

RESEARCH-BASED CENTERS AND INSTITUTES

Centers and institutes contribute significantly to the research, teaching, and service priorities of the University. By attracting external funding, research-based centers and institutes provide opportunities for faculty and students to engage current or emerging problems in a search for new solutions. For more information, please contact the Office of Research Affairs at (916) 278-6402 or visit www.csus.edu/research (<http://www.csus.edu/research>).
