2. Academic Qualifications (a baccalaureate degree from an institution accredited by a regional accrediting association, previous graduate level coursework if available, and performance on the Graduate Management Admission Test (GMAT); and
3. Additional Relevant Criteria (Potential contribution to learning experience of the program, maturity and motivation, ability and willingness to commit the required time and energy to the program, community service and professional activities, and support of an applicant’s employing organization).

A candidate with good academic qualifications and a solid, but short, work record will have the same opportunity as someone with a strong, long, work record, but who has been out of school for a while. We believe candidates who have successful professional careers, solid education, and additional relevant qualifications will excel in our EMBA Program.

We do require that our candidates have a baccalaureate degree from a regionally accredited institution. We also recommend applicants have at least 3 to 5 years of professional work experience. Professional work experience will provide the applicants and their peers with a more stimulating learning environment.

Deadlines

Since class size is limited, early applications are highly encouraged.

Please contact the EMBA Admission Help Desk (916-278-2895) or visit the EMBA Web site (csus.edu/cba/emba/admissions) for application deadlines.

Application Procedures

(All forms can be downloaded from our Web site csus.edu/cba/emba/howtoapply.)

1. To Sacramento State, Office of Graduate Studies:
   • Online Sacramento State Graduate Application (csus.edu/cba/graduate/mba) and
   • $55 Application Fee (you can pay this when you are filling out your online application).
2. To the College of Business Administration, External Graduate Programs Office (EGP). The following are required for a complete application:

The following are required for a complete application:

1. The Supplementary Application Form (http://www.emba.csus.edu/emba/documents/CBAApplication-Spring2010.pdf). You may print out a copy and manually fill out the form or fill out the form electronically by downloading the application form from www.emba.csus.edu and save a copy on your computer. Please type or print clearly on the application. Give your full legal name and avoid abbreviations. You may use additional paper if you need more space to respond, but please put your name on each page, and attach the pages to your application.
2. Two copies of official transcripts. Please request 2 copies of official transcripts from all colleges and universities you have attended. A Transcript Request form (http://www.csus.edu/cba/emba/howtoapply.html) is included for your convenience. It is recommended that you have the transcripts directly sent to you in sealed envelopes.
3. Two letters of recommendation. At least one of these letters should come from supervisors and business associates who can discuss knowledgeably your managerial and academic abilities, accomplishments, and potential. Please use the Recommendation Letter Form (http://www.csus.edu/cba/emba/howtoapply.html) for the application.
4. Results on the Graduate Management Admission Test (GMAT). The Computer Adaptive GMAT is administered at test centers throughout the world. To register, visit their Web site at www.mba.com (http://www.mba.com). Please be sure to use the correct Sacramento State institutional code on your GMAT registration form.
5. Statement of career objectives. This statement should include a description of your long- and short-term career goals, and the ways in which you believe the EMBA degree will help you to achieve them.
6. A reverse chronological resume of your work experience. The resume should include job title, organization (nature of business, gross sales/revenues, number of employees), location, dates of employment, a summary of duties and responsibilities, and a description of your organizational unit (size, scope, budget, personnel, and reporting relationships) for each position held.
7. Corporate/Individual Sponsorship Form (http://www.csus.edu/cba/emba/howtoapply.html). Required to insure that your organizational sponsor will agree to allow you to attend classes on the mandatory Friday afternoons and Saturdays, and to determine if your organization plans to cover all or part of your educational fees. If you will be self-supporting, please ask your employer to confirm their agreement to your attendance and indicate your personal payment option preference on the bottom of the form.
8. Application interview. An application interview may be required, depending on individual circumstances. The Graduate Programs Office will contact you if needed.

Your completed Supplementary Application Form, and all supporting documents should be mailed to the address below, unless otherwise indicated:

College of Business Administration
MBA for Executive Program
Tahoe Hall, Room 1010
Sacramento State
6000 J Street
Sacramento, CA 95819-6088

International Applicants

International applications are not accepted for the program.

Note: Applications are not considered complete and will not be reviewed unless GMAT scores and transcripts are included. To facilitate processing your application so that you receive an admission decision more quickly, you must submit official transcripts from ALL colleges and universities previously attended (other than courses taken at Sacramento State University) even if you attended Sacramento State as an undergraduate. You should arrange to have all official transcripts sent at the same time you submit your application.
**Minimum Units and Grade Requirement for the Degree**

Units for EMBA: 41

Minimum Cumulative GPA: 3.0. The minimum acceptable grade for any graduate business course is “C.” No more than two (2) courses with a grade of “C” will be counted for satisfaction of graduate program requirements.

**Advancement to Candidacy**

A student's program requirements are governed by the catalog in effect at the time one is accepted into and begins graduate school or by the catalog in effect at the time advancement to candidacy is approved.

Prior to enrolling in Culminating Requirements, a student must advance to candidacy. Initiation of advancement procedures is the responsibility of the student. The application to advance must be filed no later than the semester prior to enrollment in culminating experience requirement.

Eligibility to advance to candidacy requires satisfactory scholastic achievement, presentation of a plan of graduate study, and demonstration of writing proficiency. A classified graduate student in Business Administration may apply to the Graduate Business Advising Center (GBAC) for advancement to candidacy for the Master’s degree after s/he has completed at least 12 units of the program requirements beyond the Foundation requirements. Students with a GPA deficiency or who have not fulfilled the Writing Placement for Graduate Students Requirement (WPG) cannot advance to candidacy.

**Culminating Experience (4 Units)**

EMBA 260 EMBA Individual Project 4

1 Completion of EMBA 210

**MBA International (IMBA)**

**Total units required for MBA:** 36

**Program Description**

The College of Business (COB) in conjunction with the College of Continuing Education (CCE), proposes to offer a self-supported Master of Business Administration (International) degree program that can be completed either fully online or face to face.

The purpose of the MBA (International) program is to provide students the opportunity to become future leaders in the competitive world of international commerce. The program focuses on advancing knowledge, skills and practices that are complemented by twelve 3-unit courses include eight core courses and four courses from a specific area of emphasis: Finance, International Management, and Information Technology.

The academic background of each applicant will be assessed to determine if they have the educational foundation to be successful in the program. Individuals are required to take four IMBA boot camps. They are:

- Statistics
- Financial Accounting
- Business Economics
- Finance

**Admission Requirements**

All applicants for post-baccalaureate degree programs in Business must have earned a baccalaureate degree from a regionally accredited four-year institution of higher learning or the equivalent from a foreign institution. Admission requirements are different for each of the COB Graduate Programs. The specific admission requirements for each degree program are listed within the program descriptions under “Admission Information” on the following pages. The College of Business reserves the rights to revise its admissions standards and to limit enrollment in its graduate degree programs.

Applicants who are approved for admission will receive a letter from the Office of Graduate Studies informing them that they have been admitted as a conditionally or fully classified graduate student. Included with that correspondence will be an Acceptance Form which the new graduate student must then return to the COB MBA Program Services, Tahoe Hall 1020.

**Minimum Admission Criteria for the MBA Program**

As the College of Business receives a large number of applications each cycle, it reserves the right to admit fewer applicants than those who meet the minimum criteria.

Title V of the California Educational Code requires that MBA candidates must have earned a minimum 2.5 cumulative GPA and an undergraduate degree from an accredited institution.
Unless a valid waiver is presented, applicants must also submit a valid admission test (GMAT or GRE) and/or English Language Proficiency exam scores.

Minimum Admission or Language Test Scores

GMAT: 30% overall, 30% verbal, 30% quantitative; Scores valid for 5 years from test date. Test must be taken by the application deadline. Students are able to apply with pending scores, but must submit an official score report to be considered for admission.

GRE (General Test): 30% verbal, 30% quantitative; Scores valid for 5 years from test date. Test must be taken by the application deadline. Students are able to apply with pending scores, but must submit an official score report to be considered for admission (use institution code of 4671 ONLY when requesting official score reports be sent to Sacramento State; do not use department code).

TOEFL: Paper-based: 550; Internet-based: 80 (International Students only).

IELTS: 7(International Students only).

Deadlines
See the COB Web site for current admission deadlines: https://www.csus.edu/college/business-administration/graduate/mba-international.html

Special Admission Process
Applicants not meeting all the admission criteria may be admitted to the program based on evidence of potential success in the program provided by the applicant. Such evidence may include, but is not limited to: the applicant’s maturity, motivation, employment history, managerial potential, letters of recommendation, personal statement, community activities, and other accomplishments that support the applicant’s potential to successfully complete the program. An applicant so considered and recommended for admission may be approved by the Dean or Dean’s designee.

Application Procedures
All prospective graduate students must file all of the following documents by the application deadline with both the COB MBA Program Services (Tahoe Hall 1020) and the Sacramento State Office of Graduate Studies (River Front Center 215) as noted below:

1. To the College of Business, MBA Program Services Office, the following are required for a complete application:
   a. The College of Business Application (https://www.csus.edu/college/business-administration/graduate/mba-international.html)
   b. Supplemental Application Materials
      i. Official GMAT or GRE scores;
      ii. Current resume;
      iii. 1-2 page statement of purpose;
      iv. Two letters of recommendation.
   c. Two copies of official transcripts. Please request 2 copies of official transcripts from all colleges and universities you have attended. Send transcripts to both the MBA Program Services office and the Office of Graduate Studies. Sacramento State current students or graduates: only submit transcripts not previously submitted to the university or from institutions attended after graduation.

2. To Sacramento State, Office of Graduate Studies:
   * Online Cal State Apply Graduate Application and
   * Application Fee (you can pay this when you are filling out your online application).

Note: Applications are not considered complete and will not be reviewed unless all application materials and transcripts have been received.

International Applicants
International students (F or J Visas) must apply through International Admissions. Do not fill out the general graduate studies application as it will slow down your application process. All materials, inclusive of TOEFL scores, must be turned in to the International Admissions Office. To ensure consideration, international students should submit their material, including GMAT/GRE and TOEFL test scores, to the International Admissions Office one month prior to the COB MBA Program Services application filing deadline. For an application and details international students should visit The International Admissions Office Web site.

Graduate Writing Assessment Requirement (GWAR)
The Graduate GWAR is a CSU wide requirement that should be completed by students before advancing to candidacy. The purpose of the GWAR is for students to demonstrate their proficiency at writing in an academic setting at a graduate-level. Graduate students must successfully pass a Graduate Writing Intensive (GWI) course in their Graduate Program with a grade of "B" or better to satisfy the requirement.

Minimum Units and Grade Requirement for the Degree
Units required for MBA: #36

Minimum Cumulative GPA: 3.0. The minimum acceptable grade for any graduate business course (other than the GWI course) is "C." No more than two (2) courses with a grade of "C" will be counted for satisfaction of graduate program requirements.
Advancement to Candidacy
A student's program requirements are governed by the catalog in effect at the time one is accepted into and begins graduate school or by the catalog in effect at the time advancement to candidacy is approved.

Prior to enrolling in Culminating Requirements, a student must advance to candidacy. Initiation of advancement procedures is the responsibility of the student. The application to advance must be filed no later than the semester prior to enrollment in culminating experience requirement.

Eligibility to advance to candidacy requires satisfactory scholastic achievement, presentation of a plan of graduate study, and demonstration of writing proficiency. A classified graduate student in Business Administration may apply to the MBA Program Services at imba@csus.edu for advancement to candidacy for the Master's degree after they have completed at least 12 units of the program requirements. Students with a GPA deficiency or who have not fulfilled the Graduate Writing Assessment Requirement (GWAR) cannot advance to candidacy.

Minor in Business

Units required for the Minor: 24, all of which must be taken in Business Administration,* with the exception of the STAT 1 requirement.

Program Description

The College offers Minors in Business Administration, Knowledge Management Technology, Management of Human Resources and Organizational Behavior, Marketing, Real Estate and Land Use Affairs, and Risk Management and Insurance. A Minor in Business Administration is valuable to the student majoring in another area who wishes to supplement his/her knowledge with a business background.

Note: The use of the words “business administration” throughout this section refers to courses designated as Accountancy (ACCY), Decision Sciences (DS), Entrepreneurship (ENTR), Finance (FIN), General Management (GM), Human Resources/Organizational Behavior (HROB), International Business (IBUS), Management (MGMT), Management Information Science (MIS), Marketing (MKTG).

Note: Minimum required GPA: 2.0 (“C”) in Business Administration courses with the minimum acceptable grade for any course being a "C-.”

Note: At least nine upper division units must be taken in residence. Business Administration\(^1\) 195 and 199 courses may not be applied to the minor.

Note: A student shall demonstrate computer literacy and competency (MIS 1, MIS 2, MIS 3) prior to taking 100-level courses except HROB 101.

Select two 100-level Business Administration courses\(^2\) 6

**Total Units 24**

---

\(^1\) The use of the words “business administration” throughout this section refers to courses designated as Accountancy (ACCY), Accountancy Information Systems (AIS), Decision Sciences (DS), Entrepreneurship (ENTR), Finance (FIN), General Management (GM), Human Resources/Organizational Behavior (HROB), International Business (IBUS), Management (MGMT), Management Information Science (MIS), Marketing (MKTG) and Supply Chain Management (SCM).

The student pursuing a minor in business administration is cautioned that other students enrolling in the class, majors in business administration, normally will have satisfactorily completed all prerequisites. To ensure that no significant handicap is incurred where prerequisites are not met, the student should obtain explicit instructor approval.

\(^2\) Four of the courses will be selected for a particular location
permission in each course prior to enrolling. Currency policies outlined in the Business Major also apply to Business Minors.

Finance

College of Business Administration

Program Description

The College of Business Administration (COB) offers a broad professional education in Business. The Bachelor of Science program offers students a choice of 9 concentrations by which they may focus their goals. Additionally, the COB's Business Honors program provides an alternative path to its most capable students to prepare them for management opportunities. All students must choose a concentration to complete their requirements for the baccalaureate degree. Students who are uncertain about which concentration to choose are encouraged to select the General Management concentration, as it is the most comprehensive. The structure of the General Management concentration also provides an overlap with the other concentrations, thus making changes in focus possible. Students who wish a more customized program may elect to complete the requirements for additional concentrations as well. For example, students may elect dual concentrations such as General Management and Management of Human Resources and Organizational Behavior. For information about program options, please visit our website at: Undergraduate Programs | Sacramento State (csus.edu) (/https://www.csus.edu/college/business-administration/undergraduate/).

The College also offers Minors in Business Administration, Management of Human Resources and Organizational Behavior, Marketing, Real Estate and Land Use Affairs, and Risk Management and Insurance. A Minor in Business Administration is valuable to the student majoring in another area who wishes to supplement his/her knowledge with a business background.

given to flow of funds analysis within the context of emerging financial
important substitutes for money in the traditional sense. Emphasis is
the network of institutions which bring into existence the increasingly
Designed to broaden understanding of the financial system to include
Term Typically Offered: 
Prerequisite(s): 
FIN 101. Business Finance. 3 Units
Term Typically Offered: Fall, Spring
Study of principles of finance and their application to typical financial problems of business enterprises. Special emphasis on financial analysis, management of working capital, cost of capital, capital budgeting, long-term financing, dividend policy, and internal financing.
FIN 134. Financial Management. 3 Units
Prerequisite(s): FIN 101.
Term Typically Offered: Fall, Spring
Trends in the development of financial policy are analyzed and reports on specific aspects are presented in class. The student is placed in the position of the financial manager who must make decisions and implement them.
FIN 135. Investments. 3 Units
Prerequisite(s): FIN 101.
Term Typically Offered: Fall, Spring
Significant characteristics of numerous types of investments; securities markets and financial institutions; principles of investment analysis; investment management.
FIN 136. Modern Portfolio Management. 3 Units
Prerequisite(s): FIN 101.
Term Typically Offered: Fall, Spring
Asset management utilizing the major aspects of modern portfolio theory, portfolio construction and selection, portfolio performance evaluation, capital asset pricing models, and recent theoretical developments in asset pricing behavior.
FIN 137. Financial Institutions and Markets. 3 Units
Prerequisite(s): FIN 101.
Term Typically Offered: Fall, Spring
Designed to broaden understanding of the financial system to include the network of institutions which bring into existence the increasingly important substitutes for money in the traditional sense. Emphasis is given to flow of funds analysis within the context of emerging financial theories.

FIN 138. Principles of Risk Management and Insurance. 3 Units
Prerequisite(s): Must be a business major (any concentration) or Public Health major (Occupational Health & Safety concentration) or Real Estate & Land Use Affairs minor or a Risk Mgmt & Insurance minor
Term Typically Offered: Fall, Spring
Study of the concept of pure risk and its implications for decision making. Provides business students the basics of risk theory and its application to risk management or insurance purchasing using a personal consumer’s viewpoint. Practical personalized examples and cases will be used to illustrate risk decision making, primarily on a personal basis, but also in selected business decisions. Topics include risk theory and applications, life insurance, medical coverage, property insurances, and liability insurances.
FIN 139. Business Property and Liability Insurance. 3 Units
Prerequisite(s): FIN 138 or instructor permission.
Term Typically Offered: Fall, Spring
Concentrated and analytical approach to the study of property and liability loss exposures for the business enterprise. While the emphasis is on the different types of business insurance coverage's, a risk management approach and examples are used. Topics include business property insurances; liability, especially workers' compensation; the SMP and CGL contracts; business auto, crime coverage's; bonds; transportation insurance; consequential coverage's; and capacity and other related marketplace problems. Case studies and problems, as well as a computer analysis are used. The course is an excellent supplement for insurance, finance, real estate and pre-law majors, small business owners, and anyone who will be making business financial decisions, or providing insurance products in the insurance industry. Successfully completing FIN 138 and 139 substitutes for the one-year experience requirement for those interested in taking the Insurance Broker's Licensing Exam.
FIN 140. Employee Benefits. 3 Units
Prerequisite(s): FIN 138 or instructor permission.
Term Typically Offered: Fall, Spring
Intensive and analytical examination of the employee benefit planning environment and its risk exposures. Using a risk management approach, the topical areas studied include mandatory programs, especially OASDHI and ERISA; health care; group life and disability; retirement income and capital accumulation plans; paid time off; family-centered benefits; flexible benefits and cafeteria plans; and benefit cost information. Case studies and extensive contact with the business community as well as team projects are required. This is an important class for specialists in human resources management, especially personnel, pre-law, and health care or those who will be providing insurance products to fulfill employment benefit needs.
FIN 141. Managerial Real Estate Law. 3 Units
Prerequisite(s): FIN 19
Term Typically Offered: Fall, Spring
Examination of the decision making process in land utilization transactions relative to the minimization of risks of legal confrontation. Traditional conflicts underlying real estate transactions are examined and principles of preventive law are derived. The management of litigation and transaction attorneys is considered. Court remedies that are pertinent to land utilization transactions are analyzed and compared to nonjudicial alternatives.
FIN 142. Real Estate Finance. 3 Units
Prerequisite(s): FIN 19 or ACCY 121 or FIN 101 or ENGR 140; Business Majors only
Term Typically Offered: Fall, Spring
Examination of the mechanisms of real estate finance, sources of funds, loan contracts, principles of mortgage risk analysis, and the role of group equity investment. The evolution of secondary mortgage markets, government policy, and market interference will be investigated from a risk management standpoint.
FIN 143. Real Estate Investment. 3 Units
Prerequisite(s): FIN 19 or ACCY 121 or FIN 101 or ENGR 140; business majors only
Term Typically Offered: Fall, Spring
Analyzes non-financial and financial factors influencing investment decision making in income producing property. Topics include: location and its linkages; methods of estimating demand for real estate; methods for evaluating competing supply; use of market analysis in decision making; development of cash flow statements, alternative investment criteria, risk, legal, financing, and tax analysis, operating, financing investment and reversion decisions.
FIN 144. Real Estate Market Analysis. 3 Units
Prerequisite(s): FIN 19 or FIN 101; must be Business Major (any concentration) or Real Estate and Land Use Minor.
Term Typically Offered: Fall, Spring
Introduction to real estate markets, economic analysis of property markets, and impact of local governments on real estate markets. Topics include space and asset markets; location, land use and competitive bidding; land markets, housing markets, and site selection; economic growth and real estate markets, office, retail, and industrial markets; impact of local governments on real estate markets; tools of market analysis, computer applications and geographic information systems.
FIN 145. Real Estate Development and Land Use. 3 Units
Prerequisite(s): FIN 19 or FIN 101; must be Business Major (any concentration) or Real Estate and Land Use Minor.
Term Typically Offered: Fall, Spring
Process of real estate development and the federal and state laws that regulate development. Topics may include creating industrial real estate, office space, shopping centers, and hotel/recreation facilities, strategy, market and feasibility analysis; site planning/design; capital cost analysis; construction; financial structuring; federal and state laws that regulate environment impact; land use and real estate development. Emphasis on case studies and a project analysis.
FIN 149. Real Estate Analytics. 3 Units
Prerequisite(s): FIN 19 or FIN 101; must be Business Major (any concentration) or Real Estate and Land Use Minor.
Term Typically Offered: Fall, Spring
Examines contemporary and emerging issues in real estate trends, space and asset market equilibrium, land use controls and regulation, market analysis, mortgage markets, property markets, real estate cycles, real estate development, real estate finance and investments, real estate securities, and/or real estate taxation. Use of computer software and applications are emphasized to understand real estate analytics and geographic information systems applications to real estate data.
FIN 150. Capstone in Professional Financial Planning. 3 Units
Prerequisite(s): ACCY 171, FIN 135, FIN 136, FIN 138 and FIN 140; FIN 136 and/or FIN 140 may be taken concurrently.
Term Typically Offered: Spring only
This course will engage the student in critical thinking and decision-making about personal financial management topics in the context of the financial planning process. The purpose of this course is to refine and develop skills needed for personal financial planners when working with individuals, families, and business owners in meeting financial needs and objectives.
FIN 160. Student Investment Fund Management. 3 Units
Prerequisite(s): FIN 134, FIN 135, or FIN 136 with a final posted grade of B- or higher or FIN 101 with a final posted grade of A- or higher; must be in Bachelor of Science in Business Administration major or minor
Term Typically Offered: Fall, Spring
Students will manage a real investment portfolio by applying theories of investment analysis and portfolio management. Topics include economic analysis, valuation theories, risk measurement and management, performance measurement, and benchmarking.
FIN 190. Multinational Business Finance. 3 Units
Prerequisite(s): FIN 101 or instructor permission. Prior additional course in finance or international business recommended but not required.
Term Typically Offered: Fall, Spring
Principles of international financial management. Issues covered include the international environment of financial management, uses of foreign exchange spot, forward, futures, options, and swap markets, foreign exchange risk management, international investment and financing decisions.
FIN 194. Cooperative Education Experiences in Real Estate. 6-12 Units
Prerequisite(s): FIN 19, FIN 142 and a minimum overall GPA of 2.5; Business major only
Term Typically Offered: Fall, Spring
In-depth supervised work experience in Real Estate and Land Use Affairs. This supervised work experience allows the student to become familiar with the practices of the real estate industry and/or governmental agencies.
Note: Open to all upper division students subject to permission. Petitions can be obtained from the Student Affairs Office, Tahoe 2065.
Credit/No Credit
FIN 195. Internship In Finance. 3 Units
Prerequisite(s): Minimum Sacramento State GPA of 2.5.
Term Typically Offered: Fall, Spring
Supervised work experience in business, governmental or service agencies for the purpose of increasing student understanding of the nature and scope of their operations. Supervision is provided by the faculty and the cooperating agencies.
Note: Open to upper division students, subject to permission of the Finance Area. Petitions can be obtained from the Student Affairs Office, Tahoe 2065. Open to declared business administration majors only.
Credit/No Credit
FIN 195A. Internship in Real Estate and Land Use Affairs. 3 - 6 Units
Prerequisite(s): FIN 19 and FIN 142. Minimum Sacramento State GPA of 2.5 required; open to declared business administration majors only
Term Typically Offered: Fall, Spring

Supervised work experience in business, governmental or service agencies for the purpose of increasing student understanding of the nature and scope of their operations. Supervision is provided by the faculty and the cooperating agencies. Open to upper division students, subject to permission. Petitions can be obtained from the Student Affairs Office, Tahoe 2065.
Credit/No Credit

FIN 196A. Exper Offer Finance. 3 Units
Prerequisite(s): FIN 135 with a final posted grade of B- or higher and instructor’s consent.
Term Typically Offered: Fall, Spring

Students will manage a real investment portfolio by applying theories of investment analysis and portfolio management. Topics include economic analysis, valuation theories, risk measurement and management, performance measurement, and benchmarking.

FIN 199. Special Problems in Finance. 1 - 3 Units
Term Typically Offered: Fall, Spring

Individual projects or directed reading for students qualified to carry on independent work.
Note: Admission requires approval of the instructor and the Associate Dean. Petitions can be obtained from the Undergraduate Business Advising Center, Tahoe 1030.
Credit/No Credit

FIN 200. Financial Reporting and Analysis. 3 Units
Term Typically Offered: Fall, Spring

Designed for business students with prior knowledge of accounting who intend to use corporate financial statements intensively in valuation, credit or equity analysis, or strategic competitor analysis. Topics include inventory, pensions, business combination, income tax and other current issues for their impacts on financial statement. Emphasis on financial statement analysis and interpretation of financial disclosures for improving risk assessment, forecasting, and decision-making.

FIN 210. Financial Institution Management. 3 Units
Term Typically Offered: Fall, Spring

Develop an understanding of the theory and practice of the management of financial institutions. Emphasis is placed on risk measurement and management. Financial institutions include commercial banks, investment banks, savings banks, credit unions insurance companies and financial companies such as mutual funds.

FIN 220. Corporate Finance. 3 Units
Term Typically Offered: Fall, Spring

Investigate the principles that corporations use in their investing, financing, and day-to-day management decisions. Topics include financial statement analysis, capital investment decision, capital structure, dividend policy, mergers and acquisitions, corporate governance and its impact on valuation.

FIN 230. Equity Analyses. 3 Units
Term Typically Offered: Fall, Spring

Covers advanced concepts and techniques essential to asset valuation. Key topics include, but not limited to, free cash flow, price multiples, asset-based and contingent claim valuations. Applications of various valuation techniques are emphasized. Provides a framework for selecting the most appropriate model for specific circumstances.

FIN 240. Fixed Income. 3 Units
Term Typically Offered: Fall, Spring

Discuss a wide range of fixed income products. Topics include trading concepts and mechanics, pricing, duration, convexity, term structure of interest rates, and options embedded fixed income securities.

FIN 250. Derivatives. 3 Units
Term Typically Offered: Fall, Spring

Discuss major types of financial derivatives and derivative markets. Topics include forward contracts, futures, options, SWAP's and credit derivatives. Emphasis on characteristics, trading process, pricing, parity conditions, risk involved, and investment strategies for different financial derivatives.

FIN 260. Alternative Investments. 3 Units
Term Typically Offered: Fall, Spring

Discuss major types of alternative investments including real estate, hedge funds, commodities, private equity, and venture capital. Emphasis on the technical aspects and the performance analyses of alternative investments, their advantages and disadvantages, role of alternative investments, and strategies of selection.

FIN 270. Portfolio Management. 3 Units
Term Typically Offered: Fall, Spring

Cover topics of asset management utilizing the major aspects of Markowitz portfolio theory, Capital ASSET Pricing Model, and Arbitrage Pricing theory. Discuss the comprehensive approach, starting with portfolio construction and asset selection, following with portfolio performance evaluation, and concluding with rebalancing strategies. Introduce and utilize worksheet modeling techniques which are useful for portfolio management.

FIN 280. Global Financial Markets. 3 Units
Term Typically Offered: Fall, Spring

Cover advanced concepts and applied techniques essential to understand the mechanism of the global financial markets. Key topics include global capital allocation, international tax management, foreign exchange markets, derivatives, parity relationships, and others. Focuses on the core concepts and techniques are applied in the global financial markets using different case studies. Integrate the key principles of finance and extends them to a multinational setting. Topics follow the Chartered Financial Analyst (CFA) Level 1 and 2 Exam on equity valuation.

FIN 290. Special Problems in Finance. 3 Units
Prerequisite(s): Classified graduate status or instructor approval
Term Typically Offered: Fall, Spring

Individual projects or directed reading for students qualified to carry on independent work.
Note: Enrollment requires approval of faculty member supervising work in addition to the approval of the Associate Dean for Graduate and External Programs; 6 units maximum; May be repeated for credit.
FIN 500. Culminating Experience Project in Finance and Ethics. 3 Units
Prerequisite(s): Advancement to candidacy; 12 units of any combination of the following courses: FIN 200, FIN 210, FIN 220, FIN 230, FIN 240, FIN 250, FIN 260, FIN 270 and FIN 280.
Term Typically Offered: Fall, Spring

Each student conducts an individual project to fulfill the culminating experience graduation requirement of the MS in Finance program as required in Title V of the CA Educational Code. The course also covers the ethical conduct and professional standards as outlined in CFA institute standards.

Note: May be repeated for credit

BS in Business Administration (Finance)

Units required for Major: 66
Total units required for BS: 120

Program Description

The Finance concentration emphasizes a conceptual and applied approach to the development of professional skills necessary for careers in such fields as banking, investments, corporate financial management, financial planning, insurance, and financial services. Consideration and emphasis is given to the role played by financial markets, financial intermediaries, nonfinancial corporations, governments, and individual investors in the global economy. The curriculum is designed to familiarize students with the financial management of business operations, the operation and management of financial institutions and markets, and the financial aspects of investing, portfolio management, and risk management.

Note: The use of the words “business administration” throughout this section refers to courses designated as Accountancy (ACCY), Accounting Information Systems (AIS), Decision Sciences (DS), Entrepreneurship (ENTR), Finance (FIN), General Management (GM), Human Resources/Organizational Behavior (HROB), International Business (IBUS), Management (MGMT), Management Information Science (MIS), Marketing (MKTG), and Operations Management (OPM).

Note: Students graduating with a Bachelor of Science in Business Administration (all concentrations) will not be subject to the University’s Foreign Language Graduation Requirement. Students who change major may be subject to the University’s Foreign Language Graduation Requirement.

Note: At least 15 units of upper division business administration courses must be taken in residence at (or under the auspices of) California State University, Sacramento. Of these 15 units, a minimum of nine units must be in upper division courses in the concentration.

Pre-Requisite Requirements

A student may not enroll in any of the Major program or Concentration courses until he/she has completed the Pre-Requisite lower division program with a grade of “C” or better in each course and an overall GPA of 2.0 (“C”), with the exception of MATH 24 which requires a minimum acceptable grade of “C” or better.

Students enrolled as Expressed Interest in Business may enroll in the following courses after completing the lower division pre-requisite requirements:

<table>

<td>The Management of Contemporary Organizations</td>
<td>3</td>
</tr>
</tbody>
</table>

Computer Literacy

All business majors must meet spreadsheet competency prior to taking 100-level business courses. This requires completing MIS 10, Spreadsheet Skills (or equivalent).

Minimum Grade Requirements

The purpose of this requirement is to assure that all business administration students attain the minimum level of competency in all their coursework required for the business administration degree.

The minimum acceptable grade for any undergraduate course required for the business administration degree is “C-” with the exception of MATH 24 which requires a minimum acceptable grade of “C” or better.

A minimum grade point average of 2.0 (“C”) is required in the Pre-Requisite courses, Major Core courses, and the Concentration courses presented for the degree.

### MBA (Finance)

Total units required for MBA: 33

#### Program Description

The MBA is intended to improve the participant’s capacity for effective decision making, to facilitate his/her professional growth and development for increasing managerial responsibility, and to broaden his/her knowledge and understanding of management.

MBA Finance concentration provides an advanced understanding of financial theory and techniques, with many opportunities for hands-on experience with state of the art financial tools for analysis. Students earn managerial and technical expertise in areas such as investment, financial advising, banking, asset and portfolio management, security analysis, underwriting, real estate, and risk management. The design of the concentration allows students to pursue several areas of interest while gaining a broad understanding of the complex financial field.

#### Admission Requirements

All applicants for post-baccalaureate degree programs in Business must have earned a baccalaureate degree from a regionally accredited four-year institution of higher learning or the equivalent from a foreign institution. Admission requirements are different for each of the CBA Graduate Programs. The specific admission requirements for each degree program are listed within the program descriptions under “Admission Information” on the following pages. The College of Business Administration reserves the rights to revise its admissions standards and to limit enrollment in its graduate degree programs.

Applicants who are approved for admission will receive a letter from the Office of Graduate Studies informing them that they have been admitted as a conditionally or fully classified graduate student.

The following represent minimum academic qualifications and admission criteria. As the College of Business Administration receives a large number of applications each cycle, it reserves the right to admit fewer applicants than those who meet the minimum criteria.

Title V of the California Educational Code requires that MBA candidates must have earned a minimum 2.5 cumulative GPA and an undergraduate degree from an accredited institution.

Unless a valid waiver is presented, applicants must also submit a valid admission test (GMAT or GRE) and/or English Language Proficiency exam scores.

#### Minimum Admission or Language Test Scores

- **GMAT**: 30% overall, 30% verbal, 30% quantitative; Scores valid for 5 years from test date. Test must be taken by the application deadline. Students are able to apply with pending scores, but must submit an official score report to be considered for admission.

- **GRE (General Test)**: 30% verbal, 30% quantitative; Scores valid for 5 years from test date. Test must be taken by the application deadline. Students are able to apply with pending scores, but must submit an official score report to be considered for admission (use institution code of 4671 ONLY when requesting official score reports be sent to Sacramento State; do not use department code).
TOEFL: Paper-based: 550; Internet-based: 80 (International Students only).

IELTS: 7 (International Students only).

Deadlines

See the CBA MBA Web site for current admission deadlines: https://www.csus.edu/college/business-administration/graduate/mba.html

Special Admission Process

Applicants not meeting all the admission criteria may be admitted to the program based on evidence of potential success in the program provided by the applicant. Such evidence may include, but is not limited to: the applicant’s maturity, motivation, employment history, managerial potential, letters of recommendation, personal statement, community activities, and other accomplishments that support the applicant’s potential to successfully complete the program. An applicant so considered and recommended for admission may be approved by the Graduate Dean or Dean’s designee.

Application Procedures

All prospective graduate students must file all of the following documents by the application deadline with both the CBA MBA Program Services and the Sacramento State Office of Graduate Studies (River Front Center 215) as noted below:

1. To Sacramento State, Office of Graduate Studies:
   a. Online Cal State Apply Graduate Application and Application Fee (you can pay this when you are filling out your online application).
   b. Copies of official transcripts from all colleges and universities attended. Sacramento State current students or graduates: only submit transcripts not previously submitted to the university or from institutions attended after graduation.

2. To the College of Business Administration, MBA Program Services Office, the following are required for a complete application:
   a. The MBA Supplementary Application.
   b. Supplemental Application Materials.
      i. Official GMAT or GRE scores;
      ii. Current resume;
      iii. 1-2 page statement of purpose;
      iv. Two letters of recommendation.
   c. Copies of official transcripts. Please request 2 copies of official transcripts from all colleges and universities you have attended. Send transcripts to both the MBA Program Services office and the Office of Graduate Studies. Sacramento State current students or graduates: only submit transcripts not previously submitted to the university or from institutions attended after graduation.

Note: Applications are not considered complete and will not be reviewed unless all application materials and transcripts have been received.

