Elective Upper Division Requirements (8 Units)
Select 8 units of upper-division coursework chosen in consultation with physics advisor.

Physics Colloquium Attendance
Fulfill a minimum attendance requirement.

Total Units: 80-81

Program Description

Phyiscs majors who intend to pursue a single subject teaching credential must complete a BA in Physics including courses in the Science Subject Matter Program which is described in more detail under the heading "Science Subject Matter Program" in this catalog. Upon successful completion, this program fulfills the subject matter competence requirement and qualifies students to enter the Teaching Credential Program in the School of Education. The science teaching credential with a concentration in Physics allows candidates to teach all four of the natural sciences (Biology, Chemistry, Geoscience, and Physics) at the general science level and Physics at an advanced level in high school.

The Science Subject Matter Program, with concentrations in either Biological Sciences, Chemistry, Geosciences, or Physics, leads to a BA degree in the area of concentration and meets the latest subject matter requirements of the California Commission on Teacher Credentialing (CCTC) for subject-matter preparation of teachers of Natural Science at the general science level and in the student’s area of concentration at the advanced high school level. In order to obtain a California Teaching Credential, a program of professional Education preparation is required in addition to the Subject Matter Program. A typical credential might read, for example, SCIENCE: Concentration Chemistry.

Special Features

- At Sacramento State all four science departments have strong BA and BS programs supported by an active faculty and with modern laboratory facilities. The departments are committed to the education and development of new science teachers and have a solid record of providing professional activities and support for local experienced teachers through the work of the Center for Mathematics and Science Education.
- This subject matter program is based on the concept that, if well educated science majors pursue teaching careers in K-12 education, science instruction will improve. To this end, the Sacramento State Science Subject Matter Program embodies the following features. The program:
  - emphasizes breadth in all four of the sciences. All credential candidates will complete a full year or more of laboratory-based science in each of the natural sciences.
  - requires depth of study in one of the natural sciences. All credential candidates must complete the BA requirements in one of the natural sciences. Through deeper study of science, credential candidates become learners in the discipline and develop the ability to be creative teachers and models for their students.
  - emphasizes laboratory and field work so that credential candidates learn to use the many tools of science including computers. This will enable them to develop laboratory programs and structure field experiences for students in their schools.
• emphasizes science for all students. The departments recognize the need to have programs which address the needs of underrepresented groups in science; women, African-Americans, Native Americans, and Hispanics. The SEE (Science Education Equity) Office and the Center for Mathematics and Science Education encourage and enable these student groups to be successful in science and to consider careers in education.

Notes:

• Credential candidates who complete this subject matter program in the sciences will have gained the confidence and ability to do science. They will understand that science is not just a collection of facts to be memorized but a creative and dynamic process which when applied can lead to understanding and appreciation of the natural world. This attitude will be reflected in their classrooms and will make them good models for pre-college students.

• Science majors who intend to pursue a teaching credential should see a faculty advisor or the department chair in the department of their academic major. It is recommended that they do so early as it is critical that their science coursework be carefully planned and coordinated with the professional teacher preparation program. In addition, students are encouraged to become involved with education related activities like grading, assisting in labs, tutoring K-12 students, visiting schools, and actually teaching; all experiences that can be arranged through your advisor and the Center for Mathematics and Science Education.

BS in Physics

Units required for Major: 74-76

Program Description

Physics is the most fundamental science and underlies our understanding of nearly all areas of science and technology. In a broad sense, physics is concerned with the study of energy, space, and matter, and with the interactions between matter and the laws that govern these interactions. More specifically, physicists study mechanics, heat, light, electric and magnetic fields, gravitation, relativity, atomic and nuclear physics, and condensed matter physics.

The BS degrees are recommended for students seeking a career in the technology sector or planning to pursue a graduate degree.

Note: Students graduating with a Bachelor of Science Degree in Physics will not be subject to the University’s Foreign Language Graduation Requirement. Students who change major may be subject to the University’s Foreign Language Graduation Requirement.

Notes:

1. Students are required to complete 2 units for their Senior project (PHYS 191) either over one or two semesters.
2. Students with an interest in theoretical physics are encouraged to consider a minor in Mathematics.
Certificate in Scientific Computing and Simulation

Units required for Certificate: 14 minimum

Program Description
A certificate in Scientific Computing and Simulation designed for science and engineering majors is offered by the Department of Physics and Astronomy. It focuses on the basic skills of applying the computer to the solution of scientific problems which today encompass a broad range of applications in science and technology. Such skills include modeling and formulating the problem, solving the resulting equations, and displaying the results graphically. Students that earn this certificate will acquire a good grounding in such skills and be better prepared for today’s industrial and academic careers.

Eligibility Information
To receive the certificate in Scientific Computing and Simulation, students must:

- achieve a 2.5 GPA in the certificate program courses;

Certificate in Scientific Instrument Development

Units required for Certificate: 11 minimum

Program Description

A certificate in Scientific Instrument Development is available through the Department of Physics and Astronomy. The Scientific Instrument Development certificate program focuses not only on using scientific instruments, but also will teach the fundamentals of electronics, computer interfacing, and machining. Students that earn this certificate will be prepared to design, prototype, and construct instruments for a wide range of scientific applications.

Eligibility Information

To receive the certificate in Scientific Instrument Development, students must:

- achieve a 2.5 GPA in the certificate program courses;
- must be working towards a degree at Sacramento State or have special approval from the Chair of the Department of Physics and Astronomy.

Program Requirements

<table>

Additional Upper Division Requirements (6 Units)

Select 6 units of electives in consultation with an advisor:

- PHYS 105 Mathematical Methods in Physics
- PHYS 110 Classical Mechanics
- PHYS 115 Electronics and Instrumentation
- PHYS 124 Thermodynamics and Statistical Mechanics
- PHYS 130 Acoustics
- PHYS 135 Electricity And Magnetism
- PHYS 136 Electrodynamics of Waves, Radiation, and Materials
- PHYS 142 Applied Solid State Physics
- PHYS 145 Optics
- PHYS 150 Quantum Mechanics
- PHYS 151 Advanced Modern Physics
- PHYS 162 Scientific Computing: Basic Methods
- PHYS 175 Advanced Physics Laboratory

Total Units: 21

Note: PHYS 5A, PHYS 5B may be substituted for PHYS 11A, PHYS 11C, but the 21-unit minimum must be met by additional courses in one of two ways:

- PHYS 106 plus three other upper division Physics courses OR

Prehealth Professional Program

College of Natural Sciences and Mathematics

Program Description

Students planning to attend medical (allopathic or osteopathic), dental, pharmacy, veterinary, or optometry school are not required to complete a particular undergraduate major. In fact, most health professional schools state that students can be admitted after completing 90 semester units of college credit that includes a set of specified courses. However, the reality is that most students who are accepted to health professional schools earn a bachelor’s degree prior to admission. A majority of students applying to health professional schools major in biological sciences or chemistry. However, the most important criterion in selecting a major is that you have a real interest in the field.

The pre-health professional advising patterns described in this section are not majors. For example, Sacramento State does not offer a “Pre-med major.” Instead, the advising patterns identify the set of courses that must be completed before admission to particular types of health professional schools. In the case of some majors (e.g., Biological Sciences and Chemistry) there is considerable overlap in course requirements. However, the courses can be taken along with any major (e.g., English, Philosophy, Psychology, etc.) and used to satisfy General Education or elective requirements for the baccalaureate degree.

The common set of courses recommended for all of the medical-related professional schools covered in this section are listed below. Additional requirements for specific health professional schools follow the list of recommended core curriculum. It is important to note that requirements for a particular type of professional school (e.g., Dental School) may differ from one university to another, and that requirements are subject to change. The requirements listed in this section are those identified by most universities offering the identified professional program. Therefore, the lists may include courses that are not required by a particular university and may omit a course that is required by another university. It is strongly recommended that students interested in applying to professional schools contact one of the advisors listed in this section for assistance in planning their programs. It is also strongly recommended that students visit the Web sites of the universities they plan to apply to in order to be sure that they meet all requirements.

All health professional schools require strong academic ability and a good foundation in the sciences. In addition, good problem solving ability, effective oral and written communication skills, an awareness of interpersonal dynamics, an appreciation for cultural diversity, and an understanding of health care issues are important. Therefore, in addition to science courses, pre-health professional students should take general education courses that will enrich their non-science preparation in these areas.

It is also crucial that students have volunteer experience related to their professional goals. Such experience will provide more insight into how well suited you are to the work setting you are considering. Academic credit may be received for volunteer work by seeing an advisor and registering for BIO 195.

For more information about the Pre-Health Professional Program, please click here (http://www.csus.edu/prehealth).

Total Units 46

1 Some Dental Schools and Optometry Schools require only one semester of Organic Chemistry with lab. This can be satisfied by taking CHEM 20 (Organic Chemistry Lecture Brief Course) (3 units) and CHEM 20L (Introductory Organic Chemistry Laboratory) (1 unit) instead of CHEM 24, CHEM 25 and CHEM 124.

Recommended Field Specific Curricula

Allopathic Medical Schools

When most people use the term "Medical School," they are usually referring to Allopathic Medical Schools that grant the M.D. (Doctor of Medicine) degree. There is, however, another type of Medical School, called Osteopathic Medical School (described below) that grants the D.O. (Doctor of Osteopathic Medicine) degree. Both M.D.'s and D.O.’s are eligible for licensure to practice medicine as physicians and surgeons in the State of California.

Applicants do not need a 4.0 GPA to get into an allopathic medical school. However, GPA is a reflection of your ability to handle university work and is an important part of your application. A successful applicant must be able to offer more than a good GPA. The attributes of motivation, social concern, communication skills, and maturity are given great weight in the selection process.

All students applying to allopathic medical schools must complete the recommended course requirements listed above. In addition to the
common courses, most allopathic medical schools require one semester to one year of college mathematics. In general, the mathematics requirement can be satisfied by taking a full year of calculus. However, some medical schools specify that one of the courses must be statistics. Therefore, if you want to be sure that you have completed the math requirement for the greatest number of medical schools, you should take the following courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 26A</td>
<td>Calculus I for the Social and Life Sciences</td>
<td>3-4</td>
</tr>
<tr>
<td>or MATH 30</td>
<td>Calculus I</td>
<td></td>
</tr>
<tr>
<td>MATH 26B</td>
<td>Calculus II for the Social and Life Sciences</td>
<td>3-4</td>
</tr>
<tr>
<td>or MATH 31</td>
<td>Calculus II</td>
<td></td>
</tr>
<tr>
<td>STAT 1</td>
<td>Introduction to Statistics</td>
<td>3</td>
</tr>
</tbody>
</table>

Total Units: 9-11

It should be noted that there are variations in medical school admission requirements. For example, some schools also require or recommend one or more of the following courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>

</tr>
</tbody>
</table>

And/or one year of a foreign language

For information on requirements for specific schools, contact your pre-health advisor or visit the Web site of the school you are interested in attending.

Applicants must take the Medical College Admissions Test (MCAT). The test should be taken after completing the recommended core curriculum. You should allow at least 10 months between taking the exam and the date of planned matriculation. The schedule for the MCAT is currently under review. It is expected that beginning January 2007, the MCAT will become computer based and will be offered two to four times per year. For more information about dates, students should go to: www.aamc.org (http://www.aamc.org). To ensure timely submission of all application materials (including letters of recommendation), students are strongly advised to take the exam no later than April of the year preceding planned matriculation. Your MCAT scores, especially your verbal reasoning score, are an important part of your application.

Most Allopathic Medical Schools subscribe to an application service called The Association of Medical Colleges Application Service (AMCAS). What this means is that you will have to complete a single (but very lengthy and complicated) application and submit a single set of transcripts and MCAT scores to AMCAS. In turn, AMCAS, for a fee, will distribute the materials to the medical schools you identify on the application. The AMCAS application is usually available in June of the year preceding the year you wish to matriculate. For example, the AMCAS application for admission in fall 2007 is available in June 2006. Participating medical schools set their own deadlines for receipt of application materials from AMCAS. The earliest deadline is usually November 1 of the year preceding planned admission. It is strongly recommended that you complete your AMCAS application soon after it becomes available, even if you plan to take the August MCAT.

The medical schools will review your AMCAS application and MCAT scores. After this review, the school will either reject your application or invite you to submit a school specific secondary application and letters of recommendation. Following a review of these materials, the school will either reject your application or invite you for an interview.

**Osteopathic Medical School**

Doctors of Osteopathic Medicine (D.O.’s) are “complete physicians.” This means that they are fully trained and licensed to diagnose illness, prescribe medication, and perform surgery. D.O.’s and allopathic physicians (M.D.’s) are the only two types of complete physicians in the United States. In California, as in most other states, the law accords holders of the D.O. and M.D. equal professional status and privileges as licensed physicians and surgeons. D.O.’s may practice all branches of medicine, including specialties like Pediatrics, Obstetrics and Gynecology, and Emergency Medicine.

To become a D.O., you must attend a School/College of Osteopathic Medicine. At the time of this catalog, 19 schools/colleges offered programs leading to the D.O. degree. The main difference between the training of osteopathic and allopathic physicians is that osteopathic medical students must take additional training in osteopathic manipulative medicine. To learn more about osteopathic medicine, students should visit the Web site of The American Association of Colleges of Osteopathic Medicine (AACOM). To be admitted to a School/College of Osteopathic Medicine, a student must complete the recommended core curriculum listed above. As is the case for most health professional schools, students may be admitted without a baccalaureate degree. However, 97% of students enrolled in Osteopathic Medical Schools hold at least a baccalaureate degree. Most osteopathic medical schools do not specify a college mathematics requirement. However, it is recommended that students complete the same math courses that are required for admission to an allopathic medical school. In addition, like allopathic medical schools, some osteopathic medical schools also recommend or require upper division courses in biology and biochemistry.

Students seeking admission to osteopathic medical school must also take the Medical College Admissions Test (MCAT). Most osteopathic medical schools subscribe to an application service called The American Association of Colleges of Osteopathic Medicine Application Service (AACOMAS). Therefore, applicants file one application, a single set of transcripts, and one set of MCAT scores to AACOMAS, and the service distributes these materials to each of the colleges designated on the application.

Like allopathic medical schools, osteopathic medical schools require letters of recommendation at some stage in the process. However, it is important to note that one of the letters must be from a practicing doctor of osteopathic medicine. Therefore, students thinking about applying to osteopathic medical school should try to make contact with a D.O. early in their undergraduate studies.

**Dental Schools**

To become a dentist, students must complete a program leading to the D.D.S. (Doctor of Dental Surgery) or D.M.D. (Doctor of Dental Medicine) degree. Most dental school programs are four-year programs. However, a few dental schools (e.g., University of the Pacific) offer a three-year program. To be admitted to dental school, students must complete the
recommended core curriculum listed above. In addition, many dental schools recommend or require that students complete one or more of the following courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIO 22</td>
<td>Introductory Human Anatomy (anatomy)</td>
<td>4</td>
</tr>
<tr>
<td>BIO 131</td>
<td>Systemic Physiology (physiology)</td>
<td>4</td>
</tr>
<tr>
<td>BIO 184</td>
<td>General Genetics (genetics)</td>
<td>4</td>
</tr>
<tr>
<td>BIO 127</td>
<td>Developmental Biology (embryology)</td>
<td>4</td>
</tr>
<tr>
<td>CHEM 161</td>
<td>General Biochemistry (biochemistry)</td>
<td>3</td>
</tr>
<tr>
<td>STAT 1</td>
<td>Introduction to Statistics (statistics)</td>
<td>3</td>
</tr>
</tbody>
</table>

Dental school applicants must take the Dental Aptitude Test (DAT) which is given year-round by appointment on computers. The test should be taken at least 10 months prior to matriculation.

Most dental schools subscribe to an application service called the Associated American Dental Schools Application Service (AADSAS). Therefore, students applying to participating schools must complete a single initial application and submit a single set of transcripts and DAT scores to AADSAS. However, after reviewing a students AADSAS application and DAT scores, most participating dental schools will require that students submit secondary applications and letters of recommendation.

**Pharmacy Schools**

To become a pharmacist, students must complete a program leading to the Doctor of Pharmacy (Pharm.D.) degree. Some, but not all, schools require the Pharmacy College Admission Test (PCAT). Prerequisite coursework also varies by school. Therefore, you should check with your pre-health advisor and the school's Web site for information about standardized test and course requirements. Completion of the recommended core curriculum plus the following courses will satisfy course requirements for most pharmacy schools:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIO 22</td>
<td>Introductory Human Anatomy</td>
<td>4</td>
</tr>
<tr>
<td>BIO 131</td>
<td>Systemic Physiology</td>
<td>4</td>
</tr>
<tr>
<td>BIO 139</td>
<td>General Microbiology</td>
<td>4</td>
</tr>
<tr>
<td>COMS 4</td>
<td>Introduction to Public Speaking</td>
<td>3</td>
</tr>
<tr>
<td>ECON 1A</td>
<td>Introduction to Macroeconomic Analysis</td>
<td>3</td>
</tr>
<tr>
<td>MATH 26A</td>
<td>Calculus I for the Social and Life Sciences</td>
<td>3 - 4</td>
</tr>
<tr>
<td>or MATH 30</td>
<td>Calculus I</td>
<td>4</td>
</tr>
<tr>
<td>MATH 26B</td>
<td>Calculus II for the Social and Life Sciences</td>
<td>3 - 4</td>
</tr>
<tr>
<td>or MATH 31</td>
<td>Calculus II</td>
<td>4</td>
</tr>
</tbody>
</table>

**Optometry Schools**

To become an optometrist, students must complete a program leading to the Doctor of Optometry (O.D.) degree. Applicants must take the Optometry Admissions Test (OAT). The OAT is administered twice a year, once in October and once in February. The test should be taken no later than the fall of the year preceding the intended date of matriculation (e.g., in Fall 2009 for admission in Fall 2010). Prerequisite course requirements vary by school. However, completion of the recommended core curriculum plus the following courses will satisfy course requirements for most optometry schools:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIO 22</td>
<td>Introductory Human Anatomy</td>
<td>4</td>
</tr>
<tr>
<td>BIO 131</td>
<td>Systemic Physiology</td>
<td>4</td>
</tr>
<tr>
<td>BIO 139</td>
<td>General Microbiology</td>
<td>4</td>
</tr>
<tr>
<td>CHEM 161</td>
<td>General Biochemistry</td>

</tbody>
</table>

**Science Subject Matter**

**College of Natural Sciences and Mathematics**

**Program Description**

A grade of at least a "C" and an overall GPA of 2.7 in all courses in the Science Subject Matter Program are required for admission to the Teacher Education Program. It is recommended that all coursework for the Subject Matter Program be completed before starting the Teacher Education Program. At least 15 units of the coursework or equivalent work experience must be current, i.e., completed within the past six years.
It is also possible to obtain admission to the Professional Education Program by passing a series of subject-matter examinations specified by the CTC in lieu of this Science Subject Matter Program. For information about this option contact the Teacher Preparation Program Office, Eureka Hall 216, (916) 278-6403.

**Note:** Due to policy changes from the California Commission on Teacher Credentialing and the federal No Child Left Behind mandate, the Science Subject Matter program was under review at the time of this catalog printing and is subject to revision. As a result it is important to consult a credential advisor for current details.

**Special Features**

- At Sacramento State all four science departments have strong BA and BS programs supported by an active faculty and with modern laboratory facilities. The departments are committed to the education and development of new science teachers and have a solid record of providing professional activities and support for local experienced teachers through the work of the Center for Mathematics and Science Education.
- This subject matter program is based on the concept that, if well-educated science majors pursue teaching careers in K-12 education, science instruction will improve. To this end, the Sacramento State Science Subject Matter Program embodies the following features. The program:
  - emphasizes breadth in all four of the sciences. All credential candidates will complete a full year or more of laboratory-based science in each of the natural sciences.
  - requires depth of study in one of the natural sciences. All credential candidates must complete the BA requirements in one of the natural sciences. Through deeper study of science, credential candidates become learners in the discipline and develop the ability to be creative teachers and models for their students.
  - emphasizes laboratory and field work so that credential candidates learn to use the many tools of science including computers. This will enable them to develop laboratory programs and structure field experiences for students in their schools.
  - emphasizes science for all students. The departments recognize the need to have programs which address the needs of underrepresented groups in science; women, African-Americans, Native Americans, and Hispanics. The SEE (Science Education Equity) Office and the Center for Mathematics and Science Education encourage and enable these student groups to be successful in science and to consider careers in education.

**Notes:**

- Credential candidates who complete this subject matter program in the sciences will have gained the confidence and ability to do science. They will understand that science is not just a collection of facts to be memorized but a creative and dynamic process which when applied can lead to understanding and appreciation of the natural world. This attitude will be reflected in their classrooms and will make them good models for pre-college students.
- Science majors who intend to pursue a teaching credential should see a faculty advisor or the department chair in the department of their academic major. It is recommended that they do so as early as it is critical that their science coursework be carefully planned and coordinated with the professional teacher preparation program. In addition, students are encouraged to become involved with education related activities like grading, assisting in labs, tutoring K-12 students, visiting schools, and actually teaching; all experiences that can be

arranged through your advisor and the Center for Mathematics and Science Education.

**Career Possibilities**

Middle School Science Teacher · High School Teacher of General Science and Biology, Chemistry, Geoscience, or Physics depending on choice of major

**College of Social Sciences and Interdisciplinary Studies**

**College Overview**

The College of Social Sciences and Interdisciplinary Studies (SSIS) provides a curriculum that examines human society in all aspects. The College focuses on such topics as relationships among individuals and groups, the functioning of the political system and economy, the nature and influence of culture, relationships among nations, and the relation of human society to the natural environment.

The College offers Bachelor’s degree programs in Anthropology, Asian Studies, Economics, Environmental Studies, Ethnic Studies, Family and Consumer Sciences, Gerontology, Government, Liberal Studies, Psychology, Social Science, Sociology, and Women’s Studies. Additionally, SSIS offers minors in most of the above disciplines as well as African Studies, Asian American Studies, Chicano Latino Studies, Middle East and Islamic Studies, Native American Studies, Peace and Conflict Resolution, Military Studies, California Studies, and Labor Studies. The College also has several Master’s degree programs including those in Anthropology, Economics, Government, Psychology, Public Policy and Administration, Sociology, Urban Land Development and a Special Masters in Gerontology and Public Policy and Administration. The University’s Educational Doctorate Program reflects a partnership between a SSIS department (Public Policy and Administration) and the College of Education. Finally, units within the College offer various academic certificates (e.g., Pan African Studies, Collaborative Governance).

The programs in the College use and teach skills in critical thinking and problem solving; finding and using information; oral and written communication; policy analysis; adaptation to a variety of situations; and sensitivity to and understanding of other peoples and their customs, problems, values, and aspirations. The College is further dedicated to developing a sense of responsibility to participate in and contribute to the human community and a healthy natural environment.

The knowledge and skills developed by the College’s programs are applicable to a wide variety of careers. Students should consult with individual departments for further career and graduate and professional school opportunities.

For more information about the College of Social Sciences and Interdisciplinary Studies, please click here ([http://www.csus.edu/ssis](http://www.csus.edu/ssis)).
Program Descriptions

Anthropology
Located at the nexus of Natural Sciences, Social Sciences, and Humanities, Anthropology integrates diverse forms of knowledge into practical indexes for engagement with our everyday concerns. The program provides students “hands-on” experience to complement their in-class learning. Undergraduate and graduate students can participate in various projects including archaeological excavations, community engagement programs, and intern at various governmental and non-governmental agencies.

Asian Studies
At a time when Pacific Rim developments are highly important to U.S. interests, the Asian Studies undergraduate major offers students a coherent introduction to the cultures of selected Asian societies. The major emphasizes are Japanese, Chinese, and South and Southeast Asian Studies.

Economics
The Economics major is designed to provide students with a liberal education with special emphasis on the economic aspects of society and familiarization with techniques for the analysis of contemporary economic problems. A graduate degree is also offered.

Environmental Studies
The B.A. or B.S. in Environmental Studies degree can help students gain an interdisciplinary understanding of issues like pollution, wildlife and wilderness preservation, land use, biodiversity loss, resource depletion, energy conservation, and a generally healthful relationship between nature and society.

Ethnic Studies
Ethnic Studies offers an undergraduate degree through an interdisciplinary approach to the study of the cultures, languages, historical, and contemporary issues relating to African Americans, Asian Americans, Chicana/os-Latina/os, and Native Americans. The program directs students to critically examine the contributions made by these groups to world civilization and to American society.

Family and Consumer Sciences
The Family and Consumer Sciences Department offers a Bachelor of Science degree with a choice of four concentrations: Family Studies, Fashion Merchandising and Design, Nutrition and Food/Dietetic Emphasis, and Family and Consumer Sciences Education (Pre-credential Single Subject Program). Our majors study relationships between people and their diverse environments, focusing on the integration of physical, biological, cultural, economic and social influences on human behavior, lifespan development, and health.

Gerontology
Gerontology is an applied interdisciplinary program offering courses from a variety of departments and colleges. The Program prepares students to address challenges and positive life transitions related to individual and family health and illness in an aging society. Students apply concepts and theories in several service learning courses and two academically structured internships which aids in providing a solid knowledge and experiential base for careers in a wide variety of settings serving elders.

Government
Ideally located in the state capital, the Department offers students unique opportunities to integrate their studies of politics and theory through an extensive range of internships in state and local government. A graduate degree is also available.

Liberal Studies
Students enjoy a wide-ranging selection of courses in different disciplines as they prepare for careers in K-12 education or in business and government.

Psychology
The undergraduate and graduate programs in Psychology allow students to develop a scientific understanding of the biological, cognitive, cultural, developmental, and social aspects of human behavior.

Public Policy Administration
The Department of Public Policy and Administration focuses on professional training for graduate students. It offers a Master of Public Policy and Administration and a Master of Science in Urban Land Development. As well, the Department collaborates with Gerontology to provide a Special Masters in Gerontology and Public Policy and Administration. Additionally, the Department offers a Certificate in Collaborative Governance for matriculated graduate students, a Certificate in Judicial Administration through the College of Continuing Education, and participates in the Doctorate in Educational Leadership Program.

Social Science
The Social Science Program provides a major and concurrent subject matter preparation for the Single Subject Teaching Credential in Social Science.

Sociology
The undergraduate and graduate sociology programs allow students to understand and explain the way people are by examining the social, historical, cultural and organizational contexts in which they live. Neither individuals nor society can be understood without such a perspective.

Urban Land Development
The Master of Urban Land Development is a professional degree opportunity for graduate students interested in a public and/or private sector career in land development in an urban setting. The program provides both the business finance/realt estate knowledge and public policy skills necessary to be successful in this endeavor.

Women's Studies
One of the earliest programs in the country, Women's Studies at Sacramento State is a dynamic interdisciplinary field which draws undergraduate majors and minors from diverse backgrounds, offering courses on a wide range of topics drawn from the Social Sciences and Humanities. Juxtaposing knowledge of feminist theory with political projects, internships and personal experiences, the department facilitates political activism through active community involvement.

Departments/Programs
- African Studies: Certificate; Minor
- Anthropology: BA; MA; Minor
- Asian Studies: BA; Minor
Program Description
The Minor and Certificate in African Studies are identical programs. The Minor is recommended for students undertaking completion of a Bachelor's degree. The Certificate is recommended for students who have already completed a Bachelor's degree.

The program is intended to improve students' understanding of modern Africa. As a significant part of the world community, Africa merits focused and sustained study. This program provides a cohesive, directed effort to develop students' knowledge and appreciation for Africa's peoples, geography, institutions, arts, customs, languages, traditions, resources, politics, and social structures. The program is designed and structured in a way that will be useful to the student, both professionally and academically. The Minor is of particular relevance for students interested in acquiring an integrated perception and understanding of Africa. The program provides different options: a specific emphasis in international relations; interests in a particular aspect of African life such as art, history, or society; or general intellectual curiosity.

The CSU International Programs provide opportunities for students at Sacramento State to study and live in Africa. This constitutes a valuable adjunct to African Studies on the campus. Students are strongly urged to take at least one year of a language used in Africa other than English. Course selection for each student is worked out with an advisor from the African Studies faculty in conjunction with the Director of Pan African Studies.

Anthropology

College of Social Sciences and Interdisciplinary Studies

Program Description

Anthropology is the study of humans, past and present. Anthropologists take a broad approach to understanding the varieties of human experience, which uniquely places us at the juxtaposition of the social sciences, natural sciences and the humanities. Anthropology is traditionally organized into four subfields that offer distinctive skills.

Cultural and Social Anthropology deals with the social lives of people around the world, including our own society: economic systems, legal practices, kinship, religions, medical practices, folklore, arts and political systems, as well as the interrelationship of these systems in environmental adaptation and social change. Anthropological Linguistics deals with varied aspects of human language and the characteristics of nonhuman communication systems, to achieve an understanding of past and present human language systems and their significance in social life.

Biological Anthropology is a biological science that deals with adaptations, variability and evolution of humans, and our living and fossil relatives. It is also a social science because biological anthropologists study human biology within the context of culture and behavior. Simply put, they study humans from a biocultural perspective across space and time. Physical Anthropology describes and compares world human biology. Focuses on humans and their primate order, and seeks to document and understand the interplay of culture and biology in the course of human evolution and adaptation.

Archaeology focuses on the material remains of human societies from the remote and recent past with emphasis on reconstructing and understanding past modes of human cultural adaptation and change.

While maintaining exposure to these four subfields, the Anthropology program allows students to sharpen their skills in specific domains of
Anthropological thought and practice. Students may choose from three concentrations that share a common foundation.

- **Archaeology and Biological Anthropology (ABA):** emphasizes a scientific approach to anthropology. Studying diverse topics including; evolutionary processes, human variation, ecology, skeletal analysis and zoo-archaeology, it prepares students for careers in the anthropological sciences in both the public and private sectors, such as cultural resources management, forensic science; collections management, and advanced graduate studies in anthropological sciences or related disciplines.

- **Culture, Language and Society (CLS):** introduces students to knowledge and skills necessary for a nuanced understanding and engagement with the world we live in. It prepares students for graduate studies in socio-cultural and linguistic anthropology, professional careers in government, business, law, healthcare and any contexts that require attention to cultural, social and linguistic dynamics.

- **General Anthropology (GA):** constitutes a solid liberal arts foundation that prepares students for careers and graduate studies in fields that call for a broad exposure to anthropological knowledge. Students, under the guidance of a faculty advisor, can also choose to customize a program of study to pursue individualized academic or professional interests.

### Degree Programs

**BA in Anthropology (General Anthropology) (p. 790)**

**BA in Anthropology (Archaeology and Biological Anthropology) (p. 788)**

**BA in Anthropology (Culture, Language and Society) (p. 789)**

**Minor in Anthropology (p. 792)**

**MA in Anthropology (p. 791)**

### Special Features

- Diverse faculty who are widely published and enjoy national repute in their specializations.

- Regular activities include Faculty Colloquia, the Sacramento Anthropological Society sponsored brown bag discussions and annual symposium.

- Extensive ethnographic and archaeological collections, housed in the Museum of Anthropology and the Archaeological Curation Facility, afford students opportunities to learn all phases of museum and collections management work. The Department exhibit hall displays an excellent collection of museum artifacts.

- The Department maintains a computer lab, as well as several computer stations in the Archaeology lab.

- Course related fieldwork in California and the Great Basin and archaeological laboratory opportunities are offered through internships at the Archaeological Research Center (ARC) and the Archaeological Curation Facility (ACF). Paid fieldwork and laboratory opportunities may also be available for qualified students through the ARC and ACF.

- Professional journals and the updated Human Relations Area File are housed in the University Library.

### Career Possibilities

Anthropology equips students with the necessary knowledge to engage with the political, economic, cultural, and social complexities of the world. In addition to providing students analytical and critical thinking skills, anthropology exposes students to the intersection of culture, biology, and history on peoples’ lived experiences. Majoring in Anthropology provides students a solid foundation for advanced studies in diverse fields such as anthropology, business, cultural resources management, law, journalism, medicine, communication, social work, urban studies, public policy, informatics, and any other profession that calls for the sustained engagement with cultural diversity, critical thinking, analytical abilities and people skills. Given the training they receive, anthropologists are increasingly sought by the business world, government agencies and non-government organizations. Traditionally Anthropology majors have pursued careers in primary and secondary teaching; consumer market research; human resource development; local, state, and federal governmental agencies; non-governmental organizations (NGOs); archaeological field or laboratory technicians; forensic analysis, community development organizations; trade union organizations and allied fields. The globalized world economy has expanded this horizon to include career opportunities in communication, health care, entertainment, information technology, consumer product development, etc.

ZEANAH, DAVID W.
ANTH 1. Introduction to Biological Anthropology. 3 Units
General Education Area/Graduation Requirement: Life Forms (B2)
Term Typically Offered: Fall, Spring, Summer

Covers the concepts, methods of inquiry, and theory of biological evolution and their application to the human species. There is a specific focus on molecular, Mendelian and population genetics, mechanisms of evolution, primatology, paleoanthropology, biocultural adaptations, and human variation. The scientific method serves as the foundation to the course.

ANTH 1A. Biological Anthropology Laboratory. 1 Unit
Prerequisite(s): ANTH 1 (may be taken concurrently)
General Education Area/Graduation Requirement: Laboratory (B3), Life Forms (B2)
Term Typically Offered: Fall, Spring

Designed to familiarize the student with the materials and techniques of physical anthropology. Includes human and other primate osteology, anthropometric techniques, and allied methods in the gathering and analysis of physical anthropological data. Through working with the departmental collection of fossil casts and a wide variety of charts and models, the student also becomes familiar with the stages of human and primate evolution.

ANTH 2. Introduction to Cultural Anthropology. 3 Units
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall, Spring

Introduction to anthropological approaches in the study of people and cultures. Using ethnographic case studies, the course contributes to a critical understanding of continuity and diversity in peoples’ lifestyles, social institutions, and cultural practices in different societies around the world. The course also examines the impact of political, economic, and social changes, such as colonization, decolonization, and globalization on people and cultures over the last century.

ANTH 2H. Introduction to Cultural Anthropology - Honors. 3 Units
Term Typically Offered: Fall only

Introduction to anthropological approaches in the study of people and cultures. Using ethnographic case studies, contributes to a critical understanding of the continuity and diversity in peoples’ lifestyles, social institutions, and cultural practices in different societies around the world. Examines the impact of political, economic, and social changes, such as colonization, decolonization, globalization, etc., on people and cultures over the last century. Intended for students enrolled in the University’s GE Honors Program.

Note: Students must be admitted to the GE Honors Program.

ANTH 3. Introduction to Archaeology. 3 Units
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall, Spring

Introduces students to the methods and theories used by archaeologists to find, recover, and interpret such remains in an effort to reconstruct and understand the lives of earlier peoples. The class uses archaeological case studies, films, and hands-on examples of tools and other artifacts produced by simple stone age hunters and more complex civilizations that lived in California and other parts of the world.

ANTH 4. Language, Culture, and Critical Thinking. 3 Units
General Education Area/Graduation Requirement: Critical Thinking (A3)
Term Typically Offered: Fall, Spring

Introduction to the abstract and formal structures of language and cultural dimensions of human communication via major linguistic anthropological concepts, theoretical assumptions, and methodologies. Addresses the logical, formal relationship between underlying rules of natural languages while critically analyzing how speakers from different cultures use language to convey complex social and cultural information. Course illuminates how language is used to create and reinforce relationships of power (race, class, gender); develops ability to recognize linguistic fallacies; and instructs in basic critical thinking skills.

ANTH 13. Magic, Witchcraft and Religion. 3 Units
General Education Area/Graduation Requirement: Humanities (Area C2)
Term Typically Offered: Fall, Spring

Cross-cultural study of the forms and functions of supernatural beliefs and associated rituals in various societies of Africa, Asia, aboriginal Australia, Oceania, South America, native North America and elsewhere. Emphasis is on understanding beliefs and rituals within given social contexts, and using broad comparisons to derive insight into the general functions of beliefs and rituals in human life.

ANTH 15. World Prehistory and the Evolution of Modern Humanity. 3 Units
General Education Area/Graduation Requirement: Further Studies in Area B (B5)
Term Typically Offered: Fall, Spring

Introduction to the broad sweep of world prehistory, from the emergence of human culture through the development of domestication of plants and animals, and to the origins of complex societies. Included are major cultural developments on every continent, emphasizing similarities and differences in the nature and timing of key technological, cultural, and sociological changes. Methodologies for learning about the past, major archaeological discoveries, important personalities, and contributions to the modern world are discussed in the context of understanding the strengths and limitations of a scientific approach to human prehistory.

ANTH 16. Comparative Early Civilizations. 3 Units
General Education Area/Graduation Requirement: Humanities (Area C2)
Term Typically Offered: Fall, Spring

Examines the emergence and development of early civilizations. Studies state formation, urbanization, market system development, and other processes relevant to the evolution of early civilizations from the standpoints of cross-cultural comparison and modern anthropological theory. The goal is to identify cross-cultural regularities as well as critical differences that can explain the various evolutionary trajectories of these societies. The civilizations that will be contrasted include societies from Mesopotamia, Egypt, the Indus Valley, China, Mesoamerica, Andean South America, and other regions.
ANTH 21. Freshman Seminar: Becoming an Educated Person. 3 Units
General Education Area/Graduation Requirement: Understanding Personal Development (E)
Term Typically Offered: Fall, Spring
Introduction to the nature and possible meanings of higher education, and the functions and resources of the University. Designed to help students develop and exercise fundamental academic success strategies and to improve their basic learning skills. Provides students with the opportunity to interact with fellow classmates and the seminar leader to build a community of academic support and personal support.

ANTH 101. Cultural Diversity. 3 Units
General Education Area/Graduation Requirement: GE AREA D, Race & Ethnicity Graduation Requirement (RE), United States History
Term Typically Offered: Fall, Spring, Summer
Focuses on analyzing the historically conditioned political, economic and social factors that have contributed to cultural diversity in the U.S.; a critical anthropological approach is developed to explore the intersection of race, class, gender, ethnicity and sexuality; the political economy of institutions and ideas, such as racism, classism, sexual stereotyping, family, religion, state, color-blindness, multiculturalism, etc.; and, discourses of cultural diversity in the U.S.

ANTH 102. The Nature of Culture. 3 Units
Prerequisite(s): GWAR certification before Fall 09; or WPJ score of 80+; or 3-unit placement in ENGL 109M or ENGL 109W; or 4-unit placement in ENGL 109M or ENGL 109W and co-enrollment in ENGL 109X; or WPJ score 70 or 71 and co-enrollment in ENGL 109X.
General Education Area/Graduation Requirement: Writing Intensive Graduation Requirement (WI), GE AREA D
Term Typically Offered: Fall, Spring
An upper division general introduction to cultural anthropology. Divided into two major parts: a survey of theories, methods and concepts of cultural anthropology, and an introduction to applied cultural anthropology.

ANTH 103. Psychological Anthropology. 3 Units
Prerequisite(s): ANTH 2 or ANTH 102.
Term Typically Offered: Fall, Spring
Cross-cultural comparative approach to human cognition, child-training practices, personality development, deviant behavior, cultural psychiatry, and data gathering techniques.

ANTH 104. The History of Anthropology. 3 Units
Prerequisite(s): ANTH 146 or instructor permission.
Term Typically Offered: Fall, Spring
Anthropological theory in historical perspective.

ANTH 105. Anthropology of War. 3 Units
Prerequisite(s): ANTH 146 or instructor permission.
Term Typically Offered: Fall, Spring
Examination of the nature of war, primarily as it occurs in pre-industrial societies, and a survey of the kinds of explanations of this phenomenon current in anthropology. Emphasis is on understanding the complexity, variability, and cultural imbeddedness of war as it occurs around the world.

ANTH 106. Culture and Personality of the Chicano Child. 3 Units
Term Typically Offered: Fall, Spring
Study of child growth and development patterns universal to all children with focus on the pressures and effects of the Mexican and Anglo cultures on the development of the Chicano child.

ANTH 107. Anthropology of Hunters and Gatherers. 3 Units
Prerequisite(s): ANTH 3
Term Typically Offered: Fall, Spring
Survey of the rapidly disappearing life way which anthropologists call hunting and gathering, with economies based on the use of wild plant and animal resources. Using ethnographic examples from the Arctic, southern Africa, rainforests in South America, deserts of Australia, and western North America, explores variation in hunter-gatherer societies with respect to differences in environment, technology, social organization, and the historical effects of interaction with more complex cultural groups. Models that attempt to explain long-term changes in this life way are also explored.

ANTH 108. Economic Anthropology. 3 Units
Prerequisite(s): ANTH 146 or instructor permission.
Term Typically Offered: Fall, Spring
What happens to society when exchange fails? The root of economy is the household, whose members make a living in relation to other people, and in culturally shaped ways. The "world economic system" of the late 20th Century global village consists of many ill-fitting parts with different histories and goals. These functioning and changing households, markets, technologies, and concepts of work, property, and the good life are studied from a cross-cultural perspective. Also focuses on the impact of industrial societies on tribal and peasant economies.

ANTH 109. Ecological and Evolutionary Approaches to Anthropology. 3 Units
Prerequisite(s): ANTH 3
Term Typically Offered: Fall, Spring
Survey of anthropological research regarding the relationships between human behavior, ecology, and evolution. Reviews historic development of research in this field, and contrasts approaches based in ecological and evolutionary theory. Reviews and evaluates of case studies. Topics include hunter-gatherer and hominid economy and social organization, foraging theory, work effort, population growth and regulation, origins of agriculture, warfare, ritual and resource conservation, and origins of complex society.

ANTH 110. Archaeological Method and Theory. 3 Units
Prerequisite(s): ANTH 3
Term Typically Offered: Fall, Spring
Traces the development of archaeology from its inception in the eighteenth century up to the present time. Readings, lectures, and class assignments follow the evolution of archaeological method and theory in relation to changing ideas about the role of culture, environment, and technology within the broader discipline of anthropology.
Pre-contact California encompassed some of the most extensive environmental and cultural diversity ever to exist on the planet, containing widely divergent biota, many distinct languages and cultures, and among the densest hunter-gatherer populations ever recorded. At least 11,000-12,000 years of human occupation have been marked by multiple migrations and major shifts in technological and social organization. Explores long-term trends in cultural development across the state, and examines models used to explain why semi-permanent settlements, intensive subsistence strategies, and complex social institutions arose in some times/places and not others.

**ANTH 112. Great Basin Archaeology.** 3 Units
**Prerequisite(s):** ANTH 3
**Term Typically Offered:** Fall, Spring

Explores the cultural and natural history of the Great Basin from the last glacial maximum into the historic era. Though largely arid, this region in fact manifests considerable environmental variability and has seen significant climatic alterations since the Pleistocene. Human occupation of the Great Basin witnessed major changes in demography, technology, subsistence practices, and sociopolitical organization over the last 10-12,000 years. The course looks to understand cultural and environmental variability across the region through examination of the long-term material record and consideration of anthropological and biological models.

**ANTH 113. Prehistory of the Southwest.** 3 Units
**Prerequisite(s):** ANTH 3
**Term Typically Offered:** Fall, Spring

Survey of the prehistory of the Arizona, New Mexico, Western Colorado, Utah, and adjacent regions of Nevada, Texas and northwestern Mexico. Major prehistoric cultures of the Southwest (Hohokam, Anasazi, Mogollon, Fremont) are covered in detail. Focus on major transitions in subsistence and social organization emphasizing current issues of archaeological research. Cultural influences from outside areas are also considered.

**ANTH 114. North American Prehistory.** 3 Units
**Prerequisite(s):** ANTH 3
**Term Typically Offered:** Fall, Spring

Familiarizes students with the archaeological record of North America, and provides an analytical framework through which it may be understood in anthropologically meaningful terms. This will be accomplished by considering some of the explanations that have been proposed to account for the prehistory of the continent, and by examining the archaeological remains and cultural sequences found in various areas, including the North and Southeast, Great Plains, Pacific Northwest, and arctic/subarctic regions.

**ANTH 115. Origins of Agriculture.** 3 Units
**Prerequisite(s):** ANTH 3
**Term Typically Offered:** Fall, Spring

Surveys and evaluates worldwide anthropological perspectives of the origins of agriculture and the rise of complex society. Traces the development of major archaeological theories for the inception and spread of agriculture and civilization, acquainting students with groundbreaking archaeological research associated with each theoretical perspective. Current archaeological research is reviewed in-depth, providing a context for critique of the theories. Examples from North America, Latin America, the Middle East, India and China are compared and contrasted using movies, readings, and lectures.

**ANTH 116. Old World Prehistory: Paleolithic Archaeology.** 3 Units
**Term Typically Offered:** Fall, Spring

Old World Paleolithic archaeology from the emergence of hominids until the development of agriculture and civilization. Cultural developments in Africa, Asia, Europe and Australia are examined with the aim of highlighting similarities and differences in the process of technological, demographic, and sociopolitical change within each region. Explanatory models are offered to account for cultural evolution in various parts of the Old World are explored and assessed.

**ANTH 119. Analysis of Faunal Remains.** 4 Units
**Prerequisite(s):** ANTH 3 and Anthropology (Archaeological and Biological Anthropology) concentration.

Seminar on techniques and methods employed in analysis of faunal remains from archaeological sites, coupled with a laboratory providing hands-on identification of mammalian remains from these settings. Large focus on quantitative methods used in zooarchaeology to infer behavioral patterns of the human past and their paleoenvironments.

**ANTH 120. Introductory Statistics for Anthropologists.** 3 Units
**Prerequisite(s):** Anthropology (Archaeological and Biological Anthropology) concentration.
**Term Typically Offered:** Fall, Spring

Covers the conceptual framework involved in quantitative methods of data analysis commonly employed in anthropology. The emphasis is primarily on understanding concepts and secondarily on learning techniques of data analysis. Topics include data description and distributions, estimation procedures, hypothesis testing, and model fitting. Illustration of concepts in lecture are made with data from archaeology, physical anthropology, and social/cultural anthropology.

**ANTH 121. Archaeology of Mexico.** 3 Units
**General Education Area/Graduation Requirement:** Humanities (Area C2)
**Term Typically Offered:** Fall, Spring

Provides an upper division introduction to the archaeology of Mesoamerica for students not majoring in anthropology. Discusses the evolution of the ancient civilizations of Mesoamerica, including Mexico, Guatemala, Belize, Honduras, and El Salvador. Examines the development of societies from the earliest inhabitants to the growth of empires. Includes coverage of the Olmecs, Monte Alban, Teotihuacan, the Classic Maya, the Toltecs, and the Aztecs.

**Note:** Cannot be used to meet the requirements of the Anthropology major; interested majors should take ANTH 122.
ANTH 122. The Evolution of Early Mesoamerican States. 3 Units
Prerequisite(s): ANTH 3
Term Typically Offered: Fall, Spring
Traces the emergence of pre-hispanic state societies in Mesoamerica from the growth of the earliest settlements to the collapse of the Aztec empire. Analyzes how complex societies evolved in Mesoamerica, focusing on such evidence as household and village social organization, craft specialization and interregional exchange, religion and ideology, and the logistics of state management and imperial expansion.

ANTH 123. Ancient Technology. 3 Units
Term Typically Offered: Fall, Spring
Examines the importance of various preindustrial technologies, and the techniques and methods involved in their manufacture and use. Topics include stone, bone, wood, and hide working, ceramics, weaving, metallurgy, and other crafts essential to human survival in ancient and contemporary societies around the world.

ANTH 124. Environmental Archaeology. 3 Units
Prerequisite(s): ANTH 3 and Anthropology (Archaeological and Biological Anthropology) concentration.
Term Typically Offered: Fall, Spring
All human societies depend on their natural surroundings, and so the reconstruction of prehistoric environments is an essential part of archaeological interpretation. Three interrelated aspects of environmental archaeology are considered: (1) general approaches to paleoenvironmental reconstruction, employing various biological and geological indicators; (2) the analysis of human plant and animal food remains; and (3) the geological and other processes that are responsible for the formation of archaeological deposits.

ANTH 125. Historical Archaeology. 3 Units
Term Typically Offered: Fall, Spring
Written history only records a small portion of human activities that occurred in the recent past. Explores the numerous methods of investigation, analysis and interpretation that are available to aid the historical archaeologist in discovering missing information and in some cases correcting erroneous statements, assumptions and interpretations about the past.

ANTH 126. Techniques of Archaeological Analysis. 3 Units
Prerequisite(s): ANTH 3 and Anthropology (Archaeological and Biological Anthropology) concentration.
Term Typically Offered: Fall, Spring
Introduces students to various approaches to archaeological analysis, focusing on how different classes of data are collected, classified, and interpreted to resolve research issues. Includes such topics as the handling, treatment, and analysis of flaked and ground stone tools, plant and animal food remains, and other types of archaeological materials.
Lecture one hour, laboratory six hours.
Note: May be repeated once for credit.

ANTH 127. Cultural Resource Management in Theory and Practice. 3 Units
Prerequisite(s): ANTH 3
Term Typically Offered: Fall, Spring
Takes a wide-ranging look at how cultural resources are managed and preserved in California, the greater U.S., and other parts of the world. More than just a review of applicable laws and regulations, it is designed to offer a history of historic preservation, examine its role in our society, and explore the prospects for its continued presence. Practical aspects of Cultural Resource Management (CRM) are reviewed with respect to designing, budgeting, and performing archaeological surveys, site evaluation studies, and data recovery or mitigation programs.

ANTH 128. Indians of California. 3 Units
Term Typically Offered: Fall, Spring
Provides a survey of the traditional cultures of California Native American groups as they existed immediately after Western contact. Exploration of the ecological linguistic, economic, social, political, and religious diversity of California Native American groups provides a background for analysis of current anthropological theories of hunter-gatherer adaptations, subsistence intensification, political economy, cultural complexity, and California prehistory.

ANTH 129. Human Use of Caves From An Archaeological Perspective. 3 Units
Prerequisite(s): ANTH 3.
Term Typically Offered: Fall, Spring
Unique character of caves and their deposits present many challenges that cannot always be met with conventional archaeological, methodological and theoretical approaches. Students will be exposed to investigative techniques that facilitate the understanding of these unique archaeological resources. The investigation of the human use of caves through a worldwide perspective provides students with a thorough introduction to the study of these significant resources.

ANTH 130. Social Justice in Interdisciplinary Perspective. 3 Units
Prerequisite(s): Sophomore standing or instructor permission.
Term Typically Offered: Fall, Spring
Examines the nature and forms of social justice and injustice. Addresses key philosophical and theoretical models and debates over the meaning of social justice, using historical and contemporary examples to highlight important concepts and controversies. Faculty from different departments within SSIS, and occasionally from other colleges, will address how their discipline understands and analyzes issues of social justice. Students will be encouraged to critically assess the assumptions of various perspectives on social justice, and to address the relationship of academe and social activism in achieving social justice.
Cross listed as ID 124, ENVS 124, ETHN 124, FACS 124 and SOC 124. Only one may be counted for credit.
ANTH 131. Europe in the Ethnographic Imagination. 3 Units
Prerequisite(s): ANTH 146 or instructor permission.
Term Typically Offered: Fall, Spring

More than a place or "continent," Europe is a social and ideological construction employed to unite diverse linguistic and cultural communities. Focuses on major themes in contemporary Europeanist anthropology, including transformations within and between local communities and regions (especially with regards to Northern Ireland, the former Society bloc, and Yugoslav federation), immigration, neo-nationalist extremism, the changing character of religious institutions, and the European Union as a framework for organizing identity and society.

ANTH 134. Japanese Culture and Society. 3 Units
General Education Area/Graduation Requirement: Humanities (Area C2)
Term Typically Offered: Fall, Spring

Culture of the Japanese: traditional and modern, rural and urban, cultural and social institutions; village and urban organization; and family structure. Aspects of social change in contemporary rural and urban Japan.

ANTH 135. Indians of North America. 3 Units
Term Typically Offered: Fall, Spring

Provides a survey of traditional Native American societies and culture areas north of Mexico. Readings, lectures, and discussions emphasize primary ethnographic and historic data that provide the richest accounts of Amerindian cultures at the time of European contact and shortly thereafter.

ANTH 140. Social Anthropology. 3 Units
Prerequisite(s): ANTH 146 or instructor permission.
Term Typically Offered: Fall, Spring

Cross-cultural comparisons of the structures and functions of non-literate and complex societies; the diversity of social and territorial units, their analysis and classification; and the study of social organization and control and social change in relation to kinship, marriage and family, lineage and clan, law, politics, economics and religion in diverse societies.

ANTH 141. Culture Theory. 3 Units
Prerequisite(s): ANTH 146 or instructor permission.
Term Typically Offered: Fall, Spring

Exploration of the concepts, dimensions and dynamics of culture theory, viewing culture as an adaptive, comparative, cognitive, structural and symbolic system.

ANTH 142. Political Anthropology. 3 Units
Prerequisite(s): ANTH 146 or instructor permission.
Term Typically Offered: Fall, Spring

Explores political anthropology as a specialized field of anthropological inquiry. Analyzes the articulation of power, authority, and legitimacy in non-state and state based societies. Contributes to an understanding of the transforming powers of modernity and resistance to it and develops a critical appreciation of how age, status, class, ethnicity, race, gender and religious ideologies shape political order within various societies around the world.

ANTH 143. Culture and Society in Mexico. 3 Units
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall, Spring

Introduction to the cultural and social institutions of the Mexican people. The changing patterns of family, economic, political, religious, and educational systems in Mexico.

ANTH 144. Contemporary American Culture in Anthropological Perspective. 3 Units
Prerequisite(s): ANTH 146
Term Typically Offered: Fall, Spring

Anthropological analysis of contemporary American culture viewed from the perspective of both internal and external observers, with emphasis on such subjects as cultural myths and social realities, values, ideology and world view, family and cultural transmission, social institutions and structures, religious ceremonies and magical rituals, and other customs and practices that establish American culture as one of the more bizarre and exotic in the world ethnographic literature.

ANTH 145. Peoples and Cultures of Latin America. 3 Units
Prerequisite(s): ANTH 146 or instructor permission.
Term Typically Offered: Fall, Spring

Exploration of diversity of peoples and cultures in Latin America and the common experiences such as colonialism, ethnicity, and economy that shape their lives. Aspects of culture examined include: race and ethnicity, colonialism and its implications, the state and political institutions, religious systems, kinship and social organization, gender, economic processes, and issues pertaining to environment, urbanization, globalization, nationalism, and transnationalism.

ANTH 146. Ethnographic Analysis. 3 Units
Prerequisite(s): ANTH 2.
Term Typically Offered: Fall, Spring

Introduces students to current techniques, theories, and debates in ethnographic research and analysis through the use of ethnographies and related works. Critically examines the production of ethnographic knowledge in socio-cultural anthropology from historical and contemporary perspectives.

ANTH 147. Peoples of Southeast Asia. 3 Units
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall, Spring, Summer

Survey of the native peoples of Southeast Asia (Laos, Vietnam, Thailand, Philippines, Malaysia, Indonesia, Burma and Singapore). Emphasis is on examining the forms of social and cultural pluralism in contemporary Southeast Asian societies.

ANTH 148. Anthropology of Chinese Societies. 3 Units
Term Typically Offered: Fall, Spring

Exploration of the cultures of three Chinese societies (Taiwan, Hong Kong, and the People's Republic of China) in each of their unique historical contexts. A comparison and contrast of how these societies, though sharing a common cultural heritage, have had different paths of development in recent times. Aspects of culture examined include: the state and political institutions; religious systems; kinship and social organization; economic processes; and issues of regional integration, nationalism and transnationalism.
ANTE 149. Cultures of South Asia. 3 Units
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall, Spring

Exploration of cultural practices in different South Asian societies. Analyzes the impact of colonialism, post-colonialism and discourses of modernity on South Asian societies. Examines the process of state formation, nation-building, communal conflict, economic transformations and the politics of gender and class in contemporary South Asia.

ANTE 150. Human Osteology. 4 Units
Prerequisite(s): ANTH 1 and ANTH 1A, or BIO 22; and Anthropology (Archaeological and Biological Anthropology) concentration.
Term Typically Offered: Fall only

Provides students a hands-on, in-depth study of human osteology. Learn growth and development of the skeletal tissues and identification of the individual skeletal elements, and practice basic measurements, sexing and aging of skeletal material. A prerequisite for advanced techniques in forensic anthropology. Students will work with the department's osteological materials.

ANTE 151. Human Paleontology. 3 Units
Prerequisite(s): ANTH 1, ANTH 1A, or instructor permission.
Term Typically Offered: Fall, Spring

Survey of the field of human evolution from primate beginnings to modern humans. Emphasizes the interpretation of the fossil evidence and the major trends in hominid evolution, including the origins and relationships of the extinct forms of hominids.

ANTE 152. Primate Adaptations. 3 Units
Term Typically Offered: Spring only

Covers the significant dental, skeletal, and soft-anatomical adaptations of the major living families and/or subfamilies within the Order Primates. In the process of surveying the adaptations, the student will become familiar with evolutionary theory, taxonomy, embryology, ecology, social systems, biomechanics, effects of size, and the functional morphology of the skeletal system in primates. Three-hour seminar, with some lecture and hands-on experience with skeletons and casts.

ANTE 153. Evolutionary Medicine. 3 Units
Term Typically Offered: Fall, Spring

Introduction to the application of evolutionary theory to human health and disease. Evolutionary medicine is a rapidly growing interdisciplinary specialization utilizing insights from evolutionary theory and human evolutionary ecology to inform understandings of human health, development and disease; and also to critique existing biomedicine theory about the human condition. Topics include reproduction, child birth, lactation, growth and development, infectious diseases, parasites, diet and nutrition, mental and behavioral disorders, and substance use and addiction.
Note: ANTH 1, BIO 10, BIO 11, or PSYC 2 recommended.

ANTE 154. Primate Behavior. 3 Units
Term Typically Offered: Fall, Spring

Survey of the genetic, ecological and social influences on non-human primate behavior from an evolutionary perspective; covers the major non-human primate groups, including their taxonomy, major adaptations, and their present geographic distribution. The history and development of primate behavior also will be considered with an emphasis on various models for interpreting behavior.

ANTE 155. Fundamentals of Biological Anthropology. 3 Units
Prerequisite(s): ANTH 1 and ANTH 1A.
Term Typically Offered: Fall, Spring

Survey of the development of method and theory in physical anthropology from its origins in zoology, anatomy, and medicine, to the various approaches currently used in the study of human biology and evolution. Concepts considered include the scientific method, modern genetics, evolutionary theory, the race concept and other approaches to explaining human variation, taxonomy and systematics, and macro-evolutionary models. Critical reading and analytical skills will be emphasized.

ANTE 156. Evolution of Human Behavior. 3 Units
Prerequisite(s): ANTH 1, BIO 10, or PSYC 2 recommended.
Term Typically Offered: Fall, Spring

Introduction to the application of evolutionary theory to human behavior and psychology. Reviews and contrasts contemporary perspectives of human behavioral evolution with emphasis on insights from the emerging field of evolutionary psychology. Topics include human behavior and cognition as adaptations, "selfish genes," game theory, evolution of social behavior, evolution of altruism, human mating strategies, parenting, behavioral disorders, evolution of the life cycle, human behavioral ecology, Darwinian medicine, and evolutionary psychology.

ANTE 157. Human Variation. 3 Units
Prerequisite(s): ANTH 1, ANTH 1A, or instructor permission.
Term Typically Offered: Fall, Spring

Survey of the basic principles of human genetics with emphasis on the mechanisms that shape human evolution and the development of human races. Analyzes the laws of heredity as exhibited in modern human populations and human adaptability to climatic extremes. Historical development of concepts. Discussion of most current research.

ANTE 158. Human Skeletal Analysis. 4 Units
Prerequisite(s): ANTH 150.
Term Typically Offered: Spring only

Provides advanced techniques in osteology and forensic anthropology essential for many practicing physical anthropologists. Discussion and survey of the primary literature, followed by intensive hands-on experience with human skeletal remains. Included: techniques for determining age, sex and ethnicity; measurement; pathology; and trauma. The role of the forensic anthropologist and archaeologist, ethical considerations, and human rights issues are also covered. Three-hour seminar, and a three-hour lab involving substantial hands-on experience with human skeletal remains.

ANTE 159. Forensic Anthropology. 3 Units
Prerequisite(s): Any lower-division GE Area B2 course.
General Education Area/Graduation Requirement: Further Studies in Area B (BS)
Overview of forensic anthropology - an applied field of biological anthropology that works with law enforcement, medical examiners, and human rights agencies. Forensic anthropologists answer questions of medico-legal significance by applying techniques designed for analysis of human skeletal remains. Includes determining time since death, the biological profile, trauma analysis and the role of the forensic anthropologist in human rights investigations.
ANTH 160. Linguistic Anthropology. 3 Units
Prerequisite(s): ANTH 4 or instructor permission.
Term Typically Offered: Fall, Spring

Introduction to language and linguistics for anthropologists with emphasis on the role of linguistic anthropology in the development of theory and method within the discipline; non-human communication systems, language acquisition, and culture theory; the fundamentals of descriptive and structural linguistics; types of human languages; the diversity and distribution of languages from prehistoric to modern times; fundamentals of historical linguistics and proto-cultural studies.

ANTH 161. African Cultures and Societies. 3 Units
Prerequisite(s): ANTH 146 or instructor approval
Term Typically Offered: Fall, Spring

Explores the cultural richness and regional variation of African societies. Engages students with central issues and debates pertaining to Africa in relation to the deepening global interconnectedness of the human socio-cultural worlds. Topical discussions include: colonial legacy, the postcolonial state and traditional authority; ethnic identity and cultural diversity; family, kinship and the African youth; masculinity, sexuality and women; Islam, Christianity and indigenous spirituality; health, poverty and development; migration and globalization; ecotourism and African cultures.

ANTH 162. Language and Culture. 3 Units
Prerequisite(s): ANTH 4 or instructor permission.
Term Typically Offered: Fall, Spring

Relationship between language and culture; historical relationships between languages; language families and major cultural traditions; cross-cultural studies of how the language influences perception and the organization of reality; the ways in which language is embedded in social life and practices, and the ways in which various cultural patterns and values are reflected in language.

ANTH 163. Urban Anthropology. 3 Units
Prerequisite(s): ANTH 146 or instructor permission.
Term Typically Offered: Fall, Spring

Overview of both anthropological method and theory applied to research of urban environments and a survey of significant anthropological studies that have been conducted in these settings. Examines such topics as the urbanization process, the culture of cities, urban sub-cultures, social problems in urban areas, social networks and adaptive kinship strategies in cities, and the concentration and exercise of power, wealth and influence in urban centers.

ANTH 164. Culture Change. 3 Units
Prerequisite(s): ANTH 146 or instructor permission.
Term Typically Offered: Fall, Spring

Anthropological study of mechanisms and processes of social and culture change; basic theories of ecological adaptation and cultural evolution; action chains and cultural patterns; technological innovation, migration, acculturation, cultural dissonance, conflict, and cultural revitalization; analysis of case studies emphasizing contemporary conditions and problems; rapid technological innovation, population control, immigration and acculturation, social diversification, ethnic conflict.

ANTH 165. Applied Anthropology. 3 Units
Prerequisite(s): ANTH 105 or ANTH 108 or ANTH 140 or ANTH 141 or ANTH 142 or ANTH 167 or ANTH 168 or ANTH 176; and Anthropology (Culture, Language, and Society) concentration.
Term Typically Offered: Fall, Spring

Provides tools for exploring the application of an anthropological paradigm to various aspects of culture change and conflict. Content is organized into a series of critical topical areas such as modernization, economic development, human services, and urbanization.

ANTH 166. Rise of Religious Cults. 3 Units
General Education Area/Graduation Requirement: Humanities (Area C2)
Term Typically Offered: Fall, Spring, Summer

Examination of cult movements, involving comparisons of the ideals, objectives and symbolic processes common to ecstatic religious movements throughout the world -- from Melanesian cargo cults to the Peoples' Temple. Anthropological perspectives are used to examine religious cults as conscious attempts to perpetuate traditional values and social goals or to radically change the status quo; millenarian movements, crisis cults, nature communes, exotic religious importations, and cult characteristics of modern secular movements.

ANTH 167. Religion and Culture. 3 Units
Prerequisite(s): ANTH 146 or instructor permission.
Term Typically Offered: Fall, Spring

Examines ethnographic perspectives on the character and intersections of religion, ritual, and culture. Surveys the thought of "classical" social theorists (e.g., Durkheim, Tylor, Weber, and Evans-Pritchard), and concentrates on central topics in the anthropology of religion. Including the political nature of embodiment and trance, religion and nationalism, the significance of language and performance, the gendered character of many religious phenomena, and science and religion as competing epistemologies.

ANTH 168. Folklore in Anthropological Perspective. 3 Units
Prerequisite(s): ANTH 160 or ANTH 162 or instructor permission.
Term Typically Offered: Fall, Spring

Anthropological contributions to the study of folklore; survey of oral literature and other folklore forms, such as myth, folktale, legend, proverb, riddle, and games, in their social contexts; folklore as "autobiographical ethnography," folklore in everyday life, survey and comparison of folklore traditions in several culture areas.

ANTH 169. Research Methods in Linguistic Anthropology. 3 Units
Prerequisite(s): ANTH 160 or ANTH 162, and Anthropology (Culture, Language, and Society) concentration.
Term Typically Offered: Fall, Spring

Consideration of language in its social context: language and power, language and gender, interethnic communication, language and race, pidgins and creoles, multilingualism, standardization, language ideology. Instruction in ethnographic and linguistic methods of data collection and analysis; identification of socially significant linguistic variables. Contributions of the study of contextualized speech to linguistic theory.
ANTH 170. The Religious Landscape of the Sacramento Valley.  
Prerequisite(s): GWAR certification before Fall 09; or WPJ score of 80+; or 3-unit placement in ENGL 109M or ENGL 109W; or 4-unit placement in ENGL 109M or ENGL 109W and co-enrollment in ENGL 109X; or WPJ score 70 or 71 and co-enrollment in ENGL 109X.  
General Education Area/Graduation Requirement: Humanities (Area C2), Writing Intensive Graduation Requirement (WI)  
Term Typically Offered: Fall, Spring  
Introduction to the field study of religious communities. Addresses the nature of religious pluralism in the U.S. today. The practice and belief systems of at least five different religious communities will be studied each semester. Students are required to do an in-depth term project based on research in one or more religious communities. Cross Listed: HRS 170; only one may be counted for credit.

Prerequisite(s): ANTH 1 and ANTH 1A or instructor permission  
Term Typically Offered: Fall, Spring  
An exploration of research conducted on human remains from archaeological sites, including historical and ethical perspectives. Examines the effects of funerary context and preservation on skeletal remains. Demonstrates relevance of human skeletal analysis to understanding demography, causes of human skeletal variation, dietary patterns, and relevant themes in paleopathological research. Special emphasis placed on infectious disease, growth and development, activity patterns, injury and trauma, craniofacial adaptations, and methods for identifying genetic relationships in human skeletal remains.

Prerequisite(s): ANTH 146 or Instructor Permission.  
Term Typically Offered: Fall, Spring  
Introduces students to current anthropological research on social groups and cultural practices that orient around and draw inspiration from music, wherever and however it is conceived. Course focus is not on music theory or structure; rather, it critically examines anthropological and ethnographic works that focus on the relations among such social domains and features as visual and aural aesthetics, political belief, gender, ritual, religion, race, and ethnicity.

ANTH 173. Anthropology of Contemporary Asia.  
Prerequisite(s): ANTH 146 or instructor permission  
Term Typically Offered: Fall  
This course examines contemporary Asia as an articulation of intersecting historical, cultural, political and economic processes. The course will focus on postcolonial developments and critically explore the manner in which process of globalization and neoliberal strategies embed themselves within, and the responses they elicit from societies across Asia.

ANTH 174. Anthropology of Food.  
Prerequisite(s): ANTH 146 or instructor permission  
Term Typically Offered: Fall, Spring  
Examines food and eating from an anthropological perspective. Demonstrates how food communicates social messages about individual or group identity, creates social boundaries or forges belonging, and can reflect one's politics, values, and ethics. Through ethnographic examples and attention to global processes, this course explores food production, circulation, and consumption.

ANTH 175. Anthropology of Globalization.  
Prerequisite(s): ANTH 146 or instructor permission  
Term Typically Offered: Fall, Spring  
The course introduces students to major themes that inform anthropological understanding of globalization. This course will explore theoretical perspectives, topics, and methods of analysis developed in anthropology to capture the effects of intermingling global/local cultural forces and the diverse relations of power that structure them and in which they are embedded.

ANTH 176. Museums, Culture, and Society.  
Prerequisite(s): ANTH 146 or instructor permission.  
Term Typically Offered: Fall, Spring  
Provides an introduction to museum anthropology. Surveys the emergence of modern anthropology from its origins in 17th century natural history to its late 19th century institutionalization in museums. Explores the role of collectors, curators and financial patrons in the development of museums and social theory. Examines the contemporary poetics and politics of museums and cultural interpretation, including cultural property rights, cultural self-representation, collaborative exhibit development, and the ethnography of museums.

ANTH 177. Museum Methods.  
Prerequisite(s): ANTH 176 and Anthropology (Culture, Language, and Society) concentration.  
Term Typically Offered: Fall, Spring  
Combined lecture and laboratory course designed to teach basic museum methods. Surveys contemporary issues and practices in museum governance, management, interpretation, and evaluation. Provides hands-on collections and exhibit experience, including participation in the design, fabrication and installation of an exhibition.

ANTH 178. Internship.  
Term Typically Offered: Fall, Spring  
Practical experience in an approved professional environment. Student intern will work directly with professionals in public and private agencies where opportunities exist for anthropological work. Supervision and evaluation are provided by a faculty internship director and the on-site supervisor. Placements require from 15-20 hours per week.  
Credit/No Credit  
May be repeated for credit.

ANTH 181. Anthropology of Human Rights.  
Prerequisite(s): ANTH 146 or instructor permission.  
Term Typically Offered: Fall, Spring  
Examines multiple dimensions of human rights from an anthropological perspective. Explores the history and development of human rights ideas and legal conventions, and how these ideas and conventions are appropriated, adapted, contested or rejected in different cultural and political contexts. Using ethnographic case studies from around the world, addresses how the human rights discourse mediates the relationship between specific groups of people, their national states and international conventions and institutions.

ANTH 183. Women Cross-Culturally.  
General Education Area/Graduation Requirement: GE AREA D  
Term Typically Offered: Fall, Spring  
Position of women in various societies, preliterate through contemporary industrial; the evolution of women's roles and rights cross-culturally.
ANTH 186. Culture and Poverty. 3 Units
Prerequisite(s): GWAR certification before Fall 09; or WPJ score of 80+; or 3-unit placement in ENGL 109M or ENGL 109W; or 4-unit placement in ENGL 109M or ENGL 109W and co-enrollment in ENGL 109X; or WPJ score 70 or 71 and co-enrollment in ENGL 109X.

General Education Area/Graduation Requirement: Writing Intensive Graduation Requirement (WI), Race & Ethnicity Graduation Requirement (RE), GE AREA D
Term Typically Offered: Fall, Spring

Analyzes poverty in American society: the cross-cultural context, social inequality in the U.S., theoretical perspectives and their influence on policy, present trends and implications for the future.

ANTH 188. Anthropology of the Body. 3 Units
Term Typically Offered: Fall, Spring

Study of the diverse ways that humans explain and attempt to alter the human body. Focus is on the meanings and implications of our own bodily experiences through objective comparison of the experiences, explanations and techniques found in our society with those in others.

ANTH 190. Advanced Topics in Linguistic Anthropology. 3 Units
Prerequisite(s): ANTH 160 or ANTH 162 or instructor permission.
Term Typically Offered: Fall, Spring

Seminar examining contemporary developments in theories and methods of linguistic anthropology.
Note: May be repeated for credit providing the topic and instructor are not the same.

ANTH 191. Anthropology Practicum. 3 Units
Prerequisite(s): ANTH 165 or ANTH 169 or ANTH 177 or ANTH 192B; and senior level
Term Typically Offered: Fall, Spring

Students work 3-6 hours per week off campus in one of several research institutions under the supervision of institutional personnel. Students are required to become familiar with the scholarly literature relevant to their placement, to participate in on-campus meetings, and to write a research paper integrating the research and fieldwork aspects of the practicum. Permission of instructor and ANTH coordinator required prior to registration. Open to seniors only.

ANTH 192A. Laboratory Work in Archaeology. 1 Unit
Prerequisite(s): ANTH 3
Corequisite(s): ANTH 195A; may be waived with instructor permission.
Term Typically Offered: Fall, Spring

Introduces methods used in the basic laboratory preservation, cataloging, and initial analysis of various materials recovered through ANTH 195A survey and excavation projects; always offered in conjunction with ANTH 195A.
Note: May be repeated for credit.

ANTH 192B. Laboratory in Ethnographic Techniques. 1 Unit
Prerequisite(s): ANTH 105 or ANTH 108 or ANTH 140 or ANTH 141 or ANTH 142 or ANTH 167 or ANTH 168 or ANTH 176, and Anthropology (Culture, Language, and Society) concentration.
Corequisite(s): ANTH 195B.
Term Typically Offered: Fall, Spring

Design and discussion of research strategies, primary ethnographic techniques, the development of interviewing skills, and practice in the use of various recording technologies.

ANTH 195A. Fieldwork in Archaeology. 2 Units
Prerequisite(s): ANTH 3
Corequisite(s): ANTH 192B
Term Typically Offered: Fall, Spring

Introduction to archaeological field methods, covering practical aspects of how to identify and investigate isolated artifact finds, particular sites and features, and entire landscapes. Covering survey and excavation techniques, basic approaches to sampling, mapping and navigation, stratigraphic excavation, artifact and feature recording, and recovery methods.
Note: May be repeated for credit.

ANTH 195B. Fieldwork in Ethnology. 2 Units
Prerequisite(s): ANTH 105 or ANTH 108 or ANTH 140 or ANTH 141 or ANTH 142 or ANTH 167 or ANTH 168 or ANTH 176, and Anthropology (Culture, Language, and Society) concentration.
Corequisite(s): ANTH 192B
Term Typically Offered: Fall, Spring

Directed team fieldwork in ethnology.

ANTH 195C. Fieldwork in Physical Anthropology. 2 - 3 Units
Term Typically Offered: Fall, Spring

Individual or group fieldwork in various areas of physical anthropology, under the supervision of individual faculty members; may involve related supervised laboratory work.

ANTH 196S. Senior Seminar in Anthropology. 3 Units
Prerequisite(s): Anthropology majors with senior standing
Term Typically Offered: Fall, Spring

Anthropology approaches knowledge about the human condition from multidisciplinary perspectives. This senior seminar synthesizes fundamental themes from among the sub-disciplines. Students will engage with concepts and issues from different anthropological perspectives, and then work to identify common historical, methodological and theoretical anthropological themes. On completion of the course, students will have learned to seek and interpret anthropological knowledge in a holistic fashion.

ANTH 196T. Zooarchaeology. 3 Units
Prerequisite(s): ANTH 3
Term Typically Offered: Fall, Spring

An examination of past and recent research conducted on animal remains from archaeological sites. Discussion and survey of the primary literature in evaluating the role animal exploitation plays in human evolution and among small scale foraging, pastoralist, and complex societies. Emphasis on vertebrate taphonomy, reconstruction of diet from faunal remains, and ecological and evolutionary theory to understand human-animal relationships through time.

ANTH 199. Special Problems. 1 - 3 Units
Prerequisite(s): Approval of the faculty member under whom the individual work is to be conducted and the Department chair.
Term Typically Offered: Fall, Spring

Individual projects or directed reading.
Note: Open only to students who appear competent to carry on individual work. May be repeated for credit.

Credit/No Credit
ANTH 200. General Methods in Anthropology. 3 Units
Term Typically Offered: Fall, Spring

Explores uses of scientific methodology in anthropology through the examination of specific case studies in the various specialties. Focus is on the relationship among techniques, methods, and methodology; hypothesis and theory; units of analysis and comparison; deductive and inductive reasoning; inferential processes; various types of comparison (casual, controlled, hologeistic); limitations of, and objections to, "the comparative method."

Note: May be repeated for credit provided topic and instructor are not repeated.

Prerequisite(s): Graduate status in anthropology or instructor permission.

ANTH 201. Anthropological Theory. 3 Units
Term Typically Offered: Fall, Spring

Intensive reading and seminar discussion in topics on anthropological theory and research.

Note: May be repeated for credit provided topic is not repeated.

ANTH 202. Biological Anthropology Seminar. 3 Units
Term Typically Offered: Fall, Spring

Survey of contemporary issues in physical anthropology.

ANTH 203. Archaeology. 3 Units
Term Typically Offered: Fall, Spring

Explores the intellectual development of archaeological method and theory; examines the history of archaeological thought from its advent to the present day, looking in detail at pre-scientific, culture-historical, processual, and post-processual approaches to the discipline; emphasis is placed on the role of archaeology as a branch of anthropology and as a historical, humanistic, and/or scientific enterprise.

ANTH 204. Current Problems in Archaeological Method and Theory. 3 Units
Term Typically Offered: Fall, Spring

Explores recent methodological and theoretical developments within archaeology; focus is on contemporary debates within the discipline; topical coverage varies; examines conceptual and practical concerns, highlighting possibilities and limitations of new approaches to archaeological problems.

Note: May be repeated for credit provided topic and instructor are not repeated.

Note: May be repeated once for credit with different instructor.

Prerequisite(s): ANTH 126 or instructor permission.

ANTH 205. Ethnology. 3 Units
Term Typically Offered: Fall, Spring

Seminar is designed for students to develop a working knowledge of anthropological approaches to a number of major issues in ethnology. The focus is on the analysis of case studies.

Note: May be repeated once for credit with different instructor.

ANTH 207. Language and Culture. 3 Units
Term Typically Offered: Fall, Spring

Critical examination of contemporary studies in the relationship between language and culture; nonhuman primate communication and the origin of speech; non-verbal communication; historical linguistics; comparative semiology; ethnosemantics; applications of linguistic models of analysis in the study of culture.

Note: May be repeated for credit given that the instructor changes.

ANTH 222. Bioarchaeology Seminar. 3 Units
Prerequisite(s): Graduate status in anthropology.
Term Typically Offered: Fall, Spring

Provides an intensive, detailed discussion of method and theory in the skeletal biology of past human populations. Topics discussed include: demography, dietary analysis, mortuary dimensions, health and disease, biological distance and DNA analysis. Focuses on the interaction of biology and behavior, particularly the influence of culture and the environment on the skeletal and dental tissues.

ANTH 223. Areal Archaeology. 3 Units
Term Typically Offered: Fall, Spring

Provides an intensive examination of archaeological problems within a selected regional or topical area. Through general readings and case studies, students will critically assess how current perspectives regarding relevant issues have evolved and determine how contemporary viewpoints might be improved or expanded.

Note: May be repeated for credit provided topic and instructor are not repeated.

ANTH 226. Advanced Techniques of Archaeological Analysis. 3 Units
Prerequisite(s): ANTH 126 or instructor permission.
Term Typically Offered: Fall, Spring

Examines more refined approaches to archaeological analysis, focusing on how various classes of data are collected, classified, and interpreted to resolve directed research problems. Emphasis is on such topics as sampling procedures and statistical assessment of data rather than descriptive analysis and interpretation. Lecture one hour; laboratory six hours.

ANTH 251. Human Paleontology. 3 Units
Term Typically Offered: Fall, Spring

Survey of the field of human evolution from primate beginnings to modern humans. Emphasizes the interpretation of the fossil evidence and the major trends in hominid evolution, including the origins and the relationships of the extinct forms of humans.

ANTH 276. Museum Anthropology. 3 Units
Prerequisite(s): Graduate status in Anthropology or instructor permission.
Term Typically Offered: Fall, Spring

Surveys the practical, theoretical, and historical dimensions of museum anthropology and material culture studies, with particular emphasis on the U.S. and California. Situates contemporary issues related to the collection, exhibition, and repatriation of ethnographic and archaeological materials within the sociopolitical context of the globally based indigenous rights movement.

Note: Recommended for graduate students who plan to intern in the Anthropology Museum.

ANTH 278. Internship. 3 - 4 Units
Term Typically Offered: Fall, Spring

Practical graduate level experience in an approved professional environment. Student intern will work directly with professionals in public and private agencies where opportunities exist for anthropological work. Supervision and evaluation are provided by a faculty internship director and the on-site supervisor. Placements require from 15-20 hours per week.

Note: May be repeated for credit given that topic and instructor changes.

Credit/No Credit
Laboratory preservation, cataloging and initial analysis of materials recovered through archaeological fieldwork. Graduate students are expected to help supervise undergraduate students and complete a self-directed project under the supervision of the instructor.

**Note:** Participant must have already completed ANTH 192A or its equivalent. May be repeated once for credit.

**ANTH 295A. Fieldwork in Archaeology.**

- **Prerequisite(s):** ANTH 195A or equivalent.
- **Corequisite(s):** ANTH 292A.
- **Term Typically Offered:** Fall, Spring

Students will assist the instructor in supervising undergraduate students or complete an assigned project in addition to the required fieldwork.

**Note:** May be repeated given that the topic and instructor changes.

**ANTH 295B. Fieldwork in Ethnology.**

- **Units:** 2 - 3
- **Term Typically Offered:** Fall, Spring

Supervised graduate level fieldwork in ethnology and ethnography.

**ANTH 295C. Fieldwork in Physical Anthropology.**

- **Units:** 2 - 3
- **Term Typically Offered:** Fall, Spring

Supervised graduate level fieldwork in physical anthropology. May include laboratory research.

**ANTH 299. Special Problems.**

- **Units:** 1 - 3
- **Prerequisite(s):** Approval of faculty member under whom individual work is to be conducted and the Department chair.
- **Term Typically Offered:** Fall, Spring

Individual projects or directed reading.

**Note:** Open only to students who appear competent to carry on individual work at the graduate level; May be repeated given that topic and instructor changes; May be taken twice in the same semester.

Credit/No Credit

**ANTH 500. Master's Thesis.**

- **Units:** 3
- **Prerequisite(s):** Advanced to candidacy and chair permission of his/her thesis committee.
- **Term Typically Offered:** Fall, Spring

Completion of a thesis approved for the master's degree. Number of units of credit is determined by the candidate's Master's degree advisory committee. Should be taken in final semester prior to the completion of all requirements for the degree.

---

### BA in Anthropology (Archaeology and Biological Anthropology)

**Units required for Major:** 52-53, includes units of study in chosen concentration

**Program Description**

The Archaeological and Biological Anthropology concentration provides students with the knowledge, skills and perspectives of scientific anthropology. It prepares students for careers in the anthropological sciences, such as cultural resources management, skeletal identification, zoological or museum technicians for the graduate training.

**Minimum Grade Requirement**

Except for General Electives, all requirements must be completed with a grade of "C-" or better.

**Program Requirements**

**Laboratory Methods**

- ANTH 119 Analysis of Faunal Remains
- ANTH 120 Introductory Statistics for Anthropologists
- ANTH 124 Environmental Archaeology
- ANTH 126 Techniques of Archaeological Analysis
- ANTH 150 Human Osteology
- ANTH 192A Laboratory Work in Archaeology
- ANTH 195A Fieldwork in Archaeology

**Breadth Requirement**

Select three from all the upper division courses listed above plus the following:

- ANTH 116 Old World Prehistory: Paleolithic Archaeology
- ANTH 123 Ancient Technology
- ANTH 127 Cultural Resource Management in Theory and Practice
- ANTH 128 Indians of California
- ANTH 135 Indians of North America
- ANTH 152 Primate Adaptations
- ANTH 158 Human Skeletal Analysis
- ANTH 171 Bioarchaeology: Analyzing Human Remains from Archaeology Sites

**General Electives (6 Units)**

Select any two upper division courses from Anthropology or any related discipline with approval from Major Advisor.  

**Additional Requirements (3 Units)**

Anthropology majors select one statistics course or one approved by the Department.

**BA in Anthropology (Culture, Language and Society)**

Units required for Major: 52 units, includes units of study in chosen concentration

**Program Description**

The Culture, Language & Society concentration develops knowledge, skills and perspectives to understand and engage with our diverse, interconnected world. It is designed to meet the needs of students who wish to pursue graduate work or post-baccalaureate careers in government, the non-profit sector, education, healthcare or other contexts that require attention to cultural and linguistic dynamics.

**Minimum Grade Requirement**

Except for General Electives, all requirements must be completed with a grade of "C-" or better.

**Upper Division Core Requirements (12 Units)**

- ANTH 146 Ethnographic Analysis
- ANTH 162 Language and Culture

Select one of the following:

- ANTH 111 California Archaeology
- ANTH 112 Great Basin Archaeology
- ANTH 113 Prehistory of the Southwest
- ANTH 114 North American Prehistory
- ANTH 122 The Evolution of Early Mesoamerican States

**Additional requirements for Concentrations (27-28 Units)**

Select one of the following:

- ANTH 155 Fundamentals of Biological Anthropology
- ANTH 157 Human Variation

**Concentration in Culture, Language & Society (27 units)**

**Theoretical Perspective**

Select one of the following:

- ANTH 105 Anthropology of War
- ANTH 108 Economic Anthropology
- ANTH 140 Social Anthropology
- ANTH 141 Culture Theory
- ANTH 142 Political Anthropology
- ANTH 160 Linguistic Anthropology
- ANTH 167 Religion and Culture
- ANTH 168 Folklore in Anthropological Perspective
- ANTH 176 Museums, Culture, and Society
- ANTH 190 Advanced Topics in Linguistic Anthropology

**Methods**

Select one of the following:

- ANTH 165 Applied Anthropology
- ANTH 169 Research Methods in Linguistic Anthropology
- ANTH 177 Museum Methods
- ANTH 192B Laboratory in Ethnographic Techniques
- ANTH 195B Fieldwork in Ethnology

**Breadth Requirement**

Select two of the following:

- ANTH 131 Europe in the Ethnographic Imagination
- ANTH 144 Contemporary American Culture in Anthropological Perspective
- ANTH 145 Peoples and Cultures of Latin America
BA in Anthropology (General Anthropology)

Units required for Major: 52-53 units, includes units of study in chosen concentration

Program Description

The General Anthropology concentration introduces students to the fundamentals of archaeological, biological, sociocultural and linguistic anthropology. It constitutes a good liberal arts foundation that will help students pursue advanced studies and/or careers in diverse fields.

Minimum Grade Requirement

Except for General Electives, all requirements must be completed with a grade of "C-" or better.

</table>
Committee to determine the scope of his/her interests and academic background and to establish the plan for elective coursework. After the graduate interview, the student forms a Thesis Committee composed of a graduate advisor and at least one additional member of the Anthropology faculty. The responsibility of the Thesis Committee is to provide general academic advice and to guide the student in conducting research and writing the thesis.

Students may develop their special interests through individual arrangements with their faculty advisors, or they may take advantage of opportunities for special training in such areas of Applied Anthropology as cultural resource management, museology, Anthropology in education, and medical Anthropology through participation in ongoing informal programs which may include special field work or intern placement with local agencies. Prospective students should obtain a copy of the most recent Department of Anthropology Graduate Study Brochure for updated information on special opportunities.

**Admission Requirements**

Admission to classified graduate standing in Anthropology requires:

- a baccalaureate degree;
- a minimum 3.0 GPA for the last 60 units attempted.

**Admission Procedures**

Graduate students are considered once a year for admission for the fall semester. To ensure consideration of admission for the following year, applicants must complete a university application and a separate departmental application by the posted application deadline dates for the term applying. For more admissions information and application deadlines, please visit [http://www.csus.edu/gradstudies/](http://www.csus.edu/gradstudies/).

**Notes:**

- an application for admission and a supplemental application for graduate admission (forms A and B in the CSU application booklet); and
- two complete sets of official transcripts from all colleges and universities attended, other than Sacramento State.

At the same time, applicants must submit to the Graduate Coordinator, Department of Anthropology, a letter describing their academic background and present interests, two signed letters of recommendation on official letterhead from individuals who can assess the applicant’s potential for graduate study, and results of the General Graduate Record Examination and Graduate Record Examination Writing Assessment.

**Minimum Units and Grade Requirement for the Degree**

Units required for the MA: 30

Minimum Cumulative GPA: 3.0

**Advancement to Candidacy**

Each student must file an application for Advancement to Candidacy indicating a proposed program of graduate study. This procedure may begin as soon as the classified graduate student has:

- removed any deficiencies in admission requirements;
- completed at least 12 units of 200-level Anthropology courses with a minimum 3.0 GPA;
- completed a Thesis Prospectus Review; and

---

**MA in Anthropology**

Total units required for MA: 30

**Program Description**

The Master of Arts program in Anthropology is designed for students who plan to continue their graduate studies in Anthropology at the Ph.D. level as well as for students who plan to pursue any of the numerous opportunities for graduate anthropologists, such as in private research, Foreign Service, education, and government.

The program centers on a core of general requirements designed to provide each student with a graduate level exposure to the broad discipline of Anthropology, with an emphasis on general methodology and the ways in which problems are conceptualized and approached in at least three of the interrelated sub-disciplines. Beyond this core, each student is encouraged to design a plan of elective coursework relevant to his/her postgraduate goals. The plan may be to continue a broad, unspecialized course of study, or to concentrate on any of the specialties represented by the interests of the faculty.

Following admission to classified standing, each student is assigned a temporary advisor and informally interviewed by the Graduate Studies
• taken the Writing Placement for Graduate Students (WPG) or taken a Graduate Writing Intensive (GWI) course in their discipline within the first two semesters of coursework at California State University, Sacramento or secured approval for a WPG waiver.

Students should consult the Department’s current Graduate Program Brochure for deadlines.

Preliminary Examination: Passing the Preliminary Examination is a prerequisite to Advancement to Candidacy.

Note: Students may not enroll in ANTH 500 until Advanced to Candidacy. Advancement to Candidacy forms are available on the Office of Graduate Studies website. The student fills out the form after planning a program of study in consultation with his/her Anthropology faculty advisors. The completed form is then returned to the Office of Graduate Studies for approval.

1 There are no specific course requirements. However, no more than 3 units of the courses below may be counted toward the minor.

Asian Studies

College of Social Sciences and Interdisciplinary Studies

Program Description

Pacific Asia, including the nation states on the Asian shores of the Pacific Rim, the Koreas, Japan, China, Taiwan, the Philippines, Vietnam, Cambodia, Thailand, Myanmar, Laos, Malaysia, Singapore, Brunei Darussalam, and Indonesia, is a region of great economic, political and strategic importance, possessing immense natural and human resources.

The major is designed to provide students with a coherent introduction to the language, history, and culture of Asian societies on the western rim of the Pacific Basin. While focusing on Pacific Asia, the program also supports the study of cultures from the Indian subcontinent and other regions of Asia. Each concentration provides an interdisciplinary understanding of the major social and historical forces at work in the region, supported by appropriate language training. Graduates of the program either continue their studies at graduate institutions or utilize their knowledge and training through employment in government, business or education relating to this increasingly important region of the world.

The minor offers students a framework to explore one or more Pacific Asian societies from an interdisciplinary perspective. It is particularly relevant for students in various academic or applied disciplines who have a regional interest in Pacific Asia.

Degree Programs

BA in Asian Studies (Chinese Studies) (p. 794)
BA in Asian Studies (Japanese Studies) (p. 796)
BA in Asian Studies (Korean Studies) (p. 797)
BA in Asian Studies (South and Southeast Asian) (p. 799)

Minor in Asian Studies (p. 800)

Special Features

• The program of Asian Studies is administered through the Center for Pacific Asian Studies. The Center is composed of designated faculty in the departments of Anthropology, Art, Education, Ethnic Studies, World Languages and Literatures, Government, History, Humanities and Religious Studies, Philosophy, and Psychology.

• A program committee, comprised of the director of the center and four members of the Asian Studies faculty, oversees the Asian Studies Program.

• The Center also serves to support and facilitate various university activities related to furthering our understanding of the Pacific Asian region (as well as the Indian subcontinent and other regions of Asia): faculty research, sponsoring summer training institutes, travel and residential programs in Pacific Asia, seminars for faculty,
students and the community, and establishing collaborative links with institutions and community groups.

**ASIA 96. The Way of Chanoyu: An Interdisciplinary Approach to the Japanese Tea Gathering.**  
3 Units  
**Term Typically Offered:** Fall, Spring  
This course traces the development of a multifaceted cultural practice integrating architecture, garden design, art, painting, and calligraphy into a carefully constructed hospitality ritual. Students explore multiple aspects of Japanese Chado via hands-on learning including aesthetic, economic, scientific, socio-political and cultural dimensions associated with tea. The course is taught in the Nakatani Tea Room, including weekly classroom lectures and discussions, demonstrations, on-line learning modules, a group project, and typically, a day field trip to San Francisco. Field trip(s) may be required.

**ASIA 110. Anthropology of Contemporary Asia.**  
3 Units  
**Prerequisite(s):** ANTH 146 or instructor permission  
This course examines contemporary Asia as an articulation of intersecting historical, cultural, political and economic processes. The course will focus on postcolonial developments and critically explore the manner in which process of globalization and neoliberal strategies embed themselves within, and the responses they elicit from societies across Asia.

**ASIA 134. History of Korea: Antiquity to Present.**  
3 Units  
**Term Typically Offered:** Fall only  
This course traces the historical development of Korean culture from the period the Three Kingdoms to the present. In addition to the texts and records, other sources such as literature, religion, and art will be examined to gain an understanding of and appreciation for the longevity of Korea as a culture and a polity.

**ASIA 135. Contemporary Korean Culture.**  
3 Units  
**Term Typically Offered:** Spring only  
This course provides a comprehensive understanding of Korean culture and society through the analysis of contemporary Korean popular media. By critically examining the particular cultural phenomenon of the Korean Wave, this course upholds various Korean popular media (film drama, documentaries, and music) as significant forms of visual culture, which reflect as well as shape the reality of people’s everyday lives both within and outside Korea.

**ASIA 136. Korean Development and Behavior.**  
3 Units  
This course examines critical issues in Korean human development and behavior with particular attention given to current theoretical perspectives within a fast developing society. Topics include identity, cognitive development, mental health, tiger parenting, gender roles, socio-emotional development, body image, and transracial adoptions. This course integrates an interdisciplinary approach and includes indigenous discourse on Confucianism and Eastern and Western thought to understand the underlying processes of the Korean heritage person as an individual and as a member of a larger society.

Concentration Requirements (12 Units)

Select four courses from one of the following concentrations:

- Japanese Studies Concentration
- Chinese Studies Concentration
- South and Southeast Asian Concentration
- Korean Studies Concentration

Electives (9 Units)

Select 9 units from three different groupings:

Group 1: Japan
- ANTH 134 Japanese Culture and Society
- HIST 146A Cultural History of Japan to 1800
- HIST 146B Modern Japan, 1800-present
- HIST 146C The History of Manga
- HRS 174 Modern Japanese Literature and Culture
- JAPN 120 Japanese Civilization

Group 2: China
- ANTH 148 Anthropology of Chinese Societies
- CHIN 120 Chinese Civilization
- CHIN 150 Survey of Chinese Literature
- HIST 148A China: Antiquity to 1600 AD
- HIST 148B China, 1600 to Present
- HRS 172 The Classical Culture of China
- HRS 173 Chinese Philosophy and Religion

BA in Asian Studies (Chinese Studies)

Units required for Major: 44

These 44 units include 12 units of study in a student’s chosen concentration and units equivalent to the last two semesters of an Asian language appropriate to student’s concentration by coursework or a language proficiency examination provided by the Department of Foreign Languages (see below).
PHIL 145A  Chinese Philosophy

Group 3: Korea
ASIA 134  History of Korea: Antiquity to Present
ASIA 135  Contemporary Korean Culture
ASIA 136  Korean Development and Behavior
ART 117C  Art of Korea
EDUC 128  Education and Communication in Korean Society

Group 4: South and South-East Asia
ANTH 147  Peoples of Southeast Asia
ANTH 149  Cultures of South Asia
ART 117A  Art of India and Southeast Asia
ASIA 151  Genocide in Southeast Asia
GEOG 125  Geography Of East Asia
HIST 144  Indonesia, 1965: Context, Causes, and Consequences of Cold War Mass Murder
HIST 145  South Asian History & Civilization
HIST 149  The Making of Modern Southeast Asia
HIST/HRS 147  History of Buddhism
HRS 178  Religions of India
PHIL 145B  Philosophies Of India

Group 5: Asian-American
ENGL 180M  Asian American Literature
ETHN 110  The Asian American Experience
ETHN 111  Southeast Asians in the US
ETHN 112  Contemporary Asian American Issues
ETHN 113  Asian American Communities
ETHN 114  Asian Americans and Globalization
ETHN 116  Asian American Politics and Public Policy
ETHN/WOMS 118  Asian American Women
ETHN 119  The Filipino American Experience
ETHN 121  Hmong American Experience
ETHN 122  Sikh Americans and Globalization
ETHN 167  Asian American Families: Issues and Perspectives

Total Units 36

2 Students must take 9 units of electives from three different groupings. Students are not permitted to take an elective from their area of concentration. In other words, Japanese Studies Concentration Majors cannot take courses from group 1, Chinese Studies Concentration Majors cannot take courses from group 2, and Southeast Asia Concentration Majors cannot take courses from group 3.

3 Students must demonstrate proficiency at a level equivalent to four semesters of an Asian language appropriate to their concentration by coursework or a language proficiency examination provided by the Department of Foreign Languages. Students concentrating in South or Southeast Asia can demonstrate proficiency in any South or Southeast Asian Language.

Total Units 36

BA in Asian Studies (Korean Studies)
Units required for Major: 44

These 44 units include 12 units of study in a student's chosen concentration and units equivalent to the last two semesters of an Asian language appropriate to student's concentration by coursework or a language proficiency examination provided by the Department of Foreign Languages (see below)

Program Description
Pacific Asia, including the nation states on the Asian shores of the Pacific Rim, the Koreas, Japan, China, Taiwan, the Philippines, Vietnam, Cambodia, Thailand, Myanmar, Laos, Malaysia, Singapore, Brunei Darussalam, and Indonesia, is a region of great economic, political and strategic importance, possessing immense natural and human resources.

The major is designed to provide students with a coherent introduction to the language, history, and culture of Asian societies on the western rim of the Pacific Basin. While focusing on Pacific Asia, the program also supports the study of cultures from the Indian subcontinent and other regions of Asia. Each concentration provides an interdisciplinary understanding of the major social and historical forces at work in the region, supported by appropriate language training.

Graduates of the program either continue their studies at graduate institutions or utilize their knowledge and training through employment in government, business or education relating to this increasingly important region of the world.

Program Requirements

Concentration in Japanese Studies (12 units)

Select four of the following:

ANTH 134 Japanese Culture and Society
Group 1: Japan
- ANTH 134: Japanese Culture and Society
- HIST 146A: Cultural History of Japan to 1800
- HIST 146B: Modern Japan, 1800-present
- HIST 146C: The History of Manga
- HRS 174: Modern Japanese Literature and Culture
- JAPN 120: Japanese Civilization

Group 2: China
- ANTH 148: Anthropology of Chinese Societies
- CHIN 120: Chinese Civilization
- CHIN 150: Survey of Chinese Literature
- HIST 148A: China: Antiquity to 1600 AD
- HRS 172: The Classical Culture of China
- HRS 173: Chinese Philosophy and Religion
- PHIL 145A: Chinese Philosophy

Group 3: Korea
- ASIA 134: History of Korea: Antiquity to Present
- ASIA 135: Contemporary Korean Culture
- ASIA 136: Korean Development and Behavior
- ART 117C: Art of Korea
- EDUC 128: Education and Communication in Korean Society

Group 4: South and South-East Asia
- ANTH 147: Peoples of Southeast Asia
- ANTH 149: Cultures of South Asia
- ART 117A: Art of India and Southeast Asia
- ASIA 151: Genocide in Southeast Asia
- GEOG 125: Geography of East Asia
- HIST 144: Indonesia, 1965: Context, Causes, and Consequences of Cold War Mass Murder
- HIST 145: South Asian History & Civilization
- HIST/HRS 147: History of Buddhism
- HRS 178: Religions of India
- PHIL 145B: Philosophies Of India

Group 5: Asian-American
- ENGL 180M: Asian American Literature
- ETHN 110: The Asian American Experience
- ETHN 111: Southeast Asians in the US
- ETHN 112: Contemporary Asian American Issues
- ETHN 113: Asian American Communities

In other words, Japanese Studies Concentration Majors cannot take courses from group 1, Chinese Studies Concentration Majors cannot take courses from group 2, and Southeast Asia Concentration Majors cannot take courses from group 3.
California Studies

Department of Public Policy Administration

Program Description
California Studies is an interdisciplinary program designed to provide an understanding of California’s institutions, culture, and environment in a manner that will be occupationally and academically useful to students in a variety of majors. With the state’s central role as a gateway to the Pacific basin, substantial knowledge of California will be necessary for those preparing to engage in commerce and international trade. In addition, for students who are planning careers in the public sector, the California Studies minor will furnish background applicable to their future employment.

Economics

College of Social Sciences and Interdisciplinary Studies

Program Description
Economics is a social science that examines the functioning of markets, the determination of prices and distribution of income, and the determination of the overall level of income and rates of unemployment and inflation. In addition, Economics deals with various social problems. The Economics major at Sacramento State is designed to provide students with a liberal education with special emphasis on the economic aspects of society, on familiarization with techniques for the analysis of contemporary economic problems, developing the ability to think critically, and to conceptualize and to possess the communication and computer skills to evaluate private and public policy issues.

The Economics program is appealing to students due to the quality of its faculty, the breadth of its course offerings, and the amount of choice it offers the student in planning his or her coursework. In addition to training in the traditional economics areas, the program offers such diverse courses as the California economy, state and local finance, energy, environmental and resource economics, and urban economics. Students find the Department of Economics congenial to their educational and career objectives.

A minor in Economics may be especially attractive to students majoring in Business Administration, Government, and Environmental Studies or in one of the other Social Science disciplines. The Economics minor adds both theoretical and analytical depth. In addition, it provides the historical and institutional background important to an understanding of contemporary economic issues. It offers students in other majors a broader-based undergraduate education while widening the choice of job possibilities. Employers view the minor in Economics favorably.

Degree Programs
BA in Economics (p. 807)

Minor in Economics (p. 809)

Certificate in Economics Education (p. 808)

MA in Economics (p. 808)

Special Features
- Students in the Sacramento State Economics program benefit from a wide range of opportunities to work in the private and public sectors. The Economics Department offers internships for academic credit to students who are interested in the application of economics in the private and public sectors. This kind of practical experience enhances employment opportunities after graduation.
- Former Sacramento State Economics students are working at all levels of government and in many private businesses in the fields of finance, real estate, professional services, etc. Some are in the teaching profession, K-12 and community colleges, while others have continued their studies toward a Masters degree or a Ph.D. at such institutions as Notre Dame, Washington University at St. Louis, the University of Pittsburgh, University of California, Santa Cruz, Johns Hopkins University, and University of California, Davis.
- The Sacramento State Economics faculty is diverse in areas of specialization and draws upon both its advanced academic training
and practical experience. Faculty members have published articles, papers, and books, and enjoy reputations as experts in their fields. Besides providing a reputable and experienced faculty, the Economics Department offers personal advising for students in the planning and meeting of academic and career goals.

**Pre-Major Requirements**

Freshman or transfer students interested in the Economics Major are admitted as Pre-Major Economics students.

To change to an Economics major, all students are required to complete the following grade and course requirements and submit a Declaration of Major form to the Economics Department along with transcript copies:

1. An overall GPA of 2.0 and be in good academic standing.
2. Completion of the Pre-Major Required Courses with a "C" or better in each course. Only first or second attempts will be considered.

**Career Possibilities**

**ECON 1A. Introduction to Macroeconomic Analysis.** 3 Units

General Education Area/Graduation Requirement: GE AREA D

Term Typically Offered: Fall, Spring

Introductory inquiry into the workings and interrelationships of the aggregate economic system. The primary focus is on total production and its distribution, employment and price levels, and the forces influencing them. Other considerations are the roles of government, the monetary sector, and related areas.

**ECON 1B. Introduction to Microeconomic Analysis.** 3 Units

General Education Area/Graduation Requirement: GE AREA D

Term Typically Offered: Fall, Spring

Introductory microeconomic analysis of the workings of supply and demand in the determination of price, resource allocation, and distribution. Markets are analyzed as they affect economic efficiency and income distribution.

**ECON 100A. Intermediate Macroeconomic Theory.** 3 Units

Prerequisite(s): ECON 1A, ECON 1B, and MATH 24 or MATH 26A or MATH 30 with a minimum "C" grade.

Term Typically Offered: Fall, Spring

Analysis of the determinants of the aggregate level of output, income, employment and prices.
ECON 100B. Intermediate Microeconomic Theory. 3 Units
Prerequisite(s): ECON 1B and MATH 24 or MATH 26A or MATH 30 with a minimum "C" grade.
Term Typically Offered: Fall, Spring

Analysis of household and firm behavior as the foundation of supply and demand.

ECON 101. History of Economic Thought. 3 Units
Prerequisite(s): ECON 1A, ECON 1B.
Term Typically Offered: Fall, Spring

Analysis of the development of economic theory from the predecessors of Adam Smith through John Maynard Keynes. The contributions made to the discipline by its principal figures are compared and evaluated.

ECON 104. Introduction to the United States Economy. 3 Units
Term Typically Offered: Fall, Spring

One semester survey of the principles of economics, basic methods of economic analysis, and their application to public policy and current events.

Note: Not open to students who have had ECON 1A or ECON 1B or those majoring in economics.

ECON 110. Cost Benefit Analysis. 3 Units
Prerequisite(s): ECON 1B and MATH 24 or MATH 26A or MATH 30 with a minimum "C" grade.
Term Typically Offered: Fall, Spring

Examines the rationale for government provision of goods and services and presents cost-benefit analysis as a method to evaluate public participation in a market economy.

ECON 112. European Economic History. 3 Units
General Education Area/Graduation Requirement: Humanities (Area C2)
Term Typically Offered: Fall, Spring

Analysis and evaluation of the economic forces and institutions shaping European economic development through the present period. Attention will be paid to the relationship between changes in the economic environment and attendant cultural, political, and ideological developments in the stages of tribalism, slavery, feudalism, capitalism, and socialism.

ECON 113. Economic History of the United States. 3 Units
Prerequisite(s): ECON 1A or ECON 104.
Term Typically Offered: Fall, Spring

Consideration of the economic growth and development of the U.S. with emphasis on a theoretical analysis of the economic factors shaping the national destiny.

ECON 114. The California Economy. 3 Units
Prerequisite(s): ECON 1A and ECON 1B, or ECON 104.
Term Typically Offered: Fall only

Examination of the process of the development of the State's economy as well as analysis of the various public economic issues that are of contemporary concern to Californians.

ECON 120. Economics and Environmental Degradation. 3 Units
Term Typically Offered: Fall only

Analyzes environmental issues as economic issues. Economics as both a cause and cure for environmental destruction.

ECON 123. Resource Economics. 3 Units
Prerequisite(s): ECON 1B and MATH 24 or MATH 26A or MATH 30 with a minimum "C" grade.
Term Typically Offered: Fall, Spring

Analyzes the economic based problem of exhaustion in both renewable and non-renewable resources. Emphasis is given to the optimal use of these resources over time and the effects that various market and non-market factors have on their future availability.

ECON 130. Public Finance. 3 Units
Prerequisite(s): ECON 1A, ECON 1B, and MATH 24 or MATH 26A or MATH 30 with a minimum "C" grade; ECON 100B recommended.
Term Typically Offered: Fall, Spring

Economic analysis of the public sector and its impact on the allocation of resources and the distribution of income. Emphasis given to the economics of government expenditure and taxation.

ECON 132. State and Local Government Finance. 3 Units
Prerequisite(s): ECON 1A, ECON 1B, and MATH 24 or MATH 26A or MATH 30 with a minimum "C" grade.
Term Typically Offered: Fall only

Analysis of the economics of state and local government finance, with an emphasis on California's fiscal system.

ECON 135. Money and Banking. 3 Units
Prerequisite(s): ECON 1A and MATH 24 or MATH 26A or MATH 30 with a minimum "C" grade.
Term Typically Offered: Fall, Spring

Examines the role of financial markets, the banking system, and the Federal Reserve System in the economy. Included are an introduction to present value and the behavior of interest rates, analysis of money creation, and evaluation of monetary policy.

ECON 138. Monetary and Fiscal Policy. 3 Units
Prerequisite(s): ECON 1A, STAT 1, and MATH 24 or MATH 26A or MATH 30 with a minimum "C" grade; ECON 100A and ECON 140 recommended.
Term Typically Offered: Spring only

Analyzes the policies of central banks and fiscal authorities as they relate to the stability and growth of the macroeconomy. Examines the theoretical and empirical literature regarding the conduct of monetary and fiscal policy and applies the tools of economic analysis to understand macroeconomic policy debates.

ECON 140. Quantitative Economic Analysis. 3 Units
Prerequisite(s): ECON 1A, ECON 1B, STAT 1, and MATH 24 or MATH 26A or MATH 30 with a minimum "C" grade.
Term Typically Offered: Fall, Spring

Examination of the basics of conducting quantitative economic analysis. Included are basic concepts and methods of data analysis and research. Students will examine economic data using spreadsheets, will develop presentation skills, and be introduced to career opportunities.

ECON 141. Introduction to Econometrics. 3 Units
Prerequisite(s): ECON 1A, ECON 1B, ECON 140, and MATH 24 or MATH 26A or MATH 30 with a minimum "C" grade; ECON 100A or ECON 100B recommended.
Term Typically Offered: Fall, Spring

Covers the basics of regression analysis, estimation, and forecasting.
ECON 145. Economic Research Methods. 3 Units
Prerequisite(s): ECON 100A, ECON 100B, ECON 140 with a minimum "C" grade; GWAR certification before Fall 09, WPJ score of 70+, or at least a C- in ENGL 109 M/W.
Term Typically Offered: Fall, Spring
Covers the basics of conducting applied economic research: the selection of topic, literature survey, choice of research method, formulation of hypothesis, testing of hypothesis using empirical analysis, and summary and conclusions. Designed to enhance the students ability to integrate economic theory, quantitative research skills, and research.

ECON 150. Labor Economics. 3 Units
Prerequisite(s): ECON 1A, ECON 1B, and MATH 24 or MATH 26A or MATH 30 with a minimum "C" grade.
Term Typically Offered: Spring only
Economic analysis of labor markets, with special reference to employment, wage determination, and the role of government.

ECON 152. Economics of Education. 3 Units
Prerequisite(s): ECON 1B and MATH 24 or MATH 26A or MATH 30 with a minimum "C" grade.
Term Typically Offered: Fall only
Introduction to the various aspects of the economics of education. Applies the tools of economic analysis to education policy and problem solving. Topics include cost-benefit analysis of education, the signaling vs. human capital debate, race and gender issues in education, education production functions, and financing education at the elementary, secondary, and post-secondary levels. Emphasis placed on individual and social choice in education.

ECON 153. Health Economics. 3 Units
Prerequisite(s): ECON 1B and MATH 24 or MATH 26A or MATH 30 with a minimum "C" grade.
Term Typically Offered: Fall only
Introduction to the field of health economics. Applies the tools of economics to the production of health and health care. Special emphasis on health care institutions, the role of industry, health care reform, and the role of government, in addition to the public provision of care to the disadvantaged.

ECON 160. Industrial Organization. 3 Units
Prerequisite(s): ECON 1B and MATH 24 or MATH 26A or MATH 30 with a minimum "C" grade.
Term Typically Offered: Spring only
Analyzes firm decision-making in a variety of market settings. Topics include pricing and output decisions, entry and exit issues, marketing strategies, horizontal mergers, vertical integration, technological change, and U.S. antitrust policy.

ECON 161. Fundamentals of Game Theory. 3 Units
Prerequisite(s): ECON 1B, STAT 1, and MATH 24 or MATH 26A or MATH 30 with a minimum "C" grade.
Term Typically Offered: Spring only
An analysis of strategic games with sequential or simultaneous moves under complete information and uncertainty. Discussion of theory and techniques is combined with examination of specific classes of games and their application to real-world examples such as markets, voting, auctions, and international relations.

ECON 162. Energy Economics. 3 Units
Prerequisite(s): ECON 1B and MATH 24 or MATH 26A or MATH 30 with a minimum "C" grade.
Term Typically Offered: Fall only
Analyses the structure, conduct, and consequences of domestic and international energy markets. Particular emphasis on regulated industries including petroleum, electrical, and other power sources. The economic impact on energy markets of emerging technology is examined.

ECON 170. Public Economics and Regulation. 3 Units
Prerequisite(s): ECON 1B and MATH 24 or MATH 26A or MATH 30 with a minimum "C" grade.
Term Typically Offered: Spring only
Examination of government regulation of industry in the North American context: transportation, communication, energy, and other industries. Issues include deregulation, public ownership, pricing, and investment.

ECON 180. Urban Economics. 3 Units
Prerequisite(s): ECON 1B and MATH 24 or MATH 26A or MATH 30 with a minimum "C" grade.
Term Typically Offered: Spring only
Economic analysis and appraisal of models of urban development. Includes consideration of the rise of cities, land use, unemployment, poverty, housing, urban renewal, transportation, and the local public sector.

ECON 181. Economics of Racism. 3 Units
General Education Area/Graduation Requirement: GE AREA D, Race & Ethnicity Graduation Requirement (RE)
Term Typically Offered: Spring only
Economic analysis of the origins and development of racism, focusing mainly on its impact in the U.S. Differing theoretical explanations surrounding racism will be compared and evaluated.

ECON 184. Women and the Economy. 3 Units
Term Typically Offered: Fall only
Investigation of the current economic status of women in the U.S., of past and present economic discrimination experienced by women in the labor market, of the historical reasons for that discrimination and of the means and methods of ending that discrimination.

ECON 186. Sports Economics. 3 Units
Prerequisite(s): ECON 1B and MATH 24 or MATH 26A or MATH 30 with a minimum "C" grade.
Term Typically Offered: Fall, Spring
Applies the essential economic concepts and develops them with examples and applications from the sports industry. Covers basic economic concepts: economic principles, supply and demand, perfect competition, and monopoly behavior. It also applies these concepts to a variety of topics: the public finance of sports franchises, the costs/benefits of a sports franchise to a city, labor markets and labor relations, discrimination, and amateurism and college sports.
ECON 189. Economics at the Movies. 3 Units
Term Typically Offered: Fall only
Analysis of the use and treatment of economic theory and history in popular American films. Emphasis is placed on the topics of game theory, industrial organization, entrepreneurship, law and economics, labor economics, the stock market, and American economic history. The entertainment industry will also be examined from an economic perspective.

ECON 190. International Trade. 3 Units
Prerequisite(s): ECON 1A, ECON 1B and MATH 24 or MATH 26A or MATH 30 with a minimum "C" grade.
Term Typically Offered: Fall, Spring
Analysis of the causes and results of trade among nations. Introduction to modern trade theory is combined with examination of trade instruments and policy analysis.

ECON 192. International Finance. 3 Units
Prerequisite(s): ECON 1A, ECON 1B and MATH 24 or MATH 26A or MATH 30 with a minimum "C" grade.
Term Typically Offered: Fall, Spring
Critical examination of the theories and practices of financing trade among nations. International financial and monetary theories focus on how the world and financial system works, given globalization and international economic integration.

ECON 193. Development Economics. 3 Units
Prerequisite(s): ECON 1A, ECON 1B, and MATH 24 or MATH 26A or MATH 30 with a minimum "C" grade.
Term Typically Offered: Fall, Spring
An analysis of the factors involved in the growth of economies. The focus is on the application of development economics and growth theory to the process of economic growth in developing countries. Particular attention is given to variables that explain growth, namely, technological progress, population growth, saving, trade, human capital and education, and the role of institutions.

ECON 195. Economic Internship. 1 - 3 Units
Term Typically Offered: Fall, Spring
Supervised economic-related work experience, research, or teaching assistance to provide an opportunity for the student to apply principles and theories learned in the classroom to the "real world." Credit/No Credit

ECON 196E. Behavioral and Experimental Economics. 3 Units
Prerequisite(s): ECON 100B
Term Typically Offered: Fall only
Introduction to the fields of behavioral and experimental economics. Applies tools of microeconomic theory to the decisions made by individuals. Special emphasis on the utility maximization hypothesis, decision making in the face of risk and uncertainty, intertemporal choice, other regarding preferences, game theory, and neuroeconomics.

ECON 197A. Economics Exchange Mentee. 1 Unit
Prerequisite(s): Instructor permission.
Term Typically Offered: Fall, Spring
Provides opportunity for lower division students, transfer students, and newly declared majors to be mentored by more advanced upper division students or graduate students. The peer mentoring will help students meet academic deadlines, achieve academic success, become engaged in campus activities and get integrated into the Economics Department. Note: Units may not be applied towards unit requirement of the Economics major.
Credit/No Credit

ECON 197B. Economics Exchange Mentor. 1 - 3 Units
Prerequisite(s): Upper division or graduate student standing and instructor permission.
Term Typically Offered: Fall, Spring
Provides opportunity for advanced upper division students or graduate students to mentor lower division students. The peer mentoring will help students meet academic deadlines, achieve academic success, become engaged in campus activities and be integrated into the Economics Department. Note: Units may not be applied towards unit requirement of the Economics major; May be repeated for up to 3 units credit from ECON 197A & ECON 197B combined.
Credit/No Credit

ECON 198. Tutoring in Economics. 1 - 3 Units
Term Typically Offered: Fall, Spring
Supervised tutorials at educational institutions including Sacramento State where and when appropriate arrangements can be made. Prior approval for tutoring must be obtained from the Economics Department. Emphasis is on the development of effectiveness in the teaching of economics.
Credit/No Credit

ECON 199. Special Problems. 1 - 3 Units
Term Typically Offered: Fall, Spring
Individual projects or directed reading. Admission requires approval of the faculty sponsor and the Department Chair.
Credit/No Credit

ECON 200A. Advanced Macroeconomic Theory. 3 Units
Prerequisite(s): ECON 141 and ECON 200M.
Term Typically Offered: Fall, Spring
Theories of the determinants of aggregate income, employment and prices. May be taken independently of ECON 200B.

ECON 200B. Advanced Microeconomic Theory. 3 Units
Prerequisite(s): ECON 200M.
Term Typically Offered: Fall, Spring
Theories of the consumer, producer, and market structure. May be taken independently of ECON 200A.
ECON 200C. Advanced Applied Economics. 3 Units
Prerequisite(s): ECON 200A, ECON 200B, and ECON 241.
Term Typically Offered: Fall, Spring

Applies empirical analysis to topics in microeconomics and macroeconomics. Topics may include stationarity, vector autoregression, vector error correction models, calibration, fixed effects, instrumental variables, multinomial logit, and duration models. Students implement these models using econometric software. Students will write an empirical paper intended to become a prospectus for the master’s thesis.

ECON 200M. Mathematics for Economists. 3 Units
Prerequisite(s): ECON 100A, ECON 100B, MATH 26A.
Term Typically Offered: Fall, Spring

Equips students with the mathematical techniques necessary for the study of economics and econometrics at the graduate level. Covers linear algebra, derivatives, comparative static analysis, optimization, integrals, and differential equations, with specific applications from economic and econometric theory.

ECON 204. Business Economics. 3 Units
Term Typically Offered: Fall, Spring

Intensive one-semester course covering both macroeconomics and microeconomics. Emphasis is on economic analysis and policy. Designed for graduate students who have not taken ECON 1A and ECON 1B or their equivalents.

ECON 213. U.S. Economic Development in Historical Perspective. 3 Units
Prerequisite(s): Admission to MA program in Economics.
Term Typically Offered: Fall, Spring

Introduction and analysis of American economic development from a historical perspective, focusing on the trajectory of American economic development from recent advances in theoretical and empirical economics literature. Cover topics on long-term economic growth, technological change, business cycles and fluctuations, financial markets, labor markets, and economic impacts of social change.

ECON 230. Public Finance. 3 Units
Prerequisite(s): ECON 200B.
Term Typically Offered: Fall, Spring

An analysis of the allocation and distribution effects of government expenditures and taxation.

ECON 238. Monetary and Fiscal Policy. 3 Units
Prerequisite(s): ECON 200A.
Term Typically Offered: Fall, Spring

Analyzes the policies of central bank and fiscal authorities as they relate to full employment and stability of the national economy.

ECON 241. Applied Econometric Analysis. 3 Units
Prerequisite(s): ECON 141
Corequisite(s): ECON 200M
Term Typically Offered: Fall, Spring

Applied econometric analysis with emphasis on the use of econometric techniques in economic research settings, expressing economic theory in the form of econometric models, data collection, estimation, and interpretation of results. Students work individually or as a team on a current research topic from various fields of economics preselected or approved by instructor.

ECON 251. Urban Problems, Economics and Public Policy. 3 Units
Term Typically Offered: Fall, Spring

Historical development, economics and possible policy solutions of the most pressing problems facing central cities and urban areas in the U.S. are presented. Problems discussed include poverty, crime, urban abandonment/suburban sprawl, edge cities, deteriorating infrastructures, and fiscal stress. Cross Listed: PPA 251; only one may be counted for credit.

ECON 260. Industrial Organization and Performance. 3 Units
Prerequisite(s): Classified graduate status in Economics or instructor permission.
Term Typically Offered: Fall, Spring

A modern analysis of industry structure, conduct, and performance. Emphasis is placed on the use of game theory to address firm behavior, including price and output decisions, entry and exit, horizontal mergers, technological change, and marketing issues.

ECON 263. Food Economics. 3 Units
Prerequisite(s): Graduate standing or instructor permission.
Term Typically Offered: Fall, Spring

Introduction to advanced economic theory and econometric methods applied to the economics of food with emphasis on food consumption and the complexity of individual food choices. Utilizing cost-benefit analyses and concepts like constrained utility maximization, household production, opportunity costs of time, and information search, implications for a global food system will be derived. We will apply learned concepts to health and environmental concerns by discussing the recent applied economics and policy evaluation literature.

ECON 265. Cost Benefit Analysis. 3 Units
Term Typically Offered: Fall, Spring

Examination of the theories, foundations, and philosophies of economic welfare. Specifically, the basic techniques of cost-benefit analysis will be presented and applied to various policy issues.

ECON 290. International Trade. 3 Units
Prerequisite(s): Classified graduate status in Economics or instructor permission.
Term Typically Offered: Fall, Spring

Analysis of modern trade theories, their empirical relevance, and the role of multinational firms in the evolution of international trade patterns. Discussion focuses on theoretical and empirical evaluation of trade policy instruments. Various trade agreements are also discussed in the context of economic integration and globalization. Attention is also given to foreign direct investment as a vehicle of globalization and the challenges it poses to both multinational firms and host countries.

ECON 295. Economic Internship. 1 - 3 Units
Term Typically Offered: Fall, Spring

Supervised work experience or research on economic topics in government, financial, business, charitable or other kinds of institutions to provide an opportunity for the student to apply principles and theories learned in the classroom to the “real world”. Partial supervision may be supplied by persons in the institution under study. Credit/No Credit
ECON 298. Tutoring In Economics. 1 - 3 Units
Term Typically Offered: Fall, Spring
Supervised tutorials at educational institutions including Sacramento State where and when appropriate arrangements can be made. Prior approval for tutoring must be obtained from the Economics Department. Emphasis is on the development of effectiveness in the teaching of economics. Credit/No Credit

ECON 299. Special Problems. 1 - 3 Units
Term Typically Offered: Fall, Spring
Individual projects or directed reading. Admission requires approval of the faculty sponsor and the Department Chair. Credit/No Credit

ECON 500. Master's Thesis. 3 Units
Prerequisite(s): Advanced to candidacy and chair permission of his/her thesis committee
Term Typically Offered: Fall, Spring
Completion of a thesis approved for the Master's degree. Should be taken in final semester prior to the completion of all requirements for the degree.

BA in Economics
Units required for Major: 42-45

Program Description
The Economics program is appealing to students due to the quality of its faculty, the breadth of its course offerings, and the amount of choice it offers the student in planning his or her coursework. In addition to training in the traditional economics areas, the program offers such diverse courses as the California economy, state and local finance, energy, environmental and resource economics, and urban economics. Students find the Department of Economics congenial to their educational and career objectives.

Note: Students planning ahead for graduate work in Economics should consult an advisor regarding additional and/or focused coursework in mathematics, statistics, and computer science.

Note: The Department schedules courses so that the upper division requirements for the BA can be completed at night within two academic years. Evening students should contact the Department for assistance in planning a two-year program. Failure to do so may mean a delay in graduation due to scheduling problems.

Pre-Major Requirements
Freshman or transfer students interested in the Economics Major are admitted as Pre-Major Economics students.

To change to an Economics major, all students are required to complete the following grade and course requirements and submit a Declaration of Major form to the Economics Department along with transcript copies:

1. An overall GPA of 2.0 and be in good academic standing.
2. Completion of the Pre-Major Required Courses with a "C" or better in each course. Only first or second attempts will be considered.

Program Requirements

Pre-Major Required Courses (12 Units)

<table>

</tbody>
</table>

1 Additional upper division courses in Economics, selected in consultation with a faculty advisor.
Certificate in Economics Education

Units required for Certificate: 15

Program Description

The Economics Education Certificate Program is designed to give participants a solid foundation in economics that will enable them to teach the subject in primary and secondary schools. The Certificate Program is intended for

1. future or practicing teachers who desire credential authorization to teach the one-semester economics course required of all California public high school students; and
2. future or practicing teachers who wish to infuse economics into other K-12 curricula.

Students majoring in Liberal Studies or Social Science or completing a teacher credential program are especially encouraged to participate.

Note: Participants who are not enrolled in Sacramento State may take these courses through the College of Continuing Education.

For more information about the program, contact: Director of the Center for Economic Education, Professor David M. Lang, (916) 278-7077.

Minimum Grade Requirement

A grade of “B” or higher must be obtained in each course for the Certificate.

Total Units: 15

¹ The ECON 195 requirement will enable the student to serve as a Teaching Assistant to a professor teaching either ECON 1A or ECON 1B. Students must receive the permission of the Director of the Center for Economic Education prior to enrolling in ECON 195 for the Certificate program and will be assigned to a professor by the Director.

² not including ECON 104

MA in Economics

Total units required for MA: 30
• Graduate Record Examination (GRE) scores (verbal, quantitative, and analytical portion); and
• TOEFL scores, if applicable.

In addition to the above documents, arrange for two letters of recommendation to be sent to the Economics Department. Any applicant not meeting the first three admission requirements as specified above should submit to the Department in writing his/her reasons for requesting a waiver of the admission requirements.

Approximately six weeks after receipt of all items listed above, a decision regarding admission will be mailed to the applicant.

Minimum Units and Grade Requirement for the Degree

Units required for the MA: 30

Minimum Cumulative GPA: 3.0

Advancement to Candidacy

Each student must file an application for Advancement to Candidacy as soon as the graduate student has:

• successfully completed the following, and with a minimum grade of “B”:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>ECON 141</td>
<td>Introduction to Econometrics</td>
<td>3</td>
</tr>
<tr>
<td>ECON 200A</td>
<td>Advanced Macroeconomic Theory</td>
<td>3</td>
</tr>
<tr>
<td>ECON 200B</td>
<td>Advanced Microeconomic Theory</td>
<td>3</td>
</tr>
</tbody>
</table>

• be enrolled, or have successfully completed ECON 200C;
• been recommended for advancement by the Graduate Committee; and
• taken the Writing Placement for Graduate Students (WPG) or taken a Graduate Writing Intensive (GWI) course in their discipline within the first two semesters of coursework at California State University, Sacramento or secured approval for a WPG waiver.

Advancement to Candidacy forms are available on the Office of Graduate Studies website. The student fills out the form after planning a degree program in consultation with the Economics Department Graduate Coordinator. The completed form is then returned to the Office of Graduate Studies for approval.

Program Requirements

The following cannot be used as part of the 30 units toward the master’s degree:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>ECON 112</td>
<td>European Economic History</td>

Total Units 30

¹ Of these 12 units, six units (i.e., 2 courses) must come from 200-level courses. Note the following:

- There can be no 100-level/200-level duplication of similar courses (e.g., you cannot receive credit for ECON 130 and ECON 230, ECON 138 and ECON 238, etc.).
- Selected courses (e.g., Math, Statistics, or Computer Science) from other departments may be allowed as substitutes with the approval of the Graduate Coordinator.
- ECON 295 and ECON 298 do not count as electives toward satisfying the 12 unit requirement without the approval of the Graduate Coordinator.

Minor in Economics

Units required for Minor: 21, twelve of which must be upper division Economics units

Program Description

A minor in Economics may be especially attractive to students majoring in Business Administration, Government, and Environmental Studies or in one of the other Social Science disciplines. The Economics minor adds both theoretical and analytical depth. In addition, it provides the historical and institutional background important to an understanding of contemporary economic issues. It offers students in other majors a broader-based undergraduate education while widening the choice of job possibilities. Employers view the minor in Economics favorably.

Environmental Studies

College of Social Sciences and Interdisciplinary Studies

Program Description

The Environmental Studies program can help students use the resources of the entire University to gain an interdisciplinary understanding of such increasingly serious issues as pollution, wildlife and wilderness preservation, land use, biodiversity loss, resource depletion, energy conservation, and a generally healthful relationship between nature and society. The program offers both a major and a minor and also assists students in constructing special majors and identifying programs and individual courses in various departments that concern themselves with environmental questions.

The major is designed to help students understand environmental issues in their political, social, and scientific context. Because dealing with environmental issues requires an interdisciplinary approach, we emphasize the development of strong writing, research, and quantitative skills and a broad liberal arts perspective.

Environmental Studies students find work primarily in research, analysis, and enforcement activities in state, federal, and local governments. Others work for nonprofit organizations such as The Nature Conservancy, Audubon Society, and Sierra Club. Some work as consultants to private firms, and some graduates become teachers in primary schools, secondary schools, and universities. A few have created their own careers in such areas as organic farming, managing cooperatives, and social action.

Environmental Studies students often go on to professional and graduate schools in such fields as law, ecology, engineering, journalism, economics, public health, political science, public administration, special education, environmental policy, and human ecology.

Degree Programs

BA in Environmental Studies (p. 814)

BS in Environmental Studies (p. 815)

Minor in Environmental Studies (p. 816)

Special Features

- Sacramento, as the state capital, offers excellent opportunities for study and employment. One of several ways to incorporate these opportunities into a student’s academic program is through Environmental Studies internship experiences.

- The faculty also carries on a field study program to introduce students to as many features as possible of the extraordinarily varied Northern California region.

- Faculty in the Environmental Studies Department represent disciplines including Biology, Ecology, Toxicology, Political Science, Environmental Engineering, among others.

Career Possibilities

Environmental Analyst · Pollution Analyst · Pollution Measurement Technician · Environmental Planner · Naturalist · Environmental Consultant · Energy Conservation Specialist · Environmental Journalist · Environmental Health Specialist · Lobbyist · Environmental Educator · Environmental Economist · Recycling Coordinator · Hazardous Materials Specialist · Legislative Researcher · Water Quality Technician · Park Interpretative Specialist · Transportation Planner · Waste Management Specialist · Levee Management Specialist · Conservation Analyst · Environmental Investigator · Environmental Interpreter · Environmental Resource Planner · Park Ranger · Permitting Officer · Ranger · Habitat Assessment Specialist · Environmental Compliance Officer · Legislative Aide · Air Pollution Specialist · Energy Manager · Game Warden · Wildlife Manager · Hazardous Waste Specialist · Pollution Prevention Specialist · Compliance Program Manager · Community Education Officer · Environmental Health and Safety Officer · Mosquito Control Technician · Public Works Program Manager · Water Conservation Manager · Environmental Impact and Review Assessment · Environmental Scientist · Environmental Policy Analyst

ENVS 10. Introduction to Environmental Science. 3 Units
General Education Area/Graduation Requirement: Life Forms (B2)
Term Typically Offered: Fall, Spring, Winter

Course looks at the earth as an ecosystem composed of biological, chemical, and physical systems. Focus is on the interaction of these systems with each other and with human population, technology, and production. Students should acquire the fundamentals of a scientific understanding of the ecological implications of human activities. Specific topics treated within the context of ecosystem analysis include energy flows, nutrient cycles, pollution, resource use, climate change, species diversity, and population dynamics.

ENVS 10H. Honors Environmental Science. 3 Units
General Education Area/Graduation Requirement: Life Forms (B2)
Term Typically Offered: Fall, Spring, Summer

The earth as an ecosystem composed of biological, chemical, and physical systems. Focus is on the interaction of these systems with each other and with human population, technology, and production. Students should acquire the fundamentals of a scientific understanding of the ecological implications of human activities. Specific topics treated within the context of the ecosystem analysis include energy flows, nutrient cycles, pollution, resource use, climate change, species diversity, and population dynamics. Students read important original research on topics. All students participate in a semester long project that applies the principles of the course to a real environmental issue.

ENVS 11. Environmental Issues and Critical Thinking. 3 Units
General Education Area/Graduation Requirement: Critical Thinking (A3)
Term Typically Offered: Fall, Spring

Examines Western cultural values and personal beliefs toward the environment. Teaches critical thinking skills to analyze issues to make informed choices that may impact the earth, its resources and their management as consumers, leaders, professionals and moral agents.

ENVS 21. First Year Seminar: Becoming an Educated Person. 3 Units
General Education Area/Graduation Requirement: Understanding Personal Development (E)
Term Typically Offered: Fall, Spring

Introduction to the nature and possible meanings of higher education, and the functions and resources of the University. Designed to help students develop and exercise fundamental academic success strategies and to improve their basic learning skills. Provides students with the opportunity to interact with fellow classmates and the seminar leader to build a community of academic and personal support.

ENVS 110. Contemporary Environmental Issues. 3 Units
Term Typically Offered: Fall, Spring

Examination of a variety of environmental issues with emphasis on the social aspects of the problems and solutions. The class is conducted primarily through discussion, with an unusually high degree of student responsibility. Group and individual projects are designed to involve students in community affairs as well as to give them an opportunity to develop a personal perspective on environmental issues.

ENVS 111. Environmental Ethics. 3 Units
Term Typically Offered: Fall, Spring

Consideration of how human beings should act with regard to the non-human natural world in the context of complex societal needs. Students will use critical thinking skills to integrate insights from the sciences, social sciences, and humanities to make ethical decisions.

ENVS 112. International Environmental Problems. 3 Units
Prerequisite(s): GWAR certification before Fall 09; or WPJ score of 80+; or 3-unit placement in ENGL 109M or ENGL 109W; or 4-unit placement in ENGL 109M or ENGL 109W and co-enrollment in ENGL 109X; or WPJ score 70 or 71 and co-enrollment in ENGL 109X.
General Education Area/Graduation Requirement: Writing Intensive Graduation Requirement (WI)
Term Typically Offered: Fall, Spring

Global perspective on current problems of environmental protection and resource use. Population growth, food production, industrialization, technology and cultural change are considered, with heavy emphasis on the social dynamics of environmental problems. A variety of political views is studied, and an attempt is made to develop a perspective useful to students in personal and political decisions.

ENVS 120. Quantitative Methods for Environmental Science. 3 Units
Prerequisite(s): Must be an ENVS major or minor; STAT 1 or instructor permission.
Term Typically Offered: Fall, Spring

Research tools and methods used by environmental professionals including selected statistical procedures, data sources and presentation and interpretation of results. Students will become familiar with the wide range of equipment available to fit their special needs including the computer time-sharing system.

ENVS 121. Field Methods in Environmental Science. 2 Units
Prerequisite(s): Must be an ENVS major or minor
Term Typically Offered: Fall, Spring, Summer

This field course includes the direct observation of human impact on specific environments and examples of mitigation strategies. Students will learn information gathering and data presentation methodologies useful in environmental impact assessment. Lecture three hours per week; one-day and weekend field trips will be arranged.

Note: Course also substitutes for ENVS 175.

Field trip(s) may be required.

ENVS 122. Environmental Impact Analysis: CEQA and NEPA. 3 Units
Term Typically Offered: Fall only

Review of legislative and judicial requirements for environmental impact analysis. Students will be asked to review actual project environmental impact reports, analyze the methods employed, understand the relationship of the report to the planning process, and prepare such a document.

Note: It is recommended that students complete ENVS 128 or have some actual experience with environmental impact documentation before taking this course.
ENVS 124. Social Justice in Interdisciplinary Perspective. 3 Units
Prerequisite(s): Sophomore standing or instructor permission.
Term Typically Offered: Fall, Spring

Examines the nature and forms of social justice and injustice. Addresses key philosophical and theoretical models and debates over the meaning of social justice, using historical and contemporary examples to highlight important concepts and controversies. Faculty from different departments within SSIS, and occasionally from other colleges, will address how their discipline understands and analyzes issues of social justice. Students will be encouraged to critically assess the assumptions of various perspectives on social justice, and to address the relationship of academe and social activism in achieving social justice.

Cross listed as ANTH 130, ID 124, ETHN 124, FACS 124 and SOC 124. Only one may be counted for credit.

ENVS 128. Environment and the Law. 3 Units
Term Typically Offered: Spring only

Introduction to environmental law, including: the evolution of environmental legislation, environmental issues in the court system, environmental regulation and administrative law, and environmental torts. Emphasis is on understanding legal process and the special challenges environmental problems present to the legal system.

Cross Listed: GOVT 128; only one may be counted for credit.

ENVS 130. Environmental Toxicology. 3 Units
Prerequisite(s): CHEM 6A or instructor permission.
Term Typically Offered: Spring only

Focuses on the aspects of toxicology which enable us to study and explore environmental issues concerning human and ecosystem health. It will explore the impact of human activity since World War II in contributing to human disease and ecosystem disruption. Risk perception and communication as it concerns environmental toxicology will also be discussed.

ENVS 135. California Water and Society. 3 Units
Prerequisite(s): ENVS 120 or instructor permission
Term Typically Offered: Fall, Spring

This course provides the historical, scientific, legal, institutional, and economic background needed to understand the social and ecological challenges of providing water for California's growing population, agricultural economy, and other uses - all of which are made more complex by climate change. We will look at past and current debates around cases ranging from local issues on the American River to statewide issues that converge in the Sacramento-San Joaquin Delta. Both physical and social science research skills will be developed.

ENVS 137. Conservation and Society. 3 Units
Prerequisite(s): ENVS 10 and BIO 1
Term Typically Offered: Fall, Spring

Course will introduce students to the interdisciplinary field of conservation biology through the lens of modern society. Students will acquire a basic understanding of the history of the field of conservation, and the values that drive our desire to preserve species and natural systems. Students will learn about conservation challenges, will analyze the scientific and social factors that contribute to addressing those challenges, and will learn to appreciate the diverse perspectives that are vital in modern conservation.
ENVS 151. Restoration Ecology. 3 Units
Term Typically Offered: Spring only

Overview of concepts and practices in restoration ecology, emphasizing
the application of ecological principles to restoration design,
implementation, and monitoring. Major course topics will include
historical ecology, soils and hydrology, plant and animal ecology, exotic
species, endangered species concerns, mitigation, monitoring, planning,
and assessment as they apply in a restoration context. Students will work
in local restoration projects; field trips required.
Field trip(s) may be required.

ENVS 158. Wetlands Ecology. 3 Units
Term Typically Offered: Fall only

Introduces and discusses characteristics of wetland systems; principles
of wetland ecology; functions of wetlands; and regulations and permitting
process regarding development near and within wetlands. Appropriate for
students planning careers in natural resource management. Though not a
substitute for professional training in wetlands delineation and functional
assessment, students will gain a basis for such assessments. Familiarity
with basic principles of chemistry, physics, and biology recommended.
Note: Field trips required.
Field trip(s) may be required.

ENVS 163. Ethnoecology. 3 Units
Term Typically Offered: Fall only

Evaluates sustainable management of ecosystems by local indigenous
people, using traditional resource management, traditional ecological
knowledge and Western science. Familiarizes students with the fields of
ethnobiology, ethnoecology, and historical ecology. Students learn
about the relationship between people and plants, with a focus on how
traditional plant knowledge reflects and is reflected by environmental
perceptions.
Note: Field Trip. Required field trip to Chawse Indian Grinding Rocks State
Park. Fee Course. $15 per student.
Fee course.
Field trip(s) may be required.

ENVS 165. American Environmental History. 3 Units
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall, Spring

Traces the development of the changing relationship between human
society and the natural environment. Focuses on changing attitudes and
behaviors toward the environment from the pre-colonial era through the
present. Also examines the relationship between industrialization and
the technological revolution and nature and examine past and present
conservation and environmental movements.
Cross Listed: HIST 165; only one may be counted for credit.

ENVS 171. Environmental Politics and Policy. 3 Units
Prerequisite(s): instructor permission.
Term Typically Offered: Spring only

Politics of human interaction with land, air and water. Political analysis of
agenda setting, policy formation and administration (national, state and
local) of environmental programs. Focus on contemporary issues such as
energy alternatives, management of toxics, land development, and
pollution control. Course also substitutes for ENVS 128.
Cross Listed: GOVT 171; only one may be counted for credit.

ENVS 175. Aquatic Pollution Assessment. 3 Units
Prerequisite(s): BIO 160, CHEM 1A or concurrent enrollment; or instructor
permission.
Term Typically Offered: Fall, Spring

Examines both the negative and positive impacts that anthropogenic
effects have on groundwater, streams, and lakes by utilizing the
application of field sampling techniques and laboratory analysis currently
used to assess pollution impacts. Introduces the interrelationships
among plants, animals and environmental factors within polluted aquatic
ecosystems. Emphasizes laboratory and field procedures used in
strategies taken to assess and manage these impacts.
Note: Course also substitutes for ENVS 121.

ENVS 186B. Ecological and Environmental Issues Seminar. 1 Unit
Prerequisite(s): BIO 10 or both BIO 1 and BIO 2.
Term Typically Offered: Fall, Spring

Series of at least 10 seminars in ecological and environmental issues.
Topics with each seminar will vary each semester.
Note: May be repeated for credit. No more than one unit of ENVS 186B
may be counted toward the upper division major requirement. Cross
Listed: BIO 186B; only one may be counted for credit.
Credit/No Credit

ENVS 187. Environmental Studies Seminar. 1 Unit
Term Typically Offered: Fall, Spring

Students will participate in the semester-long University seminar and will
be exposed to a variety of environmental issues and topics presented
by speakers from CSUS, the USGS, government and professional
organizations, among many others. Topics include issues such as
climate change, water use and conversation, environmental sustainability,
environmental policy and decision-making, and many important regional
issues.
Credit/No Credit

ENVS 190. Senior Thesis. 3 Units
Prerequisite(s): Instructor permission and completion of all lower and
upper division Environmental Studies courses.
Term Typically Offered: Fall, Spring

Explores an environmental problem or issue in great depth. It includes
a detailed review of the scientific literature, synthesis, and integration
of information from the literature, and evaluation of the information
leading to conclusions and recommendations that address the problem
or issue. Thesis subjects are chosen by the student, and can be from a
myriad perspectives addressed in the Environmental Studies curriculum
including scientific, social, political, economic, and cultural issues.

ENVS 195. Environmental Studies Internship. 3 Units
Term Typically Offered: Fall, Spring

Supervised work experience in an approved legislative or administrative
office at some level of local, state or federal government, or in a public or
private organization that is concerned with the environment. Supervision
is provided by the faculty instructor and responsible officials in the work
situation.
Note: Open to majors only, subject to instructor permission.
Credit/No Credit
ENVS 195M.  Mini Internship.  1 Unit
Term Typically Offered: Fall, Spring

This introductory work experience is designed for sophomores and juniors. The student must complete 45 hours of environmentally related work in a volunteer position with an environmental organization or participation in an environmentally focused event. Supervision is provided by the faculty instructor and responsible officials in the work situation.

Note: Open to majors only, subject to instructor permission.

Credit/No Credit

ENVS 196G.  Youth Recreation in Camp Settings.  3 Units
This course examines camp programs in a wide variety of settings, for a variety of populations. Topics cover camp theories, camp management, risk-management, activity planning, inclusive programming, and staff training. Includes an emphasis on leadership, supervision, and organizational development of camp programs. Course uses lecture, field experiences, guest speakers, and service learning.

ENVS 199.  Special Problems.  1 - 3 Units
Term Typically Offered: Fall, Spring

Individual projects or directed reading.

Note: Open only to students who are competent to carry on individual work. Admission requires permission of the Director and the faculty member who will direct the work.

Credit/No Credit

ENVS 295.  Practicum.  2 - 6 Units
Prerequisite(s): Permission of faculty advisor and director.
Term Typically Offered: Fall, Spring

Graduate internship experiences in practical setting.

Note: Open only to graduate students specializing in environmental studies.

Credit/No Credit

ENVS 296.  Experimental Offerings in Environmental Studies.  1 - 3 Units
Prerequisite(s): Instructor permission.
Term Typically Offered: Fall, Spring

Courses offered on an experimental basis.

BA in Environmental Studies

Units required for Major: 66-69

Program Description

The Environmental Studies program can help students use the resources of the entire University to gain an interdisciplinary understanding of such increasingly serious issues as pollution, wildlife and wilderness preservation, land use, biodiversity loss, resource depletion, energy conservation, and a generally healthful relationship between nature and society.

The major is designed to help students understand environmental issues in their political, social, and scientific context. Because dealing with environmental issues requires an interdisciplinary approach, we emphasize the development of strong writing, research, and quantitative skills and a broad liberal arts perspective.

Minimum Grade Requirement

A minimum grade of “C-” is required in all courses required for the Environmental Studies B.A. and B.S. majors.

Minor in Environmental Studies

Units required for Minor: 25

Program Description
The Environmental Studies program can help students use the resources of the entire University to gain an interdisciplinary understanding of such increasingly serious issues as pollution, wildlife and wilderness preservation, land use, biodiversity loss, resource depletion, energy conservation, and a generally healthful relationship between nature and society.

Minimum Grade Requirement
A minimum grade of "C-" is required in all courses required for the Environmental Studies minor.

