

COLLEGE OF SOCIAL SCIENCES AND INTERDISCIPLINARY STUDIES

College Overview

The College of Social Sciences and Interdisciplinary Studies (SSIS) provides dynamic curricula and activities that examine all aspects of human society through the study of social justice, policy, mental and physical health, culture, social behavior, and the natural environment within innovative departments, programs, and centers/institutes. Key to our students' success is their awareness of culture and community, scientific thinking and analysis, anti-racist practices, and ethical decision-making.

The College offers bachelor's and master's degrees, as well as concentrations, minors, certificates. The University also offers a Doctorate in Educational Leadership, which reflects a partnership between our department of Public Policy and Administration and the College of Education. The knowledge and skills developed by the College's programs are applicable to a wide variety of careers. Students should consult with individual departments for further career and graduate and professional school opportunities.

Program Descriptions

Anthropology

Located at the nexus of Natural Sciences, Social Sciences, and Humanities, Anthropology integrates diverse forms of knowledge into practical indexes for engagement with our everyday concerns. The program provides students "hands-on" experience to complement their in-class learning. Undergraduate and graduate students can participate in various projects including archaeological excavations, community engagement programs, and intern at various governmental and non-governmental agencies.

Asian Studies

The Asian Studies Program at California State University, Sacramento is an interdisciplinary program that seeks to prepare our students for a future in an economically and politically important and inter-connected Pacific Basin by providing an in-depth understanding of Asia from a political, cultural, and historical perspective.

Economics

The Economics major is designed to provide students with a broad education with special emphasis on the economic aspects of society and familiarization with techniques for the analysis of contemporary economic problems. A graduate degree is also offered.

Environmental Studies

The Bachelor of Arts or Bachelor of Science in Environmental Studies provides students with an interdisciplinary understanding of challenging issues like pollution, wildlife and wilderness preservation and restoration, land use, biodiversity loss, resource depletion, energy and natural resource conservation. They learn how policy and practice assess

and address those challenges towards resilient natural systems and a sustainable society.

Ethnic Studies

Ethnic Studies offers an undergraduate degree through an interdisciplinary approach to the study of the cultures, languages, historical, and contemporary issues relating to African Americans, Asian Americans, Chicana-Latina, and Native Americans. The program directs students to critically examine the contributions made by these groups to world civilization and to American society.

Family and Consumer Sciences

The Family and Consumer Sciences Department offers a Bachelor of Science degrees in Family Studies and Human Development; Fashion Merchandising and Management; Nutrition and Food, with the option of a Didactic Program in Dietetics; and Family and Consumer Sciences Education (Pre-credential Single Subject Program). Our majors study relationships between people and their diverse environments, focusing on the integration of physical, biological, cultural, economic and social influences on human behavior, lifespan development, and health.

Gerontology

Gerontology is an applied interdisciplinary program offering courses from a variety of departments and colleges. The Program prepares students to address challenges and positive life transitions related to individual and family health and illness in an aging society. Students apply concepts and theories in several service learning courses and two academically structured internships which aids in providing a solid knowledge and experiential base for careers in a wide variety of settings serving elders.

Liberal Studies

Students enjoy a wide-ranging selection of courses in different disciplines as they prepare for careers in K-12 education or in business and government.

Political Science

The Department of Political Science offers three majors including Political Science, International Relations, and Political-Science Journalism. We also offer a minor and a Masters in Political Science. Ideally located in the state capital, the Department offers students unique opportunities to integrate their studies of politics and theory through an extensive range of internships in state and local government.

Psychology

The undergraduate program in Psychology allows students to develop a scientific understanding of the behavioral, biological, cognitive, cultural, developmental, and social aspects of human behavior. Graduate programs offer an opportunity to pursue coursework and research experience in Applied Behavior Analysis, General Psychology, or Industrial-Organizational Psychology.

Public Policy Administration

The Department of Public Policy and Administration focuses on professional training for graduate students interested in working in or adjacent to the public sector. It offers a Master of Public Policy and Administration, a Certificate in Collaborative Governance for matriculated graduate students, and a Certificate in Judicial Administration through the College of Continuing Education. It also participates actively in the Doctorate in Educational Leadership Program.

Social Science

The Social Science Program provides a major and concurrent subject matter preparation for the Single Subject Teaching Credential in Social Science.

Sociology

The study of Sociology gives students the ability to observe human behavior, analyze data, and collaborate with others to achieve desired social change. The mission of the Sociology Department is to provide our students with the theoretical and substantive knowledge to participate as skilled professionals within the institutions and organizations that shape our region. Students have the opportunity to deepen their experience through internships at non-profits, and state and local government.

Women's and Gender Studies

Women's and Gender Studies is a dynamic interdisciplinary field preparing students to be future leaders, scholars, and social justice activists. We are dedicated to studying the social production of gender, and women's experiences in relation to formations of sexuality, race, class, nationality, ability, ageism, and other categories of difference. Students are prepared for careers in teaching, counseling, psychological or family therapy; law; health, social work, human services, and public service.

Centers/Institutes

The College of Social Sciences and Interdisciplinary Studies has a long history of involvement in social policy-oriented scholarship and instruction. That history, and the College's current roster of talented researchers and instructors, has placed SSIS at the forefront of the University's efforts to meet diverse community needs, consistent with the stated values of the University's strategic plan. These efforts are channeled through the following centers, institutes, and other entities:

- Archaeological Curation Facility
- Center for Pacific Asian Studies
- Cooper-Woodson College Enhancement Program
- Educational Insights Center (EdInsights)
- Full Circle Project

- Institute for Social Research (ISR)
- Iranian and Middle Eastern Studies Center
- Hazel Cramer Endowed Chair
- Rekhi Singh Endowed Professor in Happiness