Email: mba@csus.edu

And to:
Office of Graduate Studies
Sacramento State
River Front Center, Room 215
6000 J Street
Sacramento, CA 95819-6112
Web site: https://www.csus.edu/graduate-studies/
Phone: (916) 278-6470
Email: grad_admissions@csus.edu

International Applicants

International students (F or J Visas) must apply through International Admissions (https://www.csus.edu/international-programs-global-engagement/application-admissions-process/). Do not fill out the general graduate studies application as it will slow down your application process. All materials, inclusive of TOEFL scores, must be turned in to the International Admissions Office. To ensure consideration, international students should submit their material, including GMAT/GRE and TOEFL test scores, to the International Admissions Office one month prior to the CBA MBA Program Services application filing deadline. For an application and details international students should visit The International Admissions Office Web site. (https://www.csus.edu/international-programs-global-engagement/application-admissions-process/)

Prerequisites

Prior to enrolling in the Foundation courses, students must be proficient in mathematics, statistics, and computer usage:

• Mathematics: at least one semester of calculus is strongly preferred;
• Statistics: an introductory course in probability and statistics; and
• Computer usage: ability to use common personal computer hardware and software, particularly word processing programs, spreadsheet programs, and internet browsers.

The faculty will assume that all MBA students have these proficiencies. A student may gain the necessary proficiencies in many ways: through coursework, review classes, self-study, or experience. No proficiency courses can count as credit towards program requirements.

Graduate Writing Assessment Requirement (GWAR)

The Graduate GWAR is a CSU wide requirement that should be completed by students before advancing to candidacy. The purpose of the GWAR is for students to demonstrate their proficiency at writing in an academic setting at a graduate-level.

Graduate students must successfully pass a Graduate Writing Intensive (GWI) course in their Graduate Program to complete the requirement.

Foundation Courses

The Foundation courses provide an academic background in the various disciplines of business. The MBA degree program is built upon this common background. Foundation courses should be taken after the student has attained the required entry proficiencies (prerequisites) and should be completed prior to taking program requirement courses.

A student who has a baccalaureate degree or a minor in Business Administration from an AACSB-INTERNATIONAL accredited university
may have completed all or most of the Foundation requirements. However, the student will be required to take certain Foundation courses if she/he:

1. has not previously completed the comparable undergraduate course(s) for academic credit from an AACSB-INTERNATIONAL accredited institution or from a high quality program that has a "national or international reputation;"
2. has earned less than an overall 3.0 ("B") grade point average (GPA) in the comparable undergraduate courses presented for waiver of required courses;
3. has received a "C" or lower grade in the comparable undergraduate course;
4. cannot demonstrate currency in these courses (7 year limit); or
5. has completed the bachelor's degree at a foreign institution.

Courses taken at AACSB-INTERNATIONAL accredited colleges of business will be accepted for transfer credit if the course is regarded as equivalent to the course for which credit is requested. Business Foundation courses and Core courses will not be accepted for transfer credit from programs that are not AACSB-INTERNATIONAL accredited unless taken at institutions that have national or international reputations of high quality programs.

Please visit the MBA Program website to download Foundation Course Waiver forms and petitions for equivalency for graduate, non-articulated courses. The CBA Academic Standards Committee will evaluate whether the institutions satisfy the requirement of "national or international reputations of high quality programs." Subsequently, faculty in the appropriate department will make the final determination for course equivalency, e.g., content, method of instruction, method of evaluating students, and/or course duration. To find out if your university is AACSB accredited go to www.AACSB.edu.

Master students who are registered in the last two Foundation courses must file an Application for Classification with the MBA Program Services at mps@csus.edu, to be able to enroll in the courses designated as Program Requirements. The student’s academic status will be reviewed to assure that he/she meets the necessary criteria to be accepted as a classified graduate student.

A GPA of at least 3.0 ("B") is required in all Foundation courses taken at Sacramento State, and program requirement courses presented for the degree.

The foundation courses are available after acceptance into one of the CBA Graduate Programs.

Note: To be completed after the student has demonstrated the required entry proficiencies and must be completed prior to taking Program Requirements in any of the Master's programs.

A graduate student may request a challenge for waiver of a College of Business Administration foundation or core course if it at least one of the following conditions is met:

- The student has taken an equivalent class elsewhere, subject to the GPA requirement in CBA academic policy. For core classes, the equivalent class must be at the graduate level; for the foundation classes, the equivalent class can be taken at the undergraduate level.
- The student has achieved appropriate professional or academic qualification.
- The student has appropriate professional work experience.

It is the responsibility of a student to provide sufficient documentation to support a waiver challenge application.

Total Units: 11

Minimum Units and Grade Requirement for the Degree

Units required for MBA: 33 (excluding foundation courses)

Minimum Cumulative GPA: 3.0. The minimum acceptable grade for any graduate business course is "C." No more than two (2) courses with a grade of "C" will be counted for satisfaction of graduate program requirements.

Advancement to Candidacy

A student’s program requirements are governed by the catalog in effect at the time one is accepted into and begins graduate school or by the catalog in effect at the time advancement to candidacy is approved.

Prior to enrolling in Culminating Requirements, a student must advance to candidacy. Initiation of advancement procedures is the responsibility of the student. The application to advance must be filed no later than the semester prior to enrollment in culminating experience requirement.

Eligibility to advance to candidacy requires satisfactory scholastic achievement, presentation of a plan of graduate study, and demonstration of writing proficiency. A classified graduate student in Business Administration may apply to the MBA Program Services at mps@csus.edu for advancement to candidacy for the Master’s degree after s/he has completed at least 12 units of the program requirements beyond the Foundation requirements. Students with a GPA deficiency or who have not fulfilled the Writing Placement for Graduate Students Requirement (WPG) cannot advance to candidacy.

Minor in Real Estate and Land Use Affairs

Units required for the Minor: 15, of which at least nine upper division units must be taken in residence.

Program Description

The minor in Real Estate and Land Use is designed to provide students in other fields with the opportunity to broaden their undergraduate education and to acquire specialized skills useful in a wide range of job opportunities in the real estate industry.

Total Units: 15

1 Business majors may substitute any approved upper-division business course. Substitution requires the approval of the Department Chair.

MS in Finance

The Master of Science in Finance program prepares students with a strong foundation of investment analysis and portfolio management skills, as well as practical knowledge needed in today's investment industry. The program incorporates significant portion of the curriculum of the Chartered Financial Analyst (CFA) curriculum, a curriculum widely accepted as the industry standard for investment professionals. The core

Units required for MSF: 30

**Admission Requirements**

All applicants for post-baccalaureate degree programs in Business must have earned a baccalaureate degree from a regionally accredited four-year institution of higher learning or the equivalent from a foreign institution.

Applicants have to submit the following information to be considered for admission:

- Official undergraduate transcript
- GMAT score
- 2.50 as the minimum overall undergraduate GPA required by the University
- Two letters of recommendation
- Statement of purpose for enrolling in the program
- Work experience is preferred but not required
- For international students, the University requires that applicants for graduate programs who have not completed a baccalaureate degree from a postsecondary educational institution where English is the principal language of instruction must achieve a minimum score on the Test of English as a Foreign Language (TOEFL) prior to admission to CSUS, which may be satisfied in one of the following ways: 550 on the paper-based TOEFL, or 80 on the internet-based TOEFL (IBT). Students may also demonstrate English language proficiency by possessing an overall band minimum score of 6.5 on the International English Language Testing System (IELTS).

Applicants' submitted information will be considered in its totality. Other than the minimum criteria as specified above, there are no other admission thresholds. One weak area can be compensated by another strong area in admission evaluation.

**Boot Camp Modules**

The program has six boot camp modules students have to finish before taking regular classes in the program. The six boot camp modules are:

- Basic Economics
- Basic Finance
- Quantitative Analyses I
- Quantitative Analyses II
- Financial Accounting
- Financial Modeling using Excel

**Minimum Units and Grade Requirement for Degree Completion**

Units required for MSF: 30 (excluding foundation courses)

Minimum Cumulative GPA: 3.0. The minimum acceptable grade for any graduate business course is “C.” No more than two (2) courses with a grade of “C” will be counted for satisfaction of graduate program requirements.

**Graduate Writing Assessment Requirement (GWAR)**

The Graduate GWAR is a CSU wide requirement that should be completed by students before advancing to candidacy. The purpose of the GWAR is for students to demonstrate their proficiency at writing in an academic setting at a graduate-level.

Graduate students must successfully pass a Graduate Writing Intensive (GWI) course in their Graduate Program to complete the requirement.

**Advancement to Candidacy**

A student’s program requirements are governed by the catalog in effect at the time one is accepted into and begins graduate school or by the catalog in effect at the time advancement to candidacy is approved.

Prior to enrolling in Culminating Requirements, a student must advance to candidacy. Initiation of advancement procedures is the responsibility of the student. The application to advance must be filed no later than the semester prior to enrollment in culminating experience requirement.

Eligibility to advance to candidacy requires satisfactory scholastic achievement, presentation of a plan of graduate study, and demonstration of writing proficiency. A classified graduate student in Business may apply to the Graduate Programs Office for advancement to candidacy for the Master’s degree after s/he has completed at least 12 units of the program requirements beyond the Foundation requirements. Students with a GPA deficiency or who have not fulfilled the Graduate Writing Assessment Requirement (GWAR) cannot advance to candidacy.

1 May be replaced with FIN 299 with the approval of a faculty advisor or Associate Dean for Graduate and External Programs.

**Information Systems and Business Analytics**

*College of Business*

**Program Description**

The College of Business (COB) offers a broad professional education in Business. The Bachelor of Science program offers students a choice of 9 concentrations by which they may focus their goals. Additionally, the COB’s Business Honors program provides an alternative path to its
most capable students to prepare them for management opportunities. All students must choose a concentration to complete their requirements for the baccalaureate degree. Students who are uncertain about which concentration to choose are encouraged to select the General Management concentration, as it is the most comprehensive. The structure of the General Management concentration also provides an overlap with the other concentrations, thus making changes in focus possible. Students who wish a more customized program may elect to complete the requirements for additional concentrations as well. For example, students may elect dual concentrations such as General Management and Management of Human Resources and Organizational Behavior. For information about program options, please visit our website at: Undergraduate Programs | Sacramento State (csus.edu) (https://www.csus.edu/college/business-administration/undergraduate/).

The College also offers Minors in Business Administration, Management of Human Resources and Organizational Behavior, Marketing, Real Estate and Land Use Affairs, and Risk Management and Insurance. A Minor in Business Administration is valuable to the student majoring in another area who wishes to supplement his/her knowledge with a business background.

DS 101. Introduction to Business Analytics. 3 Units
Prerequisite(s): MATH 24, STAT 1; must be a business pre-major, business major (any concentration), or business minor, and have at least sophomore standing
Term Typically Offered: Fall, Spring
Introductory course in business analytics that focuses on the application of analytics linking data to business decisions.

DS 105. Decision Analytics. 3 Units
Prerequisite(s): MATH 24, STAT 1
Term Typically Offered: Fall, Spring
Introduces students to decision models for the solution and analysis of business problems. Topics include mathematical programming, decision theory, analysis of waiting lines, simulation, and Markov processes.
MIS 1. Word Processing. 3 Units
Term Typically Offered: Fall, Spring
The course teaches Microsoft Office Word that establishes a student’s fundamental computer skills required to perform business related tasks. Topics include developing and refining a document; identifying and correcting errors; formatting, modifying and printing documents; working with pictures, graphics, tables and charts; creating reports, forms, references and mailings; securing content and sharing documents, exploring advanced document features and macros, etc.

MIS 2. Spreadsheets. 3 Units
Term Typically Offered: Fall, Spring
The course teaches Microsoft Office Excel that establishes a student’s fundamental computer skills required to perform business related tasks. Topics include creating and formatting a worksheet; summarizing and analyzing data; using decision making tools; working with logical, statistical, database and financial functions, sharing data with other applications, etc.

MIS 3. Presentation Graphics. 3 Units
Term Typically Offered: Fall, Spring
The course teaches Microsoft Power Point that establishes a student’s fundamental computer skills required to perform business related tasks. Topics include creating, refining and delivering presentations; working with graphics, tables and charts; inserting and enhancing pictures, shapes, sound and video; using templates, slide masters and text boxes, printing, securing and sharing presentations, etc.

MIS 4. Database Applications. 3 Units
Term Typically Offered: Fall, Spring
Use of database management systems (DBMS) to provide students with fundamental information retrieval skills required to perform business related tasks. Topics include basic DBMS operations, working with tables, queries, forms, reports and data analysis.

MIS 5. Advanced Business Analytics. 3 Units
Term Typically Offered: Fall, Spring
This course introduces students to more advanced topics in business analytics including Neural Networks, Deep Learning, Text Mining, Social Network Analytics, Computer Vision, and their applications in business.

MIS 10. Business Applications. 3 Units
Term Typically Offered: Fall, Spring
The course teaches the use of spreadsheets to establish a students’ fundamental computer skills required to perform business related tasks. Topics include basic spreadsheet operations, working with charts and graphics, application of formulas and spreadsheet presentation formatting.

MIS 101. Computer Information Systems for Management. 3 Units
Term Typically Offered: Fall, Spring
Explores the application of computers to the organizational environment with a management perspective. Topics may include transaction processing systems, management reporting, decision support systems, strategic planning, security, controls and acquisition of hardware, software and services. The interface between the information systems professional and the manager will be defined. Case studies and use of appropriate software packages may be included.

MIS 120. Advanced Object-Oriented Business Programming. 3 Units
Term Typically Offered: Fall, Spring
Advanced course in programming principles using an Object Oriented (OO) programming language. Topics will focus on object-oriented (OO) programming including the design and development of OO applications, object classes, inheritance, polymorphism and encapsulation, and graphical user interface (GUI) application development including contrasting event-driven and procedural programming. Assignments will focus on problem-solving in a business context.

MIS 122. Object-Oriented Programming for Business in Java. 3 Units
Term Typically Offered: Fall, Spring
Advanced course in programming principles using an Object Oriented (OO) programming language. Topics will focus on object-oriented (OO) programming including the design and development of OO applications, object classes, inheritance, polymorphism and encapsulation, and graphical user interface (GUI) application development including contrasting event-driven and procedural programming.
MIS 124. Web Development for Business Applications. 3 Units
Prerequisite(s): MIS 120.
Term Typically Offered: Fall, Spring
Examines the technologies and principles of modern Web development in the creation of Web-based business applications. Emphasis will be given to client-side and server-side technologies and include the topics of basic Web technologies, forms, database access, frameworks, and Web services. Topics are accompanied by design principles, tools, and techniques for Web application development.

MIS 125. Mobile Business Application Development. 3 Units
Prerequisite(s): MIS 15
Term Typically Offered: Fall, Spring
Provides an introduction to the art and practice of mobile business application development on the Android or iOS platform. Topics will include, but are not limited to, business opportunities, challenges, and cost presented by mobile devices, user-driven design, personas, screen layouts, and use case diagramming. Students will design and build a variety of business applications throughout the course to reinforce learning and to develop real world competency.

MIS 140. Business Data Communication. 3 Units
Prerequisite(s): Business majors only
Term Typically Offered: Fall, Spring
Examines the basic terminology, hardware/software components, and issues with the establishment, configuration, and management of data communication networks in and across organizations. Topics include wired and wireless local area networks, wide area networks, the internet, and cloud infrastructure.

MIS 150. Database Systems for Business. 3 Units
Term Typically Offered: Fall, Spring
Involves the study of generalized database management systems. The study will include logical data base models and physical base models based primarily on the relational and object-relational models. The student will create and manipulate a database utilizing an established database management system. The importance of data administration and other database related topics such as independence, integrity, privacy, query, backup, and recovery will be covered.

MIS 151. End-User Database Application Development for Business. 3 Units
Prerequisite(s): MIS 1, MIS 2, MIS 3 or approved equivalent.
Term Typically Offered: Fall, Spring
Introduction to end-user database application development in the business environment. Topics will focus on issues in the development of business database applications and include database concepts, organization, storage and retrieval of data, query and analysis with interactive software tools, informative and performance management reporting.
Note: Not open to MIS students.

MIS 160. Systems Development Life Cycle. 3 Units
Prerequisite(s): MIS 101 and MGMT 102
Term Typically Offered: Fall, Spring
Analyze, design, and develop business information systems to solve information needs of businesses and organizations. Topics include various systems analysis and design techniques, tools and methods for building new and/or integrated information systems.

MIS 161. Information Systems Practicum. 3 Units
Prerequisite(s): MIS 15, MIS 150, MIS 160, and Business major or minor.
Term Typically Offered: Fall, Spring
This course provides a comprehensive integration of MIS coursework through the completion of an information systems project. Topics include information systems development life cycle, project management, application development, database management, and security.

MIS 163. Business Process Engineering and ERP Configuration. 3 Units
Term Typically Offered: Fall, Spring
This course focuses on identifying and understanding business requirements, modeling business processes that incorporate the business requirements, and configuring the processes for their implementation in an enterprise resource planning (ERP) system. Students will gain insights to implementation issues and propose alternative solutions to overcome them. A project team environment further develops individual student’s communication and team skills.

MIS 170. Information Systems Security. 3 Units
Prerequisite(s): MIS 140
Term Typically Offered: Fall, Spring
This course provides a comprehensive study of IT security principles and of information systems. Emphasis will be placed on understanding the framework of IT security in enterprise IT infrastructure. Topics include information security concepts, security risks and vulnerabilities, common attacking techniques, technical and administrative countermeasures for modern enterprise IT infrastructure, such as encryption, authentication, access control, security policies and standards, and IT risk management and audit.

MIS 171. Enterprise Resource Planning Systems. 3 Units
Prerequisite(s): MIS 101
Term Typically Offered: Fall, Spring
Foundation, business functions, processes, data requirements, development, and management of ERP systems for sales, marketing, accounting, finance, production, supply chain and customer relationship management. Emphasis on re-engineering, integration, standardization, and methodologies of ERP systems.

MIS 173. Microcomputers for Managers. 3 Units
Term Typically Offered: Fall, Spring
For students who want to have more than the minimum required personal computer literacy knowledge. The topics covered are: hardware, system software, utility software, spreadsheet modeling, the Internet, and presentation graphics.
Note: Not open to MIS students.

MIS 181. Machine Learning Applications in Business. 3 Units
Prerequisite(s): DS 101 and MIS 150
Term Typically Offered: Fall, Spring
Applies modern machine learning applications in business to data analysis and problem solving. Topics are presented in the context of decision support and may include knowledge representation, neural networks, genetic algorithms, rule induction, fuzzy logic, case-based reasoning and intelligent agents.

MIS 182. Data Mining and Business Intelligence. 3 Units
Prerequisite(s): MIS 101
Term Typically Offered: Fall, Spring
This course provides an introduction to data mining, business intelligence, and big data analysis. Topics include data preparation, data mining techniques, visualization, and applications in various domains such as marketing, finance, and healthcare.

MIS 185. Web Intelligence and Business Analytics. 3 Units
Prerequisite(s): MIS 101
Term Typically Offered: Fall, Spring
This course focuses on the use of Web technologies and data mining techniques for business intelligence and analytics. Topics include Web applications, data visualization, and predictive analytics.

MIS 186. Business Intelligence and Big Data. 3 Units
Prerequisite(s): MIS 101
Term Typically Offered: Fall, Spring
This course examines the role of business intelligence and big data in decision making. Topics include data warehousing, data mining, and business intelligence tools.

MIS 187. Data Science and Business Analytics. 3 Units
Prerequisite(s): MIS 101
Term Typically Offered: Fall, Spring
This course provides an introduction to data science and business analytics. Topics include statistical methods, machine learning algorithms, and data visualization.
MIS 182. Topics in MIS. 3 Units
Prerequisite(s): MIS 150, MIS 160.
Term Typically Offered: Fall, Spring
Current topics will be presented regarding the technical, managerial, and organization considerations affecting computer-based information systems. Topics may include programming languages and techniques, emerging technologies, and MIS development and implementation issues. Readings, topical research, case presentations, and/or projects will be required.

MIS 183. Business Intelligence Applications. 3 Units
Prerequisite(s): Business major and minor
Term Typically Offered: Fall, Spring
Advanced information technologies that extract non-trivial, actionable, and novel knowledge from data to achieve strategic goals of organizations. Emphasis on multidimensional data modeling, online analytic processing, data warehouse, and data mining.

MIS 191. Culminating Experience. 1 Unit
Prerequisite(s): Completion of all coursework in minor.
Term Typically Offered: Fall, Spring
Students demonstrate their knowledge and apply their skill sets from the minor to a working project, and conduct an executive-level, management-oriented presentation.
Note: Students must be in their final semester of the minor’s program.
Credit/No Credit

MIS 194. Cooperative Education Experience in Management Information Systems. 6 - 12 Units
Prerequisite(s): MIS 160, minimum Sacramento State overall GPA of 2.75.
Term Typically Offered: Fall, Spring
In-depth supervised work experience in management information systems for the purpose of exposing the student to comprehensive MIS experience in business, governmental, or service agencies. Open to all upper division students, subject to permission of the MIS Area. Petitions can be obtained from the Student Affairs Office, Tahoe 2065.
Credit/No Credit

MIS 195. Internship in Management Information Systems. 3 - 6 Units
Prerequisite(s): MIS 160, minimum Sacramento State overall GPA of 2.75.
Term Typically Offered: Fall, Spring
Supervised work experience in management information systems for the purpose of increasing student understanding of the nature and scope of the operations of business, governmental, or service agencies. Supervision is provided by the faculty and the cooperating agencies. Open to upper division students, subject to permission of the MIS Area. Petitions can be obtained from the Student Affairs Office, Tahoe 2065.
Note: Open to declared business administration majors only.
Credit/No Credit

MIS 199. Special Problems in Management Information Systems. 1 - 3 Units
Term Typically Offered: Fall, Spring
Individual projects or directed reading for students qualified to carry on independent work.
Note: Admission requires approval of the instructor and the Associate Dean. Petitions may be obtained from the Undergraduate Business Advising Center, Tahoe 1030.
Credit/No Credit

MIS 210. Information Systems I. 3 Units
Term Typically Offered: Fall, Spring
Introduction to business information systems planning and systems development methodologies. Various methodologies are explored and information systems development project planning is emphasized.

MIS 211. Information Systems II. 3 Units
Term Typically Offered: Fall, Spring
Introduction to basic and object-oriented programming concepts, data structures for information representation, and database management systems.

MIS 232. Management Science. 3 Units
Term Typically Offered: Fall, Spring
Introduction to deterministic and stochastic models in operations research. Topics that may be included are: mathematical programming, inventory theory, analysis of waiting lines, Markov processes, game theory, decision theory and simulation. Various computer programs such as LINDO are used to assist in solution and analysis of management problems.
Note: Not open to students with credit for MIS 132.

MIS 240. Communications Technologies for Business. 3 Units
Prerequisite(s): Graduate MIS status or instructor permission.
Term Typically Offered: Fall, Spring
Focuses on the concepts, technology, applications, and management of data and voice communication with an emphasis on building, supporting, securing, and administering the requirements of network infrastructure and architecture to support businesses.
Note: May be taken twice for credit.

MIS 250. Data Management. 3 Units
Prerequisite(s): Graduate MIS status or instructor permission, and MIS 15 or equivalent.
Term Typically Offered: Fall, Spring
Focuses on database concepts, design and implementation in business. Topics include database design techniques, such as extended entity-relationship and unified modeling language, logical and physical data models for objection-relational database, object oriented database and relational databases, database implementation and administration issues, and the discussion of distributed database, web database, and database security.
Note: May be taken twice for credit.
MIS 251. Strategic Applications of Information Resources. 3 Units
Prerequisite(s): MSBA/MIS students: MIS 210 and 211, or their equivalents. MBA students: MBA 260 and instructor permission.
Term Typically Offered: Fall, Spring
Discussion of the techniques and methodologies to utilize information resource to improve an organization’s strategic performance measures. Topics include data warehouse, data mining, online analytical transaction processing, and multidimensional database.

MIS 260. Systems Design. 3 Units
Prerequisite(s): Graduate MIS status or instructor permission.
Term Typically Offered: Fall, Spring
Involves the study of various methods used to analyze and design a computer-based information systems and emphasizes object-oriented systems development (OOSD) techniques.
Note: May be taken twice for credit.

MIS 261. Information Technology Integration for the Enterprise. 3 Units
Prerequisite(s): MSBA/MIS students: MIS 260 or MIS 270; MBA students: MBA 260 or permission of instructor.
Term Typically Offered: Fall, Spring
IT presents many new opportunities at the enterprise level for the design and implementation of integrated organizational structures and business processes that better align the business to meeting its market demands and allow it to pursue new strategic relationships with other organizations. Enterprise IT primarily involves enterprise resource planning (ERP), supply chain management (SCM), knowledge management (KM), and customer relationship management (CRM) to support and coordinate business activities.
Note: May be taken twice for credit.

MIS 262. Business Project Management. 3 Units
Prerequisite(s): MSBA/MIS students: MIS 260; MBA students: MBA 260 or instructor permission.
Term Typically Offered: Fall, Spring
Examines various aspects of IT project management, including project selection involving feasibility, complexity, scalability and impact comparisons, project portfolio to direct the right resources to the right projects to ensure their timely completion, risk assessment, key performance measures, and others.
Note: May be taken twice for credit.

MIS 270. Information Technology Operations. 3 Units
Prerequisite(s): Graduate MIS status or instructor permission.
Term Typically Offered: Fall, Spring
Examines the management of information technology as a vital resource to an organization. IT can enable businesses to seize opportunities, gain competitive advantages and establish close relationships with other businesses and their customers. Thus, the business must effectively and efficiently manage and secure its IT resources.
Note: May be taken twice for credit.

MIS 272. Strategic Information Technology Planning. 3 Units
Prerequisite(s): MSBA/MIS students: MIS 270; MBA students: MBA 260 or instructor permission.
Term Typically Offered: Fall, Spring
Strategic IT planning defines the direction a business chooses for its IT resources. It encompasses a vision, mission, strategy, and objectives that closely align to the business’ vision, mission, strategy, and objectives. Planning involves examining how IT will support the achievement of the business’ goals and objectives, and how IT can open new opportunities to create new business goals.
Note: May be taken twice for credit.

MIS 279. Information Technology Leadership. 3 Units
Prerequisite(s): MSBA/MIS students: MIS 261 or MIS 262, MIS 272; MBA students: MBA 260 and instructor permission.
Term Typically Offered: Fall, Spring
Leadership plays an important role in determining a business’ success with IT. It requires recognizing and leveraging the businesses’ competencies and core values, and championing initiatives and projects that work in the best interest of the business and create value. Because IT opens opportunities and enables the organization, IT leadership extends to both market (external) and organizational (internal) environments.
Note: May be taken twice for credit.

MIS 280. Decision and Knowledge-Based Systems. 3 Units
Prerequisite(s): MIS 211 or equivalent.
Term Typically Offered: Fall, Spring
Organizational use of information generated from transaction processing systems, management information systems, and decision support systems. The uses of information by managers for planning, control, and decision-making purposes will be discussed. The types of information systems implemented in various kinds of organizations will be covered.

MIS 281. Topics in the Management of Information Systems. 3 Units
Prerequisite(s): Open to non-MSBA/MIS majors with credit in MBA 260 or equivalent; and to those who have completed MSBA/MIS Program Prerequisites.
Term Typically Offered: Fall, Spring
Current topics will be presented regarding the managerial, behavioral, and organizational considerations affecting computer-based information systems. Includes topics such as project selection and justification techniques, system controls, security and privacy issues, strategic planning, and use/data processing department relations. Readings, topical research, and case presentations will be required.

MIS 295. Internship in Management Information Systems. 3 Units
Prerequisite(s): Completion of two of the following: MIS 240, MIS 250, MIS 260, or MIS 270; minimum Sacramento State GPA of 3.0.
Term Typically Offered: Fall, Spring
Supervised work experience in management information systems for the purpose of increasing and enhancing student understanding of the nature and scope of the organization's operations of business, governmental, or service agencies. Supervision is provided by the faculty and the cooperating agencies.
Note: Open to second year MBA and MSBA/MIS students. Petitions to be obtained from Tahoe Hall 1037.
Credit/No Credit
## MIS 299. Special Problems in Management Information Systems.

**Prerequisite(s):** Classified graduate status.

**Term Typically Offered:** Fall, Spring

Individual projects or directed reading for students qualified to carry on independent work.

**Note:** Admission requires approval of faculty member under whom the individual work is to be conducted in addition to the approval of the Graduate Programs Office. Petitions to be obtained from Tahoe Hall 1035.

**Credit/No Credit**

**MIS 500A. Thesis.**

**Prerequisite(s):** Advanced to candidacy. Completion of MBA 244.

**Term Typically Offered:** Fall, Spring

Completion of a thesis approved for the Master’s degree.

**MIS 500B. Project.**

**Prerequisite(s):** Advanced to candidacy. Completion of MBA 244.

**Term Typically Offered:** Fall, Spring

Completion of a project approved for the Master’s degree.

**MIS 500C. Comprehensive Examination.**

**Prerequisite(s):** Advanced to candidacy; for comprehensive examination for MBA only (MGMT 500C, 1 unit), completion of program requirements (ACCY 240, MBA 230, MBA 240, MBA 241, MBA 270, MBA 280; for comprehensive examination for MSBA/MIS Degree, student must be in final semester of program.

**Term Typically Offered:** Fall, Spring

For MSBA/MIS.

## BS in Business Administration (Business Analytics)

**Units required for major:** 66

### Program Description

The Business Analytics concentration prepares students to connect data and models to substantive business problems so that better business decisions can be made. The program focuses on using quantitative approaches to help improve decision making and performance in business. To better understand business situations, students focus on collecting and analyzing data, drawing on computer technology, statistics, applied mathematics, and machine learning techniques. The program covers database, data visualization tools and techniques, statistical modeling, data mining, optimization, simulation, and their applications in business disciplines such as accounting, finance, human resources, insurance, management, and marketing.

### Pre-Requisite Requirements

A student may not enroll in any of the Major program or Concentration courses until he/she has completed the Pre-Requisite lower division program with a grade of "C-" or better in each course and an overall GPA of 2.0 ("C"), with the exception of MATH 24 which requires a minimum acceptable grade of "C" or better.

Students enrolled as Expressed Interest in Business may enroll in the following courses after completing the lower division pre-requisite requirements:

### Computer Literacy

All business majors must meet spreadsheet competency prior to taking 100-level business courses. This requires completing MIS 10, Spreadsheet Skills (or equivalent).

### Minimum Grade Requirements

The purpose of this requirement is to assure that all business administration students attain the minimum level of competency in all their coursework required for the business administration degree.

The minimum acceptable grade for any undergraduate course required for the business administration degree is "C-" with the exception of MATH 24 which requires a minimum acceptable grade of "C" or better.

A minimum grade point average of 2.0 ("C") is required in the Pre-Requisite courses, Major Core courses, and the Concentration courses presented for the degree.

BS in Business Administration (Management Information Systems)

Units required for Major: 69
Total units required for BS: 120

Program Description

The Management Information Systems concentration provides the analytical framework and the methodology to analyze, design, implement, and manage complex computer-based information/decision systems.

Information is recognized as a resource of the organization and is the common link binding the elements of the organization together. As organizations grow in size and complexity, the need for better and more timely information and for improved decision making techniques becomes critical for effective management.

Note: The use of the words “business administration” throughout this section refers to courses designated as Accountancy (ACCY), Accounting Information Systems (AIS), Decision Sciences (DS), Entrepreneurship...
Program Requirements

(ENTR), Finance (FIN), General Management (GM), Human Resources/ Organizational Behavior (HROB), International Business (IBUS), Management (MGMT), Management Information Science (MIS), Marketing (MKTG), and Operations Management (OPM).

Note: Students graduating with a Bachelor of Science in Business Administration (all concentrations) will not be subject to the University’s Foreign Language Graduation Requirement. Students who change major may be subject to the University’s Foreign Language Graduation Requirement.

Note: At least 15 units of upper division business administration courses must be taken in residence at (or under the auspices of) California State University, Sacramento. Of these 15 units, a minimum of nine units must be in upper division courses in the concentration.

Pre-Requisite Requirements

A student may not enroll in any of the Major program or Concentration courses until he/she has completed the Pre-Requisite lower division program with a grade of "C-" or better in each course and an overall GPA of 2.0 ("C"), with the exception of MATH 24 which requires a minimum acceptable grade of "C" or better.

Students enrolled as Expressed Interest in Business may enroll in the following courses after completing the lower division pre-requisite requirements:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>

**Total Units** 43

1 To help you complete your degree in a timely manner and not take more units than absolutely necessary, there are ways to use single courses to meet more than one requirement (overlap). For further information, please visit the General Education page (p. 1103).

**Note:** There is no way to list all possible overlaps so please consult with a professional advisor. The Academic Advising Center can be visited online (http://www.csus.edu/acad/), by phone (916) 278-1000, or email (advising@csus.edu).

2 If not satisfied before entering Sacramento State, it may be satisfied in General Education Area C2 (Humanities). "C- or better required."

The alternative methods for satisfying the Foreign Language Proficiency Requirement are described here: https://www.csus.edu/college/arts-letters/world-languages-literatures/foreign-language-proficiency-requirement.html

**Note:** Students with a declared major of BS in Business Administration (all concentrations) are exempt from the Foreign Language Graduation Requirement.

### MS in Business Analytics

The Master of Science in Business Analytics prepares students to connect data and models to substantive business problems so effective business decisions can be made. The program focuses on using quantitative approaches to help improve decision making and performance in business. To better understand business situations, students focus on collecting and analyzing data, drawing on computer technology, statistics, applied mathematics, and machine learning techniques. The program covers database concepts, data visualization tools and techniques, statistical modeling, data mining, optimization, simulation, and their applications in business disciplines such as accounting, finance, human resources, insurance, management, and marketing.

### Admission Requirements

Four-year bachelor’s degree or equivalent with a minimum GPA of 2.5

- Statement of Purpose
- Résumé
- Two letters of recommendation
- Undergraduate and/or graduate transcripts demonstrating satisfactory quantitative ability with 3.0 GPA and above for all quantitative courses including calculus, linear algebra, probability and statistics.
- GRE or GMAT score - A minimum percentile of 30% for overall, verbal, and quantitative scores is required from those with less than 5 years of significant professional work experience. Test scores are considered valid for 5 years from the test date.
- Foreign language test is required of all applicants who have earned their undergraduate degree from a country where the official language is not English. One of the following tests taken within the past two years are accepted: Official English Proficiency Score Report (Institution Code: 4671), TOEFL - Minimum of 80 iBT, IELTS - Minimum of 7.0 Band Score, PTE Academic Score - 65.

1 To help you complete your degree in a timely manner and not take more units than absolutely necessary, there are ways to use single courses to meet more than one requirement (overlap). For further information, please visit the General Education page (p. 1103).

**Note:** There is no way to list all possible overlaps so please consult with a professional advisor. The Academic Advising Center can be visited online (http://www.csus.edu/acad/), by phone (916) 278-1000, or email (advising@csus.edu).