Total Units 25

Ethnic Studies

College of Social Sciences and Interdisciplinary Studies
Program Description
Ethnic Studies is an interdisciplinary approach to the study of the cultures, languages, historical, and contemporary issues relating to African Americans, Asian Americans, Chicana/os-Latina/os, and Native Americans. The program directs students to critically examine the cultural contributions made by these groups to world civilization and to American society. Ethnic Studies challenges all students to analyze existing generalizations, theories, and concepts about racial and ethnic groups in order to develop valid generalizations, concepts, and theories about the people and their experiences. Students are encouraged to actively work to eliminate problems based on discrimination.

Students are also encouraged to blend professional area studies with Ethnic Studies. For example, a student may major in Ethnic Studies and minor in Business Administration. Similarly, students with a degree in Engineering Technology may minor in Ethnic Studies and emerge well-prepared professionally to assume middle management and supervisory positions in a multicultural society. Ethnic Studies majors and minors enter careers and professions in both the public and private sectors. Program advising and other information can be obtained from the Ethnic Studies Office.

Degree Programs
BA in Ethnic Studies (p. 823)
Minor in Ethnic Studies (p. 824)
Minor in Asian American Studies (p. 824)
Minor in Chicana/o Latina/o Studies (p. 824)
Minor in Native American Studies (p. 825)
Certificate in Pan African Studies (p. 823)

Special Features
- A student who majors in Ethnic Studies will not only have a strong background in one of the seven areas of specializations but will also gain broad background knowledge of other ethnic groups. Each program area develops its major focus in coordination with other program areas.
- Ethnic Studies encourages students to actively participate in community service learning projects. These projects afford students such opportunities as working directly with community-based organizations and/or agencies, local high schools, and/or middle schools.
- Ethnic Studies regularly sponsors cultural programs providing an opportunity for learning more about the experiences of the social groups framing the content of the Ethnic Studies program.

Career Possibilities
The rich educational experience of Ethnic Studies majors and minors are excellent preparation for careers and professions in the public and private sectors, as well as graduate school. Ethnic Studies majors and minors enter government service, politics, community/social service, business, public school teaching/administration, higher education teaching/administration, social work, counseling, law, journalism, and much more.

ETHN 1A. Elementary Swahili. 3 Units
Term Typically Offered: Fall, Spring
Introduction to the language of Swahili speaking people. Emphasis is on developing vocabulary and writing skills. Attention will be given to understanding the relationship of language to culture.

ETHN 1B. Elementary Swahili. 3 Units
Prerequisite(s): ETHN 1A or its equivalent; or instructor permission.
Term Typically Offered: Fall, Spring
Continuation of ETHN 1A with more emphasis on developing reading and listening skills along with further developing writing abilities. Provides deeper knowledge of the customs, traditions and experiences of Swahili speaking people.

ETHN 10. Africa: Myths and Realities. 3 Units
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall, Spring
Introduction to African Studies. Examines the most common myths found in both popular and academic literature about Africa and its people.

ETHN 11. Introduction to Ethnic Studies. 3 Units
General Education Area/Graduation Requirement: GE AREA D, Race & Ethnicity Graduation Requirement (RE)
Term Typically Offered: Fall, Spring
Introduces the diverse institutional, cultural, and historical issues relating to the past and present life circumstances of Asian Americans, Mexican Americans, Black Americans, and Native Americans. Designed to introduce students to information presented in upper division courses with ethnic studies content.
ETHN 11H. Introduction to Ethnic Studies (Honors). 3 Units
General Education Area/Graduation Requirement: GE AREA D, Race & Ethnicity Graduation Requirement (RE)
Term Typically Offered: Fall, Spring

Introduces the diverse institutional, cultural, and historical issues relating to the past and present life circumstances of Asian Americans, Mexican Americans, Black Americans, and Native Americans. Focuses may include leadership, identity development, problem solving skills, community organizing and empowerment. Designed to introduce students to information presented in upper division courses with ethnic studies content.

Note: Fulfills the General Education requirements of Area D1A (Foundations in the Social and Behavioral Sciences) as well as the General Education Honors Program.

ETHN 14. Introduction to Asian American Studies. 3 Units
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall, Spring

Introduction to the basic concepts, theoretical perspectives, and research methodologies in comparison to other social science disciplines. The intersection of class, race/ethnicity, and gender of various Asian American and non-Asian American groups will be explored from a socio-historical perspective.

ETHN 21. First Year Seminar: Becoming an Educated Person. 3 Units
General Education Area/Graduation Requirement: Understanding Personal Development (E)
Term Typically Offered: Fall, Spring

Introduction to the nature and possible meanings of higher education, and the functions and resources of the University. Designed to help students develop and exercise fundamental academic success strategies and to improve their basic learning skills.

Note: Only open to students admitted to EOP Learning Communities Program.

ETHN 30. Introduction to Chicano/Latino Studies. 3 Units
General Education Area/Graduation Requirement: Race & Ethnicity Graduation Requirement (RE), GE AREA D
Term Typically Offered: Fall, Spring

Introduction to exploring the Chicano/Latino experience in the U.S. An overview of the diverse and multiple experiences of people of Mexico, Cuba, Puerto Rico, Dominican Republic, Central and South America. From a socio-historical perspective, the intersections of class, race/ethnicity, and gender will be explored.

ETHN 50. Native American Religion and Philosophy. 3 Units
Term Typically Offered: Spring only

In-depth study into the principles of Native American religion and philosophical thought and the resulting impact of European culture upon the Native American societies.

ETHN 53. Introduction to Native American Studies. 3 Units
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall only

Broad overview to the field of Native American Studies, including history, sovereignty, popular imagery, economic development, literature, philosophy, religion, urbanization, gender, social issues, and cultures of native peoples. Introduction to Native American Studies; recognizes intra-tribal, trans-national, and various historical, cultural, and political relationships, and issues through an interdisciplinary approach. The primary focus will be post 1900.

ETHN 70. Introduction to Pan African Studies. 3 Units
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall only

Introduction to Pan African Studies. It is intended to introduce students to the context from which Pan African Studies arose, including the Western intellectual tradition, and to consider the substantive objections to Pan African Studies as a legitimate academic discipline. It is intended to show humanities and social science emphases of the discipline, and the interdisciplinary character of the discipline as a whole. Upon completion, students should have a broad exposure to the subject matter of the discipline, an acute appreciation of some of its philosophical concerns, a recognition of some of the principal methodologies employed by its scholars, some familiarity with major scholars in the discipline, and the ability to explore these subjects independently.

ETHN 71. Leadership in the African Diaspora. 3 Units
Term Typically Offered: Spring only

Provides students with an understanding of the unique contours of leadership throughout the African Diaspora through an interdisciplinary approach to understanding particular problems, necessities and styles of leadership. Examines leaders and leadership roles within the African Diaspora with an emphasis on a variety of positions and contexts in the areas of politics, religion, art, and education, including the international, national, and local community (grassroots) arenas.

ETHN 72. Black Images in Popular Culture. 3 Units
Term Typically Offered: Fall, Spring

This course is designed as a survey of the Black image within popular culture. Students will interrogate the roots of African American stereotypes within North American culture. Through an understanding of this history, we will assess how these stereotypes have evolved over time and the role they have played in constructing and positioning African Americans in American society. Students examine the ways in which African Americans actively construct images of themselves for a variety of political and social purposes.

ETHN 94. CAMP Transition and Problem Solving. 3 Units
Term Typically Offered: Fall, Spring

Designed for CAMP students new to University life, form and functions. The three hour lecture/discussions per week are focused on assisting students with making a successful transition to the University.

Note: May be repeated once for credit.

Credit/No Credit
ETHN 96B. Contemporary Issues and Social Change. 3 Units
Term Typically Offered: Fall, Spring

Generation after generation, university students have been key constituents in movements for social change. From public demonstrations to research studies, colleges and universities afford countless opportunities for students to advocate for a better world. This course explores how students can utilize university resources to explore interests and concerns, hone academic skills and contribute to social change.

ETHN 98. Co-Curricular Activities. 1 - 3 Units
Term Typically Offered: Fall, Spring

Co-curricular activities related to the subject matter and intellectual concerns in Ethnic Studies.

Note: Recommended for students new to the university experience and students having completed fewer than 45 units of course work. May be repeated twice for total credits not to exceed 6 units.

Credit/No Credit

ETHN 100. Ethnic America. 3 Units
General Education Area/Graduation Requirement: GE AREA D, Writing Intensive Graduation Requirement (WI), Race & Ethnicity Graduation Requirement (RE)
Term Typically Offered: Fall, Spring, Summer

Through an interdisciplinary approach, introduces the four major American ethnic groups - Black, American Indian, Chicano, Asian American. Focuses on themes common to all four groups (racism, economic and political oppression) and demonstrates the varied contributions of each culture to American social and economic life. Prerequisite: GWAR certification before Fall 09; or WPJ score of 80+; or 3-unit placement in ENGL 109M or ENGL 109W; or 4-unit placement in ENGL 109M or ENGL 109W and co-enrollment in ENGL 109X; or WPJ score 70 or 71 and co-enrollment in ENGL 109X.

ETHN 110. The Asian American Experience. 3 Units
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall, Spring

Survey of the experiences of various Asian groups in the U.S. from the mid-nineteenth century to present. The historical forces affecting the immigration and settlement patterns of Chinese, Japanese, Filipinos, Koreans, Asian Indians and Southeast Asians (Vietnamese, Cambodians, Laotians) will be compared and contrasted. Students will analyze the problems resulting from limited access to the social, political, and economic institutions of U.S. society.

ETHN 111. Southeast Asians in the US. 3 Units
Term Typically Offered: Spring only

Examine several issues and factors shaping the experiences of recent immigrant groups (Vietnamese, Hmong, Cambodians, Laotians) from Southeast Asia to the U.S. Focuses on the dynamic relationship between ethnicity, minority assignment and social integration as these effect the experiences of these immigrant groups.

ETHN 112. Contemporary Asian American Issues. 3 Units
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall, Spring

Examines several important social issues such as emerging communities, education, employment and occupations, anti-Asian violence, media images and stereotypes, families and identities, and political empowerment shaping the contemporary experiences of diverse Asian American groups.

ETHN 113. Asian American Communities. 3 Units
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall, Spring

Examination of the historical and contemporary experiences of various Asian American communities through active investigation. The concepts, methods, and theories commonly utilized in community research will be covered.

ETHN 114. Asian Americans and Globalization. 3 Units
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall, Spring

Examination of the Asian American immigration within the context of the larger Asian global migration. Emphasis will be placed on the period from the 16th century to the contemporary Asian global migration. A critical examination of the perspectives on the Pacific region and how the economic, social, political and historical forces affected migration and the formation of Asian global communities.

ETHN 115. Biracial and Multiracial Identity in the US. 3 Units
General Education Area/Graduation Requirement: Understanding Personal Development (E)
Term Typically Offered: Fall, Spring

Examination of biracial/multiracial populations, their social histories, social experiences and social identities within various sociological and social psychological theoretical frameworks. An exploration of the relationship biracial/multiracial groups have had, and continue to have, with the larger white majority and monoracially identified minorities.

ETHN 116. Asian American Politics and Public Policy. 3 Units
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall, Spring

Critical examination of the historical and contemporary political experiences of Asian Americans and their pursuits of immigration rights, citizenship, political identity, equality, freedom, and incorporation into the U.S. political system.

ETHN 117. Black Political Thought. 3 Units
Term Typically Offered: Spring only

To systematically and analytically introduce the predominant political trends and concepts presently entertained and harbored in the Black Community. A necessary adjunct to this dialogue is the racist theme in American society since on balance this is the matrix out of which the political alternatives and concepts grew. Cross Listed: GOVT 117; only one may be counted for credit.
ETHN 118. Asian American Women. 3 Units
General Education Area/Graduation Requirement: Humanities (Area C2)
Term Typically Offered: Fall, Spring

Using an interdisciplinary approach, course offers a broad introduction to the principle values and traditions shaping Asian American women's lives in the U.S. Examines cultural diversity, gender inequality and conflicts between traditions and social practices through critical analysis of literature, film and cultural theories as expressions of identity. Topics covered include: cultural heritage and philosophies, intergenerational conflict, transnationalism, gender roles and socio-economic practices. Provides comprehensive understanding of principle factors governing Asian American women's lives at the nexus of Asian and American cultures.

Cross-listed: WOMS 118.

ETHN 119. The Filipino American Experience. 3 Units
Term Typically Offered: Fall, Spring

Overview of the Filipino American experience from the 16th century to the present. Immigration and settlement of Filipinos in the U.S. will be critically examined within the context of historical, social, economic, and political forces in American society. How the Filipino labor market status, race, class, and sex/gender relations affected the evolution and formation of Asian American communities will be critically examined.

ETHN 121. Hmong American Experience. 3 Units
Term Typically Offered: Fall only

Explores the historical and cultural background of Hmong Americans. Major emphasis is on the many experiences of the Hmong Americans including the social, economic, and political conditions that prompted their migration from Laos to the U.S. Explores the complex patterns of Hmong American acculturation in relation with other Asian and non-Asian immigrant groups.

ETHN 122. Sikh Americans and Globalization. 3 Units
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Spring only

Examines the history and migration of Sikhs throughout the world, including the United States. Topics include the origin of Sikhism, Sikh history/religion/culture/social institutions and social relations, direct and secondary migration, race and ethnic relations, second-generation identity issues, and global diaspora/transnationalism.

ETHN 130. Chicano/Mexican-American Experience. 3 Units
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall, Spring, Summer

Transmits knowledge and understanding of how racism confronts and divides American society. Attention will be given to the effects of racism on the experiences of Chicanos/Mexican Americans in American society.

ETHN 131. La Raza Studies. 3 Units
General Education Area/Graduation Requirement: GE AREA D, Race & Ethnicity Graduation Requirement (RE)
Term Typically Offered: Fall, Spring

Ethnohistorical analysis of La Raza Cosmica designed to convey crosscultural knowledge and understanding of peoples from Mexico, Cuba, Puerto Rico and Central America. Includes a comparative analysis of ethnic identity and a survey of socio-cultural, political and economic changes which have influenced U.S./Latin American policy and immigration patterns of Latinos to the U.S.

ETHN 132. La Mujer Chicana. 3 Units
General Education Area/Graduation Requirement: Understanding Personal Development (E)
Term Typically Offered: Fall, Spring

Critical analysis of the cultural influence that the family, community, religion, economic status and peers play upon the decisions, the values and roles held by Chicanas. An examination of the processes which have resulted in the change of attitudes, values and roles of the contemporary Chicana.

ETHN 133. Crosscultural Aging in America. 3 Units
General Education Area/Graduation Requirement: Ge AREA D
Term Typically Offered: Fall, Spring

Examines aging crossculturally among ethnic groups in America. Emphasis will be placed on a review of the current literature on aging and ethnicity. Also examines changing roles and values in Black, Hispanic, Asian and Native American families.

ETHN 136. US Mexican Border Relations. 3 Units
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall, Spring

Contemporary issues affecting the daily lives of people living in the U.S. and Mexico Borderlands. Theories, gender issues, political, economic and social relationships on both sides of the border will be examined.

ETHN 137. Race and Ethnicity in Latin America and Caribbean. 3 Units
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall, Spring

Socio-economic, historical and contemporary issues affecting the various peoples living in the Latin America and the Caribbean. We will examine the intersection of race and ethnicity as well as class, gender, and identity, with attention paid to the contributions and presence of Asians, Africans, Europeans, and Indigenous peoples.

ETHN 140. Native American Experience. 3 Units
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall, Spring, Summer

Advanced course in American Indian history, political and social relations, with emphasis upon current movements and problems of Native American life.

ETHN 141. Politics of the African Diaspora. 3 Units
General Education Area/Graduation Requirement: GE AREA D, Race & Ethnicity Graduation Requirement (RE)
Term Typically Offered: Fall only

Examines the social, political, cultural, and economic factors which have been important to the African diaspora. Examines how African people have responded to those factors, both in terms of formal, political thought, and in terms of political movements and political institutions.

Examines thought and proactive, comparability to Africa, U.S., Caribbean, Central and South America.

Cross-listed: GOVT 141; only one may be counted for credit.
ETHN 142. Native American Tribal Governments. 3 Units
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall, Spring

Examines the regulatory powers that American Indian tribes possess over their peoples and territories. Students will acquire an understanding of tribal governmental history, internal affairs, jurisdictional conflicts, government relations, federal Indian public policy and economic development. The political aspects of tribal government administration and the emergence of self-governance as a foundation for self-determination, development and sustainability will be explored.

ETHN 143. American Indians, Film and Popular Culture. 3 Units
General Education Area/Graduation Requirement: Humanities (Area C2)
Term Typically Offered: Spring only

Students will examine various ways American Indians are imagined by popular culture through film, including drama, comedy and documentary. Beyond identifying and analyzing images of Indians as well as myths about their historical and contemporary circumstances, students will be challenged to investigate and understand the tenuous relationship between fact and fiction in popular culture.

ETHN 144. Native Voice, Memory, and Biography. 3 Units
Prerequisite(s): GWAR certification before Fall 09; or WPJ score of 80+; or 3-unit placement in ENGL 109M or ENGL 109W; or 4-unit placement in ENGL 109M or ENGL 109W and co-enrollment in ENGL 109X; or WPJ score 70 or 71 and co-enrollment in ENGL 109X.
General Education Area/Graduation Requirement: Humanities (Area C2), Writing Intensive Graduation Requirement (WI)
Term Typically Offered: Fall, Spring

Through the genre of biography and autobiography, students will examine the relevance of Native voice and memory in reference to the development of identity, cultural transformation, indigenous knowledge, political activism, and historical consciousness. Students will analyze the political, economic and cultural contexts in which Native voices and memories emerge.

ETHN 145. Native American Oral Tradition and Storytelling. 3 Units
General Education Area/Graduation Requirement: Humanities (Area C2)
Term Typically Offered: Fall, Spring

Study of how Native American oral tradition and storytelling affect the experience of tribal expression. Examines the foundation of this tradition through an analysis and comparison of traditional and contemporary forms.

ETHN 146. Native American Women. 3 Units
Term Typically Offered: Fall only

Examination of the traditional, non-traditional, and contemporary roles of Native American women. The relationship of these roles to both Indian and non-Indian societies. An exploration of Native women’s issues through histories, literatures, and oral traditions, focusing on Native American women's perspectives. Colonization has drastically impacted native women and the lives of their families, nations and communities. Resistance and de-colonization efforts by Native women will be illuminated and analyzed.

ETHN 152. American Indians, Sovereignty and US Laws. 3 Units
Term Typically Offered: Spring only

Examines the legal history developed between American Indians and Euro-Americans. Includes an introduction to events, circumstances, and relationships that developed social and legal concepts. There will be an examination of constitutional principles, laws and United State’s policies from the early 1800’s to the present and the impacts of these doctrines on American Indian sovereign powers. The students will acquire a basic understanding of the sources of political conflict in contemporary American Indian communities and American society.

ETHN 153. Genocide and Holocaust Studies. 3 Units
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall, Spring, Summer

Examines genocide cases, such as the Armenian genocide, the Jewish Holocaust, the genocide of Roma, the Cambodian "Killing Fields", genocide in East Timor, ethnic cleansing in Bosnia, the genocide of the Tutsi in Rwanda and genocide in the Darfur region of Sudan, as well as the genocide of Native Americans, and other indigenous peoples. Addresses causes of, and responses to, genocide around the world, especially in Africa, Asia and Latin America. This phenomenon is examined historically, descriptively, comparatively and theoretically.

ETHN 154. Indigenous People. 3 Units
Term Typically Offered: Fall, Spring

Common existential experiences of indigenous people all over the world namely the Batwa and Pygmies in Central Africa, the Khoisan of Southern Africa, the berber in Northern Africa, the Sami in Northern Europe, the Basque in France and Spain, the Hawaiians in the Pacific, the Ainu of Japan, the Aborigines in Australia, and Native Americans in the Americas.

ETHN 155. Chicano/Latino Politics and Public Policy. 3 Units
Term Typically Offered: Fall, Spring

Explores the historical and contemporary development of Chicano/Latino political activity in the United States. Will review essential components of the U.S. political system and examines relevant theories and concepts that have impacted public policy debate related to education, employment, health, housing, immigration, and income inequity. Primarily focuses on the political history and present day circumstances of the three largest Latino groups, Mexican Americans, Puerto Ricans, and Cuban Americans.

ETHN 156. American Indigenous Families: Issues and Perspectives. 3 Units
Term Typically Offered: Fall, Spring

Application of research and theory specific to Latino/Chicano and American Indian families; strategies for applying this knowledge to areas of service, therapy, policy, and education. Lecture/discussion, internet enhancement. Cross Listed: FACS 166A; only one may be counted for credit.

ETHN 157. Asian American Families: Issues and Perspectives. 3 Units
Term Typically Offered: Fall, Spring

Family is an adaptable and changing institution of society. Research and theory on Asian American families will be highlighted with an emphasis on applying the information to areas of service, therapy, policy, and education. Experiences of various Asian groups in the U. S. will be compared. Cross Listed: FACS 166B; only one may be counted for credit.
ETHN 170. Pan African Studies. 3 Units
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall, Spring

Investigation into the subjective aspects of Pan African Studies (Black Studies). Covers such topical areas as the struggle by Black Americans for education, the genesis of the Black Studies movement, Black culture, institutional change, etc. The very nature of the course permits the coverage of a broad range of subject matter. Students are encouraged to take specific courses offered by the Pan African Studies program for more extensive investigation.

ETHN 171. African Religions and Philosophies. 3 Units
General Education Area/Graduation Requirement: Humanities (Area C2)
Term Typically Offered: Fall, Spring

Study of the African's concept of God with particular emphasis on His works, His relationship to His creations, and His worship. Also covers the concepts of evil, ethics, justice and various metaphysical ideas.

ETHN 172. Black Women In America. 3 Units
Term Typically Offered: Spring only

Examines the historical and social forces that shape the lives of Black women. Examines the Black woman's role in the family, community, work force and society in general.

ETHN 173. The Black Family in the United States. 3 Units
Term Typically Offered: Fall, Spring

Using the interdisciplinary approach, several institutional factors affecting the structure, evolution, and function of the Black Family unit in the U.S. will be studied. Permits a broad, yet systematic, examination of the Black Family in order to understand the several dynamics affecting the Black Family in particular and Black Americans in general.

ETHN 177. Topics In African Studies. 3 Units
Term Typically Offered: Fall, Spring

Special topics in African studies.

ETHN 177A. Genocide and Human Rights: Africa. 3 Units
This course focuses on the human rights abuses and Genocides that occurred in colonial and post-colonial Africa. It explores Genocide in Rwanda, Darfur, Namibia, and mass killings in Congo. It examines Campaigns of cultural Genocide, ideological pressure, and the involvement of former colonial powers in mass killings. Different approaches of conflict resolution such as the South African Truth and Reconciliation model will be examined. Causes and conditions of Genocide will be interpreted through interdisciplinary literature.

ETHN 179. Black Music and Black Consciousness. 3 Units
Term Typically Offered: Fall only

Provides students with an understanding of the essential role Black music assumes in the development of people of African descent throughout the Black Diaspora. Major topics include the historical development of Black music, the role of music in Black resistance and other forms of political behavior, the economic exploitation of Black music and the Black musician and the influence of globalization.

ETHN 180A. Forms of African-American Poetry. 3 Units
Prerequisite(s): GWAR certification before Fall 09; or WPJ score of 80+; or 3-unit placement in ENGL 109M or ENGL 109W; or 4-unit placement in ENGL 109M or ENGL 109W and co-enrollment in ENGL 109X; or WPJ score 70 or 71 and co-enrollment in ENGL 109X.
General Education Area/Graduation Requirement: Humanities (Area C2), Writing Intensive Graduation Requirement (WI)
Term Typically Offered: Fall, Spring

Focuses on four or more African-American poets, representing a historical succession of literary periods.

ETHN 180B. Forms African-Am Fiction. 3 Units
Prerequisite(s): GWAR certification before Fall 09, or WPJ score of 70+ or at least a C- in ENGL 109M or ENGL 109W.
General Education Area/Graduation Requirement: Writing Intensive Graduation Requirement (WI), Race & Ethnicity Graduation Requirement (RE), Humanities (Area C2)
Term Typically Offered: Fall, Spring

Focuses on four or more African-American writers of fiction, surveying texts representing a historical succession of literary periods.

ETHN 181. Cinematic Representations of Pan African Identities. 3 Units
This course is designed as an intensive survey of African American cinema that engages questions of history, culture, politics and the overall function of race and representation in American society. Our focus in this class is to understand Pan African filmmakers and their respective films. We will focus on cultural factors intrinsic to Pan African societies and how cinema fits into this context, as well as how issues of gender, sexuality and class impact the films.

ETHN 182. Protest in Hip Hop. 3 Units
This course is designed to be an intensive survey of the evolution of hip hop as a form of social protest that developed into a global cultural movement. The course draws parallels from hip hop's historical function with past and present U.S. social movements advocating for social justice, including the recent #BlackLivesMatter movement. Students will also examine cultural studies theoretical concepts analyzing mainstream's exploitation and marginalization of race, class, gender and sexuality representations in hip hop.

ETHN 194. Research in Ethnic Studies. 3 Units
Prerequisite(s): One upper-division Ethnic Studies course.
Term Typically Offered: Fall, Spring

Designed to provide students with contemporary theoretical knowledge and practical skills for conducting research in the Asian American, Black American, Chicano, and Native American communities. Methodology which addresses issues and research perspectives distinctly germane to researching a targeted community is examined.

ETHN 195A. Ethnic Studies Fieldwork. 1 Unit
Prerequisite(s): Ethnic Studies majors only
Corequisite(s): ETHN 195B
Term Typically Offered: Spring only

Allow students, with faculty supervision, to work closely with the ethnic minority communities. Students may work with a community agency, community organization, or other site with instructor approval.

\(^1\) Four upper division Ethnic Studies and/or cross-listed courses selected with advisor approval to provide the opportunity for social, cultural, and historical study; should also apply to the area of concentration; see note below.

Notes:
- Contact the Department for a list of approved electives.
- A concentration must be declared in Asian American Studies, Chicana/o Studies, Education (Teachers in Urban Settings or Teachers in Bilingual Education), Native American Studies, Pan African Studies, or General Ethnic Studies. The concentration includes 12 units of electives.

Certificate in Pan African Studies
Units required for Certificate: 24

Program Description
A certificate in Pan African Studies is available with special permission through the Ethnic Studies Department.

Eligibility Information
Students enrolled in the Cooper-Woodson College Enhancement Program are eligible for this certificate. The Director of Pan African Studies certifies those eligible for this certificate.

Minor in Asian American Studies

Units required for Minor: 21

Program Description

Ethnic Studies is an interdisciplinary approach to the study of the cultures, languages, historical, and contemporary issues relating to African Americans, Asian Americans, Chicana/os-Latina/os, and Native Americans. The program directs students to critically examine the cultural contributions made by these groups to world civilization and to American society. Ethnic Studies challenges all students to analyze existing generalizations, theories, and concepts about racial and ethnic groups in order to develop valid generalizations, concepts, and theories about the people and their experiences. Students are encouraged to actively work to eliminate problems based on discrimination.

Students are also encouraged to blend professional area studies with Ethnic Studies. For example, a student may major in Ethnic Studies and minor in Business Administration. Similarly, students with a degree in Engineering Technology may minor in Ethnic Studies and emerge well-prepared professionally to assume middle management and supervisory positions in a multicultural society. Ethnic Studies majors and minors enter careers and professions in both the public and private sectors.

Note: Program advising and other information can be obtained from the Ethnic Studies Department.

Family and Consumer Sciences

College of Social Sciences and Interdisciplinary Studies

Program Description

The focus of Family and Consumer Sciences is to enhance the skills and knowledge that will promote the well-being of individuals, families, and communities. Our programs and profession focus on individuals and families in order to achieve an optimum balance between people and their environments. The mission of Family and Consumer Sciences is to empower individuals and families to function interdependently in a global society.

Degree Programs

- BS in Family and Consumer Sciences (Family Studies) (p. 832)
- BS in Family and Consumer Sciences (Fashion Merchandising and Design) (p. 832)
- BS in Family and Consumer Sciences (Nutrition and Food) (p. 833)
- BS in Family and Consumer Sciences (Nutrition and Food with an Emphasis in Dietetics) (p. 833)
- Minor in Family and Consumer Sciences (p. 834)
- Single Subject Matter Program (Family and Consumer Sciences Education) (p. 834)

Accreditation

In addition to California State University, Sacramento's full accreditation by the Western Association of Schools and Colleges, the Bachelor of Science in Family and Consumer Sciences (Dietetics) is also individually accredited by the American Dietetics Association.

Licensure and Credentialing Disclosure

Admission into programs leading to licensure and credentialing does not guarantee that students will obtain a license or credential. Licensure and credentialing requirements are set by agencies that are not controlled by or affiliated with the CSU and requirements can change at any time. For example, licensure or credentialing requirements can include evidence of the right to work in the United States (e.g., social security number or tax payer identification number) or successfully passing a criminal background check. Students are responsible for determining whether they can meet licensure or credentialing requirements. The CSU will not refund tuition, fees, or any associated costs, to students who determine subsequent to admission that they cannot meet licensure or credentialing requirements. Information concerning licensure and credentialing requirements are available from the Dean of Undergraduate Studies, Sacramento Hall 234, (916) 278-5344.

Special Features

- Faculty in Family and Consumer Sciences come from diverse educational backgrounds and expertise. Faculty members promote and integrate a holistic approach to understanding individuals and families while preparing students for professional careers or graduate study.
- The Department is equipped with state of the art laboratories for textiles, food, and teacher credentialing preparation courses.
- Support facilities include a Costume Collection gallery. Visit the virtual gallery at http://www.csus.edu/facs/.
- The Didactic Program in Dietetics (DPD) and the Nutrition and Dietetics Internship (NDI) programs are accredited by the Accreditation Council for Education in Nutrition and Dietetics (ACEND); the Family Studies program is approved by the National...
Council on Family Relations; and the Pre-Credential Single Subject Matter program is approved by the California Commission on Teacher Credentialing.

- Through its internship program, the Department provides an opportunity for students to work under the supervision of a professional in business, education, government, or public service settings. Internships (FACS 195C) are planned in advance with an advisor.
- The Department sponsors three student organizations for students to participate in several professional organizations related to their major concentrations.
- In addition to serving majors and minors, the Department provides service and general education courses for other majors including classes that meet the graduation requirements for the writing intensive, and race and ethnicity categories.

Career Possibilities

**Fashion Merchandising and Design:** Apparel Engineer · Buyer · Clothing Designer · Fashion Coordinator · Distributor · Fashion Editor · Fashion Forecaster · Fashion Reporter · Inventory Specialist · Magazine Editor · Merchandiser · Product Analyst · Quality Control Analyst · Regional Manager · Retail Manager · Sales Representative · Stylist · Technical Designer · Textile Designer · Theater Costuming · Visual Merchandiser

**Family Studies:** Consumer and Family Resources · Community-Based Social Services · Community Education · Early Childhood Education · Family Life Educator · Family Planning · Family Support Services Provider · Government and Public Policy · Health Care and Family Wellness · Marriage and Family Enrichment · Parenting Educator · Prenatal and Maternity Services · Preschool and Adult Day Care Director · Sexuality Educator · Youth Advisor

**Nutrition and Foods/Dietetics Emphasis:** Communications/Public Relations/Marketing · Community/Public Health Nutritionist · Degreed Nutritionist · Entrepreneur/Consultant · Food Service Manager/Hospitality · Nutrition and Health Educator · Nutrition Program Representative · University/Research Centers.

**Family and Consumer Sciences Education (Pre-Credential Single Subject Program):** Teacher in Secondary Education (middle and high school) · Outreach consultant in UCD Extension Services · Consultant in Home Economics careers and Technology, California State Department of Education · FHA-HERO State Advisor

**FACS 9. Food Safety and Sanitation.** 2 Units

**Prerequisite(s):** Open only to FACS majors/minors and Dietetic special majors.

**Term Typically Offered:** Fall, Spring, Summer

Introduction to food safety principles and application, microbiology of food safety, infection control, and safety issues. Examination of laws and regulations related to consumer and foodservice operations. Preparation for national foodservice sanitation certification examination.

**FACS 10. Nutrition And Wellness.** 3 Units

**General Education Area/Graduation Requirement:** Understanding Personal Development (E)

**Term Typically Offered:** Fall, Spring

Introduction to the basic principles of nutrition and the relationship of the human diet to health. Overview of the nutrition profession, the biological uses of nutrients and tools for dietary planning. Examination of specific issues such as weight loss, sports nutrition, food safety, the diet-disease relationship and global nutrition. Analysis of special nutritional requirements and needs during the life cycle. Evaluation of personal dietary habits using current dietary guidelines and nutritional assessment methods.

**FACS 11. Principles of Food Preparation.** 3 Units

**Term Typically Offered:** Fall, Spring, Summer

Chemical, physical, sensory, and nutritional properties of food related to processes used in food preparation. Laboratory includes preparation and evaluation of individual food products. Lecture two hours; laboratory three hours. Prerequisite: FACS Nutrition and Food majors and minors and Dietetics Special majors only

**FACS 30. Fashion and Human Environment.** 3 Units

**General Education Area/Graduation Requirement:** GE AREA D

**Term Typically Offered:** Fall, Spring

This course serves as an introduction to the study of fashion and human environment and how fashion is perceived, marketed, and internalized within individuals across Western and non-Western cultures. A focus on both internal factors such as psychological, aesthetic and self-image, and external factors such as social, economic, cultural and political experiences will be addressed.
FACS 31. Textiles.
Term Typically Offered: Fall only

Study of the characteristics of fibers, yarns, fabrics, and finishes. Emphasis on fabric performance, serviceability as they affect consumer satisfaction. Discussion of environmental concerns in the textile industry and laws relating to textile products.

Term Typically Offered: Fall, Spring

Principles of fit and design. Applied basic construction with emphasis on standards and custom techniques. Characteristics of fabrics used; individual pattern adjustment. Lecture, discussion, demonstration one hour; laboratory four hours.

FACS 50. The Family and Social Issues.
General Education Area/Graduation Requirement: GE AREA D, Race & Ethnicity Graduation Requirement (RE)
Term Typically Offered: Fall, Spring

Family structure, systems and functioning in marriage and other partnerships, parenting, work issues, domestic violence, divorce, and remarriage. Focus on social issues including gender, race, ethnicity, and class. Historical and theoretical perspectives on families in America. Introduction to research in family sciences and public policy implications. Lecture, discussion.
Note: Not open for credit to students who have taken SOC 5.

FACS 52. The Child In The Family.
General Education Area/Graduation Requirement: Understanding Personal Development (E)
Term Typically Offered: Fall, Spring

Physical, social, emotional and cognitive development of the child, conception through adolescence, in relation to the family. Strong theoretical emphasis. Introduction to methods of study, including observation and interview. Lecture, discussion, fieldwork.
Note: Not open for credit to students who have taken CHDV 137, CHDV 138, or PSYC 148.

FACS 100. Research: Methods and Application in Family and Consumer Sciences.
Prerequisite(s): 6 FACS units completed. FACS majors only
Term Typically Offered: Fall, Spring

Study of methods and application of research in the field of Family and Consumer Sciences. Focus on scientific inquiry, methodology, evidenced-based practice, interpretation of research results, program and project evaluation, and professional communication. Includes the examination of ethical practices, professional presentation skills, and technical writing skills.

Prerequisite(s): FACS 10 and an additional 3 FACS units
Term Typically Offered: Fall, Spring

Nutrition education, communication and counseling techniques for use by the nutrition/dietetics professional. Introduction and application of various health behavior theories to promote change in diverse target audiences. Development of nutrition care plans, educational materials and activities for individual groups. Understand and apply methods of dietary assessment and motivational interviewing.

FACS 108. Family Communication.
Prerequisite(s): COMS 8, FACS 50, SOC 166, or instructor permission.
Term Typically Offered: Fall, Spring

Study of the family as a small group with emphasis on understanding and interpreting the dynamics of family communication using various communication and social-psychological theories. Opportunity to develop an analytical framework. Cross Listed: COMS 108; only one may be counted for credit.

FACS 110. Food Production and Sustainability.
Prerequisite(s): FACS 9, FACS 10 and FACS 11
Term Typically Offered: Fall, Spring, Summer

Study and laboratory experience in planning, procuring, production, serving and evaluation of food for individuals, families, commercial, and institutional foodservice operations. Application of menu development techniques such as recipe modification and standardization to various target populations. Examination and application of marketing analysis and promotion. Understanding of current issues and sustainability topics related to food production.

FACS 112. Current Topics in Nutritional Sciences.
Prerequisite(s): GWAR certification before Fall 09; or WPJ score of 80+; or 3-unit placement in ENGL 109M or ENGL 109W; or 4-unit placement in ENGL 109M or ENGL 109W and co-enrollment in ENGL 109X; or WPJ score 70 or 71 and co-enrollment in ENGL 109X.
General Education Area/Graduation Requirement: Further Studies in Area B (B5), Writing Intensive Graduation Requirement (WI)
Term Typically Offered: Summer only

Examination of contemporary and controversial topics in nutrition science and how they relate to nutritional needs of different population groups. Analyzes the research process and evaluation of validity of nutrition research. Lecture, discussion.
Note: Not open for credit to Dietetics/Nutrition and Food majors.

FACS 113. Nutrition And Metabolism.
Prerequisite(s): FACS 10; BIO 10 or BIO 20; and CHEM 1A or CHEM 5 or CHEM 6A
General Education Area/Graduation Requirement: Further Studies in Area B (B5)
Term Typically Offered: Fall, Spring, Summer

Study of the structures, types and metabolism of carbohydrates, lipids and proteins. Discussion of the biological roles of vitamins and minerals. Application and integration of metabolic knowledge with health promotion and chronic disease. Lecture, discussion.

FACS 114. Cultural and Social Aspects of Food.
Prerequisite(s): FACS 10; Only FACS majors/minors and Dietetic special majors may enroll in this course
Term Typically Offered: Fall, Spring

Examination of the cultural and social meanings of food, food behaviors and food systems. Emphasis on the regional, ethnic and religious influences on food habits. Study of food production, distribution, and consumption historically and cross-culturally; traditional dishes and nutritional contributions of diets of several cultures.
FACS 115. Nutrition: Pre-conception Through Childhood. 3 Units

Prerequisite(s): FACS 113

Term Typically Offered: Fall, Spring

Examination of nutritional requirements, metabolism and issues during stages of the early life cycle, including: pre-conception, pregnancy, lactation, infancy, and early and late childhood. Study of assessment and methods for achieving nutritional needs through dietary selection and promotion of maternal, infant, and child health. Analysis of social, environmental, physical and economic factors affecting nutritional status.

FACS 116. Foodservice Management. 4 Units

Prerequisite(s): FACS 110.

Term Typically Offered: Fall, Spring

Study of financial, facility, human resource management in commercial and noncommercial foodservice operations. Application of accounting principles, evaluation and selection of equipment, layout and design, and principles and practices of human resource management as an entry-level manager. Lecture, discussion, field trips. Field trip(s) may be required.

FACS 117. Community Nutrition. 3 Units

Prerequisite(s): FACS 107, and either FACS 115 or FACS 119.

Term Typically Offered: Fall, Spring

Study of theory, concepts and philosophy affecting nutrition education and services in the community. Introduction to techniques of interviewing and counseling clients. Emphasis on culturally sensitive approaches to dietary assessment, counseling and community nutrition research. Use of a variety of teaching methods to improve nutrition status of the community. Field study involves practical experience in a community nutrition program. Lecture, discussion, two hours; field study three hours.

FACS 118A. Medical Nutrition Therapy I. 3 Units

Prerequisite(s): FACS 113, FACS 121, and BIO 131.

Term Typically Offered: Fall only

Study of the principles of medical nutrition therapy and the Nutrition Care Process. Use the Nutrition Care Process to make decisions, identify nutrition-related problems and determine and evaluate nutrition interventions with patients/clients with various conditions, including, cardiovascular and gastrointestinal disorders.

FACS 118B. Medical Nutrition Therapy II. 3 Units

Prerequisite(s): FACS 118A, and CHEM 161 or instructor permission.

Term Typically Offered: Spring only

Continuation of principles, methods, and skills as developed in FACS 118A. Review of the etiology, development and dietary prevention and intervention of diseases influenced by nutrition such as: diabetes mellitus, hepatic and biliary diseases, cancer, renal disease, pulmonary disease, neurological disorders, HIV and AIDS, and inborn errors of metabolism. Lecture, discussion two hours; activity two hours.

FACS 119. Nutrition: Adolescence Through Older Adulthood. 3 Units

Prerequisite(s): FACS 113

Term Typically Offered: Fall, Spring

Examination of nutritional requirements, metabolism and issues during stages of the life cycle, including: adolescence, adulthood, and old age. Study of assessment and methods for achieving nutritional needs through dietary selection and promotion of adolescent, adult, and elderly adult health. Analysis of social, environmental, physical and economic factors affecting nutritional status.

FACS 120. Practical Application in Sports Nutrition. 3 Units

Prerequisite(s): FACS 113

Term Typically Offered: Fall, Spring

A survey course in nutrition with an emphasis on the relationship among diet, physical activity, and health; exploration of the changes in the metabolism of carbohydrates, lipids, protein and water; discussion of the function of vitamins and minerals; practical application of evidence-based dietary recommendations for common sports and varying physical intensity. Recommended for FACS majors. Lecture/Discussion. Three units.

FACS 121. Nutrition Assessment, Methods and Support. 3 Units

Prerequisite(s): FACS 113

Term Typically Offered: Fall, Spring

Study of health care systems, the nutrition care process including assessment and support, and clinical implications of malnutrition. Topics include nutrition-focused physical examination, anthropometric, biochemical, dietary, body composition, and functional status evaluation and an understanding of advantages and disadvantages of assessment approaches. Application of various assessment methods and problem solving will be achieved through hands on training and clinical case studies in the context of malnutrition, nutrition support, cancer, eating disorders, and obesity.

FACS 128. Consumer Technologies and Environments. 3 Units

Term Typically Offered: Fall, Spring

Study and analysis of technologies, durable goods, and environments in home and workplace and their impact on quality of life. Principles of equipment and product design, selection and safety; space planning; consumer decision making. Examination of issues related to energy management, shelter, housing and access to technology. Lecture, field trips two hours; activity two hours. Field trip(s) may be required.

FACS 130. History Of Fashion. 3 Units

Term Typically Offered: Spring only

A study of dress in Western civilization from ancient times through the present. An interdisciplinary approach is used to examine how clothing communicates values displayed by the individual and functions as a reflection of trends in technology, political events, social ideals, and cultural developments such as art and music. Emphasis on the contributions and perspectives of women as well as differing roles in the production, dissemination, and consumption of clothing in relation to socioeconomic groups. Lecture, discussion.

FACS 131. Quality Analysis: Apparel. 3 Units

Prerequisite(s): FACS 31, FACS 32.

Term Typically Offered: Spring only

Analysis of apparel construction and production; current industrial and technological developments. Discussion of sizing and quality standards with emphasis on identification of fabrics, garment styles, finding and trims. Lecture, discussion, demonstration, field trips. Field trip(s) may be required.
FACS 133. Creative Principles of Apparel Design. 3 Units
Prerequisite(s): FACS 30 and FACS 31
Term Typically Offered: Fall only
Study of the functional and aesthetic elements of apparel design. The creative process and development of illustrative techniques. Development of creative approaches through projects of experimental, contemporary and traditional techniques with emphasis on elements of design, and selection and organization of colors, forms, materials and accessories for apparel production. Studio-activity six hours.

FACS 134. Introduction to Fashion Industry. 3 Units
Term Typically Offered: Fall, Spring
Designed to develop an awareness and understanding of the total fashion industry including past, present and future directions of costume design, manufacturing, textiles, retailers' publications, buying offices, advertising and the consumer.

FACS 135. Merchandise Buying. 3 Units
Prerequisite(s): FACS 134.
Term Typically Offered: Fall only
Detailed study of merchandising mix, purchasing plan, inventory plan, assortment plan, pricing, markdown, markup, and reports. Review of planning and control processes and the buyer's role in merchandise management and decision-making. Lecture, discussion.

FACS 136. Fashion Retailing. 3 Units
Prerequisite(s): FACS 134.
Term Typically Offered: Spring only
A in-depth exploration of fashion retailing from different perspectives, including organizational structure, store location and image with a focus on visual merchandising techniques, and fashion advertising and promotion strategies. Lecture-discussion.

FACS 137. Clothing, Society, and Culture. 3 Units
Term Typically Offered: Fall only
Study of the relationship of humans and clothing within their cultural and social environment. Introduction to the fundamentals of social psychology in the examination of clothing and appearance. Clothing and appearance are studied as forms of nonverbal communication and as devices for expressing cultural and social values. Lecture discussion.

FACS 139. Textiles and Apparel in the Global Economy. 3 Units
Prerequisite(s): FACS 134 or MKTG 101.
Term Typically Offered: Spring only
Overview of global factors affecting the textiles and apparel industries and trade, the impact of textiles and apparel industries on the economy and consumers, the US textiles and apparel in the global economy, and strategies for balancing conflicting interest.

FACS 140. Family Resource Management. 3 Units
General Education Area/Graduation Requirement: Understanding Personal Development (E)
Term Typically Offered: Fall, Spring
Management of resources in family systems. Interaction of families with other societal and environmental systems in acquiring and using resources to meet goals and other demands.

FACS 141. Family Finance. 3 Units
General Education Area/Graduation Requirement: Understanding Personal Development (E)
Term Typically Offered: Fall, Spring
Economic problems of and financial management by the individual and family. Topics include: income patterns, inflation, credit, contracts, housing, financial services, insurance, taxes, investments, retirement income planning.

FACS 142. Consumer Issues. 3 Units
Term Typically Offered: Fall, Spring
Study of effect of consumer movements on protection of consumer rights. Current issues include marketplace fraud and redress; consumer information, education, and decision-making; privacy and environmental concerns; and advocacy for vulnerable consumer groups.

FACS 143. Consumer Policy. 3 Units
Prerequisite(s): GOVT 1 or GOVT 150 or instructor permission.
Term Typically Offered: Fall, Spring
Examination of consumer policy and regulations. Emphasis on consumer products, including food and drugs, housing, and credit. Strategies for promoting consumer advocacy. Lecture, discussion, field trips. Field trip(s) may be required.

FACS 147. Financial and Legal Aspects of Aging. 3 Units
Prerequisite(s): FACS 141 or instructor permission.
Term Typically Offered: Fall, Spring
Economic status, financial and consumer issues, legal rights and responsibilities and resource management for aging persons. Emphasis on financial planning for retirement and estate planning. Lecture, discussion, case studies.

FACS 149. Family Financial Counseling. 3 Units
Prerequisite(s): FACS 141 and senior status.
Term Typically Offered: Fall, Spring
Examination of professional issues in family financial planning including ethical considerations, regulations, communication skills, and professional responsibility. Development of skills needed by family financial counselors to counsel families with financial problems. Lecture, discussion, case study, counseling sessions.

FACS 150. Family Stress and Coping: Multicultural Focus. 3 Units
Prerequisite(s): FACS 50 or equivalent with instructor permission, and GWAR certification before Fall 09; or WPJ score of 80+; or 3-unit placement in ENGL 109M or ENGL 109W; or 4-unit placement in ENGL 109M or ENGL 109W and co-enrollment in ENGL 109X; or WPJ score 70 or 71 and co-enrollment in ENGL 109X.
General Education Area/Graduation Requirement: GE AREA D, Race & Ethnicity Graduation Requirement (RE), Writing Intensive Graduation Requirement (WI)
Term Typically Offered: Fall, Spring, Summer
Study of multicultural families and diverse family forms, with a focus on how families function under stress. Family theory and research are applied to the interpretation and analysis of selected literary work, both in print and film formats.
FACS 152. Adolescent Development. 3 Units
Prerequisite(s): CHDV 30, or CHDV 35, or FACS 52, or instructor permission.
Term Typically Offered: Fall only

In-depth study of the achievements and challenges associated with the adolescent stage of development. Focus on understanding the needs and motivations of adolescents and the challenges they face within their socio-cultural environment. Lecture, discussion.
Note: Not open to students who have taken PSYC 149. Previous or concurrent enrollment in CHDV 133 strongly recommended.

FACS 154. Issues in Parenting. 3 Units
Prerequisite(s): CHDV 30, or CHDV 35, or FACS 52, or instructor permission.
Term Typically Offered: Fall, Spring

Survey of historical and contemporary attitudes toward parenting. Review of research on child-rearing and parent-child relationships. Use of case studies to explore the influence of personality, developmental stage, family structure, ethnic and cultural factors on parenting. Lecture, Case Study.
Note: Previous or concurrent enrollment in CHDV 133 strongly recommended. Cross-listed: CHDV 154; only one may be counted for credit.

FACS 155. Family Life Education. 3 Units
Prerequisite(s): FACS 50; and FACS 100 or CHDV 133; and senior standing.
Term Typically Offered: Fall only

Historical and philosophical perspective on family life education across the lifespan. Practice in curriculum development including content, objectives, and teaching strategies.

FACS 156. Child Life and Family-Centered Care. 3 Units
Prerequisite(s): FACS 52 or CHDV 30 or CHDV 35 or a course in child development/human development, covering at least birth through adolescence with instructor permission.
Term Typically Offered: Summer only

Overview of the Child Life profession and child life practices. Focus on family-centered care for children in the healthcare environment and their families. Major course topics include: scope of practice in child life; ethical and professional practice; impact of illness, injury and health on patients and family; techniques and outcomes of preparation; therapeutic play; grief and bereavement.
Note: This course is designed to meet the specifications set forth by the Child Life Council for the Child Life course required for certification as a Certified Child Life Specialist (CCLS)

FACS 159. Adulthood and Aging in Human Development. 3 Units
Prerequisite(s): A human development course or instructor permission.
Term Typically Offered: Spring only

Analyzes the aging process; the interrelation between physical, psychological, and social development in the middle and later years; and characteristic personal, family and community adjustment problems.

FACS 162. Family Support Services. 3 Units
Prerequisite(s): A minimum of 12 units in FACS upper division family area courses.
Term Typically Offered: Fall, Spring

Application of family science to the development, implementation, and evaluation of family support services. Implications of research for practice with diverse families. Focus on developing skills in family-centered services, family-professional collaboration, and resource-based and asset-based intervention. Lecture two hours; fieldwork in the community three hours.

FACS 166A. American Indigenous Families: Issues and Perspectives. 3 Units
Term Typically Offered: Fall, Spring

Family is an adaptable and changing institution of society. The course will highlight research and theory on Asian American families with an emphasis on applying the information to areas of service, therapy, policy, and education. Lecture; discussion, Internet enhancement.
Cross Listed: ETHN 166; only one may be counted for credit.

FACS 166B. Asian American Families: Issues and Perspectives. 3 Units
Term Typically Offered: Fall, Spring

Application of research and theory specific to Latino/Chicano and American Indian families; strategies for applying this knowledge to areas of service, therapy, policy, and education. A comparison of the experiences between various Asian groups in the U.S. will be stressed. Lecture; discussion, Internet enhancement.
Cross Listed: ETHN 167; only one may be counted for credit.

FACS 168. Senior Seminar. 3 Units
Prerequisite(s): 21 FACS units.
Term Typically Offered: Fall, Spring

Designed to synthesize knowledge in Family and Consumer Sciences. Examination of the concentration in the major and career exploration. Analysis of public policy and ethical issues, professionalism and leadership strategies. Includes personal and professional competency assessment and development of an academic and professional portfolio.

FACS 170. Advanced Nutrition and Metabolism. 3 Units
Prerequisite(s): CHEM 161, FACS 113; or instructor permission.
Term Typically Offered: Spring only

Study of the physiologic function of carbohydrates, lipids, protein and micronutrients including integrated metabolism, transport, regulation and relation to inborn errors/chronic disease. Introduction to gene-nutrient interaction.
Cross Listed: BIO 170; only one may be counted for credit.

FACS 195A. Field Study: Selected Areas in Family and Consumer Sciences. 1 - 3 Units
Prerequisite(s): Instructor permission.
Term Typically Offered: Fall, Spring

Guided study and experience in some area within Family and Consumer Sciences in which the student needs orientation or greater depth of study in a specialized field.
Credit/No Credit
FACS 195C. Internship. 1 - 3 Units
Prerequisite(s): Upper division status; instructor permission obtained in the preceding semester; 2.5 GPA or above.
Term Typically Offered: Fall, Spring

Directed observation and supervised work experience in an approved business, government, or service agency. Internships are offered for the purpose of increasing student understanding of the nature and scope of agency operations and giving students orientation in occupational specialties. Supervision is provided by authorized persons in the cooperating agencies and collaborative supervision is provided by the Family and Consumer Sciences faculty. Each student is required to maintain a record of activities and assignments and to prepare periodic reports.

Note: Student must make arrangements with a faculty member for a work program one semester prior to admittance to the course. A minimum of three hours per week per unit of credit is required.

Credit/No Credit

FACS 195F. Practicum in Family Life Education. 1 - 3 Units
Prerequisite(s): senior status; GPA of 2.75 or above; NURS 160 or PSYC 134 or HLSC 134; and FACS 155.
Corequisite(s): If not taken as a prerequisite, FACS 155 may be taken concurrently with instructor's approval.

Directed observation and supervised work experience in an approved educational setting, service agency, business or government agency that provides family life education. Students will move from observing and assisting to developing, delivering and assessing lessons and programs in family life education. Students will gain experience applying educational and developmental theories, curriculum development, and teaching methods to delivering evidence-based and culturally sensitive lessons in the content areas of family life education: parent education, strengthening relationships, and/or sexuality education.

Note: Students must make arrangements with the supervising faculty member one semester prior to admittance to the course.

Credit/No Credit

FACS 199. Special Problems. 1 - 3 Units
Term Typically Offered: Fall, Spring

Individual projects or directed reading.

Note: Departmental petition required.

Credit/No Credit

FACS 199D. Dietetic Pathways. 1 Unit
Prerequisite(s): Senior standing as Dietetics emphasis.

Examination of dietetics career paths, processes and options. Students will learn about the profession of dietetics, including professionalism, the professional organization, pathways, mentoring and the code of ethics.

FACS 221A. Advanced Clinical Nutrition A. 3 Units
Prerequisite(s): Admission into Dietetic Internship Program or instructor permission.
Term Typically Offered: Fall, Spring

Perform nutrition assessment of patients with complex medical conditions. Integration of pathophysiology into medical nutrition therapy. Development, supervision and evaluation of nutrition care plans. Select, calculate, monitor and evaluate nutritional support regimens for patients. Lecture, composition.

FACS 221B. Advanced Clinical Nutrition B. 1 Unit
Prerequisite(s): Admission into Dietetic Internship Program or instructor permission.
Term Typically Offered: Fall, Spring

Continuation of principles and skills as developed in FACS 221A with application to other complex disease conditions and integration to multiple diseases. Application of genetics and pathophysiology to complex disease conditions. Demonstration of skills in assignments and presentations. Lecture, composition.

FACS 222. Advanced Community Nutrition and Nutrition Education. 1 Unit
Prerequisite(s): Admission into Dietetic Internship Program or instructor permission.
Term Typically Offered: Fall, Spring

Management of nutrition care for population groups across the lifespan. Perform outcome assessment/evaluation of community based food and nutrition programs. Nutrition policy development and evaluation based on community needs and resources. Learn advanced nutrition counseling techniques. Lecture, composition.

FACS 223. Advanced Foodservice Management and Administration. 2 Units
Prerequisite(s): Admission into Dietetic Internship Program or instructor permission.
Term Typically Offered: Fall, Spring

Management of procurement, distribution, and service of food, and integration of financial, human, physical and material resources. Production of food that meets nutrition guidelines, cost parameters, and consumer acceptance; safety and sanitation issues related to food. Analysis of the operations of food service organization. Lecture, written assignments and practical experience.

FACS 224. Advanced Community Nutrition and Policy. 3 Units
Prerequisite(s): Admission into Dietetic Internship Program or instructor permission.
Term Typically Offered: Fall, Spring

Learn and apply the nutrition care process and to manage nutrition care for population groups. Conduct outcome assessment, planning, implementation, marketing and evaluation of nutrition programs. Apply the research process and critically evaluate nutrition research. Develop an understanding of nutrition policy and resources. Lecture-discussion.

FACS 280. Teaching Methods in Family and Consumer Sciences/Home Economics. 3 Units
Prerequisite(s): Current enrollment in a teaching credential program or instructor permission.
Term Typically Offered: Summer only

This course is designed to provide students with materials, classroom management strategies and methods necessary to successfully teach Family & Consumer Sciences (FCS)/Home Economics Careers and Technology (HECT) at the secondary level. Teacher candidates will become acquainted with legislation, standards, teaching strategies, resources, research and student leadership programs.
**BS in Family and Consumer Sciences (Family Studies)**

**Units required for Major: 51**

**Program Description**

The concentration prepares students for careers in various human service fields. The program emphasizes an understanding of human development, family communication, and diverse families. The program is approved by the National Council on Family Relations (NCFR) for academic programs in Family Life Education. (Also see certificate program in Family Life Education.)

**Minimum Grade Requirement**

A minimum grade of "C-" is required for all prerequisite courses within and outside the Department.

**Note:** Students should consult a Department advisor before choosing a concentration.

Total Units: 51
BS in Family and Consumer Sciences (Nutrition and Food)

Units required for Major: 54

Program Description
The concentration prepares students for careers in the field of nutrition, food management, and food product development and sales. The program emphasizes the role of nutrition and food in individual and family health, connotations of food use, and the management of commercial and noncommercial food systems.

Minimum Grade Requirement
A minimum grade of "C-" is required for all prerequisite courses within and outside the Department.

Note: Students should consult a Department advisor before choosing a concentration.

Note: BIO 10, CHEM 1A, CHEM 1B, CHEM 20, and STAT 1 are recommended for students who plan to complete the dietetics emphasis or graduate studies in nutrition.

BS in Family and Consumer Sciences (Nutrition and Food-Dietetics)

Units required for Major: 80
Units that also fulfill GE: 25

Program Description
The focus of Family and Consumer Sciences is to enhance the skills and knowledge that will promote the well-being of individuals, families, and communities. Our programs and profession focus on individuals and families in order to achieve an optimum balance between people and their environments. The mission of Family and Consumer Sciences is to empower individuals and families to function interdependently in a global society.

Note: By completing the required core courses in the Dietetics Emphasis, GE Area B (12 units) requirements are met.

Pre-Major Requirements
To declare the Dietetics Emphasis, freshman or transfer students admitted as Nutrition and Food Concentration are required to complete the following grade and core course requirements (28 units: Section A) and submit a Major Change form to the Family and Consumer Sciences Department Office along with transcript copies:

1. An overall GPA of 2.75
2. Completion of the required core courses (28 units) with a "C" or better. Only first or second attempts will be considered.

(Family and Consumer Sciences Education)

Units required for Subject Matter Program: 49

Program Description
The Subject Matter Program leads to a BS in Family and Consumer Sciences and meets the subject matter content requirement for a teaching credential.

Minimum Grade Requirement
A minimum grade of "C-" for all courses is required for admission into the teacher preparation program. Teaching credential candidates must also complete the Professional Education Program to qualify for a teaching credential. Consult the FACS Department credential advisor and the College of Education Student Service Center for further information regarding requirements.

Family Life Education

College of Social Sciences and Interdisciplinary Studies

Program Description
The goal of the program is to prepare students to provide family life education in schools, churches, youth programs, family service agencies, and other areas of the community. The certificate program is designed to cover the ten family life substance areas delineated by the National Council on Family Relations NCFR. (See list below). A Sacramento State certificate is awarded upon graduation provided all certificate and degree requirements have been fulfilled.

Note: This program is taken concurrently with established degree requirements. The majority of courses for the certificate program are applicable toward course requirements for a degree in Family and Consumer Sciences. The certificate is not a teaching credential. In conjunction with a Bachelor or Master degree or a state teaching credential, it may be helpful in obtaining employment as a Family Life Educator.
Admission Requirements
1. Students must either have a degree in a related field or must apply for graduate admission to the University.
2. Both undergraduates and graduate students must have a GPA of at least 2.5.
3. Students must apply for entry into the program through the certificate coordinator.

Program Requirements
1. Complete a baccalaureate degree program with a major in Family and Consumer Sciences or a related field.
2. A GPA of 3.0 (B grade or higher) must be attained for all courses taken in the program.
3. At least 9 of the 21 required units must be taken in residence at Sacramento State.

National Council on Family Relations Family Life Substance Areas
• Families in Society
• Internal Dynamics of Families
• Human Growth and Development
• Human Sexuality
• Family Resource Management
• Interpersonal Relationships
• Parent Education and Guidance
• Family Law and Public Policy
• Ethics
• Family Life Education Methodology

Career Possibilities
The Sacramento State certificate in Family Life Education can stand alone or serve as a step toward national certification through the National Council on Family Relations (NCFR). Family Life Educators have employment opportunities in a variety of public service areas: social services, health and welfare, recreation, youth programs, community action, preschool/daycare, after school programs, drug/alcohol rehabilitation centers, senior citizens programs, military family support, parent education, community education, extension services, and family service agencies. For information on certification at the national level see www.ncfr.org (http://www.ncfr.org).

Gerontology
College of Social Sciences and Interdisciplinary Studies

Program Description
The Gerontology Program provides an applied interdisciplinary approach to studying the human aging process and the challenges encountered by older adults and their families as they interact in contemporary society. The curriculum is anchored in life course and humanistic theory, and concentrates on the needs of both healthy and chronically ill elders.

In order to better understand life's complexities, the program guides students to critically examine and explore the issues, impacts, and interventions for elders and their families from an interdisciplinary framework. Throughout coursework, students are exposed to the bio-psycho-social-cultural and gender contexts that exist individually and in aggregate groups within society. Course content challenges all students to identify and analyze existing generalizations, theories, and concepts about aging in order to develop valid understandings based on current research in the discipline. Throughout the program, students are encouraged to actively advocate concerning elder issues.

The program offers a minor in Gerontology. Students are encouraged to blend other disciplines of study with Gerontology in order to facilitate varied career alternatives. They are helped in constructing an individual (elective) program of study within their major that reflects their own interests. Using elective courses to begin to build a minor in this area is highly encouraged. The program also assists students in constructing a special master's degree.

Career opportunities for gerontologists are growing rapidly. Employers are realizing the benefits of employing people who have backgrounds in aging along with abilities to address the needs of their older consumers. Gerontology graduates enter careers in both the public and private sectors with healthy and chronically ill elders. The careers are as varied as the goals of the individual and the needs of the organization. Graduates often work in such positions as counselors, advocates, analysts in state agencies for older adults, social workers, nurses, and information and referral specialists. Others have created their own careers in such areas as dental hygiene, human services, food services, travel, and Web design.

Graduates often work in such positions as counselors, advocates, analysts in state agencies for older adults, social workers, nurses, and information and referral specialists. Others have created their own careers in such areas as dental hygiene, human services, food services, travel, and Web design.

Gerontology graduates also often go on to graduate and professional schools in fields such as sociology, psychology, counseling, nursing, criminal justice, family services, and social work.

Degree Programs

BS in Gerontology (p. 838)

Minor in Gerontology (p. 839)

Certificate in Gerontology (Graduate) (p. 839)

Accreditation

In addition to California State University, Sacramento's full accreditation by the Western Association of Schools and Colleges, the Bachelor of Science in Gerontology is also individually accredited by the Association of Gerontology in Higher Education.

Licensure and Credentialing Disclosure

Admission into programs leading to licensure and credentialing does not guarantee that students will obtain a license or credential. Licensure and credentialing requirements are set by agencies that are not controlled by or affiliated with the CSU and requirements can change at any time. For example, licensure or credentialing requirements can include evidence of the right to work in the United States (e.g., social security number or tax payer identification number) or successfully passing a criminal background check. Students are responsible for determining whether they can meet licensure or credentialing requirements. The CSU will not refund tuition, fees, or any associated costs, to students who determine subsequent to admission that they cannot meet licensure or credentialing requirements. Information concerning licensure and credentialing requirements are available from the Dean of Undergraduate Studies, Sacramento Hall 234, (916) 278-5344.

Special Features

The focus of the curriculum is upon the biological/psychological/social aspects of aging; social policies; services and research in aging; and practice, administration, and program development, implementation and evaluation skills related to aging.

- An integrated interdisciplinary program of courses and field experiences leads to a Bachelor of Science degree with a Major or Minor in Gerontology.
- Multiple major courses include integrated Service Learning to connect theory, practice, and community service.
- Individuals are prepared for careers in varied gerontological practice areas based upon demographic projections of need for personnel in planning, administering, coordinating, and delivering older adult services.
- Gerontological practitioners’ awareness of the effects of social policy on aging individuals and families is emphasized.
- The program helps facilitate students’ progression from community colleges to the University when acquiring a BS degree in Gerontology.

- Individuals currently working in the community are afforded opportunities to learn advanced skills and acquire professional training in gerontology.
- The strong relationships between the Gerontology Program and Sacramento area agencies and institutions planning or delivering services for older persons, and their families are key components to this program's success.
- The Gerontology Program helps enhance the interest and commitment of diverse faculty and the University while providing a vehicle for collaboration regarding community engagement, interdisciplinary study and research in the field of Gerontology.
- The Program provides comprehensive academic preparation for graduate study in Gerontology or other related fields.

Potential Career Possibilities

Counselor · Adult Protective Services · Assessment/Intake Case Worker · California Department of Aging · Case Manager · Consultant · Department of Health Services · Department of Social Services-Older Adult Educator · Guardian/Conservator Staff · Information and Referral Specialist · Legal Aid Assistant · Ombudsman/Advocate · Program Activities Director · Program Specialist · Senior Community Outreach · Geriatric Social Worker · Geriatric Clinical Nurse · Rehabilitation/Job Training Agencies · Senior Retirement/Adult Day Care Centers · Area Agencies on Aging

GERO 21. First Year Seminar: Becoming an Educated Person. 3 Units
General Education Area/Graduation Requirement: Understanding
Personal Development (E)
Term Typically Offered: Fall, Spring

Introduction to the nature and possible meanings of higher education, and the functions and resources of the University. Designed to help students develop and exercise fundamental academic success strategies and to improve their basic learning skills. Provide students with the opportunity to interact with fellow students and the seminar leader and to build a community of academic and personal support, as well as explore gerontological concepts needed to respond to demographic changes in today's world.
GERO 100. Aging Issues in Contemporary America. 3 Units
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall, Spring, Summer

Introduction to the field of Gerontology and how the discipline addresses society's aging needs. An examination of current issues in gerontology using a life span perspective focusing on older adults' needs/concerns along life's continuum in various environments. Major topics include implications of the demographic imperative, common aging changes/conditions, myths and stereotypes, effects of health/illness on individual and family roles, basic social issues and policies arising from the graying of America, and media, cultural and gender influences.

GERO 101. Elder Care Continuum Services and Strategies. 3 Units
Term Typically Offered: Fall, Spring

Exploration and analysis of the "elder care service continuum" within the context of changing diverse societal needs, service availability and accessibility, current public policy, and administrative and management issues facing care providers. A multidisciplinary examination of the spectrum of services and programs targeted for older adults and their families. Includes information and referral processes and agencies, recreational and social options, housing alternatives, in-home, residential and skilled care options, health care eligibility criteria, funding sources, and adult protective services.

Note: This is a service learning course.

GERO 102. Social Policy for an Aging Society. 3 Units
Prerequisite(s): GOVT 1 or GOVT 150 or equivalent.
Term Typically Offered: Fall, Spring

Explores context and process for policy making by national and California state governments including ethical dimensions. Applications are developed from students' and instructor's areas of interest including K-12 and higher education, land-use policy, and aging issues such as elder advocacy, Social Security, and Medicare/Medicaid. Provides background and skills for entry level positions in public or non-profit organizations. Cross Listed: PPA 100; only one may be counted for credit.

GERO 103. Applied Care Management in Gerontology Practice. 3 Units
Term Typically Offered: Fall, Spring

Analysis of issues, services, methods, and interventions related to "practice" with older adults and application of strategies for identifying and accessing services targeted for older adults and their families. Outcomes include understanding: unique characteristics/needs of elders; relationship of the systems approach to working with elders; issues affecting service delivery to this population (diversity, gender, ethics, special health and mental health needs); basic practice skills for effective service delivery to elders and families/caregivers; student's attitudes and roles when working with this population.

Note: This is a service learning course.

GERO 121. Models for Successful Aging. 3 Units
Term Typically Offered: Fall, Spring

In depth interdisciplinary, holistic exploration of health promotion and adaptation paradigms that facilitate successful, productive longevity. Hardiness and self-efficacy theories along with expectations and experiences enhancing quality of life are explored. Interactions among such variables as activity, diet, exercise, work/leisure, attitudes/beliefs, humor, living environments, spirituality, and social networks are investigated within the contexts of gender, economic and cultural perspectives.

GERO 122. Managing Disorders in Elders. 3 Units
Prerequisite(s): GERO 121
Term Typically Offered: Fall, Spring

Study and analysis of prevalent pathophysiological-based diseases and psychological disorders commonly experienced by older adults and frail elder populations. Disease/disorder causes and the effects of chronic illness on individuals' activities of daily living, sexuality, relationships, and coping abilities with changing lifestyles are examined using a life course framework and evidenced-based research. Assessment tools, lab value changes, medication needs, complications/disabilities, traditional/alternative treatments and ethical issues rising from meeting needs are investigated along with implications for caregivers.

GERO 130. Gerontology Practicum. 3 Units
Prerequisite(s): 24 Major units including GERO 101, GERO 102, GERO 103, GERO 121, GERO 122 and instructor permission.
Term Typically Offered: Fall, Spring

Supervised practicum experience in a community agency planning for or delivering professional services to older adults. This practicum experience is part of two culminating courses for the major and focuses on application of the interdisciplinary nature of the discipline while affording students direct, hands on experiences. Includes a field seminar. Seminar discussions focus on the application of gerontological concepts derived from all gerontology courses and are applied to each student's specific practicum area.

Note: This is a service learning course.

Credit/No Credit

GERO 131. Gerontology Capstone Practicum. 3 Units
Prerequisite(s): 36 Major units including GERO 101, GERO 102, GERO 103, GERO 121, GERO 122, GERO 130 and instructor permission.
Term Typically Offered: Fall, Spring

Supervised internship experience in a community agency planning for or delivering professional services to older adults. This capstone practicum experience builds on the first internship course and is the final culminating course for the major and focuses on advanced application of the interdisciplinary nature of the discipline while affording students direct, hands on experiences. Includes a field seminar. Seminar discussions focus on the application of gerontologic concepts derived from all gerontology courses and are applied to each student's specific Practicum area.

Note: This is a service learning course. Minors may take this course without taking GERO 130

Credit/No Credit

GERO 199. Special Problems. 1 - 3 Units
Prerequisite(s): Advanced approval of project goal and objectives by program director.
Term Typically Offered: Fall, Spring

Independent research, project, or directed reading.

Note: Open to students who are capable of independent work. A maximum of 3 units may count toward elective major requirements.

Credit/No Credit
GERO 200. Adaptation To Age Related Changes, Illnesses and Caregiving. 3 Units
Term Typically Offered: Fall, Spring
Exposure to and analysis of positive and negative functional consequences arising from age related changes and illnesses in elders. Content elucidates changes and their effects on elders’ levels of wellness using interdisciplinary research and holistic, life course frameworks. Screening assessments, interventions, community resources and services, and ethical issues are addressed for each topic. Caregiving issues and solutions are explored within life span and problem solving frameworks.

GERO 221. Models for Successful Aging. 3 Units
Term Typically Offered: Fall, Spring
In depth interdisciplinary, holistic exploration of health promotion and adaptation paradigms that facilitate successful, productive longevity. Hardiness and self-efficacy theories along with expectations and experiences enhancing quality of life are explored. Interactions among such variables as activity, diet, exercise, work/leisure, attitudes/beliefs, humor, living environments, spirituality, and social networks are investigated within the contexts of gender, economic and cultural perspectives. Cross Listed: GERO 121; only one may be counted for credit.

GERO 222. Managing Disorders in Elders. 3 Units
Prerequisite(s): GERO 221
Term Typically Offered: Fall, Spring
Offers in-depth study/analysis of prevalent pathophysiological-based diseases and psychological disorders commonly experienced by older adults and frail elder populations. Disease/disorder causes and the effects of chronic illness on individuals’ activities of daily living, sexuality, relationships, and coping abilities with changing lifestyles are examined using a life course framework and evidenced-based research. Assessment tools, lab value changes, medication needs, complications/disabilities, traditional/alternative treatments and ethical issues rising from meeting needs are investigated along with implications for caregivers. Cross Listed: GERO 122; only one may be counted for credit.

GERO 295. Internship/Project. 3 Units
Prerequisite(s): GERO 200, GERO 221, GERO 222.
Term Typically Offered: Fall, Spring
Supervised fieldwork internship or project that is a culminating experience and applies learned gerontological theories and concepts in a community setting where planning, developing, or delivering services to older adults or their families occurs. Students choose an area of practice and negotiate their learning experiences or project with their faculty advisor and field supervisor. Advanced approval of project goal and objectives by program director are required. Credit/No Credit

GERO 299. Special Problems. 1 - 3 Units
Prerequisite(s): Instructor permission.
Term Typically Offered: Fall, Spring
Independent research, project, or directed reading. Open to students who are capable of independent work. A maximum of 3 units may count toward elective major requirements. Advanced approval of project goal and objectives by program director. Credit/No Credit

• Major Core courses have the potential of offering a one unit Service Learning (SL) option for each of the three theory courses (GERO 102, GERO 121, and GERO 122) that do not already include SL. These units could be combined and serve as one elective (GERO 199) if there is an approved written plan by the student and academic advisor prior to enrolling in the course.

Certificate in Gerontology

Units required for Certificate: 18

Program Description

The Gerontology Program provides an applied interdisciplinary approach to studying the human aging process and the challenges encountered by older adults and their families as they interact in contemporary society. The curriculum is anchored in life course and humanistic theory, and concentrates on the needs of both healthy and chronically ill elders.

Candidates must maintain an overall GPA of 3.0 in courses submitted for the certificate.

1. Graduate students wishing to pursue independent study focusing on aspects of Gerontology are encouraged to also take GERO 299: Special Problems.

Eligibility Information

Students must either be in a graduate degree program at Sacramento State or must apply for graduate admission to the University.

Students must complete at least 45 units of college or university work before becoming eligible to enroll in the program. Students are also encouraged to meet with the Program Director for advising prior to enrolling in any Gerontology classes.

Interdisciplinary Studies

College of Social Sciences and Interdisciplinary Studies

Program Description
This program recognizes that some subject matter is more thoroughly explored by drawing on various perspectives and methodologies from more than one discipline. Students, with faculty supervision, engage learning opportunities that encourage combining a range of information and experiences into a challenging individualized learning project. The office administering, guiding, reviewing, and monitoring the interdisciplinary efforts, when they cross College or Divisional lines, is that of the Dean of the College of Social Sciences and Interdisciplinary Studies. Offerings are listed under the heading Interdisciplinary (ID) in the Class Schedule. Questions pertaining to the establishment and "equivalency" of courses should be directed to the Dean of the College of Social Sciences and Interdisciplinary Studies.

Labor Studies

College of Social Sciences and Interdisciplinary Studies

Program Description
The Labor Studies Program is concerned with the world of work, workers, and their organizations. It investigates the cultural, economic, and political forces which provide the environment in which people make a living. It is an inter-disciplinary program which combines broad perspectives with specific skills.

The program emphasizes the world of work from the view of the individual in the workplace, the labor market, and as a member of a work group or labor union. The roles of employers, government, and labor unions, as adversaries and cooperators in an increasingly competitive world, are covered. Courses combine analytical and practical elements, bridging academia with the world of work.

Degree Program
Minor in Labor Studies (p. 840)

Contact Information
Charles Varano, Coordinator
Amador Hall 454D

LBRS 100. Labor and the American Social Structure. 3 Units
Prerequisite(s): GWAR certification before Fall 09; or WPJ score of 80+; or 3-unit placement in ENGL 109M or ENGL 109W; or 4-unit placement in ENGL 109M or ENGL 109W and co-enrollment in ENGL 109X; or WPJ score 70 or 71 and co-enrollment in ENGL 109X.
General Education Area/Graduation Requirement: Writing Intensive Graduation Requirement (WI), GE AREA D
Term Typically Offered: Fall, Spring
Introduction to the study of labor in the U.S., including the nature of work, characteristics of the work force, and an overview of contemporary labor and industrial relations systems within the framework of current U.S. economic and political developments.
Cross Listed: SOC 176; only one may be counted for credit.

LBRS 195. Labor Studies Internship. 1 - 3 Units
Term Typically Offered: Fall, Spring
Supervised work experience or research in relevant institutions providing an opportunity to apply classroom theories and principles to the "real world." Partial supervision may be supplied by host institution. Requires approval of the Labor Studies Coordinator.
Credit/No Credit

LBRS 199. Special Problems. 1 - 3 Units
Term Typically Offered: Fall, Spring
Individual projects or directed reading open to students competent to carry on individual work under the direction of a faculty sponsor. Admission requires approval of the faculty sponsor and the Labor Studies Coordinator.
Credit/No Credit

Minor in Labor Studies
Units required for Minor: 21

### Career Possibilities

The traditional program of the Liberal Studies major is specifically designed to prepare students in the multiple disciplines that teachers in the kindergarten through middle school grades must have studied. The nontraditional program of the Liberal Studies major is recommended as a general major for those who wish to pursue a variety of career fields (including teaching).

**LBST 110. California Studies.** 3 Units
Prerequisite(s): GOVT 1 or equivalent.
Term Typically Offered: Fall, Spring
Multidisciplinary, analytical view of California that identifies its ethnic and racial diversity within the political, economic and social development of the state. Examines the environmental and geographic dimensions of the state as well as the demographic and land-use trends that have contributed to California's uniqueness.

**LBST 194. Liberal Studies Cooperative Education Experience.** 3 Units
Prerequisite(s): Upper division status, and instructor permission.
Term Typically Offered: Fall, Spring
Cooperative Education (Co-op) relates academic theory to professional practice by providing paid work experience in schools or related settings. Students gain field experience through supervised employment in school districts and other education-related settings.
Note: May be repeated once for credit.

Credit/No Credit

**BA in Liberal Studies (American Studies)**

Units required for Major: 100-103
Minimum total units required for BA: 120

**Program Description**
The Liberal Studies program is an interdisciplinary major, which encompasses a wide variety of areas of knowledge in a multidisciplinary curriculum. The program provides a broad academic program that encourages academic excellence, diversity, community, and collaboration. There are two tracks in the Liberal Studies Program, the traditional program, and the nontraditional program. The traditional program is a multidisciplinary major designed for students who intend to become K-8 or special education teachers in California, and it has been approved by the California Commission on Teacher Credentialing. Its purpose is to provide beginning teachers with a strong grounding in the wide ranging subject matter that will be needed to be effective teachers. The nontraditional program is designed for students who are interested in a multidisciplinary major, but who do not necessarily plan to become teachers.

Advisors meet at least once each semester with students to provide a hands-on approach to learning. The Liberal Studies major is also an excellent preparation for careers in public service, management, counseling, law, librarianship, medicine, and professional or graduate education in business.

**Minimum Grade Requirement**
A minimum grade of "C-" is required in all courses applied to the Liberal Studies major.

**Requirements for Concentrations (Traditional Program)**
All concentrations require a minimum of 12 units, 3 of which may overlap with the core course requirements (except for concentration in multicultural studies). Students who wish to complete requirements for a supplementary authorization in any CCTC-approved discipline, which allows them to teach that subject in grades K-9, should see an advisor for important information.

**Requirements for Non-traditional Program**
Students who are following the nontraditional program will complete a minor instead of a concentration. Please talk to an advisor for more information.

In addition, there are other ways of completing a concentration in mathematics. For further information on a concentration in mathematics, please consult the mathematics advisor in Liberal Studies.

4. In compliance with California Commission on Teacher Credentialing standards, in order to receive subject matter competency certification, students who complete the Liberal Studies major must pass the California Subject Examination for Teachers (CSET). **Note:** Students will need to meet the foreign language graduation requirement in effect as per their catalog year.

**Total Units**  12

**BA in Liberal Studies (Foreign Language)**

**Units required for Major:** 100-103  
**Minimum total units required for BA:** 120

**Program Description**

The Liberal Studies program is an interdisciplinary major, which encompasses a wide variety of areas of knowledge in a multidisciplinary curriculum. The program provides a broad academic program that encourages academic excellence, diversity, community, and collaboration. There are two tracks in the Liberal Studies Program, the traditional program, and the nontraditional program. The traditional program is a multidisciplinary major designed for students who intend to become K-8 or special education teachers in California, and it has been approved by the California Commission on Teacher Credentialing. Its purpose is to provide beginning teachers with a strong grounding in the wide ranging subject matter that will be needed to be effective teachers. The nontraditional program is designed for students who are interested in a multidisciplinary major, but who do not necessarily plan to become teachers.

Advisors meet at least once each semester with students to provide a hands-on approach to learning. The Liberal Studies major is also an excellent preparation for careers in public service, management, counseling, law, librarianship, medicine, and professional or graduate education in business.

**Minimum Grade Requirement**

A minimum grade of "C-" is required in all courses applied to the Liberal Studies major.

**Requirements for Concentrations (Traditional Program)**

All concentrations require a minimum of 12 units, 3 of which may overlap with the core course requirements (except for concentration in multicultural studies). Students who wish to complete requirements for a supplementary authorization in any CCTC-approved discipline, which allows them to teach that subject in grades K-9, should see an advisor for important information.

**Requirements for Non-traditional Program**

Students who are following the nontraditional program will complete a minor instead of a concentration. Please talk to an advisor for more information.

Total Units: 100-103

1. The Core Requirements for the nontraditional program are similar to the Core Requirements for the traditional program except there are a number of substitutions that can be made. Please see an advisor for more information.

2. Course to meet critical thinking requirement. See advisor for specific options.

3. Students who complete a mathematics concentration may substitute MATH 30, MATH 31, and MATH 35 for the above requirements. In addition, there are other ways of completing a concentration in mathematics. For further information on a concentration in mathematics, please consult the mathematics advisor in Liberal Studies.

4. In compliance with California Commission on Teacher Credentialing standards, in order to receive subject matter competency certification, students who complete the Liberal Studies major must pass the California Subject Examination for Teachers (CSET).

**Note:** Students will need to meet the foreign language graduation requirement in effect as per their catalog year.

## Concentration in Foreign Language

Complete the minor requirements in a foreign language.

## BA in Liberal Studies (Human Development)

Units required for Major: 100-103

Minimum total units required for BA: 120

### Program Description

The Liberal Studies program is an interdisciplinary major, which encompasses a wide variety of areas of knowledge in a multidisciplinary
curriculum. The program provides a broad academic program that encourages academic excellence, diversity, community, and collaboration. There are two tracks in the Liberal Studies Program, the traditional program, and the nontraditional program. The traditional program is a multidisciplinary major designed for students who intend to become K-8 or special education teachers in California, and it has been approved by the California Commission on Teacher Credentialing. Its purpose is to provide beginning teachers with a strong grounding in the wide ranging subject matter that will be needed to be effective teachers. The nontraditional program is designed for students who are interested in a multidisciplinary major, but who do not necessarily plan to become teachers.

Advisors meet at least once each semester with students to provide a hands-on approach to learning. The Liberal Studies major is also an excellent preparation for careers in public service, management, counseling, law, librarianship, medicine, and professional or graduate education in business.

Minimum Grade Requirement
A minimum grade of "C-" is required in all courses applied to the Liberal Studies major.

Requirements for Concentrations (Traditional Program)
All concentrations require a minimum of 12 units, 3 of which may overlap with the core course requirements (except for concentration in multicultural studies). Students who wish to complete requirements for a supplementary authorization in any CCTC-approved discipline, which allows them to teach that subject in grades K-9, should see an advisor for important information.

Requirements for Non-traditional Program
Students who are following the nontraditional program will complete a minor instead of a concentration. Please talk to an advisor for more information.

**Program Total Units**
100-103

1 The Core Requirements for the nontraditional program are similar to the Core Requirements for the traditional program except there are a number of substitutions that can be made. Please see an advisor for more information.

2 Course to meet critical thinking requirement. See advisor for specific options.
Students who complete a mathematics concentration may substitute MATH 30, MATH 31, and MATH 35 for the above requirements. In addition, there are other ways of completing a concentration in mathematics. For further information on a concentration in mathematics, please consult the mathematics advisor in Liberal Studies.

In compliance with California Commission on Teacher Credentialing standards, in order to receive subject matter competency certification, students who complete the Liberal Studies major must pass the California Subject Examination for Teachers (CSET).

Note: Students will need to meet the foreign language graduation requirement in effect as per their catalog year.

### BA in Liberal Studies (Mathematics)

Units required for Major: 100-103
Minimum total units required for BA: 120

### Program Description

The Liberal Studies program is an interdisciplinary major, which encompasses a wide variety of areas of knowledge in a multidisciplinary curriculum. The program provides a broad academic program that encourages academic excellence, diversity, community, and collaboration. There are two tracks in the Liberal Studies Program, the traditional program, and the nontraditional program. The traditional program is a multidisciplinary major designed for students who intend to become K-8 or special education teachers in California, and it has been approved by the California Commission on Teacher Credentialing. Its purpose is to provide beginning teachers with a strong grounding in the wide ranging subject matter that will be needed to be effective teachers. The nontraditional program is designed for students who are interested in a multidisciplinary major, but who do not necessarily plan to become teachers.

Advisors meet at least once each semester with students to provide a hands-on approach to learning. The Liberal Studies major is also an excellent preparation for careers in public service, management, counseling, law, librarianship, medicine, and professional or graduate education in business.

### Minimum Grade Requirement

A minimum grade of "C-" is required in all courses applied to the Liberal Studies major.

### Requirements for Concentrations (Traditional Program)

All concentrations require a minimum of 12 units, 3 of which may overlap with the core course requirements (except for concentration in multicultural studies). Students who wish to complete requirements for a supplementary authorization in any CCTC-approved discipline, which allows them to teach that subject in grades K-9, should see an advisor for important information.

### Requirements for Non-traditional Program

Students who are following the nontraditional program will complete a minor instead of a concentration. Please talk to an advisor for more information.

- ETHN 111 Southeast Asians in the US

**African American Emphasis**
- ETHN 170 Pan African Studies
- HIST 177 The African-American Experience, 1603-Present

**Native American Emphasis**
- ETHN 140 Native American Experience
- HIST 171

**Women's Studies Emphasis**
- HIST 167 History of American Women
- WOMS 115 Introduction to Women's Studies
- WOMS 136 Gender, Race, and Class
- WOMS 137 Women Of Color

Total Units 12

1 If planning to pursue a multiple subject credential with a Bilingual Emphasis (BCLAD) in Spanish or Asian languages, students must take two courses from Chicano/Latino Emphasis or Asian American Emphasis, respectively.

Note: There is no overlap with core course requirements in this concentration.

BA in Liberal Studies (Music)

Units required for Major: 100-103
Minimum total units required for BA: 120

Program Description

The Liberal Studies program is an interdisciplinary major, which encompasses a wide variety of areas of knowledge in a multidisciplinary curriculum. The program provides a broad academic program that encourages academic excellence, diversity, community, and collaboration. There are two tracks in the Liberal Studies Program, the traditional program, and the nontraditional program. The traditional program is a multidisciplinary major designed for students who intend to become K-8 or special education teachers in California, and it has been approved by the California Commission on Teacher Credentialing. Its purpose is to provide beginning teachers with a strong grounding in the wide-ranging subject matter that will be needed to be effective teachers. The nontraditional program is designed for students who are interested in a multidisciplinary major, but who do not necessarily plan to become teachers.

Advisors meet at least once each semester with students to provide a hands-on approach to learning. The Liberal Studies major is also an excellent preparation for careers in public service, management, counseling, law, librarianship, medicine, and professional or graduate education in business.

Minimum Grade Requirement
An A minimum grade of "C-" is required in all courses applied to the Liberal Studies major.

Requirements for Concentrations (Traditional Program)

All concentrations require a minimum of 12 units, 3 of which may overlap with the core course requirements (except for concentration in multicultural studies). Students who wish to complete requirements for a supplementary authorization in any CCTC-approved discipline, which allows them to teach that subject in grades K-9, should see an advisor for important information.

Requirements for Non-traditional Program

Students who are following the nontraditional program will complete a minor instead of a concentration. Please talk to an advisor for more information.

1 The Core Requirements for the nontraditional program are similar to the Core Requirements for the traditional program except there are a number of substitutions that can be made. Please see an advisor for more information.
2 Course to meet critical thinking requirement. See advisor for specific options.
3 Students who complete a mathematics concentration may substitute MATH 30, MATH 31, and MATH 35 for the above requirements.
In addition, there are other ways of completing a concentration in mathematics. For further information on a concentration in mathematics, please consult the mathematics advisor in Liberal Studies.
In compliance with California Commission on Teacher Credentialing standards, in order to receive subject matter competency certification, students who complete the Liberal Studies major must pass the California Subject Examination for Teachers (CSET).

Note: Students will need to meet the foreign language graduation requirement in effect as per their catalog year.

BA in Liberal Studies (Physical Education)

Units required for Major: 100-103
Minimum total units required for BA: 120

Program Description

The Liberal Studies program is an interdisciplinary major, which encompasses a wide variety of areas of knowledge in a multidisciplinary curriculum. The program provides a broad academic program that encourages academic excellence, diversity, community, and collaboration. There are two tracks in the Liberal Studies Program, the traditional program, and the nontraditional program. The traditional program is a multidisciplinary major designed for students who intend to become K-8 or special education teachers in California, and it has been approved by the California Commission on Teacher Credentialing. Its purpose is to provide beginning teachers with a strong grounding in the wide ranging subject matter that will be needed to be effective teachers. The nontraditional program is designed for students who are interested in a multidisciplinary major, but who do not necessarily plan to become teachers.

Advisors meet at least once each semester with students to provide a hands-on approach to learning. The Liberal Studies major is also an excellent preparation for careers in public service, management, counseling, law, librarianship, medicine, and professional or graduate education in business.

Minimum Grade Requirement

A minimum grade of "C-" is required in all courses applied to the Liberal Studies major.

Requirements for Concentrations (Traditional Program)

All concentrations require a minimum of 12 units, 3 of which may overlap with the core course requirements (except for concentration in multicultural studies). Students who wish to complete requirements for a supplementary authorization in any CCTC-approved discipline, which allows them to teach that subject in grades K-9, should see an advisor for important information.

Requirements for Non-traditional Program

Students who are following the nontraditional program will complete a minor instead of a concentration. Please talk to an advisor for more information.

</tr>
<tr>
<td>Physical Education</td>
</tr>
<tr>
<td>Human Development</td>
</tr>
</tbody>
</table>

Total Units: 100-103

1. The Core Requirements for the nontraditional program are similar to the Core Requirements for the traditional program except there are a number of substitutions that can be made. Please see an advisor for more information.

2. Course to meet critical thinking requirement. See advisor for specific options.

3. Students who complete a mathematics concentration may substitute MATH 30, MATH 31, and MATH 35 for the above requirements.

   In addition, there are other ways of completing a concentration in mathematics. For further information on a concentration in mathematics, please consult the mathematics advisor in Liberal Studies.

4. In compliance with California Commission on Teacher Credentialing standards, in order to receive subject matter competency certification, students who complete the Liberal Studies major must pass the California Subject Examination for Teachers (CSET).

   Students will need to meet the foreign language graduation requirement in effect as per their catalog year.

Military Studies

College of Social Sciences and Interdisciplinary Studies

Program Description

The Military Studies Minor is an appropriate and timely course of study for any student interested in defense policy, the military’s role in society, and military history. The successful completion of the minor will provide additional recognition for students wishing to understand these important subjects.

The Military Studies Minor is an interdisciplinary minor of 21 units which provides a broad range perspective on a vital contemporary issue. The program focuses on the nature of human conflict, conflict resolution, international power relations, historical battles and campaigns, the military in domestic society, and myriad sub-topics. It enhances student exposure to, and understanding of, relevant military subjects. The Military Studies Minor is compatible with, and complements, several majors, i.e., Economics, Geography, Government, and History.

Peace and Conflict Resolution

College of Social Sciences and Interdisciplinary Studies

Program Description

Peace and Conflict Resolution is an interdisciplinary minor with most of its courses drawn from the Social Sciences. The courses introduce students to the processes of understanding and changing social
conditions in order to lead to a more peaceful, just, and conflict-free society and world.

We find that war and oppression are subject to study and to change, and the university is an appropriate setting for the study and pursuit of alternate means of resolving conflicts.

The minor complements a number of majors, including many in the Humanities, Social Sciences, and Professional Schools.

**Degree Program**

Minor in Peace and Conflict Resolution (p. 865)

**Special Features**

- A philosophy basic to the study of Peace and Conflict Resolution is praxis, the creative combination of analysis and action. Students in the program are encouraged to develop the knowledge base, skills, and political courage necessary for effective leadership in a democratic society.
- The program’s faculty is widely published and active in a number of fields related to peace and conflict resolution.
- The goal of the program is to educate adults to be responsible and courageous citizens, and, if the students choose, to become professional peace workers. To achieve this end we practice an interdisciplinary approach, drawing upon courses and faculty in several academic areas including anthropology, communication studies, economics, education, government, environmental studies, ethnic studies, and women’s studies.

**Peace Corps Prep Certificate**

Units Required for Certificate: 19-33

**Program Description**

The purpose of the Peace Corps Prep Certificate is to provide a combination of curricular and co-curricular preparation for students who are interested in international development work and potential Peace Corps service. Although the Certificate does not guarantee acceptance to the Peace Corps, it offers students a competitive advantage in their applications by providing the sort of knowledge, skills, and experiences that will prepare students for such international development work. Most students should be able to integrate the program into their existing plans of study, with significant opportunities for overlap with major and General Education requirements.

The Peace Corps Prep Certificate includes four required components:

A. Training in your chosen Peace Corps work sector (9 units)
B. Field Experience in your chosen Peace Corps work sector (1-3 units)
C. Development of intercultural competence (9 units)
D. Professional and Leadership Development (0 units)

All Peace Corps Prep students are encouraged to study a foreign language, but are not required to. Students seeking Peace Corps service in certain placement areas must demonstrate to the Peace Corps the appropriate level of language proficiency:

- Spanish-speaking countries in Latin America: Students must build strong intermediate proficiency in Spanish, having completed two intermediate-level courses or learned Spanish through another medium.
- French-speaking countries in West Africa: Students must build proficiency in French or another Romance language, having completed one intermediate-level course or learned the language through another medium.

**Peace Corps Work Sectors**

1. **Agriculture**: Agriculture volunteers work with small-scale farmers and families to increase food security and production and adapt to climate change while promoting environmental conservation. They introduce farmers to techniques that prevent soil erosion, reduce the use of harmful pesticides, and replenish the soil. They work alongside farmers on integrated projects that often combine vegetable gardening, livestock management, agroforestry, and nutrition education.

2. **Community Economic Development**: Community economic development volunteers work with development banks, non-governmental organizations, and municipalities to encourage economic opportunities in communities. They frequently teach in classroom settings and work with entrepreneurs and business owners to develop and market their products. Some Volunteers also teach basic computer skills and help communities take advantage of technologies that connect them to the global marketplace.
3. **Education**: Education is the Peace Corp's largest program area. Volunteers play an important role in creating links among schools, parents, and communities by working in elementary, secondary, and postsecondary schools as math, science, conversational English, and resource teachers or as early grade reading and literacy teacher trainers. Volunteers also develop libraries and technology resource centers.

4. **Environment**: Environment volunteers lead grassroots efforts in their communities to protect the environment and strengthen understanding of environmental issues. They teach environmental awareness in elementary and secondary schools and to youth groups and community organizations, empowering communities to make their own decisions about how to protect and conserve the local environment. Volunteers also address environmental degradation by promoting sustainable use of natural resources.

5. **Health**: Health volunteers work within their communities to promote important topics such as nutrition, maternal and child health, basic hygiene, and water sanitation. Volunteers also work in HIV/AIDS education and prevention programs to train youth as peer educators, develop appropriate education strategies, provide support to children orphaned by the pandemic, and create programs that provide emotional and financial support to families and communities affected by the disease.

6. **Youth in Development**: Youth development volunteers work with youth in communities to promote engagement and active citizenship, including gender awareness, employability, health and HIV/AIDS education, environmental awareness, sports and fitness programs, and information technology.

**Admission Requirements**

Political Science

College of Social Sciences and Interdisciplinary Studies

Program Description

Political Science, or Government, is devoted to study of the theory and practice of government and politics. The Political Science Department at Sacramento State offers courses in several fields of study, including: Political Theory; American Politics; Public Law; International Relations; Comparative Politics; and Public Policy. Over 70 courses cover all the major aspects of political science. Lower division courses satisfy General Education requirements and help to prepare students for advanced work.

The Government major complements a student's liberal arts education with an emphasis on understanding the theoretical and practical aspects of government and politics. The department offers a BA in Government, two concentrations, and the minor in Government. The Government major is structured to provide students with a background in the basic fields of political science, as well as to permit them a range of choice in completing the program. The Political Science Department offers several courses integral to interdisciplinary programs such as California Studies,
Environmental Studies, Ethnic Studies, Peace and Conflict Resolution Studies, and Women's Studies.

Students should select a faculty advisor who shares the student's academic interests. For students who wish to pursue graduate work in Government, a Master of Arts degree is offered.

Degree Programs
BA in Government (p. 892)
BA in Government (International Relations) (p. 892)
BA in Government/Journalism (p. 893)
Minor in Government (p. 898)
MA in Government (California and its Political Environment) (p. 894)
MA in Government (International Relations/Comparative Government) (p. 895)
MA in Government (Political Theory) (p. 897)
Capital Fellows Certificate in Applied Policy and Government (p. 893)

Special Features
• Located in the state capital, the Sacramento State program offers unusual opportunities for the study of government and politics and especially for internships. Students have served internships with state legislators, legislative committee staffs, special interest and lobbying groups, and administrative agencies. Placement is also possible in local government executive agencies and with county supervisors, city council members, and selected political campaigns. Students applying for internships should have had (or be taking in the same semester) GOVT 180, California State and Local Government, and must have passed the Writing Placement for Juniors Examination.
• Sacramento State students may apply for the Sacramento Semester Program, which brings students from all California State University campuses to Sacramento for one semester to take advantage of the unique learning experience at the State Capitol. The heart of this program is six units of internship with the legislature or other state offices. An accompanying 6 unit seminar course in state government and politics allows students to integrate their practical internship experience with academic work.
• Students who work in the day will be interested to know that class scheduling permits completion of the general Government major in the late afternoon and evening hours.

Career Possibilities
Government majors enter careers in government at the local, state, or federal level, political campaigns, non-profit and non-governmental organizations, lobbying, urban planning, or policy-related fields of all kinds. Others go into teaching at all levels, journalism, business, and Government, of course, is a popular major for students interested in pursuing legal careers. Examples of possible careers include: policy analyst, specialist in legislative and governmental relations, budget analyst, campaign manager, Foreign Service officer, attorney, paralegal, high school teacher.

GOVT 1. Essentials Of Government. 3 Units
General Education Area/Graduation Requirement: U.S. Constitution + California State & Local Govt, GE AREA D
Term Typically Offered: Fall, Spring, Summer
Examines the U.S. Constitution, the U.S. system of governments and the ideas and values on which they are based. Fulfills state code requirements for U.S. Constitution and California State and Local Government. Students who believe they have a good fundamental knowledge of the institutions of American Government are encouraged to consider a designated upper division course to fulfill the state requirement.

GOVT 1H. Honors Government. 3 Units
General Education Area/Graduation Requirement: U.S. Constitution + California State & Local Govt, GE AREA D
Term Typically Offered: Fall, Spring
Explores some of the most influential works of politics and political writing in American history, and challenges contemporary analysis of political institutions and processes. Examines the structure of the Constitution, issues of federalism, the growth of civil rights, and the processes of government, with a comparative element. Explores the unique characteristics of California state politics.
GOVT 10. The Meaning of Government: An Introduction to Political Ideas. 3 Units
General Education Area/Graduation Requirement: Humanities (Area C2)
Term Typically Offered: Fall only

Examination of the ideas of various authors about governing and being governed. Topics include: the scope and limits of freedom, the causes and characteristics of the state, the content of politics, the nature of authority, the problems of power and the duty to obey.

GOVT 35. World Politics. 3 Units
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall, Spring

Basic introduction to global politics focusing on a broad range of issues and problems relating to conflict and cooperation among nations, and on similarities and differences among nations’ governmental institutions, structures and processes.

GOVT 96. California Constitution & Government. 1 Unit
Prerequisite(s): Instructor approval required.
Examines the California state constitution, the structure and role played by both the state government and local governments in California. Students who pass the course will petition the Dean of Undergraduate Studies for credit in meeting the California Government portion of the American Institution requirement.
Note: Experimental course.
Credit/No Credit

GOVT 100. Introduction to Research Methods in Political Science. 3 Units
Term Typically Offered: Fall, Spring

Examines the foundations of scientific research methodology in political and social science. Designed to introduce students to the basic conceptual, observational and analytical methods of empirical research in political science and related social sciences.

GOVT 110. Political Thought I. 3 Units
Term Typically Offered: Fall, Spring

History of political theory, covering some important thinkers and topics during the Ancient, Medieval and Early Modern periods.

GOVT 111. Political Thought II. 3 Units
Term Typically Offered: Fall, Spring

History of political theory, covering some important thinkers and topics from the Early Modern period to the early 20th century.

GOVT 112. Current Political Thought. 3 Units
Term Typically Offered: Fall, Spring

Current issues in political thought, with emphasis upon developments in the political philosophies of democracy, fascism, communism, conservatism, liberalism. Ideas are analyzed with reference to assumptions on which they are based and their relevance for political institutions and problems.

GOVT 113. American Political Thought. 3 Units
General Education Area/Graduation Requirement: GE AREA D, U.S. Constitution + California State & Local Govt
Term Typically Offered: Fall, Spring

Assessment of ideas that are central to the development of an American political tradition, as those ideas influence government at the federal, state and local levels. Meets the state requirements in U.S. Constitution and California State and Local Government.

GOVT 115. Democratic Theory. 3 Units
Term Typically Offered: Spring only

Introduction to basic questions of democracy. Draws on classical and contemporary writings to explore what democracy means and various forms of democratic government, politics, and culture: direct, representative, liberal, republican, pluralist, elitist. Specific topics may include: definitions of democracy, justifications for democracy, arguments for increasing or limiting democratic participation, tasks of political representatives, democratization of social institutions, and the relationship between globalization and democracy.

GOVT 117. Black Political Thought. 3 Units
Term Typically Offered: Spring only

Systematically and analytically introduces the predominant political trends and concepts presently entertained and harbored in the Black Community. A necessary adjunct to this dialogue is the racist theme in American society since on balance this is the matrix out of which the political alternatives and concepts grew. Cross Listed: ETHN 117; only one may be counted for credit.

GOVT 118. Just War, Natural Right, and the Law of Nations. 3 Units
Term Typically Offered: Fall only

Examines fundamental conceptual questions about morality, law, and international relations through great works of political theory. Topics will cover natural right, sovereignty, just war, imperialism, national security, and international obligations. Authors read will include Thucydides, Aristotle, Aquinas, Machiavelli, Grotius, Montesquieu, Kant, Hegel, Marx, Mill and Nietzsche.

GOVT 119A. Socialism Marxism-Communism. 3 Units
Term Typically Offered: Fall only

Analyzes the basic writings and ideas of Socialist and Marxist writers and the implications of their ideas.

GOVT 119B. Greek Political Thought. 3 Units
Term Typically Offered: Fall only

Study of the political thought of Greece from Homer to Demosthenes, including Plato, Thucydides, Sophocles, and other Greek thinkers. Topics include the birth of democracy, the sciences and philosophy, Athens’ rise to prominence, its defense of freedom against Persia, and its own development of an empire. Examination of Greek thoughts about justice, authority, freedom, equality, and culture. The events that shaped ideas and ideas that shaped events, as well as our understanding of the modern world, will be covered.
GOVT 119D. Shaping of the Modern World. 3 Units
Term Typically Offered: Spring only

This course examines major problems that have shaped the modern world, the historical and intellectual roots of the modern world, and debates over the meaning of modernity. Considers how both advocates and critics of modernity have understood the relation of history, philosophy, politics, nature, religion, economics, and other key concepts. Specific topics may include: the development of modern science, technological progress, democratic institutions, capitalism, colonialism, secularization, religious tolerance, and individual freedom.

GOVT 120A. Constitutional Law. 3 Units
Prerequisite(s): GOVT 1 or GOVT 150
Term Typically Offered: Fall, Spring

Basic junior level course in Public Law. A study of leading decisions of the U.S. Supreme Court and other materials pertaining to the power of Congress, the President and the Judiciary; relations between states and nation; and civil rights. Considers such topics as the separation of powers, judicial review, Congress, and the President.

GOVT 120B. Constitutional Rights and Liberties. 3 Units
Prerequisite(s): GOVT 1 or GOVT 150
Term Typically Offered: Fall, Spring

Basic junior level course in Public Law. A study of rights and immunities under the U.S. Constitution: examines leading decisions of the U.S. Supreme Court and other materials pertaining to freedom of expression, freedom of association, equality and due process of law.

GOVT 121. American Legal History. 3 Units
Term Typically Offered: Fall only

Examines the interaction of law, society, and politics in America from the colonial period to the present with special emphasis on law as an arena of social and cultural conflict. Major topics include the development of the common law in early America; the law of slavery and its impact on constitutional development; the role of the law in defining controversies over race and gender; legal thought and education; and the role of the Supreme Court in 20th Century America. Cross Listed: HIST 180; only one may be counted for credit.

GOVT 122. The Law and Bureaucracy. 3 Units
Prerequisite(s): GOVT 1 or GOVT 150
Term Typically Offered: Not offered

Examines constitutional and statutory limits of bureaucratic power in the American political system.

GOVT 123. Elements Of Law. 3 Units
Prerequisite(s): GOVT 1 or GOVT 150
Term Typically Offered: Fall only

Current legal thought in the U.S. with special emphasis on the relationship of law to history, economics, anthropology, and government; the nature of law; the role of legislators, lawyers, and judges in making the legal system.

GOVT 124. Politics and Lawyers. 3 Units
Prerequisite(s): GOVT 1 or GOVT 150
Term Typically Offered: Fall, Spring

Examines and analyzes the pervasiveness of lawyers and their activities in political realities; what do lawyers do; politics of prosecution and defense; politics within the profession; professional mobility; politics of the judiciary; lawyers in government.

GOVT 127. Elements of International Law. 3 Units
Prerequisite(s): GOVT 1 or GOVT 150
Term Typically Offered: Spring only

While tracing the evolution of historical antecedents, centers upon modern literature in the field. The scope is broad and the problems vary, but among the areas to be studied are: 1) Is international law really law? 2) historical foundations; 3) international legal institutions and structures; 4) supra-legal international orders, structures, and institutions and their meaning to international law; 5) world order and world law; and 6) an international “Bill of Rights.

GOVT 128. Environment and the Law. 3 Units
Term Typically Offered: Spring only

Introduction to environmental law, including: the evolution of environmental legislation, environmental issues in the court system, environmental regulation and administrative law and environmental torts. Emphasis is on understanding legal process and the special challenges environmental problems present to the legal system. Cross Listed: ENVS 128; only one may be counted for credit.

GOVT 130. International Politics. 3 Units
Term Typically Offered: Fall, Spring

Basic junior-level course in International Relations. Current international tensions; the motivating forces influencing world politics; and the role of diplomacy and international organizations in resolving conflicts.

GOVT 131. International Organization. 3 Units
Prerequisite(s): GOVT 1 or GOVT 150
Term Typically Offered: Spring only

Examines human efforts to create supranational organizations to promote world peace and prosperity. The focus will be on social, political, and economic activities and problems which have developed and proliferated since the end of the Second World War.

GOVT 132. War and Peace in the Nuclear Age. 3 Units
Term Typically Offered: Not offered

Covers the discovery of atomic fission, the development of the atomic bomb and the evolution of U.S. nuclear weapons and strategy from 1945 to the present. It examines political, strategic, bureaucratic, economic and cultural forces that have shaped U.S. nuclear policy since Hiroshima. The problem of international security in the Nuclear Age is also addressed.

GOVT 133. American Defense and National Security. 3 Units
Term Typically Offered: Spring only

Analyzes U.S. security policy, looking at the structure and ideologies of the security system, the requirements of national defense, and the roles played by conventional and nuclear weapons in protecting and promoting American security.

GOVT 134. War, Peace and the Mass Media. 3 Units
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Spring, Summer

Concerned with the relationship of mass media to war and the possibilities for peace, with emphasis on recent concepts of political communication. Cross Listed: JOUR 134; only one may be counted for credit.
GOVT 135. American Foreign Policy. 3 Units
Prerequisite(s): GOVT 1 or GOVT 150
Term Typically Offered: Fall only

Institutions, practices and development of American foreign policy; the interaction of domestic and foreign factors on the formulating of American foreign policy since World War II.

GOVT 136. International Political Economy. 3 Units
Term Typically Offered: Fall, Spring

Analyzes the interaction between politics and economics at the international level. Covers basic theoretical approaches; historical evolution of international economy; creation and role of international financial institutions; development issues; globalization and integration.

GOVT 137. Nationalism. 3 Units
Prerequisite(s): GOVT 35 or GOVT 130 or instructor permission.
Term Typically Offered: Fall, Spring

Focuses on major theories of nationalism. Examines the literature dealing with theories explaining the emergence of nationalism and its political consequences; develops a comprehensive set of empirical indicators of nationalism, together with several working hypotheses regarding political manifestations of nationalism; provides the analytic framework for understanding nationalism; and applies theories to explain political behaviors of nations.

GOVT 138. UN Simulation. 3 Units
Prerequisite(s): Junior status or above, a minimum 3.0 GPA in the major, GOVT 130 and/or GOVT 148, or instructor permission.
Term Typically Offered: Fall, Spring

Seminar experience for upper level Government and International Relations concentration majors. Students will prepare for and participate in a national intercollegiate model UN conference.
Note: Course repeatable with instructor permission.

GOVT 139A. Globalization. 3 Units
Prerequisite(s): An upper division course in the field and/or instructor permission.
Term Typically Offered: Fall only – odd years

Explores the nature of, and issues in, globalization. It does so in five parts. Part I examines alternative conceptions of globalization. Part II identifies and examines the primary forms of economic globalization. Part III considers globalization's effects on the territorial state, the welfare state, organized violence, culture, immigration, gender, and the environment. Part IV investigates the politics of the anti-globalization backlash. Part V concludes with an assessment of the shape and future of contemporary globalization.

GOVT 139B. International Politics and International Development. 3 Units
Prerequisite(s): GOVT 130 or Instructor Permission
Term Typically Offered: Fall only – even years

This course examines the origins and evolution of the theory and practice of international development; considers the meaning of international development; examines theoretical models and approaches to understanding the conditions, effects, and processes of international development. It explores the history and current state of theories and approaches to international development and addresses contemporary and essential issues in the field.

GOVT 139S. Topics in Human Security. 3 Units
Term Typically Offered: Spring only

This course introduces students to the broad field of the study of human security and many essential current topics in that field, such as access to food and water, security against personal violence, and economic security. Students will examine how international forces and structural elements of society can endanger or ensure the security of groups and individuals within the borders of nation-states. Students will learn to research, analyze, and address the connections between international forces and their affects upon human beings around the world.

GOVT 139G. Intelligence and Espionage. 3 Units
Term Typically Offered: Fall only

Involves students in the study of the field of intelligence, as it relates to national security, foreign policy, law and ethics. Comparative analysis of the practice and experience of the U.S., the former Soviet Union and other nations will be emphasized.

GOVT 139R. Causes of War, Causes of Peace. 3 Units
Prerequisite(s): GOVT 1 or GOVT 150
Term Typically Offered: Fall only

Explores the entire conflict process associated with war from a variety of theoretical and methodological angles, including rationalist and behavioral models. Examines the concept of war and why wars begin. Looks at how violent international conflict is resolved. Investigates the role of the international community in the management of violent conflict, how peace processes are implemented, what leads to successful negotiations, and how war crimes and post-conflict reconciliation issues are resolved.
GOVT 144. European Politics. 3 Units
Prerequisite(s): GOVT 1 or GOVT 150
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall only

Study of national and regional politics, governmental institutions and public problems in Europe since 1945. In different semesters there may be investigation of several, but varying, national systems, of cross-national political behavior, or of regional integration processes. May be taken more than once if there are different topics and instructor permission.

GOVT 145. Asian Politics. 3 Units
Prerequisite(s): GOVT 1 or GOVT 150
Term Typically Offered: Fall only

Survey of governmental institutions and political processes in East and Southeast Asia. Focuses on the region's politics, dynamic economic growth, complex security context, resurgence of nationalism, and attempts to build multilateral institutions.

GOVT 147. Latin American Government and Politics. 3 Units
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Spring only

Two-part examination of government, politics, political change and political groups in Latin America. Part one examines the development of government, politics, political change and political groups. Part two presents national case studies.

GOVT 148. Governments and Politics in the Middle East. 3 Units
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Spring only

Survey of the governmental institutions and the political processes in the region, with emphasis on the problems of social change. Focuses on the colonial situation, the growth of nationalism, the revolution of rising expectations, Islamic political theory and its contemporary manifestations, the role of the military, and the current regional conflicts.

GOVT 149A. Original Research in Comparative Politics. 3 Units
Prerequisite(s): An upper division course in the field and/or instructor permission.
Term Typically Offered: Fall only

Students will engage in a cross-national research agenda. Students will conduct original research in comparative politics, which requires an appreciation for distinct learning cultures in different countries. Countries acceptable for comparison will vary with instructor.

GOVT 150. American Governments. 3 Units
General Education Area/Graduation Requirement: U.S. Constitution + California State & Local Govt, GE AREA D
Term Typically Offered: Fall, Spring, Summer

Federal system of government; the U.S. Constitution; legislative, executive, and judicial processes; political parties, interest groups, and the relationships and obligations of citizens to their government(s). Fulfills the California state graduation and credential requirements for U.S. Constitution and California State and Local Government. May be substituted for GOVT 1, but may not be used as an elective toward the major.

GOVT 151. Bureaucracy. 3 Units
Prerequisite(s): GOVT 1 or GOVT 150
Term Typically Offered: Not offered

Evaluation of the role and background of a professionalized bureaucracy with references to American national, state and local administrative systems as well as non-American administrative systems.

GOVT 152. Political Psychology. 3 Units
Term Typically Offered: Fall, Spring

Examines the ways in which political behavior is shaped by individual beliefs, personalities, cognitive patterns, biases, and other psychological mechanisms. Students will engage with a wide range of research on topics such as cognitive styles, personality, obedience, psychological roots of terrorism, the psychology of ideology, and the role of emotion in politics.
Cross Listed: PSYC 153

GOVT 153. The American Presidency. 3 Units
Prerequisite(s): GOVT 1 or GOVT 150
Term Typically Offered: Spring only

Examines the development of the Presidency as an institution; sources and uses of presidential power in contemporary politics; the President's relationship with Congress and the bureaucracy; and current issues relating to the office.

GOVT 154. Political Parties in America. 3 Units
Prerequisite(s): GOVT 1 or GOVT 150
Term Typically Offered: Fall, Spring

Examination and analysis of American political parties. An exploration of the nature and functions of political parties including party organization, electorate, and government. Topics include the various historical party systems, the two-party system, elections, and campaign financing. Includes discussion of the presidential nominating process.

GOVT 155. The Legislative Process. 3 Units
Prerequisite(s): GOVT 1 or GOVT 150
Term Typically Offered: Spring only

Examination and analysis of the institutions, the people and the behavior that make up the legislative process. Considers the nature of representation and the role and impact of such factors as committee structure, political parties, interest groups, and others on public policy. Focus is on both the U.S. Congress and the California State Legislature.

GOVT 156. Interest Groups. 3 Units
Prerequisite(s): GOVT 1 or GOVT 150
Term Typically Offered: Fall only – odd years

Examination and analysis of interest groups in American political systems. The nature, role, formation, organization and activities of interest groups; how interest groups influence the public, political campaigns, public policy-making, and policy implementation. Representative interest groups will be studied.

GOVT 157. Politics, Opinion, and Participation. 3 Units
Term Typically Offered: Fall only

How we learn and change our political beliefs, including the influence of media, religion and social standing. The various forms of political participation; who participates and who doesn't and why. The meaning and conduct of elections in the modern era.
GOVT 158. Mass Media and American Politics. 3 Units
Prerequisite(s): GOVT 1 or GOVT 150
Term Typically Offered: Fall only

Focuses on the role the mass media plays in the political life of our democracy. Five primary topics are covered: the proper media role in a democracy; the relationship between the media, public opinion and agenda setting; the effects of media coverage on campaigns, elections, and voting; how elected officials influence and "spin" coverage; and the impact of media on policy-making. Students will develop critical analysis skills and emerge as more savvy media consumers and citizens.

GOVT 159A. Campaigns and Elections. 3 Units
Term Typically Offered: Fall only – even years

Exploration of American campaigns and elections. Topics include the electoral process, voting behavior, the role of political parties, the media, interest groups, and candidate and campaign strategies. Focus will be on contemporary/current campaigns and elections.

GOVT 159B. American Politics Seminar: Problems in Democratic Institutions. 3 Units
Term Typically Offered: Not offered

Examines the concept of representation and how it functions in the U.S. Congress and in state legislatures. In the first section different meanings of representation are discussed. In the second section interactions between legislators and their constituents are explored. Finally, the tradeoffs to different designs of representative institutions are studied.

GOVT 162. American Film and Culture in the Nuclear Age. 3 Units
Term Typically Offered: Fall only

Explores the impact of the revolutionary change represented by the atomic bomb on forms of cultural response and expression in America. Attempts to analyze the bomb-culture relationship by reviewing important films, television programs, novels, essays, music and poetry that revealed, and helped shape, the hopes and anxieties that have characterized life in the nuclear age.

GOVT 163. Introduction to Black Politics in the U.S. 3 Units
Prerequisite(s): GOVT 1 or GOVT 150
General Education Area/Graduation Requirement: Race & Ethnicity Graduation Requirement (RE), GE AREA D
Term Typically Offered: Fall, Spring, Summer

Examines historically and currently the political life of black people in the U.S. Emphasis on understanding underlying conditions.

GOVT 164. History of American Capitalism. 3 Units
Term Typically Offered: Spring only

Traces the development of the relationship between business and government in the U.S., especially in relation to state and federal regulations of those industries. Examines how individual entrepreneurs and regulators have contributed to the development of the modern American political economy.

Cross Listed: HIST 164; only one may be counted for credit.

GOVT 165. Politics of the Underrepresented. 3 Units
Prerequisite(s): GOVT 1 or GOVT 150; and GWAR certification before Fall 09; or WPJ score of 80+; or 3-unit placement in ENGL 109M or ENGL 109W; or 4-unit placement in ENGL 109M or ENGL 109W and co-enrollment in ENGL 109X; or WPJ score 70 or 71 and co-enrollment in ENGL 109X.
General Education Area/Graduation Requirement: Writing Intensive Graduation Requirement (WI), Race & Ethnicity Graduation Requirement (RE), GE AREA D
Term Typically Offered: Fall, Spring, Summer

Examines the phenomenon of political underrepresentation in the U.S.A. It will identify significant affected groupings, examine the conditions which have resulted in such underrepresentation, evaluate the effects of underrepresentation on the lives of affected groups, and consider relevant political strategies. Emphasis on particular groups may vary with instructor.

GOVT 166. Gender and Politics. 3 Units
Term Typically Offered: Spring only

This course examines the influence of socially constructed meanings of femininity and masculinity on the political participation of women, candidate selection, election campaigns, and electoral outcomes in executive and legislative offices in the U.S. and worldwide. Students will develop a rich understanding of the relationship between gender and women’s political representation and analyze and discuss institutional, structural, cultural, and historical conditions associated with women’s voting behavior, political advancement, leadership styles, and impacts of political representation on women.

Cross Listed: WOMS 166; only one may be counted for credit.

GOVT 167. American Political Development. 3 Units
Term Typically Offered: Fall only

Focuses on key transformative sequences in American political history and their consequences. Topics include the nature of American political culture and its role in shaping U.S. political institutions and public policy; the process of government growth or "state building"; the role of political institutions in channeling societal demands and influencing public policy; the nature of American party systems or "regimes" and the electoral "realignments" that link them; and connections between long-term economic and political cycles.

GOVT 168. Gay and Lesbian Politics. 3 Units
Prerequisite(s): GOVT 1 or GOVT 150
Term Typically Offered: Spring only

Provides a broad overview of the politics of gay rights in the United States. Particular emphasis is placed on gay rights at the state level (where the vast majority of policy is made) and major legal strategies and court rulings affecting the gay rights movement, since judiciaries have been the main venue for advancing gay rights arguments.

GOVT 169A. Science, Technology, and Politics. 3 Units
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall only

Social and political dimensions of science and technology. Examines how science and technology both shape politics and are shaped by politics. Considers the role of scientific advisors in government and society; dilemmas of expert authority and bias; relations between experts and non-experts; science and technology in popular culture; science and technology policy; implications of emerging technologies such as genetic engineering and the Internet for civil rights, moral values, and democracy.
GOVT 170. Public Policy Development. 3 Units
Prerequisite(s): GOVT 1 or GOVT 150 and GWAR Certification before Fall 09, or WPJ score of 70+, or at least a C- in ENGL 109M or ENGL 109W.
Term Typically Offered: Fall, Spring

Examines the policy development process in the U.S. by exploring the ideological predispositions of the American public, the analytical approaches applied to policy development and assessment, and the institutional and political environment in which policy is made. Typically, the understanding derived from this examination is applied to several policy issues of current interest.

GOVT 171. Environmental Politics and Policy. 3 Units
Term Typically Offered: Spring only

Politics of human interaction with land, air and water. Political analysis of agenda setting, policy formation and administration (national, state, and local) of environmental programs. Focus on contemporary issues such as energy alternatives, management of toxics, land development, and pollution control.
Cross Listed: ENVS 171; only one may be counted for credit.

GOVT 180. California State and Local Government. 3 Units
General Education Area/Graduation Requirement: California State & Local Government, GE AREA D
Term Typically Offered: Fall, Spring, Summer

California state, city and county politics and government. Comparisons with governments in other states. Meets State requirements in California State and Local Governments. Permits students who have fulfilled U.S. Constitution requirement in another state to meet graduation requirements for California State and Local Governments.

GOVT 181. Comparative State Government. 3 Units
Prerequisite(s): GOVT 1 or GOVT 150.
Term Typically Offered: Spring only

Examines the political diversity of the fifty states, with special attention paid to variations in state governing institutions. Topics covered include legislatures, governors, judiciaries, political parties, interest groups, elections, direct democracy, and state budget procedures.

GOVT 182A. Sem Calif Govt+Politics. 3 Units
Term Typically Offered: Spring only

Open to selected students from each of the 20 CSU campuses, the Sacramento Semester program provides students with an opportunity to spend the semester studying and working directly in California State government. Participating students work as interns at the State Capitol for 25 or more hours each week. Interns are placed in legislators' offices, with legislative committees, party caucuses, lobbyists and interest groups, or in various executive, administrative, and judicial agencies. In addition to the internships, students participate in an academic seminar, California Government and Politics. The seminars frequently include as resource persons individuals who work in key policy-making positions in the state government.

GOVT 182B. Sem Calif Govt+Politics. 3 Units
Term Typically Offered: Spring only

Open to selected students from each of the 20 CSU campuses, the Sacramento Semester program provides students with an opportunity to spend the semester studying and working directly in California State government. Participating students work as interns at the State Capitol for 25 or more hours each week. Interns are placed in legislators' offices, with legislative committees, party caucuses, lobbyists and interest groups, or in various executive, administrative, and judicial agencies. In addition to the internships, students participate in an academic seminar, California Government and Politics. The seminars frequently include as resource persons individuals who work in key policy-making positions in the state government.

GOVT 184. Introduction to Urban Politics. 3 Units
Prerequisite(s): GOVT 1 or GOVT 150
Term Typically Offered: Fall only

Problems of urban areas and proposed solutions; politics and government. May be offered as lecture-discussion class or as a seminar. Field study may be required.

GOVT 195A. Internship. 1 - 6 Units
Prerequisite(s): GWAR certification before Fall 09, WPJ score of 70+, or at least a C- in ENGL 109 M/W. Minimum GPA of 2.5 (both in the major and overall).
Term Typically Offered: Fall, Spring, Summer
Credit/No Credit

GOVT 195B. Internship Sacramento Semester. 1 - 6 Units
Prerequisite(s): Minimum GPA of 2.5 (both in the major and overall).
Term Typically Offered: Spring only
Credit/No Credit

GOVT 195D. Internship - Washington DC. 6 Units
Prerequisite(s): GWAR certification before Fall 09, WPJ score of 70+, or at least a C- in ENGL 109 M/W.
Term Typically Offered: Fall, Spring
Credit/No Credit

GOVT 198A. Odyssey Peer Advisers. 1 - 3 Units
Prerequisite(s): Instructor permission
Term Typically Offered: Fall, Spring

Provides individualized learning opportunities (1-3 units per semester) for engaging in peer advising along with elective activities such as tutoring, assisting faculty with research, event planning and other activities of a comparable nature. Students should be upper division students or graduate students. The units may not be applied towards unit requirement of the Government major, Government IR and Government/Journalism.

Note: This course may be repeated up to a total of six units.
Credit/No Credit
GOVT 198B. Peer Advising by Odyssey. 1 Unit
Prerequisite(s): Instructor permission
Term Typically Offered: Fall, Spring
Provides opportunity for lower division students, students on probation, and newly declared majors to be mentored by more advanced upper division students or graduate students. This peer advising will help students meet academic deadlines, achieve academic success, become engaged in campus activities and integrated into the Government Department. Units may not be applied towards unit requirement of the Government major, Government IR and Government/Journalism
Note: This course may be repeated one time only for unit credit.

Credit/No Credit
GOVT 199. Independent Studies. 1 - 3 Units
Prerequisite(s): GOVT 1 or equivalent, and nine units upper division government courses.
Term Typically Offered: Fall, Spring
Permits a student to pursue study and research in an area not otherwise available through the regular curriculum. Open only to upper division Government majors with at least a 3.0 GPA in the major.
Credit/No Credit

GOVT 200. Method and Scope in Political Science. 3 Units
Prerequisite(s): STAT 1 or its equivalent.
Term Typically Offered: Fall, Spring
Introduction to the philosophy of science, and the scope and methods of empirical research in political, social and policy science. In the area of philosophy of science, focuses on the logic of scientific inquiry, theory testing and confirmation and causal explanation. In the area of scope and methods, critically examines the scientific merits of several competing approaches to the study of politics and policy, as well as some of the major methodological controversies and debates in the literature.

GOVT 210. Political Theory. 3 Units
Prerequisite(s): An upper division course in the field and/or instructor permission.
Term Typically Offered: Fall, Spring
Historical and social roots, democratic or authoritarian ideologies; the conflict of ideologies; philosophic approaches.
Note: May be repeated for credit with permission of Graduate Coordinator.

GOVT 213. Special Topics in American Political Thought. 3 Units
Term Typically Offered: Fall, Spring
A class examining the historical and philosophical discourse in America on central topics of debate, such as the meaning of citizenship, civil society, democracy, federalism, religion, and civil rights open to both advanced undergraduates and graduate students.
Note: Undergraduates are strongly encouraged to have completed GOVT 113 or an equivalent course.

GOVT 218. Special Topics in International Political Thought. 3 Units
Term Typically Offered: Fall, Spring
A class examining the philosophical underpinnings and the theatrical problems of central concepts and problems in international relations, including human rights, intercultural dialogue, problems of just war and international justice through a study of historical and contemporary texts open to both advanced undergraduates and graduate students.
Note: Undergraduates are strongly encouraged to have completed GOVT 118 or an equivalent course.

GOVT 219. Specialized Studies in Political Theory. 3 Units
Prerequisite(s): Instructor permission.
Term Typically Offered: Fall, Spring
Makes it possible for political theory students to deal with questions which theorists have asked, and to attempt to answer such questions for themselves.
Note: May be repeated for credit with permission of Graduate Coordinator.

GOVT 230. Theories of International Relations. 3 Units
Prerequisite(s): Upper division course in the field and/or instructor permission.
Term Typically Offered: Fall, Spring
Examination of the theory and practice of international relations including such subfields as international law, international organization, foreign policy and national security policy.
Note: May be repeated for credit with permission of Graduate Coordinator. Cross Listed: IA 210; only one may be counted for credit.

GOVT 236. Seminar in International Political Economy. 3 Units
Prerequisite(s): An upper division course in the field and/or instructor permission.
Term Typically Offered: Fall, Spring
This seminar is a graduate-level introduction to the theory and substance of international political economy (IPE). It examines the various theoretical approaches to IPE; considers the role of trade, money, and finance in the international political economy; analyzes the pattern and structure of global production, with an emphasis on multinational corporations; surveys international development issues, including Third World economic development strategies, the debt crises, structural adjustment, and economies in transition; and investigates the politics of globalization.
Cross Listed: IA 221; only one may be counted for credit.

GOVT 239. Globalization and International Relations. 3 Units
Prerequisite(s): An upper division course in international relations or instructor permission.
Term Typically Offered: Fall, Spring
Introduction to the theories and substance of globalization. It examines alternative theories of globalization; considers globalization's political impact on the territorial state, regionalism, the welfare state, the military, immigration, and the environment; investigates the politics of the anti-globalization backlash; and concludes with an assessment of the future political trends of globalization.
Cross Listed: IA 230; only one may be counted for credit.
GOVT 240. Comparative Government and Politics. 3 Units
Prerequisite(s): Advanced course in the field.
Term Typically Offered: Fall, Spring

Advanced study of some of the world's governmental and political systems. May focus on single countries, groups of countries or general categories of systems. Considers theoretical concept and methodology. 
Note: May be repeated for credit with permission of Graduate Coordinator. Cross Listed: IA 222; only one may be counted for credit.

GOVT 249A. Middle East Politics and the United States. 3 Units
Prerequisite(s): Instructor permission.
Term Typically Offered: Fall, Spring

Graduate introduction to politics and governments of the Middle East and the impact of the United States foreign policy in the region. Relies on a comparative frame to tease out the causes of intrastate and interstate conflicts in the region, as well as the effects of the American foreign policy on the contemporary political trends in the Middle East, including those relating to the Arab-Israeli conflict, Islamic political resurgence, and terrorism.

GOVT 250. Basic Issues of American Government. 3 Units
Prerequisite(s): An upper division course in the field and/or instructor permission.
Term Typically Offered: Fall, Spring

Exploration in-depth of topics such as federalism, executive-legislative relationships, problems of representation, government reorganization, congressional reform, the electoral process.
Note: May be repeated for credit with permission of Graduate Coordinator.

GOVT 270. Political Behavior and Political Processes: California and Beyond. 3 Units
Term Typically Offered: Fall, Spring

Course will explore public opinion, voting behavior, representation and political psychology with special focus on California.
Note: Undergraduates may take the course with instructor permission.

GOVT 280. California Politics. 3 Units
Term Typically Offered: Fall, Spring

Advanced study of California's state and local governments, with emphasis on political history, political institutions, and the role of direct democracy on the state's government, budget and politics. Demographic and geographic elements will be scrutinized through a political focus. California's policy and political process will also be examined, as well as discussion of various political reforms.
Note: Undergraduates may take the course with instructor permission. 
Prerequisite

GOVT 281. Comparative State Government. 3 Units
Term Typically Offered: Fall, Spring

Examines state political institutions and processes. Special attention will be paid to how the political variation among the states shapes processes and outcomes. Topics covered will include governors, legislatures, interest groups, public opinion, political parties, and elections.

GOVT 284. Urban Politics. 3 Units
Term Typically Offered: Fall, Spring

In-depth exploration of the socio-economic problems of urban and metropolitan areas and an evaluation of proposed political and governmental solutions.
Note: May be repeated for credit with permission of Graduate Coordinator. Cross Listed: PPA 284; only one may be counted for credit.

GOVT 293A. Senate Fellows Introductory Seminar. 3 Units
Term Typically Offered: Fall, Spring

Critical analysis and examination of the operation of the State Capitol and the larger political environment of political parties, interest groups, and public opinion.
Note: Open only to students admitted to the California Senate Fellows Program.

GOVT 293B. Senate Fellows Policy Seminar. 3 Units
Term Typically Offered: Fall, Spring

Seminar will analyze procedural issues and public policy questions within the State Senate, legislature, and contemporary California politics.
Note: Open only to students admitted to the California Senate Fellows Program.

GOVT 294A. Assembly Fellows Introductory Seminar. 3 Units
Term Typically Offered: Fall, Spring

Critical examination of state and local governmental institutions and processes. Seminar will impart an advanced understanding of the structures and processes of California's political institutions, government and legislature.
Note: Open only to students admitted to the Jesse M. Unruh Assembly Fellowship Program.

GOVT 294B. Assembly Fellows Policy Seminar. 3 Units
Term Typically Offered: Fall, Spring

Seminar focuses on current California policy issues and the lawmaking process.
Note: Open only to students admitted to the Jesse M. Unruh Assembly Fellowship Program.

GOVT 295. Government Internship. 1 - 6 Units
Term Typically Offered: Fall, Spring

Supervised work experience in an approved legislative or administrative office at some level of local or state government, or in a politically-related organization that is concerned with government. Supervision is provided by the faculty instructor and responsible officials in the work situation.
Note: Open to all graduate students, subject to instructor permission. No more than 3 units of GOVT 295 may be counted toward the Master's degree.

Credit/No Credit

GOVT 299. Independent Study. 1 - 3 Units
Term Typically Offered: Fall, Spring

For advanced graduate students who have demonstrated their ability to carry on advanced, independent research. Permits a student to pursue study and research in an area not otherwise available through the regular curriculum. Student must be advanced to candidacy.
Credit/No Credit
BA in Government

Units required for Major: 39
Minimum required GPA in the Major: 2.0

Program Description
The Government major complements a student's liberal arts education with an emphasis on understanding the theoretical and practical aspects of government and politics. The department offers a BA in Government, two concentrations, and the minor in Government. The Government major is structured to provide students with a background in the basic fields of political science, as well as to permit them a range of choice in completing the program. The Political Science Department offers several courses integral to interdisciplinary programs such as California Studies, Environmental Studies, Ethnic Studies, Peace and Conflict Resolution Studies, and Women's Studies.

The department emphasizes its expectation that students seek faculty advice when planning their program. Students may ask any faculty member's assistance initially. As specific interests are developed, students may wish to seek the advice of faculty sharing their interests.

Note: Although it is not a requirement of the major, the department strongly recommends that students take an introductory statistics course as part of their undergraduate work. A course in statistics may be used to satisfy the GE requirement in mathematics.

The Political Science Department offers several courses integral to interdisciplinary programs such as California Studies, Environmental Studies, Ethnic Studies, Peace and Conflict Resolution Studies, and Women's Studies.

The department emphasizes its expectation that students seek faculty advice when planning their program. Students may ask any faculty member's assistance initially. As specific interests are developed, students may wish to seek the advice of faculty sharing their interests.

Note: Although it is not a requirement of the major, the department strongly recommends that students take an introductory statistics course as part of their undergraduate work. A course in statistics may be used to satisfy the GE requirement in mathematics.

Minimum required GPA: 2.0
BA in Government/Journalism

Units required for Major: 51

Program Description
A unique interdisciplinary program that spans the combined areas of Government and Journalism.

The University's association with the Washington Center makes it possible for California State University, Sacramento students to undertake an internship in Washington, D.C. There are many opportunities for Government-Journalism majors to do an internship to meet their unique interests through this program.

Note: Government-Journalism majors should have both an advisor in the Political Science Department and a Journalism Advisor in the Communication Studies Department.

Minimum Grade Requirement
Majors must complete each required lower and upper division Journalism course with a grade of "C-" or better.

Select one upper division course in Journalism.

Total Units 51

1 If a student has not taken GOVT 1 or its equivalent, then GOVT 150 may be used in place of GOVT 1 or as its equivalent as a prerequisite.
2 The Department particularly recommends at least one course in political theory. GOVT 150 may not be used as an elective.

Capital Fellows Certificate in Applied Policy and Government

Units required for Certificate: 6

Program Description
Political Science, or Government, is devoted to study of the theory and practice of government and politics. The Political Science Department at Sacramento State offers courses in several fields of study, including: Political Theory; American Politics; Public Law; International Relations; Comparative Politics; and Public Policy. Over 70 courses cover all the major aspects of political science. Lower division courses satisfy General Education requirements and help to prepare students for advanced work.

Admission Requirements
Accepted to one of the four Capital Fellows Programs: Assembly, Judicial Administration, Executive, or Senate.

### MA in Government (California and its Political Environment)

Total units required for MA: 30

### Program Description

The Master of Arts program in Government is designed to orient the student toward critical investigation of problems in government and politics, and to improve the student's ability for independent study. This program is of special value to teachers of government in the public schools, to persons who contemplate public service or politics as a career, and to persons planning additional graduate study leading to the doctorate. The Political Science Department Graduate Coordinator acts as advisor to graduate students and should be consulted early in each student's program of graduate study.

**Note:** Because most graduate students work during the day, graduate courses are offered in the evening hours.

### Admission Requirements

Admission as a classified graduate student in Government requires:

- a baccalaureate degree;
- a minimum 3.0 GPA in the last 60 units attempted and 3.0 GPA in the major;
- a satisfactory score on the aptitude portion of the Graduate Record Examination (the Department expects the student to achieve at least the 50th percentile in the combined verbal/analytic score);
- three letters of recommendation from individuals who can evaluate the applicant's potential for successful graduate study;
- a written statement explaining the applicant's purposes and goals in pursuing a master's degree in Government; and
- an example of written work which the applicant considers evidence of his/her best scholarship regardless of the grade received.

Applicants who have deficiencies in Admission Requirements that can be removed by specified additional preparation may be admitted to the degree program with conditionally classified graduate status. Students with an undergraduate major in any subject may be accepted; no minimum number of units in Government is required. However, if a student's preparation in the field of government or political science is not adequate preparation for graduate study, he/she may be asked to complete some additional coursework before becoming classified. Any deficiencies will be noted on a written response to the student's admission application. No upper division prerequisite courses required as a condition of classification can be counted towards the degree requirement.

### Admission Procedures

Applications are accepted as long as room for new students exists. All prospective graduate students, including Sacramento State graduates, must file the following with the Office of Graduate Studies, River Front Center 215, (916) 278-6740:

- an online application for admission;
- two sets of official transcripts from all colleges and universities attended, other than Sacramento State; and
- Graduate Record Examination scores, aptitude portion only.

For more admissions information and application deadlines please visit http://www.csus.edu/gradstudies/.

At the same time, each applicant should forward to the Graduate Coordinator in Government the following:

- the three letters of recommendation;
- the applicant's written statement of purposes and goals; and
- the example of the applicant's best written work.

Approximately six weeks after receipt of all items listed above, a decision regarding admission will be mailed to the applicant.

### Minimum Units and Grade Requirement for the Degree

Units required for the MA: 30

Minimum Cumulative GPA GPA: 3.0 with no grade below a "C" (not a "C-").

### Advancement to Candidacy

Each student must file an application for Advancement to Candidacy, indicating a proposed program of graduate study. This procedure should begin as soon as the classified graduate student has:

- removed any deficiencies in admission requirements;
- completed STAT 1 or its approved equivalent, a prerequisite to the program (does not count towards the degree) which must be taken before GOVT 200;
- completed at least 12 units in the graduate program with a minimum 3.0 GPA;
- taken the Writing Placement for Graduate Students (WPG) or taken a Graduate Writing Intensive (GWI) course in their discipline within the first two semesters of coursework at California State University, Sacramento or secured approval for a WPG waiver; and
- submitted a thesis prospectus (if the student elects to do a thesis).

Advancement to Candidacy forms are available on the Office of Graduate Studies website. The student fills out the form after planning a degree program in consultation with a Political Science Department advisor. The

1 Three additional courses which may be completed from graduate seminars in the Department, from 200-level courses in related fields (6 units allowed with graduate coordinator’s prior approval), from GOVT 295 (3 units allowed), and/or from GOVT 299 (6 units allowed). However, a maximum of 6 units of GOVT 295 and/or GOVT 299 may be applied to the MA. Of these twelve units, up to 6 units may be in 100-level courses within the Government Department, chosen from a pre-approved list compiled by the graduate coordinator. Up to six units of coursework from the graduate fellowships programs (Assembly Fellow, Executive Fellow or Senate Associates Program) can be counted towards the degree.

2 By the time of Advancement to Candidacy, students must enroll in GOVT 500 and choose either of the following options:
   - Plan A: Masters Thesis
   - Plan B: Comprehensive Exam (Students will take one exam in their area of emphasis and demonstrate a general comprehensive in that area)

Note: Students are not permitted to enroll in the culminating experience until they have Advanced to Candidacy, obtained a sponsor for their thesis, and received the approval of the Graduate Coordinator.

Note: Upper division undergraduate courses (100-level courses) which may be used towards the MA program must be individually approved by the Graduate Coordinator and will involve an additional work component over-and-above what is required for undergraduate students. A list of approved 100-level courses will be available semester-by-semester.

Select 15 units of government or political science courses

Total Units: 21

1 Students may count as many as (6) units of a GOVT 195, or (3) units of a GOVT 195 and (3) units of GOVT 199 toward completion of the minor. GOVT 1 (or its equivalent) or GOVT 150 may count as the prerequisite for the minor; however, if GOVT 150 is used as the prerequisite, it will not count toward the 15 units of upper division government courses required. GOVT 150 cannot count as an elective for the minor.

Note: Students are permitted to repeat upper division courses a maximum of two times.

Psychology

College of Social Sciences and Interdisciplinary Studies

Program Description

Psychology is the scientific study of human and animal behavior, cognition, and emotion. It is a broad discipline that includes both basic research and the application of research findings to everyday life. The Sacramento State Psychology Department offers an undergraduate major and minor in Psychology and an undergraduate certificate in Applied Behavior Analysis. In addition, there are graduate programs in Applied Behavior Analysis, Industrial/Organizational Psychology, and General Psychology (which comprises a range of interests, including doctoral
program preparation). At both the undergraduate and graduate levels, students may choose coursework, fieldwork, and research experiences that allow them to emphasize such areas as Applied Behavior Analysis, Clinical Psychology, Cognitive Psychology, Community Psychology, Cultural Psychology, Developmental Psychology, Industrial/Organizational Psychology, Neuroscience, Quantitative Methods, Personality, and Social Psychology.

The Psychology program at Sacramento State is highly sought after and the undergraduate major is now officially impacted. Students wishing to become Psychology majors must meet eligibility requirements before applying for admission to the program. It is highly recommended that interested students speak with a Psychology advisor as soon as possible.

Degree Programs
Certificate in Behavior Analysis (p. 909)
Minor in Psychology (p. 914)
BA in Psychology (p. 908)
MA in Psychology (Applied Behavior Analysis) (p. 909)
MA in Psychology (General Psychology) (p. 911)
MA in Psychology (Industrial/Organizational Psychology) (p. 912)

Special Features
- The Psychology Department is housed in Amador Hall and contains extensive human and animal research facilities.
- The Psychological Services Center provides excellent learning opportunities for students in Applied Behavior Analysis. The six-room suite is equipped for audio and video recording of research sessions and a kitchenette for studies with children diagnosed with feeding difficulties.
- Available facilities support operant and neuroscience research with animals, including a rodent colony as well as equipment for behavioral procedures, histological techniques, and neurophysiological recordings.
- Computer labs are available for data collection, analysis, and teaching.
- The Psychology Department maintains close ties with the Sacramento community. Each year students conduct research projects or fieldwork in various community organizations and state agencies.
- Students are able to take independent study courses in Applied Behavior Analysis, Clinical Psychology, Cognition Cultural Psychology, Developmental Psychology, Industrial/Organizational Psychology, Neuroscience, Perception, Quantitative Methods, and Social Psychology.
- The Prospects Peer Mentoring and Advising Program allows students to give and receive information and support regarding academic and career planning.
- Our Annual Psychology Department Research Conference showcases student and faculty research projects for the campus community, providing professional development opportunities for students.
- Several student organizations are involved in extracurricular activities: Psi Chi, Psychology Society, and the Student Association for Applied Behavior Analysis.

Career Possibilities

Individuals with a Bachelor of Arts
Administrative Service Manager · Admissions Counselor · Behavior Specialist · Community Service Manager · Employee Assistance Program Associate · Health Educator · Human Factors Specialist · Management Analyst · Market Research Analyst · Mental Health Worker · Public Relations Specialist · Sales Manager · Sales Representative · Victim Advocate.

Individuals with a Master of Arts
Autism Specialist · Behavior Analyst · Behavioral Consultant · Case Manager · Career Counselor · Community College Instructor · Human Resource Specialist · Mental Health Counselor · Personnel Analyst · Private Sector Consultant · Program Director: Psychometric Specialist · Personnel Selection Consultant · Research Analyst · Research Program Manager · Research Technician · School Consultant · Test Validation Specialist · Training and Development Specialist

PSYC 2. Introductory Psychology. 3 Units
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall, Spring

Provides a general overview of theory and research concerning psychological processes at the basic, individual and social levels. Topics will include physiological psychology, comparative psychology, learning, motivation, sensation and perception, developmental psychology, personality, social psychology, maladaptive behavior, individual differences, and selected other topics. Requires three hours of participation as a research subject.

PSYC 4. Navigating Psychology: The Major and Careers. 1 Unit
Prerequisite(s): PSYC 2 and Psychology majors only.
Term Typically Offered: Fall, Spring

Covers requirements for the major and career options in psychology and related fields. Students learn to design plans of study to meet requirements for the major and enhance career objectives. Introduces career options in various areas such as academic psychology, applied behavior analysis, counseling and mental health, education, industrial-organizational psychology and related fields. Class activities clarify students' career goals and develop skills such as resume writing and interviewing. Requires participation as a research subject.

PSYC 8. Methods of Psychology. 3 Units
Corequisite(s): PSYC 2.
Term Typically Offered: Fall, Spring

Introduction to methods of the science of psychology. The topics include psychology as a way of knowing, the role of science in psychology, the nature of psychological research, research ethics, psychological literature and report writing, psychological measurement, and the design and analysis of case studies, survey research, field studies, correlational methods, and experimental methods. Requires three hours of participation as an experimental subject.

