

# MINOR IN GEOGRAPHY

Units required for Minor: 18

## Program Description

Geography students at Sacramento State explore Earth's natural and cultural environments using methods from the natural sciences and the social sciences. They study climate, weather, landforms, water resources, and plants and animals, as well as peoples, societies, economies, and cities. These phenomena overlap in intricate ways, giving rise to distinctive places and regions. Geography's approach emphasizes Earth's spatial relationships and patterns, and the processes that govern them, whether found in nature or in human behavior.

## Program Requirements

Code	Title	Units
Select two of the following lower division courses: <sup>1</sup>		6