2 Required in Major; also satisfies GE.
Deadlines
Please see the CBA Web site for current admission deadlines: http://www.cba.csus.edu/graduate/MSBA (http://www.cba.csus.edu/graduate/MSBA/)

Application Procedures
All prospective graduate students must file the following documents with both the CBA Graduate Business Advising Center (GBAC) and the Sacramento State Office of Graduate Studies (River Front Center, 215) as noted below:

1. To the College of Business Administration Graduate Business Advising Center, submit the following:
   1. One (1) set of official transcripts
   2. Results from GMAT or GRE scores
   3. Recommendation Form Waiver
   4. Two (2) Recommendation Forms
   5. Current Resume.
   Mail all of the above documents to the following address:
   Graduate Business Advising Center (GBAC)
   Tahoe Hall, 1037
   College of Business Administration
   CSU, Sacramento
   6000 J Street
   Sacramento, CA 95819-6088
   Phone: (916) 278-6772
   FAX: (916) 278-4233
   Email: cba-gbac@saclink.csus.edu

2. To the Sacramento State Office of Graduate Studies, submit the following:
   1. Online CSU Graduate Application: (https://www2.calstate.edu/apply/graduate (https://www2.calstate.edu/apply/graduate/))
   2. $70 Application Fee (paid on-line when you file your application).
   3. Mail one (1) Set of Official Transcripts to the following address:
      Office of Graduate Studies
      River Front Center, Room 215, MS 6112
      CSU, Sacramento
      6000 J Street
      Sacramento, CA 95819
      Phone: (916) 278-6470
      Website: www.csus.edu/graduate-studies (http://www.csus.edu/graduate-studies/) (Visit How to Apply section for more information)

Please Note: Applications are not considered complete and will not be reviewed unless you complete all the steps as directed. You must submit official transcripts from ALL colleges and universities previously attended. Submission of official transcripts and test scores must be received no later than the application deadline.

International Students
International students will not be issued an F-1 student visa for this program as it is a completely online program. You may apply but you will not be issued a student visa to come to the United States. All materials, inclusive of TOEFL scores, must be turned into the Office of Graduate Studies. To ensure consideration, international students should submit their material to the International Admissions Office one month prior to the above CBA application deadlines.

TOEFL
The University requires a minimum TOEFL score of 550 (paper based), 80 (internet based), or 213 (computer based).

To understand the guidelines for your country please go to http://www.csus.edu/gradstudies/futurestudents/applicantswithforeigndocuments/index.html (http://www.csus.edu/gradstudies/futurestudents/applicantswithforeigndocuments/). Click on your country for detailed information.

California State University, Sacramento interprets "where English was the principal language of instruction" to mean that a school is located in a country where English is the native language (the daily medium of communication of the majority of the residents is English), and that the student received academic instruction in all subjects (except foreign language courses) at all levels of education in English.

Minimum Units and Grade Requirements for the Degree
Total units required for MS/MSBA: 30 (excluding foundation courses) Minimum Cumulative GPA: 3.0. The minimum acceptable grade for any graduate business course is "C." No more than two (2) courses with a grade of "C" will be counted for satisfaction of graduate program requirements.

Advancement to Candidacy
A student’s program requirements are governed by the catalog in effect at the time one is accepted into and begins graduate school or by the catalog in effect at the time advancement to candidacy is approved.

Prior to enrolling in Culminating Requirements, a student must advance to candidacy. Initiation of advancement procedures is the responsibility of the student. The application to advance must be filed no later than the semester prior to enrollment in culminating experience requirement.

Eligibility to advance to candidacy requires satisfactory scholastic achievement, presentation of a plan of graduate study, and demonstration of writing proficiency. A classified graduate student in Business Administration may apply to the Graduate Business Advising Center (GBAC) for advancement to candidacy for the Master’s degree after s/he has completed at least 12 units of the program requirements beyond the Foundation requirements. Students with a GPA deficiency or who have not fulfilled the Writing Placement for Graduate Students Requirement (GWAR) cannot advance to candidacy.

Program Requirements
The program consists of ten 3-unit courses. These courses are carefully chosen based on curriculum requirements for an excellent business analytics program, market demand, and available faculty expertise.

Management and Organization

College of Business

Program Description
The College of Business (COB) offers a broad professional education in Business. The Bachelor of Science program offers students a choice of 9 concentrations by which they may focus their goals. Additionally, the COB’s Business Honors program provides an alternative path to its most capable students to prepare them for management opportunities. All students must choose a concentration to complete their requirements for the baccalaureate degree. Students who are uncertain about which concentration to choose are encouraged to select the General Management concentration, as it is the most comprehensive. The structure of the General Management concentration also provides an overlap with the other concentrations, thus making changes in focus possible. Students who wish a more customized program may elect to complete the requirements for additional concentrations as well. For example, students may elect dual concentrations such as General Management and Management of Human Resources and Organizational Behavior. For information about program options, please visit our website at: Undergraduate Programs | Sacramento State (csus.edu) (https://www.csus.edu/college/business-administration/undergraduate/).

The College also offers Minors in Business Administration, Management of Human Resources and Organizational Behavior, Marketing, Real Estate and Land Use Affairs, and Risk Management and Insurance. A Minor in Business Administration is valuable to the student majoring in another area who wishes to supplement his/her knowledge with a business background.

HROB 101. The Management of Contemporary Organizations.  3 Units
Term Typically Offered: Fall, Spring

Overview of managerial and organizational theory and practice, including a discussion of the contingencies that influence an organization's effectiveness and efficiency. Focus is on the decision making and problem-solving processes that affect managerial performance in planning, implementing, and controlling the work of contemporary organizations.

HROB 151. Management of Human Resources.  3 Units
Prerequisite(s): BSBA major (any concentration), Real Est and Land Use minor, HROB minor, or Public Health major
Term Typically Offered: Fall, Spring

Seminar covering contemporary processes and practices pertaining to the organization and management of personnel including employee selection, development, motivation, evaluation and remuneration, and union relations. Emphasis on the management of human resources in task oriented organizations. Instructional method provides for case method, laboratory exercises, and small group discussion.

HROB 152. Management Skills Seminar.  3 Units
Prerequisite(s): HROB 101; HROB 151 recommended.
Term Typically Offered: Fall, Spring

Development of management awareness of the dynamics of organizational behavior. Emphasis on case discussions, small group action and role playing for the acquisition of knowledge and skills for effective managing and changing in an organization.

HROB 153. Employment Law.  3 Units
Term Typically Offered: Fall, Spring

Provides students with an overview of the employment laws that impact and influence the workplace including laws regarding employment discrimination, disability discrimination and accommodation, employment leaves of absence, workplace harassment, employment torts and contracts, wage/hour regulations, employee privacy, intellectual property in the employment setting, and other emerging issues in employment law and personnel management. The impact of law on the management of human resources will be the focus of this class.

HROB 154. Strategic Human Resources Management.  3 Units
Prerequisite(s): HROB 151, HROB 152, HROB 153.
Term Typically Offered: Fall, Spring

The objective of this capstone course is to identify contemporary strategies to improve individual and organizational performance. Utilizes a strategic human resource management perspective and incorporates Human Resource Management and Organizational Behavior theories for practical implementation in organizations. Links such concepts as compensation, performance management, law, conflict management, communication, diversity, ethics, and managerial skill building towards preparing for the future of managing individuals in organizations.

HROB 155. Conflict Management and Negotiation.  3 Units
Term Typically Offered: Fall, Spring

Analyzes conflict in organizations, and strategies and processes for effective settlement or resolution of that conflict. Emphasis on the practical aspects of institutional and extra-institutional processes outside the conventional legal system. These dispute resolution methods include negotiation, mediation, arbitration and fair hearing. Students participate in a variety of exercises including simulated negotiations. Through these exercises students explore the basic theoretical models of bargaining and test and improve individual negotiation skills. Class format includes lecture, class discussion, simulation/role-play, expert guests and video demonstrations.

HROB 156. Current Trends and Emerging Issues.  3 Units
Term Typically Offered: Fall, Spring

Designed to provide an in-depth examination of current trends and emerging issues in human resources management and/or organizational behavior. Provides students the opportunity to better understand the latest people-related challenges organizations face. Instructional method provides for case method, group discussion, industry guest speakers, and classroom exercises.

HROB 157. Labor Relations.  3 Units
Term Typically Offered: Fall, Spring

Employer-employee relations in historical and contemporary contexts, with emphasis on the development of labor and management institutions and philosophies, public policies, collective bargaining, and contract administration in the private and public sectors.

HROB 158. Special Topics in Human Resource Management.  3 Units
Term Typically Offered: Fall, Spring

Designed to provide an in-depth examination of a current human resource management topic(s), from both a theoretical and practitioner perspective. Possible topics include, but are not limited to, outsourcing and staffing trends, merit-based performance and compensation plans, technology-based recruiting and selection practices, and innovations in training and career development. Instructional method provides for case method, group discussion, industry guest speakers, and classroom exercises.
HROB 159.  Special Topics in Organizational Behavior.  3 Units
Term Typically Offered: Fall, Spring

Designed to provide an in-depth examination of a current organizational behavior topic(s), from both a theoretical and practitioner perspective. Topics include, but are not limited to, family-work relations, stress and burnout, workplace aggression, leadership and motivation, organizational politics and culture, attitudes and change, and organizational learning. Instructional method provides for case method, group discussion, industry guest speakers, and classroom exercises.

HROB 194.  Cooperative Education Experiences in Human Resources Management.  6 - 12 Units
Prerequisite(s): HROB 151 and a minimum overall GPA of 2.5.
Term Typically Offered: Fall, Spring

In-depth supervised work experience in human resources management. This supervised work experience allows the student to become familiar with the practice of human resources management in businesses or governmental agencies.

Note: Open to all upper division students subject to permission of the Management Area. Petitions can be obtained from the Student Affairs Office, Tahoe 2065.

HROB 195.  Internship in Human Resources Management.  3 Units
Prerequisite(s): Minimum Sacramento State GPA of 2.5 required.
Term Typically Offered: Fall, Spring

Supervised work experience in business, governmental or service agencies for the purpose of increasing student understanding of the nature and scope of their operations. Supervision is provided by the faculty and the cooperating agencies. Open to upper division students, subject to permission of the Management Area. Petitions can be obtained from the Student Affairs Office, Tahoe 2065.

Note: Open to declared business administration majors only.

HROB 199.  Special Problems in Human Resources Management.  1 - 3 Units
Term Typically Offered: Fall, Spring

Individual projects or directed reading for students qualified to carry on independent work. Admission requires approval of the instructor and the Associate Dean. Petitions can be obtained from the Undergraduate Business Advising Center, Tahoe 1030.

Credit/No Credit

MGMT 10.  Introduction to Business Law.  3 Units
Term Typically Offered: Fall, Spring

Study of business law for the future business professional. Introduces students to basic business problems that have legal consequences. Encourages the identification of ethical concerns along with the ability to anticipate potential legal problems with the goal of preventing them. Covers introduction to the legal system; court procedures; contracts and sales; business organizations; real and personal property; labor and employment law; product liability, and the government regulation of business.

Provides an overview of the various basic functions of business and how they interface. Topics will include accounting, finance, marketing, human resources management, management information systems, operations management, real estate, and international business.

MGMT 21.  First Year Seminar: Becoming an Educated Person.  3 Units
Term Typically Offered: Fall, Spring

Introduction to the meaning of higher education, resources of the University, and skills for lifelong learning. Designed to help students develop academic success strategies and to improve information literacy, intercultural competence, and integrative thinking. Provides students with the opportunity to interact with fellow students and seminar faculty to build a community of academic and personal support.

MGMT 101.  Legal Environment of Business.  3 Units
Prerequisite(s): Must be a Business pre-major, Business major (any concentration), a business minor, a Construction Mgmt major, a Mech Engr Tech major, or a Music (Music Mgmt) major to enroll in this course.
Term Typically Offered: Fall, Spring

Study of business law for the business professional. Aside from investigating substantive law, the course stresses critical thinking and analytical evaluation of contemporary business problems. Encourages the identification of ethical concerns along with the ability to anticipate potential legal problems with the goal of preventing them. Covers introduction to the legal system; court procedures; contracts and sales; business organizations; real and personal property; labor and employment law; product liability, and the government regulation of business. OBE 16 or the equivalent is recommended.

MGMT 102.  Business Communications.  3 Units
Prerequisite(s): Completion of Area A in General Education and ENGL 20. Recommend COMS 2 and COMS 4.
Term Typically Offered: Fall, Spring

Provides basic concepts for understanding and practice of communication in the changing world of business for managers and professionals. It examines the use of language and conversations in business settings and their role in coordinating actions, resolving breakdowns in work performance, and providing customer satisfaction. Topics include: Practice in professional styles of business writing and formats, preparation of a formal report, development of competence in business conversation skills (written, electronic, and oral), and other selected topics. International, technical, and linguistic developments are integrated into the various applications of business communication.
Program with a grade of "C-" or better in each course and an overall GPA of 2.0 ("C"), with the exception of MATH 24 which requires a minimum acceptable grade of "C" or better.

Students enrolled as Expressed Interest in Business may enroll in the following courses after completing the lower division pre-requisite requirements:

### Computer Literacy

All business majors must meet spreadsheet competency prior to taking upper division courses in the major. This requires completing MIS 10 (or equivalent).

### Minimum Grade Requirements

The purpose of this requirement is to assure that all business administration students attain the minimum level of competency in all their coursework required for the business administration degree.

The minimum acceptable grade for any undergraduate course required for the business administration degree is "C-" with the exception of MATH 24 which requires a minimum acceptable grade of "C" or better.

A minimum grade point average of 2.0 ("C") is required in the Pre-Requisite courses, Major Core courses, and the Concentration courses presented for the degree.

### Pre-Requisite Requirements

A student may not enroll in any of the Major program or Concentration courses until he/she has completed the Pre-Requisite lower division program with a grade of "C-" or better in each course and an overall GPA.
### General Education Requirements

#### Area A: Basic Subjects (9 Units)
- **A1** - Oral Communication 3
- **A2** - Written Communication 3
- **A3** - Critical Thinking 3

#### Area B: Physical Universe and Its Life Forms (10 Units)
- **B1** - Physical Science 3
- **B2** - Life Forms 3
- **B3** - Lab (Note: Lab experience to be taken with one of the following: B1, B2 or B5) 1
- **B4** - Math Concepts 2 0
- **B5** - Additional Course (Any B to reach 12 units) - Take upper-division course to complete Area & upper division requirements. 3

#### Area C: Arts and Humanities (12 Units)
- **C1** - Arts 3

### Graduation Requirements

#### Graduation Requirements (required by CSU) (6-9 Units)
- **American Institutions: U.S. History** 3
- **American Institutions: U.S. Constitution & CA Government** 3
- **Writing Intensive (WI)** 2 0

#### Graduation Requirements (required by Sacramento State) (6 Units)
- **English Composition II** 3
- **Race and Ethnicity in American Society (RE)** 3
- **Foreign Language Proficiency Requirement** 3 0

---

1 To help you complete your degree in a timely manner and not take more units than absolutely necessary, there are ways to use single courses to meet more than one requirement (overlap). For further information, please visit the General Education page (p. 1103).

2 Required in Major; also satisfies GE.

3 Department offers students a “select from the following” option:
   - If student chooses to take MGMT 117, they will meet the Writing Intensive (WI) graduation requirement.

---

### Management of Human Resources and Organizational Behavior (HROB) Concentration (18 units)

#### Required Courses (12 Units)
- **HROB 151** - Management of Human Resources 3
- **HROB 152** - Management Skills Seminar 3
- **HROB 153** - Employment Law 3
- **HROB 154** - Strategic Human Resources Management 3

#### Electives (6 Units)
Select two of the following: 6
- **HROB 155** - Conflict Management and Negotiation
- **HROB 156** - Current Trends and Emerging Issues
- **HROB 157** - Labor Relations
- **HROB 158** - Special Topics in Human Resource Management
- **HROB 159** - Special Topics in Organizational Behavior
- **MGMT 117** - Business, Ethics and Society 2

Marketing and Supply Chain Management

College of Business

Program Description

The College of Business (COB) offers a broad professional education in Business. The Bachelor of Science program offers students a choice of 9 concentrations by which they may focus their goals. Additionally, the COB’s Business Honors program provides an alternative path to its most capable students to prepare them for management opportunities. All students must choose a concentration to complete their requirements for the baccalaureate degree. Students who are uncertain about which concentration to choose are encouraged to select the General Management concentration, as it is the most comprehensive. The structure of the General Management concentration also provides an overlap with the other concentrations, thus making changes in focus possible. Students who wish a more customized program may elect to complete the requirements for additional concentrations as well. For example, students may elect dual concentrations such as General Management and Management of Human Resources and Organizational Behavior. For information about program options, please visit our website at: Undergraduate Programs | Sacramento State (csus.edu) (https://www.csus.edu/college/business-administration/undergraduate/).

The College also offers Minors in Business Administration, Management of Human Resources and Organizational Behavior, Marketing, Real Estate and Land Use Affairs, and Risk Management and Insurance. A Minor in Business Administration is valuable to the student majoring in another area who wishes to supplement his/her knowledge with a business background.

Full PDF2023-2024 423
MKTG 101. Principles Of Marketing. 3 Units
Prerequisite(s): You must be a Business major (any concentration), a business minor or in one of the following majors: Coms/Pub Relations, CM, MET, FACS (Apparel Mktg/Design), FACS (Cons Sci), FASH, GPHD, INTD (Mktg), Rec & Park Mgmt, Photography to enroll in this course.
Term Typically Offered: Fall, Spring

The purpose of this course is to help students develop a working knowledge of marketing. Students will learn about the role marketing plays in an organization, as well as how to plan, implement and evaluate marketing activities. This course builds a foundation for further study in marketing and related fields.

MKTG 115. Marketing Analytics. 3 Units
Prerequisite(s): MKTG 101; and either DS 101 or MKTG 121; or instructor permission
Term Typically Offered: Fall, Spring

The course covers current developments in marketing analytics. Topics include methodologies for market forecasting, estimating market size, and demand; evaluating marketing ROI and customer life time value; modeling of segmentation, positioning, competitive analysis, conjoint analysis, distribution channel analytics, and sales analytics. Students will also learn the latest datamining tools to collect, analyze, and visualize data for decision making and communicating to senior executives.

MKTG 121. Marketing Research and Information. 3 Units
Prerequisite(s): MKTG 101.
Corequisite(s): DS 101
Term Typically Offered: Fall, Spring

Examines the acquisition of information for marketing management decision making, including methods of collection and analysis applicable to secondary and primary data, as this process relates to the management information system. Seminar.

MKTG 122. Buyer Behavior. 3 Units
Prerequisite(s): MKTG 101.
Term Typically Offered: Fall, Spring

Understanding buying as a process in order to develop more effective solutions to marketing problems; an interdisciplinary approach drawing on insights from the behavioral sciences; applications to practical marketing situations. Seminar.

MKTG 123. Public Relations and Ethics in Business. 3 Units
Term Typically Offered: Fall, Spring

Managerial function of evaluating public attitudes toward business firms and other organizations and institutions, and of adjusting policies and executing programs to earn public acceptance and support. Media and method of communicating with the various publics, and problems in responsible leadership.

MKTG 124. Retail Management. 3 Units
Prerequisite(s): MKTG 101.
Term Typically Offered: Fall, Spring

Development, trends, and institutions of retailing; organization and management of retail establishments; principles and policies of retail store operations including location and layout, planning and control of budgets, personnel, pricing and customer services.

MKTG 125. Advertising. 3 Units
Prerequisite(s): MKTG 101.
Term Typically Offered: Fall, Spring

Examination of advertising as a marketing communications tool in profit and nonprofit organizations. Emphasis will be placed on creative methods, alternative media, measurements of effectiveness, and coordination with other aspects of the marketing program through class discussion and written projects. Seminar.
MKTG 126. Salesmanship. 3 Units
Term Typically Offered: Fall, Spring
Principles of the sales process including prospecting, structuring a sales presentation, handling objections, closing and customer relationship management. Application of sales techniques in product and service situations, integration of technology as a sales tool. Includes lectures, role playing, and practice in sales presentations.

MKTG 127. Sales Management. 3 Units
Prerequisite(s): MKTG 101.
Term Typically Offered: Fall, Spring
Individual problems of manufacturer or wholesaler in merchandising; intensive development of the "selling" function of marketing; duties of the sales manager.

MKTG 129. Marketing Management. 3 Units
Prerequisite(s): MKTG 101 and senior status.
Term Typically Offered: Fall, Spring
Application of marketing principles to the solution of a wide variety of problems and cases including target markets, product selection, channels of distribution, promotion and pricing.
Note: It is a capstone course. It is recommended that students take MKTG 121 and MKTG 122 prior to taking MKTG 129. Seminar.

MKTG 130. Digital Marketing. 3 Units
Prerequisite(s): MKTG 101 and Business majors or Marketing minors only.
Term Typically Offered: Fall, Spring
The purpose of this course is to help students learn and apply emerging marketing techniques to become efficient and effective marketers in the 21st century. Topics covered center on effective marketing in an online environment to help students refine their strategic marketing skills, ability to work effectively in diverse teams, and understanding of the local marketing environment.

MKTG 140. Sports Marketing. 3 Units
Prerequisite(s): MKTG 101
Term Typically Offered: Fall, Spring
The purpose of this course is to help students to integrate principles of marketing and sports industry management. It examines the marketing of sports, teams, athletes, sport arenas, as well as the use of sports related marketing tools (such as sponsorships, celebrity athlete endorsements, promotional licensing) for promoting non-sport consumer and industrial products.

MKTG 160. Principles of Quality Management. 3 Units
Term Typically Offered: Fall, Spring
Study of the major principles of quality management: customer focus, continuous improvement, employee involvement, and process improvement. Use of case studies and a project to gain knowledge in implementing quality management principles. Seminar.

MKTG 181. Supply Chain Logistics Management. 3 Units
Prerequisite(s): OPM 101.
Term Typically Offered: Fall, Spring
Delivery of enhanced customer and economic value through synchronized management of the flow of physical goods and associated information from sourcing through consumption. Examines the management of those activities that facilitate the movement, control and direction of goods and services to create time, place, form and ownership utilities in the global market. Topics include transportation, warehousing, information systems, sourcing, strategic alliances, modeling, purchasing and international operations.

MKTG 186. Advanced Operations Planning and Control. 3 Units
Prerequisite(s): OPM 101.
Term Typically Offered: Fall, Spring
Focuses on effective operations strategies for companies that operate in a dynamic business environment, with an emphasis on in-depth treatments of the decision situations facing managers in charge of related to the planning and control of the flow of goods and services in supply chain systems.

MKTG 188. Supply Chain Modeling and Analysis. 3 Units
Prerequisite(s): OPM 101.
Term Typically Offered: Fall, Spring
Covers modeling and analytics for designing, managing and improving supply chain systems in order to achieve competitive advantages: cost, quality, service, flexibility, adaptability, and sustainability which support business level strategies of cost leadership and differentiation.

MKTG 190. Multinational Marketing. 3 Units
Prerequisite(s): MKTG 101 or instructor permission.
Term Typically Offered: Fall, Spring, Summer
Environmental factors affecting international trade, such as culture and business customs, political factors and constraints, economic development and legal differences, are integrated with the marketing management functions of market potential, analysis marketing research, international organization, channels and distribution, sales promotion, prices, credit, and financing.

MKTG 195. Internship in Marketing. 3 Units
Prerequisite(s): Minimum Sacramento State GPA of 2.5.
Term Typically Offered: Fall, Spring
Supervised work experience in business, governmental or service agencies for the purpose of increasing student understanding of the nature and scope of their operations. Supervision is provided by the faculty and the cooperating agencies.
Note: Open to upper division students, subject to permission of the Marketing Area. Petitions can be obtained from the Student Affairs Office, Tahoe 2065. Open to declared business administration majors only.
Credit/No Credit

MKTG 199. Special Problems in Marketing. 1 - 3 Units
Term Typically Offered: Fall, Spring
Individual projects or directed reading for students qualified to carry on independent work.
Note: Admission requires approval of the instructor and the Associate Dean. Petitions can be obtained from the Undergraduate Business Advising Center, Tahoe 1030.
Credit/No Credit
Note: Students graduating with a Bachelor of Science in Business Administration (all concentrations) will not be subject to the University's Foreign Language Graduation Requirement. Students who change major may be subject to the University's Foreign Language Graduation Requirement.

Note: At least 15 units of upper division business administration courses must be taken in residence at (or under the auspices of) California State University, Sacramento. Of these 15 units, a minimum of nine units must be in upper division courses in the concentration.

**Pre-Requisite Requirements**

A student may not enroll in any of the Major program or Concentration courses until he/she has completed the Pre-Requisite lower division program with a grade of "C-" or better in each course and an overall GPA of 2.0 ("C"), with the exception of MATH 24 which requires a minimum acceptable grade of "C" or better.

Students enrolled as Expressed Interest in Business may enroll in the following courses after completing the lower division pre-requisite requirements:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>MIS 15</td>
<td>Introduction to Business Programming (for MIS majors only)</td>
<td>3</td>

<tr>
<td>MGMT 102</td>
<td>Business Communications</td>
<td>3</td>
</tr>
<tr>
<td>HROB 101</td>
<td>The Management of Contemporary Organizations</td>
<td>3</td>
</tr>
</tbody>
</table>

**Computer Literacy**

All business majors must meet spreadsheet competency prior to taking upper division courses in the major. This requires completing MIS 10 or equivalent.

**Minimum Grade Requirements**

The purpose of this requirement is to assure that all business administration students attain the minimum level of competency in all their coursework required for the business administration degree.

The minimum acceptable grade for any undergraduate course required for the business administration degree is "C-" with the exception of MATH 24 which requires a minimum acceptable grade of "C" or better.

A minimum grade point average of 2.0 ("C") is required in the Pre-Requisite courses, Major Core courses, and the Concentration courses presented for the degree.

2 Required in Major; also satisfies GE.

BS in Business Administration
(Supply Chain Management)

Units required for Major: 66
Total units required for BS: 120

Program Description
The Supply Chain Management (SCM) Concentration is concerned
with organizations, methods, and processes employed in managing
and improving supply chain and operations systems which provide
goods or services to fulfill customer needs and wants in both local and
global markets in a flexible, adaptable, quality, reliable, cost effective,
environmentally sustainable, ethically sound and socially responsible
manner. Students who select the SCM Concentration are provided with
a well-balanced program of qualitative and quantitative subject matter
and should be able to assume first-line staff or management positions
in supply chain and operations systems for manufacturing, service, or
government organizations.

Note: The use of the words “business administration” throughout this
section refers to courses designated as Accountancy (ACCY), Accounting
Information Systems (AIS), Decision Sciences (DS), Entrepreneurship
(ENTR), Finance (FIN), General Management (GM), Human Resources/
Organizational Behavior (HROB), International Business (IBUS),
Management (MGMT), Management Information Science (MIS),
Marketing (MKTG), and Operations Management (OPM).

Note: Students graduating with a Bachelor of Science in Business
Administration (all concentrations) will not be subject to the University's
Foreign Language Graduation Requirement. Students who change
major may be subject to the University's Foreign Language Graduation
Requirement.

Note: At least 15 units of upper division business administration courses
must be taken in residence at (or under the auspices of) California State
University, Sacramento. Of these 15 units, a minimum of nine units must
be in upper division courses in the concentration.

Pre-Requisite Requirements
A student may not enroll in any of the Major program or Concentration
courses until he/she has completed the Pre-Requisite lower division
program with a grade of "C-" or better in each course and an overall GPA
of 2.0 ("C"), with the exception of MATH 24 which requires a minimum
acceptable grade of "C" or better.

Students enrolled as Expressed Interest in Business may enroll in the
following courses after completing the lower division pre-requisite
requirements:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>DS 101</td>
<td>Introduction to Business Analytics</td>
<td>3</td>
</tr>
<tr>
<td>MGMT 102</td>
<td>Business Communications</td>
<td>3</td>
</tr>
<tr>
<td>HROB 101</td>
<td>The Management of Contemporary Organizations</td>
<td>3</td>
</tr>
</tbody>
</table>

Computer Literacy
All business majors must meet spreadsheet competency prior to taking
upper division. This requires completing MIS 10 (or equivalent).

Minimum Grade Requirement
The purpose of this requirement is to assure that all business
administration students attain the minimum level of competency in all
their coursework required for the business administration degree.

The minimum acceptable grade for any undergraduate course required
for the business administration degree is "C-" with the exception of MATH
24 which requires a minimum acceptable grade of "C" or better.

A minimum grade point average of 2.0 ("C") is required in the Pre-
Requisite courses, Major Core courses, and the Concentration courses
presented for the degree.

Total Units: 43
1 To help you complete your degree in a timely manner and not take more units than absolutely necessary, there are ways to use single courses to meet more than one requirement (overlap). For further information, please visit the General Education page (p. 1103).

Note: There is no way to list all possible overlaps so please consult with a professional advisor. The Academic Advising Center can be visited online (http://www.csus.edu/acad/), by phone (916) 278-1000, or email (advising@csus.edu).

2 Required in Major; also satisfies GE.

### Graduation Requirements

To help you complete your degree in a timely manner and not take more units than absolutely necessary, there are ways to use single courses to meet more than one requirement (overlap). For further information, please visit the General Education page (p. 1103).

Note: There is no way to list all possible overlaps so please consult with a professional advisor. The Academic Advising Center can be visited online (http://www.csus.edu/acad/), by phone (916) 278-1000, or email (advising@csus.edu).

If not satisfied before entering Sacramento State, it may be satisfied in General Education Area C2 (Humanities). "C- or better required."

The alternative methods for satisfying the Foreign Language Proficiency Requirement are described here: https://www.csus.edu/college/arts-letters/world-languages-literatures/foreign-language-requirement.html

Note: Students with a declared major of BS in Business Administration (all concentrations) are exempt from the Foreign Language Graduation Requirement.

### Strategy and Entrepreneurship

#### College of Business

#### Program Description

The College of Business (COB) offers a broad professional education in Business. The Bachelor of Science program offers students a choice of 9 concentrations by which they may focus their goals. Additionally, the COB’s Business Honors program provides an alternative path to its most capable students to prepare them for management opportunities. All students must choose a concentration to complete their requirements for the baccalaureate degree. Students who are uncertain about which concentration to choose are encouraged to select the General Management concentration, as it is the most comprehensive. The structure of the General Management concentration also provides an overlap with the other concentrations, thus making changes in focus possible. Students who wish a more customized program may elect to complete the requirements for additional concentrations as well. For example, students may elect dual concentrations such as General Management and Management of Human Resources and Organizational Behavior. For information about program options, please visit our website at: Undergraduate Programs | Sacramento State (csus.edu) (https://www.csus.edu/college/business-administration/undergraduate/).

The College also offers Minors in Business, Management of Human Resources and Organizational Behavior, Marketing, Real Estate and Land Use Affairs, and Risk Management and Insurance. A Minor in Business is valuable to the student majoring in another area who wishes to supplement his/her knowledge with a business background.

### Degree Programs

- B (p. 426) in Business (Entrepreneurship) (p. 432)
- BS in Business (General Management) (p. 434)
- BS in Business (International Business) (p. 436)
- MBA (Entrepreneurship and Global Business) (p. 439)

### Career Possibilities

- Business Development Manager
- Family Business Owner/Manager
- Financial Services Advisor
- Franchised Business Owner/Manager
- Insurance Agency Owner/Manager
- Management Analyst
- Management Consultant
- New Venture Founder/Manager
- Non-Profit Organization

### Minor in Marketing

Units required for the Minor: 15, of which at least nine upper division units must be taken in residence.

#### Program Description

The minor in Marketing is designed for students that are interested in learning how marketing concepts are applied in profit and nonprofit organizations and government agencies. Majors in Communication Studies, Recreation and Leisure Studies, Liberal Arts, Graphic Design and Fashion Merchandising may find the minor in Marketing is helpful in achieving their career objectives.

Total Units: 15
ENTR 185. Venture Growth Strategies. 3 Units
Prerequisite(s): Upper-division standing; ENTR 187 or ENTR 189.
Term Typically Offered: Fall, Spring
Focuses on the opportunities and challenges involved in the management of a business venture and its growth opportunities. Growth is the ultimate resource constrainer, stretching all the resources of a company to the limit and often beyond. Develops a venture spanning approach that examines the business venture and the challenges that tasks venture management to the limit. Provides students with a series of frameworks, analytical skills and techniques, heuristics, and decision-making tools that can be used in growing entrepreneurial businesses. Note: Only students with an Entrepreneurship Concentration will be admitted.

ENTR 187. Entrepreneurship. 3 Units
Term Typically Offered: Fall, Spring
Objective is to lead students through all steps necessary in starting a business: analyzing personal and business goals, researching the market, developing a marketing plan, determining land, building, equipment, supplies, inventory, people needed, determining cash flow and pro forma financial statements, and money needed. The output of all this will be a professional business plan and financial package ready to submit to prospective investors.

ENTR 189. Corporate Entrepreneurship. 3 Units
Prerequisite(s): Upper-division standing.
Term Typically Offered: Fall, Spring
Offers a multidisciplinary framework for studying and developing corporate entrepreneurship. Covers the climate and culture of an entrepreneurial organization, strategies for developing new business ventures within an organization, and strategies for transforming firms toward a more entrepreneurially driven organization. As a result, students will increase their understanding of environment, processes and strategies that will create value and build competence through entrepreneurial activities within organizations.

GM 105. Strategic Management. 3 Units
Prerequisite(s): Completion of all other upper-division core courses, except MIS 101.
Term Typically Offered: Fall, Spring, Summer
This capstone course focuses on the integration of functional areas of a business and requires students to determine strategies/policies at the general-management level. Students address problems and issues faced by companies from a general management perspective which integrates accounting, financial, marketing, human resources, and operations in relation to the environment within a framework of balance between profit or cost-effectiveness and social responsibility.
GM 170. Fundamentals of Business Strategy. 3 Units
Prerequisite(s): HROB 101, MKTG 101, FIN 101, and OPM 101.
Term Typically Offered: Fall, Spring
Basics of business-level strategy and how they are applied in modern organizations. Underlying primary principles, theories and practices are examined and discussed. Cases presenting actual, real-world situations will be analyzed to derive solutions to the business-level opportunities and problems facing strategic managers.
Note: General Management students must complete all functional core courses before taking GM 170.

GM 194. Cooperative Education Experience in Management. 6 - 12 Units
Prerequisite(s): Minimum overall GPA of 2.5.
Term Typically Offered: Fall, Spring
In-depth supervised work experience in management for the purpose of exposing the student to comprehensive management experience in business, governmental, or service agencies.
Note: Open to all upper division students, subject to permission of the Management Area. Petitions can be obtained from the Student Affairs Office, Tahoe 2065.

Credit/No Credit

GM 195. Internship in Strategic Management. 3 Units
Prerequisite(s): Minimum Sacramento State GPA of 2.5.
Term Typically Offered: Fall, Spring
Supervised work experience in business, governmental or service agencies for the purpose of increasing student understanding of the nature and scope of their operations. Supervision is provided by the faculty and the cooperating agencies.
Note: Open to upper division students, subject to permission of the Management Area. Petitions can be obtained from the Student Affairs Office, Tahoe 2065. Open to declared business administration majors only. Petitions can be obtained from the Student Affairs Office, Tahoe 2065.

Credit/No Credit

GM 199. Special Problems in Strategic Management. 1 - 3 Units
Term Typically Offered: Fall, Spring
Individual projects or directed reading for students qualified to carry on independent work.
Note: Admission requires approval of the instructor and the Associate Dean. Petitions can be obtained from the Undergraduate Business Advising Center, Tahoe 1030.

Credit/No Credit

IBUS 180. Sustainability Business in Global Economy. 3 Units
Term Typically Offered: Fall, Spring
Introduces students to the emerging field of sustainability in business and the growing focus on the social, environmental, and economic performance of businesses in global economy. The course presents scientific, moral, and business cases for adopting sustainability.

IBUS 190. International Business. 3 Units
Term Typically Offered: Fall, Spring, Summer
Analyzes international business: foreign markets; export-import trade; licensing agreements; foreign exchange problems; role of the multinational firm; intergovernmental trade agreements; balance of payments; decision making in foreign environments.