PSYC 9. Introductory Statistics for Psychology. 3 Units
Prerequisite(s): PSYC 2, may be taken concurrently.
Term Typically Offered: Fall, Spring

Introduction to descriptive and inferential statistics as tools for evaluating data from Psychological research. Topics include: measures of central tendency, measures of variability, correlation and regression, sampling distributions, hypothesis testing procedures including t-tests and analysis of variance. Application of hand computation will be emphasized to include the interpretation and significance of the statistical findings.

PSYC 100. Cross-Cultural Psychology. 3 Units
Prerequisite(s): PSYC 2, PSYC majors only.
Corequisite(s): PSYC 8.
Term Typically Offered: Fall, Spring

Examination of similarities and differences in human behavior, cognition, and emotion across cultures. Empirical evidence from cross-cultural research in the various areas of psychology, including biological, clinical, cognitive, developmental, social, personality, and industrial/organizational psychology, is evaluated with the purpose of developing a global perspective on the psychological processes underlying human behavior, cognition, and emotion.

PSYC 101. Statistics for Psychology. 3 Units
Prerequisite(s): PSYC 2, PSYC 4, PSYC 8. PSYC majors only. PSYC 4 may be taken concurrently.
Term Typically Offered: Fall, Spring

Introduction to descriptive and inferential statistics as tools for evaluating data from Psychological research. Topics include: measures of central tendency, measures of variability, correlation and regression, sampling distributions, hypothesis testing procedures including t-tests and analysis of variance, and selected other topics. Application of hand computation will be emphasized to include the interpretation and significance of the statistical findings.

PSYC 102. Advanced Methods and Statistics in Psychological Research. 4 Units
Prerequisite(s): PSYC 121; Psychology majors only.
Term Typically Offered: Fall, Spring

Plan and conduct projects using experimental, quasi-experimental and correlational methods. Evaluate published research and write proposals with attention to such issues as the reliability and validity of methods, the degree to which statistical assumptions are met, the adequacy of statistical power, and the internal and external validity of the project. Contemporary research design, measurement, and analysis techniques are examined, including the use of statistical software, for varieties of univariate and multivariate research designs. Lecture-discussion three hours; laboratory three hours.

PSYC 103. Perception. 3 Units
Prerequisite(s): PSYC 2, PSYC or CRJ majors only. PSYC 8 and PSYC 9 are recommended.
Term Typically Offered: Fall, Spring

Examination of how information about the outside world is sensed and how that information is organized and interpreted to form perceptions. Vision and audition will be primarily examined, along with some coverage of the other senses. Topics may include psychophysical methods, basic physiology and function of sensory systems, perception of color and form, motion, distance, auditory patterns, body and limb position, temperature, pain, perceptual constancies, attention, perceptual learning, adaptation, and perceptual development.

PSYC 104. Learning Theories. 3 Units
Prerequisite(s): PSYC 2, PSYC 8, PSYC 9, and PSYC majors only or instructor permission.
Term Typically Offered: Fall, Spring

Examination of classical and contemporary theories of learning, and a sampling of experimental findings which bear directly on the theories. Some attention is given to theory construction in psychology.
PSYC 106. Motivation. 3 Units
Prerequisite(s): PSYC 2; PSYC majors only or instructor permission.
Term Typically Offered: Fall, Spring

Study of theories and experimental findings related to basic processes in animal and human motivation.

PSYC 107. Controversial Issues in Psychology. 3 Units
Prerequisite(s): PSYC 121; Psychology majors only
Term Typically Offered: Fall, Spring

Consideration of unresolved issues of interest to psychology and the general public, such as the use of animals in research and mind and health. Emphasis is on critical analysis (but not solution) of the issues as they are presented in public discourse. Discussion format, written reports and evaluations.

PSYC 108. Organizational Psychology. 3 Units
Term Typically Offered: Fall, Spring

This course will provide an overview of the dynamics of human behavior in organizations, using the lens of psychological theory. Students will explore individual-, group-, and systems-level phenomena in organizations, with the overriding goal of understanding how to maximize performance, well-being, and satisfaction at work. Topics may include job attitudes, teams, organizational culture, individual differences, leadership, employee development, organizational change, occupational stress, fairness and diversity, and more.

PSYC 110. Cognitive Psychology. 3 Units
Prerequisite(s): PSYC 2; PSYC majors only. PSYC 8 and PSYC 9 are recommended.
Term Typically Offered: Fall, Spring

Examination of the basic concepts of cognitive psychology, including sensory storage, pattern recognition, attention, short-term memory, long-term memory, visual imagery, semantic memory structure, text processing, problem solving and decision-making. The relations among artificial intelligence, mental modeling, and the simulation of cognitive processes will also be explored.

PSYC 111. Introduction to Biological Psychology. 3 Units
Prerequisite(s): PSYC 2; PSYC majors only. PSYC 8 and PSYC 9 are recommended.
Term Typically Offered: Fall, Spring

Introductory overview of the psychobiological aspects of behavior. Emphasis is on the central and autonomic nervous systems and the endocrine system. Topics include physiological factors involved in sensation, perception, motivation, learning, emotion, social behavior, and maladaptive behavior.

PSYC 115. Introduction to Neuroscience. 4 Units
Prerequisite(s): PSYC 2 and PSYC 8; PSYC or BIO majors only. PSYC 9 recommended.
Term Typically Offered: Spring only

Introduction to the structure and function of the nervous system including neuroanatomy, neurophysiology, and systems neuroscience. Lectures and readings emphasize the empirical questions, techniques and methods used in neuroscience research. Laboratory activities focus on nervous system structure and some of the specialized techniques used within the fields of cellular, systems, and behavioral neuroscience. Lecture-discussion three hours; laboratory three hours. Cross Listed: BIO 115; only one may be counted for credit.

PSYC 116. Animal Behavior. 3 Units
Prerequisite(s): PSYC 2; PSYC majors only or instructor permission.
Term Typically Offered: Fall, Spring

Basic principles of animal behavior including the genetic, evolutionary and ecological mechanisms underlying courtship, reproduction, aggression, territoriality, communication and parental behavior; applied aspects of animal behavior; innate or naturally occurring behavior patterns necessary for survival in the natural environment; physiological, social and acquired aspects of animal and, secondarily, human behavior.

PSYC 117. Drugs and Behavior. 3 Units
Prerequisite(s): PSYC majors only or instructor permission.
Term Typically Offered: Fall, Spring

Examination of the classification of psychoactive drugs and their mode of action. Covers effects of psychoactive drugs on central nervous system structure and function and on behavior; use, abuse, effects, and dangers of therapeutic and recreational drugs; motivational aspects of drug use, and methods for treating addiction.

PSYC 118. Cognitive Neuroscience. 3 Units
Prerequisite(s): PSYC 111 or PSYC 115 or PSYC 117 or BIO 132.
Term Typically Offered: Fall, Spring

Examines how the nervous system accomplishes cognitive functioning. Brain mechanisms of higher functions such as memory, attention, sensorimotor integration, decision making, and language will be covered.

PSYC 119. Human Factors Psychology. 3 Units
Prerequisite(s): PSYC 2
Term Typically Offered: Fall, Spring

Study of the scientific application of psychology and human performance to the design of products and complex systems. Applications of perception, cognition, and human physical limitations are covered, with an emphasis on understanding how they relate to design. Topics include perception, attention, decision making, memory, action, and how they related to areas such as product design, human-machine interaction, health and medicine, aviation and aerospace, ergonomics of the workplace, and designing for special populations.

PSYC 120. Psychological Testing. 3 Units
Prerequisite(s): PSYC 121; PSYC majors only.
Term Typically Offered: Fall, Spring

Construction, application, interpretation and evaluation of psychological tests. Tests used to measure general mental ability, specific abilities and aptitudes, personality, interests and attitudes are surveyed.

PSYC 121. Methods and Statistics in Psychological Research. 3 Units
Prerequisite(s): PSYC 4 (may be taken concurrently), PSYC 8, and PSYC 9; PSYC majors only.
Term Typically Offered: Fall, Spring

Project-based experience of Psychology. Study of scientific processes in research such as literature reviews; developing testable hypotheses; design; IRB review; data collection, analysis, and interpretation; critical analysis of studies; APA paper preparation; and issues in dissemination. Study of some advanced statistical processes such as factorial ANOVAs, planned and post hoc comparisons, and multiple regression. Study of statistical software programs used in the analysis of data.
PSYC 122. Qualitative Research in Psychology. 3 Units
Prerequisite(s): PSYC 121 and PSYC majors only.
Term Typically Offered: Fall, Spring

Examines the philosophy underpinning the use of qualitative research and the methods and analyses strategies used in qualitative research. Methods may include interviews, focus groups, participant observation, and behavioral observation. Analyzes strategies may include grounded theorizing, negative case analyses, developing case studies, and content coding. Issues pertaining to data accuracy and consistency will be examined, and the researcher's role in interpreting results. Students will complete research projects involving the collection and/or analyses of qualitative data.

PSYC 129. Behavioral Research Methods. 3 Units
Prerequisite(s): PSYC 121 and PSYC 171, PSYC majors only or ABA certificate students
Term Typically Offered: Fall, Spring

Covers evaluating and thinking critically about behavioral research (i.e., data collection, logic, designs). Topics include: comparing group and single-case designs; observational strategies and measuring interobserver reliability; displaying and interpreting behavioral data; single-case experimental design including reversal, multiple-baseline, alternating treatments, changing-criterion, and combinatory designs; research ethics; identifying characteristics of pseudoscience; and disseminating behavioral research. The versatility of single-case designs will be discussed by including a wide range of case examples from multiple disciplines in the social and behavioral sciences and education.

PSYC 130. Personality Theories. 3 Units
Prerequisite(s): PSYC 2.
Term Typically Offered: Fall, Spring

Detailed examination of classic and contemporary personality theories such as those of Freud, Jung, Adler, Horney, Fromm, Skinner, Dollard and Miller, Rotter, Bandura, Kelly, Rogers, Maslow and May. Theories will be considered with respect to content, conceptual image of the individual, and current status.

PSYC 134. Psychology of Human Sexuality. 3 Units
Prerequisite(s): PSYC 2.
General Education Area/Graduation Requirement: Understanding Personal Development (E)
Term Typically Offered: Fall, Spring

Covers the inherent biological, as well as the psychological, social and cultural similarities and differences between the sexes. Sexual myths and misconceptions are explored, and the sex roles and patterns of interaction currently practiced in our society are discussed.

PSYC 135. Psychology of Multicultural Groups. 3 Units
General Education Area/Graduation Requirement: Understanding Personal Development (E)
Term Typically Offered: Fall, Spring

Examines the role of culture, race, ethnicity, gender, and social class in human development and behavior within diverse cultural groups. Presents sociocultural and ecological perspectives on human development, i.e., that individuals must be understood in the context of his or her culturally patterned social relations, practices, institutions, and ideas. Explores psychological issues that pertain to the major ethnic minority groups in the U.S.

PSYC 137. Stress Management. 3 Units
General Education Area/Graduation Requirement: Understanding Personal Development (E)
Term Typically Offered: Fall, Spring

Examination of the causes and manifested effects of various stressors related to acculturation, socio-economic, physical, occupational, and psychological pressures. Techniques for recognizing and coping with stress will be explored. Emphasis is on the development of skills to handle commonly encountered stress-producing situations.

PSYC 142. Community Psychology. 3 Units
Prerequisite(s): PSYC 121 and PSYC majors only.
This course is designed to introduce you to the field of community psychology, which is concerned with the scientific study of social problems through collaborative research. This course will provide you with ecological frameworks that aim to reduce social problems (e.g., poverty, mental illness and others) as well as core values of community well-being, empowerment, and collaboration. You will be exposed to prevention and intervention programs employed to solve social concerns as well as potential implications for practice and policy.

PSYC 143. Practicum in Community Psychology. 3 Units
Prerequisite(s): academic level of senior, Psychology majors only, and instructor permission.
Corequisite(s): PSYC 142
Term Typically Offered: Fall, Spring

Classroom and on-site experience in community psychology. Students will work at a community organization for a minimum of six hours per week with supervision by authorized persons at the organization. Students will also attend weekly class meetings to discuss the application of concepts in community psychology to practicum experience. Topics include: ethics, structure and capacity of community organizations, working with diverse populations, and professional relationships.

PSYC 145. Social Psychology. 3 Units
Prerequisite(s): PSYC 2.
Term Typically Offered: Fall, Spring

Empirical examination of the emotion, behavior, and cognition of individuals in social situations. Topics can include: social psychology methods, social perception, social cognition, attitudes, persuasion, social identity, gender identity, prejudice and discrimination, interpersonal attraction, close relationships, conformity, compliance, obedience to authority, helping behavior, aggression, group processes, and social psychology applications. Multiple perspectives discussed.

PSYC 148. Child Psychology. 3 Units
Prerequisite(s): PSYC 2.
Term Typically Offered: Fall, Spring

Examination of behavioral and physiological development during the prenatal period, and behavioral, cognitive and social development during infancy and childhood. Theories, methods and empirical research will be studied.

PSYC 149. Psychology of Adolescence. 3 Units
Prerequisite(s): PSYC 2.
Term Typically Offered: Fall, Spring

Growth and development during the adolescent period and the interrelationships between adolescents and their culture are studied. Physical, psychological, social and educational problems and their implications are considered.
PSYC 150. Psychological Aspects of Aging. 3 Units
Prerequisite(s): PSYC 2
Term Typically Offered: Fall, Spring
Developmental study of human aging emphasizing psychosocial, psychopathological, biological, intellectual and personality processes from a theoretical and research-oriented perspective. Influences including culture, gender, gender identity, race, ethnicity, sexual orientation, and socio-economic status on aging are examined.

PSYC 151. Psychological Aspects of Death and Dying. 3 Units
General Education Area/Graduation Requirement: Understanding Personal Development (E)
Term Typically Offered: Fall, Spring
Examination of the beliefs, attitudes, and behaviors associated with death and dying. Topics covered include children's and adults' concepts of dying and death; causes and types of death; self-destructive behavior; grief and mourning in the dying person and their survivors; euthanasia and other legal and ethical issues; cross-cultural and historical perspectives.

PSYC 152. Psychological Aspects of Health, Wellness, and Illness. 3 Units
Prerequisite(s): PSYC 2 and PSYC 8.
Term Typically Offered: Fall, Spring
Examines social, psychological, and behavioral factors important for physical health and emotional well-being. Psychological perspectives are applied to such topics as behavioral medicine, health promotion and compromise, the stress-illness relationship, social relations, personality, emotions, chronic illness, death and dying, and health care provider and patient interactions. Explores the development of health problems and the causes of premature death, as well as research on how psychology can help people live longer, healthier lives.

PSYC 153. Political Psychology. 3 Units
Term Typically Offered: Fall, Spring
Examines the ways in which political behavior is shaped by individual beliefs, personalities, cognitive patterns, biases, and other psychological mechanisms. Students will engage with a wide range of research on topics such as cognitive styles, personality, obedience, psychological roots of terrorism, the psychology of ideology, and the role of emotion in politics.
Cross Listed: GOVT 152

PSYC 157. Psychology of Women. 3 Units
Prerequisite(s): PSYC 2 or instructor permission.
Term Typically Offered: Fall, Spring
Contemporary psychological theories and issues related to the psychology of women in America and globally. Psychological theories may include but are not limited to feminism, cognitive-behavioral, self-object relations, humanistic, social learning and existential. Issues may include development, sexuality, mental health, psychotherapy, physical health, education, work, violence against women, gender inequality, multicultural perspectives, aging, parenting, criminal behavior, politics, sexual slavery, reproductive rights, religion, spirituality, and the arts.
Note: A service course for WOMS.

PSYC 160. Homosexuality. 3 Units
Term Typically Offered: Fall, Spring

PSYC 165. Evolutionary Psychology. 3 Units
Prerequisite(s): PSYC 2 and PSYC 8; Psychology majors only
Term Typically Offered: Spring only
Examination of empirical literature on emotion, behavior, and cognition of individuals from an evolutionary perspective. Topics can include: scientific methods in evolutionary psychology, survival strategies, mating strategies, parenting, kinship, cooperation, altruism, aggression, sexual conflict, and social dominance.

PSYC 167. Psychology in Personnel Training and Development. 3 Units
Prerequisite(s): PSYC 2.
Term Typically Offered: Fall, Spring
Application of psychological principles to problems of personnel training and development; techniques for determining training requirements, motivating trainees, providing feedback on trainee performance, and ensuring positive transfer of training to the job situation; personnel development programs.

PSYC 168. Abnormal Psychology. 3 Units
Prerequisite(s): PSYC 2.
Term Typically Offered: Fall, Spring
Detailed consideration of behavior disorders and maladaptive behavior: theories of causation, descriptions of the disorders, and strategies of various therapies.

PSYC 169. Industrial Psychology. 3 Units
Prerequisite(s): PSYC 2 and PSYC 8.
Term Typically Offered: Fall, Spring
Comprehensive overview of various human resources practices and policies, with an emphasis on people's psychological reactions to them. Topics include: recruitment, employee selection, training, employee compensation, legal aspects of employment decisions, and ethics in human resource management.

PSYC 171. Applied Behavior Analysis. 3 Units
Prerequisite(s): PSYC 2 and PSYC majors or posted Behavior Analysis Certificate only, or instructor permission.
Term Typically Offered: Fall, Spring
Introduction to theory, historical background, and philosophical assumptions relevant to behavior analysis with individuals. Lectures and laboratory activities in basic principles of behavior and methodology.

PSYC 181. Experimental Analysis of Behavior. 4 Units
Prerequisite(s): PSYC 9, PSYC 171, and PSYC majors only.
Term Typically Offered: Fall, Spring
Extensive analysis of single subject experimental research on intermittent reinforcement of behavior, including complex schedules, stimulus control, generalization, and verbal behavior. Lecture-discussion three hours; laboratory three hours; laboratory may include a component of self paced instruction.
PSYC 183. Teaching of Psychology. 3 Units
Prerequisite(s): Instructor permission
Term Typically Offered: Fall, Spring

Study of best practices in the Teaching of Psychology. Selected topics may include, course preparation, skills for fostering student learning, strategies for improving student writing, theories of assessment, using technology in the classroom, sensitivity to diversity, teaching special populations, and the ethical and legal issues faced in the classroom. Students attend scheduled seminars on course topics and course are mentored by a professor in the Department of Psychology (called Faculty Mentor/Sponsor).

Credit/No Credit

PSYC 184. Clinical Issues in Applied Behavior Analysis. 4 Units
Prerequisite(s): PSYC 2 and PSYC 171, and PSYC majors or ABA Certificate students only
Term Typically Offered: Spring only

Extensive study of applied behavior analytic methods in the assessment, development, and implementation of treatment programs for a variety of clinical issues including pediatric behavior problems, developmental disabilities, hyperactivity, parent-child difficulties, school-related problems, behavioral safety, brain injury, and dementia. Lecture three hours; laboratory three hours.

PSYC 185. Psychology of Exceptional Children. 3 Units
Prerequisite(s): PSYC 2
Term Typically Offered: Fall, Spring

Examines characteristics, special needs, and problems of children who differ from the group norm because of their level of abilities, physical handicaps, or other deviations.

PSYC 190. History and Systems of Psychology. 3 Units
Prerequisite(s): PSYC 9 and PSYC majors only.
Term Typically Offered: Fall, Spring

Covers the development of the various schools and systems of psychology, and their philosophical roots, interrelationships and differences. Normally taught with a seminar or proseminar format.

PSYC 191. Undergraduate Practicum in Behavior Analysis. 3 Units
Prerequisite(s): PSYC 171 or PSYC 181.
Term Typically Offered: Fall, Spring

Classroom and on-site experience in applied behavior analysis. Students will work at an approved agency for a minimum of 10 hours per week under the supervision of a Board Certified Behavior Analyst. Students will also meet in class to present and review their cases. Emphasis will be placed on treatment integrity and ethics.

Note: Requires permission of instructor. May be repeated for credit.

PSYC 194. Cooperative Research. 1 - 6 Units
Prerequisite(s): PSYC 2, PSYC 8, and PSYC 9. PSYC 121 recommended.
Term Typically Offered: Fall, Spring

Opportunity for dedicated students interested in graduate school or a career involving research to work cooperatively on a psychological research project under faculty supervision.

Note: May be repeated once for up to 6 units of credit.

PSYC 195A. Fieldwork in the Teaching of Psychology. 1 - 6 Units
Term Typically Offered: Fall, Spring

Supervised experience in various educational and instructionally related tasks, such as leading discussion groups, setting up and presenting demonstrations, constructing and scoring tests, and tutoring, at selected educational institutions in the Sacramento area.

Note: Requires permission of instructor and the Department Chair. May be repeated once for credit.

Credit/No Credit

PSYC 195B. Fieldwork in Child Observation. 3 Units
Prerequisite(s): PSYC 148 or equivalent.
Term Typically Offered: Fall, Spring

Supervised observation of preschool children in a formal school setting.

Note: Requires permission of instructor and the Department Chair. May be repeated once for credit.

Credit/No Credit

PSYC 195C. Fieldwork in Industrial and Organizational Psychology. 1 - 6 Units
Term Typically Offered: Fall, Spring

Supervised work experience at an appropriate level in business and governmental organizations.

Note: Requires permission of instructor and the Department Chair. May be repeated once for credit.

Credit/No Credit

PSYC 195E. Fieldwork in Community Psychology. 1 - 4 Units
Term Typically Offered: Fall, Spring

Supervised experience in various community and governmental agencies, such as the Suicide Prevention Service, Planned Parenthood, and the California Youth Authority. The experience must be of an applied psychological nature, determined collectively by the agency, the supervising faculty member, and the student.

Note: Requires permission of instructor and the Department Chair. May be repeated once for credit and a third time if another agency is involved.

Credit/No Credit

PSYC 195G. Fieldwork. 1 - 6 Units
Term Typically Offered: Fall, Spring

Projects in contemporary areas of psychology under the supervision of one or more faculty.

Note: Requires permission of instructor and the Department Chair. May be repeated once for credit.

Credit/No Credit

PSYC 195H. Psychology of Religion. 3 Units
Prerequisite(s): PSYC 2
Term Typically Offered: Fall, Spring

Introduction to psychological aspects of religion, including its foundations, measurement, and research methods. Selected topic areas include: religious & spiritual development; religion and spirituality in neuroscience, cognitive psychology, emotion, personality, social psychology, and cross-cultural psychology; religion and spirituality in health, mental health, coping, and psychotherapy.
PSYC 197A. Advanced Research I. 1 - 4 Units
Prerequisite(s): PSYC 194 and permission of instructor and Department Chair. Graded; 1 - 4 units.
Term Typically Offered: Fall only

Advanced research opportunity for students who have completed previous research experiences in PSYC 194. Students in the course are expected to demonstrate competence in advanced research skills in research methods, data management, data analysis, and the communication of research findings by conducting research on collaborative projects under the guidance of a psychology faculty supervisor.

PSYC 197B. Advanced Research II. 1 - 4 Units
Prerequisite(s): PSYC 197A and permission of instructor and Department Chair. Graded; 1 - 4 units.
Term Typically Offered: Fall, Spring

Advanced research opportunity for students who have completed previous research experiences in PSYC 197A. Students in the course are expected to demonstrate competence in advanced research skills in research methods, data management, data analysis, and the communication of research findings by conducting research on collaborative projects under the guidance of a psychology faculty supervisor.

PSYC 198A. Prospects for Success: Peer Mentee. 1 Unit
Term Typically Offered: Fall, Spring

Provide psychology majors with information and experiences necessary for developing academic goals, skills, and better understanding of the Psychology major. Weekly meetings with peer mentors to discuss topics that include academic planning, website navigation, preparation for meeting with professors, academic skills, student professionalism and resume/CV development.

Note: May be repeated for credit

PSYC 198B. Prospects for Success: Peer Mentor. 2 - 3 Units
Prerequisite(s): PSYC 4 and permission from instructor
Term Typically Offered: Fall, Spring

Provide peer mentoring and advising to Psychology majors. Develop peer mentoring knowledge and skills through training and assigned readings. Peer mentors provide psychology majors with information and experiences necessary for developing academic goals, skills, and a better understanding of the Psychology major. Conduct weekly mentee meetings to discuss topics that include academic planning, website navigation, preparations for meetings with professors, academic skills, student professionalism and resume/CV development.

PSYC 199. Special Problems. 1 - 6 Units
Term Typically Offered: Fall, Spring

Individual projects or directed reading.

Note: Requires permission of instructor and the Department Chair.

Credit/No Credit

PSYC 200. Methods in Empirical Psychology. 3 Units
Prerequisite(s): PSYC 8, PSYC 101, PSYC 102.
General Education Area/Graduation Requirement: Writing Intensive Graduation Requirement (WI)
Term Typically Offered: Fall, Spring

Philosophy of science, critical thinking in the design of research studies, and professional issues. Topics include: nature of science; observational, experimental, and case study designs; formulating research questions; measurement strategies; scaling and coding; internal and external validity; naturalism in research; quasi-experiments; archival research; physical traces; data collection; interpreting results; program evaluation; professional writing; and ethics.

PSYC 202. Survey of Contemporary Statistical Methods in Psychological Research. 3 Units
Prerequisite(s): Graduate standing; PSYC 102 or equivalent
Term Typically Offered: Fall, Spring

Broad coverage of common univariate and multivariate designs and analyses used in contemporary psychological research. Primary focus is on providing the basic tools for carrying out the analyses in statistical software and interpreting the results, as well as understanding results presented in published research reports. Topics include various ANOVA and multiple regression models and applications including related categorical and multivariate alternatives, such as logistic regression analysis, discriminant function analysis, MANOVA, path analysis, factor analysis, canonical correlation analysis.

PSYC 204. Advanced Topics in Statistical Methods for Psychological Research. 3 Units
Prerequisite(s): PSYC 202
Term Typically Offered: Fall, Spring

Advanced treatment of selected research design and analysis methods of psychological research. Applications of the general and generalized linear models (e.g., multiple regression models, structural equation models, multilevel models, and limited dependent variable models) for a variety of research designs and data structures. Intermediate to advanced training in statistical software and data management. Focus is on understanding foundations and assumptions of the methods, understanding interrelationships between the methods, performing specialized and non-routine analyses when needed, and interpreting results in detail.

PSYC 205. Measurement Methods for Psychological Research and Practice. 3 Units
Prerequisite(s): PSYC 202
Term Typically Offered: Fall, Spring

Detailed coverage of classical and modern theories and models of psychological measurement, and their applications in research and professional testing settings. Primary focus is on principles of constructing and analyzing measures, including both paper-and-pencil tests/surveys and performance-based tests that require rater judgment in scoring. Measurement models include classical testing theory, generalizability theory, confirmatory factor analysis, Rasch measurement, and item response theory.
PSYC 206. Tests and Measurement. 3 Units
Prerequisite(s): Graduate standing and PSYC 102 or its equivalent.
Term Typically Offered: Fall, Spring

Examines the administration, interpretation, and application of psychological tests used by behavioral scientists in clinical, educational, organizational, and other settings. Test development, reliability and validity, and legal considerations will be discussed.

PSYC 209. Seminar in Systems of Psychology. 3 Units
Term Typically Offered: Fall, Spring

Historical review of the systems of thought which led to modern psychology. An examination of current psychological systems and their development. Factors that differentiate psychological systems will be studied.

PSYC 210. Theories of Personality. 3 Units
Prerequisite(s): PSYC 102 or equivalent; PSYC 102 may be taken concurrently.
Term Typically Offered: Fall, Spring

Study of the role of personality theory in the field of psychology, and an examination of the current theories.

PSYC 216. Current Literature in Personnel and Organizational Psychology. 3 Units
Prerequisite(s): Course work in Personnel and Organizational Psychology; PSYC 102 or its equivalent.
Term Typically Offered: Fall, Spring

Analyzes selected current articles on theory and research in such journals as the Journal of Applied Psychology, Personnel Psychology, and Organizational Dynamics, with written and oral critiques.
Note: May be repeated twice for credit.

PSYC 216A. Current Literature and Applications in Industrial-Organizational Psychology. 3 Units
Term Typically Offered: Fall only

Seminar to review current literature in selected organizational psychology topics, and develop proposals for applied research in industrial-organizational psychology. Literature focus will be centered on personal and interpersonal factors influencing the quality of work life and experiences of employees. Application focus will be centered on identifying organizational problems amenable to research, reviewing literature and common practices to identify potential solutions, designing a research methodology to address the problem and evaluate the solution, and writing research proposals including Human Subjects Review.

PSYC 216B. Current Literature and Applications in industrial-Organizational Psychology. 3 Units
Prerequisite(s): PSYC 216A
Term Typically Offered: Spring only

Seminar to discuss implementation of applied research proposals from the previous semester and review current literature in performance management and workforce planning systems. Application focus will be centered on understanding organizational contexts and constraints for implementing research, obtaining managerial and participant cooperation, maintaining methodological rigor in the field, systematically and objectively recording data, and preparing data for analysis. Literature focus will be centered on methods for measuring employee performance relative to objectives, understanding performance barriers, and identifying human resource needs.

PSYC 217. Seminar in Social Psychology. 3 Units
Prerequisite(s): Graduate standing
Term Typically Offered: Fall, Spring

Review of classic and contemporary theories and research in social psychology. Topics may include: group dynamics, social influence, aggression, helping behavior, attitudes, dissonance and self-justification, prejudice, stereotyping, and discrimination; automaticity and social cognition, motivation, and gender. Emphasis upon the application of social psychological theories and research to social problems.

PSYC 240. Seminar in Behavioral Neuroscience. 3 Units
Prerequisite(s): Graduate standing
Term Typically Offered: Fall, Spring

Surveys the fundamental principles of Behavioral Neuroscience, the connection between the brain and behavior. Topics may include: neuroanatomy, electrochemical transmission, sites and mechanism of drug action, sensation and perception, motor systems, developmental processes, neuroendocrine systems, learning and memory, attention, emotion, executive function, neurodegenerative disease and the neurobiology of mental illness. Seminal experiments and recent discoveries within the field will be reviewed and discussed with a focus on how these findings impacted and continue to influence past and current theory.

PSYC 241. Seminar in Cognitive Psychology. 3 Units
Prerequisite(s): Graduate standing
Term Typically Offered: Fall, Spring

Provides a survey of topics in human information processing. Selected topics may include perception, attention, memory, knowledge, categorization, problem solving, reasoning, decision making, and language comprehension and production. Classical theories and experiments in these areas will be reviewed in addition to applications of this work to practical problems.

PSYC 242. Seminar in Learning and Behavior. 3 Units
Prerequisite(s): Graduate standing
Term Typically Offered: Fall, Spring

Surveys the area of Psychology concerned with how people and animals learn and how their behaviors are changed as a result of this learning. Selected topics include: Inmate behaviors, respondent and operant learning, behavioral economics, comparative cognition, theories of imitation, choice and self-control. Classical theories and current experiments in these areas will be reviewed in addition to implications of this work to practical problems.

PSYC 251. Developmental Processes. 3 Units
Prerequisite(s): PSYC 148 or PSYC 149.
Term Typically Offered: Fall, Spring

Study of the psychological processes underlying development throughout the life span. Covers such topics as cognitive, language, emotional, and relationship development in terms of the individual. Attention will be given to functioning of the individual within social units such as the family.
PSYC 262. Theoretical Foundations of Organizational Psychology. 3 Units
Prerequisite(s): PSYC 108 or equivalent.
Term Typically Offered: Fall, Spring

Major theories that made significant theoretical contributions to organizational psychology are covered, along with areas of significant research which have provided the foundations of modern organizational psychology.

PSYC 267. Training & Employee Development. 3 Units
Term Typically Offered: Fall only

This course will provide an overview of the application of psychological principles to employee training and development, and an in-depth review of common training and development practices. Additional topics include techniques for determining training requirements, motivating trainees, providing feedback on trainee performance, ensuring positive transfer of training to the job environment, and employee development programs.

PSYC 268. Advanced Psychopathology. 3 Units
Term Typically Offered: Fall, Spring

Covers an advanced and detailed discussion of the description, etiology, development, dynamics and treatment of individuals with mental disorders. Since the DSM-IV is the major classification system used by mental health professionals, it will also be discussed. This manual describes essential features of a variety of disorders and outlines the basis on which an experienced clinician can differentiate one disorder from another.

Note: May substitute EDC 231.

PSYC 269. Analysis of Work and Employee Selection. 3 Units
Term Typically Offered: Spring only

Survey of work analysis, with emphasis on designing employee selection systems. Topics include multiple methods for analysis of different types and aspects of work, and applications of the results such as: Explicating the performance construct for a given job; identifying human attributes required for successful performance; evaluating jobs in terms of compensation; selecting appropriate measurement methods for predictor and criterion constructs; evaluating predictor utility; and the legal environment for employee selection practice.

PSYC 271. Advanced Applied Behavior Analysis. 4 Units
Prerequisite(s): Graduate status and instructor permission.
Term Typically Offered: Fall, Spring

Designed both for graduate students who are interested in gaining knowledge about the fundamental principles of behavioral psychology and those who are pursuing certification as a Board Certified Behavior Analyst. Students will not only learn behavioral theory and the means by which behavior is increased, decreased, shaped and maintained, but they will learn to apply behavioral principles to more complex topics such as concept formation and novel behaviors.

PSYC 272. Research Methods in Behavior Analysis. 3 Units
Prerequisite(s): PSYC 171 or PSYC 181.
Term Typically Offered: Fall, Spring

Covers methods related to single-case research (i.e., data collection, logic, designs). Course content is based primarily on contemporary books and articles from peer-review journals. Topics include: measurement of behavior, methods of assessing inter-rater agreement; experimental design including, reversal designs, changing-criterion designs, alternating treatment designs, and multiple-baseline designs; and displaying and interpreting behavioral data. Current methodological issues will be discussed.

PSYC 274. Theoretical Foundations of Behavior Analysis. 3 Units
Prerequisite(s): PSYC171 or PSYC181 or equivalent.
Term Typically Offered: Fall, Spring

Covers major theories that have made significant contributions to behavior analysis, along with areas of significant research providing the foundations of radical behaviorism and contemporary behavior analysis. Topics include history of behaviorism, selection by consequences as a casual mode, pragmatism, determinism, logical positivism, dualism and monism, verbal behavior and private events.

PSYC 275. Applied Behavior Analysis in the Workplace. 3 Units
Prerequisite(s): Graduate students only.
Term Typically Offered: Fall only

Overview of contemporary research and practice on the use of applied behavior analysis techniques in the workplace. Students will learn to use several performance assessment and improvement tools based on the operant learning literature, as well as learn strategies for effective supervision, training, and management of staff in human service organizations.

PSYC 281. Advanced Experimental Analysis of Behavior. 4 Units
Prerequisite(s): PSYC 271.
Term Typically Offered: Fall, Spring

Advanced consideration of small-N research designs. Analysis of complex contingencies of reinforcement and stimulus control as they apply to such topics as perceiving, thinking, abstractions, and concept formation. In-depth examination of behavior analytic principles in relation to choice behavior and verbal behavior.

PSYC 283. Teaching Of Psychology. 3 Units
Term Typically Offered: Fall, Spring

Covers the historical background of higher education, the social and administrative structure of colleges and universities, and the selection, preparation and planning of undergraduate psychology courses, particularly introductory courses.
PSYC 284. Assessment and Treatment of Behavior Problems. 4 Units
Prerequisite(s): Graduate status and instructor permission.
Term Typically Offered: Fall, Spring

Advanced study and practical experience in application and teaching of behavior analytic methods of assessment, data collection, program construction and evaluation for a variety of behavior problems. Students will become proficient in conducting functional analyses, positive programming, and constructing and implementing behavior intervention programs for behavior excesses (consistent with State of California laws) including, antecedent manipulations, differential reinforcement schedules, functional communication training, and response cost. They will be required to develop didactic skills with respect to these various programs. Lecture three hours; Lab three hours.

PSYC 291. Professional Issues in Behavior Analysis. 3 Units
Prerequisite(s): PSYC 271.
Term Typically Offered: Fall, Spring

Classroom and on-site experience in applied behavior analysis. Students will work at an approved agency for a minimum of 10 hours per week under the supervision of a Board Certified Behavior Analyst. Students will also meet in class to present and review their cases. Emphasis will be placed on treatment integrity and ethics.
Note: Requires permission of instructor. May be repeated for credit.

PSYC 294. Cooperative Research. 1 - 6 Units
Term Typically Offered: Fall, Spring

Students work cooperatively on a psychological research project under faculty supervision.
Note: Requires permission of instructor and the Department Chair. May be repeated once for credit.

PSYC 295A. Fieldwork in the Teaching of Psychology. 1 - 6 Units
Term Typically Offered: Fall, Spring

Supervised experience in various educational and instructionally related tasks, such as leading discussion groups, setting up and presenting demonstrations, constructing and scoring tests, and tutoring, at selected educational institutions in the Sacramento area.
Note: Requires permission of instructor and the Department Chair. May be repeated once for credit.
Credit/No Credit

PSYC 295C. Fieldwork in Personnel and Organizational Psychology. 1 - 6 Units
Term Typically Offered: Fall, Spring

Supervised work experience at a professional level in business and governmental organizations.
Note: Requires permission of instructor and the Department Chair. May be repeated once for credit.
Credit/No Credit

PSYC 299. Special Problems. 1 - 6 Units
Term Typically Offered: Fall, Spring

Individual projects or directed reading. Requires approval of instructor and Department Chair.
Credit/No Credit

PSYC 500A. Culminating Experience. 4 Units
Prerequisite(s): Advanced to candidacy and permission of the graduate coordinator.
Term Typically Offered: Fall, Spring

Completion of a thesis or project approved for the Master’s degree.

PSYC 500B. Culminating Experience. 2 Units
Prerequisite(s): PSYC 500A.
Term Typically Offered: Fall, Spring

Continuation of work on thesis or project.

BA in Psychology

Units required for Major: 46-50

Program Description

With a Bachelor of Arts in Psychology, graduates can qualify for positions requiring an understanding of human behavior in public service, education, or business. The undergraduate Behavior Analysis Certificate qualifies students for positions requiring the application of behavior analysis in educational settings and health and human service agencies.

The Psychology program at Sacramento State is highly sought after and the undergraduate major is not officially impacted. Students wishing to become Psychology majors must meet eligibility requirements before applying for admission to the program. It is highly recommended that interested students speak with a Psychology advisor as soon as possible.

Minimum Grade Requirement

Once admitted to the program, PSYC 2, PSYC 8, AND PSYC 121 must each be completed with a minimum grade of "C-" or better.

Coursework Sequencing

The Psychology Department strongly recommends that Psychology Majors sequence their courses in the following manner to provide them with an optimal learning experience:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td><strong>Freshmen and Sophomores</strong></td>
<td></td>
</tr>
<tr>
<td></td>
<td>Lower division GE requirements, CHDV 30, PSYC 2, PSYC 4, PSYC 8, PSYC 9 and electives</td>
<td></td>
</tr>
<tr>
<td></td>
<td><strong>Juniors</strong></td>
<td></td>
</tr>
<tr>
<td></td>
<td>Upper division GE requirements, PSYC 121 (and PSYC 102 for graduate school aspirants), any upper division Psychology courses and electives</td>
<td></td>
</tr>
<tr>
<td></td>
<td><strong>Seniors</strong></td>
<td></td>
</tr>
<tr>
<td></td>
<td>Upper division GE requirements, any upper division Psychology courses, Psychology capstone course and electives</td>
<td></td>
</tr>
</tbody>
</table>

It is important to choose courses in the sequence outlined above. Otherwise, there could be a delay in completion of the major and graduation.
**Note:** Transfer students must take at least 15 units of Psychology courses in residence at Sacramento State; 12 of those units must be upper division.

### Program Requirements

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>

</tr>
</tbody>
</table>

Select one of the following methods courses: 3 - 4

- PSYC 102 Advanced Methods and Statistics in Psychological Research
- PSYC 120 Psychological Testing
- PSYC 122 Qualitative Research in Psychology
- PSYC 129 Behavioral Research Methods

Select one of the following biological processes courses: 3 - 4

- PSYC 111 Introduction to Biological Psychology
- PSYC/BIO 115 Introduction to Neuroscience
- PSYC 116 Animal Behavior
- PSYC 117 Drugs and Behavior

Select four courses, with at least one from Cognitive/Learning and one from Individual/Social Processes: 12 - 13

Cognitive and Learning Processes

- PSYC 103 Perception
- PSYC 104 Learning Theories
- PSYC 106 Motivation
- PSYC 110 Cognitive Psychology
- PSYC 181 Experimental Analysis of Behavior

Individual and Social Processes

- PSYC 108 Organizational Psychology
- PSYC 130 Personality Theories
- PSYC 145 Social Psychology
- PSYC 148 Child Psychology
- PSYC 168 Abnormal Psychology
- PSYC 171 Applied Behavior Analysis

Select one of the following human diversity courses: 3

- PSYC 135 Psychology of Multicultural Groups
- PSYC 150 Psychological Aspects of Aging
- PSYC 157 Psychology of Women
- PSYC 160 Homosexuality
- PSYC 185 Psychology of Exceptional Children

Select one of the following capstone courses: 3 - 4

- PSYC 107 Controversial Issues in Psychology

Total Units: 46-50

1. Must be completed with a minimum grade of "C-" or better.
2. Select PSYC 102 if planning to enter a graduate program in Psychology.

### Certificate in Behavior Analysis

Units required for Certificate: 17

**Program Description**

The undergraduate Behavior Analysis Certificate qualifies students for positions requiring the application of behavior analysis in educational settings and health and human service agencies. Specialized coursework is taken concurrently with established degree requirements. Courses for the Certificate program are applicable toward course requirements for the major.

To receive the Sacramento State certification in Behavior Analysis, students must:

- complete a baccalaureate degree program with a major in Psychology or a related field;
- achieve a 3.5 GPA in the BA Certificate Program courses.

Additional certification information may be obtained from the Psychology Department Office.

Total Units: 17

### MA in Psychology (Applied Behavior Analysis)

Total units required for MA: 30
Program Description

The Master of Arts program in Psychology is designed to provide specialized education in the field of psychology. With a MA in Psychology, one can qualify for positions similar to those associated with a BA, though at a higher level of responsibility. Advisors play an active role in the planning process, and students are strongly encouraged to consult with faculty on a continual and intensive basis as soon as they begin their studies in the program. MA students can prepare for doctoral study in any area of Psychology or specialize in areas such as Applied Behavior Analysis or Industrial-Organizational Psychology. The Graduate Brochure contains the department application procedures, including GRE requirements and the departmental application form.

Although the program is based on a core set of requirements, the structure of the program allows for flexibility. While much material is covered in regular course offerings, the Department recognizes that specialized study and the development of certain types of skills must take place on a one-to-one student-instructor basis. This includes research activities in the laboratory, field, or library; teaching activities; and volunteer work in community mental health agencies, government agencies, schools, and/or businesses. Academic credit under individualized study or fieldwork designations is available for these purposes.

Applied behavior analysis (ABA) is the field of Psychology concerned with understanding the environmental variables that reliably influence human behavior, as well as developing procedures to modify socially significant behavior. The ABA program prepares students to work as behavior analysts in a variety of settings including schools and agencies providing services to individuals with disabilities. The ABA program coursework fulfills the requirements to sit for the national certification exam in Behavior Analysis (BCBA). Students should note that this degree option is also appropriate for those planning to enter doctoral programs in Applied Behavior Analysis, Experimental Analysis of Behavior, or Special Education.

Applied Behavior Analysis is a scientific approach aimed at understanding environmental variables that reliably influence socially significant behavior and developing behavior-change technologies based on this understanding. Applied Behavior Analysis procedures have been used in many areas including developmental disabilities, education, rehabilitation, community psychology, self-management, child management, and sports psychology. The program at Sacramento State prepares students to practice as M.A. level board certified behavior analysts, as well as enter doctoral (Ph.D.) programs in Applied Behavior Analysis or Experimental Analysis of Behavior. Our graduates are extremely marketable in California and are typically employed by school districts, private schools, or agencies providing services to individuals with learning, emotional, or developmental disabilities.

Research and Clinical Opportunities

Our research facilities include human and animal (rats) operant laboratories and research rooms for data collection with children and adults. We have also established research partnerships with different schools and agencies in the region.

Clinical training is also an integral part of our program. There are numerous funded internships and job opportunities for behavior analysis students in Sacramento.

Certification

The ABA option coursework should fulfill the new requirements to sit for the national certification exam in Behavior Analysis. For more information visit www.bacb.com.

Admission Requirements

Admission to graduate study in Psychology is selective. The Department equally weighs the candidate's overall grade point average (GPA) and scores on the Graduate Record Examination (GRE). An overall GPA of 3.0 is recommended. When making admissions decisions, the Department takes into consideration the candidate's combined GPA and GRE score, letters of recommendation, previous (research and/or practical) experience, the candidate's interest in a particular faculty member's research agenda, and additional materials as required by each program option (ABA, General MA, and I/O).

Applicants are required to have completed upper division undergraduate psychology courses in statistics and research methods, with at least “C” grades in those courses, as well as a balanced and academically strong group of upper division courses covering at least five different core academic areas of psychology (e.g., biological, clinical, cognitive, developmental, social). The upper division psychological research methods/statistics requirement is met by PSYC 121 and PSYC 102 taken at Sacramento State, or their equivalents at other universities. Upper division research methods/statistics courses from other four-year universities must be reviewed and approved for equivalency by the Department's Graduate Coordinator.

Please visit www.csus.edu/psyc/grad-students/graduate-program-dev.html for information on each option's additional requirements.

Admission Procedures

All applicants, including Sacramento State graduates, must apply to both the University and the Psychology Department. Please submit the following to the Sacramento State Office of Graduate Studies:

- an application for admission—via CalState Apply (https://www2.calstate.edu/apply)
- two sets of official transcripts from all colleges and universities attended, other than Sacramento State, should be sent to:
  California State University, Sacramento
  Office of Graduate Studies
  River Front Center 215
  6000 J Street
  Sacramento, CA 95819-6112
- Official Graduate Records Exam (GRE) scores (be aware that it takes approximately six weeks from the test date for scores to be forwarded); for more admissions information and application deadlines please visit http://www.csus.edu/gradstudies

At the same time, each applicant must file on-line with the Psychology Department:

- a completed application form;
- one set of unofficial transcripts from all colleges and universities attended, including Sacramento State transcripts;
- unofficial copies of the General GRE scores*;
- three letters of recommendation, from individuals who can evaluate the applicant's potential for successful graduate study. At least two letters from faculty are preferred. See application brochure for link—
Program Requirements

Minimum Units and Grade Requirement for the Degree

Units required for the MA: 34-36

Minimum Cumulative GPA: 3.0. All units must be completed with a grade of "B" or better.

Advancement to Candidacy

Each student must file an application for Advancement to Candidacy, indicating a proposed program of graduate study. This procedure should begin as soon as the classified graduate student has:

- removed any deficiencies in admission requirements;
- completed at least 12 units of 200-level courses in the graduate program with a minimum 3.0 GPA;
- selected a Thesis or Project committee;
- obtained the committee's approval of a proposal for the thesis or project (as indicated by committee members' signatures on the Department's thesis/project approval form); and
- taken the Writing Placement for Graduate Students (WPG) or taken a Graduate Writing Intensive (GWI) course in their discipline within the first two semesters of coursework at California State University, Sacramento or secured approval for a WPG waiver.

The student will complete the Advancement to Candidacy form after planning a degree program in consultation with a Psychology advisor and members of the student's thesis/project committee. The completed form is then returned to the Office of Graduate Studies for approval.

MA in Psychology (General Psychology)

Total units required for the MA: 30

Program Description

The Master of Arts program in Psychology is designed to provide specialized education in the field of psychology. With a MA in Psychology, one can qualify for positions similar to those associated with a BA, though at a higher level of responsibility. Advisors play an active role in the planning process, and students are strongly encouraged to consult with faculty on a continual and intensive basis as soon as they begin their studies in the program. MA students can prepare for doctoral study in any area of Psychology or specialize in areas such as Applied Behavior Analysis or Industrial-Organizational Psychology. The Graduate Brochure contains the department application procedures, including GRE requirements and the departmental application form.

Although the program is based on a core set of requirements, the structure of the program allows for flexibility. While much material is covered in regular course offerings, the Department recognizes that specialized study and the development of certain types of skills must take place on a one-to-one student-instructor basis. This includes research activities in the laboratory, field, or library; teaching activities; and volunteer work in community mental health agencies, government agencies, schools, and/or businesses. Academic credit under individualized study or fieldwork designations is available for these purposes.

In the General Psychology option, students can create individual programs in conjunction with the faculty to prepare for employment or further study in doctoral programs in a variety of specialized fields, such as Clinical, Cognitive, Developmental, Educational, Experimental, Industrial/Organizational, Neuroscience, Quantitative, and Social Psychology.

Admission Requirements

Admission to graduate study in Psychology is selective. The Department equally weighs the candidate's overall grade point average (GPA) and scores on the Graduate Record Examination (GRE). An overall GPA of 3.0 is recommended. When making admissions decisions, the Department takes into consideration the candidate's combined GPA and GRE score, letters of recommendation, previous (research and/or practical) experience, the candidate's interest in a particular faculty member's research agenda, and additional materials as required by each program option (ABA, General MA, and I/O).

Applicants are required to have completed upper division undergraduate psychology courses in statistics and research methods, with at least "C" grades in those courses, as well as a balanced and academically strong group of upper division courses covering at least five different core academic areas of psychology (e.g., biological, clinical, cognitive, developmental, social). The upper division psychological research methods/statistics requirement is met by PSYC 121 and PSYC 102 taken at Sacramento State, or their equivalents at other universities. MA in Psychology (Industrial/Organizational Psychology)

Total units required for MA: 30
Program Description

The Master of Arts program in Psychology is designed to provide specialized education in the field of psychology. With a MA in Psychology, one can qualify for positions similar to those associated with a BA, though at a higher level of responsibility. Advisors play an active role in the planning process, and students are strongly encouraged to consult with faculty on a continual and intensive basis as soon as they begin their studies in the program. MA students can prepare for doctoral study in any area of Psychology or specialize in areas such as Applied Behavior Analysis or Industrial-Organizational Psychology. The Graduate Brochure contains the department application procedures, including GRE requirements and the departmental application form.

Although the program is based on a core set of requirements, the structure of the program allows for flexibility. While much material is covered in regular course offerings, the Department recognizes that specialized study and the development of certain types of skills must take place on a one-to-one student-instructor basis. This includes research activities in the laboratory, field, or library; teaching activities; and volunteer work in community mental health agencies, government agencies, schools, and/or businesses. Academic credit under individualized study or fieldwork designations is available for these purposes.

The Industrial-Organizational Psychology Option is designed for students who wish to develop marketable career skills that allow them to apply psychological principles and research methods to work-related issues. The I-O program at Sacramento State was designed with heavy influence from the 2016 Guidelines for Education and Training in Industrial-Organizational Psychology, published by the Society for Industrial and Organizational Psychology. While we cover all 24 major competency areas in the SIOP Guidelines to some degree, we give more emphasis to some than we do others—a strategy that is common and fully expected in master’s programs according to the narrative of the SIOP Guidelines. In consideration of the typical jobs held by master’s level I-O practitioners in general and especially in the local employment market for our students and alumni, our program gives primary emphasis to topics in human resource planning and development (e.g., job/work analysis; employee recruitment, testing, and selection; employee training; performance management) and general analytical skills (e.g., research methods; measurement; data analysis). These topics are slanted more toward the “industrial” side of the I-O field. Current literature in organizational psychology topics such as work attitudes and motivation, groups and teams, and occupational health and safety have important implications for the aforementioned human resource planning and development topics, and are covered more briefly in the coursework. In addition to completing the core courses and the culminating requirement for the MA degree, students must also select the Industrial-Organizational Psychology option.

Admission Requirements

Admission to graduate study in Psychology is selective. The Department equally weighs the candidate’s overall grade point average (GPA) and scores on the Graduate Record Examination (GRE). An overall GPA of 3.0 is recommended. When making admissions decisions, the Department takes into consideration the candidate's combined GPA and GRE score, letters of recommendation, previous (research and/or practical) experience, the candidate’s interest in a particular faculty member’s research agenda, and additional materials as required by each program option (ABA, General MA, and I/O).

Applicants are required to have completed upper division undergraduate psychology courses in statistics and research methods, with at least “C” grades in those courses, as well as a balanced and academically strong group of upper division courses covering at least five different core academic areas of psychology (e.g., biological, clinical, cognitive, developmental, social). The upper division psychological research methods/statistics requirement is met by PSYC 121 and PSYC 102 taken at Sacramento State, or their equivalents at other universities. Upper division research methods/statistics courses from other four-year universities must be reviewed and approved for equivalency by the Department’s Graduate Coordinator.

Please visit www.csus.edu/psyc/grad-students/graduate-program-dev.html for information on each option’s additional requirements.

Admission Procedures

All applicants, including Sacramento State graduates, must apply to both the University and the Psychology Department. Please submit the following to the Sacramento State Office of Graduate Studies:

  River Front Center 215
  6000 J Street
  Sacramento, CA 95819-6112

- Official Graduate Records Exam (GRE) scores (be aware that it takes approximately six weeks from the test date for scores to be forwarded); for more admissions information and application deadlines please visit http://www.csus.edu/gradstudies

At the same time, each applicant must file on-line with the Psychology Department:

- a completed application form;
- one set of unofficial transcripts from all colleges and universities attended, including Sacramento State transcripts;
- unofficial copies of the General GRE scores*;
- three letters of recommendation, from individuals who can evaluate the applicant’s potential for successful graduate study. At least two letters from faculty are preferred. See application brochure for link—available from www.csus.edu/psyc/grad-students/graduate-program-dev.html;
- additional materials, as required by each specific option (General MA, ABA and I/O).

*The General GRE must have been taken by the application deadline.

Minimum Units and Grade Requirement for the Degree

Units required for the MA: 34-36
Minimum Cumulative GPA: 3.0. All units must be completed with a grade of “B” or better.

The field of Industrial-Organizational Psychology (I-O Psychology) covers all aspects of psychology in the workplace, including such sub-topics as: organizational development, leadership, performance evaluation,
personnel selection, test validation and development, work teams, training, and personality influences.

The Industrial-Organizational Psychology Option at Sacramento State is designed to give broad-based training in the relevant content areas as well as provide a strong methodological background. Students obtaining the Master’s degree should be prepared for a career as a personnel manager, a testing specialist, a member of an I-O consulting group; they should also be prepared for further graduate work at the doctoral level. By meeting all of the requirements for the degree, students will have met the master’s level educational competencies identified by the Society for Industrial and Organizational Psychology.

Students are strongly advised to keep in contact with professors in the Psychology Department for academic advising.

Advancement to Candidacy
Each student must file an application for Advancement to Candidacy, indicating a proposed program of graduate study. This procedure should begin as soon as the classified graduate student has:

- removed any deficiencies in admission requirements;
- completed at least 12 units of 200-level courses in the graduate program with a minimum 3.0 GPA;
- selected a Thesis or Project committee;
- obtained the committee’s approval of a proposal for the thesis or project (as indicated by committee members’ signatures on the Department’s thesis/project approval form); and
- taken the Writing Placement for Graduate Students (WPG) or taken a Graduate Writing Intensive (GWI) course in their discipline within the first two semesters of coursework at California State University, Sacramento or secured approval for a WPG waiver.

The student will complete the Advancement to Candidacy form after planning a degree program in consultation with a Psychology advisor and members of the student’s thesis/project committee. The completed form is then returned to the Office of Graduate Studies for approval.

Public Policy and Administration

College of Social Sciences and Interdisciplinary Studies

Program Description

The graduate programs in the Department of Public Policy and Administration prepare students for a career in public service through
a deeper understanding of how to address complex issues relating to public policy and administration. We serve the State of California and Sacramento Region by developing leaders possessing strong analytical tools, and a deep commitment to public service.

Note: The Department of Public Policy and Administration, in collaboration with the College of Business Administration, also offers an interdisciplinary Master’s of Science in Urban Land Development. In addition, it offers an interdisciplinary doctorate in education in collaboration with the College of Education. Both of these programs are listed separately in this catalog.

Special Features
- The proximity of Sacramento State to the State Capitol offers significant advantages to students by providing them with a ready "laboratory" for observing the policy and administrative issues they will confront professionally, and for gaining experience alongside existing practitioners in public policy and administration. In particular, the graduate program's internship feature is greatly strengthened by the placements available in California state government, local government, and related organizations.
- The graduate program’s curricular design and scheduling of courses allow students to complete the program in four semesters if enrolled full-time. In addition, part-time students may complete the program after five or a six semesters of attendance. Classes are scheduled in the evening, and sometimes on Saturday, to accommodate the scheduling needs of students who are employed in the daytime, or who have other obligations that require non-traditional schedules.
- As a reflection of the growing interest in collaborative processes to solve public concerns, and the need for mid-level administrators in the judicial system, the PPA Department also offers certificates in Collaborative Governance and Judicial Administration (through the College of Continuing Education).

Career Possibilities
Policy analyst and/or public administrator for state, federal, or local government; private firm or association; or not-for profit organization

PPA 100. Introduction to Public Policy and Administration. 3 Units
Prerequisite(s): GOVT 1 or GOVT 150 or equivalent.
Term Typically Offered: Fall, Spring
Explores context and process for policy making by national and California state governments, including ethical dimensions. Applications are developed from students’ and instructor’s areas of interest including K-12 and higher education, land-use policy, and aging issues such as elder advocacy, Social Security, and Medicaid. Provides background and skills for entry level positions in public or non-profit organizations. Cross Listed: GERO 102; only one may be counted for credit.

PPA 200. Introduction to Public Policy and Administration. 3 Units
Term Typically Offered: Fall, Spring
Examines public policy and administration by exploring major policy processes, particularly in California state and local government. Topics include the emergence and specification of issues, developing and selecting policy options, implementing and administering policies and evaluating and terminating public policies. The course approach is comprehensive, transdisciplinary and human centered – concerned with the interplay of values in shaping policy outcomes. The intent is to provide conceptual frameworks and operational principles required in identifying and resolving issues emerging in public settings.
Note: Satisfies the Graduate Writing Intensive Requirement (GWI).

PPA 205. Research in Public Policy and Administration. 3 Units
Term Typically Offered: Fall, Spring
Emphasizes fundamental research and management skills necessary in generating accurate and useful decision-related information for policy makers. Topics include conceptualizing and structuring research questions, collecting valid and relevant data and interpreting and presenting results. The course approach is pragmatic, transdisciplinary, and oriented to producers and users of policy research information. The intent is to enhance research skills in analyzing and resolving policy issues.

PPA 207. Quantitative Methods in Public Policy and Administration. 3 Units
Prerequisite(s): ECON 1B, PPA 205 or instructor permission.
Term Typically Offered: Fall, Spring
Study of quantitative methods as applied in public policy analysis. Concentrates on interpreting the results of econometric, statistical, and other public policy studies, and on determining the relevance and applicability of quantitative analysis with the larger scheme of public policy decision making.

PPA 210. Political Environment of Policy Making. 3 Units
Prerequisite(s): PPA 200 or instructor permission.
Term Typically Offered: Fall, Spring
Assists students in learning to identify the political factors impinging on the policy process and in learning to cope with them. With special emphasis on the California political environment and issues, employs case studies, structured role-playing, and including politically feasible policy alternatives and advice to hypothetical clients. The goal is to equip students to work effectively as politically aware policy analysts.
PPA 220A. Applied Economic Analysis I. 3 Units
Prerequisite(s): ECON 1B, or instructor permission.
Term Typically Offered: Fall, Spring
Presents the basic concepts, tools, and models of microeconomics in the context of public sector choices. The standard market demand and supply model is developed and used to analyze the effect of public policies (particularly those of California state and local governments) on consumers and businesses. The principles of welfare economics are presented and used to evaluate economic performance.
Note: Graduate Writing Intensive Course.

PPA 220B. Applied Economic Analysis II. 3 Units
Prerequisite(s): PPA 220A.
Term Typically Offered: Fall, Spring
Continuation of PPA 220A which focuses specifically on the role of government in a market-oriented economy with emphasis on market failures including: public goods, externalities, and monopoly. Corrective taxes and expenditure programs are discussed, and the technique of cost-benefit analysis is developed and applied to various state and local government projects.

PPA 230. Public Budgeting and Finance. 3 Units
Term Typically Offered: Fall, Spring
Enables students to understand, analyze, and evaluate the governmental budget process including revenue and expenditure patterns. The primary emphasis is on California state and local governments. The federal budget process is discussed primarily to reflect the impact that it has on state and local governments. Features both theoretical and practical approaches to budgets, including alternate budget formats. Various perspectives are utilized to explore the political, economic, and policy concerns inherent in the development and implementation of public sector budgets.

PPA 240A. Public Management and Administration I. 3 Units
Prerequisite(s): 1) graduate standing and 2) completion of PPA program prerequisites, or instructor permission.
Term Typically Offered: Fall, Spring
Examines concepts and approaches used in analyzing and understanding complex organizations. Organizational theory, management concepts, and behavioral analysis is employed to understand the dynamics and evolution of public sector organizations. Emphasis is placed on applying classic organizational theory and introductory leadership skills and issues.

PPA 240B. Public Management and Administration II. 3 Units
Prerequisite(s): PPA 240A.
Term Typically Offered: Fall, Spring
Continuation of PPA 240A. Examines concepts and approaches used in analyzing and understanding complex organizations. Emphasis is placed on ability to intervene and assist public agencies by designing intervention plans, engaging in strategic planning, promoting interdepartmental effectiveness, using advanced leadership issues and techniques, and using advanced organizational development strategies.

PPA 250. California Land Use Policy. 3 Units
Term Typically Offered: Fall, Spring
Examines public policies that influence land use. Reviews tools of land use planning and development and applies them to issues that dominate California policy choices including urban design, fiscalization of land use, sustained growth, and the challenges of social equity.

PPA 251. Urban Problems, Economics and Public Policy. 3 Units
Prerequisite(s): PPA 220A or ECON 100B.
Corequisite(s): ECON 251; only one of these courses may be counted for credit.
Term Typically Offered: Fall, Spring
Historical development, economics and possible policy solutions of the most pressing problems facing central cities and urban areas in the U.S. are presented. Problems discussed include poverty, crime, urban abandonment/suburban sprawl, edge cities, deteriorating infrastructures, and fiscal stress.
Cross Listed: ECON 251; only one may be counted for credit.

PPA 270. Introduction to Collaborative Policy Making. 3 Units
Prerequisite(s): PPA 200 and PPA 210, or approval of instructor.
Term Typically Offered: Fall, Spring
Examines the theory and practice of collaborative policy making using case studies of major collaborative processes. Topics include interpretative policy analysis, deliberative democracy theory, public participation, collaborative policy networks, the use of dialogue in public policy, resolution of policy controversies, and consensus building.

PPA 272. Collaborative Governance Advanced Practice. 3 Units
Prerequisite(s): PPA 270 with a grade of B- or better, or instructor permission.
Term Typically Offered: Fall, Spring
Practice driven, highly participatory course for professionals who require more advanced skills into collaborative methods. Topics include conflict analysis and assessment, analysis of advocacy speech, public participation, working with the media, and interagency networks. Focuses on active learning with practice in a wide variety of collaborative skills.

PPA 284. Urban Policy. 3 Units
Term Typically Offered: Fall, Spring
Exploration in-depth of the socio-economic problems of urban and metropolitan areas and evaluation of proposed political and governmental solutions.
Cross Listed: GOVT 284; only one may be counted for credit.

PPA 291. Court Governance and Operations. 3 Units
Term Typically Offered: Fall, Spring
Studies the state judiciary as both independent and interdependent with the legislative and executive branches of government at both the state and local level. The goal is to develop foundational knowledge of the historical and evolving governing and operational principles of the California court system.

PPA 292. Court Management. 3 Units
Prerequisite(s): PPA 291 or instructor permission.
Term Typically Offered: Fall, Spring
Provides training in key court administrative areas identified by such organizations as the National Association of Court Management (e.g., case flow management). Drawing from interdisciplinary literature on management theory, court case studies illustrate and provide context.
PPA 293. Court Leadership. 3 Units
Term Typically Offered: Fall, Spring
Examines leadership in the court environment as distinct from management. Investigates how leadership principles are exercised in pivotal areas of the courts such as: community relations, creativity and innovation, organizational change, workforce development, succession planning, strategic planning and re-engineering.

PPA 294. Emerging Issues in Judicial Administration. 3 Units
Term Typically Offered: Fall, Spring
Addresses pressing issues in judicial administration (e.g., courts in an electronic world, rising administrative workloads, greater number of self-represented litigants). Specific topics may change from year to year depending on the urgency of topics and nature of policy implications.

PPA 295. Internship in Public Policy and Administration. 3 - 6 Units
Prerequisite(s): PPA 200.
Term Typically Offered: Fall, Spring
Supervised work experience in a government or related organization. Credit/No Credit

PPA 297A. Executive Fellows Introductory Seminar. 3 Units
Prerequisite(s): PPA 297A
Term Typically Offered: Fall, Spring
Seminar will enhance Executive Fellows’ understanding of the state policy making and administrative process, policy implementation, ethical responsibilities of policy and administrative actors.
Note: Open only to students admitted to the Executive Fellowship Program.

PPA 297B. Executive Fellows Policy Seminar. 3 Units
Prerequisite(s): PPA 297A
Term Typically Offered: Fall, Spring
Seminar will extend the examination and analysis of the Executive branch of government to include alternative administrative practices, policy implementation strategies, and related administrative issues.
Note: Open only to students admitted to the Executive Fellowship Program.

PPA 298A. Judicial Administration Fellows Introductory Seminar. 3 Units
Term Typically Offered: Fall, Spring
Critical examination and analysis of the administrative operation of the California judicial system and its structures, policies and practices.
Note: Open only to students admitted to the Judicial Administration Fellows Program.

PPA 298B. Judicial Administration Fellows Policy Seminar. 3 Units
Term Typically Offered: Fall, Spring
Analyzes procedural issues and policy questions within the California judicial system with emphasis on the interdependence of the judicial, legislative and executive branches.
Note: Open only to students admitted to the Judicial Administration Fellows Program.

PPA 299. Special Problems. 1 - 3 Units
Prerequisite(s): Permission of faculty supervisor and the Department Chair.
Term Typically Offered: Fall, Spring
Supervised independent study in public policy and administration. Credit/No Credit

PPA 500. Culminating Experience. 3 Units
Prerequisite(s): Advanced to candidacy and permission of the graduate coordinator.
Term Typically Offered: Fall, Spring
Completion of a thesis or project approved for the Master’s degree.

Certificate in Applied Policy and Government

Units required for Certificate: 6

Program Description
The Capital Campus’s graduate programs in Public Policy and Administration prepare future leaders to address the complex issues that face California. We serve the State and the region by developing leaders with strong analytical tools and a deep commitment to public service.

Admission Requirements
Acceptance to one of the four Capital Fellows Programs: Assembly, Judicial Administration, Executive, or Senate.

Master of Public Policy and Administration

Total units required for MPPA: 36-39

Program Description

The Capital Campus’s graduate programs in Public Policy and Administration prepare future leaders to address the complex issues that face California. We serve the State and the region by developing leaders with strong analytical tools and a deep commitment to public service.

Admission Requirements

Admission to classified standing in the program requires:

• the baccalaureate degree;
• a GPA of 3.0 for all undergraduate coursework and in the last 60 units;
• results of the Graduate Record Examination (GRE) General Test;
• completion of the following (or their equivalents at other colleges or universities as determined by the Department Chair):

<table>
<thead>
<tr>

• a written statement of purpose from one to two pages in length (typewritten), addressing the applicant’s purpose in pursuing the Master of Public Policy and Administration;
• a minimum score of 560 (220 if computer-based, 83 if internet based) on the TOEFL (this requirement applies only to students earning degrees abroad whose primary language is not English); and
• three letters of recommendation from individuals with knowledge of the applicant’s academic and professional potential.

A student with certain deficiencies in the above requirements may be admitted to the program on a conditionally classified status. Admission conditions will be determined on an individual basis.

Admission Procedures

All prospective students must file the following with the Office of Graduate Studies:

• an online application for admission;
• two sets of official transcripts from all colleges and universities attended, other than Sacramento State; and
• GRE scores.

For more admissions information and application deadlines please visit http://www.csus.edu/gradstudies/.

The items below should be submitted to the Department office:

• written statement of purpose;
• letters of recommendation;
• program application; and
• TOEFL score, if applicable.

Minimum Units and Grade Requirement for the Degree

Units required for the MPPA: 36-39

Minimum Cumulative GPA: 3.0 with no grade lower than a "B-" in all required courses (and "credit" for PPA 295 and PPA 500).

Advancement to Candidacy

Students must file an application for Advancement to Candidacy listing their program of graduate study. The filing procedure should begin as soon as the student has:

• removed any deficiencies in admission requirements;
• completed at least five of the program’s required courses (except PPA 295) with a minimum grade of "B-" in each and a cumulative grade point average of at least 3.0; and

Total Units 39

1 At the discretion of the Department Chair, PPA 295 may be waived for students with one year of administrative and analytical experience in a full-time professional capacity in the field of Public Policy and Administration.

2 PPA graduate students are required to take 6 units of elective courses. Ordinarily at least 3 of these units should be chosen from among the graduate level elective courses offered by the Department of Public Policy and Administration. As appropriate, the requirement to take at least 3 units within PPA may be waived with the approval of the student’s academic advisor and the Department Chair. Additionally, the Department has offered experimental PPA 296 electives in the past, and will continue to do so.

3 Enrollment in PPA 500 is required of students in their last semester of enrollment in the program. Each student will undertake a project or thesis dealing with a policy or administrative issue and complete a significant written work detailing the problem or issue examined, sources of information used in analyzing the issue, and project findings and conclusions.

Social Science

College of Social Sciences and Interdisciplinary Studies

Program Description

The Social Science major is offered by the departments of Anthropology, Economics, Ethnic Studies, Geography, Government, History, and Sociology. It serves both as a major for the Bachelor of Arts degree and to provide subject matter preparation for the Single Subject Teaching Credential in Social Science.

To qualify for a teaching credential, candidates must also complete an approved Professional Education Program and other requirements as specified by the California Commission on Teacher Credentialing. California faces a shortage of qualified teachers. Over the next decade we will need to find 300,000 people to take on the challenging but rewarding job of teaching in California schools.

Since the Social Science program involves work in several departments, and since special rules on overlap with General Education apply to this program, advising is essential to the efficient completion of the program.

Note: On June 1, 2006, the California Commission on Teacher Credentialing approved the program of subject matter preparation for the Single Subject Teaching credential in Social Science submitted by California State University, Sacramento.

Anyone working on the Social Science program in this and in earlier catalogs (1994-1996 or earlier) should be aware of the following: as long as one retains catalog rights, the earlier Social Science program may still be completed for a degree. However, older programs no longer meet subject matter requirements for a Social Science Credential. Consult the Social Science advisor for details.

Special Features

- Although the aim of the Social Science program is directed toward the teacher credential, the program also provides an opportunity for students to build on the foundation of their general education and become familiar with several areas in the Social Sciences. A Social Science major is excellent background for advanced graduate studies and in professional careers. Non-credential students need not complete the professional education program, and elective courses are available to complete the 120-unit Bachelor of Arts degree.
- Through the Social Science major, graduates also earn a 24 unit minor in History. Formal submission of a Minor Degree Application is required.
- Graduates of the Social Science program have distinguished leadership careers in government, politics, business, K-12, education, higher education administration, law, law enforcement, counseling, community service, and military service. Several Social Science majors (including two former mayors of Sacramento) are inductees into the College of Social Science and Interdisciplinary Studies Academy of Distinction and Honor.
- The Social Science program works closely with the Career Center on campus to provide proactive and comprehensive career services to students through: career development, experiential learning, on-campus recruitment, and employer relations.

Career Possibilities

Middle School or High School Teacher of Civics, Economics, Geography, and History · Politics · Government and Civil Service · Lobbyist · Pre-
Law Attorney · Law Enforcement · Business · Public Relations · Human Relations/Personnel Specialist · Journalist · Military Service · Community Service · Graduate School

SSCI 193. Integrating History and Social Science. 3 Units
Prerequisite(s): Instructor permission.
Term Typically Offered: Spring only

Capstone seminar that serves as a bridge between academic preparation and entry into a professional teacher credential program. Students will examine social science-history in the State curriculum framework, reflect on subject matter preparation, focus on middle and high school social science teaching and learning, investigate and evaluate resources pertinent to instruction, and explore current issues in education.

SSCI 199. Special Problems. 1 - 3 Units
Prerequisite(s): Approval of instructor or Department chair.
Term Typically Offered: Fall, Spring

Individual projects or directed reading. Requires permission of instructor and department chair.
Credit/No Credit

BA in Social Science

Units required for Major: 60
Units required for Subject Matter Program: 69

Program Description

The Social Science major is offered by the departments of Anthropology, Economics, Ethnic Studies, Geography, Government, History, and Sociology. It serves both as a major for the Bachelor of Arts degree and to provide subject matter preparation for the Single Subject Teaching Credential in Social Science.

Minimum Grade Requirement

Minimum grade of "C-" is required in all courses completed toward the Social Science major and pre-credential requirements.

Total Units 69

1 In addition to the core curriculum for the major, the courses listed are required for students completing the Subject Matter Program in Social Science as preparation for a Single Subject Teaching Credential.

**Sociology**

*College of Social Sciences and Interdisciplinary Studies*

**Program Description**

Sociology is the group-level analysis of social lives of people, groups, and societies. A sociological perspective helps students understand the relationship between individuals and society, appreciate the meaning about the social world, and become aware of ways to achieve desired collective ends.

Sociology faculty have expertise in the following areas: family and marriage, gender study, social psychology, migration and immigration, ethnic and race relations, inequalities, human sexuality, environment, sports, popular culture, political sociology, medical sociology, sociology of education, and crime and deviance.

Sociology graduates are hired by community-based organizations, government agencies, hospital and healthcare organizations, social services departments, the criminal justice system, school systems, private businesses, and research firms.

**Degree Programs**

Minor in Sociology (p. 930)

BA in Sociology (p. 929)

MA in Sociology (p. 929)

**Special Features**

- Sociology students are encouraged to become involved in the internship program. Though it is not mandatory, internships provide an excellent way to explore the real world of sociology outside of the classroom.
The Sociology Club’s mission is to promote the professional, intellectual, and personal growth of our student members. Alpha Kappa Delta (AKD) is an international honor society for Sociology majors.

- Majors learn statistical analysis of social data, computer processing of data and the SPSS computer program. Students are encouraged to learn several computer languages and the use of census data for social and regional planning. Student research projects may be selected for presentation in programs throughout the state.
- Thematic areas of studies include ethnic and race relation, immigration, crime and deviance, social inequality, socialization and interaction, globalization, and social change.

### Career Possibilities

Public Health Statistician · Demographer · Recreational Specialist · Social Worker · Urban Planner · Correctional Counselor · Youth Counselor · Criminologist · Social Ecologist · Public Relations Consultant · Interviewer/Researcher · Statistician · Population Analyst · Public Opinion Analyst · Migration Specialist · Parole/Probation Officer · Employment Counselor · Teacher · Writer/Journalist · Management Analyst · Budget Analyst · Government Research Analyst

### Course Descriptions

#### SOC 1. Principles of Sociology. 3 Units

**General Education Area/Graduation Requirement:** GE AREA D

**Term Typically Offered:** Fall, Spring

Introduction to the field of sociology; its basic concepts and principles; the analysis and explanation of culture, personality, social institutions, social change, population, social processes and collective behavior.

#### SOC 3. Social Problems. 3 Units

**General Education Area/Graduation Requirement:** GE AREA D

**Term Typically Offered:** Fall, Spring

Introduction to major social problems in the U.S., with an emphasis on systemic problems, such as economic, racism and sexism. Problems in major social institutions such as the family, social services, criminal justice and the environment are also addressed.

#### SOC 5. Exploring Issues Facing Contemporary Families. 3 Units

**Term Typically Offered:** Fall, Spring

An exploration of social issues that contemporary families face every day with an integration of the life course perspective and sociopsychological viewpoint. Issues covered may include varying family constellations, mate selection, intimacy, communication, adjustment, cohesion, attachment, aging, foster care and adoption, gender, race/ethnic/cultural influences, social stratification, family/partner violence, health, and social policy.

#### SOC 8. Sense and Nonsense in Social Issues and Research. 3 Units

**General Education Area/Graduation Requirement:** Critical Thinking (A3)

**Term Typically Offered:** Fall, Spring

Introduces basic steps in the research process and/or basic steps in critically evaluating discussions on social issues. Students are taught to recognize common errors through the analysis of non-technical applied research and/or through newspapers and sociological articles about social issues and problems. Emphasizes the logical steps involved in thinking critically about social research and/or social problems such as quality of operational definitions, weaknesses in research design, sampling errors, value assumptions, logical consistency between premises and conclusions, and the structure of arguments.

#### SOC 10. Issues in Crime and Social Control. 3 Units

**General Education Area/Graduation Requirement:** GE AREA D

**Term Typically Offered:** Fall, Spring

Introduces the concepts utilized by sociologists in the analysis of controversial issues in crime and social control, e.g., norms, roles, subcultures, labeling, social conflict, social stratification, racism, sexism, etc. Particular attention is paid to sources of data and trends over time. Issues covered include, but are not limited to: capital punishment, drugs and drug policy, domestic violence, abortion, driving under the influence, police use of deadly force, private prisons and juvenile justice reform.
SOC 101.  Introduction to Statistics for Sociologists.  4 Units
Prerequisite(s): Sociology majors only
Term Typically Offered: Fall, Spring, Summer

Provides students with an overall view of the role and techniques of statistics in the presentation and interpretation of social science data. Lectures emphasize descriptive statistics: measures of central tendency and variability, and association and correlation. Introduction is given to statistical inference: sampling distributions, hypothesis-testing, and estimation. Lab sessions provide demonstrations and training in the practical application of concepts and techniques dealt with in lectures. Students learn to use the computer as an aid in data processing and analysis.

SOC 102.  Research Methods in Sociology.  4 Units
Prerequisite(s): SOC 101; Sociology majors only
Term Typically Offered: Fall, Spring, Summer

Students will be introduced to the basic steps in research; problem definition, research design, sampling, data collection methods, and analysis. Laboratory exercises reinforce methodological processes, including finding and evaluating existing research studies, operationalizing concepts, developing questionnaires, and analyzing primary data. Students will learn how to process and analyze both qualitative and quantitative data, including analytic induction, manipulation of computerized data files, bivariate and multivariate analysis, table construction, and preparation of written research reports. Lab exercises reinforce computer and statistical skills.

SOC 103.  Advanced Sociological Analysis.  3 Units
Prerequisite(s): SOC 101 and SOC 102
Term Typically Offered: Fall, Spring

An advanced course in research design and analysis. Introduces students to advanced data analysis techniques and how to use them to investigate social problems and issues. Students will build on the knowledge they have accumulated in previous courses in sociological research methods and theory to design and complete a research project. Specific methodological strategies taught will vary, and could include regression analysis, ethnography, comparative-historical methods, qualitative interviewing, evaluation research and longitudinal survey analysis.

Note: May be repeated for credit

SOC 106.  Births, Deaths and Borders.  3 Units
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall, Spring

Studies population including growth and decline, fertility and mortality trends, migration, human ecology, and the interrelationship of population and socioeconomic change.

SOC 110.  Urban Life and Problems.  3 Units
Term Typically Offered: Fall, Spring

Takes a political economic approach to urban development, with special emphasis on the roles played by various social groups and institutions. Particular attention is given to the effects of urban growth, oppositional movements to growth and the global developments that affect urban conditions.

SOC 118.  Chicano Community.  3 Units
General Education Area/Graduation Requirement: Race & Ethnicity Graduation Requirement (RE), GE AREA D
Term Typically Offered: Fall, Spring

Analyzes the institutions, norms, values, and traditions of the Chicano community. Included is an examination of the Chicano community’s progress in mainstream American life with attention to the effect of ethnocentrism, racism and class.

SOC 120.  Ethnic and Race Relations.  3 Units
General Education Area/Graduation Requirement: GE AREA D, Race & Ethnicity Graduation Requirement (RE)
Term Typically Offered: Fall, Spring

Analyzes relations among various racial, religious, nationality, and gender groups as they interact with racism, ethnocentrism and class in the U.S. and the world.

SOC 122.  Immigration Studies.  3 Units
Term Typically Offered: Fall, Spring

Examines the social phenomena of labor migration, immigration, and transnationalism, and places their origins and development in the context of political-economic national inequalities. Advances an understanding of why societies experience migration, immigration, and transnationalism, and evaluates competing and complementary theoretical frameworks explaining these migratory processes, particularly as they relate to the U.S. Special attention will be given to race, gender, and class relations as impacted by labor migration processes.

SOC 123.  Black Studies in Sociology.  3 Units
Term Typically Offered: Fall, Spring

Introduces students to the sociological analysis of Black American life in the U.S. – the complex phenomena of Black issues, emerging theories of race, and the cumulative scholarship on black identity, experience, socio-economic status, and social organization. Focus is on the original contributions of social scientists to Black Studies in Sociology.

SOC 124.  Social Justice in Interdisciplinary Perspective.  3 Units
Prerequisite(s): Sophomore standing or instructor permission
Term Typically Offered: Fall, Spring

Examines the nature and forms of social justice and injustice. Key philosophical and theoretical models and debates over the meaning of social justice, using historical and contemporary examples to highlight important concepts and controversies are addressed. Faculty from different departments within SSIS, and occasionally from other colleges, will address how their discipline understands and analyzes issues of social justice. Students will be encouraged to critically assess the assumptions of various perspectives on social justice, and to address the relationship of academe and social activism in achieving social justice. Cross listed as ANTH 130, ID 124, ENVS 124, ETHN 124 and FACS 124. Only one may be counted for credit.

SOC 125.  Social Inequalities.  3 Units
Prerequisite(s): SOC 1 or equivalent.
Term Typically Offered: Fall, Spring

Examination of the ways race, class and gender, as well as the intersection of all three, affect the distribution of valued resources in a society. Other social inequalities such as age, sexual orientation, or nationality, etc. may also be examined. Attention is given to struggles to change or preserve economic and political inequalities.
SOC 126. Sociology of Gender. 3 Units
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall, Spring

Examines how gender designation of "male" and "female" impacts an individual's life; explores the social construction of masculinity and femininity in the family, school, workplace, everyday interactions, and within racialized and colonized societies; studies the consequences of gender difference and inequality that result in violence and abuse, sexual harassment, hate crimes, wage differentials and unequal opportunities.

SOC 127. Men, Masculinity and Society. 3 Units
General Education Area/Graduation Requirement: Understanding Personal Development (E)
Term Typically Offered: Fall, Spring

Introduces students to the field of men and masculinity. Examines the construction of masculinity in sports, family, work and other social relationships, showing how it affects and is affected by people, institutions and society. Explores the diverse experiences based on race, class, occupation, physical ability and sexuality, and the implications for people from such diverse groups.

SOC 128. Sociology Of Sexuality. 3 Units
Prerequisite(s): SOC 1 or instructor permission.
Term Typically Offered: Fall, Spring

Studies sexuality including historical and cultural differences in sexual attitudes, beliefs and behaviors. Also examines the mutual influence of sexuality and social institutions, such as the family, the economy, politics and religion.

SOC 130. Political Sociology. 3 Units
Prerequisite(s): SOC 1 or equivalent.
Term Typically Offered: Fall, Spring

Analyzes political order and change from the viewpoint of cultural values and the institutional structure of societies. Examines group behavior patterns related to ideology, elites, masses, classes, movements, parties, and other power groups. Surveys differing theories and methodologies for the study of political processes across cultures and societies.

SOC 133. Sport in a Global Perspective. 3 Units
Prerequisite(s): GWAR certification before Fall 09; or WPJ score of 80+; or 3-unit placement in ENGL 109M or ENGL 109W; or 4-unit placement in ENGL 109M or ENGL 109W and co-enrollment in ENGL 109X; or WPJ score 70 or 71 and co-enrollment in ENGL 109X.
General Education Area/Graduation Requirement: Writing Intensive Graduation Requirement (W)
Term Typically Offered: Fall, Spring

Examines sport in a global context, focusing on the dynamic nature of sports in response to changes in society. Addresses the effect sport has on both the society and the individual, from socialization to nationalism. Focuses on both participants (youth, amateurs, professionals) and spectators (parents, fans, etc.) at all levels of involvement, from community to international competition. Highlights cross-cultural differences in the relationships between sport and other social institutions such as government, corporations, and the media.

SOC 134. Sociology of Film. 3 Units
Term Typically Offered: Fall, Spring

Introduces the "Sociological Imagination" by linking the personal histories found in films to larger social structures. The evolution of important contemporary global and domestic social issues is discussed by analyzing the sociological content of major motion pictures. The sociohistorical development of the American film industry is also examined to explore its ideological role in challenging and perpetuating various forms of class, race, and gender discrimination.

SOC 135. Sociology of Popular Culture. 3 Units
General Education Area/Graduation Requirement: Humanities (Area C2)
Term Typically Offered: Fall, Spring

Analyzes social processes that produce popular culture by contrasting interrelationships between institutional power structures and collective behavior. Examines theories of popular culture, mass movements, and individualism; social change, cultural hegemony, subcultures, and organizational studies.

SOC 136. Social Movements. 3 Units
Prerequisite(s): SOC 1 or instructor permission.
Term Typically Offered: Fall, Spring

Analyzes old and new social movements – pre-political and political, cultural and identity types – class, labor, feminist, ethnic, environmental, left and right. Challenges by movements to institutional order. Surveys differing theories and methodologies for the study of movements and degree of change (reform, revolutionary) across cultures and societies.

SOC 137. Sociology of Science. 3 Units
Term Typically Offered: Fall, Spring

Examines paradigm changes of science in society and how views of science and technology are socially constructed. Analyzes the representations of scientists, scientific inquiry, and technological innovation. Explores the ways in which science has driven social change, and vice-versa.

SOC 138. Environmental Sociology. 3 Units
Term Typically Offered: Fall, Spring

Studies human society, the natural environment, and their mutual interactions. Examines environmental sociology at several levels, from the micro level of individual communities to the meso level of government policies to macro theoretical considerations. Analysis of environmental issues in a global context also included.

SOC 139. Animals in Society. 3 Units
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall, Spring

Examines social relationships between humans and animals as pets, companions, workers, entertainers, and food. Analyzes the representations of animals. Studies our relationships with animals both on the level of social groups and as individuals. Applies sociological approaches to the study of human-animal relationships, including the social movements around animal rights.
SOC 140. Sociology of Education. 3 Units
Prerequisite(s): SOC 1 or equivalent.
Term Typically Offered: Fall, Spring
Examines the organization and functions of educational institutions; the rise of mass education and changes in educational systems to the present; the role of teachers, parents, and schools in education; the impact of gender, race, and class on educational outcomes and processes.

SOC 144. Sociology of Health and Illness. 3 Units
Prerequisite(s): SOC 1 or instructor permission.
Term Typically Offered: Fall, Spring
Examines the social contexts of health, illness, and medical care. Emphasizes the debates and contrasting perspectives that characterize the sociological study of health and illness. Topics include the social, global, environmental, and occupational factors influencing health and illness; the politics surrounding physical and mental illness; the patient’s perspective on illness; ethical issues in medicine as they relate to medical technology; and health care reform. The influence of health status on identity and interaction will also be addressed.

SOC 146. Sociology of Aging. 3 Units
Term Typically Offered: Fall, Spring
Analyses the process of aging in the context of social structure and processes. Specifically, it deals with such issues as the age structure of society, social values and norms that define the aged, social stratification and aging, social institutions and the aged, theoretical and methodological issues in social gerontology.

SOC 150. Social Psychology. 3 Units
Term Typically Offered: Fall, Spring
Examines major principles governing face to face interaction and their application in understanding the student’s own experience: creating and preserving meaning, “realities” and selves through dramaturgy, negotiation and power; the relationship between status and intimacy; the impact of status resources (such as race and gender) on the status assignment process; the self concept; the role of emotions in social life.

SOC 155. Criminology. 3 Units
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall, Spring
Examines social dimensions – causes and characteristics – of adult crime and deviant behavior in American society. Makes some international comparisons. Police, courts and prisons are examined. Special attention is given to current issues in crime and deviance.

SOC 156. Delinquency. 3 Units
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall, Spring
Examines social determinants of juvenile delinquency, including family, urban conditions, social-psychological and sociological factors. Analyzes the juvenile justice system, including law enforcement, the courts and community treatment programs.

SOC 157. Issues in Courts and Prisons. 3 Units
Term Typically Offered: Fall, Spring
Sociologically analyzes American courts and prisons from prosecutorial intake through sentencing and incarceration. Emphasis is on the role of social factors (in particular race, class and gender) in decision-making practices at each stage of processing. Topics will include, but are not limited to: preventive detention, prosecutorial intake, plea-bargaining, jury selection, pre-sentence investigation reports, sentencing, and legal reconstruction of the American prison in the modern era.

SOC 158. Sociology of Deviance. 3 Units
General Education Area/Graduation Requirement: Understanding Personal Development (E)
Term Typically Offered: Fall, Spring
Introduces students to the history of attempts to define and explain deviant behavior; explains social conditions and processes associated with careers of deviants; examines relationship of deviance to problems of social control.

SOC 160. Asian Societies. 3 Units
General Education Area/Graduation Requirement: Humanities (Area C2)
Term Typically Offered: Fall, Spring
Cross-cultural study focuses on Japanese and Chinese societies and cultures and their influences on other Asian developments. Emphasizes their distinctive institutions, norms, values, and traditions in relation to contemporary social, economic, and political processes.

SOC 163. Conflict, Oil and Development in the Middle East. 3 Units
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall, Spring
Examines in detail the major sources of conflict in the Middle East with special reference to the Arab-Israeli conflict, the arms buildup in the Arabian-Persian Gulf, energy crisis and the multi-national aspect of Middle East oil. Attempts to discuss the impact of these conflicts on the processes of social and economic development.

SOC 164. Sociology of Globalization. 3 Units
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall, Spring
Examines globalization and its effect on local societies, including the impact of globalization on local labor and work practices, the social organization of local firms and business enterprises, local social structures such as gender, class, race/ethnicity, and local social patterns such as consumption and leisure activities.

SOC 166. The Family. 3 Units
Term Typically Offered: Fall, Spring
Introduces students to the sociology of the family including an examination of the family in various cultures with the emphasis on the American family in all its many forms.
SOC 168. Self and Society. 3 Units
Prerequisite(s): GWAR certification before Fall 09; or WPJ score of 80+; or 3-unit placement in ENGL 109M or ENGL 109W; or 4-unit placement in ENGL 109M or ENGL 109W and co-enrollment in ENGL 109X; or WPJ score 70 or 71 and co-enrollment in ENGL 109X.

General Education Area/Graduation Requirement: Writing Intensive Graduation Requirement (WI), Understanding Personal Development (E)

Term Typically Offered: Fall, Spring

Examines the relationship between the individual and society: social interaction, human development, behavior in groups and collectivities, personality and social structure. Theories and empirical studies.

SOC 169. Changing American Family. 3 Units
Term Typically Offered: Spring only

Analyzes the American family, past, present, and future, focusing on explanation and consequences of changes in child-bearing, courtship, marriage, and the interrelationships between the individual and the family and society. Focuses on connecting course material to real world organizations and programs in the community that are associated with or linked to families. Per week: lecture two hours; fieldwork in the community two to three hours.

SOC 170. Sociology of Children and Adolescents. 3 Units
Term Typically Offered: Fall, Spring

Introduces students to the sociology of childhood and adolescence, focusing on theoretical foundations, methodological challenges, and empirical examination of youth from preschool through high school. Focuses on peer relations within wider contexts shaped by gender, race, and social class.

SOC 171. Sociology of Religion. 3 Units
Term Typically Offered: Fall, Spring

Acquaints students with the sociological foundations of religion in society. Emphasis is on the history, development and overall structure of the institution of religion, its relation to social, ethnic and class-based groups and its effect on society in general, and how its social development in America differs from other cultures.

SOC 175. Work and Occupations. 3 Units
Term Typically Offered: Fall, Spring

Examines the social organization of work and economic organization; the rise of industrial society and changes in workplace relations to the present; the role of technology and ideology in the workplace; industrial reforms and alternative forms of economic organization.

SOC 176. Labor and the American Social Structure. 3 Units
Prerequisite(s): GWAR certification before Fall 09; or WPJ score of 80+; or 3-unit placement in ENGL 109M or ENGL 109W; or 4-unit placement in ENGL 109M or ENGL 109W and co-enrollment in ENGL 109X; or WPJ score 70 or 71 and co-enrollment in ENGL 109X.

General Education Area/Graduation Requirement: Writing Intensive Graduation Requirement (WI), GE AREA D

Term Typically Offered: Fall, Spring

Introduction to the study of labor in the U.S., including the nature of work, characteristics of the work force, and an overview of contemporary labor and industrial relations systems within the framework of current U.S. economic and political developments.

Cross Listed: LBRS 100; only one may be counted for credit.

SOC 185. Bullying as a Social Experience. 3 Units
Term Typically Offered: Fall, Spring

This course educates students on bullying as a social experience, introducing how social forces, environment and context impact the culture of bullying. Students will develop an understanding about how programs and policies impact bullying rates based on social theoretical perspective. Students will gain a better understanding of how research is related to intervention and prevention practices. Then, from a whole school approach, using the resources available to the school, students will implement different components of an anti-bullying program at a school site.

SOC 190. Sociology of Small Groups. 3 Units
Prerequisite(s): SOC 1 or equivalent.

Term Typically Offered: Fall, Spring

Examines social structure and social determinants of behavior in small groups; socialization, social control, social change, leadership, social ranking, social conflict and morale.

SOC 192. Sociological Theory. 3 Units
Prerequisite(s): SOC 1.

Term Typically Offered: Fall, Spring

Surveys the history of sociological theory from Comte to the present.

SOC 193A. Mentoring in Sociology. 1 Unit
Prerequisite(s): Instructor permission.

Term Typically Offered: Fall, Spring

Provides opportunity for freshman, sophomores, and juniors majoring in sociology to be mentored for improved student success and retention. Students receive peer mentoring to facilitate closer integration into campus community through participation in events, organizations, and conferences sponsored by the sociology department. Students learn how to build productive relationships with professors and receive timely advising for better retention and success rates. Course does not count toward sociology major but toward degree requirements.

Note: May be repeated twice for credit; Three times with exception as determined by the instructor.

Credit/No Credit

SOC 193B. Peer Mentoring in Sociology. 2 Units
Prerequisite(s): One year of residency at Sac State; 2.8 GPA required; Open only to Sociology majors.

Term Typically Offered: Fall, Spring

Provides opportunities for junior and senior sociology majors to mentor and gain practical out-of-class experience. Students learn the principles of mentoring and contribute to student retention and success and close the retention gap. Course provides practical orientation and guidance for the best practices in mentoring that contribute to a positive campus culture.

Note: May be repeated twice for credit; Three times with exception as determined by the instructor.

Credit/No Credit
SOC 194. Special Topics in Sociology. 3 Units
Prerequisite(s): SOC 1 or instructor permission.
Term Typically Offered: Fall, Spring

Examines contemporary issues and social developments within the research specialization of department faculty. Provides a forum to discuss and evaluate controversies and advancements in the discipline of sociology, including theory and methodology.

SOC 195. Internship and Fieldwork. 1 - 3 Units
Prerequisite(s): Instructor permission.
Term Typically Offered: Fall, Spring

Supervised internship and fieldwork experience in a variety of settings: (1) public or private agencies in the Sacramento community, and (2) ethnic and/or minority communities. Supervision is provided by authorized persons in the field and collaborative supervision is provided by sociology faculty at Sacramento State. Limitations: sociology majors electing a concentration may count a maximum of 3 units in 195 and/or 199 toward the major. Those taking the general sociology pattern may count up to 6 units of 195 and/or 199 toward the major. Sociology minors may take up to 3 units. (See SOC 199 below.)
Credit/No Credit

SOC 198. Linking Statistics Education and Practice. 1 - 2 Units
Prerequisite(s): SOC 101 and instructor permission.
Term Typically Offered: Fall, Spring

Advanced exploration of the scholarship of learning as applied to sociological methods and/or data analysis. Students will work independently on an applied semester project, but will also attend agreed upon number of computer lab hours each week and engage in course activities with a focus on how to best structure learning opportunities and apply content.
Note: Admission requires approval of professor and Department Chair. No more than 3 units from SOC 195, SOC 198, or SOC 199 combined may be applied to the Sociology upper division major requirement.

SOC 199. Individual Study Projects. 1 - 3 Units
Term Typically Offered: Fall, Spring

Individual projects or directed reading; open only to students who appear competent to carry on individual work. Admission requires approval of the sponsor of the project and the Department Chair. Limitations: sociology majors electing a concentration may count a maximum of 3 units in 195 and/or 199 toward the major. Those taking the general sociology pattern may count up to 6 units of 195 and/or 199 toward the major. Sociology minors may take up to 3 units. (See SOC 199 above.)
Credit/No Credit

SOC 200A. Orientation to Graduate Studies in Sociology. 1 Unit
Prerequisite(s): Classified graduate status.
Term Typically Offered: Fall, Spring

Describes our graduate program, clearly explains our requirements and standards for successful completion of the M.A., shows students how the profession works and how to work in the profession (public submissions, conference presentations, job searches), and explains how to get through the program in a timely manner with a strong thesis. We will discuss Ph.D. programs and the application process, job opportunities and the role of professional sociologists outside academe.

SOC 200B. Thesis Prospectus/Project Preparation Seminar. 2 Units
Prerequisite(s): Completion of a minimum of 6 hours of graduate study. Completion of (or concurrent enrollment in) SOC 214 is recommended.
Term Typically Offered: Fall, Spring

Provides students with faculty and peer support for the process of developing a draft of a thesis prospectus or project proposal. This includes the clarification of expectations, familiarization with research resources, and support provided through feedback in a structured environment.
Credit/No Credit

SOC 210. Urban Sociology. 3 Units
Prerequisite(s): Classified graduate status.
Term Typically Offered: Fall, Spring

Critically examines major theories, research, and debates in the field of urban sociology, including social ecology, Marxist, subcultural, and postmodernist perspectives. Course materials will be framed within two main themes: the dynamics of cooperation and conflict under urban conditions, and the tension between private interests and public life in urban settings. Methodological emphasis will be on case studies, ethnographic, and social historical analysis.

SOC 214. Research Methods. 3 Units
Term Typically Offered: Fall, Spring

Deals specifically with such issues as the role of research within the discipline, the ethics of conducting research, the rationale behind field and survey methods, the validity and reliability of data collected through these methods and alternative approaches to data collection.
Note: Open to classified graduate students in sociology, all others by instructor permission only; Graduate Writing Intensive

SOC 215. Data Analysis. 3 Units
Prerequisite(s): SOC 101 or equivalent, or instructor permission.
Term Typically Offered: Fall, Spring

Introduces techniques used to analyze sociological data. Emphasis will be placed on the basic concepts of quantitative models used to explore causality, along with an introduction to software to carry out multivariate analysis. Qualitative analytical techniques and software will also be introduced.

SOC 220. Seminar: Social Change. 3 Units
Prerequisite(s): Classified graduate status in sociology; all others by instructor permission only.
Term Typically Offered: Fall, Spring

Course deals with main theoretical orientations in sociology representing radical, liberal and conservative viewpoints on social change. Examines the historical context of events that affected Western countries such as the Industrial Revolution, French Revolution, and the emergence of nationalism and human rights. Course approach is theoretical, historical and global.

SOC 225. Social Stratification. 3 Units
Prerequisite(s): Classified graduate status in sociology; all others by instructor permission only.
Term Typically Offered: Fall, Spring

Analyzes contemporary issues in stratification literature including class, status, power, sex/gender, identity, ethnicity, mobility, equality/inequality. Discusses differing theories, methodologies, and controversies according to student interests.
SOC 226. Sociology of Gender. 3 Units
Term Typically Offered: Fall, Spring

Intended to introduce graduate students to diverse theories that explain gender relations in contemporary society. Provides a critical perspective on how we construct men's and women's identities and how the consequences of such a construction affect institutions, culture and society. Broken up in four sections: origins of gender inequality and issues surrounding research, theoretical perspectives, marginalized groups, and gendered issues in society.

SOC 230. Seminar: Social Organization. 3 Units
Prerequisite(s): Classified graduate status or instructor permission.
Term Typically Offered: Fall, Spring

Analyzes and critiques institutional structure. Studies shared understanding in groups, corporations, communities, institutions or societies and their hierarchical order.

SOC 235. Social Psychology. 3 Units
Prerequisite(s): Open to classified graduate students in sociology, all others by instructor permission only.
Term Typically Offered: Fall, Spring

Examines advanced social psychology. Focuses on symbolic interactionism, ethnomethodology and other recent developments in sociological social psychology, phenomenology, humanistic social psychology and critical reflective sociology.

SOC 238. Environmental Sociology. 3 Units
Term Typically Offered: Fall, Spring

Examines the complex relationship between human society and its surrounding environment. Theoretical perspectives are complemented by empirical research on environmental issues. Special attention is given to issues relating to the local and regional California environment. Analyzes environmental issues in a global context.

SOC 240. Seminar: Sociological Theory. 3 Units
Prerequisite(s): Classified graduate status in sociology; all others by instructor permission only.
Term Typically Offered: Fall, Spring

Analyzes and critiques terms and issues in social and sociological theory including levels of social reality and differing perspectives - positivism, idealism, realism, post-modernism, feminism, etc.

SOC 255. Social Research in Crime and Deviance. 3 Units
Term Typically Offered: Fall, Spring

Comprehensively reviews and evaluates major sociological theories of crime and deviance, methods of studying crime and deviance, current empirical research in crime and deviance, empirical testing of sociological explanations of crime and deviance, and empirical evaluation of crime and deviance control policy.

SOC 260. Contemporary Issues of the Middle East and North Africa. 3 Units
Term Typically Offered: Fall, Spring

Discusses in-depth several contemporary issues such as the political dimension of Islam, population growth and food security, oil and development, regional conflict, national integration and forces of modernization, etc. The selection of the topics will depend on current events.

SOC 265. Race and Ethnic Relations. 3 Units
Term Typically Offered: Fall, Spring

Examines the social constructs of race and ethnicity as "central organizing principles" in the making and development of our modern world, particularly in the U.S., and how they have interacted with class and gender to create and maintain cultural and material social inequalities. Evaluates competing and complementary theoretical frameworks explaining how race and ethnicity affect individual and group social-structural location (e.g., class position, educational attainment, and political power).

SOC 266. Sociology of The Family. 3 Units
Prerequisite(s): Classified graduate status or instructor permission.
Term Typically Offered: Fall, Spring

Sociologically examines the family, with an emphasis on the contemporary American family. The numerous stages and variations of the family life cycle will be considered, with an emphasis on changes and the causes and consequences of the changes.

SOC 294. Special Topics in Sociology. 3 Units
Prerequisite(s): Open to classified graduate students in sociology; all other sociology graduate students by instructor permission.
Term Typically Offered: Fall, Spring

Examines contemporary issues and social developments within the research specialization of department faculty. Provides a forum to discuss and evaluate controversies and advancements in the discipline of sociology including theory and methodologies.

Note: May be repeated twice for credit

SOC 295. Internship and Fieldwork. 1 - 3 Units
Prerequisite(s): Instructor permission.
Term Typically Offered: Fall, Spring

Supervised internship and fieldwork experience in a variety of settings: (1) public or private agencies in the Sacramento community, (2) ethnic and/or minority communities, and (3) educational institutions including area community colleges and universities. Supervision is provided by authorized persons in the field and collaborative supervision is provided by sociology faculty at Sacramento State.
Credit/No Credit

SOC 299. Special Problems. 1 - 3 Units
Term Typically Offered: Fall, Spring

Individual projects or directed reading.
Note: Open only to students who appear competent to carry on individual work. Admission requires approval of the sponsor of the project and the Department Chair.
Credit/No Credit

SOC 500. Culminating Experience. 3 - 6 Units
Prerequisite(s): Advancement to candidacy, successful thesis prospectus hearing, and a minimum 3.0 GPA.
Term Typically Offered: Fall, Spring

Completion of a thesis or a project. Thesis: the 6 unit master's thesis requirement must be completed under the direction of the student's thesis committee. Project: the 6 unit project requirement must be completed under the direction of the student's project committee.
BA in Sociology

Units required for Major: 43
Minimum total units for BA: 120

Program Description
The sociology major and minor have few specific requirements, allowing the student flexibility in selecting courses in the various subject areas covered in the program. The areas covered are:

1. social theory and methods of inquiry;
2. social institutions, such as the family, education, politics, work, and religion;
3. thematic areas of crime and deviance, diversity and inequality, socialization and interaction, globalization, and social change.

Total Units 37

Note: SOC 195 or SOC 199 can be taken for 1-3 units of credit. A maximum of 3 units in SOC 195 or SOC 199 may be counted toward the major. Students may take up to 3 units of upper division courses outside the department in consultation with their undergraduate advisor.

MA in Sociology

Total units required for MA: 30

Program Description
The Master of Arts Program in Sociology is designed to provide a broad academic foundation for a variety of professional opportunities and community needs such as survey research, evaluation research, social problems analysis, career interest in community organizations, and teaching.
The program offers small seminars and allows for close student-faculty contact. The program encourages students to seek internships and fieldwork, and participate in observation experience among the many government, voluntary, and private agencies in the Sacramento area. Students concentrate on theory and research methods as well as areas of specialization. Following coursework, students write a thesis based on original research.

Some graduates of the program enter Ph.D. programs at a variety of universities throughout the United States and others are employed in many state, local, and city government agencies and private businesses doing evaluation research, systems analysis, social problems analysis, and social impact assessment.

**Admission Requirements**

Admission as a classified graduate student in Sociology requires:

- a baccalaureate degree;
- a minimum 3.0 GPA in the last 60 units attempted;
- satisfactory completion of a minimum of 18 units of undergraduate work in Sociology, including one course each in theory, statistics, and methodology, with a minimum 3.0 GPA;
- two letters of recommendation from faculty members in Sociology who know the applicant well enough to assess his/her potential for graduate study.

Students who have deficiencies in admission requirements that can be removed by specified additional preparation may be admitted with conditionally classified graduate status. Any such deficiencies will be noted on a written response to the admission application.

**Admission Procedures**

Applications are accepted as long as room for new students exists. All prospective graduate students, including Sacramento State graduates, must file the following with the Office of Graduate Studies, River Front Center 215, (916) 278-6470:

- an online application for admission;
- two sets of official transcripts from all colleges and universities attended, other than Sacramento State; and
- two letters of recommendation from Sociology faculty members to the Graduate Coordinator in the Sociology Department.

For more admissions information and application deadlines please visit http://www.csus.edu/gradstudies/.

**Minimum Units and Grade Requirement for the Degree**

Units required for the MA: 30

Minimum Cumulative GPA: 3.0

**Advancement to Candidacy**

Each student must file an application for Advancement to Candidacy, indicating a proposed program of graduate study. This procedure should begin as soon as the classified graduate student has:

- removed any deficiencies in admission requirements;
- completed at least 15 units in the graduate program with a minimum 3.0 GPA;
- completed a draft of the thesis prospectus; and
- taken the Writing Placement for Graduate Students (WPG) or taken a Graduate Writing Intensive (GWI) course in their discipline within the first two semesters of coursework at California State University, Sacramento or secured approval for a WPG waiver.

Advancement to candidacy forms are available in the Department Office. The student fills out the form after planning a degree program in consultation with a Sociology Graduate Advisor. The completed form should be returned to the Office of Graduate Studies for approval.

**Note:** A foreign language is not required for the degree. However, students who plan further graduate study are encouraged to study French, German, or Spanish since proficiency in one of these is sometimes required in doctoral programs.

Urban Land Development

College of Social Sciences and Interdisciplinary Studies

Program Description
The purpose of this program is to bring together the private (decision making) and public (policy) aspects of real estate development and to help students develop skills related to land development in metropolitan areas. The program is interdisciplinary and covers all major aspects of the development process including design, feasibility analysis, land use regulation, market and location analysis, and negotiation. Thus, graduates from the program would bridge the gap between

1. professional training in fields such as city planning and public policy and
2. business administration.

Graduates from the new program should be able to understand the constraints and incentives faced by both the private and public sectors when making land use recommendations and decisions.

MS in Urban Land Development

Total units required for MS: 33

Program Description
The purpose of this program is to bring together the private (decision making) and public (policy) aspects of real estate development and to help students develop skills related to land development in metropolitan areas. The program is interdisciplinary and covers all major aspects of the development process including design, feasibility analysis, land use regulation, market and location analysis, and negotiation. Thus, graduates from the program would bridge the gap between

1. professional training in fields such as city planning and public policy and
2. business administration.

Admission Requirements
The following are required for admission to the Master’s Program in Urban Land Development (including admission as a conditional ULD Master’s student):

- A BA or BS degree;
- A minimum GPA of 3.0 or above in all undergraduate courses;
- Completion of the foundation courses or their equivalents with a minimum GPA of 3.0 and no grade lower than a “B-”; and
- A minimum score of 550 (213 if computer based) on the Test of English as a Foreign Language (TOEFL) for students whose preparatory education was in a language other than English, taken within three years of the date of application.

Additionally, the following information will be considered in evaluating applications:

- The candidate’s overall GPA, GPA in the last 60 units of the bachelor’s program, and GPA in foundation courses;
- The candidate’s performance on the Graduate Management Admission Test (GMAT) or the Graduate Record Examination (GRE) taken within three years of the date of application;
- The candidate’s written statement of purpose; and
- The candidate’s letters of recommendation.

Admission Procedures
The Department of Public Policy and Administration in the College of Social Sciences and Interdisciplinary Studies will be responsible for processing applications at the departmental level. The Graduate Office will process applications twice a year: once in the fall semester and once in the spring semester. Candidates for the MS in Urban Land Development will be required to submit the following information to the PPA Graduate Office:

- Any specific application form that may be developed for the program;
- GMAT or GRE scores;
- TOEFL scores (if applicable);
- A written statement of purpose addressing the applicant’s purpose in pursuing a Master’s in Urban Land Development; and
- Three letters of recommendation from individuals with knowledge of the applicant’s academic and professional potential.

Additionally, the candidate shall submit the following information to the University’s Office of Graduate Studies:

- The application for graduate school admission (in accordance with any applicable University filing deadlines);
- Two sets of official transcripts from all colleges and universities attended; and
- TOEFL scores (if applicable).
For more admissions information and application deadlines please visit [http://www.csus.edu/gradstudies/](http://www.csus.edu/gradstudies/).

Applicants who are approved for admission will receive a letter from the Associate Dean, Office of Graduate Studies. The Graduate Admission Recommendation (GAR) form will include any relevant information about proficiencies to be addressed and foundation courses that are required.

Students are expected to have demonstrated basic proficiency in statistics and computer usage before enrolling in the foundation courses. Such proficiencies include the following:

- Statistics: equivalent to an introductory course in probability and statistics; and
- Computer usage: literacy as demonstrated by coursework or competency examination.

The program director has the discretion to determine if and how such proficiencies may be demonstrated.

**Moving from Foundation to Required Courses**

Students who have met the above prerequisites can be admitted as conditional ULD Master’s students and enroll in the foundation courses. To advance from the foundation to the required courses students must:

1. earn a B- or better in all foundation courses and
2. maintain an overall grade point average of 3.0 or better in such courses.

Students in the last semester of the foundation courses must file an Application for Classification with the Graduate Programs Office in the College of Social Sciences. The student’s academic status will be reviewed to assure that he or she meets the necessary criteria to be accepted as a classified graduate student. At the discretion of the ULD program director, a student may enroll in required or elective courses while concurrently completing the last of the foundation courses.

**Minimum Units and Grade Requirement for the Degree**

Units for the MS: 33

Minimum Cumulative GPA 3.0

**Advancement to Candidacy**

Before enrolling in a 500 level course a student must advance to candidacy. Initiation of advancement is the responsibility of the student. The application for Advancement to Candidacy must be filed no more than four weeks before the opening of the final semester of the program. To be eligible to advance a student must be making satisfactory progress and have completed at least 12 units in the program beyond the foundation courses. Satisfactory progress is defined in part as earning an overall GPA of 3.0, with no grade in a foundation or required course below a "B". Additional requirements include:

- Students must also satisfy the Writing Placement for Graduate Students (WPG) or take a Graduate Writing Intensive (GWI) course in their discipline within the first two semesters of coursework at California State University, Sacramento or secured approval for a WPG waiver.

Women's Studies

College of Social Sciences and Interdisciplinary Studies

Program Description

The field of Women's Studies is dedicated to studying women's lives and facilitating political activism and community participation. What makes Women's Studies such a dynamic field is the conviction that theoretical knowledge is best illuminated when connected to political projects and personal experiences.

Our Women's Studies curriculum is multi-disciplinary and focuses on women, gender, and sexuality in relation to other social and economic forces such as racism, ethnocentrism, capitalism, and militarism. Students have opportunities to examine women's diverse experiences--locally, nationally, and globally--within feminist and social justice frameworks.

The course of study situates gender in specific historical and cultural contexts, and examines how our lives are shaped by social and economic institutions, political movements, and individual experiences. We also place a strong focus on community involvement and activism, and we offer many opportunities for internships and service work credit.

Women's Studies affirms the Preamble and Purpose of the National Women's Studies Association which states:

"Women's Studies owes its existence to the movement for the liberation of women; the women's liberation movement exists because women are oppressed... Feminist aims include the elimination of oppression and discrimination on the basis of sex, race, class, religion, disability, and sexual orientation."

 Faculty

JONES, CARA
JOSEPHSON, TRISTAN
MONI, SUJATHA

WOMS 50. Introduction to Gender & Sexuality. 3 Units
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall, Spring

Introduction to basic concepts and issues informing studies in gender, gay, lesbian, bisexual and transsexual/gender (GLBT) identities. Classic and contemporary texts from different cultures will cover biological, historical and social constructions of gender and sexuality. Transformations in family and society, global and intersectional perspectives on GLBT identity, political activism, cultural and social perceptions of gender and sexuality will be discussed.

WOMS 110. Introduction to the Women's Movement in Contemporary Society. 3 Units
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall, Spring

Examination of women's issues in the current women's movement. Emphasis is on detailed examination of feminist topics important to women today.

WOMS 115. Introduction to Women's Studies. 3 Units
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall, Spring

Introduction to the origins and models of Women's Studies. Explores the significance of a new field of study, and examines the methods of interdisciplinary study. Provides an opportunity to read a number of Women's Studies "classics" and to trace the development of feminist theory.

WOMS 118. Asian American Women. 3 Units
General Education Area/Graduation Requirement: Humanities (Area C2)
Term Typically Offered: Fall, Spring

Using an interdisciplinary approach, course offers a broad introduction to broad principle values and traditions shaping Asian American women's lives in the U.S. Examines cultural diversity, gender inequality and conflicts between traditions and social practices through critical analysis of literature, film and cultural theories as expressions of identity. Topics covered include: cultural heritage and philosophies, intergenerational conflict, transnationalism, gender roles and socio-economic practices. Comprehensive understanding principle factors governing Asian American women's lives at the nexus of Asian and American cultures. Cross-listed: ETHN 118.

WOMS 120. Mother Woman Person. 3 Units
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall only

This course applies principles of feminism to the study of motherhood as social institution and private experience. Students explore family, cultural and social values that influenced their mothers and grandmothers, analyzing the impact of social institutions on their own childhood and adulthood. Students develop awareness of the historic evolution of women's social and private roles and the changing emphasis on woman as mother, wife/sexual companion and wage earning person largely through African American women's social movements.
### WOMS 121. Women Of The Middle East. 3 Units

**General Education Area/Graduation Requirement:** Humanities (Area C2)

**Term Typically Offered:** Fall, Spring

Provides an introduction to historical and contemporary conditions affecting women's lives and contributions to Middle Eastern societies. Readings will be framed with a focus on women within state systems and political life, economic activity, family systems, religious thought and law, health, arts and literature.

### WOMS 125. Sex & Gender in South Asia. 3 Units

This course focuses on sex & gender roles in South Asia starting with ancient times to the present. Patriarchal ideals pertaining to social values, traditions and family structures will be examined. Religious, caste and economic class factors contributing to the preservation of gender norms and socially approved sexual behavior, sex roles, stereotypes, and violence against women, transgender youth and sexual minorities will be analyzed. Contemporary social movements and activism by women’s groups and LGBTQIA+ activists will also be discussed.

### WOMS 133. Gender & Health. 3 Units

**Term Typically Offered:** Fall only

This course explores feminist analyses of medicine. An intersectional approach to how medical science constructs knowledge about health will be examined. This interdisciplinary study draws on humanities and social sciences; feminism; medical, scientific, and clinical literature; popular sources; and web discourses. How gender, race, class, sexuality, ethnicity, nationality, and disability intersect and shape behavior and experience will be analyzed. Contemporary social movements and activism by women and LGBTQIA+ people will also be discussed.

### WOMS 136. Gender, Race, and Class. 3 Units

**General Education Area/Graduation Requirement:** GE AREA D, Race & Ethnicity Graduation Requirement (RE), Writing Intensive Graduation Requirement (WI)

**Term Typically Offered:** Fall, Spring

Designed to examine the effects of the dynamic interaction of gender, race, and class on women. The social construction of gender, race, and class will also be examined. Other topics to be discussed and researched are the effects of sexism, racism, and classicism on institutions such as academia, business, government, religion, and social movements. Also provides an analysis of effective techniques to end sexism, racism, and classicism. Prerequisite: GWAR certification before Fall 09; or WPJ score of 80+; or 3-unit placement in ENGL 109M or ENGL 109W; or 4-unit placement in ENGL 109M or ENGL 109W and co-enrollment in ENGL 109X; or WPJ score 70 or 71 and co-enrollment in ENGL 109X.

### WOMS 138. Women and Work. 3 Units

**Prerequisite(s):** GWAR certification before Fall 09; or WPJ score of 80+; or 3-unit placement in ENGL 109M or ENGL 109W; or 4-unit placement in ENGL 109M or ENGL 109W and co-enrollment in ENGL 109X; or WPJ score 70 or 71 and co-enrollment in ENGL 109X.

**General Education Area/Graduation Requirement:** Writing Intensive Graduation Requirement (WI), GE AREA D

**Term Typically Offered:** Fall, Spring

Explores topics basic to discussion of women's paid and unpaid work from historical and crosscultural perspectives. Consideration is given to popular conceptions and stereotypes of work and "women's issues" in the industrialized world; the private and public lives of women and men with emphasis on work and social realities; and the maintenance of patriarchy under capitalism, socialism and communism, with some possible feminist "solutions.

### WOMS 139. Violence Against Women. 3 Units

**General Education Area/Graduation Requirement:** GE AREA D

**Term Typically Offered:** Spring only

Consider from an international feminist perspective the forms of violence directed at women. It will also look at contemporary attitudes towards women, children, power, aggression and sexuality. Topics include sexual assault; child abuse; medical violence; psychiatric violence; economic violence; and military violence. Also examines the ways in which women are individually and collectively combating these various forms of violence.

### WOMS 144. Women and Theatre: Staging Diversity. 3 Units

**General Education Area/Graduation Requirement:** Race & Ethnicity Graduation Requirement (RE), Arts (Area C1)

**Term Typically Offered:** Fall, Spring

Includes study of recent feminist performance theory and criticism and its application to acting, directing, and writing for the theatre. Students will participate in both lecture/discussion and activities, including the creation of a final performance. Lecture two hours; lab two hours. Cross Listed: THEA 144; only one may be counted for credit.

### WOMS 145. Feminism and the Spirit. 3 Units

**General Education Area/Graduation Requirement:** Humanities (Area C2)

**Term Typically Offered:** Fall only

Provides a critique of traditional patriarchal religions and traces women's participation in the evolution of the human spirit. Consideration is given to the history of Goddess religion and its resurgence in the contemporary world; sexism in institutionalized religions and the current advances women are making in the churches; and dimensions of woman spirit incorporated in today's feminist art and literature.

### WOMS 146. Women In Art. 3 Units

**General Education Area/Graduation Requirement:** Arts (Area C1)

**Term Typically Offered:** Fall, Spring

Study of the unique and important contributions of women to the visual arts (Renaissance to present) and their personal struggle toward success and recognition. The Women's Art Movement and its impact on education, museums and women's status in the arts are important topics of this class.
**BS in Women’s Studies**

**Units required for Major: 36**

**Program Description**

The field of Women’s Studies is dedicated to studying women’s lives and facilitating political activism and community participation. What makes Women’s Studies such a dynamic field is the conviction that theoretical knowledge is best illuminated when connected to political projects and personal experiences.

Our Women’s Studies curriculum is multi-disciplinary and focuses on women, gender, and sexuality in relation to other social and economic forces such as racism, ethnocentrism, capitalism, and militarism. Students have opportunities to examine women’s diverse experiences—locally, nationally, and globally—within feminist and social justice frameworks.

Minimum total units required for the BS: 120; 40 units should be upper division.

**Minimum Grade Requirement**

A minimum grade of C- is required of courses applied to the major.

General Education

General Education Prior to Fall 2018 (p. 952)

One of the principles on which a modern university rests is the assumption that there is an important difference between learning to make a living and building the foundation for a life. While the first goal is important, the second is fundamental.

In focusing on the students’ development as whole or “educated” people, a university distinguishes itself from a trade school. The goal of a university education is not simply the acquisition and application of knowledge, but the creation of people who firmly grasp the worth of clear thinking and know how to do it; who understand and appreciate the differences between peoples and cultures as well as their similarities; who have a sense of history and social forces; who can express thought clearly and have quantitative ability; who know something about the arts as well as how to enjoy them; who can talk and think intelligently about the physical and life sciences, the humanities, and literature; and, above all, who have the desire and capability for learning. This goal is why a university degree is so highly valued by individuals, employers, and the community at large.

The Sacramento State General Education Program is designed to educate in this holistic sense. Thus, it is not simply a series of courses to complete or hoops for students to jump through as they complete the courses in their major. Rather, general education lies at the heart of what a university education is all about.

Therefore students should carefully select courses and actively seek subject areas that are new and may challenge their world views or cherished assumptions and offer new experiences, such as inquiry-based or community-based learning. In short, students should not take the easy way out. This is their opportunity to lay the foundation for the rest of their lives, and to define themselves as educated members of the human community. Their time at the university is precious and the General Education Program has been designed to help them begin the process of becoming truly educated people. In deciding to pursue a university degree, they have chosen well and should make the best use of the opportunities open to them.

Objectives

Upon completion of the General Education Program requirements, students will be expected to:

- read, write, and understand relatively complex and sophisticated English prose;
- construct a non-fallacious verbal argument, recognize fallacious arguments, and follow the verbal arguments of others;
- find and use common information resources, engage in specialized library research, use computers, and seek out appropriate expert opinion and advice;
- use mathematical ideas to accomplish a variety of tasks;
- gain a general understanding of current theory, concepts, knowledge, and scientific methods pertaining to the nature of the physical universe, ecosystems, and life on this planet;
- develop an acquaintance and understanding of cultures and major dynamic social institutions which affect one’s life;
- possess a significant and useful understanding of peoples from a diversity of cultures and backgrounds, including women and ethnic

Office of Academic Affairs

Academic Affairs is the largest administrative unit in the University, encompassing the seven Academic Colleges, the University Library, and the College of Continuing Education.

Our Program Centers include: the Office of Graduate Studies, Research Administration, the Community Engagement Center, the Center for Teaching and Learning, Academic Technology & Creative Services, International Programs & Global Engagement, and the Center for College Readiness. Most important, we ensure quality academic programs for all students and support well qualified faculty to provide excellent teaching and learning.

1 Descriptions of non-Women’s Studies courses may be obtained by consulting the listings under the appropriate departments. Please consult the Women’s Studies Department for any new courses added to these categories. The major and minor in Women’s Studies are planned in advance and approved for graduation by the Women’s Studies Coordinator.
and other minority groups who have been the objects of prejudice and adverse discrimination within our society.

In addition to these basic skills, courses in the sciences, arts, humanities, and social sciences have been selected to help students attain the university’s baccalaureate learning goals and to satisfy particular GE Area Learning Outcomes. The Baccalaureate Learning Goals include:

- **Competence in the Disciplines**: The ability to demonstrate the competencies and values listed below in at least one major field of study and to demonstrate informed understandings of other fields, drawing on the knowledge and skills of disciplines outside the major.
- **Knowledge of Human Cultures and the Physical and Natural World**: through study in the sciences and mathematics, social sciences, humanities, histories, languages, and the arts. Focused by engagement with big questions, contemporary and enduring.
- **Intellectual and Practical Skills, Including**: inquiry and analysis, critical, philosophical, and creative thinking, written and oral communication, quantitative literacy, information literacy, teamwork and problem solving, practiced extensively across the curriculum, in the context of progressively more challenging problems, projects, and standards for performance.
- **Personal and Social Responsibility, Including**: civic knowledge and engagement—local and global, intercultural knowledge and competence, ethical reasoning and action, foundations and skills for lifelong learning anchored through active involvement with diverse communities and real-world challenges.
- **Integrative Learning**, Including: synthesis and advanced accomplishment across general and specialized studies.

Sacramento State General Education courses are designed, selected, and approved by the faculty to meet these program objectives. Students will benefit from consultation with the Academic Advising Center or advisors in their major departments in planning their General Education course choices. Students may search the online Schedule of Classes by Area or other specification(s) for currently available GE courses.

### Course Requirements

The following courses have been approved to meet the 48-unit General Education pattern required of Sacramento State students. At least 9 units must be in upper division GE courses (100-199) from Areas B, C, and D taken after you complete 60 units of coursework. Enrollment in upper division GE courses is limited to students who have completed Areas A1, A2, A3, and have taken at least 45 units (not limited to GE classes). At least nine units of GE must be taken in residence (i.e., at Sacramento State). In addition, a second semester composition course and demonstration of proficiency in a foreign language are required for graduation.

**Total Units**: 9

To help you complete your degree in a timely manner and not take more units than absolutely necessary, there are ways to use single courses to meet more than one requirement (overlap). There is no way to list all possible overlaps so please complete this checklist with a professional advisor. We can help you identify the best course of action. Academic Advising Center can be visited online (http://www.csus.edu/acad) or please call: (916) 278-1000 or email (advising@csus.edu).

Students must choose their General Education classes from the Areas and classes listed below.

**Area A: Basic Subjects (p. 939) (9 units)**

These requirements must be completed before enrollment in upper division GE courses. A grade of "C-" or better is required in all courses taken in Area A.

Race and Ethnicity in American Society (RE) - May double-count for unit requirements in General Education Areas B, C, or D

Foreign Language Proficiency Requirement - If not satisfied before entering Sacramento State, it may be satisfied in General Education Area C2 (Humanities). "C- or better required." The alternative methods for satisfying the Foreign Language Proficiency Requirement are described here: [http://www.csus.edu/wll/for-students/graduation-requirement.html](http://www.csus.edu/wll/for-students/graduation-requirement.html)
Area B: The Physical Universe and Its Life Forms (p. 750) (12 Units)

At least 3 units must be taken in each of Areas B1, B2 and B4. At least one course with a laboratory component must be taken in Area B1 or B2.

Additional Graduation Requirements (p.

The 48-unit General Education requirement does not include the following two graduation requirements:

- Second semester composition (ENGL 20, ENGL 20M or an approved equivalent) must be completed with a grade of C- or better.
- Foreign language graduation requirement may be met by successfully completing appropriate coursework or passing proficiency exams. With a grade of "C" or better, the following second semester or equivalent college-level language courses may satisfy both GE Area C2 units and the Foreign Language Requirement:

<table>
<thead>
<tr>

<td>3</td>
</tr>
</tbody>
</table>

American Institutions (p.

This requirement may be fulfilled by completing one Government and one US History course from the following list. The courses below also satisfy Area D units. In addition, students have the option of taking challenges in US History, US Constitution and California State and Local Government. For details on challenges exam, please visit the Department of World Languages and Literatures website (http://csus.edu/wll/for-students/graduation-requirement.html).

### Writing Intensive (p. 3) (3-unit Supervenient Requirement)

One Writing Intensive course, i.e., a course with comprehensive writing assignments (minimum 5,000 words) is required. This requirement may be met either with a specifically marked GE courses or, in certain majors, with a course required for the major. (Writing Intensive courses taken to meet major requirements do not apply to the nine-unit upper division requirement in GE.) Prerequisite: Completion of GE Areas A2, A3, second semester composition (ENGL 20), junior standing, and ENGL 109M/ENGL 109W. Students who take the WPJ instead of initially taking ENGL 109M/ENGL 109W must score 70, 71, or 80. Students with a lower WPJ score will have to complete other prerequisites determined by their score. Successful completion of the writing intensive course with a grade of C- or better certifies the Graduation Writing Assessment Requirement (GWAR).

General Education Policies

- All upper division GE courses require at least second semester sophomore standing (45 units) and completion of all GE Area A courses as prerequisites.
- At least 9 units must be chosen from upper division GE courses (100-199) and at least 9 units must be taken in residence at Sacramento State (these units may overlap).
- Each course taken to satisfy the Area A Basic Subjects and Area B4 Quantitative Reasoning must be completed with a grade of “C-” or higher.
- A 2.0 cumulative GPA is required in General Education.

Overlap Between General Education and Majors/Minors
(Fall 2013 and Later)

General Education requirements include five areas (A-E) in which you must take courses (area requirements), a nine-unit upper division requirement, a Race and Ethnicity requirement, and a Writing Intensive requirement. The overlap possibilities among these four aspects of General Education are outlined below. Students needing help applying these overlap policies are encouraged to seek advising through their College Advising Centers or through an advisor in the Academic Advising Center, Lassen Hall 1012.

1. A maximum of nine units of coursework from your major department may also be applied to the General Education requirements.
2. The Race and Ethnicity requirement can be met with an upper or lower division course from a student's major or major department. Example: A Social Work major can use SWRK 102 to meet the Race and Ethnicity requirement.
3. The Writing Intensive requirement can be met with a course from the major or major department in specified majors, but not in all majors.
4. There is no restriction on the overlap of courses between GE and minor requirements*

Note: For Business Administration majors, substitute “College of Business” for “major department.” For Social Science majors, substitute “History” for “major department.”

Overlap Between General Education and Majors/Minors
(Fall 2013 and Later)

General Education requirements include five areas (A-E) in which you must take courses (area requirements), a nine-unit upper division requirement, a Race and Ethnicity requirement, and a Writing Intensive requirement. The overlap possibilities among these four aspects of General Education are outlined below. Students needing help applying these overlap policies are encouraged to seek advising through their College Advising Centers or through an advisor in the Academic Advising Center, Lassen Hall 1012.

1. There is no university restriction on the overlap of courses between GE and coursework approved for GE from your major department.
2. The Race and Ethnicity requirement can be met with an upper or lower division course from a student's major or major department. Example: A Social Work major can use SWRK 102 to meet the Race and Ethnicity requirement.
3. The Writing Intensive requirement can be met with a course from the major or major department in specified majors, but not in all majors.
4. There is no restriction on the overlap of courses between GE and minor requirements*
**Transfer Students**

Transfer students who have completed lower division General Education requirements at a California Community College, including those certified under the Intersegmental General Education Transfer Core Curriculum (IGETC), and/or those in receipt of an Associate Degree for Transfer (ADT), are required to complete 9 units of upper division GE at Sacramento State, meet the foreign language proficiency graduation requirement, meet the state “code” requirements in U.S. History, American and California Government, and the writing intensive requirement. These 9 units may or may not include the writing intensive requirement, depending on the policy of the student’s major department. Students who have not completed an approved course for the “Race and Ethnicity in American Society” category at a community college must take a course in this category at Sacramento State. In addition, all transfer students, except those fully certified as having completed the IGETC core curriculum, must complete the required second semester writing course or an approved course at a community college.

Note: Foreign Language Proficiency Requirement - If not satisfied before entering Sacramento State, it may be satisfied in General Education Area C2 (Humanities). "C- or higher required." The alternative methods for satisfying the Foreign Language Proficiency Requirement are described here (http://www.csus.edu/wll/for-students/graduation-requirement.html%E2%80%8B). For more information about IGETC requirements and/or Associate Degrees for Transfer, contact your community college counselor.

**Certificate in Global and Multicultural Perspectives**

Units required for Certificate: 12

**Program Description**

Total Units: 12 units minimum—9 of which must be upper division. All courses in Section A and B are also approved for General Education.

All courses and petitions for substitution will be approved by the Office of Undergraduate Studies and will reflect the criteria and learning outcomes of the Certificate Program.

General Education (Prior to Fall 2018)

One of the principles on which a modern university rests is the assumption that there is an important difference between learning to make a living and building the foundation for a life. While the first goal is important, the second is fundamental.

In focusing on the students’ development as whole or “educated” people, a university distinguishes itself from a trade school. The goal of a university education is not simply the acquisition and application of knowledge, but the creation of people who firmly grasp the worth of clear thinking and know how to do it; who understand and appreciate the differences between peoples and cultures as well as their similarities; who have a sense of history and social forces; who can express thought clearly and have quantitative ability; who know something about the arts as well as how to enjoy them; who can talk and think intelligently about the physical and life sciences, the humanities, and literature; and, above all, who have the desire and capability for learning. This goal is why a university degree is so highly valued by individuals, employers, and the community at large.

The Sacramento State General Education Program is designed to educate in this holistic sense. Thus, it is not simply a series of courses to complete or hoops for students to jump through as they complete the courses in their major. Rather, general education lies at the heart of what a university education is all about.

Therefore students should carefully select courses and actively seek subject areas that are new and may challenge their world views or cherished assumptions and offer new experiences, such as inquiry-based or community-based learning. In short, students should not take the easy way out. This is their opportunity to lay the foundation for the rest of their lives, and to define themselves as educated members of the human community. Their time at the university is precious and the General Education Program has been designed to help them begin the process of becoming truly educated people. In deciding to pursue a
Learning Outcomes. The Baccalaureate Learning Goals include: university’s baccalaureate learning goals and to satisfy particular GE Area Objectives

Upon completion of the General Education Program requirements, students will be expected to:

- read, write, and understand relatively complex and sophisticated English prose;
- construct a non-fallacious verbal argument, recognize fallacious arguments, and follow the verbal arguments of others;
- find and use common information resources, engage in specialized library research, use computers, and seek out appropriate expert opinion and advice;
- use mathematical ideas to accomplish a variety of tasks;
- gain a general understanding of current theory, concepts, knowledge, and scientific methods pertaining to the nature of the physical universe, ecosystems, and life on this planet;
- develop an acquaintance and understanding of cultures and major dynamic social institutions which affect one’s life;
- possess a significant and useful understanding of peoples from a diversity of cultures and backgrounds, including women and ethnic and other minority groups who have been the objects of prejudice and adverse discrimination within our society.

In addition to these basic skills, courses in the sciences, arts, humanities, and social sciences have been selected to help students attain the university’s baccalaureate learning goals and to satisfy particular GE Area Learning Outcomes. The Baccalaureate Learning Goals include:

- **Competence in the Disciplines**: The ability to demonstrate the competencies and values listed below in at least one major field of study and to demonstrate informed understandings of other fields, drawing on the knowledge and skills of disciplines outside the major.

- **Knowledge of Human Cultures and the Physical and Natural World** through study in the sciences and mathematics, social sciences, humanities, histories, languages, and the arts. Focused by engagement with big questions, contemporary and enduring.

- **Intellectual and Practical Skills, Including**: inquiry and analysis, critical, philosophical, and creative thinking, written and oral communication, quantitative literacy, information literacy, teamwork and problem solving, practiced extensively across the curriculum, in the context of progressively more challenging problems, projects, and standards for performance.

- **Personal and Social Responsibility, Including**: civic knowledge and engagement—local and global, intercultural knowledge and competence, ethical reasoning and action, foundations and skills for lifelong learning anchored through active involvement with diverse communities and real-world challenges.

- **Integrative Learning**, including: synthesis and advanced accomplishment across general and specialized studies.

Sacramento State General Education courses are designed, selected, and approved by the faculty to meet these program objectives. Students will benefit from consultation with the Academic Advising Center or advisors in their major departments in planning their General Education course choices. Students may search the online Schedule of Classes by Area or other specification(s) for currently available GE courses.

Course Requirements

The following courses have been approved to meet the 48-unit General Education pattern required of Sacramento State students. At least 9 units must be in upper division GE courses (100-199) taken after you complete 60 units of coursework. Enrollment in upper division GE courses is limited to students who have completed Areas A1, A2, A3, and have taken at least 45 units (not limited to GE classes). At least nine units of GE must be taken in residence (i.e., at Sacramento State). In addition, a second semester composition course and demonstration of proficiency in a foreign language are required for graduation.

Additional Graduation Requirements

The 48-unit General Education requirement does not include the following two graduation requirements:

- Second semester composition (ENGL 20, ENGL 20M or an approved equivalent) must be completed with a grade of C- or better.
- Foreign language graduation requirement may be met by successfully completing appropriate coursework or passing proficiency exams. With a grade of "C-" or better, the following second semester or equivalent college-level language courses may satisfy both GE Area C2 units and the Foreign Language Requirement:

<table>

</tbody>
</table>

American Institutions

This requirement may be fulfilled by completing one Government and one US History course from the following list. The courses below also satisfy Area D units. In addition, students have the option of taking challenges in US History, US Constitution and California State and Local Government. For details on challenges exam, see http://www.csus.edu/ccr/Challenge%20Exams/.

Writing Intensive (p. ) (3-unit Supervenient Requirement)

One Writing Intensive course, i.e., a course with comprehensive writing assignments (minimum 5,000 words) is required. This requirement may be met either with a specifically marked GE courses or, in certain majors, with a course required for the major. (Writing Intensive courses taken to meet major requirements do not apply to the nine-unit upper division requirement in GE.) Prerequisite: Completion of GE Areas A2, A3, second semester composition (ENGL 20), junior standing, and ENGL 109M/ENGL 109W. Students who take the WPJ instead of initially taking ENGL 109M/ENGL 109W must score 70, 71, or 80. Students with a lower WPJ score will have to complete other prerequisites determined by their score. Successful completion of the writing intensive course with a grade of C- or better certifies the Graduation Writing Assessment Requirement (GWAR).

Global and Multicultural Perspectives in the Discipline (3 Units)
Select 3 units

Total Units 9-15

1 3 units may be lower or upper division. Courses to be selected in consultation with major advisor

All courses and petitions for substitution will be approved by the Office of Undergraduate Studies and will reflect the criteria and learning outcomes of the Certificate Program.

General Education Policies

• All upper division GE courses require at least second semester sophomore standing (45 units) and completion of all GE Area A courses as prerequisites.
• At least 9 units must be chosen from upper division GE courses (100-199) and at least 9 units must be taken in residence at Sacramento State (these units may overlap).
• Each course taken to satisfy the Area A Basic Subjects and Area B4 Quantitative Reasoning must be completed with a grade of “C-” or higher.
• A 2.0 cumulative GPA is required in General Education.

Overlap Between General Education and Majors/Minors (Fall 1992 - Spring 2013)

General Education requirements include five areas (A-E) in which you must take courses (area requirements), a nine-unit upper division requirement, a Race and Ethnicity requirement, and a Writing Intensive requirement. The overlap possibilities among these four aspects of General Education are outlined below. Students needing help applying these overlap policies are encouraged to see an advisor in the Academic Advising Center, Lassen Hall 1012.

1. A maximum of nine units of coursework from your major department may also be applied to the General Education requirements.
2. The Race and Ethnicity requirement can be met with an upper or lower division course from a student's major or major department. Example: A Social Work major can use SWRK 102 to meet the Race and Ethnicity requirement.
3. The Writing Intensive requirement can be met with a course from the major or major department in specified majors, but not in all majors.
4. There is no restriction on the overlap of courses between GE and minor requirements*

Note: For Business Administration majors, substitute “College of Business” for “major department.” For Social Science majors, substitute “History” for “major department.”

Overlap Between General Education and Majors/Minors (Fall 2013 and Later)

General Education requirements include five areas (A-E) in which you must take courses (area requirements), a nine-unit upper division requirement, a Race and Ethnicity requirement, and a Writing Intensive requirement. The overlap possibilities among these four aspects of General Education are outlined below. Students needing help applying these overlap policies are encouraged to see an advisor in the Academic Advising Center, Lassen Hall 1012.

1. There is no university restriction on the overlap of courses between GE and coursework approved for GE from your major department.
2. The Race and Ethnicity requirement can be met with an upper or lower division course from a student's major or major department. Example: A Social Work major can use SWRK 102 to meet the Race and Ethnicity requirement.
3. The Writing Intensive requirement can be met with a course from the major or major department in specified majors, but not in all majors.
4. There is no restriction on the overlap of courses between GE and minor requirements

Transfer Students
Transfer students who have completed lower division General Education requirements at a California Community College, including those certified under the Intersegmental General Education Transfer Core Curriculum (IGETC), and/or those in receipt of an Associate Degree for Transfer (ADT), are required to complete 9 units of upper division GE at Sacramento State, meet the foreign language proficiency graduation requirement, meet the state “code” requirements in U.S. History, American and California Government, and the writing intensive requirement. These 9 units may or may not include the writing intensive requirement, depending on the policy of the student's major department. Students who have not completed an approved course for the "Race and Ethnicity in American Society" category at a community college must take a course in this category at Sacramento State. In addition, all transfer students, except those fully certified as having completed the IGETC core curriculum, must complete the required second semester writing course or an approved course at a community college.

Note: Foreign Language Proficiency Requirement - If not satisfied before entering Sacramento State, it may be satisfied in General Education Area C2 (Humanities). “C- or higher required” The alternative methods for satisfying the Foreign Language Proficiency Requirement are described here: http://www.csus.edu/will/for-students/graduation-requirement.html

For more information about IGETC requirements and/or Associate Degrees for Transfer, contact your community college counselor.

General Education Honors Program

Program Description
"Education is not preparation for life; education is life itself." – John Dewey

The General Education Honors Program is a course of study to provide academic challenges and enhanced learning for highly motivated students at Sacramento State. Honors students take most of these courses in their freshman and sophomore years. There is an additional nine-unit upper division Honors sequence that students take to earn an Honors certificate upon graduation. The Honors courses fulfill almost all Sacramento State General Education requirements.

The guiding principles of the Honors Programs are active learning, global subject matter, study of primary texts, and an interdisciplinary orientation. Specially selected faculty provide challenging and stimulating learning experiences in small class settings. The cornerstone experience of the freshmen and sophomore years is a three semester Honors seminar, in which students will read some of the great books of the civilizations of the world and discuss some of the issues raised by these authors.

Honors students have access to a lounge and central administrative office, where they can relax, study, meet with advisors, and talk with one another. The program is open to qualified entering freshmen; all others interested should contact the Honors Director.

For further information and application instructions, visit the Honors Web site at www.csus.edu/honorsprogram (http://www.csus.edu/honorsprogram).

HONR 1.  First Year Seminar: Education, Self-Examination, and Living. 3 Units
Prerequisite(s): Open only to Honors students.
General Education Area/Graduation Requirement: Understanding Personal Development (E)
Term Typically Offered: Fall, Spring

Introduction to comparative ideas of education and self-development. In writings from around the world, examines works on education, autobiographical accounts, and short stories to explore concepts of teaching, learning, human growth and development, and the role of the school and university in the realization of human potential.

HONR 2.  Great Books and World Civilization I. 3 Units
Prerequisite(s): HONR 1 and instructor permission.
General Education Area/Graduation Requirement: Humanities (Area C2)
Term Typically Offered: Fall, Spring

Students read, discuss, and explore some of the most influential works of literature, philosophy, history, and religion from cultures around the world prior to the 15th century. Students will gain knowledge of different cultural traditions, explore ways to criticize and to learn from different genres of literature, examine their own concepts and ideas, and practice skills of critical thinking in dialogue with challenging works. Readings will be drawn from a broad array of sources, including Greek, Chinese, and Indian traditions, different religious faiths, and works of literature representing a variety of outlooks and views.

HONR 3.  Great Books and World Civilization II. 3 Units
Prerequisite(s): HONR 2 and instructor permission.
General Education Area/Graduation Requirement: Humanities (Area C2)
Term Typically Offered: Fall, Spring

Students read, discuss, and explore some of the most influential works of literature, philosophy, history, and religion from cultures around the world from the 15th century to the present. Students will gain knowledge of different cultural traditions, explore ways to criticize and to learn from different genres of literature, examine their own concepts and ideas, and practice skills of critical thinking in dialogue with challenging works. Readings will be drawn from a broad array of sources, including Greek, Chinese, and Indian traditions, different religious faiths, and works of literature representing a variety of outlooks and views.
HONR 101. Science and the Public Good. 3 Units
General Education Area/Graduation Requirement: Further Studies in Area B (B5)
Term Typically Offered: Fall, Spring

This course examines how scientists employ information derived through the scientific method and statistical analyses to form conclusions. The methodology of science is applied to public policy debates relating to climate change, the use of DNA, Creationist/evolutionist issues, water conservation, land use zoning, energy, mineral resources, and other topics.

HONR 102. The Public Good Through the Visual and Performing Arts. 3 Units
Prerequisite(s): Upper division status in Honors Program; GWAR certification before Fall 09; or WPJ score of 80+; or 3-unit placement in ENGL 109M or ENGL 109W; or 4-unit placement in ENGL 109M or ENGL 109W and co-enrollment in ENGL 109X; or WPJ score 70 or 71 and co-enrollment in ENGL 109X.
General Education Area/Graduation Requirement: Writing Intensive Graduation Requirement (WI)
Term Typically Offered: Fall, Spring

This course explores the role of the visual and performing arts as a catalyzing and infinitely variable means of pursuing the public good. Students will engage with the artistic process as well as learn how works of art have successfully challenged ideological conventions and helped change social and political systems. Strategies of making art will be examined in the form of specific visual and performativity methodologies, the context of the artist, and the public perception of various art forms.

