Program Description
The Labor Studies Program is concerned with the world of work, workers, and their organizations. It investigates the cultural, economic, and political forces which provide the environment in which people make a living. It is an inter-disciplinary program which combines broad perspectives with specific skills.

The program emphasizes the world of work from the view of the individual in the workplace, the labor market, and as a member of a work group or labor union. The roles of employers, government, and labor unions, as adversaries and cooperators in an increasingly competitive world, are covered. Courses combine analytical and practical elements, bridging academia with the world of work.