IBUS 195. Internship in International Business. 3 Units
Prerequisite(s): Minimum Sacramento State GPA of 2.5.
Term Typically Offered: Fall, Spring
Supervised work experience in business, governmental or service agencies for the purpose of increasing student understanding of the nature and scope of their operations. Supervision is provided by the faculty and the cooperating agencies.
Note: Open to upper division students, subject to permission of the Management Area. Open to declared business administration majors only. Petitions can be obtained from the Student Affairs Office, Tahoe 2065.

Credit/No Credit

IBUS 199. Special Problems in International Business. 1 - 3 Units
Term Typically Offered: Fall, Spring
Individual projects or directed reading for students qualified to carry on independent work.
Note: Admission requires approval of the instructor and the Associate Dean. Petitions can be obtained from the Undergraduate Business Center, Tahoe 1030.

Credit/No Credit

BS in Business Administration (Entrepreneurship)

Units required for Major: 63
Total units required for BS: 120

Program Description

The Entrepreneurship concentration is designed to meet the CBA Mission: "offering a quality business education that is responsive to the changing regional, global, and technology-driven environment" of the Sacramento region. It is to provide a solid understanding of entrepreneurial skills, principles, and strategies that build and maintain an effective organization. The curriculum is designed for students to develop entrepreneurial skills, principles, and strategies that build and maintain an effective organization. The courses of area emphasis are provided to develop the students' breadth and functional orientation to focus their entrepreneurial skills.

Note: The use of the words "business administration" throughout this section refers to courses designated as Accountancy (ACCY), Accounting Information Systems (AIS), Decision Sciences (DS), Entrepreneurship (ENTR), Finance (FIN), General Management (GM), Human Resources/Organizational Behavior (HROB), International Business (IBUS), Management (MGMT), Management Information Science (MIS), Marketing (MKTG), and Operations Management (OPM).

Note: Students graduating with a Bachelor of Science in Business Administration (all concentrations) will not be subject to the University's Foreign Language Graduation Requirement. Students who change major may be subject to the University's Foreign Language Graduation Requirement.

Note: At least 15 units of upper division business administration courses must be taken in residence at (or under the auspices of) California State
University, Sacramento. Of these 15 units, a minimum of nine units must be in upper division courses in the concentration.

**Pre-Requisite Requirements**

A student may not enroll in any of the Major program or Concentration courses until he/she has completed the Pre-Requisite lower division program with a grade of "C-" or better in each course and an overall GPA of 2.0 ("C"), with the exception of MATH 24 which requires a minimum acceptable grade of "C" or better.

Students enrolled as Expressed Interest in Business may enroll in the following courses after completing the lower division pre-requisite requirements:

<table>

</tr>
<tr>
<td>HROB 101</td>
<td>The Management of Contemporary Organizations</td>
<td>3</td>
</tr>
</tbody>
</table>

**Computer Literacy**

All business majors must meet spreadsheet competency prior to taking upper division courses in the major. This requires completing MIS 10 (or equivalent).

**Minimum Grade Requirements**

The purpose of this requirement is to assure that all business administration students attain the minimum level of competency in all their coursework required for the business administration degree.

The minimum acceptable grade for any undergraduate course required for the business administration degree is "C-" with the exception of MATH 24 which requires a minimum acceptable grade of "C" or better.

A minimum grade point average of 2.0 ("C") is required in the Pre-Requisite courses, Major Core courses, and the Concentration courses presented for the degree.

² Required in Major; also satisfies GE.

BS in Business Administration (General Management)

Units required for Major: 66
Total units required for BS: 120

Program Description

The General Management concentration permits a focus upon the skills of the manager, whether the manager is an entrepreneur or operating at the corporate or agency level, with emphasis on the skills of decision making as taught through the case method. Managerial skills in planning, organizing, and controlling are highly transferable within private industry and within the public and nonprofit sector as well, thus permitting a wide variety of career goals.

Note: The use of the words “business administration” throughout this section refers to courses designated as Accountancy (ACCY), Accounting Information Systems (AIS), Decision Sciences (DS), Entrepreneurship (ENTR), Finance (FIN), General Management (GM), Human Resources/Organizational Behavior (HRB), International Business (IBUS), Management (MGMT), Management Information Science (MIS), Marketing (MKTG), and Operations Management (OPM).

Note: Students graduating with a Bachelor of Science in Business Administration (all concentrations) will not be subject to the University’s Foreign Language Graduation Requirement. Students who change major may be subject to the University’s Foreign Language Graduation Requirement.

Pre-Requisite Requirements

A student may not enroll in any of the Major program or Concentration courses until he/she has completed the Pre-Requisite lower division program with a grade of "C-" or better in each course and an overall GPA.
of 2.0 ("C"), with the exception of MATH 24 which requires a minimum acceptable grade of "C" or better.

Students enrolled as Expressed Interest in Business may enroll in the following courses after completing the lower division pre-requisite requirements:

1. To help you complete your degree in a timely manner and not take more units than absolutely necessary, there are ways to use single courses to meet more than one requirement (overlap). For further information, please visit the General Education page (p. 1103).

Note: There is no way to list all possible overlaps so please consult with a professional advisor. The Academic Advising Center can be visited online (http://www.csus.edu/acad/), by phone (916) 278-1000, or email (advising@csus.edu).

2. Department offers students a "select from the following" option:
   • If student chooses to take MGMT 117, they will meet the Writing Intensive (WI) graduation requirement.

3. If not satisfied before entering Sacramento State, it may be satisfied in General Education Area C2 (Humanities). "C- or better required." For further information, please visit the foreign language proficiency requirement page.

BS in Business Administration (International Business)

Units required for Major: 66
Units required for Major with additional Emphasis: 75
Total units required for BS: 120

Program Description

The International Business concentration is designed to prepare students for a career in business by providing a broad exposure to the areas of international business, competency in a functional area of business, and an awareness of foreign cultural differences.

The Emphasis in Sustainability Business is designed to introduce students to the emerging field of sustainability in business and the growing focus on the social, environmental, and economic performance of businesses in global economy. The coursework presents the scientific, moral, and business cases for adopting sustainability.

Note: The use of the words “business administration” throughout this section refers to courses designated as Accountancy (ACCY), Accounting Information Systems (AIS), Decision Sciences (DS), Entrepreneurship (ENTR), Finance (FIN), General Management (GM), Human Resources/Organizational Behavior (HROB), International Business (IBUS), Management (MGMT), Management Information Science (MIS), Marketing (MKTG), and Operations Management (OPM).

Note: Students graduating with a Bachelor of Science in Business Administration (all concentrations) will not be subject to the University's Foreign Language Graduation Requirement. Students who change major may be subject to the University's Foreign Language Graduation Requirement.

Note: At least 15 units of upper division business administration courses must be taken in residence at (or under the auspices of) California State
University, Sacramento. Of these 15 units, a minimum of nine units must be in upper division courses in the concentration.

**Pre-Requisite Requirements**

A student **may not enroll** in any of the Major program or Concentration courses until he/she has completed the Pre-Requisite lower division program with a grade of "C-" or better in each course and an overall GPA of 2.0 ("C"), with the exception of MATH 24 which requires a minimum acceptable grade of "C" or better.

Students enrolled as Expressed Interest in Business may enroll in the following courses after completing the lower division pre-requisite requirements:

<table>
<thead>
<tr>

<td>Business Communications</td>
<td>3</td>
</tr>
<tr>
<td>HROB 101</td>
<td>The Management of Contemporary Organizations</td>
<td>3</td>
</tr>
</tbody>
</table>

**Computer Literacy**

All business majors must meet spreadsheet competency prior to taking 100-level business courses. This requires completing MIS 10 (or equivalent).

**Minimum Grade Requirements**

The purpose of this requirement is to assure that all business administration students attain the minimum level of competency in all their coursework required for the business administration degree.

The minimum acceptable grade for any undergraduate course required for the business administration degree is "C-" with the exception of MATH 24 which requires a minimum acceptable grade of "C" or better.

A minimum grade point average of 2.0 ("C") is required in the Pre-Requisite courses, Major Core courses, and the Concentration courses presented for the degree.

¹ Course also satisfies General Education (GE)/Graduation Requirement.

When enrolled in the last of the pre-requisite courses, students must file the supplemental business application to officially apply to Business Administration as their major. Visit www.csus.edu/cba/ubac/impaction.html for more information.

Students who do not complete the required prerequisites as presented in the following Business Major program are subject to being administratively dropped from courses in which they are inappropriately enrolled.

| or SOC 138 | Environmental Sociology                    |       |

Group B (Economic Sustainability) - Select one of the following 3
| ECON 120   | Economics and Environmental Degradation   |       |
| ECON 123   | Resource Economics                         |       |
| ECON 162   | Energy Economics                           |       |

1 To help you complete your degree in a timely manner and not take more units than absolutely necessary, there are ways to use single courses to meet more than one requirement (overlap). For further information, please visit the General Education page (p. 1103).

2 Required in Major; also satisfies GE.

3 Department offers students a "select from the following" option:
   • If student chooses to take GEOL 130, they will meet Area B5.

Note: This option only applies to students who are completing the Emphasis in Sustainability Business.

Applicants who are approved for admission will receive a letter from the Administration to limit enrollment in its graduate degree programs. The Administration reserves the right to revise its admissions standards and degree program are listed within the program descriptions under Graduate Programs. The specific admission requirements for each institution. Admission requirements are different for each of the CBA four-year institution of higher learning or the equivalent from a foreign government, and non-profit organizations.

All applicants for post-baccalaureate degree programs in Business Administration (all concentrations) are exempt from the Foreign Language Graduation Requirement.

MBA (Entrepreneurship and Global Business)

Total units required for MBA: 33

Program Description

The MBA is intended to improve the participant's capacity for effective decision making, to facilitate his/her professional growth and development for increasing managerial responsibility, and to broaden his/her knowledge and understanding of management.

In the Entrepreneurship and Global Business (EGB) Concentration students will learn how to systematically analyze opportunities for global entrepreneurship, understand and be able to cope with the issues and challenges facing global entrepreneurs; obtain knowledge and hands-on experience in managing international business activities of global startups and existing companies and become familiar with the power of networks while working globally. As a result, the concentration will prepare individuals who are interested in beginning their own company in today's globalized business environment. At the same time it allows students the flexibility to tailor coursework to pursue career interests not only in entrepreneurial businesses, but also in multinational enterprises governments, and non-profit organizations.

Admission Requirements

All applicants for post-baccalaureate degree programs in Business must have earned a baccalaureate degree from a regionally accredited four-year institution of higher learning or the equivalent from a foreign institution. Admission requirements are different for each of the CBA Graduate Programs. The specific admission requirements for each degree program are listed within the program descriptions under "Admission Information" on the following pages. The College of Business Administration reserves the rights to revise its admissions standards and to limit enrollment in its graduate degree programs.

Applicants who are approved for admission will receive a letter from the Office of Graduate Studies informing them that they have been admitted as a conditionally or fully classified graduate student.

The following represent minimum academic qualifications and admission criteria. As the College of Business Administration receives a large number of applications each cycle, it reserves the right to admit fewer applicants than those who meet the minimum criteria.

Title V of the California Educational Code requires that MBA candidates must have earned a minimum 2.5 cumulative GPA and an undergraduate degree from an accredited institution.

Unless a valid waiver is presented, applicants must also submit a valid admission test (GMAT or GRE) and/or English Language Proficiency exam scores.

Minimum Admission or Language Test Scores

GMAT: 30% overall, 30% verbal, 30% quantitative; Scores valid for 5 years from test date. Test must be taken by the application deadline. Students are able to apply with pending scores, but must submit an official score report to be considered for admission.

GRE (General Test): 30% verbal, 30% quantitative; Scores valid for 5 years from test date. Test must be taken by the application deadline. Students are able to apply with pending scores, but must submit an official score report to be considered for admission (use institution code of 4671 ONLY when requesting official score reports be sent to Sacramento State; do not use department code).

TOEFL: Paper-based: 550; Internet-based: 80 (International Students only).

IELTS: 7(International Students only).

Deadlines

See the CBA MBA website for current admission deadlines: https://www.csus.edu/college/business-administration/graduate/mba.html

Special Admission Process

Applicants not meeting all the admission criteria may be admitted to the program based on evidence of potential success in the program provided by the applicant. Such evidence may include, but is not limited to: the applicant's maturity, motivation, employment history, managerial potential, letters of recommendation, personal statement, community activities, and other accomplishments that support the applicant's potential to successfully complete the program. An applicant so considered and recommended for admission may be approved by the Graduate Dean or Dean's designee.

Application Procedures

All prospective graduate students must file all of the following documents by the application deadline with both the CBA MBA Program Services and the Sacramento State Office of Graduate Studies (River Front Center 215) as noted below:

1. To Sacramento State, Office of Graduate Studies:
   a. Online Cal State Apply Graduate Application and
   b. Application Fee (you can pay this when you are filling out your online application).
   c. Copies of official transcripts for all universities previously attended. Sacramento State current students or graduates: only submit transcripts not previously submitted to the university or from institutions attended after graduation.
2. To the College of Business Administration, MBA Program Services Office, the following are required for a complete application:
   a. The MBA Supplementary Application.
   b. Supplemental Application Materials.
      i. Official GMAT or GRE scores;
      ii. Current resume;
      iii. 1-2 page statement of purpose;
      iv. Two letters of recommendation.
   c. Copies of official transcripts. Please request 2 copies of official transcripts from all colleges and universities you have attended. Send transcripts to both the MBA Program Services office and to the Office of Graduate Studies. Sacramento State current students or graduates: only submit transcripts not previously submitted to the university or from institutions attended after graduation.

Note: Applications are not considered complete and will not be reviewed unless all application materials and transcripts have been received.

Email: grad_admissions@csus.edu

International Applicants

International students (F or J Visas) must apply through International Admissions (https://www.csus.edu/international-programs-global-engagement/application-admissions-process/). Do not fill out the general graduate studies application as it will slow down your application process. All materials, inclusive of TOEFL scores, must be turned in to the International Admissions Office. To ensure consideration, international students should submit their material, including GMAT/GRE and TOEFL test scores, to the International Admissions Office one month prior to the CBA MBA Program Services application filing deadline. For an application and details international students should visit The International Admissions Office Web site (https://www.csus.edu/international-programs-global-engagement/application-admissions-process/).

Prerequisites

Prior to enrolling in the Foundation courses, students must be proficient in mathematics, statistics, and computer usage:

- Mathematics: at least one semester of calculus is strongly preferred;
- Statistics: an introductory course in probability and statistics; and
- Computer usage: ability to use common personal computer hardware and software, particularly word processing programs, spreadsheet programs, and internet browsers.

The faculty will assume that all MBA students have these proficiencies. A student may gain the necessary proficiencies in many ways: through coursework, review classes, self-study; or experience. No proficiency courses can count as credit towards program requirements.

Graduate Writing Assessment Requirement (GWAR)

The Graduate GWAR is a CSU wide requirement that should be completed by students before advancing to candidacy. The purpose of the GWAR is for students to demonstrate their proficiency at writing in an academic setting at a graduate-level.

Graduate students must successfully pass a Graduate Writing Intensive (GWI) course in their Graduate Program to complete the requirement.

Foundation Courses

The Foundation courses provide an academic background in the various disciplines of business. The MBA degree program is built upon this common background. Foundation courses should be taken after the student has attained the required entry proficiencies (prerequisites) and should be completed prior to taking program requirement courses.

A student who has a baccalaureate degree or a minor in Business Administration from an AACSB-INTERNATIONAL accredited university may have completed all or most of the Foundation requirements. However, the student will be required to take certain Foundation courses if she/he:

1. has not previously completed the comparable undergraduate course(s) for academic credit from an AACSB-INTERNATIONAL accredited institution or from a high quality program that has a "national or international reputation";
2. has earned less than an overall 3.0 ("B") grade point average (GPA) in the comparable undergraduate courses presented for waiver of required courses;
3. has received a "C" or lower grade in the comparable undergraduate course;
4. cannot demonstrate competency in these courses (7 year limit); or
5. has completed the bachelor's degree at a foreign institution.

Courses taken at AACSB-INTERNATIONAL accredited colleges of business will be accepted for transfer credit if the course is regarded as equivalent to the course for which credit is requested. Business Foundation courses and Core courses will not be accepted for transfer credit from programs that are not AACSB-INTERNATIONAL accredited unless taken at institutions that have national or international reputations of high quality programs.

Please visit the MBA Program website to download Foundation Course Waiver forms and petitions for equivalency for graduate, non-articulated courses. The CBA Academic Standards Committee will evaluate whether the institutions satisfy the requirement of "national or international reputations of high quality programs." Subsequently, faculty in the appropriate department will make the final determination for course equivalency, e.g., content, method of instruction, method of evaluating
students, and/or course duration. To find out if your university is AACSB accredited go to www.AACSB.edu.

Master students who are registered in the last two Foundation courses must file an Application for Classification with the MBA Program Services at mps@csus.edu, to be able to enroll in the courses designated as Program Requirements. The student's academic status will be reviewed to assure that he/she meets the necessary criteria to be accepted as a classified graduate student.

A GPA of at least 3.0 ("B") is required in all Foundation courses taken at Sacramento State, and program requirement courses presented for the degree.

The foundation courses are available after acceptance into one of the CBA Graduate Programs.

Note: To be completed after the student has demonstrated the required entry proficiencies and must be completed prior to taking Program Requirements in any of the Master's programs.

A graduate student may request a challenge for waiver of a College of Business Administration foundation or core course if it at least one of the following conditions is met:

- The student has taken an equivalent class elsewhere, subject to the GPA requirement in CBA academic policy. For core classes, the equivalent class must be at the graduate level; for the foundation classes, the equivalent class can be taken at the undergraduate level.
- The student has achieved appropriate professional or academic qualification.
- The student has appropriate professional work experience.

It is the responsibility of a student to provide sufficient documentation to support a waiver challenge application.

Prior to enrolling in Culminating Requirements, a student must advance to candidacy. Initiation of advancement procedures is the responsibility of the student. The application to advance must be filed no later than the semester prior to enrollment in culminating experience requirement.

Eligibility to advance to candidacy requires satisfactory scholastic achievement, presentation of a plan of graduate study, and demonstration of writing proficiency. A classified graduate student in Business Administration may apply to the MBA Program Services at mps@csus.edu for advancement to candidacy for the Master's degree after s/he has completed at least 12 units of the program requirements beyond the Foundation requirements. Students with a GPA deficiency or who have not fulfilled the Writing Placement for Graduate Students Requirement (WPG) cannot advance to candidacy.

### Program Requirements

<table>

</tbody>
</table>

**Elective Group A (9 Units)**

Select at least three of the following:

- MBA 232 Negotiation and Relationship Management
- MBA 235 Management Of Innovation
- MBA 243 Global Marketing Environment
- MBA 270 Global Business Management
- MBA 271 Integrated Entrepreneurship Management
- MBA 272 Entrepreneurial Resources Management
- MBA 273 Global Supply Chain Management

**Elective Group B (6 Units)**

Select at least two MBA 200-level courses which are not in Group A. Total elective units from group A and group B are 15.

**Culminating Experience (3 Units)**

Select one of the following:

- MBA 501 Culminating Experience Project in Business and Strategy
- MBA 500A Thesis
- MBA 500B Project

**Total Units**

33

### Minimum Units and Grade Requirement for the Degree

Units required for MBA: 33 (excluding foundation courses)

Minimum Cumulative GPA: 3.0. The minimum acceptable grade for any graduate business course is "C." No more than two (2) courses with a grade of "C" will be counted for satisfaction of graduate program requirements.

### Advancement to Candidacy

A student’s program requirements are governed by the catalog in effect at the time one is accepted into and begins graduate school or by the catalog in effect at the time advancement to candidacy is approved.
A graduate student may request a challenge for waiver of a College of Business Administration foundation or core course if at least one of the following conditions is met:

- The student has taken an equivalent class elsewhere, subject to the GPA requirement in CBA academic policy. For core classes, the equivalent class must be at the graduate level; for foundation classes, the equivalent class can be at the undergraduate level.
- The student has achieved appropriate professional or academic qualification.
- The student has appropriate professional work experience.

It is the responsibility of a student to provide sufficient documentation to support waiver challenge application. Academic credit for core courses is not earned by waiver. The requirement for completing a core course is waived, providing the student enrolls in and satisfactorily completes an elective course in that discipline or an elective approved to the appropriate faculty advisor who grants the waiver.

College of Continuing Education

College Overview

The College of Continuing Education (CCE) extends the mission of the university by increasing educational access for diverse learners. We believe that learner-centered programs and services lead to individual, organizational, and community transformation. With a primary expertise on serving adult learners, CCE provides programs and services to individuals and employers year-round in a variety of formats and modalities. The College supports students throughout California and beyond, serving over 80,000 learners annually through in-person, hybrid and fully online workshops, courses, conferences, certificate and degree programs.

For more information about the College of Continuing Education, please visit www.cce.csus.edu or call (916) 278-4433.

Conference and Event Services

CCE’s Conference and Event Services is recognized throughout California as a leader in the meeting and event planning industry. We excel at creating partnerships where government, education and private industry come together to address community, regional and statewide issues. CCE provides assistance with conferences, organizational events, stakeholder engagement, and regional and statewide meetings. We offer a full range of services designed to anticipate and facilitate all aspects of a successful event.

Degree and Credential Programs

On behalf of academic departments, CCE administers several undergraduate degree completion programs, graduate programs, and credential programs in a variety of formats that meet the needs of diverse student audiences. CCE offers degree and credential programs in multiple areas, such as business, child and adolescent development, communication sciences and disorders, criminal justice, education, nursing, psychology, public health, and social work.

Open University

Open University provides individuals with the opportunity to explore the university environment, pursue an area of interest or update professional skills. This program allows community members to enroll in university classes without going through the formal admission process. Upon instructor and department approval, individuals may be enrolled in a course through the Open University program. Some courses may require prerequisites.

Professional Development Programs

CCE offers a wide variety of courses and certificate programs specifically designed for working professionals. Our programs feature quality curriculum that combines practice and theory, expert instructors with extensive industry experience, affordable fees to fit individual or organizational budgets, networking opportunities with business professionals, and convenient class schedules to accommodate work and family. Program areas include business operations, emergency medical services, public safety, teacher and educator preparation and more.

Summer Session and Winter Intersession

Summer and Winter programs enable Sacramento State and visiting students to meet or accelerate degree requirements, pursue an area of interest, or reduce class load for the fall and spring semesters. CCE works with academic departments and colleges across campus to offer a robust selection of courses during Summer Session and Winter Intersession.

Training and Organizational Development Services

CCE offers a wide variety of custom training solutions specifically designed to meet the needs of public and private organizations. From an initial needs assessment through program planning and delivery as well as visual design (video and graphic design), throughout the process, we work closely with organizations to ensure that program content and learning outcomes are aligned with organizational goals and objectives. Choose from a portfolio of existing programs and services such as leadership and management, diversity, equity, inclusion, and belonging, workforce development, communication, conflict management, change management, leadership coaching, strategic planning, facilitation, and mediation. Additionally, CCE has a team of expert instructors with extensive industry experience who design custom solutions based on specific organizational needs. Training programs are delivered virtually or in-person via locations throughout California.

Travel Study and International Professional Development Services and

In partnership with the Office of International Programs and Global Engagement (IPGE) and academic departments and colleges, CCE offers faculty-led travel study courses to infuse international, intercultural, and global dimensions into students’ academic experience. These programs feature experiential learning by pairing international or domestic travel with academic coursework toward major and degree requirements. CCE also offers professional certificate programs to international audiences who are interested in enhancing professional and academic skills. These are often offered as cohort experiences in partnership with international universities.

Youth Programs

Students in 7th–12th grade can get a feel for college life in CCE’s Summer Youth Academies. The noncredit Academies provide youth with the opportunity to preview college, engage in hands-on academic and career exploration, and explore a variety of subjects under the guidance of campus faculty, industry experts, and regional educators.

College of Education

College Overview

As a comprehensive college, we collaborate with our professional communities in preparing educators, leaders, and Deaf service providers to serve as agents of positive social change. We give
access to professional careers for students with diverse identities and backgrounds, and contribute to their personal growth. We provide informed advice and applied research services to the local educational community.

Please review our website (https://www.csus.edu/college/education/) for up-to-date information about our programs and services.

**Notice to Students RE: Professional Licensure and Certification**
California State University programs for professions that require licensure or certification are intended to prepare the student for California licensure and certification requirements. Admission into programs for professions that require licensure and certification does not guarantee that students will obtain a license or certificate. Licensure and certification requirements are set by agencies that are not controlled by or affiliated with the California State University and licensure and certification requirements can change at any time.

The California State University has not determined whether its programs meet other states’ educational or professional requirements for licensure and certification. Students planning to pursue licensure or certification in other states are responsible for determining whether, if they complete a California State University program, they will meet their state’s requirements for licensure or certification. This disclosure is made pursuant to 34 CFR §668.43(a)(5)(v)(C).

EDC 205. Advanced Counseling Theory and Multicultural Systems Abroad. 3 Units
Prerequisite(s): EDC 216, EDC 280, EDC 210, EDUC 155, and EDUC 156
Term Typically Offered: Summer only

This course is designed to provide students with a foundation in the philosophy and practice of contemporary theories of counseling and psychotherapy. Course material is aimed at helping students develop basic skills necessary for effective counseling and communicating with clients. Students will engage in: (1) personal growth in counselor identity development, (2) counseling skills development utilizing multiple approaches, and (3) theory integration and multicultural systems. Students will be actively involved in their learning and invited to share knowledge.

Note: This course is a study abroad experience.

EDC 210. Advocacy, Social Justice, and Cultural Foundations in Counseling. 3 Units
Prerequisite(s): Classified and/or admitted student in MS Counseling program
Term Typically Offered: Fall only

Exploration of ethnic and cultural differences to develop or expand awareness, techniques, skills, theories, concepts, and to acquire information necessary to counsel effectively with clients of various cultural groups. Students examine their own attitudes, behaviors, perceptions, and biases, and are encouraged to develop their own multicultural approach to counseling.

EDC 212. Gender and Sexuality in Counseling. 3 Units
Term Typically Offered: Fall, Spring

An examination of various gender roles within society, including their impact on the individual, couple and family. An overview of information and methods for working in the field of human sexuality education and counseling. Addressing problems involving sexual disorders, sexually transmitted infection & HIV/AIDS. Preventing, assessing, reporting, and intervening in family violence. Obtaining and developing accurate information and awareness about current sources and methods to competently assist clients in their struggle toward a more meaningful and satisfying sense of self.

EDC 214. Dynamics of Human Development. 3 Units
Prerequisite(s): Classified or Admitted Student in MS Counseling program
Term Typically Offered: Spring only

Overview of theories and research pertaining to the dynamics of human development, including cultural, biological, social, and psychological factors. Particular emphasis will be placed on the relationship of these factors to the field of counseling. Lifespan coverage includes conception, pregnancy, birth, infancy-toddlerhood, early/middle childhood, adolescence, early/middle/late adulthood, as well as dying, death, and bereavement.

EDC 215. Foundations of Professional School Counseling. 3 Units
Term Typically Offered: Fall, Spring

Understanding the roles, responsibilities, and functions of a professional school counselor is necessary to student and counselor success alike. Topics on school counseling services, practices, basic concepts related to the organization and operation of school counseling programs and socio-cultural, economic, and other societal influences on the educational process in TK-12 settings will be explored.
EDC 216. Counseling Theory. 3 Units
Prerequisite(s): Classified, or Admitted Student in MS Counseling program
Corequisite(s): EDC 280. Please sign up for the same section of 216 and 280 as they are paired by section.
Term Typically Offered: Fall only
Examination of ten counseling philosophies, with emphasis on knowledge and practice. Requires the refinement of one's own counseling orientation. Designed to provide students with a foundation in the basic philosophy and practice of contemporary theories of counseling/psychotherapy. The requirements support three components of multiple measures of learning and outcomes: 1) personal growth, 2) counseling skills building utilizing multiple approaches, 3) professional development.

EDC 218. Assessment In Counseling. 3 Units
Prerequisite(s): Classified, or Admitted Student in MS Counseling program
Term Typically Offered: Fall, Spring
Intended to acquaint the prospective counselor with an array of assessment instruments and appraisal techniques. Includes practical experience with tests as well as foundations of test development. Lecture three hours.

EDC 219. Group Processes in Counseling. 3 Units
Prerequisite(s): EDC 216 and EDC 280, classified student in the Counselor Education Program.
Term Typically Offered: Fall, Spring
Group Processes in Counseling is a course that introduces students to group process and theory, including group counseling skills and facilitation. Participation in a group experience is required as well as leading a group under supervision. The experience and material in this course are aimed at helping students develop group counseling skills necessary for effectively leading counseling and psychoeducational groups while integrating theory into practice.

EDC 220. The Spiritual Dimension in Counseling and Psychotherapy. 3 Units
Prerequisite(s): EDUC 155, EDUC 156, EDC 216, EDC 280; or instructor permission.
Term Typically Offered: Fall, Spring
Investigation into concerns and issues, modes, and methodologies surrounding exploration of the spiritual dimension in the counseling/therapy relationship. Experiential activities are included.

EDC 222. Clinical Stress Reduction. 3 Units
Term Typically Offered: Fall, Spring
Major concepts, theories, and approaches to effective stress reduction. Includes stress level assessment, planning and implementation of a stress reduction program. Practice of beneficial stress reduction techniques and application in clinical practice. 
Note: Open to unclassified students with instructor permission.

EDC 230. Law and Ethics for Marriage, Family, and Child Counseling. 3 Units
Prerequisite(s): EDC 155, EDC 156, EDC 216, EDC 280 or instructor permission.
Term Typically Offered: Fall, Spring
Legal and ethical considerations in the practice of marriage, family, and child counseling. Current laws, responsibilities, restrictions, rights and privileges, licensing regulations, and ethical standards of major professional groups. Child abuse assessment and reporting requirements. Organization, administration, and management of independent practice. Lecture three hours.

EDC 231. Diagnosis and Treatment Planning. 3 Units
Prerequisite(s): EDC 216, EDC 218, EDC 280; classified student in the Counselor Education Program.
Term Typically Offered: Fall, Spring
This graduate level course provides students with an overview of adult and child psychopathology presented as a manifestation of multiple biological, psychological, sociocultural and other factors. It offers an advanced discussion of psychopathology with an emphasis on biopsychosocial assessment, differential diagnosis, use of the Diagnostic and Statistical Manual of Mental Disorders, and development of treatment plans. Lecture three hours.

EDC 232. Family Violence. 3 Units
Prerequisite(s): EDC 212, EDC 230, EDC 234; or instructor permission.
Term Typically Offered: Fall, Spring
Violence in the family includes spouse abuse, child abuse, incest, and sexual abuse. Myths about these areas will be replaced by empirically-based facts. There will be an emphasis on effective treatment methods; research findings on family violence, including etiology and family patterns; overlap with alcohol and other drugs, and maintenance factors. Students will gain techniques and skills in interviewing, assessment, and counseling when violence is a presenting issue.

EDC 233. Substance Use and Addiction Counseling. 3 Units
Prerequisite(s): EDC 231, classified student in the Counselor Education Program.
Term Typically Offered: Fall, Spring
Provides an overview of substance use disorders, addiction, and co-occurring disorders. Students will develop an understanding of Substance Use Disorders (SUD’s); the physiological, psychological, behavioral, and social consequences on the user and family members; to facilitate the development of addiction counseling competencies that are associated with positive treatment outcomes, and to increase the student’s level of confidence relative to providing substance use evaluation, education, and treatment services. Emphasis will be placed on developing and practicing substance use counseling skills.

EDC 234. Seminar: Marriage and Family Counseling. 3 Units
Prerequisite(s): EDC 216, EDC 280; classified student in the Counselor Education Program.
Term Typically Offered: Fall, Spring
Introduction to the basic concepts and principles of family therapy. Provides and lays the foundation on which all theories/schools of family therapy are based and covers the basic theories of family therapy. Issues include evaluation of families, diagnosis in a family context, interviewing strategies, redefining problems in a family systems context, and treatment principles. Lecture three hours.
EDC 236. Couples Counseling. 2 Units
Prerequisite(s): EDC 212; EDC 234.
Term Typically Offered: Fall, Spring

Focuses on applying major schools of couples and sex therapy to actual practice. Issues include evaluation of couples, interviewing strategies, power, diversity, ethical and legal considerations, treatment principles and practice, as well as outcome research in couples therapy. Lecture/discussion/practice.

EDC 238. Professional Issues in Marriage Couple and Family Counseling. 2 Units
Term Typically Offered: Fall, Spring

This course will provide MCFC students an advanced overview of current evidence-based practices, intervention techniques, and treatment strategies for diverse populations. This class will challenge students to conceptualize through a diverse therapeutic lens. Topics will include domestic violence, death and dying, substance use disorder, patients with HIV or AIDS, relational trauma, the foster care system, infidelity in marriage and couples counseling, caring for caregivers, family law, and practice/management considerations including HIPAA and third party reimbursement.

EDC 239. Foundations in Rehabilitation Counseling. 3 Units
Prerequisite(s): Classified student in the MS Counseling program
Term Typically Offered: Spring only

This foundation course is designed to introduce and orient students to the profession of rehabilitation counseling, the various setting in which services are performed, and federal laws that dictate delivery of rehabilitation services. Students will learn about the history and development of rehabilitation counseling and the current issues relevant to this specialization including historical and contemporary perspectives on disability, societal attitudes towards disability and its influence on individuals with disabilities.

EDC 240A. Medical Aspects of Disability. 3 Units
Prerequisite(s): Classified or Admitted Student in the MS Counseling program
Term Typically Offered: Fall, Spring

This course focuses on the medical aspects of various congenital, hereditary, and trauma-induced disabilities. The etiology, pathology, treatment, symptoms, prognosis, and limitations caused by various disabling medical conditions are covered. Implications of medical disabilities are explored inclusive of its relationship to vocational adjustment. Areas of exploration include motivation, self-concept, and personal and societal attitudes toward disability. This course will include a survey of psychosocial aspects of disability as it pertains to medical aspects of disability.

EDC 240B. Psychosocial Aspects of Disability. 3 Units
Prerequisite(s): Classified or Admitted Student in MS Counseling program
Term Typically Offered: Fall, Spring

The primary focus of this course will be on the psychosocial aspects of disability including the psychological genesis of and social implications affecting individuals with disabilities. Various psychological disabilities will be explored in concert with treatment considerations. This course builds on knowledge gained in the EDC 240A: Medical Aspects of Disability. The course will explore rehabilitation philosophy and processes from a holistic standpoint to enhance coping and skill development to aid in vocational adjustment.

EDC 241. Developmental Stages and Art Therapy Techniques. 3 Units
Prerequisite(s): EDC 215 and EDC 156.
Term Typically Offered: Fall, Spring

In-depth study of normal stages of development in art with special emphasis on the developmental stages as both diagnostic indicators and aids in devising art therapy treatment. Includes hands-on experience with a variety of art therapy techniques and discussion of their applicability to different client populations. Purchase of some basic art supplies is required. Lecture, discussion, three hours.

EDC 242. Play and Art in Therapy with Children. 3 Units
Prerequisite(s): EDC 216, EDC 280, classified student in the School Counseling Specialization. Other Counselor Education students may be permitted to enroll when space is available.
Term Typically Offered: Fall, Spring

Explores the ways children use fantasy, play, and art as means for communication, growth and healing. Emphasis is placed on clinical skills, therapeutic limit setting, counseling theory and developmentally appropriate interventions. Purchase of some basic art supplies is required.