HONR 103. Civic Engagement, Service Learning: Pursuing the Public Good. 3 Units
Prerequisite(s): Must be admitted to Honors Program
Term Typically Offered: Fall, Spring

Students to be an active participant in his/her own learning process through a service learning experience and participation in a corresponding seminar. Students are offered a reciprocal opportunity to acquire knowledge and develop skills while providing service and assistance to the community. Students will have the opportunity to assess the circumstances of an organization and provide feedback on their situation. The student will evaluate and assess his/her service learning from three perspectives: the physical universe and its life forms, social issues and social science research, and the arts.
Note: An international experience can be substituted for a local service learning experience. See Honors Program Director for more information.

HONR 120. Honors One World Seminar. 3 Units
Prerequisite(s): Open to students in the Honors program and permission of the program director.
Seminar dedicated to exploring the One World theme for the university. Topic changes annually.

HONR 195. Community Fieldwork and Internship. 3 Units
Prerequisite(s): Open to students in the Honors Program with permission of the program director and advanced approval of project goal and objective.
Term Typically Offered: Fall, Spring

Supervised service-learning experience with a community partner. This experience focuses on application of the interdisciplinary approach of the General Education Honors Program while affording students direct, hands-on experiences.
Credit/No Credit

HONR 196. Honors Senior Thesis. 3 Units
Prerequisite(s): Open to students in the Honors program with permission of the program director.
Honors research seminar in which students will complete a research paper in the discipline of their choice based on original research. Recommended for the student’s final semester of study.

HONR 199. Special Problems. 1 - 3 Units
Term Typically Offered: Fall, Spring

Open to students enrolled in the General Education Honors Program. Individual projects and directed reading for students who are competent to assume independent work. Requires approval of the Honors Program Director and Honors faculty member under whom the independent work is to be conducted.

GE Honors Certificate
Units required for Certificate: 51

Program Description

The General Education Honors Program is a course of study to provide academic challenges and enhanced learning for highly motivated students at Sacramento State. Honors students take most of these courses in their freshman and sophomore years. There is an additional nine-unit upper division Honors sequence that students take to earn an Honors certificate upon graduation. The Honors courses fulfill almost all Sacramento State General Education requirements.

Requirements

Honors students take forty-five (45) units of Honors courses (36 lower division and 9 upper division). Exceptions are permitted with permission of the Director.

In their freshman and sophomore years, Honors students take approximately three Honors courses (9 units) per semester, filling out their schedules with other General Education courses or courses required in their pre-major. Honors students must take at least 12 units overall per semester.

The core of the curriculum will be a three-semester Honors seminar in which students read some of the great books of world civilizations, consider some of the big issues raised by world thinkers and writers, and improve their skills in critical thinking and writing:

The Honors courses fulfill almost all Sacramento State General Education requirements for graduation. GE courses that students take in addition to their Honors courses are: ENGL 5, and a physical science course with lab. Students must also fulfill a university graduation requirement in foreign languages and the second semester English composition class.

Honors students are assigned a faculty advisor upon arrival at Sacramento State. They must consult with their advisors at least once a semester before registering for their courses.
The freshman and sophomore courses for the first Honors cohort are approximately as follows:

**ROTC**

**Office of Academic Affairs**

### Program Description

#### Aerospace Studies/Air Force

The Department of Aerospace Studies offers three and four year academic and training programs towards a commission in the United States Air Force. The Air Force Reserve Officer Training Corps (AFROTC) program is designed to develop officers in the USAF through leadership and academic training. Cadets participate in dialogues, problem solving, and other planning activities. Program goals are achieved through formal academic classes, physical fitness training, and Leadership Laboratory (a 2-hour weekly military training session). Qualified undergraduate or specially qualified graduate students may apply for AFROTC. The program accepts students from most of the local two- and four-year community colleges and universities. Contact the Department ([www.csus.edu/afrotc/](http://www.csus.edu/afrotc/)) for information on open enrollment procedures for non-Sacramento State students.

#### Eligibility

As one of the prerequisites for commissioning, each cadet must attend a two-week field training encampment. This training is conducted at an Air Force base during the summer, normally between a cadet's sophomore and junior years. Field training emphasizes military orientation, academics, physical fitness training, leadership exercises, teamwork, job specialty briefings, military drill and ceremonies.

Upon completion of the AFROTC program and all requirements for a bachelor's degree, cadets are commissioned as second lieutenants and serve a minimum of four years in the Air Force. Graduate students are eligible for an Air Force commission upon successful completion of
the AFROTC program. AFROTC students may compete to be selected and enter pilot, combat systems operator ("CSO"—navigators, weapon system operators, etc.), remotely piloted aircraft pilot, or air battle manager training after commissioning. These career fields, particularly pilot, are highly selective career fields and the competition is intense. Other commissionees go on active duty in specialties consistent with their academic majors, their desires, and the needs of the Air Force. Commissionees may request a delay from entry on active duty to continue their education, or they may apply for Air Force sponsored graduate study to begin immediately upon entering on active duty service.

**Scholarships**

AFROTC may offer scholarships to qualified students. Less than 20% of AFROTC cadets are on scholarships and they are highly competitive. Scholarships usually provide for tuition, books, lab and incidental fees, and a tax-free monthly stipend ranging from $300-$500. Except for scholarship recipients, students are under no obligation to the Air Force until they enter their junior cadet year. Upon entering their junior cadet year all cadets (scholarships/non-scholarships) begin receiving a monthly stipend ranging from $300-$500. More detailed program information is available upon request from AFROTC, Sacramento State, Chair, Department of Aerospace Studies, Yosemite Hall Room 122, (916) 278-7315 or at www.csus.edu/afrotc/ (http://www.csus.edu/afrotc)

**Program Description**

**Military Science/Army**

The Military Science Department operates as an extension office of the Military Science Department at the University of California at Davis and offers hands-on training in management and leadership. The program stresses the following leadership dimensions: oral and written communications, oral presentations (formal briefings), initiative, sensitivity, influence, planning and organizing, delegation, administrative control, problem analysis, judgment, decisiveness, physical stamina, mission accomplishment, and fellowship. Also stressed are current events, national and international politics, military affairs, ethics training, and human relations with emphasis on eliminating racial and gender discrimination. Management and leadership are taught using the U.S. Army as a model. Military skills (such as drill and ceremonies, map reading, and squad tactics) are taught to create an environment where students can enter leadership positions and apply theories taught in the classroom. Students learn by doing. The program assists students in all academic fields to prepare for positions of leadership in military or civilian careers.

The Department offers two program tracks:

1. a purely academic track, and
2. a precommissioning track for those desiring a commission in the U.S. Army

The academic track entails no obligation to the military and is open to all students. Students pursuing the academic track do not wear a uniform or otherwise participate in extracurricular activities designed as part of the precommissioning process. Activities for all students include the Ranger club (a club designed for adventure activities such as rappel ling, white-water rafting, orienteering, and patrolling) and intramural sports teams.

Students who desire a commission in the U.S. Army participate in both the academic portion of the program and in the leadership laboratories and extracurricular activities designed to enhance their leadership and technical skills. They wear uniforms to leadership laboratories and selected classes and become ROTC cadets. Students may be cadets in the lower division courses without incurring a military obligation. Students participating in the upper division precommissioning program incur a military obligation. See below for details. Extracurricular activities for cadets include an intercollegiate sports team (Ranger Challenge), the university color guard, military honor society, a rifle/pistol team, and opportunities to participate in field training exercises.

**Military Science Program Options**

Students are enrolled in military science under one of two programs.

**Four-Year Program**

Students are enrolled in the basic course (lower division) for the first two years on a voluntary basis. There is no military obligation associated with attendance in lower division courses. Admission to the advanced course (upper division) is by application from second-year lower division students who meet the academic, physical, and military aptitude requirements. Qualified veterans can enter the advanced course immediately because of their military service experience, upon approval by the Department Chair. Upper division students receive $350 (Juniors) or $400 (Seniors) subsistence per month after executing a contract agreeing to complete the course and accept a commission if offered. During the course, all military science textbooks, uniforms and equipment are provided without cost. Students are given leadership development experience at summer camp (advanced camp) between their third and fourth years of the course. Emphasis is on individual participation, leadership development and the capability to function effectively in positions of significant responsibility.

**Two-Year Program**

The two-year program is for students who have not attended lower division Military Science classes. In lieu of lower division courses an applicant attends the Army ROTC National Leader's Camp at Fort Knox, Kentucky. Applicants are paid for camp attendance and transportation costs. Applications are accepted during the winter and spring terms of the year preceding enrollment in the two-year program. All other provisions explained above for the upper division course apply to the two-year program.

**Scholarships**

The U.S. Army offers four-, three-, and two-year Active Duty and two-year Reserve Forces Duty or Dedicated California National Guard scholarships to students planning to attend or attending Sacramento State. The U.S. Army ROTC scholarship package pays tuition and educational fees. Also included in all scholarships is a flat rate of $600 per year for textbooks, up to $400 per year for miscellaneous fees such as laboratory, student activity, transcript, and graduation fees, and a subsistence allowance of up to $400 a month for 10 months for each year that the scholarship is in effect.

The Army Reserve Officers' Training Corps four-year Active Duty merit scholarships are awarded to qualified high school seniors in a national competition each year. There are two cycles available for submission of the four-year scholarship application. High school juniors can compete for an Early Cycles scholarship by submitting their application complete and postmarked by July 15 between their junior and senior years. Applicants will receive notification of their final status by November 1. As high school seniors, students compete for the Regular Cycle scholarship by submitting their application complete and postmarked by December 1. Those applicants not selected in the Early Cycle are considered in the Regular Cycle competition. Applicants will receive notification of their
final status by March 1 of their senior year in high school. Interested applicants should see their high school counselor for an application or contact the UC Davis Department of Military Science at (530) 752-7682.

The three-year Active Duty and two-year Reserve Forces Duty scholarships are awarded to college students who are already attending Sacramento State or transferring from a junior college to Sacramento State, and have three to two years remaining before graduating with a baccalaureate. Students interested in competing for these scholarships can submit their application beginning in November of each school year. The deadline for submission of an application is January 15 for the two-year scholarship and February 15 for the three-year scholarship. Students apply for and are awarded these Army scholarships through the Military Science Department.

Leadership Laboratory
During the course of the school year, several weekends and two hours per week are spent in the conduct of practical exercises. Classes emphasize adventure activities including offense, defense and patrolling techniques, weapons familiarization, rappelling, rope bridging, obstacle course, leadership reaction course, and land navigation. All cadets are required to attend leadership laboratories at the UC Davis campus for practical leadership experience and to prepare for attendance at the Army ROTC Advanced Camp, held at Fort Knox, Kentucky.

AERO 1A. Foundations of the Air Force I. 1 Unit
Term Typically Offered: Fall, Spring
Orientation to the Air Force and AFROTC. Students will gain an understanding of the benefits of Air Force ROTC membership, the Air Force's organizational structure and its installations, jobs and careers available in the Air Force, the American way of war and benefits of Air Force membership. Students will be required to complete an oral and written project.

AERO 1B. Foundations of the Air Force II. 1 Unit
Term Typically Offered: Fall, Spring
Continuation of AERO 1A: completes students' orientation to the Air Force. Specific topics include team building, introduction to leadership, communication skills, Air Force Core Values, diversity and harassment, and the Oath of Office. An oral and written project is required.

AERO 21A. The Evolution of USAF Air and Space Power I. 1 Unit
Term Typically Offered: Fall, Spring
Overview of the history of American air power from the Wright Brothers to the beginning of the Cold War. Key leaders and milestones will be discussed. Communication skills will be emphasized and include: public speaking, writing, and class participation.

AERO 21B. The Evolution of USAF Air and Space Power II. 1 Unit
Term Typically Offered: Fall, Spring
Continuation of AERO 21A. Overview of the history of American air power from Vietnam to today's modern Air Force. Key leaders and milestones will be discussed. Communication skills will be emphasized and include: speaking, writing, and class participation.

AERO 99. Special Problems. 1 - 4 Units
Term Typically Offered: Fall, Spring
Academic study and evaluation in specified topics associated with aerospace development, technology, and doctrine.

Note: Open only to students who appear competent to complete assigned work and who meet prerequisites established by the Department of Aerospace Studies. Approval in writing by the Department Chair required.

Credit/No Credit
AERO 135A. Leadership and Management I. 3 Units
Term Typically Offered: Fall, Spring
Survey of selected concepts, principles, and theories on leadership, followership, management, delegation, mentoring, and responsibility. Students will be given the opportunity to improve speaking and writing skills.

AERO 135B. Leadership and Management II. 3 Units
Term Typically Offered: Fall, Spring
Survey of selected concepts, principles, and theories on team building, speaking and writing effectively, listening, feedback, performance evaluations, ethics, character, and officership. Students will be given the opportunity to improve speaking and writing skills.

AERO 145A. National Security Affairs. 3 Units
Term Typically Offered: Fall, Spring
Provides an overview of the role of the military in our national security policy and processes. It includes an analysis of the roles of the three branches of government as they relate to national security; an examination of the doctrine and organization of the Air Force as well as other branches of the military; an overview of military ethics; and a discussion of global current events which impact our national security. Students will be expected to participate in class discussions and complete a written and oral presentation.
AERO 145B. Preparation for Active Duty. 3 Units
Term Typically Offered: Fall, Spring

Presentation of critical issues facing today's military professionals.
A wide variety of topics are discussed including: the military legal system; the laws of armed conflict; security issues; personal finance; professional/unprofessional relationships; information warfare; and issues pertinent to the first assignment after commissioning into the Air Force. Students will be expected to participate in class discussions and complete a written and oral presentation.

AERO 199. Special Problems. 1 - 4 Units
Term Typically Offered: Fall, Spring

Academic study and evaluation in specified topics associated with aerospace development, technology, and doctrine.
Note: Open only to those students who appear competent to complete assigned work and who meet prerequisites established by the Department of Aerospace Studies. Approval in writing by the Department Chair required.

Credit/No Credit

MILS 14. Introduction to Military Science I. 1 Unit
Term Typically Offered: Fall, Spring

Discussion of the military as one element of national power; its role in American defense; its purpose, weapons and organizations; its participation in international treaties. Discussion of other subjects required for a student to understand the military and its place in modern society. Fall only.

MILS 15. Introduction to Military Science II. 1 Unit
Term Typically Offered: Fall, Spring

Discussion of the military's role in American Society, current society attitudes, sources of its leaders, and an examination of its structure. Spring only.

MILS 24. Principles and Tactics of the Soldier. 1 Unit
Term Typically Offered: Fall, Spring

Familiarizes students with the nine principles of war, and gain an appreciation for the role of the commander in warfare. A study of small unit level will enable the student to understand the nature of the battlefield environment, and will put the decisions of the commander into perspective. These discussions will lead to the discussion of the elements of leadership to be presented in MILS 25. Fall only.

MILS 25. Leadership Assessment and Beginning Counseling Skills. 1 Unit
Term Typically Offered: Fall, Spring

Students will gain insight and practical experience in the manager-leader skills of counseling using the Army's sixteen leadership dimensions as a model. The student will understand the elements of leadership, and undergo the Army's Leadership Assessment Program in class. Interactive role playing scenarios will be conducted and behavior recorded in a group setting. The student will be given individual feedback on the results of the assessment by scheduling a private appointment with the instructor. Spring only.

MILS 99. Special Problems. 1 - 3 Units
Prerequisite(s): Instructor permission.
Term Typically Offered: Fall, Spring

Intensive examination of one or more special problems in Military Science. Possible areas of study include examination of the structure of the military and its place in modern society, participation in international treaties, leadership skills, decision making, as well as other topics in military science.

MILS 134. Principles Of Instruction. 2 Units
Term Typically Offered: Fall, Spring

Principles and practice in fundamentals applicable to military instruction to include planning, presentation, execution and evaluation. Student presentations exemplify lecture material. Application of small combat unit tactics (squad and platoon) will solidify concepts discussed in class. Fall only.

MILS 135. Military Operations. 2 Units
Prerequisite(s): Upper division standing, MILS 134 or instructor permission.
Term Typically Offered: Fall, Spring

Military small unit tactical theory and application are taught and serve as a basis for leadership development. Introduces principals of combat contemporary operating environment, Geneva Law of Land Warfare, and military offensive and defensive operations. Emphasis is placed on developing critical thinking, problem solving, and communication skills. Spring only.

MILS 144. Principles of Military Administration. 2 Units
Term Typically Offered: Fall, Spring

Comprehensive course in the organization, structure, and functions of the various types of staffs and an introduction to the theory and application of military law and legal systems focusing on the Uniform Code of Military Justice and the rights of the accused under the Constitution. Fall only.

MILS 145. Military Leadership and Ethics. 2 Units
Term Typically Offered: Fall, Spring

Capstone seminar designed to bring together all previous Military Science instruction. Examines contemporary leadership problems. Designed to provide the ROTC cadet with the basic management skills necessary for a foundation for future growth as a junior officer. Spring only.

MILS 199. Special Problems. 1 - 3 Units
Prerequisite(s): MILS 14, MILS 15, MILS 24, MILS 25 and Department Chair permission.
Term Typically Offered: Fall, Spring

Intensive examination of one or more special problems in military science. Possible areas of study include leadership dimensions, professional ethics, critical thinking, problem solving, communication skills as well as other topics in military science.

Special Major/Minor

Special Major (Undergraduate) (p. 974)
Special Major (Graduate) (p. 974)
Contact Information

For Undergraduate Special Major:
Special Major (Graduate)

Graduate Program

The Special Major for the Master's degree provides an alternative for superior students whose special needs and interests cannot adequately be met by any one of the existing master's degree programs of the University. The student may earn a Master of Arts or a Master of Science, as appropriate to the department in which the culminating experience requirement is completed. The special major is a coherent program directed towards a clear theme, not available within an existing graduate major. The courses are chosen from two or more departments and may bridge more than one college within the University. The courses must be carefully selected for their correlation and clear applicability to the objective of the unique major being proposed. The proposed program must be compatible with the objects of the University and supportable by courses already offered within the degree programs and by the expertise of the faculty members.

Eligibility

The Special Major program is restricted to superior graduate students who are eligible for admission to classified standing in one of the regular master's degree programs of the University.

Applicants must present evidence of overall undergraduate grade point averages of 3.0 and 3.0 in the last 60 semester units taken.

Courses taken to fulfill prerequisite requirements must be completed with a minimum GPA of 3.5, and they may not be counted toward the degree requirements.

Admission Requirements

Students may apply to the University as unclassified graduate students or directly into a Special Major program.

A Special Major application with department approvals must be submitted no later than the end of the first semester of attendance.

The applicant will need to obtain the assistance and approval of three or more faculty advisors. Because of the interdisciplinary nature of the Special Major, students are required to obtain the assistance and concurrence of faculty advisors from the key instructional units listed in the Program of Study. Obtain the detailed Graduate Special Major guidelines from the Office of Graduate Studies, River Front Center 206, (916) 278-6470. Prepare the program in consultation with the faculty committee.

Advancement to Candidacy

Each student must file an application for Advancement to Candidacy indicating a proposed program of graduate study. This procedure may begin as soon as the classified graduate student has:

- removed any deficiencies in admission requirements;
- completed at least 12 units of 200-level courses with a minimum 3.0 GPA; and
- taken the Writing Placement for Graduate Students (WPG) or taken a Graduate Writing Intensive (GWI) course in their discipline within the first two semesters of coursework at California State University, Sacramento or secured approval for a WPG waiver.

Master of Arts/Master of Science – Special Major

Minimum upper division and graduate level units required: 30

- At least 18 units must be in regularly established lecture or seminar courses at the 200 level (not to include 299 courses).
- No more than six units may be in Independent Study (299 or similar courses).
- No more than six units shall be in any one or in any combination of:
  a. approved extension credit;
  b. transfer credit, for work carrying graduate degree residence credit at another accredited institution. No more than half the units may be in any one department.

Special Major (Undergraduate)

Program Description

When an existing, authorized Bachelor's degree, Minor, Certificate, or Non-Certificate Program of Study does not meet the needs of a student, a Special Major or Minor can be requested. The Special Major or Minor can be a first and only program or a second major or minor. In the latter case, students are encouraged to develop a program of study which complements the first major. Programs will be interdisciplinary in nature and will require at least six units of coursework in each of at least two academic units. Materials describing the procedures and requirements applying to special majors and minors can be obtained from the Dean's office in each of the colleges or online at: www.csus.edu/acaf/ge/Student%20Forms/Revised%20Policy%20for%20Special%20Major.pdf (http://www.csus.edu/acaf/ge/Student%20Forms/Revised%20Policy%20for%20Special%20Major.pdf). All approvals should be obtained at least one year in advance of graduation date. Final special major program plans with appropriate signatures are submitted to the Dean for Undergraduate Studies, Sacramento Hall 234. The program does not qualify for special major authorization until all parties have approved the program.

Eligibility

To qualify for a Special Major or Minor a student must satisfy the following requirements:

- Before submitting the application to begin work on the Special Major, the student must have a combined grade point average of 2.5 on all coursework completed to that point.
- Describe the educational and career objectives sought.
- Identify and justify the relationship of the pattern of study requested to the objectives sought.
• Outline the coursework and academic activity necessary to complete the objectives cited.
• No more than 6 units may be in Independent Study (199 or similar courses) and Fieldwork (195 or similar courses).
• Obtain the assistance and approval of two or more faculty advisors from the key instructional units listed in the Program of Study as well as the Department or Academic Unit Chairs from those units.
• Obtain the approval of the appropriate college dean(s).
• Submit all materials for review and approval to the Office of Undergraduate Studies, Sacramento Hall 234.

Specific Degree Requirements
• A minimum/maximum total of 120 units are required for the Bachelor of Arts or Bachelor of Science Special Major
• A BA Special Major must have a minimum of 24 units
• A BS Special Major must have a minimum of 36 units
• Each Special Major must have a minimum of 6 units in each of the key areas of the degree program
• All other University requirements for a Bachelor’s degree, such as State Code, General Education, upper division minimum requirements, etc. must be met.
• At least two-thirds of the upper division units must be taken in residence at California State University, Sacramento

Program Requirements
Special Major
A minimum of 120 units are required for the Bachelor of Arts or Bachelor of Science Special Major. No more than 6 units may be in Independent Study (199 or similar courses) and Fieldwork (195 or similar courses).

The unit requirements for the major are:
• BA: no less than 24 units with at least 12 upper division units
• BS: no less than 36 units with at least 18 upper division units

In all cases at least two thirds of the upper division units must be taken in residence, i.e., at Sacramento State.

Special Minor
Total units required for the Special Minor: 18, including a minimum of 12 upper division units in the field of specialization.

Office of the President

Programs:
Athletics (p. 975)

Athletics
President’s Office

Program Description
The program of intercollegiate athletics is organized and conducted as an integral part of the total educational program of the University. Academic excellence and athletic accomplishments go hand in hand at Sacramento State. There are three separate and unique missions in this program: to contribute to the educational objectives of the University; to provide a healthy, competitive athletic experience to individual student-athletes; to serve as a public relations vehicle within the community.

The Department of Intercollegiate Athletics offers both academic courses and an intercollegiate athletics program. Academic courses offer the opportunity for individuals to gain knowledge and understanding in a particular area of expertise related to intercollegiate athletics.

Sacramento State has made a strong commitment to the achievement of national excellence at the NCAA Division I level. It also is committed to maintaining an equitable program between men and women.

Special Features
• Most of Sacramento State’s sports are affiliated with the Big Sky Conference.
• Baseball is a member of the Western Athletic Conference
• Men’s Soccer and Beach Volleyball are members of the Big West Conference.
• Gymnastics is a member of the Mountain Pacific Sports Federation.
• Rowing is a member of the American Athletic Conference.
• The Student-Athlete Resource Center (SARC) (Lassen Hall 3002) offers a counseling system for student-athletes, designed specifically by the Department of Intercollegiate Athletics and Student Affairs to ensure academic development.

Student-Athlete Special Action Review Committee
The Student-Athlete Special Action (SASA) Committee will be convened at the request of the Athletic Admissions & Initial Eligibility Coordinator. The SASA Committee’s purpose is to review, on a case-by-case basis at the request of the Athletic Admissions & Initial Eligibility Coordinator, prospective student-athlete applicants to California State University, Sacramento who do not meet University admission standards and/or NCAA eligibility requirements. The SASA Committee will consider and provide recommendations to the Director of Admissions on whether an applicant should be granted special admission to the University. The primary information to be reviewed will be the applicant’s overall academic performance as demonstrated by grade point average, SAT/ACT scores, and/or complete college coursework. Additional educational evidence may also be considered (e.g., at-risk issues, family background, and learning disability).

The SASA Committee will be comprised of the following individuals and should include at least four voting representatives (five preferred) present at any requested meeting.
1. NCAA Faculty Athletic Representative
2. Director of the Academic Advising Center (or their designee)
3. Representative from the Student-Athlete Resource Center (SARC)
4. Associate Athletic Director (e.g. Senior Woman Administrator or Associate Athletic Director)
5. Faculty member of the Intercollegiate Athletics Advisory Committee (IAAC)
6. Campus staff/faculty/administrator (outside of Athletics and/or SARC) and may include a representative from International Programs
and Global Education (IPGE) if the prospective student-athlete is an international student.

Other staff may attend a SASA Review Committee meeting to provide background or serve as support to the committee based on their relationship to the particular case. Example: head coach, admissions representative, SARC Director, International Programs and Global Education representative, etc.

The following process will be used in the review of each case:

1. If a prospective student-athlete does not meet University admission standards, is denied admission, or denied an admissions appeal to the University because he or she has demonstrated a lack of academic preparedness to succeed in college, the coach may request that the Athletic Admissions & Initial Eligibility Coordinator schedule a meeting with the SASA Committee to review the admission status of the prospective student-athlete and determine whether the granting of a special admission is warranted. This request may also come from the Undergraduate Admissions Committee or a member of the Office of Global Education depending on the specific student and situation.

2. The prospective student-athlete, coach and/or athletic director are encouraged to forward or present any relevant information to the SASA Committee for its review and consideration. This can include the prospective student-athlete being present during the meeting to answer questions and present any background information they believe is important in considering their application.

3. The admission decision recommended by the SASA Committee for each applicant will be forwarded in writing to the Director of Admission via the Athletic Admissions & Initial Eligibility Coordinator and should include any stipulations or expectations that relate to the student-athlete's admissions recommendation.

4. The Director of Admissions will communicate in writing the final admissions decision(s) on each applicant to the respective head coach, the athletics director and the Athletic Admissions & Initial Eligibility Coordinator.

5. If any stipulations or expectations of the admissions decision(s) are recommended and accepted by the Director of Admissions, a written memorandum of understanding for the approved applicant(s) will be produced by the Athletic Admissions & Initial Eligibility Coordinator and signed by the head coach, student-athlete, and athletic director.

ATIC 61. Men's Cross Country. 2 Units
Prerequisite(s): Intercollegiate Student Athletes only
Term Typically Offered: Fall, Spring
Practice begins mid-August and the season ends in mid-November. Credit/No Credit

ATIC 62. Men's Tennis. 2 Units
Prerequisite(s): Intercollegiate Student Athletes only
Term Typically Offered: Fall, Spring
Practice begins the first day of the fall semester and the spring schedule ends the last of May. Credit/No Credit

ATIC 63. Men's Track and Field. 2 Units
Prerequisite(s): Intercollegiate Student Athletes only
Term Typically Offered: Fall, Spring
Indoor Track and Field practice begins in the fall. The competitive season is in the winter. Outdoor Track and Field practice begins the first day of spring semester and the season ends the last week of May. Credit/No Credit

ATIC 64. Men's Baseball. 2 Units
Prerequisite(s): Intercollegiate Student Athletes only
Term Typically Offered: Fall, Spring
Practice begins in the fall with the competitive season starting February 1. The 56-game schedule is followed by the NCAA Championships for qualified teams in May. Credit/No Credit

ATIC 65. Men's Basketball. 2 Units
Prerequisite(s): Intercollegiate Student Athletes only
Term Typically Offered: Fall, Spring
Practice begins mid-October. The season ends in late February and leads to NCAA Championships for qualified teams. Credit/No Credit
ATIC 66. Men's Football.
Prerequisite(s): Intercollegiate Student Athletes only
Term Typically Offered: Fall, Spring

Daily afternoon practice begins in late August. The 10-11 game schedule is followed by NCAA Championships for qualified teams in late November. There is also spring practice which follows NCAA regulations as to starting date.
Credit/No Credit

ATIC 67. Men's Golf.
Prerequisite(s): Intercollegiate Student Athletes only
Term Typically Offered: Fall, Spring

Practice begins fall semester Monday through Friday starting at noon.
Credit/No Credit

ATIC 68. Men's Soccer.
Prerequisite(s): Intercollegiate Student Athletes only
Term Typically Offered: Fall, Spring

Morning and afternoon practices begin in mid-August in accordance with NCAA regulations. Competitive season begins the first week of September and ends in mid-November. Daily practices during fall semester are from 3:00-6:00 p.m. Daily practices during the spring semester are also from 3:00-6:00 p.m. beginning the third week in February and ending the last week in April. You must see the head coach for permission to tryout.
Credit/No Credit

ATIC 80. Women's Basketball.
Prerequisite(s): Intercollegiate Student Athletes only
Term Typically Offered: Fall, Spring

Practice begins mid-October. The competitive season begins in November and continues to the end of February leading to the NCAA Championships for qualified teams.
Credit/No Credit

ATIC 81. Women's Golf.
Prerequisite(s): Intercollegiate Student Athletes only
Term Typically Offered: Fall, Spring

Practice begins the second week of September. Competition consists of one or two matches in the fall and the remaining part of the schedule is during the spring semester. Interested student-athletes who would like to walk on and try out for the team should contact the coach.
Credit/No Credit

ATIC 82. Women's Soccer.
Prerequisite(s): Intercollegiate Student Athletes only
Term Typically Offered: Fall, Spring

Morning and afternoon practices begin in mid-August in accordance with NCAA regulations. Competitive season begins the first week of September and ends in mid-November. Daily practices during fall semester are from 2:00-4:00 p.m.
Credit/No Credit

ATIC 83. Women's Gymnastics.
Prerequisite(s): Intercollegiate Student Athletes only
Term Typically Offered: Fall, Spring

Practice begins in September. The competitive season starts in January and ends in late April with the NCAA Championships for qualified teams. Daily practices are 12:30-4:00 p.m. Student-athletes must contact the coach prior to tryouts.
Credit/No Credit

ATIC 84. Women's Softball.
Prerequisite(s): Intercollegiate Student Athletes only
Term Typically Offered: Fall, Spring

Practice begins in the fall with the competitive season starting mid-February. The 56-game schedule is followed by NCAA Championships in late May for qualified teams. Daily practices are 1:30-5:30 p.m.
Credit/No Credit

ATIC 85. Women's Rowing.
Prerequisite(s): Intercollegiate Student Athletes only
Term Typically Offered: Fall, Spring

Rowing accommodates both scholarship and walk-on athletes with no experience necessary. Tall cross-over student-athletes are encouraged to turn out. Daily practice starts in September, 6:00-8:30 a.m. There is a fall semester long distance race season and a traditional "sprint" season in the spring semester, concluding with the National Championships in May. All student-athletes race. No limit on squad size. Freshman/Novice, Junior Varsity and Varsity squads, lightweight (130 lbs.) or open. Also, coxswains required. Should be under 115 lbs.
Credit/No Credit

ATIC 86. Women's Tennis.
Prerequisite(s): Intercollegiate Student Athletes only
Term Typically Offered: Fall, Spring

Practice begins the first day of the fall semester and the spring schedule ends the last of May.
Credit/No Credit

ATIC 87. Women's Volleyball.
Prerequisite(s): Intercollegiate Student Athletes only
Term Typically Offered: Fall, Spring

Preseason begins in mid-August. Competition begins September 1 and ends in mid-December with NCAA Championships for qualified teams. Daily practices are 2:00-5:00 p.m. Interested student-athletes must contact the coach prior to the preseason, be cleared by the Clearinghouse, and meet all eligibility requirements in order to participate in tryouts.
Credit/No Credit

ATIC 88. Women's Cross Country.
Prerequisite(s): Intercollegiate Student Athletes only
Term Typically Offered: Fall, Spring

Practice begins mid-August and the season ends in mid-November.
Credit/No Credit
ATIC 89. Women's Track and Field. 2 Units
Prerequisite(s): Intercollegiate Student Athletes only
Term Typically Offered: Fall, Spring

Indoor Track and Field practice begins in the fall. The competitive season is in the Winter. Outdoor Track and Field practice begins the first day of spring semester and the season ends the last week of May.

Credit/No Credit

ATIC 167. Coaching of Football. 3 Units
Term Typically Offered: Fall, Spring

Examines all phases of the game, including offense, defense and special teams. Other topics covered are public/media relations, budget management, academic rules, marketing strategies, officiating, equipment and many other aspects. Lecture two hours, activity two hours.

ATIC 175. Sports Information Fieldwork. 1 - 3 Units
Prerequisite(s): JOUR 123 or instructor permission.
Term Typically Offered: Fall, Spring

Directed observations and work experience with intercollegiate athletics sports information support services. Field work is offered to give students orientation in the profession of sports information services. Supervision is provided by the instructional staff of the university. Each student is required to maintain a record of activities and assignments and to prepare periodic reports.

Note: May be repeated once for credit.

Credit/No Credit

ATIC 195. Field Experience in Intercollegiate Athletics. 1 - 3 Units
Term Typically Offered: Fall, Spring

Directed experience in athletics. Student interns keep records of daily experiences and prepare periodic progress reports. Succeeding enrollments should be in different sports.

Note: Registration requires prior approval of Director of Athletics.

Credit/No Credit

ATIC 199. Directed Individual Study. 1 - 3 Units
Term Typically Offered: Fall, Spring

Individual research, project or directed reading.

Note: Registration requires approval of the faculty under whom the individual work is to be conducted and the Director of Athletics.

Credit/No Credit
Appendix A: Determination of Residency for Tuition Purposes

University requirements for establishing residency for tuition purposes are independent from those of other types of residency, such as for tax purposes, or other state or institutional residency. These regulations were promulgated not to determine whether a student is a resident or nonresident of California, but rather to determine whether a student should pay University fees on an in-state or out-of-state basis. A resident for tuition purposes is someone who meets the requirements set forth in the Uniform Student Residency Requirements. These laws governing residency for tuition purposes at the California State University are California Education Code sections 68000-68085, 68120-68133, and 89705-89707.5, and California Code of Regulations, Title 5, Subchapter 5, Article 4, sections 41900-41916. Residency material can be viewed by accessing the website (http://www.calstate.edu/sas/residency).

Each campus’ Admissions Office is responsible for determining the residency status of all new and returning students based on the Application for Admission, Residency Questionnaire, Reclassification Request Form, and, as necessary, other evidence furnished by the student. A student who fails to submit adequate information to establish eligibility for resident classification will be classified as a nonresident.

Generally, establishing California residency for tuition purposes requires a combination of physical presence and intent to remain indefinitely in the State of California. An adult who, at least 366 days prior to the residency determination date for the term in which enrollment is contemplated, can demonstrate both physical presence in the state combined with evidence of intent to remain in California indefinitely may establish California residency for tuition purposes. A minor normally derives residency from the parent(s) with whom he/she resides with or most recently resided.

Evidence demonstrating intent may vary from case to case but will include, and is not limited to, the absence of residential ties to any other state, California voter registration and voting in California elections, maintaining California vehicle registration and driver’s license, maintaining active California bank accounts, filing California income tax returns and listing a California address on federal tax returns, owning residential property or occupying or renting a residence where permanent belongings are kept, maintaining active memberships in California professional or social organizations, and maintaining a permanent military address and home of record in California.

A nonresident student seeking reclassification is required to complete a supplemental questionnaire that includes questions concerning his/her financial independence. Financial independence is required, in addition to physical presence and intent to remain indefinitely, to be eligible for reclassification. Financial independence is established if in the calendar year the reclassification application is made and in any of the three calendar years preceding the reclassification application the student:

- has not and will not be claimed as an exemption for state and federal tax purposes by his/her parent(s);
- has not and will not receive more than $750 per year in financial assistance from his/her parent(s); and
- has not lived and will not live longer than six (6) weeks in the home of his/her parent(s).

A nonresident student who has been appointed as a graduate student teaching assistant, a graduate student research assistant, or a graduate student teaching associate on any CSU campus and is employed on a 0.49 or more time basis is exempt from the financial independence requirement.

Non-citizens establish residency in the same manner as citizens, unless precluded by the Immigration and Nationality Act from establishing domicile in the United States.

Exceptions to the general residency requirements are contained in California Education Code sections 68070-68085 and California Code of Regulations, Title 5, Subchapter 5, Article 4, sections 41906-41906.6, 41910. Whether an exception applies to a particular student can only be determined after the submission of an application for admission and, as necessary, additional supporting documentation. Because neither the campus nor Chancellor’s Office staff may give advice on the application of these laws, applicants are strongly urged to review the material for themselves and consult with a legal advisor.

Residency determination dates are set each term. They are:

Students classified as nonresidents may appeal a final campus decision within 30 days of notification by the campus. Information on the appeal process may be found online (http://www.calstate.edu/sas/residency/appeals.shtml). A campus residency classification appeal must be submitted via the InfoReady online Residence Appeal Form to the California State University Chancellor’s Office (http://calstate.infoready4.com/#competitionDetail/1760156).

Appeals via email, fax, and U.S. mail will NOT be accepted. A student with documents disability that prohibits student from submitting an appeal through the InfoReady site should contact Student Academic Services:

The California State University
Attn: Student Academic Services
401 Golden Shore, 6th Floor
Long Beach, California 90802-4210
Email: residencyappeals@calstate.edu
The Chancellor’s Office can either decide the appeal or send the matter back to the campus for further review. Students incorrectly classified as residents or incorrectly granted an exception from nonresident tuition are subject to reclassification as nonresidents and payment of nonresident tuition in arrears. If incorrect classification results from false or concealed facts, the student is also subject to discipline pursuant to Section 41301 of Title 5 of the California Code of Regulations.

Resident students who become nonresidents or who no longer meet the criteria for an exception must immediately notify the Admissions Office. Changes may have been made in the rate of nonresident tuition and in the statutes and regulations governing residency for tuition purposes in California between the time this information is published and the relevant residency determination date. Students are urged to review the statutes and regulations stated above.

Appendix B: Student Conduct

Title 5, California Code of Regulations, § 41301 Standards for Student Conduct.

Campus Community Values

The University is committed to maintaining a safe and healthy living and learning environment for students, faculty, and staff. Each member of the campus community should choose behaviors that contribute toward this end. Students are expected to be good citizens and to engage in responsible behaviors that reflect well upon their university, to be civil to one another and to others in the campus community, and contribute positively to student and university life.

Grounds for Student Discipline

Student behavior that is not consistent with the Student Conduct Code is addressed through an educational process that is designed to promote safety and good citizenship and, when necessary, impose appropriate consequences. The following are the grounds upon which student discipline can be based:

1. Dishonesty, including:
   a. Cheating, plagiarism, or other forms of academic dishonesty that are intended to gain unfair academic advantage.
   b. Furnishing false information to a University official, faculty member, or campus office.
   c. Forgery, alteration, or misuse of a University document, key, or identification instrument.
   d. Misrepresenting one’s self to be an authorized agent of the University or one of its auxiliaries.

2. Unauthorized entry into, presence in, use of, or misuse of University property.

3. Willful, material and substantial disruption or obstruction of a University-related activity, or any on-campus activity.

4. Participating in an activity that substantially and materially disrupts the normal operations of the University, or infringes on the rights of members of the University community.

5. Willful, material, and substantial obstruction of the free flow of pedestrian or other traffic, on or leading to campus property or an off-campus University related activity.

6. Disorderly, lewd, indecent, or obscene behavior at a University related activity, or directed toward a member of the University community.

7. Conduct that threatens or endangers the health or safety of any person within or related to the University community, including physical abuse, threats, intimidation, harassment, or sexual misconduct.

8. Hazing or conspiracy to haze. Hazing is defined as any method of initiation or pre-initiation into a student organization or student body, whether or not the organization or body is officially recognized by an educational institution, which is likely to cause serious bodily injury to any former, current, or prospective student of any school, community college, college, university or other educational institution in this state (Penal Code 245.6), and in addition, any act likely to cause physical harm, personal degradation or disgrace resulting in physical or mental harm, to any former, current, or prospective student of any school, community college, college, university or other educational institution. The term “hazing” does not include customary athletic events or school sanctioned events. Neither the express or implied consent of a victim of hazing, nor the lack of active participation in a particular hazing incident is a defense. Apathy or acquiescence in the presence of hazing is not a neutral act, and is also a violation of this section.

9. Use, possession, manufacture, or distribution of illegal drugs or drug-related paraphernalia, (except as expressly permitted by law and University regulations) or the misuse of legal pharmaceutical drugs.

10. Use, possession, manufacture, or distribution of alcoholic beverages (except as expressly permitted by law and University regulations), or public intoxication while on campus or at a University related activity.

11. Theft of property or services from the University community, or misappropriation of University resources.

12. Unauthorized destruction, or damage to University property or other property in the University community.

13. Possession or misuse of firearms or guns, replicas, ammunition, explosives, fireworks, knives, other weapons, or dangerous chemicals (without the prior authorization of the campus president) on campus or at a University related activity.

14. Unauthorized recording, dissemination, or publication of academic presentations (including handwritten notes) for a commercial purpose.

15. Misuse of computer facilities or resources, including:
   a. Unauthorized entry into a file, for any purpose.
   b. Unauthorized transfer of a file.
   c. Use of another’s identification or password.
   d. Use of computing facilities, campus network, or other resources to interfere with the work of another member of the University Community.
   e. Use of computing facilities and resources to send obscene or intimidating and abusive messages.
   f. Use of computing facilities and resources to interfere with normal University operations.
   g. Use of computing facilities and resources in violation of copyright laws.
   h. Violation of a campus computer use policy.

16. Violation of any published University policy, rule, regulation, or presidential order.

17. Failure to comply with directions of, or interference with, any University official or any public safety officer while acting in the performance of his/her duties.

18. Any act chargeable as a violation of a federal, state, or local law that poses a substantial threat to the safety or wellbeing of members of the University community, to property within the University community or poses a significant threat of disruption or interference with University operations.

19. Violation of the Student Conduct Procedures, including:
a. Falsification, distortion, or misrepresentation of information related to a student discipline matter.
b. Disruption or interference with the orderly progress of a student discipline proceeding.
c. Initiation of a student discipline proceeding in bad faith.
d. Attempting to discourage another from participating in the student discipline matter.
e. Attempting to influence the impartiality of any participant in a student discipline matter.
f. Verbal or physical harassment or intimidation of any participant in a student discipline matter.
g. Failure to comply with the sanction(s) imposed under a student discipline proceeding.

20. Encouraging, permitting, or assisting another to do any act that could subject him or her to discipline.

Procedures for Enforcing This Code
The Chancellor shall adopt procedures to ensure students are afforded appropriate notice and an opportunity to be heard before the University imposes any sanction for a violation of the Student Conduct Code.

Application of This Code
Sanctions for the conduct listed above can be imposed on applicants, enrolled students, students between academic terms, graduates awaiting degrees, and students who withdraw from school while a disciplinary matter is pending. Conduct that threatens the safety or security of the campus community, or substantially disrupts the functions or operation of the University is within the jurisdiction of this Article regardless of whether it occurs on or off campus. Nothing in this Code may conflict with Education Code Section 66301 that prohibits disciplinary action against students based on behavior protected by the First Amendment.

Title 5, California Code of Regulations, Section 41302. Disposition of Fees: Campus Emergency; Interim Suspension.
The President of the campus may place on probation, suspend, or expel a student for one or more of the causes enumerated in Section 41301. No fees or tuition paid by or for such student for the semester, quarter, or summer session in which he or she is suspended or expelled shall be refunded. If the student is readmitted before the close of the semester, quarter, or summer session in which he or she is suspended, no additional tuition or fees shall be required of the student on account of the suspension.

During periods of campus emergency, as determined by the President of the individual campus, the President may, after consultation with the Chancellor, place into immediate effect any emergency regulations, procedures, and other measures deemed necessary or appropriate to meet the emergency, safeguard persons and property, and maintain educational activities.

The President may immediately impose an interim suspension in all cases in which there is reasonable cause to believe that such an immediate suspension is required in order to protect lives or property and to insure the maintenance of order. A student so placed on interim suspension shall be given prompt notice of charges and the opportunity for a hearing within 10 days of the imposition of interim suspension. During the period of interim suspension, the student shall not, without prior written permission of the President or designated representative, enter any campus of the California State University other than to attend the hearing. Violation of any condition of interim suspension shall be grounds for expulsion.

Appendix C: Privacy Rights of Students in Education Records
The federal Family Educational Rights and Privacy Act of 1974 (20 U.S.C. 1232g) and regulations adopted thereunder (34 C.F.R. 99) set out requirements designed to protect students' privacy in their records maintained by the campus. The statute and regulations govern access to certain student records maintained by the campus and the release of such records. The law provides that the campus must give students access to most records directly related to the student, and must also provide opportunity for a hearing to challenge the records if the student claims they are inaccurate, misleading, or otherwise inappropriate. The right to a hearing under this law does not include any right to challenge the appropriateness of a grade determined by the instructor. The law generally requires the institution to receive a student's written consent before releasing personally identifiable data about the student. The institution has adopted a set of policies and procedures governing implementation of the statute and the regulations. Copies of these policies and procedures may be obtained at Lassen Hall 3008. Among the types of information included in the campus statement of policies and procedures are:

1. the types of student records maintained and the information they contain;
2. the official responsible for maintaining each type of record;
3. the location of access lists indicating persons requesting or receiving information from the record;
4. policies for reviewing and expunging records;
5. student access rights to their records;
6. the procedures for challenging the content of student records;
7. the cost to be charged for reproducing copies of records; and
8. the right of the student to file a complaint with the Department of Education.

The Department of Education has established an office and review board to investigate complaints and adjudicate violations. The designated office is:

Family Policy Compliance Office
U.S. Department of Education
400 Maryland Avenue, SW
Washington, D.C. 20202-5920.

The campus is authorized under the Act to release "directory information" concerning students. "Directory information" may include the student's name, address, telephone listing, electronic mail address, photograph, date and place of birth, major field of study, participation in officially recognized activities and sports, weight and height of members of athletic teams, dates of attendance, grade level, enrollment status, degrees, honors, and awards received, and the most recent previous educational agency or institution attended by the student. The above-designated information is subject to release by the campus at any time unless the campus has received prior written objection from the student specifying what information the student requests not be released. Written objections should be sent to the Office of the University Registrar.

The campus is authorized to provide access to student records to campus officials and employees who have legitimate educational
interests in such access. These persons have responsibilities in the campus’s academic, administrative or service functions and have reason for accessing student records associated with their campus or other related academic responsibilities. Student records will be disclosed to the Chancellor’s Office of the CSU in order to conduct research, to analyze trends, or to provide other administrative services on behalf of the CSU. Student records may also be disclosed to other persons or organizations under certain conditions (e.g., as part of the accreditation or program evaluation; in response to a court order or subpoena; in connection with financial aid; or to other institutions to which the student is transferring).

All student records of the California State University, including California State University, Sacramento, are kept in accordance with the provisions of the Family Educational Rights and Privacy Act of 1974, as amended.

The Family Educational Rights and Privacy Act (FERPA) affords students certain rights with respect to their education records. These rights include:

1. The right to inspect and review the student’s education records within 45 days of the day the University receives a request for access. Students should submit to the registrar, dean, head of the academic department, or other appropriate official, written requests that identify the record(s) they wish to inspect. The University official will make arrangements for access and notify the student of the time and place where the records may be inspected. If the records are not maintained by the University official to whom the request was submitted, that official shall advise the student of the correct official to whom request should be addressed.

2. The right to request the amendment of the student’s education records that the student believes are inaccurate or misleading. Students may ask the University to amend a record that they believe is inaccurate or misleading. They should write the University official responsible for the record, clearly identify the part of the record they want changed, and specify why it is inaccurate or misleading. If the University decides not to amend the record as requested by the student, the University will notify the student of the decision and advise information regarding the hearing procedures will be provided to the student when notified of the right to a hearing.

3. The right to consent to disclosures of personally identifiable information contained in the student’s education records and the right to withdraw consent to disclosure FERPA authorizes disclosure without consent to school officials with legitimate educational interests. A school official is a person employed by the University in an administrative, supervisory, academic, research, or support staff position (including law enforcement unit personnel and health staff); a person or company with whom the University has contracted (such as an auditor, clearinghouse, or collection agent); a person serving on the Board of Trustees; or a student serving on an official committee or assisting another school official in performing his or her tasks. A school official has a legitimate educational interest if the official needs to review an education record in order to fulfill his or her professional responsibility. In addition, the University may disclose education records without consent upon request a) to officials of another school in which a student seeks or intends to enroll, and b) to a parent who establishes that student’s status as a dependent according to Internal Revenue Code.

4. The right to file a complaint with the U.S. Department of Education concerning alleged failures by California State University, Sacramento to comply with the requirements of FERPA. The name and address of the office that administers FERPA is Family Policy Compliance Office U.S. Department of Education 400 Maryland Avenue, SW Washington, DC 20202-4605

5. California State University, Sacramento shall exercise its prerogative within the Family Educational Rights and Privacy Act, as amended, and release directory information to any person, party, or agency, so long as the student has not requested confidentiality. University directory information is defined as that information contained in an education record of the student that generally would not be considered harmful or an invasion of privacy if disclosed. The following is considered Direct Information and Sacramento State will release and make available to the public unless notified by the student to withhold release of this information: Student’s name, addresses, University email address, telephone number, likenesses used in University publications including photographs, date of birth, major field of study, class level, dates of attendance, enrollment status (part/full-time), degrees earned, awards and honors (e.g., Dean’s Honor List) received, participation in University recognized activities and sports, weight and health of members of athletic teams and most recent educational agency or institution attended by the student. For student employees covered by the Unit 11 Collective Bargaining Agreement with the United Auto Workers (e.g., Teaching Associates, Graduate Assistants, and Instructional Student Assistants), directory information which may be released by the CSU to the UAW also includes: enrollment status (undergraduate vs. graduate, part-time vs. full-time), department employed and employment status (e.g., TA, GA, or ISA). Data may be added to or removed from the definition of directory information from time to time. Only currently enrolled students may withhold disclosure of directory information by filing a request form with the Office of the Registrar through the Student Services Counter.

For more information about FERPA, please go to the University Registrar’s website (http://www.csus.edu/registrar/Confidentiality %20FERPA).

Appendix D: Average Support Cost & Source of Funds Per Full-Time Equivalent Student

The total support cost per full-time equivalent student (FTES) includes the expenditures for current operations, including payments made to students in the form of financial aid, and all fully reimbursed programs contained in state appropriations. The average support cost is determined by dividing the total cost by the number of FTES. The total CSU 2017/18 budget amounts were $3,390,564,000 from state General Fund (GF) appropriations and before adding $39.3 million CalPERS retirement adjustment, $2,477,015,000 from gross tuition revenue, and $594,397,000 from other fee revenues for a total of $6,461,976,000. The 2017/18 resident FTES target is 364,131 and the nonresident FTES based on past-year actual is 24,398 for a total of 388,529 FTES. The GF appropriation is applicable to resident students only whereas fee revenues are collected from resident and nonresident students. FTES is determined by dividing the total academic student load (e.g. 15 units per semester) (the figure used here to define a full-time student’s academic load).

The 2017/18 average support cost per FTES based on GF appropriation and tuition revenue only is $15,687 and when including all three sources as indicated below is $17,217, which includes all fee revenue (e.g. tuition, application fees, and other campus mandatory fees) in the CSU Operating
President. The President may adjust campus-based mandatory fees referendum and the fee committee review are advisory to the campus if he/she determines that a referendum is not the best mechanism.

III. The campus President may use alternate consultation mechanisms Revenue Bond Act of 1947, including, but not limited to, Education Code student center fees may be established only after a fee referendum is held which approves establishment of the fee (Education Code, Section 89304). Once bonds are issued, authority to set and adjust fees shall be subject to referendum at any time upon the presentation of a voting in a referendum established for that purpose. The required fee adjustment has been approved by a majority of students after the fee adjustment has been approved by a majority of students enrolling in, or attend the university is $7,216 ($5,742 tuition fee plus $1,474 average campus-based fees). However, the costs paid by individual students will vary depending on campus, program, and whether a student is part-time, full-time, resident, or nonresident.

Appendix E: Procedure for the Establishment or Abolishment of Campus-Based Mandatory Fees

The law governing the California State University provides that specific campus fees defined as mandatory, such as a student association fee and a student center fee, may be established. A student association fee must be established upon a favorable vote of two-thirds of the students voting in an election held for this purpose (Education Code, Section 89300). The campus President may adjust the student association fee only after the fee adjustment has been approved by a majority of students voting in a referendum established for that purpose. The required fee shall be subject to referendum at any time upon the presentation of a petition to the campus President containing the signatures of 10 percent of the regularly enrolled students at the University. Student association fees support a variety of cultural and recreational programs, childcare centers, and special student support programs. A student center fee may be established only after a fee referendum is held which approves by a two-thirds favorable vote the establishment of the fee (Education Code, Section 89304). Once bonds are issued, authority to set and adjust student center fees is governed by provisions of the State University Revenue Bond Act of 1947, including, but not limited to, Education Code sections 90012, 90027, and 90068.

The process to establish and adjust other campus-based mandatory fees requires consideration by the campus fee advisory committee and a student referendum as established by Executive Order 1102, Section III. The campus President may use alternate consultation mechanisms if he/she determines that a referendum is not the best mechanism to achieve appropriate and meaningful consultation. Results of the referendum and the fee committee review are advisory to the campus President. The President may adjust campus-based mandatory fees but must request the Chancellor to establish a new mandatory fee. The President shall provide to the campus fee advisory committee a report of all campus-based mandatory fees. The campus shall report annually to the Chancellor a complete inventory of all campus-based mandatory fees.

For more information or questions, please contact the Budget Office in the CSU Chancellor’s Office at (562) 951-4560.

Appendix F: Nondiscrimination Policy and Complaint Procedures

Protected Status: Genetic Information, Marital Status, Medical Condition, Nationality, Race or Ethnicity (including color or ancestry), Religion or Religious Creed, and Veteran or Military Status.

The California State University does not discriminate on the basis of age, genetic information, marital status, medical condition, nationality, race or ethnicity (including color and ancestry), religion (or religious creed), and veteran or military status - as these terms are defined by CSU policy - in its programs and activities, including admission and access. Federal and state laws, including Title VI of the Civil Rights Act of 1964 and the California Equity in Higher Education Act, prohibit such discrimination. The Office for Equal Opportunity has been designated to coordinate the efforts of California State University, Sacramento to comply with all applicable federal and state laws prohibiting discrimination on these bases. Inquiries concerning compliance may be presented to William “Skip” Bishop, Director of Equal Opportunity, at California State University, Sacramento 6000 J Street, Sacramento, CA 95819-6032, (916) 278-5770. CSU Executive Order 1097 Revised October 5, 2016 (http://www.calstate.edu/eqo/EO-1097-rev-10-5-16) (or any successor executive order) is the systemwide procedure for all complaints of discrimination, harassment or retaliation made by students against the CSU, a CSU employee, other CSU students or a third party.

Protected Status: Disability

The California State University does not discriminate on the basis of Disability (physical and mental) - as this term is defined in CSU policy - in its programs and activities, including admission and access. Federal and state laws, including sections 504 and 508 of the Rehabilitation Act of 1973 and the Americans with Disabilities Act of 1990, prohibit such discrimination. The Office for Equal Opportunity has been designated to coordinate the efforts of California State University, Sacramento to comply with all applicable federal and state laws prohibiting discrimination on the basis of disability. Inquiries concerning compliance may be presented to William “Skip” Bishop, Director of Equal Opportunity, at California State University, Sacramento 6000 J Street, Sacramento, CA 95819-6032, (916) 278-5770. CSU Executive Order 1097 Revised October 5, 2016 (http://www.calstate.edu/eqo/EO-1097-rev-10-5-16.html) (or any successor executive order) is the systemwide procedure for all complaints of discrimination, harassment or retaliation made by students against the CSU, a CSU employee, other CSU students or a third party.

Protected Status: Gender (or sex), Gender Identity (including transgender), Gender Expression and Sexual Orientation

The California State University does not discriminate on the basis of Gender (or sex), Gender Identity (including transgender), Gender Expression or Sexual Orientation in its programs and activities, including admission and access. Federal and state laws, including Title IX of the Education Amendments of 1972, prohibit such discrimination. William “Skip” Bishop, the Director of Equal Opportunity, has been designated to coordinate the efforts of California State University, Sacramento.

<sup>1</sup> Represents state GF appropriation in the Budget Act of 2017/18; GF is divisible by resident students only (364,131 FTES)
<sup>2</sup> Represents CSU Operating Fund, gross tuition and other fees revenue amounts submitted in campus August 2017/18 final budgets. Revenues are divisible by resident and nonresident students (388,529 FTES).
to comply with all applicable federal and state laws prohibiting discrimination on these bases. Inquires concerning compliance may be presented to the Office for Equal Opportunity at (916) 278-5770, equalopportunity@csus.edu, or visit our website at www.csus.edu/hr/departments/equal-opportunity/ (http://www.csus.edu/hr/departments/equal-opportunity). The California State University is committed to providing equal opportunities to male and female CSU students in all campus programs, including intercollegiate athletics. CSU Executive Order 1097 Revised October 5, 2016 (http://www.calstate.edu/ eo-1097-rev-10-5-16.html) or any successor executive order) is the systemwide procedure for all complaints of discrimination, harassment or retaliation made by students against the CSU, a CSU employee, other CSU students or a third party.

Title IX of the Education Amendments of 1972 protects all people regardless of their Gender, Gender Identity, Gender Expression or Sexual Orientation from gender discrimination, which includes sexual harassment and violence:

**Sex discrimination** means an adverse action taken against a student by the CSU, a CSU employee, or another student because of Gender or Sex (including Sexual Harassment, Sexual Misconduct, Domestic Violence, Dating Violence, and Stalking) that is perpetrated against an individual on a basis prohibited by Title IX of the Education Amendments of 1972, 20 U.S.C. §1681 et seq., and its implementing regulations, 34 C.F.R. Part 106 (Title IX); California Education Code §66250 et seq., and/or California Government Code §11135.

**Sexual Harassment**, a form of Sex Discrimination, is unwelcome verbal, nonverbal or physical conduct of a sexual nature that includes but is not limited to sexual advances, requests for sexual favors, and any other conduct of a sexual nature where:

1. Submission to, or rejection of, the conduct is explicitly or implicitly used as the basis for any decision affecting a Complainant’s academic status or progress, or access to benefits and services, honors, programs, or activities available at or through the University; or
2. The conduct is sufficiently severe, persistent or pervasive that its effect, whether or not intended, could be considered by a reasonable person in the shoes of the Complainant, and is in fact considered by the Complainant, as limiting his or her ability to participate in or benefit from the services, activities or opportunities offered by the University; or
3. The conduct is sufficiently severe, persistent or pervasive that its effect, whether or not intended, could be considered by a reasonable person in the shoes of the Complainant, and is in fact considered by the Complainant, as creating an intimidating, hostile or offensive environment.

Sexual Harassment could include being forced to engage in unwanted sexual contact as a condition of membership in a student organization; being subjected to video exploitation or a campaign of sexually explicit graffiti; or frequently being exposed to unwanted images of a sexual nature in a classroom that are unrelated to the coursework.

Sexual Harassment also includes acts of verbal, non-verbal or physical aggression, intimidation or hostility based on Gender or sex-stereotyping, even if those acts do not involve conduct of a sexual nature.

Executive Order 1097 covers unwelcome conduct of a sexual nature. While romantic, sexual, intimate, personal or social relationships between members of the University community may begin as consensual, they may evolve into situations that lead to Sexual Harassment or Sexual Misconduct, including Dating or Domestic Violence, or Stalking, subject to this policy.

Claiming that the conduct was not motivated by sexual desire is not a defense to a complaint of harassment based on Gender.

**Sexual misconduct:** All sexual activity between members of the University community must be based on affirmative consent. Engaging in any sexual activity without first obtaining affirmative consent to the specific activity is sexual misconduct, whether or not the conduct violates any civil or criminal law. Sexual activity includes, but is not limited to, kissing, touching intimate body parts, fondling, intercourse, penetration of any body part, and oral sex. It also includes any unwelcome physical acts, such as unwelcome sexual touching, sexual assault, sexual battery, rape, and dating violence. When based on gender, domestic violence or stalking also constitutes sexual misconduct.

Sexual misconduct may include using physical force, violence, threat or intimidation, ignoring the objections of the other person, causing the other person’s intoxication or incapacitation through the use of drugs or alcohol, or taking advantage of the other person’s incapacitation (including voluntary intoxication) to engage in sexual activity. Men as well as women can be victims of these forms of sexual misconduct.

Sexual activity with a minor is never consensual when the complainant is under 18 years old, because the minor is considered incapable of giving consent.

**Sexual Assault** is a form of sexual misconduct and is an attempt, coupled with the ability, to commit a violent injury on the person of another because of that person’s gender or sex.

**Sexual Battery** is a form of sexual misconduct and is any willful and unlawful use of force or violence upon the person of another because of that person’s gender or sex as well as touching an intimate part of another person against that person’s will and for the purpose of sexual arousal, gratification or abuse.

**Rape** is a form of sexual misconduct and is non-consensual sexual intercourse that may also involve the use of threat of force, violence, or immediate and unlawful bodily injury or threats of future retaliation and duress. Any sexual penetration, however slight, is sufficient to constitute rape. Sexual acts including intercourse are considered non-consensual when a person is incapable of giving consent because s/he is incapacitated from alcohol and/or drugs, is under 18 years old, or if a mental disorder or developmental or physical disability renders the person incapable of giving consent. The respondent’s relationship to the person (such as family member, spouse, friend, acquaintance or stranger) is irrelevant.

**Acquaintance Rape** a form of sexual misconduct committed by an individual known to the victim. This includes a person the victim may have just met, i.e., at a party, introduced through a friend, or on a social networking website.

**Affirmative Consent** means an informed, affirmative, conscious, voluntary, and mutual agreement to engage in sexual activity. It is the responsibility of each person involved in the sexual activity to ensure that s/he has the affirmative consent of the other participant(s) to engage in the sexual activity. Lack of protest or resistance does not mean consent nor does silence mean consent. Affirmative consent must be voluntary, and given without coercion, force, threats or intimidation.

- **The existence of a dating or social relationship between those involved, or the fact of past sexual activities between them,** should
never by itself be assumed to be an indicator of affirmative consent. A request for someone to use a condom or birth control does not, in and of itself, constitute affirmative consent.

- Affirmative consent can be withdrawn or revoked. Consent to one form of sexual activity (or sexual act) does not constitute consent to other forms of sexual activity. Consent given to sexual activity on one occasion does not constitute consent on another occasion. There must always be mutual and affirmative consent to engage in sexual activity. Consent must be ongoing throughout a sexual activity and can be revoked at any time, including after penetration. Once consent is withdrawn or revoked, the sexual activity must stop immediately.

- A person who is incapacitated cannot give affirmative consent. A person is unable to consent when s/he is asleep, unconscious or is incapacitated due to the influence of drugs, alcohol, or medication so that s/he could not understand the fact, nature or extent of the sexual activity. A person is incapacitated if s/he lacks the physical and/or mental ability to make informed, rational decisions. Whether an intoxicated person (as a result of using alcohol or other drugs) is incapacitated depends on the extent to which the alcohol or other drugs impact the person's decision making capacity, awareness of consequences, and ability to make fully informed judgments. A person's own intoxication or incapacitation from drugs or alcohol does not diminish that person's responsibility to obtain affirmative consent before engaging in sexual activity.

- A person with a medical or mental disability may also lack the capacity to give consent.

- Sexual activity with a minor (a person under 18 years old) is not consensual, because a minor is considered incapable of giving legal consent due to age.

- It shall not be a valid excuse that a person affirmatively consented to the sexual activity if the respondent knew or reasonably should have known that the person was unable to consent to the sexual activity under any of the following circumstances:

  - The person was asleep or unconscious;
  - The person was incapacitated due to the influence of drugs, alcohol or medication, so that the person could not understand the fact, nature or extent of the sexual activity;
  - The person was unable to communicate due to a mental or physical condition.

- It shall not be a valid excuse that the respondent believed that the person consented to the sexual activity under either of the following circumstances:

  - The respondent's belief in affirmative consent arose from the intoxication or recklessness of the respondent;
  - The respondent did not take reasonable steps, in the circumstances known to the respondent at the time, to ascertain whether the person affirmatively consented.

Consensual relationships: Consensual relationship means a sexual or romantic relationship between two persons who voluntarily enter into such a relationship. While sexual and/or romantic relationships between members of the University community may begin as consensual, they may evolve into situations that lead to discrimination, harassment, retaliation, sexual misconduct, dating or domestic violence, or stalking.

- A University employee shall not enter into a consensual relationship with a student or employee over whom that employee exercises direct or otherwise significant academic, administrative, supervisory, evaluative, counseling, or extracurricular authority. In the event such a relationship already exists, each campus shall develop a procedure to reassign such authority to avoid violations of policy.

- This prohibition does not limit the right of an employee to make a recommendation on the personnel matters concerning a family or household member where the right to make recommendations on such personnel matters is explicitly provided for in the applicable collective bargaining agreement or MPP/confidential personnel plan.

Domestic Violence is abuse committed against someone who is a current or former spouse, current or former cohabitant, someone with whom the abuser has a child, someone with whom the abuser has or had a dating or engagement relationship, or a person similarly situated under California domestic or family violence law. Cohabitant means two unrelated persons living together for a substantial period of time, resulting in some permanency of relationship. It does not include roommates who do not have a romantic, intimate, or sexual relationship. Factors that may determine whether persons are cohabiting include, but are not limited to (1) sexual relations between the parties while sharing the same living quarters, (2) sharing of income or expenses, (3) joint use or ownership of property, (4) whether the parties hold themselves out as husband and wife, (5) the continuity of the relationship, and (6) the length of the relationship. For purposes of this definition, “abuse” means intentionally or recklessly causing or attempting to cause bodily injury or placing another person in reasonable apprehension of imminent serious bodily injury to himself or herself, or another. Abuse does not include non-physical, emotional distress or injury.

Dating Violence is abuse committed by a person who is or has been in a social or dating relationship of a romantic or intimate nature with the victim. This may include someone the victim just met; i.e., at a party, introduced through a friend, or on a social networking website. For purposes of this definition, “abuse” means intentionally or recklessly causing or attempting to cause bodily injury or placing another person in reasonable apprehension of imminent serious bodily injury to himself or herself, or another. Abuse does not include non-physical, emotional distress or injury.

Stalking means a repeated course of conduct directed at a specific person that would cause a reasonable person to fear for his/her or others’ safety or to suffer substantial emotional distress. For purposes of this definition:

- Course of conduct means two or more acts, including but not limited to, acts in which the stalker directly, indirectly, or through third parties, by any action, method, device, or means, follows, monitors, observes, surveys, threatens, or communicates to or about a person, or interferes with a person’s property;
- Reasonable person means a reasonable person under similar circumstances and with the same protected status as the complainant;
- Substantial emotional distress means significant mental suffering or anguish that may, but does not necessarily, require medical or other professional treatment or counseling.

For further information see California State University, Sacramento’s Notice of Nondiscrimination on the Basis of Sex, Myths and Facts about Sexual Violence, and Rights and Options for Victims of Sexual Violence, Dating Violence, Domestic Violence, and Stalking at http://www.csus.edu/titleix/
Appendices

Who to Contact If You Have Complaints, Questions or Concerns

Title IX requires the university to designate a Title IX Coordinator to monitor and oversee overall Title IX compliance. Your campus Title IX Coordinator is available to explain and discuss your right to file a criminal complaint (for example, in cases of sexual violence); the university’s complaint process, including the investigation process; how confidentiality is handled; available resources, both on and off campus; and other related matters. If you are in the midst of an emergency, please call the police immediately by dialing 9-1-1.

Campus Title IX Coordinator:
William “Skip” Bishop
Office for Equal Opportunity
William.bishop@csus.edu
(916) 278-5770
Monday—Friday, 8:00 am—5:00 pm

Deputy Title IX Coordinators:
Alison Morgan
Equal Opportunity Investigator
alison.morgan@csus.edu
916-278-2843
Monday—Friday, 8:00 am—5:00 pm

Stephanie Cruz
Equal Opportunity Investigator
stephanie.cruz@csus.edu
916-278-2843
Monday—Friday, 8:00 am—5:00 pm

Lois Mattice
Deputy Title IX Coordinator for Athletics Compliance
Athletic Center 2140
lmattice@csus.edu
916-278-7548
Monday — Friday, 8:00 am – 5:00 pm

Tom Carroll
Director, Student Organizations & Leadership
University Union, 3011C
tcarroll@csus.edu
916-278-6595
Monday – Friday, 8:00 am – 5:00 pm

Aja Holmes
Sierra Hal
aja.holmes@csus.edu
Monday – Friday, 8:00 am – 5:00 pm

University Police:
Mark Iwasa
6000 J Street Sacramento CA 95819-6029
police@csus.edu
911 (emergencies only)
(916) 278-6800

University Police Service Center:
University Union
916-278-2788

Hours: Monday—Friday 8:30 a.m.—Noon and 1:00—4:30 p.m.

Local Police:
Sacramento Police Department
5770 Freeport Boulevard, Suite 100
Sacramento, CA 95822
Non-emergency: 916-264-5471
Emergency: 9-1-1

U.S. Department of Education, Office for Civil Rights:
(800) 421-3481 or ocr@ed.gov
If you wish to fill out a complaint form online with the OCR, you may do so at:
http://www2.ed.gov/about/offices/list/ocr/complaintintro.html.

Department of Education, Office for Civil Rights: (800) 421-3481 or ocr@ed.gov
If you wish to fill out a complaint form online with the OCR, you may do so at: www2.ed.gov/about/offices/list/ocr/complaintintro.html (http://www2.ed.gov/about/offices/list/ocr/complaintintro.html).

Title IX requires the university to adopt and publish complaint procedures that provide for prompt and equitable resolution of gender discrimination complaints, including sexual harassment and misconduct as well as provide training, education and preventive measures related to sex discrimination. CSU Executive Order 1097 (www.calstate.edu/ eo/EO-1097-rev-10-5-16.html (http://www.calstate.edu/ eo/EO-1097-rev-10-5-16.html)) is the systemwide procedure for all complaints of discrimination, harassment or retaliation made by students against the CSU, a CSU employee, other CSU students or a third party.

Except as provided below under confidentiality and sexual misconduct, dating violence, domestic violence, and stalking, any University employee who knows or has reason to know of allegations or acts that violate University policy shall promptly inform the Title IX Coordinator. These employees are required to disclose all information including the names of the parties, even where the person has requested that his/her name remain confidential. The Title IX Coordinator will determine whether confidentiality is appropriate given the circumstances of each such incident (see confidential reporting options outlined below).

Regardless of whether an alleged victim of gender discrimination ultimately files a complaint, if the campus knows or has reason to know about possible sexual discrimination, harassment or misconduct, violence, it must review the matter to determine if an investigation is warranted. The campus must then take appropriate steps to eliminate any gender discrimination/harassment/misconduct, prevent its recurrence, and remedy its effects.

Safety of the Campus Community is Primary

The University’s primary concern is the safety of its campus community members. The use of alcohol or drugs never makes the victim at fault for gender discrimination, harassment or misconduct; therefore, victims should not be deterred from reporting incidents of sexual misconduct out of a concern that they might be disciplined for related violations of drug, alcohol or other university policies. Except in extreme circumstances, victims of sexual misconduct shall not be subject to discipline for related violations of the Student Conduct Code.
Information Regarding Campus, Criminal and Civil Consequences of Committing Acts of Sexual Violence

Individuals alleged to have committed sexual misconduct may face criminal prosecution by law enforcement and may incur penalties as a result of civil litigation. In addition, employees and students may face discipline at the university, up to including suspension or expulsion. Employees may face sanctions up to and including dismissal from employment, pursuant to established CSU policies and provisions of applicable collective bargaining unit agreements.

Students who are charged by the University with gender discrimination, harassment or misconduct will be subject to discipline, pursuant to the California State University Student Conduct Procedures (see Executive Order 1098 at www.calstate.edu/EO/EO-1098-rev-6-23-15.pdf) or any successor executive order and will be subject to appropriate sanctions. In addition, during any investigation, the University may implement interim measures in order to maintain a safe and non-discriminatory educational environment. Such measures may include but not be limited to: immediate interim suspension from the University; a required move from university-owned or affiliated housing; adjustments to course schedule; and/or prohibition from contact with parties involved in the alleged incident.

Confidentiality and Sexual Misconduct, Dating Violence, Domestic Violence and Stalking

The University encourages victims of sexual misconduct, dating violence, domestic violence, or stalking (collectively sexual misconduct) to talk to someone about what happened so they can get the support they need, and so the University can respond appropriately.

Privileged and Confidential Communications

Physicians, Psychotherapists, Professional Counselors, Licensed Clinical Social Workers, and Clergy – Physicians, psychotherapists, professional, licensed counselors, licensed clinical social workers, and clergy who work or volunteer on or off campus, acting solely in those roles or capacities as part of their employment, and who provide medical or mental health treatment or counseling (and those who act under their supervision, including all individuals who work or volunteer in their centers and offices) may not report any information about an incident of sexual misconduct to anyone else at the University, including the Title IX Coordinator, without the victim’s consent. A victim can seek assistance and support from these professionals, counselors and advocates without triggering a University investigation that could reveal his/her identity or that a victim disclosed an incident to them. However, see limited exceptions below regarding when sexual assault and domestic violence counselors and advocates must report to local law enforcement agencies. Counselors and advocates should explain these limited exceptions to victims, if applicable.

The University will be unable to conduct an investigation into a particular incident or pursue disciplinary action against a perpetrator if a victim chooses to (1) speak only to a physician, professional licensed counselor, licensed clinical social worker, clergy member, sexual assault counselor, domestic violence counselor or advocate; and (2) maintain complete confidentiality. Even so, these individuals will assist victims in receiving other necessary protection and support, such as victim advocacy, disability, medical/health or mental health services, or legal services, and will advise victims regarding their right to file a Title IX complaint with the University and a separate complaint with local or University police. If a victim insists on confidentiality, such professionals, counselors and advocates will likely not be able to assist the victim with: University academic support or accommodations; changes to University-based living or working schedules; or adjustments to course schedules. A victim who at first requests confidentiality may later decide to file a complaint with the University or report the incident to the police, and thus have the incident fully investigated. These counselors and advocates can provide victims with that assistance if requested by the victim. These counselors and advocates will also explain that Title IX includes protections against retaliation, and that the University will not only take steps to prevent retaliation when it knows or reasonably should know of possible retaliation, but will also take strong responsive action if it occurs.

Exceptions: Under California law, any health practitioner employed in a health facility, clinic, physician’s office, or local or state public health department or clinic is required to make a report to local law enforcement if he or she provides medical services for a physical condition to a patient/victim who he or she knows or reasonably suspects is suffering from (1) a wound or physical injury inflicted by a firearm; or (2) any wound or other physical injury inflicted upon a victim where the injury is the result of assailtive or abusive conduct (including sexual misconduct, domestic violence, and dating violence). This exception does not apply to sexual assault and domestic violence counselors and advocates. Health care practitioners should explain this limited exception to victims, if applicable.

Additionally, under California law, all professionals described above (physicians, psychotherapists, professional counselors, licensed clinical social workers, clergy, and sexual assault and domestic violence counselors and advocates) are mandatory child abuse and neglect reporters, and are required to report incidents involving victims under 18 years of age to local law enforcement agencies. These professionals will explain this limited exception to victims, if applicable.

Finally, some or all of these professionals may also have reporting obligations under California law to (1) local law enforcement in cases involving threats of immediate or imminent harm to self or others where disclosure of the information is necessary to prevent the threatened danger; or (2) to the court if compelled by court order or subpoena in a criminal proceeding related to the sexual violence incident. If applicable, these professionals will explain this limited exception to victims.

Reporting to University or Local Police

If a victim reports to local or University Police about sexual misconduct, the police are required to notify victims that their names will become a matter of public record unless confidentiality is requested. If a victim
requests that his/her identity be kept confidential, his/her name will not become a matter of public record and the police will not report the victim’s identity to anyone else at the University, including the Title IX Coordinator. University Police will, however, report the facts of the incident itself to the Title IX Coordinator being sure not to reveal to the Title IX Coordinator victim names/identities or compromise their own criminal investigation. The University is required by the federal Clery Act to report certain types of crimes (including certain sex offenses) in statistical reports. However, while the University will report the type of incident in the annual crime statistics report known as the Annual Security Report, victim names/identities will not be revealed.

Reporting to the Title IX Coordinator and Other University Employees
Most University employees have a duty to report sexual misconduct incidents when they are on notice of it. When a victim tells the Title IX Coordinator or another University employee about a sexual misconduct incident, the victim has the right to expect the University to take immediate and appropriate steps to investigate what happened and to resolve the matter promptly and equitably. In all cases, the University strongly encourages victims to report sexual misconduct directly to the campus Title IX Coordinator. As detailed above, all University employees except physicians, licensed professional counselors, licensed clinical social workers, sexual assault counselors and advocates, must report to the Title IX Coordinator all relevant details about any sexual violence incidents of which they become aware. The University will need to determine what happened – and will need to know the names of the victim(s) and the perpetrator(s), any witnesses, and any other relevant facts, including the date, time and specific location of the incident.

To the extent possible, information reported to the Title IX Coordinator or other University employees will be shared only with individuals responsible for handling the University’s response to the incident. The University will protect the privacy of individuals involved in a sexual misconduct incident except as otherwise required by law or University policy. A sexual misconduct report may result in the gathering of extremely sensitive information about individuals in the campus community. While such information is considered confidential, University policy regarding access to public records and disclosure of personal information may require disclosure of certain information concerning a report of sexual misconduct. In such cases, efforts will be made to redact the records, as appropriate, in order to protect the victim’s identity and privacy and the privacy of other involved individuals. Except as detailed in the section on Privileged and Confidential Communications above, no University employee, including the Title IX Coordinator, should disclose the victim’s identity to the police without the victim’s consent or unless the victim has also reported the incident to the police. If a victim requests of the Title IX Coordinator or another University employee that his/her identity remain completely confidential, the Title IX Coordinator will explain that the University cannot always honor that request and guarantee complete confidentiality. If a victim wishes to remain confidential or request that no investigation be conducted or disciplinary action taken, the University must weigh that request against the University’s obligation to provide a safe, non-discriminatory environment for all students, employees, and third parties, including the victim. Under those circumstances, the Title IX Coordinator will determine whether the victim’s request for complete confidentiality and/or no investigation can be honored under the facts and circumstances of the particular case, including whether the University has a legal obligation to report the incident, conduct an investigation or take other appropriate steps. Without information about a victim’s identity, the University’s ability to meaningfully investigate the incident and pursue disciplinary action against the perpetrator may be severely limited. See Executive Order 1095 for further details around confidential reporting, and other related matters (www.calstate.edu/EO/EO-1095.pdf [http://www.calstate.edu/EO/EO-1095-rev-6-23-15.html]).

Inquiries Concerning Compliance
Inquiries concerning compliance or the application of these laws and programs and activities of Sacramento State may be referred to the specific campus officers identified above or to the Regional Director of the Office for Civil Rights, United States Department of Education, 50 Beale Street, Suite 7200, San Francisco, California 94105.

Appendix G: University Library Policy and Procedures
(916) 278-6926 library.csus.edu (http://www.library.csus.edu)

Library Hours
For Library hours visit http://library.csus.edu/hours/ or call (916) 278-6926.

Library Privileges
The Sacramento State OneCard serves as a library card. Students, faculty, and staff must present a valid OneCard each time an item is checked out or renewed. Library privileges are nontransferable and the OneCard may be used only by the person to whom it has been issued.

Loan Periods and Renewal Procedures
The basic loan period is three weeks, with automatic renewals of the same period, providing another patron has not placed a recall on the item.

All books are subject to recall. All due date reminders and other notices are sent via Sac State email.

Overdue and Lost Item Fees
An item is overdue one day after the due date. Unless the item is recalled, no fees will accrue until 44 full days after the due date. After that date a bill listing a $50.00 item cost, a $10.00 processing fee, and a $10.00 overdue fee will be sent. The overdue fee for an item returned 44 or more days late is $10. For more information regarding Suspensions and Fines, including information on Course Reserves, please visit: http://library.csus.edu

To avoid overdue fees check your account at one of the following web locations:
MyLibraryAccount: http://library.csus.edu/mylibrary.html
My Sac State, Library tab: http://my.csus.edu

Overdue Reminder, Bills, and Overdue Fee Notices
All notices are emailed to your Sac State email address. Notices include: loan receipts, borrowing activity summaries, courtesy, due date change, lost item replacement, and hold shelf notices.

Appendix H: Schedule of Tuition and Fees, 2016-2017
The CSU makes every effort to keep student costs to a minimum. Tuition and fees listed in published schedules or student accounts may need to be increased when public funding is inadequate. Therefore, CSU must reserve the right, even after tuition or fees are initially charged or initial payments are made, to increase or modify any listed tuition or fees. All listed fees, other than mandatory systemwide tuition, are subject to change without notice, until the date when instruction for a particular semester or quarter has begun. All CSU-listed tuition and fees should be regarded as estimates that are subject to change upon approval by The Board of Trustees, the Chancellor, or the Presidents, as appropriate. Changes in mandatory systemwide tuition will be made in accordance with the requirements of the Working Families Student Fee Transparency and Accountability Act (Sections 66028 – 66028.6 of the Education Code).

The following reflects applicable systemwide tuition for both semester and quarter campuses that were authorized by the Board of Trustees at their July and November 2011 meetings and September 2012 meeting. THESE RATES ARE SUBJECT TO CHANGE.

All Students
Application Fee (nonrefundable), payable by check or money order at time application is made: $55

The CSU makes every effort to keep student costs to a minimum. Tuition and fees listed in published schedules or student accounts may need to be increased when public funding is inadequate. Therefore, CSU must reserve the right, even after initial payments are made, to increase or modify any listed tuition or fees. All listed fees, other than mandatory systemwide tuition, are subject to change without notice, until the date when instruction for a particular semester or quarter has begun. All CSU-listed tuition and fees should be regarded as estimates that are subject to change upon approval by the Board of Trustees, the Chancellor, or the Presidents, as appropriate. Changes in mandatory systemwide tuition will be made in accordance with the requirements of the Working Families Student Fee Transparency and Accountability Act (Sections 66028 – 66028.6 of the Education Code).

The following reflects applicable systemwide tuition for both semester and quarter campuses. These rates are subject to change.

The total nonresident tuition paid per term will be determined by the number of units taken.

Mandatory systemwide tuition is waived for those individuals who qualify for such exemption under the provisions of the California Education Code (see section on fee waivers).

Students are charged campus fees in addition to tuition and systemwide fees. Information on campus fees can be found by contacting the individual campus(es).

### Credit Cards

Visa and MasterCard bank credit cards may be used for payment of student tuition and fees.

### Schedule of Tuition and Fees, 2017-2018

The CSU makes every effort to keep student costs to a minimum. Tuition and fees listed in published schedules or student accounts may need to be increased when public funding is inadequate. Therefore, CSU must reserve the right, even after initial payments are made, to increase or

---

1. Applicable term tuition apply for campuses with special terms, as determined by the campus. Total College Year tuition cannot exceed the Academic Year plus Summer Term tuition. The Summer Term tuition for the Education Doctorate at quarter campuses is equal to the Per Semester tuition listed in the table. Total tuition for the Education Doctorate over the College Year equals the Per Academic Year tuition plus the Per Semester tuition for the summer term at all CSU campuses.

2. These rates are subject to change.
Nonresident Students (U.S. and Foreign)
Nonresident Tuition (in addition to basic tuition and systemwide fees charged all students) for all campuses:

Charge Per Unit: Semester = $372, Quarter = $248.

The total nonresident tuition paid per term will be determined by the number of units taken.

Mandatory systemwide tuition is waived for those individuals who qualify for such exemption under the provisions of the California Education Code (see section on fee waivers).

Students are charged campus fees in addition to tuition and systemwide fees. Information on campus fees can be found by contacting the individual campus(es).

Credit Cards
Visa and MasterCard bank credit cards may be used for payment of student tuition and fees.

Appendix I: Availability of Institutional and Financial Assistance Information
The following information concerning student financial assistance may be obtained from the Financial Aid Office, Lassen Hall 1006, (916) 278-6554:

1. A description of the federal, state, institutional, local, and private student financial assistance programs available to students who enroll at Sacramento State;
2. For each aid program, a description of procedures and forms by which students apply for assistance, student eligibility requirements, criteria for selecting recipients from the group of eligible applicants, and criteria for determining the amount of a student’s award;
3. A description of the rights and responsibilities of students receiving financial assistance, including federal Title IV student assistance programs, and criteria for continued student eligibility under each program;
4. The satisfactory academic progress standards that students must maintain for the purpose of receiving financial assistance and criteria by which a student who has failed to maintain satisfactory progress may reestablish eligibility for financial assistance;
5. The method by which financial assistance disbursements will be made to students and the frequency of those disbursements;
6. The way the school provides for Pell-eligible students to obtain or purchase required books and supplies by the seventh day of a payment period and how the student may opt out;
7. The terms of any loan received as part of the student’s financial aid package, a sample loan repayment schedule, and the necessity for repaying loans;
8. The general conditions and terms applicable to any employment provided as part of the student’s financial aid package;
9. The terms and conditions of the loans students receive under the Direct Loan and Perkins Loan Programs;
10. The exit counseling information the school provides and collects for student borrowers; and
11. Contact information for campus offices available for disputes concerning federal, institutional and private loans.

Information concerning the cost of attending Sacramento State is available from the following and includes tuition and fees; the estimated costs of books and supplies; estimates of typical student room, board, and transportation costs; and, if requested, additional costs for specific programs.

Emiliano Diaz, Director of Admissions & Outreach Services
California State University, Sacramento
6000 J Street
Sacramento, CA 95819-6032
(916) 278-6000
(916) 278-7766

Information concerning the refund policies of Sacramento State for the return of unearned tuition and fees or other refundable portions of institutional charges is available from:

Anita Kermes, Director of Financial Aid Office
California State University, Sacramento
6000 J Street
Sacramento, CA 95819-6032
(916) 278-6554.

Information concerning policies regarding the return of federal Title IV student assistance funds as required by regulation is available from:

Anita Kermes, Director of Financial Aid Office
California State University, Sacramento
6000 J Street
Sacramento, CA 95819-6032
(916) 278-6554.

Information regarding special facilities and services available to students with disabilities may be obtained from:

Judy Dean, Director, Office of Services to Students with Disabilities
California State University, Sacramento
6000 J Street
Sacramento, CA 95819-6032
(916) 278-6955.

Information concerning Sacramento State policies, procedures, and facilities for students and others to report criminal actions or other emergencies occurring on campus may be obtained from:

Mark Iwasa, Chief of Police
California State University, Sacramento
6000 J Street
Sacramento, CA 95819-6032
(916) 278-6000.

Information concerning Sacramento State annual campus security report and annual fire safety report may be obtained from:

Mark Iwasa, Chief of Police
California State University, Sacramento
6000 J Street
Sacramento, CA 95819-6032
(916) 278-6000.
Information concerning the prevention of drug and alcohol abuse and rehabilitation programs may be obtained from:

Reva Wittenberg, Associate Director of Campus Wellness
California State University, Sacramento
6000 J Street
Sacramento, CA 95819-6032
(916) 278-6566.

Information regarding student retention and graduation rates at Sacramento State and, if available, the number and percentage of students completing the program in which the student is enrolled or has expressed interest may be obtained from:

Jing Wang, Director of the Office of Institutional Research,
California State University, Sacramento
6000 J Street
Sacramento, CA 95819-6032
(916) 278-62036.

Information concerning athletic opportunities available to male and female students and the financial resources and personnel that Sacramento State dedicates to its men's and women's teams may be obtained from:

Bill Macriss, Director of Athletics
California State University, Sacramento
6000 J Street
Sacramento, CA 95819-6032
(916) 278-6566.

Information concerning teacher preparation programs at Sacramento State, including the pass rate on teacher certification examinations, may be obtained from:

Elizabeth Christian, Credentials Analysts Office
California State University, Sacramento
6000 J Street
Sacramento, CA 95819-6032
Eureka Hall 414
(916) 278-4567.

Information concerning grievance procedures for students who feel aggrieved in their relationships with the University, its policies, practices, and procedures, or its faculty and staff may be obtained from:

Dr. Ed Mills, Vice President, Student Affairs
California State University, Sacramento
6000 J Street
Sacramento, CA 95819-6032
(916) 278-6060.

Information concerning student body diversity at [name of institution], including the percentage of enrolled, full-time students who are (1) male, (2) female, (3) Pell Grant recipients, and (4) self-identified members of a specific racial or ethnic group, must be obtained from:

Jing Wang, Director of the Office of Institutional Research,
California State University, Sacramento
6000 J Street
Sacramento, CA 95819-6032
(916) 278-6566.

Information concerning student activities at California State University, Sacramento is available at http://www.csus.edu/soal/

The federal Military Selective Service Act (the “Act”) requires most males residing in the United States to present themselves for registration with the Selective Service System within 30 days of their 18th birthday. Most males between the ages of 18 and 25 must be registered. Males born after December 31, 1959, may be required to submit a statement of compliance with the Act and regulations in order to receive any grant, loan, or work assistance under specified provisions of existing federal law. In California, students subject to the Act who fail to register are also ineligible to receive any need-based student grants funded by the state or a public postsecondary institution.

Selective Service registration forms are available at any U.S. Post Office, and many high schools have a staff member or teacher appointed as a Selective Service Registrar. Applicants for financial aid can also request that information provided on the Free Application for Federal Student Aid (FAFSA) be used to register them with the Selective Service. Information on the Selective Service System is available and the registration process may be initiated online at www.sss.gov (http://www.sss.gov).

Appendix J: Personal Safety and Protection of Property

Personal Safety and Protection of Public Property

Police Department Building
Police Emergency: (916) 278-6900 or dial 911 from any campus phone
www.csus.edu/police (http://www.csus.edu/police)
www.twitter.com/sacstatepolice (https://twitter.com/sacstatepolice)

The University and the Sacramento State Police Department (formerly known as the Department of Public Safety) encourage the prompt reporting of any incident that compromises the safety, health, or rights of Sacramento State community members. The Sacramento State Police Department is the primary respondent for campus emergencies and reports of criminal activity on campus. Officers are fully certified by the State of California with full arrest powers and cooperate with State and local police agencies (Sacramento City Police and Sacramento County Sheriff’s Departments), resulting in the University’s awareness of criminal activity perpetrated beyond the campus. Reports of criminal activity will be fully investigated, and appropriate referrals made to the courts, the University, or both.

Campus Buildings: Buildings on the Sacramento State campus remain open only through the completion of the last scheduled event. A daily schedule is provided to Facilities Management and buildings are electronically locked on the basis of that schedule. For those buildings that are not electronically controlled, Custodial Services and Community Service Specialists are responsible for the unlocking of buildings on a daily basis for scheduled classes. After buildings are locked, only employees with offices and personnel with maintenance responsibilities have access to buildings.

Personal Safety Training: The Sacramento State Police Department has full-time Police Officers who are available, on request, for personal safety presentations to increase awareness and personal responsibility of students, faculty, or staff. Please call (916) 278-6000 for an appointment. Presentations are offered consistently during the semester. The Sacramento State Police Department has completed approximately 671 crime prevention and safety presentations between 2006 and 2014. A full-
time Sacramento State employee is available for seminars concerning personal safety for women through the Violence and Sexual Assault Support Services (916) 278-3799. In addition, students are employed through the Sacramento State Police Department as Community Service Officers (CSOs) with primary responsibility for providing patrols and community assistance on campus. The CSOs provide directed patrols in the Residential Life Complex, Academic Information Resource Center, and the Library.

Residence Halls: Sacramento State Residence Hall policy requires that exterior doors be locked at all times. All residents are issued a fob for personal access to the exterior doors and rest rooms. A resident must accompany all guests. Additional information is contained in the Guide to Residential Life available through the Office of Residential Life in Sierra Hall. The Sacramento State Police Department worked with the American River Courtyard planning group on physical security for the new facility. The American River Courtyard residence hall opened in August, 2009; the new Riverview residence hall is expected to open in 2016.

Publications: Brochures are available through the Sacramento State Police Department which provides additional information and training under the following titles: A Guide to Safe & Responsible Partying, Alcohol Alert, Alcohol - The Hard Facts, Apartment Safety Checklist, Bicycles on Campus, Bicycle Safety Tips, CA Driver License & Identification Cards, CA Victim Compensation Program (CalVCP), Compensation for Victims of Violent Crime, Crime Prevention Information, Crime Victims Services, Dater's Bill of Rights, Depression and College Students, Domestic Violence, Do You Know How To Be Safe, Help for Victims of Domestic Violence, Parents You're Not Done Yet, Personal Safety Guide, Police Department Brochure, Preventing Arson & Vandalism, Preventing Date Rape, Preventing Vehicle Theft, Safety Tips for Runners and Walkers, Sexual Assault Act Sheet, Sexual Assault Prevention, Sexual Harassment Facts, Streetwise - The Way to Be, Sustaining Your Gang Prevention Efforts, Tobacco Laws, and Victim Witness Assistance Program. The Sacramento State Violence and Sexual Assault Support Services Program has a brochure on Personal Safety. An Emergency Response Manual is available to the campus community through the Sacramento State Police Department, or online at www.csus.edu/police/cleryact.htm. The Sacramento State Police Department collects crime statistics from local and appropriate police agencies, gathers information from multiple sources both on and off campus and prepares the report. Crimes reported on campus, in certain off-campus buildings or property owned or controlled by Sacramento State and on public property within or immediately adjacent to and accessible from the campus during the last three years is included. The report includes fire safety statistics and information, institutional policies concerning campus security, alcohol and drug use, crime prevention, the reporting of crimes, sexual assault and other safety matters. During the fall semester of every year, information is emailed to all enrolled and prospective students, faculty and staff. In addition, all CSU employees receive a notice concerning this information on their August paycheck. Print copies are available in the University Library, Police Service Center located in the University Union and by request from the Office of the Vice President for Student Affairs and the Sacramento State Police Department.

Appendix K: Civil and Criminal Penalties for Violation of Federal Copyright Laws

Anyone who is found to be liable for copyright infringement may be liable for either the owner’s actual damages along with any profits of the infringer or statutory damages of up to $30,000 per work infringed. In the case of a willful infringement, a court may award up to $150,000 per work infringed. (See 17 U.S.C. §504.) Courts also have discretion to award costs and attorneys’ fees to the prevailing party. (See 17 U.S.C. §505.) Willful copyright infringement can also result in criminal penalties, including imprisonment and fines. (See 17 U.S.C. §506 and 18 U.S.C. §2319.)
COURSES A-Z

Accountancy (ACCY)

ACCY 1. Accounting Fundamentals. 3 Units

Prerequisite(s): Entry Level Math (ELM) test of at least 36 or a CR grade in LS 7A.

Term Typically Offered: Fall, Spring

Accounting as the basis of an information system with emphasis on concepts and assumptions underlying data accumulation for financial reports. Includes the concepts of income determination and financial position, and the accounting for various types of ownership equities.

ACCY 2. Managerial Accounting. 3 Units

Prerequisite(s): ACCY 1.

Term Typically Offered: Fall, Spring

Use and reporting of accounting data for managerial planning, control, and decision making. Broad coverage of concepts, classification, and behavior of costs.

ACCY 111. Intermediate Accounting I. 3 Units

Term Typically Offered: Fall, Spring

In-depth knowledge of how financial information provides information about a company’s: economic resources, obligations, and owner’s equity; income and its components; and cash flows. Topics include the development and application of basic assumptions, principles and constraints underlying financial statements; the use of information derived from financial statements and the limitations of the information; and the use of accounting information to evaluate a company’s return on investment, risk, financial, flexibility, liquidity, and operational capability. Students learn how to prepare financial statements.

ACCY 112. Intermediate Accounting II. 3 Units

Prerequisite(s): ACCY 111.

Term Typically Offered: Fall, Spring

Application of Generally Accepted Accounting Principles to the reporting of tangible and intangible assets, liabilities, and the capital section of the balance sheet. Other topics include the reporting of stock-based compensation and earnings-per-share.

ACCY 113. Intermediate Accounting III. 3 Units

Prerequisite(s): ACCY 111.

Term Typically Offered: Fall, Spring

Application of Generally Accepted Accounting Principles to revenue recognition and matching, pensions, leases, income taxes, accounting changes, interim financial statements, and segmental reporting. Students develop an in-depth knowledge of the preparation and the analysis of the cash flow statement.

ACCY 117. Advanced Accounting. 3 Units

Prerequisite(s): ACCY 111 and ACCY 112.

Term Typically Offered: Fall, Spring

Specialized topics in partnership accounting; consolidated statements; foreign currency translation and financial statements.

ACCY 118. Federal Tax Procedures I. 3 Units

Term Typically Offered: Fall, Spring

Federal taxation concepts are used in effective decision making: a working knowledge of the concepts of gross income, deductions, tax rates, and property transactions as they pertain to C corporations, partnerships, S corporations, and individuals; and proficiency in the application of tax concepts as they pertain to business and individual taxpayers.

ACCY 120. Cost Accounting. 3 Units

Term Typically Offered: Fall, Spring

Importance of the allocation of costs; the cost allocation techniques available to accountants; the techniques used by management to maintain and create enterprise value, e.g., CVP analysis; the accountant’s responsibility for the management of inventory; and the ethical consideration in internal reporting.

ACCY 121. Advanced Management Accounting. 3 Units

Prerequisite(s): ACCY 120.

Term Typically Offered: Fall, Spring

Accountant’s responsibility to provide financial and no financial information to managers; the planning techniques available to accountants; managerial control techniques that enhance the maintenance and improvement of enterprise value, and short-run and long-run analyses.

ACCY 131. Survey of Auditing, Attest, and Assurance Topics. 3 Units

Prerequisite(s): ACCY 111, ACCY 112.

Term Typically Offered: Fall, Spring

Survey of topics in auditing as a control activity in society. Covers a variety of opportunities in the auditing profession including external auditing, internal auditing, compliance auditing, and operational auditing as well as fraud examinations. Topics include evidence and documentation, professional ethics, auditing computer systems, statistical sampling, and internal controls.

ACCY 132. Accountants’ Ethical and Professional Responsibilities. 3 Units

Prerequisite(s): ACCY 111, ACCY 112.

Corequisite(s): ACCY 131.

Term Typically Offered: Fall, Spring

This course addresses professional responsibilities for the accounting profession, including the development of ethical standards, ethical reasoning, AICPA and California Codes of Professional Conduct, financial reporting fraud, corporate governance, and other relevant topics.

ACCY 161. Government and Nonprofit Accounting. 3 Units

Prerequisite(s): ACCY 111

Term Typically Offered: Fall, Spring

Fundamentals of accounting and financial reporting for governmental units and institutions; accounting for various types of funds; accounting aspects of budgetary control.

ACCY 171. Federal Tax Procedures I. 3 Units

Term Typically Offered: Fall, Spring

Important regulatory and tax concepts are used in effective decision making: a working knowledge of the concepts of gross income, deductions, tax rates, and property transactions as they pertain to C corporations, partnerships, S corporations, and individuals; and proficiency in the application of tax concepts as they pertain to business and individual taxpayers.
ACCY 172. Federal Tax Procedures II.  3 Units
Prerequisite(s): ACCY 171.
Term Typically Offered: Fall, Spring

Business entity formation, operation, and termination and business taxation principles and concepts used in effective decision-making. Students develop the ability to understand and apply business tax principles and the critical and analytical skills that are necessary in the study and application of taxation and tax law.

ACCY 190. International Accounting.  3 Units
Term Typically Offered: Fall, Spring

Accounting concepts, principles, and methods applicable to multinational transactions and global corporations. Contents include the translation of financial statements, comparative accounting systems, financial reporting, currency risk management, international accounting standards and organizations, taxation problems, and the managerial aspects of multinational transactions.

ACCY 194. Cooperative Education Experience in Accountancy.  6 - 12 Units
Prerequisite(s): Minimum overall GPA of 2.75; instructor permission.
Term Typically Offered: Fall, Spring

In-depth supervised work experience in accounting for the purpose of exposing the student to comprehensive accountancy experience in business, governmental, or service agencies. Supervision is provided by the faculty and the cooperating agencies.

Note: Open to declared business administration upper division majors only, subject to permission of the Accountancy Area. Petitions can be obtained from the Student Affairs Office, Tahoe 2065.

Credit/No Credit

ACCY 195. Internship in Accountancy.  3 Units
Prerequisite(s): Completion of 15 units of upper division business courses at Sacramento State; minimum overall GPA of 2.75; instructor permission.
Term Typically Offered: Fall, Spring

Supervised work experience in accounting for the purpose of increasing student understanding of the nature and scope of the operations of business, governmental, or service agencies. Supervision is provided by the faculty and the cooperating agencies.

Note: Open to declared business administration upper division majors only, subject to permission of the Accountancy Area. Petitions can be obtained from the Student Affairs Office, Tahoe 2065.

Credit/No Credit

ACCY 199. Special Problems in Accountancy.  1 - 3 Units
Prerequisite(s): Senior status or instructor permission.
Term Typically Offered: Fall, Spring

Individual projects or directed reading for students qualified to carry on independent work. Admission requires approval of the instructor and the Associate Dean. Petitions can be obtained from the Undergraduate Business Advising Center, Tahoe 1030.

Note: Open to declared business administration majors only.

Credit/No Credit

ACCY 220. Accountancy Teaching Experience.  3 - 6 Units
Term Typically Offered: Fall, Spring

Supervised experience of teaching lower division accountancy courses. Students will teach one section of ACCY 1 or 2 for each three units of credit. They may teach no more than two classes (6 units of credit) during any semester and be under direct supervision of an appropriate coordinator. To be eligible, students must register for nine units in addition to ACCY 220 and must have approval of the Department Chair. May not be used to satisfy any requirements in the CBA graduate programs. No student may earn more than twelve (12) units cumulative. Credit/No Credit

ACCY 240. Integrated Accounting Concepts.  3 Units
Term Typically Offered: Fall, Spring

Designed for students who enter the Master of Science Accountability program without a Bachelor of Science in Accountancy or students who need to refresh their basic skills and understanding in record keeping, financial statement preparation and analysis, ethics in the practice of accounting, and internal controls through the use of comprehensive case study/practice set. Delivered via independent project work rather than lecture.

ACCY 250. Financial Reporting I.  3 Units
Term Typically Offered: Fall, Spring

Corporate financial reporting to external users in accordance with US Generally Accepted Accounting Principles (GAAP), including financial information about a company’s economic resources, obligations, owners’ equity, income, case flow, and use of information to evaluate a company's return on investment, risk, financial flexibility, liquidity, and operational capability.

ACCY 251. Foundations of International Accounting.  3 Units
Prerequisite(s): ACCY 250 or equivalent.
Term Typically Offered: Fall, Spring

The role of culture in accounting; comparative international financial and managerial accounting fundamentals; international financial statement analysis; international accounting standards and U.S. GAAP convergence; international business combinations; foreign exchange; international auditing; international taxation; and international capital flows.

ACCY 260. Financial Reporting II.  3 Units
Prerequisite(s): ACCY 250.
Term Typically Offered: Fall, Spring

In-depth study of technical financial accounting issues including accounting for pensions and leases, income tax, accounting changes, consolidated financial statements, and foreign currency.

ACCY 261. Cost Analysis and Control.  3 Units
Term Typically Offered: Fall, Spring

Fundamentals of cost accounting concepts and practice relating to cost accumulation, control, and analysis for managerial planning and decision making. Specific topics generally include product costing, standards, cost allocation, estimation, budgeting, transfer pricing, and performance evaluation. Emphasis is on current issues.
ACCY 262. Auditing. 3 Units
Term Typically Offered: Fall, Spring

Study auditing as a control activity in society. It covers a variety of opportunities in the auditing profession including external auditing, internal auditing, compliance auditing, and operational auditing as well as fraud examinations. Topics include evidence and documentation, auditing computer systems, and internal controls.

ACCY 263. Governmental and Non-Profit Accounting. 3 Units
Term Typically Offered: Fall, Spring

This course provides an in-depth study of accounting and reporting for state and local governmental and non-profit entities. The course emphasizes the governmental reporting environment, the accounting for various types of funds, the accounting aspects of budgetary control, and the preparation of governmental financial information to be included in the Comprehensive Annual Financial Report. This course also emphasizes the key differences between governmental and non-profit organizations, and the financial accounting and reporting for non-profit organizations.

ACCY 264. Taxation of Business Entities. 3 Units
Term Typically Offered: Fall, Spring

Covers the topics for corporate tax, partnership tax, estate and gift tax, and tax planning. Corporate tax includes taxation of transactions between corporations and their shareholders, transfers to corporations, dividends and non-liquidating distributions, stock redemptions, corporate liquidations, and S corporation. Partnership tax includes operation and liquidation, dissolution, sales, and exchange of partnership interests. Estate and gift tax addresses the types of transfers for federal gift tax.

ACCY 265. Advanced Accounting Information Systems Analysis and Controls. 3 Units
Term Typically Offered: Fall, Spring

Emphasis on the role of computer and information technology in the development, analysis, and operation of accounting information systems; may include advanced coverage of accounting transaction cycles, accounting systems planning and analysis, accounting system design, accounting systems implementation and operation, the accounting system internal control structure, data modeling and database design in accounting, computer fraud and security, and auditing of computer-based information systems.

ACCY 266. Business Environment and Concepts. 3 Units
Term Typically Offered: Fall, Spring

Designed to provide understanding of knowledge and skills necessary for the general business environment and business operation. In addition, students are required to apply that knowledge in performing professional responsibilities. Topics include corporate governance, business cycles, global economic markets, business strategy, effect of financial management policies on accounting transactions, economic substance of transactions and their accounting implications, and budgeting/forecasting techniques.

ACCY 269. Taxation of Individuals. 3 Units
Term Typically Offered: Fall, Spring

Covers the required topics for tax form preparation for reporting individual incomes. Examines fundamental concepts in tax law and the underlying reasons for income identification, exemption, and deduction.

ACCY 270. Tax Research and Procedure. 3 Units
Prerequisite(s): ACCY 172 or ACCY 269.
Term Typically Offered: Fall, Spring

Tax reporting and collection procedure; administrative and judicial procedures governing tax controversies; the rights and obligations of the taxpayer. Intensive training in performing and communicating tax research. Includes use of current database programs. Lecture basis, followed by "hands-on" application of research methods.

ACCY 271. Tax Accounting Periods and Methods. 3 Units
Prerequisite(s): ACCY 172 or ACCY 269.
Term Typically Offered: Fall, Spring

Concepts and principles of the overall cash, accrual and hybrid methods of tax accounting. Applications of specific methods such as: inventory costing and capitalization rules, installment sales, long-term contracts, and original issue discount/time value of money will be examined. Lecture format to present the underlying rules and concepts. Case studies will then be analyzed and discussed by the students to examine the topics in a "real-world" context.

ACCY 272. Taxation of Business Enterprises I - Corporations. 3 Units
Prerequisite(s): ACCY 172 or ACCY 269.
Term Typically Offered: Fall, Spring

Discusses federal tax law as it applies to corporations, including the following topics: special deductions, formation, distributions, and complete liquidations. Incorporates problem sets, case analysis, a corporate tax return project, and a research project to enhance analytical and critical thinking skills and compliance experience.

ACCY 273. Taxation of Business Enterprises II - Partnerships. 3 Units
Prerequisite(s): ACCY 172 or ACCY 269.
Term Typically Offered: Fall, Spring

Discusses general concepts, acquisitions and basis of partnerships interests, operations, transfers of partnership interests, and distributions. Incorporates problem sets, a partnership tax return project, and research projects to enhance analytical and critical thinking skills and compliance experience and to develop students' technical proficiency in the application of partnership concepts.

ACCY 274. Estate, Gift and Trust Taxation. 3 Units
Prerequisite(s): ACCY 172 or ACCY 269.
Term Typically Offered: Fall, Spring

Taxation of decedent's estate and lifetime gifts; valuation of property subject to estate and gift taxes; income taxation of estates and trusts; estate planning. Uses a lecture format to present the underlying rules and concepts. Case studies will then be analyzed and discussed by the students to examine the topics in a "real-world" context.

ACCY 275. International Wealth and Asset Management. 3 Units
Term Typically Offered: Fall, Spring

Importance of global asset protection and wealth management; domestic Statutory and case law authorities of selected European, American and Asian countries as they relate to wealth protection and asset management; bi-lateral international agreements relating to wealth management and asset protection; Multilateral agreement affecting wealth management and asset protection; tax and legal liability minimizing models.
ACCY 276. U.S. Taxation of International Transactions. 3 Units
Prerequisite(s): ACCY 272, Advanced to Candidacy.
Term Typically Offered: Fall, Spring

U.S. tax jurisdiction; U.S. source of income rules and related expense allocation; U.S. taxation of foreign taxpayers; transfer pricing issues; U.S. taxation of the foreign income of U.S. citizens and residents; cross border transactions; foreign currency tax issues; and U.S. bilateral tax agreements. Successful completion will satisfy the culminating experience for the MSBA/Taxation program. Students may select topics for their Master’s projects that are outside the discipline topic of the class subject to the approval of the instructor.

ACCY 277. Comparative International Tax Systems. 3 Units
Term Typically Offered: Fall, Spring

The similarities and differences between current global tax systems including jurisdiction and conflict of laws issues; the role of bilateral international tax treaties and other international tax related agreements in business operations; international tax planning for individuals and multinational enterprise including corporations, partnerships and estates and trusts.

ACCY 278. International and Multi-State Taxation. 3 Units
Term Typically Offered: Fall, Spring

Focuses on the taxation of cross-border transactions which encompasses discussion of the laws, rules, and regulations that affect transactions that cross both state and national borders. It covers various issues such as income sourcing and jurisdiction to tax. This course generally discusses these issues from the perspective of a U.S. person, but emphasizes and illustrates the general applicability of these rules for the tax regimes as established by other countries and states.

ACCY 280. Management Control Systems. 3 Units
Term Typically Offered: Fall, Spring

Development of the concepts and practice of management control systems. How alternative accounting-based planning, performance motivation and evaluation, and control systems fit and are used in varying strategic, management, and operative environments. How systems focus and motivate managers’ decision behavior. How systems fit and are used in varying decision, competitive, and organization settings. Emphasis is on cases.

ACCY 295. Internship in Accountancy. 3 Units
Prerequisite(s): Classified graduate status; minimum Sacramento State GPA of 3.0 required.
Term Typically Offered: Fall, Spring

Supervised work experience in business, governmental service, or agencies for the purpose of increasing and enhancing student understanding of the nature and scope of the organization's accounting operations. Supervision is provided by the faculty and the cooperating agencies. Open to MS in Accountancy students. Petitions are obtained from Tahoe Hall 1035.
Credit/No Credit

ACCY 296. Experimental Offerings in Accountancy. 3 Units
Term Typically Offered: Fall, Spring

When a sufficient number of qualified students apply, a faculty member may conduct a seminar on a designated advanced topic in accountancy.

ACCY 299. Special Problems in Accountancy. 1 - 3 Units
Prerequisite(s): Classified graduate status.
Term Typically Offered: Fall, Spring

Individual projects or directed reading for students qualified to carry on independent work. Admission requires approval of faculty member under whom the individual work is to be conducted in addition to the approval from the Department Chair of Accountancy. Petitions to be obtained from the CBA Graduate Programs Office, Tahoe Hall 1037.
Credit/No Credit

ACCY 500A. Thesis. 1 - 3 Units
Prerequisite(s): Advanced to candidacy; completion of MGMT 210 is required for the MBA only.
Term Typically Offered: Fall, Spring

Completion of a thesis approved for the Master’s degree.

ACCY 500B. Project. 1 - 3 Units
Prerequisite(s): Advanced to candidacy; completion of MGMT 210 is required for the MBA only.
Term Typically Offered: Fall, Spring

Completion of a project approved for the Master’s degree.

ACCY 500C. Comprehensive Examination for MS/Accountancy and MSBA/Taxation Degrees. 1 - 3 Units
Prerequisite(s): Advanced to candidacy. For comprehensive examination for MBA only (MGMT 500C, 1 unit), completion of Program Requirements (ACCY 240, MGMT 222, MGMT 223, MGMT 234, MGMT 280, MIS 221, OBE 252). For comprehensive examination for MS/Accountancy and MSBA/Taxation degrees, student must be in final semester of program.
Term Typically Offered: Fall, Spring

Note: MS Accountancy degree, student must be in final semester of program.

ACCY 501. Culminating Experience Project in Accounting and Ethics. 3 Units
Prerequisite(s): Advancement to Candidacy
Term Typically Offered: Fall, Spring

Each student conducts an individual project to fulfill the culminating experience graduation requirement of the MS in Accountancy program as required in Title V of the CA Educational Code. The course also covers the development of ethical standards, ethical reasoning, AICPA Code of Professional Conduct, accountants’ professional responsibilities, financial reporting fraud and responses, corporate governance, and other relevant topics.
Note: May be repeated for credit

Accountancy Information System (AIS)

AIS 141. Accounting Information Systems Development. 3 Units
Term Typically Offered: Fall, Spring

Design, analysis, and implementation of computer-based accounting information systems. Discussion of flow charting, data security, systems development, program architecture, and management of the implementation process. Development of computer applications and formulation of decision information for managerial uses. Use of the computer in projects.
AIS 142. Enterprise and E-Commerce Accounting Models. 3 Units
Prerequisite(s): AIS 141 or instructor permission.
Term Typically Offered: Fall, Spring

Survey of Enterprise Resource Planning (ERP) models, Business-to-Business (B2B) E-commerce models, and the effects of the changing business and technology landscape upon the accounting profession. Topics include internal control, auditing, and economics relating to these new business-process models.

AIS 144. Cooperative Education Experience in Accounting Information Systems Problems. 6 - 12 Units
Prerequisite(s): Minimum overall GPA of 2.75; instructor permission.
Term Typically Offered: Fall, Spring

In-depth supervised work experience in accounting information systems for the purpose of exposing the student to comprehensive Accounting Information Systems experience in business, governmental, or service agencies.

Note: Open to declared business administration upper division majors only, subject to permission of the Accountancy Area. Petitions can be obtained from the Student Affairs Office, Tahoe 2065.

Credit/No Credit

AIS 195. Internship in Accounting Information Systems. 3 - 6 Units
Prerequisite(s): Completion of 15 units of upper division business courses at Sacramento State; minimum GPA of 2.75 required; instructor permission.
Term Typically Offered: Fall, Spring

Supervised work experience in accounting information systems for the purpose of increasing student understanding of the nature and scope of the operations of business, governmental, or service agencies. Supervision is provided by the faculty and cooperating agencies.

Note: Open to declared business administration upper division majors only, subject to permission of the Accountancy Area. Petitions can be obtained from the Student Affairs Office, Tahoe 2065.

Credit/No Credit

AIS 199. Special Problems in Accounting Information Systems. 1 - 3 Units
Prerequisite(s): Senior status or instructor permission.
Term Typically Offered: Fall, Spring

Individual accounting information systems projects or directed reading for students qualified to carry on independent work.

Note: Open to declared business administration majors only. Admission requires approval of the instructor and the Associate Dean. Petitions can be obtained from the Undergraduate Business Advising Center, Tahoe 1030.

Credit/No Credit

Anthropology (ANTH)

ANTH 1. Introduction to Biological Anthropology. 3 Units
General Education Area/Graduation Requirement: Life Forms (B2)
Term Typically Offered: Fall, Spring, Summer

Covers the concepts, methods of inquiry, and theory of biological evolution and their application to the human species. There is a specific focus on molecular, Mendelian and population genetics, mechanisms of evolution, primatology, paleoanthropology, biocultural adaptations, and human variation. The scientific method serves as the foundation to the course.

ANTH 1A. Biological Anthropology Laboratory. 1 Unit
Prerequisite(s): ANTH 1 (may be taken concurrently)
General Education Area/Graduation Requirement: Laboratory (B3), Life Forms (B2)
Term Typically Offered: Fall, Spring

Designed to familiarize the student with the materials and techniques of physical anthropology. Includes human and other primate osteology, anthropometric techniques, and allied methods in the gathering and analysis of physical anthropological data. Through working with the departmental collection of fossil casts and a wide variety of charts and models, the student also becomes familiar with the stages of human and primate evolution.

ANTH 2. Introduction to Cultural Anthropology. 3 Units
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall, Spring

Introduction to anthropological approaches in the study of people and cultures. Using ethnographic case studies, the course contributes to a critical understanding of continuity and diversity in peoples’ lifestyles, social institutions, and cultural practices in different societies around the world. The course also examines the impact of political, economic, and social changes, such as colonization, decolonization, and globalization on people and cultures over the last century.

ANTH 2H. Introduction to Cultural Anthropology - Honors. 3 Units
Term Typically Offered: Fall only

Introduction to anthropological approaches in the study of people and cultures. Using ethnographic case studies, contributes to a critical understanding of the continuity and diversity in peoples’ lifestyles, social institutions, and cultural practices in different societies around the world. Examines the impact of political, economic, and social changes, such as colonization, decolonization, globalization, etc., on people and cultures over the last century. Intended for students enrolled in the University’s GE Honors Program.

Note: Students must be admitted to the GE Honors Program.

ANTH 3. Introduction to Archaeology. 3 Units
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall, Summer

Introduces students to the methods and theories used by archaeologists to find, recover, and interpret such remains in an effort to reconstruct and understand the lives of earlier peoples. The class uses archaeological case studies, films, and hands-on examples of tools and other artifacts produced by simple stone age hunters and more complex civilizations that lived in California and other parts of the world.
ANTH 4. Language, Culture, and Critical Thinking. 3 Units
General Education Area/Graduation Requirement: Critical Thinking (A3)
Term Typically Offered: Fall, Spring

Introduction to the abstract and formal structures of language and cultural dimensions of human communication via major linguistic anthropological concepts, theoretical assumptions, and methodologies. Addresses the logical, formal relationship between underlying rules of natural languages while critically analyzing how speakers from different cultures use language to convey complex social and cultural information. Course illuminates how language is used to create and reinforce relationships of power (race, class, gender); develops ability to recognize linguistic fallacies; and instructs in basic critical thinking skills.

ANTH 13. Magic, Witchcraft and Religion. 3 Units
General Education Area/Graduation Requirement: Humanities (Area C2)
Term Typically Offered: Fall, Spring

Cross-cultural study of the forms and functions of supernatural beliefs and associated rituals in various societies of Africa, Asia, aboriginal Australia, Oceania, South America, native North America and elsewhere. Emphasis is on understanding beliefs and rituals within given social contexts, and using broad comparisons to derive insight into the general functions of beliefs and rituals in human life.

ANTH 15. World Prehistory and the Evolution of Modern Humanity. 3 Units
General Education Area/Graduation Requirement: Further Studies in Area B (B5)
Term Typically Offered: Fall, Spring

Introduction to the broad sweep of world prehistory, from the emergence of human culture through the development of domestication of plants and animals, and to the origins of complex societies. Included are major cultural developments on every continent, emphasizing similarities and differences in the nature and timing of key technological, cultural, and sociological changes. Methodologies for learning about the past, major archaeological discoveries, important personalities, and contributions to the modern world are discussed in the context of understanding the strengths and limitations of a scientific approach to human prehistory.

ANTH 14. Comparative Early Civilizations. 3 Units
General Education Area/Graduation Requirement: Humanities (Area C2)
Term Typically Offered: Fall, Spring

Examines the emergence and development of early civilizations. Studies state formation, urbanization, market system development, and other processes relevant to the evolution of early civilizations from the standpoints of cross-cultural comparison and modern anthropological theory. The goal is to identify cross-cultural regularities as well as critical differences that can explain the various evolutionary trajectories of these societies. The civilizations that will be contrasted include societies from Mesopotamia, Egypt, the Indus Valley, China, Mesoamerica, Andean South America, and other regions.

ANTH 21. Freshman Seminar: Becoming an Educated Person. 3 Units
General Education Area/Graduation Requirement: Understanding Personal Development (E)
Term Typically Offered: Fall, Spring

Introduction to the nature and possible meanings of higher education, and the functions and resources of the University. Designed to help students develop and exercise fundamental academic success strategies and to improve their basic learning skills. Provides students with the opportunity to interact with fellow classmates and the seminar leader to build a community of academic support and personal support.

ANTH 101. Cultural Diversity. 3 Units
General Education Area/Graduation Requirement: GE AREA D, Race & Ethnicity Graduation Requirement (RE), United States History
Term Typically Offered: Fall, Spring, Summer

Focuses on analyzing the historically conditioned political, economic and social factors that have contributed to cultural diversity in the U.S.; a critical anthropological approach is developed to explore the intersection of race, class, gender, ethnicity and sexuality; the political economy of institutions and ideas, such as racism, classism, sexual stereotyping, family, religion, state, color-blindness, multiculturalism, etc.; and, discourses of cultural diversity in the U.S.

ANTH 102. The Nature of Culture. 3 Units
Prerequisite(s): GWAR certification before Fall 09; or WPJ score of 80+; or 3-unit placement in ENGL 109M or ENGL 109W; or 4-unit placement in ENGL 109M or ENGL 109W and co-enrollment in ENGL 109X; or WPJ score 70 or 71 and co-enrollment in ENGL 109X.
Term Typically Offered: Fall, Spring

Writing Intensive Graduation Requirement (WI), GE AREA D

An upper division general introduction to cultural anthropology. Divided into two major parts: a survey of theories, methods and concepts of cultural anthropology, and an introduction to applied cultural anthropology.

ANTH 103. Psychological Anthropology. 3 Units
Prerequisite(s): ANTH 2 or ANTH 102.
Term Typically Offered: Fall, Spring

Cross-cultural comparative approach to human cognition, child-training practices, personality development, deviant behavior, cultural psychiatry, and data gathering techniques.

ANTH 104. The History of Anthropology. 3 Units
Prerequisite(s): ANTH 146 or instructor permission.
Term Typically Offered: Fall, Spring

Anthropological theory in historical perspective.

ANTH 105. Anthropology of War. 3 Units
Prerequisite(s): ANTH 146 or instructor permission.
Term Typically Offered: Fall, Spring

Examination of the nature of war, primarily as it occurs in pre-industrial societies, and a survey of the kinds of explanations of this phenomenon current in anthropology. Emphasis is on understanding the complexity, variability, and cultural imbeddedness of war as it occurs around the world.
ANTH 106. Culture and Personality of the Chicano Child. 3 Units
Term Typically Offered: Fall, Spring
Study of child growth and development patterns universal to all children with focus on the pressures and effects of the Mexican and Anglo cultures on the development of the Chicano child.

ANTH 107. Anthropology of Hunters and Gatherers. 3 Units
Prerequisite(s): ANTH 3
Term Typically Offered: Fall, Spring
Survey of the rapidly disappearing life way which anthropologists call hunting and gathering, with economies based on the use of wild plant and animal resources. Using ethnographic examples from the Arctic, southern Africa, rainforests in South America, deserts of Australia, and western North America, explores variation in hunter-gatherer societies with respect to differences in environment, technology, social organization, and the historical effects of interaction with more complex cultural groups. Models that attempt to explain long-term changes in this life way are also explored.

ANTH 108. Economic Anthropology. 3 Units
Prerequisite(s): ANTH 146 or instructor permission.
Term Typically Offered: Fall, Spring
What happens to society when exchange fails? The root of economy is the household, whose members make a living in relation to other people, and in culturally shaped ways. The "world economic system" of the late 20th Century global village consists of many ill-fitting parts with different histories and goals. These functioning and changing households, markets, technologies, and concepts of work, property, and the good life are studied from a cross-cultural perspective. Also focuses on the impact of industrial societies on tribal and peasant economies.

ANTH 109. Ecological and Evolutionary Approaches to Anthropology. 3 Units
Prerequisite(s): ANTH 3
Term Typically Offered: Fall, Spring
Survey of anthropological research regarding the relationships between human behavior, ecology, and evolution. Reviews historic development of research in this field, and contrasts approaches based in ecological and evolutionary theory. Reviews and evaluates of case studies. Topics include hunter-gatherer and hominid economy and social organization, foraging theory, work effort, population growth and regulation, origins of agriculture, warfare, ritual and resource conservation, and origins of complex society.

ANTH 110. Archaeological Method and Theory. 3 Units
Prerequisite(s): ANTH 3.
Term Typically Offered: Fall, Spring
Traces the development of archaeology from its inception in the eighteenth century up to the present time. Readings, lectures, and class assignments follow the evolution of archaeological method and theory in relation to changing ideas about the role of culture, environment, and technology within the broader discipline of anthropology.

ANTH 111. California Archaeology. 3 Units
Prerequisite(s): ANTH 3
Term Typically Offered: Fall, Spring
Pre-contact California encompassed some of the most extensive environmental and cultural diversity ever to exist on the planet, containing widely divergent biota, many distinct languages and cultures, and among the densest hunter-gatherer populations ever recorded. At least 11,000-12,000 years of human occupation have been marked by multiple migrations and major shifts in technological and social organization. Explores long-term trends in cultural development across the state, and examines models used to explain why semi-permanent settlements, intensive subsistence strategies, and complex social institutions arose in some times/places and not others.

ANTH 112. Great Basin Archaeology. 3 Units
Prerequisite(s): ANTH 3
Term Typically Offered: Fall, Spring
Explores the cultural and natural history of the Great Basin from the last glacial maximum into the historic era. Though largely arid, this region in fact manifests considerable environmental variability and has seen significant climatic alterations since the Pleistocene. Human occupation of the Great Basin witnessed major changes in demography, technology, subsistence practices, and sociopolitical organization over the last 10,000-12,000 years. The course looks to understand cultural and environmental variability across the region through examination of the long-term material record and consideration of anthropological and biological models.

ANTH 113. Prehistory of the Southwest. 3 Units
Prerequisite(s): ANTH 3
Term Typically Offered: Fall, Spring
Survey of the prehistory of the Arizona, New Mexico, Western Colorado, Utah, and adjacent regions of Nevada, Texas and northwestern Mexico. Major prehistoric cultures of the Southwest (Hohokam, Anasazi, Mogollon, Fremont) are covered in detail. Focus on major transitions in subsistence and social organization emphasizing current issues of archaeological research. Cultural influences from outside areas are also considered.

ANTH 114. North American Prehistory. 3 Units
Prerequisite(s): ANTH 3
Term Typically Offered: Fall, Spring
Familiarizes students with the archaeological record of North America, and provides an analytical framework through which it may be understood in anthropologically meaningful terms. This will be accomplished by considering some of the explanations that have been proposed to account for the prehistory of the continent, and by examining the archaeological remains and cultural sequences found in various areas, including the North and Southeast, Great Plains, Pacific Northwest, and arctic/subarctic regions.
ANTH 115. Origins of Agriculture. 3 Units
Prerequisite(s): ANTH 3
Term Typically Offered: Fall, Spring

Surveys and evaluates worldwide anthropological perspectives of the origins of agriculture and the rise of complex society. Traces the development of major archaeological theories for the inception and spread of agriculture and civilization, acquainting students with groundbreaking archaeological research associated with each theoretical perspective. Current archaeological research is reviewed in-depth, providing a context for critique of the theories. Examples from North America, Latin America, the Middle East, India and China are compared and contrasted using movies, readings, and lectures.

ANTH 116. Old World Prehistory: Paleolithic Archaeology. 3 Units
Term Typically Offered: Fall, Spring

Old World Paleolithic archaeology from the emergence of hominids until the development of agriculture and civilization. Cultural developments in Africa, Asia, Europe and Australia are examined with the aim of highlighting similarities and differences in the process of technological, demographic, and sociopolitical change within each region. Explanatory models are offered to account for cultural evolution in various parts of the Old World are explored and assessed.

ANTH 119. Analysis of Faunal Remains. 4 Units
Prerequisite(s): ANTH 3 and Anthropology (Archaeological and Biological Anthropology) concentration.

Seminar on techniques and methods employed in analysis of faunal remains from archaeological sites, coupled with a laboratory providing hands-on identification of mammalian remains from these settings. Large focus on quantitative methods used in zooarchaeology to infer behavioral patterns of the human past and their paleoenvironments.

ANTH 120. Introductory Statistics for Anthropologists. 3 Units
Prerequisite(s): Anthropology (Archaeological and Biological Anthropology) concentration.
Term Typically Offered: Fall, Spring

Covers the conceptual framework involved in quantitative methods of data analysis commonly employed in anthropology. The emphasis is primarily on understanding concepts and secondarily on learning techniques of data analysis. Topics include data description and distributions, estimation procedures, hypothesis testing, and model fitting. Illustration of concepts in lecture are made with data from archaeology, physical anthropology, and social/cultural anthropology.

ANTH 121. Archaeology of Mexico. 3 Units
General Education Area/Graduation Requirement: Humanities (Area C2)
Term Typically Offered: Fall, Spring

Provides an upper division introduction to the archeology of Mesoamerica for students not majoring in anthropology. Discusses the evolution of the ancient civilizations of Mesoamerica, including Mexico, Guatemala, Belize, Honduras, and El Salvador. Examines the development of societies from the earliest inhabitants to the growth of empires. Includes coverage of the Olmecs, Monte Alban, Teotihuacan, the Classic Maya, the Toltecs, and the Aztecs.
Note: Cannot be used to meet the requirements of the Anthropology major; interested majors should take ANTH 122.

ANTH 122. The Evolution of Early Mesoamerican States. 3 Units
Prerequisite(s): ANTH 3
Term Typically Offered: Fall, Spring

Traces the emergence of pre-hispanic state societies in Mesoamerica from the growth of the earliest settlements to the collapse of the Aztec empire. Analyzes how complex societies evolved in Mesoamerica, focusing on such evidence as household and village social organization, craft specialization and interregional exchange, religion and ideology, and the logistics of state management and imperial expansion.

ANTH 123. Ancient Technology. 3 Units
Term Typically Offered: Fall, Spring

Examines the importance of various preindustrial technologies, and the techniques and methods involved in their manufacture and use. Topics include stone, bone, wood, and hide working, ceramics, weaving, metallurgy, and other crafts essential to human survival in ancient and contemporary societies around the world.

ANTH 124. Environmental Archaeology. 3 Units
Prerequisite(s): ANTH 3 and Anthropology (Archaeological and Biological Anthropology) concentration.
Term Typically Offered: Fall, Spring

All human societies depend on their natural surroundings, and so the reconstruction of prehistoric environments is an essential part of archaeological interpretation. Three interrelated aspects of environmental archaeology are considered: (1) general approaches to paleoenvironmental reconstruction, employing various biological and geological indicators; (2) the analysis of human plant and animal food remains; and (3) the geological and other processes that are responsible for the formation of archaeological deposits.

ANTH 125. Historical Archaeology. 3 Units
Term Typically Offered: Fall, Spring

Written history only records a small portion of human activities that occurred in the recent past. Explores the numerous methods of investigation, analysis and interpretation that are available to aid the historical archaeologist in discovering missing information and in some cases correcting erroneous statements, assumptions and interpretations about the past.

ANTH 126. Techniques of Archaeological Analysis. 3 Units
Prerequisite(s): ANTH 3 and Anthropology (Archaeological and Biological Anthropology) concentration.
Term Typically Offered: Fall, Spring

Introduces students to various approaches to archaeological analysis, focusing on how different classes of data are collected, classified, and interpreted to resolve research issues. Includes such topics as the handling, treatment, and analysis of flaked and ground stone tools, plant and animal food remains, and other types of archaeological materials. Lecture one hour, laboratory six hours.
Note: May be repeated once for credit.
ANTH 127. Cultural Resource Management in Theory and Practice.  3 Units

Prerequisite(s): ANTH 3
Term Typically Offered: Fall, Spring

Takes a wide-ranging look at how cultural resources are managed and preserved in California, the greater U.S., and other parts of the world. More than just a review of applicable laws and regulations, it is designed to offer a history of historic preservation, examine its role in our society, and explore the prospects for its continued presence. Practical aspects of Cultural Resource Management (CRM) are reviewed with respect to designing, budgeting, and performing archaeological surveys, site evaluation studies, and data recovery or mitigation programs.

ANTH 128. Indians of California.  3 Units

Term Typically Offered: Fall, Spring

Provides a survey of the traditional cultures of California Native American groups as they existed immediately after Western contact. Exploration of the ecological linguistic, economic, social, political, and religious diversity of California Native American groups provides a background for analysis of current anthropological theories of hunter-gatherer adaptations, subsistence intensification, political economy, cultural complexity, and California prehistory.

ANTH 129. Human Use of Caves From An Archaeological Perspective.  3 Units

Prerequisite(s): ANTH 3.
Term Typically Offered: Fall, Spring

Unique character of caves and their deposits present many challenges that cannot always be met with conventional archaeological, methodological and theoretical approaches. Students will be exposed to investigative techniques that facilitate the understanding of these unique archaeological resources. The investigation of the human use of caves through a worldwide perspective provides students with a thorough introduction to the study of these significant resources.

ANTH 130. Social Justice in Interdisciplinary Perspective.  3 Units

Prerequisite(s): Sophomore standing or instructor permission.
Term Typically Offered: Fall, Spring

Examines the nature and forms of social justice and injustice. Addresses key philosophical and theoretical models and debates over the meaning of social justice, using historical and contemporary examples to highlight important concepts and controversies. Faculty from different departments within SSIS, and occasionally from other colleges, will address how their discipline understands and analyzes issues of social justice. Students will be encouraged to critically assess the assumptions of various perspectives on social justice, and to address the relationship of academe and social activism in achieving social justice. Cross listed as ID 124, ENVS 124, ETHN 124, FACS 124 and SOC 124. Only one may be counted for credit.

ANTH 131. Europe in the Ethnographic Imagination.  3 Units

Prerequisite(s): ANTH 146 or instructor permission.
Term Typically Offered: Fall, Spring

More than a place or "continent," Europe is a social and ideological construction employed to unite diverse linguistic and cultural communities. Focuses on major themes in contemporary Europeanist anthropology, including transformations within and between local communities and regions (especially with regards to Northern Ireland, the former Society bloc, and Yugoslav federation), immigration, neo-nationalist extremism, the changing character of religious institutions, and the European Union as a framework for organizing identity and society.

ANTH 134. Japanese Culture and Society.  3 Units

General Education Area/Graduation Requirement: Humanities (Area C2)
Term Typically Offered: Fall, Spring

Culture of the Japanese: traditional and modern, rural and urban, cultural and social institutions; village and urban organization; and family structure. Aspects of social change in contemporary rural and urban Japan.

ANTH 135. Indians of North America.  3 Units

Term Typically Offered: Fall, Spring

Provides a survey of traditional Native American societies and culture areas north of Mexico. Readings, lectures, and discussions emphasize primary ethnographic and historic data that provide the richest accounts of Amerindian cultures at the time of European contact and shortly thereafter.

ANTH 140. Social Anthropology.  3 Units

Prerequisite(s): ANTH 146 or instructor permission.
Term Typically Offered: Fall, Spring

Cross-cultural comparisons of the structures and functions of non-literate and complex societies; the diversity of social and territorial units, their analysis and classification; and the study of social organization and control and social change in relation to kinship, marriage and family, lineage and clan, law, politics, economics and religion in diverse societies.

ANTH 141. Culture Theory.  3 Units

Prerequisite(s): ANTH 146 or instructor permission.
Term Typically Offered: Fall, Spring

Exploration of the concepts, dimensions and dynamics of culture theory, viewing culture as an adaptive, comparative, cognitive, structural and symbolic system.

ANTH 142. Political Anthropology.  3 Units

Prerequisite(s): ANTH 146 or instructor permission.
Term Typically Offered: Fall, Spring

Explores political anthropology as a specialized field of anthropological inquiry. Analyzes the articulation of power, authority, and legitimacy in non-state and state based societies. Contributes to an understanding of the transforming powers of modernity and resistance to it and develops a critical appreciation of how age, status, class, ethnicity, race, gender and religious ideologies shape political order within various societies around the world.
ANTH 143. Culture and Society in Mexico. 3 Units
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall, Spring

Introduction to the cultural and social institutions of the Mexican people. The changing patterns of family, economic, political, religious, and educational systems in Mexico.

ANTH 144. Contemporary American Culture in Anthropological Perspective. 3 Units
Prerequisite(s): ANTH 146
Term Typically Offered: Fall, Spring

Anthropological analysis of contemporary American culture viewed from the perspective of both internal and external observers, with emphasis on such subjects as cultural myths and social realities, values, ideology and world view, family and cultural transmission, social institutions and structures, religious ceremonies and magical rituals, and other customs and practices that establish American culture as one of the more bizarre and exotic in the world ethnographic literature.

ANTH 145. Peoples and Cultures of Latin America. 3 Units
Prerequisite(s): ANTH 146 or instructor permission.
Term Typically Offered: Fall, Spring

Exploration of diversity of peoples and cultures in Latin America and the common experiences such as colonialism, ethnicity, and economy that shape their lives. Aspects of culture examined include: race and ethnicity, colonialism and its implications, the state and political institutions, religious systems, kinship and social organization, gender, economic processes, and issues pertaining to environment, urbanization, globalization, nationalism, and transnationalism.

ANTH 146. Ethnographic Analysis. 3 Units
Prerequisite(s): ANTH 2.
Term Typically Offered: Fall, Spring

Introduces students to current techniques, theories, and debates in ethnographic research and analysis through the use of ethnographies and related works. Critically examines the production of ethnographic knowledge in socio-cultural anthropology from historical and contemporary perspectives.

ANTH 147. Peoples of Southeast Asia. 3 Units
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall, Spring, Summer

Survey of the native peoples of Southeast Asia (Laos, Vietnam, Thailand, Philippines, Malaysia, Indonesia, Burma and Singapore). Emphasis is on examining the forms of social and cultural pluralism in contemporary Southeast Asian societies.

ANTH 148. Anthropology of Chinese Societies. 3 Units
Term Typically Offered: Fall, Spring

Exploration of the cultures of three Chinese societies (Taiwan, Hong Kong, and the People's Republic of China) in each of their unique historical contexts. A comparison and contrast of how these societies, though sharing a common cultural heritage, have had different paths of development in recent times. Aspects of culture examined include: the state and political institutions; religious systems; kinship and social organization; economic processes; and issues of regional integration, nationalism and transnationalism.

ANTH 149. Cultures of South Asia. 3 Units
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall, Spring

Exploration of cultural practices in different South Asian societies. Analyzes the impact of colonialism, post-colonialism and discourses of modernity on South Asian societies. Examines the process of state formation, nation-building, communal conflict, economic transformations and the politics of caste, gender and class in contemporary South Asia.

ANTH 150. Human Osteology. 4 Units
Prerequisite(s): ANTH 1 and ANTH 1A, or BIO 22; and Anthropology (Archaeological and Biological Anthropology) concentration.
Term Typically Offered: Fall only

Provides students a hands-on, in-depth study of human osteology. Learn growth and development of the skeletal tissues and identification of the individual skeletal elements, and practice basic measurements, sexing and aging of skeletal material. A prerequisite for advanced techniques in forensic anthropology. Students will work with the department's osteological materials.

ANTH 151. Human Paleontology. 3 Units
Prerequisite(s): ANTH 1, ANTH 1A, or instructor permission.
Term Typically Offered: Fall, Spring

Survey of the field of human evolution from primate beginnings to modern humans. Emphasizes the interpretation of the fossil evidence and the major trends in hominid evolution, including the origins and relationships of the extinct forms of humans.

ANTH 152. Primate Adaptations. 3 Units
Term Typically Offered: Spring only

Covers the significant dental, skeletal, and soft-anatomical adaptations of the major living families and/or subfamilies within the Order Primates. In the process of surveying the adaptations, the student will become familiar with evolutionary theory, taxonomy, embryology, ecology, social systems, biomechanics, effects of size, and the functional morphology of the skeletal system in primates. Three-hour seminar, with some lecture and hands-on experience with skeletons and casts.

ANTH 153. Evolutionary Medicine. 3 Units
Term Typically Offered: Fall, Spring

Introduction to the application of evolutionary theory to human health and disease. Evolutionary medicine is a rapidly growing multidisciplinary specialization utilizing insights from evolutionary theory and human evolutionary ecology to inform understandings of human health, development and disease; and also to critique existing biomedical theory about the human condition. Topics include reproduction, child birth, lactation, growth and development, infectious diseases, parasites, diet and nutrition, mental and behavioral disorders, and substance use and addiction.

Note: ANTH 1, BIO 10, BIO 11, or PSYC 2 recommended.

ANTH 154. Primate Behavior. 3 Units
Term Typically Offered: Fall, Spring

Survey of the genetic, ecological and social influences on non-human primate behavior from an evolutionary perspective; covers the major non-human primate groups, including their taxonomy, major adaptations, and their present geographic distribution. The history and development of primate behavior also will be considered with an emphasis on various models for interpreting behavior.
ANTH 155. Fundamentals of Biological Anthropology. 3 Units
Prerequisite(s): ANTH 1 and ANTH 1A.
Term Typically Offered: Fall, Spring
Survey of the development of method and theory in physical anthropology from its origins in zoology, anatomy, and medicine, to the various approaches currently used in the study of human biology and evolution. Concepts considered include the scientific method, modern genetics, evolutionary theory, the race concept and other approaches to explaining human variation, taxonomy and systematics, and macro-evolutionary models. Critical reading and analytical skills will be emphasized.

ANTH 156. Evolution of Human Behavior. 3 Units
Prerequisite(s): ANTH 1, BIO 10, or PSYC 2 recommended.
Term Typically Offered: Fall, Spring
Introduction to the application of evolutionary theory to human behavior and psychology. Reviews and contrasts contemporary perspectives of human behavioral evolution with emphasis on insights from the emerging field of evolutionary psychology. Topics include human behavior and cognition as adaptations, "selfish genes," game theory, evolution of social behavior, evolution of altruism, human mating strategies, parenting, behavioral disorders, evolution of the life cycle, human behavioral ecology, Darwinian medicine, and evolutionary psychology.

ANTH 157. Human Variation. 3 Units
Prerequisite(s): ANTH 1, BIO 10, or instructor permission.
Term Typically Offered: Fall, Spring
Survey of the basic principles of human genetics with emphasis on the mechanisms that shape human evolution and the development of human races. Analyzes the laws of heredity as exhibited in modern human populations and human adaptability to climatic extremes. Historical development of concepts. Discussion of most current research.

ANTH 158. Human Skeletal Analysis. 4 Units
Prerequisite(s): ANTH 150.
Term Typically Offered: Spring only
Provides advanced techniques in osteology and forensic anthropology essential for many practicing physical anthropologists. Discussion and survey of the primary literature, followed by intensive hands-on experience with human skeletal remains. Included: techniques for determining age, sex and ethnicity; measurement; pathology; and trauma. The role of the forensic anthropologist and archaeologist, ethical considerations, and human rights issues are also covered. Three-hour seminar, and a three-hour lab involving substantial hands-on experience with human skeletal remains.

ANTH 159. Forensic Anthropology. 3 Units
Prerequisite(s): Any lower-division GE Area B2 course.
General Education Area/Graduation Requirement: Further Studies in Area B (B5)
Overview of forensic anthropology - an applied field of biological anthropology that works with law enforcement, medical examiners, and human rights agencies. Forensic anthropologists answer questions of medico-legal significance by applying techniques designed for analysis of human skeletal remains. Includes determining time since death, the biological profile, trauma analysis and the role of the forensic anthropologist in human rights investigations.

ANTH 160. Linguistic Anthropology. 3 Units
Prerequisite(s): ANTH 4 or instructor permission.
Term Typically Offered: Fall, Spring
Introduction to language and linguistics for anthropologists with emphasis on the role of linguistic anthropology in the development of theory and method within the discipline; non-human communication systems, language acquisition, and culture theory; the fundamentals of descriptive and structural linguistics; types of human languages; the diversity and distribution of languages from prehistoric to modern times; fundamentals of historical linguistics and proto-cultural studies.

ANTH 161. African Cultures and Societies. 3 Units
Prerequisite(s): ANTH 146 or instructor approval
Term Typically Offered: Fall, Spring
Explores the cultural richness and regional variation of African societies. Engages students with central issues and debates pertaining to Africa in relation to the deepening global interconnectedness of the human socio-cultural worlds. Topical discussions include: colonial legacy, the postcolonial state and traditional authority; ethnic identity and cultural diversity; family, kinship and the African youth; masculinity, sexuality and women; Islam, Christianity and indigenous spirituality; health, poverty and development; migration and globalization; ecotourism and African cultures.

ANTH 162. Language and Culture. 3 Units
Prerequisite(s): ANTH 4 or instructor permission.
Term Typically Offered: Fall, Spring
Relationship between language and culture; historical relationships between languages; language families and major cultural traditions; cross-cultural studies of how the language influences perception and the organization of reality; the ways in which language is embedded in social life and practices, and the ways in which various cultural patterns and values are reflected in language.

ANTH 163. Urban Anthropology. 3 Units
Prerequisite(s): ANTH 146 or instructor permission.
Term Typically Offered: Fall, Spring
Overview of both anthropological method and theory applied to research of urban environments and a survey of significant anthropological studies that have been conducted in these settings. Examines such topics as the urbanization process, the culture of cities, urban subcultures, social problems in urban areas, social networks and adaptive kinship strategies in cities, and the concentration and exercise of power, wealth and influence in urban centers.

ANTH 164. Culture Change. 3 Units
Prerequisite(s): ANTH 146 or instructor permission.
Term Typically Offered: Fall, Spring
Anthropological study of mechanisms and process of social and culture change; basic theories of ecological adaptation and cultural evolution; action chains and cultural patterns; technological innovation, migration, acculturation, cultural dissonance, conflict, and cultural revitalization; analysis of case studies emphasizing contemporary conditions and problems; rapid technological innovation, population control, immigration and acculturation, social diversification, ethnic conflict.
ANTH 165. Applied Anthropology. 3 Units
Prerequisite(s): ANTH 105 or ANTH 108 or ANTH 140 or ANTH 141 or ANTH 142 or ANTH 167 or ANTH 168 or ANTH 176; and Anthropology (Culture, Language, and Society) concentration.
Term Typically Offered: Fall, Spring

Provides tools for exploring the application of an anthropological paradigm to various aspects of culture change and conflict. Content is organized into a series of critical topical areas such as modernization, economic development, human services, and urbanization.