EDC 244. Trauma and Crisis Counseling. 3 Units
Term Typically Offered: Fall

This course provides opportunities for both theory and skill development by examining crisis and trauma counseling, including crisis theory; multidisciplinary responses to crises, emergencies, or disasters; cognitive, affective, behavioral, and neurological effects associated with trauma; brief, intermediate and long-term approaches; assessment strategies for clients in crisis and principles of intervention for individuals with mental or emotional disorders during times of crisis, emergency, or disaster.

EDC 250. Education Research. 3 Units
Prerequisite(s): Graduate status
Term Typically Offered: Fall, Spring

EDC 250 will provide the study of qualitative and quantitative methods used in the development of reliable knowledge in the field of education. It includes identification and formulation of research problems, research designs, and the presentation of reports representative of different research strategies. Scholars will be immersed in counseling discourse and a wide range of writing assignments in various genres. It is anticipated that this course will facilitate skills important to the evaluation of educational and psychological programs.

EDC 252. Legal and Ethical Issues in Professional Counseling. 3 Units
Term Typically Offered: Fall

Designed to provide students with basic knowledge and skills necessary to be legally and ethically competent in practice of counseling. Examines ethical and legal considerations pursuant to practice of counseling. Topics to be covered are ethics (CAMFT, AAMFT, ACA, ASCA, NCDA) related to counseling practice in private and public sectors, as well as laws regarding mandatory child and elder abuse assessment and reporting, confidentiality, privilege, liability, marriage, family, child and school ethics and law. Required for graduation with a degree in Counseling.
EDC 254. Counseling and Psychotropic Medicine. 3 Units
Prerequisite(s): EDC 231 and Classified or Admitted Student in the MS Counseling program
Term Typically Offered: Fall, Spring
Provides an introduction to psychopharmacology; the biological bases of behavior; basic classifications, indications, and contraindications of commonly prescribed psychopharmacological medications; and effective approaches to collaborating with clients, their families and other professionals so that appropriate referrals can be made for medication evaluations and so that the side effects of those medications can be identified. Meets the BBS licensure requirements for Professional Clinical Counselors and Marriage and Family Therapists.

EDC 260. Career Development. 3 Units
Prerequisite(s): Classified or Admitted Student in MS Counseling program
Term Typically Offered: Fall, Spring
Provides a basic introduction to career development and career counseling. Identification and assessment of issues common in career counseling settings are examined. Group and individual models of career development and counseling in schools, community agencies or private industry are also investigated and discussed. Lecture three hours.

EDC 261. Seminar in Counseling: Job Placement. 3 Units
Term Typically Offered: Fall, Spring
Analyzes and practice of job-seeking skills, employer information base, and job placement of the handicapped.

EDC 262. Career Counseling Process. 3 Units
Prerequisite(s): EDC 260; classified student in the Counselor Education Program.
Term Typically Offered: Fall, Spring
On-going learning of the processes needed to deliver career counseling services to a variety of clientele. Students will extend their theoretical knowledge base and will more clearly focus on the relationship between a person’s life and the process of career development. Elements to be studied in more depth include career development theory, assessment techniques and strategies, goal setting, decision making, and integration of multicultural aspects and strategies. A practical experience in administering and interpreting selected test instruments extensively used in career counseling will be included. Lecture three hours; practical experience one hour.

EDC 263. Advanced Case Conceptualization in Clinical Rehabilitation. 3 Units
Prerequisite(s): EDC 239 and Classified or Admitted Student in the MS Counseling program
Term Typically Offered: Fall, Spring
This course provides an in-depth review and study of the clinical rehabilitation processes and continuum of care. This course will address effective clinical rehabilitation counseling assessments, interventions, and documentation. Students will apply principles, models, and use documentation formats of biopsychosocial case conceptualization and treatment planning. This course will review strategies for interfacing with medical and allied health professionals, including interdisciplinary treatment teams culminating in a case management and clinical file addressing a holistic intervention for clients and consumers.

EDC 264. Seminar in Counseling: Career Systems Development. 3 Units
Prerequisite(s): EDC 260; classified student in the Counselor Education Program.
Term Typically Offered: Fall, Spring
Specific emphasis is at the implementation level, with students learning the necessary skills for implementing, maintaining, and stimulating career development in schools, community agencies or private industry. Lecture three hours.

EDC 266. Seminar in Counseling: Career Program Development. 3 Units
Prerequisite(s): EDC 260; classified student in the Counselor Education Program.
Term Typically Offered: Fall, Spring
Specific emphasis is at the program development level, with students learning the necessary components for developing a career counseling program in schools, community agencies, or private industry. Lecture three hours.

EDC 268. Career and Job Search. 3 Units
Prerequisite(s): EDC 260 or instructor permission.
Term Typically Offered: Fall, Spring
Work is undergoing change with the advent of new technologies, an increasingly diverse workforce, and corporate restructuring. These conditions have led to more frequent occupational shifts and the loss of previously secure jobs, self-reliance replacing loyalty in relations between employers and employees, and fragmented careers becoming more common as family responsibilities and work opportunities became increasingly interwoven. Examines traditional and emerging approaches for assisting clients in a changing and evolving job market.

EDC 270. Organization and Administration of School Counseling Programs. 3 Units
Term Typically Offered: Fall, Spring
Principles and practices necessary to plan, initiate, administer, and evaluate school counseling programs, including related laws. Lecture, discussion three hours.

EDC 272. Counseling Children and Youth. 3 Units
Prerequisite(s): EDC 216, EDC 280, classified student in Counselor Education Program. School specialization: EDC 242.
Corequisite(s): School Counseling Specialization: EDC 475.
Term Typically Offered: Fall, Spring
Provides students with a theoretical foundation and working knowledge of contemporary issues and interventions for children and youth. A variety of presenting problems and treatment strategies are explored.

EDC 274. Advocacy and Systemic Change in School Counseling. 3 Units
Prerequisite(s): EDC 216, EDC 280, EDC 270; classified student in the Counselor Education Program.
Term Typically Offered: Fall, Spring
This course provides an overview of consultation, leadership, and advocacy models with emphasis on their use and application in school settings. The effective counselor must be able to employ consultation, advocacy, and leadership skills in order to meet the needs of students. Methods for analyzing data to design intentional and developmental school counseling interventions will be explored.
EDC 280. Counseling Skills Lab. 2 Units
Prerequisite(s): Classified Student in MS Counseling program
Corequisite(s): EDC 216 is taken the same semester
Term Typically Offered: Fall only

Supervised practice in acquiring and developing counseling micro-skills including the basic styles of communication, verbal and nonverbal, with additional focus on developing and practicing counseling micro-skills under supervision and observation. The material in this course is aimed at helping students develop basic counseling skills necessary for effectively counseling and communicating with clients while integrating theory into practice.

Note: Recommended to be taken within the first 6 units of study in the Counselor Education Program

Credit/No Credit

EDC 282. Practicum in Group Counseling. 2 Units
Prerequisite(s): EDC 219; classified student in the Counselor Education Program.
Term Typically Offered: Fall, Spring

Supervised practice in leadership of group counseling. Lecture one hour; laboratory three hours.
Credit/No Credit

EDC 294. Cooperative Education Experience. 3 Units
Prerequisite(s): Open only to upper division and graduate students; consent of Department Chair.
Term Typically Offered: Fall, Spring

Cooperative Education (Co-op) relates academic theory to professional practice by providing paid work experience in the student's major field of study and academic credit. Students receive supervised employment in school districts, state and community agencies, companies, and other appropriate settings. Requires attendance at weekly meetings, preparation of application packet, completion of field study assignment, and a written final report.

Note: Units may not be used to meet course work requirements. May be repeated once for credit.

Credit/No Credit

EDC 296. Current Issues in Counseling: Meditation. 1 Unit
Term Typically Offered: Fall, Spring

An introductory experimental class in meditation which provides a basic foundation of basic meditative theories, the experience of meditative practices, and a basic knowledge of meditative techniques of benefit both personally and with clients. Research has demonstrated that meditation is helpful in a number of stress-related conditions and recent research indicates it is often more effective than psychotherapy in treatment of some problems.

Note: Instructor approval required. May be taken twice for credit.

Credit/No Credit

EDC 299. Special Problems. 1 - 3 Units
Term Typically Offered: Fall, Spring

Individual projects at graduate level designed especially for students capable of independent study.

Note: Admission by approval of the instructor with whom the student will be working directly and the Department Chair.

Credit/No Credit

EDC 475. Counseling Practicum. 3 Units
Prerequisite(s): EDC 219 and classified student in MS Counseling.
Additional prerequisites by specialization: Career - EDC 260; MCFC - EDC 476; School - EDC 270; Rehabilitation - EDC 239.
Term Typically Offered: Fall, Spring

Supervised counseling practice in Center for Counseling and Diagnostic Services (CCDS) and/or school settings. Emphasis on application of counseling theories and the integration of one's own counseling philosophy into practical applications. Basic requirements: 100 clock hours with at least 40 client contact hours, 1 hour per week of individual/triadic supervision, and one and half hours per week of group supervision.

Note: Department petition is required the semester prior to enrollment. Must receive Credit for EDC 475 in order to move into EDC 480.

Credit/No Credit

EDC 476. Advanced Skills in Marriage and Family Counseling. 1 Unit
Prerequisite(s): Classified student in the MS Counseling program and marriage, couple, family counseling concentration
Term Typically Offered: Fall, Spring

Structured observation and supervised practice in marriage, couple, and family counseling. Application of material learned in EDC 234 to build on practice and use of systems theories and techniques. Emphasis on establishing relationships, interviewing techniques with multiple clients, assessment techniques, setting goals, developing theory based treatment plans using systems theories, and learning to think systemically. Laboratory two hours.

Credit/No Credit

EDC 480. Field Study in Counseling. 3 Units
Prerequisite(s): EDC 475 and department approval.
Term Typically Offered: Fall, Spring

Supervised counseling and field experiences arranged in community-based settings such schools, colleges and/or agencies. Students are to collect between 600-800 hours of field work experience in the form of direct and indirect counseling experiences as designated by specialty and aligned with CACREP, CTC, and BBS requirements. This course is designed to be taken third year in both fall and spring, collecting approximately 300 hours each semester and totaling 6 units.

Note: EDC 480 must be taken twice, over two separate semesters, in order to meet accreditation requirements. Department approval is required the semester prior to enrollment.

Credit/No Credit
EDC 551. Master's Project - Counseling - Plan B. 3 Units
Prerequisite(s): Advanced to candidacy. All course requirements in Counselor Education and EDC 555.
Term Typically Offered: Fall, Spring
Completion of a project approved for the Master's degree.
Note: Department petition is required the semester prior to enrollment.

EDD 600. Transformational Leadership. 3 Units
Prerequisite(s): Admission into the Ed.D. in Educational Leadership Program and instructor permission.
Term Typically Offered: Fall, Spring
Designed to engage students in understanding, implementing, and evaluating strategic leadership practices based on various theories, models, and approaches for achieving organizational transformation. Students will become skilled facilitators of the organizational transformation process by initiating, implementing, sustaining, and evaluating transformation/change efforts. Students will build a solid foundation through the integration of theory and practice in order to implement a planned change process in their home institution.

EDD 601. Organizational Leadership. 3 Units
Prerequisite(s): Admission into the Ed.D. in Educational Leadership Program and instructor permission.
Term Typically Offered: Fall, Spring
Builds and expands on candidates' knowledge of systems thinking, personal and organizational behaviors, and leadership approaches to the change process. Candidates will demonstrate ethical thinking and action in organizational settings by re-conceptualizing leadership roles and organizational structures. In coursework and related fieldwork components students will apply concepts and theories to improving their respective educational institutions. Among the interactive pedagogies used are: case studies, experiential exercises, dialogue and group activities.

EDD 602. Policy and Practice for Educational Leaders I. 3 Units
Prerequisite(s): Admission into the Ed.D. in Educational Leadership Program and instructor permission.
Term Typically Offered: Fall, Spring
Develops in students the skills for informed analysis of educational policy in order to positively influence the educational policy in the K-12 or community college setting. In addition to studying the historical perspectives pertaining to educational policy, practice, and reform, students will investigate the mission of public education. Students will also study governance and inter-governmental relations through contemporary policy development with particular reference to current law, local board policy, shared governance, and working with a variety of constituencies.

EDD 603. Policy and Practice for Educational Leaders II. 3 Units
Prerequisite(s): Admission into the Ed.D. in Educational Leadership Program and instructor permission.
Term Typically Offered: Fall, Spring
Designed to engage students in critical analyses of policy at the local, state, national, and international levels. Specific California and federal policy environment structures and processes will be examined. Students will learn about how public policy is generated, potential consequences, ethical dilemmas, social justice, and equity issues.

EDD 604. Introduction to Educational Research. 3 Units
Prerequisite(s): Admission into the Ed.D. in Educational Leadership Program.
Term Typically Offered: Fall only
This course introduces students to educational research design, methodologies, findings, and audience. Students will learn about how public policy is generated, potential consequences, ethical dilemmas, social justice, and equity issues.

EDD 605. Qualitative Research Methods. 3 Units
Prerequisite(s): Admission into the Ed.D. in Educational Leadership Program.
Term Typically Offered: Spring only
This course is designed to provide doctoral students with instruction in qualitative research approaches as applied to questions of educational leadership and policy. The course will emphasize individual and group interviewing as techniques for qualitative study data collection as well as coding and analysis of qualitative data. This course is particularly useful for doctoral students who plan to conduct a qualitative or mixed method dissertation related to an educational leadership and/or policy topic.

EDD 606. Quantitative Research Methods. 3 Units
Prerequisite(s): Admission into the Ed.D. in Educational Leadership Program.
Term Typically Offered: Fall only
This course will introduce educational leaders to concepts in quantitative research in preparation for conducting independent research. This course will enable students to critically understand, critique, and develop quantitative research methodology and apply it appropriately to various educational issues.
EDD 607. Community and Communication in Educational Leadership. 3 Units

Prerequisite(s): Admission into the Ed.D. in Educational Leadership Program and instructor permission.
Term Typically Offered: Fall, Spring

Presents theories and frameworks concerning organizational, interpersonal, and cross-cultural communication in educational and community contexts. Includes developing written and verbal skills for specific contexts, including strategic planning, evaluation, presentations, formal and informal texts, technology, crisis management, and public relations. Through research and practical application, enhances communication skills needed for creating inclusive systems and positive results for all stakeholders.

EDD 608. Diversity and Equity in Complex Organizations. 3 Units

Prerequisite(s): Admission into the Ed.D. in Educational Leadership Program and instructor permission.
Term Typically Offered: Fall, Spring

Designed to engage students in self introspection of awareness and advocacy in applying theoretical frameworks and research to promote equitable, excellence in schooling. Students will demonstrate the ability to develop cross-cultural relationships across multiple constituents for the purpose of improving students performance and promoting social justice. Students will develop the capacity to be courageous change agents in assuring academic excellence for all students.

EDD 609. Human Resource Management for Educational Leaders. 3 Units

Prerequisite(s): Admission into the Ed.D. in Educational Leadership Program and instructor permission.
Term Typically Offered: Fall, Spring

Examines how to manage human resources effectively in the dynamic legal, social, and economic environment currently impacting educational institutions. Among the topics included are: formulation and implementation of human resource strategy, job analysis, methods of recruitment and selection, techniques for training and development, performance appraisal, compensation and benefits, and the evaluation of the effectiveness of human resource management frameworks and practices. Class participants will be expected to demonstrate understanding of Human Resource Management (HRM) competencies through assignments, exercises and case analyses.

EDD 610. Curriculum and Instruction Issues for Educational Leaders. 3 Units

Prerequisite(s): Admission into the Ed.D. in Educational Leadership Program and instructor permission.
Term Typically Offered: Fall, Spring

Presents curriculum and instruction from a leadership perspective within the contexts of K-12 schools and community colleges. Students examine contemporary issues in school curriculum, including policy initiatives and reform efforts affecting curricular decision-making. Prepares students to analyze and design appropriate strategies for implementing and evaluating district and school curricula and to investigate the implications of curricula for educational programming. Students also learn specific foundations and procedures for professional development that have well-documented effects on student achievement.

EDD 611. Legal Issues for Educational Leaders. 2 Units

Prerequisite(s): Admission into the Ed.D. in Educational Leadership Program and instructor permission.
Term Typically Offered: Fall, Spring

Examines key legal issues that govern daily and long-range decisions of educational leaders. Focuses on understanding California and federal codes, case law, policies, and significant precedent and will emphasize analysis of key legal concepts and application of law to major areas including finance, personnel, risk management, curriculum, student services, teacher rights, torts, students rights, and access. Examines trends in law and the initiation and influence of educational law to positively influence educational institutions.

EDD 612. Student Services in Education. 2 Units

Prerequisite(s): Admission into the Ed.D. in Educational Leadership Program and instructor permission.
Term Typically Offered: Fall, Spring

Provides a comprehensive insight into the student services. It addresses both practical and theoretical perspectives intended to build a sense of vision and passion to transform the profession of student affairs and leadership. In particular, examines four distinct arenas: 1) historical and philosophical foundations of student affairs and leadership 2) management and organizational issues, 3) essential skills and professional development in building an equitable organization, and 4) the synthesis of practice and theory.

EDD 613. Finance and Budget for Educational Leaders. 3 Units

Prerequisite(s): Admission into the Ed.D. in Educational Leadership Program and instructor permission.
Term Typically Offered: Fall, Spring

Analyzes two related topics with respect to public educational institutions: funding and internal budget management. Provides a state and national overview of the economics and finance of K-12 and higher education, including private and public benefits of education, methods of financing public education, and contemporary policy issues regarding school and college finances. Focuses on how educational leaders can most effectively manage resources to further the vision, goals, and philosophy of the organization.

EDD 614. Issues in Educational Leadership: Synthesis and Application. 2 - 3 Units

Prerequisite(s): Successful completion of all previous courses in the EDD program (EDD 600-EDD 613) with a grade of B or higher and no incompletes.
Term Typically Offered: Spring only

This seminar integrates the principal three themes of the program: leadership, policy, methods, and equity. Students will take a qualifying exam to demonstrate their mastery of key program skills, concepts, and theories and their readiness to undertake dissertation research.
EDD 615. Dissertation Proposal Seminar. 6 Units  
**Prerequisite(s):** Passed Ed.D. Qualifying Examination and instructor permission.  
**Term Typically Offered:** Fall, Spring

Provides faculty and peer guidance in preparation of material to develop the dissertation proposal. Students will be guided in the clarification of dissertation topic, familiarization with relevant literature, and the development of a sound methodology. Students will learn how to critically analyze and provide constructive criticism to key research components proposed by others. At the end students are expected to complete the first three chapters of their dissertation in anticipation of their dissertation defense.

EDD 616. Dissertation I. 6 Units  
**Prerequisite(s):** Admission into the Ed.D. in Educational Leadership Program and instructor permission.  
**Term Typically Offered:** Fall, Spring

Each candidate will work with a dissertation advisor (dissertation committee chair) to conduct independent research leading to the completion of a dissertation. Twelve units of dissertation study will be required for completion of the program.  
**Note:** Students must have passed their qualifying examination and successfully defended their dissertation proposal.

EDD 616A. Dissertation I - Seminar. 3 Units  
**Prerequisite(s):** Admission into the Ed.D. in Educational Leadership Program and instructor permission.  
**Corequisite(s):** EDD 616B.  
**Term Typically Offered:** Fall, Spring

Each candidate will work with a dissertation advisor (dissertation committee chair) to conduct independent research leading to the completion of a dissertation. Twelve units of dissertation study will be required for completion of the program. This course provides a 3 unit seminar in support of the first phase of the dissertation.  
**Note:** Students must have passed their qualifying examination and successfully defended their dissertation proposal.

EDD 616B. Dissertation I - Research and Writing. 3 Units  
**Prerequisite(s):** Admission into the Ed.D. in Educational Leadership Program and instructor permission.  
**Corequisite(s):** EDD 616A  
**Term Typically Offered:** Fall, Spring

Each candidate will work with a dissertation advisor (dissertation committee chair) to conduct independent research leading to the completion of a dissertation. Twelve units of dissertation study will be required for completion of the program.  
**Note:** Students must have passed their qualifying examination and successfully defended their dissertation proposal.

EDD 617. Dissertation II. 6 Units  
**Prerequisite(s):** Admission into the Ed.D. in Educational Leadership Program and completion of EDD 616 and instructor permission.  
**Term Typically Offered:** Fall, Spring

Each candidate will work with a dissertation advisor (dissertation committee chair) to conduct independent research leading to the completion of a dissertation. Twelve units of dissertation study will be required for completion of the program.

EDD 617A. Dissertation II - Seminar. 3 Units  
**Prerequisite(s):** Admission into the Ed.D. in Educational Leadership Program and instructor permission. EDD 616A.  
**Corequisite(s):** EDD 617B.  
**Term Typically Offered:** Fall, Spring

Each candidate will work with a dissertation advisor (dissertation committee chair) to conduct independent research leading to the completion of a dissertation. Twelve units of dissertation study will be required for completion of the program.  
**Note:** Students must have passed their qualifying examination and successfully defended their dissertation proposal.

EDD 617B. Dissertation II - Research and Writing. 3 Units  
**Prerequisite(s):** Admission into the Ed.D. in Educational Leadership Program and instructor permission. EDD 616B.  
**Corequisite(s):** EDD 617A.  
**Term Typically Offered:** Fall, Spring

Each candidate will work with a dissertation advisor (dissertation committee chair) to conduct independent research leading to the completion of a dissertation. Twelve units of dissertation study will be required for completion of the program.  
**Note:** Students must have passed their qualifying examination and successfully defended their dissertation proposal.

EDD 623. Educational Foundations. 3 Units  
**Term Typically Offered:** Fall only

This course introduces major sociological theories, key education history and policy, current and reoccurring equity debates in education—concepts fundamental to educational leadership, policy, and doctoral research. It includes a survey of seminal theorists, social theory, and its application; key historical events, facts, policies, and decisions that influence and situate contemporary educational practice; and important equity debates, such as segregation and tracking, access and quality, public and private roles, testing and accountability, and others.

EDGR 210. Contemporary Issues in Education: Curriculum and Social Emotional Well Being of Students. 3 Units  
**Term Typically Offered:** Fall, Spring

This course examines contemporary issues in education, with special attention to the social, cultural, political, economic, and institutional dynamics of educational processes and the impacts on students, schools, and communities. Fulfilling the mission of the Masters programs and the College of Education vision, the course focuses on preparing students to become social change agents in schools and communities. Topics covered will fit into the two threads of (a) curriculum and (b) social emotional well-being of students.
EDGR 211. Contemporary Issues in Education: Context of Schooling and Leadership.  3 Units
Term Typically Offered: Fall, Spring
This course examines contemporary issues in education, with special attention to the social, cultural, political, economic, and institutional dynamics of educational processes and the impacts on students, schools, and communities. Fulfilling the mission of the Masters programs and the College of Education vision, the course focuses on preparing students to become social change agents in schools and communities. Topics covered will fit into the two threads of (a) context of schooling and (b) leadership.

EDGR 220. Issues in New Literacies throughout the Lifespan.  3 Units
Term Typically Offered: Fall, Spring
This course examines contemporary issues in literacy. The course introduces students to pedagogies and politics of new literacies within a variety of contexts: academic, new literacy studies, technology literacy, cultural, family, community, and workplace literacy. From a frame of literacy/illiteracy, students examine its connections with economic, political, social, occupational, education, governmental, and cultural change. Students will study how literacy programs are organized and implemented, examine research on the rationale for literacy, including the connection between literacy and healthy, livelihoods, empowerment, community development and cognitive skills.

EDGR 251. Principles of Universal Design for Learning.  3 Units
Term Typically Offered: Fall only
Provides an introduction to the UDL educational framework to explore strategies for educators and course designers to build UDL into lessons and assessments so all participants have equal opportunities to learn. A range of topics in UDL explore ways for practitioners to use the framework as a guide to design flexible curriculum in a variety of disciplines.

EDGR 252. Instructional Design and eLearning Practicum I.  3 Units
Term Typically Offered: Fall only
Provides an opportunity to demonstrate competence in applying concepts from instructional design, project management, and educational technology based on the results of a needs analysis in a field-based setting. Students will design an inclusive instructional intervention and present a model for an online or hybrid eLearning modality. Program project plan provides support for students’ culminating projects/thesis.

EDGR 253. Instructional Design and eLearning.  3 Units
Term Typically Offered: Spring only
This course provides students with experiences to develop the knowledge, skills, and dispositions essential in the design of instruction that involves uses of inclusive technology for learning. Students will develop teaching and learning activities that may include webinars, parts of a course or workshop, online learning, or others with the instructor’s approval. Students will explore and apply instructional design processes, the UDL framework, and theories for analysis, planning, and evaluation of equitable and inclusive learning experiences for diverse audiences.

EDGR 254. Instructional Design and eLearning Practicum II.  3 Units
Term Typically Offered: Spring only
Provides a continued opportunity to demonstrate competence incorporating concepts from instructional design, project management, and educational technology in the field-based program project. Students will develop, incorporate, and evaluate the effectiveness of applying the UDL principles to an instructional intervention. Project plan provides support for students’ culminating projects/thesis.

EDGR 255. Multimedia and Advanced Applications for Inclusive Course Design.  3 Units
Term Typically Offered: Spring only
Examines technology and multimedia as the foundation for inclusive education strategies. Includes the necessity for accessible technology applications, web design, and learning materials. Explore strategies in which technology can be utilized in the development of inclusive learning materials.

EDGR 256. Aligning Culturally Responsive Education and UDL.  3 Units
Term Typically Offered: Summer only
Advanced study of effective and inclusive education design. Examine curriculum design through a culturally responsive lens in digital spaces where a diversity of voices are affirmed. Studies theories of learning, assessment, individual differences, cultural, historical, philosophical, and social/political influences. Students will utilize the UDL framework to anticipate barriers to learning for historically underrepresented communities.

EDGR 257. Culminating Experience in MA in UDEL.  3 Units
Term Typically Offered: Summer only
Student will evaluate the implementation of Program project. Culminating Exam will consist of an ePortfolio organized with program coursework artifacts. Student reflections of educational experiences through various program courses will be included.

EDGR 260. Writing and Research Across the Disciplines.  3 Units
Prerequisite(s): Admission to graduate program in the College of Education or instructor permission
Term Typically Offered: Fall, Spring
Orientation to graduate study design to introduce students to research within their field of study and across disciplines in the College of Education. Overview of qualitative and quantitative methods and basic statistical concepts. Focus on writing to communicate evidence-based knowledge in a professional manner using APA style. Includes research presentations, active discussion, critical reading, and analytical writing with some activities.

Note: This course serves as a foundation for further study and must be taken prior to 250. This course satisfies the GWI requirement.

EDGR 270. Makerspaces.  3 Units
Term Typically Offered: Fall, Spring, Summer
This course examines makerspaces as locales, which are central to “maker” culture. Students will explore the role of makerspaces in local, national and international communities. Specifically, students will conduct critical analysis of the concepts surrounding the rise of “third spaces” in American society to understand the proliferation of makerspaces throughout the United States. Students will also investigate the integration of makerspaces into schooling and vocational practices as they explore ways that makerspaces function to develop 21st century learning and innovation.
EDGR 272. Project-Based Learning and Assessment for Maker Educators. 3 Units
Prerequisite(s): EDGR 270, EDGR 273
Corequisite(s): Practicum
Term Typically Offered: Spring, Summer

In this hybrid course that includes equal parts theory and practical application, students will experience what it is to both complete skill and performance based tasks using a Makers approach and also assess those same tasks through the lens of 21st Century Skills: communication, collaboration, critical thinking, problem solving, creativity and innovation.

EDGR 273. Maker Theory and Practice. 3 Units
Term Typically Offered: Fall, Spring, Summer

This course is an overview of theoretical frameworks that undergird making, the maker movement, and Maker Education. We will examine the ideas and practices associated with educational reforms that emphasize do-it-yourself (DIY) learning and 21st century skill development in high-tech and low-tech environments. Students will critically investigate the connections between theoretical perspectives and applied practices including STEM/STEAM Initiatives, design thinking, critical making, project-based learning, and universal design for learning. Theories that students will explore include: constructivism, constructionism, culturally sustaining pedagogy.

EDGR 274. Practicum for Maker Educators. 3 Units
Term Typically Offered: Spring, Summer

Supervised maker practice in community and/or school setting to be approved by instructor. Practicum emphasizes the function of maker theories in the development and implementation of maker programming. Basic requirements: 200 clock hours with at least 100 hours devoted to practical application of theoretical frameworks in programming and assessment, two hours per week of skill building with maker tools, and one hour bi-weekly of mentoring with practicum supervisor. Prerequisite: EDGR 270, EDGR 272, and EDGR 273.
Credit/No Credit

EDGR 287A. Seminar in Culminating Experience Exploration and Design. 1 Unit
Term Typically Offered: Fall only

Explore and identify potential Culminating Experience project topics in instructional design and/or educational technology trends and issues through surveys of published research, discussions, and presentations with peers and professionals. Compare and contrast existing literature and research, identify trends, recognize real-world best practices, and explore underlying factors contributing or relating to your Culminating Experience topic of interest.
Credit/No Credit

EDGR 287B. Seminar in Culminating Experience Development and Proposal. 2 Units
Prerequisite(s): EDGR 287A
Term Typically Offered: Spring only

Discuss, develop and propose a Culminating Experience project in instructional design and/or educational technology based on prior exploration and identification of topics and issues. Develop program ePortfolio.
Credit/No Credit

EDGR 557. Culminating Experience in MA in UDEL. 3 Units
Term Typically Offered: Summer only

Student will evaluate the implementation of Program project. Culminating Exam will consist of an ePortfolio organized with program coursework artifacts. Student reflections of educational experiences through various program courses will be included.

EDLP 200. Diversity and Equity in Educational Leadership. 3 Units
Term Typically Offered: Fall, Spring

Students will engage in reflection regarding equity focused practices and policy throughout educational systems. Students will develop an understanding of how, and ability to lead for a just, equitable, and inclusive educational system.

EDLP 201. Foundations of Educational Leadership. 3 Units
Term Typically Offered: Fall, Spring

Designed to introduce students to leadership theories and their direct connection to practice in the field of educational leadership. Develops in students the ability to examine various leadership theories, frames, techniques, and lenses that can be used to effectively lead schools and other educational settings.

EDLP 202. School Law and Ethics of Educational Leadership. 3 Units
Term Typically Offered: Fall, Spring

The study of school law and ethical decision making as it applies to school leadership including federal and state decisions affecting the educational setting.

EDLP 203. Foundations of Educational Leadership. 3 Units
Term Typically Offered: Fall, Spring

School finance with focus on the State of California school system.

EDLP 205. Instructional Leadership. 3 Units
Term Typically Offered: Fall, Spring

Instructional leadership that focuses on the diverse needs of students through the collection and analysis of data, state standards, accountability systems and culturally relevant pedagogy. Theory and practice will be explored on the best practice of supervisory techniques, classroom observation, and teacher improvement.

EDLP 209. Organizational Systems and Human Resources. 3 Units
Term Typically Offered: Fall, Spring

Students will engage in examination, synthesis, and application of human resources and management practices necessary to effectively serve as school leader in P-12 educational setting.

EDLP 221. Foundations in Higher Education Leadership. 3 Units
Prerequisite(s): Admission to the Master of Education: Higher Education Leadership Option.
Term Typically Offered: Fall, Spring

Analyzes higher education including its historical, political, philosophical and social aspects with emphasis upon the implications of crucial issues for leaders in higher education. An examination of the historical origins of contemporary practices and discourse and an analysis of the complex relationships between society and institutions of higher education: patterns of governance and coordination; diversity; overview of organizational and administrative structure; faculty; curriculum; student affairs, policy, and demographic trends.
EDLP 222. Diversity in Higher Education. 3 Units
Prerequisite(s): Admission to the Master of Education: Higher Education Leadership Option.
Term Typically Offered: Fall, Spring

Engages participants in a process of inquiry and reflection through self-critique, peer critique, and the dialogical examination of our assumptions, ideas, and understandings that promote intellectual growth. Participants will examine and discuss the literature, research, and discourse concerning theory, policy, and practice about diversity and its relation to higher education.

EDLP 223. Workforce Development Resource Planning, Implementation, and Evaluation. 3 Units
Term Typically Offered: Fall, Spring

Builds on the foundational competencies for workforce education and development professionals. Emphasis is on workforce development planning, analysis, design, implementation, management, and measurement and evaluation processes. Introduces several program planning models and frameworks used in the field of workforce development.

EDLP 224. Advanced Seminar: Dynamics of Organizational Change. 3 Units
Term Typically Offered: Fall, Spring

Students will engage in examination, synthesis, and application of theories of change, organizational problem solving, planning and evaluation and change management. An exploration of administrative roles and responsibilities.

EDLP 225. Advanced Seminar: Ethical Decision Making. 3 Units
Prerequisite(s): Admission to the Master of Education: Higher Education Leadership Option.
Term Typically Offered: Fall, Spring

Links analysis with action through a survey of the ethical, legal, and professional issues facing the public or private education administrator. Underlying decision making is to understand the basic nature of the academic enterprise and apply social and moral values to the management of higher education and ethical decision making.

EDLP 226. Workforce Development Professional Competencies. 3 Units
Term Typically Offered: Fall, Spring

Explores the foundational and professional competencies of workforce education and development in the context of educational institutions, business and industry, government, NGOs, and economic development at the national and local/regional level. Examines the research literature pertaining to identification of those competencies that are demonstrated to be critical for professional success as a Workforce Development Professional.

EDLP 227. Leading the Way for Student Success: Student and Instructional Services. 3 Units
Term Typically Offered: Fall, Spring

Participants will explore changing demographics, accountability regarding statewide mandates, reporting regulations, and accreditation, new technology and other factors impacting California's community college student services programs and professionals. Gain an understanding of the philosophy and mission of student services initiatives and programs and student development theory. Examine the role of faculty as leaders in curriculum, instruction and assessment and student success. Understand the purposes and uses of research and technology to address student outcomes, teaching and learning, institutional effectiveness, and decision-making.

EDLP 228. Innovative Leadership: Strengthening Organizational Capacity. 3 Units
Term Typically Offered: Fall, Spring

California higher education leaders are presented with increased legislative and public pressure for accountability while in an era of chronic and disparate under-funding of the system. Understand the relationship between higher education finance and the overall fiscal operations of California's higher education systems.

EDLP 229. Adult Education and Learning. 3 Units
Term Typically Offered: Fall, Spring

Explores the historical and philosophical foundations of the field of adult education and learning. Contemporary applications of adult learning theories and practices are explored to provide a broad understanding of andragogy (the art and science of teaching adults) and how it relates to workforce development and other related fields (e.g., career and technical education, human resource development).

EDLP 230. Master of Arts Thesis/Project Seminar. 3 Units
Prerequisite(s): EDLP 250 and advancement to candidacy.
Term Typically Offered: Fall, Spring

This individualized seminar is designed to extend research knowledge and provide direction in the use of library/professional education resources, as well as exposure to sample theses and projects using APA style. Reviews research methods and a review of the literature and provides instruction in the appropriate academic writing style and format for academic presentation.

Credit/No Credit

EDLP 250. Education Research. 3 Units
Prerequisite(s): Admission into the EDLP Program.
Term Typically Offered: Fall, Spring

Studies qualitative and quantitative methods in the development of reliable knowledge in the field of education. Includes identification and formulation of research problems, research designs and presentation of reports representative of different research strategies. Establishes and improves students' professional and academic writing skills in preparation for leadership duties. Classified students are encouraged to take this course early in their graduate programs.

Note: Graduate Writing Intensive (GWI) course.
EDLP 255. Field Experience Seminar. 3 Units
Prerequisite(s): Completion of 12 units including EDLP 200, EDLP 201, and either EDLP 205 or EDLP 206A for Preliminary Administrative Services Internship Credential students only.
Corequisite(s): EDLP 401 and/or EDLP 402 for Administrative Services Credential students only.
Term Typically Offered: Fall, Spring
Experience and practice in observation and analysis of school environment, including disaggregated student achievement data.
Note: Intern Students are allowed to take class twice and can take course concurrently with EDLP 401 and EDLP 402.
Credit/No Credit

EDLP 270. Advanced Seminar: Applied Leadership and Staff Teambuilding. 3 Units
Prerequisite(s): Graduate level status within the School of Education and instructor permission.
Term Typically Offered: Fall, Spring
Develop a comprehensive theoretical/conceptual framework from which to view current research surrounding Organizational Leadership and Staff Teambuilding. Special emphasis will be on providing students with experiential learning activities beyond the classroom and incorporate challenging outdoor components. Students will develop a resource portfolio relevant to their unique work situations.

EDLP 273. Advanced Seminar: Grants, Proposals and Systematic Planning. 3 Units
Term Typically Offered: Fall, Spring
Systematic planning theory and skills with particular attention to use of these skills in the development of grant proposals. Students will use funding agency regulations and guidelines relative to program development and implementation, and will develop a proposal which may be submitted to a funding agency.
Credit/No Credit

EDLP 277. Advanced Seminar: Assessment. 2 Units
Prerequisite(s): Admitted into the Professional Administrative Credential.
Term Typically Offered: Fall, Spring
Engage participants in a process of ongoing assessment of their administrative practice as school leaders. Such ongoing assessment uses multiple points of data, multiple sources of information, and multiple feedback sources such as colleagues and mentors.
Credit/No Credit

EDLP 286. Advanced Seminar: Supervision and Leadership. 3 Units
Prerequisite(s): Admission to the Educational Leadership Program, EDLP 206A, instructor permission.
Term Typically Offered: Fall, Spring
Through lecture and discussion, philosophical and practical problems of supervision of instruction will be explored. Current research on effective teaching, staff development, supervisory techniques, and theories of learning for both students and adults will be examined as a basis for sound supervision practices.

EDLP 292. Advanced Seminar: Current Topics in Educational Leadership and Policy Studies. 3 Units
Term Typically Offered: Fall, Spring
Selected current topics of concern to those involved with the administration of schools and other educational systems.
Credit/No Credit

EDLP 293. Induction Seminar. 2 Units
Term Typically Offered: Fall, Spring
Induction Seminar leads to the training experience of the Professional Administrative Services Credential candidate. Facilitates the interaction among candidate, district mentor, and university advisor, per standards of the Commission on Teaching Credentialing. Through guided practice, candidates are prompted and supported in developing an individualized induction plan. This induction plan includes mentoring, academic program at the university and non-campus components.
Credit/No Credit

EDLP 296A. Capstone Research Project. 3 Units
Prerequisite(s): Advancement to Candidacy
Each student conducts an individual project to fulfill the culminating experience graduation requirement. The course covers application of research in education to the professional practice of educational leadership, and integrates the accumulated knowledge, skills and strategies delivered in the program. This course is the culmination of the MA in Educational Leadership/Higher Education Leadership, leading to completion of the final project and the 4-semester degree.
Credit/No Credit

EDLP 299. Special Problems Educational Leadership. 1 - 4 Units
Term Typically Offered: Fall, Spring
Individual projects or directed reading.
Note: Departmental petition required. Professional Credential Students only may take up to 8 units.
Credit/No Credit

EDLP 299C. Special Problems-Preliminary Administrative Services Credential. 1 Unit
Term Typically Offered: Fall, Spring
Individual projects for Preliminary Administrative Services Credential candidates at graduate/credential level especially for students capable of independent study. Admission with written approval by the instructor with which the student will be working and the program pathway coordinator.
Note: Students must have failed a CalAPA cycle(s) to take this course. This course may be repeated for up to 3 units of credit.
Credit/No Credit
EDLP 299T. Special Problems - Educational Leadership. 3 Units
Term Typically Offered: Fall, Spring
Individual projects or directed reading for students working on their culminating MA requirements.
Note: Departmental petition required.
Credit/No Credit

EDLP 401. Internship On-the-Job Experience. 8 Units
Term Typically Offered: Fall, Spring
First semester of the on-the-job internship experience. Interns are supervised by sponsoring employing agency, as well as by university faculty. Limited to, and required of, internship candidates for the Preliminary Administrative Services Internship Credential.
Credit/No Credit

EDLP 402. Internship On-the-Job Experience. 8 Units
Term Typically Offered: Fall, Spring
Second semester of the on-the-job internship experience. Interns are supervised by sponsoring employing agency, as well as by university sponsors. Limited to, and required of, candidates for the Preliminary Administrative Services Internship Credential.
Credit/No Credit

EDLP 403. Internship On-the-Job Experience. 8 Units
Corequisite(s): EDLP 403.
Term Typically Offered: Fall, Spring
Third semester of the on-the-job experience for candidates who have not completed their credential requirements during the first year of internship. (Refer to EDLP 401.) Limited to, and required of, candidates for the Preliminary Administrative Services Internship Credential.
Credit/No Credit

EDLP 404. Internship On-the-Job Experience. 8 Units
Corequisite(s): EDLP 404.
Term Typically Offered: Fall, Spring
Fourth semester of the on-the-job internship experience. (Refer to EDLP 403.)
Credit/No Credit

EDLP 413. Supplemental Internship Experience. 6 Units
Corequisite(s): EDLP 403.
Term Typically Offered: Fall, Spring
Third semester of the supplemental internship experience. Provides first-hand visitations and experiences in various educational and community agencies at state, county, district, and local school levels; additional supervised experience for candidates; and seminar experiences in observation and analysis of school environments for candidates for the Preliminary Administrative Services Internship Credential.
Credit/No Credit

EDLP 414. Supplemental Internship Experience. 6 Units
Corequisite(s): EDLP 404.
Term Typically Offered: Fall, Spring
Fourth semester of the supplemental internship experience. Provides first-hand visitations and experiences in various educational and community agencies at state, county, district, and local school levels; additional supervised experience for candidates; and seminar experiences in observation and analysis of school environments for candidates for the Preliminary Administrative Services Internship Credential.
Credit/No Credit

EDLP 495A. Field Study in Educational Leadership. 3 Units
Term Typically Offered: Fall only
On-the-job experience in which the candidate assumes responsibility for observation and analysis of school environments including leadership responsibilities, supervision of instructional program, and overall school climate.
Credit/No Credit

EDLP 495B. Field Study in Educational Leadership. 3 Units
Term Typically Offered: Spring only
Students will participate in leadership driven field experience at a TK-12 educational setting. The leadership activities will be purposefully planned to ensure the student engages in work that supports their learning as a future/current leader while simultaneously supporting the educational setting with their initiatives.
Credit/No Credit

EDLP 498. Advanced Administrative Field Experience. 8 Units
Prerequisite(s): Admission to Professional Administrative Services Credential Program and full-time employment as a school administrator.
Term Typically Offered: Fall, Spring
Candidates for the Professional Administrative Services Credential are supervised in full-time administrative roles by sponsoring employment agency and university faculty.
Credit/No Credit

EDLP 500A. Master of Arts Thesis/Project. 3 Units
Prerequisite(s): Advanced to candidacy and chair permission of his/her thesis or project committee.
Term Typically Offered: Fall, Spring
Completion of a thesis or project approved for the Master's degree.

EDLP 500B. Master of Arts Thesis/Project. 3 Units
Prerequisite(s): Advanced to candidacy and chair permission of his/her thesis or project committee.
Term Typically Offered: Fall, Spring
Completion of a thesis or project approved for the Master's degree.

EDS 140. Introductory Behavioral Statistics. 3 Units
Term Typically Offered: Fall, Spring
Descriptive and interpretative statistics in education and allied fields. Use of calculators and statistical tables. Lecture three hours.
EDS 202. Seminar in Neurodevelopmental Disabilities. 3 Units
Term Typically Offered: Fall, Spring
Examines topics and issues in neurodevelopmental disabilities and includes educational, clinical, habilitative, therapeutic, and medical perspectives. Focuses on collaborative, interdisciplinary perspectives on educational and related interventions with students who have neurodevelopmental disabilities.

EDS 203. Seminar for Resource Specialists: Management and Delivery of Services. 3 Units
Prerequisite(s): EDS 201, EDS 101 and Special Education Credential.
Term Typically Offered: Fall, Spring
Review of literature, and simulated experience in the various roles of the resource specialist in special education programs in the schools. Professional problem-solving strategies; standards and procedures; model program organizational alternatives; management approaches of resource specialist program (RSP); major developments and trends at Federal, State and local levels; references to legal provisions, rules and regulations in special education.
Credit/No Credit

EDS 213B. Mathematics Curriculum and Instruction in Inclusive Classrooms. 1 Unit
Prerequisite(s): Admittance to Mild/Moderate or Moderate/Severe Credential Program or permission of respective special education coordinator.
Term Typically Offered: Fall, Spring
Field-based practice lab (30 hours). Lab will be a synthesis and application of course content (EDS 213A) in a setting for students who receive special and/or general education services.
Credit/No Credit

EDS 214A. Social Science Curriculum and Instruction in Inclusive Classrooms. 2 Units
Prerequisite(s): Admittance to Mild/Moderate or Moderate/Severe Credential program or permission of respective special education coordinator.
Corequisite(s): EDS 214B.
Term Typically Offered: Fall, Spring
Prepares mild/moderate/severe and multiple subject teacher candidates to teach history-social science content standards for California public schools to all students, including English Learners and students with disabilities; to use analytical and critical thinking skills in history and social science; and to integrate history-social science topics, themes and concepts with other subject areas. Pedagogical topics include the use of timelines, maps, and artifacts, case studies, simulations, literature, art, multiple perspectives, SDAIE, cooperative projects, and research activities.

EDS 214B. Social Science Curriculum and Instruction in Inclusive Classrooms Lab. 1 Unit
Prerequisite(s): Admittance to Mild/Moderate or Moderate/Severe Credential program or permission of respective special education coordinator.
Corequisite(s): EDS 214A.
Term Typically Offered: Fall, Spring
Field-based practice lab (30 hours). Lab will be a synthesis and application of course content (EDS 214A) in a setting for students who receive special and/or general education services.
Credit/No Credit

EDS 215A. Science Curriculum and Instruction in Inclusive Classrooms. 2 Units
Prerequisite(s): Admittance to Mild/Moderate or Moderate/Severe Credential program or permission of respective special education coordinator.
Corequisite(s): EDS 215B.
Term Typically Offered: Fall, Spring
Prepares mild/moderate/severe and multiple subject teacher candidates to teach science content standards for California public schools to all students. Give participants the knowledge of basic principles and strategies related to science education appropriate for general education (k-8) teacher candidates. Participants will also develop, implement, and evaluate science curricula appropriate for those students with mild/moderate/severe disabilities. This includes an expanded treatment of science pedagogy, manipulative, technological supports, accommodations, inclusive instructional techniques, and other strategies specially suited to the instruction of English Learners and students with disabilities.

EDS 215B. Science Curriculum and Instruction in Inclusive Classrooms Lab. 1 Unit
Prerequisite(s): Admittance to Mild/Moderate or Moderate/Severe Credential program or permission of respective special education coordinator.
Corequisite(s): EDS 215A.
Term Typically Offered: Fall, Spring
Field-based practice lab (30 hours). Lab will be a synthesis and application of course content (EDS 215A) in a setting for students who receive special and general education services.
Credit/No Credit

EDS 222. Perspectives Workforce Dev. 3 Units
Term Typically Offered: Fall, Spring
Examines the premises of workforce development and advocacy with emphases on adult learning styles and learning communities. Explores the specific needs of the formal and informal vocational, technical and adult learning community in an ever-changing work environment.

EDS 223. Organization Learning Comm. 3 Units
Term Typically Offered: Fall, Spring

EDS 224. WF Assess+Accountability. 3 Units
Term Typically Offered: Fall, Spring

EDS 226. Resource Enhance For WDA. 3 Units
Term Typically Offered: Fall, Spring

EDS 227. Issues Impacting WDA. 3 Units
Term Typically Offered: Fall, Spring
EDS 228.  Sem:Future Workforce Dev.  3 Units
Term Typically Offered: Fall, Spring

EDS 250.  Educational Research.  3 Units
Prerequisite(s): Graduate status
Term Typically Offered: Spring only

Studies qualitative and quantitative methods in the development of reliable knowledge in the field of education. Includes identification and formulation of research problems, research designs and presentation of reports representative of different research strategies. Classified students are encouraged to take this course early in their graduate programs.

EDS 252A.  Advanced Teacher Induction Seminar.  2 Units
Prerequisite(s): Admission to Special Education Level II program.
Corequisite(s): EDS 252B.
Term Typically Offered: Fall, Spring

Leads to the development of a Professional Level II Education Specialist Credential induction plan for the support and professional development of the teacher credential candidate as required by the California Commission on Teacher Credentialing. The candidate, the university advisor, and the employer’s representative work together to plan course work, and provide individual assistance, and professional development opportunities to address individual performance goals. Seminar.
Credit/No Credit

EDS 252B.  Advanced Teacher Induction Seminar Lab.  1 Unit
Prerequisite(s): Admission to Special Education Level II program.
Corequisite(s): EDS 252A
Term Typically Offered: Fall, Spring

Level II candidate, university advisor/supervisor and employer’s representative work collaboratively to develop a professional plan which relates to the CCTC standards and the individual learning needs of the student. The class is designed as a lab to support the acquisition of all proscribed Level II standards and to support the development of the candidate’s professional portfolio for assessment of designated competencies.
Credit/No Credit

EDS 264.  Seminar in Counseling: Work Evaluation.  3 Units
Term Typically Offered: Fall, Spring

Study of the work evaluation process and the modalities utilized, with emphasis on the use of work evaluation in the rehabilitation process.

EDS 265.  Current Issues in Counseling: Disabled.  1 Unit
Term Typically Offered: Fall, Spring

Examination of myths regarding the disabled client. Course includes an exploration of counseling families with a disabled member, the impact of disability upon sexuality and upon interpersonal relationships. Factual data will be presented. The student’s attitude toward the disabled will be examined.
Credit/No Credit

EDS 267A.  Advanced Studies in Special Education-Seminar I.  3 Units
Corequisite(s): EDS 267B.
Term Typically Offered: Fall, Spring

For candidates accepted into the Level II Alternative Option Program; skills for inservice training, working with paraprofessionals, coordinating meetings, developing consensus, dealing with conflict and serving as part of collaborative teams; e-mail, use of Listproc and attendance at monthly seminars required; attaining and documenting competencies and developing portfolios related to outcomes of the Level II Mild/Moderate or Moderate/Severe Specialist Credential. Lecture.

EDS 267B.  Advanced Studies in Special Education Seminar I Laboratory.  3 Units
Corequisite(s): EDS 267A.
Term Typically Offered: Fall, Spring

Will be a synthesis and application of course content (EDS 267A) in a setting(s) for students who receive special education services. The 3-unit lab section requires approximately 90 hours of related field-based and/or on-the-job activities. E-mail/Internet access required.
Credit/No Credit

EDS 268A.  Advanced Studies in Special Education-Seminar II.  3 Units
Corequisite(s): EDS 268B.
Term Typically Offered: Fall, Spring

For candidates accepted into the Level II Alternative Option Program; skills for ongoing individualized assessment and curriculum adaptation to meet needs of diverse populations and advanced skills for behavioral management in inclusive settings; e-mail, use of Listproc and attendance at monthly seminars required; attaining and documenting competencies and developing portfolios related to outcomes of the Level II M/M or M/S Specialist Credentials; individualized planning for candidates who are self-directed and committed to self improvement. Lecture.

EDS 268B.  Advanced Studies in Special Education Seminar II Laboratory.  3 Units
Corequisite(s): EDS 268A.
Term Typically Offered: Fall, Spring

Synthesis and application of course content (EDS 268A) in a setting(s) for students who receive special education services. The 3-unit lab section requires approximately 90 hours of related field-based and/or on-the-job activities. E-mail/internet access required.
Credit/No Credit

EDS 269A.  Collaborative Strategies for Inclusive Practice.  2 Units
Prerequisite(s): CCTC Preliminary Multiple or Single Subject credential.
Sacramento State graduate status or CCE/Open University enrollee.
Corequisite(s): EDS 269B.
Term Typically Offered: Fall, Spring

For candidates seeking to meet Special Education CCTC requirements for Level 2 (Induction) Multiple or Single Subject Teaching Credentials. Candidates must demonstrate skills for ongoing IDEA and State mandates, curriculum adaptation to meet individual needs, and advanced skills for behavioral management in inclusive settings. All activities will be tied to attaining and documenting CCTC Level 2 special education standards through individual portfolios. Assignments will be designed to emphasize an interdisciplinary perspective to collaborative problem solving. E-mail/Internet access required.
EDS 269B. Collaborative Strategies for Inclusive Practice Lab. 1 Unit
Prerequisite(s): CCTC Preliminary Multiple or Single Subject credential. Sacramento State graduate status or CCE/Open University enrollee.
Corequisite(s): EDS 269A.
Term Typically Offered: Fall, Spring

Field-based practice lab (30 hours field). Lab will be synthesis and application of course content in a setting for students who receive special education services. Students will verify experiences across the age-span and in inclusive settings, agencies, and/or other natural environments.
Credit/No Credit

EDS 273A. Instructional Strategies - Mild/Moderate. 2 Units
Prerequisite(s): Admittance into Mild/Moderate Credential or M.A. in Education programs.
Corequisite(s): EDS 273B.
Term Typically Offered: Fall, Spring

Development of knowledge, skills, and strategies for the Mild/Moderate Credential Program area. Students are required to participate in class visitations, student tutoring, and interviews.
Credit/No Credit

EDS 273B. Instructional Strategies - Mild/Moderate - Lab. 1 Unit
Prerequisite(s): Admittance into Mild/Moderate Credential or M.A. in Education programs.
Corequisite(s): EDS 273A.
Term Typically Offered: Fall, Spring

Field-based practice lab (30 hours). Lab will be a synthesis and application of course content (EDS 273A) in developing instructional strategies for the Mild/Moderate Credential Program area. Students are required to participate in class visitations, student tutoring, and interviews.
Credit/No Credit

EDS 280. Foundational Elements of Adult Learning Disability Intervention. 2 Units
Term Typically Offered: Fall, Spring

Explore and analyze the most common social, emotional and psychological problems of adults with learning disabilities (LD) impacting cognition and learning. Topics include: current definitions, characteristics of learning disabilities (LD), the impact of dual diagnosis, and the collaborative role of the LD specialist regarding issues of professional conduct, ethics, and legality. Differences will be examined between LD and other disability categories such as Attention Deficit Disorder (ADD), Acquired Brain Injury (ABI), Developmentally Delayed Learners (DDL), etc.

EDS 281. Assessing Achievement in Adults with Learning Disabilities. 3 Units
Term Typically Offered: Fall, Spring

EDS 282A. Assess Cognitive SKls Adult LD. 3 Units
Term Typically Offered: Fall, Spring

EDS 282B. Assess Cognitive SKl Adult LD II. 3 Units
Term Typically Offered: Fall, Spring

EDS 283. Legal Issues+Adult Learning Di. 1 Unit
Term Typically Offered: Fall, Spring

EDS 285. Strategies to Enhance Academic Skills for Adults with Learning Disabilities. 3 Units
Term Typically Offered: Fall, Spring, Summer

For adults with learning disabilities (LD), compensatory learning strategies are vital tools for success in the post secondary academic arena and beyond. Learn to utilize the most effective teaching and learning strategies and review material and method for teaching adults with disabilities in reading, writing, spelling and mathematics. Topics include: subtypes of learning disabilities; historical as well as current teaching approaches; formal and informal assessment methods; cognitive function as a basis of understanding learning behaviors and learning strategies; and current technologies available to enhance learning opportunities. Learn how to empower adults with LD with the ability to adapt commonly used learning strategies to meet individual needs.

EDS 290. Issues in Early Childhood Education for Children with Disabilities. 3 Units
Term Typically Offered: Fall, Spring

Overview of current theories, research, policies and practices regarding educational services for children, from birth to 8, with disabilities and their families. Topics emphasized include typical/atypical development, interdisciplinary assessment, family involvement, community resources, program planning, mainstreaming, and collaborative case management. Requires observations/field study in settings serving young children with disabilities.

EDS 291A. Technology in Special Education. 2 Units
Prerequisite(s): Admittance to Special Education Program or instructor permission.
Corequisite(s): EDS 291B.
Term Typically Offered: Fall, Spring

Offers an overview of technology usage in special education. Topics covered include: current research; identification of needs of exceptional children that can be met through use of microcomputers; evaluation and prescription of software, hardware and assistive devices; writing computer-assisted instructional programs to meet special needs; time management, and the general implementation of microcomputers into a special education program.

EDS 291B. Technology in Special Education Lab. 1 Unit
Prerequisite(s): Admittance to Special Education Program or instructor permission.
Corequisite(s): EDS 291A.
Term Typically Offered: Fall, Spring

Field-based practice lab (30 hours). Lab will be synthesis and application of course content (EDS 291A) in technology usage with students who receive special education services. Credit/No Credit
EDS 332. Assessment Center Laboratory for Multiple Subject Candidates. 2 Units
Prerequisite(s): Admittance to Mild/Moderate or Moderate/Severe Credential program or permission of respective special education instructor.
Corequisite(s): EDSP 420B or approved equivalent by assigned advisor or department chair.
Term Typically Offered: Fall, Spring

Individual support to guide multiple subject candidates through the process of completing and submitting the culminating PACT Teaching Event and completion of their electronic portfolio. The signature assignments, formative PACT assessments and summative PACT Teaching Event represent a working electronic portfolio embedded throughout the credential program, and the summative component will be polished and formally submitted at the conclusion of the EDS 332.
Credit/No Credit

EDS 412. Student Teaching: Moderate/Severe. 5 - 10 Units
Corequisite(s): EDSP 233. A total of 10 units is required.
Term Typically Offered: Fall, Spring

Students teaching in a cooperating LEA/District providing services for students receiving Moderate/Severe special education program services. Candidates must meet the criteria for student teaching to be accepted to this course.
Note: Approximately 320 hours are required to meet competencies.
Credit/No Credit

EDS 439B. Early Fieldwork in School Psychology. 1 - 10 Units
Prerequisite(s): Satisfactory completion of first year coursework and EDS 439A Graded: Credit / No Credit Units: 1.0 -10.0
Term Typically Offered: Fall, Spring

Advanced fieldwork experience providing the opportunity for students to engage in the following activities: individual and group counseling; consultation with teachers, parents, and other school staff, and assessment of students. Students will work under the supervision of a credentialed school psychologist. A faculty supervisor from the School Psychology Training Program will work with students and field supervisor.
Credit/No Credit

EDS 460. Practicum in Individual Counseling/VRC. 3 Units
Prerequisite(s): Approval as a candidate in the Vocational Rehabilitation program; approval of advisor; and department petition.
Term Typically Offered: Fall, Spring

Supervised practice in individual counseling.
Credit/No Credit

EDS 461. Field Study in Counseling/VRC. 3 - 15 Units
Prerequisite(s): Approval as a candidate in the Vocational Rehabilitation program, completion of core courses except EDS 560, EDS 561, or Comprehensive Examination (oral or written), approval of advisor, and department petition.
Term Typically Offered: Fall, Spring

Directed field study for rehabilitation counselors. Supervised experiences are arranged in rehabilitation counseling. Forty hours of experience required for each unit of credit.
Credit/No Credit

EDS 472E. Student Teaching: Serious Emotional Disturbance. 10 Units
Corequisite(s): EDS 277.
Term Typically Offered: Fall, Spring

Students will be placed in approved settings which serve students with serious emotional disturbance as a primary disability; be expected to demonstrate skills for instruction across content areas; interact with emotionally disturbed students using a combination of counseling and behavior management strategies; and consult with families, co-workers, mental health representatives and other in a collaborative style.
Credit/No Credit

EDS 530. Project In WDA I. 2 Units
Term Typically Offered: Fall, Spring

EDS 531. Project In WDA II. 4 Units
Term Typically Offered: Fall, Spring

Certificate in Maker Education

Program Description

The Certificate in Maker Education program engages students in a 12 credit program designed to develop critical knowledge of making, the maker movement, and Maker Education. We will examine ideas and practices associated with educational reforms that emphasize making as an ethos of interest driven do-it-yourself (DIY) learning and culture. Students will investigate the knowledge, skills, and dispositions associated with 21st century skill development in makerspaces as formal and informal learning environments, and the development of “maker culture” in local, national, and international communities.

Admission Requirements

A 2.5 GPA in the last 60 semester or 90 quarter units completed in the undergraduate degree is required for admission. This is a graduate-level certificate program and students must maintain a grade point average of 2.5 or higher to remain in good standing in the program.

Certificate of Competency in Educational Technology

Total units required for Certificate: 12

Program Description

A graduate student may earn a certificate in Educational Technology by completing four 3-unit courses. These courses provide the competencies needed by teachers, trainers, or curriculum specialists to integrate
technology into the curriculum, scaffold its inclusion in instruction, and disseminate that knowledge via appropriate staff-development needs.

Minimum Grade Requirement
Minimum required GPA: 3.0 for all courses in the certificate program.

Certificate of Competency in Mathematics Education
Total units required for Certificate: 12

Program Description
A graduate student may earn a Certificate in Mathematics Education by completing the following courses. Enrollment in the Master’s program is not required provided that admission requirements are met, including having a teaching credential or being enrolled in a credential program.

Certificate of Competency in Teaching Reading to Adults
Total units required for Certificate: 15

Program Description
The Certificate in Teaching Reading to Adults (TRA Certificate) provides professional preparation and training in the theory and practice of teaching reading to adults. A combination of coursework in reading theory and pedagogy with teaching and/or tutoring experience provides the competencies and skills necessary to teach reading to adults. The program is designed for graduate candidates who expect to teach in community college or adult education settings.

Eligibility Requirements
- Candidates must either be in a graduate degree program at Sacramento State or must apply for graduate admission to the University. Once admitted to Sacramento State, prospective TRA
Certificate candidates must apply to the Certificate Coordinator for admission to the program.

- Candidates must take the Writing Placement for Graduate candidates (WPG) or take a Graduate Writing Intensive (GWI) course in their discipline within the first two semesters of coursework at California State University, Sacramento or secure approval for a WPG waiver.
- International candidates must have a TOEFL score of 600 or higher (or a score of 250 or higher on the computerized TOEFL) and a score of 5 on the Test of Written English.

For further information, contact the Certificate Coordinator, Calaveras Hall 138, (916) 278-6197.

Minimum Grade Requirement
The reading certificate requires 15 units of coursework with a minimum GPA of 3.0.

Total Units: 15

Doctorate in Education (Ed.D.)

Total units required for Doctorate: 60

Program Description
The Doctoral Program in Transformational Leadership is an award-winning Ed.D. program that represents a dynamic collaborative effort between the Educational Leadership and Policy Studies Program in the College of Education and the Department of Public Policy and Administration in the College of Social Sciences and Interdisciplinary Studies. This program connects theory to practice for the purposes of impacting educational systems.

Our degree focuses on preparing administrative leaders for California public elementary and secondary schools and community colleges and on the knowledge and skills needed by administrators to be effective leaders in California public schools and community colleges.

Our Cohort-based program is designed for working professionals, and classes are offered on Friday nights and Saturdays. Groups of students are admitted each year and take courses together. This creates several distinct advantages of group membership during graduate study which are intentionally fostered in the program:

- Cohorts offer support to candidates and provide opportunities for members to learn from one another.
- Cohorts establish professional ties that often last beyond the doctoral program itself; such networks are valuable in terms of continued professional support and growth.
- Fostering and monitoring candidates’ progress is enhanced in cohorts. The group carries with it the expectation that all but the occasional candidate will complete the program successfully, including such standard benchmarks as the qualifying examination, advancement to candidacy, and completion of the dissertation.

Admission Requirements
The Ed.D. Program admits candidates who meet the academic requirements for the Ed.D. degree program and who possess personal qualities and professional experiences that suggest a strong potential for success as doctoral candidates and as educational leaders in preK-12, community colleges, and higher education.

Applicants must have:

- An earned baccalaureate degree and master’s degree or the equivalent from an accredited institution of higher education with a grade point average in upper division and graduate study of 3.0 or above;
- Sufficient preparation and experience pertinent to educational leadership and a commitment to educational equity and racial justice;
- Demonstrated educational leadership potential and skills including successful experience in school, postsecondary, community, and/or policy leadership;
- Advanced writing and criticality to analyze literature and formulate a research agenda;
- Demonstrated academic excellence, problem-solving ability, and an interest in assessing and bringing about improvements within current educational policies and practices.

Admission Procedures
Applicants must complete a university application by the posted application deadline date for the term applying. For more admissions information and application deadlines, please visit the Office of Graduate Studies website (http://www.csus.edu/gradstudies/). Prospective doctoral students must file the following with the Office of Graduate Studies, Riverfront Center 215, (916) 278-6470:

Please note: The GRE requirement is suspended. If applicants send in GRE scores, the scores cannot be taken into consideration when making admissions decisions.

A complete application includes:

- An online application that can be accessed at Cal State Apply (https://www2.calstate.edu/apply/)
- Statement of Purpose
- Essay Responses
- Writing Sample
  - Important Note: Your writing in all cases should be your own original work and may not be written, in part or in whole, by a third party. The admissions committee will carefully consider both the content and the writing in its assessment of your candidacy for graduate study at Sacramento State University.
- Resume or CV detailing education and professional experience
- Statement of Support: A brief statement of support for your doctoral studies from your employer.
- Unofficial Transcripts: Upload one set of unofficial transcripts from all colleges and universities attended
- Letters of Recommendation: Three letters of recommendation attesting to the leadership ability and scholarship of the candidate
- Official Transcripts: Send one set of official transcripts from all colleges and universities attended, other than Sacramento State;
fail to maintain a grade point average of 3.0, the student would be notified and counseled regarding requirements for satisfactory progress toward the degree. Systemwide criteria of satisfactory academic progress are provided in Appendix 5, Title 5 of California Code of Regulations: The Doctor of Education Degree §40512(c).

Students who need to take a leave of absence are typically provided two options. One is to take extra coursework to make up courses missed and return to their original cohort. The second is to join a later cohort that, at the time they return, is taking the classes that they missed. If a student goes on an approved leave of absence and a course is not offered upon their return, a modified version of the course can be offered as a substitute through independent study or a course substitution may be made, depending on the course requirement.

Criteria for Continuation in the Program

Students must maintain at least a 3.0 cumulative grade point average in the program and not have a grade point average below 3.0 in any two successive terms to be considered in good academic standing. They must also meet all the requirements of graduate students outlined in the University Catalog.

Students who fall below a 3.0 grade point average in any one term will be placed on academic probation and notified of this in writing. Students who fail to make satisfactory academic progress may be officially disqualified from the program in writing in accordance with policies established by the campus and based upon the recommendation of the Ed.D. Program faculty.

To ensure that a decision to disqualify a student because of unsatisfactory academic progress is just, basic due process requirements will be met. Faculty will conduct a thorough review and consultation and will provide a written recommendation by the Ed.D. Program Director to the Graduate Division. The student may appeal the decision. A student who has been disqualified from the program will not be allowed to continue in the Ed.D. Program, enroll in doctoral level courses in the program, or register again in the Ed.D. Program without a formal application and re-admission to the University.

Ed.S. in School Psychology

Total units required for Ed.S.: 100-107

Program Description

The Specialist in Education, School Psychology (Ed.S.) is an advanced degree that requires students to have completed both the Master of Arts (MA) in School Psychology or its equivalent, and the Pupil Personnel Services School Psychology Endorsement Credential. Completion of the Ed.S. requires additional coursework (beyond the MA and Credential requirements) focused on identifying and addressing school-related issues that arise during school psychology practice. The School Psychology program at CSUS is approved as a Specialist level program by the National Association of School Psychologists.

Note: If students are to graduate under the provisions of this catalog, they must maintain continuous enrollment from the date of classification to the date of graduation. Students who are planning to be absent for more than one semester must file a Leave of Absence request and have it approved prior to the absence.

Admission Requirements

Admission as a classified graduate student in the Specialist in Education (Ed.S.): School Psychology, requires:

- a baccalaureate degree
- a minimum 3.0 overall grade point average (if GPA is below 3.0, student may be accepted conditionally)
- proficiency in written English composition as demonstrated by either passing the California State University, Sacramento, Writing Placement for Juniors exam or equivalent, or passing ENGL 109W (or its equivalent) with a grade of C or better
- satisfying the Basic Skills Requirement (or having registered for the CBEST examination). For more detailed information, visit the CTC website (https://www.ctc.ca.gov/credentials/leaflets/cl667.pdf).

Example of ways to satisfy Basic Skills Requirement include:

a. Pass the California Basic Educational Skills Test (CBEST)
b. Pass the CSET Multiple Subjects plus Writing Skills examination
c. Pass the CSU Early Assessment Program (EAP) or the CSU Placement Examinations
d. Achieve qualifying score on the SAT or ACT (see the CTC website (https://www.ctc.ca.gov/credentials/leaflets/basic-skills-requirement-(cl-667)/))

- score a 3 or above on specific AP examinations (see the CTC website (https://www.ctc.ca.gov/credentials/leaflets/basic-skills-requirement-(cl-667)/))
- earn a grade of “B” or better in specific college or university courses as detailed on the CTC website (https://www.ctc.ca.gov/credentials/leaflets/basic-skills-requirement-(cl-667)/).
- completion of prerequisite courses addressing the following topics or their equivalents (contact a school psychology advisor for more information on equivalent experiences):
  a. Abnormal psychology
  b. Introduction to counseling
  c. Descriptive statistics
  d. Issues of diversity

- experience working with diverse learners in a K-12 school setting (30 hours minimum, which includes work with special needs students)
- completion of a course in applied psychometrics/psychological testing/psychological measurement is recommended

Applicants who have deficiencies in admission requirements that can be removed by specified additional preparation may be admitted with conditionally classified graduate status. Any deficiencies will be noted on a Prerequisite Guidance Form and must be resolved before advancement to candidacy (typically within the first year of full time study).

Admission Procedures

All students must file the following with the Sacramento State Office of Graduate Studies, River Front Center 215, (916) 278-6470:
- an online application via Cal State Apply for admission; and
- one set of official transcripts from all colleges and universities attended, other than Sacramento State.

For more admissions information and application deadlines, visit the Office of Graduate Studies website (http://www.csus.edu/gradstudies/).

In addition, each applicant must complete a separate application for admission to the School Psychology Program:
- the program’s application is available online (http://www.csus.edu/coe/apply/graduate.html);
- two letters of reference (references will submit letters online);
- one set of transcripts;
- evidence of experience working or volunteering in schools and/or working with youth;
- evidence of knowledge of the profession of school psychology;
- evidence of strong written communication skills (obtained via writing samples);
- evidence of strong oral communication skills (obtained via an interview with a current school psychology graduate student, practicing school psychologist, and core school psychology faculty member).
Department applications are due by February for admission the following Fall Semester. Applications are only accepted and processed once per year, during spring semester for admission the following fall.