ANTH 166. Rise of Religious Cults. 3 Units
General Education Area/Graduation Requirement: Humanities (Area C2)
Term Typically Offered: Fall, Spring, Summer

Examination of cult movements, involving comparisons of the ideals, objectives and symbolic processes common to ecstatic religious movements throughout the world -- from Melanesian cargo cults to the Peoples' Temple. Anthropological perspectives are used to examine religious cults as conscious attempts to perpetuate traditional values and social goals or to radically change the status quo; millenarian movements, crisis cults, nature communes, exotic religious importations, and cult characteristics of modern secular movements.

ANTH 167. Religion and Culture. 3 Units
Prerequisite(s): ANTH 146 or instructor permission.
Term Typically Offered: Fall, Spring

Examines ethnographic perspectives on the character and intersections of religion, ritual, and culture. Surveys the thought of "classical" social theorists (e.g., Durkheim, Tylor, Weber, and Evans-Pritchard), and concentrates on central topics in the anthropology of religion. Including the political nature of embodiment and trance, religion and nationalism, the significance of language and performance, the gendered character of many religious phenomena, and science and religion as competing epistemologies.

ANTH 168. Folklore in Anthropological Perspective. 3 Units
Prerequisite(s): ANTH 160 or ANTH 162 or instructor permission.
Term Typically Offered: Fall, Spring

Anthropological contributions to the study of folklore; survey of oral literature and other folklore forms, such as myth, folklore, legend, proverb, riddle, and games, in their social contexts; folklore as "autobiographical ethnography," folklore in everyday life, survey and comparison of folklore traditions in several culture areas.

ANTH 169. Research Methods in Linguistic Anthropology. 3 Units
Prerequisite(s): ANTH 160 or ANTH 162, and Anthropology (Culture, Language, and Society) concentration.
Term Typically Offered: Fall, Spring

Consideration of language in its social context: language and power, language and gender, interethnic communication, language and race, pidgins and creoles, multilingualism, standardization, language ideology. Instruction in ethnographic and linguistic methods of data collection and analysis; identification of socially significant linguistic variables. Contributions of the study of contextualized speech to linguistic theory.

ANTH 170. The Religious Landscape of the Sacramento Valley. 3 Units
Prerequisite(s): GWAR certification before Fall 09; or WPJ score of 80+; or 3-unit placement in ENGL 109M or ENGL 109W; or 4-unit placement in ENGL 109M or ENGL 109W and co-enrollment in ENGL 109X; or WPJ score 70 or 71 and co-enrollment in ENGL 109X.
General Education Area/Graduation Requirement: Humanities (Area C2), Writing Intensive Graduation Requirement (WI)
Term Typically Offered: Fall, Spring

Introduction to the field study of religious communities. Addresses the nature of religious pluralism in the U.S. today. The practice and belief systems of at least five different religious communities will be studied each semester. Students are required to do an in-depth term project based on research in one or more religious communities.

Cross Listed: HRS 170; only one may be counted for credit.

ANTH 171. Bioarchaeology: Analyzing Human Remains from Archaeology Sites. 3 Units
Prerequisite(s): ANTH 1 and ANTH 1A or instructor permission.
Term Typically Offered: Fall, Spring

An exploration of research conducted on human remains from archaeological sites, including historical and ethical perspectives. Examines the effects of funerary context and preservation on skeletal remains. Demonstrates relevance of human skeletal analysis to understanding demography, causes of human skeletal variation, diet, and relevant themes in paleopathological research. Special emphasis placed on infectious disease, growth and development, activity patterns, injury and trauma, craniofacial adaptations, and methods for identifying genetic relationships in human skeletal remains.

ANTH 172. Anthropologies of Music. 3 Units
Prerequisite(s): ANTH 146 or Instructor Permission.
Term Typically Offered: Fall, Spring

Introduces students to current anthropological research on social groups and cultural practices that orient around and draw inspiration from music, wherever and however it is conceived. Course focus is not on music theory or structure; rather, it critically examines anthropological and ethnographic works that focus on the relations among such social domains and features as visual and aural aesthetics, political belief, gender, ritual, religion, race, and ethnicity.

ANTH 173. Anthropology of Contemporary Asia. 3 Units
Prerequisite(s): ANTH 146 or instructor permission.
Term Typically Offered: Fall, Spring

This course examines contemporary Asia as an articulation of intersecting historical, cultural, political and economic processes. The course will focus on postcolonial developments and critically explore the manner in which process of globalization and neoliberal strategies embed themselves within, and the responses they elicit from societies across Asia.

ANTH 174. Anthropology of Food. 3 Units
Prerequisite(s): ANTH 146 or instructor permission.
Term Typically Offered: Fall, Spring

Examines food and eating from an anthropological perspective. Demonstrates how food communicates social messages about individual or group identity, creates social boundaries or forges belonging, and can reflect one's politics, values, and ethics. Through ethnographic examples and attention to global processes, this course explores food production, circulation, and consumption.
ANTH 175. Anthropology of Globalization. 3 Units
Prerequisite(s): ANTH 146 or instructor permission
Term Typically Offered: Fall, Spring

The course introduces students to major themes that inform anthropological understanding of globalization. This course will explore theoretical perspectives, topics, and methods of analysis developed in anthropology to capture the effects of intermingling global/local cultural forces and the diverse relations of power that structure them and in which they are embedded.

ANTH 176. Museums, Culture, and Society. 3 Units
Prerequisite(s): ANTH 146 or instructor permission.
Term Typically Offered: Fall, Spring

Provides an introduction to museum anthropology. Surveys the emergence of modern anthropology from its origins in 17th century natural history to its late 19th century institutionalization in museums. Explores the role of collectors, curators and financial patrons in the development of museums and social theory. Examines the contemporary poetics and politics of museums and cultural interpretation, including cultural property rights, cultural self-representation, collaborative exhibit development, and the ethnography of museums.

ANTH 177. Museum Methods. 3 Units
Prerequisite(s): ANTH 176 and Anthropology (Culture, Language, and Society) concentration.
Term Typically Offered: Fall, Spring

Combined lecture and laboratory course designed to teach basic museum methods. Surveys contemporary issues and practices in museum governance, management, interpretation, and evaluation. Provides hands-on collections and exhibit experience, including participation in the design, fabrication and installation of an exhibition.

ANTH 178. Internship. 3 - 4 Units
Term Typically Offered: Fall, Spring

Practical experience in an approved professional environment. Student intern will work directly with professionals in public and private agencies where opportunities exist for anthropological work. Supervision and evaluation are provided by a faculty internship director and the on-site supervisor. Placements require from 15-20 hours per week. Note: May be repeated for credit.

Credit/No Credit

ANTH 181. Anthropology of Human Rights. 3 Units
Prerequisite(s): ANTH 146 or instructor permission.
Term Typically Offered: Fall, Spring

Examines multiple dimensions of human rights from an anthropological perspective. Explores the history and development of human rights ideas and legal conventions, and how these ideas and conventions are appropriated, adapted, contested or rejected in different cultural and political contexts. Using ethnographic case studies from around the world, addresses how the human rights discourse mediates the relationship between specific groups of people, their national states and international conventions and institutions.

ANTH 183. Women Cross-Culturally. 3 Units
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall, Spring

Position of women in various societies, preliterate through contemporary industrial; the evolution of women's roles and rights cross-culturally.

ANTH 185. Culture and Poverty. 3 Units
Prerequisite(s): GWAR certification before Fall 09; or WPJ score of 80+; or 3-unit placement in ENGL 109M or ENGL 109W; or 4-unit placement in ENGL 109M or ENGL 109W and co-enrollment in ENGL 109X; or WPJ score 70 or 71 and co-enrollment in ENGL 109X.
General Education Area/Graduation Requirement: Writing Intensive Graduation Requirement (WI), Race & Ethnicity Graduation Requirement (RE), GE AREA D
Term Typically Offered: Fall, Spring

Analyzes poverty in American society: the cross-cultural context, social inequality in the U.S., theoretical perspectives and their influence on policy, present trends and implications for the future.

ANTH 188. Anthropology of the Body. 3 Units
Term Typically Offered: Fall, Spring

Study of the diverse ways that humans explain and attempt to alter the human body. Focus is on the meanings and implications of our own bodily experiences through objective comparison of the experiences, explanations and techniques found in our society with those in others.

ANTH 190. Advanced Topics in Linguistic Anthropology. 3 Units
Prerequisite(s): ANTH 160 or ANTH 162 or instructor permission.
Term Typically Offered: Fall, Spring

Seminar examining contemporary developments in theories and methods of linguistic anthropology. Note: May be repeated for credit providing the topic and instructor are not the same.

ANTH 191. Anthropology Practicum. 3 Units
Prerequisite(s): ANTH 165 or ANTH 169 or ANTH 177 or ANTH 192B; and senior level
Term Typically Offered: Fall, Spring

Students work 3-6 hours per week off campus in one of several research institutions under the supervision of institutional personnel. Students are required to become familiar with the scholarly literature relevant to their placement, to participate in on-campus meetings, and to write a research paper integrating the research and fieldwork aspects of the practicum. Permission of instructor and ANTH coordinator required prior to registration. Open to seniors only.

ANTH 192A. Laboratory Work in Archaeology. 1 Unit
Prerequisite(s): ANTH 3
Corequisite(s): ANTH 195A; may be waived with instructor permission.
Term Typically Offered: Fall, Spring

Introduces methods used in the basic laboratory preservation, cataloging, and initial analysis of various materials recovered through ANTH 195A survey and excavation projects; always offered in conjunction with ANTH 195A. Note: May be repeated for credit.

ANTH 192B. Laboratory in Ethnographic Techniques. 1 Unit
Prerequisite(s): ANTH 105 or ANTH 108 or ANTH 140 or ANTH 141 or ANTH 142 or ANTH 167 or ANTH 168 or ANTH 176, and Anthropology (Culture, Language, and Society) concentration.
Corequisite(s): ANTH 195B.
Term Typically Offered: Fall, Spring

Design and discussion of research strategies, primary ethnographic techniques, the development of interviewing skills, and practice in the use of various recording technologies.
ANTH 195A. Fieldwork in Archaeology. 2 Units
Prerequisite(s): ANTH 3
Corequisite(s): ANTH 192B
Term Typically Offered: Fall, Spring

Introduction to archaeological field methods, covering practical aspects of how to identify and investigate isolated artifact finds, particular sites and features, and entire landscapes. Covering survey and excavation techniques, basic approaches to sampling, mapping and navigation, stratigraphic excavation, artifact and feature recording, and recovery methods.

Note: May be repeated for credit.

ANTH 195B. Fieldwork in Ethnology. 2 Units
Prerequisite(s): ANTH 105 or ANTH 108 or ANTH 140 or ANTH 141 or ANTH 142 or ANTH 167 or ANTH 168 or ANTH 176, and Anthropology (Culture, Language, and Society) concentration.
Corequisite(s): ANTH 192B
Term Typically Offered: Fall, Spring

Directed team fieldwork in ethnology.

ANTH 195C. Fieldwork in Physical Anthropology. 2 - 3 Units
Term Typically Offered: Fall, Spring

Individual or group fieldwork in various areas of physical anthropology, under the supervision of individual faculty members; may involve related supervised laboratory work.

ANTH 196S. Senior Seminar in Anthropology. 3 Units
Prerequisite(s): Anthropology majors with senior standing
Term Typically Offered: Fall, Spring

Anthropology approaches knowledge about the human condition from multidisciplinary perspectives. This senior seminar synthesizes fundamental themes from among the sub-disciplines. Students will engage with concepts and issues from different anthropological perspectives, and then work to identify common historical, methodological and theoretical anthropological themes. On completion of the course, students will have learned to seek and interpret anthropological knowledge in a holistic fashion.

ANTH 196T. Zoarchaeology. 3 Units
Prerequisite(s): ANTH 3
Term Typically Offered: Fall, Spring

An examination of past and recent research conducted on animal remains from archaeological sites. Discussion and survey of the primary literature in evaluating the role animal exploitation plays in human evolution and among small scale foraging, pastoralist, and complex societies. Emphasis on vertebrate taphonomy, reconstruction of diet from faunal remains, and ecological and evolutionary theory to understand human-animal relationships through time.

ANTH 199. Special Problems. 1 - 3 Units
Prerequisite(s): Approval of the faculty member under whom the individual work is to be conducted and the Department chair.
Term Typically Offered: Fall, Spring

Individual projects or directed reading.

Note: Open only to students who appear competent to carry on individual work. May be repeated for credit.

Credit/No Credit

ANTH 200. General Methods in Anthropology. 3 Units
Term Typically Offered: Fall, Spring

Explores uses of scientific methodology in anthropology through the examination of specific case studies in the various specialties. Focus is on the relationship among techniques, methods, and methodology; hypothesis and theory; units of analysis and comparison; deductive and inductive reasoning; inferential processes; various types of comparison (casual, controlled, hologetic); limitations of, and objections to, “the comparative method.”

ANTH 201. Anthropological Theory. 3 Units
Prerequisite(s): Graduate status in anthropology or instructor permission.
Term Typically Offered: Fall, Spring

Intensive reading and seminar discussion in topics on anthropological theory and research.

Note: May be repeated for credit provided topic is not repeated.

ANTH 202. Biological Anthropology Seminar. 3 Units
Term Typically Offered: Fall, Spring

Survey of contemporary issues in physical anthropology.

ANTH 203. Archaeology. 3 Units
Term Typically Offered: Fall, Spring

Explores the intellectual development of archaeological method and theory; examines the history of archaeological thought from its advent to the present day, looking in detail at pre-scientific, culture-historical, processual, and post-processual approaches to the discipline; emphasis is placed on the role of archaeology as a branch of anthropology and as a historical, humanistic, and/or scientific enterprise.

ANTH 204. Current Problems in Archaeological Method and Theory. 3 Units
Term Typically Offered: Fall, Spring

Explores recent methodological and theoretical developments within archaeology; focus is on contemporary debates within the discipline; topical coverage varies; examines conceptual and practical concerns, highlighting possibilities and limitations of new approaches to archaeological problems.

Note: May be repeated for credit provided topic and instructor are not repeated.

ANTH 205. Ethnology. 3 Units
Term Typically Offered: Fall, Spring

Seminar is designed for students to develop a working knowledge of anthropological approaches to a number of major issues in ethnology. The focus is on the analysis of case studies.

Note: May be repeated once for credit with different instructor.

ANTH 207. Language and Culture. 3 Units
Term Typically Offered: Fall, Spring

Critical examination of contemporary studies in the relationship between language and culture; nonhuman primate communication and the origin of speech; non-verbal communication; historical linguistics; comparative semiology; ethnosemantics; applications of linguistic models of analysis in the study of culture.

Note: May be repeated for credit given that the instructor changes.
ANTH 222. Bioarchaeology Seminar.  3 Units
Prerequisite(s): Graduate status in anthropology.
Term Typically Offered: Fall, Spring
Provides an intensive, detailed discussion of method and theory in the skeletal biology of past human populations. Topics discussed include: demography, dietary analysis, mortuary dimensions, health and disease, biological distance and DNA analysis. Focuses on the interaction of biology and behavior, particularly the influence of culture and the environment on the skeletal and dental tissues.

ANTH 223. Areal Archaeology.  3 Units
Term Typically Offered: Fall, Spring
Provides an intensive examination of archaeological problems within a selected regional or topical area. Through general readings and case studies, students will critically assess how current perspectives regarding relevant issues have evolved and determine how contemporary viewpoints might be improved or expanded.
Note: May be repeated for credit provided topic and instructor are not repeated.

ANTH 226. Advanced Techniques of Archaeological Analysis.  3 Units
Prerequisite(s): ANTH 126 or instructor permission.
Term Typically Offered: Fall, Spring
Examines more refined approaches to archaeological analysis, focusing on how various classes of data are collected, classified, and interpreted to resolve directed research problems. Emphasis is on such topics as sampling procedures and statistical assessment of data rather than descriptive analysis and interpretation. Lecture one hour; laboratory six hours.

ANTH 251. Human Paleontology.  3 Units
Survey of the field of human evolution from primate beginnings to modern humans. Emphasizes the interpretation of the fossil evidence and the major trends in hominid evolution, including the origins and the relationships of the extinct forms of humans.

ANTH 276. Museum Anthropology.  3 Units
Prerequisite(s): Graduate status in Anthropology or instructor permission.
Term Typically Offered: Fall, Spring
Surveys the practical, theoretical, and historical dimensions of museum anthropology and material culture studies, with particular emphasis on the U.S. and California. Situates contemporary issues related to the collection, exhibition, and repatriation of ethnographic and archaeological materials within the sociopolitical context of the globally based indigenous rights movement.
Note: Recommended for graduate students who plan to intern in the Anthropology Museum.

ANTH 278. Internship.  3 - 4 Units
Term Typically Offered: Fall, Spring
Practical graduate level experience in an approved professional environment. Student intern will work directly with professionals in public and private agencies where opportunities exist for anthropological work. Supervision and evaluation are provided by a faculty internship director and the on-site supervisor. Placements require from 15-20 hours per week.
Note: May be repeated for credit given that topic and instructor changes.
Credit/No Credit

ANTH 292A. Laboratory Work in Archaeology.  1 Unit
Prerequisite(s): ANTH 192A.
Corequisite(s): ANTH 295A.
Term Typically Offered: Fall, Spring
Laboratory preservation, cataloging and initial analysis of materials recovered through archaeological fieldwork. Graduate students are expected to help supervise undergraduate students and complete a self-directed project under the supervision of the instructor.
Note: Participant must have already completed ANTH 192A or its equivalent. May be repeated once for credit.

ANTH 295A. Fieldwork in Archaeology.  2 Units
Prerequisite(s): ANTH 195A or equivalent.
Corequisite(s): ANTH 292A.
Term Typically Offered: Fall, Spring
Students will assist the instructor in supervising undergraduate students or complete an assigned project in addition to the required fieldwork.
Note: May be repeated given that the topic and instructor changes.

ANTH 295B. Fieldwork in Ethnology.  2 - 3 Units
Term Typically Offered: Fall, Spring
Supervised graduate level fieldwork in ethnology and ethnography.

ANTH 295C. Fieldwork in Physical Anthropology.  2 - 3 Units
Term Typically Offered: Fall, Spring
Supervised graduate level fieldwork in physical anthropology. May include laboratory research.

ANTH 299. Special Problems.  1 - 3 Units
Prerequisite(s): Approval of faculty member under whom individual work is to be conducted and the Department chair.
Term Typically Offered: Fall, Spring
Individual projects or directed reading.
Note: Open only to students who appear competent to carry on individual work at the graduate level; May be repeated given that topic and instructor changes; May be taken twice in the same semester.

ANTH 500. Master’s Thesis.  3 Units
Prerequisite(s): Advanced to candidacy and chair permission of his/her thesis committee.
Term Typically Offered: Fall, Spring
Completion of a thesis approved for the master’s degree. Number of units of credit is determined by the candidate’s Master’s degree advisory committee. Should be taken in final semester prior to the completion of all requirements for the degree.

Arabic (ARBC)

ARBC 1A. Elementary Arabic.  4 Units
Term Typically Offered: Fall, Spring
Introduction to standard Arabic, including Arabic letters and sounds, the essentials of Arabic grammar, and basic instruction in all four language skills: speaking, reading, listening and writing. In addition to getting a start in modern Arabic, students will also learn about social aspects of the use of Arabic.
ART 1B.  Elementary Arabic.  4 Units
Prerequisite(s): ARBC 1A or instructor permission.
General Education Area/Graduation Requirement: Foreign Language Graduation Requirement
Term Typically Offered: Fall, Spring
Continuation of ARBC 1A.

ARBC 2A.  Intermediate Arabic.  4 Units
Prerequisite(s): ARBC 1B or instructor permission.
General Education Area/Graduation Requirement: Foreign Language Graduation Requirement
Term Typically Offered: Fall, Spring
Continuation of ARBC 1B with an ongoing emphasis on communication skills and the rudiments of literacy, as well as continued integration of cultural and social components with the language learning experience.

ARBC 2B.  Intermediate Arabic Conversation 2.  4 Units
Prerequisite(s): ARBC 2A or instructor permission.
Term Typically Offered: Fall, Spring
Continuation of ARBC 2A intermediate conversation with an ongoing emphasis on communication skills and the rudiments of literacy, as well as continued integration of cultural and social components with the language learning experience.

ARBC 199.  Special Problems.  1 - 3 Units
Term Typically Offered: Fall only
Individual projects or directed reading.
Note: Departmental petition required.
Credit/No Credit

Art (ART)

ART 1A.  Art in the Western World: From Stone Age to End of Middle Ages.  3 Units
General Education Area/Graduation Requirement: Arts (Area C1)
Term Typically Offered: Fall, Spring
Survey of architecture, crafts, painting, and sculpture of the Eastern Mediterranean and European cultures.
Note: Recommended for freshman or sophomore years. It is recommended that ART 1A be taken before ART 1B.

ART 1B.  Art in the Western World: From Renaissance to Baroque.  3 Units
General Education Area/Graduation Requirement: Arts (Area C1)
Term Typically Offered: Fall, Spring
Survey of architecture, crafts, painting, and sculpture of the Eastern Mediterranean and European cultures.
Note: Recommended for freshman or sophomore years. It is recommended that ART 1A be taken before ART 1B.

ART 1C.  Modern and Contemporary Art: Rococo to the Present.  3 Units
General Education Area/Graduation Requirement: Arts (Area C1)
Term Typically Offered: Fall, Spring
A 3-unit lecture based survey of the history of world art from the late 18th century to the present, from the European Rococo, Enlightenment, age of science and revolution, through Neo-Classicism, Romanticism and the rise of the international avant-garde, Realism, Impression, Symbolism, photography and film. In the 20th century, Fauvism, Cubism, the Bauhaus, Expressionism, Pop, Minimal art, Postmodernism, conceptualism, performance, video and new media are considered from global perspectives and artistic production. Part of the art history foundation sequence.
Note: Recommended for freshman or sophomore years. It is recommended that ART 1A and/or ART 1B be taken before ART 1C.

ART 2.  History of Islamic Art.  3 Units
General Education Area/Graduation Requirement: Arts (Area C1)
Term Typically Offered: Fall only
Introduces students to the art and architecture of major Islamic cultures and offers a background in the religion and philosophy of Islam. Works of art from Muslim countries and regions are studied in comparison to those of other major Asian and European cultures. Lecture. 3 units

ART 3A.  Traditional Asian Art.  3 Units
General Education Area/Graduation Requirement: Arts (Area C1)
Term Typically Offered: Spring only
Introduces students to the art and architecture of Asia from the prehistoric through pre-modern periods (approximately 1600). The styles, subjects, and significance of the art of India, Sri Lanka, Indonesia, Thailand, Burma, Cambodia, Tibet, China, Japan and Korea will be presented in a broad context including the history, geography, ethnic populations, languages, and religions of these countries (i.e., Buddhism, Hinduism, Jainism, Islam, Daoism, and Shinto).

ART 3B.  Modern and Contemporary Asian Art.  3 Units
General Education Area/Graduation Requirement: Arts (Area C1)
Term Typically Offered: Spring only
Covers the art and architecture of Asia from the modern period to the present day. Attention will be given to the impact of outside influences upon the development of art in several Asian countries, including India, Thailand, Vietnam, Indonesia, Philippines, China, Korea, and Japan. Contacts between those countries, their exposure to western visual culture through new or increased contact with the west, and the spread of Christianity all had an impact on Asian art during the period under consideration.

ART 5.  Native American Art.  3 Units
General Education Area/Graduation Requirement: Arts (Area C1)
Term Typically Offered: Spring only
Historical survey and visual study of the development of American Indian art in North America from the prehistoric periods to the end of the 19th century.
ART 7. Introduction to Art and Visual Culture. 3 Units
General Education Area/Graduation Requirement: Arts (Area C1)
Term Typically Offered: Fall, Spring

For the general education student who wants to explore the world of art and visual culture. A wide range of multicultural, historical, and contemporary art works, art media, art history, art ideas, and art practices are presented through illustrated lectures, discussions, field trips, guest lectures, studio visits, and beginning-level art projects.
Field trip(s) may be required.

ART 20A. Beginning Drawing. 3 Units
General Education Area/Graduation Requirement: Arts (Area C1)
Term Typically Offered: Fall, Spring, Summer

Introduction to various techniques of and approaches to drawing, using still lifes, landscapes, and figures.
Note: Fee course.

ART 20B. Intermediate Drawing. 3 Units
Prerequisite(s): ART 20A or equivalent.
Term Typically Offered: Fall, Spring

Extension of drawing experiences initiated in ART 20A, with emphasis on surveying materials and concepts pertinent to contemporary and historical drawing.
Note: Fee course.

ART 22. Beginning Painting. 3 Units
Prerequisite(s): ART 20A or equivalent.
Term Typically Offered: Fall, Spring

Introduction to the methods and problems of painting in oil or acrylic medium.
Note: May be taken twice for credit. Fee course.

ART 24. Beginning Watercolor. 3 Units
Prerequisite(s): ART 20A or equivalent.
Term Typically Offered: Not offered

Introduction to both transparent and opaque watercolor.
Note: May be taken twice for credit. Fee course.

ART 27. Beginning Color. 3 Units
Term Typically Offered: Fall, Spring

Investigation of the interactions of color based on the laws of perception, color composition, space, and design. An empirical study of the phenomena of color as developed by Josef Albers and Johannes Itten, and the use of color as a visual experience with acrylic paints.

ART 40. Beginning Printmaking. 3 Units
Prerequisite(s): ART 20A or ART 60
Term Typically Offered: Fall, Spring

Introduction to printmaking processes, their history, and their contemporary applications. Students will learn a combination of basic relief, intaglio, lithography, monotype, and/or screen print techniques, along with their historical and contemporary context.
Note: Fee course. This course will carry a fee of $75 to cover ink, plates, and other supplies.

ART 40B. Basic Printmaking: Etching. 3 Units
Term Typically Offered: Fall, Spring

Introduction to intaglio techniques, including etching, drypoint, and aquatint. Fee course.

ART 40D. Basic Printmaking: Relief. 3 Units
Term Typically Offered: Fall, Spring

Introduction to wood and linoleum cutting and printing. Fee course.

ART 40E. Basic Printmaking: Silkscreen. 3 Units
Term Typically Offered: Fall, Spring

Introduction to silkscreen processes and printing. Includes the construction of the equipment necessary to print direct drawing materials, and photo-established imagery. Fee course.

ART 50. Beginning Ceramics. 3 Units
Term Typically Offered: Fall, Spring

Projects in basic techniques and approaches to the potter’s wheel. Fee course.
Note: May be taken twice for credit.

ART 53. Beginning Hand-Built Ceramics. 3 Units
Term Typically Offered: Fall, Spring

Basic techniques and approaches to pottery through practice in hand-building methods, including coil, slab, pinch, and combinations thereof. Fee course.
Note: May be taken twice for credit.

ART 60. Two-Dimensional Composition. 3 Units
Term Typically Offered: Fall, Spring

Structured exploration of principles used to organize two-dimensional images. Basic art elements and their properties are explored in a series of progressive projects.
Note: Recommended for freshman or sophomore years.

ART 108. 19th Century Art. 3 Units
Prerequisite(s): ART 1C or equivalent.
Term Typically Offered: Fall, Spring
European architecture, painting, and sculpture of the 19th century.

ART 109. Modern Art. 3 Units
Prerequisite(s): Upper-division standing and ART 1C or equivalent with instructor approval.
Term Typically Offered: Fall only
Presented as the cultural episode that began with the emergence of the avant-garde in mid-nineteenth century Paris and ended in the middle of the twentieth century with WW II and the beginning of the postmodern era: from Realism, the birth of photography, and Impressionism through the high modernist movements associated with the international School of Paris, including Fauvism, Cubism, Constructivism, Dada, and Surrealism. It concludes with post-WW II expressions, including Abstract Expressionism.

ART 110. American Art. 3 Units
Prerequisite(s): ART 1B or ART 1C or equivalent.
Term Typically Offered: Spring only
Art of the Americas, particularly the architecture, crafts, painting, and sculpture of the U.S.

ART 111. Latin American and Latino Art History. 3 Units
Prerequisite(s): GWAR certification before Fall 09; or WPJ score of 80+; or 3-unit placement in ENGL 109M or ENGL 109W; or 4-unit placement in ENGL 109M or ENGL 109W and co-enrollment in ENGL 109X; or WPJ score 70 or 71 and co-enrollment in ENGL 109X.
General Education Area/Graduation Requirement: Arts (Area C1), Writing
Seminar on topics in modern and contemporary art history.
Note: Course may be taken twice for credit, if the topic is not the same.

ART 112. Contemporary Art. 3 Units
Prerequisite(s): ART 1C or ART 109 or instructor permission.
Term Typically Offered: Spring only
Beginning with international Pop art and Minimalism in the 1960s, surveys the history of contemporary art from the end of avant-garde modernism to the postmodernism and globalization of today. Lectures, discussions, readings and assignments offer insights into the contexts, attitudes, and ideas behind current art and visual culture.
Note: Taught in conjunction with ART 212.

ART 113B. Asian Art and Mythology. 3 Units
Prerequisite(s): ART 3A or equivalent or instructor permission.
Term Typically Offered: Spring only – odd years
Survey and investigation of selected myths from Asian cultures and traditions.

ART 114. Topics in Early Modern Art. 3 Units
Prerequisite(s): ART 1A or ART 1B; an upper division art history course in a related subject area; upper division or post-baccalaureate status; and GWAR certification before Fall 2009; or WPJ score of 80 or above; or 3-unit placement in ENGL 109M/W; or 4-unit placement in ENGL 109M/W + co-enrollment in ENGL 109X; or WPJ score 70/71 + co-enrollment in ENGL 109X.
Term Typically Offered: Fall only – even years
Seminar on topics in early modern art history.
Note: Course may be taken twice for credit, if the topic is not the same.

ART 115. Topics in Asian Art. 3 Units
Prerequisite(s): Upper division or graduate status; completion of ART 3A (or equivalent); and an upper division Asian art history course such as ART 117A, ART 117B, ART 113B, or or instructor permission; GWAR certification before Fall 09, WPJ score of 70+, or at least a C- in ENGL 109M/W.
Term Typically Offered: Fall only
Seminar on topics in Asian art.

ART 116. Topics in Modern and Contemporary Art. 3 Units
Prerequisite(s): Upper division or graduate status; completion of ART 1C (or equivalent); and an upper division art history course in a related subject area (or instructor permission); GWAR certification before Fall 09, WPJ score of 70+, or at least a "C-" in ENGL 109 M/W.
Term Typically Offered: Fall only
Seminar on topics in modern and contemporary art history.

ART 117A. Art of India and Southeast Asia. 3 Units
Prerequisite(s): ART 3A or equivalent, or instructor permission.
General Education Area/Graduation Requirement: Arts (Area C1)
Term Typically Offered: Fall only
Provides a broad overview of the architectural remains and visual arts of India and Southeast Asia from prehistory to the present. Consideration will be given to the art styles, iconography, history, geography, ethnic populations, languages, and religions (i.e., Buddhism, Hinduism, Jainism, and Islam) of each region.

ART 117B. Art of China and Japan. 3 Units
Prerequisite(s): ART 3A or equivalent, or instructor permission.
General Education Area/Graduation Requirement: Arts (Area C1)
Term Typically Offered: Spring only
Provides a broad overview of the architectural remains and visual arts of China and Japan from prehistory to the present. Consideration will be given to the art styles, iconography, history, geography, ethnic populations, languages, and religions (i.e., Buddhism, Taoism, and Shintoism) of each region.

ART 117C. Art of Korea. 3 Units
Term Typically Offered: Spring only – even years
Introduces students to the art and architecture of Korea from the pre-historic through contemporary periods. The styles, subjects, and significance of the art of Korea will be presented in a broad context including the history, geography, ethnic populations, languages, and religions of Korea (i.e., Buddhism, Daoism, Confucianism, and Christianity).
ART 118A. Modern Architecture. 3 Units
Prerequisite(s): ART 1C (or equivalent), or instructor permission.
Term Typically Offered: Not offered

A survey of modern architecture which covers the architectural theories and principles underlying certain significant structures. Special consideration is given to an analysis of the works of 20th century pioneers and their followers, such as Wright, Gropius, Le Corbusier, Van der Rohe, Aalto, and Johnson, among others, and to certain movements, such as the International Style, Brutalism, and Formalism.

ART 118B. California Architecture and Urban History. 3 Units
Term Typically Offered: Fall, Spring

Survey of the history of California architecture and its impact on the urban environment from Native Americans to the 20th century. Particular attention will be given to architecture as a symbol or statement of social, economic, and political empowerment. Cross listed as HIST 184; only one may be counted for credit.

ART 119. Directed Research in Art History. 3 Units
Prerequisite(s): Instructor permission and Department chair via signed petition form.
Term Typically Offered: Fall, Spring

Open to upper division art majors or minors only who have completed 9 units in a specialized area.
Note: May be repeated as often as approved by advisor and Department chair.

ART 120. Advanced Drawing. 3 Units
Prerequisite(s): ART 20B or equivalent.
Term Typically Offered: Fall, Spring

Continuing investigation of drawing. Emphasis is on the development of individual style.
Note: May be taken twice for credit.

ART 122A. Intermediate Painting. 3 Units
Prerequisite(s): ART 22 or equivalent.
Term Typically Offered: Fall, Spring

Continuing investigation of the technical and conceptual issues of painting.
Note: May be taken twice for credit.

ART 122B. Advanced Painting. 3 Units
Prerequisite(s): ART 122A, or ART 124A, or ART 125A, or ART 126, or instructor permission.
Term Typically Offered: Fall, Spring

Continuing investigation of the technical and conceptual issues of painting, with an emphasis on intensive individual exploration.
Note: May be repeated four times for credit.

ART 123. Figure Drawing. 3 Units
Prerequisite(s): ART 20A or equivalent.
Term Typically Offered: Fall, Spring

Concentrates on the development of drawing and visual skills with emphasis on the human figure. Strong emphasis is placed on anatomical knowledge of the body and its expression through drawing techniques. The effects of volume and movement in space as well as compositional possibilities with the figure are explored. Slides are used to inform students of the drawing techniques achieved in historic and contemporary images. Fee course.
Note: May be taken for credit three times.

ART 124A. Intermediate Watercolor. 3 Units
Prerequisite(s): ART 24 or equivalent.
Term Typically Offered: Spring only – odd years

Continuing investigation of the technical and conceptual issues of painting, using transparent water media.
Note: May be taken twice for credit.

ART 124B. Advanced Watercolor. 3 Units
Prerequisite(s): ART 124A or equivalent.
Term Typically Offered: Fall, Spring

Continuing investigation of the techniques and conceptual issues of painting using transparent water media, with emphasis on intensive individual exploration.
Note: May be taken four times for credit.

ART 125A. Life Painting. 3 Units
Prerequisite(s): ART 20A or equivalent.
Term Typically Offered: Fall only

Painting from professional models.
Note: May be taken for credit twice. Fee course.

Fee course.

ART 125B. Life Studio. 3 Units
Prerequisite(s): ART 20A or equivalent.
Term Typically Offered: Fall, Spring

Drawing and painting from professional models. Fee course.
Note: May be taken twice for credit.

Fee course.

ART 126. Painting and Drawing in the Field. 3 Units
Prerequisite(s): ART 22 or ART 24, or equivalent.
Term Typically Offered: Fall, Spring

Further development of painting and drawing skills with emphasis on direct observation and use of color to make form. Class will meet at specific landscape sites to work, with primary focus on painting. In addition, work will be developed in the classroom based on prior field study. Critiques will examine how one situation is variously interpreted.
ART 127. Collage and Assemblage. 3 Units
Prerequisite(s): ART 20A, ART 22 and either ART 70 or ART 88 (or equivalent), or instructor permission.
Term Typically Offered: Spring only

Use of found and readily available materials to make 2-dimensional collage and 3-dimensional assemblage. Most projects are conceptual, a few purely visual, and take from one to three class periods, including critique, and class discussions.
Note: May be taken twice for credit. Fee Course

Fee course.

ART 128. Art and the Artist in the Marketplace. 3 Units
Term Typically Offered: Spring only

Study of the thought processes and preparations for presenting one's artwork in the marketplace. An overview of what it takes to begin showing and selling artworks, including the skills and procedures of presenting artwork to galleries. A study of contracts, loan agreements, invoicing, commissions, model releases, taxes, pricing of work, resumes, slide preparation/presentation, publicity skills, and record keeping. Lecture, field trips to galleries and museums. Field trip(s) may be required.

ART 129. Painting/Drawing Studio. 3 Units
Prerequisite(s): Instructor permission and Department chair via signed petition form.
Term Typically Offered: Fall, Spring

Open to upper division art majors or minors only who have completed 9 units in a specialized area.
Note: May be repeated as often as approved by advisor and Department chair.

ART 130. Theories in Art Education. 3 Units
Prerequisite(s): Upper division or graduate status; declared major in Art.
Term Typically Offered: Spring only

Overview of national and international theories in the fields of visual art and education through historical and contemporary literature with particular attention to strategies for engaging student populations in the topics.

ART 133. Art Education for Children. 3 Units
Prerequisite(s): Upper division status; declared major or minor in Art, or a declared major in Child Development, or Liberal Studies, or Blended Liberal Studies
Term Typically Offered: Fall, Spring, Summer

Intended for students who are preparing to become elementary school teachers in California, providing meaningful, thematic instruction suitable for grades 1-6. Students will explore several 21st century education approaches applicable to both elementary generalists and visual art specialists, including meaning making, visual culture, holistic integration, learner-directed, and standards-based. Students will explore and evaluate the Common Core State Standards and the California Visual and Performing Arts Standards.
Note: Fee course.

Fee course.

ART 134. Interdisciplinary Art. 3 Units
Prerequisite(s): ART 20A and upper division status.
Term Typically Offered: Fall, Spring

Students learn how to make connections and relationships between visual art and curriculum subjects such as ecology, history, anthropology, language arts, theatre and music. Through studio activities and interdisciplinary themes, students will learn how to integrate the California Visual Art Content Standards.

ART 135. Overview of Secondary Art Education. 3 Units
Prerequisite(s): ART 133 or instructor permission.
Term Typically Offered: Fall only

Exploration of visual art and education theories, studio practices, curriculum development, and teaching strategies for art at the secondary school level. Students will explore and evaluate the National Core Arts Standards.

ART 137. Art for Exceptional Children. 3 Units
Term Typically Offered: Fall, Spring

Art is studied as a means of meeting the learning needs of atypical children, whose ages range from infancy through adolescence, and whose atypical characteristics consist of mental deficiencies, physical disabilities, emotional problems, or gifted abilities. Lectures, readings, and class discussions focus on the characteristics, and art curriculum goals of exceptional children, while studio activities provide experiences with art media. Lecture, laboratory. Fee course.
Fee course.

ART 139. Directed Research in Art Education. 3 Units
Prerequisite(s): Instructor permission and Department chair via signed petition form.
Term Typically Offered: Fall, Spring

Open only to upper division art majors/minors who have successfully completed 9 units in a specialized area.
Note: May be repeated as often as approved by advisor and Department chair.

ART 140. Intermediate Printmaking. 3 Units
Prerequisite(s): ART 40
Term Typically Offered: Fall, Spring

Intermediate-level study of printmaking processes, their history, and their contemporary applications. This course focuses on a single set of printmaking media each semester: Intaglio, Relief/Monotype, Lithography, or Screen Printing. Students will engage with the relationship between research, content, and process to develop a body of work through assigned and self-designed projects.
Note: Fee course. This course will carry a fee of $75 to cover ink, plates, and other supplies. This course may be repeated for up to 6 units of credit.

Fee course.

ART 141. Advanced Silkscreen. 3 Units
Prerequisite(s): ART 40E or equivalent.
Term Typically Offered: Fall, Spring

Advanced work in silkscreen including photo-silkscreen. Emphasis is on exploration of color and imagery.
Note: May be taken for credit four times.
ART 142. 3D Computer Modeling. 3 Units
Prerequisite(s): CSC 10 or ART 97 or equivalent.
Term Typically Offered: Fall, Spring

Techniques and processes to create 3D computer models and environments. Exercises, assignments and projects designed to build skill levels with 3D computer modeling tools. Demonstrations and workshops in the use of 3D computer modeling software. Critiques, discussion and presentations to develop students' conceptual grasp of 3D computer modeling and virtual reality environments. Example applications in art/new media and computer gaming.
Note: May be taken twice for credit. Cross-listed as CSC 126.

ART 143. 3D Computer Animation. 3 Units
Prerequisite(s): ART 142 or CSC 126.
Term Typically Offered: Spring only

Creative skills and techniques for animating 3D computer-modeled objects/environments. Topics include animation techniques: keyframing and interpolation; deformation and morphing; path control; skeletal animation; model rigging and skinning; forward and inverse kinematics, constraints and IK solvers; particle systems; fluid, cloth, hair; and fur simulation; shape keys; and soft body animation. Emphasis on both skill development and creative application of modeling and animation techniques. Includes demos, in class and homework exercises, and self directed projects.
Cross-listed: CSC 127.

ART 144. Digital Printmaking. 3 Units
Prerequisite(s): ART 97 or equivalent.
Term Typically Offered: Fall, Spring

Through traditional and digital print media, the course explores the convergence of digital imaging (vector and raster processes) and printmaking techniques (such as monoprint, lithography, etching and silkscreen). Vector graphics use geometry: points, lines and fills, creating crisp re-scaleable images. Raster graphics use a rectangular grid of pixels to create continuous-tone effects. By exploring these approaches and their transference to printmaking processes, students gain deeper understanding of print technology and a more tactile awareness of image making. Fee course.
Note: May be taken twice for credit.

Fee course.

ART 145. Advanced Printmaking Studio. 3 Units
Term Typically Offered: Fall, Spring

Advanced exploration of printmaking media (etching, lithography, relief, and monoprinting techniques) within a historical framework. Students investigate the printmaking techniques of historically significant figures and apply them to their own imagery.
Note: Open to students with experience in upper division painting or photography, or lower division printmaking. May be taken twice for credit.
Fee course.

Fee course.

ART 147. Video Art. 3 Units
Prerequisite(s): ART 97 or COMS 27A/FILM 27A and COMS 27B/ FILM 27B.
Term Typically Offered: Fall, Spring

The creation and analysis of video artwork; including techniques of video production, post-production manipulation and critique, within the context of art and communication. The techniques and theory of producing and editing video will serve as a foundation for the pursuit of individual, creative projects.
Cross-listed as COMS 157; only one may be counted for credit.

ART 148. Barrio Art for Ethnic Groups. 3 Units
Term Typically Offered: Fall

Provides a cultural situation for students who expect to work with the Mexican American community. Involves personal contact with persons in that community. Uses poetry, music, slides, and film to understand art as a non-verbal language.
Note: May be taken twice for credit.

ART 149. Graphics/Printmaking Studio. 3 Units
Prerequisite(s): Instructor permission and Department chair via signed petition.
Term Typically Offered: Fall, Spring

Open only to upper division art majors/minors who have completed 9 units in a specialized area.
Note: May be repeated as often as approved by advisor and Department chair.

ART 150. Advanced Ceramics. 3 Units
Prerequisite(s): ART 50 or equivalent.
Term Typically Offered: Fall, Spring

Advanced study of ceramic techniques leading toward the development of an individual creative expression. Fee course.
Note: May be taken for credit four times.
Fee course.

ART 153. Hand-Built Ceramic Techniques. 3 Units
Prerequisite(s): ART 53 or equivalent.
Term Typically Offered: Fall, Spring

Specialization in hand-built clay forms. Methods of working include coil, slab, pinch, and combinations of techniques which might include some wheel-thrown parts, decoration, and glazing of forms. Fee course.
Note: May be taken for credit four times.
Fee course.

ART 159. Ceramics Studio. 3 Units
Prerequisite(s): Instructor permission and Department chair via signed petition form.
Term Typically Offered: Fall, Spring

Open to upper division art majors or minors only who have completed 9 units in a specialized area.
Note: May be repeated as often as approved by advisor and Department chair.
ART 161. Photography in the Field. 3 Units
Prerequisite(s): PHOT 141 or instructor permission.
Term Typically Offered: Fall, Spring

The class visits specific sites followed by a group critique of the resulting photographic work. The course objective is to examine how one situation can be interpreted by many varied sensibilities, broadening the artist's visual vocabulary. Students are required to create visually unified portfolio that demonstrates a sense of place.
Cross-listed: PHOT 161.

ART 162. Alternative Photographic Processes. 3 Units
Prerequisite(s): PHOT 141 or instructor permission.
Term Typically Offered: Fall, Spring

Studio course exploring alternative photographic processes that may include: printing-out paper, new cyanotype, argyrotype, and platinum-palladium. Slide discussions, individual and class critiques.
Cross-listed: PHOT 162.

ART 163. Pinhole Photography. 3 Units
Prerequisite(s): PHOT 40 or equivalent.
Term Typically Offered: Fall, Spring

Intermediate course investigating the theory, history, and practice of pinhole photography. Use of student-made pinhole cameras of varying focal lengths using black and white and color materials. Emphasis on creative approach in both camera making and image formation, supported by intermediate-level photographic technique. Individual final portfolios and group exhibition of cameras and prints at conclusion of course.
Cross-listed: PHOT 163.

ART 169. Photography Studio. 3 Units
Prerequisite(s): Instructor permission and Department chair via signed petition form.
Term Typically Offered: Fall, Spring

Open to upper division art majors or minors only who have completed successfully 9 units in a specialized area.
Note: May be repeated as often as approved by advisor and Department chair.

ART 174. Intermediate Jewelry. 3 Units
Prerequisite(s): ART 74 or equivalent, or instructor permission.
Term Typically Offered: Fall, Spring

Continued study of the techniques and tools used in metal fabrication, such as raising, tool making, chasing and repousse, and scoring/bending process. Emphasis is on development and individual style. Fee course.
Note: May be taken twice for credit.

Fee course.

ART 175. Intermediate Metalsmithing. 3 Units
Prerequisite(s): Art 75.
Term Typically Offered: Fall, Spring

Continued exploration of techniques, tools, and methods used in fabrication of ferrous and non-ferrous metal such as cold fastening, repoussage, forging, and finishing processes. Emphasis is on composition and imagery. Fee course.
Fee course.

ART 176. Advanced Jewelry. 3 Units
Prerequisite(s): ART 174.
Term Typically Offered: Fall, Spring

Focus on the development of personal style in metal fabrication and casting techniques. Students learn to build mechanical devices such as clasp systems that enhance the overall appearance of their work. Research involving historical periods in metal work.

ART 179. Small Metals Studio. 3 Units
Prerequisite(s): ART 176.
Term Typically Offered: Fall, Spring

Open to upper division art majors or minors only who have completed 9 units in a specialized area.
Note: May be repeated as often as approved by advisor and Department chair.

ART 180. Figure Sculpture. 3 Units
Prerequisite(s): ART 20A or equivalent.
Term Typically Offered: Fall only

Work from live models in clay and plaster. Construction of armatures and waste mold demonstrated. Fee course.
Note: May be taken for credit four times.

Fee course.

ART 182. Intermediate Sculpture. 3 Units
Prerequisite(s): ART 70 or ART 88 or equivalent.
Term Typically Offered: Fall, Spring

Intermediate explorations with traditional and non-traditional processes of sculpture, three-dimensional form and spatial relationships. Students will expect to explore concept based learning through visual problem solving while accumulating in depth techniques and skills in a variety of sculpture materials. Includes study of historical and contemporary examples of sculpture and other relevant forms of art.
Note: May be taken twice for credit. Fee Course

Fee course.

ART 183. Advanced Sculpture. 3 Units
Prerequisite(s): ART 180 or 182 or instructor permission.
Term Typically Offered: Fall, Spring

Advanced explorations and study in sculpture, three-dimensional media and imagery and conceptual based art. Students can explore sculpture, advanced three-dimensional design, mixed media, installation art, site specificity, performance art, public art or other. Study will be both assignment based or self-directed. Fee course.
Note: May be taken twice for credit.

Fee course.
ART 187. Installation and Performance Art. 3 Units
Prerequisite(s): Art 20A and either ART 70 or ART 88 or equivalent.
Term Typically Offered: Spring only – even years

Explores the practice, theory and history of making installation and performance art. Students will study contemporary artists of this genre while designing, modeling and creating installation projects. Performances are not mandatory. Students will exhibit their works in traditional campus galleries alternative spaces. Emphasizes individual investigation and discovery while remaining open to collaborative projects that may cross disciplines. Fee course.

Note: may be taken twice for credit.

ART 189. Sculpture Studio. 3 Units
Prerequisite(s): Instructor permission and Department chair via signed petition form.
Term Typically Offered: Fall, Spring

Open to upper division art majors or minors only who have completed 9 units in a specialized area. Fee course.

Note: May be repeated as often as approved by advisor and Department chair.

Fee course.

ART 191. Film as an Art Form. 3 Units
Term Typically Offered: Fall, Spring

Wide range of theory and criticism of film, photography, and painting in the 20th century is presented from which the student may cultivate a coherent critical awareness. The development of realism in Western art, the photographic image, narrative in film, montage, and the development of cinematography will be included with special attention given to the films of D.W. Griffith, Sergei Eisenstein, Jean Renoir, Alfred Hitchcock, and Orsen Welles.

ART 192A. Senior Seminar in Studio Art. 3 Units
Prerequisite(s): Senior status (90 overall units), completion of 30 units of art studio courses, and (GWAR certification before Fall 09, or WPJ score of 70+ or at least a C- in ENGL 109M or ENGL 109W).
Term Typically Offered: Fall, Spring

Culminating studio art course designed to deepen experiences in diverse visual arts. Emphasis placed on independent studio practice with additional development in verbal and written skills in a variety of art disciplines. Participation in BA candidate exhibition required in the second enrolled semester for completion of the course.

Note: Must be taken twice. Cannot be taken twice in the same semester.

ART 192B. Senior Seminar in Art History. 3 Units
Prerequisite(s): Senior status, completion of all lower-division major requirements, HIST 100, and GWAR certification before Fall 09, WPJ score of 70+, or at least a C- in ENGL 109 M/W.
Term Typically Offered: Spring only

Focuses on the research, writing, and oral presentation of a 25-35 page thesis in the student's area of interest. Seminar readings, discussions, and weekly workshops support the thesis project and develop basic career skills. Explores how to employ traditional and new research technologies and develops writing skills. Career topics include how to locate appropriate jobs, professional schools, and graduate programs; how to write professional resumes, correspondence, including graduate school and grant applications.

ART 192C. Senior Seminar in Art Education. 3 Units
Prerequisite(s): Senior status, and ART 130, ART 133, ART 134, and ART 135.
Term Typically Offered: Fall only

Relates current art education theories to teaching practices in elementary and secondary classrooms, and museum/gallery settings. Teaching practices in a classroom or gallery/museum setting will connect to curriculum materials developed.

ART 193. Art Gallery Management. 3 Units
Term Typically Offered: Fall only

Designed for direct participation of students in the management of an art gallery, including installation, publicity, and budgeting.

Note: May be taken twice for credit.

ART 195. Fieldwork. 1 - 3 Units
Term Typically Offered: Fall, Spring

Directed observation and work experience with public agencies. Field work is offered for the purpose of giving students orientation in occupational specialties. Supervision is provided by both the instructional staff of the University and the cooperating agencies. Each student is required to maintain a record of activities and assignments, and to prepare periodic reports. The student must make arrangements with a faculty member for a work program prior to admittance to the course.

Credit/No Credit

ART 196. Experimental Offerings in Art. 1 Unit
Term Typically Offered: Fall, Spring

Undergraduate seminar in art, to be scheduled as needed.

ART 196U. Introduction to Curatorial Studies. 3 Units
Prerequisite(s): upper-division status.
Term Typically Offered: Spring only – even years

This course provides the foundation needed for professionally managing and displaying objects held in art collections. Through readings, small group discussions, field trips, guest lectures, and the directed experience of creating an exhibition of artworks from the Sacramento State Art Department collection, students learn the basics of curatorial studies and art collection management.

Field trip(s) may be required.

ART 197. Intermediate Electronic Art. 3 Units
Prerequisite(s): ART 97, or equivalent experience, such as PHOT 11, Introduction to Digital Imaging.
Term Typically Offered: Spring only

Explores the creative potential of digital imaging and multimedia art making techniques. Teaching methods will include hands on demonstrations, lab workshops, creative projects, reading assignments, seminars, discussion and critiques. The development of technical fluency will be stressed, and the creative potential of digital media within the framework of contemporary art, design and culture will be emphasized. Fee course.

Note: Proficiency in MAC-OS recommended. May be taken for credit three times.

Fee course.
ART 198. Advanced Electronic Art. 3 Units
Prerequisite(s): ART 197, or equivalent experience, evidenced in portfolio.
Term Typically Offered: Fall only

Utilizes the creative potential of electronic media to create art projects, working within the conceptual framework of developments in contemporary culture using a range of available software programs. An experimental and exploratory approach to the digital medium in concept, process and execution of work is encouraged. Fee course.

Note: Proficiency in MAC-OS recommended. May be taken for credit three times.

Fee course.

ART 199. Special Problems. 1 - 3 Units
Term Typically Offered: Fall, Spring

Individual projects or directed reading. Open only to students who are competent to carry on individual work.

Note: Departmental petition required.

Credit/No Credit

ART 206. Art Theory and Criticism. 3 Units
Term Typically Offered: Fall only

Seminar discussions of essential readings in Western aesthetic philosophy and contemporary art theory and criticism. Stress is placed on the conceptualization of the student’s own graduate production.

Note: Required for students in art graduate program; Graduate Writing Intensive (GWI) course.

ART 212. Contemporary Art. 3 Units
Prerequisite(s): Modern Art History: Art 1B or ART 109 or equivalent or instructor permission.
Term Typically Offered: Spring only

Beginning with international Pop art and Minimalism in the 1960s, surveys the history of contemporary art from the end of avant-garde modernism to the postmodernism and globalization of today. Lectures, discussions, readings and assignments, offer insights into the contexts, attitudes and ideas behind current art and visual culture.

Note: Students who earned a grade of B or higher in ART 112 can fulfill the requirements for ART 212 by taking a one-unit supplemental ART 299 to satisfy graduate level criteria.

ART 219. Directed Research in Art History. 3 Units
Prerequisite(s): Instructor permission and Department chair via signed petition form.
Term Typically Offered: Fall, Spring

Open to classified and unclassified art graduate students only.

Note: May be repeated as often as approved by advisor and Department chair.

ART 220. Advanced Problems in Painting and Drawing. 3 Units
Prerequisite(s): ART 122B, graduate art student status, or instructor permission.
Term Typically Offered: Fall, Spring

Special problems in painting and drawing.

Note: May be taken twice for credit.

ART 222. Studio Critique Seminar. 3 Units
Term Typically Offered: Fall, Spring

Critique seminar taught by one or more instructors representing different creative experiences.

Note: Required for students in the art studio graduate program, every semester until the final review has been passed. Only 6 units may be applied toward the degree program. Open only to classified graduate students.

ART 229. Painting/Drawing Studio. 3 Units
Prerequisite(s): Instructor permission and Department chair via signed petition form.
Term Typically Offered: Fall, Spring

Open to classified and unclassified art graduate students only.

Note: May be repeated as often as approved by advisor and Department chair; only 6 units may be applied toward the degree program.

ART 239. Directed Research in Art Education. 3 Units
Prerequisite(s): Instructor permission and Department chair via signed petition form.
Term Typically Offered: Fall, Spring

Open to classified and unclassified art graduate students only.

Note: May be repeated as often as approved by advisor and Department chair; only 6 units may be applied toward the degree program.

ART 249. Graphics/Printmaking Studio. 3 Units
Prerequisite(s): Instructor permission and Department chair via signed petition form.
Term Typically Offered: Fall, Spring

Open to classified and unclassified art graduate students only.

Note: May be repeated as often as approved by advisor and Department chair; only 6 units may be applied toward the degree program.

ART 259. Ceramics Studio. 3 Units
Prerequisite(s): Instructor permission and Department chair via signed petition form.
Term Typically Offered: Fall, Spring

Open to classified and unclassified art graduate students only.

Note: May be repeated as often as approved by advisor and Department chair; only 6 units may be applied toward the degree program.

ART 269. Photography Studio. 3 Units
Prerequisite(s): Instructor permission and Department chair via signed petition form.
Term Typically Offered: Fall, Spring

Open to classified and unclassified art graduate students only.

Note: May be repeated as often as approved by advisor and Department chair; only 6 units may be applied toward the degree program.

ART 279. Crafts/Art Metal Studio. 3 Units
Prerequisite(s): Instructor permission and Department chair via signed petition form.
Term Typically Offered: Fall, Spring

Open to classified and unclassified art graduate students only.

Note: May be repeated as often as approved by advisor and Department chair; only 6 units may be applied toward the degree program.
ART 283. Graduate Sculpture. 3 Units
Prerequisite(s): Graduate Art student status, or instructor permission.
Term Typically Offered: Fall, Spring
Special problems in sculpture, mixed media, installation art, site specific art, performance art, public art or other. Students will engage in self-directed projects while participating in sculpture studio forum and critiques.
Note: may be taken twice for credit

ART 289. Sculpture Studio. 3 Units
Prerequisite(s): Instructor permission and Department chair via signed petition form.
Term Typically Offered: Fall, Spring
Open to classified and unclassified graduate students only. Fee course.
Note: May be repeated as often as approved by advisor and Department chair; only 6 units may be applied toward the degree program.
Fee course.

ART 297. New Media 1. 3 Units
Term Typically Offered: Spring only
Students will work on self-directed new media projects with the supervision of the instructor. The work will focus on projects that are either entirely based on digital image and/or animation, or on works that also utilize other media or processes combined with digital image or animation, such as intermedia, mixed media and installation work. This course also includes reading assignments, critique and discussion.
Note: May be repeated twice for credit.

ART 298. New Media 2. 3 Units
Term Typically Offered: Fall only
Students will work on self-directed video and new media with the supervision of the instructor. The work will focus on projects that are either entirely based in new media and video, or on works that also utilize other media or processes combined with video and/or interactive processes, such as intermedia, mixed media and installation work. The course also includes reading assignments, critique and discussion.
Note: May be taken twice for credit.

ART 299. Special Problems. 1 - 3 Units
Prerequisite(s): Open only to graduate art students competent to carry on individual work. Admission requires approval of the faculty member who will direct the work and of the Department chair via signed petition form.
Term Typically Offered: Fall, Spring
Individual projects or directed reading.
Note: Only 6 units may be applied toward the degree program.
Credit/No Credit

ART 305. Art in the Public School. 3 Units
Prerequisite(s): Enrollment in the art teaching credential program.
Term Typically Offered: Fall, Spring
Art teaching methods and programs for public school grades K-12. Must be taken during Phase I or II of student teaching.

ART 500. Culminating Experience. 3 Units
Prerequisite(s): Advanced to candidacy and chair permission of student's project committee.
Term Typically Offered: Fall, Spring
Culminating exhibition of student work.

Arts and Letters (ALS)

ALS 21. First Year Seminar: Becoming an Educated Person. 3 Units
General Education Area/Graduation Requirement: Understanding Personal Development (E)
Term Typically Offered: Fall, Spring
Introduction to the nature and possible meanings of higher education, and the functions and resources of the University. Designed to help students develop and exercise fundamental academic success strategies and to improve their basic learning skills. Exploring majors in Arts and Letters and the careers they can lead to for freshmen considering a major in one of these disciplines. Provides students with the opportunity to interact with fellow students and the seminar leader and to build a community of academic and personal support.

ALS 39A. Special Problems for EOP Students. 1 - 3 Units
Term Typically Offered: Fall, Spring
Individually directed projects or tutorial instruction in a skill development area or in any subject matter to develop a specific academic skill (i.e., essay writing).
Credit/No Credit

ALS 52A. Acad Strategies-ALS: History 6. 1 Unit
Term Typically Offered: Fall, Spring
Study skills supplemental instruction for selected General Education courses. Effective learning strategies for the academic course in which the student is concurrently enrolled.
Note: May be repeated for credit.
Credit/No Credit

ALS 52B. Academic Strategies-ALS: History 17A. 1 Unit
Term Typically Offered: Fall, Spring
Study skills supplemental instruction for selected General Education courses. Effective learning strategies for the academic course in which the student is concurrently enrolled.
Note: May be repeated for credit.
Credit/No Credit

ALS 52C. Academic Strategies-ALS: History 17B. 1 Unit
Term Typically Offered: Fall, Spring
Study skills supplemental instruction for selected General Education courses. Effective learning strategies for the academic course in which the student is concurrently enrolled.
Note: May be repeated for credit.
Credit/No Credit
ALS 52D. Academic Strategies-ALS: History 50. 1 Unit
Term Typically Offered: Fall, Spring
Study skills supplemental instruction for selected General Education courses. Effective learning strategies for the academic course in which the student is concurrently enrolled.
Note: May be repeated for credit.
Credit/No Credit

ALS 52E. Academic Strategies-ALS: History 51. 1 Unit
Term Typically Offered: Fall, Spring
Study skills supplemental instruction for selected General Education courses. Effective learning strategies for the academic course in which the student is concurrently enrolled.
Note: May be repeated for credit.
Credit/No Credit

ALS 52F. Academic Strategies-ALS: Philosophy 4. 1 Unit
Term Typically Offered: Fall, Spring
Study skills supplemental instruction for selected General Education courses. Effective learning strategies for the academic course in which the student is concurrently enrolled.
Note: May be repeated for credit.
Credit/No Credit

ALS 52G. Academic Strategies - ALS: English 40A. 1 Unit
Study skills supplemental instruction for selected General Education courses. Effective learning strategies for the academic course in which the student is concurrently enrolled.
Note: May be repeated for credit.
Credit/No Credit

ALS 52H. Academic Strategies - ALS: History 7. 1 Unit
Study skills supplemental instruction for selected General Education courses. Effective learning strategies for the academic course in which the student is concurrently enrolled.
Note: May be repeated for credit.
Credit/No Credit

ALS 52J. Academic Strategies - ALS: English 40B. 1 Unit
Study skills supplemental instruction for selected General Education courses. Effective learning strategies for the academic course in which the student is concurrently enrolled.
Note: May be repeated for credit.
Credit/No Credit

ALS 52K. Academic Strategies - ALS: English 50A. 1 Unit
Study skills supplemental instruction for selected General Education courses. Effective learning strategies for the academic course in which the student is concurrently enrolled.
Note: May be repeated for credit.
Credit/No Credit

ALS 52L. Academic Strategies - ALS: English 50B. 1 Unit
Study skills supplemental instruction for selected General Education courses. Effective learning strategies for the academic course in which the student is concurrently enrolled.
Note: May be repeated for credit.
Credit/No Credit

</table>
ALS 56Q. **Academic Strategies - NSM: Biology 10.** 1 Unit
Corequisite(s): BIO 10  
Term Typically Offered: Fall, Spring

Study skills supplemental instruction for selected General Education courses. Effective learning strategies for the academic course in which the student is concurrently enrolled.
Note: May be repeated for credit.
Credit/No Credit

ALS 56R. **Academic Strategies - NSM: Biology 20.** 1 Unit
Corequisite(s): BIO 20  
Term Typically Offered: Fall, Spring

Study skills supplemental instruction for selected General Education courses. Effective learning strategies for the academic course in which the student is currently enrolled.
Note: May be repeated for credit.
Credit/No Credit

ALS 56S. **Academic Strategies - NSM: Geography 1.** 1 Unit
Study skills supplemental instruction for selected General Education courses. Effective learning strategies for the academic course in which the student is concurrently enrolled.
Note: May be repeated for credit.
Credit/No Credit

ALS 57A. **Academic Strategies-SSIS: Economics 1A.** 1 Unit
Term Typically Offered: Fall, Spring

Study skills supplemental instruction for selected General Education courses. Effective learning strategies for the academic course in which the student is concurrently enrolled.
Note: May be repeated for credit.
Credit/No Credit

ALS 57B. **Academic Strategies-SSIS: Economics 1B.** 1 Unit
Term Typically Offered: Fall, Spring

Study skills supplemental instruction for selected General Education courses. Effective learning strategies for the academic course in which the student is concurrently enrolled.
Note: May be repeated for credit.
Credit/No Credit

ALS 57C. **Academic Strategies-SSIS: Government 1.** 1 Unit
Term Typically Offered: Fall, Spring

Study skills supplemental instruction for selected General Education courses. Effective learning strategies for the academic course in which the student is concurrently enrolled.
Note: May be repeated for credit.
Credit/No Credit

ALS 57D. **Academic Strategies-SSIS: Psychology 2.** 1 Unit
Term Typically Offered: Fall, Spring

Study skills supplemental instruction for selected General Education courses. Effective learning strategies for the academic course in which the student is concurrently enrolled.
Note: May be repeated for credit.
Credit/No Credit

ALS 57E. **Academic Strategies-SSIS: FACS 10.** 1 Unit
Corequisite(s): FACS 10  
Term Typically Offered: Fall, Spring

Study skills supplemental instruction for selected General Education courses. Effective learning strategies for the academic course in which the student is concurrently enrolled.
Note: May be repeated for credit.
Credit/No Credit

ALS 57F. **Academic Strategies-SSIS: PSYC 101.** 1 Unit
Term Typically Offered: Fall, Spring

Study skills adjuncts/SI classes for selected General Education courses. Effective learning strategies for the academic course (PSYC 101) in which the student is concurrently enrolled.
Note: May be repeated for credit; Instructor approval required.
Credit/No Credit

ALS 57G. **Academic Strategies-SSIS: Anthropology 2.** 1 Unit
Corequisite(s): ANTH 2  
Term Typically Offered: Fall, Spring

Study skills supplemental instruction for selected General Education courses. Effective learning strategies for the academic course which the student is concurrently enrolled.
Note: May be repeated for credit.
Credit/No Credit

ALS 57H. **Academic Strategies - SSIS: Economics 100A.** 1 Unit
Term Typically Offered: Fall, Spring

Study skills supplemental instruction for selected General Education courses. Effective learning strategies for the academic course in which the student is concurrently enrolled.
Note: May be repeated for credit.
Credit/No Credit

ALS 70A. **Strategies of Learning for EOP Students.** 1 Unit
Term Typically Offered: Fall, Spring

This course is designed to provide individual approaches to self-knowledge, motivation, educational philosophy and skills necessary to give the student a firm foundation for a productive educational program during his/her college and post-college career. The basic intent is to help the student perceive his/her position in the educational process, understand the necessity for succeeding, and learn how to succeed in college.
Credit/No Credit

ALS 79A. **Developing Student Leadership EOP.** 1 - 3 Units
Term Typically Offered: Fall, Spring

The course is designed to provide students an opportunity to develop leadership skills that will serve them throughout their college career. They will become familiar with the opportunities for leadership and growth at Sacramento State. Skills developed will include public speaking, team building, delegation, communication, and others.
Credit/No Credit
ALS 96. Academic Strategies: Experimental. 1 Unit
Term Typically Offered: Fall, Spring

Study skills supplemental instruction for selected General Education courses or major courses. Effective learning strategies for the academic course in which the student is concurrently enrolled.

Note: May be repeated for credit.

Credit/No Credit

ALS 101. Texts Over Time. 3 Units
Term Typically Offered: Fall, Spring

Drawing on selected texts from across at least two historical periods or cultural settings, students will refine their skills of textual appreciation and analysis with an eye toward enhanced understanding of the texts in their historical and cultural contexts.

ALS 102. Individual, Community, and Citizenship. 3 Units
Term Typically Offered: Fall, Spring

This course examines the relationship between the individual and the community across at least two historical periods or cultural settings. Students will examine how perceptions of this relationship contribute to an understanding of belonging to or exclusion from political and social life.

ALS 103. Creativity, Meaning, and Criticism. 3 Units
Term Typically Offered: Fall, Spring

This course examines the theoretical and practical bases that sustain the creative process, especially as it is engaged in the production and interpretation of meaning in the arts and literatures, as well as the foundation for their criticism.

ALS 104. Happiness, Well-Being and the Good Life. 3 Units
Term Typically Offered: Fall, Spring

This course will examine the conditions and characteristics of living a good life, how happiness and well-being contribute to it, and its value as expressed in a range of human activities. Students will examine happiness, well-being and the good life in at least two historical periods or cultural settings.

ALS 151. The Studio: Explorations in Arts and Letters. 3 Units
General Education Area/Graduation Requirement: Arts (Area C1)
Term Typically Offered: Fall, Spring

This course provides students with an opportunity to become informed and engaged participants in the cultural, artistic and literary dimensions of their communities. Students will explore the ways our experience of and appreciation for cultural products is informed by exposure to theory and practice in each of the Arts and Letters disciplines.

ALS 195. Internship in Arts and Letters. 1 - 3 Units
Prerequisite(s): Faculty approval required; Upper division status; Overall Sacramento GPA 2.3
Term Typically Offered: Fall, Spring

Directed work experience in the internship program. Instructional staff and the cooperating agency provide supervision.

Credit/No Credit

ALS 199. Special Problems. 1 - 3 Units
Term Typically Offered: Fall, Spring

Individual projects or directed study.

Note: Petition and faculty approval required; may be repeated for credit.

Credit/No Credit

Asian Studies (ASIA)

ASIA 96. The Way of Chanoyu: An Interdisciplinary Approach to the Japanese Tea Gathering. 3 Units
Term Typically Offered: Fall, Spring

This course traces the development of a multifaceted cultural practice integrating architecture, garden design, art, painting, and calligraphy into a carefully constructed hospitality ritual. Students explore multiple aspects of Japanese Chado via hands-on learning including aesthetic, economic, scientific, socio-political and cultural dimensions associated with tea. The course is taught in the Nakatani Tea Room, including weekly classroom lectures and discussions, demonstrations, on-line learning modules, a group project, and typically, a day field trip to San Francisco. Field trip(s) may be required.

ASIA 110. Anthropology of Contemporary Asia. 3 Units
Prerequisite(s): ANTH 146 or instructor permission

This course examines contemporary Asia as an articulation of intersecting historical, cultural, political and economic processes. The course will focus on postcolonial developments and critically explore the manner in which process of globalization and neoliberal strategies embed themselves within, and the responses they elicit from societies across Asia.

ASIA 134. History of Korea: Antiquity to Present. 3 Units
Term Typically Offered: Fall only

This course traces the historical development of Korean culture from the period the Three Kingdoms to the present. In addition to the texts and records, other sources such as literature, religion, and art will be examined to gain an understanding of and appreciation for the longevity of Korea as a culture and a polity.

ASIA 135. Contemporary Korean Culture. 3 Units
Term Typically Offered: Spring only

This course provides a comprehensive understanding of Korean culture and society through the analysis of contemporary Korean popular media. By critically examining the particular cultural phenomenon of the Korean Wave, this course upholds various Korean popular media (film drama, documentaries, and music) as significant forms of visual culture, which reflect as well as shape the reality of people’s everyday lives both within and outside Korea.

ASIA 136. Korean Development and Behavior. 3 Units

This course examines critical issues in Korean human development and behavior with particular attention given to current theoretical perspectives within a fast developing society. Topics include identity, cognitive development, mental health, tiger parenting, gender roles, socio-emotional development, body image, and transracial adoptions. This course integrates an interdisciplinary approach and includes indigenous discourse on Confucianism and Eastern and Western thought to understand the underlying processes of the Korean heritage person as an individual and as a member of a larger society.
Astronomy (ASTR)

ASTR 4A. Introduction to the Solar System. 3 Units
Prerequisite(s): One year of high school geometry or instructor permission.
General Education Area/Graduation Requirement: Physical Science (B1)
Term Typically Offered: Spring

ASTR 4B. Introduction to Stars, Galaxies, and Cosmology. 3 Units
Prerequisite(s): One year high school geometry or instructor permission.
General Education Area/Graduation Requirement: Physical Science (B1)
Term Typically Offered: Fall, Spring
Description and explanations of astronomical phenomena related to stars, galaxies, and cosmology. Structure and evolution of stellar and galactic systems. Occasional observation periods.

ASTR 4C. Introduction to Astrobiology. 3 Units
Prerequisite(s): One year high school geometry or instructor permission.
General Education Area/Graduation Requirement: Physical Science (B1)
Term Typically Offered: Fall only

ASTR 6. Astronomical Observation Laboratory. 1 Unit
Prerequisite(s): ASTR 4A, ASTR 4B, or ASTR 4C with C- or better; may be taken concurrently.
General Education Area/Graduation Requirement: Laboratory (B3), Physical Science (B1)
Term Typically Offered: Fall, Spring, Summer
Study and use of various telescopes; field observation of planets, stars, meteors, asteroids, the moon and sun; laboratory activities relevant to astronomy. Lab three hours.

ASTR 131. The Solar System and Space Exploration. 3 Units
Prerequisite(s): ASTR 4A or ASTR 4B or 4C or PHYS 11A or CHEM 1A and GWAR certification before Fall 09; or WPJ score of 80+; or 3-unit placement in ENGL 109M or ENGL 109W; or 4-unit placement in ENGL 109M or ENGL 109W and co-enrollment in ENGL 109X; or WPJ score 70 or 71 and co-enrollment in ENGL 109X.
General Education Area/Graduation Requirement: Further Studies in Area B (B5), Writing Intensive Graduation Requirement (WI)
Term Typically Offered: Fall only
Planets and satellites, including their composition, structure, and atmospheres, with emphasis on modern techniques and observations. Solar surface phenomena and their influence on planets through the solar wind. Comets, meteorites, and their implications for the origin and evolution of planets. Physical effects governing feasible forms of space exploration and colonization.
Note: This course is approved as a Writing Intensive course.

ASTR 132. Stars, Galaxies and Cosmology. 3 Units
Prerequisite(s): ASTR 4A or ASTR 4B or 4C or PHYS 11A or CHEM 1A and GWAR certification before Fall 09; or WPJ score of 80+; or 3-unit placement in ENGL 109M or ENGL 109W; or 4-unit placement in ENGL 109M or ENGL 109W and co-enrollment in ENGL 109X; or WPJ score 70 or 71 and co-enrollment in ENGL 109X.
General Education Area/Graduation Requirement: Further Studies in Area B (B5), Writing Intensive Graduation Requirement (WI)
Term Typically Offered: Spring only
Types and evolution of stars; structure and evolution of galaxies; overall structure of the universe; current developments in astronomy.
Note: This course is approved as a Writing Intensive course.
ASTR 150. Dark Matter and Dark Energy. 3 Units
Prerequisite(s): PHYS 106
Corequisite(s): PHYS 110
Term Typically Offered: Spring only – odd years

Introduction to historical, observational and theoretical principles of dark matter and dark energy in the Universe. Topics will include dark matter in galaxies (rotation curves, stellar motions), dark matter in clusters (virial theorem, x-ray observations), MACHOs and WIMPs as dark matter candidates, as well as the discovery of dark energy through supernovae observations, and additional probes of dark energy. Dark matter and dark energy will be discussed in the cosmological context of the Big Bang theory.

ASTR 199. Special Problems. 1 - 2 Units
Term Typically Offered: Fall, Spring

Individual projects or directed reading.
Note: Open only to students competent to assume individual work on approval of the instructor. Up to 2 units may be taken for a grade.

Credit/No Credit

Athletics (ATIC)

ATIC 61. Men's Cross Country. 2 Units
Prerequisite(s): Intercollegiate Student Athletes only
Term Typically Offered: Fall, Spring

Practice begins mid-August and the season ends in mid-November.
Credit/No Credit

ATIC 62. Men's Tennis. 2 Units
Prerequisite(s): Intercollegiate Student Athletes only
Term Typically Offered: Fall, Spring

Practice begins the first day of the fall semester and the spring schedule ends the last of May.
Credit/No Credit

ATIC 63. Men's Track and Field. 2 Units
Prerequisite(s): Intercollegiate Student Athletes only
Term Typically Offered: Fall, Spring

Indoor Track and Field practice begins in the fall. The competitive season is in the winter. Outdoor Track and Field practice begins the first day of spring semester and the season ends the last week of May.
Credit/No Credit

ATIC 64. Men's Baseball. 2 Units
Prerequisite(s): Intercollegiate Student Athletes only
Term Typically Offered: Fall, Spring

Practice begins in the fall with the competitive season starting February 1. The 56-game schedule is followed by the NCAA Championships for qualified teams.
Credit/No Credit

ATIC 65. Men's Basketball. 2 Units
Prerequisite(s): Intercollegiate Student Athletes only
Term Typically Offered: Fall, Spring

Practice begins mid-October. The season ends in late February and leads to NCAA Championships for qualified teams.
Credit/No Credit

ATIC 66. Men's Football. 2 Units
Prerequisite(s): Intercollegiate Student Athletes only
Term Typically Offered: Fall, Spring

Daily afternoon practice begins in late August. The 10-11 game schedule is followed by NCAA Championships for qualified teams in late November.
Credit/No Credit

ATIC 67. Men's Golf. 2 Units
Prerequisite(s): Intercollegiate Student Athletes only
Term Typically Offered: Fall, Spring

Practice begins fall semester Monday through Friday starting at noon.
Credit/No Credit

ATIC 68. Men's Soccer. 2 Units
Prerequisite(s): Intercollegiate Student Athletes only
Term Typically Offered: Fall, Spring

Practice begins the second week of September. Competition consists of one or two matches in the fall and the remaining part of the schedule is during the spring semester. Interested student-athletes who would like to walk on and try out for the team should contact the coach.
Credit/No Credit

ATIC 80. Women's Basketball. 2 Units
Prerequisite(s): Intercollegiate Student Athletes only
Term Typically Offered: Fall, Spring

Practice begins mid-October. The competitive season begins in November and continues to the end of February leading to the NCAA Championships for qualified teams.
Credit/No Credit

ATIC 81. Women's Golf. 2 Units
Prerequisite(s): Intercollegiate Student Athletes only
Term Typically Offered: Fall, Spring

Practice begins the second week of September. Competition consists of one or two matches in the fall and the remaining part of the schedule is during the spring semester. Interested student-athletes who would like to walk on and try out for the team should contact the coach.
Credit/No Credit

ATIC 82. Women's Soccer. 2 Units
Prerequisite(s): Intercollegiate Student Athletes only
Term Typically Offered: Fall, Spring

Practice begins in the fall with the competitive season starting February 1. The 56-game schedule is followed by the NCAA Championships for qualified teams in May.
Credit/No Credit
ATIC 83. Women's Gymnastics. 2 Units
Prerequisite(s): Intercollegiate Student Athletes only
Term Typically Offered: Fall, Spring

Practice begins in September. The competitive season starts in January and ends in late April with the NCAA Championships for qualified teams. Daily practices are 12:30-4:00 p.m. Student-athletes must contact the coach prior to tryouts. Credit/No Credit

ATIC 84. Women's Softball. 2 Units
Prerequisite(s): Intercollegiate Student Athletes only
Term Typically Offered: Fall, Spring

Practice begins in the fall with the competitive season starting mid-February. The 56-game schedule is followed by NCAA Championships in late May for qualified teams. Daily practices are 1:30-5:30 p.m. Credit/No Credit

ATIC 85. Women's Rowing. 2 Units
Prerequisite(s): Intercollegiate Student Athletes only
Term Typically Offered: Fall, Spring

Rowing accommodates both scholarship and walk-on athletes with no experience necessary. Tall cross-over student-athletes are encouraged to turn out. Daily practice starts in September, 6:00-8:30 a.m. There is a fall semester long distance race season and a traditional “sprint” season in the spring semester, concluding with the National Championships in May. All student-athletes race. No limit on squad size. Freshman/Novice, Junior Varsity and Varsity squads, lightweight (130 lbs.) or open. Also, coxswains required. Should be under 115 lbs. Credit/No Credit

ATIC 86. Women's Tennis. 2 Units
Prerequisite(s): Intercollegiate Student Athletes only
Term Typically Offered: Fall, Spring

Practice begins the first day of the fall semester and the spring schedule ends the last of May. Credit/No Credit

ATIC 87. Women's Volleyball. 2 Units
Prerequisite(s): Intercollegiate Student Athletes only
Term Typically Offered: Fall, Spring

Preseason begins in mid-August. Competition begins September 1 and ends in mid-December with NCAA Championships for qualified teams. Daily practices are 2:00-5:00 p.m. Interested student-athletes must contact the coach prior to the preseason, be cleared by the Clearinghouse, and meet all eligibility requirements in order to participate in tryouts. Credit/No Credit

ATIC 88. Women's Cross Country. 2 Units
Prerequisite(s): Intercollegiate Student Athletes only
Term Typically Offered: Fall, Spring

Practice begins mid-August and the season ends in mid-November. Credit/No Credit

ATIC 89. Women's Track and Field. 2 Units
Prerequisite(s): Intercollegiate Student Athletes only
Term Typically Offered: Fall, Spring

Indoor Track and Field practice begins in the fall. The competitive season is in the Winter. Outdoor Track and Field practice begins the first day of spring semester and the season ends the last week of May. Credit/No Credit

ATIC 167. Coaching of Football. 3 Units
Term Typically Offered: Fall, Spring

Examines all phases of the game, including offense, defense and special teams. Other topics covered are public/media relations, budget management, academic rules, marketing strategies, officiating, equipment and many other aspects. Lecture two hours, activity two hours. Credit/No Credit

ATIC 175. Sports Information Fieldwork. 1 - 3 Units
Prerequisite(s): JOUR 123 or instructor permission.
Term Typically Offered: Fall, Spring

Directed observations and work experience with intercollegiate athletics sports information support services. Field work is offered to give students orientation in the profession of sports information services. Supervision is provided by the instructional staff of the university. Each student is required to maintain a record of activities and assignments and to prepare periodic reports.

Note: May be repeated once for credit. Credit/No Credit

ATIC 195. Field Experience in Intercollegiate Athletics. 1 - 3 Units
Term Typically Offered: Fall, Spring

Directed experience in athletics. Student interns keep records of daily experiences and prepare periodic progress reports. Succeeding enrollments should be in different sports.

Note: Registration requires prior approval of Director of Athletics. Credit/No Credit

ATIC 199. Directed Individual Study. 1 - 3 Units
Term Typically Offered: Fall, Spring

Individual research, project or directed reading.

Note: Registration requires approval of the faculty under whom the individual work is to be conducted and the Director of Athletics. Credit/No Credit
Biological Sciences (BIO)

BIO 1. Biodiversity, Evolution and Ecology. 5 Units
General Education Area/Graduation Requirement: Life Forms (B2), Laboratory (B3)
Term Typically Offered: Fall, Spring, Summer

Introduction to properties of life and cells leading to genetic and biological diversity. Survey of biological diversity emphasizing variation leading to natural selection; introduction to ecological concepts within an evolutionary framework; a survey of ecosystems and global climate change. Development of scientific skills will be emphasized. Designed for science majors. Lecture three hours; laboratory three hours; activity two hours; fee course.

Note: Field trips may be required.

Fee course.
Field trip(s) may be required.

BIO 2. Cells, Molecules and Genes. 5 Units
Prerequisite(s): BIO 1 and CHEM 1A.
Term Typically Offered: Fall, Spring

Introduction to molecular and cellular biology and genetics. Topics include biomolecules, cell structure and function, cellular energetics, molecular flow of information, cell division, and genetic inheritance. Development of scientific skills and a scientific mindset will be emphasized throughout the course, particularly in lab exercises and activities. Designed for science majors. Lecture three hours; laboratory three hours; activity two hours.

BIO 7. Introduction to the Science of Biology. 4 Units
General Education Area/Graduation Requirement: Laboratory (B3), Life Forms (B2)
Term Typically Offered: Fall, Spring

Introduction to major concepts of biology, including properties of living things, cells and their molecular constituents, the unity and diversity of organisms, genetics, ecology, evolution, and the scientific methods of investigation employed by biologists. Satisfies requirements in biology for students planning to obtain the Multiple Subject Teaching Credential. Lecture three hours; laboratory three hours. Fee course.

Fee course.

BIO 9. Our Living World: Evolution, Ecology and Behavior. 3 Units
General Education Area/Graduation Requirement: Life Forms (B2)
Term Typically Offered: Fall, Spring

Designed for non-majors, this course is an introduction to the biological science behind important issues that face us today, such as those surrounding evolution, endangered species, conservation of ecosystems, and the behavior of organisms. By gaining an understanding of the scientific approach and the principles of evolution, ecology and behavior, students will be equipped to evaluate scientific developments and arguments in these and other issues as informed citizens. Lecture three hours.

Note: Not open to Biological Sciences majors or students who have received credit for BIO 1 or BIO 2.

BIO 10. Basic Biological Concepts. 3 Units
General Education Area/Graduation Requirement: Life Forms (B2)
Term Typically Offered: Fall, Spring

An intensive introductory course for non-majors who will take additional course work in biology or related disciplines, including the allied health sciences. Introduction to the biological sciences with strong emphasis on cellular structure and metabolism, molecular biology and genetics, as well as concepts and principles common to all living systems including ecology and evolution. Lecture three hours.

Note: Not open to Biological Sciences majors or students who have received credit for BIO 1 or BIO 2.

BIO 15L Laboratory Investigations in Biology. 1 Unit
Prerequisite(s): BIO 9, BIO 10 or BIO 20.
Corequisite(s): BIO 9, BIO 10 or BIO 20.
General Education Area/Graduation Requirement: Laboratory (B3)
Term Typically Offered: Fall, Spring

Introductory laboratory investigation of the major principles of biology, including properties of all living things, the unity and diversity of organisms, structure and function of cells, energy and metabolism, genetics, ecology, evolution, and the scientific methods of investigation employed by biologists. Laboratory three hours.

Note: Not open to Biological Sciences majors or students who have received credit for BIO 1 or BIO 2.

BIO 20. Biology: A Human Perspective. 3 Units
General Education Area/Graduation Requirement: Life Forms (B2)
Term Typically Offered: Fall, Spring

Introduction to biological concepts with emphasis on their application to humans. Topics include: Evidenced-based decision making with respect to food, nutritional supplements, drugs, pathogens, and biotechnology. How heredity and evolution contribute to our understanding of personality, sex, behavior, addiction, disease, and aging is also discussed. Lecture three hours.

Note: Not open to majors in biological sciences and/or students who have received credit for BIO 10.

BIO 22. Introductory Human Anatomy. 4 Units
Prerequisite(s): BIO 1, BIO 2 or BIO 10
Term Typically Offered: Fall, Spring

Introduction to the study of the gross and microscopic structure of the human body using a systemic approach. Lecture three hours; laboratory three hours. Fee course.

Fee course.

BIO 25. Human Anatomy and Physiology I. 4 Units
Term Typically Offered: Fall, Spring

BIO 25/26 series provides an introduction to the structure and function of the major organ systems of the human body. BIO 25 offers basic terminology and concepts pertaining to the disciplines of anatomy and physiology, including structure/function relationships, homeostasis, and organizational levels; and provides an introduction to the structure and function of the muscular and nervous systems.

Note: Not open to students who have successfully completed BIO 22 and BIO 131, or an equivalent combination of separate anatomy and physiology courses. Lecture three hours; laboratory three hours. Fee course.

Fee course.
BIO 26. Human Anatomy and Physiology II. 4 Units
Prerequisite(s): BIO 25 or instructor permission.
Term Typically Offered: Fall, Spring

BIO 25/26 series provides an introduction to the structure and function of the major organ systems of the human body. BIO 26 provides an introduction to the structure and function of the cardiovascular, respiratory, renal and digestive systems, and emphasizes homeostatic control mechanisms.

Note: Not open to students who have successfully completed BIO 22 and BIO 131, or an equivalent combination of separate anatomy and physiology courses. Lecture three hours; laboratory three hours. Fee course.

Fee course.

BIO 30. Anatomy & Physiology - Brief Course. 4 Units
Prerequisite(s): Physical Education majors only
Term Typically Offered: Fall, Spring

An overview of the basic anatomy and physiology of all systems. Designed to meet the standards for the Physical Education Subject Matter Program, but may also prepare students for study in other health-related fields.

BIO 39. Microbiology for Allied Health Students. 4 Units
Prerequisite(s): BIO 10; CHEM 5 or CHEM 6A and CHEM 6B or equivalent.
Term Typically Offered: Fall, Spring

Introduction to micro-organisms, particularly bacteria and viruses, with emphasis on health care-related applications of microbiology using case studies. Laboratory work includes aseptic techniques, methods of cultivating and identifying bacteria, demonstration of microbial properties and will provide practice with basic microbiological skills. Lecture three hours; laboratory three hours. Fee Course.

Note: Does not satisfy microbiology requirement for Biological Sciences majors.

Fee course.

BIO 100. Introduction to Scientific Analysis. 2 Units
Prerequisite(s): BIO 1, BIO 2, and STAT 1; declared Biological Sciences majors only or instructor consent
Term Typically Offered: Fall, Spring

Covers anatomy of scientific literature, reading and writing scientific papers, proper citation formats, basic interpretation of tables and figures, graphical analysis, basic statistical analysis, experimental design to effectively test a hypothesis, and effective presentation of an experiment. Lecture one hour. Activity two hours.

Note: Course cannot be taken concurrently with or after taking BIO 167

BIO 102. The Natural History of Plants. 3 Units
Prerequisite(s): A college course in biology or instructor permission.
Term Typically Offered: Fall, Spring

Major plant communities of California provide a framework for understanding the interrelationships of natural environments and the dominant trees and shrubs of these areas. Identification of these species and the wildflowers of the communities are emphasized in the lab and field trips. Designed for minors in biology or for those with an interest in their natural surroundings, but is acceptable for majors who have not completed BIO 112. Lecture one hour; laboratory six hours. Fee course.

Fee course.

Field trip(s) may be required.

BIO 103. Plants and Civilization. 3 Units
Prerequisite(s): BIO 10 or equivalent.
Term Typically Offered: Fall, Spring

Study of the significance of plants in the development of human civilization. Emphasis will be placed on the botanical, sociological and economic aspects of plants useful to humans. Lecture three hours.

BIO 104. Physiology of Human Reproduction. 3 Units
Prerequisite(s): BIO 1, BIO 2 or BIO 10.
Term Typically Offered: Spring only

Study of the physiology of human reproduction. Topics to be covered include: gametogenesis, the basis of fertility, conception, prenatal development, parturition, lactation and the physiology of contraception. Lecture three hours.

BIO 105. Life in the Ocean. 3 Units
Term Typically Offered: Spring

Study of marine life and ocean ecosystems. Exploration of the unique adaptations of marine life, how marine organisms interact with their environment, diversity of marine habitats from coral reefs to deep sea, and conservation. Does not count toward the Biological Sciences Major.

BIO 106. Genetics: From Mendel to Molecules. 3 Units
Term Typically Offered: Fall, Spring

Introduction to the principles of genetics and scientific approaches used to define those principles. The physical basis of heredity, the impact of selective breeding and genetic engineering will be discussed. Lecture two hours; discussion one hour.

Note: BIO 10 recommended.

BIO 109. Biology of Dinosaurs. 3 Units
Term Typically Offered: Spring

Introduction to the biology of the dinosaurs. Dinosaurs came in a vast array of shapes and sizes and exemplify biodiversity. This course will examine the dinosaurs in an evolutionary framework, discussing their origin, the major lineages, phylogeny and what they look like today. The course will take advantage of the recent surge in scientific investigations into the biology of dinosaurs, such as parental care, sexual selection, group living, flight and feathers. Does not count toward the Biological Sciences Major.

BIO 112. Plant Taxonomy. 4 Units
Prerequisite(s): BIO 1 and BIO 2.
Term Typically Offered: Spring only

Spring flora of central California is used as the focus of study in the classification and identification of native vascular plants. Lecture two hours; laboratory six hours. Field trips may be required. Fee course.

Fee course.

Field trip(s) may be required.

BIO 113. Evolution and Speciation in Flowering Plants. 3 Units
Prerequisite(s): BIO 1 and BIO 2 or equivalent.
Term Typically Offered: Fall only – even years

A survey of the important tools and mechanisms used to study speciation in plants. Topics include the molecular basis of evolutionary change, intraspecific genetic variation at both the local and landscape levels, theory regarding mechanisms of speciation, and the importance of polyploidy. Readings will be from both a text and from the primary literature, and will include in-depth discussions of historical and modern studies in plant evolution. Lecture three hours.
BIO 115. Introduction to Neuroscience. 4 Units
Prerequisite(s): PSYC 2 and PSYC 8; PSYC or BIO majors only. PSYC 9 recommended.
Term Typically Offered: Fall, Spring
Investigation of the structure and function of the central nervous system including neuroanatomy and neurophysiology, sensorimotor integration. The lectures and readings emphasize the empirical questions, techniques and methods used in neuroscience research. Laboratory exercises focus on gross- and micro- neuroanatomy, models of membrane electrophysiology and motor system function. Lecture/discussion three hours; laboratory three hours.
Cross Listed: PSYC 115; only one may be counted for credit.

BIO 118. Natural Resource Conservation. 3 Units
Prerequisite(s): BIO 1 and BIO 2.
Term Typically Offered: Fall only – odd years
Introduction to the principles and practices of biological conservation. Historical development of conservation philosophy; current issues in conservation of renewable natural resources; conservation administration. Lecture three hours.

BIO 120. Biology of Aging. 3 Units
Prerequisite(s): BIO 1, BIO 2, BIO 10 or BIO 20.
Term Typically Offered: Fall, Spring
Theories of aging, cellular aging and aging effects on the various human body systems. Lecture three hours.
Note: Not open for credit to students who have previously taken BIO 131.

BIO 121. Molecular Cell Biology. 3 Units
Prerequisite(s): BIO 184
Term Typically Offered: Fall, Spring
Comparison of the cellular and molecular biology of prokaryotic and eukaryotic cells. Emphasis will be placed on membrane structures, transport phenomena, cell to cell communication, cellular reproduction, genetic architecture, gene expression and metabolism, as well as the eukaryotic endomembrane, cytoskeleton and extracellular matrix systems. Lecture three hours.

BIO 122. Advanced Human Anatomy. 4 Units
Prerequisite(s): BIO 22.
Term Typically Offered: Spring only
Gross structure of the human body using a regional approach. Lecture three hours; laboratory three hours. Fee course.

BIO 123. Neuroanatomy. 3 Units
Prerequisite(s): BIO 22.
Term Typically Offered: Fall only
Gross and microscopic structures of the central, peripheral and autonomic nervous systems. The lectures are correlated with laboratory exercises and demonstrations using human prospected cadaver specimens, audio-visual slide projected materials, charts and models. Lecture two hours; laboratory three hours. Fee course.

BIO 124. Clinical Hematology. 3 Units
Prerequisite(s): CHEM 161 and BIO 184
Term Typically Offered: Spring only
Basic principles and current clinical laboratory procedures used in the study of blood; emphasis on morphological and chemical changes in the disease processes. Lecture two hours; laboratory three hours. Fee course.

BIO 125. Body Fluid Analysis. 1 Unit
Prerequisite(s): CHEM 161 or instructor permission.
Term Typically Offered: Fall only
Production of body fluids (e.g., urine, cerebrospinal, pleural, peritoneal, pericardial, and synovial fluids); their normal characteristics and pathological changes will be discussed. A description of the laboratory tests used in the clinical evaluation of body fluids will also be presented.

BIO 126. Comparative Vertebrate Morphology. 3 Units
Prerequisite(s): BIO 1 and BIO 2.
Term Typically Offered: Spring only
Study of the anatomical systems of vertebrates in an evolutionary and functional context. Covers vertebrate form, function, development and phylogeny, overviews of organ systems, and how their modification founded the major events of vertebrate evolution including metamorphosis, water-to-land transition, tetrapodal locomotion, feeding and reproduction. Labs complement lectures with dissections of three representative species (shark, salamander, cat), and surveys of specializations in other forms. Lecture two hours; laboratory three hours.
Fee course.

BIO 127. Developmental Biology. 4 Units
Prerequisite(s): BIO 2.
Term Typically Offered: Fall only
This course examines the progression of fertilized eggs of vertebrate organisms through embryonic development. This progression will be studied at biochemical, molecular, genetic, morphological and physiological levels, with an emphasis on the progressive changes that occur within cells, tissues and organs in the embryo. We will use a comparative approach between a variety of model organisms to understand similarities and differences among vertebrate and selected invertebrate species. Fee course.
Note: Prerequisite will be enforced by instructor.
Fee course.

BIO 128. Plant Anatomy and Physiology. 4 Units
Prerequisite(s): BIO 1 and BIO 2.
Term Typically Offered: Spring only
An integrative examination of our current understanding of plant structure and function. Students will apply fundamental principles of cell and molecular biology, evolution, and ecology to understand the relationships between plant anatomy and plant physiology that have enabled plants to achieve such a high level of success as primary producers on our planet. Lecture three hours, laboratory three hours. Fee course.
Fee course.
BIO 130. Histology. 3 Units
Prerequisite(s): BIO 22
Term Typically Offered: Spring only

Study of the morphology and physiology of cells in primary normal human tissues and the arrangement and adaptations of tissues in organs and organ systems. The characteristics and properties of abnormalities in human tissues will be covered if time permits. Lecture two hours; laboratory three hours.

BIO 131. Systemic Physiology. 4 Units
Prerequisite(s): CHEM 1B or CHEM 6B and BIO 1 or BIO 2 or BIO 10 or BIO 22.
Term Typically Offered: Fall, Spring

Physiology of organ systems with emphasis on control and integration of system function. Experiments using humans and selected vertebrate animal models are performed in the laboratory to illustrate functional characteristics of organ systems discussed in lecture and to provide direct experience with techniques, recording systems, and methods of data analysis commonly used in physiology and related fields. Lecture three hours; laboratory three hours. Fee course.

BIO 131A. Advanced Problems in Physiology. 1 Unit
Corequisite(s): BIO 131
Term Typically Offered: Fall, Spring

Advanced problem-solving in physiology designed for students concurrently enrolled in BIO 131. Students explore solutions to challenging problem sets under the direct supervision of an experienced section leader. Discussion: two hours.

BIO 132. Neurophysiology. 3 Units
Prerequisite(s): BIO 131 or both BIO 25 and BIO 26.
Term Typically Offered: Fall, Spring

Organization and function of the nervous system will be explored. Topics include mechanisms of communication between neurons, integration of sensory and motor systems, and functional brain systems. Diseased states will be introduced, as appropriate. Lecture 3 hours.

BIO 133. Cardiovascular, Respiratory and Renal Physiology. 3 Units
Prerequisite(s): BIO 131.
Term Typically Offered: Spring only

Advanced consideration of the integrated physiology of the cardiovascular, respiratory, and renal systems, including acid-base physiology. Advanced problem-solving, analysis of case studies, and interpretation of experimental findings will be included. Lecture three hours.

BIO 134. Medical Mycology. 3 Units
Prerequisite(s): BIO 139.
Term Typically Offered: Spring only – even years

Study of the morphology, cultural characteristics and classification of fungi which are pathogenic for humans, as well as fungi which appear as common contaminants. Lecture two hours; laboratory three hours. Fee course.

BIO 135. Endocrinology. 3 Units
Prerequisite(s): BIO 121.
Term Typically Offered: Fall only

Advanced consideration of the principles of endocrinology with special emphasis on the role of hormones in growth, metabolism, stress (including the hormonal interactions during exercise) and disease. Various endocrine disorders, will serve as the model for case studies, current literature analysis and advanced problem-solving activities. Lecture three hours.

BIO 139. General Microbiology. 4 Units
Prerequisite(s): BIO 184; CHEM 20 or CHEM 24
Term Typically Offered: Fall, Spring

Introduction to microorganisms, particularly bacteria and viruses, their physiology and metabolism. Laboratory work includes aseptic techniques, methods of cultivating and identifying bacteria, and demonstration of microbial properties. Lecture three hours; laboratory three hours. Fee course.

BIO 140. Medical Microbiology and Emerging Infectious Diseases. 3 Units
Prerequisite(s): BIO 39 or BIO 139.
Term Typically Offered: Spring only

Lectures, discussions, and readings regarding infectious viruses, bacteria, fungi, and parasites, with an emphasis on highly relevant pathogens including emerging infectious agents and microbes that are regionally endemic. The clinical syndrome, along with the molecular and cellular aspects of the course of infection of each pathogen will be discussed. Additionally, the history of microbiology and medicine as well as a brief overview of laboratory methods used for diagnosis will also be covered. Lecture three hours.

Note: BIO 140 cannot substitute for BIO 144 in the CLS concentration in Biological Sciences.

BIO 143. General Virology. 3 Units
Prerequisite(s): BIO 121 and BIO 139
Term Typically Offered: Spring only

Lectures and demonstrations on the fundamental characteristics and properties of plant, animal and bacterial viruses. Lecture three hours.

BIO 144. Pathogenic Bacteriology. 4 Units
Prerequisite(s): BIO 139.
Term Typically Offered: Fall only

Morphological, physiological and immunological characteristics of pathogenic bacteria. In the laboratory, pure culture studies are emphasized. Lecture two hours; laboratory six hours. Fee course.

BIO 145. The Diversity of Microorganisms. 3 Units
Prerequisite(s): BIO 139.
Term Typically Offered: Spring only

Isolation, cultivation and characterization of a wide variety of soil and water microbes from natural habitats using the elective enrichment technique; natural habitats also will be examined directly for the numbers and varieties of microbes which are present. Lecture two hours; laboratory three hours. Fee course.
BIO 149A. Immunology.
Prerequisite(s): BIO 121 and BIO 139
Term Typically Offered: Fall only

Nature of antigens, antibodies and their reactions. The development of the immune response and its role in immunity and pathology. Lecture two hours.

BIO 149B. Immunology and Serology Laboratory.
Prerequisite(s): BIO 139, BIO 149A.
Term Typically Offered: Fall, Spring, Summer

Laboratory exercises designed to provide familiarity with common clinical laboratory procedures in serology. Laboratory three hours. Fee course. Fee course.

BIO 149C. Advanced Problems in Immunology.
Prerequisite(s): BIO 139 and CHEM 161.
Corequisite(s): BIO 149A
Term Typically Offered: Fall only

Advanced problem-solving in immunology designed for students concurrently enrolled in BIO 149A. Discussions and problem sets are focused on the medical, clinical, and biotechnology applications of immunology. Discussion one hour. Credit/No Credit

BIO 150. Forensic Biology.
Prerequisite(s): BIO 1, BIO 2 and BIO 184.
Term Typically Offered: Spring only

Principles governing the application of biology and biological statistics to solve crimes. Topics include evidence examination and preservation, presumptive and confirmatory serological tests, hair comparison, generation and statistical analysis of mitochondrial and nuclear DNA profiles, structure and administration of the modern crime laboratory, and the role of the criminalist in the U.S. court system. Lecture two hours; laboratory three hours.

Note: Not offered every semester

BIO 151. Advanced Laboratory Techniques in Forensic Biology.
Prerequisite(s): BIO 150 or instructor permission.
Term Typically Offered: Fall only

Laboratory exercises focusing on current research problems and skills in forensic serology, DNA typing, and court testimony. Topics will include DNA mixture and low copy number interpretation, advanced techniques in serological testing, research ethics, as well as skills for effective communication in the courtroom. Topics may also include Y-STR typing, animal and plant DNA identification and typing, microbial forensics, somatic mosaicism, ELISA specificity and sensitivity testing, and other current areas of active inquiry. Designed to prepare students for entry level positions as DNA analysts in federal, state, and local crime laboratories. Laboratory six hours. Fee course.

Fee course.

BIO 152. Human Parasitology.
Prerequisite(s): BIO 1 and BIO 2.
Term Typically Offered: Spring only

Examines, in detail, the most important species of protozoans, flukes, tapeworms and roundworms that infect humans. Life cycles, pathology and prophylaxis constitute the principal topics in lectures. Morphology, physiology, taxonomy and diagnosis constitute the principal topics in the laboratory. Lecture two hours; laboratory three hours. Fee course.

Fee course.

BIO 155. Food Microbiology.
Prerequisite(s): BIO 139.
Term Typically Offered: Fall, Spring

Microbiology of food fermentations, food preservation and spoilage. Lecture two hours; laboratory three hours. Fee course. Fee course.

BIO 157. General Entomology.
Prerequisite(s): BIO 1 and BIO 2.
Term Typically Offered: Fall only

Biology of insects and a brief consideration of other terrestrial arthropods. Includes structure, physiology, ecology, classification, economic importance, collection and preservation of insects. Lecture three hours; laboratory three hours. Fee course. Fee course.

Prerequisite(s): BIO 10 or both BIO 1 and BIO 2; STAT 1.
Term Typically Offered: Fall, Spring

Examination of the interrelationships among organisms and their environments. Designed for the major in Biological Sciences or related fields. Topics include the structure and function of terrestrial and aquatic ecosystems, population and community dynamics and human effects on ecosystems. Projects and field trips required. Lecture two hours; laboratory three hours. Fee course.

Fee course.

Field trip(s) may be required.

BIO 162. Ichthyology: The Study of Fishes.
Prerequisite(s): BIO 1 and BIO 2.
Term Typically Offered: Fall only – even years

Biology of fishes: structure, physiology, ecology, economic importance, propagation and classification. Methods of identification, life history study, propagation, collection and preservation. Lecture two hours; laboratory three hours. Field trips may be required. Fee course.

Fee course.

Field trip(s) may be required.

BIO 163. Amphibians and Reptiles: An Introduction to Herpetology.
Prerequisite(s): BIO 1 and BIO 2.
Term Typically Offered: Spring only – odd years

Taxonomy, natural history, ecology and distribution of amphibians and reptiles with emphasis on local forms. Lecture two hours; laboratory three hours. Field trips may be required. Fee course.

Fee course.

Field trip(s) may be required.

BIO 166. Ornithology.
Prerequisite(s): BIO 1 and BIO 2.
Term Typically Offered: Spring only – odd years

Biology of birds: structure, physiology, ecology, behavior, and classification. Methods of life history study, ecological studies, laboratory and field identification. Lecture two hours; laboratory three hours. Field trips required. Fee course.

Fee course.

Field trip(s) may be required.
BIO 167. Quantitative Methods in Biology. 3 Units
Prerequisite(s): STAT 1 and BIO 100 or graduate status
Term Typically Offered: Spring only

Focuses on statistical hypothesis testing and experimental design in the biological sciences. Topics include the development of a hypothesis, study design and implementation, management and presentation of data, identification of data types, and appropriate use of statistical procedures. General application to a wide range of biological disciplines and will emphasize the scientific process, critical thinking skills, and the interpretation of statistical results, which will include a project culminating a scientific paper and presentation. Lecture two hours; laboratory three hours.

BIO 168. Mammalogy. 4 Units
Prerequisite(s): BIO 1 and BIO 2.
Term Typically Offered: Fall only

Biology of mammals: structure, physiology, ecology, behavior, classification. Methods of life history, laboratory and field identification, collection and preservation. Lecture three hours; laboratory three hours. Field trips required. Fee course.
Fee course.
Field trip(s) may be required.

BIO 169. Animal Behavior. 3 Units
Prerequisite(s): BIO 1 and BIO 2.
Term Typically Offered: Spring only

Introduction to the fascinating world of why animals do the things that they do. Focus is on the evolution and function of animal behavior through understanding the costs and benefits of different behavior including foraging, fighting and reproduction. Lecture two hours; laboratory three hours. Fee course.

BIO 170. Advanced Nutrition and Metabolism. 3 Units
Prerequisite(s): CHEM 161, FACS 113; or instructor permission.
Term Typically Offered: Spring only – odd years

Study of the physiologic function of carbohydrates, lipids, protein and micronutrients including integrated metabolism, transport, regulation and relation to inborn errors/chronic disease. Introduction to gene-nutrient interaction.
Cross Listed: FACS 170; only one may be counted for credit.

BIO 173. Principles of Fisheries Biology. 3 Units
Prerequisite(s): BIO 160, STAT 1.
Term Typically Offered: Fall only – odd years

Introduction to the biological principles basic to fisheries science, including enumeration, recruitment, growth, abundance and mortality. Mathematics, computer modeling, and field methods will be used to understand natural populations and the impact of fishing on those populations in keeping with modern approaches to fisheries science which are grounded in population ecology and conservation biology. Lecture two hours; laboratory three hours. Fee course.

BIO 178. Molecular Ecology. 4 Units
Prerequisite(s): BIO 184
Corequisite(s): BIO 188
Term Typically Offered: Fall only

A survey of the use of molecular tools to understand ecological questions. Lecture will focus on the background and history of the use of molecular tools in ecological settings, including application of molecular tools to conservation of natural resources. Laboratory will include techniques for both wet lab and analysis of molecular data, including interpretation of results. Students will complete a capstone-style project that will culminate in the production of a research proposal.

BIO 179. Conservation Biology & Wildlife Management. 3 Units
Prerequisite(s): BIO 100. BIO 160 recommended.
Term Typically Offered: Spring only – odd years

Study of human effects and management of ecological systems, including populations, communities, and ecosystems. Topics include population and biodiversity responses to human activities, endangered species management, reserve design, and restoration.
Note: Lecture two hours; laboratory and fieldwork three hours. Fee course.

BIO 180. Advanced Molecular Biology. 4 Units
Prerequisite(s): BIO 121 and BIO 184.
Term Typically Offered: Fall only

Examination of the structure of genes and genomes, the mechanisms by which they change, and the use of evolutionary relationships to understand function. Mechanisms of the regulation of gene expression from gene to phenotype and the tools used to study these processes. Applications of molecular tools in medicine and biotechnology and the ethics around these approaches. Lecture two hours, laboratory six hours.

BIO 183. Cancer Biology. 3 Units
Prerequisite(s): BIO 121 and BIO 184.
Term Typically Offered: Fall only

Study of cancer from the molecular level to the effect on whole tissues and organs. Topics to be covered include the classification and nomenclature of cancers, the process leading up to the formation of a cancer, the possible causes of cancer, and possible treatment. Lecture two hours.

BIO 183A. Advanced Problems in Cancer Biology. 1 Unit
Prerequisite(s): BIO 121 and BIO 184 and BIO 183 or instructor permission; BIO 183 may be taken concurrently
Term Typically Offered: Fall, Spring

Literature searches and discussions are focused on medical, clinical, and biotechnological applications of Cancer Biology.

BIO 184. General Genetics. 4 Units
Prerequisite(s): BIO 1 and BIO 2; declared major in Biological Sciences, Biochemistry, Chemistry or instructor consent
Term Typically Offered: Fall, Spring, Summer

Principles of inheritance as they relate to microorganisms, plants, animals and humans. Genetic mechanisms are analyzed according to evidence derived from both classical and current research. The nature, structure, and function of the genome are considered at the molecular level. Lecture three hours; laboratory three hours. Fee course.

Fee course.
BIO 185. Topics in Biology. 3 Units
Prerequisite(s): BIO 10 or both BIO 1 and BIO 2; CHEM 20.
Term Typically Offered: Fall, Spring

Current topics in cellular, developmental and/or molecular biology. Topics will vary. May be taken more than once provided that topics are different. Lecture three hours.

BIO 186A. Cell and Molecular Biology Seminar. 1 Unit
Prerequisite(s): BIO 10 or both BIO 1 and BIO 2.
Term Typically Offered: Fall, Spring

Series of at least 10 seminars in cell and molecular biology. Topics within each seminar will vary each semester.
Note: May be repeated for credit. No more than one unit of BIO 186 may be counted toward the upper division major requirement.
Credit/No Credit

BIO 186B. Ecological and Environmental Issues Seminar. 1 Unit
Prerequisite(s): BIO 10 or both BIO 1 and BIO 2.
Term Typically Offered: Fall only

Series of at least 10 seminars in ecological and environmental issues. Topics within each seminar will vary each semester.
Note: May be repeated for credit. No more than one unit of BIO 186 may be counted toward the upper division major requirement. Cross Listed: ENVS 186B; only one may be counted for credit.
Credit/No Credit

BIO 186C. Introduction to Health Careers Seminar. 1 Unit
Term Typically Offered: Fall, Spring

Designed for pre-health professional students who are in the process of researching traditional and non-traditional health professions and careers. This course consists of at least 10 seminars presented by various practicing health professionals, health professional students, and health professional school admissions officers. Topics vary each semester. One hour per week.
Credit/No Credit

BIO 187. Advanced Cell Biology. 4 Units
Prerequisite(s): BIO 121 and BIO 184.
Term Typically Offered: Spring only

Advanced cellular and molecular biology of eukaryotic cells. Comparison to prokaryotic organism will be made as needed to illustrate key concepts. Emphasis will be placed on cellular functions and utilize two or more cellular systems; including cell to cell communication, regulation of gene expression, uptake and secretion, regulation of cytoskeletal configuration, cell migration and cellular reproduction. Lecture two hours, laboratory six hours.

BIO 188. Evolution. 3 Units
Prerequisite(s): BIO 184 or instructor permission.
Term Typically Offered: Fall, Spring

General survey of evolutionary processes: mechanisms of evolutionary change, adaptation and history of life. Designed for biological sciences majors. Lecture three hours.

BIO 189. Biology-Related Work Experience. 6 - 12 Units
Term Typically Offered: Fall, Spring

Supervised employment in a biology or biology-related company or agency arranged through the Department of Biological Sciences and the Cooperative Education Program office. Requires preparation of application packet, completion of a three to six month, full-time or part-time work assignment, and a written report.
Note: Open only to upper division or graduate students with appropriate preparation. Consent of Department Cooperative Education Committee required, and Committee will determine the number of units to be granted. Students may enroll for no more than 12 total units, and units may not be used to meet biology major or graduate course work requirements.
Credit/No Credit

BIO 190. Biological Internship. 1 - 2 Units
Prerequisite(s): Department chair and instructor (representing the appropriate biological discipline) permission.
Term Typically Offered: Fall, Spring

Supervised work-learn experience in biology with a public or private organization. Up to 4 units may be taken. No more than 2 units from BIO 195, BIO 197 and BIO 199 combined can be applied to the biological sciences upper division major requirement.
Credit/No Credit

BIO 195. Medical Internship. 1 - 2 Units
Prerequisite(s): Department Chair, Instructor and Placement Agency's permission required.
Term Typically Offered: Fall, Spring

Supervised non-paid internship experience in the medical-related and business-related aspects of dentistry. Includes a volunteer experience in the community. No more than 2 units from BIO 195, BIO 197 and BIO 199 combined can be applied to the biological sciences upper division major requirement.
Note: 1 unit = 40 hours of participation/semester and 2 units = 80 hours of participation/semester; May be repeated for up to 4 units of credit.
Credit/No Credit

BIO 195M. Medical Internship. 2 Units
Prerequisite(s): Department Chair, Instructor and Placement Agency's permission required.
Term Typically Offered: Fall, Spring

Supervised non-paid internship experience in multiple aspects of health care. Includes a volunteer experience in the community, supplemental readings, and a presentation on current issues in medicine and health education. No more than 2 units of BIO 195, BIO 197 and BIO 199 combined may be applied to the Biological Sciences upper division major requirement.
Note: 80 hours of participation/semester
Credit/No Credit
BIO 195P. Pharmacy Internship. 1 - 2 Units
Prerequisite(s): Department Chair, Instructor, and Placement Agency permission required.
Term Typically Offered: Fall, Spring
Supervised non-paid internship experience in pharmacy. Includes a volunteer experience in the community. No more than 2 units from BIO 195, BIO 197 and BIO 199 combined can be applied to the biological sciences upper division major requirement. May be repeated for up to 4 units of credit. 1.0-2.0 units (40-80 hours of participation/semester).
Credit/No Credit

BIO 195T. Teaching Internship. 1 - 2 Units
Prerequisite(s): Department chair and instructor permission.
Term Typically Offered: Fall, Spring
Supervised non-paid internship experience in K-12 teaching. Includes regular meetings with supervising teacher and submission of a field experience journal. May be repeated for credit.
Note: No more than 2 units from BIO 195, 197 and 199 combined can be applied to the biological sciences upper division major requirement.
Credit/No Credit

BIO 195A. Laboratory Teaching Assistant. 1 - 2 Units
Prerequisite(s): Department Chair and instructor permission.
Term Typically Offered: Fall, Spring
Supervised experiences will include aspects of laboratory preparation and aspects of teaching biology laboratory courses. Conferences and laboratory experiences four to eight hours weekly. Admission requires approval of professor and Department Chair.
Note: May be taken more than once, but no more than 2 units from BIO 195, BIO 197 and BIO 199 combined can be applied to the Biological Sciences upper division major requirement.
Credit/No Credit

BIO 195B. Laboratory Techniques. 1 - 2 Units
Prerequisite(s): Department Chair and instructor permission.
Term Typically Offered: Fall, Spring
Supervised laboratory experiences for advanced students in the organization and techniques for operation of a basic sciences laboratory. Conferences and laboratory experiences four to eight hours weekly. Admission requires approval of professor and Department Chair.
Note: May be taken more than once, but no more than 2 units from BIO 195, BIO 197 and BIO 199 combined can be applied to the Biological Sciences upper division major requirement.
Credit/No Credit

BIO 195C. Co-curricular Activities in Biology. 1 - 2 Units
Term Typically Offered: Fall, Spring
Students may earn BIO 197C credit by participating as tutors and/or section or discussion leaders for biological sciences classes or teaching as voluntary instructors or tutors in K-12 courses or programs offered by other community organizations. Participation requires four to eight hours weekly. Admission requires approval of professor and Department Chair.
Note: May be taken more than once, but no more than 2 units from BIO 195, BIO 197 and BIO 199 combined can be applied to the Biological Sciences upper division major requirement.
Credit/No Credit

BIO 195D. Advanced Laboratory Exploration. 1 - 2 Units
Prerequisite(s): BIO 197A and instructor permission.
Term Typically Offered: Fall, Spring
Advanced, supervised experiences that explore the science behind laboratory experiences and discussion regarding aspects of specific laboratories that promote understanding of scientific content. Conferences and laboratory experiences four to eight hours weekly; written assignments and/or oral presentations required. Admission requires approval of professor and Department Chair.
Note: No more than 2 units from BIO 195, BIO 197, BIO 199 combined may be applied to the Biological Sciences upper division major requirement.

BIO 195E. Intermediate Lab Techniques. 1 - 2 Units
Prerequisite(s): BIO 197B and instructor or Department Chair permission
Term Typically Offered: Fall, Spring
Supervised laboratory experiences for skilled students in the organization and techniques for operation of a basic sciences laboratory. Conferences and laboratory experiences four to eight hours weekly. Admission requires approval of instructor and Department Chair.
Note: May be taken more than once, but no more than 2 units from BIO 195, BIO 197 and BIO 199 combined may be applied to the Biological Sciences upper division major requirement.
Credit/No Credit

BIO 195F. Advanced Lab Techniques. 1 - 2 Units
Prerequisite(s): BIO 197B and instructor permission.
Term Typically Offered: Fall, Spring
Advanced supervised laboratory experiences for skilled students in the organization and techniques for operation of a basic sciences laboratory. Conferences and laboratory experiences four to eight hours weekly. Admission requires approval of instructor and Department Chair.
Note: May be taken more than once, but no more than 2 units from BIO 195, BIO 197 and BIO 199 combined may be applied to the Biological Sciences upper division major requirement.
Credit/No Credit

BIO 196A. Honors Proseminar and Research. 2 Units
Prerequisite(s): Open only to honors students in biological sciences who have an overall GPA of 3.25 and a minimum of 3.0 GPA in biology courses (at least six units of upper division biology excluding BIO 106, BIO 108, BIO 194, BIO 195, BIO 197 and BIO 199).
Term Typically Offered: Fall, Spring
Contemporary topics in biology selected by students in the course will form the basis for an introduction to scientific journals, the scientific method, and research as a professional pursuit. Each student develops a refined research proposal and prepares a seminar summarizing the proposal and the current state of knowledge in the topic area. Students will develop and refine their methodology under the direction of a faculty sponsor.
BIO 197. Advanced Laboratory. 
Prerequisite(s): BIO 199A.
Term Typically Offered: Fall, Spring

Directed research involving completion of an independently conducted research project for which a proposal and methodology was developed in BIO 198A. Data collection, summary and analysis, and formulation of conclusions based on the data will be discussed periodically with a faculty sponsor. Culmination will consist of preparation of an undergraduate thesis, poster and presentation of a seminar summarizing results and conclusions.

Note: Open only to honors students in Biological Sciences. Fee course.

BIO 198A. Directed Readings. 
Prerequisite(s): Department Chair and instructor permission.
Term Typically Offered: Fall, Spring

Directed Readings on a topic in Biology culminating in a research paper. Admission requires submission of a prospectus approved by the faculty member under whom the work is to be conducted and the Department Chair.

Note: May be taken more than once, but no more than 2 units from BIO 195, BIO 197 and BIO 199 combined may be applied to the Biological Sciences upper division major requirement.

BIO 198B. Advanced Readings. 
Prerequisite(s): Department Chair and instructor permission.
Term Typically Offered: Fall, Spring

Directed research involving completion of an independently conducted research project for which a proposal and methodology was developed in BIO 198A. Data collection, summary and analysis, and formulation of conclusions based on the data will be discussed periodically with a faculty sponsor. Culmination will consist of preparation of an undergraduate thesis, poster and presentation of a seminar summarizing results and conclusions.

Note: Open only to honors students in Biological Sciences. Fee course.

BIO 199A. Introductory Undergraduate Research. 
Prerequisite(s): Department Chair and instructor permission.
Term Typically Offered: Fall, Spring

Student conducts introductory, independent laboratory or field research on an original question. Research must culminate in a formal report. Weekly meetings may be required. Students must have a research prospectus approved by faculty mentor and Department Chair.

Note: May be taken more than once, no more than 2 units from BIO 195, BIO 197 and BIO 199 combined may be applied to the Biological Sciences upper division major requirement.

BIO 199B. Directed Readings. 
Prerequisite(s): Department Chair and instructor permission.
Term Typically Offered: Fall, Spring

Directed Readings on a topic in Biology culminating in a research paper. Admission requires submission of a prospectus approved by the faculty member under whom the work is to be conducted and the Department Chair.

Note: May be taken more than once, but no more than 2 units from BIO 195, BIO 197 and BIO 199 combined may be applied to the Biological Sciences upper division major requirement.

BIO 199C. Intermediate Undergraduate Research. 
Prerequisite(s): Department Chair and instructor permission.
Term Typically Offered: Fall, Spring

Student conducts independent laboratory or field research on an original question. Research must culminate in a formal report. Weekly meetings may be required. Students must have a research prospectus approved by faculty mentor and Department Chair.

Note: May be taken more than once; no more than 2 units from BIO 195, BIO 197 and BIO 199 combined may be applied to the Biological Sciences upper division major requirement.

BIO 199D. Advanced Undergraduate Research. 
Prerequisite(s): Department Chair and instructor permission.
Term Typically Offered: Fall, Spring

Advanced laboratory or field research on an original question. The research must culminate in a formal report. Weekly meetings may be required. Students must have a prospectus approved by the faculty member and the Department Chair.

Note: May be taken more than once; no more than 2 units from BIO 195, BIO 197 and BIO 199 combined may be applied to the Biological Sciences upper division major requirement.

Prerequisite(s): BIO 160.
Term Typically Offered: Fall, Spring

Fundamental properties of plant populations; population regulation; community productivity and structure; a study of ecotypic and ecocline variation in plant populations. Lecture one hour, laboratory and field six hours.

Prerequisite(s): BIO 220 (may be taken concurrently).
Term Typically Offered: Fall, Spring

Graduate level introduction to scientific inquiry in the biological sciences. Students learn to apply the scientific method, critically evaluate the scientific literature, initiate their graduate project, and develop written and oral scientific presentation skills. Lecture two hours.

Note: Graduate Writing Intensive (GWI).

Prerequisite(s): BIO 220 (may be taken concurrently).
Term Typically Offered: Fall, Spring

Introduction to research methods in ecology, evolution and conservation biology. Students learn field and laboratory techniques with a variety to taxa in a range of local ecosystems. Students will work with several faculty conducting research projects. Topics will include developing hypotheses, experimental design, study implementation, and statistical analyses. Students will be expected to present findings in oral and written form. Two three hour laboratory periods. Fee course.

BIO 221A. Cell and Molecular Methods and Techniques. 
Prerequisite(s): BIO 167, BIO 220 (may be taken concurrently).
Term Typically Offered: Fall, Spring

Introduction to research methods in molecular and cellular biology. Students learn both cell and molecular techniques in the context of hypothesis-driven research to answer questions relating to a specific gene and cellular system. Experimental design and commonly used laboratory techniques will be explored. Two three hour laboratory periods. Fee course.

Prerequisite(s): BIO 167, BIO 220 (may be taken concurrently).
Term Typically Offered: Fall, Spring

Introduction to research methods in ecology, evolution and conservation biology. Students learn field and laboratory techniques with a variety to taxa in a range of local ecosystems. Students will work with several faculty conducting research projects. Topics will include developing hypotheses, experimental design, study implementation, and statistical analyses. Students will be expected to present findings in oral and written form. Two three hour laboratory periods. Fee course.

FIELD TRIP(S) MAY BE REQUIRED.

BIO 222. Molecular Biology. 
Prerequisite(s): BIO 184, CHEM 161.
Term Typically Offered: Fall, Spring

Processes and control of DNA replication, transcription, and translation developed from a consideration of the current literature. Lecture three hours.
BIO 223. Human Molecular Genetics. 3 Units
Prerequisite(s): BIO 184 and CHEM 161.
Term Typically Offered: Fall, Spring
In-depth study of the molecular basis of human disease, emphasizing current experimental approaches and technologies. Topics include the isolation and analysis of disease genes, the influence of teratogens and random environmental events on human embryonic development, the molecular and biochemical consequences of mutations, and ethical issues that currently surround the field. Lecture 3 hours.

BIO 224. Genomics, Proteomics, and Bioinformatics. 3 Units
Prerequisite(s): BIO 184, BIO 222 and graduate status or instructor permission.
Term Typically Offered: Fall, Spring
Examination of current approaches in structural genomics, functional genomics and proteomics, and the bioinformatics tools utilized to understand genome organization, the regulation of gene expression, gene function and the evolutionary relationships within and between genomes. Lecture two hours; laboratory 3 hours.

BIO 225. Stem Cell Biology and Manufacturing Practices. 1 Unit
Prerequisite(s): Graduate status and instructor permission.
Term Typically Offered: Fall, Spring
Graduate level introductory course in human stem cell biology with specific emphasis on adult, embryonic, and induced pluripotent stem cells. Topics will include how stem cells are isolated or generated, how they are cultured, and how they are used for regenerative therapies. In addition, students will learn about Good Manufacturing Practice (GMP) and how to manufacture human stem cells.

BIO 227. Development and Regenerative Medicine. 3 Units
Prerequisite(s): Graduate status and instructor permission.
Term Typically Offered: Fall, Spring
Examines the processes of cellular development in the embryo and adult with a focus on stem cells. Stem cells will be studied at the biochemical, molecular, genetic, epigenetic, cellular and physiological level, with an emphasis on their roles in promoting organismal health and disease. Current research and clinical applications will be examined, along with the bioethics, policies and politics of their use.

BIO 245. Host/Pathogen Interactions. 3 Units
Prerequisite(s): BIO 121, BIO 139, BIO 184. Courses recommended but not required: BIO 144, BIO 149, BIO 180.
Term Typically Offered: Fall, Spring
Critical reading and discussion of current literature on host/pathogen interactions. Topics to be covered include: alteration of host intracellular trafficking, subversion of cell cytoskeleton for invasion, intracellular survival mechanisms, pathogen-induced cell killing, and evasion and subversion of the host immune system.

BIO 247. Contemporary Topics in Immunology. 2 Units
Prerequisite(s): BIO 149A or instructor permission.
Term Typically Offered: Fall, Spring
Readings and discussions of current literature emphasizing new field developments and controversies. Lecture two hours.
BIO 293. Research Conference. 2 Units  
Prerequisite(s): Department Chair and instructor permission.
Term Typically Offered: Fall, Spring

Presentation and discussion of graduate student and faculty research and current literature with emphasis on critical evaluation of research design, data analysis and presentation techniques. 
Note: Discussion two hours. May be taken twice for credit. Only two units may be applied to the University's requirement for 200-level courses; May be repeated for up to 4 units of credit.
Credit/No Credit

BIO 294A. Seminar in Molecular and Cellular Biology. 1 Unit  
Prerequisite(s): Student must be a Biology major at the master's level to enroll in this class and/or have instructor permission.
Term Typically Offered: Fall, Spring

Library research, short-term original research, technique development, or thesis research site selection and preliminary field observations. Culminating experience will be in the format of a scientific paper, annotated bibliography, demonstration of technique mastery, or oral presentation. Enrollment requires classified graduate status and approval of the project by a faculty supervisor and the Department Chair.
Credit/No Credit

BIO 294B. Seminar in Ecology, Evolution and Conservation. 1 Unit  
Prerequisite(s): Student must be a Biology major at the master's level to enroll in this class and/or have instructor permission.
Term Typically Offered: Fall, Spring

Library research, short-term original research, technique development, or thesis research site selection and preliminary field observations. Culminating experience will be in the format of a scientific paper, annotated bibliography, demonstration of technique mastery, or oral presentation. Enrollment requires classified graduate status and approval of the project by a faculty supervisor and the Department Chair.
Credit/No Credit

BIO 295. Problems in Biological Sciences. 1 - 4 Units  
Term Typically Offered: Fall, Spring

Library research, short-term original research, technique development, or thesis research site selection and preliminary field observations. Culminating experience will be in the format of a scientific paper, annotated bibliography, demonstration of technique mastery, or oral presentation. Enrollment requires classified graduate status and approval of the project by a faculty supervisor and the Department Chair.
Credit/No Credit

BIO 297A. Teaching Biology Seminar. 1 Unit  
Prerequisite(s): Acceptance in the GTA Program or instructor permission.
Term Typically Offered: Fall, Spring

Training for graduate students who wish to participate in the Department's Graduate Teaching Associate (GTA) Program and others interested in teaching biology. Weekly seminar session covering aspects of teaching biology laboratories. Lecture/discussion. Not applicable toward 18 unit 200-level course work requirement.
Credit/No Credit

BIO 297B. Laboratory Teaching. 1 Unit  
Prerequisite(s): Acceptance in the GTA Program or instructor permission.
Term Typically Offered: Fall, Spring

Training for graduate students admitted to the Graduate Teaching Associate (GTA) Program. Students assist in teaching three hours of biology laboratory weekly under the supervision of a laboratory instructor. Laboratory three hours. Not applicable toward 18 unit 200-level coursework requirement.
Credit/No Credit

BIO 299. Problems in Biological Sciences. 1 - 4 Units  
Term Typically Offered: Fall, Spring

Library research, short-term original research, technique development, or thesis research site selection and preliminary field observations. Culminating experience will be in the format of a scientific paper, annotated bibliography, demonstration of technique mastery, or oral presentation. Enrollment requires classified graduate status and approval of the project by a faculty supervisor and the Department Chair.
Credit/No Credit

BIO 500. Master's Thesis. 4 Units  
Prerequisite(s): Advanced to candidacy and chair permission of his/her thesis committee.
Term Typically Offered: Fall, Spring

Completion of a thesis approved for the Master's degree. Should be taken in final semester prior to the completion of all requirements for the degree.

BIO 502. Master's Project. 2 Units  
Prerequisite(s): Advanced to candidacy and chair permission of his/her committee.
Term Typically Offered: Fall, Spring

Completion of a written project based on a research problem in biology approved for the Master of Arts Degree. Should be taken in final semester prior to the completion of all requirements for the degree.

BIO 633. Human Gross Anatomy for Physical Therapists. 3 Units  
Prerequisite(s): BI 633 or BI 22 or instructor permission.
Corequisite(s): PT 600, PT 602, PT 608, PT 630.
Term Typically Offered: Fall, Spring

Study of the gross anatomy of selected regions of the human body. Emphasis will be placed on musculoskeletal, neurovascular and anatomy of the joints of the back, thoracic wall, abdominal wall, upper limb and lower limb. Anatomical relationships will be reinforced through study of cross-sectional anatomy. Lecture two hours; lab three hours.
Note: Course designed for students enrolled in the Doctor of Physical Therapy Program.

Business Administration (BUS)

BUS 162. Project Management. 3 Units  
Prerequisite(s): MGMT 102.
Term Typically Offered: Fall, Spring

Processes, methodologies, tools, techniques, software, economic analysis, and life-cycle costing for managing different phases of projects. Emphasis on effective management of projects to achieve operational, managerial, and strategic goals of organizations.

Business Honors (BHON)

BHON 102. Business Communication. 2 Units  
Prerequisite(s): Admitted into Business Honors Program.
Term Typically Offered: Fall, Spring

Provides basic concepts for the understanding and practice of communication for managers and professionals. Examines the use of language and conversations in business settings and their role in coordinating actions, resolving breakdowns in work performance, and providing customer satisfaction. Topics include professional styles and formats of business writing and development of competence in business conversation skills (written, electronic and oral).
Prerequisite(s): Admitted into Business Honors Program.
Term Typically Offered: Fall, Spring

Investigates substantive law and stresses critical thinking and analytical evaluation of contemporary business legal issues. Identifies ethical concerns and addresses potential legal problems. Topics include an introduction to the legal system, court procedures, contracts and sales, real and personal property, labor and employment law, product liability, and the government regulation of business.

BHON 104. Fundamentals of Organizational Behavior.
Prerequisite(s): Admitted into Business Honors Program.
Term Typically Offered: Fall, Spring

The course provides students frameworks to deal and work with members of work organizations, and focuses on how individual, group and organization-level factors influence employee attitudes and behaviors. The course further discusses challenges people face in today’s dynamic work environment and global settings.

BHON 105. Introduction to Management Information Systems.
Prerequisite(s): Admitted into Business Honors Program.
Term Typically Offered: Fall, Spring

Explores the application of information technology in the organizational environment to assist in managerial decision making. Examines the alignment of IT and business strategy.

BHON 106. Business Data Analysis.
Prerequisite(s): Admitted into Business Honors Program.
Term Typically Offered: Fall, Spring

Applies statistical methods to solve business problems and inform managerial decision making. Topics include data analysis, statistical reasoning, model building and communication of statistical results. A statistical computer package is used in this course.

Prerequisite(s): Admitted into Business Honors Program.
Term Typically Offered: Fall, Spring

Study of principles of finance and their application to typical financial problems of business enterprises. Topics include financial analysis, management of working capital, capital budgeting, long-term financing, dividend policy, internal financing, and time value of money.

BHON 108. Fundamentals in Marketing.
Prerequisite(s): Admitted into Business Honors Program.
Term Typically Offered: Fall, Spring

An introduction to marketing concepts and principals. Examines the marketing function, its relationships with other business functions, and its role in the US and global economies.

Prerequisite(s): Admitted into Business Honors Program.
Term Typically Offered: Fall, Spring

Introduces the basic concepts and methods used to analyze and improve operation performance in manufacturing and service organizations. Topics include operations strategy, process design and capacity management, inventory management, supply chain management, and operations planning and control.

BHON 120. Business Intelligence.
Prerequisite(s): BHON 102, BHON 104, BHON 105, BHON 106, BHON 107, BHON 108, BHON 109
Term Typically Offered: Fall, Spring

Focuses on enterprise problem solving and decision making using information technology, and data and financial analyses for mission critical and integral applications in planning and control. Alternative solutions are examined and evaluated for their effectiveness in achieving results.

BHON 130. Value Chain and Supply Chain Management.
Prerequisite(s): BHON 102, BHON 104, BHON 105, BHON 106, BHON 107, BHON 108, BHON 109
Term Typically Offered: Fall, Spring

Methods used for developing effective organizational value chains that integrate strategic planning, procurement, R&D, production, warehousing, distribution, and customer service to support business strategy. Includes critical decisions surrounding various organizational stakeholders, such as customer and supplier management, and the movement of goods and information throughout a supply chain network.

BHON 140. Enterprise Resource Planning and Infrastructure.
Prerequisite(s): BHON 102, BHON 104, BHON 105, BHON 106, BHON 107, BHON 108, BHON 109
Term Typically Offered: Fall, Spring

Examines the design, planning, implementation and impact of enterprise-wide systems on the organization and infrastructure. Focuses on the integration and coordination of all facets of business, including production, accounting, finance, human resources, and marketing to improve the organization’s resource planning, and management and operational control.

BHON 150. Entrepreneurship and Innovation.
Prerequisite(s): BHON 102, BHON 104, BHON 105, BHON 106, BHON 107, BHON 108, BHON 109
Term Typically Offered: Fall, Spring

An application based course that provides a broad understanding of the new venture processes. Discusses fundamental tools and skills necessary to create, run, and grow a successful new venture. Offers a multidisciplinary framework for studying and developing innovative and creative capabilities of entrepreneurs.

BHON 160. Project Management.
Prerequisite(s): BHON 102, BHON 104, BHON 105, BHON 106, BHON 107, BHON 108, BHON 109
Term Typically Offered: Fall, Spring

Methods and processes used for planning, controlling and managing projects. Includes project selection and scope, scheduling methodologies, economic analysis, the use of software, and life-cycle costing for managing different phases of projects. Emphasis on effective management of projects to achieve operational, managerial and strategic goals of organizations.
BHON 170. Strategy and Leadership. 3 Units
Prerequisite(s): BHON 102, BHON 104, BHON 105, BHON 106, BHON 107, BHON 108, BHON 109
Term Typically Offered: Fall, Spring

An introduction to traditional and contemporary theories of business strategy, corporate strategy and strategic leadership. Compares and contrasts theories in strategy and styles of strategic leadership through case studies, current research, and conversations with business leaders.

BHON 190. Practicum in Business. 1 Unit
Prerequisite(s): BHON 120, BHON 130, BHON 140, BHON 150 and BHON 160.
Corequisite(s): BHON 170.
Term Typically Offered: Fall, Spring

A series of forums that exposes students to practical business issues that have significant impact on the enterprise. Discussions with managers who have effectively led planning and operations. Compares and contrasts business concepts and principles to their practical applications.

Chemistry (CHEM)

CHEM 1A. General Chemistry I. 5 Units
Prerequisite(s): High school chemistry and college algebra; sufficient performance on the college algebra diagnostic test, or equivalent; passing score on a standardized Chemistry diagnostic exam given prior to each semester, or a minimum grade of “C” in CHEM 4.
General Education Area/Graduation Requirement: Physical Science (B1), Laboratory (B3)
Term Typically Offered: Fall, Spring

Fundamental principles and concepts of chemistry, including stoichiometry; thermochemistry; atomic and molecular structure; solution chemistry, including acid-base chemistry; quantum theory; bonding and intermolecular forces; and chemical kinetics. Lecture three hours, laboratory three hours, discussion one hour.
Note: Not open to enrollment by engineering majors, who should take CHEM 1E, General Chemistry for Engineering.

CHEM 1B. General Chemistry II. 5 Units
Prerequisite(s): CHEM 1A with a passing grade of C or better.
General Education Area/Graduation Requirement: Further Studies in Area B (B5)
Term Typically Offered: Fall, Spring

Continuation of the development of fundamental principles of chemistry and application of principles developed in CHEM 1A. The laboratory work emphasizes applications of equilibrium principles, including some qualitative analysis, coordination chemistry and bioinorganic chemistry. Lecture three hours, laboratory six hours. Knowledge of word processing and spreadsheet software is recommended.

CHEM 1E. General Chemistry for Engineering. 4 Units
Prerequisite(s): High school chemistry; Math 30 or eligibility to take MATH 30 as evidenced by the calculus readiness diagnostic exam; passing score on a standardized Chemistry diagnostic exam given prior to each semester, or minimum grade of “C” in CHEM 4
Term Typically Offered: Fall, Spring, Summer

A one-semester chemistry course for engineering students covering the fundamental principles and concepts of chemistry important to engineering applications. Lecture topics include atomic and molecular structure, solution chemistry, equilibrium, oxidation-reduction, thermochemistry; intermolecular forces; electrochemistry; radiochemistry; polymers; metallic bonding and alloys; chemical diffusion and kinetics. Lecture three hours, Lab three hours.

Note: Enrollment in this course is restricted to engineering majors.

CHEM 4. Chemical Calculations. 3 Units
Prerequisite(s): High school algebra and college algebra; sufficient performance on the college algebra diagnostic test, or equivalent.
Term Typically Offered: Summer only

Introductory chemistry for students who plan to major in a scientific field. Appropriate for students desiring to prepare themselves for Chemistry 1A. Emphasizes chemical nomenclature and techniques of chemical problem solving. Topics covered include: dimensional analysis; conversions between measuring units; weight, mole and chemical equations; density; elementary gas laws; heat and temperature; elementary acid and base chemistry; oxidation and reduction; solutions. Three hours lecture.

CHEM 5. Chemistry for Nurses. 5 Units
Prerequisite(s): One year high school algebra, high school chemistry.
General Education Area/Graduation Requirement: Laboratory (B3), Physical Science (B1)
Term Typically Offered: Fall, Spring

One-semester chemistry survey course for pre-nursing students, covering the areas of general chemistry, organic chemistry and biochemistry. Major lecture topics include atomic and molecular structure and bonding, nomenclature of relevant inorganic and organic compounds, states of matter and intermolecular forces, solutions and solubility, reactions of inorganic, organic, and biological molecules, stereochimistry, structure and function of biological macromolecules, nutrition and metabolism. Emphasize chemistry as it appears in a practical nursing context. Lecture four hours, laboratory three hours.

CHEM 6A. Introduction to General Chemistry. 5 Units
Prerequisite(s): One year high school algebra; high school chemistry recommended.
General Education Area/Graduation Requirement: Physical Science (B1), Laboratory (B3)
Term Typically Offered: Fall, Spring

Structure of atoms, molecules and ions; their interactions including stoichiometry, equilibria, and oxidation-reduction. Does not fulfill the requirements for more advanced study in chemistry and cannot be counted toward a major or minor in chemistry. Lecture three hours, discussion one hour, laboratory three hours.
CHEM 6B. Introduction to Organic and Biological Chemistry. 5 Units
Prerequisite(s): CHEM 1A or CHEM 6A, or a high school chemistry course and passing a qualifying exam given in the first laboratory period.
General Education Area/Graduation Requirement: Further Studies in Area B (B5)
Term Typically Offered: Fall, Spring
Introduction to structure and properties of the major classes of organic compounds; introduction to nomenclature and to the fundamental concepts of reaction mechanisms and stereochemistry; the chemistry and metabolism of carbohydrates, lipids, proteins (including enzymes); the chemistry of nucleic acids. Does not fulfill the requirement for more advanced study in chemistry and cannot be counted toward a major or minor in chemistry. Lecture three hours; discussion one hour; laboratory three hours.

CHEM 20. Organic Chemistry Lecture--Brief Course. 3 Units
Prerequisite(s): CHEM 1B.
Term Typically Offered: Fall, Spring, Summer
Basic principles of organic chemistry. Recommended for students majoring in life-sciences, but not recommended for preprofessional students.

CHEM 20L. Introductory Organic Chemistry Laboratory. 1 Unit
Prerequisite(s): CHEM 20; CHEM 20 may be taken concurrently.
Term Typically Offered: Fall, Spring
Basic organic experimental techniques. Experimental topics include: melting points, purification of solids, distillation, chromatography, extraction, and functional group qualitative analysis. Specifically designed for Biological Sciences majors and others who want to meet the Chemistry minor requirements for a lower division organic laboratory. Laboratory three hours.

CHEM 24. Organic Chemistry Lecture I. 3 Units
Prerequisite(s): CHEM 1B.
Term Typically Offered: Fall, Spring, Summer
Introduction to the basic principals of organic chemistry, including nomenclature, properties and reactions of various classes of organic compounds. Reaction mechanisms will be emphasized.
Note: Required for chemistry majors and recommended for preprofessional students.

CHEM 25. Organic Chemistry Laboratory. 3 Units
Prerequisite(s): CHEM 24, CHEM 124; CHEM 124 may be taken concurrently.
Term Typically Offered: Fall, Spring, Summer
Basic organic experimental techniques including the preparation, separation, purification and identification of organic compounds. Discussion one hour, laboratory six hours.

CHEM 31. Quantitative Analysis. 4 Units
Prerequisite(s): CHEM 1B. 
Term Typically Offered: Fall, Spring
Chemical measurements including associated statistics, chemical equilibrium in aqueous solutions, volumetric analysis, and an introduction to spectrophotometry and chromatography. Lecture two hours, laboratory six hours.

CHEM 89. Introduction to Undergraduate Research. 1 - 3 Units
Term Typically Offered: Fall, Spring
Introduction to undergraduate research which requires students to become familiar lab safety policies, SDSs, and SOPs in the research lab (if applicable), attend group meetings (if applicable) and learn methods of experimental, educational and/or computational design. Students must show proficiency in these requirements in order to receive a final grade.
Credit/No Credit

CHEM 106. Chemical Concepts. 3 Units
Prerequisite(s): GEOL 8 or BIO 7 and ENGL 20 or an equivalent second semester composition course.
Term Typically Offered: Fall, Spring
Principles and concepts of chemistry with applications in the home and environment. Satisfies the upper division chemistry requirement for the multiple-subject teaching credential. Lecture one hour, discussion and activity four hours. Does not fulfill credit requirements for the major or minor in chemistry.

CHEM 110. Inorganic Chemistry Lecture. 3 Units
Prerequisite(s): CHEM 125, CHEM 140B or CHEM 142 instructor permission; CHEM 140B may be taken concurrently, however, students are encouraged to complete CHEM 140B and CHEM 141 first.
Corequisite(s): CHEM 110L.
Term Typically Offered: Fall only
Application of atomic structure, the periodic law, molecular structure and bonding principles, electrochemical principles and other selected models and concepts to theoretical and descriptive inorganic chemistry. Physical and chemical properties of selected elements and inorganic compounds are studied.

CHEM 110L. Advanced Inorganic Chemistry Laboratory. 2 Units
Prerequisite(s): CHEM 125, ENGL 20 or an equivalent second semester composition course.
Corequisite(s): CHEM 110.
Term Typically Offered: Fall only
Preparation, purification and instrumental studies of inorganic compounds. Instrumental and experimental techniques will include EPR, magnetic susceptibility, FTIR, UV-VIS spectroscopy and inert atmosphere techniques.

CHEM 124. Organic Chemistry Lecture II. 3 Units
Prerequisite(s): CHEM 24 or instructor permission; concurrent enrollment in CHEM 25 recommended.
Term Typically Offered: Fall, Spring, Summer
Continued discussion of the principals of organic chemistry, including nomenclature, properties, and reactions of various classes of organic compounds and spectroscopic analysis. Reaction mechanisms will be emphasized.

CHEM 125. Advanced Organic Chemistry Laboratory. 3 Units
Prerequisite(s): CHEM 25, CHEM 124, ENGL 20 or an equivalent second semester composition course.
Term Typically Offered: Fall, Spring
Focuses on advanced organic laboratory techniques and instrumental methods of analysis. Not intended for pre-health professional majors. Discussion one hour, laboratory six hours.
CHEM 128. Organic Synthesis. 3 Units
Prerequisite(s): CHEM 124.
Term Typically Offered: Spring only

Application of functional group reactions to multistep syntheses. Recently developed synthetic methods and literature searching will be emphasized.

CHEM 133. Chemical Instrumentation. 4 Units
Prerequisite(s): CHEM 31, concurrent enrollment in CHEM 140B or completion of CHEM 142: ENGL 20 or an equivalent second semester composition course. Graded: Graded Student. Units: 4.0
Term Typically Offered: Fall, Spring

Modern instrumentation and methods for chemical analysis. Function of electronics and computers in instruments. Theory and use of instruments in the areas of electrochemistry, spectroscopy, mass spectrometry and chromatography. Lecture two hours, laboratory six hours.

CHEM 140A. Physical Chemistry Lecture I. 3 Units
Prerequisite(s): CHEM 1B, CHEM 24, CHEM 31, MATH 32, PHYS 5A, PHYS 5B, or PHYS 11A, PHYS 11B, PHYS 11C; PHYS 11C may be taken concurrently.
Term Typically Offered: Fall only

Introduction to chemical thermodynamics and kinetics.

CHEM 140B. Physical Chemistry Lecture II. 3 Units
Prerequisite(s): CHEM 140A.
Term Typically Offered: Spring only

Introduction to molecular quantum chemistry, structure of matter, molecular spectroscopy, and statistical thermodynamics.

CHEM 141. Physical Chemistry Laboratory. 3 Units
Prerequisite(s): ENGL 20 or an equivalent second semester composition course; CHEM 140A, CHEM 140B or CHEM 142, instructor permission; CHEM 140B may be taken concurrently.
Term Typically Offered: Fall, Spring

Selected exercises in the practice of physico-chemical laboratory methods. Lecture one hour, laboratory six hours.

CHEM 142. Introduction to Physical Chemistry. 4 Units
Prerequisite(s): CHEM 1B, CHEM 24, PHYS 5A, PHYS 5B, MATH 31.
Term Typically Offered: Fall, Spring

Introductory presentation of the theoretical and practical aspects of thermodynamics, quantum chemistry, spectroscopy, and kinetics. As time permits, other topics will be: solution chemistry, hydrodynamics, electrochemistry, and crystallography.

Note: Not acceptable for the BS or the BA without concentration.

CHEM 145. Applications of Computational Chemistry. 3 Units
Prerequisite(s): CHEM 140A and CHEM 140B or CHEM 142, or instructor permission.
Term Typically Offered: Fall only – odd years

Brief introduction/background in computational theory, with emphasis on chemical/biochemical applications. Demonstration/instruction of widely used modeling/computational software. Covering techniques including molecular mechanics, semi-imperical methods and “ab initio” methods. Application of computational methods to thermodynamics, kinetics, spectra, electrochemistry, molecular properties. Lecture three hours.

Note: CHEM 245 students will complete an additional research project beyond that expected of students in CHEM 145. Cross-listed: CHEM 245.

CHEM 160A. Structure and Function of Biological Molecules. 3 Units
Prerequisite(s): CHEM 124; MATH 26A or MATH 30 is recommended. Fall only.
Term Typically Offered: Fall only

The chemistry and biochemistry of amino acids, proteins, nucleic acids, lipids and carbohydrates. Also includes enzyme kinetics, the structure and function of biological membranes and discussion of some common laboratory methods. Lecture three hours.

CHEM 160B. Metabolism and Regulation of Biological Systems. 3 Units
Prerequisite(s): CHEM 160A or equivalent course; one year of organic chemistry. Spring only.
Term Typically Offered: Spring only

The bioenergetics and regulation of anaerobic and aerobic metabolic pathways. Major topics include glycolysis, Kreb's cycle, fatty acid and amino acid oxidation, lipid biosynthesis and photosynthesis. Particular emphasis is given to pathway regulation and integration. Lecture three hours.

CHEM 161. General Biochemistry. 3 Units
Prerequisite(s): CHEM 20 or CHEM 124; one year of biological science is recommended.
Term Typically Offered: Fall, Spring, Summer

Introduction to the structure and function of biological molecules (carbohydrates, lipids, proteins, nucleic acids, enzymes and hormones), enzyme kinetics, the structure and function of membranes, and the bioenergetics and regulation of major anaerobic and aerobic metabolic pathways.

CHEM 162. General Biochemistry Laboratory. 3 Units
Prerequisite(s): CHEM 31; CHEM 160A or CHEM 161 (either CHEM 160A or CHEM 161 may be taken concurrently); ENGL 20 or an equivalent second semester composition course.
Term Typically Offered: Fall, Spring

Introduction to fundamental laboratory techniques for the purification and analysis of biological molecules, including chromatographic separation of amino acids and proteins, electrophoretic separation of proteins and nucleic acids, enzyme kinetics, and basic bioinformatics. Discussion one hour, laboratory six hours.

CHEM 164. Advanced Biochemistry Laboratory. 3 Units
Prerequisite(s): CHEM 162 or equivalent; ENGL 20 or an equivalent second semester composition course.
Term Typically Offered: Fall, Spring

Capstone course which emphasizes biochemical laboratory experimental design and trouble-shooting skills. Common biochemistry laboratory techniques are applied in semester-long individual student projects. Discussion one hour, laboratory six hours.

CHEM 189A. Undergraduate Research. 1 - 3 Units
Prerequisite(s): ENGL 20 or equivalent
Term Typically Offered: Fall, Spring

Directed undergraduate research involving a project that requires use of chemical literature and experimental design. A comprehensive written report and/or scientific poster must be submitted to receive a final grade.

Note: Only three units of CHEM 189A-C may be applied toward the major requirement in chemistry for the BA or BS degrees.
CHEM 189B. Intermediate Undergraduate Research. 1 - 3 Units
Prerequisite(s): ENGL 20 or equivalent and CHEM 189A
Term Typically Offered: Fall, Spring

Continuing directed undergraduate research involving a project with emphasis on experimentation and data analysis. A comprehensive written report and/or scientific poster must be submitted to receive a final grade.
Note: Only three units of CHEM 189A-C may be applied toward the major requirement in chemistry for the BA or BS degrees.

CHEM 189C. Advanced Undergraduate Research. 1 - 3 Units
Prerequisite(s): ENGL 20 and CHEM 189B
Term Typically Offered: Fall, Spring

Culminating directed undergraduate research with emphasis on comprehensive data analysis and formulation of conclusions. A comprehensive written report and/or scientific poster must be submitted to receive a final grade.
Note: Only three units of CHEM 189A-C may be applied toward the major requirement in chemistry for the BA or BS degrees.

CHEM 189D. Culminating Advanced Undergraduate Research. 1 - 3 Units
Prerequisite(s): ENGL 20 and CHEM 189C
Term Typically Offered: Fall, Spring

Extension of culminating undergraduate research with emphasis on finalizing data analysis and writing experimental methods for potential publication. A comprehensive written report (if a scientific poster was completed in 189C) and/or scientific poster (if a written report was completed in 189C) must be submitted to receive a final grade.

CHEM 194. Chemistry-Related Work Experience. 6 - 12 Units
Prerequisite(s): Open only to upper division students and consent of Department Chair. Units may not be applied toward a major in Chemistry or Biochemistry.
Term Typically Offered: Fall, Spring

Supervised employment in a Chemistry related company or agency. Placement is arranged through the Department and the Cooperative Education Program office. Requires completion of a 3-6 month work assignment and a written report.
Credit/No Credit

CHEM 198. Senior Research. 3 Units
Prerequisite(s): One upper division chemistry laboratory class, ENGL 20 or an equivalent second semester composition course and instructor and department chair permission.
Term Typically Offered: Fall, Spring

The student will conduct an independent study of a chemical research topic that is based on experimental techniques or advanced computer modeling. Significant use of chemical literature and information retrieval is required. A well-written, comprehensive, and well-documented final report must be submitted to receive a final grade. A weekly seminar is required. Seminar one hour, laboratory activities are a minimum of six hours per week.

CHEM 200. Research Methods in Chemistry. 3 Units
Prerequisite(s): Must be a Chemistry graduate student or have instructor permission
Term Typically Offered: Fall, Spring

This course is designed to improve the ability of graduate students to research and interpret the chemical literature. Students work through a series of exercises in preparation for a major writing project such as a thesis proposal or a thesis chapter/section. Exercises include analysis of primary research articles, peer review of student writing samples, and presentation of scientific information. These activities will improve students' understanding of how scientific questions are developed and posed through proposals and dissemination of research results.

CHEM 220. Spectrometric Identification of Compounds. 3 Units
Term Typically Offered: Fall, Spring

Interpretation of ultraviolet, infrared, nuclear magnetic resonance, and the mass spectra for the elucidation of chemical structures, with emphasis on problem solving.

CHEM 230. Separation Methods in Chemistry. 3 Units
Term Typically Offered: Fall, Spring

Theoretical and practical aspects of separation sciences. Methods of separations that are included are liquid-liquid extraction and ion exchange, gas, and liquid chromatography. Lecture three hours.

CHEM 245. Applications of Computational Chemistry. 3 Units
Prerequisite(s): CHEM 140A and CHEM 140B or CHEM 142, or instructor permission.
Term Typically Offered: Fall, Spring

Brief introduction/background in computational theory, with emphasis on chemical/biochemical applications. Demonstration/instruction of widely used modeling/instruction of software. Covering techniques including molecular mechanics, semi-empirical methods and "ab initio" methods. Application of computational methods to thermodynamics, kinetics, spectra, electrochemistry, molecular properties. Lecture three hours.

CHEM 250. Selected Topics in Chemistry. 3 Units
Prerequisite(s): Enrollment in MS Chemistry graduate program or instructor permission.
Term Typically Offered: Fall, Spring

Intensive coverage of one or more advanced topics in chemistry. A variety of learning/teaching methodologies may be employed including lecture, team projects, computer modeling, oral presentations and poster projects. May be team-taught.
Note: May be team-taught. May be repeated once for credit if topics are different.

CHEM 251. Topics in Interdisciplinary Chemistry. 3 Units
Prerequisite(s): enrollment in Chemistry master's degree program or permission of instructor.
Term Typically Offered: Fall, Spring

Lecture course focusing on interdisciplinary topics in chemistry and related fields. Course activities may include literature review, individual and/or group oral presentations, independent research project. May be team-taught.
CHEM 252. Topics in Synthetic Chemistry. 3 Units
Prerequisite(s): enrollment in Chemistry master's degree program or permission of instructor.
Term Typically Offered: Fall, Spring
Lecture course focusing on synthetic chemistry. Focus may be on biochemical, inorganic, or organic synthetic chemistry. Course activities may include literature review, individual and/or group oral presentations, independent research project. May be team-taught.

CHEM 253. Topics in Applied Chemistry. 3 Units
Prerequisite(s): enrollment in Chemistry master's degree program or permission of instructor.
Term Typically Offered: Fall, Spring
Lecture course focusing on applications of chemistry to a variety of fields. Areas of focus may include biological, environmental, materials, and pharmaceutical applications. Course activities may include literature review, individual and/or group oral presentations, independent research project. May be team-taught.

CHEM 254. Topics in Physical Chemistry. 3 Units
Prerequisite(s): enrollment in Chemistry master's degree program or permission of instructor.
Term Typically Offered: Fall, Spring
Lecture course focusing on topics in physical chemistry. Areas of focus may include content areas such as quantum mechanics, physical/organic or biophysical chemistry, an/or in-depth treatment of structure analysis and determination. Course activities may include literature review, individual and/or group oral presentations, independent research project. May be team-taught.

CHEM 255. Topics in Chemistry Education. 3 Units
Prerequisite(s): enrollment in Chemistry master's degree program or permission of instructor.
Term Typically Offered: Fall, Spring
Intensive coverage of one or more advanced topics in chemistry. A variety of learning/teaching methodologies may be employed, including lecture, team projects, computer modeling, oral presentations and poster projects. May be team-taught.

CHEM 260. Protein Biochemistry. 3 Units
Prerequisite(s): One semester of biochemistry.
Term Typically Offered: Fall, Spring
Provides a comprehensive review of proteins, with emphasis on protein structure and structure/function relationships. Topics include methods for structure determination, stability and folding, catalysis and denovo protein design. Topical examples from the literature, particularly those related to disease states, are used to illustrate fundamental principles of protein structure and function.

CHEM 261. Nucleic Acid Chemistry. 3 Units
Prerequisite(s): Undergraduate course in biochemistry.
Term Typically Offered: Fall, Spring
The recent biochemical literature will be used to study the structural, chemical, and physical properties of nucleic acids. Chemical mechanisms of mutation, protein-nucleic acid interactions, and DNA-drug interactions will be used to illustrate these properties.

CHEM 294. Seminar In Chemistry. 0.5 Units
Term Typically Offered: Fall, Spring
Student presentations of topics from the chemical literature and their thesis research.
Note: Grade of C/NC will be based on attendance and successful presentation of a seminar. May be repeated for a total of 2 units
Credit/No Credit

CHEM 296. Experimental Offerings in Chemistry. 1 Unit
Prerequisite(s): Instructor approval.
Term Typically Offered: Fall, Spring
Presentation and discussion of graduate student and faculty research and current literature with emphasis on critical evaluation of research design, data analysis and presentation techniques. One hour discussion.
Note: May be taken up to four times for credit, but only one unit may be applied to the University's requirement for 200-level courses.
Credit/No Credit

CHEM 299. Special Problems. 1 - 6 Units
Term Typically Offered: Fall, Spring
Graduate research. Approval must be obtained from a departmental committee and the faculty member under whom the work is to be conducted. Written report must be submitted before a final grade is given.
Credit/No Credit

CHEM 500. Culminating Experience. 2 - 4 Units
Prerequisite(s): Advanced to candidacy and chair permission of his/her thesis committee.
Term Typically Offered: Fall, Spring
Completion of a thesis or project approved for the Master's degree. Should be taken in final semester prior to the completion of all requirements for the degree. Number of units of credit is determined by the candidate's master's degree advisory committee.

Child Development (CHDV)

CHDV 23. Assessment and Observation in Child Development. 3 Units
Prerequisite(s): CHDV 30, or CHDV 35, or equivalent
Purposes of and methodological issues involved in assessing and observing early child development and learning in educational and developmental settings. Topics include selection of appropriate observation methods, survey of standardized measures, ethics, and interpretation and implications of assessment data for teaching and learning. Focus will be on becoming objective and unbiased observers, use of both informal and formal assessment tools, and principles of observational assessment research. Students will be required to complete up to 10 hours of observation outside of class. APA style will be introduced to support the development of practical and scholarly communication and writing.

CHDV 30. Human Development. 3 Units
General Education Area/Graduation Requirement: Understanding Personal Development (E)
Term Typically Offered: Fall, Spring
Interdisciplinary study of human development with practical observations. Addresses physical, socio-cultural, intellectual and emotional aspects of growth and development from conception to death. A variety of field experiences will be required.
CHDV 31. Adult Supervision and Mentoring In Early Childhood Programs.  2 Units
**Prerequisite(s):** CHDV 30 or CHDV 35 or equivalent.
**Term Typically Offered:** Spring only

Study of research and exemplary practices in the supervision of early childhood teachers, other program staff, parents and volunteers. Content emphasizes adult learning.

CHDV 32. Administration and Supervision of Early Childhood Programs.  3 Units
**Prerequisite(s):** CHDV 30 or CHDV 35 or equivalent.
**Term Typically Offered:** Fall only

Basic issues, procedures and practices in the administration and supervision of public and private schools. Requires administrative supervisory fieldwork in an early childhood program.

CHDV 35. Child and Adolescent Development.  3 Units
**General Education Area/Graduation Requirement:** Understanding Personal Development (E)
**Term Typically Offered:** Fall, Spring

Examination of theory and research on cognitive, social and physical human development from conception through adolescence. Content will include data-collection techniques such as observation. Some course material will be applied to an analysis of elementary schooling.

CHDV 35F. Human Development and Elementary Field Experience.  2 Units
**Corequisite(s):** Completion of or enrollment in CHDV 35.
**Term Typically Offered:** Fall, Spring

Directed field experiences in elementary school settings. Students are required to work at an elementary school and attend an on-campus seminar. Includes the integration of student field experiences with theory and research in Human Development. Issues in learning, social development, adult career selection and schooling will be explored.

CHDV 44. Community Service Learning in Developmental and Educational Settings.  1 - 3 Units
**Term Typically Offered:** Fall, Spring

Designed to provide a range of service learning experiences where students apply their academic knowledge and skills in community-based settings. The community-based experiences will be combined with classroom activities designed to develop student understanding of topics related to their service activities such as tutoring reading and math, mentoring students from disadvantaged backgrounds, working with special populations of children.
**Note:** May be taken up to four times for credit (maximum 12 units of credit).

CHDV 123. Qualitative Methods in Human Development.  3 Units
**Prerequisite(s):** CHDV 30, or CHDV 35, or equivalent
**Term Typically Offered:** Fall, Spring

Introduction to qualitative research methods and their philosophical underpinnings. The focus will be on theoretical, methodological, and ethical issues in studying human learning and developmental processes from interpretive and social constructivist perspectives. Attention given to methodological strategies used to document and analyze learning and development in context. Strategies include participant-observation field notes, interviews, audio/video recordings, documents, and artifacts, with implications for theory, policy, and practice. APA style will be introduced to support the development of scholarly communication and writing.

**Note:** For CHDV majors, must be taken prior to completion of 90 units; completion of 45 total units credit.

CHDV 130. Parent Education.  3 Units
**Term Typically Offered:** Fall, Spring

Ways parent education may be conducted in Child Development programs to meet legislated requirements as well as parent needs. Attention will be given to parent education programs which serve children of different ages, diverse language and cultural backgrounds, and children with special needs. The rights and responsibilities of children, parents and teachers will be discussed. Discussion and participation in such classroom activities as panels, presentations, demonstrations and cooperative learning assignments.

CHDV 131. Language Development.  3 Units
**Prerequisite(s):** CHDV 133. CHDV 133 may be taken concurrently.
**Term Typically Offered:** Fall, Spring

Investigation of the development of language and its relationship to school learning, cognitive development and social development. Both linguistic and communication competence are included. Specific attention to second language acquisition and principles underlying effective instruction in linguistically diverse children.

**Note:** Topic areas will vary by semester, and the course may be repeated.

CHDV 132. Fieldwork in Child Development.  3 Units
**Prerequisite(s):** CHDV 123
**Term Typically Offered:** Fall, Spring

Directed field experiences in settings selected to meet students' experience and needs. Students are required to work at the selected setting and attend an on-campus seminar to explore developmental content and issues. Discussion will also focus on attention to professional development and ethics in community and educational settings working with children and families.

**Note:** May be taken as a core requirement and repeated as an elective.
CHDV 133. Quantitative Methods in Human Development. 3 Units
Prerequisite(s): CHDV 30, or CHDV 35, or equivalent
Term Typically Offered: Fall, Spring

Introduction to quantitative research methods in human development and their philosophical underpinnings. Major topics include the structures, design and conduct of research inquiry, and the generation of research questions and hypotheses, and collection of data. Emphasis will also be on engaging in quantitative research as well as increasing students’ ability to locate, understand, critique, and report research findings. Students will be challenged to think critically about methodological issues in quantitative research. AP A style will be introduced to support the development of scholarly communication and writing.

Note: For CHDV majors, must be taken prior to completion of 90 units; completion of 45 total units credit.

CHDV 134. Development of Young Children as Mathematical and Scientific Thinkers. 3 Units
Prerequisite(s): CHDV 30 or CHDV 35 or equivalent.
Term Typically Offered: Summer only

Theory, research, and practice in development of the child’s thinking about mathematical and scientific concepts. Topics will include: (a) early emergence of conceptual reasoning connected with mathematics and science, (b) symbolic development and language of mathematics and science, (c) developmental sequences in mathematical and scientific thinking, (d) California Preschool Learning Foundations; (e) age-appropriate and culturally-relevant experiences to promote mathematical and scientific reasoning. Activities include lecture, discussions, presentations, cooperative learning assignments, and integration of course content with early childhood classroom practice.

CHDV 135. Crosscultural Child Development. 3 Units
Prerequisite(s): CHDV 133. CHDV 133 may be taken concurrently.
Term Typically Offered: Fall, Spring

Examination of the physical, socio-emotional and cognitive development in children from a crosscultural orientation. Will investigate cultural variables that influence child development from both inter- and intranational perspectives. Discussion of culturally universal and culturally specific behaviors, cognitions and experiences will be covered.

CHDV 136. Developmental Experiences, Methods and Curriculum. 3 Units
Prerequisite(s): CHDV 123. CHDV 123 may be taken concurrently.
Term Typically Offered: Fall, Spring

Examination of theory, research, and exemplary practices and programs for children through elementary school. Activities include discussions, presentations, demonstrations and cooperative learning assignments.

CHDV 137. Cognitive Development. 3 Units
Prerequisite(s): CHDV 133.
Corequisite(s): CHDV 137L.
Term Typically Offered: Fall, Spring

Cognitive development of children from conception through adolescence with consideration of biological and environmental influences. Lectures, discussions and participation in such classroom activities as presentations, demonstrations and cooperative learning assignments.

Note: Student must co-enroll in the corresponding section of CHDV 137L.

CHDV 137L. Cognitive Development Research Laboratory. 1 Unit
Prerequisite(s): CHDV 133.
Corequisite(s): CHDV 137.
Term Typically Offered: Fall, Spring

Laboratory course to complement CHDV 137. Emphasis placed on the observation, interaction, documentation, and using a scientific approach to learn about cognitive development. Classroom, field, and research experiences supporting the study of cognitive development.

Note: Student must co-enroll in the corresponding section of CHDV 137.

CHDV 138. Social and Emotional Development. 3 Units
Prerequisite(s): CHDV 133.
Corequisite(s): CHDV 138L.
Term Typically Offered: Fall, Spring

Study of the social and emotional development of children from conception through adolescence with consideration of biological and environmental influences. Lectures, discussions and participation in such classroom activities as presentations, demonstrations and cooperative learning assignments.

Note: Student must co-enroll in the corresponding section of CHDV 138L.

CHDV 138L. Social and Emotional Development Laboratory. 1 Unit
Prerequisite(s): CHDV 133.
Corequisite(s): CHDV 138.
Term Typically Offered: Fall, Spring

Laboratory course to complement CHDV 138. Emphasis placed on the nature of observation, interaction, and using a scientific approach to learn about social and emotional development. Classroom and field experiences related to the study of social and emotional development.

Note: Student must co-enroll in the corresponding section of CHDV 138.

CHDV 139. Educational Play. Theory and Practice. 3 Units
Prerequisite(s): CHDV 30 or CHDV 35 or equivalent
Term Typically Offered: Summer only

Use of play as an educational vehicle in early childhood. Discovering how play helps children develop physically, socially, emotionally, cognitively and creatively through a variety of playful modes. Constructing appropriate developmental play materials and activities with emphasis on the active role of the adult in child’s play. Activities include discussions, presentations, demonstrations and cooperative learning assignments.

CHDV 140. Coordination of Early Childhood Programs. 3 Units
Prerequisite(s): CHDV 30 or CHDV 35 or equivalent
Term Typically Offered: Fall, Spring

Advanced methodology of coordinating early childhood programs, to include organization, staff development and community relations. Includes the functions of parents, aides, volunteers and varied early childhood organizational patterns.
CHDV 141. History of Childhood: International and Interdisciplinary Perspectives. 3 Units
General Education Area/Graduation Requirement: Humanities (Area C2)
Term Typically Offered: Fall, Spring
Examination of what it means to be a child in today’s world by comparing social constructions of childhood across the broad historical periods and in contrasting parts of the world. Exploration of cultural beliefs, values and practices of childhood in different historical, social, and economic contexts. Comparative approach provides a critical framework from which to analyze scholarly inquiry about how children develop in families, schools, and broader society. Course content will interest students from a broad array of majors.

CHDV 143. Mind and Brain in Developmental Context. 3 Units
Prerequisite(s): CHDV 30/CHDV 35, Introductory Biology, and GWAR certification before Fall 09; or WPJ score of 80+; or 3-unit placement in ENGL 109M or ENGL 109W; or 4-unit placement in ENGL 109M or ENGL 109W and co-enrollment in ENGL 109X; or WPJ score 70 or 71 and co-enrollment in ENGL 109X.
General Education Area/Graduation Requirement: Further Studies in Area B (B5), Writing Intensive Graduation Requirement (WI)
Term Typically Offered: Fall, Spring, Summer
Investigation of the biological processes underlying child development, from conception through adolescence. Emphasis will be on the genetic, neurological, and endocrine processes related to cognition, social, and emotional development. Students will explore the bidirectional nature of psychobiological processes, with specific emphasis on the psychobiological mechanisms underlying the transaction between cultural, educational, and social-emotional related to educational, and mental and physical health functioning.

CHDV 144. Community Service Learning in Developmental and Educational Settings. 1 - 3 Units
Prerequisite(s): Instructor permission.
Term Typically Offered: Fall, Spring
Designed to provide a range of service learning experiences where students apply their academic knowledge and skills in community-based settings. The community-based experiences will be combined with classroom activities designed to develop student understanding of topics related to their service activities such as tutoring reading and math, mentoring students from disadvantaged backgrounds, working with special populations of children.
Note: May be taken up to four times for credit (maximum 12 units of credit).
Credit/No Credit

CHDV 145. Controversial Issues in Childhood Development, Education, and Social Policy. 3 Units
General Education Area/Graduation Requirement: GE AREA D, Race & Ethnicity Graduation Requirement (RE)
Term Typically Offered: Fall, Spring
Discussion-based examination of controversial issues linking development, education, and cultural practice in which scholarly inquiry has substantial implications for social policy. Specific topics vary by semester and include topics of both historical relevance and contemporary debates. Content relevant to multiple disciplines including issues such as adolescent risk behavior, bilingual education, brain-based pedagogy, child care, children and the law, cultural diversity, developmental theory and educational practice, gender, literacy practices, motivation, parenting styles, school violence, special education, standardized testing, and technological change.

CHDV 150A. Early Literacy Development in First and Second Language. 2 Units
Prerequisite(s): CHDV 123 or CHDV 133. CHDV 123 or CHDV 133 may be taken concurrently.
Corequisite(s): CHDV 150B.
Term Typically Offered: Summer only
Students will become familiar with language and emergent literacy of young children from birth to eight. An overview of research-based developmental progression will be emphasized as it relates to the learning foundations for language and literacy. Other focal points will be home-school connections and cultural influences on literacy development. Assessment topics, including observation and other developmental strategies will be integrated. An emphasis on increasing students’ ability to connect theoretical understanding to the practice offered in CHDV 150B.

CHDV 150B. Early Literacy Development in First and Second Language Practicum. 1 Unit
Prerequisite(s): CHDV 123 or CHDV 133. CHDV 123 or CHDV 133 may be taken concurrently.
Corequisite(s): CHDV 150B.
Term Typically Offered: Summer only
The practicum experience (20 hours) will provide students with the application of course content material learned in CHDV 150A. Students will observe and validate multiple experiences in which first and second language learners learn language and literacy successfully. Factors affecting language and literacy development will be addressed.
Credit/No Credit

CHDV 153. Apprenticeship in Advanced Child Development. 3 Units
Prerequisite(s): Instructor permission
Term Typically Offered: Fall, Spring
Faculty mentors will meet with graduate and undergraduate apprentices individually or in small groups for guided discussions of assigned readings and/or research data analysis/collection endeavors.
Prerequisite: Instructor permission.
Note: Readings will depend on the specific mentor’s research or scholarly interest; May be repeated up to four times for 12 units of credit, with a limit of 6 units applied towards the CHDV major requirements.
CHDV 154. Issues in Parenting. 3 Units
Prerequisite(s): CHDV 30 or CHDV 35 or FACS 52.
Term Typically Offered: Fall, Spring, Summer
Survey of historical and contemporary attitudes toward parenting. Review of research on child-rearing and parent-child relationships. Use of case studies to explore the influence of personality, developmental stage, family structure, ethnic and cultural factors on parenting. Lecture, Case Study.
Cross-listed: FACS 154; only one may be counted for credit.

CHDV 157. Infant and Toddler Development and Care. 3 Units
Prerequisite(s): One of the following: CHDV 30 or CHDV 35, FACS 50, PSYC 148, or SWRK 125A.
Term Typically Offered: Fall, Spring
Research theory and practice are examined in relation to each area of infant and toddler development (conception through 24 months): Physical, social, emotional, cognitive, and perceptual. Individual differences and needs are stressed. Issues pertinent to individual and group care will be covered. Activities include lecture, discussion, and observations.
Cross Listed: FACS 157; only one may be counted for credit.

CHDV 194. Cooperative Education Experience. 3 Units
Prerequisite(s): Completion of 60 units total credit and instructor permission. May be taken four times for a maximum of 12 units credit.
Term Typically Offered: Fall, Spring
Cooperative Education (Co-op) relates academic theory to professional practice by providing paid work experience in the student's major field of study and academic credit. Students receive supervised employment in school districts, state and community agencies, companies and other appropriate settings. Requires regular meetings with faculty supervisor, completion of field study assignment, evaluation by field-based supervisor, and a written final report.
Credit/No Credit

CHDV 196A. Approaches to Research Methods in Child Development A. 3 Units
Prerequisite(s): CHDV 30 or CHDV 35 or equivalent; completion of 45 total units; Must be taken prior to completion of 90 units.
Term Typically Offered: Fall, Spring
This course examines methodological issues involved in assessment, observation, analysis, and design in the field of child development. Topics include the research process, APA style writing, ethics, design and methods, use assessment tools, qualitative and quantitative data analysis and interpretation. The focus will be on becoming critical consumers of research and developing the skills of scientific inquiry.
Note: First course in a series. 196B must be taken in the semester immediately following completion of CHDV 196A.

CHDV 196B. Approaches to Research Methods in Child Development B. 3 Units
Prerequisite(s): CHDV 196A.
Term Typically Offered: Fall, Spring
Two semester sequence of instruction that examines methodological issues involved in assessment, observation, research design, and analytical concepts involved in the field of child and adolescent development. Topics include the research process, APA style writing, ethics, design and methods, use assessment tools, qualitative and quantitative data analysis and interpretation. The focus will be on becoming critical consumers of research and developing the skills for scientific inquiry.
Note: Must be taken prior to 90 units.

CHDV 199. Special Problems. 1 - 3 Units
Term Typically Offered: Fall, Spring
Individual projects designed especially for students capable of independent study. Admission by written approval of the instructor and Department Chair.
Credit/No Credit

CHDV 210. Seminar in Social Development. 3 Units
Term Typically Offered: Fall, Spring
Advanced seminar focusing on theoretical and empirical readings covering topics in social/ emotional development. Potential topics may include social and emotional development of children from conception through adolescence with consideration of biological and environmental influences.

CHDV 211. Seminar in Cognitive Development. 3 Units
Prerequisite(s): Admission to MA program or instructor permission.
Term Typically Offered: Fall, Spring
Advanced developmental seminar focusing on theoretical and empirical readings covering topics in cognitive development. Specific topics will be related to cognitive development of children from conception through adolescence with consideration of biological and environmental influences.

CHDV 242. Theoretical Approaches to Child Development. 3 Units
Prerequisite(s): Graduate standing or instructor permission.
Term Typically Offered: Fall, Spring
An in-depth examination of physical, cognitive, and social development from infancy through adolescence. Content includes current developmental theory and research and the application of this research to educational and community settings, with special emphasis on the cultural context of development. The development of critical thinking skills and scholarly writing will be emphasized.
Note: Graduate Writing Intensive course
CHDV 244. Community Service Learning in Developmental and Educational Settings. 1 - 3 Units
Term Typically Offered: Fall, Spring

Designed to provide a range of service learning experiences where students apply their academic knowledge and skills in community-based settings. The community-based experiences will be combined with classroom activities designed to develop student understanding of topics related to their service activities such as tutoring reading and math, mentoring students from disadvantaged backgrounds, working with special populations of children.

Note: May be taken up to four times for credit (maximum 12 units of credit).

Credit/No Credit

CHDV 245. Selected Topics in Developmental Theory. 3 - 6 Units
Prerequisite(s): Admission to MA program or instructor permission.
Term Typically Offered: Fall, Spring

In-depth study of selected topics in cognitive and socio-emotional development of preschool and primary grade children as related to educational practice. Content includes theory and research on psychological dimensions of children as they participate in various contextual settings.

Note: May be repeated twice as long as topic differs. Three units may be used toward the elective requirements in the Master of Arts in Child Development.

CHDV 246. Motivation and Learning in Children. 3 Units
Prerequisite(s): Graduate standing, or instructor permission.
Term Typically Offered: Fall, Spring

Sources of and developmental changes in motivation, including biological predispositions, critical life events, individual differences, and social, cultural and educational experiences will be examined. Students will participate in a group research effort on motivation and educational practice.

CHDV 247. Theoretical and Applied Perspectives on Cross-cultural Development. 3 Units
Prerequisite(s): CHDV 242; graduate standing or instructor permission.
Term Typically Offered: Fall, Spring

The cultural basis of human development through an in-depth examination of the socio-emotional, cognitive, language and gender development of children from infancy through adolescence within and across different cultures and communities. Theory, methods, and research of cross-cultural investigations will be considered and applications of course material to educational and community settings will be explored and analyzed.

CHDV 248. Curriculum and Instruction. 3 Units
Prerequisite(s): Graduate standing or instructor permission.
Term Typically Offered: Fall, Spring

Advanced study of the sociocultural influences on curriculum development. Research, theory, and curricular practices will be analyzed, evaluated and applied to a variety of preschool and primary grade settings.

CHDV 249. Language Processes in Development. 3 Units
Prerequisite(s): Admission to MA program or instructor permission.
Term Typically Offered: Fall, Spring

Language is an important cognitive and communicative tool that promotes learning. Through an integrative approach to language and cognitive development, students will examine how children learn through language. Students will have practical experience in collecting and analyzing children's language learning in educational settings.

CHDV 250. Research Methods. 3 Units
Prerequisite(s): CHDV 133; admission to the MA program or instructor permission.
Term Typically Offered: Fall, Spring

Survey of both qualitative and quantitative methods in the development of reliable knowledge in the field of education. Includes identification and formulation of research problems, research designs and presentation of reports representative of different research strategies. Critical thinking and writing skills will be emphasized.

CHDV 253. Apprenticeship in Advanced Child Development. 3 Units
Prerequisite(s): Instructor permission.
Term Typically Offered: Fall, Spring

Faculty mentors will meet with graduate and undergraduate apprentices individually or in small groups for guided discussions of assigned readings and/or research data analysis/collection endeavors.

Note: Readings will depend on the specific mentor's research or scholarly interest; May be repeated up to 4 times for credit.

CHDV 290. Seminar for Culminating Experience. 3 Units
Prerequisite(s): Advancement to candidacy; completion of at least 20 units of course work towards the MA, instructor permission.
Term Typically Offered: Fall, Spring

Seminar to focus on topics/elements/expectations to be included in the culminating experience: defining and narrowing a topic for study; abstract writing; differentiation of primary/secondary source of evidence; development of organizational schemes for a literature review; database literature searches; APA format requirements; time management, range and breadth of evidence for a comprehensive review; connecting the review and project/thesis; writing style and quality; revisions and critical feedback; social/psychological dimensions of thesis/project process; data analysis and statistics help on campus for thesis.

Credit/No Credit

CHDV 292. Culminating Seminar for Exam Option. 3 Units
Prerequisite(s): Completion of all foundation course requirements for MA program (CHDV 200A, CHDV 200B, CHDV 242, CHDV 247, CHDV 250) advancement to candidacy, or instructor permission.
Term Typically Offered: Fall, Spring

Seminar to focus on topics/elements/expectations for the exam option culminating experience: test preparation and tips, exam writing, practice exam questions, time management, and community building with other students. Students will complete reading and writing assignments related to each exam area and prepare for an exam question related to an approved elective topic of their choice. Students will submit an exam petition to be reviewed and approved by the departmental exam committee.

Credit/No Credit
As a mode of thinking, inter-human relations, and aesthetic expressions.

Beginning Mandarin with emphasis on listening comprehension, speaking, grammar structure and character writing. The relationship between language and culture will also be emphasized. Includes an introduction to elements of Chinese culture that pertain to language, such as societal values and views of the world, will continue to be emphasized.

**CHDV 295. Practicum in Child Development.** 1 - 3 Units

**Prerequisite(s):** Graduate standing, or instructor permission.

**Term Typically Offered:** Fall, Spring

Direct field based experience in preschool, elementary or other community based settings serving children from infancy through adolescence and their families. Designed to provide students the opportunity to develop professional skills and understandings in applied settings or explore career development opportunities with particular emphasis on leadership or administrative skills and knowledge.

**Note:** Students are required to work at an instructor-approved field site consistent with their career goals and interests and attend an on campus seminar.

**CHDV 299. Special Problems.** 1 - 3 Units

**Prerequisite(s):** Open only to upper division and graduate students with consent of faculty advisor and Department Chair.

**Term Typically Offered:** Fall, Spring

Individual projects at graduate level designed especially for students capable of independent study. Departmental petition, signed by instructor with whom student will be working and department chair, required.

**Credit/No Credit**

**CHDV 504. Culminating Experience in Child Development: Thesis or Project.** 3 Units

**Prerequisite(s):** Admission to MA, Child Development program or instructor permission.

**Term Typically Offered:** Fall, Spring

Guidance toward completion of thesis or project option for the MA, Child Development program. Credit is given upon successful completion of a thesis, project, or other approved culminating experience. Open only to the graduate student who has been advanced to candidacy for the Master’s degree and has secured the permission of his/her faculty advisor and the Department Chair one full semester prior to registration.

**CHDV 505. Culminating Experience in Child Development: Exam Option.** 3 Units

**Prerequisite(s):** Admission to and completion of all course requirements for the MA, Child Development program, CHDV 292 or instructor permission.

**Term Typically Offered:** Fall, Spring

Guidance in ongoing preparation for the examination option for the MA, Child Development program. Credit is given upon successful completion of the examination option for the culminating experience. Open only to the graduate student who has completed all other course requirements, has been advanced to candidacy for the Master’s degree, and has secured the permission of the Department Chair one full semester prior to registration.

**Credit/No Credit**

**Chinese (CHIN)**

**CHIN 1A. Elementary Mandarin.** 5 Units

**Term Typically Offered:** Fall only

Beginning Mandarin with emphasis on listening comprehension, speaking, grammar structure and character writing. The relationship between language and culture will also be emphasized. Includes an introduction to elements of Chinese culture that pertain to language, such as mode of thinking, inter-human relations, and aesthetic expressions.

**CHIN 1B. Elementary Mandarin.** 5 Units

**Prerequisite(s):** CHIN 1A or instructor permission.

**General Education Area/Graduation Requirement:** Humanities (Area C2), Foreign Language Graduation Requirement

**Term Typically Offered:** Spring only

Continuation of CHIN 1A, with growing emphasis on reading, writing, and listening. Chinese cultural patterns as reflected in the language, such as societal values and views of the world, will continue to be emphasized.

**CHIN 2A. Intermediate Mandarin.** 4 Units

**Prerequisite(s):** CHIN 1B or instructor permission.

**General Education Area/Graduation Requirement:** Foreign Language Graduation Requirement

**Term Typically Offered:** Fall only

Intermediate Mandarin on the further development of reading, speaking, and writing skills. Emphasis will be placed on the shift from romanized script to Chinese characters. Introduction will also be made to simple prose reading. Meets the Foreign Language Graduation Proficiency Requirement.

**CHIN 2B. Intermediate Mandarin.** 4 Units

**Prerequisite(s):** CHIN 2A or instructor permission.

**General Education Area/Graduation Requirement:** Foreign Language Graduation Requirement

**Term Typically Offered:** Spring only

Continuation of CHIN 2A designed to further the development of reading, speaking and writing skills at the intermediate to intermediate-high level.

**CHIN 110. Advanced Mandarin: Modern Chinese Fiction.** 3 Units

**Prerequisite(s):** CHIN 2B or instructor permission.

**Term Typically Offered:** Fall, Spring

Taught exclusively in Mandarin as an introduction to Modern Chinese Fiction through a careful study of representative works from both the People’s Republic of China and Taiwan.

**CHIN 120. Chinese Civilization.** 3 Units

**General Education Area/Graduation Requirement:** Humanities (Area C2)

**Term Typically Offered:** Fall, Spring

Presentation of formative cultural achievements of China through language and literature with a view to understanding present-day popular Chinese culture. A general survey conducted in English for students who are taking Chinese language courses and others who want a deeper appreciation of this important non-Western culture.

**CHIN 130. Introduction to Classical and Literary Chinese.** 3 Units

**Prerequisite(s):** CHIN 2A or equivalent

The classical Chinese language, also known as literary Chinese, is the doorway into the fascinating world of Chinese culture. It has been the primary form of communication for at least three thousand years. Although Classical Chinese uses many of the same characters as modern Mandarin Chinese, the syntax and diction are quite different. In this course, we will study the language through readings in early philosophical, historical, and poetic texts.
CHIN 150. Survey of Chinese Literature. 3 Units
Prerequisite(s): GWAR Certification before Fall 09, or WPJ score of 70+, or at least a C- in ENGL 109M or ENGL 109W.
Term Typically Offered: Spring only

Introduction to Chinese literature from classical times to the present. The various forms of Chinese prose, poetry, and novel will be surveyed through the selective reading of representative works (in English translation). Class is conducted in English.

CHIN 195. Fieldwork-Tutoring. 1 - 3 Units
Prerequisite(s): Advanced level fluency and instructor permission.
Term Typically Offered: Fall, Spring

Tutoring of lower division students in Mandarin or Cantonese. 3 hours of tutoring per week for each unit. May be taken for credit more than once. Credit/No Credit

CHIN 199. Special Problems. 1 - 3 Units
Term Typically Offered: Fall, Spring

Individual projects or directed reading. Open only to students who appear competent to carry on independent study. Admission requires the approval of the instructor by whom the work is to be supervised. Credit/No Credit

Civil Engineering (CE)

CE 1A. Civil Engineering Seminar. 1 Unit
Term Typically Offered: Fall, Spring

Introduces students to civil engineering as a profession. Topics include the technical disciplines (environmental, geotechnical, structural, transportation, and water resources), the role of civil engineers in planning, constructing and operating infrastructure, and professional responsibilities such as licensure and ethics. Case studies are used to explore both technical and nontechnical aspects of civil engineering projects such as design and environmental constraints, constructability, and social and political issues.

CE 4. Engineering Graphics and CAD. 2 Units
Term Typically Offered: Fall, Spring

In-depth graphic analysis and solution of typical three dimensional space problems by applying the principles of orthogonal projection. Fundamentals of interactive computer aided design and drafting. Lecture one hour; laboratory three hours.

CE 9. Plane and Topographic Surveying. 3 Units
Prerequisite(s): MATH 30
Term Typically Offered: Fall, Spring

Instruments, methods and theories necessary for the measurement of distance, direction, angles and elevations. Application of data to traverse computations, estimation of earthwork volumes, transportation facility design and construction layout. Introduction to legal aspects of surveying, geodetic surveys, maps, boundary surveys and new technologies used in surveying. Lecture two hours; laboratory three hours.

CE 100. Engineering Geology. 2 Units
Prerequisite(s): ENGR 112; may be taken concurrently.
Term Typically Offered: Fall, Spring

Soil and rock mechanics and their relations to geological features influencing design, construction and maintenance of engineering projects. Lectures and field problems.

CE 101. Computer Applications in Civil Engineering. 3 Units
Prerequisite(s): ENGR 30 and CE 4 (CE 4 may be taken concurrently).
Term Typically Offered: Fall, Spring

Develops a computer-based concept for problem solving and graphical presentation of results with applications in five areas of civil engineering: environmental, geotechnical, structural, transportation and water resources. Uses word processing, spreadsheets, structure programming (Visual BASIC with spreadsheets), and special purpose software packages. Lecture two hours; laboratory three hours.

CE 113. Structural Laboratory. 1 Unit
Prerequisite(s): CE 101 and ENGR 112; WPJ score of 70+, or at least a "C-" in ENGL 109M or ENGL 109W.
Term Typically Offered: Fall, Spring

Introduction to the principles of structural analysis and design by testing of structural elements. Experimental verification of the assumptions of strength of materials. Introduction to laboratory techniques. Laboratory three hours.

CE 135. Hydraulics Laboratory. 1 Unit
Prerequisite(s): CE 101, CE 137 and CE 146; CE 137 and CE 146 may be taken concurrently.
Term Typically Offered: Fall, Spring

Laboratory experiments relating the principles of fluid mechanics to real fluid flow. Laboratory three hours.

CE 137. Water Resources Engineering. 3 Units
Prerequisite(s): CE 1A, CE 101, CE 146, ENGR 115, ENGR 132, and ENGR 140; CE 146 may be taken concurrently.
Term Typically Offered: Fall, Spring

Hydrologic and hydraulic fundamentals which are common to water resources projects; introduction to reservoirs, dams, pipelines, channels, hydraulic machinery, ground water, water rights, statistical analysis, engineering economy applications, and water resources planning.

CE 138. Hydrology. 3 Units
Prerequisite(s): CE 137.
Term Typically Offered: Fall only

Introduction to hydrologic engineering design. Precipitation analysis, hydrograph and flood routing applications for civil engineering. Groundwater hydrology including quality problems in development of subsurface water resources. Statistical applications in hydrology.

CE 139. Open Channel Hydraulics. 3 Units
Prerequisite(s): CE 137.
Term Typically Offered: Spring only

Civil engineering design problems in open channel flow. Model design, pressure problems, design application of hydraulic analysis in structures, transitions, culverts, weirs and spillways. Channel design including roughness for subcritical and supercritical flow. Analyzes and design problems in steady, uniform, gradually and rapidly varied flow.

<td>CE 169A</td>
<td>Timber Design</td>
<td>3</td>
<td>CE 161</td>
<td></td>
<td>Fall only</td>
<td>Wood as a structural material. Design of sawn and glulam beams, concentrically and eccentrically loaded columns, shear walls, flexible diaphragms and connections for vertical and lateral loading including effects of wind and seismic forces.</td>
</tr>
</tbody>
</table>
CE 169B. Reinforced Masonry Design. 3 Units
Prerequisite(s): CE 161.
Term Typically Offered: Fall, Spring

Reinforced masonry as a structural material. Design of reinforced masonry beams, concentrically and eccentrically loaded columns, walls for vertical and lateral loading including effects of wind and seismic forces. Design of a small building for wind and seismic loading including torsional effects.

CE 170. Principles of Environmental Engineering. 4 Units
Prerequisite(s): CHEM 1E or CHEM 1A, CE 1A, CE 101, CE 146, ENGR 115; CE 146 may be taken concurrently
Term Typically Offered: Fall, Spring

Introduction to the principles and practices of environmental quality management. Physical and chemical principles affecting environmental quality. Water and air quality parameters, their importance, and natural processes that affect them. Introduction to treatment processes and waste management. Environmental ethics. Lecture three hours. Laboratory three hours.

CE 171A. Soil Mechanics. 4 Units
Prerequisite(s): CE 1A, CE 100, CE 101, CE 146, and ENGR 112. CE 146 may be taken concurrently
Term Typically Offered: Fall, Spring

Composition and properties of soils; soil classification; soil compaction; soil-water interaction, including permeability and seepage analyses; soil stresses; soil compressibility, consolidation, and settlement analysis; soil shear strength. Lecture three hours; laboratory three hours.

CE 171B. Soil Mechanics and Foundation Engineering. 3 Units
Prerequisite(s): CE 171A.
Term Typically Offered: Spring only

Lateral earth pressures and principles of retaining wall design; slope stability analysis and principles of slope stabilization design; ultimate bearing capacity of soils, allowable bearing pressures and settlement of structures; principles of foundation design including shallow foundations and deep foundations.

CE 172. Design of Urban Water and Sewer Systems. 3 Units
Prerequisite(s): CE 137.
Term Typically Offered: Fall only

Hydraulic design of water distribution and sewerage systems. Computer-assisted pipe network analysis. Analysis of pump systems. Pump station design. Other selected topics.

CE 173. Design of Water Quality Control Processes. 3 Units
Prerequisite(s): CE 170, ENGR 132.
Term Typically Offered: Spring only

Analysis and design of selected physical, chemical, and biological facilities for water purification and wastewater treatment. Emphasis is on design based on loading factors and integration of unit processes into treatment systems.

CE 181. Geoenvironmental Engineering. 3 Units
Prerequisite(s): CE 170 and CE 171A; CE 170 may be taken concurrently
Term Typically Offered: Not offered

Equilibrium distribution of contaminants among air, water and solid phases of soil systems; analysis and modeling of soil vapor extraction (SVE), pump and treat, and soil washing systems; movement of gasses in landfills; infiltration through landfill cover; geosynthetic liner systems; hazardous waste containment systems.

CE 184. Geotechnical Earthquake Engineering. 3 Units
Prerequisite(s): CE 171A.
Term Typically Offered: Fall only

Introduction to seismology and seismic hazard analysis; determination of building code design loads; prediction of soil-site effects; evaluation of liquefaction triggering, cyclic softening and associated consequences; introduction to mitigation techniques for liquefaction and ground failure hazards.

CE 190. Senior Project. 3 Units
Prerequisite(s): To be taken in final semester or instructor permission.
Term Typically Offered: Fall, Spring

Culminating degree requirement. Completion of a conceptual design and evaluation of alternatives under realistic constraints for proposed infrastructure projects. Students work in teams with practicing professionals providing mentoring. Draws upon full educational experience to date. Lecture two hours. Laboratory three hours.

CE 194. Career Development in Civil Engineering. 1 Unit
Prerequisite(s): Instructor permission.
Term Typically Offered: Fall, Spring

Designed for Civil Engineering students making career decisions. Instruction will include effective career planning strategies and techniques including skill assessments, employment search strategy, goal setting, time management, interview techniques and resume writing. Lecture one hour.

Note: Units earned cannot be used to satisfy major requirements. Cross Listed: ENGR 194, EEE194
Credit/No Credit

CE 195. Fieldwork in Civil Engineering. 1 - 3 Units
Prerequisite(s): Petition approval by supervising faculty member and Department chair.
Term Typically Offered: Fall, Spring

Supervised work experience in civil engineering with public agencies or firms in the industry.

Note: May be repeated for credit.
Credit/No Credit

CE 195A. Professional Practice. 1 - 12 Units
Prerequisite(s): Instructor permission.
Term Typically Offered: Fall, Spring

Supervised employment in a professional engineering or computer science environment. Placement arranged through the College of Engineering and Computer Science.

Note: Requires satisfactory completion of the work assignment and a written report.
Credit/No Credit
CE 196M. Groundwater Engineering. 3 Units
Prerequisite(s): CE 137

CE 199. Special Problems. 1 - 3 Units
Term Typically Offered: Fall, Spring
Individual projects or directed reading.
Note: Open to students judged capable of carrying out individual work. Admission requires departmental approval and sponsorship of a supervising faculty member. Cannot be used as a technical elective in the major. Consult the CE Department for admission procedures and other requirements. May be repeated.

CE 199E. Independent Study Technical Elective. 3 Units
Prerequisite(s): GPA of 2.5 or greater in the upper division courses of the major; grade of “B” or better in the required major course associated with the proposed area of study (CE 137 or CE 146 or CE 147 or CE 161 or CE 170 or CE 171A).
Term Typically Offered: Fall, Spring
Individual project, research, or directed reading on an advanced topic.
Note: Open to only those students prepared and capable of carrying out independent work. Admission requires departmental approval and sponsorship of a supervising faculty member. Can be used as a technical elective in the major. Consult the CE Department for admission procedures and other requirements. May not be repeated for credit.

CE 231A. Computer Methods of Structural Analysis I. 3 Units
Prerequisite(s): CE 161.
Term Typically Offered: Fall only – even years
Flexibility and stiffness methods of structural analysis are applied to two- and three-dimensional framed structures. Use of computer software to perform analysis is discussed in detail. Techniques of computer modeling are discussed.

CE 231B. Computer Methods of Structural Analysis II. 3 Units
Prerequisite(s): CE 231A or instructor permission.
Term Typically Offered: Spring only – odd years
Continuation of CE 231A with extension of theory to allow for the analysis of a wider variety of structures. Structural analysis software is used for the analysis of three-dimensional structures. Fundamentals of the finite element method and computer modeling with applications to structural problems.

CE 232. Nonlinear Structural Analysis. 3 Units
Prerequisite(s): CE 231A or instructor permission.
Term Typically Offered: Spring only – odd years
Theory and applications of nonlinear structural analysis including geometric and material nonlinear effects. Stability issues and second-order analysis methods in the context of moment amplification effects, member buckling, and the behavior of structural elements and frames undergoing large deformations. Inelastic material behavior and stress resultant plasticity concepts within a line-type element framework. Computer implementation of geometric nonlinear behavior.

CE 234. Dynamics and Earthquake Response of Structures. 3 Units
Prerequisite(s): Knowledge of the stiffness method of structural analysis.
Term Typically Offered: Fall only – odd years
Response of structures modeled as single-degree systems to harmonic, periodic, and arbitrary excitation and earthquake ground motion; effects of damping and material nonlinearity; numerical methods including spreadsheets; response spectra. Response of structures modeled as multi-degree systems: modeling of structure mass, damping and elastic stiffness; solution by modal superposition; time-history and response spectrum analysis; implications for codes for earthquake-resistant design. Microcomputer software is extensively used.

CE 235. Advanced Steel Design. 3 Units
Prerequisite(s): CE 163
Term Typically Offered: Spring only – even years
Advanced design methodology of steel structures using Load and Resistance Factor Design (LRFD). System level behavior, especially from a seismic loading perspective, is integrated into the design of steel components and connections. Other topics include plate girder design, plastic design of indeterminate systems, design of moment frame systems, and design of braced-frame systems.

CE 250. Systems Analysis of Resources Development. 3 Units
Prerequisite(s): CE 250 or instructor permission.
Term Typically Offered: Spring only – even years
Investigation of resource planning using the “systems approach”. Objectives of resource development; basic economic and technologic concepts, and economic factors affecting system design. Consideration of evaluation, institutional constraints, and uncertainty in water resources systems. Familiarization with modern computer techniques. Applications of concepts to air and land resources.

CE 251. Water Resources Planning. 3 Units
Prerequisite(s): CE 250 or instructor permission.
Term Typically Offered: Fall only – odd years
Application of single and multi-objective planning to the design and operation of water resources projects. Objectives and constraints for water projects, criteria and procedures for evaluation, planning under uncertainty. Application in water development and water quality planning, with case studies.

CE 252A. Environmental Quality Processes I. 3 Units
Prerequisite(s): CE 170 or equivalent.
Term Typically Offered: Fall, Spring

CE 252B. Environmental Quality Processes II. 3 Units
Prerequisite(s): CE 170 or equivalent, CE 252A recommended, or instructor permission.
Term Typically Offered: Fall, Spring
CE 252C. Environmental Quality Processes III. 3 Units
Prerequisite(s): CE 170 or equivalent, CE 252A recommended, or instructor permission.
Term Typically Offered: Fall, Spring

Theory and practice of physical and chemical processes used in engineered water and wastewater systems. Adsorption, ion exchange, gas transfer, membrane processes, coagulation, flocculation, sedimentation, filtration, precipitation, disinfection, and stripping. Physical/chemical reactors.

CE 254. Water Quality Management. 3 Units
Prerequisite(s): CE 170 or equivalent, CE 252A recommended, or instructor permission.
Term Typically Offered: Fall, Spring

Examination of pollution sources and effects on water bodies, and the management issues and tools used to protect environmental quality. Topics include point and nonpoint pollution sources, interactions in the environment, Federal and State laws, water quality objectives, beneficial uses, and regulatory mechanisms such as basin plans and total maximum daily loads (TMDLs). Emphasis is on surface water.

CE 255. Transport of Chemicals in Soil Systems. 3 Units
Prerequisite(s): MATH 45. Graduate status.
Term Typically Offered: Fall

Study of the mechanics of movement of chemicals in soil, including equilibrium and partition models, development of mass transport equations in porous media, analytical solution for one-dimensional transport, lumped parameter transport model (linear reservoir model), transport of reactive and conservative chemicals numerical solutions of transport models, transport in the unsaturated zone and coupled models for saturated and unsaturated zone.

CE 256. Analysis and Control of Traffic Systems. 3 Units
Prerequisite(s): CE 147 or CE 148; CE 263 or instructor permission.
Term Typically Offered: Fall only – odd years

Traffic data collection and analysis, practical application of theoretical methods of analysis such as capacity, level of service, and queuing theory. Investigation of traffic control techniques such as actuated signals and signal systems, and study of management techniques for traffic congestion.

CE 265. Advanced Design in Reinforced Concrete. 3 Units
Prerequisite(s): CE 161, CE 163, CE 164.
Term Typically Offered: Spring only – even years

Advanced topics in behavior and design in reinforced concrete. Detailing for seismic response.

CE 267. Structural Systems for Buildings. 3 Units
Prerequisite(s): CE 232 or instructor permission.
Term Typically Offered: Spring only – even years

Behavior and design of short and medium-span prestressed concrete bridges using American Association of State Highway and Transportation Officials (AASHTO) Load Resistance Factor Design (LRFD) specifications. Topics include: bridge types, aesthetics; design process; superstructure load types and live load analysis; limit states and load combinations; prestressed concrete materials; flexural analysis and design; shear analysis and design; and introduction to substructure analysis and design, including seismic design criteria. A team project is required.

CE 268. Pre-stressed Concrete Bridge Design. 3 Units
Prerequisite(s): CE 164 or instructor approval.
Term Typically Offered: Fall only – even years

Behavior and design of short and medium-span prestressed concrete bridges using American Association of State Highway and Transportation Officials (AASHTO) Load Resistance Factor Design (LRFD) specifications. Topics include: bridge types, aesthetics; design process; superstructure load types and live load analysis; limit states and load combinations; prestressed concrete materials; flexural analysis and design; shear analysis and design; and introduction to substructure analysis and design, including seismic design criteria. A team project is required.

CE 271. Modern Hydrologic Techniques. 3 Units
Prerequisite(s): CE 137 or CE 138 and ENGR 203 or instructor permission.
Term Typically Offered: Spring only – even years

Analyzes of hydrologic and meteorologic phenomena by mathematical, statistical, and system methods, linear and non linear, stochastic and parametric hydrology, computer applications in hydrology.

CE 272. Advanced Engineering Hydraulics. 3 Units
Prerequisite(s): CE 137 or equivalent.
Term Typically Offered: Spring only – even years

Steady uniform and non-uniform open channel flows including gradually, rapid and spatially varied flows; analysis of supercritical flow in transition; basic principles of unsteady flows; long wave theory; Saint-Venant Equations and their solutions including method of characteristics, explicit and implicit finite difference numerical methods.

CE 273. Hydrologic Modeling. 3 Units
Prerequisite(s): CE 272 or equivalent; instructor permission.
Term Typically Offered: Spring only – odd years

Theories and structure of hydraulic model components; application of HEC-RAS (River Analysis System) and HEC-HMS (Hydrologic Modeling System) computer programs; emphasis on flood routing methods; dam safety analysis methodology including dam break and dam overtopping cases; application of microcomputers in hydraulics computations.
CE 276. Groundwater Hydrology. 3 Units
Prerequisite(s): CE 137 or instructor permission.
Term Typically Offered: Fall only – even years
Occurrence and movement of groundwater; physical characteristics of aquifers; analysis of steady-state groundwater flow problems by mathematical, digital computer, electrical analog and graphical methods; analysis of unsteady-state problems in confined and unconfined, aquifers; multiple well systems.

CE 280A. Advanced Soil Mechanics and Foundation Engineering I. 3 Units
Prerequisite(s): CE 171A or equivalent.
Term Typically Offered: Fall only – even years
Advanced analyses in soil mechanics and their practical applications in foundation engineering; compressibility of soils, settlement analysis, and tolerable settlement; lateral earth pressures and design of earth retaining structures; bearing capacity of shallow foundations; in-situ soil testing for foundation design; design of deep foundations, including driven piles, drilled shaft foundations, and laterally loaded piles.

CE 280B. Advanced Soil Mechanics and Foundation Engineering II. 3 Units
Prerequisite(s): CE 171A or equivalent.
Term Typically Offered: Fall only – odd years
Advanced analyses in shear strength of cohesionless and cohesive soils, including stress-strain characteristics of soils, total and effective stress analyses; slope stability analyses for natural slopes, fill slopes, earth dams, levees, and methods of slope stabilization; analysis and design of anchored bulkheads, cellular cofferdams, soil nail walls, tieback walls, mechanically stabilized earth walls, and segmental retaining walls.

CE 280C. Geotechnical Modeling. 3 Units
Prerequisite(s): CE 171A
Term Typically Offered: Fall only – even years
Advanced analysis principles and procedures for calculating monotonic and cyclic soil element response effective stress and pore water pressure distributions, dynamic site response, and soil deformations; application to analysis of complex geotechnical engineering systems such as levees, dams, and wharfs. Laboratory time devoted to numerical analysis software and physical element and small scale tests. Lecture two hours, Laboratory three hours.

CE 283. Ground Modification Engineering. 3 Units
Prerequisite(s): CE 171A or equivalent.
Term Typically Offered: Fall, Spring
Principles of soil stabilization and earth reinforcement; mechanical compaction and treatment of difficult soils, including expansive soils, collapsible soils, oversize materials, and compressible fill; prefabricated vertical drains and preloading; dynamic deep compaction; vibro compaction; vibro-replacement; rammed aggregate pier; compaction grouting; jet grouting; slurry grouting; chemical grouting; deep soil mixing; slurry trench walls.

CE 284. Soil Dynamics and Earthquake Engineering. 3 Units
Prerequisite(s): CE 171A or equivalent.
Term Typically Offered: Spring only – odd years
Introduction to vibration theory; wave propagation in soils and dynamic behavior of soils and foundations; dynamic tests; analysis of dynamically loaded foundations; causes of earthquakes; earthquake magnitude and zones; ground motions induced by earthquakes; earthquake-resistant design of foundations and earth dams.

CE 285. Geosynthetics I. 3 Units
Prerequisite(s): CE 171A or instructor permission.
Term Typically Offered: Fall only – even years
Overview of geotextiles, geogrids and geonets; geosynthetic properties and test methods; geosynthetic functions and mechanisms as in separation, roadway and soil reinforcement, filtration, and drainage; applications and design methods; construction, fabrication and installation.

CE 286. Geosynthetics II. 3 Units
Prerequisite(s): CE 171A or instructor permission.
Term Typically Offered: Fall, Spring
Overview of geomembranes, geosynthetic clay liners, and geocomposites. Topics include: geosynthetic properties and test methods; geosynthetic functions and mechanisms as in landfill liners, liquid barriers and carriers, erosion control, drainage, and design and construction methods.

CE 289. Project Management for Civil Engineers. 3 Units
Prerequisite(s): Graduate standing or instructor permission.
Term Typically Offered: Spring only
Theory and practice of project management in civil engineering. Interrelationship of planning, design, and construction. New technologies and techniques used in both US and international architectural/engineering/construction (A/E/C) markets. Topics: Project initiation, early estimates, project budgeting, work plans, design proposals, scheduling, tracking, design coordination, construction, project close-out, team and personal management skills, and quality control.

CE 290. Stormwater Management. 3 Units
Prerequisite(s): CE 137 and CE 170
Term Typically Offered: Fall, Spring

CE 296D. GIS Applications in Civil Engineering. 3 Units
Prerequisite(s): ENGR 115, CE 9 and CE 137 or CE 147 or CE 171A.
Term Typically Offered: Fall, Spring
Introduction to fundamental concepts of geographic information systems (GIS), methods, and applications in civil engineering. Design and develop GIS-based analytical methods and solutions for civil engineering problems. Lab exercises are used to design and practice GIS applications in civil engineering. This course may be paired with CE 196H.
Communication Sciences and Disorders (CSAD)

CSAD 21. First Year Seminar: Becoming an Educated Person. General Education Area/Graduation Requirement: Understanding Personal Development (E) 3 Units
Term Typically Offered: Fall, Spring

Freshman seminar intended to provide students with an introduction to the nature and possible meanings of higher education and the functions and resources of the University. Designed to help students develop and exercise fundamental academic success strategies and to improve their basic learning skills. Also provide students with an opportunity to interact with fellow students and the seminar leader and to build a community of academic and personal support.

CSAD 111. Anatomy and Physiology of the Speech Mechanism. 3 Units
Prerequisite(s): CHDV 30, DEAF 51, PSYC 2, and STAT 1
Corequisite(s): CSAD 110
Term Typically Offered: Fall only

Anatomical, physiological and neurological bases of speech. Covers development, normal structure and function. A general course in human anatomy is recommended as background.

CSAD 112. Language Science and Development. 3 Units
Prerequisite(s): CHDV 30, DEAF 51, PSYC 2, and STAT 1
Corequisite(s): CSAD 110 and CSAD 111
Term Typically Offered: Fall only

Overview and comparison of normal and abnormal child language development from infancy through upper elementary school. Establishes a framework for understanding language disorders including autism and pervasive developmental delay. Includes theories of language acquisition, basic principles of language sampling, systems of language, elements of grammar, and preparation for informal and standardized assessment of language disorders. Introduces students to the impact of variables such as attention deficit disorder, poverty, bilingualism on developing language skills.

CSAD 120. Introduction to Language, Speech and Hearing Problems. 3 Units
Term Typically Offered: Fall, Spring

Review of normal speech and language development. Overview of language, speech, and hearing development and disorders including multicultural issues. Introduction to professional issues and ethics.

CSAD 123. Voice and Fluency. 3 Units
Prerequisite(s): CSAD 125, CSAD 126, PSYC 2, STAT 1, DEAF 51.
Term Typically Offered: Fall only

CSAD 125. Developmental and Acquired Neurogenic Language Disorders Across the Lifespan. 3 Units
Prerequisite(s): CSAD 112, CHDV 30, PSYC 2, STAT 1, and DEAF 51.
Term Typically Offered: Spring only

Language disorders and the dynamic, reciprocal relationships between the disability, the client, his/her family, and the environment. Developmental and acquired neurogenic language disorders from infancy through adulthood will be covered including neurophysiology and neuropsychology.

CSAD 126. Speech Sound Development and Disorders in Children: Aspects of Articulation and Phonology. 3 Units
Prerequisite(s): CSAD 110, CHDV 30, PSYC 2, STAT 1, and DEAF 51.
Term Typically Offered: Spring only

Introduction to audiology; anatomy and physiology of the hearing mechanism; pathologies of the ear; basic acoustics of sound and its relation to hearing and speech; school hearing screening; hearing conversation; audiometric interpretation and its relationship to speech language and learning disorders.

CSAD 133. Aural Rehabilitation. 3 Units
Prerequisite(s): CSAD 125, CSAD 126, CSAD 130, PSYC 2, STAT 1, CHDV 30, and DEAF 51.
Term Typically Offered: Spring only

According to Tye-Murray, aural rehabilitation is "intervention aimed at minimizing and alleviating the communication difficulties associated with hearing loss." This course examines communication assessment and remediation approaches for children and adults with both peripheral and central auditory problems.

CSAD 140. SLPA Methods. 3 Units
Prerequisite(s): CSAD 145 and instructor permission.
Corequisite(s): CSAD 140L.
Term Typically Offered: Fall, Spring

Taken by students as one of their senior level courses when they wish to pursue a Speech-Language Pathology Assistant (SLPA) licensure. Graduate students who have not had a similar course and wish to obtain this licensure will also need to enroll prior to pursuing the licensure.

CSAD 140L. SLPA Practicum, Ethical and Legal Parameters. 3 Units
Prerequisite(s): CSAD 145 and instructor permission.
Corequisite(s): CSAD 140.
Term Typically Offered: Fall, Spring

Taken by students as one of their senior level courses when they wish to pursue a Speech-Language Pathology Assistant (SLPA) licensure. Graduate students who have not had a similar course and wish to obtain this licensure will also need to enroll prior to pursuing the licensure.

CSAD 142. Topics in Autism Spectrum Disorders. 2 Units
Prerequisite(s): CSAD 112, CSAD 125, PSYC 2, STAT 1, CHDV 30, and DEAF 51.
Term Typically Offered: Fall only

Detailed look at characteristics of autism spectrum disorders (including Asperger’s Syndrome, PDD-NOS and Autism). Issues related to diagnosis/assessment, early intervention, school-based intervention, functional therapeutic techniques and theories, and current "hot topics" in Autism (Theory of Mind, joint attention, biomedical issues, dietary restrictions, sensory regulation and intervention paradigms) will be a part of this course.

CSAD 143. Communication Disorders in Multicultural Populations. 3 Units
Prerequisite(s): CHDV 30, DEAF 51, PSYC 2, STAT 1, CSAD 110, CSAD 125, and CSAD 126.
Term Typically Offered: Spring only

Identification, evaluation, and treatment of multicultural, multilingual clients with communication disorders. Discussion of normal second language acquisition, bilingual development, and cultural values related to effective service delivery for multicultural clients.

CSAD 145. Supervised Field Observations. 1 Unit
Prerequisite(s): CSAD 110, CSAD 111, CSAD 112, PSYC 2, STAT 1, CHDV 30, and DEAF 51.
Corequisite(s): CSAD 125, CSAD 126, and CSAD 130.
Term Typically Offered: Spring only

Directed observations of speech and hearing testing (screening and diagnostic); therapy and case staffing in schools, service clinics and hospitals.

CSAD 146. Introduction to Clinical Issues and Methods. 3 Units
Prerequisite(s): CHDV 30, DEAF 51, PSYC 2, STAT 1, CSAD 110, CSAD 111, CSAD 112, CSAD 125, CSAD 126, CSAD 130, and CSAD 145.
Term Typically Offered: Fall, Spring

Methods and materials used in clinical procedures are introduced. Work with graduate students and clients provides introduction to actual procedures and ethical practices. Introduction to ASHA Code of Ethics and legal issues in professional practice including federal and state laws and regulations, funding sources and scope of practice, survey of professional settings for speech and hearing services, including multidisciplinary settings. Prior to enrolling in CSAD 146, students must fulfill the catalogue requirements listed in the catalogue section "Undergraduate Clinical Assistantship.

CSAD 147. Assessment Procedures. 3 Units
Prerequisite(s): CSAD 125, CSAD 126, CSAD 145, PSYC 2, STAT 1, CHDV 30, and DEAF 51.
Term Typically Offered: Fall only

Current principles, methods and materials used by the speech-language pathologist to assess communication disorders are presented. Issues related to a model of assessment, informal and formal testing, dynamic assessment, interview techniques, administration, scoring and interpretation of test results, report writing and related issues will be discussed.

CSAD 148. Research in Speech - Language Pathology and Audiology. 3 Units
Prerequisite(s): CHDV 30, DEAF 51, PSYC 2, SAT 1, CSAD 110, CSAD 111, CSAD 112, CSAD 125, CSAD 126, CSAD 130, and CSAD 145.
Term Typically Offered: Spring only

Survey of research strategies and methods in Speech-Language Pathology and Audiology. Statistical procedures and single-subject designs. Emphasis on interpreting research reports in the literature and on developing research projects. Writing research proposals and reports.
CSAD 199. Special Problems. 1 - 3 Units
Term Typically Offered: Fall, Spring

Individual projects or directed reading. Open only to students competent
to carry on individual work.
Note: Departmental petition required.
Credit/No Credit

CSAD 217. AAC and Assistive Technologies. 2 Units
Term Typically Offered: Spring only

Biological, acoustic, psychological, development, linguistic, and cultural
bases for motor speech disorders, focusing on augmentative and
alternative communication an assistive technologies as well as their
assessment and treatment techniques.

CSAD 218. Motor Speech Disorders. 3 Units
Prerequisite(s): Classified graduate status.
Term Typically Offered: Fall only

Background pertinent to understanding neurophysiology associated
with congenital and acquired dysarthria and dyspraxia. Descriptions and
classifications of disorders and their causes, methods of assessment and
treatment.

CSAD 219. Counseling Techniques for Speech Pathologists and
Audiologists. 3 Units
Term Typically Offered: Fall only

Development of strategies for counseling and interviewing clients with
communication disorders and their families. Development of specific
skills such as effective listening, dealing constructively with emotions,
working with families, and leading support groups. Students will learn
to deal effectively with the affective side of communication disorders to
help clients benefit maximally from assessment and treatment.

CSAD 221. Neurogenic Language Disorders. 4 Units
Term Typically Offered: Spring only

In-depth study of language and cognitive disorders in adult, secondary
to cerebrovascular accident, dementia, and/or traumatic brain injury.
Assessment and intervention strategies are covered with particular
emphasis on functional outcomes.

CSAD 222. Curriculum in Relation to Language -- Learning Disabilities
in School-age Children. 3 Units
Prerequisite(s): Instructor permission.
Term Typically Offered: Spring only

Language acquisition as a continuum from oral language to reading
and writing, the role of the speech-language specialist in working with
reading disabilities; the interactions among speech-language intervention
and curricula areas including mathematics, spelling, handwriting, social
studies and language arts; and various service delivery models, including
collaborative consultation and learning centers.

CSAD 223. Advanced Seminar in Child Language Disorders. 3 Units
Prerequisite(s): CSAD 125 or equivalent
Term Typically Offered: Fall only

In-depth study of childhood language disorders emphasizing the use of
critical thinking to integrate evidence-based practice into discussion of
current assessment and intervention practices for children with primary
and secondary language impairment Specific topics include language
sampling, early intervention, connecting intervention with Common
Core State Standards, and team-based service delivery. Populations
addressed include bilingual learners, those with working memory deficits,
and autism spectrum disorder. The impact of the digital era and screen
exposure on children with language impairment is discussed.

CSAD 227. Dysphagia and the Medical Setting. 3 Units
Prerequisite(s): CSAD 218, CSAD 221, instructor permission.
Term Typically Offered: Fall, Spring

Swallowing problems from infancy through old age; growth patterns
and failures in younger populations; feeding and swallowing problems
related to normal aging processes and those associated with neurogenic
disorders. Assessment and treatment. Includes theoretical and
experiential components. Overview of the role of Speech-Language
Pathologist in the hospital setting including learning how to read medical
charts, basic insurance information, understanding other disciplines and
how they affect the job and career of an SLP in the hospital, and medical
terms/abbreviations.

CSAD 228A. Methods: Speech Disorders I. 2 Units
Prerequisite(s): CSAD 125, CSAD 126, CSAD 143, CSAD 145, CSAD 146,
CSAD 148 or equivalents; instructor permission.
Corequisite(s): CSAD 229A.
Term Typically Offered: Fall, Spring

Diagnosis and treatment as applied to the current caseload, including
articulation and phonological disorders and characteristics associated
with English as a second language (ESL) populations. Methods for
both children and adults. Staffings, case studies and presentations;
demonstrations and class discussions.

CSAD 228B. Methods: Speech Disorders II. 1 Unit
Prerequisite(s): CSAD 123, CSAD 127 or equivalents; CSAD 228A,
instructor permission.
Corequisite(s): CSAD 229B.
Term Typically Offered: Fall, Spring

Techniques and materials for assessing and treating speech disorders
emphasizing fluency and voice. Staffings and discussion of cases in the
current caseload.
Note: May be repeated.

CSAD 228C. Methods: Speech Disorders III. 1 Unit
Prerequisite(s): CSAD 218, CSAD 228B; CSAD 221 may be concurrent;
instructor permission.
Corequisite(s): CSAD 229C.
Term Typically Offered: Fall, Spring

Techniques and materials for assessing and treating clients with
disordered speech secondary to developmental disabilities and
syndromes, degenerative diseases or complex problems associated with
English as a second language (ESL). Discussions of cases in the current
caseload.
Note: May be repeated.
CSAD 229A. Practice: Speech Disorders I. 2 Units
Prerequisite(s): Instructor permission
Corequisite(s): CSAD 228A
Term Typically Offered: Fall, Spring

Supervised clinical practice emphasizing articulation and phonological disorders, and phonological difficulties associated with English as a second language (ESL). Clients may include both children and adults.

CSAD 229B. Practice: Speech Disorders II. 2 Units
Prerequisite(s): Instructor permission.
Corequisite(s): CSAD 228B.
Term Typically Offered: Fall, Spring

Supervised clinical practice emphasizing clients whose speech is disrupted by abnormal rhythm and rate (e.g. stuttering and cluttering) or abnormal vocal pitch, loudness, and/or quality.

CSAD 229C. Practice: Speech Disorders III. 2 Units
Prerequisite(s): Instructor permission
Corequisite(s): CSAD 228C
Term Typically Offered: Fall, Spring

Supervised clinical practice emphasizing children and adults whose speech is disrupted secondary to developmental disorders and syndromes, degenerative disorders or complex problems.

CSAD 241S. Practice: Hearing Screenings. 1 Unit
Prerequisite(s): CSAD 130
Corequisite(s): CSAD 228C
Term Typically Offered: Fall, Spring

Supervised clinical practice in the administration of hearing screening tests. The student must furnish his/her own transportation. Fifteen to twenty hours for one unit.

Credit/No Credit

CSAD 242A. Methods: Language Disorders I & Professional Writing-Field of Speech-Language Pathology & Audiology. 2 Units
Prerequisite(s): Admission to Graduate Program
Corequisite(s): CSAD 243A
Term Typically Offered: Fall, Spring

Methods, materials and procedures in language disorders with emphasis on working with children and adults with peripheral hearing loss or central auditory processing disorders (CAPD). Includes staffing and discussion of cases in the current caseload. Focus on professional writing in the field of Speech-Language Pathology through the development of treatment plan proposals, critical responses, and clinic reports.

CSAD 242B. Methods: Language Disorders II. 1 Unit
Prerequisite(s): CSAD 223, CSAD 242A; instructor permission.
Corequisite(s): CSAD 243B.
Term Typically Offered: Fall, Spring

Techniques and materials for assessing and treating children with disordered language secondary to a myriad of contributing factors including delayed development, neurological problems and various genetic conditions. Discussion of cases in the current caseload.

Note: May be repeated.

CSAD 242C. Methods: Language Disorders III. 1 Unit
Prerequisite(s): CSAD 218, CSAD 242B; CSAD 221 may be taken concurrently; instructor permission.
Corequisite(s): CSAD 243C.
Term Typically Offered: Fall, Spring

Techniques and materials for assessing and treating speech and language disorders emphasizing disorders secondary to cerebral vascular accidents, traumatic brain injury, or other neurological disorders. Discussion of cases in the current caseload.

Note: May be repeated.

CSAD 243A. Practice: Language Disorders I. 2 Units
Prerequisite(s): Instructor permission
Corequisite(s): CSAD 242A
Term Typically Offered: Fall, Spring

Supervised clinical practice in language disorders emphasizing children and adults with peripheral hearing loss or central auditory processing disorders (CAPD).

CSAD 243B. Practice: Language Disorders II. 2 Units
Prerequisite(s): Instructor permission
Corequisite(s): CSAD 242B
Term Typically Offered: Fall, Spring

Supervised clinical practice with children demonstrating language disorders secondary to a myriad of contributing factors including delayed development, neurological problems, and various genetic conditions.

CSAD 243C. Practice: Language Disorders III. 2 Units
Prerequisite(s): CSAD 243B; instructor permission
Corequisite(s): CSAD 242C
Term Typically Offered: Fall, Spring

Supervised clinical practice with adult clients whose speech and language are disordered secondary to neurogenically related problems such as cerebrovascular accident, traumatic brain injury, or other neurological disorders.

CSAD 244. Methods: Speech -- Language Assessment. 1 Unit
Prerequisite(s): CSAD 147 or equivalent; CSAD 228B, CSAD 242B; instructor permission.
Corequisite(s): CSAD 245.
Term Typically Offered: Fall, Spring

Methods and materials for initial assessment in Speech-Language Pathology.

CSAD 245. Practice: Speech -- Language Assessment. 1 Unit
Prerequisite(s): Instructor permission
Corequisite(s): CSAD 244
Term Typically Offered: Fall, Spring

Supervised clinical practice in assessment with a variety of communication disorders in children and adults. Experience with interdisciplinary teams.
CSAD 250. Speech/Language Internships Seminar. 2 Units
Prerequisite(s): CSAD 228A, CSAD 228B, CSAD 228C, CSAD 229A, CSAD 229B, CSAD 229C, CSAD 241S, CSAD 242A, CSAD 242B, CSAD 242C, CSAD 243A, CSAD 243B, CSAD 243C, CSAD 244, CSAD 245. Corequisite(s): CSAD 295I, or CSAD 295M, or CSAD 295P, or CSAD 295S. Term Typically Offered: Fall, Spring
Assessment, scheduling and conducting language and hearing programs in schools. Related issues including scope of practice, managed care, interagency cooperation and transdisciplinary approaches.

CSAD 295I. Internship: Speech-Language and Hearing Services in Schools (SLHS). 4 Units
Prerequisite(s): All previous semester's clinical practica and coursework must be completed, achievement of a passing score on the CBEST. Corequisite(s): CSAD 250. Graded: Credit/No Credit Units: 4 Term Typically Offered: Fall, Spring
Supervised clinical practice in the school setting. Students are expected to conform to the schedules of the placement(s) to which they are assigned. The student must furnish his/her own transportation. Credit/No Credit

CSAD 295M. Internship: Speech-Language Pathology in a Medical Setting. 4 Units
Prerequisite(s): All previous semester’s clinical practica and coursework must be completed, achievement of a passing score on the CBEST. Corequisite(s): CSAD 250. Graded: Credit/No Credit Units: 4 Term Typically Offered: Fall, Spring
Supervised clinical practice in a medical setting. Students are expected to conform to the schedules of the placement(s) to which they are assigned. The student must furnish his/her own transportation. Credit/No Credit

CSAD 295P. Internship: Speech-Language Pathology in Private Practice. 4 Units
Prerequisite(s): CSAD 250. All previous semester’s clinical practica and coursework must be completed, achievement of a passing score on the CBEST. Graded: Credit/No Credit. Units: 4 Term Typically Offered: Fall, Spring
Supervised clinical practice in a private practice setting. Students are expected to conform to the schedules of the placement(s) to which they are assigned. The student must furnish his/her own transportation. Credit/No Credit

CSAD 295S. Internship: Special Class Authorization Eligibility. 4 Units
Prerequisite(s): CSAD 250. All previous semester's clinical practica and coursework must be completed, achievement of a passing score on the CBEST. Graded: Credit/No Credit Units: 4 Term Typically Offered: Fall, Spring
Supervised clinical practice in a medical setting. Students are expected to conform to the schedules of the placement(s) to which they are assigned. The student must furnish his/her own transportation. Credit/No Credit

CSAD 299. Special Problems. 1 - 3 Units
Term Typically Offered: Fall, Spring
Individual projects or directed reading. Open only to students who appear competent to carry on individual work. Note: Departmental petition required. Credit/No Credit

CSAD 500C. Culminating Experience: Comprehensive Exam. 2 Units
Prerequisite(s): Advanced to Candidacy Graded: Credit/No Credit Units: 2.0 Term Typically Offered: Fall, Spring
Written exam comprised of eight questions. Examinees are given one and a half hours to complete each question.

CSAD 500P. Culminating Experience: Project. 2 Units
Prerequisite(s): Advanced to Candidacy. Graded: Credit/No Credit Units: 2.0 - 4.0 Term Typically Offered: Fall, Spring
Independent work conducted under the supervision of faculty members. A project is a significant undertaking appropriate to the professional fields of Speech-Language Pathology or Audiology. It must evidence originality, independent thinking, appropriate form and organization, and a rationale. It must be described and summarized in a written document that includes the project's significance, objectives, methodology, and a conclusion or recommendation. Students must follow all department and university project guidelines.

CSAD 500T. Culminating Experience: Thesis. 2 Units
Prerequisite(s): Advanced to Candidacy. Graded: Credit/No Credit. Term Typically Offered: Fall, Spring
Independent research study, conducted under the supervision of faculty members. Thesis must involve a research question or hypothesis, review of pertinent literature, collection and analysis of data. It is the student’s responsibility to locate and recruit subjects, to collect data, and to write the thesis. Students must follow all department and university project guidelines.

Communication Studies (COMS)

COMS 2. Argumentation. 3 Units
General Education Area/Graduation Requirement: Critical Thinking (A3) Term Typically Offered: Fall, Spring
Practice in argumentation, critical evaluation, evidence, and reasoning. Basic principles are applied in a variety of formal and informal advocacy situations. Concepts of argument structure and context are discussed and applied. Note: Majors must complete with a grade of "C-" or better.

COMS 4. Introduction to Public Speaking. 3 Units
General Education Area/Graduation Requirement: Oral Communication (A1) Term Typically Offered: Fall, Spring
Theory and technique of public speaking. Emphasis on organizing, supporting, and clearly stating ideas. Practice in informative and persuasive speaking.
COMS 4H. Honors Public Speaking. 3 Units
**Prerequisite(s):** Open only to Honors students.
**General Education Area/Graduation Requirement:** Oral Communication (A1)
**Term Typically Offered:** Fall, Spring

Provides both theoretical and practical training in the art of public discourse. Students learn both to recognize and to demonstrate the strategic processes of organizing and delivering speeches, especially within the context of global citizenship issues. Students are also introduced to the basic idea of forming reasonable challenges to speech in the public square.

COMS 5. The Communication Experience. 3 Units
**General Education Area/Graduation Requirement:** Oral Communication (A1)
**Term Typically Offered:** Fall, Spring

Basic skills and introductory concepts necessary for effective communication in a variety of settings. Special emphasis on practical experiences within groups, facilitation of interpersonal relationships, and methods of conflict resolution.
**Note:** Not recommended for COMS majors in General, Organizational or Public Relations concentrations.

COMS 8. Interpersonal Communication Skills. 3 Units
**Term Typically Offered:** Fall, Spring

Basic skills and introductory concepts for examining and altering interpersonal communication. In addition to lectures and discussions, students engage in structured interpersonal exercises and simulations to practice interpersonal communication skills such as listening, paraphrasing, describing feelings and intentions, and giving and receiving criticism.
**Note:** Majors must complete with a grade "C-" or better.

COMS 20A. Audio Production. 2 Units
**Corequisite(s):** COMS 20B.
**Term Typically Offered:** Fall, Spring

Introduction to the theory and practice of audio production in radio, television, film and recording applications. Cross listed: FILM 20A.

COMS 20B. Audio Production Laboratory. 1 Unit
**Corequisite(s):** COMS 20A.
**Term Typically Offered:** Fall, Spring

Experience in audio console operation, microphone selection and use, and audio recording in radio, television, film and recording applications. Cross listed: FILM 20B.

COMS 21. First Year Seminar: Becoming an Educated Person. 3 Units
**General Education Area/Graduation Requirement:** Understanding Personal Development (E)
**Term Typically Offered:** Fall, Spring

Introduction to the nature and possible meanings of higher education, and the functions and resources of the University. Helps students to develop and exercise fundamental academic success strategies and to improve their basic learning skills. Students interact with fellow students and the seminar leader to build a community of academic and personal support.

COMS 26. Introduction to Capturing and Editing Digital Media. 3 Units
**Term Typically Offered:** Fall, Spring

Developing skills in producing photographic, graphic and animated materials used for the World Wide Web and multimedia.

COMS 27A. Digital Film/Video Production. 2 Units
**Corequisite(s):** COMS 27B.
**Term Typically Offered:** Fall, Spring

Addresses the theory and practice of film/video production. Students will be expected to understand: camera operation, basic directing, lighting, and editing. Students will also be expected to learn the terminology of video production/post-production and use this terminology competently. Students enrolled in COMS 27A must be concurrently enrolled in COMS 27B. There are no exceptions to this requirement. Cross-listed: FILM 27A

COMS 27B. Digital Film/Video Production Laboratory. 1 Unit
**Corequisite(s):** COMS 27A.
**Term Typically Offered:** Fall, Spring

Provides practical, hands-on experience in video production. Students will be expected to become proficient in all production roles: camera operation, audio control, basic directing, lighting, and editing. Students enrolled in COMS 27B must be concurrently enrolled in COMS 27A. Cross listed: FILM 27B.

COMS 55. Media Communication and Society. 3 Units
**Term Typically Offered:** Fall, Spring

Introduction to the basic concepts of mass communication, including the effects, uses, and functions associated with the goods and services of mass media. Examination of the ways mass media combine with other institutions to affect the organization, design, and comprehension of messages, as well as political thought, cultural beliefs, and economic behavior.
**Note:** Majors must complete with a grade of "C-" or better. Cross Listed: JOUR 55; only one may be counted for credit.

COMS 100A. Survey of Communication Studies. 3 Units
**Term Typically Offered:** Fall, Spring, Summer

Survey of various theories of communication. Attention given to such topics as verbal and nonverbal coding, information processing, interpersonal and small group communication, organizational communication, the structure and effects of mediated communication, rhetorical criticism, and research in communication.
**Note:** Majors and minors must complete with a grade of "C-" or better.
COMS 100B. Critical Analysis of Messages. 3 Units
**Prerequisite(s):** COMS 2, and COMS 4, (COMS 5 is accepted for COMS 4 for MCOM majors) or transfer equivalents (COMS 100A may be taken concurrently), and (GWAR Certification before Fall 09, or WPJ score of 80+, or at least a C- in ENGL 109M or ENGL 109W).

**General Education Area/Graduation Requirement:** Writing Intensive

**Graduation Requirement (WI)**

**Term Typically Offered:** Fall, Spring, Summer

Classical and contemporary models for analyzing messages. Discussion of techniques applicable to a variety of basic message types. Practice in written analysis.

**Note:** Majors must complete with a grade of "C-" or better; Writing Intensive.

COMS 100C. Introduction to Scientific Methods in Communication Research. 3 Units

**Prerequisite(s):** COMS 100A; may be taken concurrently.

**Term Typically Offered:** Fall, Spring, Summer

Empirical methods commonly applied during communication research. An introduction to the concepts fundamental to the scientific study of communication, including conceptual and operational definitions, sampling, measurement, experimental design, independent and dependent variables, and quantitative data analysis.

**Note:** Majors must complete with a grade of "C-" or better.

COMS 101. Information Management and Privacy. 3 Units

**Term Typically Offered:** Fall, Spring

Students develop skills to use information proficiently in digital environments. In order to cope with information overload, students learn how to define and limit informational needs, how to access and evaluate information critically, and how to analyze and integrate information purposefully. The course teaches students evolving strategies and techniques for maintaining personal information spaces and security.

COMS 103. Presentational Speaking in the Organization. 3 Units

**Prerequisite(s):** A general education oral communication course.

**Term Typically Offered:** Fall, Spring, Summer

Contemporary communication techniques for use in business and industry. Principles and practice of oral reporting, persuasive speaking, conference participation, and interpersonal interaction.

**Note:** COMS majors are urged to take COMS 104 instead of COMS 103.

COMS 104. Persuasive Public Speaking. 3 Units

**Prerequisite(s):** COMS 2, COMS 4, or instructor permission.

**Term Typically Offered:** Fall, Spring

Advanced public speaking focusing upon persuasive strategies, principles and techniques.

COMS 105. Communication in Small Groups. 3 Units

**Term Typically Offered:** Fall, Spring, Summer

Theory and practice in small group communication. Topics include leadership, meeting management, evolution of group norms, phases of group development, communication networks, good communication techniques, conflict management, and problem solving in a variety of contexts.

COMS 106. Digital Media Creation - An Introduction. 3 Units

**Term Typically Offered:** Fall, Spring

Students learn multimedia authoring through the manipulation of digital media download legally from online repositories. Students learn how to digitally edit pixel-based images, vector images, audio, video and 3D models, while learning the principles that govern all digital media. The course uses Open Source and specialized software.

COMS 107. Children And Television. 3 Units

**Term Typically Offered:** Fall, Spring

Cognitive, affective, and behavioral effects of television on children. Explores in detail issues such as televised violence, stereotyping, advertising and cognitive development. Discusses relationship between television and education.

COMS 108. Family Communication. 3 Units

**Prerequisite(s):** COMS 8 or FACS 50 or SOC 166, or instructor permission.

**Term Typically Offered:** Fall, Spring

Family as a small group with emphasis on understanding and interpreting the dynamics of family communication and socio-psychological theories. Cross Listed: FACS 108; only one may be counted for credit.

COMS 110. Advanced Debate Workshop. 1 Unit

**Term Typically Offered:** Fall, Spring

Participation in intercollegiate debate competition. Credit/No Credit

COMS 111. Debate Research Practicum. 3 Units

**Term Typically Offered:** Fall only

Directed research in the current intercollegiate debate topic; identification of issues, compilation of evidence, and case building.

**Note:** May be taken four times for credit with instructor permission.

COMS 114. Communication and American Culture. 3 Units

**General Education Area/Graduation Requirement:** Understanding Personal Development (E)

**Term Typically Offered:** Fall, Spring, Summer

Critical analysis of the ways modern American media interact with the conduct of American life; emphasizes the role of commercialism and other aspects of contemporary American capitalism; examines the problem of personal development and relationships in the context of a commercially dominated media system.

COMS 115. Nonverbal Communication. 3 Units

**Term Typically Offered:** Fall, Spring

Nonverbal communication will focus on the nonverbal aspects of human communication. Students will learn the vocabulary of nonverbal communication (NVC) as we examine the nature of NVC, NVC Codes, and the effects of NVC on messages we receive and send. In addition, we will consider nonverbal behaviors in interpersonal relationships, intercultural communication and research in nonverbal.

COMS 116. Intercultural Communication. 3 Units

**Term Typically Offered:** Fall, Spring, Summer

Analysis of factors which influence communication between individuals of different cultures and cocultures. Discussion and practical application.
COMS 117. Multimedia Communication. 3 Units

Prerequisite(s): COMS 106

Term Typically Offered: Fall, Spring

Students create and integrate information and digital media with the purpose of informing or persuading an audience. By identifying communication needs, students learn to prepare multimedia presentation aids and standalone multimedia presentations for distribution in online environments. This course focuses topics in visual communication, storyboarding, presentation and delivery.

COMS 118. Survey of Public Relations. 3 Units

Prerequisite(s): At least one college writing course in ENGL or JOUR with a grade of "C-" or better.

Term Typically Offered: Fall, Spring, Summer

Introduces the student to publics, organization-environment relationships, structures, practices, processes from a communication theory and research perspective. Specifically, the student is introduced to the multi-phased approach to public relations, an approach that highlights the PR subprocesses of task identification, task analysis, and task performance.

COMS 119. Conflict Resolution Through Communication. 3 Units

Term Typically Offered: Fall, Spring

Ways to identify, clarify, and resolve conflicts in dyads, groups, and organizations. Conflict is contrasted with disagreement, aggression, incompatible values, etc. The costs and benefits of conflict are explored.

COMS 120. History of the Media. 3 Units

Prerequisite(s): COMS 55 or JOUR 55 or equivalent; may be taken concurrently.

Term Typically Offered: Fall, Spring

Examination of development of major mass communication media in the U.S. and of how the economics, content, regulation and audience use of the media have been affected by the way the media have evolved. Current issues and trends are discussed, as well as possible future development. Cross Listed: JOUR 120; only one may be counted for credit.

COMS 121. Media Aesthetics. 3 Units

Term Typically Offered: Fall, Spring

Overview and analysis of the primary aesthetic tools used to create messages in video and film. The basic properties of light, color, area, space, shape, sound, time and motion are defined and discussed as they relate to media production. Introduces students to the concepts and vocabulary necessary for effectively conceiving, producing or criticizing mediated messages. Designed primarily for students with interest in digital media. Provides a foundation for students working in media criticism. Cross listed: FILM 121.

COMS 122. Writing for Interactive Media. 3 Units

Prerequisite(s): ENGL 1A and ENGL 20 or (GWAR Certification before Fall 09, or WPJ score of 70+, or at least a C- in ENGL 109M or ENGL 109W.)

Term Typically Offered: Fall, Spring

Writing and editing for visual, audio, and interactive media. How to choose appropriate format and delivery mechanisms for news, web sites, kiosks, and CD/DVD. Topics include copyright law and information ethics.
COMMUNICATION OF SELF, THEORIES OF CONFLICT RESOLUTION, COMMUNICATION DYNAMICS. TOPICS INCLUDE NONVERBAL COMMUNICATION, SELF CONCEPT, OF RELATIONSHIPS, AS WELL AS RESEARCH ON THE FORCES BEHIND RELATIONAL TASK SETTINGS. THEORIES OF COMMUNICATION DURING THE GROWTH AND DECAY OF RELATIONSHIPS.

COMS 130. Staging and Lighting Digital Video. 3 Units
Prerequisite(s): COMS 20A, COMS 20B, COMS 27A, COMS 27B, each with a grade of B- or better.
Term Typically Offered: Fall, Spring

Introduction to the aesthetics, concepts and techniques used to control lighting in digital video productions. Aspects of staging, blocking and composition in the context of studio and location lighting.
Note: Students enrolled are required to work on productions outside of scheduled class time (1-3 hours/week). Cross listed: FILM 130.

COMS 133. The Documentary Film. 3 Units
Term Typically Offered: Fall, Spring

Examines the historical, development, and present state of documentary film. Emphasis is on both understanding and critically analyzing the significance of various genres of the documentary and its uses as a tool for information, proselytizing, education, and propaganda.

COMS 136. Introduction to Electronic Publishing. 3 Units
Prerequisite(s): COMS 26 or instructor permission.
Term Typically Offered: Fall, Spring

Design and production of information sites for the World Wide Web. Concepts covered include market analysis, cognitive design, layout, navigation, interactive strategies, site management, and multimedia components for electronic distribution systems. Introduction to object oriented programs and XHTML text editors.

COMS 140. Online Collaboration. 3 Units
Term Typically Offered: Spring only

Students learn to communicate in virtual environments in real-time and asynchronously. Students survey current technologies for collaboration, explore psychological and cultural aspects of individuals working and communicating in teams across computer networks, and identify strategies to foster cooperatives in distributed work.

COMS 141. Theory of Film and Video Editing. 3 Units
Prerequisite(s): COMS/FILM 27A and COMS/FILM 27B with final posted grade of C or better.
Term Typically Offered: Fall, Spring

Study of history and theory of film and video editing. Many films are viewed and discussed, examining how editing theory is put into practice. Cross listed: FILM 141.

COMS 142. Film As Communication. 3 Units
Term Typically Offered: Fall only

Explores the uses of film as a tool of communication.

COMS 143. Theories of Interpersonal Communication. 3 Units
Prerequisite(s): COMS 8 or equivalent; COMS 100A may be taken concurrently.
Term Typically Offered: Fall, Spring, Summer

One-to-one communication between individuals in both social and task settings. Theories of communication during the growth and decay of relationships, as well as research on the forces behind relational dynamics. Topics include nonverbal communication, self concept, communication of self, theories of conflict resolution, communication competence and the rhetoric of disconfirmation.

COMS 144. Developing Rich Media Websites. 3 Units
Prerequisite(s): COMS 27A, and COMS 27B.
Term Typically Offered: Fall, Spring

An introduction to the creation of multimedia websites using current multimedia development software such as Flash. Emphasis will be placed on creating interactive video and formatting video programs for delivery over the WWW, extranets, or intranet.

COMS 145. Organizational Communication. 3 Units
Prerequisite(s): COMS 100A.
Term Typically Offered: Fall, Spring, Summer

Basic concepts of interpersonal and inter-group communication within formal and informal social organizations. Current techniques of auditing and evaluating organizational communication.

COMS 149. Multimedia Authoring. 3 Units
Prerequisite(s): COMS 106, COMS 126.
Term Typically Offered: Fall, Spring

Basic multimedia authoring theory and skills. Text, graphics, audio, and video are synchronized into interactive media. Topics include 2D animation, interface design, and fundamentals of scripting language.

COMS 150. Mass Communication Theories and Effects. 3 Units
Prerequisite(s): COMS 55 or JOUR 55 or equivalent; and COMS 100A which may be taken concurrently.
Term Typically Offered: Fall, Spring, Summer

Survey of the major theories dealing with the relationship between the mass media and human communication behavior. Examination of research into the social, political, economic and cultural effects of mass communication.

COMS 152. Freedom Of Speech. 3 Units
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall, Spring

Thorough introduction to issues related to freedom of speech and censorship, sections of the historical origins of free speech, seditious speech, libel and slander, pornography and obscenity, commercial speech and advertising, symbolic speech and hate speech. The class brings a communication focus to addressing issues related to the First Amendment.

COMS 153. Mass Media Law and Regulation. 3 Units
Term Typically Offered: Fall, Spring

Laws and regulations that govern print, broadcast, and the electronic mass media in the U.S. Discusses the process by which laws and regulations are enacted and interpreted as well as legal and regulatory issues concerned with the content, control, political role and responsibilities of media practitioners, regulators, Congress, and the public.
Cross Listed: JOUR 153; only one may be counted for credit.

COMS 154. Instructional Design and Training. 3 Units
Term Typically Offered: Fall, Spring

Instructional theory and practice in organizational training. Surveys instructional communication theory and the instructional design process. Focus on effective communication in training contexts. Topics include needs assessment, training design, training evaluation and training delivery via electronic media.
COMS 155. Survey of World Cinema. 3 Units
Term Typically Offered: Fall, Spring

A historical review of the development of major international film styles and themes. Concepts derived from this study of international film are then used as a basis to analyze contemporary films of India, Asia, and Africa. Emphasis is on both the development of formal film technique and a comparison of the unique cultural values that shape the film narrative and style.

COMS 157. Video Art. 3 Units
Prerequisite(s): ART 97 or COMS 27A/Film 27A and COMS 27B/Film 27B.
Term Typically Offered: Fall, Spring

The creation and analysis of video artwork; including techniques of video production, post-production manipulation and critique, within the context of art and communication. The techniques and theory of producing and editing video will serve as a foundation for the pursuit of individual, creative projects. Cross-listed as ART 147; only one may be counted for credit.

COMS 158. Public Relations Planning and Management. 3 Units
Prerequisite(s): COMS 118 and COMS 123 or JOUR 123 with grade of "C-" or better.
Term Typically Offered: Fall, Spring

Theoretical concepts to the solution of problems for pre-selected non-profit and campus clients by forming small group PR agencies; completing needs assessments; profiling target and secondary audiences; developing and implementing a strategic public relations plan; producing targeted messages for media kits and other uses; developing and evaluating formative and summative evaluation plans; and making formal in-class presentations to peers, clients and invited PR professionals. Students will also learn how to negotiate contracts, maintain client relations, track work on projects and develop timelines and budgets. Cross Listed: JOUR 158; only one may be counted for credit.

COMS 160. Political Communication. 3 Units
Term Typically Offered: Fall only

Analyzes the relationship between mass media and political decision-making, including a structural analysis of political and media institutions. Particular attention on the formation of public opinion through messages and strategies, and the impact of public opinion on public policy.

COMS 161. Health Communication. 3 Units
Term Typically Offered: Fall, Spring

Communication principles and techniques as they apply to the many facets of health care, health education and promotion, and research in health communication. Emphasis on understanding and improving communication among health professionals, and between health professionals and clients. Explores the rapidly emerging field of health communication. Selected concepts and theories of human communication are directly applied to communication problems and situations in health care settings through the use of case studies. In addition, pertinent research that helps explain human interaction in health care is incorporated through readings and discussions.

COMS 162. Gender Ideology and Communication. 3 Units
Prerequisite(s): COMS 100A
Term Typically Offered: Fall, Spring

Scholarly, theoretical and critical writings on the production and circulation of gender roles, images, and gender-types attributes through communication, with a special focus on mass-mediated communication such as television, video, and film.

COMS 164. Visual Communication. 3 Units
Prerequisite(s): COMS 100A and 100B or equivalent, with a grade of C- or better.
Term Typically Offered: Fall, Spring, Summer

Comprehensive overview of the theoretical concepts and communication methodologies appropriate for analysis of contemporary visual messages. Focuses on rhetorical analysis of visual messages. Significant research and critical writing required.

COMS 165. Communication and Religion. 3 Units
Term Typically Offered: Fall, Spring, Summer

Examines the history, development and present state of religious communication. Discussion of the limits and challenges communication theories face when confronted with situations requiring them to describe the indescribable. Emphasis upon the communication methods in a religious context as well as the communication strategies, limits, and possibilities that are revealed in what is arguably the most extreme of communication situations: the intersection of religion and words.

COMS 166. Theories of Persuasion and Attitude Change. 3 Units
Term Typically Offered: Fall, Spring

Various theories of persuasion and attitude change, both classical and empirical, in terms of their effectiveness and social impact. Includes units on production and consumption of persuasive messages.

COMS 167. Systems and Theories of Rhetoric. 3 Units
Prerequisite(s): COMS 100B or equivalent with a grade of "C-" or better.
Term Typically Offered: Fall, Spring, Summer

Historical survey of theories of rhetoric. Comparison/contrast of scope and value of rhetorical theories. Practice in critical writing.

COMS 168. Approaches to Rhetorical Criticism. 3 Units
Prerequisite(s): COMS 100B or equivalent with a grade of "C-" or better.
Term Typically Offered: Fall, Spring, Summer

Analyzes rhetorical events, using a variety of critical perspectives. Current issues on criticism’s function and the critic’s role. Practice in critical writing.

COMS 169. Television Criticism. 3 Units
Prerequisite(s): COMS 100B with a grade of C- or better; completion of 12 units of upper division COMS courses; or unclassified graduate student status; or instructor permission.
Term Typically Offered: Fall, Spring, Summer

Introduction to television criticism theory and to various critical methods with which television program texts may be analyzed. Current theoretical and critical issues in the function of criticism and the role of the critic are addressed through readings, writing assignments, screenings and discussion.
COMS 170. Data Analysis in Communication Research. 3 Units
Prerequisite(s): COMS 100C or equivalent with a grade of "C-" or better; or instructor permission.
Term Typically Offered: Fall, Spring, Summer

Introduction to the application of data analysis to the study of communication processes.

COMS 171. Survey Methods in Communication Research. 3 Units
Prerequisite(s): COMS 100C or equivalent with a grade of "C-" or better; or instructor permission.
Term Typically Offered: Fall, Spring, Summer

Techniques of survey research in communication, including sampling, questionnaire construction, interviewing, data analysis, and report writing. Each student designs and executes a research project.

COMS 172. Content Analysis. 3 Units
Prerequisite(s): COMS 100C or equivalent with a grade of "C-" or better; or instructor permission.
Term Typically Offered: Fall, Spring

Content analysis as a research technique in communication. Emphasizes design and execution of content analysis studies in a wide range of communication situations. Each student completes several short studies and a major project.

COMS 173. Communication, Language and Culture. 3 Units
Prerequisite(s): COMS 100A.
Term Typically Offered: Spring only

Cross-cultural exploration of communication and social interaction; relationship between language and society; cross-cultural implications of values embedded in message production, transmission, and interpretation; studies of how language influences perception and organization of social reality; linguistics, information and message transmission.

Note: Restricted to junior and above or instructor permission.

COMS 174. International Communication. 3 Units
Prerequisite(s): COMS 100A.
Term Typically Offered: Fall, Spring, Summer

Movement of mediated messages across and between national boundaries. Topics include news and entertainment flow, media systems and philosophies, cultural dependency and imperialism, the new world information order and communication development.

COMS 175. Creative Problem Solving. 3 Units
Term Typically Offered: Fall, Spring

Creative problem solving techniques for use by individuals and groups. Topics include the nature of creative problem solving, barriers to creativity, clear problem definition, idea generation, decision making, group dynamics in creative situations, implementation of changes, and overcoming resistance to change.

COMS 176. Communication and Terrorism. 3 Units
Prerequisite(s): COMS 100A or instructor permission
Term Typically Offered: Spring only

This course addresses the communication aspects of terrorism, including both the ways terrorism has been used to make political and religious statements worldwide; how the media cover those messages; and how we talk about those messages and the coverage they receive. The course draws on the cutting-edge communication research from international/intercultural, political, mass communication, and computer-mediated communication sources. This is a course in the communication of terrorism. It is neither a course in the political science of terrorism nor in the criminal justice enforcement of counter-terrorism.

COMS 177. Virtual Communities on the Internet. 3 Units
Term Typically Offered: Fall, Spring

The nature of communication in virtual communities on the Internet and the impact that these communities have on traditional communication media. Topics include: the interaction of real and cyber communities, self-publishing, educational uses of virtual communities, virtual self-governance, artificial intelligent agents, and the issues of security, privacy, and anonymity. Students will participate in structured on-line activities.

COMS 178. Media, Sports, and Society. 3 Units
Term Typically Offered: Spring only

Examines and critiques the relationship between the mass media and sports. Reviews theoretical approaches for studying media and sports (including historical, sociological, psychological, political, and cultural studies perspectives), then examines how sport is mediated through literature, print journalism, radio, and television.

COMS 179. Senior Seminar in Organizational Communication. 3 Units
Prerequisite(s): COMS 145; completion of 12 units of upper division COMS courses including COMS 100A.
Term Typically Offered: Fall, Spring, Summer

Seminar on communication theories, techniques and research methodologies in the field of social and governmental organizational systems.

COMS 180. Senior Seminar in Small Group Communication. 3 Units
Prerequisite(s): COMS 105; completion of 12 units of upper division COMS courses including COMS 100A.
Term Typically Offered: Fall, Spring, Summer

Seminar on the ways theories of group communication are realized in actual social settings.

COMS 181. Senior Seminar in Interpersonal Communication. 3 Units
Prerequisite(s): COMS 8, COMS 143, and completion of 12 units of upper division COMS courses including COMS 100A.
Term Typically Offered: Fall, Spring, Summer

Seminar on advanced theories of interpersonal communication. Sample topics include relational development, relational termination, communication and interpersonal attraction, and communication competence. Students present one in-class report and complete a major research paper.
COMS 183. Senior Seminar in Media Issues and Ethics. 3 Units
Prerequisite(s): COMS 55 or JOUR 55; completion of 12 units of upper division COMS courses including COMS 100A.
Term Typically Offered: Fall, Spring, Summer

Seminar on the functions and roles of communication media in contemporary society. Includes issues and ethical considerations associated with freedom, responsibility and control examined from the points of view of the media, the government and the public. Specific topics will vary.

COMS 184B. Multimedia Project Completion. 3 Units
Prerequisite(s): Instructor permission.
Corequisite(s): COMS 184A.
Term Typically Offered: Fall, Spring

Second of a two-semester senior project sequence. Students complete the project designed in COMS 184A. Projects are completed with assistance and feedback from the instructor, client, and working professionals.

COMS 185. Senior Practicum in Video Production. 3 Units
Prerequisite(s): COMS/FILM 124 with a final posted grade of C or better.
Term Typically Offered: Fall, Spring

Assignments in various phases of video production including creative use of camera, sound and lighting, editing production design, production planning and management, and directing and producing. Students in first semester function as crew members for productions.
Note: May be repeated once for credit. Repeating students are expected to produce and direct a major student project. Cross listed: FILM 185.

COMS 187. Issue Management and Case Studies in Public Relations. 3 Units
Prerequisite(s): COMS 118; completion of 12 units of upper division COMS courses.
Term Typically Offered: Fall, Spring

Examines the management of issues in the public and private sectors including knowledge and skills in the communication activities and thinking processes that affect an issue's development. Uses case studies of organizations—governmental agencies, businesses, and not-for-profit entities to assess issue development and management by examining the fundamental questions confronting organizations: What should the particular organization do and how should it do it? Examines criteria for selecting among alternative options, and the relation of the organization to its environment. Explores the broader social, legal, and ethical implications of the organization’s activities.

COMS 188. Senior Seminar in Intercultural Communication. 3 Units
Prerequisite(s): COMS 116; completion of 12 units of upper division COMS courses including COMS 100A.
Term Typically Offered: Fall, Spring, Summer

Critically examines and analyzes complex dynamics and concepts in communication and culture in a pluralistic society. Also relates various perspectives on intercultural communication theories and methods to an analysis of social interaction processes among culturally diverse groups. An interactive dimension includes problem-solving strategies.

COMS 189. Practicum in Communication Training. 3 Units
Prerequisite(s): COMS 145 and COMS 154 or instructor permission.
Term Typically Offered: Spring only

Students work in groups to complete organizational training projects within community organizations. After assessing the organization’s needs, students design, conduct and evaluate training. Advanced readings and professional competencies are emphasized.

COMS 190. Human Communication on the Internet. 3 Units
Term Typically Offered: Fall only

Provides an in-depth study of communication models that summarize and explain the interaction of humans in electronic environments, especially the Internet. Students locate, organize, analyze, and synthesize the latest research in online communication and make connection between theoretical models and their own experiences.

COMS 191. New Media and Society. 3 Units
Term Typically Offered: Fall, Spring, Summer

The course examines contemporary social, cultural, political and economic topics regarding the adoption of digital media and the Internet. Students understand their role as citizens of a global knowledge-based society and the ethical dimensions brought by the new computer-enabled media environment.

COMS 192. Senior Seminar in Film. 3 Units
Prerequisite(s): Completion of the Film Studies core, and (GWAR Certification before Fall 09, or WPJ score of 70+, or at least a C- in ENGL 109M or ENGL 109W).
Term Typically Offered: Fall, Spring

Research seminar that provides an in-depth investigation of film as an art form, a medium of mass communication and a means of personal expression. Subject will vary according to instructor. Cross listed: FILM 192.

COMS 194. Communication Studies - Related Work Experience. 3 - 6 Units
Prerequisite(s): Open only to upper division or graduate students with appropriate course preparation. Units may not be used to meet COMS major, minor or graduate course work requirements. Consent of Communication Studies Department faculty advisor required. No more than 12 units may be counted toward the degree.
Term Typically Offered: Fall, Spring

Supervised employment in a company or agency working on communication studies-related assignments, arranged through the Department of Communication Studies and the Cooperative Education Program office. Requires preparation of application packet, completion of a 6 month full-time or part-time work assignment, and a written report. Credit/No Credit

COMS 195. Internship in Communication Studies. 1 - 6 Units
Prerequisite(s): COMS 100A, minimum 2.3 overall GPA.
Corequisite(s): COMS 100A.
Term Typically Offered: Summer only

Directed work experience in the internship program. Supervision is provided by both instructional staff and the cooperating agency. Faculty approval required. Credit/No Credit
COMS 196. Critical Analysis of the Media. 3 Units
Prerequisite(s): Upper division standing for majors and non-majors.
Term Typically Offered: Fall, Spring

The course will introduce students to semiotics that will be employed to tease out "overt" and hidden meanings in news (print and video) and other mediated messages. In particular the course will focus on the various, powerful strands of American ideology, e.g., individualism, democracy, patriotism, environmentalism, and the First Amendment that shape an understanding of ourselves and of our society. It will examine the present state of American journalism and how it operates.

COMS 196Q. Seminar in Health Communication. 3 Units
Seminar about how health messages impact individuals, communities, and mass audiences. Introduces students to health communication research, raises awareness about health-related messages in our daily lives, applies theories of health communication, and critically analyzes how the creation, sending, and reception of health messages impacts society.
Note: COMS 161 is strongly encouraged prior to taking this course.

COMS 199. Special Problems. 1 - 3 Units
Prerequisite(s): COMS 100A.
Term Typically Offered: Fall, Spring

Individual projects or directed reading open to students who wish to attempt independent work. Faculty approval required.
Credit/No Credit

COMS 200. Qualitative Research Methods in Communication Studies. 3 Units
Term Typically Offered: Fall, Spring

Focuses on qualitative research methods as one methodological option to use in scholarly research. Critically review and analyze existing qualitative research projects; creation of qualitative research project; and response the research projects of peers. Consideration of ways to successfully integrate into the communication discipline through a variety of class discussions, readings, and activities.
Note: Graduate student status or instructor permission required

COMS 201. Communication Theory. 3 Units
Term Typically Offered: Fall, Spring

Approaches to the study of human communication. Emphasizes general theories of communication and specific theories of rhetoric, symbolic interaction, information processing, interpersonal communication, small group communication, persuasion, organizational communication, and mass communication. Must be taken within first two semesters of graduate enrollment.
Note: Graduate standing or instructor permission required.

COMS 202. Quantitative Research Methods in Communication Studies. 3 Units
Prerequisite(s): Graduate student status or instructor permission.
Term Typically Offered: Fall, Spring

Introduction to advanced quantitative and qualitative research methods. Students will demonstrate their ability to apply at least one research perspective to a significant topic of interest in the discipline. Students are expected to produce a well-crafted research proposal as part of a culminating experience.

COMS 206. Organizational Communication. 3 Units
Term Typically Offered: Fall, Spring

History, research, and theories in the social, psychological, and structural aspects of organizational communication. Students undertake field studies integrating various analytical approaches.

COMS 207. Dyadic Communication. 3 Units
Term Typically Offered: Fall, Spring

Various theoretical approaches to interpersonal or face-to-face communication.

COMS 208. Communication and National Development. 3 Units
Term Typically Offered: Fall, Spring

Role of communication in national development. Examines how communication (government policies, technologies and implementation strategies) can be used in the development of third world nations.

COMS 209. Communication and Social Change. 3 Units
Term Typically Offered: Fall, Spring

Relationship between movement rhetoric, mass media messages and major societal changes and paradigm shifts. Students examine the flow of communication from individual and group "change agents" to the larger population and write a paper which illuminates a contemporary social change in progress.

COMS 210. Seminar in Mass Communication. 3 Units
Term Typically Offered: Fall, Spring

Concentrated survey of mass media systems and an analysis of theories of media uses and effects. Students are required to conduct library research on a specific media-related topic and to present their findings orally.

COMS 211. Electronic Media and American Culture. 3 Units
Term Typically Offered: Fall, Spring

American thought and culture as reflected in and influenced by the content of electronic media.

COMS 212. Seminar in Small Group Communication. 3 Units
Term Typically Offered: Fall, Spring

Theory and research about task-oriented groups.

COMS 213. Seminar In Criticism. 3 Units
Term Typically Offered: Fall, Spring

Intensive examination of critical theory. A major critical paper is prepared by each student.
Note: Graduate Writing Intensive

COMS 215. Communication and Public Opinion. 3 Units
Term Typically Offered: Fall, Spring

Examines theoretical foundations of public opinion formation and change and explores current public opinion measurement methodologies.
Various theories, perspectives and approaches to the study of intercultural communication. Selected contemporary issues pertaining to race and culture and their impact on the communication process, especially the multicultural/multiracial consciousness in California in particular, and the U.S. in general.

**COMS 217. Assessment of Communication Behavior in Organizations.**
**Term Typically Offered:** Fall, Spring

Review of measuring instruments commonly used to assess communication practices in large organizations. Students also critically review relevant research literature regarding important communication issues in large organizations.

**COMS 219. Conflict Resolution.**
**Term Typically Offered:** Fall, Spring

Review of theory and research of the role of communication in conflict resolution.

**COMS 221. Instructional Communication Theory.**
**Term Typically Offered:** Fall, Spring

Survey of dominant theories of instructional communication. Students read, study and critique prevailing bodies of literature which have a bearing on the study and practice of instructional communication. Theories are used to help students reflect on their own experiences as teachers and students and to generate new ideas for research in instructional communication.

**COMS 222. Instructional Communication Practicum.**
**Term Typically Offered:** Fall, Spring

Examination of communication theory and research in instructional or training contexts. Designed for beginning teachers or organizational trainers. Centers on those communication principles which contribute to greater student/client learning and satisfaction. Emphasis on the development and implementation of instructional communication packages for adult learners.

**COMS 228. Corporate Advocacy and Public Policy.**
**Term Typically Offered:** Fall, Spring

Explores "corporate advocacy" as a kind of rhetorical, persuasive transaction between Corporate America and those in its environment. Seeks to understand corporate America's role in the "policy process" (broadly defined), by analyzing the constituted authority for policy formation, the actual institutions involved in such formation, the interaction between/among these centers of power, the difference between authority and influence between/among these centers of power and influence, and how corporate America uses rhetorical messages to enhance various goals.

**COMS 230. Computer-Mediated Communication.**
**Term Typically Offered:** Fall, Spring

Instruction and analysis of human and social Computer-Mediated Communications. Covers from how digital media affects representation and narrative to research on current uses of the Internet and the theoretical frameworks applied to summarize it. Includes a component of Computer Literacy that will help students understand Computer-Mediated Communication and use online collaborative tools efficiently. No previous computer knowledge is required.

**COMS 235. Practicum for Teaching Associates in Communication Studies.**
**1 Unit**

**Prerequisite(s):** COMS 200, COMS 201.

**Term Typically Offered:** Fall, Spring

Open to students appointed as teaching associates in Communication Studies. Designed to facilitate the development, refinement, and maintenance of effective teaching methods and strategies.

**Note:** May be repeated up to three times with permission of instructor.

**COMS 239. Internship in Communication Studies.**
**1 - 6 Units**

**Term Typically Offered:** Fall, Spring

Directed work experience in the internship program. Supervision is provided by both the instructional staff and the cooperating agency. Faculty and Graduate Committee approval required the semester prior to enrollment.

Credit/No Credit

**COMS 297. Directed Study and Comprehensive Examination.**
**1 - 3 Units**

**Prerequisite(s):** Must be advanced to candidacy.

**Term Typically Offered:** Fall, Spring

Structured and supervised reading program for MA candidates preparing for comprehensive examinations. Should be taken after completion of all other requirements for the degree. Credit given upon successful completion of comprehensive examinations. Examining committee determines the number of units to be credited.

**Note:** Open to students who have been advanced to candidacy and have secured permission of the chair of their examining committee and the Graduate Coordinator.

Credit/No Credit

**COMS 298. Colloquium in Communication.**
**3 Units**

**Term Typically Offered:** Fall, Spring

A seminar on a communication topic of contemporary concern. Topic may change from semester to semester. May be taken for credit more than once, provided topic is not repeated.

**COMS 299. Special Problems.**
**1 - 3 Units**

**Term Typically Offered:** Fall, Spring

Individual projects or directed reading open to students wishing to attempt independent work. Faculty and Graduate Committee approval required the semester prior to enrollment.

Credit/No Credit
COMS 500. Culminating Experience. 3 - 6 Units
Prerequisite(s): Advanced to candidacy and chair permission of his/her thesis or project committee.
Term Typically Offered: Fall, Spring
Completion of a thesis or project approved for the Master's degree. Thesis or project prospectus committees determine the number of units to be credited.

Computer Engineering (CPE)

CPE 64. Introduction to Logic Design. 4 Units
Prerequisite(s): CSC 15 or CSC 25.
Term Typically Offered: Fall, Spring
Covers the following topics: logic gates, binary number system, conversion between number systems, Boolean algebra, Karnaugh maps, combinational logic, digital logic design, flip-flops, programmable logic devices (PLDs), counters, registers, memories, state machines, designing combinational logic and state machines into PLDs, and basic computer architecture. Lab emphasizes the use of software equation entry design tools, the use of a schematic entry, and the use of a logic simulation design tool. Lab assignments are design-oriented. Lecture three hours; laboratory three hours.
Cross Listed: EEE 64; only one may be counted for credit.

CPE 64W. Introduction to Logic Design Workshop. 1 Unit
Corequisite(s): CPE 64.
Term Typically Offered: Fall, Spring
Designated to assist students in developing a more thorough understanding of logic simulation and logic design. Focus is on problem solving and design. Activity two hours.
Cross Listed: EEE 64W; only one may be counted for credit.

CPE 138. Computer Networks and Internets. 3 Units
Prerequisite(s): CSC 35, CSC 60, CSC 130.
Term Typically Offered: Fall, Spring
Overview of the fundamentals of computer networks and connections between networks, from the physical layer up through peer-to-peer communications at the application level. Lower layer characteristics including serial vs. parallel, capacity issues, high-speed connections, LAN framing and error handling, LAN vs. WAN characteristics, network architecture and the ISO network model. Internetworking components including LANs, repeaters, routers, bridges, and gateways. Internet addresses, TCP/IP, and the Domain Name System. Common Internet client/server application protocols including SMTP and FTP. Client/Server programming involving sockets. World Wide Web characteristics including CGI and HTTP protocol, Web pages, Web browsers, Web servers, and Applets. Introduction to advanced Web issues such as Web security, Search engine operations, and Web database operations.
Cross Listed: CSC 138; only one may be counted for credit.

CPE 142. Advanced Computer Organization. 3 Units
Prerequisite(s): CSC 137 or CPE 166 and CPE 185.
Term Typically Offered: Fall, Spring
Design and performance issues of computers. Instruction set architecture, computer arithmetic, processor design, survey of contemporary architectures, interfacing I/O devices, hierarchal memory design and analysis, parallelism and multiprocessing, distributed systems, techniques for enhancing performance, and an introduction to EDA tools for design and verification of computers. Design and simulation of a microcomputer in an HDL.
Note: Open to students with full CSC or CPE major standing only. Cross Listed: CPE 142; only one may be counted for credit.

CPE 144. Dsp Architecture Design. 3 Units
Prerequisite(s): CPE 142.
Term Typically Offered: Fall, Spring

CPE 151. Cmos And Vlsi. 3 Units
Prerequisite(s): CPE 64 and EEE 108.
Term Typically Offered: Fall, Spring
Begins with an introduction to CMOS gates and design of CMOS combinational and sequential functions at the gate level, including CMOS memory. The theory of MOS transistors is covered including: DC equations, threshold voltage, body effect, subthreshold region, channel length modulation, tunneling, punch through, basic CMOS invertor, and the CMOS transmission gate. A basic exposure to VLSI includes the following topics: CMOS processing technology, CMOS layout, CMOS circuit design and CMOS logic design. Simulations on SPICE and basic VLSI layouts using LEDIT will be included.

CPE 153. Vlsi Design. 3 Units
Prerequisite(s): CPE 151.
Term Typically Offered: Fall, Spring
Review basic CMOS VLSI technology, circuit characterization and performance estimation, and provides detailed information on synthesis, placing and routing, clocking strategies, quality and reliability, and I/O structures. Design examples, design techniques, and testing techniques will be presented via current EDA design tools. Students assigned one project from concept design through validation.

CPE 159. Operating System Pragmatics. 3 Units
Prerequisite(s): CSC 139.
Term Typically Offered: Fall, Spring
Application of operating system principles to the design and implementation of a multi-tasking operating system. Students will write an operating system for a computer system. Topics include scheduling of processes, control and allocation of computer resources and user interfacing.
Cross Listed: CSC 159; only one may be counted for credit.
CPE 166. Advanced Logic Design. 4 Units
**Prerequisite(s):** CPE 64, ENGR 17.
**Term Typically Offered:** Fall, Spring

VHDL and Verilog Hardware Description Languages are studied and used on the following advanced level logic design topics: synchronous state machines, asynchronous state machines, metastability, hazards, races, testability, boundary scan, scan chains, and built-in self-tests. Commercial Electronic Design Automation (EDA) tools are used to synthesize lab projects containing a hierarchy of modules into Field Programmable Gate Arrays (FPGAs). Post synthesis simulations by these same tools verify the design before implementation on rapid prototyping boards in the lab.

CPE 185. Computer Interfacing. 4 Units
**Prerequisite(s):** CPE 64, CSC 35 and CSC 60.
**Term Typically Offered:** Fall, Spring

Design of microcomputer systems including memory systems, parallel and serial input/output, timer modules, and interrupt structures; designing "C" language code, in laboratory, to exercise interface modules of parallel and serial input/output, timer modules, and interrupts; extensive study of interrupt handlers, assemblers, linkers, and loaders. Practical features of interfaces, handshaking techniques, displays, keypads, and trackballs are included.

CPE 186. Computer Hardware System Design. 3 Units
**Prerequisite(s):** CPE 185 or EEE 174.
**Term Typically Offered:** Fall, Spring

Study of Intel and Motorola architectures, bus structures, interrupts, memory interface and controllers, bus arbitration, DMA controllers, I/O interface, bridges and microcontroller. Electromagnetic compatibility and regulations, cabling and shielding, grounding, digital circuit noise and layout.

CPE 187. Embedded Processor System Design. 2 Units
**Prerequisite(s):** CPE 166, CPE 185, EEE 102, and (GWAR Certification before Fall 09, or WPJ score of 70+, or at least a C- in ENGL 109M or ENGL 109W).
**Term Typically Offered:** Fall, Spring

Students will design, construct and test an embedded processor system project. All address decoding, control functions, input and output ports, handshaking signals and interrupt control will be implemented in an FPGA. The system will interface to a microcontroller system. Students will use an assembler, a C compiler and either VHDL or Verilog to fully test their project. Laboratory techniques include oscilloscopes, logic analyzers, protocol analyzers and programmers for EPROMs, FLASH and microcontrollers. One lecture per week and one three-hour laboratory per week.

CPE 190. Senior Design Project I. 2 Units
**Prerequisite(s):** CPE 142, CPE 166, CPE 186, CPE 187, EEE 108
**Term Typically Offered:** Fall, Spring

Centers on developing hardware and software project planning and engineering design skills. Emphasis is placed on design philosophies, problem definition, project planning and budgeting, written and oral communication skills, working with others in a team arrangement, development of specifications and effective utilization of available resources. Lecture one hour per week, laboratory three hours per week.

CPE 191. Senior Design Project II. 2 Units
**Prerequisite(s):** CPE 190, and (GWAR Certification before Fall 09, or WPJ score of 70+, or at least a C- in ENGL 109M or ENGL 109W).
**Term Typically Offered:** Fall, Spring

Continuation of CPE 190. Students are expected to continue the project started by design teams in CPE 190. The hardware will be completed, tested and redesigned if necessary. At the same time, software for the project will be finished and debugged. The final results of the team project will be presented to the CPE faculty and students at a prearranged seminar. Lecture one hour, laboratory three hours.

CPE 195. Fieldwork in Computer Engineering. 1 - 15 Units
**Prerequisite(s):** Petition approval by Program Coordinator.
**Term Typically Offered:** Fall, Spring

Directed observations and work experience in computer engineering with firms in the industry or public agencies. Supervision is provided by the instructional staff and the cooperating agencies. Faculty approval required.

**Note:** May be repeated for credit.

**Credit/No Credit**

CPE 195A. Professional Practice. 1 - 12 Units
**Prerequisite(s):** Instructor permission.
**Term Typically Offered:** Fall, Spring

Supervised employment in a professional engineering or computer science environment. Placement arranged through the College of Engineering and Computer Science. Requires satisfactory completion of the work assignment and a written report.

**Credit/No Credit**

CPE 195B. Professional Practice. 1 - 12 Units
**Prerequisite(s):** Instructor permission.
**Term Typically Offered:** Fall, Spring

Supervised employment in a professional engineering or computer science environment. Placement arranged through the College of Engineering and Computer Science. Requires satisfactory completion of the work assignment and a written report.

**Credit/No Credit**

CPE 195C. Professional Practice. 1 - 12 Units
**Prerequisite(s):** Instructor permission.
**Term Typically Offered:** Fall, Spring

Supervised employment in a professional engineering or computer science environment. Placement arranged through the College of Engineering and Computer Science. Requires satisfactory completion of the work assignment and a written report.

**Credit/No Credit**

CPE 199. Special Problems. 1 - 3 Units
**Prerequisite(s):** Instructor permission.
**Term Typically Offered:** Fall, Spring

Individual projects or directed reading.

**Note:** Open only to those students who appear competent to carry on individual work. Admission to this course requires approval of the faculty member under whom the individual work is to be conducted, in addition to the approval of the advisor. May be repeated for credit.
CPE 201. Research Methodology. 1 Unit
Prerequisite(s): Fully classified graduate status.
Term Typically Offered: Fall, Spring

Research methodology, problem formulation and problem solving. Collective and individual study of selective issues and problems relating to fields of study in the Computer Engineering Graduate Program. Orientation to the requirements for Master's Thesis or Project in Computer Engineering.

Credit/No Credit

CPE 273. Hierarchical Digital Design Methodology. 3 Units
Prerequisite(s): CSC 205, EEE 285 or their equivalents.
Term Typically Offered: Fall, Spring

Advanced logic modeling, simulation, and synthesis techniques. Topics include modeling, simulation, and synthesis techniques, using Hardware Description Language (HDL's), Register Transfer Level (RTL) representation, high level functional partitioning, functional verification and testing, computer-aided logic synthesis, logical verification and testing, timing and delay analysis, automated place and route process, and design with Application Specific Integrated Circuits (ASICs) and programmable logic.

CPE 274. Advanced Timing Analysis. 3 Units
Prerequisite(s): EEE 273, CSC 273, CPE 273 or instructor permission.
Term Typically Offered: Fall, Spring

Timing analysis of Application Specific Integrated Circuit (ASIC) designs. Topics include ASIC design methodology, static timing analysis, timing design constraints, design reports, clock timing issues, timing exceptions, operating conditions, hierarchical analysis, analyzing designs with asynchronous logic, performance measurement and power issues. Cross-listed: EEE 274; only one may be counted for credit.

CPE 280. Advanced Computer Architecture. 3 Units
Prerequisite(s): CSC 205, fully classified graduate status.
Term Typically Offered: Fall, Spring

Introduction to parallel architecture covering computer classification schemes, fine and course grain parallelism, processor interconnections, and performance issues of multiprocessor systems. Includes parallel and pipelined instruction execution, structure of multiprocessor systems, memory hierarchy and coherency in shared memory systems, programming issues of multiprocessor systems, arithmetic pipeline design, and design for testability.

CPE 296T. Digital Speech Processing. 3 Units
Prerequisite(s): EEE 181 or instructor permission.
Term Typically Offered: Fall, Spring

The objective of this course is to cover the digital processing of speech signals. Topics include speech production and perception, speech processing in the time frequency domains. Short-time energy and Short-time Fourier analysis, homomorphic and linear predictive coding methods. Also covered are speech coding, basic introduction of text-to-speech synthesis and speech recognition. Cross-listed: EEE 296T.

CPE 299. Special Problems. 1 - 3 Units
Prerequisite(s): Instructor permission.
Term Typically Offered: Fall, Spring

Open to qualified students who wish to pursue problems of their own choice. Projects must have approval and supervision of a faculty advisor.
CSC 8S. Self-Paced Introduction to Internet Technologies. 3 Units
Prerequisite(s): Basic computer literacy recommended.
Term Typically Offered: Fall, Spring

Covers the same material as CSC 8, Introduction to Internet Technologies. Provided by electronic means in addition to meetings for orientation, laboratory demonstrations, and tests. Internet applications such as Email, instant messaging, file transfer, secure communications, the Web, and related tools and protocols. Basics of the Web-publishing process and methods used to locate authoritative information on the Internet. Webpage design, Internet security and emerging/declining technologies on the Internet.
Credit/No Credit

CSC 10. Introduction to Programming Logic. 3 Units
Prerequisite(s): Math 11 or equivalent
General Education Area/Graduation Requirement: Further Studies in Area B (B5)
Term Typically Offered: Fall, Spring

Introduction to computer science with an emphasis on programming concepts and methodology. Intended to assist students with little or no programming experience to understand the basic principles of programming logic. Topics include computer hardware and software, problem solving and algorithm development, flow of control, modular design using techniques that can be applied to common programming languages. Lecture two hours, technical activity and laboratory two hours.

CSC 10A. Accelerated Introduction to Programming Logic. 3 Units
Term Typically Offered: Fall, Spring

Introduction to computer science with an emphasis on programming concepts, logic, and methodology: computer hardware and software, problem solving and algorithm development, flow of control, and modular design. Accelerated and more in-depth study of programming concepts than CSC 10. Intended for computer science and computer engineering majors who have little or no programming experience. Lecture two house, technical activity and laboratory, two hours. Not open to students who have received credit for CSC 10. Prerequisite: Math 11

CSC 15. Programming Concepts and Methodology I. 3 Units
Prerequisite(s): CSC 10, or programming experience in a high-level programming language.
Term Typically Offered: Fall, Spring, Summer

Programming concepts using an object-oriented programming language. Introduction to methodologies for program design, development, testing, and documentation. Topics include program design, algorithm design, number systems, classes and objects, methods (functions), control structures, arrays, and interactive input/output. Lecture two hours, technical activity and laboratory two hours.

CSC 15W. Programming Methodology I Workshop. 1 Unit
Corequisite(s): CSC 15.
Term Typically Offered: Fall, Spring, Summer

Designed to assist students in developing a more thorough understanding of programming methodology and problem solving techniques. Activity two hours.
Credit/No Credit

CSC 20. Programming Concepts and Methodology II. 3 Units
Prerequisite(s): CSC 15.
Term Typically Offered: Fall, Spring

Application of object-oriented techniques for systematic problem analysis and specification, design, coding, testing, and documentation. Semester-long project approach emphasizing larger programs. Managing program complexity using abstraction. Introduction to algorithm analysis and Big-O notation. Advanced language features. Basic sorting and searching algorithms. Recursion. Lecture two hours, technical activity and laboratory two hours.

CSC 21. First Year Seminar: Becoming an Educated Person. 3 Units
General Education Area/Graduation Requirement: Understanding Personal Development (E)
Term Typically Offered: Fall only

Introduction to the nature and possible meanings of higher education, and the functions and resources of the University. Designed to help students develop and exercise fundamental academic success strategies and to improve their basic learning skills. Development of information competence and computer literacy. Students interact with fellow students and the seminar leader to build a community of academic and personal support.

CSC 22. Visual Programming in BASIC. 3 Units
Prerequisite(s): Intermediate Algebra.
Term Typically Offered: Fall, Spring

Computer Programming using Visual Basic. Topics include the Visual Basic Integrated Development Environment, visual user interface development, concepts of object-oriented programming, variables, control structures, arrays, functions, subroutines, strings, files, and database access. Applications will be created in areas such as business, games, and multimedia. Lecture two hours, technical activity and laboratory two hours.

CSC 25. Introduction to C Programming. 3 Units
Term Typically Offered: Fall only

Topics include: types, operators, control structures, input/output, arithmetic operations, the C library and preprocessor, functions and parameters, arrays, strings, pointers, and structures. Program design and style will be emphasized. Students will use a compiler.
Note: Students with significant programming experience should take CSC 60 rather than CSC 25. Lecture two hours, technical activity and laboratory two hours.

CSC 28. Discrete Structures for Computer Science. 3 Units
Prerequisite(s): MATH 26A or MATH 29; and CSC 20; CSC 20 may be taken concurrently.
Term Typically Offered: Fall, Spring

Introduction to the essential discrete structures used in Computer Science, with emphasis on their applications. Topics include: counting methods, elementary formal logic and set theory, recursive programming, digital logic and combinational circuits, real number representation, regular expressions, finite automata.
CSC 35.  Introduction to Computer Architecture.  3 Units
Prerequisite(s): CSC 15.
Term Typically Offered: Fall, Spring

Internal representation of numeric and non-numeric data, assembly level machine architecture, addressing modes, subroutine linkage, polled input/output, interrupts, high-level language interfacing, macros and pseudo operations. Lecture two hours, technical activity and laboratory two hours.

CSC 60.  Introduction to Systems Programming in UNIX.  3 Units
Prerequisite(s): CSC 20, CSC 35.
Term Typically Offered: Fall, Spring

Features of the C language commonly used in systems programming, application to systems programming in a UNIX environment. Topics include C preprocessor macros, I/O, bit-manipulation facilities, timesharing system concepts, file permissions, shell script programming, make files and source code control, basic system calls like fork and exec, pointers and dynamic memory allocation, libraries and relocation and linking concepts including assembler handling of symbol tables. Prior knowledge of a C like programming language is presumed.

CSC 80.  Web Development with HTML/XHTML and Tools.  3 Units
Prerequisite(s): CSC 8 or equivalent computer and Internet experience.
Term Typically Offered: Fall, Spring

Hands-on course covering the processes and guidelines for creating and customizing interactive webpages. Emphasis on use of HTML/XHTML, CSS, and tools to create webpages. HTML/XHTML syntax to create, format, and link documents. Use of tables, graphics, styles, forms, multimedia, and other features in webpages. Effective webpage design and website organization. Lecture two hours and technical activity and laboratory two hours.

CSC 107.  Introduction to Computer Science.  3 Units
Prerequisite(s): CSC 15.
Term Typically Offered: Fall, Spring

Introduction to the basic concepts and principles of computer science and to the software development process. Topics include topics include the history and evolution of computing, the role of computers in society, software development life cycle, top-down design, algorithms, data structures, abstraction, software reliability, and problem solving. Meets for three lecture hours per week.

CSC 110.  Introduction to Programming.  3 Units
Prerequisite(s): CSC 15.
Term Typically Offered: Fall, Spring

Introduction to computing through an object-oriented programming language. Topics include program design principles, the importance of careful design, and the use of modern software development processes. Meets for three lecture hours per week.

CSC 111.  Introduction to the World Wide Web.  3 Units
Prerequisite(s): CSC 1 and CSC 8 or CSC 8S or CSC 80; or instructor permission.
Term Typically Offered: Fall, Spring

Introduces students to the World Wide Web and basic HTML (Hypertext Markup Language). Students will learn how to create and maintain Web pages. May be taken twice for credit. Cross-listed as ART 142.

CSC 114.  Digital Evidence and Computer Crime.  3 Units
Prerequisite(s): CSC 1 and CSC 8 or CSC 8S or CSC 80; or instructor permission.
Term Typically Offered: Fall, Spring

Topics include technology and law, computer basics for digital investigations, network basics for digital investigations, investigation of computer crime, and the handling of digital evidence.

CSC 115.  Internet Security.  3 Units
Prerequisite(s): CSC 1 and CSC 8 or CSC 8S or CSC 80; or instructor permission.
Term Typically Offered: Summer only

Internet security problems and discussion of potential solutions: network vulnerabilities and attacks, secure communication and use of cryptography, Internet security protocols and tools to defend against network attacks, network intrusion detection, and wireless network security. Survey and use of software tools for network security.

CSC 116.  Cyber Forensics.  3 Units
Prerequisite(s): CSC 1 and CSC 8 or CSC 8S or CSC 80; or instructor permission.
Term Typically Offered: Summer only

Fundamentals of computer forensics and cyber-crime scene analysis including laws, regulations, and international standards; formal methodology for conducting security incident investigations; categories of electronic evidence. Projects involving digital forensic tools.

CSC 120.  Web Server Administration.  3 Units
Prerequisite(s): CSC 80.
Term Typically Offered: Fall, Spring

Managing and maintaining Web servers. Administering open source and commercial Web servers, Web hosting alternatives, professional standards and practices of website hosting, Web server installation, configuration, management, and security. Selecting and using technologies to support professional quality websites. Lecture two hours; technical activity and laboratory two hours.

CSC 121.  Client-Side Web Programming.  3 Units
Prerequisite(s): CSC 22, CSC 80 or equivalents; OR PCSC/CSC Major, CSC 60, CSC 130.
Term Typically Offered: Fall, Spring

CSC 122.  Web Database Applications.  3 Units
Prerequisite(s): CSC 10 or CSC 22; and CSC 80 or equivalent.
Term Typically Offered: Fall, Spring

Fundamentals of building effective database-driven web applications. Particular emphasis on database access via web interfaces. Introduction to database management systems, their structure and usage, SQL, integrating web applications with databases, design and implementation of dynamic web database applications.

CSC 123.  Web Application Development.  3 Units
Prerequisite(s): CSC 22, CSC 121, CSC 122, or equivalent experience; OR PCSC/CSC Major, CSC 60, CSC 134.
Term Typically Offered: Fall, Spring

Developing multi-tiered enterprise-level Web applications. Standards of Web services and other current Web technologies, including XML, AJAX, and server-side programming such as Java EE, .NET, or PHP. Development of Web applications such as those used for e-commerce, e-business, and content management. Format consists of two 1.5 hour lecture/lab sessions per week.

CSC 125.  3D Computer Modeling.  3 Units
Prerequisite(s): CSC 10 or ART 97 or equivalent.
Term Typically Offered: Fall only

Topics and techniques for creating 3D computer models and environments. Exercises, assignments, and projects designed to build skill levels with 3D computer modeling tools. Demonstrations and workshops in the use of 3D computer modeling software. Critiques, discussion and presentations to develop students’ conceptual grasp of 3D computer modeling and virtual reality environments. Example applications in art/ new media and computer gaming.

Note: May be taken twice for credit. Cross-listed as ART 142.
CSC 127. 3D Computer Animation. 3 Units
Prerequisite(s): ART 142 or CSC 126.
Term Typically Offered: Spring only

Creative skills and techniques for animating 3D computer-modeled objects/environments. Topics include animation techniques; keyframing and interpolation; deformation and morphing; path control; skeletal animation; model rigging and skinning; forward and inverse kinematics, constraints and IK solvers; particle systems; fluid, cloth, hair, and fur simulation; shape keys; and soft body animation. Emphasis on both skill development and creative application of modeling and animation techniques. Includes demos, in class and homework exercises, and self directed projects.
Cross-listed: ART 143.

CSC 130. Data Structures and Algorithm Analysis. 3 Units
Prerequisite(s): CSC 20, CSC 28, CSC 28 may be taken concurrently.
Term Typically Offered: Fall, Spring

CSC 131. Computer Software Engineering. 3 Units
Prerequisite(s): CSC 130; may be taken concurrently.
Term Typically Offered: Fall, Spring

Principles of Software Engineering covering the software development life cycle, including software requirements engineering (elicitation, modeling, analysis and specification), software design, software implementation and testing. Main topics include various software development process models, method and techniques for specifying requirements, architectural and detailed design specification, prototyping, top-down and bottom-up software implementation and testing. Topics also include project management, project documentation and the development of communication skills through written documentation and oral presentation.

CSC 132. Computing Theory. 3 Units
Prerequisite(s): CSC 28, CSC 130; CSC 130 may be taken concurrently.
Term Typically Offered: Fall, Spring

Introduction to computing theory with examples and applications. Automata and formal languages; language recognition and generation; language hierarchy; deterministic and non-deterministic finite automata; pumping lemma for regular languages; push-down automata and context-free grammars; language recognition; parsing techniques including recursive descent; Turing machines; computable and non-computable functions. Design and implementation of selected features of programming languages. Functional and logic programming paradigms.