Minimum Units and Grade Requirements for the Degree
Units required for the Ed.S.: 100-107

Minimum Cumulative GPA: 3.0. No single course in which a student receives a grade below "B-" will be counted as credit toward the degree unless the student has petitioned for acceptance of the course, and the petition has been accepted and approved by School Psychology Program faculty.

Note: A minimum of 21 of these units must be taken in residence at California State University, Sacramento. Use of extension courses must be approved by the advisor. Enrollment in Special Problems (EPSY 299) will only be granted under exceptional circumstances.

Advancement to Candidacy
Students must advancement to candidacy prior to enrolling in EPSY 239 and EPSY 540 or EPSY 542. School psychology students are typically automatically advanced to Ed.S. degree candidacy upon completion of their MA in School Psychology (having already completed Advancement to Candidacy Forms before earning the MA in School Psychology).

Students who already hold an appropriate master’s degree at the time of admission to the School Psychology Program, and who do not want to earn a second master’s degree, but do wish to earn the Ed.S degree must file an application for Advancement to Candidacy, indicating a proposed program of study. This procedure should begin (typically as soon as the end of the first year in the program) as soon as the classified graduate student has:

- been assigned an advisor;
- removed any deficiencies in admission requirements;
- completed 24 units of School Psychology Program coursework content knowledge elective units with a minimum 3.0 overall GPA; and
- completed the Graduate Writing Assessment Requirement (GWAR) by passing EPSY 201, Legal Aspects of Special Education, with a grade of "B" or higher.

Advancement to Candidacy forms are available in the Department office and on the Office of Graduate Studies website. The student fills out the form after planning the a degree program in consultation with a faculty advisor and approved by the Graduate Coordinator. The completed form is then returned to the Office of Graduate Studies for approval. Note deadline dates posted by the Office of Graduate Studies for submission of this form.

Culminating Experience Requirements
Enrollment in the Ed.S. Seminar (EPSY 239) and the Ed.S. Thesis (EPSY 540) or Ed.S. Project (EPSY 542) courses require students to file and have approved a Reservation Form, for these courses the semester before intended registration. This program follows the guidelines provided by the American Psychological Association’s most current edition, for formatting of projects and thesis. The office of Graduate Studies, River Front Center, Room 215, (916) 278-6470, offers formatting guides and templates on their website.

Graduation Procedures
Prior to graduation, an application for graduation must be filed in the Office of Graduate Studies by the specified deadline. All course work leading to this degree must be completed within a seven year period. Be sure to attend to deadline dates posted by the Office of Graduate Studies for submission of this form.

MA in Education (Curriculum and Instruction)

Total units required for MA: 30

Program Description

The Master of Arts in Education (Curriculum and Instruction) is designed to provide professional and specialized preparation for the candidate interested in acquiring knowledge and skills essential for the design and development of curriculum and related instructional practices. The program provides a variety of options for educators to develop and enhance expertise in a particular field of interest related to elementary, middle school, and secondary education. Each course is designed to produce an ideal blend of theory, research and practice in modern, diverse educational settings. The program is committed to exploring critical intellectual questions of contemporary education. Program instructors bring varied levels of expertise with advanced degrees from major research universities and classroom experience in K-12 and higher education settings.

Students may apply to either a stateside traditional cohort or a College of Continuing Education online cohort. The traditional cohort will meet face-to-face. The online cohort will meet approximately 25% synchronously (real time) and 75% asynchronously (your own schedule within a given timeframe). During the synchronous sessions students will participate in community development, collaboration, and communications that will allow them to get to know their peers and instructors and facilitate instructional delivery suited to an online format. During asynchronous sessions students will build on learning experiences acquired in the synchronous sessions while deepening the knowledge, skills and dispositions that emerge with reflective, “on your own schedule” participation. Students in the online cohort will complete six units of coursework during the summer term as part of the condensed format.

Admission Requirements

Admission as a classified graduate student requires:

- a baccalaureate degree;
- a minimum 3.0 GPA in the last 60 units;
- proficiency in written English composition as demonstrated by either passing the Sacramento State Writing Placement for Juniors exam or equivalent, or enrolling in ENGL 109W passing with a grade of C or better; and
- an interview with a program administrator/faculty team;

Applicants who have deficiencies in admission requirements that can be removed by specified additional preparation may be admitted with conditionally classified graduate status. Any deficiencies will be noted on a written response to the student's admission application.

Admission Procedures

The stateside traditional program admits a cohort of students in fall only. The online program offered through the College of Continuing Education admits a cohort of students in fall and/or spring. Prospective graduate students, including Sacramento State graduates, must file the following with the Office of Graduate Studies, Riverfront Center 215, (916) 278-6470:

- an online application for admission; and
- one set of official transcripts from all colleges and universities attended, other than Sacramento State.

For more admissions information and application deadlines, please visit the Office of Graduate Studies website (http://www.csus.edu/gradstudies/).

The graduate degree program is subject to general University and Departmental requirements. These requirements are explained in the Graduate Degree Requirements (p. 86) section of the University Catalog.

Specific Additional Admission Requirements

General Admission Requirements/Procedures for MA in Graduate & Professional Studies in Education (GPSE) apply, plus:

- supplemental application for the MA in Curriculum & Instruction, including a complete set of unofficial transcripts, an essay based on a prompt that will be provided to you, and a statement of purpose; and
- two years of teaching experience or its functional equivalent; or program coordinator approval.

Applicants who have deficiencies in admission requirements that can be removed by specified additional preparation may be admitted with conditionally classified status. Any deficiencies will be noted on a written response to the student’s admission application.

Minimum Units and Grade Requirement for the Degree

Units required for the MA: 30

Minimum cumulative GPA: 3.0; no units with a grade lower than "C" may apply toward the degree.

General Advancement to Candidacy Procedures

Each student must file an application for Advancement to Candidacy indicating a proposed program of graduate study. This procedure should begin as soon as the classified graduate student has:

- removed any deficiencies in admission;
- completed at least 12 units of courses in the graduate program (see Degree Requirements) with a minimum 3.0 GPA; and
- taken the Writing Placement for Graduate Students (WPG) or taken a Graduate Writing Intensive (GWI) course in their discipline within the first two semesters of coursework.

Advancement to Candidacy forms are available online through the Office of Graduate Studies website (http://www.csus.edu/gradstudies/forms/). The student fills out the form after planning a degree program in consultation with the appropriate M.A. Program Coordinator. The form must be submitted online with the Office of Graduate Studies for approval.

Approved Culminating Experience Format: American Psychological Association (APA) - Latest edition. Before beginning a 500-level course, students must submit a reservation form for a Culminating Experience to the program coordinator for approval.

Enrollment in the 500 series Culminating Experience is for one semester. The expectation is that students will complete the culminating
experience during the 500-level course. One semester of continuous enrollment is allowed if the Culminating Experience advisor deems a reasonable amount of progress has been made and assigns a grade of "RP" for the 500 series. If students fail to make adequate progress and there are no mitigating circumstances (e.g., illness), a grade of "no credit" is given, and the student must re-enroll in the appropriate 500 series Culminating Experience.

¹ Six elective units in Curriculum and Instruction coursework are to be selected by the student in consultation with the Curriculum and Instruction Program Coordinator. Students may focus their elective units in a program of their interest or select courses from various programs. At least three of the elective units must be at the 200 level. Examples of Curriculum and Instruction elective programs include: Educational Technology, Mathematics Education, Language and Literacy, Multicultural Education, Gender Equity, BTSA or other pre-approved induction courses. With C & I Program Coordinator approval, program courses may include one of the following:

- 6 transfer elective units (must not be independent study or supervision units)
- 6 units of academic credit earned through Continuing Education

² Open only to the graduate student who has been advanced to candidacy for the master’s degree and has secured the permission of his/her Culminating Experience Chair and the Curriculum and Instruction Program Coordinator. All forms may be obtained on the Office of Graduate STUDIES (OGS) website. Credit is given upon completion of a university-approved project consisting of an ePortfolio that includes an action research report, supporting materials such as curriculum and/or student work, and a poster presentation evaluated by a faculty committee. With prior approval a master’s thesis may be substituted for the action research report.

Minimum required GPA: 3.0; no units with a grade lower than "B" may apply

**Program Description**

The Master of Arts in Educational Technology (iMET) is a unique fully online program which has 2-3 optional face-to-face program and class meetings each semester. It is a rigorous 24 month program focusing on a full-range of instructional design and academic technology knowledge, skills, and dispositions. Instruction is centered on the learner and on what is required of teachers or trainers in today’s technologically-rich learning environment. Coursework is project-oriented, utilizing eportfolios focusing on reflective learning practices and review by peers and colleagues.

The iMET program is designed to support students who want to develop their understanding of learning with technology and advance their ability to teach and design instruction involving the use of technology. Students will be able to design, create, present and evaluate instruction and learning for various types of education environments including for private industry and K-12 and higher education environments. Coursework focuses on learning theories, instructional design models, effective instruction, assessment, educational technology, multimedia tools and strategies, research and scholarship, leadership, project management, professional development, and socio-cultural aspects in education.

Students focus on developing their Culminating Experience project connecting content learned throughout the program courses with their final project. Guidance is provided by advisors through courses on an individual basis connecting students with experienced practitioners. This program is currently offered only in cohort groups. Check with the Department (https://www.ccsu.edu/master-arts-universal-design-elearning/) or (916) 278-6155 for the next start date.

**Admission Requirements**

Admission as a classified graduate student requires:

- a baccalaureate degree;
- a minimum 2.5 GPA in the last 60 units;
- proficiency in written English composition as by meeting the requirements set by the University Office of Graduate Studies;
- international students must meet Office of Graduate Studies (OGS) requirements for International students, which are available on the OGS website (https://www.csus.edu/graduate-studies/).

Applicants who have deficiencies in admission requirements that can be removed by specified additional preparation may be admitted with conditionally classified graduate status. Any deficiencies will be noted on a written response to the student’s admission application.

**Admission Procedures**

Information to apply for prospective graduate students is available on the Office of Graduate Studies website (https://www.csus.edu/graduate-studies/) (916) 278-6470, which will include the following

1. online application procedures for admission
2. information to apply to a Sacramento State graduate program
3. specific program application procedures in addition to apply to a graduate program at Sacramento State are available on the College of Education Department of Graduate and Professional Studies website
4. To be admitted to a College of Education graduate program both #2 and #3 above must be complete, meeting the general admission
indicating a proposed program of graduate study. This procedure should
Each student must file an application for Advancement to Candidacy

General Advancement to Candidacy Procedures

Specific Additional Admission Requirements

General Admission Requirements/Procedures for MA in Education apply, plus:

- a minimum 3.0 overall GPA in the last 60 units attempted; potentially waived on approval of the Program Coordinator and Department Chair
- applicants should have an intermediate level of educational technology knowledge and proficiency
- an approved statement of purpose that addresses:
  a. why the applicant wants to enter this particular program which would include:
     i. an example of a successful experience you have had in using technology for learning or
     ii. an example of a work experience where you helped lead or support others in using technology for teaching or learning, including a description of your level of involvement, and
     iii. what you believe to be optimal ways that technology can successfully be used for teaching or learning
  b. career objectives
     i. applicants must be proficient in using the Internet and have accessible Internet access to meet the requirements of a fully online program

Minimum Units and Grade Requirement for the Degree

- Units required for the MA: 30
- Minimum cumulative GPA: 3.0; no units with a grade lower than "B" may apply toward the degree

Program Costs

- Information on Tuition Fees and Campus Fees is made available on the University website.
- Note: There is an additional Distance Learning Technology Fee of $40 per unit for the iMET Program courses.

General Advancement to Candidacy Procedures

Each student must file an application for Advancement to Candidacy indicating a proposed program of graduate study. This procedure should begin as soon as the classified graduate student has:

- removed any deficiencies in admission;
- completed at least 12 units of courses in the graduate program (see Degree Requirements) with a minimum 3.0 GPA; and
- fulfilled the “Graduate Writing Assessment Requirement (GWAR).”

Requirements for the GWAR are available on the Office of Graduate Studies website (https://www.csus.edu/graduate-studies/). (https://www.csus.edu/graduate-studies/)

- Information to complete the Advancement to Candidacy forms is available online and will be provided through the Program Coordinator. The Advancement to Candidacy entails the degree program in consultation with the appropriate M.A. Program Coordinator. A completed form must be submitted to the Program and Department for approval and to the Office of Graduate Studies for approval.

Approved Master’s Thesis/Project Format: American Psychological Association (APA) - Latest edition. Before beginning the 500-level course to complete a Project, Action Research, or Thesis, students are required to have an approved Culminating Experience Proposal on file in the Department office. Dates for completing the form are announced by the Program Coordinator.

Note: A completed Proposal requires the approval of the Culminating Experience Chair as well as Human Subjects approval if needed. The proposal and accompanying Protection of Human Subject forms must be reviewed by the EDTE Graduate Coordinator and approved by the Department and University Human Subjects Review Committee.

Enrollment in the 500 series Culminating Experience is for one semester. The expectation is that students will complete the thesis/project during the 500-level course. Continuous enrollment is allowed if the Culminating Experience Chair deems a reasonable amount of progress has been made as per the timeline in the Proposal and assigns a grade of “RP” for the 500 series. If students fail to make adequate progress according to their Proposal timeline, a grade of “no credit” is given, and the student must re-enroll in the appropriate 500 series Culminating Experience.

Total Units 30

1 These courses must be taken as part of the Educational Technology cohort. The Educational Technology coursework is integrated into these courses. Requires acceptance into Master of Arts (Educational Technology); not open to students who have not been admitted to the program.

2 Credit is given upon completion of a thesis, project or other approved culminating experience for the Master of Arts in Education (Educational Technology). Open only to the graduate student who has been advanced to candidacy for the master’s degree and has secured the permission of the Educational Technology Program Coordinator.
MA in Education (Higher Education Leadership)

Total units required for MA: 30

Program Description

Educational Leadership and Policy Studies aims to develop TK-12, higher education, and workforce development leaders from diverse backgrounds who will positively impact all educational settings. The program specifically focuses on cultivating leaders who promote learning, equity, social justice and achievement for all students. Educational Leadership and Policy Studies seeks to prepare transformational leaders with the capacity to effectively facilitate and manage change.

Admission Requirements

Admission as a classified graduate student in Higher Education Leadership requires:

- Completion, and successful review, of Cal State Apply and program Supplemental application
- Successful interview with faculty, demonstrating
  - Preparation for graduate level study
  - Professional experience at any level in higher education
  - Some leadership experience
  - Familiarity with current issues in education
  - Knowledge of conflict resolution and negotiation skills
  - Knowledge of higher education as a field
  - Entry level understanding of ethical leadership
  - Vision for P-16 education

Applicants who have deficiencies in admission requirements that can be removed by specified additional preparation may be admitted with conditionally classified graduate status. Any deficiencies will be noted on a written response to the student's admission application.

Specific Additional Admission Procedures

Each applicant must forward the following to the Educational Leadership and Policy Studies Department in the College of Education:

- the Educational Leadership and Policy Studies application for admission
- the supplemental application (can be found on the Apply | Sacramento State (csus.edu) (https://www.csus.edu/college/education/masters-programs/apply.html) page)
- two letters of reference (forms attached to application packet); and
- one set of transcripts, including Sacramento State (these need not be official).

Approximately two weeks after the deadline for submission of application materials to the Department, each applicant will be scheduled for an interview. Approximately two weeks after all applicants have been interviewed, a decision regarding admission will be mailed to each applicant.

Minimum Units and Grade Requirement for the Degree

Units required for the MA: 30

Minimum Cumulative GPA: 3.0. Only units with a grade "C" or better may be counted.

Notes:

- This graduate degree program is subject to general University and Departmental requirements. These requirements are explained in the "Graduate Studies" and the "Educational Leadership and Policy Studies Department" sections of this catalog.
- All work must be completed within a 7-year period
- 30 units required for the MA, including at least 21 units in approved Educational Leadership courses. Up to six units, including extension credit, can be transferred from another university (if current and not used toward another degree); a minimum of 21 units must be taken in residence

Advancement to Candidacy

Each student working toward a Master’s degree must file an application for Advancement to Candidacy for the degree; the application is a form on which the student indicates a proposed program of graduate study. The student must be advanced to candidacy the semester prior to enrolling in EDLP 230. The procedure should begin as soon as the classified graduate student has:

- removed any deficiencies in admission requirements;
- completed at least 12 units in the Educational Leadership and Policy Studies graduate program with a minimum 3.0 GPA; and
- completed a Graduate Writing Intensive (GWI) course in their discipline with a "B" or better; within the first two semesters of coursework at California State University, Sacramento.

Advancement to candidacy forms are available on the Office of Graduate Studies website or the GPSE Department Office. The student fills out the form after planning a degree program in consultation with his/her Educational Leadership faculty advisor. The completed form is returned to the GPSE Graduate Coordinator for approval and then submitted to the Office of Graduate Studies.

Notes:

- Thesis/Projects: Students must file a petition in the Department office one semester in advance and must have advanced to candidacy before they enroll in thesis/project.
- The Master of Arts in Educational Leadership, Higher Education Leadership Concentration, consists of the following tracks: Student Affairs Leadership and Community College Leadership.

Concentration Requirements (9 Units)

Select one of the following concentrations:

TK-12 Leadership
MA in Education (Language and Literacy)

Total units required for MA: 30

Program Description

The Master of Arts in Education with a Concentration in Language and Literacy is designed for the administrator, the classroom teacher, and the specialist teacher of language and literacy for all types of children, youth, and adults. The program includes required courses in Professional Education and selected courses in language and literacy.

Admission Requirements

Admission as a classified graduate student requires:

- a baccalaureate degree;
- two years of teaching experience or its functional equivalent;
- a minimum 2.5 GPA in the last 60 units;
- proficiency in written English composition as demonstrated by either passing the Sacramento State Writing Placement for Juniors exam or equivalent, or enrolling in ENGL 109W passing with a grade of C or better; and
- an interview with a student/practicing administrator/faculty team; interviews will be scheduled at the close of the application period, (the Graduate Record Exam (GRE) or Miller Analogies Test scores are NOT required; however, these test scores may be included with the admission application).

Applicants who have deficiencies in admission requirements that can be removed by specified additional preparation may be admitted with conditionally classified graduate status. Any deficiencies will be noted on a written response to the student’s admission application.

Admission Procedures

Prospective graduate students, including Sacramento State graduates, must file the following with the Office of Graduate Studies, Riverfront Center 215, (916) 278-6470:

- an online application for admission; and
- one set of official transcripts from all colleges and universities attended, other than Sacramento State.

For more admissions information and application deadlines, please visit the Office of Graduate Studies website (http://www.csus.edu/gradstudies/).

The graduate degree program is subject to general University and Departmental requirements. These requirements are explained in the Graduate Degree Requirements (p. 86) section of the University Catalog.

Specific Additional Admission Requirements

Admission as a classified graduate student in Education, Language and Literacy, requires:

- a valid Teaching Credential or advisor or Department approval for waiving this requirement;
- a minimum 3.0 GPA in the last 60 units attempted; and
- successful completion of a basic course in the Teaching of Reading from an accredited university; if reading methods course is older than seven years, the applicant must show evidence of either a) current staff development in Language and Literacy by participation in workshops, institutes, etc., (candidates must show documentation); or b) passing the RICA test within the past seven years.

Applicants who have deficiencies in admission requirements that can be removed by specified additional preparation may be admitted with conditionally classified graduate status. Any deficiencies will be noted on a written response to the student’s admission application.

The Department of Teacher Education requires each student download the Department of Teacher Education Graduate Student Handbook, available on the Department website (http://www.csus.edu/coe/academics/credentials/handbooks/).

Minimum Units and Grade Requirement for the Degree

Units required for the MA: 30

Minimum cumulative GPA: 3.0; no units with a grade lower than "C" may apply toward the degree.

General Advancement to Candidacy Procedures

Each student must file an application for Advancement to Candidacy indicating a proposed program of graduate study. This procedure should begin as soon as the classified graduate student has:

- removed any deficiencies in admission;
- completed at least 12 units of courses in the graduate program (see Degree Requirements) with a minimum 3.0 GPA; and
- taken the Writing Placement for Graduate Students (WPG) or taken a Graduate Writing Intensive (GWI) course in their discipline within the first two semesters of coursework at California State University, Sacramento or secured approval for a WPG waiver.

Advancement to Candidacy forms are available online through the Office of Graduate Studies website (http://www.csus.edu/gradstudies/forms/). The student fills out the form after planning a degree program.
in consultation with the appropriate M.A. Program Coordinator. The form must be submitted to the Teacher Education Department Office and the Office of Graduate Studies for approval.

Approved Master's Thesis/Project Format: American Psychological Association (APA) - Latest edition. Before beginning a 500-level course to complete a Project, Action Research, or Thesis, students are required to have an approved Culminating Experience Proposal on file in the Department office. The reservation form for a Culminating Experience Chair for fall semester is due March 10; for spring the form is due October 15. Note: A completed Proposal requires the approval of the Culminating Experience Chair as well as Human Subjects approval. The proposal and accompanying Protection of Human Subject forms must be reviewed by the EDTE Graduate Coordinator and the Department or University Human Subjects Review Committee.

Enrollment in the 500 series Culminating Experience is for one semester. The expectation is that students will complete the thesis/project during the 500-level course. One semester of continuous enrollment is allowed if the Culminating Experience Chair deems a reasonable amount of progress has been made as per the timeline in the Proposal and assigns a grade of "RP" for the 500 series. If students fail to make adequate progress according to their Proposal timeline and there are no mitigating circumstances (e.g., illness), a grade of "no credit" is given, and the student must re-enroll in the appropriate 500 series Culminating Experience.

Note: The Department of Teacher Education requires each student to download the Department of Teacher Education Graduate Student Handbook, available on the Department website (http://www.csus.edu/coe/academics/credentials/handbooks/).

*Credit is given upon completion of a thesis, project, or other approved culminating experience for the Master of Arts in Education (Language and Literacy). Open only to the graduate student who has been advanced to candidacy for the master's degree and has secured the permission of his/her Culminating Experience Chair and the Language and Literacy Program Coordinator. All forms may be obtained on the College of Education's website (http://csus.edu/coe/).*

### MA in Education (Workforce Development Advocacy)

**Total units required for MA: 30**

### Program Description

Educational Leadership and Policy Studies aims to develop TK-12, higher education, and workforce development leaders from diverse backgrounds who will positively impact all educational settings. The program specifically focuses on cultivating leaders who promote learning, equity, social justice and achievement for all students. Educational Leadership and Policy Studies seeks to prepare transformational leaders with the capacity to effectively facilitate and manage change.

### Admission Requirements

1. Completion of a baccalaureate degree at the time of application
2. GPA in the last 60 units of 2.5 or better
3. Completion, and successful review, of University and program application materials for admission.
4. Successful interview with faculty, demonstrating:
   - Preparation for graduate level study
   - Leadership experience
   - Familiarity with current issues in education
   - Knowledge of conflict resolution and negotiation skills
   - Knowledge of education as a professional field
   - Entry level understanding of ethical leadership
   - Knowledge of workforce development as a profession
   - Vision for education

### Advancement to Candidacy

Each student working toward a Master's degree must file an application for Advancement to Candidacy for the degree; the application is a
form on which the student indicates a proposed program of graduate study. The student must be advanced to candidacy the semester prior to enrolling in EDLP (https://catalog.csus.edu/search/?P=EDLP%20223). The procedure should begin as soon as the classified graduate status:

- removed any deficiencies in admission requirements;
- completed at least 12 units in the Educational Leadership and Policy Studies program with a minimum 3.0 GPA; and
- completed a Graduate Writing Intensive (GWI) course in their discipline with a “B” or better, within the first two semesters of coursework at California State University, Sacramento.

Advancement to candidacy forms are available on the Office of Graduate Studies website or the GPSE Department Office. The student fills out the form after planning a degree program in consultation with his/her Educational Leadership and Policy Studies faculty advisor. The completed form is returned to the GPSE Graduate Coordinator for approval and then submitted to the Office of Graduate Studies.

### MA in Educational Leadership & Policy Studies (Higher Education Leadership)

Total units required for MA: 30

### Program Description

Educational Leadership and Policy Studies aims to develop TK-12, higher education, and workforce development leaders from diverse backgrounds who will positively impact all educational settings. The program specifically focuses on cultivating leaders who promote learning, equity, social justice and achievement for all students. Educational Leadership and Policy Studies seeks to prepare transformational leaders with the capacity to effectively facilitate and manage change.

### Admission Requirements

Admission as a classified graduate student in Higher Education Leadership requires:

- Completion, and successful review, of Cal State Apply and program Supplemental application
- Successful interview with faculty, demonstrating
  - Preparation for graduate level study
  - Professional experience at any level in higher education
  - Some leadership experience
  - Familiarity with current issues in education
  - Knowledge of conflict resolution and negotiation skills
  - Knowledge of higher education as a field
  - Entry level understanding of ethical leadership
  - Vision for P-16 education

Applicants who have deficiencies in admission requirements that can be removed by specified additional preparation may be admitted with conditionally classified graduate status. Any deficiencies will be noted on a written response to the student’s admission application.

### Specific Additional Admission Procedures

Each applicant must forward the following to the Educational Leadership and Policy Studies Department in the College of Education:

- the Educational Leadership and Policy Studies application for admission
- the supplemental application (can be found on the Apply | Sacramento State (csus.edu) (https://www.csus.edu/college/education/masters-programs/apply.html) page)
- two letters of reference (forms attached to application packet); and
- one set of transcripts, including Sacramento State (these need not be official).

Approximately two weeks after the deadline for submission of application materials to the Department, each applicant will be scheduled for an interview. Approximately two weeks after all applicants have been
Minimum Units and Grade Requirement for the Degree

Units required for the MA: 30

Minimum Cumulative GPA: 3.0. Only units with a grade "C" or better may be counted.

Notes:

- This graduate degree program is subject to general University and Departmental requirements. These requirements are explained in the "Graduate Studies" and the "Educational Leadership and Policy Studies Department" sections of this catalog.
- All work must be completed within a 7-year period.
- 30 units required for the MA, including at least 21 units in approved Educational Leadership courses. Up to six units, including extension credit, can be transferred from another university (if current and not used toward another degree); a minimum of 21 units must be taken in residence.

Advancement to Candidacy

Each student working toward a Master's degree must file an application for Advancement to Candidacy for the degree; the application is a form on which the student indicates a proposed program of graduate study. The student must be advanced to candidacy the semester prior to enrolling in EDLP 230. The procedure should begin as soon as the classified graduate student has:

- removed any deficiencies in admission requirements;
- completed at least 12 units in the Educational Leadership and Policy Studies graduate program with a minimum 3.0 GPA; and
- completed a Graduate Writing Intensive (GWI) course in their discipline with a "B" or better, within the first two semesters of coursework at California State University, Sacramento.

Advancement to candidacy forms are available on the Office of Graduate Studies website or the GPSE Department Office. The student fills out the form after planning a degree program in consultation with his/her Educational Leadership faculty advisor. The completed form is returned to the GPSE Graduate Coordinator for approval and then submitted to the Office of Graduate Studies.

Notes:

- Thesis/Projects: Students must file a petition in the Department office one semester in advance and must have advanced to candidacy the semester prior to enrolling in thesis/project. EDLP 500A and EDLP 230 can not be taken in the same semester unless approved by the student’s advisor and Graduate Coordinator or Department Chair. Students needing additional time may enroll in subsequent semesters of EDLP 500B and EDLP 299T with approval of their advisor and the Department Chair.

• an interview with a student/practicing administrator/faculty team; interviews will be scheduled at the close of the application period, (the Graduate Record Exam (GRE) or Miller Analogies Test scores are NOT required; however, these test scores may be included with the admission application).

Applicants who have deficiencies in admission requirements that can be removed by specified additional preparation may be admitted with conditionally classified graduate status. Any deficiencies will be noted on a written response to the student’s admission application.

Admission Procedures
Prospective graduate students, including Sacramento State graduates, must file the following with the Office of Graduate Studies, Riverfront Center 215, (916) 278-6470:

• an online application for admission; and
• one set of official transcripts from all colleges and universities attended, other than Sacramento State.

For more admissions information and application deadlines, please visit the Office of Graduate Studies website (http://www.csus.edu/gradstudies/).

The graduate degree program is subject to general University and Departmental requirements. These requirements are explained in the Graduate Degree Requirements (p. 86) section of the University Catalog.

Specific Additional Admission Requirements
Admission as a classified graduate student in TK-12 School Leadership and Policy Studies requires:

• Completion of a baccalaureate degree at the time of application;
• GPA in the last 60 units of a 2.5 or better;
• A minimum of 4 years teaching experience in a TK-12 educational setting;
• Completion, and successful review, of CSU Apply and program Supplemental Application
• Successful interview with faculty, demonstrating:
  • Preparation for graduate level study
  • Some leadership experience
  • Familiarity with current issues in education
  • Knowledge of conflict resolution and negotiation skills
  • Knowledge of TK-12 education as a field
  • Entry level understanding of ethical leadership
  • Vision for TK-12 education

Applicants who have deficiencies in admission requirements that can be removed by specified additional preparation may be admitted with conditionally classified graduate status. Any deficiencies will be noted on a written response to the student’s admission application.

Specific Additional Admission Procedures
Each applicant must forward the following to the Educational Leadership and Policy Studies Department in the College of Education:

• the Educational Leadership and Policy Studies application for admission (available in Eureka Hall 437);
• two letters of reference (forms attached to application packet); and
• one set of transcripts, including Sacramento State (these need not be official).

Approximately two weeks after the deadline for submission of application materials to the Department, each applicant will be scheduled for an interview. Approximately two weeks after all applicants have been interviewed, a decision regarding admission will be mailed to each applicant.

Minimum Units and Grade Requirement for the Degree
Units required for the MA: 30

Minimum Cumulative GPA: 3.0. Only units with a grade “C” or better may be counted.

Notes:

• This graduate degree program is subject to general University and Departmental requirements. These requirements are explained in the “Graduate Studies” and the “Educational Leadership and Policy Studies Department” sections of this catalog.

MA in Gender Equity Studies in Education

Total units required for MA: 30

Program Description

The Master of Arts in Gender Equity in Education offers:

1. the opportunity to take courses that focus on gender roles from the points of view of the various disciplines from other University departments;
2. the opportunity to take courses that focus on the social constructs of gender, race, and socioeconomic status;
3. the opportunity to focus on the developmental needs of students for a nonsexist education; and
4. to develop an understanding of the many political and social issues affecting gender constructs in schools, the workforce, and the impact on society.

The purpose of the program is to offer graduate students an opportunity to be change agents in the educational system and to make a difference in student’s lives, which includes an understanding of intersectionality.

Admission Requirements

Requirements/Procedures for MA in Gender Equity in Education:

- a baccalaureate degree;
- a minimum 2.5 GPA in the last 60 units attempted;
- a two page essay on education/gender related topics;
- an approved statement of purpose that addresses:
  a. Why the applicant wants to enter this particular program;
  b. Career objectives which will coincide with program goals;
- evidence of completion of a previous course(s) with "B" or better grade (graduate or undergraduate level) which focuses on the area of Women's Studies and/or Gender Studies and/or course on social justices focus which includes issues on gender; and
- participation in an interview (interviews will be scheduled after applicants submit their Program application). Interviews are scheduled after the Program and Office of Graduate Studies applications are due.

Applicants who have deficiencies in admission requirements that can be removed by specified additional preparation may be admitted with conditionally classified graduate status. Any deficiencies will be noted on a written response to the student’s admission application.

Admission Procedures

Prospective graduate students, including Sacramento State graduates, must file the following with the Office of Graduate Studies, Riverfront Center 215, (916) 278-6470.

- an online application, via Cal State Apply (https://www2.calstate.edu/apply/), for admission; and
- one set of official transcripts from all colleges and universities attended, other than Sacramento State.

The graduate degree program is subject to general University and Departmental requirements. These requirements are explained in the Graduate Degree Requirements section of the University Catalog.

Specific Additional Admission Procedures

MA in Gender Equity in Education cohorts begin in fall semester. Applicants must complete a university application and department application by the posted application deadline date for the term applying.

Each applicant must also complete the following procedures with the Graduate and Professional Studies in Education by the same due dates noted above.

Minimum Units and Grade Requirement for the Degree

Units required for the MA: 30

Minimum Cumulative GPA: 3.0

Advancement to Candidacy

Students working toward a Master’s degree must file an application for Advancement to Candidacy, indicating a proposed program of study. This procedure should begin as soon as the classified graduate student has:

- been assigned an advisor;
- removed any deficiencies in admission requirements;
- completed 12 units of content knowledge units with a minimum 3.0 GPA; and
- met the Graduate writing requirement through completion of the Graduate Writing Intensive (GWI) course, EDTE 250, with a B grade or better.

Advancement to Candidacy form is submitted online through MySacState. The student fills out the form after planning a degree program in consultation with his or her faculty advisor. The completed form is then approved by the Graduate Coordinator of the Department and submitted to the Office of Graduate Studies.

Thesis/Project Registration

The Thesis/Project course (EDTE 506) requires the student to file and have an approved Thesis/Project Petition form and Advisor Reservation form on record with the MA in Behavioral Sciences, Gender Equity Education Program Coordinator. Both forms are due by April 1st for fall enrollment and by November 1st for spring enrollment. Failure to meet
these deadlines will result in the inability to enroll in the Thesis/Project course (EDTE 506).

Enrollment in EDTE 506 for one semester is required for students to complete their thesis/project. It is expected that students will complete the thesis/project during the 500-level course. If students fail to make adequate progress according to their Proposal timeline and there are no mitigating circumstances (e.g., illness), a grade of "no credit" is given, and the student must re-enroll in EDTE 506. Enrollment in the culminating experience may occur only after approval of the Advancement to Candidacy. Enrollment in EDTE 599 (Continuous Enrollment) required completion of most of the thesis/project (all chapters completed with minor editing needed) and approval of the Program Coordinator.

Please be aware that this program follows the guidelines provided by the American Psychological Association’s (APA) most current edition for formatting of theses and projects. The Office of Graduate Studies also publishes a two-sided form, Project Format Requirements, to refer to for the preparation and submission of the Master’s Project. You can find this form and other Graduate Studies forms on the web on the Office of Graduate Studies website (http://csus.edu/gradstudies/forms/).

MA in Language and Literacy

Total units required for MA: 30

Program Description

The Master of Arts in Education in Language and Literacy is designed for the administrator, the classroom teacher, and the specialist teacher of language and literacy for all types of children, youth, and adults. The program includes required courses in the field of language and literacy. Students will do practical work with struggling readers, examine literacy in educational contexts, and read and do research in the field of literacy.

Admission Requirements

Applicants who have deficiencies in admission requirements that can be removed by specified additional preparation may be admitted with conditionally classified graduate status. Any deficiencies will be noted on a written response to the student’s admission application.

Admission Procedures

Prospective graduate students, including Sacramento State graduates, must file the following with the Office of Graduate Studies, Riverfront Center 215, (916) 278-6470:

- an online application for admission; and
- one set of official transcripts from all colleges and universities attended, other than Sacramento State.

For more admissions information and application deadlines, please visit the Office of Graduate Studies website (http://www.csus.edu/gradstudies/).