CSC 133. Object-Oriented Computer Graphics Programming. 3 Units
Prerequisite(s): CSC 130, CSC 131.
Term Typically Offered: Fall, Spring

Introduction to computer graphics and advanced topics in object-oriented (OO) programming. The OO paradigm is used throughout, utilizing computer graphics as the vehicle for solidifying basic OO concepts, studying the implementation of event-driven systems, and for developing a thorough understanding of advanced OO concepts such as inheritance and polymorphism. Topics include fundamental concepts of object-oriented programming, software design patterns, graphic devices, line and surface drawing, simple 2D and 3D representation, and use of User Interface components.

CSC 134. Database Management Systems. 3 Units
Prerequisite(s): CSC 130.
Term Typically Offered: Fall, Spring

Entity-Relationship (ER) model; relational model; relational database design by ER-to-relational mapping; design of applications using database technology; SQL; schema definition, constraints, and queries; relational algebra; data normalization; access methods such as indexing and hash structures; introduction to transaction processing.

CSC 135. Computing Theory and Programming Languages. 3 Units
Prerequisite(s): CSC 28, CSC 35, CSC 130.
Term Typically Offered: Fall, Spring

Introduction to computing theory with examples and applications. Automata and formal languages; regular expressions; deterministic and non-deterministic finite automata; pumping lemma for regular languages; push-down automata and context-free grammars; language recognition; parsing techniques including recursive descent; Turing machines; computable and non-computable functions. Design and implementation of selected features of programming languages. Functional and logic programming paradigms.

CSC 136. Programming Languages. 3 Units
Prerequisite(s): CSC 35, CSC 132.
Term Typically Offered: Fall, Spring

Evolution and characteristics of programming languages. Scripting, procedural, object-oriented, functional and logic paradigms. Language specification; interpreters and compilers; virtual machines; parsing techniques. Design and implementation of selected features of programming languages. Programming languages used in the development of intelligent systems, with introduction to Artificial Intelligence. Trends in programming languages.

CSC 137. Computer Organization. 3 Units
Prerequisite(s): CSC 28, CSC 35, CSC 130
Term Typically Offered: Fall, Spring

Introduction to computer organization and architecture. Combinational devices, sequential and synchronized circuits, memory organization, CPU architecture and organization, bus structures, input/output, interrupts, DMA, memory hierarchy, introduction to instruction level parallelism, multithreading, and multiprocessing. Exposure to hardware security issues.

CSC 138. Computer Networks and Internets. 3 Units
Prerequisite(s): CSC 35, CSC 60, CSC 130
Term Typically Offered: Fall, Spring

Overview of the fundamentals of computer networks and connections between networks, from the physical layer up through peer-to-peer communications at the application level. Lower layer characteristics including serial vs. parallel, capacity issues, high-speed connections, LAN framing and error handling. LAN vs. WAN characteristics, network architecture and the ISO network model. Internetworking components including LANs, repeaters, routers, bridges, and gateways. Internet addresses, TCP/IP, and the Domain Name System. Common Internet client/server application protocols including SMTP and FTP. Client/Server programming involving sockets. World Wide Web characteristics including CGI and HTTP protocol. Web pages, Web browsers, Web servers, and Applets. Introduction to advanced Web issues such as Web security, search engine operations, and Web database operations.
Cross-listed: CPE 138; only one may be counted for credit.
CSC 139. Operating System Principles. 3 Units
Prerequisite(s): CSC 60 and CSC 130, and either CSC 137 or CPE 185
Term Typically Offered: Fall, Spring

Concepts, principles, fundamental issues, organization and structure of contemporary operating systems. Topics include processes, threads, concurrency, scheduling, inter-process communication and synchronization, deadlock, real and virtual memory management, device management, file systems, network and distributed operating systems, security, and protection.

CSC 140. Advanced Algorithm Design and Analysis. 3 Units
Prerequisite(s): CSC 130.
Term Typically Offered: Spring only

CSC 142. Advanced Computer Organization. 3 Units
Prerequisite(s): CSC 137 or CPE 166 and CPE 185.
Term Typically Offered: Fall, Spring

Design and performance issues of computers. Instruction set architecture, computer arithmetic, processor design, survey of contemporary architectures, interfacing I/O devices, hierarchical memory design and analysis, parallelism and multiprocessoring, distributed systems, techniques for enhancing performance, and an introduction to EDA tools for design and verification of computers. Design and simulation of a microcomputer in an HDL.
Note: Open to students with full CSC or CPE major standing only. Cross Listed: CPE 142; only one may be counted for credit.

CSC 143. Modeling and Experimental Design. 3 Units
Prerequisite(s): MATH 26B or MATH 31, STAT 50 or ENGR 115, and proficiency in a programming language.
Term Typically Offered: Not offered

Modeling and simulation techniques; Monte Carlo methods; queuing theory; model formulation, data collection and analysis, experimental design; model verification and validation.

CSC 151. Compiler Construction. 3 Units
Prerequisite(s): CSC 135
Term Typically Offered: Fall only

Practical approach to compiler design and implementation. Organization of a compiler, algorithms for lexical, syntactic and semantic analysis, recursive descent and/or LALR parsing, organization of symbol tables, error detection and recovery, object code generation. Modular design will be emphasized.

CSC 152. Cryptography. 3 Units
Prerequisite(s): CSC 60, CSC 130; and STAT 50 or ENGR 115
Term Typically Offered: Fall only

Introduction to design and analysis of cryptographic systems. Symmetric cryptography: Block ciphers and secure hash functions. Asymmetric cryptography: Key exchange and public-key systems. Authentication and encryption in an adversarial model. Simple cryptanalysis. Protocol design and analysis.

CSC 153. Computer Forensics Principles and Practices. 3 Units
Prerequisite(s): CSC 138 or CPE 138.
Term Typically Offered: Spring only

Fundamentals of computer forensics, cyber-crime scene analysis and electronic discovery. Technical and formal methodology for conducting security incident investigations; file systems and storage analysis, data hiding techniques, network forensics; projects involving using, understanding, and designing digital forensics tools; anti-forensics; legal issues and standards.

CSC 154. Computer System Attacks and Countermeasures. 3 Units
Prerequisite(s): CSC 138 or CPE 138.
Term Typically Offered: Fall only

Introduction to network and computer security with a focus on how intruders gain access to systems, how they escalate privileges, and what steps can be taken to secure a system against such attacks. Topics include: Perimeter defenses, intrusion detection systems, social engineering, distributed denial of service attacks, buffer overflows, race conditions, trojans, and viruses.

CSC 155. Advanced Computer Graphics. 3 Units
Prerequisite(s): CSC 133.
Term Typically Offered: Fall only

Modeling, viewing, and rendering techniques in 3D computer graphics systems. Topics include modeling systems and data structures; polygonal and parametric surface representation; transformations, windowing, clipping and projections in 3D; hidden surface removal algorithms; techniques for realism such as shading, shadows, highlights, and texture; fractals and procedural models; introduction to animation; hardware support for computer graphics; and the application of graphics principles to virtual reality systems and 3D games.

CSC 156. Operating System Pragmatics. 3 Units
Prerequisite(s): CSC 139.
Term Typically Offered: Fall, Spring

Application of operating system principles to the design and implementation of a multitasking operating system. Students will write an operating system for a computer platform. Topics include: scheduling of processes, control and allocation of computer resources, and user interfacing. Cross Listed: CPE 159; only one may be counted for credit.

CSC 157. Computer Game Architecture and Implementation. 3 Units
Prerequisite(s): CSC 130; CSC 133; MATH 26A or MATH 30; PHYS 5A or PHYS 11A.
Term Typically Offered: Spring only

Architecture and implementation of computer game systems. Topics include game engine architecture; screen management and rendering control; geometric models; algorithms and data structures for spatial partitioning, occlusion, and collision detection; real-time interactive 3D graphics and animation techniques; behavioral control for autonomous characters; simulation of physical phenomena; sound and music in games; optimization techniques; multi-player games and networking; game development tools and environments. Substantial programming and project work.
CSC 170. Software Requirements and Specification. 3 Units
Prerequisite(s): CSC 131.
Term Typically Offered: Spring only – odd years
Analysis and specification of functional and non-functional requirements for real-time and non-real-time software systems in the context of a software development lifecycle. Determining customer and user software requirements and ensuring that specifications are correct, complete, and testable. Includes modeling techniques, methods for representing real-time requirements, and the use of Computer-Aided Software Engineering (CASE) tools to illustrate analysis concepts.

CSC 171. Software Engineering Project Management. 3 Units
Prerequisite(s): CSC 131.
Term Typically Offered: Spring only – even years
Fundamental issues in the management and economics of a software engineering project in the context of the software development lifecycle. Topics include: techniques for project planning (budgeting and scheduling), controlling (including quality assurance and configuration management), organizing, staffing, and directing a software project (leadership and motivation); and contemporary issues in management.

CSC 174. Advanced Database Management Systems. 3 Units
Prerequisite(s): CSC 131, CSC 134.
Term Typically Offered: Fall only
Enhanced Entity-Relationship (EER) modeling; relational database design based on EER; SQL views; integrity constraints and triggers; stored procedures and functions; database programming techniques; query processing and optimization; transactions concurrency and recovery techniques; relational decomposition and normalization algorithms; database schema and data security.

CSC 176. Database Architecture and Optimization. 3 Units
Prerequisite(s): CSC 174.
Term Typically Offered: Spring only
Advanced object-relational systems, advanced catalog systems, security mechanisms, distributed database processing, advanced schema design-partitioning, introduction to data warehousing and data mining, materialized views, Internet technologies, parallel query processing, system utilities, database tuning, DBA tools and techniques.

CSC 177. Data Warehousing and Data Mining. 3 Units
Prerequisite(s): CSC 134 and STAT 50 or ENGR 115.
Term Typically Offered: Spring only
Data warehousing involves data preprocessing, data integration, and providing on-line analytical processing (OLAP) tools for the interactive analysis of multidimensional data, which facilitates effective data mining. Data mining is the automated extraction of hidden predictive information from databases. Data mining applies concepts and techniques from the fields of databases, machine learning, algorithms, information retrieval, and statistics. Topics include: data warehousing, association analysis, classification, clustering, numeric prediction, and selected advanced data mining topics.

CSC 179. Software Testing and Quality Assurance. 3 Units
Prerequisite(s): CSC 131.
Term Typically Offered: Spring only – even years
Testing, verification, validation, and control of real-time and non-real-time software systems in the context of a software development lifecycle. Topics include: unit, integration and system testing; verification and validation (V&V), quality assurance, metrics, and configuration management.

CSC 180. Intelligent Systems. 3 Units
Prerequisite(s): MATH 26B or MATH 31; STAT 50 or ENGR 115; CSC 130 and CSC 135.
Term Typically Offered: Spring only
Theory and implementation of a variety of techniques used to simulate intelligent behavior. Expert systems, fuzzy logic, neural networks, evolutionary computation, and two-player game-tree search will be covered in depth. Knowledge representation, pattern recognition, hybrid approaches, and handling uncertainty will also be discussed.

CSC 190. Senior Project: Part I. 2 Units
Prerequisite(s): Senior status, completion of CSC 130, CSC 131 and four additional 3-unit CSC upper-division courses that fulfill the major requirements (excluding CSC 192-195, 198, 199), and (GWAR Certification before Fall 09, or WPJ score of 70+, or at least a C- in ENGL 109M or ENGL 109W).
Term Typically Offered: Fall, Spring
First of a two-course sequence in which student teams undertake a project to develop and deliver a software product. Approved project sponsors must be from industry, government, a non-profit organization, or other area. Teams apply software engineering principles in the preparation of a software proposal, a project management plan and a software requirements specification. All technical work is published using guidelines modeled after IEEE documentation standards. Oral and written reports are required. Lecture one hour, laboratory three hours.

CSC 191. Senior Project-Part II. 2 Units
Prerequisite(s): CSC 190.
Term Typically Offered: Fall, Spring
Continuation of the group project begun in CSC 190. Teams apply software engineering principles to the design, implementation and testing of their software product. All technical work is published using guidelines modeled after IEEE documentation standards along with an appropriate user manual. Oral and written reports are required. Senior project is completed with the successful delivery, installation and demonstration of the software along with all approved documentation. Lecture one hour, laboratory three hours.

CSC 192. Career Planning. 1 Unit
Prerequisite(s): CSC 130 and three additional upper-division courses that fulfill major requirements with a C- grade or better (excluding CSC 190-195, CSC 198, and CSC 199).
Term Typically Offered: Fall, Spring
Designed to help students learn more about the labor market and opportunities in the Computer Science field. Students will examine their interests, consider their goals, and learn how to conduct an effective proactive job search. Strategies for long term career growth will be identified.
Credit/No Credit
CSC 194. Computer Science Seminar. 1 Unit
Prerequisite(s): Upper division or graduate status in CSC.
Term Typically Offered: Spring only

Series of weekly seminars on Computer Science topics. These topics cover subjects not normally taught in the course of a school year and they range from the very theoretical in Computer Science through applications to presentations by industry on working conditions, real world environment and job opportunities.

Note: May be repeated for credit.

CSC 195. Fieldwork in Computer Science. 1 - 4 Units
Prerequisite(s): Instructor permission.
Term Typically Offered: Fall, Spring

Directed observations and work experience in computer science with firms in the industry or public agencies. Supervision is provided by the instructional staff and the cooperating agencies.

Note: Faculty approval required. May be repeated for credit.

Credit/No Credit

CSC 195A. Professional Practice. 1 - 12 Units
Prerequisite(s): Instructor permission.
Term Typically Offered: Fall, Spring

Supervised employment in a professional engineering or computer science environment. Placement arranged through the Career Center.

Note: Requires satisfactory completion of the work assignment and a written report.

Credit/No Credit

CSC 195B. Professional Practice. 1 - 12 Units
Prerequisite(s): Instructor permission.
Term Typically Offered: Fall, Spring

Supervised employment in a professional engineering or computer science environment. Placement arranged through the Career Center.

Note: Requires satisfactory completion of the work assignment and a written report.

Credit/No Credit

CSC 196. Cloud and Mobile Computing Pragmatics. 3 Units
Prerequisite(s): CSC 134, CSC 138, and CSC 139
Introduction to cloud computing. Cloud services. Deployment options. The installation, configuration, and deployment of a cloud infrastructure based upon industrial standards. Step-by-step cloud setup as well as the development of scripts for automated deployment. The installation, building, deployment, testing, and provisioning of a multi-tier cloud based mobile application as a cloud service.

CSC 196U. Parallel Programming with GPUs. 3 Units
Prerequisite(s): CSC 60, CSC 130, CSC 137; and either MATH 30 or MATH 26A
Term Typically Offered: Fall, Spring

Parallel programming with emphasis on developing Graphics Processing Unit (GPU) computing applications. GPU architecture and programming model, mapping computations to parallel hardware, parallel computation patterns, parallel programming optimization techniques, application case studies.

CSC 198. Co-Curricular Activities in Computer Science. 1 - 3 Units
Term Typically Offered: Fall, Spring

Students will serve in leadership roles in computer science activities, provide tutoring or technical assistance in labs, assist instructors in grading coursework, or assist in other activities related to the subject matter and concerns of the department.

Credit/No Credit

CSC 199. Special Problems. 1 - 3 Units
Term Typically Offered: Fall, Spring

Individual projects or directed reading in specified topics in computer science.

Note: Open only to students who appear competent to carry on individual work; approval of faculty supervisor and advisor required. May be repeated for credit.

Credit/No Credit

CSC 201. Programming Language Principles. 3 Units
Prerequisite(s): Fully classified graduate status in Computer Science or Software Engineering.
Term Typically Offered: Fall, Spring

Notations for the specification of programming language syntax and semantics; attribute, translational, operational, axiomatic, algebraic, denotational, and action semantics. Applications of programming language syntax and programming language semantics. Use of meta languages to generate executable language definitions for language implementation, program transformation, program property analysis, and rapid software prototyping. Principles of logic, functional, and object-oriented programming languages.

CSC 204. Data Models for Database Management Systems. 3 Units
Prerequisite(s): Fully classified graduate status in Computer Science or Software Engineering.
Term Typically Offered: Fall, Spring

Database management system (DBMS) architecture; database file organizations and access methods; the relational model and relational algebra; SQL query language; introduction to query optimization; concurrent transaction processing and backup and recovery; applications using embedded SQL, object types, and stored procedures; database analysis and design notations: EER, UML, and XML; web database environments; database security and administration throughout course.

Note: Not intended for students who have completed CSC 174.

CSC 205. Computer Systems Structure. 3 Units
Prerequisite(s): Fully classified graduate status in Computer Science, Software Engineering or Computer Engineering.
Term Typically Offered: Fall, Spring

Overview of computer systems organization and design. Concepts of instruction set architecture, interactions of hardware-software interface, principles of performance analysis, processor design, instruction level parallelism, survey of contemporary architectures, hierarchical memory design and analysis, interfacing I/O devices, parallel processing and multiprocessing, and introduction to EDA tools and methodologies for computer systems design and verification.
Design and analysis of algorithms. Classical design paradigms including greedy, divide-and-conquer, dynamic programming, and backtracking algorithmic methods. Alternative paradigms of computing including parallel and numerical approaches. Theoretical limits of computation. Selected additional topics such as genetic, approximation, and probabilistic algorithms.

CSC 209. Research Methodology. 1 Unit
Prerequisite(s): Fully classified graduate status in Computer Science or Software Engineering, completion of at least 12 units of 200-level courses in Computer Science, and (GWAR Certification before Fall 09, or WPJ score of 70+, or at least a C- in ENGL 109M or ENGL 109W).
Term Typically Offered: Fall, Spring

Research methodology, problem formulation, and problem solving. Orientation to the requirements for Master's Thesis or Project. Presentations on various research topics. Credit/No Credit

CSC 212. Bioinformatics: Data Integration and Algorithms. 3 Units
Prerequisite(s): CSC 109, STAT 50, and graduate status; BIO 10 recommended.
Term Typically Offered: Fall, Spring

The application of information technology and computer science to biological problems, in particular to biomedical science issues involving genetic sequences. Algorithms and their applications to DNA sequencing and protein database search; tools and techniques for data integration to transform genetic sequencing data into comprehensible information to study biological processes.

CSC 214. Knowledge-Based Systems. 3 Units
Prerequisite(s): Fully classified graduate status in Computer Science or Software Engineering.
Term Typically Offered: Fall, Spring

Historical perspective of knowledge-based systems and their relationship to artificial intelligence. Concepts of knowledge representation and automated reasoning. Survey of expert systems in a variety of applications in engineering and other fields. Implementation of expert systems and expert system shells.

CSC 215. Artificial Intelligence. 3 Units
Prerequisite(s): Fully classified graduate status in Computer Science, Software Engineering or Computer Engineering.
Term Typically Offered: Fall, Spring

CSC 219. Machine Learning. 3 Units
Prerequisite(s): Fully classified graduate status in Computer Science, Software Engineering or Computer Engineering.
Term Typically Offered: Fall, Spring

Introduction to major paradigms and methods of machine learning. Inductive learning, explanation-based learning, classifier systems and genetic algorithms, analogical reasoning, case-based learning, connectionist learning, data driven approaches to empirical discovery, and basis of learning theory. Focus is on representative systems that have been built.

CSC 230. Software System Engineering. 3 Units
Prerequisite(s): Fully classified graduate status in Computer Science or Software Engineering; or Computer Engineering and CSC 131.
Term Typically Offered: Fall, Spring

Integration of managerial and technical activities in system engineering that control the cost, schedule, and technical achievement of the developing software system. Application of the principles, activities, tasks and procedures of system engineering and software engineering to the development of a software system.

CSC 231. Software Engineering Metrics. 3 Units
Prerequisite(s): Fully classified graduate status in Computer Science or Software Engineering.
Term Typically Offered: Fall, Spring

Software quality and quantity metrics in software engineering. Measurement theory and metrics. Metrics include management metrics, indirect and direct metrics and predictive metrics. Uses of metrics include software cost and schedule estimates, model calibration, and software productivity measurements. Metrics techniques include the Goal-Question-Metric approach, COCOMO, and function point analysis.

CSC 232. Software Requirements Analysis and Design. 3 Units
Prerequisite(s): Fully classified graduate status in Computer Science or Software Engineering.
Term Typically Offered: Fall, Spring

Software engineering requirements including elicitation, analysis, specification, verification and management. Emphasizes IEEE software engineering requirements and standards and the concept of operations (ConOps) document. Techniques include structured analysis, use cases and object-oriented analysis.

CSC 233. Advanced Software Engineering Project Management. 3 Units
Prerequisite(s): Fully classified graduate status in Computer Science or Software Engineering.
Term Typically Offered: Fall, Spring

Advanced methods and procedures for managing a software development project. Includes project planning, scheduling, and cost estimation, project organizational types, staffing and training considerations, leading and motivating computer personnel, and methods for measuring and controlling a project. Emphasizes IEEE software engineering management standards and keys to project success.
CSC 234. Software Verification and Validation. 3 Units
Prerequisite(s): Fully classified graduate status in Computer Science or Software Engineering, or Computer Engineering and CSC 131.
Term Typically Offered: Fall, Spring
Verification and validation (V & V) techniques to identify and resolve software problems and high-risk issues early in the software lifecycle. Application of V & V to all phases of the lifecycle process. Includes planning and reporting on the V & V effort. Topics also include software quality assurance and software testing.

CSC 235. Software Architecture. 3 Units
Prerequisite(s): Fully classified graduate status in Computer Science or Software Engineering.
Term Typically Offered: Fall, Spring

CSC 236. Formal Methods in Secure Software Engineering. 3 Units
Prerequisite(s): Fully classified graduate status in Computer Science or Software Engineering.
Term Typically Offered: Fall, Spring
Basic concepts of formal methods in secure software engineering; formal methods based software development models and methodologies; formal methods for software system specification, modeling, analysis, verification, information assurance and security; systems and tools for the application of formal methods in secure software engineering; advances of formal methods in secure software engineering.

CSC 237. Microprocessor Systems Architecture. 3 Units
Prerequisite(s): CSC 205.
Term Typically Offered: Fall, Spring
Microprocessor/microcomputer architecture and hardware/software interfacing design. RISC v. CISC architecture in-depth, case studies of several popular commercial advanced 32-bit microprocessors. Microcomputer firmware architecture is discussed and illustrated with detailed examples. Term project in which students specify, design and build the hardware and firmware of a computer system.

CSC 238. Human-Computer Interface Design. 3 Units
Prerequisite(s): Fully classified graduate status in Computer Science or Software Engineering.
Term Typically Offered: Fall, Spring
Issues involved in design of interaction between people and computers. Insight and experience in key issues of HCI design. Emphasis on identifying issues and tradeoffs in interaction design. Development and evaluation of alternative solutions to design problems.

CSC 239. Advanced Operating Systems Principles and Design. 3 Units
Prerequisite(s): CSC 205.
Term Typically Offered: Fall, Spring
Advanced concepts of concurrent processes, concurrent programming and operating systems. Virtual memory management systems, deadlock, file systems, operating system performance measurement and evaluation.

CSC 242. Computer-Aided Systems Design and Verification. 3 Units
Prerequisite(s): CSC 205 or CSC/EEE 273.
Term Typically Offered: Fall, Spring
Design and verification methodology using hardware description and verification languages (HDVLs). Advances in IC chip design; introduction to HDVLs such as System Verilog; HDVL language basics including data types, arrays, structures, unions, procedural blocks, tasks, functions, and interface concepts; design hierarchy; verification planning and productivity; verification infrastructure; guidelines for efficient verification of large designs; assertion-based verification; comprehensive computer-related design projects.

CSC 244. Database System Design. 3 Units
Prerequisite(s): CSC 174 or CSC 204.
Term Typically Offered: Fall, Spring
Topics in the design and implementation of database management systems. Database system concepts and architectures; query compiler, query processing algorithms, logical and physical query plans, query optimization; recovery, concurrency control; transaction management in centralized database management systems and distributed database management systems. Also exploration of current research directions, issues, and results related to databases and data management.

CSC 245. Performance Modeling and Evaluation. 3 Units
Prerequisite(s): Fully classified graduate status in Computer Science or Software Engineering.
Term Typically Offered: Fall, Spring
Performance and cost measures; software and hardware performance monitors; data reduction and evaluation; analytic and simulation models of hardware and program behavior; performance-cost trade-offs and resource allocation.

CSC 250. Computer Security. 3 Units
Prerequisite(s): Fully classified graduate standing in Computer Science, Computer Engineering, or Software Engineering.
Term Typically Offered: Fall, Spring
Principles and technologies behind computer security. Introduction to encryption and decryption; security mechanisms in computer programs, operating systems, databases, and networks; administration of computer security, and legal and ethical issues.

CSC 251. Principles of Compiler Design. 3 Units
Prerequisite(s): CSC 151 or CSC 201.
Term Typically Offered: Fall, Spring

CSC 252. Cryptography Theory and Practice. 3 Units
Prerequisite(s): Fully classified graduate status in Computer Science, Computer Engineering, or Software Engineering.
Term Typically Offered: Fall, Spring
CSC 253. Computer Forensics. 3 Units
Prerequisite(s): Fully classified graduate status in Computer Science, Computer Engineering, or Software Engineering.
Term Typically Offered: Fall, Spring

Structured security incident investigations internal and external; emphasis on analysis of electronic evidence and proper audit; utilization of scientific aids in obtaining information from computing devices; legal electronic evidence.

CSC 254. Network Security. 3 Units
Prerequisite(s): Fully classified graduate status in Computer Science, Computer Engineering, or Software Engineering.
Term Typically Offered: Fall, Spring

In-depth study of network security problems and discussion of potential solutions. Topics include: network vulnerabilities and attacks, secure communication, Internet security protocols and tools to defend against network attacks, network intrusion detection, and wireless network security. Survey and demonstration of software tools used for network security.

CSC 255. Computer Networks. 3 Units
Prerequisite(s): Fully classified graduate status in Computer Science, Software Engineering, or a Computer Engineering.
Term Typically Offered: Fall, Spring

Computer networking fundamentals with emphasis on higher level protocols and functions. Network design considerations, software design and layering concepts, interface design, routing and congestion control algorithms, internetworking, transport protocol design, and end-to-end communication, session and application protocols. Specific examples of commercial and international standards.

CSC 258. Distributed Systems. 3 Units
Prerequisite(s): CSC 204 and fully classified graduate status in Computer Science, Software Engineering, or Computer Engineering.
Term Typically Offered: Fall, Spring

Distributed system architectures, distributed object model, component-based design, time and global states, coordination and agreement, distributed transactions and concurrency control, replication, security, distributed multimedia systems, message passing and distributed shared memory, Web services and Service-Oriented Architecture (SOA), Grid computing. Emphasis on scalability, manageability, security, and dependability of distributed systems.

CSC 273. Hierarchical Digital Design Methodology. 3 Units
Prerequisite(s): CSC 205, CPE 64, or equivalent.
Term Typically Offered: Fall, Spring

Advanced logic modeling, simulation, and synthesis techniques. Topics include modeling, simulation, and synthesis techniques, using Hardware Description Language (HDL's), Register Transfer Level (RTL) representation, high-level functional partitioning, functional verification and testing, computer-aided logic synthesis, logical verification and testing, timing and delay analysis, automated place and route process, and design with Application Specific Integrated Circuits (ASICs) and programmable logic.
Cross Listed: EEE 273; only one may be counted for credit.

CSC 275. Advanced Data Communication Systems. 3 Units
Prerequisite(s): Fully classified graduate status in Computer Science, Software Engineering, or Computer Engineering.
Term Typically Offered: Fall, Spring

Fundamental concepts, principles and issues of data communication systems. The ISO/OSI reference model is used as a vehicle for discussion and emphasizes the lower layer of the model. Specific topics include: motivation and objectives, layered architectures, physical layer principles and protocols, data link and medium access control principles and protocols, circuit, packet and cell switching, local area network design principles and performance comparisons, high speed networking, introduction to wide area network architectures. Typical examples and standards are cited for point-to-point, satellite, packet radio and local area networks.

CSC 280. Advanced Computer Architecture. 3 Units
Prerequisite(s): CSC 205 and fully classified graduate status in Computer Science or Software Engineering.
Term Typically Offered: Fall, Spring

Introduction to parallel architecture covering computer classification schemes, fine and coarse grain parallelism, processor interconnections, and performance issues of multiprocessor systems. Includes parallel and pipelined instruction execution, structure of multiprocessor systems, memory hierarchy and coherency in shared memory systems, programming issues of multiprocessor systems, arithmetic pipeline design, and design for testability.
Cross Listed: EEE 280; only one may be counted for credit.

CSC 288. Special Topics in Computer Science - Software Engineering. 3 Units
Term Typically Offered: Fall, Spring

Contemporary topics in computer science will be offered as needed. Topics offered:

CSC 295. Fieldwork. 1 - 3 Units
Term Typically Offered: Fall, Spring

Directed observations and work experience in computer science with firms in the industry or public agencies. Supervision is provided by the instructional staff and the cooperating agencies.
Note: Faculty approval required. May be repeated for credit.
Credit/No Credit

CSC 299. Special Problems. 1 - 3 Units
Term Typically Offered: Fall, Spring

Any properly qualified student who wishes to pursue a problem of his own choice may do so if the proposed subject is acceptable to the member of the staff with whom he/she works and to his/her advisor.
Note: May be repeated for credit.
Credit/No Credit

CSC 500. Master's Thesis. 1 - 5 Units
Prerequisite(s): CSC 209; advanced to candidacy.
Term Typically Offered: Fall, Spring

Completion of a thesis approved for the Master’s degree.
Note: May be repeated for credit.
CSC 502. Master's Project. 1 - 2 Units
Prerequisite(s): CSC 209; advanced to candidacy.
Term Typically Offered: Fall, Spring
Completion of a project approved for the Master's degree.

Construction Management (CM)

CM 9. Construction Surveying and Layout. 3 Units
Prerequisite(s): CM 10, CM 20, CM 21 and either Math 26A or MATH 30; CM 21 and Math 26A or MATH 30 may be taken concurrently.
Corequisite(s): CM 21.
Term Typically Offered: Fall, Spring
Geomatics and the principles of surveying measurements for distance, direction, and elevation. Special emphasis on the application of surveying skills relevant to the field of construction, including building, bridge, and sitework layout techniques and procedures, establishment of reference line and grade, topographic mapping, and earthwork computations. Lecture two hours. Laboratory 3 hours.

CM 10. The Construction Industry. 1 Unit
Term Typically Offered: Fall, Spring
Introduction to the Construction Management program and the many facets of the construction industry and to the various career opportunities. The unique products of construction, the organizations involved, and the people that make it happen. Guest speakers. Lecture one hour.
Credit/No Credit

CM 20. Construction Materials and Processes. 3 Units
Prerequisite(s): CM 10, ENGL 1A; CM 10 may be taken concurrently.
Term Typically Offered: Spring only
Introduction to construction materials; to their properties in-place in completed projects, and to their characteristics that affect construction processes. The organizations, methods, equipment and safety considerations that are common to projects of all types and to all segments of the industry. Field trips. Lecture two hours; laboratory three hours.
Field trip(s) may be required.

CM 21. Construction Graphics. 3 Units
Prerequisite(s): ENGL 1A and CM 10; CM 10 may be taken concurrently.
Term Typically Offered: Fall only
Instruction and exercises in graphic techniques and procedures applicable to construction. Analysis of drawings in the civil, architectural, structural, mechanical, and electrical fields and how drawings affect construction planning. Freehand sketching. Isometric and oblique projections. Material quantity surveying. Lecture two hours; laboratory three hours.

CM 22. Construction Documents. 3 Units
Prerequisite(s): ENGL 1A, CM 20, and CM 21; CM 20 may be taken concurrently.
Term Typically Offered: Spring only
Analyzes construction contract documents. Technical and legal interpretations and implications to managers of the construction process. Quantity surveying. Lecture two hours; laboratory three hours.

CM 30. Engineering Mechanics--Statics. 3 Units
Prerequisite(s): MATH 26A or MATH 30; and PSYC 5A or PSYC 11A.
Term Typically Offered: Spring only
Introduction to the solution of engineering design problems. Concepts of units, vectors, equilibrium, forces, force systems, shear and moment diagrams. Lecture three hours.

CM 40. Properties of Construction Materials. 3 Units
Prerequisite(s): PHYS 5A.
Term Typically Offered: Fall only
Study of the engineering performance characteristics of materials. Covers testing concepts and procedures. Includes basic properties of metals, aggregates, cements, concrete, timber, asphalt, masonry and plastics with emphasis on construction applications. Lecture two hours; laboratory three hours.

CM 96A. Fundamentals of Construction Management. 1 Unit
Term Typically Offered: Fall, Spring
Introduction to the Construction Management program. Critical reading, thinking and writing for the construction profession. Introduction to visualization and graphic communication using software. Introduction to quantitative software commonly used in the construction industry.

CM 100. Legal Aspects of Construction. 1 Unit
Corequisite(s): CM 10, CM 20, CM 21 and either Math 26A or MATH 30; and PSYC 5A or PSYC 11A.
Term Typically Offered: Spring only
Application of advanced legal concepts to the construction process. Analyzes problems relating to contract formation, administration, and interpretation. Includes bidding and contract enforcement; litigation of disputes vs. arbitration; liability for negligence, warranty, and strict liability; safety; license law requirements; mechanics' liens and stop notices; bond rights and obligations. Lecture three hours.

CM 111. Construction Labor Relations. 3 Units
Term Typically Offered: Spring only
Study of federal and state labor law; labor unions, and their importance in the construction industry; and an analysis of the growth of open-shop construction. Employment law. Lecture three hours.

CM 120. Construction Operations and Methods Analysis. 3 Units
Prerequisite(s): CM 121.
Corequisite(s): CM 126
Term Typically Offered: Fall only
Introduction to the analysis and management of construction projects in terms of the work that must be performed in the construction process. Analyzes operations and methods using concepts and techniques, including video, that are applicable to all types of projects in all segments of the industry, variables affecting productivity. Safety as an integral part of project and operations management. Field trips. Lecture two hours; laboratory three hours.
Field trip(s) may be required.
CM 121. Fundamentals of Construction Estimating. 3 Units
Prerequisite(s): CM 22.
Corequisite(s): CM 120.
Term Typically Offered: Fall only

Study of the basic approaches to estimating the cost of construction projects from a managerial viewpoint. Types of estimates and methods; elements of cost, variables and costing concepts; analysis procedures for detailed estimates. Lecture two hours; laboratory three hours.

CM 124. Engineering Construction. 3 Units
Prerequisite(s): CM 125, CM 135.
Term Typically Offered: Fall only

Study of engineering construction projects with emphasis on equipment-paced operations including safety aspects. Engineering fundamentals and other factors that affect equipment selection and production. Amplification of recording and analysis techniques. Unit price contracts. Field trips. Lecture two hours; laboratory three hours. Field trip(s) may be required.

CM 125. Advanced Estimating and Bidding. 3 Units
Prerequisite(s): CM 120, CM 121.
Term Typically Offered: Spring only

Study of the concepts and practices involved in the total estimating and bidding process in construction, from initial project selection to submission of final bids. Covers considerations in project selection, sub-bid analysis, contingency and risk analysis, pricing concepts, bidding models, and an introduction to computer applications. A complete project estimate and bid is prepared by each student. Lecture two hours; laboratory three hours.

CM 126. Construction Project Management. 3 Units
Prerequisite(s): CM 125, CM 127.
Corequisite(s): CM 110.
Term Typically Offered: Fall only

Introduction to the study of Project Management as it is used on the larger construction project. Students study how construction contractors manage cost, time, scope, and quality. The theory of Project Management is developed and compared to management of the on-going business enterprise. Matrix and functional organizations are examined within the context of the industrial, commercial and heavy contract construction industries using the principles of the management process. Lecture three hours.

CM 127. Planning, Scheduling and Control. 3 Units
Prerequisite(s): CM 121.
Term Typically Offered: Spring only

Study of the concepts used in planning and controlling construction projects. Arrow, PERT, precedence, and linear scheduling methods; resource leveling; time-cost analysis; bar charts; and time-scaled diagrams. Manual procedures followed by computer applications. Lecture three hours.

CM 129. Senior Project. 3 Units
Prerequisite(s): CM 110, CM 111, CM 124, CM 126, HROB 101.
Term Typically Offered: Spring only

Consideration of technical, legal, business and human factors (including safety) in applying the functional approach to the management of construction organizations, projects, and operations. The individual construction professional in a competitive industry: personal and professional development, ethics, stress, physical and mental health. The industry and the construction professional in relation to the social and physical environments. Lecture three hours.

CM 130. Structures I -- Design Principles and Structural Steel Design. 3 Units
Prerequisite(s): CM 30, CM 40; CM 40 may be taken concurrently.
Term Typically Offered: Fall only

Introduction to structural design. Consideration of load conditions, stresses, strain, beam deflection and column action. Basic design of structural steel members with emphasis on systems used in practical situations. Beams, trusses, and columns are designed using the Uniform Building Code as a reference and the results are shown on detailed drawings and sketches. Lecture three hours.

CM 135. Soils and Foundations. 3 Units
Prerequisite(s): CM 130.
Term Typically Offered: Spring only

Study of the properties and behaviors of soils used as materials in construction. Index and physical properties of soils including compaction; permeability, compressibility, and shear strength. Methods of laboratory and field tests. Principles of foundation design, pavements, embankments and temporary soil support systems for trenches and cuts. Lecture two hours; laboratory three hours.

CM 136. Principles of Mechanical and Electrical Engineering. 3 Units
Prerequisite(s): PHYS 5B, CM 30.
Term Typically Offered: Fall only

Basic principles of thermodynamics with application to heating, ventilating and air conditioning systems. Introduction to electrical circuits and circuit analysis with construction applications. Lecture three hours.

CM 140. Structures II -- Timber and Formwork Design. 3 Units
Prerequisite(s): CM 130.
Term Typically Offered: Spring only

Basic design of structural timber members with emphasis on systems used in practical situations. Beams, trusses, and columns are designed using the Uniform Building Code as a reference and the results are shown on detailed drawings and sketches. Application of engineering principles to satisfy construction requirements that are not designed or shown in typical construction documents. Includes analysis and design of concrete form systems, shoring, and falsework, and construction dewatering. Lecture three hours.

CM 150. Structures III -- Reinforced Concrete and Reinforced Masonry. 3 Units
Prerequisite(s): CM 130.
Term Typically Offered: Fall only

Basic design concepts of reinforced concrete and reinforced masonry design. Topics and examples include design of beams, slabs, columns and walls. Students are required to demonstrate drafting ability. Assignments include design and drawings of various structural systems. Lecture three hours.

**CRJ 199. Special Problems.** 1 - 3 Units  
**Term Typically Offered:** Fall, Spring  
Individual projects or directed reading.  
**Note:** Open only to students competent to carry on individual work. Admission to this course requires approval of an instructor and the program coordinator.

**Credit/No Credit**

**Introduction to the nature and possible meanings of higher education and the functions and resources of the University.** Designed to help students develop and exercise fundamental academic success strategies and to improve their basic learning skills. Also provide students with an opportunity to interact with fellow students and the seminar leader and to build a community of academic and personal support.
CRJ 109. Media, Crime, and Criminal Justice. 3 Units
Prerequisite(s): CRJ 101 and CRJ 102; restricted to declared majors or chair permission.
Term Typically Offered: Fall only

Analyzes the social construction of crime by news and entertainment media and introduces criminal justice students to the manner in which the media influences and shapes crime in their own society and in the criminal justice system. Analyzes images of crime and the criminal justice system that are presented through the major mass media within America, including a detailed analysis of media institutions, American pop culture, and the construction of crime and justice. Exposes students to a new way of looking at crime problems and provide them with a deeper understanding of how crime and the criminal justice system are both socially constructed by the news and entertainment media.

CRJ 111. Women and the Criminal Justice System. 3 Units
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall only

Survey of the roles of women as offenders, victims and employees in the criminal justice system. Examines statistics, research and the literature as it relates to female crime. Evaluates current patterns and practices of law enforcement, criminal courts and corrections relative to women as offenders, victims, and employees.

CRJ 112. Gangs and Threat Groups in America. 3 Units
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall, Spring

Examination of criminal organizations in America. The problems posed by "anti-social groups," their structure and their history in contemporary American society. The spectrum of social sciences is employed in an examination of "illegal groups" and such issues as aggression and group dynamics. Styles such as street gangs, prison gangs and traditional organized crime are defined and studied.

CRJ 114. Sexual Offenses and Offenders. 3 Units
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall, Spring

Exploration of relevant factors and dimensions of sexual offenses and offenders related to the Criminal Justice system, its cliental and practitioners.

CRJ 115. Violence and Terrorism. 3 Units
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall, Spring

Systemically examines political violence, responses by government institutions to that violence and implications of both for the administration of justice. Content is structured along a continuum, ranging from small scale violence to mass violence - assassinations, terrorism by sub-national and transnational organizations, state terror and genocide. In recent years political violence has progressively drawn the American governmental institutions, particularly justice agencies, into the global picture of violence committed by both domestic and international terrorists.

CRJ 116. Restorative Justice and Conflict Resolution. 3 Units
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall, Spring

Examines concepts, principles, techniques of conflict resolution and restorative justice in contemporary US legal system, global peacebuilding, across cultures, and comparative justice practices. The centerpiece is a classroom simulation that introduces students to theoretic analysis and practical knowledge on resolution of conflicts and crime. Addresses nonviolent responses to inter/intra state and community conflicts. Topics include negotiation, mediation, victim offender reconciliation, alternative dispute resolution (ADR), circle sentencing, transitional justice, peace treaty, transformative justice, intergroup dialogues, etc.

CRJ 117. American Criminal Justice and Minority Groups. 3 Units
General Education Area/Graduation Requirement: GE AREA D, Race & Ethnicity Graduation Requirement (RE)
Term Typically Offered: Fall, Spring

Course examines the origins of racial/ethnic/gender/sex discrimination and disparities in the US justice system. Additionally, course provides a critical examination of the processes and outcomes of the justice system by reviewing the major theories of crime and number of minorities reported in crime data. Using discussions about various criminal justice policies and their impact on minority groups, the course assesses the changing dynamic of race relations and diversity in society and their influences on justice administration.

CRJ 118. Drug Abuse and Criminal Behavior. 3 Units
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall, Spring

Sociogenic review of the case histories and life styles of selected juvenile and adult offenders with a history of drug abuse. An inquiry into the drug scene, "street" drugs, an examination of people who have abused drugs and have been guilty of delinquent or criminal acts for the purpose of determining the known and identified relationships between drug abuse and crime, and probing the many unknown relationships. A sustained and disciplined examination of the main issues and problems by the use of case studies, discussion groups, and student involvement.

CRJ 121. The Structure and Function of the American Courts. 3 Units
Prerequisite(s): declared majors or minors or chair permission.
Term Typically Offered: Fall, Spring

Overview of the Federal and State court structures including jurisdiction, venue, roles of court participants, due process and post arrest procedures employed in adjudication, trial process, appellate review. Constitutional issues such as discretion, indigent rights, right to counsel, discovery, pleas, bail and preventive detention, competency, evidence suppression, double jeopardy, and speedy trial will also be addressed.

CRJ 123. Law of Arrest, Search and Seizure. 3 Units
Prerequisite(s): Restricted to declared majors or minors or department chair permission.
Term Typically Offered: Fall, Spring

Current and recent developments relating to arrest, searches, and seizures; study of constitutional rights predominately associated with the Fourth, Fifth, Sixth and Fourteenth Amendments as related to criminal justice and its administration – warrants, warrantless seizures, exclusionary rule, confession, eye-witness identification, electronic surveillance, entrapment, and state variance with federal rules. Case study method law course.
CRJ 121. Correlation Institutions. 3 Units
Prerequisite(s): CRJ 101, CRJ 102 and CRJ 130; restricted to declared majors or chair permission.
Term Typically Offered: Fall, Spring
Role and function of the correctional institution in the administration of criminal justice. A review of institutional procedures: reception, classification, program assignment, mass custody, treatment programs, and release, including parole and discharge. The inmate social system and its relationship to the official world that contains it. The following topics will receive special attention: the determinate sentence; the confinement of repetitively violent offenders; the death penalty and its impact on prison management, inmate social services; prison reform; and the stresses experienced by institutional personnel.

CRJ 126. Law of Evidence. 3 Units
Prerequisite(s): CRJ 121 and CRJ 123; restricted to declared majors or chair permission.
Term Typically Offered: Fall only
Law of evidence as codified and its complimentary interpretations by the courts. Topics include the admission and exclusion of evidence, relevance, the hearsay rule and its exceptions, the use of writings and demonstrative evidence, judicial notice, order of proof and presumptions, and issues relating to witness competency and privileges. Constitutional exclusions and their impacts are not covered.

CRJ 127. Juvenile Law. 3 Units
Prerequisite(s): CRJ 102 and CRJ 121; restricted to CRJ majors or chair permission.
Term Typically Offered: Fall, Spring
Overview of legal concepts and principles affecting the adjudication of delinquent children in juvenile and adult court systems, develops the ability to read and analyze difficult legal issues relating to juvenile law, and provides the information required to evaluate the effectiveness of the juvenile court system in the context of its stated rehabilitative goals and the potential impact of a shift in focus to a more retribution-oriented structure.

CRJ 128. Administrative Law for Public Safety Personnel. 3 Units
Prerequisite(s): CRJ 121 and CRJ 123; restricted to CRJ majors or chair permission
Term Typically Offered: Spring only
Administrative law is the study of the adjudicatory and law making processes that take place within administrative agencies of the executive branches of government. Further, it is a study of the legal relationship between those agencies and the legislature, the courts, and private parties. Particular attention will be paid to the Federal Administrative Procedures Act, and the California Administrative Procedure Act.

CRJ 130. Fundamentals of Corrections. 3 Units
Prerequisite(s): Restricted to declared CRJ majors or minors or department chair permission.
Term Typically Offered: Fall, Spring
Overview and critical analysis of contemporary correctional theory and practice. Comparison of mainline American corrections with historical, cross-cultural, philosophical and non-traditional views of corrections. Controversial issues in contemporary corrections, including prisoner rights, victimization, the death penalty, unions, institutional corrections, community corrections, future of corrections, correctional careers, and administration and staffing of correctional programs.
CRJ 144. Contemporary Issues in Police Administration. 3 Units
Prerequisite(s): CRJ 101 and CRJ 141; restricted to declared CRJ majors or chair permission.
Term Typically Offered: Fall, Spring

Roles of police in a democratic society; analysis of public disobedience to law; racial and ethnic group relationships with police; public, official, and police corruption; police discretion; professionalism; development of criminal intelligence.

CRJ 151. White Collar Crime. 3 Units
Prerequisite(s): Junior/Senior status, Criminal Justice or Fire Service Management major or chair permission
Term Typically Offered: Fall, Spring

Introduces students to a variety of white collar crime issues, including definitional complexities, the causes, frequency and impact of economic crime, and victim and offender profiles. Governmental corruption, organizational fraud, consumer and environmental offenses, anti-trust violations and international schemes will be covered. Students will also become familiar with methods used to investigate, prosecute and sentence white collar offenders. Policy considerations will be discussed for controlling national and international white collar crime.

CRJ 152. Interviewing and Detection of Deception. 3 Units
Prerequisite(s): CRJ 102; restricted to declared CRJ majors or chair permission.
Term Typically Offered: Fall, Spring

Principles and techniques of interviewing and detection of deception studied from communication, physiological and psycho-social points of view. Introduction to the use of the polygraph; laws pertaining to confessions and admissions.

CRJ 153. Advanced Criminal Investigation. 3 Units
Prerequisite(s): CRJ 102; restricted to declared CRJ majors or declared Forensic minor or have chair permission.
Term Typically Offered: Fall, Spring

Principles involved in the investigation of crimes; utilization of scientific aids in obtaining information from physical objects; concepts in obtaining information from and about people; concept of reconstruction of crime and profile of suspect; development of leads; investigative problems in major crimes; special problems in crime investigation.

CRJ 154. Introduction to Physical Evidence. 3 Units
Prerequisite(s): CRJ 102; restricted to declared CRJ majors or Forensic Investigation minor or chair permission.
Term Typically Offered: Fall, Spring

Provides an overview of the role of science in collecting and evaluating physical evidence as a component of the criminal investigation and legal processes. Various operations in the examination and interpretation of physical evidence are examined with emphasis on the role of science in supporting the investigator and in the litigation process. Suitable for both science and non-science majors.

CRJ 156. Introduction to Crime and Intelligence Analysis. 3 Units
Prerequisite(s): CRJ 101; must be a declared CRJ major or have chair permission.
Term Typically Offered: Fall, Spring

Introduction to crime and intelligence analysis with a special emphasis on those methods most often used in the study of crime and criminal behavior patterns. Students will acquire the knowledge and skills necessary toward understanding crime analysis, intelligence analysis and mapping geospatial data. Topics include theory, the history of crime analysis, crime analysis technologies, intelligence analysis, and types/functions of crime analysis.

CRJ 160. Justice and Public Safety Administration. 3 Units
Prerequisite(s): restricted to declared CRJ majors or minors or department chair permission.
Term Typically Offered: Fall, Spring

Examines the nature and development of public safety and criminal justice organizations in American society with attention to how the unique functions performed by these agencies has shaped and developed their nature. Particular emphasis is placed on understanding the unique problems generated by administration of bureaucratic, public agencies in a highly politicized environment. Examines the influence of social and political factors on justice and public safety organizations.

CRJ 162. Intergovernmental Relations, Finance and Budgeting for Public Safety Personnel. 3 Units
Prerequisite(s): CRJ 160 or PPA 100; Junior or Senior standing; must be a Criminal Justice or Fire Service Management Major.
Term Typically Offered: Fall only

An examination of the structure, organization and management of state and local government with particular attention to the interplay between governmental agencies that is focused on the operations and management of public safety agencies. Government leadership models, such as mayor and city manager will be examined. Finance, the state and local budgets, taxation, revenue and spending will be addressed.

CRJ 163. Leadership in Criminal Justice and Public Safety. 3 Units
Prerequisite(s): CRJ 160; restricted to declared CRJ majors or chair permission.
Term Typically Offered: Fall, Spring

Addresses role of leadership in shaping and directing complex justice and public safety organizations. Leadership styles, roles, communication, group dynamics and organizational culture are examined and applied to organizational maintenance, adaptation, and change. Also addresses the role of employee organizations and personal practices in shaping leadership options and styles in public agencies. Particular attention is focused on implementing leadership in the bureaucratic and public agencies typical to the fields of criminal justice and public safety administration.

CRJ 165. Planning for Justice and Public Safety. 3 Units
Prerequisite(s): CRJ 101, CRJ 102 and CRJ 160; restricted to declared CRJ majors or chair permission.
Term Typically Offered: Spring only

Addresses planning in complex justice and public safety organizations. Focuses on the role of planning in preparing for change, maximizing utilization of resources and addressing crime and public safety. Emphasis is placed on the use of planning to unify fragmented public agencies at multiple levels of government in preparing for disaster, controlling crime, and assuring public safety.
This course provides an understanding of history, theories, laws, and practices related to contemporary as well as future criminal justice/public safety personnel administration and practice.

**CRJ 167. Collective Bargaining and Arbitration Issues in Public Safety.**

**Prerequisite(s):** Must be a declared CRJ major or chair permission.

**Term Typically Offered:** Fall, Spring

This course is designed to provide the public safety student and/or criminal justice student, practitioner and/or administrator with an understanding of public safety personnel practices in the area of collective bargaining. Labor-management relations, dispute resolution, arbitration, and the various laws that govern labor-management relations, at all levels of government, will be covered.

**CRJ 168. Justice and Public Safety Information Systems.**

**Prerequisite(s):** Restricted to declared majors or chair permission.

**Term Typically Offered:** Fall, Spring

Introduction to criminal justice and public safety information systems. Provides a framework for understanding the needs, types, capabilities and applications of information systems to the field. Current uses are surveyed and future potential applications are examined.

**CRJ 169. Emergency Management.**

**Prerequisite(s):** CRJ 164; Criminal Justice or Fire Service Management major, or instructor permission.

**Term Typically Offered:** Fall, Spring

Course reviews the history of emergency management, the current systems in place to manage mitigation, preparedness, response and recovery and the coordination and communication required to do so. Diverse responses to various emergencies will be presented with detailed examination of the roles of various levels of government and integration required. The formal declaration of emergencies and federal aid procedures, agencies involved and their administration will be covered.

**CRJ 170. Human Trafficking and Slavery.**

**Prerequisite(s):** Junior/Senior level and CRJ majors only; or department chair permission.

**Term Typically Offered:** Fall, Spring

The course explores the international and domestic legal framework that defines human trafficking and slavery and analyzes the major theories and current research on related causes and risk factors. The role of involvement of transnational organized criminal groups and vulnerability of social groups are discussed. Lastly, the course provides a critical analysis of effective strategies in victim identification, protection, prosecution, and prevention as instrumental components in assessment of crime control policy.

**CRJ 172. Comparative Criminal Justice Systems.**

**Prerequisite(s):** Junior status; restricted to declared CRJ majors or chair permission.

**Term Typically Offered:** Fall, Spring

Examines representative criminal justice systems from a variety of nations with emphasis on the role of history, culture, social and political values and economic institutions in shaping institutions of justice including law, police, courts, corrections, and juvenile justice systems and practice. Attention is paid to conflict and cooperation between criminal justice systems and ideologies that occur when peoples of different cultures and systems are in close proximity.

**CRJ 174. Criminal Justice Systems of the Future.**

**Term Typically Offered:** Fall, Spring

Societal structures, definitions of deviance and criminal behavior, social problems related to criminality, the nature of systems for handling criminals and sanctions in future societies.

**CRJ 176. Security Systems.**

**Prerequisite(s):** CRJ 101 and CRJ 102; restricted to declared CRJ majors or chair permission.

**Term Typically Offered:** Fall, Spring

Purposes, functions and historical development of industrial security in the U.S. Co-responsibilities of security personnel and line supervisors; principles of physical security, document protection, pilferage prevention and employee programs for plant and inventory protection. Survey of related laws and cooperating agencies of government.

**CRJ 181. Topics in Criminal Justice.**

**Prerequisite(s):** CRJ 100 and CRJ 110; must be a CRJ major.

**Term Typically Offered:** Fall, Spring

Topics of interest to criminal justice students and faculty will be offered as the need arises.

**Note:** May be repeated provided the topic is different.

**CRJ 190. Contemporary Issues in Criminal Justice.**

**Prerequisite(s):** CRJ 101, CRJ 102, CRJ 121, CRJ 123, CRJ 130, CRJ 141, CRJ 160; restricted to declared CRJ majors or chair permission with senior status, and GWAR certification before Fall 09; or WPJ score of 80+; or 3-unit placement in ENGL 109M or ENGL 109W; or 4-unit placement in ENGL 109M or ENGL 109W and co-enrollment in ENGL 109X; or WPJ score 70 or 71 and co-enrollment in ENGL 109X.

**General Education Area/Graduation Requirement:** Writing Intensive Graduation Requirement (WI)

**Term Typically Offered:** Fall, Spring

Examination of current issues in criminal justice with an emphasis on the application of law, management, practice and ethics to analysis of contemporary criminal justice policy. The culminating event for criminal justice majors with an emphasis upon written and oral communication, research and analytical thinking.

**CRJ 191. Topics in Criminal Justice Administration.**

**Prerequisite(s):** CRJ 101 and CRJ 102; restricted to declared CRJ majors or chair permission.

**Term Typically Offered:** Fall, Spring
CRJ 195. Internship. 1 - 6 Units
Prerequisite(s): Restricted to declared majors or chair permission and senior status
Term Typically Offered: Fall, Spring
Supervised work and experience in justice or public safety related agencies designed to expand the student's understanding of techniques, procedures and problems that occur in these agencies. Supervision provided by both faculty and agency personnel.
Note: may be repeated for credit
Credit/No Credit

CRJ 196. Experimental Offerings in Criminal Justice. 2 - 4 Units
Prerequisite(s): Restricted to declared majors or minors or instructor permission.
Term Typically Offered: Fall, Spring
To be offered in the various fields of Criminal Justice in response to student needs.

CRJ 196A. The Mentally Ill Individual in the Criminal Justice System. 3 Units
Term Typically Offered: Fall, Spring
Overview and analysis of how mentally ill individuals interface with the criminal justice system, from first contacts with the police, to their entry into the jails, courts, and prisons, and then reentry into the community via parole and probation. The history of how the mentally ill became so embedded in the criminal justice system, whether mental illness has become criminalized, evidence-based mental health programs, and treatment for this population will be covered.

CRJ 196B. Law of Homeland Security and Emergency Management. 3 Units
Term Typically Offered: Fall, Spring
Current and historical developments relating to the laws surrounding homeland security and emergency management. Topics include the legal framework for the U.S. domestic preparedness and national incident management system, the role of the military in emergency response and homeland security, and the legal jurisdiction and authority of federal, state, and local public safety, as well as private sector institutions, in terrorism prevention and response. Course utilizes cases, statutes, executive orders, government reports, and scholarly research.

CRJ 196R. Offender Rehabilitation. 3 Units
Prerequisite(s): Department permission, Junior/Senior status.
Term Typically Offered: Fall, Spring
This course focuses on research, training and supervision through service learning. Students will be taught about the scientific literature on offender rehabilitation, and the practical information on how to work with a small caseload of offenders in a Reentry center using a cognitive behavioral approach in a one-to-one format. Students will gain training in Cognitive Behavioral Therapy.
Credit/No Credit

CRJ 196S. Ethics and the Criminal Justice System. 3 Units
Prerequisite(s): CRJ Majors or department chair permission
Term Typically Offered: Fall, Spring
Purpose of course is to learn various ethical considerations within the criminal justice system. Course will briefly explore the classical, philosophical foundations of ethics and proceed into surveying modern, ethical decision-making among the various criminal justice components. Criminal justice system ethics and decision-making of the police, prosecution, courts, corrections, and probation/parole from a managerial standpoint and a line perspective will be examined and critiqued. Emphasis will be placed on viable, practical solutions to ethical conundrums.

CRJ 198. Co-Curricular Activities. 1 - 3 Units
Prerequisite(s): Permission of the sponsoring professor and the Division Chair.
Term Typically Offered: Fall, Spring
Co-Curricular activities related to the subject matters and intellectual concerns of the Division of Criminal Justice, including service learning, related community service assignments, and service on University and community policy making bodies.
Credit/No Credit

CRJ 199. Special Problems. 1 - 3 Units
Prerequisite(s): Restricted to declared CRJ majors or chair permission and senior status.
Term Typically Offered: Fall, Spring
Individual projects or directed reading, open only to those students who appear competent to carry on individual work.
Credit/No Credit

CRJ 200. Research Methods in Criminal Justice. 3 Units
Prerequisite(s): Classified graduate status, satisfactory completion of a basic statistics course.
Term Typically Offered: Fall, Spring
Research theory and methodology in Criminal Justice; research designs; conceptual models; design and preparation of Master's thesis prospectus.
Note: Graduate Writing Intensive (GWI) course.

CRJ 201. Advanced Research Design and Data in Criminal Justice. 3 Units
Prerequisite(s): CRJ 200
This course provides applied explanations of advanced research designing, use of data development strategies, and techniques for effective data analysis using statistical software. Topics generally covered include: (1) issues and techniques in advanced research design with emphasis on theory testing and hypothesis formulation; (2) measurement, data collection strategies, reliability and validity of measures and results, sampling, surveys; and, (3) examination of qualitative versus quantitative research techniques, working with observational data, field research issues, and triangulation.
Note: Required core course
CRJ 205. Criminal Justice Policy Analysis. 3 Units
Prerequisite(s): Graduate status, CRJ 200, CRJ 255, and CRJ 260, which may be taken concurrently; or instructor permission; GWAR certification before Fall 09, WPJ score of 70+, or at least a C- in ENGL 109 M/W.
Term Typically Offered: Fall, Spring
Examination of responses of the criminal justice system to major current issues with attention to factors influencing their effects; review of uses and limitations of various responses; appraisal of the consequences of various criminal justice policy alternatives.

CRJ 207. Criminal Justice Research and Program Evaluation. 3 Units
Prerequisite(s): CRJ 200, CRJ 201, CRJ 255 and CRJ 260
Term Typically Offered: Fall, Spring
Systematic review of selected evaluations of major criminal justice programs, demonstration projects, experiments, and innovations; introduction to basic techniques of interpretation and analysis of research findings to determine outcomes.

CRJ 210. Critical Examination of Law and Justice. 3 Units
Prerequisite(s): CRJ 200, CRJ 201, CRJ 255 and CRJ 260
Term Typically Offered: Fall, Spring
Examines the historical, theoretical, and practical developments that gave rise to the dominance of legal formalism in the American legal tradition. Examines the multiple challenges to that model, including legal realism, the sociology of law, critical legal studies, and critical race theory. Will critically examine the intersection of the American legal tradition with issues concerning the possibility and implementation of social justice strategies in diverse, and increasingly global contexts.

CRJ 220. Politics of Crime Legislation. 3 Units
Prerequisite(s): Graduate status, CRJ 200, CRJ 255, and CRJ 260, which may be taken concurrently; or instructor permission; GWAR certification before Fall 09, WPJ score of 70+, or at least a C- in ENGL 109 M/W.
Term Typically Offered: Fall, Spring
Familiarizes students with the legislative process, the performance of the legislature as it relates to the handling of crime bills and the role of interest groups and politics in the process of initiating and passing laws. Topics include: theoretical models of lawmaking, factors in legislative decision-making, the politics of crime legislation, ethics in politics, and how people influence and use the legislative process.

CRJ 230. The Prison. 3 Units
Prerequisite(s): CRJ 200, CRJ 201, CRJ 255 and CRJ 260
Term Typically Offered: Fall, Spring
Contemporary penal institutions will be studied using the literature in the social sciences, the biographies of prisoners, and the writings of prison critics.

CRJ 231. Graduate Seminar in Corrections. 3 Units
Prerequisite(s): CRJ 200, CRJ 201, CRJ 255 and CRJ 260
Term Typically Offered: Fall, Spring
Provides a historical analysis and discussion of the current state of corrections and correctional management. Theories of punishment will be addressed and management techniques will be covered. Goes beyond concepts of institutionalized corrections to explore modern correctional alternatives, correctional policy and special topics relevant to corrections.

CRJ 233. Psychodynamics of Confinement. 3 Units
Prerequisite(s): CRJ 200, CRJ 201, CRJ 255 and CRJ 260
Term Typically Offered: Fall, Spring
Examination of current conditions of confinement; review of confinement related factors common to populations in penal institutions, military installations, mental hospitals, prisoner of war camps, and concentration camps; investigation into the broader implications of conditions of confinement for society; survey of practical strategies for developing and implementing standards for confined populations.

CRJ 240. Contemporary Issues in Policing. 3 Units
Prerequisite(s): CRJ 200, CRJ 201, CRJ 255 and CRJ 260
Term Typically Offered: Fall, Spring
In-depth study of contemporary issues in policing in the U.S., including management, organization and issues confronting law enforcement at federal, state and local levels.

CRJ 250. Comparative Analysis of the Criminal Justice System. 3 Units
Prerequisite(s): CRJ 200, CRJ 201, CRJ 255 and CRJ 260
Term Typically Offered: Fall, Spring
Examination of alternative systems for criminal justice provides a basis for improved understanding of organizational and functional components within given sociopolitical environments. Through comparison of formal and operational levels, decision-making processes are made explicit with reference to historical, legal, social, and economic parameters in the administration of justice.

CRJ 251. White-Collar Crime. 3 Units
Prerequisite(s): CRJ 200, CRJ 201, CRJ 255 and CRJ 260
Term Typically Offered: Fall, Spring
Examines the underlying theories and the diverse nature of white-collar crime. Studies offenses associated with corporations, occupations, governments, enterprises and individuals. Examines the offenders and the organizational culture that facilitates criminal action. Topics include embezzlement, political corruption, employee theft, fraud, computer crime, and environmental crime. Study consequences for victims, offender characteristics and the theoretical explanations for the decisions by criminals to commit white-collar crimes.

CRJ 252. Violence and Victims. 3 Units
Prerequisite(s): CRJ 200, CRJ 201, CRJ 255 and CRJ 260
Term Typically Offered: Fall, Spring
Comprehensive survey of the literature on violence emphasizing high-fear crimes; the repetitively violent criminal; the emerging field of victimology; improved delivery of social services to victims; juvenile gangs; and the response of criminal justice agencies to urban violence.

CRJ 255. Crime, Criminology and Criminal Justice. 3 Units
Prerequisite(s): Classified graduate status.
Term Typically Offered: Fall, Spring
Study of major criminological theories, their ideological premises and basic assumptions, interrelationships, and the shifts in emphasis and focal points in the study of criminality. Analyzes post and current applications of theory to the intervention strategies of crime control.
CRJ 256. Historical Analysis of the American Criminal Justice System. 3 Units
Prerequisite(s): Classified graduate status
Term Typically Offered: Fall, Spring
Evolution and historical foundations of American patterns of crime and violence, criminological theories, law enforcement structures and philosophies, the adult criminal justice system, and the juvenile system will be traced through three distinct historical periods: Colonial and Early American Roots, 1609-1814; Creating the American Criminal Justice System, 1815-1900; and Reforming the Criminal Justice System, 1900 to present.

CRJ 257. The Nature Of Terrorism. 3 Units
Prerequisite(s): CRJ 200, CRJ 201, CRJ 255 and CRJ 260
Term Typically Offered: Fall, Spring
Theoretical approaches to the study of terrorism and analysis of terrorist theory and strategies. Topics include operational definitions of terrorism, typologies of terrorism, threat analysis of terrorism in the U.S., and responses of the criminal justice system to acts of hostage-taking, bombing, political murder, and narco-terrorism.

CRJ 260. Management of Complex Justice Organizations. 3 Units
Prerequisite(s): Classified graduate status.
Term Typically Offered: Fall, Spring
Description, analysis, solution, and synthesis of contemporary management problems in criminal justice organizations; presentation and exemplary implementation of management concepts significant to criminal justice organizations; review of case studies for management problem recognition, and the study of operational systems.

CRJ 262. Administration of Juvenile Justice. 3 Units
Prerequisite(s): CRJ 200, CRJ 201, CRJ 255 and CRJ 260
Term Typically Offered: Fall, Spring
Theoretical and empirical study of the cause and control of delinquent behavior. Assessment of policies and practices of agencies involved in juvenile justice including the impact of recent federal and state legislation.

CRJ 266. Personnel Administration in Justice Organizations. 3 Units
Prerequisite(s): CRJ 200, CRJ 201, CRJ 255 and CRJ 260
Term Typically Offered: Fall, Spring
Provides an in depth understanding of the history, theories, laws, processes, issues and unique environment shaping contemporary personnel administration in a variety of criminal justice agencies.

CRJ 267. Criminal Justice Issues in Collective Bargaining and Arbitration. 3 Units
Prerequisite(s): Classified graduate status; CRJ 200, CRJ 255, CRJ 256 and CRJ 260; or chair permission
Term Typically Offered: Fall, Spring
Designed to provide the criminal justice practitioner and administrator with an understanding of criminal justice labor-management relations and collective bargaining and difference resolution, along with conflict resolution practices as applied to inmate-custody and control situations.

CRJ 289. Criminal Justice Systems of the Future. 3 Units
Prerequisite(s): CRJ 200, CRJ 201, CRJ 255 and CRJ 260
Term Typically Offered: Fall, Spring
Societal structures, definitions of deviance and criminal behavior, social problems related to criminality, the nature of systems for handing criminal and sanctions in future societies.

CRJ 295. Internship. 3 Units
Prerequisite(s): Classified graduate status
Term Typically Offered: Fall, Spring
Supervised graduate student placement in selected criminal justice agencies with emphasis on research and evaluation project assignments. Credit/No Credit

CRJ 296A. The Mentally Ill Individual in the Criminal Justice System. 3 Units
Prerequisite(s): Graduate student status
Term Typically Offered: Fall, Spring
A critical analysis of how mentally ill individuals interface with the criminal justice system, from first contacts with the police, to their entry into the jails, courts, prisons, and then reentry into the community via parole and probation. Current and historical topics about the mentally ill will be explored via an in-depth analysis of the current literature regarding the mentally ill in the criminal justice system, which will be reviewed and critiqued.

CRJ 296K. Emergency Management. 3 Units
Prerequisite(s): Graduate status; CRJ 200, CRJ 255, CRJ 256 and CRJ 260 or chair permission.
Term Typically Offered: Fall, Spring
Introduction to the authority, organization, responsibilities, challenges, and issues related to emergency management in California and the U.S., examines the implications of citizen involvement in preparation for and management of natural and man-made disasters. Graduate students will consider impact of terrorism on democratic governance issues and potential future trends and issues.

CRJ 299. Special Problems. 1 - 3 Units
Prerequisite(s): CRJ 200, CRJ 201, CRJ 255 and CRJ 260
Term Typically Offered: Fall, Spring
Individual projects or directed reading. Open only to students who are competent to carry on individual work. Credit/No Credit

CRJ 500. Culminating Experience. 3 Units
Prerequisite(s): Advanced to candidacy.
Term Typically Offered: Fall, Spring
Completion of a thesis or project approved for the Master's degree. A thesis requires an original contribution to knowledge in a traditional research format. A project is a significant undertaking of a pursuit appropriate to the profession. It must evidence originality and independent thinking, appropriate form and organization and a rationale.
CRJ 501. Culminating Experience: Thesis/Project Development. 3 Units
Prerequisite(s): Advancement to candidacy.
Term Typically Offered: Fall, Spring

Provides students with an opportunity to develop a foundation for their culminating experience. Students will complete the initial components of their project or thesis including the Statement of the Problem, Literature Review, and Human Subjects application. Students are expected to read assigned materials and engage in weekly discussions about their progress and experience with other students, the instructor, and their advisor (as needed).
Credit/No Credit

CRJ 502. Culminating Experience: Thesis or Project. 3 Units
Prerequisite(s): Advanced to candidacy; satisfactory completion of CRJ 501.
Term Typically Offered: Fall, Spring

Completion of a thesis or project approved for the Master's degree. A thesis requires an original contribution to knowledge in a traditional research format. A project is a significant undertaking of a pursuit appropriate to the profession. It must evidence originality and independent thinking, appropriate form and organization and a rationale.
Credit/No Credit

Dance (DNCE)

DNCE 1A. Jazz Dance Level IA. 2 Units
Theory and practice of basic beginning jazz techniques.
Note: May be repeated for up to 4 units of credit.

DNCE 1B. Jazz Dance Level IB. 2 Units
Continued theory and practice of beginning jazz techniques.
Note: Does not satisfy degree requirements for major; all students welcome. May be repeated for up to 4 units of credit.

DNCE 1C. Jazz Dance Level IC. 2 Units
Further theory and practice of beginning jazz techniques.
Note: May be repeated for up to 4 units of credit.

DNCE 2A. Contemporary Dance Level IA. 2 Units
Introduction to the history and techniques of the contemporary dance and modern dance tradition through basic dance principles and aesthetics including the introduction to contemporary movement to develop and improve strength, flexibility, balance, coordination and creative expression.
Note: Does not satisfy degree requirements for major; all students welcome.

DNCE 2B. Contemporary Dance Level IB. 2 Units
Continues the introduction of the history and techniques of contemporary dance and the modern dance tradition through deepened study of basic dance principles and aesthetics including the continued practice of contemporary movement to continue the development and improvement of strength, flexibility, balance, coordination and creative expression.
Note: Does not satisfy degree requirements for major; all students welcome.

DNCE 2C. Contemporary Dance Level IC. 2 Units
Further introduction to the history and techniques of the contemporary dance and modern dance tradition through further study of basic contemporary dance principles and aesthetics including the further practice of contemporary movement for the deepened development and improvement of strength, flexibility, balance, coordination and creative expression.
Note: Does not satisfy degree requirements for major; all students welcome.

DNCE 3A. Ballet Level IA. 2 Units
Introduction to the history and development of traditional ballet techniques. Students will study ballet principles and aesthetics and continue to learn basic ballet movement, vocabulary, and skills.
Note: Does not satisfy degree requirements for major; all students welcome.

DNCE 3B. Ballet Level IB. 2 Units
This course provides, continued introduction to the history and development of traditional ballet techniques. Students will study ballet principles and aesthetics and continue to learn basic ballet movement, vocabulary, and skills.
Note: Does not satisfy degree requirements for major; all students welcome.

DNCE 3C. Ballet Level IC. 2 Units
This course provides a further introduction to the history and development of traditional ballet techniques. Students will expand upon their earlier study of ballet principles and aesthetics and continue to learn basic ballet movement, vocabulary, and skills.
Note: Does not satisfy degree requirements for major; all students welcome.

DNCE 4A. Tap Dance Level IA. 2 Units
Introduction to fundamental tap dance skills including basic steps, history and vocabulary, and style development.
Note: May be repeated for up to 4 units of credit. Satisfies degree requirement; all students welcome.

DNCE 4B. Tap Dance Level IB. 2 Units
Continued introduction to fundamental tap dance skills including a deepened study of basic steps, history and vocabulary, and continued style development.
Note: May be repeated for up to 4 units of credit. Satisfies degree requirements; all students welcome.

DNCE 4C. Tap Dance Level IC. 2 Units
Further introduction to fundamental tap dance skills including an expanded study of basic steps, history and vocabulary, and further style development.
Note: May be repeated for up to 4 units of credit. Satisfies degree requirements; all students welcome.

DNCE 5A. Mexican Folklorico Level IA. 2 Units
Introduction to dances typically and traditionally performed by Mexican and Latin Americans exploring the interrelationship of dance culture to historical events, holidays, and people throughout the Americas and with opportunities to learn folk dances representative of specific regions of Mexico and Latin America.
Note: May be repeated for up to 4 units of credit. Satisfies degree requirements; all students welcome.
DNCE 5B. Mexican Folklorico Level IB. 2 Units
Continued introduction to dances typically and traditionally performed by Mexican and Latin Americans with deepened exploration of the interrelationship of dance culture to historical events, holidays, and people throughout the Americas and with further study of folk dances representative of specific regions of Mexico and Latin America.
Note: May be repeated for up to 4 units of credit. Satisfies degree requirement, all students welcome.

DNCE 5C. Mexican Folklorico Dance Level IC. 2 Units
Further introduction to dances typically and traditionally performed by Mexican and Latin Americans with expanded exploration of the interrelationship of dance culture to historical events, holidays, and people throughout the Americas and with further study of folk dances representative of specific regions of Mexico and Latin America.
Note: May be repeated for up to 4 units of credit. Satisfies degree requirement, all students welcome.

DNCE 6A. Hip Hop Level IA. 2 Units
Introduction to the fundamentals of Hip Hop and Urban dance skills, including basic steps, history, and vocabulary.
Note: May be repeated for up to 4 units of credit. Does not satisfy degree requirement, all students welcome.

DNCE 6B. Hip Hop Level IB. 2 Units
Continues the introduction of the fundamentals of Hip Hop and Urban dance skills, with a deepened study of basic steps, history, and vocabulary.
Note: May be repeated for up to 4 units of credit, does not satisfy degree requirement, all students are welcome.

DNCE 6C. Hip Hop Level IC. 2 Units
Further introduction of the fundamentals of Hip Hop and Urban dance skills, with an expanded study of basic steps, history, and vocabulary.
Note: May be repeated for up to 4 units of credit, does not satisfy degree requirement, all students are welcome.

DNCE 11A. Jazz Dance Level IIA. 2 Units
Theory and practice of current jazz techniques including continued study of movement vocabulary with an emphasis on the different jazz styles. Instructor with dance faculty representatives will audition students during first week of class for proper placement.
Note: May be repeated for up to 4 units of credit. Satisfies degree requirements, all students welcome. Audition during first week of classes, all students welcome.

DNCE 11B. Jazz Dance Level IIB. 2 Units
Continued theory and practice of current jazz techniques including the continued study of movement vocabulary with an emphasis on the different jazz styles. Instructor with dance faculty representatives will audition students during first week of class for proper placement.
Note: May be repeated for up to 4 units of credit. Satisfies degree requirements, all students welcome. Audition during the first week of classes, all students welcome.

DNCE 11C. Jazz Dance Level IIC. 2 Units
Further expanded theory and practice of current jazz techniques including the deepened study of movement vocabulary with an emphasis on the different jazz styles. Instructor with dance faculty representatives will audition students during first week of class for proper placement.
Note: May be repeated for up to 4 units of credit. Satisfies degree requirements, all students welcome. Audition during the first week of classes, all students welcome.

DNCE 12A. Contemporary Dance Level IIA. 2 Units
Examination of theories of the contemporary dance and modern dance tradition that develops proficiency in performing intermediate level contemporary dance techniques from an intellectual and kinesthetic understanding. Instructor with dance faculty representatives will audition students during first week of class for proper placement.
Note: May be repeated for up to 4 units of credit. Satisfies degree requirements, all students welcome. Audition during first week of classes, all students welcome.

DNCE 12B. Contemporary Dance Level IIB. 2 Units
Continued examination of theories of the contemporary dance and modern dance tradition that continues the proficiency in performing intermediate level contemporary dance techniques with a deepened intellectual and kinesthetic understanding. Instructor with dance faculty representatives will audition students during first week of class for proper placement.
Note: May be repeated for up to 4 units of credit. Satisfies degree requirements, all students welcome. Audition during first week of classes, all students welcome.

DNCE 12C. Contemporary Dance Level IIC. 2 Units
Further examination of theories of the contemporary dance and modern dance tradition that further expand the proficiency in performing intermediate level contemporary dance techniques from a deeper intellectual and kinesthetic understanding. Instructor with dance faculty representatives will audition students during first week of class for proper placement.
Note: May be repeated for up to 4 units of credit. Satisfies degree requirements, all students welcome. Audition during first week of classes, all students welcome.

DNCE 13A. Ballet Level IIA. 2 Units
Understand and demonstrate proficiency of Ballet movement and vocabulary including different styles while learning the importance of proper anatomical alignment, collaboration of foot and arm positions, and appreciation of classical musical accompaniment. Instructor with dance faculty representatives will audition students during first week of class for proper placement.
Note: May be repeated for up to 4 units of credit. Satisfies degree requirements, all students welcome. Audition during first week of classes, all students welcome.

DNCE 13B. Ballet Level IIB. 2 Units
Continued understanding and deepened demonstration of proficiency of Ballet movement and vocabulary including different styles while learning the importance of proper anatomical alignment, collaboration of foot and arm positions, and appreciation of classical musical accompaniment. Instructor with dance faculty representatives will audition students during first week of class for proper placement.
Note: May be repeated for up to 4 units of credit. Satisfies degree requirements, all students welcome. Audition during first week of classes, all students welcome.
DNCE 13C.   Ballet Level IIC.  
Further understanding and expanded demonstration of proficiency of Ballet aesthetics through Ballet movement and vocabulary including different styles while learning the importance of proper anatomical alignment, collaboration of foot and arm positions, and appreciation of classical musical accompaniment. Instructor with dance faculty representatives will audition students during first week of class for proper placement.

Note: May be repeated for up to 4 units of credit. Satisfies degree requirements, all students welcome. Audition during first week of classes, all students welcome.

DNCE 14A.   Tap Dance Level IIA.  
Development and refinement of intermediate tap skills and vocabulary through the study of historical and current tap styles. Instructor with dance faculty representatives will audition students during first week of class for proper placement.

Note: May be repeated for up to 4 units of credit. Satisfies degree requirements, all students welcome. Audition during first week of classes, all students welcome.

DNCE 14B.   Tap Dance Level IIB.  
Continued development and refinement of intermediate tap skills and vocabulary through the deepened study of historical and current tap styles. Instructor with dance faculty representatives will audition students during first week of class for proper placement.

Note: May be repeated for up to 4 units of credit. Satisfies degree requirements, all students welcome. Audition during first week of classes, all students welcome.

DNCE 14C.   Tap Dance Level IIC.  
Further development and refinement of intermediate tap skills and vocabulary through the expanded study of historical and current tap styles. Instructor with dance faculty representatives will audition students during first week of class for proper placement.

Note: May be repeated for up to 4 units of credit. Satisfies degree requirements, all students welcome. Audition during first week of classes, all students welcome.

DNCE 21.   First Year Seminar: Becoming an Educated Person.  
General Education Area/Graduation Requirement: Understanding Personal Development (E)

Term Typically Offered: Fall, Spring

Introduction to the nature and possible meanings of higher education, and the functions and resources of the University. Designed to help students develop and exercise fundamental academic success strategies and to improve their basic learning skills. Students will have the opportunity to interact with fellow classmates and the seminar leader to build a community of academic support and personal support.

Prerequisite(s): DNCE 1A or DNCE 1B or DNCE 1C or DNCE 2A or DNCE 2B or DNCE 2C or instructor permission.

Term Typically Offered: Fall only

Experiential course exploring the musical elements utilized by the dancer, choreographer, and teacher of dance including a survey of music history and vocabulary; rhythms and theory; musical and dance phrasing; and dance performance musicality. This course fulfills requirements for the Dance Major and Dance Minor, non-dance major or minor students welcome.

DNCE 111A.   Jazz Dance Level IIIA.  
Advanced training in the theory and practice of jazz techniques. Instructor with dance faculty representatives will audition students during first week of class for proper placement.

Note: May be repeated for up to 4 units of credit. Satisfies degree requirements, all students welcome. Audition during first week of classes, all students welcome.

DNCE 111B.   Jazz Dance Level IIIB.  
Continued training at the advanced level in the theory and practice of Jazz Dance techniques. Instructor with dance faculty representatives will audition students during first week of class for proper placement.

Note: May be repeated for up to 4 units of credit. Satisfies degree requirements, all students welcome. Audition during first week of classes, all students welcome.

DNCE 111C.   Jazz Dance Level IIIC.  
Further advanced training at a deepened level for the theory and practice of Jazz techniques. Instructor with dance faculty representatives will audition students during first week of class for proper placement.

Note: May be repeated for up to 4 units of credit. Satisfies degree requirements, all students welcome. Audition during first week of classes, all students welcome.

DNCE 112A.   Contemporary Dance Level IIIA.  
Advanced training in the theory and practice of Contemporary Dance techniques and Modern Dance Traditions. Instructor with dance faculty representatives will audition students during first week of class for proper placement.

Note: May be repeated for up to 4 units of credit. Satisfies degree requirements, all students welcome. Audition during first week of classes, all students welcome.

DNCE 112B.   Contemporary Dance Level IIIB.  
Continued training at the advanced level in the theory and practice of Contemporary Dance techniques and Modern Dance Traditions. Instructor with dance faculty representatives will audition students during first week of class for proper placement.

Note: May be repeated for up to 4 units of credit. Satisfies degree requirements, all students welcome. Audition during first week of classes, all students welcome.

DNCE 112C.   Contemporary Dance Level IIIC.  
Further advanced training at a deepened level for the theory and practice of Contemporary Dance techniques and Modern Dance Traditions.

Instructor with dance faculty representatives will audition students during first week of class for proper placement.

Note: May be repeated for up to 4 units of credit. Satisfies degree requirements, all students welcome. Audition during first week of classes, all students welcome.

DNCE 113A.   Ballet Level IIIA.  
Advanced training in the theory and practice of Ballet including proper alignment, collaboration of foot and arm positions, and appreciation of classical musical accompaniment. Instructor with dance faculty representatives will audition students during first week of class for proper placement.

Note: May be repeated for up to 4 units of credit. Satisfies degree requirements, all students welcome. Audition during first week of classes, all students welcome.
DNCE 113B. Ballet Level IIIB. 2 Units
Continued training at the advanced level in the theory and practice of Ballet including proper alignment, collaboration of foot and arm positions, and appreciation of classical musical accompaniment. Instructor with dance faculty representatives will audition students during first week of class for proper placement. 
Note: May be repeated for up to 4 units of credit. Satisfies degree requirements, all students welcome. Audition during first week of classes, all students welcome.

DNCE 113C. Ballet Level IIIC. 2 Units
Prerequisite(s): Instructor permission
Further refinement within the proficiency of performing Ballet techniques while expanded intellectual and kinesthetic understanding of different Ballet styles which will be attained through the further emphasis of anatomy and the expanded building of the bodily strength and endurance through barre and center work.
Note: May be repeated for up to 4 units of credit. Satisfies degree requirements, all students welcome. Audition during first week of classes, all students welcome.

DNCE 118. Dance Improvisation. 2 Units
Prerequisite(s): DNCE 1A or DNCE 1B or DNCE 1C or DNCE 2A or DNCE 2B or DNCE 2C or instructor permission.
Term Typically Offered: Spring only
Exploration of the creation of movement through improvisation. Students will simultaneously explore and create, while spontaneously performing inner-directed movement without intellectual censorship.
Note: May be repeated for up to 4 units of credit. Satisfies degree requirements, all students welcome. Audition during first week of classes, all students welcome.

DNCE 120. Dance Composition I. 2 Units
Prerequisite(s): DNCE 118 or instructor approval
Term Typically Offered: Fall only
An exploration of the principle elements and processes utilized in the choreographic process.
Note: Satisfies degree requirements, all students welcome.

DNCE 122. Dance Composition II. 2 Units
Prerequisite(s): DNCE 120 or instructor permission.
Term Typically Offered: Fall, Spring
An in-depth exploration of the concepts, approaches, and processes used to further develop a stylistic approach to Dance Composition.
Note: Satisfies degree requirements, all students welcome.

DNCE 130. Appreciation and History of Dance. 3 Units
General Education Area/Graduation Requirement: Arts (Area C1)
Term Typically Offered: Fall, Spring
Survey in the appreciation and history of dance and the relationship of dance to the fine and liberal arts in Western Civilization. Emphasis upon the history of ballet; American modes of expression: modern and jazz forms.
Note: Non-activity.

DNCE 131. Dance Cultures Of America. 3 Units
General Education Area/Graduation Requirement: Ethnicity Graduation Requirement (RE), Arts (Area C1)
Term Typically Offered: Fall, Spring
Survey course in the appreciation and understanding of dance cultures in America. The relationship of dance to the identity and expression of different cultural groups in the U.S. will be examined. Jazz, modern, and ballet from a multicultural perspective will be the focus of the class.
Note: Non-activity.

DNCE 132. African-Caribbean Dance. 3 Units
General Education Area/Graduation Requirement: Race & Ethnicity Graduation Requirement (RE), Arts (Area C1)
Term Typically Offered: Fall, Spring
Introduction to the rich dance cultures of the Caribbean. Students will learn the different dances of Haiti, Cuba, Jamaica and Trinidad as they relate to their function in secular and religious culture, including the study of the Dunham Dance Technique.
Note: May be repeated for up to 6 units of credit.

DNCE 142. Dance Science and Somatics. 3 Units
Prerequisite(s): Upper division standing, or instructor permission.
The study of skeletal structure, joint and muscle function, and the mechanics of movement geared specifically for dancers and movement practitioners. Incorporated into the course will be the study of embodied awareness practices - Somatics. The structural and energetic connections of the body will be explored within a context of both ease and efficiency of movement as well as creative expression.
Note: May be repeated for up to 6 units of credit. Satisfies degree requirement, all students welcome.

DNCE 143. University Dance Company. 1 Unit
Term Typically Offered: Fall, Spring
Participation in the University Dance Company includes preparation, rehearsal, and performance for a departmental production with possible off campus performances for advertising, community engagement, and choreographic/ scholarly festivals.
Note: Admission by audition only, this course is approximately 40 hours of participation including mandatory weekly class, weekly rehearsals and culminating performance. Fulfills requirement for Dance Major and elective for Dance Minor, all students welcome to audition.

DNCE 150. Dance Theory and Criticism. 3 Units
Prerequisite(s): DNCE 122, DNCE 130, DNCE 131, instructor permission.
Term Typically Offered: Fall only
Exploration of the contemporary theories and philosophies of movement, specifically in the dance genres of modern and jazz. Also explores personal aesthetics and how to look at dance from a critical writing and oral presentation perspective. The role of the audience as well as the critic will be assessed and students will learn to evaluate content of movement in relation to its intention, motivation, and delivery.
DNCE 160. Creative Dance for Children.  3 Units  
Term Typically Offered: Spring only  
Exploration of creative dance as it applies to young children, including exploration of non-locomotor and locomotor movement patterns through problem solving and guided discovery techniques.

DNCE 190. Capstone Dance Project.  2 Units  
Prerequisite(s): DNCE 150  
Participation and creative research in the rehearsal, production, and performance of a public dance production. Students will synthesize all major course materials to individually create a new choreographic work and collaboratively produce the Senior Dance Concert as their capstone project. Fulfills requirements for Dance Major.  
Note: Dance Majors Only or Instructor Permission.

Deaf Studies (DEAF)

DEAF 51. American Sign Language 1.  3 Units  
Term Typically Offered: Fall, Spring  
Students will learn basic vocabulary and grammar of American Sign Language. Upon completion of this course, students will be able to exchange basic information about themselves and their families such as their names, where they live, and their interests. Through out-of-class readings, in-class discussions and demonstrations, and experiences within the deaf community, students are exposed to elements of the deaf culture and community.  
Note: Taught in ASL without voice.

DEAF 52. American Sign Language 2.  3 Units  
Prerequisite(s): DEAF 51 or equivalent.  
General Education Area/Graduation Requirement: Humanities (Area C2), Foreign Language Graduation Requirement  
Term Typically Offered: Fall, Spring  
Students will continue to expand vocabulary and concepts acquired in DEAF 51. Expansion of conversational range includes talking about other people and activities, giving directions, and making requests. Students develop discourse skills appropriate for establishing connections with deaf acquaintances and handling a variety of interruptions. Through in-class discussions/demonstrations, course readings, and out-of-class field experience, students are exposed to elements of the deaf culture and community.  
Note: Taught in ASL without voice.

DEAF 53. American Sign Language 3.  4 Units  
Prerequisite(s): EDS 52 or equivalent.  
General Education Area/Graduation Requirement: Foreign Language Graduation Requirement  
Term Typically Offered: Fall, Spring  
Students will expand communicative repertoire developed in DEAF 52 to talk about people and places in a contextually-reduced framework. Students learn to describe places, objects, and events. Students develop basic narrative skills to tell about past events. Through in-class discussions/demonstrations, course readings, and out-of-class field experience, students are exposed to elements of the deaf community and culture.  
Note: Taught in ASL without voice.

DEAF 54. American Sign Language 4.  4 Units  
Prerequisite(s): DEAF 53.  
Term Typically Offered: Fall, Spring  
Students will build upon communicative skills developed in EDS 154 to develop and expand on their abilities to discuss parts of the body and health conditions, tell a personal narrative about themselves and moments in their and others’ lives, as well as to retell and translate simple stories into ASL.

DEAF 55. American Sign Language 5.  4 Units  
Prerequisite(s): DEAF 154 or instructor permission.  
Term Typically Offered: Fall, Spring, Summer  
Students will develop increased fluency in their expressive and receptive abilities in fingerspelling through in-class practice and viewing of videotaped narratives. Students will also reinforce their abilities to utilize ASL numbering systems for time, money, measurements, and game scores, amount others.  

DEAF 57. ASL Classifiers.  2 Units  
Prerequisite(s): DEAF 53; may be taken concurrently  
Term Typically Offered: Fall, Spring  
Students will develop increased understanding of the types and uses of classifiers in ASL and develop further abilities to utilize this component of ASL in their expressive and receptive signing abilities through in-class practice, viewing of videotaped narratives, and individual practice outside of class.

DEAF 59. Beyond Deafness: Exploration of Non-locomotor and Locomotor Movement.  3 Units  
Term Typically Offered: Spring only  
Course introduces students to topics central to the deaf and deaf community, including audiology, education, culture, and history. Utilizing readings, lectures and group discussion, students will learn about the anatomy and causes of deafness, early intervention and education of deaf children, communication strategies and their effectiveness, the deaf as a cultural group and deaf/hearing relationships. Upon course completion, students will understand deaf individuals and their community in a holistic perspective and apply this knowledge toward further studies into the deaf culture and community.

DEAF 56. ASL Fingerspelling and Numbers.  1 Unit  
Prerequisite(s): DEAF 52  
Term Typically Offered: Fall, Spring  
Students will develop increased fluency in their expressive and receptive abilities in fingerspelling through in-class practice and viewing of videotaped narratives. Students will also reinforce their abilities to utilize ASL numbering systems for time, money, measurements, and game scores, amount others.

DEAF 60. Introduction to Deaf Studies.  3 Units  
General Education Area/Graduation Requirement: GE AREA D  
Term Typically Offered: Fall, Spring  
Principles, methods and techniques of manual communication with deaf people using American Sign Language. Emphasis on the continuation of developing advanced manual communication skills with a focus on techniques for informing others of factual information and instruction about rules and methods for students who will work or interact with adult deaf persons. Continuation of the analysis of the culture of deafness with emphasis on participation in the community.  
Note: Taught in ASL without voice.

DNCE 150. Creative Dance for Children.  3 Units  
Term Typically Offered: Fall, Spring  
Exploration of creative dance as it applies to young children, including exploration of non-locomotor and locomotor movement patterns through problem solving and guided discovery techniques.

DNCE 154. Creative Dance for Children.  3 Units  
Term Typically Offered: Fall, Spring  
Exploration of creative dance as it applies to young children, including exploration of non-locomotor and locomotor movement patterns through problem solving and guided discovery techniques.
DEAF 161. Deaf History. 3 Units
Prerequisite(s): DEAF 60; may be taken concurrently.
Term Typically Offered: Fall, Spring, Summer.
An overview of the education of the deaf from prehistoric times to the present will be provided. Roots of current trends and events in deaf education will be explored, with projections for the future. Current issues such as mainstreaming, cochlear implants, communication modalities for instruction and others are discussed in both a historical context and from a deaf perspective.

DEAF 162. Deaf Culture and Community. 3 Units
Prerequisite(s): DEAF 60; may be taken concurrently.
Term Typically Offered: Fall, Spring, Summer.
Course introduces students to deaf people as a cultural and linguistic minority in America through coverage of sociolinguistic, anthropological, and historic issues in the development of deaf culture and community in America and worldwide. Utilizing readings, lectures and group discussion, topics will include: theories of culture; language use; cross-cultural interaction and intercultural processes, and deaf literature and art. Upon course completion, students will understand current and past educational, legal and medical policies and their impact on deaf and hard-of-hearing people.

DEAF 163. ASL Literature. 3 Units
Prerequisite(s): DEAF 57, DEAF 60, DEAF 154, DEAF 161, DEAF 162, and DEAF 164.
Term Typically Offered: Spring only.
Students will be exposed to a number of ASL stories on videotape, learn several different forms of ASL literature and develop their own stories and narratives in each format. They will understand the effects of genre, style, perspective, and other artistic techniques on ASL storytelling, and utilize similar techniques in their developed stories. Students may perform their stories for a general audience.

DEAF 164. Sign Language Structure and Usage. 3 Units
Prerequisite(s): DEAF 154 or instructor permission.
Term Typically Offered: Fall, Spring, Summer.
Examines origins and linguistic structure of American Sign Language (ASL). Cross-linguistic comparisons with spoken and signed languages of other countries will be made. Students will learn aspects of ASL phonology, morphology and syntax. Sociolinguistic aspects of ASL usage in regard to gender, ethnicity, geographical region and educational status will be discussed. Conducted entirely in American Sign Language.

DEAF 165. Seminar: Current Issues in the Deaf-World. 2 - 5 Units
Prerequisite(s): DEAF 60, DEAF 154, DEAF 161, and DEAF 162.
Term Typically Offered: Fall, Spring.
This course will explore a specific theme of interest to faculty and students within the program, with course content changed each semester. Selected topics will touch upon issues of special concern and interest to the Deaf community such as genetics, multicultural issues, media representations of deafness, theatre and performance art, visual arts, and other subjects which may arise in the future. Course will consist of readings, discussion, independent research, and viewing of various media as appropriate.
Note: May be repeated when different topic is offered.

DEAF 166. Experiences in the Deaf Community. 3 Units
Prerequisite(s): DEAF 155, DEAF 161, DEAF 162, and DEAF 164.
Term Typically Offered: Fall, Spring, Summer.
This course links active participation in the Deaf community to the content of previous Deaf Studies courses. In particular this course examines how to be a good ally within the Deaf community in the midst of a context of power, privilege and difference. Following a Service Learning model, student teams will collaborate on various service projects contributing to the Deaf community. In addition, some students may be assigned volunteer placements serving the Deaf community.

DEAF 199. Special Problems. 1 - 3 Units
Term Typically Offered: Fall, Spring.
Individual projects designed especially for students capable of independent study.
Note: Departmental petition required.
Credit/No Credit

Decision Sciences (DS)

DS 101. Data Analysis for Managers. 3 Units
Prerequisite(s): MATH 24, STAT 1; must be a business pre-major, business major (any concentration), or business minor, and have at least sophomore standing.
Term Typically Offered: Fall, Spring.
Second course in business statistics that focuses on the application of statistical methods to business problems. Emphases are placed on case studies, data analysis, model building techniques, statistical reasoning, and communications of statistical results. A statistical computer package will be used in the course.

DS 133. Multivariate Business Statistics. 3 Units
Prerequisite(s): DS 101.
Term Typically Offered: Fall, Spring.
Data analysis involving multivariate statistical methods, including ANOVA, MANOVA, multivariate and logistic regression, discriminant analysis, cluster analysis, principle components analysis, and factor analysis, and facilitated through statistical software. Focus on problem solving in the business environment.

Economics (ECON)

ECON 1A. Introduction to Macroeconomic Analysis. 3 Units
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall, Spring.
Introductory inquiry into the workings and interrelationships of the aggregate economic system. The primary focus is on total production and its distribution, employment and price levels, and the forces influencing them. Other considerations are the roles of government, the monetary sector, and related areas.

ECON 1B. Introduction to Microeconomic Analysis. 3 Units
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall, Spring.
Introductory microeconomic analysis of the workings of supply and demand in the determination of price, resource allocation, and distribution. Markets are analyzed as they affect economic efficiency and income distribution.
ECON 100A. Intermediate Macroeconomic Theory. 3 Units
Prerequisite(s): ECON 1A, ECON 1B, and MATH 24 or MATH 26A or MATH 30 with a minimum "C" grade.
Term Typically Offered: Fall, Spring
Analysis of the determinants of the aggregate level of output, income, employment and prices.

ECON 100B. Intermediate Microeconomic Theory. 3 Units
Prerequisite(s): ECON 1B and MATH 24 or MATH 26A or MATH 30 with a minimum "C" grade.
Term Typically Offered: Fall, Spring
Analysis of household and firm behavior as the foundation of supply and demand.

ECON 101. History of Economic Thought. 3 Units
Prerequisite(s): ECON 1A, ECON 1B.
Term Typically Offered: Fall, Spring
Analysis of the development of economic theory from the predecessors of Adam Smith through John Maynard Keynes. The contributions made to the discipline by its principal figures are compared and evaluated.

ECON 104. Introduction to the United States Economy. 3 Units
Term Typically Offered: Fall, Spring
One semester survey of the principles of economics, basic methods of economic analysis, and their application to public policy and current events.
Note: Not open to students who have had ECON 1A or ECON 1B or those majoring in economics.

ECON 110. Cost Benefit Analysis. 3 Units
Prerequisite(s): ECON 1B and MATH 24 or MATH 26A or MATH 30 with a minimum "C" grade.
Term Typically Offered: Fall, Spring
Examines the rationale for government provision of goods and services and presents cost-benefit analysis as a method to evaluate public participation in a market economy.

ECON 112. European Economic History. 3 Units
General Education Area/Graduation Requirement: Humanities (Area C2)
Term Typically Offered: Fall, Spring
Analysis and evaluation of the economic forces and institutions shaping European economic development through the present period. Attention will be paid to the relationship between changes in the economic environment and attendant cultural, political, and ideological developments in the stages of tribalism, slavery, feudalism, capitalism, and socialism.

ECON 113. Economic History of the United States. 3 Units
Prerequisite(s): ECON 1A or ECON 104.
Term Typically Offered: Fall, Spring
Consideration of the economic growth and development of the U.S. with emphasis on a theoretical analysis of the economic factors shaping the national destiny.

ECON 114. The California Economy. 3 Units
Prerequisite(s): ECON 1A and ECON 1B, or ECON 104.
Term Typically Offered: Fall only
Examination of the process of the development of the State’s economy as well as analysis of the various public economic issues that are of contemporary concern to Californians.

ECON 120. Economics and Environmental Degradation. 3 Units
Term Typically Offered: Fall only
Analyzes environmental issues as economic issues. Economics as both a cause and cure for environmental destruction.

ECON 123. Resource Economics. 3 Units
Prerequisite(s): ECON 1B and MATH 24 or MATH 26A or MATH 30 with a minimum "C" grade.
Term Typically Offered: Fall, Spring
Analyzes the economic based problem of exhaustion in both renewable and non-renewable resources. Emphasis is given to the optimal use of these resources over time and the effects that various market and non-market factors have on their future availability.

ECON 130. Public Finance. 3 Units
Prerequisite(s): ECON 1A, ECON 1B, and MATH 24 or MATH 26A or MATH 30 with a minimum "C" grade; ECON 100B recommended.
Term Typically Offered: Fall, Spring
Economic analysis of the public sector and its impact on the allocation of resources and the distribution of income. Emphasis given to the economics of government expenditure and taxation.

ECON 132. State and Local Government Finance. 3 Units
Prerequisite(s): ECON 1A, ECON 1B, and MATH 24 or MATH 26A or MATH 30 with a minimum "C" grade.
Term Typically Offered: Fall only
Analysis of the economics of state and local government finance, with an emphasis on California’s fiscal system.

ECON 135. Money and Banking. 3 Units
Prerequisite(s): ECON 1A and MATH 24 or MATH 26A or MATH 30 with a minimum "C" grade.
Term Typically Offered: Fall, Spring
Examines the role of financial markets, the banking system, and the Federal Reserve System in the economy. Included are an introduction to present value and the behavior of interest rates, analysis of money creation, and evaluation of monetary policy.

ECON 138. Monetary and Fiscal Policy. 3 Units
Prerequisite(s): ECON 1A, STAT 1, and MATH 24 or MATH 26A or MATH 30 with a minimum "C" grade; ECON 100A and ECON 140 recommended.
Term Typically Offered: Spring only
Analyzes the policies of central banks and fiscal authorities as they relate to the stability and growth of the macroeconomy. Examines the theoretical and empirical literature regarding the conduct of monetary and fiscal policy and applies the tools of economic analysis to understand macroeconomic policy debates.

ECON 140. Quantitative Economic Analysis. 3 Units
Prerequisite(s): ECON 1A, ECON 1B, STAT 1, and MATH 24 or MATH 26A or MATH 30 with a minimum "C" grade.
Term Typically Offered: Fall, Spring
Examination of the basics of conducting quantitative economic analysis. Included are basic concepts and methods of data analysis and research. Students will examine economic data using spreadsheets, will develop presentation skills, and be introduced to career opportunities.
ECON 141. Introduction to Econometrics. 3 Units
Prerequisite(s): ECON 1A, ECON 1B, ECON 140, and MATH 24 or MATH 26A or MATH 30 with a minimum "C" grade; ECON 100A or ECON 100B recommended.
Term Typically Offered: Fall, Spring
Covers the basics of regression analysis, estimation, and forecasting.

ECON 145. Economic Research Methods. 3 Units
Prerequisite(s): ECON 100A, ECON 100B, ECON 140 with a minimum "C" grade; GWAR certification before Fall 09, WPJ score of 70+, or at least a C- in ENGL 109 M/W.
Term Typically Offered: Fall, Spring
Covers the basics of conducting applied economic research: the selection of topic, literature survey, choice of research method, formulation of hypothesis, testing of hypothesis using empirical analysis, and summary and conclusions. Designed to enhance the students ability to integrate economic theory, quantitative research skills, and research.

ECON 150. Labor Economics. 3 Units
Prerequisite(s): ECON 1A, ECON 1B, and MATH 24 or MATH 26A or MATH 30 with a minimum "C" grade.
Term Typically Offered: Spring only
Economic analysis of labor markets, with special reference to employment, wage determination, and the role of government.

ECON 152. Economics of Education. 3 Units
Prerequisite(s): ECON 1B and MATH 24 or MATH 26A or MATH 30 with a minimum "C" grade.
Term Typically Offered: Fall only
Introduction to the various aspects of the economics of education. Applies the tools of economic analysis to education policy and problem solving. Topics include cost-benefit analysis of education, the signaling vs. human capital debate, race and gender issues in education, education production functions, and financing education at the elementary, secondary, and post-secondary levels. Emphasis placed on individual and social choice in education.

ECON 153. Health Economics. 3 Units
Prerequisite(s): ECON 1B and MATH 24 or MATH 26A or MATH 30 with a minimum "C" grade.
Term Typically Offered: Fall only
Introduction to the field of health economics. Applies the tools of economics to the production of health and health care. Special emphasis on health care institutions, the role of industry, health care reform, and the role of government, in addition to the public provision of care to the disadvantaged.

ECON 160. Industrial Organization. 3 Units
Prerequisite(s): ECON 1B and MATH 24 or MATH 26A or MATH 30 with a minimum "C" grade.
Term Typically Offered: Spring only
Analyzes firm decision-making in a variety of market settings. Topics include pricing and output decisions, entry and exit issues, marketing strategies, horizontal mergers, vertical integration, technological change, and U.S. antitrust policy.

ECON 161. Fundamentals of Game Theory. 3 Units
Prerequisite(s): ECON 1B, STAT 1, and MATH 24 or MATH 26A or MATH 30 with a minimum "C" grade.
Term Typically Offered: Spring only
An analysis of strategic games with sequential or simultaneous moves under complete information and uncertainty. Discussion of theory and techniques is combined with examination of specific classes of games and their application to real-world examples such as markets, voting, auctions, and international relations.

ECON 162. Energy Economics. 3 Units
Prerequisite(s): ECON 1B and MATH 24 or MATH 26A or MATH 30 with a minimum "C" grade.
Term Typically Offered: Fall only
Analyzes the structure, conduct, and consequences of domestic and international energy markets. Particular emphasis on regulated industries including petroleum, electrical, and other power sources. The economic impact on energy markets of emerging technology is examined.

ECON 162. Energy Economics. 3 Units
Prerequisite(s): ECON 1B and MATH 24 or MATH 26A or MATH 30 with a minimum "C" grade.
Term Typically Offered: Spring only
Examination of government regulation of industry in the North American context: transportation, communication, energy, and other industries. Issues include deregulation, public ownership, pricing, and investment.

ECON 170. Public Economics and Regulation. 3 Units
Prerequisite(s): ECON 1B and MATH 24 or MATH 26A or MATH 30 with a minimum "C" grade.
Term Typically Offered: Spring only
Examination of government regulation of industry in the North American context: transportation, communication, energy, and other industries. Issues include deregulation, public ownership, pricing, and investment.

ECON 170. Public Economics and Regulation. 3 Units
Prerequisite(s): ECON 1B and MATH 24 or MATH 26A or MATH 30 with a minimum "C" grade.
Term Typically Offered: Spring only
Examination of government regulation of industry in the North American context: transportation, communication, energy, and other industries. Issues include deregulation, public ownership, pricing, and investment.

ECON 171. Political Economy. 3 Units
General Education Area/Graduation Requirement: GE AREA D, Race & Ethnicity Graduation Requirement (RE)
Term Typically Offered: Spring only
Economic analysis and appraisal of models of urban development. Includes consideration of the rise of cities, land use, unemployment, poverty, housing, urban renewal, transportation, and the local public sector.

ECON 180. Urban Economics. 3 Units
Prerequisite(s): ECON 1B and MATH 24 or MATH 26A or MATH 30 with a minimum "C" grade.
Term Typically Offered: Spring only
Economic analysis and appraisal of models of urban development. Includes consideration of the rise of cities, land use, unemployment, poverty, housing, urban renewal, transportation, and the local public sector.

ECON 180. Urban Economics. 3 Units
Prerequisite(s): ECON 1B and MATH 24 or MATH 26A or MATH 30 with a minimum "C" grade.
Term Typically Offered: Spring only
Economic analysis and appraisal of models of urban development. Includes consideration of the rise of cities, land use, unemployment, poverty, housing, urban renewal, transportation, and the local public sector.

ECON 181. Economics of Racism. 3 Units
General Education Area/Graduation Requirement: GE AREA D, Race & Ethnicity Graduation Requirement (RE)
Term Typically Offered: Spring only
Economic analysis of the origins and development of racism, focusing mainly on its impact in the U.S. Differing theoretical explanations surrounding racism will be compared and evaluated.

ECON 181. Economics of Racism. 3 Units
General Education Area/Graduation Requirement: GE AREA D, Race & Ethnicity Graduation Requirement (RE)
Term Typically Offered: Spring only
Economic analysis of the origins and development of racism, focusing mainly on its impact in the U.S. Differing theoretical explanations surrounding racism will be compared and evaluated.

ECON 184. Women and the Economy. 3 Units
Term Typically Offered: Fall only
Investigation of the current economic status of women in the U.S., of past and present economic discrimination experienced by women in the labor market, of the historical reasons for that discrimination and of the means and methods of ending that discrimination.
ECON 186. Sports Economics. 3 Units
Prerequisite(s): ECON 1B and MATH 24 or MATH 26A or MATH 30 with a minimum "C" grade.
Term Typically Offered: Fall, Spring
Applies the essential economic concepts and develops them with examples and applications from the sports industry. Covers basic economic concepts: economic principles, supply and demand, perfect competition, and monopoly behavior. It also applies these concepts to a variety of topics: the public finance of sports franchises, the costs/benefits of a sports franchise to a city, labor markets and labor relations, discrimination, and amateurism and college sports.

ECON 189. Economics at the Movies. 3 Units
Term Typically Offered: Fall only
Analysis of the use and treatment of economic theory and history in popular American films. Emphasis is placed on the topics of game theory, industrial organization, entrepreneurship, law and economics, labor economics, the stock market, and American economic history. The entertainment industry will also be examined from an economic perspective.

ECON 190. International Trade. 3 Units
Prerequisite(s): ECON 1A, ECON 1B and MATH 24 or MATH 26A or MATH 30 with a minimum "C" grade.
Term Typically Offered: Fall, Spring
Analysis of the causes and results of trade among nations. Introduction to modern trade theory is combined with examination of trade instruments and policy analysis.

ECON 192. International Finance. 3 Units
Prerequisite(s): ECON 1A, ECON 1B and MATH 24 or MATH 26A or MATH 30 with a minimum "C" grade.
Term Typically Offered: Fall, Spring
Critical examination of the theories and practices of financing trade among nations. International financial and monetary theories focus on how the world and financial system works, given globalization and international economic integration.

ECON 193. Development Economics. 3 Units
Prerequisite(s): ECON 1A, ECON 1B, and MATH 24 or MATH 26A or MATH 30 with a minimum "C" grade.
Term Typically Offered: Fall, Spring
An analysis of the factors involved in the growth of economies. The focus is on the application of development economics and growth theory to the process of economic growth in developing countries. Particular attention is given to variables that explain growth, namely, technological progress, population growth, saving, trade, human capital and education, and the role of institutions.

ECON 195. Economic Internship. 1 - 3 Units
Term Typically Offered: Fall, Spring
Supervised economic-related work experience, research, or teaching assistance to provide an opportunity for the student to apply principles and theories learned in the classroom to the "real world."

ECON 196E. Behavioral and Experimental Economics. 3 Units
Prerequisite(s): ECON 100B
Term Typically Offered: Fall only
Introduction to the fields of behavioral and experimental economics. Applies tools of microeconomic theory to the decisions made by individuals. Special emphasis on the utility maximization hypothesis, decision making in the face of risk and uncertainty, intertemporal choice, other regarding preferences, game theory, and neuroeconomics.

ECON 197A. Economics Exchange Mentee. 1 Unit
Prerequisite(s): Instructor permission.
Term Typically Offered: Fall, Spring
Provides opportunity for lower division students, transfer students, and newly declared majors to be mentored by more advanced upper division students or graduate students. The peer mentoring will help students meet academic deadlines, achieve academic success, become engaged in campus activities and get integrated into the Economics Department.
Note: Units may not be applied towards unit requirement of the Economics major.

Credit/No Credit

ECON 197B. Economics Exchange Mentor. 1 - 3 Units
Prerequisite(s): Upper division or graduate student standing and instructor permission.
Term Typically Offered: Fall, Spring
Provides opportunity for advanced upper division students or graduate students to mentor lower division students. The peer mentoring will help students meet academic deadlines, achieve academic success, become engaged in campus activities and be integrated into the Economics Department.
Note: Units may not be applied towards unit requirement of the Economics major; May be repeated for up to 3 units credit from ECON 197A & ECON 197B combined.

Credit/No Credit

ECON 198. Tutoring in Economics. 1 - 3 Units
Term Typically Offered: Fall, Spring
Supervised tutorials at educational institutions including Sacramento State where and when appropriate arrangements can be made. Prior approval for tutoring must be obtained from the Economics Department. Emphasis is on the development of effectiveness in the teaching of economics.

Credit/No Credit

ECON 199. Special Problems. 1 - 3 Units
Term Typically Offered: Fall, Spring
Individual projects or directed reading. Admission requires approval of the faculty sponsor and the Department Chair.

Credit/No Credit

ECON 200A. Advanced Macroeconomic Theory. 3 Units
Prerequisite(s): ECON 141 and ECON 200M.
Term Typically Offered: Fall, Spring
Theories of the determinants of aggregate income, employment and prices. May be taken independently of ECON 200B.
ECON 200B. Advanced Microeconomic Theory. 3 Units
Prerequisite(s): ECON 200M.
Term Typically Offered: Fall, Spring

Theories of the consumer, producer, and market structure. May be taken independently of ECON 200A.

ECON 200C. Advanced Applied Economics. 3 Units
Prerequisite(s): ECON 200A, ECON 200B, and ECON 241.
Term Typically Offered: Fall, Spring

Applies empirical analysis to topics in microeconomics and macroeconomics. Topics may include stationarity, vector autoregression, vector error correction models, calibration, fixed effects, instrumental variables, multinomial logit, and duration models. Students implement these models using econometric software. Students will write an empirical paper intended to become a prospectus for the master’s thesis.

ECON 200M. Mathematics for Economists. 3 Units
Prerequisite(s): ECON 100A, ECON 100B, MATH 26A.
Term Typically Offered: Fall, Spring

Equips students with the mathematical techniques necessary for the study of economics and econometrics at the graduate level. Covers linear algebra, derivatives, comparative static analysis, optimization, integrals, and differential equations, with specific applications from economic and econometric theory.

ECON 204. Business Economics. 3 Units
Term Typically Offered: Fall, Spring

Intensive one-semester course covering both macroeconomics and microeconomics. Emphasis is on economic analysis and policy. Designed for graduate students who have not taken ECON 1A and ECON 1B or their equivalents.

ECON 213. U.S. Economic Development in Historical Perspective. 3 Units
Prerequisite(s): Admission to MA program in Economics.
Term Typically Offered: Fall, Spring

Introduction and analysis of American economic development from a historical perspective, focusing on the trajectory of American economic development from recent advances in theoretical and empirical economics literature. Cover topics on long-term economic growth, technological change, business cycles and fluctuations, financial markets, labor markets, and economic impacts of social change.

ECON 230. Public Finance. 3 Units
Prerequisite(s): ECON 200B.
Term Typically Offered: Fall, Spring

An analysis of the allocation and distribution effects of government expenditures and taxation.

ECON 238. Monetary and Fiscal Policy. 3 Units
Prerequisite(s): ECON 200A.
Term Typically Offered: Fall, Spring

Analyzes the policies of central bank and fiscal authorities as they relate to full employment and stability of the national economy.

ECON 241. Applied Econometric Analysis. 3 Units
Prerequisite(s): ECON 141
Corequisite(s): ECON 200M
Term Typically Offered: Fall, Spring

Applied econometric analysis with emphasis on the use of econometric techniques in economic research settings, expressing economic theory in the form of econometric models, data collection, estimation, and interpretation of results. Students work individually or as a team on a current research topic from various fields of economics preselected or approved by instructor.

ECON 251. Urban Problems, Economics and Public Policy. 3 Units
Term Typically Offered: Fall, Spring

Historical development, economics and possible policy solutions of the most pressing problems facing central cities and urban areas in the U.S. are presented. Problems discussed include poverty, crime, urban abandonment/suburban sprawl, edge cities, deteriorating infrastructures, and fiscal stress. Cross Listed: PPA 251; only one may be counted for credit.

ECON 260. Industrial Organization and Performance. 3 Units
Prerequisite(s): Classified graduate status in Economics or instructor permission.
Term Typically Offered: Fall, Spring

A modern analysis of industry structure, conduct, and performance. Emphasis is placed on the use of game theory to address firm behavior, including price and output decisions, entry and exit, horizontal mergers, technological change, and marketing issues.

ECON 263. Food Economics. 3 Units
Prerequisite(s): Graduate standing or instructor permission.
Term Typically Offered: Fall, Spring

Introduction to advanced economic theory and econometric methods applied to the economics of food with emphasis on food consumption and the complexity of individual food choices. Utilizing cost-benefit analyses and concepts like constrained utility maximization, household production, opportunity costs of time, and information search, implications for a global food system will be derived. We will apply learned concepts to health and environmental concerns by discussing the recent applied economics and policy evaluation literature.

ECON 265. Cost Benefit Analysis. 3 Units
Term Typically Offered: Fall, Spring

Examination of the theories, foundations, and philosophies of economic welfare. Specifically, the basic techniques of cost-benefit analysis will be presented and applied to various policy issues.

ECON 290. International Trade. 3 Units
Prerequisite(s): Classified graduate status in Economics or instructor permission.
Term Typically Offered: Fall, Spring

Analysis of modern trade theories, their empirical relevance, and the role of multinational firms in the evolution of international trade patterns. Discussion focuses on theoretical and empirical evaluation of trade policy instruments. Various trade agreements are also discussed in the context of economic integration and globalization. Attention is also given to foreign direct investment as a vehicle of globalization and the challenges it poses to both multinational firms and host countries.
ECON 295. Economic Internship. 1 - 3 Units
Term Typically Offered: Fall, Spring
Supervised work experience or research on economic topics in government, financial, business, charitable or other kinds of institutions to provide an opportunity for the student to apply principles and theories learned in the classroom to the "real world." Partial supervision may be supplied by persons in the institution under study. Credit/No Credit

ECON 298. Tutoring In Economics. 1 - 3 Units
Term Typically Offered: Fall, Spring
Supervised tutorials at educational institutions including Sacramento State where and when appropriate arrangements can be made. Prior approval for tutoring must be obtained from the Economics Department. Emphasis is on the development of effectiveness in the teaching of economics. Credit/No Credit

ECON 299. Special Problems. 1 - 3 Units
Term Typically Offered: Fall, Spring
Individual projects or directed reading. Admission requires approval of the faculty sponsor and the Department Chair. Credit/No Credit

ECON 500. Master's Thesis. 3 Units
Prerequisite(s): Advanced to candidacy and chair permission of his/her thesis committee.
Term Typically Offered: Fall, Spring
Completion of a thesis approved for the Master's degree. Should be taken in final semester prior to the completion of all requirements for the degree.

Ed.D. in Educational Leadership (EDD)

EDD 601. Organizational Leadership. 3 Units
Prerequisite(s): Admission into the Ed.D. in Educational Leadership Program and instructor permission.
Term Typically Offered: Fall, Spring
Builds and expands on candidates’ knowledge of systems thinking, personal and organizational behaviors, and leadership approaches to the change process. Candidates will demonstrate ethical thinking and action in organizational settings by re-conceptualizing leadership roles and organizational structures. In coursework and related fieldwork components students will apply concepts and theories to improving their respective educational institutions. Among the interactive pedagogies used are: case studies, experiential exercises, dialogue and group activities.

EDD 602. Policy and Practice for Educational Leaders I. 3 Units
Prerequisite(s): Admission into the Ed.D. in Educational Leadership Program and instructor permission.
Term Typically Offered: Fall, Spring
Develops in students the skills for informed analysis of educational policy in order to positively influence the educational policy in the K-12 or community college setting. In addition to studying the historical perspectives pertaining to educational policy, practice, and reform, students will investigate the mission of public education. Students will also study governance and inter-governmental relations through contemporary policy development with particular reference to current law, local board policy, shared governance, and working with a variety of constituencies.

EDD 603. Policy and Practice for Educational Leaders II. 3 Units
Prerequisite(s): Admission into the Ed.D. in Educational Leadership Program and instructor permission.
Term Typically Offered: Fall, Spring
Designed to engage students in critical analyses of policy at the local, state, national, and international levels. Specific California and federal policy environment structures and processes will be examined. Students will learn about how public policy is generated, potential consequences, ethical dilemmas, social justice, and equity issues.

EDD 604. Data-based Decision Making in Educational Leadership. 3 Units
Prerequisite(s): Admission into the Ed.D. in Educational Leadership Program and instructor permission.
Term Typically Offered: Fall, Spring
Studies the use of quantitative and qualitative data by K-12 and community college leaders to improve student and organizational outcomes. Students will develop enhanced data literacy and analytical skills to facilitate data-based decision making in the identification of problems and development of solutions and evaluation plans. General concepts and techniques of data analysis, generation, and presentation will be learned with specific application to educational issues including program assessment and evaluation, resource planning and allocation, and strategic planning.
EDD 605. Quantitative and Qualitative Research Methods I. 3 Units
Prerequisite(s): Admission into the Ed.D. in Educational Leadership Program and instructor permission.
Term Typically Offered: Fall, Spring
Focuses on the design, conceptualization, interpretation, and application of qualitative, quantitative, and mixed-method research procedures. Helps students acquire skills and gain knowledge in using a wide range of methodological and analytical research techniques with an eye towards students’ dissertation projects and field application in educational leadership.

EDD 606. Quantitative and Qualitative Research Methods II. 3 Units
Prerequisite(s): Admission into the Ed.D. in Educational Leadership Program and instructor permission.
Term Typically Offered: Fall, Spring
Introduces educational leaders to concepts in qualitative, quantitative, and mixed-methods research in preparation for conducting independent research. Enables students to critically understand research methodology and apply it appropriately to various educational issues. Topics will include the framing of research questions, identifying data and data sources, and using theory in the design process. Enables educational leaders to critically understand research methodology and apply it appropriately and effectively to educational issues.

EDD 607. Community and Communication in Educational Leadership. 3 Units
Prerequisite(s): Admission into the Ed.D. in Educational Leadership Program and instructor permission.
Term Typically Offered: Fall, Spring
Presents theories and frameworks concerning organizational, interpersonal, and cross-cultural communication in educational contexts. Includes developing written and verbal skills for specific contexts, including strategic planning, evaluation, presentations, formal and informal texts, technology, crisis management, and public relations. Through research and practical application, enhances communication skills needed for creating inclusive systems and positive results for all stakeholders.

EDD 608. Diversity and Equity in Complex Organizations. 3 Units
Prerequisite(s): Admission into the Ed.D. in Educational Leadership Program and instructor permission.
Term Typically Offered: Fall, Spring
Designed to engage students in self introspection of awareness and advocacy in applying theoretical frameworks and research to promote equitable, excellence in schooling. Students will demonstrate the ability to develop cross-cultural relationships across multiple constituents for the purpose of improving students performance and promoting social justice. Students will develop the capacity to be courageous change agents in assuring academic excellence for all students.

EDD 609. Human Resource Management for Educational Leaders. 3 Units
Prerequisite(s): Admission into the Ed.D. in Educational Leadership Program and instructor permission.
Term Typically Offered: Fall, Spring
Examines how to manage human resources effectively in the dynamic legal, social, and economic environment currently impacting educational institutions. Among the topics included are: formulation and implementation of human resource strategy, job analysis, methods of recruitment and selection, techniques for training and development, performance appraisal, compensation and benefits, and the evaluation of the effectiveness of human resource management frameworks and practices. Class participants will be expected to demonstrate understanding of Human Resource Management (HRM) competencies through assignments, exercises and case analyses.

EDD 610. Curriculum and Instruction Issues for Educational Leaders. 3 Units
Prerequisite(s): Admission into the Ed.D. in Educational Leadership Program and instructor permission.
Term Typically Offered: Fall, Spring
Presents curriculum and instruction from a leadership perspective within the contexts of K-12 schools and community colleges. Students examine contemporary issues in school curriculum, including policy initiatives and reform efforts affecting curricular decision-making. Prepares students to analyze and design appropriate strategies for implementing and evaluating district and school curricula and to investigate the implications of curricula for educational programming. Students also learn specific foundations and procedures for professional development that have well-documented effects on student achievement.

EDD 611. Legal Issues for Educational Leaders. 2 Units
Prerequisite(s): Admission into the Ed.D. in Educational Leadership Program and instructor permission.
Term Typically Offered: Fall, Spring
Examines key legal issues that govern daily and long-range decisions of educational leaders. Focuses on understanding California and federal codes, case law, policies, and significant precedent and will emphasize analysis of key legal concepts and application of law to major areas including finance, personnel, risk management, curriculum, student services, teacher rights, torts, students rights, and access. Examines trends in law and the initiation and influence of educational law to positively influence educational institutions.

EDD 612. Student Services in Education. 2 Units
Prerequisite(s): Admission into the Ed.D. in Educational Leadership Program and instructor permission.
Term Typically Offered: Fall, Spring
Provides a comprehensive insight into the student services. It addresses both practical and theoretical perspectives intended to build a sense of vision and passion to transform the profession of student affairs and leadership. In particular, examines four distinct arenas: 1) historical and philosophical foundations of student affairs and leadership 2) management and organizational issues, 3) essential skills and professional development in building an equitable organization, and 4) the synthesis of practice and theory.
EDD 613. Finance and Budget for Educational Leaders. 2 Units
Prerequisite(s): Admission into the Ed.D. in Educational Leadership Program and instructor permission.
Term Typically Offered: Fall, Spring
Analyze two related topics with respect to public educational institutions: funding and internal budget management. Provides a state and national overview of the economics and finance of K-12 and higher education, including private and public benefits of education, methods of financing public education, and contemporary policy issues regarding school and college finances. Focuses on how educational leaders can most effectively manage resources to further the vision, goals, and philosophy of the organization.

EDD 614. Issues in Educational Leadership: Synthesis and Application. 3 Units
Prerequisite(s): Admission into the Ed.D. in Educational Program and instructor permission.
Term Typically Offered: Fall, Spring
This problem-based seminar integrates the three themes of the program. Includes conducting a review of the literature that will later be integrated into the candidates' research. In addition, each student will study and select theoretical frame/s that supports their doctoral topic. Students will also work in teams formed by research interests. They will present findings to classmates in forums that they facilitate and they will critique each other's work.

EDD 615. Dissertation Proposal Seminar. 6 Units
Prerequisite(s): Passed Ed.D. Qualifying Examination and instructor permission.
Term Typically Offered: Fall, Spring
Provides faculty and peer guidance in preparation of material to develop the dissertation proposal. Students will be guided in the clarification of dissertation topic, familiarization with relevant literature, and the development of a sound methodology. Students will learn how to critically analyze and provide constructive criticism to key research components proposed by others. At the end students are expected to complete the first three chapters of their dissertation in anticipation of their dissertation defense.

EDD 616. Dissertation I. 6 Units
Prerequisite(s): Admission into the Ed.D. in Educational Leadership Program and instructor permission.
Term Typically Offered: Fall, Spring
Each candidate will work with a dissertation advisor (dissertation committee chair) to conduct independent research leading to the completion of a dissertation. Twelve units of dissertation study will be required for completion of the program.

Note: Students must have passed their qualifying examination and successfully defended their dissertation proposal.
Credit/No Credit

EDD 617. Dissertation II. 6 Units
Prerequisite(s): Admission into the Ed.D. in Educational Leadership Program and completion of EDD 616 and instructor permission.
Term Typically Offered: Fall, Spring
Each candidate will work with a dissertation advisor (dissertation committee chair) to conduct independent research leading to the completion of a dissertation. Twelve units of dissertation study will be required for completion of the program.

Education (ED)

EDD 300B. Teaching Performance Assessment-Multiple Subject-Literacy. 1 Unit
Prerequisite(s): Candidate in good standing in a teacher preparation program.
Corequisite(s): EDBM 402B or EDTE 420B.
Term Typically Offered: Fall, Spring
Candidates in the Teacher Preparation Program must complete the Teaching Event for the Performance Assessment for California Teachers. The Teaching Event requires candidates to plan and teach an instructional sequence in their student teaching placement. They must also assess student learning during this lesson sequence and submit a videotape with material recorded during the lesson sequence. The Teaching Event is a summative assessment and one of several requirements that must be completed in order to receive a recommendation for a teaching credential.
Credit/No Credit

Education (EDUC)

EDUC 10. Critical Thinking and the Educated Person. 3 Units
General Education Area/Graduation Requirement: Critical Thinking (A3)
Term Typically Offered: Fall, Spring
Examines thinking process patterns and dispositions, for self, children, parents, and educators. Familiarizes students with critical thinking and provides a systematic approach to its process and components. Students will learn about problem solving, decision-making, logical and creative thinking. The study of critical thinking will be supplemented with readings, discussions, and written assignments. Implements critical thinking applications used both in student’s academic and personal lives.

EDUC 10H. Critical Thinking and the Educated Person: Honors. 3 Units
Prerequisite(s): Open only to Honors students.
General Education Area/Graduation Requirement: Critical Thinking (A3)
Term Typically Offered: Fall, Spring
This introductory course will examine the thinking process patterns and dispositions for self, children, parents, and educators. The purpose of this course is to familiarize students with critical thinking and to provide a systematic approach to its process and components. Students will learn about problem solving, decision-making, logical and creative thinking. The study of critical thinking will be supplemented with readings, discussions, and written assignments. The course will implement critical thinking applications used both in student’s academic and personal lives.

EDUC 18. Mathematical Practices Across Cultures. 3 Units
General Education Area/Graduation Requirement: Math Concepts & Quantitative Reasoning (B4)
Term Typically Offered: Fall, Spring
Introduction to diverse mathematical thought, action and practices across cultures. Mathematics will be seen from a diversity of contexts. Learners will consider how diverse contexts and traditions both reflect a culture’s heritage and world view and influence the mathematics learned and used. Topics covered include: ethnomathematics, mathematical modeling, and cultural connections in relation to diverse forms of quantitative reasoning, problem solving, numbering, systems of organization, perceptions of time and space as experienced by diverse traditions and peoples.
Introduction to the nature and possible meanings of higher education, and the functions and resources of the University. Designed to help students develop and exercise fundamental academic success strategies and to improve their basic learning skills. Students will have the opportunity to interact with fellow classmates and the seminar leader to build a community of academic support and personal support.

EDUC 100A. Educating Students with Disabilities in Inclusive Settings. 2 Units
Corequisite(s): EDUC 100B.
Term Typically Offered: Fall, Spring

This course provides an overview of current knowledge about individuals with disabilities within the context of inclusive educational and community-based settings, with substantial focus on the role of the educator in the education of students who have disabilities in diverse communities. Content includes historical factors, legislation, causes and characteristics, educational needs, educational strategies, including educational technologies, assessment, collaboration, and support services for individuals with disabilities ranging across mild, moderate, severe, and profound disability levels.
Note: Designed to meet the Special Education requirement for a clear multiple and single subject credential.

EDUC 100B. Educating Students with Disabilities in Inclusive Settings Lab. 1 Unit
Corequisite(s): EDUC 100A.
Term Typically Offered: Fall, Spring

Field-based 30 hour experience. Lab is a synthesis and application of EDUC 100A course content in educational setting for students who receive special education services. Students will verify multiple experiences across the age-span and in inclusive educational settings, agencies, and community environments.
Credit/No Credit

EDUC 101A. Consultation Strategies for Educators of Students with Disabilities. 2 Units
Corequisite(s): EDUC 101B.
Term Typically Offered: Fall, Spring

Basic skills for effective collaboration and teaming are practiced through simulations, reflective case study analyses, and interviews with families, paraprofessionals, and related service providers. Cultural, socioeconomic and organizational implications are analyzed.
EDUC 106. Instructional Supervision/Coordination I of Career Technical Education. 3 Units
Prerequisite(s): Students must be admitted to the BSCTS program
Term Typically Offered: Fall, Spring

Offers student participation in performance-based objectives program addressing the following major topics: Principles of supervision, supervision models, consultation and coordination skills, facilitation skills, curriculum management, and labor relations.

EDUC 107. Instructional Supervision/Coordination II of Career Technical Education. 3 Units
Prerequisite(s): Student must be admitted to the BSCTS program
Term Typically Offered: Fall, Spring

Offers student participation in a performance-based objectives program addressing the following major topics: School finance, grants and proposals, teacher observation models, staff development models, and total quality management practices.

EDUC 109. Career Guidance in Career Technical Education. 1 Unit
Prerequisite(s): Application for Review of Work Experience
Term Typically Offered: Fall only

Examines the occupational history of students and assists them in gathering documentation to support their request to the CSU Reviewing Committee. Assists students in identifying goals for professional accomplishment. Credit/No Credit

EDUC 110. Current Issues in Career Technical Education. 3 Units
Prerequisite(s): Student must be admitted to the BSCTS program
Term Typically Offered: Fall, Spring

Provides in-depth investigation of various problems and issues confronting the career technical educator in public and private sectors. The class will focus on the specific issues of adult career development and perspectives of work. These issues will be explored from both global and personal perspectives. Students will gain awareness and understanding in relation to their own individual career development, as well as the career development of those with whom they work or will work.

EDUC 111. Education for Career Technical Students with Special Needs. 3 Units
Term Typically Offered: Fall, Spring

Introduces concepts and practices of inclusion of special needs students as provided for under federal legislation and case law. Methods of adapting instruction and devising positive behavioral supports for students of diverse abilities are studied. Methods of assessing the progress of students with diverse abilities are examined.

EDUC 112. Legislation and Financing of Career Technical Education. 3 Units
Prerequisite(s): Student must be admitted to the BSCTS program
Term Typically Offered: Fall, Spring

Offers a historical review of legislation and financing of career technical education programs at the federal, state, and local levels, addressing community colleges, regional occupational programs, secondary schools, corrections, private post-secondary schools, private industry education and training.

EDUC 113. Introduction to Technology Based Teaching Strategies in Career Technical Education. 3 Units
Prerequisite(s): Student must be admitted to the BSCTS program
Term Typically Offered: Fall only

Examines the use of computers and their application in career technical instruction. Applications involving direct instruction, discovery learning, problem solving, assessment, practice and presentation are learned. Other technologies that support teaching and learning are studied and practiced. Issues involved in access to and use and control of computer based technologies in a democratic society are studied.

EDUC 114. Multicultural Career Technical Education for a Pluralistic Society. 3 Units
Prerequisite(s): Student must be admitted to the BSCTS program
Term Typically Offered: Fall, Spring

Examines cultural diversity and the historical and cultural traditions of the major cultural, ethnic, and linguistic groups in California. Methods of effective ways to include cultural traditions and community values in the instructional program are learned. Principles of second language acquisition, language teaching strategies, and curriculum adaptions for students whose second language is English are studied.

EDUC 115. Behavior Management and Total Quality Management in Career Technical Education Program. 3 Units
Prerequisite(s): Student must be admitted to the BSCTS program
Term Typically Offered: Fall only

Teaches students how to manage the classroom and learning behavior of career technical education students in various settings under various circumstances. Total Quality Management procedures for career technical education/training programs are studied.

EDUC 116. Special Problems in Career Technical Education. 1 - 3 Units
Prerequisite(s): Student must be admitted to the BSCTS program
Term Typically Offered: Fall, Spring

Individualized study of various questions and problems within career/technical education determined collaboratively by the student and the instructor. Credit/No Credit

EDUC 117. Field Experience in Career Technical Education. 1 - 6 Units
Prerequisite(s): Student must be admitted to the BSCTS program
Term Typically Offered: Fall, Spring

Individualized field experience designed collaboratively by the student and instructor.
Note: Department consent required
Credit/No Credit

EDUC 120. Literature For Children. 3 Units
Prerequisite(s): Must have Junior or higher standing to enroll in this course
Term Typically Offered: Fall, Spring

Historical and modern children’s literature; standards of selection and acquaintance with the leading authors and illustrators; procedures and practices in methodology.
EDUC 121. Multicultural Children's Literature. 3 Units
Prerequisite(s): GWAR certification before Fall 09; or WPJ score of 80+; or 3-unit placement in ENGL 109M or ENGL 109W; or 4-unit placement in ENGL 109M or ENGL 109W and co-enrollment in ENGL 109X; or WPJ score 70 or 71 and co-enrollment in ENGL 109X.
General Education Area/Graduation Requirement: Humanities (Area C2), Race & Ethnicity Graduation Requirement (RE), Writing Intensive Graduation Requirement (WI)
Term Typically Offered: Fall, Spring, Summer
Survey of historical and modern multicultural children's literature examining standards of selection and acquaintance with the leading authors, illustrators and book awards; procedures and practice in methodology. Focus on children's literature which represents the diversity in America and fosters an understanding of the cultural values, identity, and heritage of those populations.

EDUC 124A. Tutoring Children in Mathematics. 2 Units
Corequisite(s): EDUC 124B.
Term Typically Offered: Fall, Spring
Orientation to concept and practice of tutoring basic mathematics skills including developing conceptual understanding and the ability to scaffold instruction of addition, subtraction, multiplication and division of whole numbers, fractions, and decimals. After completing on-campus training, students are placed in nearby school districts. May be taken by all undergraduate students and is strongly recommended for students considering careers in education, criminal justice, psychology, and social work. It may also be used as an elective in the Blended Teacher Education Program.
Note: May be taken twice for credit.
Credit/No Credit

EDUC 124B. Tutoring Children in Mathematics: Practicum. 1 Unit
Corequisite(s): EDUC 124A.
Term Typically Offered: Fall, Spring
Practicum of tutoring basic mathematics skills and scaffolding instruction of addition, subtraction, multiplication and division of whole numbers, fractions, and decimals. After completing on-campus training, students are placed in nearby school districts. May be taken by all undergraduate students and is strongly recommended for students considering careers in education, criminal justice, psychology, and social work. It may also be used as an elective in the Blended Teacher Education Program.
Note: May be taken twice for credit.
Credit/No Credit

EDUC 125A. Tutoring Children in Reading. 2 Units
Corequisite(s): EDUC 125B.
Term Typically Offered: Fall, Spring
Orientation to concept and practice of tutoring basic reading skills including sight word recognition, word analysis skills, oral fluency, and comprehension. After completing on-campus training, students are placed in nearby school districts.
Note: Strongly recommended for students considering careers in education, criminal justice, psychology and social work. May be repeated once for credit. May also be used as an elective in the Blended Teacher Education Program.
Credit/No Credit

EDUC 125B. Tutoring Children in Reading Practicum. 1 Unit
Corequisite(s): EDUC 125A
Term Typically Offered: Fall, Spring
Field-based course provides a synthesis and application of course content learned in EDUC 125B. Students are placed in a primary level setting for at-risk students who read approximately two grade levels below their peers. The twice-weekly practicum focuses on comprehension questioning strategies, learning styles and differences, multicultural and ESL strategies, Reader's theater and poetry, and motivating students to achieve greater academic success.
Note: May be taken by all undergraduate students and must be taken concurrently with EDUC 125A.
Credit/No Credit

EDUC 126. Assisting the Elementary Classroom Teacher. 3 Units
Prerequisite(s): EDUC 125A
Term Typically Offered: Fall, Spring
Directly connected to hands-on classroom experiences. Students will be intensively trained in workshops, and will work as teacher assistants in public schools (4 hours per week). Students will learn strategies for working with diverse groups of students at all grade levels; keep weekly tutoring logs; and write a case study on a student and present their findings to the class. Students will reflect on their own growth and development.
Note: May be repeated once for credit.
Credit/No Credit

EDUC 127A. Field Experience in After School STEM Programs. 2 Units
Corequisite(s): EDUC 127B
Term Typically Offered: Fall, Spring
Orientation to high quality Science, Technology, Engineering, and Mathematics (STEM) instruction. On-campus training includes skills to develop conceptual understanding and ability to scaffold instruction for elementary and middle school aged students in STEM after school programs. After completing on-campus training, students assist with instruction in nearby school STEM programs.
Note: May be taken twice for credit.
Credit/No Credit

EDUC 127B. Field Experience in After School STEM Programs: Practicum. 1 Unit
Corequisite(s): EDUC 127A
Term Typically Offered: Fall, Spring
This course is designed to connect students with local public school partners in after school programs that support inquiry based STEM activities with K-8 children. After completing on-campus training, students then complete the practicum.
Note: May be taken twice for credit.
Credit/No Credit
EDUC 128. Education and Communication in Korean Society. 3 Units
Term Typically Offered: Fall, Spring
This course is designed to explore various dimensions of the education and the communication in Korea. It will focus on (a) the Korean educational philosophy, system, and practices of all levels - preschool to higher education; (b) the Korean language in a variety of communicative contexts; and (c) how education and communication shape and interface. The similarities and differences in education and communication between South Korea and the United States will be also investigated.

EDUC 130A. Typical & Atypical Developmental Characteristics and Outcomes for Young Children with Disabilities. 2 Units
Prerequisite(s): CHDV 30 or approved equivalent.
Corequisite(s): EDUC 130B.
Term Typically Offered: Fall, Spring
Examination of disabilities and risk factors and their influence on developmental competencies and outcomes for infants, toddlers, and young children. Content will include typical developmental patterns of young children, atypical development due to prenatal, perinatal and early childhood developmental risk factors including low incidence disabilities, and an introduction to interventions in a range of community settings to address the unique needs of these children and their families. Lecture.

EDUC 130B. Typical & Atypical Developmental Characteristics and Outcomes for Young Children with Disabilities Lab. 1 Unit
Prerequisite(s): CHDV 30 or approved equivalent.
Corequisite(s): EDUC 130A.
Term Typically Offered: Fall, Spring
Field-based practice lab (30 hours). Lab will be a synthesis and application of lecture/discussion course content in home based, center based, and community settings serving infants, toddlers, and young children with disabilities and their families.
Credit/No Credit

EDUC 131A. Introduction to Family Centered Service Delivery In Early Childhood Special Education. 2 Units
Prerequisite(s): EDUC 130A and EDUC 130B or its equivalent.
Corequisite(s): EDUC 131B.
Term Typically Offered: Fall, Spring
Designed to enable participants to gain knowledge and develop skills necessary to provide culturally responsive, family-centered approaches to assessment and intervention for infants and young children with disabilities. Focus will be on the historical, theoretical, and philosophical bases for family-centered service delivery, including an emphasis on understanding family systems and family life stages, respect for cultural diversity, the IFSP process, collaborative parent-professional relationships, parent advocacy, and transition planning. Lecture.

EDUC 131B. Introduction to Family Centered Service Delivery in Early Childhood Special Education Laboratory. 1 Unit
Prerequisite(s): EDUC 130A and EDUC 130B or its equivalent.
Corequisite(s): EDUC 131A.
Term Typically Offered: Fall, Spring
Field-based practice lab (30 hours). Lab will be a synthesis and application of lecture course content (EDUC 131A) in home-based, center-based and/or community settings serving infants and young children with disabilities and their families.
Credit/No Credit

EDUC 131. Introduction to Family Centered Service Delivery in Early Childhood Special Education. 2 Units
Prerequisite(s): CHDV 30 or approved equivalent.
Corequisite(s): EDUC 131B.
Term Typically Offered: Fall, Spring
Examination of disabilities and risk factors and their influence on developmental competencies and outcomes for infants, toddlers, and young children. Content will include typical developmental patterns of young children, atypical development due to prenatal, perinatal and early childhood developmental risk factors including low incidence disabilities, and an introduction to interventions in a range of community settings to address the unique needs of these children and their families. Lecture.

EDUC 131B. Typical & Atypical Developmental Characteristics and Outcomes for Young Children with Disabilities Lab. 1 Unit
Prerequisite(s): CHDV 30 or approved equivalent.
Corequisite(s): EDUC 131A.
Term Typically Offered: Fall, Spring
Field-based practice lab (30 hours). Lab will be a synthesis and application of lecture/discussion course content in home based, center based, and community settings serving infants, toddlers, and young children with disabilities and their families.
Credit/No Credit

EDUC 131. Introduction to Family Centered Service Delivery In Early Childhood Special Education. 2 Units
Prerequisite(s): CHDV 30 or approved equivalent.
Corequisite(s): EDUC 131B.
Term Typically Offered: Fall, Spring
Examination of disabilities and risk factors and their influence on developmental competencies and outcomes for infants, toddlers, and young children. Content will include typical developmental patterns of young children, atypical development due to prenatal, perinatal and early childhood developmental risk factors including low incidence disabilities, and an introduction to interventions in a range of community settings to address the unique needs of these children and their families. Lecture.

EDUC 155. Introduction to Counseling. 3 Units
Term Typically Offered: Fall, Spring
Introduction to the profession of counseling, including differences between professional counseling and other professions, counseling theories, consultation skills and an introduction to basic counseling skills. Lecture three hours.
Note: Open to unclassified students on a space available basis. Required prerequisite for the Master of Science in Counseling and requirement for the Counseling minor, not included in 200-series 60 unit program for master's degree. Instructor approval required.

EDUC 156. Power, Privilege and Self Identity in Counseling. 3 Units
Term Typically Offered: Fall, Spring
Focuses on understanding how one's values, attitudes, belief systems impact perception of differences related to race, ethnicity, culture, etc. Experiential activities promote self awareness while developing capacity in becoming a culturally responsive/skilled counselor. Historical processes that created inter and intra group constructs are explored.
Note: Open to unclassified students on a space available basis. Required corequisite for the Master of Science in Counseling and requirement for the Counseling Minor, not included in 200-series 60 unit master's degree. Instructor approval required.

EDUC 157. Child and Family Psychopathology. 3 Units
Prerequisite(s): CHDV 30 or equivalent.
Term Typically Offered: Fall, Spring
Examines the etiology of development and mental health issues in children, youth and caregivers, including genetic and socio-cultural factors. The classification and treatment of abnormal behavior within family contexts will also be explored. Recommended for human services majors such as child development, education, psychology, counseling, social work and criminal justice.

EDUC 160. Urban Education. 3 Units
Prerequisite(s): GWAR certification before Fall 09; or WPJ score of 80+; or 3-unit placement in ENGL 109M or ENGL 109W; or 4-unit placement in ENGL 109M or ENGL 109W and co-enrollment in ENGL 109X; or WPJ score 70 or 71 and co-enrollment in ENGL 109X.
General Education Area/Graduation Requirement: Writing Intensive Graduation Requirement (WI), GE AREA D, Race & Ethnicity Graduation Requirement (RE)
Term Typically Offered: Fall, Spring
Designed to enhance students’ knowledge of urban schooling, especially related to dynamics of race, class, and culture. Along with a Service Learning component in urban schools, provides analysis of the following: historical, socioeconomic, and political factors influencing urban education; the distribution of opportunity in cities and their schools; and effective instructional organizational practices that close the achievement gap, including the development of positive school cultures and the use of community services and resources.
EDUC 165. Sex Role Stereotyping in American Education. 3 Units
Prerequisite(s): GWAR certification before Fall 09; or WPJ score of 80+; or 3-unit placement in ENGL 109M or ENGL 109W; or 4-unit placement in ENGL 109M or ENGL 109W and co-enrollment in ENGL 109X; or WPJ score 70 or 71 and co-enrollment in ENGL 109X.
General Education Area/Graduation Requirement: GE AREA D, Race & Ethnicity Graduation Requirement (RE), Writing Intensive Graduation Requirement (WI)
Term Typically Offered: Fall, Spring
This course is designed to introduce students to the educational programs and practices resulting from societal sex role and racial stereotyping. It analyzes the specific effects of sex and race inequalities in the total school setting.

EDUC 168. Foundational Issues for a Multicultural, Pluralistic Society, B. 3 Units
Prerequisite(s): Admission and enrollment in BMED multiple subject credential program; EDBM 117.
Corequisite(s): EDBM 402B.
Term Typically Offered: Fall, Spring
Critical examination of the socio-political relationship between California’s public schools and its major population subgroups (as defined by culture, gender, social class, language, race/ethnicity, and ability). Candidates critically reflect on the philosophy and practices of schooling in relation to students’ culture, family and community; analyze institutional and instructional practices for educational equity; and develop alternative instructional activities based on the principles of multicultural education and English language learning in a democratic society. Lectures, discussions, small group work, simulations, field tasks.

EDUC 170. Bilingual Education: Introduction to Educating English Learners. 3 Units
Term Typically Offered: Fall, Spring
Introductory study of important themes regarding the education of English Learners. Covers the history of bilingual education; relevant legal mandates and court rulings; first and second language acquisition; linguistic development; theory and practice of effective programs; and beginning methods, materials and strategies responsive to the students’ primary language and assessed levels of English proficiency. A fieldwork component involving the tutoring of an English Learner is required.
Note: EDUC 170 is a prerequisite for EDMS 272, EDBM 279.

EDUC 172. Introduction to Hmong Literacy. 3 Units
Prerequisite(s): Fluent in Hmong
Term Typically Offered: Fall, Spring
This course covers fundamental literacy components of the Hmong language. It examines the historical development and maintenance of the Hmong oral and written language and related issues based on lectures, class discussions, group work, writing assignments, and a research paper. It fulfills one of the requirements for teaching credential students pursuing the Bilingual Cross Cultural Authorization (BCLAD).

EDUC 173. Hmong History and Culture. 3 Units
Term Typically Offered: Fall, Spring
This course covers history of the Hmong dated 5,000 years ago to the present. It examines Hmong history and culture as it evolves through living in various Asian countries and in the United States through lectures, class discussions, group work, writing assignments, and a research paper.

EDUC 175. Pedagogy and Academic Language Skills in Spanish for Bilingual Educators. 3 Units
Prerequisite(s): Spanish fluency/literacy required.
Term Typically Offered: Fall only
This course is designed to provide participants background and foundational knowledge in Standard Spanish language use, language varieties in Spanish, issues of power and language in our society, academic language use, and bilingual methods. Participants will examine theoretical and practical issues in bilingual language use in society and in the classroom. Participants will learn and apply bilingual teaching methods; will analyze children's bilingual language use, and also will evaluate Spanish medium texts and trade books.

EDUC 177. Multicultural, Pluralistic, and Diversity Curriculum. 3 Units
Prerequisite(s): Approval of Department Chair.
Term Typically Offered: Fall, Spring
This course explores the nature, implementation and effects of multicultural, pluralistic, and diversity curricula from the perspectives of an academic discipline and a professional field. It focuses on the development of multicultural curricula that reflect current research, educational standards, legal mandates, political activism, and the needs of the local community. It is appropriate for students in the multicultural education, bilingual education, ethnic studies, and diversity certificate programs.

EDUC 179. Special Problems. 1 - 3 Units
Term Typically Offered: Fall, Spring
Individual projects designed especially for students capable of independent study. Admission by written approval of the instructor with whom the student will be working and Department Chair. Credit/No Credit
Education - Bilingual/Multicultural (EDBM)

EDBM 128. Foundations for Multicultural Secondary Education, B.  
3 Units
Prerequisite(s): Admission to Single Subject Credential Program; Successful completion of EDBM 127. 
Corequisite(s): EDBM 400B. 
Term Typically Offered: Fall, Spring

Critical examination of the socio-political relationship between California's public schools and its major population subgroups (as defined by culture, gender, social class, language, race/ethnicity, and ability). Candidates critically reflect on the philosophy and practices of schooling in relation to students' culture, family and community; analyze institutional and instructional practices for educational equity; and develop alternative instructional activities based on the principles of multicultural education and English language learning in a democratic society. Lectures, discussions, small group work, simulations, and field tasks.

EDBM 205. Education for a Democratic, Pluralistic Society.  
3 Units
Term Typically Offered: Fall, Spring

Advanced study of social, cultural, historical, philosophical and psychological issues related to the teaching and learning of culturally and linguistically diverse students. In-depth consideration of the implications of theories and research related to the history of educational reform, the history and culture of the teaching profession, the nature of learning for linguistically and culturally diverse students, the relationship between schooling and democratic society, and the barriers to all of the above.

EDBM 220. Multicultural Curriculum, Instruction and Assessment.  
3 Units
Term Typically Offered: Fall, Spring

Explores the common concepts of curriculum development through an examination of alternatives to traditional education models. Educational models representing Afrocentric, Multicultural and Social Reconstructionist, Anti-bias, Anti-racist, Culturally-Relevant and other critical pedagogical approaches will be explored. There will be an emphasis on contemporary programs addressing curriculum, instruction, and assessment issues at the elementary, secondary, and university levels; and an analysis of materials and methods for culturally and linguistically diverse student populations.

EDBM 235. Research Seminar on Bilingualism and Language Varieties in Education.  
3 Units
Prerequisite(s): Instructor permission. 
Term Typically Offered: Fall, Spring

Designed for graduate students who already have some preparation in the area of Bilingualism and language varieties as they relate to the schools. Uses a seminar format to explore the latest research in the areas of first and second language acquisition of bilinguals, acquisition of standard and nonstandard dialects, and related sociolinguistic issues. Special attention will be given to research about language varieties used in the U.S. (Black English, Chicano English, Chicano Spanish, Hawaiian English and so on.)

EDBM 245. Advocacy, Change and Community.  
3 Units
Term Typically Offered: Fall, Spring

Focus on learning theories behind and the methods for creating social change. Development of skills needed to differentiate social problems from their symptoms, and to coalesce key community members and agencies toward effecting social change. Additional study of strategies needed to assess the success of change efforts, and how to learn from challenges.

EDBM 250. Education Research.  
3 Units
Prerequisite(s): Graduate status. 
Term Typically Offered: Fall, Spring

Studies qualitative and quantitative methods in the development of reliable knowledge in the field of education. Includes identification and formulation of research problems, research designs and presentation of reports representative of different research strategies. Provides support for students' culminating projects/thesis.

EDBM 265. Thesis/Project Writing.  
3 Units
Prerequisite(s): EDBM 250 or equivalent, advanced to candidacy. 
Term Typically Offered: Fall, Spring

Seminar to focus on the process of completing the required culminating experience including refining the research problem, completing the literature review, finalizing and implementing the research design, and completing required university protocol (e.g., Human Subjects Review and format requirements). 

Note: May be taken twice for credit. 

Credit/No Credit 

EDBM 299. Special Problems.  
1 - 3 Units
Term Typically Offered: Fall, Spring

Individual projects at graduate level especially for students capable of independent study. Admission by written approval of the instructor with whom the student will be working and Department Chair. 
Credit/No Credit 

2 Units
Prerequisite(s): Admission to Single Subject Credential Program. 
Term Typically Offered: Fall, Spring

Introduces the relationship between elements of teaching, instructional organization, and classroom management to effectively teach in culturally and linguistically diverse secondary classrooms. Focus is grounded in a Social Reconstructionist approach. Emphasis includes students' development as a teacher specific, teaching strategies for culturally and linguistically diverse students, curriculum development, and theories and practices for establishing and maintaining an effective learning environment in multicultural/multilingual classrooms. Provides an introduction to E-Portfolio development, integration of technology, and familiarization of content standards.

EDBM 401. Observation and Participation in Multilingual/Multicultural Schools.  
2 Units
Prerequisite(s): Admission to Teacher Preparation Program. 
Term Typically Offered: Fall, Spring

Teacher candidates will observe and participate as teaching assistants in public school classrooms with high enrollments of students from culturally and linguistically diverse backgrounds. 
Credit/No Credit
EDBM 565. MA Thesis/Project. 3 Units
Prerequisite(s): EDBM 250, advanced to candidacy, and completion of the Thesis/Project Petition and Advisor Reservation Form and the approval by the Department’s Graduate Coordinator one semester prior to registration of this course.
Term Typically Offered: Fall, Spring
Completion of a thesis or project approved for the Master’s Degree. Note: May be taken twice for credit.

Education - Counselor Education (EDC)

EDC 210. Multicultural/Ethnic Counseling. 3 Units
Term Typically Offered: Fall, Spring
Exploration of ethnic and cultural differences to develop or expand awareness, techniques, skills, theories, concepts, and to acquire information necessary to counsel effectively with clients of various ethnic/cultural groups. Students examine their own attitudes, behaviors, perceptions, and biases, and are encouraged to develop their own multicultural approach to counseling. Lecture three hours.

EDC 212. Gender Roles in Counseling. 3 Units
Term Typically Offered: Fall, Spring
An overview of the individual and societal parameters of gender roles and sexism in self-identity, sexual behavior, health, mental health, relationships, values, abuse, violence, etc. Attitudes, research, prevention, assessment and treatment methods are addressed. Meets Board of Behavioral Science requirements in human sexuality and domestic violence.

EDC 214. Dynamics of Human Development. 3 Units
Term Typically Offered: Fall, Spring
Overview of theories and research pertaining to the dynamics of human development, including cultural, biological, social, and psychological factors. Particular emphasis will be placed on the relationship of these factors to the field of counseling. Lecture three hours.

EDC 216. Counseling Theory. 3 Units
Corequisite(s): EDC 280.
Term Typically Offered: Fall, Spring
Examination of ten counseling philosophies, with emphasis on knowledge and practice. Requires the refinement of one’s own counseling orientation. Designed to provide students with a foundation in the basic philosophy and practice of contemporary theories of counseling/psychotherapy. The requirements support three components of multiple measures of learning and outcomes: 1) personal growth, 2) counseling skills building utilizing multiple approaches, 3) professional development.

EDC 218. Assessment in Counseling. 3 Units
Term Typically Offered: Fall, Spring
Intended to acquaint the prospective counselor with an array of assessment instruments and appraisal techniques. Includes practical experience with tests as well as foundations of test development. Lecture three hours.

EDC 219. Group Processes in Counseling. 3 Units
Prerequisite(s): EDC 216 and EDC 280.
Term Typically Offered: Fall, Spring
Group process theory and procedures, including group counseling and guidance. Participation in a group experience is required. Lecture, discussion, three hours.
Note: May be repeated for credit.

EDC 220. The Spiritual Dimension in Counseling and Psychotherapy. 3 Units
Prerequisite(s): EDC 155, EDC 156, EDC 216, EDC 280; or instructor permission.
Term Typically Offered: Fall, Spring
Investigation into concerns and issues, modes, and methodologies surrounding exploration of the spiritual dimension in the counseling/therapy relationship. Experiential activities are included.

EDC 222. Clinical Stress Reduction. 3 Units
Term Typically Offered: Fall, Spring
Major concepts, theories, and approaches to effective stress reduction. Includes stress level assessment, planning and implementation of a stress reduction program. Practice of beneficial stress reduction techniques and application in clinical practice.
Note: Open to unclassified students with instructor permission.

EDC 230. Law and Ethics for Marriage, Family, and Child Counseling. 3 Units
Prerequisite(s): EDC 155, EDC 156, EDC 216, EDC 280 or instructor permission.
Term Typically Offered: Fall, Spring
Legal and ethical considerations in the practice of marriage, family, and child counseling. Current laws, responsibilities, restrictions, rights and privileges, licensing regulations, and ethical standards of major professional groups. Child abuse assessment and reporting requirements. Organization, administration, and management of independent practice. Lecture three hours.

EDC 231. Diagnosis and Treatment Planning. 3 Units
Prerequisite(s): EDC 216, EDC 218, EDC 280; classified student in the Counselor Education Program.
Term Typically Offered: Fall, Spring
Advanced discussion of psychopathology with emphasis on differential diagnosis, use of DSM IV, and development of treatment plans. Use of mental status exam and structured interview schedules. Major diagnostic categories covered include schizophrenia, mood disorders, anxiety disorders, and personality disorders. Completion of case reports and understanding of clinical materials using diagnosis and treatment plans will be emphasized from a diversity perspective. Lecture three hours.

EDC 232. Family Violence. 3 Units
Prerequisite(s): EDC 212, EDC 230, EDC 234; or instructor permission.
Term Typically Offered: Fall, Spring
Violence in the family includes spouse abuse, child abuse, incest, and sexual abuse. Myths about these areas will be replaced by empirically-based facts. There will be an emphasis on effective treatment methods; research findings on family violence, including etiology and family patterns; overlap with alcohol and other drugs, and maintenance factors. Students will gain techniques and skills in interviewing, assessment, and counseling when violence is a presenting issue.
EDC 233. Substance Abuse and Addiction. 3 Units
Prerequisite(s): EDC 231.
Term Typically Offered: Fall, Spring
Provides an overview of substance abuse, addiction and co-occurring disorders with emphasis on psychoactive drugs including alcohol. Material will focus on the following areas: identification, evaluation, treatment and prevention of substance abuse and addiction, family, friends and coworker issues, legal and medical aspects of substance abuse, populations at risk, the role of support persons, support systems, and community resources.

EDC 234. Seminar: Marriage and Family Counseling. 3 Units
Prerequisite(s): EDC 214, EDC 216, EDC 280; classified student in the Counselor Education Program.
Corequisite(s): For MFCC Specialization: EDC 476.
Term Typically Offered: Fall, Spring
Introduction to the basic concepts and principles of family therapy. Provides and lays the foundation on which all theories/schools of family therapy are based and covers the basic theories of family therapy. Issues include evaluation of families, diagnosis in a family context, interviewing strategies, redefining problems in a family systems context, and treatment principles. Lecture three hours.
Note: May substitute PSYC 225 with consent of faculty advisor prior to registration.

EDC 240A. Psychological, Social and Medical Aspects of Disability, A. 3 Units
Prerequisite(s): Approval as a candidate for the MS degree in Counseling.
Term Typically Offered: Fall, Spring
Psychological, social, and medical aspects of various congenital, hereditary, and trauma-induced disabilities are studied in-depth, particularly their relationship to vocational adjustment. The etiology, treatment, prognosis, and limitations caused by various disabling medical conditions are covered as well as such factors as depression, denial and dependency as they occur or are related to these disabling conditions. Emphasis is also given to the concepts of motivation, self-concept, and personal and societal attitudes toward disability.

EDC 240B. Psychological, Social and Medical Aspects of Disability, B. 3 Units
Term Typically Offered: Fall, Spring
This is a two-part course. Both EDC 240A and EDC 240B are required. EDC 240A is not a prerequisite for 240B.

EDC 241. Developmental Stages and Art Therapy Techniques. 3 Units
Prerequisite(s): EDUC 155 and EDUC 156.
Term Typically Offered: Fall, Spring
In-depth study of normal stages of development in art with special emphasis on the developmental stages as both diagnostic indicators and aids in devising art therapy treatment. Includes hands-on experience with a variety of art therapy techniques and discussion of their applicability to different client populations. Purchase of some basic art supplies is required. Lecture, discussion, three hours.

EDC 242. Play and Art in Therapy with Children. 3 Units
Prerequisite(s): EDC 216, EDC 280, classified student in the School Counseling Specialization. Other Counselor Education students may be permitted to enroll when space is available.
Term Typically Offered: Fall, Spring
Explores the ways children use fantasy, play, and art as means for communication, growth and healing. Emphasis is placed on clinical skills, therapeutic limit setting, counseling theory and developmentally appropriate interventions. Purchase of some basic art supplies is required.

EDC 244. Trauma and Crisis Counseling. 3 Units
Term Typically Offered: Fall, Spring
This course provides opportunities for both theory and skill development by examining crisis and trauma counseling, including crisis theory; multidisciplinary responses to crises, emergencies, or disasters; cognitive, affective, behavioral, and neurological effects associated with trauma; brief, intermediate and long-term approaches; assessment strategies for clients in crisis and principles of intervention for individuals with mental or emotional disorders during times of crisis, emergency, or disaster.

EDC 250. Education Research. 3 Units
Prerequisite(s): Graduate status.
Term Typically Offered: Fall, Spring
Studies qualitative and quantitative methods in the development of reliable knowledge in the field of education. Includes identification and formulation of research problems, research designs and presentation of reports representative of different research strategies. Classified students are encouraged to take this course early in their graduate programs.

EDC 252. Legal and Ethical Issues in Professional Counseling. 3 Units
Term Typically Offered: Fall, Spring
Designed to provide students with basic knowledge and skills necessary to be legally and ethically competent in practice of counseling. Examines ethical and legal considerations pursuant to practice of counseling. Topics to be covered are ethics (CAMFT, AAMFT, ACA, ASCA, NCDA) related to counseling practice in private and public sectors, as well as laws regarding mandatory child and elder abuse assessment and reporting, confidentiality, privilege, liability, marriage, family, child and school ethics and law. Required for graduation with a degree in Counseling.

EDC 254. Counseling and Psychotropic Medicine. 3 Units
Prerequisite(s): EDC 231
Term Typically Offered: Fall, Spring
Provides an introduction to psychopharmacology; the biological bases of behavior; basic classifications, indications, and contraindications of commonly prescribed psychopharmacological medications; and effective approaches to collaborating with clients, their families and other professionals so that appropriate referrals can be made for medication evaluations and so that the side effects of those medications can be identified. Meets the BBS licensure requirements for Professional Clinical Counselors and Marriage and Family Therapists.
EDC 260. Career Development. 3 Units
Term Typically Offered: Fall, Spring

Provides a basic introduction to career development and career counseling. Identification and assessment of issues common in career counseling settings are examined. Group and individual models of career development and counseling in schools, community agencies or private industry are also investigated and discussed. Lecture three hours.

EDC 261. Seminar in Counseling: Job Placement. 3 Units
Term Typically Offered: Fall, Spring

Analyzes and practice of job-seeking skills, employer information base, and job placement of the handicapped.

EDC 262. Career Counseling Process. 3 Units
Prerequisite(s): EDC 260; classified student in the Counselor Education Program.
Term Typically Offered: Fall, Spring

On-going learning of the processes needed to deliver career counseling services to a variety of clientele. Students will extend their theoretical knowledge base and will more clearly focus on the relationship between a person's life and the process of career development. Elements to be studied in more depth include career development theory, assessment techniques and strategies, goal setting, decision making, and integration of multicultural aspects and strategies. A practical experience in administering and interpreting selected test instruments extensively used in career counseling will be included. Lecture three hours; practical experience one hour.

EDC 264. Seminar in Counseling: Career Systems Development. 3 Units
Prerequisite(s): EDC 260; classified student in the Counselor Education Program.
Term Typically Offered: Fall, Spring

Specific emphasis is at the implementation level, with students learning the necessary skills for implementing, maintaining, and stimulating career development in schools, community agencies or private industry. Lecture three hours.

EDC 266. Seminar in Counseling: Career Program Development. 3 Units
Prerequisite(s): EDC 260; classified student in the Counselor Education Program.
Term Typically Offered: Fall, Spring

Specific emphasis is at the program development level, with students learning the necessary components for developing a career counseling program in schools, community agencies, or private industry. Lecture three hours.

EDC 268. Career and Job Search. 3 Units
Prerequisite(s): EDC 260 or instructor permission.
Term Typically Offered: Fall, Spring

Work is undergoing change with the advent of new technologies, an increasingly diverse workforce, and corporate restructuring. These conditions have led to more frequent occupational shifts and the loss of previously secure jobs, self-reliance replacing loyalty in relations between employers and employees, and fragmented careers becoming more common as family responsibilities and work opportunities became increasingly interwoven. Examines traditional and emerging approaches for assisting clients in a changing and evolving job market.

EDC 270. Organization and Administration of School Counseling Programs. 3 Units
Term Typically Offered: Fall, Spring

Principles and practices necessary to plan, initiate, administer, and evaluate school counseling programs, including related laws. Lecture, discussion three hours.

EDC 272. Counseling Children and Youth. 3 Units
Prerequisite(s): EDC 216, EDC 280, classified student in Counselor Education Program. School specialization: EDC 242.
Corequisite(s): School Counseling Specialization: EDC 475.
Term Typically Offered: Fall, Spring

Provides students with a theoretical foundation and working knowledge of contemporary issues and interventions for children and youth. A variety of presenting problems and treatment strategies are explored.

EDC 274. Guidance and Consultation in School Counseling. 3 Units
Prerequisite(s): EDC 216, EDC 280, EDC 270; classified student in the Counselor Education Program.
Term Typically Offered: Fall, Spring

Presents a variety of topics and strategies related to the school counselor's role in implementing guidance curricula in the school. Explores models of consultation, change strategies, human relations skills, and ethical considerations. Emphasis is on the developmental nature of school counseling programming, the need for school counseling to support the larger instructional mission of the school, the role of the counselor as a change agent and the multiplicity of skills needed for successful guidance and consultation.

EDC 280. Practicum in Communication. 2 Units
Corequisite(s): EDC 216.
Term Typically Offered: Fall, Spring

Supervised practice in the basic styles of communication, verbal and nonverbal, with additional focus on the particular skills of selected theories. Lecture one hour; laboratory two hours.

Note: Recommended to be taken within the first 6 units of study in the Counselor Education Program.

EDC 282. Practicum in Group Counseling. 2 Units
Prerequisite(s): EDC 219; classified student in the Counselor Education Program.
Term Typically Offered: Fall, Spring

Supervised practice in leadership of group counseling. Lecture one hour; laboratory three hours.

Credit/No Credit
EDC 294. Cooperative Education Experience. 3 Units  
Prerequisite(s): Open only to upper division and graduate students; consent of Department Chair.  
Term Typically Offered: Fall, Spring  
Cooperative Education (Co-op) relates academic theory to professional practice by providing paid work experience in the student’s major field of study and academic credit. Students receive supervised employment in school districts, state and community agencies, companies, and other appropriate settings. Requires attendance at weekly meetings, preparation of application packet, completion of field study assignment, and a written final report.  
Note: Units may not be used to meet course work requirements. May be repeated once for credit.  
Credit/No Credit

EDC 296A. Current Topics in Marriage Couples and Family Counseling. 2 Units  
Prerequisite(s): EDC 210, EDC 216, EDC 280 and acceptance into the Counselor Education Program.  
This course will provide Marriage, Couple, and Family Counseling students an advanced review and introduction of current applied theories (evidence-based or best practiced), intervention techniques/strategies, and multicultural perspectives specific to the MFCC specialization. Topics may include domestic violence, death and dying, and addiction, as well as others.  
Credit/No Credit

EDC 296P. Current Issues in Counseling: Meditation. 1 Unit  
Term Typically Offered: Fall, Spring  
An introductory experimental class in meditation which provides a basic foundation of basic meditative theories, the experience of meditative practices, and a basic knowledge of meditative techniques of benefit both personally and with clients. Research has demonstrated that meditation is helpful in a number of stress-related conditions and recent research indicates it is often more effective than psychotherapy in treatment of some problems.  
Note: Instructor approval required. May be taken twice for credit.  
Credit/No Credit

EDC 299. Special Problems. 1 - 3 Units  
Term Typically Offered: Fall, Spring  
Individual projects at graduate level designed especially for students capable of independent study.  
Note: Admission by approval of the instructor with whom the student will be working directly and the Department Chair.  
Credit/No Credit

EDC 462. Supervised Field Observation Rehabilitation Counseling. 3 Units  
Term Typically Offered: Fall, Spring  
Introduction to the vocational rehabilitation program. Students will learn about the foundations of rehabilitation counseling through discussion and visits to a number of agencies in the community. Students will spend at least 30 hours over the course of the semester in a variety of community rehabilitation facilities.  
Note: Open to unclassified graduate students on a space available basis.  
Credit/No Credit

EDC 475. Practicum In Counseling. 3 Units  
Prerequisite(s): Prerequisites for all specializations: EDC 210, EDC 214, EDC 216, EDC 280. Additional prerequisites by specialization: Career - EDC 212+, EDC 218, EDC 219+, EDC 260, EDC 262+, Community - EDC 201, EDC 212+, EDC 218, EDC 219; MFCC - EDC 212, EDC 218+, EDC 219, EDC 234, EDC 252+, EDC 476; School - EDC 252+, EDC 270.  
Corequisite(s): By specialization: School - EDC 272.  
Term Typically Offered: Fall, Spring  
Supervised counseling practice in agency and/or school settings. Emphasis on application of counseling theories and the integration of one’s own counseling philosophy into practical applications. Basic requirements: 100 clock hours with at least 40 client contact hours, 1 hour per week of individual/triadic supervision, and one and half hours per week of group supervision.  
Note: Department petition is required the semester prior to enrollment.  
Credit/No Credit

EDC 476. Practicum in Marriage, Family and Child Counseling. 1 Unit  
Prerequisite(s): EDC 216, EDC 280, classified student in the Counselor Education Program.  
Corequisite(s): EDC 234.  
Term Typically Offered: Fall, Spring  
Structured observation and supervised practice in marriage, family, and child counseling. Application of material learned in EDC 234. Emphasis on establishing relationships and interviewing techniques with multiple clients, assessment techniques, setting goals, and learning to think systemically. Laboratory two hours.  
Credit/No Credit

EDC 480. Field Study In Counseling. 2 - 6 Units  
Prerequisite(s): EDC 475 and all of its prerequisites. Additional prerequisites by specialization: MFCC - completion of required courses except culminating requirement.  
Corequisite(s): By specialization: School - EDC 272.  
Term Typically Offered: Fall, Spring  
Supervised counseling and field experiences arranged in community-based settings such schools, colleges and/or agencies. One hundred clock hours of experience required for each unit of credit for a total of six hundred clock hours (or 6 units). Weekly supervision is provided throughout the field experience: one hour per week of individual/triadic supervision and one and half hours per week of group supervision.  
Note: Department petition and approval of faculty advisor is required the semester prior to enrollment.  
Credit/No Credit

EDC 500. Master's Culminating Experience. 1 Unit  
Prerequisite(s): Advanced to candidacy for the master's degree and enrollment in the last semester of course work; Classified student in the Counselor Education Program; Department petition required the semester prior to enrollment.  
Term Typically Offered: Fall, Spring  
Focuses on reviewing and synthesizing of student's knowledge of theory, and practice. A review and examination of previous learning will be included.  
Note: Taken in preparation for the comprehensive examination.  
Credit/No Credit
EDLP 202A. Legal Basis of Education. 3 Units
Prerequisite(s): Admission to the Educational Leadership Program and instructor permission.
Term Typically Offered: Fall, Spring

Study of school law as set forth in the common law, state, and federal constitutions, statutes, judicial decisions, and in the rules and regulations of state departments and local units of administration.

EDLP 201. Foundations of Educational Leadership. 3 Units
Prerequisite(s): Instructor permission.
Term Typically Offered: Fall, Spring

Introduction to theory and practice of educational leadership at the local, state, and federal levels including structure and function of administration, organizational behavior, intrapersonal dimensions, and interpersonal relationships.

EDLP 200A. Diversity and Equity in Educational Leadership. 3 Units
Term Typically Offered: Fall, Spring

Primary objective is to provide a learning environment conducive to the development of knowledge, understanding, and skills consistent with Multicultural Education and pluralistic education philosophy.

EDLP 200. Diversity and Equity in Educational Leadership. 3 Units
Term Typically Offered: Fall, Spring

Designed to synthesize previously obtained knowledge of different cultures/ethnic groups/races and social classes. The primary objective is to provide a learning environment which is conducive to the development of knowledge, understanding, and skills consistent with multicultural education and pluralistic education philosophy.

EDLP 205. Curriculum Development. 3 Units
Prerequisite(s): Admission to the Educational Leadership Program and instructor permission.
Term Typically Offered: Fall, Spring

Curriculum development appropriate to a modern program of education; the service role of the leader in instructional improvement; cultural, social, and political forces acting to shape the curriculum.

EDLP 205A. Curriculum and Instructional Leadership in K-12 Schools. 3 Units
Prerequisite(s): EDLP 201
Term Typically Offered: Fall, Spring

Focuses on the significance of instructional leadership in the design and implementation of curriculum leading to high achievement for all students in K-12 schools. Particular attention will be given to current state and federal school accountability requirements, standards-based curriculum, the use of disaggregated student achievement data to design an instructional program appropriate to and effective for a diverse student population, and best research-based instructional practices.

EDLP 206A. Supervision and Leadership. 3 Units
Prerequisite(s): Admission to the Educational Leadership Program and instructor permission.
Term Typically Offered: Fall, Spring

Supervisory theory and technique, including assessment of educational innovations, supervision of teaching, development of strategies for in-service programming, and the roles of various groups and individuals in the improvement of instruction.

EDLP 208A. School Leadership/Management. 3 Units
Prerequisite(s): Admission to the Educational Leadership Program
Term Typically Offered: Fall, Spring

Examination, synthesis, and application of contemporary leadership/management theory and processes at the site or unit level; consideration given to the expanding roles and current requirements in the administration of educational enterprises. Lecture three hours per week.

EDLP 209A. Human Resources and Supervision. 3 Units
Term Typically Offered: Fall, Spring

Examines human resources and personnel practices in educational organizations. Key themes and issues in personnel will be presented with broad assumptions regarding dominant practices and their application to establishing positive human relations.
EDLP 221. Foundations in Higher Education Leadership. 3 Units
Prerequisite(s): Admission to the Master of Education: Higher Education Leadership Option.
Term Typically Offered: Fall, Spring

Analyzes higher education including its historical, political, philosophical and social aspects with emphasis upon the implications of crucial issues for leaders in higher education. An examination of the historical origins of contemporary practices and discourse and an analysis of the complex relationships between society and institutions of higher education: patterns of governance and coordination; diversity; overview of organizational and administrative structure; faculty; curriculum; student affairs, policy, and demographic trends.

EDLP 222. Diversity in Higher Education. 3 Units
Prerequisite(s): Admission to the Master of Education: Higher Education Leadership Option.
Term Typically Offered: Fall, Spring

Engages participants in a process of inquiry and reflection through self-critique, peer critique, and the dialogical examination of our assumptions, ideas, and understandings that promote intellectual growth. Participants will examine and discuss the literature, research, and discourse concerning theory, policy, and practice about diversity and its relation to higher education.

EDLP 223. Advanced Seminar: Student Affairs Leadership. 3 Units
Prerequisite(s): Admission to the Master of Education: Higher Education Leadership Option.
Term Typically Offered: Fall, Spring

Administration of student services and student affairs in colleges and universities. Principles that guide professional practice and decision making will be explored, as will the roles and responsibilities of student affairs professionals. Students will have the opportunity to explore current and future issues and directions in student services.

EDLP 224. Advanced Seminar: Program Development and Evaluation. 3 Units
Prerequisite(s): Admission to the Master of Education: Higher Education Leadership Option.
Term Typically Offered: Fall, Spring

Program development, processes, and procedures, including needs assessment and writing goals and objectives. An exploration of administrative roles and responsibilities. Formative, summative, and impact evaluation strategies, including empowerment evaluation, planning for evaluation, and analyzing and applying evaluation data for program improvement.

EDLP 225. Advanced Seminar: Ethical Decision Making. 3 Units
Prerequisite(s): Admission to the Master of Education: Higher Education Leadership Option.
Term Typically Offered: Fall, Spring

Links analysis with action through a survey of the ethical, legal, and professional issues facing the public or private education administrator. Underlying decision making is to understand the basic nature of the academic enterprise and apply social and moral values to the management of higher education and ethical decision making.

EDLP 226. Meeting the Leadership Challenge. 3 Units
Term Typically Offered: Fall, Spring

Explore and analyze the leadership styles, qualities and characteristics that are common to effective leaders and the leadership skills and knowledge necessary to effectively lead in California’s community colleges. The history, mission, and culture of the California Community College system and the students it serves will also be examined. Topics such as consultation, shared governance, legislative and accrediting bodies, and other external groups that influence policy and decision-making in higher education will be discussed.

EDLP 227. Leading the Way for Student Success: Student and Instructional Services. 3 Units
Term Typically Offered: Fall, Spring

Participants will explore changing demographics, accountability regarding statewide mandates, reporting regulations, and accreditation, new technology and other factors impacting California’s community college student services programs and professionals. Gain an understanding of the philosophy and mission of student services initiatives and programs and student development theory. Examine the role of faculty as leaders in curriculum, instruction and assessment and student success. Understand the purposes and uses of research and technology to address student outcomes, teaching and learning, institutional effectiveness, and decision-making.

EDLP 228. Innovative Leadership for Troubled Times: Budget/Finance and Human Resources. 3 Units
Term Typically Offered: Fall, Spring

California community college leaders are presented with increased legislative and public pressure for accountability while in an era of chronic and disparate under-funding of the system. Understand the relationship between higher education finance and the overall fiscal operations of California’s community college system. Gain a broad knowledge of human resource laws and regulations and explore issues of faculty and staff diversity, part-time and full-time faculty, collective bargaining, affirmative action, staff development and recruitment, and selection and retention of staff.

EDLP 230. Master of Arts Thesis/Project Seminar. 3 Units
Prerequisite(s): EDLP 250 and advancement to candidacy.
Term Typically Offered: Fall, Spring

This individualized seminar is designed to extend research knowledge, and provide direction in the use of library/professional education resources, as well as exposure to sample theses and projects using APA style. Reviews research methods and a review of the literature and provides instruction in the appropriate academic writing style and format for academic presentations.
Credit/No Credit

EDLP 250. Education Research. 3 Units
Prerequisite(s): Admission into the EDLP Program.
Term Typically Offered: Fall, Spring

Studies qualitative and quantitative methods in the development of reliable knowledge in the field of education. Includes identification and formulation of research problems, research designs and presentation of reports representative of different research strategies. Establishes and improves students’ professional and academic writing skills in preparation for leadership duties. Classified students are encouraged to take this course early in their graduate programs.
Note: Graduate Writing Intensive (GWI) course.
EDLP 255. Field Experience Seminar. 3 Units
Prerequisite(s): Completion of 12 units including EDLP 200, EDLP 201, and either EDLP 205 or EDLP 206A for Preliminary Administrative Services Internship Credential students only.
Corequisite(s): EDLP 401 and/or EDLP 402 for Administrative Services Credential students only.
Term Typically Offered: Fall, Spring
Experience and practice in observation and analysis of school environment, including disaggregated student achievement data.
Note: Intern Students are allowed to take class twice and can take course concurrently with EDLP 401 and EDLP 402.
Credit/No Credit

EDLP 270. Advanced Seminar: Applied Leadership and Staff Teambuilding. 3 Units
Prerequisite(s): Graduate level status within the School of Education and instructor permission.
Term Typically Offered: Fall, Spring
Develop a comprehensive theoretical/conceptual framework from which to view current research surrounding Organizational Leadership and Staff Teambuilding. Special emphasis will be on providing students with experiential learning activities beyond the classroom and incorporate challenging outdoor components. Students will develop a resource portfolio relevant to their unique work situations.

EDLP 273. Advanced Seminar: Grants, Proposals and Systematic Planning. 3 Units
Term Typically Offered: Fall, Spring
Systematic planning theory and skills with particular attention to use of these skills in the development of grant proposals. Students will use funding agency regulations and guidelines relative to program development and implementation, and will develop a proposal which may be submitted to a funding agency.
Credit/No Credit

EDLP 277. Advanced Seminar: Assessment. 2 Units
Prerequisite(s): Admitted into the Professional Administrative Credential.
Term Typically Offered: Fall, Spring
Engage participants in a process of ongoing assessment of their administrative practice as school leaders. Such ongoing assessment uses multiple points of data, multiple sources of information, and multiple feedback sources such as colleagues and mentors.
Credit/No Credit

EDLP 286. Advanced Seminar: Supervision and Leadership. 3 Units
Prerequisite(s): Admission to the Educational Leadership Program, EDLP 206A, instructor permission.
Term Typically Offered: Fall, Spring
Through lecture and discussion, philosophical and practical problems of supervision of instruction will be explored. Current research on effective teaching, staff development, supervisory techniques, and theories of learning for both students and adults will be examined as a basis for sound supervision practices.
EDLP 401. Internship On-the-Job Experience. 8 Units
Term Typically Offered: Fall, Spring

First semester of the on-the-job internship experience. Interns are supervised in the administrative roles by sponsoring employing agency, as well as by university faculty. Limited to, and required of, candidates for the Preliminary Administrative Services Internship Credential. Credit/No Credit

EDLP 402. Internship On-the-Job Experience. 8 Units
Term Typically Offered: Fall, Spring

Second semester of the on-the-job internship experience. Interns are supervised by sponsoring employing agency, as well as by university sponsors. Limited to, and required of, candidates for the Preliminary Administrative Services Internship Credential. Credit/No Credit

EDLP 403. Internship On-the-Job Experience. 8 Units
Corequisite(s): EDLP 413.
Term Typically Offered: Fall, Spring

Third semester of the on-the-job experience for candidates who have not completed their credential requirements during the first year of internship. (Refer to EDLP 401.) Limited to, and required of, candidates for the Preliminary Administrative Services Internship Credential. Credit/No Credit

EDLP 404. Internship On-the-Job Experience. 8 Units
Corequisite(s): EDLP 414.
Term Typically Offered: Fall, Spring

Fourth semester of the on-the-job internship experience. (Refer to EDLP 403.) Credit/No Credit

EDLP 413. Supplemental Internship Experience. 6 Units
Corequisite(s): EDLP 403.
Term Typically Offered: Fall, Spring

Third semester of the supplemental internship experience. Provides first-hand visitations and experiences in various educational and community agencies at state, county, district, and local school levels; additional supervised experience for candidates; and seminar experiences in observation and analysis of school environments for candidates for the Preliminary Administrative Services Internship Credential. Credit/No Credit

EDLP 414. Supplemental Internship Experience. 6 Units
Corequisite(s): EDLP 404.
Term Typically Offered: Fall, Spring

Fourth semester of the supplemental internship experience. Provides first-hand visitations and experiences in various educational and community agencies at state, county, district, and local school levels; additional supervised experience for candidates; and seminar experiences in observation and analysis of school environments for candidates for the Preliminary Administrative Services Internship Credential. Credit/No Credit

EDLP 495A. Field Study in Educational Leadership. 3 Units
Prerequisite(s): Admission to Educational Leadership Program; completion of twelve (12) units of EDLP coursework, including EDLP 255; approval of faculty advisor.
Term Typically Offered: Fall, Spring

On-the-job experience in which the candidate assumes responsibility for observation and analysis of school environments including leadership responsibilities, supervision of instructional program, and overall school climate. Credit/No Credit

EDLP 498. Advanced Administrative Field Experience. 8 Units
Prerequisite(s): Admission to Professional Administrative Services Credential Program and full-time employment as a school administrator.
Term Typically Offered: Fall, Spring

Candidates for the Professional Administrative Services Credential are supervised in full-time administrative roles by sponsoring employment agency and university faculty. Credit/No Credit

EDLP 500A. Master of Arts Thesis/Project. 3 Units
Prerequisite(s): Advanced to candidacy and chair permission of his/her thesis or project committee.
Term Typically Offered: Fall, Summer

Completion of a thesis or project approved for the Master’s degree.

EDLP 500B. Master of Arts Thesis/Project. 3 Units
Prerequisite(s): Advanced to candidacy and chair permission of his/her thesis or project committee.
Term Typically Offered: Fall, Spring

Completion of a thesis or project approved for the Master’s degree.

Electrical and Electronic Engineering (EEE)

EEE 64. Introduction to Logic Design. 4 Units
Prerequisite(s): CSC 15 or CSC 25
Term Typically Offered: Summer only

Covers the following topics: logic gates, binary number system, conversion between number systems, Boolean algebra, Karnaugh maps, combinational logic, digital logic design, flip-flops, programmable logic devices (PLDs), counters, registers, memories, state machines, designing combinational logic and state machines into PLDs, and basic computer architecture. Lab emphasizes the use of software equation entry design tools, the use of a schematic entry, and the use of a logic simulation design tool. Lab assignments are design-oriented. Cross Listed: CPE 64; only one may be counted for credit.

EEE 64W. Introduction to Logic Design Workshop. 1 Unit
Corequisite(s): EEE 64.
Term Typically Offered: Fall, Spring

Assists students in developing a more thorough understanding of logic simulation and logic design. Focus is on problem solving and design. Activity two hours. Lecture three hours; laboratory three hours. Cross Listed: CPE 64W; only one may be counted for credit. Credit/No Credit
EEE 102. Analog/Digital Electronics. 3 Units
Prerequisite(s): ENGR 17.
Corequisite(s): EEE 102L.
Term Typically Offered: Fall, Spring
Introduction to analog/digital electronics, diodes, FET’s, BJTs, DC biasing, VI characteristics, single-stage amplifiers, power supplies and voltage regulators, power electronic devices, OP-amps, active filters, A/D and D/A converters. PSPICE used extensively.
Note: Cannot be taken for credit by E&EE Majors.

EEE 102L. Analog/Digital Electronics Laboratory. 1 Unit
Prerequisite(s): EEE 102.
Corequisite(s): EEE 102.
Term Typically Offered: Fall, Spring
Introduction to analog/digital electronics, diodes, FET’s, BJTs, DC biasing, VI characteristics, single stage amplifiers, power supplies and voltage regulators, power electronic devices, OP-amps, active filters, A/D and D/A converters. PSPICE used extensively.
Note: Cannot be taken for credit by E&EE Majors.

EEE 108. Electronics I. 3 Units
Prerequisite(s): EEE 117.
Corequisite(s): EEE 108L.
Term Typically Offered: Fall, Spring, Summer
Introduction to electronics, ideal OP-AMPS, BJTs, FETs, DC biasing, VI characteristics, single stage amplifiers, low frequency small signal models, power supplies and voltage regulation. PSPICE required.

EEE 108L. Electronics I Laboratory. 1 Unit
Prerequisite(s): EEE 108, EEE 117L.
Corequisite(s): EEE 108.
Term Typically Offered: Fall, Spring, Summer
Characteristics and applications of OP-AMPS, rectifiers, BJTs and FETs. Introduction to GPIB, PSPICE and LabVIEW. Laboratory three hours.

EEE 109. Electronics II. 4 Units
Prerequisite(s): EEE 108, EEE 108L, EEE 117, EEE 117L; and }GWAR Certification before Fall 09, or WPJ score of 70+, or at least a C- in ENGL 109M or ENGL 109W).
Term Typically Offered: Fall, Spring, Summer
Differential and multistage amplifiers, high frequency models (BJTs and FETs), feedback and sensitivity, power amplifiers, oscillators and waveform shaping circuits. Advanced use of PSPICE. Lecture three hours; laboratory three hours.

EEE 110. Advanced Analog Integrated Circuits. 3 Units
Prerequisite(s): EEE 109 or consent of instructor.
Term Typically Offered: Fall only
The use of operational amplifiers in circuit designs for applications such as filtering, switched capacitor design, sample and hold design, instrumentation amplifiers, and voltage reference circuitry will be explored, as well as topics in Feedback Theory.

EEE 111. Advanced Analog Integrated Circuits Laboratory. 1 Unit
Prerequisite(s): EEE 109; either EEE 110 or EEE 230. EEE 110 or EEE 230 may be taken concurrently.
Term Typically Offered: Fall only
Circuit design, mask design, and simulation of integrated circuitry. Use of CAD software to prepare design for fabrication. Individual and group design projects. Laboratory three hours.

EEE 117. Network Analysis. 3 Units
Prerequisite(s): ENGR 17, MATH 45, and PHYS 11C
Corequisite(s): EEE 117L.
Term Typically Offered: Fall, Spring, Summer
Review of sinusoidal steady state, phasors, complex power, three phase power, mutual inductance, series and parallel resonance. Introduction to application of Laplace transforms in network analysis, transfer functions, Bode plots, Fourier series, two-port circuits.

EEE 117L. Networks Analysis Laboratory. 1 Unit
Corequisite(s): EEE 117.
Term Typically Offered: Fall, Spring, Summer
Introduces fundamental laboratory techniques while demonstrating the concepts introduced in the EEE 117 lecture. The computer simulation language PSPICE is introduced and applied. Laboratory three hours.

EEE 120. Electronic Instrumentation. 4 Units
Prerequisite(s): EEE 108, EEE 117; EEE 108 may be taken concurrently.
Term Typically Offered: Fall, Spring
Fundamental principles of sensors and instrumentation systems, together with their electrical implementation, such as biasing and signal conditioning circuits. Temperature, force, pressure, and mechanical sensors. Optical sensors, including a brief introduction to light sources and detectors. Applications to biomedical engineering and industrial control. Lecture three hours; laboratory three hours.

EEE 122. Applied Digital Signal Processing. 3 Units
Prerequisite(s): EEE 117, EEE 180
Corequisite(s): EEE 180
Term Typically Offered: Fall, Spring
Application of digital signal processing to biomedical signals. Origin and characteristics of biomedical signals and contaminations. Preparation of biomedical signals for processing, including sensors, amplification, filtering, sampling, and quantization. Time-domain processing, including peak and zero-crossing detection, time interval measurement, peak height, and moving average estimates of mean and root mean square value. Frequency domain processing, including filtering to separate biomedical signal components and spectrum estimation. Joint time-frequency analysis.

EEE 130. Electromechanical Conversion. 3 Units
Prerequisite(s): EEE 117 and EEE 161
Term Typically Offered: Fall, Spring, Summer
Magnetic circuits and principles of electromechanical energy conversion, transformers, DC machines, asynchronous AC machines, synchronous AC machines, introduction to special machines.
EEE 131. Electromechanics Laboratory. 1 Unit
Prerequisite(s): EEE 117, EEE 130 (EEE 130 may be taken concurrently), and (GWAR Certification before Fall 09, or WPJ score of 70+, or at least a C- in ENGL 109M or ENGL 109W).
Term Typically Offered: Fall, Spring

Direct current motor and generator characteristics, three phase synchronous motor and synchronous generator characteristics, single phase power transformer short circuit and no-load tests, frequency changer tests and tests on DC and AC machine models, potential and current transformers.

EEE 135. Renewable Electrical Energy Sources and Grid Integration. 3 Units
Prerequisite(s): EEE 130.
Term Typically Offered: Fall, Spring

The study of existing sources of renewable electric energy such as wind, solar, geothermal, hydro, tidal, wave power, and biomass. Emphasis on wind and solar energy sources and their integration into the electric power grid. Various energy storage methods to accommodate the intermittent nature of these resources. Economic constraints, environmental benefits and institutional regulations.

EEE 136. Smart Electric Power Grid. 3 Units
Corequisite(s): EEE 142 or EEE 144.
Term Typically Offered: Spring only

EEE 141. Power System Analysis I. 3 Units
Prerequisite(s): EEE 117 and EEE 161
Term Typically Offered: Fall, Spring, Summer

EEE 142. Power System Analysis II. 3 Units
Prerequisite(s): EEE 130, EEE 141, and EEE 184
Term Typically Offered: Fall, Spring

Review of the fundamentals in electric energy systems; power flow analysis, disturbance of normal operating conditions, symmetrical components and sequence impedances, analysis of balanced and unbalanced faults; a brief review of protection systems; optimum allocation and dispatching of generators; dynamic system control; introduction to stability studies. Students in the course will use MATLAB to solve problems.

EEE 143. Power System Laboratory. 1 Unit
Prerequisite(s): EEE 130, EEE 141, and (GWAR Certification before Fall 09, or WPJ score of 70+, or at least a C- in ENGL 109M or ENGL 109W).
Term Typically Offered: Fall, Spring

Simulation of three phase operations and transmission line operation including voltage regulation, efficiency of long lines, power system stability, voltage control and load-frequency control, load flow and optimal dispatch for simplified interconnected systems.

EEE 144. Electric Power Distribution. 3 Units
Prerequisite(s): EEE 130.
Term Typically Offered: Fall, Spring

Operation and design of utility and industrial distribution systems including distribution system planning; load characteristics; application of distribution transformers; design of subtransmission lines, distribution substations, primary systems, secondary systems; application of capacitors; voltage regulation and reliability.

EEE 145. Power System Relay Protection and Laboratory. 4 Units
Prerequisite(s): EEE 141
Term Typically Offered: Fall only

Principles of protective relaying (classical and modern), current and voltage transformers, setting and testing or relaying elements, including differential, impedance, over/under current, voltage, and frequency relay types and/or elements, and their applications in protection of power system elements, including lines, generators, transformers, motors, and buses. Lecture 3 hours; laboratory 3 hours.

EEE 146. Power Electronics Controlled Drives. 3 Units
Prerequisite(s): EEE 108, EEE 130.
Term Typically Offered: Spring only

Review thyristors, controlled rectifiers, DC choppers and inverters and pulse width modulation methods including space vector method. Control of DC drives and methods of control of induction synchronous motors including flux-vector methods and computer simulations will be studied.

EEE 147. Power System Operation and Control Laboratory. 1 Unit
Prerequisite(s): EEE 141.
Term Typically Offered: Fall, Spring

Computer simulation methods to describe power system behavior under steady state and dynamic conditions. Experiments conducted using MATLAB and Simulink for load flow in distribution lines, optimal power dispatch, synchronous machine transient behavior under short circuit conditions, transient stability, voltage and reactive power control, classical and modern load frequency control. Laboratory three hours.

EEE 148. Power Electronics Laboratory. 1 Unit
Prerequisite(s): EEE 146; may be taken concurrently.
Term Typically Offered: Spring only

EEE 161. **Applied Electromagnetics.** 4 Units

**Prerequisite(s):** MATH 32, MATH 45, PHYS 11C, ENGR 17, and CSC 25.

**Term Typically Offered:** Fall, Spring, Summer

EEE 162. **Applied Wave Propagation.** 3 Units

**Prerequisite(s):** EEE 117, EEE 161.

**Term Typically Offered:** Fall only

Review of distributed circuit theory and the Smith chart. Impedance matching using series or shunt lumped and distributed circuits or near-quarterwave-matching sections. Noise temperature and noise figure. Scattering coefficient characterization of two-ports. Stability circles for high frequency transistors. Constant gain and noise figure circles. Basic antenna theory. Illustrated by their use for cell phones and other wireless systems.

EEE 163. **Traveling Waves Laboratory.** 1 Unit

**Prerequisite(s):** EEE 117, EEE 162 (EEE 162 may be taken concurrently), and (GWAR Certification before Fall 09, or WPJ score of 70+, or at least a C- in ENGL 109M or ENGL 109W).

**Term Typically Offered:** Fall only

Selected experiments in the transmission and reflection of waves in coaxial lines and waveguides. Antenna impedance and pattern measurements. Laboratory three hours.

EEE 165. **Introduction To Optical Engineering.** 3 Units

**Prerequisite(s):** EEE 161, EEE 180, EEE 185; EEE 185 may be taken concurrently.

**Term Typically Offered:** Fall, Spring

Generation, propagation and detection of light. Fresnel equations, Snells law, diffraction, polarization and interference. Operating principles of LEDs, lasers, photodiodes and optical fibers. Introduction to optical communications systems, integrated optical devices, and optical instrumentation.

EEE 166. **Physical Electronics.** 3 Units

**Prerequisite(s):** EEE 108.

**Term Typically Offered:** Spring only

Semiconductor physics, atomic models and crystal structures. Quantum theory, energy bands, motion of charge carriers, minority/majority carrier profiles and pn junctions. Manufacturing processes for and operating characteristics of diodes, bipolar transistors and field effect devices.

EEE 167. **Electro-Optical Engineering Lab.** 1 Unit

**Prerequisite(s):** EEE 161, EEE 180, EEE 165; EEE 165 may be taken concurrently, and GWAR Certification before Fall 09, WPJ score of 70+, or at least a C- in ENGL 109 M/W.

**Term Typically Offered:** Fall, Spring

Provides senior level undergraduates with hands-on experience in optical engineering and design. Experiments involving laser characteristics, spectral radiometry, diffraction, polarization, modulation of light, holography and spatial filtering will be performed. Laboratory three hours.

EEE 174. **Introduction to Microprocessors.** 4 Units

**Prerequisite(s):** Junior status, EEE 64.

**Term Typically Offered:** Fall, Spring, Summer

Topics include: microcomputer systems, microprocessor architecture, machine and assembly language programming, timing operations, bus arbitration and exception processing logic, addressing modes, parallel and serial ports, memory, assemblers and development systems. The lab uses development systems and target systems in the Computer Engineering laboratory to assemble, link, test and debug and run various assignments. Lecture three hours; laboratory three hours.

EEE 178. **Introduction to Machine Vision.** 3 Units

**Prerequisite(s):** EEE 180 or ME 172, or instructor approval.

**Term Typically Offered:** Spring only

Fundamental digital image processing and machine vision concepts and their application to the fields of robotics and automation. Topics include: digital image processing, image formation, two dimensional transforms, boundary descriptors, motion, camera calibration, vision for robot control, 3-D vision, and hardware architectures to support vision.

EEE 180. **Signals and Systems.** 3 Units

**Prerequisite(s):** EEE 117; EEE 117 may be taken concurrently.

**Term Typically Offered:** Fall, Spring, Summer

Rigorous development of the fundamental relationships governing time-domain and frequency-domain analysis of linear continuous-time and discrete-time systems. Topics include Fourier, Laplace and z-transforms, sampling theorem, modulation, system stability, and digital filters.

EEE 181. **Introduction to Digital Signal Processing.** 3 Units

**Prerequisite(s):** EEE 64 or equivalent, EEE 180.

**Term Typically Offered:** Spring only

Focuses on the application of linear systems theory to design and analysis of digital signal processing systems. Discrete systems, the z transform, and discrete Fourier transform are reviewed. Design of infinite impulse response filters, finite impulse response filters, and digital spectral analysis systems is presented. Computer simulation is used to study the performance of filters and spectral analysis systems. Signal processing architectures are introduced. Lecture three hours.

EEE 182. **Digital Signal Processing Lab.** 1 Unit

**Prerequisite(s):** EEE 180, EEE 181; EEE 181 may be taken concurrently.

**Term Typically Offered:** Spring only

Provides senior level undergraduate students with experience in the software/hardware design of discrete-time systems, and modern DSP techniques. Laboratory projects will include the following: spectral analysis of analog and digital signals, design of sampling and quantizer circuits, design and realization of IIR and FIR Digital Filters. Hardware projects will include acquisition, analysis, and filtering of speech, biomedical and video signals using Digital Signal Processors (DSPs).
EEE 183. Digital and Wireless Communication System Design. 3 Units
**Prerequisite(s):** EEE 161, EEE 180; EEE 185 may be taken concurrently.
**Term Typically Offered:** Fall only

Review of fundamentals, probability, information, distortion by channel, sampling, pulse code modulation, companding, link power calculation, noise figure, pseudo noise. Matched filter detection of binary signals, bit error rate, inter-symbol interference, zero-forcing equalizers. Effects of additive white Gaussian noise in pulse code modulation, spread spectrum in multiple access, cellular radio and other wireless applications. Procedure for making design trade offs will be discussed.

EEE 184. Introduction to Feedback Systems. 3 Units
**Prerequisite(s):** EEE 180.
**Term Typically Offered:** Fall, Spring, Summer

Dynamic system modeling by transfer function and state-space methods using differential equation, time-response and frequency-response methods. Determination of steady-state errors due to step, ramp and parabolic inputs and disturbances for closed-loop systems. Mapping of block diagrams and state-space representations to signal flow graphs (SFG) as well as finding the transfer function of the system represented by the SFG by Mason's Rule. Closed-loop system stability is examined via poles and eigenvalues and by using the Routh-Hurwitz criterion. Introduction to observability and controllability of systems. Design of compensators for feedback systems using root-locus, frequency response and state-space methods. Introduction to digital control. Computer simulation methods such as MATLAB and SIMULINK are used to support the above subjects.

EEE 185. Modern Communication Systems. 3 Units
**Prerequisite(s):** EEE 180, ENGR 120; ENGR 120 may be taken concurrently.
**Term Typically Offered:** Fall, Spring, Summer

Review of signal and system analysis, sampling theorem and Nyquist's criteria for pulse shaping, signal distortion over a channel, study of digital and analog communication systems, line coding, signal to noise ratios, performance comparison of various communication systems.

EEE 186. Communication Systems Laboratory. 1 Unit
**Prerequisite(s):** EEE 117 (EEE 185 may be taken concurrently), and (GWAR Certification before Fall 09, or WPJ score of 70+, or at least a C- in ENGL 109 M/W).
**Term Typically Offered:** Fall, Spring

Experimental study of modulation and demodulation in AM, FM, and digital communication systems, A/D and D/A conversion, measurement of power spectra, noise characterization in frequency domain.

EEE 187. Robotics. 4 Units
**Prerequisite(s):** EEE 180 or equivalent, or instructor permission.
**Term Typically Offered:** Fall only

Lecture introduces principles of robotics and design of robot systems. Includes robot architectures, sensing position/velocity, digital circuit noise, actuator and path control, robot coordinate systems, kinematics, differential motion, computer vision/architectures, and artificial intelligence. Laboratory will apply lecture theory in design experiments utilizing five degree-of-freedom robots, an industrial robot, and vision systems.

EEE 188. Digital Control System. 3 Units
**Prerequisite(s):** EEE 180, GWAR certification before Fall 09, WPJ score of 70+, or at least a C- in ENGL 109 M/W.
**Term Typically Offered:** Spring only

EEE 189. Controls Laboratory. 1 Unit
**Prerequisite(s):** EEE 184 (EEE 184 may be taken concurrently), and (GWAR Certification before Fall 09, or WPJ score of 70+, or at least a C- in ENGL 109 M/W).
**Term Typically Offered:** Fall, Spring

Study, simulation and design of linear feedback control systems using digital control methods such as MATLAB and SIMULINK. Practical examples of analysis and compensation for closed loop systems.

EEE 192A. Electrical Power Design Project I. 2 Units
**Prerequisite(s):** EEE 143 and any two of the following courses: EEE 141, EEE 142, EEE 144 (EEE 143 make be taken concurrently), and (GWAR Certification before Fall 09, or WPJ score of 70+, or at least a C- in ENGL 109 M/W or ENGL 109W).
**Term Typically Offered:** Fall, Spring

Concentrates on the planning, research and design aspects of electric power systems, including generation, transmission and distribution systems. Emphasis is placed on design philosophies, problem definition, research, project planning, written and oral communication skills, teamwork, development of specifications and effective utilization of available resources. Lecture one hour; laboratory three hours.

EEE 192B. Electrical Power Design Project II. 2 Units
**Prerequisite(s):** EEE 192A, EEE 142, EEE 144; EEE 142 or EEE 144, but not both may be taken concurrently.
**Term Typically Offered:** Fall, Spring

Continuation of EEE 192A. Students are expected to continue the power engineering design project begun the previous semester in EEE 192A. Final results of the project report will be presented orally to the class and invited faculty in a publicized seminar. Lecture one hour; laboratory three hours.

EEE 193A. Product Design Project I. 2 Units
**Prerequisite(s):** EEE 108, EEE 109, EEE 130, EEE 161, EEE 174, EEE 180 (EEE 109 may be taken concurrently), GE Area 1 and (GWAR Certification before Fall 09, or WPJ score of 70+, or at least a C- in ENGL 109 M/W or ENGL 109W).
**Term Typically Offered:** Fall, Spring

Concentrates on the planning and design of electronic engineering devices, systems and software. Emphasis is placed on design philosophies, problem definition, project planning and budgeting, written and oral communication skills, teamwork, development of specifications, utilization of computer aided design systems, and effective utilization of available resources. Lecture one hour; laboratory three hours.
EEE 193B. Product Design Project II.  2 Units
Prerequisite(s): EEE 193A.
Term Typically Offered: Fall, Spring

Concentrates on design projects begun by the previous semester design teams in EEE 193A. The hardware will be completed, tested for the meeting of specifications and other requirements, and redesigned if necessary. Required software will be written, debugged and incorporated in a written report. The final results of the team project will be presented orally to the class and invited faculty in a publicized seminar. Lecture one hour; laboratory three hours.

EEE 194. Career Development in Electrical and Electronic Engineering.  1 Unit
Prerequisite(s): EEE 192A or EEE 193A, may be taken concurrently.
Term Typically Offered: Fall, Spring

Designed for Electrical and Electronic Engineering students making career decisions. Instruction will include effective career planning strategies and techniques including skill assessments, employment search strategy, goal setting, time management, interview techniques and resume writing. Lecture one hour.
Note: Units earned cannot be used to satisfy major requirements.
Credit/No Credit

EEE 195. Fieldwork in Electrical and Electronic Engineering.  1 - 3 Units
Term Typically Offered: Fall, Spring

Supervised work experience in Electrical and Electronic Engineering with public agencies or firms in the industry. Requires approval of a petition by the supervising faculty member and Department Chair.
Note: May be repeated for credit.
Credit/No Credit

EEE 195A. Professional Practice.  1 - 12 Units
Prerequisite(s): Instructor permission.
Term Typically Offered: Fall, Spring

Supervised employment in a professional engineering or computer science environment. Placement arranged through the College of Engineering and Computer Science. Requires satisfactory completion of the work assignment and a written report.
Note: Units earned cannot be used to satisfy major requirements.
Credit/No Credit

EEE 195B. Professional Practice.  1 - 12 Units
Prerequisite(s): Instructor permission.
Term Typically Offered: Fall, Spring

Supervised employment in a professional engineering or computer science environment. Placement arranged through the College of Engineering and Computer Science. Requires satisfactory completion of the work assignment and a written report.
Note: Units earned cannot be used to satisfy major requirements.
Credit/No Credit

EEE 195C. Professional Practice.  1 - 12 Units
Prerequisite(s): Instructor permission.
Term Typically Offered: Fall, Spring

Supervised employment in a professional engineering or computer science environment. Placement arranged through the College of Engineering and Computer Science. Requires satisfactory completion of the work assignment and a written report.
Note: Units earned cannot be used to satisfy major requirements.
Credit/No Credit

EEE 196A. PCB Design Fundamentals.  1 Unit
Prerequisite(s): EEE 102, CPE 102 or EEE 108.
Term Typically Offered: Fall only

Printed circuit board (PCB) design fundamentals including library component creation, schematic capture, layout, routing, signal integrity and transmission line analysis, IEEE/IPC rules and standards, materials, manufacturing processes, and other physical properties of a PCB.

EEE 196B. Applications of Power Electronics in Power Systems.  3 Units
Prerequisite(s): EEE 130 and EEE 141

Analysis methods for power electronics. Power electronic devices and their control methodologies. Electric machinery drives and flexible alternating current transmission systems (FACTS) devices with simulation and analysis of cases relevant to applications of power electronics in power systems.

EEE 199. Special Problems.  1 - 3 Units
Prerequisite(s): Instructor permission.
Term Typically Offered: Fall, Spring

Individual projects or directed reading.
Note: Open only to students who appear qualified for independent work. Approval of the faculty sponsor and the academic advisor must be obtained before registering. May be repeated for credit.

EEE 201. Research Methodology.  1 Unit
Prerequisite(s): Fully classified graduate status.
Term Typically Offered: Fall, Spring

Research methodology, problem formulation and problem solving. Collective and individual study of selected issues and problems relating to fields of study in the Electrical and Electronic Engineering Graduate Program. Orientation to the requirements for Masters Thesis or Project in Electrical Engineering.
Credit/No Credit
EEE 211. Microwaves Engineering. 3 Units
Prerequisite(s): EEE 161; EEE 108 or instructor permission.
Term Typically Offered: Fall, Spring
High-frequency passive electronic circuit design, specifically S-parameters, impedance matching, microstrip lines, filters, couplers and antennas.

EEE 212. Microwaves Engineering II. 3 Units
Term Typically Offered: Fall, Spring
Passive microwave components; power dividers, couplers and hybrids. Microwave filter design, periodic structures, image parameter and insertion loss methods for designing filters. Design of ferromagnetic components, isolators, phase shifters and circulators. Noise in microwave circuits.

EEE 213. Microwave Devices and Circuits. 3 Units
Prerequisite(s): EEE 162.
Term Typically Offered: Fall, Spring
Theory and application of electromagnetic radiation at microwave frequencies; study of microwave impedance and power measurement and characteristics of microwave circuit components, and electronic devices.

EEE 214. Computer Aided Design for Microwave Circuits. 3 Units
Prerequisite(s): EEE 211 or instructor permission.
Term Typically Offered: Fall, Spring
Introduction to design methodology of the basic building blocks of communication systems. Use of solid state devices in communications and microwave technology. Implementation of transmitter and receiver architectures. Impedance matching, S-parameters and small-signal, large-signal device operation. Design of transmitter and receiver components using a professional software tool. Design and simulations of gain and low noise amplifiers, detectors, mixers, power amplifiers and oscillators. Tradeoffs involved in the design of a complete transmitter and a receiver.

EEE 215. Lasers. 3 Units
Prerequisite(s): EEE 180 and EEE 161 or instructor permission.
Term Typically Offered: Fall, Spring
Review of electromagnetic theory. Ray tracing in an optical system, Gaussian beam propagation. Resonant optical cavities, study of excitation and lasing mechanisms in gas and semiconductor lasers. General characteristics and design of CW, Q switched and traveling wave lasers.

EEE 221. Machine Vision. 3 Units
Term Typically Offered: Fall, Spring
Introduces the student to fundamental digital imaging processing concepts and their application to the fields of robotics, automation, and signal processing. Topics include: digital image filters, two dimensional transforms, boundary descriptors, Hough transform, automated visual inspection techniques, vision for robot control, 3-D vision, and hardware architectures to support vision.

EEE 222. Electronic Neural Networks. 3 Units
Term Typically Offered: Fall, Spring
Current neural network architectures and electronic implementation of neural networks are presented. Basics of fuzzy logic is covered. Application software will be used to simulate training. Testing of various neural net architectures. Learning strategies such as back-propagation, Kohonen, Hopfield and Hamming algorithms will be explored. A final project requires the student to design, train and test a neural network for electronic implementation that solves a specific practical problem.

EEE 225. Advanced Robot Control. 3 Units
Prerequisite(s): EEE 184 or equivalent.
Term Typically Offered: Fall, Spring
Introduction to robot kinematics and dynamics followed by a comprehensive treatment of robot control. Topics include: independent joint control, multivariable control, force control, feedback linearization, real-time parameter estimation, and model-reference adaptive control.

EEE 230. Analog and Mixed Signal Integrated Circuit Design. 3 Units
Prerequisite(s): EEE 109 or instructor permission.
Term Typically Offered: Fall, Spring
Covers core topics and circuits important for analog and mixed-signal integrated circuits. Topics include: device structures and models, single-stage and differential amplifiers, current mirrors and active loads, operational amplifier design, stability and compensation, fully-differential circuits and common-mode feedback, noise in integrated circuits and the impact of IC processes on analog performance.

EEE 231. Advanced Analog and Mixed Signal Integrated Circuit Design. 3 Units
Prerequisite(s): EEE 230 or consent of the instructor.
Term Typically Offered: Fall, Spring
A companion course to EEE 230, covers additional topics important in analog and mixed-signal integrated circuit design. Topics include traditional issues such as device matching and analog layout techniques, as well as important building blocks such as bandgap references and bias circuits. Also included are current-mode techniques such as high-speed current-mode logic (CML), and an introduction to noise in integrated circuits. Circuit and layout projects are assigned using CAD software.

EEE 232. Key Mixed-Signal Integrated Circuit Building Blocks. 3 Units
Prerequisite(s): EEE 230 or consent of instructor.
Term Typically Offered: Fall, Spring
Covers key mixed-signal integrated circuit building blocks most often used in modern ICs. Topics covered include data converter fundamentals, comparators, and important circuit architectures for Analog-to-Digital Converters (ADCs), Digital-to-Analog Converters (DACs), and Phase-Locked Loops (PLLs).

EEE 234. Digital Integrated Circuit Design. 3 Units
Prerequisite(s): EEE 230 or instructor permission.
Term Typically Offered: Fall, Spring
The background and techniques needed to design and layout digital circuits at the transistor level for mixed-signal integrated circuits are covered. Topics include the design, layout and characterization of digital logic gates at the transistor level, typical CMOS process flows, device models and physics, and chip level considerations.
EEE 235. Mixed-Signal IC Design Laboratory.
Prerequisite(s): EEE 230 or consent of the instructor.
Term Typically Offered: Fall, Spring

Methods to develop successful mixed-signal integrated circuits using industrial design methodology and computer-aided design tools. Proven design techniques presented; hands-on experience gained through each student designing their own integrated circuit. Communications skills developed through periodic presentations, including reviews for the circuit architecture, design and layout.

EEE 236. Advanced Semiconductor Devices.
Term Typically Offered: Fall, Spring

Semiconductor device modeling, including the application of the continuity equation and Poisson's equation to abrupt and graded p/n junctions, semiconductor/metal contacts, junction field effect transistors (JFET), metal-oxide-semiconductor transistors (MOSFET), and bipolar junction transistors (BJT). Special topics include compound semiconductor devices and heterostructures.

EEE 238. Advanced VLSI Design-For-Test I.
Prerequisite(s): CPE 151 and CPE 166.
Term Typically Offered: Fall, Spring

Focus on integrated circuit design-for-test-techniques; semiconductor reliability factors and screening; semiconductor fabrication processes, device physics, and related performance limitations; quantifying cost/quality tradeoffs; IC manufacturing flows and high-accuracy parametric test methods.

EEE 239. Advanced VLSI Design-For-Test II.
Prerequisite(s): EEE 238.
Term Typically Offered: Fall, Spring

Advanced topics in VLSI testing and Design-For-Test applications. Memory-specific test methodology and special features of memory designs employed in high volume manufacturing for improved testability, reliability. VLSI failure modes, their prediction and prevention. Application of trim, redundancy, wear-leveling, and error correction.

EEE 241. Linear Systems Analysis.
Prerequisite(s): EEE 180 or equivalent.
Term Typically Offered: Fall, Spring

Analyzes linear systems in the state-space. System realization and modeling, solutions of linear systems, stability including the method of Lyapunov, controllability and observability, state feedback and observers for both continuous and discrete-time systems. Familiarity with MATLAB is required.

Term Typically Offered: Fall, Spring

Introduces the student to modern statistical approaches for solving electronic system noise problems. A few of the topics covered are: Stochastic processes, Wiener and Kalman filters, linear prediction, lattice predictors and singular-value decomposition.

Prerequisite(s): ENGR 120.
Term Typically Offered: Fall, Spring

Introduction to sequence of random variables and multivariable distributions; models of stochastic processes; stationary stochastic processes and their applications; Markov processes, Markov chains, continuous Markov chains; renewal processes; birth-death processes; time-series applications in stochastic processes in filtering, reliability and forecasting, prediction and control.

EEE 244. Electrical Engineering Computational Methods and Applications.
Prerequisite(s): EEE 180.
Term Typically Offered: Fall, Spring

Computational methods for solving problems in engineering analysis. Topics include variational methods, finite-difference analysis, optimization methods, and matrix methods. Focuses predominantly on applications of the methods, and students are required to solve real-world, engineering problems on the computer.

Prerequisite(s): EEE 174, EEE 181 or equivalent.
Term Typically Offered: Fall, Spring

Advanced signal processing topics include: multirate signal processing, adaptive filter design and analysis, spatial filtering and the application of FIR filter theory to beamforming. Applications of digital signal processing in communication systems, radar systems, and imaging systems are covered. Hardware and software topics, including current products and the incorporation of VLSI are included. Lecture.

EEE 246. Advanced Digital Control.
Prerequisite(s): EEE 241.
Term Typically Offered: Fall, Spring

EEE 249. Advanced Topics in Control and Systems.
Term Typically Offered: Fall, Spring

Topics from recent advances in control, systems and robotics control selected from IEEE Journals and related professional publications. May be taken twice for credit.

Prerequisite(s): EEE 141 or equivalent.
Term Typically Offered: Fall, Spring

Computation of phase and sequence impedances for transmission lines, machines, and transformers; sequence capacitance of transmission lines; applications of symmetrical components; changes in symmetry; analysis of simultaneous faults by two-port network theory and matrix transformations; analytical simplification for shunt and series faults; solution of the generalized fault diagrams; computer solution methods using the admittance and impedance matrices.
ECE 251. Power System Economics and Dispatch. 3 Units
Prerequisite(s): EEE 141 or equivalent.
Term Typically Offered: Fall, Spring
Study of a number of engineering and economic matters involved in planning, operating, and controlling power generation and transmission systems in electric utilities. Effects of hydro and nuclear plants on system economics. Economic and environmental constraints. Theoretical developments and computer methods in determining economic operation of interconnected power systems with emphasis on digital computers.

ECE 252. Power System Reliability and Planning. 3 Units
Prerequisite(s): EEE 142 or equivalent.
Term Typically Offered: Fall, Spring
Power system economics, generation, transmission and distribution reliability. Production costing and generation planning, transmission planning.

ECE 253. Control and Stability of Power Systems. 3 Units
Prerequisite(s): EEE graduate standing.
Term Typically Offered: Fall, Spring
The fundamental concepts of control and stability in power systems. Topics include: power systems dynamics and linearized models, small and large disturbances, voltage and frequency stability. Introduction to power systems dynamic simulation for stability studies using CAD tools.

ECE 254. Large Interconnected Power Systems. 3 Units
Prerequisite(s): EEE 142.
Term Typically Offered: Fall, Spring
Computer control, optimization and organization of large power systems. Load and frequency control, voltage control, large load flow and contingency studies. Introduction to state estimation and load forecasting.

ECE 255. Future Power Systems and Smart Grids. 3 Units
Prerequisite(s): EEE 141, EEE 146, EEE 180, and EEE 250 or instructor permission.
Term Typically Offered: Fall, Spring
Future power systems from component and system perspectives. Smart grids, micro-grids, and interactive power systems using renewable resources and energy storage elements. National standards for certification of distributed generation involving machine-based and inverter-based technologies. Essential elements of advanced sensing, communications and information technology and their roles in adaptive automation, control, protection, and security.

ECE 256. Advanced Power Systems Protection. 3 Units
Prerequisite(s): EEE 141; EEE 145 or instructor permission.
Term Typically Offered: Fall, Spring
Advanced concepts and schemes used in power system protection including the various protective schemes used for transmission lines, transformers, machines, and other elements of a large interconnected power system. Concepts in digital and microprocessor based relay design and analysis of typical protection subsystems, in conjunction with the protection of the power system as a whole.

ECE 257. Wind Energy Electrical Conversion Systems. 3 Units
Prerequisite(s): Fully classified graduate standing in EEE or instructor permission.
Term Typically Offered: Fall, Spring
Fundamentals of current technologies and methods in wind energy conversion systems, including turbines, generators and converters as well as control and integration of these devices in power grids. Topics include: power conversion, grid converters for wind systems, system integration, methods for power, voltage and frequency control, and wind farms simulation and aggregation methods.

ECE 259. Advanced Topics in Power Systems. 3 Units
Prerequisite(s): EEE 142.
Term Typically Offered: Fall, Spring
Topics from recent advances in Electrical Power Engineering selected from IEEE Journal on "Power Systems" and "Power Systems Delivery." May be taken twice for credit.

ECE 260. Statistical Theory of Communication. 3 Units
Prerequisite(s): EEE 185.
Term Typically Offered: Fall, Spring
Review of Fourier analysis and theory of probability, random processes, optimum filtering, performance of analog and digital communication systems in the presence of noise, system optimization.

ECE 261. Information Theory, Coding, and Detection. 3 Units
Prerequisite(s): EEE 185.
Term Typically Offered: Fall, Spring
Signal space concepts, optimum M-ary communication systems, MAP estimation of continuous waveform parameters, information theory, coding.

ECE 262. Wireless Communications Systems. 3 Units
Prerequisite(s): EEE 185 or instructor permission.
Term Typically Offered: Fall, Spring
Wireless communication techniques, systems and standards. Topics include cellular systems, RF transmission and analog/digital modulation techniques. Modern techniques such as multiple access and spread spectrum systems. Channel coding and diversity will also be included.

ECE 264. Advanced Topics in Wireless Communications. 3 Units
Prerequisite(s): EEE 262 or instructor permission.
Term Typically Offered: Fall, Spring
Advanced theoretical and practical aspects of modern wireless communications. Specific topics include: advanced cellular concepts, modern small-scale and large-scale propagation models, complex equalization and diversity system design, 3G (third generation) wireless networks, Bluetooth and Personal Area Networks (PANs), GPRS (General Packet Radio Service) and wireless measurement techniques.

ECE 265. Optoelectronic Engineering. 4 Units
Prerequisite(s): Graduate standing or instructor permission.
Term Typically Offered: Fall, Spring
Generation, propagation and detection of light. Fresnel equations, Snell's law, diffraction, polarization, and interference. Operating principles of LEDs, lasers, photodiodes, optical fibers, photovoltaic devices. Introduction to optical communications systems and optical instrumentation.

Note: ECE 265 and EEE 165 may not be both taken for graduate credit.
EEE 267. Fiber Optic Communications. 3 Units
Prerequisite(s): EEE 185 or instructor permission.
Term Typically Offered: Fall, Spring

EEE 270. Advanced Topics in Logic Design. 4 Units
Prerequisite(s): EEE 161, fully classified graduate standing and instructor permission.
Term Typically Offered: Fall, Spring

Synchronous and asynchronous state machines. Timing issues in high-speed digital design. Design of a complex system using VHDL and Verilog Hardware Description Languages in a CAD environment. Automation toolsets to synthesize projects containing a hierarchy of modules into Field Programmable Gate Arrays (FPGAs). Simulations using CAD tools to verify the design before implementation on rapid prototyping boards in the lab. Lecture 3 hours; laboratory 3 hours.

EEE 272. High Speed Digital System Design. 3 Units
Prerequisite(s): EEE 161, fully classified graduate standing and instructor permission.
Term Typically Offered: Fall, Spring

Theoretical topics and practical applications relating to high speed digital systems. Review of basic transmission line theory, crosstalk, impact of PCB traces, vias, and connectors on signal integrity, return current paths, simultaneous switching noise, high frequency power delivery, high speed timing budgets, high speed bus design methodologies, radiated emissions, and system noise.

EEE 273. Hierarchical Digital Design Methodology. 3 Units
Prerequisite(s): EEE 64 or equivalent.
Term Typically Offered: Fall, Spring

Hierarchical digital design course that includes: State machine design, Programmable Logic Devices, digital simulation techniques, digital interface, design with ASIC (Application Specific Integrated Circuits), programmable Gate Arrays, and designing with Gas high speed logic devices. Problems with EMI, RFI and EMC will be presented along with design guidelines. Lecture three hours. Cross listed: CSC 273, only one may be counted for credit.

EEE 274. Advanced Timing Analysis. 3 Units
Prerequisite(s): EEE 273, CSC 273, CPE 273 or instructor permission.
Term Typically Offered: Fall, Spring

Timing analysis of Application Specific Integrated Circuit (ASIC) designs: Topics include ASIC design methodology, static timing analysis, timing design constraints, design reports, clock timing issues, timing exceptions, operating conditions, hierarchical analysis, analyzing designs with asynchronous logic, performance measurement and power issues. Cross-listed: CPE 274; only one may be counted for credit.

EEE 280. Advanced Computer Architecture. 3 Units
Prerequisite(s): CSC 205 or instructor permission.
Term Typically Offered: Fall, Spring

Introduces computer classification schemes, structures of uni- and multiprocessor systems, parallelism in uniprocessor systems, design and performance analysis of pipelined and array processors; survey and analysis of interconnection networks and parallel memory organizations; programming issues of multiprocessor systems; and fault tolerant computing and design for testability. Cross Listed: CSC 280; only one may be counted for credit.

EEE 285. Micro-Computer System Design I. 3 Units
Prerequisite(s): EEE 174 or CPE 185.
Term Typically Offered: Fall, Spring

Focuses on: design of the microprocessor based computer system, study of bus structures, interrupt schemes, memory interfacing, timing, bus arbitration, system architecture, data communications, introduction to multiprocessor systems, and software development.

EEE 286. Microcomputer System Design II. 3 Units
Prerequisite(s): EEE 285 or CPE 186.
Term Typically Offered: Fall, Spring

Includes PCI and PCI express bus specifications/architecture, PCI bridges transaction ordering, PCI express transactions and handshaking protocols, electromagnetic interference, methods of eliminating interference, shielding grounding, balancing, filtering, isolation, separation, orientation, cancellation techniques and cable design. Includes design projects and research presentations on PCI and PCI Express Bridge.

EEE 296T. Digital Speech Processing. 3 Units
Prerequisite(s): EEE 181 or instructor permission.
Term Typically Offered: Fall, Spring

The objective of this course is to cover the digital processing of speech signals. Topics include speech production and perception, speech processing in the time frequency domains. Short-time energy and Short-time Fourier analysis, homomorphic and linear predictive coding methods. Also covered are speech coding, basic introduction of text-to-speech synthesis and speech recognition. Cross listed: CPE 296T.

EEE 299. Special Problems. 1 - 3 Units
Prerequisite(s): Instructor permission.
Term Typically Offered: Fall, Spring

Open to qualified students who wish to pursue problems of their own choice. Projects must have approval and supervision of a faculty advisor.

EEE 500. Culminating Experience. 1 - 6 Units
Prerequisite(s): Advanced to candidacy and permission of the graduate coordinator, and GWAR certification before Fall 09, WPJ score of 70+, or at least a C- in ENGL 109 M/W.
Term Typically Offered: Fall, Spring

Completion of a thesis, project or comprehensive examination. Credit given upon successful completion of one of the following plans: Plan A: Master’s Thesis, 5 units; Plan B: Master’s Project, 2 units; or Plan C: Comprehensive Examination.
Engineering (ENGR)

ENGR 1. Introduction to Engineering. 1 Unit
Prerequisite(s): Engineering major status or instructor permission
Term Typically Offered: Fall, Spring

Engineering study skills, fundamentals of the engineering design process and problem solving, current engineering challenges. Distinctions and similarities of different engineering disciplines. The engineering profession, ethics, teamwork, communication skills. Course helps students make an informed choice of their engineering majors.

Credit/No Credit

ENGR 1A. Fundamentals of Engineering. 3 Units
Prerequisite(s): Algebra and trigonometry or instructor permission.
Term Typically Offered: Fall, Spring

Problem solving skills needed in all areas of engineering offered at Sacramento State. Exposure to the different areas of engineering, and understanding of the relationship between them. Students will work in teams and complete hands-on engineering laboratory experiments and projects. Development of effective communication skills by presenting periodic oral and written reports. Computers will be used throughout. Lecture two hours, laboratory three hours.

Note: Not for degree credit.

Credit/No Credit

ENGR 2. Robotics Explorations. 3 Units
Prerequisite(s): Algebra and Trigonometry.
Term Typically Offered: Fall, Spring

Introduction to robotics. History of robotics, recent advances in the field, common devices such as sensors and actuators. Use of modular robotic kits. Students will be assigned competition based projects.

ENGR 45. Engineering Materials. 3 Units
Prerequisite(s): CHEM 1E and MATH 30. CHEM 1E may be taken concurrently.
Term Typically Offered: Fall, Spring, Summer

Basic principles of mechanical, electrical and chemical behavior of metals, polymers and ceramics in engineering applications; topics include bonding, crystalline structure and imperfections, phase diagrams, corrosion, and electrical properties. Laboratory experiments demonstrate actual behavior of materials; topics include metallography, mechanical properties of metals and heat treatment. Lecture two hours; laboratory three hours.

Note: Fee course.

Fee course.

ENGR 45W. Engineering Materials Workshop. 1 Unit
Term Typically Offered: Fall, Spring, Summer

Problem solving and discussion of topics in materials science to enhance students' understanding of subject matter. Activity two hours.

Note: Can not be used for the degree requirement.

Credit/No Credit
ENGR 50. Computational Methods and Applications. 3 Units
Prerequisite(s): Math 30 and PHYS 11A; Physics 11A may be taken concurrently
Term Typically Offered: Fall, Spring

Computational methods for solving problems in analysis and design. Introduces lower division students to the use of computer technology for the computations required to solve real world problems in science and engineering. Includes introduction to numerical techniques, introduction to structured programming, and graphic visualization. Practical applications of analysis and design using tools such as MATLAB and C++. Emphasis is on developing confidence and skill in finding computational solutions to practical science and engineering problems. Portable computer recommended. Lecture three hours.

ENGR 60. MEP Orientation and Problem Solving. 2 Units
Term Typically Offered: Fall, Spring

Mandatory class for MEP freshman students on orientation to the University, its resources, facilities and faculty. Students will be encouraged to form a group atmosphere where they can freely interact with each other and value each other as resources. Students will be provided with instruction and materials on study skills, note taking, time management, preparing for tests and dealing with stress. Presentation by working engineers and field trips to engineering firms will be taken. Personal and professional development will also be part of the freshman orientations with leadership, public speaking and career planning being topics of discussion. Lecture one hour; activity two hours.
Note: Not for use as an engineering major technical elective and is not applicable to the baccalaureate degree.

Field trip(s) may be required.

ENGR 70. Engineering Mechanics. 3 Units
Prerequisite(s): PHYS 11A.
Term Typically Offered: Fall, Spring

ENGR 96A. Interdisciplinary Topics in Engineering. 1 Unit
Term Typically Offered: Fall, Spring

Course will enable students to make an informed choice of their engineering majors, engage on interdisciplinary discussions between engineering fields, and equip them with relevant study skills. An introduction to engineering and the fundamentals of problem solving. Distinctions between different disciplines within engineering as well as other similarities. The engineering profession and ethics. Study skills for an engineering education.
Credit/No Credit

ENGR 105. Sustainable Design and Construction. 3 Units
Prerequisite(s): Upper division standing or instructor permission.
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall, Spring

Strategies, analysis methods, and processes of environmentally conscious planning, design, construction, operation, deconstruction, and assessment of engineered facilities. Presents a systematic framework for problem solving, decision making, design, and construction using the principles of sustainability as guiding objectives. Tools, and techniques for gathering information, generating, analyzing, and evaluation alternatives, and developing implementation strategies are presented and demonstrated.

ENGR 110. Analytic Mechanics - Dynamics. 3 Units
Prerequisite(s): Student must pass ENGR 30, MATH 45, and MATH 32 or MATH 35 or MATH 100 with a minimum grade of C- or better.
Term Typically Offered: Fall, Spring, Summer

Fundamental principles of kinematics and kinetics, study of motion and force analysis of particles and rigid bodies, application to idealized structures and physical systems, introduction to free and forced vibrations.

ENGR 110W. Analytic Mechanics-Dynamics Workshop. 1 Unit
Corequisite(s): ENGR 110.
Term Typically Offered: Fall, Spring, Summer

Problem solving and discussion of topics in dynamics to enhance students' understanding of subject matter. Activity two hours.
Note: Can not be used for degree requirement.
Credit/No Credit

ENGR 112. Mechanics Of Materials. 3 Units
Prerequisite(s): ENGR 30; ENGR 45; MATH 45; and either CE 4 or ENGR 6 (CE 4 or ENGR 6 may be taken concurrently).
Term Typically Offered: Fall, Spring, Summer

Stresses, strains and deformations in elastic behavior of axial force, torsion and bending members, and design applications. Statically indeterminate problems. Strain energy. Column stability.

ENGR 115. Statistics For Engineers. 2 Units
Prerequisite(s): MATH 31, may be taken concurrently.
Term Typically Offered: Fall, Spring

Application of statistical methods to the analysis of engineering and physical systems. Data collection, characteristics of distributions, probability, uses of normal distribution, regression analysis, and decision-making under uncertainty.

ENGR 117W. Networks Workshop. 1 Unit
Corequisite(s): EEE 117.
Term Typically Offered: Fall, Spring

Elaborates on fundamentals and enhances students' understanding of networks.
Note: Not for degree credit.
Credit/No Credit
ENGR 120. Probability and Random Signals. 3 Units
Prerequisite(s): EEE 180; may be taken concurrently.
Term Typically Offered: Fall, Spring, Summer

Probability and random signals and their application in engineering systems. Topics include the random sample space model, concept of axiomatic probability, conditional probability, discrete and continuous random variables, probability density and distribution functions, functions and statistics of random variables, random vectors multivariate distributions, and correlation and covariance of random vectors. Applications include estimation, risk, signal detection, random signals and noise in linear systems, reliability, and estimation.

ENGR 124. Thermodynamics. 3 Units
Prerequisite(s): CHEM 1E, PHYS 11A, and MATH 32 or MATH 35 or MATH 100.
Term Typically Offered: Fall, Spring, Summer

Study of thermodynamic principles and their applications to engineering problems. Includes a study of the first and second laws, the properties of pure substances and ideal gas, gas/vapor mixtures, and an introduction to thermodynamic cycles.

ENGR 124W. Thermodynamics Workshop. 1 Unit
Corequisite(s): ENGR 124.
Term Typically Offered: Fall, Spring, Summer

Problem solving and discussion of topics in thermodynamics to enhance students' understanding of subject matter. Activity two hours. Credit/No Credit

ENGR 132. Fluid Mechanics. 3 Units
Prerequisite(s): ENGR 110 (may be taken concurrently)
Term Typically Offered: Fall, Spring, Winter

Lectures and problems in the fundamental principles of incompressible and compressible fluid flow.

ENGR 140. Engineering Economics. 2 Units
Prerequisite(s): ENGR 17 or ENGR 30
Term Typically Offered: Fall, Spring, Summer

Evaluation of economic consequences of engineering design proposals on projects. Emphasis on marginal or incremental economic analysis using Net Present Value, Annual Equivalent, Rate of Return and Benefit-Cost methods including multiple alternatives, taxes, uncertainty, inflation, organizational constraints and money market factors.

ENGR 150. Technical Communication. 3 Units
Prerequisite(s): Recommendation based on the results of the WPG or instructor permission
Term Typically Offered: Fall, Spring

Practical technical communication for engineers and computer scientists. Topics covered include practical technical writing, improving technical writing style, development of strategies to improve writing, oral presentations, running effective meetings, and the use of visual aids. The use of appropriate communication technology is emphasized throughout the course.

ENGR 181. Electronic Materials. 3 Units
Prerequisite(s): CHEM 1A, PHYS 11A, MATH 45.
Term Typically Offered: Fall, Spring

Basic principles of materials behavior pertaining to electronics applications. Topics include electrical conductivity, bonding, crystal structures, optical properties, magnetic properties, energy transfer, and the fundamentals of some simple electronic devices. Lecture 3 hours.

ENGR 194. Career Development Seminar. 1 Unit
Term Typically Offered: Fall, Spring

This course is designed for all ECS majors making career decisions and developing a job search strategy. Instruction will include: effective career planning strategies and techniques including skill assessment, interests, values, job search organization and strategies, goal setting, and time management as well as professional image development including interview techniques, resume writing, employment related correspondence and portfolio construction. Guest speakers from industry will be featured.

Credit/No Credit

ENGR 196B. Energy and Modern Life. 3 Units
Term Typically Offered: Fall, Spring

Our "modern life" is intimately and increasingly intertwined with energy utilization. This course deals with where energy comes from, how it is converted to desirable forms, where it is consumed, and what the consequences of this consumption are. In each case, historical prospective, current status, and future projections will be discussed. The ultimate objective of this course is to help students to make informed decisions on energy-related issues in their personal life and as responsible citizens of the society.

ENGR 201. Engineering Analysis I. 3 Units
Prerequisite(s): MATH 45.
Term Typically Offered: Fall, Spring

Mathematical methods for the solution of advanced engineering problems. Vector analysis, tensors and matrix algebra, complex variable techniques. The applications of these methods to practical engineering problems are demonstrated.

ENGR 202. Engineering Analysis II. 3 Units
Prerequisite(s): MATH 45.
Term Typically Offered: Fall, Spring

Mathematical methods for the solution of advanced engineering problems. Solutions of ordinary and partial differential equations, Fourier series and Laplace transforms and operational calculus. The applications of these methods to practical engineering problems are demonstrated.

ENGR 203. Engineering Statistics. 3 Units
Prerequisite(s): ENGR 115 or equivalent.
Term Typically Offered: Fall, Spring

Applications of statistics to engineering problems. Collection and analysis of data, sampling methods, design of experiments, probability theory, decision theory, analysis of variance, regression analysis, and mathematical curve fitting.
ENGR 296A. Quality Management Systems for Engineers. 3 Units
Prerequisite(s): Graduate Standing
Term Typically Offered: Fall, Spring

Designed to equip students with understanding of basic terms and definitions related to quality, a brief history and basic quality concepts, understanding measurement systems and tools, understanding differences of quality control (QC), quality assurance (QA) and quality management (QM), getting familiar with the applications of different tools, systems and standards and how to select proper tools for different quality requirements. Understanding basic inspection, auditing, assessment and evaluation techniques.

English (ENGL)

ENGL 1. Basic Writing Skills. 3 Units
Prerequisite(s): Score of 146 and below on English Placement Test or credit in ENGL 15. Department approval required.
Term Typically Offered: Spring only

Prepares students for the challenging thinking, reading, and writing required in academic discourse. Uses writing as a means for discovery and reflection as well as reading as a source for ideas, discussion, and writing. Concentrates on developing expository essays that communicate clearly, provide adequate levels of detail, maintain overall coherence and focus, and demonstrate awareness of audience and purpose.
Note: May be taken for workload credit toward establishing full-time enrollment status, but is not applicable to the baccalaureate degree.

ENGL 1C. Critical Thinking and Writing. 3 Units
Prerequisite(s): Grade of C- or better in ENGL 1A.
Term Typically Offered: Fall, Spring

Devoted to the principles of critical thinking and the writing of argumentative essays. Focuses upon formulating defensible statements, evaluating evidence, and applying the principles of inductive and deductive reasoning.

ENGL 1X. Composition Tutorial. 1 Unit
Corequisite(s): ENGL 1A or ENGL 2 or ENGL 10 or ENGL 10M or ENGL 11 or ENGL 11M
Term Typically Offered: Fall, Spring

Offers supplemental instruction in elements of composition and assists students in mastering the writing process with special emphasis on planning and revising essays. Instruction takes place both in traditional classroom setting and in small group and individual tutorials. Students enrolled in this tutorial must also be enrolled in a first-year composition course as the focus will be drafting and revising the work done in the primary writing course.
Note: May be taken for workload credit toward establishing full-time enrollment status, but is not applicable to the baccalaureate degree.

Credit/No Credit

ENGL 3. Introduction to Academic Discourse. 4 Units
Term Typically Offered: Fall, Spring

Offers students a rigorous introduction to academic discourse at the college level in the areas of critical reading, critical thinking, academic discussion, and the use of academic research. Concentrates on using expository texts as a foundation for analyzing the rhetorical strategies and effectiveness of an argument. Promotes academic discussion and fosters intellectual curiosity and collaboration.
Note: Receives baccalaureate credit.

Credit/No Credit

ENGL 3M. Introduction to Academic Discourse for Multilingual Students. 4 Units
Term Typically Offered: Fall, Spring

Offers multilingual students a rigorous introduction to academic discourse at the college level in the areas of critical reading, critical thinking, academic discussion, and the use of academic research. Concentrates on using expository texts as a foundation for analyzing the rhetorical strategies and effectiveness of an argument. Promotes academic discussion and fosters intellectual curiosity and collaboration.
Note: Receives baccalaureate credit.

Credit/No Credit

ENGL 5. Accelerated Academic Literacies. 3 Units
General Education Area/Graduation Requirement: Written Communication (A2)
Term Typically Offered: Fall, Spring

Intensive, semester-long course to help students use reading, writing, discussion, and research for discovery, intellectual curiosity, and personal academic growth - students will work in collaborative groups to share, critique, and revise their reading and writing. Students will engage in reading and writing as communal and diverse processes; read and write effectively in and beyond the university; develop metacognitive understandings of their reading, writing, and thinking processes; and understand that everyone develops and uses multiple discourses.
Note: Writing requirement

ENGL 5M. Accelerated Academic Literacies - Multilingual. 3 Units
Prerequisite(s): EPT score of 147 or above, or credit in ENGL 87; EDT score of 2-5.
General Education Area/Graduation Requirement: Written Communication (A2)
Term Typically Offered: Fall, Spring

Intensive, semester-long course to help multilingual students use reading, writing, discussion, and research for discovery, intellectual curiosity, and personal academic growth - students will work in collaborative groups to share, critique, and revise their reading and writing. Students will engage in reading and writing as communal and diverse processes; read and write effectively in and beyond the university; develop metacognitive understandings of their reading, writing, and thinking processes; and understand that everyone develops and uses multiple discourses.
Note: Writing requirement
ENGL 10. Academic Literacies I. 3 Units
Term Typically Offered: Fall only

Year-long course (combined with ENGL 11) to help students use reading, writing, discussion, and research for discovery, intellectual curiosity, and personal academic growth - students will work in collaborative groups to share, critique, and revise their reading and writing. Students will engage in reading and writing as communal and diverse processes; read and write effectively in and beyond the university; develop a metacognitive understanding of their reading, writing, and thinking processes; and understand that everyone develops and uses multiple discourses.

Note: Writing requirement
Credit/No Credit

ENGL 10M. Academic Literacies I - Multilingual. 3 Units
Term Typically Offered: Fall, Spring

Year-long course (combined with ENGL 11M) to help multilingual students use reading, writing, discussion, and research for discovery, intellectual curiosity, and personal academic growth - students will work in collaborative groups to share, critique, and revise their reading and writing. Students will engage in reading and writing as communal and diverse processes; read and write effectively in and beyond the university; develop a metacognitive understanding of their reading, writing, and thinking processes; and understand that everyone develops and uses multiple discourses.

Note: Writing requirement
Credit/No Credit

ENGL 11. Academic Literacies II. 3 Units
Prerequisite(s): ENGL 10.
General Education Area/Graduation Requirement: Written Communication (A2)
Term Typically Offered: Spring only

Continued study (following ENGL 10) to help students use reading, writing, discussion, and research for discovery, intellectual curiosity, and personal academic growth - students will work in collaborative groups to share, critique, and revise their reading and writing. Students will engage in reading and writing as communal and diverse processes: read and write effectively in and beyond the university; develop a metacognitive understanding of their reading, writing, and thinking processes; and understand that everyone develops and uses multiple discourses.

Note: Writing requirement

ENGL 11M. Academic Literacies II-Multilingual. 3 Units
Prerequisite(s): ENGL 10M.
General Education Area/Graduation Requirement: Written Communication (A2)
Term Typically Offered: Spring only

Continued study (following ENGL 10M) to help multilingual students use reading, writing, discussion, and research for discovery, intellectual curiosity, and personal academic growth - students will work in collaborative groups to share, critique, and revise their reading and writing. Students will engage in reading and writing as communal and diverse processes; read and write effectively in and beyond the university; develop a metacognitive understanding of their reading, writing, and thinking processes; and understand that everyone develops and uses multiple discourses.

Note: Writing requirement

ENGL 15. College Language Skills. 4 Units
Prerequisite(s): Score of 120-141 on the English Placement Test.
Term Typically Offered: Fall, Spring

Instruction in reading and writing skills. Focuses on the interrelationship of reading and writing, with emphasis on development, organization, and clarity of communication. Lecture three hours; lab two hours.

Note: Utilizes computers.

ENGL 16. Structure Of English. 3 Units
Prerequisite(s): ENGL 1A or equivalent.
Term Typically Offered: Fall, Spring

Introduction to the terminology and structure of traditional grammar; analysis of the standard rules for agreement, punctuation, pronoun reference, etc.; introduction to social variance with respect to usage-standard vs. non-standard; and a description of the English sound system (vowels and consonants) and its relationship to standard orthography (sound/letter correspondences) spelling rules.

ENGL 20. College Composition II. 3 Units
Prerequisite(s): Completion of ENGL 5 or ENGL 5M or ENGL 11 or ENGL 11M or equivalent with a C- or better; sophomore standing (must have completed 30 units prior to registration).
Term Typically Offered: Fall, Spring

Advanced writing that builds upon the critical thinking, reading, and writing processes introduced in ENGL 5 and ENGL 5M. Emphasizes rhetorical awareness by exploring reading and writing within diverse academic contexts with a focus on the situational nature of the standards, values, habits, conventions, and products of composition. Students will research and analyze different disciplinary genres, purposes, and audiences with the goals of understanding how to appropriately shape their writing for different readers and demonstrating this understanding through various written products.

Note: Writing requirement

ENGL 20M. College Composition II for Multilingual Students. 3 Units
Prerequisite(s): ENGL 5 or ENGL 5M or equivalent; sophomore standing
Term Typically Offered: Fall, Spring

Advanced writing for multilingual that builds upon the critical thinking, reading, and writing processes introduced in English 5/5M. Emphasizes rhetorical awareness by exploring reading and writing within diverse academic contexts focusing on the situational nature of the standards, values, habits, conventions, and products of composition. Students will research and analyze different disciplinary genres, purposes, and audiences with the goals of understanding how to appropriately shape their writing for different readers and demonstrating this understanding through various written products.

Note: Writing requirement

ENGL 21. First Year Seminar: Becoming an Educated Person. 3 Units
General Education Area/Graduation Requirement: Understanding Personal Development (E)
Term Typically Offered: Fall only

Introduction to the nature and possible meanings of higher education, and the functions and resources of the University. Designed to help students develop and exercise fundamental academic success strategies and to improve their basic learning skills. Provides students with the opportunity to interact with fellow students and the seminar leader and to build a community of academic and personal support.

<tbody>
<tr>
<td>ENGL 30A</td>
<td>Introduction to Creative Writing.</td>
<td>3</td>
<td>Fall, Spring</td>
<td></td>
<td>Workshop for students who have had little or no experience writing fiction or poetry and who are trying to decide if they are interested in becoming writers. Over the course of the semester, students write and polish several poems and short stories which they present for critique and commentary. In addition, they study the basic elements of fiction and poetry and learn how to use these effectively in their own work.</td>
</tr>
<tr>
<td>ENGL 30B</td>
<td>Introduction to Writing Fiction.</td>
<td>3</td>
<td>Fall, Spring</td>
<td></td>
<td>Workshop for students who have had little or no experience writing fiction. Students write and polish several short stories which they present for critique and commentary. In addition, they study the basic elements of plot, character, description, and dialogue and learn how to use these effectively in their own fiction.</td>
</tr>
<tr>
<td>ENGL 30C</td>
<td>Introduction to Poetry Writing.</td>
<td>3</td>
<td>Fall, Spring</td>
<td></td>
<td>Designed for lower division students who have little or no experience writing poetry. Students will write approximately twelve poems in a variety of forms and receive instruction and practice in the workshop method. In addition, they study the basic elements of poetic craft: rhythm, enjambment, basic figures of speech, etc., and how to use them effectively in their own poetry.</td>
</tr>
<tr>
<td>ENGL 40A</td>
<td>Introduction to British Literature I.</td>
<td>3</td>
<td>Fall only</td>
<td>Humanities (Area C2)</td>
<td>Major developments in the literature of England from Chaucer through the close of the Augustan Age.</td>
</tr>
<tr>

Note: Utilizes computers; may be repeated for credit.
ENGL 97. Introduction to Film Studies. 3 Units
Term Typically Offered: Fall, Spring
Examines cinematic techniques, styles, vocabulary, and discourses. Introduces different ways for writing about films and for working with a variety of cinematic terms. Film form and style will be studied by examining specific scenes in films from different genres, nations, and directors. Films used throughout the course will be selected from different historical periods.
Cross-listed: FILM 97.

ENGL 100B. Literary Theory. 3 Units
Term Typically Offered: Fall, Spring
Designed to engage students in a productive conversation about the various theories of literature and reading that currently inform Literary Studies. Provides a historical overview of modern theory including, but not limited to, Formalism, Structuralism, Psychoanalysis, Marxism, Deconstruction, and Feminism. Students are encouraged to apply these theories to their practice of literary criticism and to assess the strengths and weaknesses of each paradigm.

ENGL 100Z. Topics in Literary Theory and Criticism. 3 Units
Prerequisite(s): GWAR certification before Fall 09; or WPJ score of 80+; or 3-unit placement in ENGL 109M or ENGL 109W; or 4-unit placement in ENGL 109M or ENGL 109W and co-enrollment in ENGL 109X; or WPJ score 70 or 71 and co-enrollment in ENGL 109X.
General Education Area/Graduation Requirement: Writing Intensive Graduation Requirement (WI)
Term Typically Offered: Fall, Spring
Investigates one or more schools of literary theory or criticism and their application to works of literature and/or film.
Note: May be repeated twice for credit as long as topics vary; Writing Intensive

ENGL 105. Film Theory and Criticism. 3 Units
Term Typically Offered: Fall, Spring
Survey of film theory focusing on Auteurism, Class, Expressionism, Formalism, Genre, Gender, Narratology, Neorealism, Phenomenology, Post Structuralism, Psychoanalysis, Realism, Semiology, Structuralism and Third Cinema.
Cross listed: FILM 105.

ENGL 109M. Writing for GWAR Placement-Multilingual. 3 Units
Prerequisite(s): ENGL 20 with at least a C- grade or better and have completed at least 60 semester units.
Term Typically Offered: Fall, Spring
Provides intensive practice in prewriting, drafting, revising, and editing academic writing for multilingual writers. Students research, analyse, reflect on, and write about the kinds of writing produced in academic disciplines. Students produce a considerable amount of writing such as informal reading responses, rhetorical analyses, and an extended academic research project: students will submit their writing late in the semester in a GWAR Portfolio, from which they will receive a GWAR Placement.

ENGL 109W. Writing for GWAR Placement. 3 Units
Prerequisite(s): English 20 with a C- grade or better and have completed at least 60 semester units.
Term Typically Offered: Fall, Spring
Provides intensive practice in prewriting, drafting, revising, and editing academic writing. Students research, analyse, reflect on, and write about the kinds of writing produced in academic disciplines. Students produce a considerable amount of writing such as informal reading responses, rhetorical analyses, and an extended academic research project: students will submit their writing late in the semester in a GWAR Portfolio, from which they will receive a GWAR Placement.

ENGL 109X. Writing-Intensive Workshop. 1 Unit
Prerequisite(s): Writing Placement for Juniors: student who receive a 4-unit placement on the WPJ.
Corequisite(s): Writing-Intensive upper-division course.
Term Typically Offered: Fall, Spring
Student-centered group tutorial which will offer supplemental instruction in elements of academic writing taught in writing-intensive upper-division courses; it will provide support to students concurrently enrolled in writing-intensive upper-division courses throughout the writing process, including drafting, revising, and editing, for a variety of papers.
Credit/No Credit

ENGL 109M. Writing for GWAR Placement-Multilingual. 3 Units
Term Typically Offered: Fall, Spring
Provides intensive practice in prewriting, drafting, revising, and editing academic writing for multilingual writers. Students research, analyse, reflect on, and write about the kinds of writing produced in academic disciplines. Students produce a considerable amount of writing such as informal reading responses, rhetorical analyses, and an extended academic research project: students will submit their writing late in the semester in a GWAR Portfolio, from which they will receive a GWAR Placement.

ENGL 109W. Writing for GWAR Placement. 3 Units
Prerequisite(s): English 20 with a C- grade or better and have completed at least 60 semester units.
Term Typically Offered: Fall, Spring
Provides intensive practice in prewriting, drafting, revising, and editing academic writing. Students research, analyse, reflect on, and write about the kinds of writing produced in academic disciplines. Students produce a considerable amount of writing such as informal reading responses, rhetorical analyses, and an extended academic research project: students will submit their writing late in the semester in a GWAR Portfolio, from which they will receive a GWAR Placement.

ENGL 109X. Writing-Intensive Workshop. 1 Unit
Prerequisite(s): Writing Placement for Juniors: student who receive a 4-unit placement on the WPJ.
Corequisite(s): Writing-Intensive upper-division course.
Term Typically Offered: Fall, Spring
Student-centered group tutorial which will offer supplemental instruction in elements of academic writing taught in writing-intensive upper-division courses; it will provide support to students concurrently enrolled in writing-intensive upper-division courses throughout the writing process, including drafting, revising, and editing, for a variety of papers.
Credit/No Credit

ENGL 109M. Writing for GWAR Placement-Multilingual. 3 Units
Term Typically Offered: Fall, Spring
Provides intensive practice in prewriting, drafting, revising, and editing academic writing for multilingual writers. Students research, analyse, reflect on, and write about the kinds of writing produced in academic disciplines. Students produce a considerable amount of writing such as informal reading responses, rhetorical analyses, and an extended academic research project: students will submit their writing late in the semester in a GWAR Portfolio, from which they will receive a GWAR Placement.

ENGL 109W. Writing for GWAR Placement. 3 Units
Prerequisite(s): English 20 with a C- grade or better and have completed at least 60 semester units.
Term Typically Offered: Fall, Spring
Provides intensive practice in prewriting, drafting, revising, and editing academic writing. Students research, analyse, reflect on, and write about the kinds of writing produced in academic disciplines. Students produce a considerable amount of writing such as informal reading responses, rhetorical analyses, and an extended academic research project: students will submit their writing late in the semester in a GWAR Portfolio, from which they will receive a GWAR Placement.

ENGL 109X. Writing-Intensive Workshop. 1 Unit

Student-centered group tutorial which will offer supplemental instruction in elements of academic writing taught in writing-intensive upper-division courses; it will provide support to students concurrently enrolled in writing-intensive upper-division courses throughout the writing process, including drafting, revising, and editing, for a variety of papers.
Credit/No Credit

ENGL 109M. Writing for GWAR Placement-Multilingual. 3 Units
Term Typically Offered: Fall, Spring
Provides intensive practice in prewriting, drafting, revising, and editing academic writing for multilingual writers. Students research, analyse, reflect on, and write about the kinds of writing produced in academic disciplines. Students produce a considerable amount of writing such as informal reading responses, rhetorical analyses, and an extended academic research project: students will submit their writing late in the semester in a GWAR Portfolio, from which they will receive a GWAR Placement.

ENGL 109W. Writing for GWAR Placement. 3 Units
Prerequisite(s): English 20 with a C- grade or better and have completed at least 60 semester units.
Term Typically Offered: Fall, Spring
Provides intensive practice in prewriting, drafting, revising, and editing academic writing. Students research, analyse, reflect on, and write about the kinds of writing produced in academic disciplines. Students produce a considerable amount of writing such as informal reading responses, rhetorical analyses, and an extended academic research project: students will submit their writing late in the semester in a GWAR Portfolio, from which they will receive a GWAR Placement.
ENGL 110J. Traditional Grammar and Standard Usage. 3 Units
Term Typically Offered: Fall, Spring

Develops a thorough understanding of basic issues in traditional English grammar and usage. It emphasizes knowledge of traditional grammar needed by single-subject credential students expecting to teach high school English. Topics include parts of speech, functions of words in sentences, phrases and clauses, and punctuation. Students will learn to apply their knowledge of grammar in composition instruction and marking essays. Students will also study use of specific grammatical features in developing rhetorical styles.

ENGL 110P. Second Language Learning and Teaching. 3 Units
Term Typically Offered: Fall, Spring

Surveys the major issues involved in the acquisition of second languages and in teaching second language (L2) students. Topics covered include differences between first and second language acquisition, including age, biology, cognitive styles, personality, sociocultural factors, and linguistic variables; in addition, various models and techniques and approaches to L2 teaching are covered. Special attention is given to the unique demographics and characteristics of language minority students in California's public schools.

ENGL 110Q. English Grammar for ESL Teachers. 3 Units
Term Typically Offered: Fall, Spring

A survey of those aspects of English grammar that are relevant to teaching second language learners of English. The emphasis is on elements of simple and complex sentences, particularly the structure of noun phrases, the meanings of verb forms, and the expression of adverbial meanings.

ENGL 110A. Advanced Composition. 3 Units
Term Typically Offered: Fall, Spring

Prerequisite(s): ENGL 109M or ENGL 109W.

An intensive writing workshop in which student writing is the focus. Students will engage in a writing process that will include feedback from peers and the instructor throughout the process. This writing process may occur in a variety of rhetorical situations and genres. Through reflection on their writing products and processes, students will gain an awareness of themselves as writers. By the end of the course students will complete an extensive research project focused on academic inquiry. Note: ENGL 120A is a requirement for English majors.

ENGL 120C. Topics in Composition. 3 Units
Prerequisite(s): ENGL 20 or ENGL 120A.

General Education Area/Graduation Requirement: Writing Intensive Graduation Requirement (WI)
Term Typically Offered: Fall, Spring

Offers a rotating series of topics relevant to composition studies, such as technology-based writing, writing across the curriculum, critical literacy, etc. Introduces students to the theory and practice of the field under consideration. Regardless of the topics, students will explore the major scholarly works of the field and produce writing that analyzes and utilizes the concepts in the area under consideration. Note: May be repeated for credit as long as topic differs.

ENGL 120P. Professional Writing. 3 Units
Prerequisite(s): ENGL 20 or ENGL 120A.

General Education Area/Graduation Requirement: Writing Intensive Graduation Requirement (WI)
Term Typically Offered: Fall, Spring

Teaches students the most common professional writing genres used in career fields ranging from business to public relations to nonprofit management. Focuses on how business or technical communication is different from academic styles and introduces students to the current writing challenges and practices in these fields. Students will gain instruction and practice composing various essential writing formats, such as memos, reports, and feasibility studies.

ENGL 120R. Topics in Rhetoric. 3 Units
Prerequisite(s): ENGL 20 or ENGL 120A.

General Education Area/Graduation Requirement: Writing Intensive Graduation Requirement (WI)
Term Typically Offered: Fall, Spring

Offers a rotating series of topics relevant to rhetorical studies, such as digital rhetoric, cultural rhetorics, contemporary rhetorical theories, etc. Introduces students to the theory and practice of the field under consideration. Regardless of the topic, students will explore the major scholarly works of the field and produce writing that analyzes and utilizes the concepts in the area under consideration. Note: May be repeated for credit as long as topic differs.
ENGL 125S. Writing in the Social Sciences. 3 Units
Prerequisite(s): GWAR certification before Fall 09, WPJ score of 70+, or at least a C- in ENGL 109 M/W.
Term Typically Offered: Fall, Spring

Introduces principles of analyzing and composing texts appropriate for various social science disciplines. Provides practice in analyzing texts in social science journals and in writing abstracts, summaries, and literature reviews. Appropriate for upper-division undergraduate students and beginning graduate students in TESOL and in other social science programs (e.g., psychology, sociology, anthropology, etc.)

ENGL 120X. MLA and APA Style Guides. 1 Unit
Corequisite(s): ENGL 120A, ENGL 198T, a Writing Intensive course, or instructor permission.
Students will learn how to format papers, cite sources, and integrate in-text citations into their work according to MLA and APA formatting and style guides.

ENGL 121. Writing Center Tutoring. 1 Unit
Term Typically Offered: Fall, Spring

One-on-one tutoring in reading and writing at the University Writing Center. Student writers will meet with assigned tutor an hour a week. Topics could include understanding assignments, prewriting, revising, reading strategies, editing strategies, integrating research, etc. Students must sign up for a regular tutoring session time during week two of the semester at the University Writing Center.

Note: May be repeated for credit.

ENGL 125A. Literature and Film for Adolescents. 3 Units
Prerequisite(s): ENGL 20 or 120A
Term Typically Offered: Fall, Spring

Provides prospective secondary school English teachers with an opportunity to think through important issues related to the planning and implementation of literature programs for adolescents. Equal emphasis will be given to the study of poetry, fiction, non-fiction, drama, and film. The focus will embrace literature from a variety of cultures and periods.

ENGL 125B. Writing and the Young Writer. 3 Units
Prerequisite(s): ENGL 20 or ENGL 120A; and ENGL 110J or ENGL 110Q or ENGL 16
Term Typically Offered: Fall, Spring

Provides an introduction to teaching writing in high school and operates on the assumption that the need for and impact of writing competence for students is interdisciplinary and pervasive. The class has a workshop format, and students will practice many of the strategies studied. The texts will cover theoretical issues in teaching composition and practical methods of implementing theory in public school classrooms.

ENGL 125E. Academic Reading and Writing for Second Language Students. 3 Units
Term Typically Offered: Fall, Spring

Helps prospective teachers to better understand the unique needs of second language students. Covers second language acquisition theory with particular emphasis on the teaching of reading and writing for academic purposes. Practical skills covered will all focus on the particular needs of second language readers and writers, for instance, how to help them to read more efficiently and with greater comprehension, how to write more fluently and accurately in ways that meet the needs and expectations of the academic discourse community.

ENGL 125F. Teaching Oral Skills. 3 Units
Term Typically Offered: Fall, Spring

Provides students with both the necessary background knowledge as well as the specific pedagogical tools for promoting proficiency in spoken interaction, listening skills, and pronunciation in second language/foreign language contexts, specifically English as a Second Language (ESL) and English as a Foreign Language (EFL).

ENGL 130A. Intermediate Fiction Writing. 3 Units
Prerequisite(s): ENGL 30A or ENGL 30B.
Term Typically Offered: Fall, Spring

Workshop for students who already have some experience writing short stories. Students write and polish several stories which they present for critique and commentary. They also take an in-depth look at the theory and craft of fiction-writing, analyze the stories of contemporary writers from diverse ethnic and cultural backgrounds, and learn how to apply what they have learned to their own writing.

ENGL 130B. Intermediate Poetry Writing. 3 Units
Prerequisite(s): ENGL 30A or ENGL 30C.
Term Typically Offered: Fall, Spring

Designed for students interested in developing their poetic expression beyond the basics covered in ENGL 30A and ENGL 30C. Emphasizes further practice and experimentation with meters, verse forms, and figures of speech. Focal points for analysis and discussion will be poems and essays by contemporary poets of various aesthetic orientations, as well as work produced by members of the class.

ENGL 130C. Special Topics in Poetry Writing. 3 Units
Prerequisite(s): ENGL 30A or ENGL 30C.
Term Typically Offered: Fall, Spring

Provides students with further opportunity to refine their poetic craft beyond the levels achieved in 30C and 130B. Emphasizes further experimentation with meters, verse forms, and figures of speech as well as questioning the "rules" of poetry and encouraging students to blur or defy the boundaries of genre. Focal points for analysis and discussion will be poems and essays by contemporary poets of various aesthetic orientations, as well as work produced by members of the class.

Note: May be repeated twice for credit assuming the topic is different.

ENGL 130D. Meter and Rhythm. 3 Units
Term Typically Offered: Fall, Spring

Offers an in-depth study of prosody including the principles of meter (line measurement) and scansion (the marking of stressed syllables to determine meter and rhythm), as well as examining the relationship of these principles to verse in English. Examines a variety of poetic schemes, tropes, and forms. Three hours, lecture and guided practice.

ENGL 130F. Writing For Television. 3 Units
Term Typically Offered: Fall, Spring

Focuses on training students in video literacy and script writing for the video explosion: educational media, documentaries, and interactive programs.
ENGL 130G. Between Genres: Flash Fiction/Prose Poetry. 3 Units
Term Typically Offered: Fall, Spring

Offers undergraduate poets and fiction writers the opportunity to explore/experiment with the long-standing anti-genre of the poetry/fiction hybrid. For 200 years writers around the world have noted the symbiosis between the genres of poetry and prose. Currently, some of America's most exciting writers are currently exploring the margins between prose poetry, flash fiction, and related evolving forms. Prerequisite: ENGL 30A, ENGL 30B, or ENGL 30C.

ENGL 130J. Writing Feature Filmscripts. 3 Units
Term Typically Offered: Fall, Spring

Workshop designed for students who have little or no previous experience writing for the screen. Students write the synopsis, treatment, and part of the master scene script for a feature film, all of which are polished and revised in a workshop setting. Special attention is given to the dynamics of plot, characterization, and dialogue with an emphasis on the difference between writing for film and writing other kinds of fiction.

ENGL 130M. Art of Autobiography. 3 Units
Prerequisite(s): At least a C- grade in ENGL 30A or 30B, and GWAR certification before Fall 09, or WPJ score of 80+, or 3-unit placement in ENGL 109M or ENGL 109W, or 4-unit placement in ENGL 109M or ENGL 109W and co-enrollment in ENGL 109X; or WPJ score 70 or 71 and co-enrollment in ENGL 109X.

General Education Area/Graduation Requirement: Writing Intensive Graduation Requirement (WI), Arts (Area C1)
Term Typically Offered: Fall, Spring

Students keep a journal and write several drafts of an autobiographical essay which they present for critique and commentary. They also read and analyze several biographies and journals by writers from diverse ethnic and cultural backgrounds.

ENGL 130N. Creative Non-Fiction. 3 Units
Prerequisite(s): ENGL 30A or ENGL 30B.
Term Typically Offered: Fall, Spring

Students write several non-fiction pieces which may include (but are not limited to) autobiography, memoir, nature-writing, travel writing, and literary memoir. Students need not previously have had fiction-writing experience to take this course, but they must be prepared to write literary non-fiction of high quality.

ENGL 130W. Advanced Poetry Writing. 3 Units
Prerequisite(s): ENGL 30A or ENGL 30C

Theory and practice in the writing of poetry at the advanced level. Consists primarily of the preparation and evaluation of student work. Students are also assigned supplemental readings designed to help them determine their affinity (or lack of affinity) with current poetic theory and practice.

ENGL 130Y. Creative Writing for Young Audiences. 3 Units
Prerequisite(s): ENGL 30A or ENGL 30C
Term Typically Offered: Fall, Spring

In this creative writing course students will learn how to write children's literature in a wide array of genres, including picture book texts, early readers, poetry, and middle grade and young adult novels. The course will give an overview of these genres and through portfolio assignments allow students to sample different genres and gain expertise in one particular genre.

ENGL 140A. Introduction to Old English. 3 Units
Term Typically Offered: Fall, Spring

Study of the grammar of Old English with particular attention to its survival in the modern language. Shows students how to use their instincts as native speakers of Modern English to acquire a good working sense of the original form of the language. Readings in biblical and historical texts will be supplemented by an introduction to Old English paleography which will allow students to access literature in the original.

ENGL 140B. Medieval Literature. 3 Units
Term Typically Offered: Fall, Spring

Survey of English literature from 1100 to 1500. Students will read texts from the various genres of Middle English literature—romance, lyric, ballad, lay, drama, history—in the dialects of origin. Focuses on how medieval thought both differs from and anticipates modern thought.

ENGL 140C. The English Renaissance. 3 Units
Term Typically Offered: Fall, Spring

English Renaissance refers to exploration, experimentation, and creativity during the sixteenth and early seventeenth centuries in England. The poets, playwrights, and prose writers of the age include Shakespeare, Marlowe, Jonson, Spenser, Donne, Bacon, Sidney, and Milton. Explores, discusses, and analyzes representative works by figures of the age—including prose and poetry—making connections between the writers and the cultural context in which they worked.

ENGL 140D. Restoration Comedy. 3 Units
Term Typically Offered: Fall, Spring

In-depth examination of the drama of late 17th century England, a drama which revolutionized the British theater and whose influence is still very much with us. It includes the study of the age itself, the social and political issues of the time as well as its art, specifically its comedies of manners, which it examines in their historical context as immediate descendants of Jacobean drama and progenitors of the Sentimental comedy of the 18th century.

ENGL 140E. The Golden Age Of Satire. 3 Units
Term Typically Offered: Fall, Spring

Covers the period from 1680 to 1745, focusing on the major works of England's greatest satirists: John Dryden, Jonathan Swift, John Gay, William Hogarth (the painter), and Alexander Pope. It begins with a general discussion of the nature and purpose of satire.

ENGL 140F. The English Romantic Novel. 3 Units
Term Typically Offered: Fall, Spring

Devoted to exploring the fiction of nineteenth-century British novelists from Jane Austen through Thomas Hardy. Particular attention is paid to prevalent genres, especially the mixing of romance and realism, narrative and plot structures, imagery patterns, character types and anti-types, and thematic concerns, which usually involve some sort of conflict between the self and society, the individual and institutions (or the environment).
Examines British literature and culture during the late eighteenth and early nineteenth centuries. Topics may include war and revolution, tourism and the picturesque, genius and imagination, the Gothic, Romantic orientalism and literature and the environment. Writers covered may include Smith, Blake, Wollstonecraft, the Wordsworths, Scott, Coleridge, Austen, de Quincey, Byron, the Shelleys, Hemans and Keats.

**ENGL 140J. The Victorian Imagination.** 3 Units

Term Typically Offered: Fall, Spring

Explores themes and forms of the Victorian period, stressing the evolving role of the artist and the growth of self-consciousness in verse and prose. Victorian themes like the divided self, the love-duty conflict, and the inevitable crises of faith are recurring problems in the obsessive Victorian debate between flesh and spirit. Analyzes this dialectic in the poetry of Browning, Tennyson, the Pre-Raphaelites and Decadents, in a representative novel, and in the prose of Ruskin, Mill, and Pater.

**ENGL 140K. Modern British Literature, 1900-Present.** 3 Units

Term Typically Offered: Fall, Spring

In-depth examination of some of the important British texts in fiction, poetry, and drama from 1900 to the present. The works dramatize the important historical, social and aesthetic changes in a century which saw the collapse of the British Empire, the spread of democracy, the rise of Modernism and the Absurd in the arts, and the continuing struggle of the personal statement in an impersonal world.

**ENGL 140L. Modern British Fiction, 1900-Present.** 3 Units

Term Typically Offered: Fall, Spring

Survey of British fiction from 1900 to the present which covers the struggle between traditional Realism and Modernism in the novel, the decline and fall of the British Empire and the rise of the former colonies as purveyors of fictions in English in their own right, and the development of new experimental forms in the last decades of the 20th century.

**ENGL 140M. Modern British Drama, 1889-Present.** 3 Units

General Education Area/Graduation Requirement: Writing Intensive Graduation Requirement (WI), Arts (Area C1)

Term Typically Offered: Fall, Spring

In-depth examination of British drama from the arrival of Ibsen's The Doll House on the British stage (and Shaw's publication of his influential treatise The Quintessence of Ibsenism) both laying to rest for serious artists the moralistic, bourgeois theater of the late 19th century. Includes study of various dramatic movements in England –including realism, absurdism, kitchen-sink naturalism, surrealism, epic theater, expressionism. Prerequisite: GWAR certification before Fall 09; or WPJ score of 80+; or 3-unit placement in ENGL 109M or ENGL 109W; or 4-unit placement in ENGL 109M or ENGL 109W and co-enrollment in ENGL 109X; or WPJ score 70 or 71 and co-enrollment in ENGL 109X.

**ENGL 140N. Renaissance Drama.** 3 Units

Term Typically Offered: Fall, Spring

Readings in and analysis of English drama written in the period, roughly, from 1500-1660. Provides a survey of playwrights and genres from the entire period or focus on a particular theme or a grouping of authors. Students will come to understand the texts as well as the variety of historical, political, cultural, social, sexual, and religious contexts in which the playwrights of the era composed their works.

**ENGL 140Z. Studies in British Literature.** 3 Units

Term Typically Offered: Fall, Spring

Topics in periods and movements in the literature of Britain. Course may focus on a limited period (e.g. The Edwardian Age), a single author (e.g. Anthony Trollope or Margery Kempe), an authorial dialogue (e.g. Shakespeare and Wilde or G.M. Hopkins and Christina Rossetti), or a unique literary feature, theme, or structure (e.g. the Sonnet or Literature and the Law).

**ENGL 141A. The Essential Shakespeare.** 3 Units

Prerequisite(s): GWAR certification before Fall 09; or WPJ score of 80+; or 3-unit placement in ENGL 109M or ENGL 109W; or 4-unit placement in ENGL 109M or ENGL 109W and co-enrollment in ENGL 109X; or WPJ score 70 or 71 and co-enrollment in ENGL 109X.

General Education Area/Graduation Requirement: Arts (Area C1), Writing Intensive Graduation Requirement (WI)

Term Typically Offered: Fall, Spring

Non-technical approach to Shakespeare’s most representative dramatic works, designed for the non-major. Focuses upon Shakespeare’s typical themes, conventions, and techniques, his development of character and situation, and his relationship to the culture and values of both his own and subsequent ages.

**ENGL 141B. Shakespop: Shakespeare and Popular Culture.** 3 Units

Term Typically Offered: Fall, Spring

The works of William Shakespeare circulate in our culture in a wide variety of ways - in music, art, dance, film, television, advertising, management manuals, self-help books, etc. sometimes staying close to the original texts and at other times barley skimming the surface for cultural capital. This course will examine the dynamic relationships between Shakespeare in its diverse forms and popular culture by examining various instances of Shakespearean appropriation and adaptation. Themes include Shakespeare in Love, War, Business, and Youth Culture.

**ENGL 145A. Chaucer - Canterbury Tales.** 3 Units

Term Typically Offered: Fall, Spring

Reading of The Canterbury Tales in Middle English. Chaucer's great unfinished poem will be investigated as the pinnacle of literary achievement in the English Middle Ages, a work that attempts, like Dante's Divine Comedy, to account for all the issues and problems of human life as medieval thinkers had come to regard them.

**ENGL 145B. Shakespeare - Early Plays, 1592-1600.** 3 Units

Term Typically Offered: Fall, Spring

Exploration of representative plays from roughly the first half of Shakespeare's career as a dramatist, including early and middle comedies (e.g., A Midsummer Night's Dream, As You Like It), early and middle tragedies (e.g. Richard II, Henry IV, Part One), while situating the plays within their cultural and historical context.

**ENGL 145C. Shakespeare - Later Plays, 1600-1612.** 3 Units

Term Typically Offered: Fall, Spring

Exploration of representative plays from roughly the second half of Shakespeare's career as a dramatist, with emphasis on the major tragedies (Hamlet, Othello, King Lear, and Macbeth), but also including the middle comedies (e.g., Twelfth Night, Measure for Measure) and the later romances (e.g., The Winter's Tale, The Tempest), while situating the plays within their cultural and historic context.
ENGL 145I. John Milton. 3 Units
Term Typically Offered: Fall, Spring

Students study the major poems of Milton among them Comus, "Lycidas," Paradise Lost, Paradise Regained, and Samson Agonistes—giving special attention to Paradise Lost. Students will also consider such prose works as Of Education, the divorce tracts, and Areopagitica, Milton's famous argument against censorship. Finally, it includes lectures on the Puritan Revolution of 1640-60 and Milton's role in it.

ENGL 150A. Early American Literature. 3 Units
Term Typically Offered: Fall, Spring

Focusing on the literature of early American settlement, the literature that first defined our nation. Students analyze such works as oral literature of Native America, earliest writings of Spanish explorers, Puritan settlement literature, Captivity Narratives of the 17th through 19th centuries, Witchcraft Narratives, and Slave Narratives. Students might also study connections to later works (e.g., Puritan literature and Hawthorne's Scarlet Letter, Witchcraft narratives and Miller's The Crucible).

ENGL 150B. American Romanticism. 3 Units
Pre requisite(s): GWAR certification before Fall 09; or WPJ score of 80+; or 3-unit placement in ENGL 109M or ENGL 109W; or 4-unit placement in ENGL 109M or ENGL 109W and co-enrollment in ENGL 109X; or WPJ score 70 or 71 and co-enrollment in ENGL 109X.
General Education Area/Graduation Requirement: Writing Intensive
Graduation Requirement (WI)
Term Typically Offered: Fall, Spring

Focuses on one of the great periods in the history of literature. It has appropriately been called the American Renaissance. Writers covered might include but not be limited to Poe, Hawthorne, Emerson, Thoreau, Fuller, Melville, Whitman, Dickinson.

ENGL 150C. American Realism. 3 Units
Term Typically Offered: Fall, Spring

Examines American literature written during the period after the Civil War, a time of unprecedented change that transformed America from rural, agricultural, and homogeneous culture into its urban, industrial, heterogeneous counterpart. It investigates how the literature of this period reflected these changes and simultaneously tried to reconcile them with the values of an earlier America. The magnitude of this endeavor produced a remarkable literary heritage for the 20th century.

ENGL 150D. Early Modern Fiction, 1910-1950. 3 Units
Term Typically Offered: Fall, Spring

Survey of the important historical movements and conflicts in American literature, including the development of Realism and Naturalism, the experimental Modernist movement of the twenties, the populist literature of the thirties and the development of psychological realism in the forties.

ENGL 150E. American Poetry, 1910-1950. 3 Units
Term Typically Offered: Fall, Spring

Many scholars argue that American literature's greatest achievement in the twentieth century literature is in the genre of poetry. Offers a survey of such movements as the "New Poetry," Modernism, Imagism, Primitivism, and Postmodernism. Major figures will include, but not be limited to, Robinson, Frost, Eliot, Pound, Millay, Cummings, Stevens, W.C. Williams, Jeffers, Moore, and Hughes.

ENGL 150F. Contemporary American Fiction, 1950-Present. 3 Units
Term Typically Offered: Fall, Spring

Examines American fiction in the decades immediately following World War II. These novels deal with themes such as exhaustion, social unrest, historical conspiracy, and political coercion. Representative figures include, but are not limited to, Ralph Ellison, John Barth, Philip Roth, Joan Didion, Thomas Berger, Vladimir Nabokov, Marilynne Robinson, Thomas Pynchon.

ENGL 150G. Contemporary American Poetry, 1950-Present. 3 Units
Term Typically Offered: Fall, Spring

Examines the richness of American poetry since World War II giving some consideration to the impact of recent world poetry brought to us by our skillful poet/translators.

ENGL 150H. Recent American Fiction, 1980-Present. 3 Units
Term Typically Offered: Fall, Spring

Introduction to the remarkable flowering of American fiction in the late decades of the twentieth century. The primary focus is to scrutinize a collection of novels for which there is no firmly established critical opinion but which are nonetheless distinguished fictional accomplishments. Emphasis is placed on revealing the diversity of voices and the ways in which these writers demonstrate the continuing possibilities for artistic variety and experimentation.

ENGL 150I. Modern American Short Story. 3 Units
Term Typically Offered: Fall, Spring

Since the publication of Washington Irving's "Legend of Sleepy Hollow," Americans have excelled at the genre of the short story. Offers a survey of traditional "masters" and recent innovators. Provides an opportunity to read a wide variety of writers (such as Wharton, Chopin, Crane, Gilman, James, Anderson, Hemingway, Faulkner, Ellison, O'Connor, Barth, Oates, Proulx, Roth, Carvey, and Welty), and examine a range of forms, themes and experiences that reflect and shape American culture.

ENGL 150J. Twentieth Century American Drama. 3 Units
General Education Area/Graduation Requirement: Arts (Area C1)
Term Typically Offered: Fall, Spring

In-depth examination of American drama, starting with Eugene O'Neill. Traces American drama from the turn-of-the-century to the present, examining the plays themselves—their themes, dramatic idioms, stage craft and European influences—in their social, historical and artistic contexts.

ENGL 150L. Lost Generation Writers. 3 Units
Term Typically Offered: Fall, Spring

Examines one of the most remarkable flowerings of literary achievement in American letters, the writing of "The Lost Generation," authors born between 1885 and 1900. Unified by a profound disillusionment with American culture after World War I, writers such as T.S. Eliot, Eugene O'Neill, William Faulkner, and Ernest Hemingway produced enduring modern masterpieces. In the process they demonstrated that their generation might find in art what had been lost on the battlefield.

ENGL 150M. California Fiction. 3 Units
Term Typically Offered: Fall, Spring

Focuses on the California phenomenon—the place where the American dream can reach fulfillment—and how this phenomenon has captivated writers for decades. Presents a cross-section of this fiction, examining the various literary manifestations of the California phenomenon.
ENGL 150R. The American Gothic. 3 Units
Term Typically Offered: Fall, Spring

Explores American works written in the Gothic mode. In novels, captivity narratives, short stories, and poetry, we will investigate representations of terrifying, uncanny, and supernatural phenomena. As we trace the development of the Gothic mode in American literature, we will examine how narratives and poetic depictions of horror rehearse our individual and cultural fears about sexuality, race, violation, rebellion, madness, and death, and we will inquire into that thrill of macabre pleasure that attends the exploration of the darker side of life.

ENGL 150R. American Regionalism. 3 Units
Examines literature by American regionalist writers during the late-nineteenth century. Topics may include nationalism, sectional divisions, local color, dialect fiction, conditions of publication, and emerging women writers and writers of color. Students will investigate the role that regionalism plays in relation to literary representations that depict the conflicting and complex social, cultural, and historical formation of racialized and gendered identities.

ENGL 155E. Hemingway and Fitzgerald. 3 Units
Term Typically Offered: Fall, Spring

Intensive study of two of the most important American writers of the 20th century: Ernest Hemingway and F. Scott Fitzgerald. This focus on two authors allows students to read them in-depth, to examine the dynamics of their friendship, and to explore the similarities and differences in their responses to World War I and the Great Depression.

ENGL 165A. A Survey of Irish Literature. 3 Units
Term Typically Offered: Fall, Spring

Survey of Irish literature, beginning with various myths, moving through the bardic period and eighteenth and nineteenth centuries, and then centering upon the "Irish Renaissance" (1885-1940). Covers the genres of poetry, drama, and fiction, and representative figures include W.B. Yeats, Patrick Kavanagh, James Joyce, Flann O'Brien, John Synge, Lady Gregory, Sean O'Casey, Sean O'Faoilain, and Frank O'Connor.

ENGL 165D. Drama. 3 Units
Term Typically Offered: Fall, Spring

Offers a survey of dramatic literature--tragedy, comedy, tragi-comedy--with plays both modern and classical. Since plays are meant to be seen as well as read, several selections will be available on video to deepen understanding and enjoyment. Focus is on analysis of genre, theme, structure, and interpretation of the plays. A term project based on one live performance in Sacramento is also included.

ENGL 165F. Caribbean Literature. 3 Units
Term Typically Offered: Fall, Spring

Focuses on the literature—novels, shorts stories, poetry, and plays—by a wide range of Caribbean authors, among whom are two recent Nobel Prize winners, Derek Walcott and V. S. Naipaul. Students will learn to appreciate the cultural diversity of this post-colonial literature and will become familiar with its important themes and stylistic techniques. Students will also experience the multi-dialectal richness and flavor of the Anglophone Caribbean as expressed by authors from linguistically diverse islands.

ENGL 165A. Fantasy. 3 Units
Term Typically Offered: Fall, Spring

Helps students develop their own working definition of fantasy by examining its central narrative and dramatic structures, image patters, and thematic preoccupations. At the same time, encourages students to compare these motifs with those of so called "realist" fiction so they may understand how blurred conventional distinctions between "fantasy" and "reality" actually are.

ENGL 170D. Modern Poetry. 3 Units
Term Typically Offered: Fall, Spring

General Education Area/Graduation Requirement: Humanities (Area C2), Writing Intensive Graduation Requirement (WI)

Examines the development of the Gothic mode in American literature, we will examine how narratives and poetic depictions of horror rehearse our individual and cultural fears about sexuality, race, violation, rebellion, madness, and death, and we will inquire into that thrill of macabre pleasure that attends the exploration of the darker side of life.

ENGL 170E. Short Fiction. 3 Units
Term Typically Offered: Fall, Spring

Survey of the art of short fiction through readings of a variety of world writers. Representative figures include, but are not limited to, Hawthorne, Melville, Joyce, Hemingway, Atwood, O'Connor, Boyle, Cather, Faulkner, Jackson, etc.

ENGL 170G. Modern Poetry. 3 Units
Term Typically Offered: Fall, Spring

General Education Area/Graduation Requirement: Humanities (Area C2), Writing Intensive Graduation Requirement (WI)

Examines the development of the Gothic mode in American literature, we will examine how narratives and poetic depictions of horror rehearse our individual and cultural fears about sexuality, race, violation, rebellion, madness, and death, and we will inquire into that thrill of macabre pleasure that attends the exploration of the darker side of life.

ENGL 170H. Introduction To Comedy. 3 Units
Term Typically Offered: Fall, Spring

Focuses on various comic genres and theories—from 4th century BC to the present. It examines romantic comedy, tragicomy, comedies of manners, of humors, of menace; farce, satire, slapstick. Students also read widely in comic theory, examining aspects psychological, phenomenological, aesthetic—in drama, fiction, poetry and prose.
ENGL 170I. Introduction To Tragedy. 3 Units
Prerequisite(s): GWAR certification before Fall 09; or WPJ score of 80+; or 3-unit placement in ENGL 109M or ENGL 109W; or 4-unit placement in ENGL 109M or ENGL 109W and co-enrollment in ENGL 109X; or WPJ score 70 or 71 and co-enrollment in ENGL 109X.
General Education Area/Graduation Requirement: Writing Intensive Graduation Requirement (WI), Humanities (Area C2)
Term Typically Offered: Fall, Spring

Focuses on the literatures and theories of tragedy—from 5th century BC to the present—from Sophocles to Mamet, from Flaubert to Stoppard. It examines the "tragic vision" in light of individual genres, times, social mores, religious beliefs and expectations, using Aristotle for both its touchstone and lodestar.

ENGL 170K. Masters of the Short Story. 3 Units
Term Typically Offered: Fall, Spring

Concentrates on the works of a few distinguished writers of short fiction. In each case the writer is one with a widely acknowledged reputation. Emphasis is upon exploring how writers shape and manipulate the genre to produce lasting, individual, distinctive works. Representative figures include, but are not limited to, James Joyce, Nathaniel Hawthorne, Sherwood Anderson, Ernest Hemingway, Frank O'Connor, Flannery O'Connor, John Barth, D.H. Lawrence, and Eudora Welty.

ENGL 170M. Literatures Of Sexuality. 3 Units
Term Typically Offered: Fall, Spring

Examines the relation between sexuality and literature, exploring different conceptions of sexuality over time and across cultures and the rhetorical strategies employed in representations of sexuality in literary texts. Topics may include the modern connection between sexuality and identity; the links between nation, race, and sexuality; and the treatment of homosexuality and women's sexuality. Throughout, careful attention will be paid to the literary forms and discursive strategies (e.g., the confessional mode, modern scientific discourses) used to represent sexuality.

ENGL 170N. Narrative Poetry. 3 Units
Term Typically Offered: Fall, Spring

Provides an introduction to the genre of narrative poetry, a historical survey of the vicissitudes of its reception from the nineteenth century to the present, and a close study of representative narrative poems by poets who have excelled in this mode.

ENGL 170Z. Twentieth Century Fiction. 3 Units
Term Typically Offered: Fall, Spring

ENGL 180A. Forms of African-American Poetry. 3 Units
Prerequisite(s): GWAR certification before Fall 09; or WPJ score of 80+; or 3-unit placement in ENGL 109M or ENGL 109W; or 4-unit placement in ENGL 109M or ENGL 109W and co-enrollment in ENGL 109X; or WPJ score 70 or 71 and co-enrollment in ENGL 109X.
General Education Area/Graduation Requirement: Humanities (Area C2), Writing Intensive Graduation Requirement (WI)
Term Typically Offered: Fall, Spring

Focuses on four or more African-American poets, representing a historical succession of literary periods.

ENGL 180B. Forms of African-American Fiction. 3 Units
Prerequisite(s): GWAR certification before Fall 09, or WPJ score of 70+ or at least a C- in ENGL 109M or ENGL 109W.
General Education Area/Graduation Requirement: Race & Ethnicity Graduation Requirement (RE), Humanities (Area C2), Writing Intensive Graduation Requirement (WI)
Term Typically Offered: Fall, Spring

Focuses on four or more African-American writers of fiction, surveying texts representing a historical succession of literary periods.

ENGL 180F. Major African-American Authors. 3 Units
Term Typically Offered: Fall, Spring

Employing a lecture-discussion format, involves studies in a single literary genre or a combination of literary genres emphasizing the work of three or fewer African-American authors.

ENGL 180G. American Identities: In the Intersection of Race, Gender, and Ethnicity. 3 Units
General Education Area/Graduation Requirement: Humanities (Area C2), Race & Ethnicity Graduation Requirement (RE)
Term Typically Offered: Fall, Spring

Uses a team-teaching approach to sample a range of diverse American literatures. Texts are selected by the team to represent both mainstream and marginalized groups and to reflect the individual professors' interests and expertise. Examines the commonalities that cross ethnic, racial, class, and gender boundaries as well as the differences that enrich our cultural identity.

ENGL 180J. Jewish American Literature. 3 Units
General Education Area/Graduation Requirement: Humanities (Area C2)
Term Typically Offered: Fall, Spring

Students will examine a rich tradition of Jewish American literature in the context of a complex American multicultural narrative. Topics include the immigrant experience, assimilation, alienation, responses to the Holocaust and other forms of anti-Semitism, the place of Israel in the Jewish American imagination, and a contemporary rediscovery of reconstruction of Jewishness and Judaism. Students will interrogate what constitutes Jewish American identity and defines its literature in a culture that is itself conflicted about its secular/religious ethos and the degree to which subjectivity is determined by "consent and/or descent."

ENGL 180L. Chicano Literature. 3 Units
Prerequisite(s): GWAR certification before Fall 09; or WPJ score of 80+; or 3-unit placement in ENGL 109M or ENGL 109W; or 4-unit placement in ENGL 109M or ENGL 109W and co-enrollment in ENGL 109X; or WPJ score 70 or 71 and co-enrollment in ENGL 109X.
General Education Area/Graduation Requirement: Writing Intensive Graduation Requirement (WI), Humanities (Area C2)
Term Typically Offered: Fall, Spring

Gives students an overview of Chicano Literature. Students examine both contemporary Chicano poetry and fiction.
ENGL 180M. Asian American Literature. 3 Units