The graduate degree program is subject to general University and Departmental requirements. These requirements are explained in the Graduate Degree Requirements (p. 86) section of the University Catalog.

Specific Additional Admission Requirements

Admission as a classified graduate student in Education, Language and Literacy, requires:

- a minimum 3.0 GPA in the last 60 units attempted; and
- an essay for acceptance into the Masters program is required. The Graduate Record Exam (GRE) or Miller Analogies Test scores are NOT required, however, these test scores may be included with the admission application.
- a valid California Teaching Credential is not required, but may be included in the application.
- completion and successful review of Department application

Applicants who have deficiencies in admission requirements that can be removed by specified additional preparation may be admitted with conditionally classified graduate status. Any deficiencies will be noted on a written response to the student’s admission application.

MA in Multicultural Education

Total units required for MA: 30

Program Description
The Multicultural Education graduate program explores theoretical and pedagogical issues related to working with diverse culturally, linguistically, ethically, and low-income populations across educational and community settings. The program includes history, research and pedagogy on bilingualism, multiculturalism, educational equity, social justice, and ethnic studies, offering courses and experiences to assist educators to work successfully in classrooms, schools, and educational agencies within our diverse state. The curriculum develops students’ historical, pedagogical, analytical, and planning skills in order to prepare them to operate effectively in the development, implementation and analysis of educational policies and programs, as well as in social justice projects and advocacy to serve historically underserved and underrepresented groups in K-12 education.

Admission Requirements
Admission as a classified graduate student requires:

- a baccalaureate degree;
- a minimum 2.5 GPA in the last 60 units;
- completion and successful review of application;
- Resume
- Two letters of recommendation
- Personal Statement
- Essay
- Interview

Admission Procedures
Prospective graduate students, including Sacramento State graduates, must file the following with the Office of Graduate Studies, Riverfront Center 215, (916) 278-6470:

- an online application for admission; and
- one set of official transcripts from all colleges and universities attended, other than Sacramento State.

For more admissions information and application deadlines, please visit the Office of Graduate Studies website (http://www.csus.edu/gradstudies/).

The graduate degree program is subject to general University and Departmental requirements. These requirements are explained in the Graduate Degree Requirements (p. 86) section of the University Catalog.

The Department does not accept units earned through Open University and they will not be credited towards the Multicultural Education degree.

Specific Admission Procedures
All MA cohorts begin in fall semester. Applicants must complete a university application and department application by the posted application deadline date for the term applying:

When applying applicants will include the following materials. Each applicant must also complete the following procedures with the Graduate and Professional Studies in Education by the same due dates noted above:

- complete and submit a Program application
- Resume: Please include a copy of a current resume or curriculum vita, which includes relevant experience in working with diverse population
- Two letters of recommendation from individuals who can speak of your professional experience, competence, and/or academic potential
- Personal Statement: Please attach a statement of purpose that provides:
  - (a) A description of the school(s) or educational setting(s) in which you have had experience; (b) A description of the kinds of responsibilities you have had as an educator; (c) A description of the kinds of multicultural activities and programs you have experienced as an educator; (d) If not detailed in a-c above, a description of the kinds of experiences you have had in multicultural and/or multilingual settings. The personal statement should not exceed 2 pages, double spaced, 12 point font and type-written
- Essay: Discuss a current critical issue in the field of education in communities with children, adolescents, or adults with either a

EDLL 503 Culminating Experience: Language and Literacy 3

Total Units 30

1 Credit is given upon completion of a thesis, project, or other approved culminating experience for the Master of Arts in Education (Language and Literacy). Open only to the graduate student who has been advanced to candidacy for the master’s degree and has secured the permission of his/her Culminating Experience Chair and the Language and Literacy Program Coordinator. All forms may be obtained on the College of Education’s website (http://csus.edu/coe/).

2 The Adult Reading Certificate in not currently being offered. Please check with the department for information about future plans to offer it.
focus on racial/ethnic diversity, English Learners, and/or disabilities, and the relationship of this issue to your motivation to become a social justice advocate. The essay should not exceed 3 pages, double spaced, 12 point font and type-written.

- Interview: Each applicant will be interviewed (either in person or virtually) and given the opportunity to articulate in-person how the Multicultural Education program aligns with personal, professional, or research goals. Interviews are scheduled within one month after the Program and Office of Graduate Studies applications are due.

Minimum Units and Grade Requirement for the Degree

Units required for the MA: 30

Minimum Cumulative GPA: 3.0

Advancement to Candidacy

Each student must file an application for Advancement to Candidacy indicating a proposed program of study for the MA. The student must be advanced to candidacy prior to enrolling in EDBM 565. This procedure should begin as soon as the classified graduate student has:

- removed any deficiencies in admission requirements;
- completed at least 12 units of courses in the graduate program (see Degree Requirements) with a minimum 3.0 GPA; and
- taken a Graduate Writing Intensive (GWI) course in their discipline within the first three semesters of coursework at California State University, Sacramento or secured approval for a WPG waiver.

Advancement to Candidacy forms are available on the Office of Graduate Studies website. The student will complete the form after planning a degree program in consultation with the Department Graduate Coordinator. The form must be submitted to the Multicultural Education Graduate Coordinator and the Office of Graduate Studies for approval.

Thesis/Project Registration

Check with the Multicultural Education Graduate Coordinator for the policies regarding Report in Progress (“RP”) grades and continuous enrollment. The culminating experience for the MA may be a thesis or project.

A 3-unit course is required when doing the thesis/project. Enrollment in the culminating experience may occur only after Advancement to Candidacy.

The Thesis/Project course requires the student to file and have an approved Thesis/Project Petition form and Advisor Reservation form on record with the Multicultural Education Graduate Coordinator at least one full semester in advance of registration. Both forms are due by April 1st for fall enrollment and by November 1st for spring enrollment. Failure to meet these deadlines will result in the inability to enroll in the Thesis/Project course for the desired semester.

The Thesis/Project Petition and reservation forms must be submitted to the Graduate Coordinator at least one month prior to the submission due date (i.e., March or October); the forms will then be forwarded to the Graduate Committee for review and recommendations.

Students may enroll in the Thesis/Project course a maximum of two semesters for credit. Students must submit the Reservation Form only to continue in the Thesis/Project course for the second semester. Failure to do so will result in inability to work with the Thesis/Project advisor for the desired semester.

Total Units: 30

1 The program requires completion of 30 units of approved coursework with a minimum 3.0 GPA. A minimum of 18 units of approved 200 series offerings must be earned, not including EDBM 299. A minimum of 24 units in 200, and 500 series offerings must be earned in residence at Sacramento State. The Department does not accept units earned through Open University, and they will not be credited towards the MA. All work must be completed within a 7-year period.

2 According to university policy, “A minimum cumulative grade point average of 3.0. No grade below a “B” may be counted toward the degree requirement unless expressly permitted by a campus-approved graduate programs’ written policies”. See http://catalog.csus.edu/graduate-degree-requirements/

3 EDBM 599 (Continuous Enrollment) will only be offered to students (a) after one semester of EDBM 565, AND (b) with advisor approval.

MA in School Psychology

Total units required for MA: 42-45

Program Description

The Master of Arts in School Psychology is part of the School Psychology Program, and typically earned as students progress toward the more advanced Ed.S. in School Psychology (https://catalog.csus.edu/colleges/education/graduate-professional-studies-education/eds-in-school-psychology/) degree. Students who do not wish to obtain the Ed.S. are allowed to have this be their terminal School Psychology Program degree.

This program offers the opportunity to gain skills in working with preschool through grade 12 students, teachers, and parents in the school setting. Graduates of this degree who also complete practicum and fieldwork requirements (described in Pupil Personnel Services School Psychology Endorsement Credential (https://catalog.csus.edu/colleges/education/graduate-professional-studies-education/pupil-personnel-services-school-psychology-endorsement-credential/)) are eligible for the Pupil Personnel Services School Psychology Endorsement Credential,
offered by the California Commission on Teacher Credentialing (CCTC). Possession of the MA in School Psychology and the Pupil Personnel Services School Psychology Endorsement Credential also prepares an individual to meet the academic requirements for the Licensed Educational Psychologist (https://www.bbs.ca.gov/applicants/lep.html) (LEP) license administered by the California Board of Behavioral Sciences (https://www.bbs.ca.gov), California Department of Consumer Affairs.

The program includes training in counseling techniques, the use of individual academic and psychological assessment tools, behavioral interventions in the school and the home, consultation skills, techniques of program development and evaluation, special education law, and instructional strategies.

Note: If students are to graduate under the provisions of this catalog, they must maintain continuous enrollment from the date of classification to the date of graduation. Students who are planning to be absent for more than one semester must file a Leave of Absence request and have it approved prior to the absence.

Admission Requirements

Admission Procedures
See Ed.S. in School Psychology (https://catalog.csus.edu/colleges/education/graduate-professional-studies-education/eds-in-school-psychology/) for admission procedures. For more admissions information and application deadlines, visit the Office of Graduate Studies website (http://www.csus.edu/gradstudies/), and the College of Education website (https://www.csus.edu/college/education/masters-programs/). The graduate degree program is subject to general University requirements. These requirements are explained in the Graduate Degree Requirements (https://catalog.csus.edu/graduate-degree-requirements/) section of the University Catalog.

Minimum Units and Grade Requirement for the Degree
Units required for the MA: 42-45

Minimum Cumulative GPA: 3.0. No single course in which a student receives a grade below "B" will be counted as credit toward the degree unless the student has petitioned for acceptance of the course, and the petition has been accepted and approved by the School Psychology Program faculty.

Note: A minimum of 21 of these units must be taken in residence at California State University, Sacramento. Use of extension courses must be approved by the advisor. Enrollment in Special Problems (EPSY 299) will only be granted under exceptional circumstances.

Advancement to Candidacy
Students must advance to candidacy prior to enrolling in EPSY 249 or EPSY 541. Students working toward a school psychology graduate degree must file an application for Advancement to Candidacy, indicating a proposed program of study. This procedure should begin (typically by the end of the first year in the program) as soon as the classified graduate student has:

- been assigned an advisor;
- removed any deficiencies in admission requirements;
- completed 24 units of School Psychology Program coursework with a minimum 3.0 overall GPA; and
- satisfied the Graduate Writing Assessment Requirement (GWAR) by passing EPSY 201, Legal Aspects of Special Education, with a grade of "B" or higher.

Advancement to Candidacy forms are available on the Office of Graduate Studies website (https://www.csus.edu/graduate-studies/current-students/forms.html). The student fills out the form after planning the degree program in consultation with a faculty advisor and approved by the Graduate Coordinator. The completed form is then returned to the Office of Graduate Studies for approval. Please note deadline dates posted by the Office of Graduate Studies for submission of this form. Students who are going on to the Ed.S. in School Psychology, are automatically advanced to Ed.S. candidate status after being awarded the MA in School Psychology.

Culminating Experience Requirements
Enrollment in the MA Seminar EPSY 249 or Master's Project EPSY 541 requires students to file and have approved a Reservation Form for these courses the semester before intended registration. Registration for Special Problems (EPSY 299) requires a Special Problems petition be filed the semester before intended registration. This program follows guidelines provided by the American Psychological Association's, most current edition for formatting of projects. The Office of Graduate Studies, River Front Center 215, (916) 278-6470, offers formatting guides and templates on their website (https://www.csus.edu/graduate-studies/current-students/thesis-project-dissertation.html).

Graduation Procedures
Prior to graduation, an application for graduation (https://www.csus.edu/graduate-studies/current-students/forms.html) must be filed in the Office of Graduate Studies by the specified deadline. All coursework leading to this degree must be completed within a seven year period. Always attend to deadline dates posted by the Office of Graduate Studies for submission of this form.

MA in Universal Design for E-learning

Catalog Description

The Master of Arts in Universal Design for eLearning (UDEL) is a fully online one-year project-based program. The program focuses on Universal Design for Learning principles, technology, instructional design, and inclusive teaching and learning. The UDEL Program is designed for students who want to advocate for diversity, equity, and inclusion in course design. Each course will draw from an equity lens to examine ways to increase access to various educational supports and promote learner success. Students will learn ways to remove barriers to increase access to instructional materials, technology, support services, and assessment methods.

Program Description

The Master of Arts in Universal Design for eLearning (UDEL) is a fully online one-year project-based program. The program focuses on Universal Design for Learning principles, technology, instructional design, and inclusive teaching and learning. The UDEL Program is designed for students who want to advocate for diversity, equity, and inclusion in course design. Students will be able to advance their knowledge of instructional approaches that reduce barriers to meet the needs and abilities of all learners.

The program is designed with a core curriculum structure that logically progresses through the course content and provides a clear learning path. Each course is designed to provide options and choices in various contexts. There will be an intentional focus on instructional materials selection to provide a social justice lens in digital spaces. The program will incorporate social learning and provide students with the opportunity to contribute, collaborate, and challenge their thoughts. Course work will present real-life, authentic connections that make the information relevant to students’ lived experiences. Courses will provide a variety of examples and formats to help students truly internalize the material.

The UDEL program coursework is project-oriented and will consist of field-based work. The Culminating Experience (Exam) will consist of an ePortfolio where students will add equity and/or technology-based artifacts they developed in each course throughout the program. Students will have faculty assigned as advisors to help them complete the project report and ePortfolio. Program instructors are experts in instructional design, technology, and inclusive learning and teaching. They hold advanced degrees and subject matter field experiences.

This program is offered as a partnership between the College of Education and the College of Continuing Education at Sacramento State.

Admission Requirements

Admission as a classified graduate student in the Master of Arts in Universal Design for eLearning Program requires:

- a baccalaureate degree;
- a minimum 2.5 GPA in the last 60 units;
- proficiency in written English composition as by meeting the requirements set by Sacramento State;
- an intermediate level of educational technology knowledge and proficiency
- International students must meet Office of Graduate Studies (OGS) requirements for international students, which are available through the OGS website.

Opportunity exists for conditional classification of applicants with an undergraduate major and experiences different from those listed above. This requires that students demonstrate convincingly that they are competent to pursue the degree.

Admission Procedures

All prospective graduate students, including Sacramento State graduates, must file a University application and a separate supplemental MA UDEL Program application. Both applications must be submitted by the deadlines stated on the College of Continuing Education and Office of Graduate Studies websites. Required application materials include:

- Online applications for admission;
- Official transcripts from all colleges and universities attended, other than Sacramento State;
- A clearly articulated statement of purpose that addresses the applicants personal and academic preparation for the program that includes:
  - why the applicant wants to enter this particular program which would include
  - An example of a work experience where you identified a need for building more equitable and inclusive learning opportunities, including a description of your level of involvement, and
  - an example of a successful experience you have had in using technology for teaching or learning
- Career objectives

Applicants must be proficient in using the Internet and have Internet access to meet the program.

For more admissions information and application deadlines, please visit the Office of Graduate Studies website (http://www.csus.edu/gradstudies/). Details about each of the components of the supplemental application can be found on the application packet posted to the College of Education website.

Approximately six weeks after the posted application deadline, a decision regarding admission will be emailed to each applicant.

Minimum Units and Grade Requirement for the Degree

Units required for the MA: 30.0

Minimum Cumulative GPA: 3.0; no units with a grade lower than "B-" may apply toward the degree.

Advancement to Candidacy Procedures

Each student must file an application for Advancement to Candidacy indicating a proposed program of graduate study. This procedure should begin as soon as the classified graduate student has:

- removed any deficiencies in admission requirements;
- completed at least 12 units of courses in the graduate program (see Requirements) with a minimum 3.0 GPA; and
• met the Graduate writing requirement through completion of the Graduate Writing Intensive (GWI) course, EDI 250, with a B grade or better.

Advancement to Candidacy form is submitted online through MySacState. The student fills out the form after planning a degree program in consultation with his or her faculty advisor. The completed form is then approved by the Graduate Coordinator of the Department and submitted to the Office of Graduate Studies.

**Total Units**: 30

1. Program electives are to be selected by the student in consultation with the Universal Design for eLearning Program Coordinator. At least three of the elective units must be at the 200 level. Students may focus their elective units in a program of their interest or select courses from other programs. Examples of Universal Design for eLearning elective programs include: Curriculum and Instruction, Language and Literacy, Multicultural Education, Gender Equity, BTSA or other pre-approved induction courses.

With UDEL Program Coordinator approval, elective courses may include one of the following:

- 6 transfer elective units (must not be independent study or supervision units)
- 6 units of academic credit earned through Continuing Education

2. Credit is given upon completion of an Exam which consists of an ePortfolio approved culminating experience for the Master of Arts in Universal Design for eLearning. Open only to the graduate student who has been advanced to degree and has secured the permission of the UDEL Program Coordinator.

### MS in Counseling (Career Counseling)

**Total units required for MS: 60**

### Program Description

The 60-unit Master of Science in Counseling prepares professional counselors for employment in a variety of settings such as public and private agencies, universities and colleges, schools and private practice. This degree meets the educational requirements for becoming a Licensed Marriage and Family Therapist (LMFT) and/or a Licensed Professional Clinical Counselor (LPCC) in the State of California. The 59-unit Pupil Personnel Services, School Counseling Credential prepares professional counselors to work within the K-12 educational system.

The programs are clinically oriented, with didactic and experiential courses, a 100-hour clinical practicum, and 600 hours of field experience. The program is a full time three-year program and students will take between 9-12 units each fall and spring to complete within the three years. Students are admitted into a cohort and will follow the course sequence designated by their program concentration. The cohort model allows students to advance together throughout their education while building support and connections within their peer group. Students are encouraged to advance their advocacy and professional experiences through such activities as participation in professional organizations, research, and presentations at the state, regional, and national level; involvement in the CSUS Multicultural Conference; [https://www.csus.edu/college/education/engagement/mce_conference/](https://www.csus.edu/college/education/engagement/mce_conference/) and/or involvement in the Counselor Education Student Counseling Society. Both leadership and research opportunities are supported through faculty mentorship. The curricular experience is organized around core foundation courses, an intensive on-campus practicum training clinic experience, interpersonal growth experiences, advanced theory and practice courses, and a culminating field study placement.

### Career Counseling Concentration

- The Career Counseling Concentration provides students with the knowledge, theory, and skills to work as effective counselors/career development specialists, and consultants in a variety of settings: community-based agencies, schools (K-12), colleges and universities, private practice, business, industry, and government. Students are trained to facilitate a holistic career development/career decision-making/planning process with groups and individuals that integrates personal, social, and career needs. Students develop the skills to address current issues in the 21st century, such as career self-reliance, work/family/life balance, multiculturalism, diversity, and lifelong learning.

Note: Only students who are already enrolled in the School Counseling specialization at California State University, Sacramento may apply to the Pupil Personnel Services School Counseling Internship Credential Program (p. 492).

The Career Counseling: Marriage, Couple, and Family Counseling: Rehabilitation Counseling: and School Counseling concentrations at Sacramento State are nationally accredited by the Council for Accreditation of Counseling and Related Educational Programs (CACREP).

Note: For additional information on credentials, see the "College of Education" section of this catalog. Program requirements are subject to change in order to maintain compliance with relevant state and national certification, licensure, and/or accreditation requirements. Interested parties should refer to the current student handbook for up to date program information.

### Special Features

- An on-campus Center for Counseling and Diagnostic Services brings clients from off campus to be counseled by students in the program and provides opportunity for video and audio feedback.
- Trainees provide off-campus counseling in local agencies, school districts, hospitals, and non-profit organizations.
- The Masters in Counseling Program and participating school districts collaborate with the Migrant Education Advisor Program (MEAP),
which is a collaborative partnership with the Office of Migrant Education.
- Faculty actively support diversity and focus on multicultural counseling skills throughout the curriculum.
- Classes are offered during the day, late afternoon, and evening.

Admission Requirements
Admission as a classified graduate student in the Master of Science in Counseling program requires:

- A baccalaureate degree;
- Good academic standing at the last college attended;
- A grade point average of at least 3.0 (on a 4.0 scale) in the last 60 semester (or 90 quarter units);
- Completion of the University application materials;
- Completion and submission of all Departmental application materials which include:
  - Application form;
  - Written statements delineated in application, including a Personal Statement and Writing Sample;
  - Copies of transcripts (from all universities and colleges attended);
  - Professional letters of recommendation (2 required);
  - Relevant work experience via a Resume/CV
- Participation in an In-Person Admission Evaluation, which may include (but is not limited to) interviews, experiential activities, and writing samples.

Selected applicants, based on paper screening of completed applications, will be invited for an In-Person Admission Evaluation. Decisions for admission into the Master of Science in Counseling program are made based on a comprehensive assessment of all application materials and performance in the In-Person Admission Evaluation.

Admission Procedure
The M.S. in Counseling accepts applications each fall for admission the following year. The program does not offer spring admissions. Applicants must complete a university application and program supplemental application by the posted application deadline date for the term applying.

For more admissions information and application deadlines, please visit the Office of Graduate Studies website (https://www.csus.edu/graduate-studies/).

Prospective applicants, including Sacramento State graduates, must submit one set of official transcripts from all colleges and universities attended, other than Sacramento State, to the Office of Graduate Studies either electronically to gradtranscripts@csus.edu or physical transcripts for those institutions that do not send official transcripts electronically can be addressed to:

Office of Graduate Studies
California State University, Sacramento
Riverfront Center, Room 215, MS 6112
6000 J St.
Sacramento, CA 95819

Admission is competitive with a limited number of students admitted each year. At the end of the application and screening period, a program recommendation will be submitted to the Office of Graduate Studies for further review. Decisions regarding admission are then emailed to each applicant. Following admission, students are assigned to a faculty advisor who assists with academic advising.

The Master of Science in Counseling and the Pupil Personnel Services credentials are subject to general University and requirements. These requirements are explained in the "Graduate Degree Requirements" and the "Counselor Education" sections of this catalog. Students may be disqualified when not meeting program standards (see Counselor Education Student Handbook).

Minimum Units and Grade Requirement for the Degree
Units required for the MS: 60
Minimum Cumulative GPA: 3.0

Advancement to Candidacy
Each student working toward a Master’s degree must file an application for Advancement to Candidacy for the Master’s degree. The purpose of this application is to provide certification to the Office of Graduate Studies that the student will complete or has completed the necessary requirements and acceptable electives for the Master’s degree with a minimum 3.0 GPA. The Advancement to Candidacy application should be filed upon completion of 30 units in the program but typically our students complete this in their final year of our program.

Note: Students must meet the Graduation Writing Assessment Requirement (GWAR) before advancing to candidacy. Our EDC 250 serves as our Graduate Writing Intensive (GWI) course to advance to candidacy.

The Advancement to Candidacy form is submitted online. Students should complete the relevant form electronically in consultation with their assigned academic advisor. Once the form is endorsed by the student and the advisor, it will be verified by the Department's Graduate Coordinator and then forwarded to the Office of Graduate Studies for final approval. An Advancement to Candidacy must be on file prior to submitting a Petition to Graduate to the Office of Graduate Studies.

For Counselor Education information please visit the College of Education: Master’s Programs Website (https://www.csus.edu/college/education/masters-programs/) where you will find the Counselor Education webpage (https://www.csus.edu/college/education/masters-programs/counselor-education.html) and under the “Current Students” link, the Forms and Handbooks (https://www.csus.edu/college/education/masters-programs/current-students.html) page where you can obtain the Student Handbook. It is highly recommended that students read the Student Handbook.

#### Marriage, Couple, and Family Counseling Concentration

- The Marriage, Couple, and Family Counseling Concentration is designed to provide students with all the educational competencies required by the California State Board of Behavioral Sciences (BBS) for licensure as a Marriage and Family Therapist (LMFT). The program trains professionals to work in a variety of settings, including community agencies, county and state agencies, hospitals and private practice, and prepares students to provide consulting to businesses and agencies. Emphasis is placed on developmental and preventative concerns from a holistic perspective.

Note: Only students who are already enrolled in the School Counseling concentration at California State University, Sacramento may apply to the Pupil Personnel Services School Counseling Internship Credential Program (p. 492).

The Career Counseling; Marriage, Couple, and Family Counseling; Rehabilitation Counseling; and School Counseling concentrations at Sacramento State are nationally accredited by the Council for Accreditation of Counseling and Related Educational Programs (CACREP). The Marriage, Couple, and Family Counseling concentration is both CACREP accredited, and COAMFTE aligned, in order to help students with licensure in California and other states.

Note: For additional information on credentials, see the “College of Education” section of this catalog. For program specific information, see the Counselor Education webpage. Program requirements are subject to change in order to maintain compliance with relevant state and national certification, licensure, and/or accreditation requirements. Interested parties should refer to the current student handbook for up to date program information.

### Special Features

- An on-campus Center for Counseling and Diagnostic Services brings clients from off campus to be counseled by students in the program and provides opportunity for video and audio feedback.

---

1. Minimum GPA: 3.0
2. Academic Residence: A minimum of 42 approved semester units in 100-, 200-, and 500-series offerings must be earned in residence at California State University, Sacramento.

---

### Culminating Requirement (1 Unit)

All students in the M.S. in Counseling program must enroll in EDC 500 during their final semester in the program and complete the Counselor Education Preparation Comprehensive Examination (CPCE).

In order to pass this multiple choice examination, a student must meet the minimum criterion score set by the Counselor Education Program. Categories covered include:

- Human Growth and Development
- Social and Cultural Foundations
- Helping Relationships
- Group Work
- Career and Lifestyle Development
- Appraisal
- Research and Program Evaluation
- Professional Orientation and Ethics

1. Department petition required the semester prior to enrollment.

---

### MS in Counseling (Marriage, Couple, and Family Counseling)

**Total units required for MS**: 60

---

**Special Features**

- An on-campus Center for Counseling and Diagnostic Services brings clients from off campus to be counseled by students in the program and provides opportunity for video and audio feedback.
- Trainees provide off-campus counseling in local agencies, school districts, hospitals, and non-profit organizations.
- Faculty actively support diversity and focus on multicultural counseling skills throughout the curriculum.
- Classes are offered during the day, late afternoon, and evening.
- Opportunities to collaborate with school districts.

**Admission Requirements**

Admission as a classified graduate student in the Master of Science in Counseling program requires:

- A baccalaureate degree;
- Good academic standing at the last college attended;
- A grade point average of at least 3.0 (on a 4.0 scale) in the last 60 semester (or 90 quarter units);
- Completion of the University application materials;
- Completion and submission of all Departmental application materials which include:
  - Application form;
  - Written statements delineated in application, including Personal Statement and Writing Prompt;
  - Copies of transcripts (from all universities and colleges attended);
  - Professional letters of recommendation (2 required);
  - Relevant work experience via a Resume/CV.
- Participation in an In-Person Admission Evaluation, which may include (but is not limited to) interviews, experiential activities, and writing samples.

Selected applicants, based on paper screening of completed applications, will be invited for an In-Person Admission Evaluation via an Interview Day. Decisions for admission into the Master of Science in Counseling program are made based on a comprehensive assessment of all application materials and performance in the In-Person Admission Evaluation.

**Admission Procedure**

The M.S. in Counseling accepts applications each fall for admission the following year. The program does not offer spring admissions. Applicants must complete a university application and program supplemental application by the posted application deadline date for the term applying.

For more admissions information and application deadlines, please visit the Office of Graduate Studies website (https://www.csus.edu/graduate-studies/).

Prospective applicants, including Sacramento State graduates, must submit one set of official transcripts from all colleges and universities attended, other than Sacramento State, to the Office of Graduate Studies either electronically to gradtranscripts@csus.edu or physical transcripts for those institutions that do not send official transcripts electronically can be addressed to:

Office of Graduate Studies
California State University, Sacramento
Riverfront Center, Room 215, MS 6112
6000 J St.
Sacramento, CA 95819

Admission is competitive with a limited number of students admitted each year. At the end of the application and screening period, a program recommendation will be submitted to the Office of Graduate Studies for further review. Decisions regarding admission are then emailed to each applicant. Following admission, students are assigned to a faculty advisor who assists with academic advising.

The Master of Science in Counseling and the Pupil Personnel Services credentials are subject to general University and requirements. These requirements are explained in the "Graduate Degree Requirements" and the "Counselor Education" sections of this catalog. Students may be disqualified when not meeting program standards (see Counselor Education Student Handbook).

**Minimum Units and Grade Requirement for the Degree**

Units required for the MS: 60

Minimum Cumulative GPA: 3.0

**Advancement to Candidacy**

Each student working toward a Master’s degree must file an application for Advancement to Candidacy for the Master’s degree. The purpose of this application is to provide certification to the Office of Graduate Studies that the student will complete or has completed the necessary requirements and acceptable electives for the Master’s degree with a minimum 3.0 GPA. The Advancement to Candidacy application should be filed upon completion of 30 units in the program but typically our students complete this in their final year of our program.

**Note:** Students must meet the Graduation Writing Assessment Requirement (GWAR) before advancing to candidacy. Our EDC 250 serves as our Graduate Writing Intensive (GWI) course to advance to candidacy.

The Advancement to Candidacy form is submitted online. Students should complete the relevant form in consultation with their assigned academic advisor. Once the form is endorsed by the student and the advisor, it will be verified by the Department’s Graduate Coordinator and then forwarded to the Office of Graduate Studies for final approval. An Advancement to Candidacy must be on file prior to registration for culminating experience (EDC 500) and prior to submitting a Petition to Graduate to the Office of Graduate Studies.

For Counselor Education information please visit the College of Education: Master’s Programs Website (https://www.csus.edu/college/education/masters-programs/) where you will find the Counselor Education webpage (https://www.csus.edu/college/education/masters-programs/counselor-education.html) and under the “Current Students” link, the Forms and Handbooks (https://www.csus.edu/college/education/masters-programs/current-students.html) page where you can obtain the Student Handbook. It is highly recommended that students read the Student Handbook.

MS in Counseling (Rehabilitation Counseling)

Total units required for MS: 60

Program Description
The 60-unit Master of Science in Counseling prepares professional counselors for employment in a variety of settings such as public and private agencies, universities and colleges, schools and private practice. This degree meets the educational requirements for becoming a Licensed Professional Clinical Counselor (LPCC) in the State of California.

The MS Counseling program is clinically oriented, with didactic and experiential courses, a 100-hour clinical practicum, and 600 hours of field experience. The program is a full time three-year program and students will take between 9-12 units each fall and spring to complete within the three years. Students are admitted into a cohort and will follow the course sequence designated by their program concentration. The cohort model allows students to advance together throughout their education while building support and connections within their peer group. Students are encouraged to advance their advocacy and professional experiences through such activities as participation in professional organizations, research, and presentations at the state, regional, and national level; involvement in the CSUS Multicultural Conference; (https://www.csus.edu/college/education/engagement/mce_confERENCE/) Counselor Education Symposium, and/or involvement in our Chi Sigma Sigma chapter of Chi Sigma Iota. Both leadership and research opportunities are supported through faculty mentorship. The curricular experience is organized around core foundation courses, an intensive on-campus practicum training clinic experience, interpersonal growth experiences, advanced theory and practice courses, and a culminating field study placement.

Rehabilitation Counseling Concentration
- The MS in Counseling program, and Rehabilitation Counseling concentration, is designed to provide all the educational competencies required by the California State Board of Behavioral Sciences (BBS) for licensure as Licensed Professional Clinical Counselor (LPCC). The Rehabilitation Counseling concentration will prepare graduates with specialized skills to help individuals with cognitive, physical, sensory, psychiatric, and other disabilities work through a variety of mental health issues and provide treatment of mental disorders, including co-occurring disorders. Students will be practice skills within the principles and practices of clinical counseling such as assessment, diagnosis, treatment, referral, and prevention. Rehabilitation Counselors work in a wide variety of settings including private practice, community-based mental health facilities, substance treatment facilities, schools, hospitals and/or other treatment centers, private agencies, college campuses, and state agencies.
- This concentration trains Rehabilitation Counselors to consider the medical, psychosocial, family, co-occurring substance use trauma, and environmental influences on disability and the individual's ability to function in their environment. Rehabilitation Counselors are trained to identify and implement interventions to optimize rehabilitative functioning.
- The program includes training in counseling techniques, medical and psychosocial aspects of disability, comorbid conditions, diagnosis and treatment planning, and the potential for trauma and substance
use disorders to mimic and/or co-occur with a variety of neurological, medical, and psychological disorders.

- Students in the Rehabilitation program are eligible for their Licensed Professional Clinical Counselor (LPCC) license and Certified Rehabilitation Counselor (CRC) credential.

Note: Only students who are already enrolled in the School Counseling Concentration at California State University, Sacramento may apply to the Pupil Personnel Services School Counseling Internship Credential Program (p. 492).

The MS Counseling: Career Counseling; Marriage, Couple and Family Counseling; Rehabilitation Counseling; and School Counseling concentrations at Sacramento State are accredited by the Council for Accreditation of Counseling and Related Educational Programs (CACREP (https://www.cacrep.org/)).

Note: For additional information on credentials, see the “College of Education” section of this catalog. Program requirements are subject to change in order to maintain compliance with relevant state and national certification, licensure, and/or accreditation requirements. Interested parties should refer to the current student handbook for up to date program information.

Special Features
- An on-campus Center for Counseling and Diagnostic Services brings clients from off campus to be counseled by students in the program and provides opportunity for video and audio feedback.
- Trainees provide off-campus counseling in local agencies, school districts, hospitals, and non-profit organizations.
- The Masters in Counseling Program and participating school districts collaborate with the Migrant Education Advisor Program (MEAP), which is a collaborative partnership with the Office of Migrant Education.
- Faculty actively support diversity and focus on multicultural counseling skills throughout the curriculum.
- Classes are offered during the morning, afternoon, and evening.

Admission Requirements
Admission as a classified graduate student in the Master of Science in Counseling program requires:

- A baccalaureate degree;
- Good academic standing at the last college attended;
- A grade point average of at least 3.0 (on a 4.0 scale) in the last 60 semester (or 90 quarter units);
- Completion of the University application materials;
- Completion and submission of all Departmental application materials which include:
  - Application form;
  - Written statements delineated in application, including a Personal Statement and Writing Prompt;
  - Copies of transcripts (from all universities and colleges attended);
  - Professional letters of recommendation (2 required);
  - Relevant work experience via a Resume/CV.
- Participation in an In-Person Admission Evaluation, which may include (but is not limited to) interviews, experiential activities, and writing samples.

Selected applicants, based on paper screening of completed applications, will be invited for an In-Person Admission Evaluation. Decisions for admission into the Master of Science in Counseling program are made based on a comprehensive assessment of all application materials and performance in the In-Person Admission Evaluation.

Admission Procedure
The M.S. in Counseling accepts applications each fall for admission the following year. The program does not offer spring admissions. Applicants must complete a university application and program supplemental application by the posted application deadline date for the term applying.

For more admissions information and application deadlines, please visit the Office of Graduate Studies website (https://www.csus.edu/graduate-studies/).

Prospective applicants, including Sacramento State graduates, must submit one set of official transcripts from all colleges and universities attended, other than Sacramento State, to the Office of Graduate Studies either electronically to gradtranscripts@csus.edu or physical transcripts for those institutions that do not send official transcripts electronically can be addressed to:

Office of Graduate Studies
California State University, Sacramento
Riverfront Center, Room 215, MS 6112
6000 J St.
Sacramento, CA 95819

Admission is competitive with a limited number of students admitted each year. At the end of the application and screening period, a program recommendation will be submitted to the Office of Graduate Studies for further review. Decisions regarding admission are then emailed to each applicant. Following admission, students are assigned to a faculty advisor who assists with academic advising.

Students are strongly advised to remain in communication with the Counselor Education Program (by attending group advising sessions and meeting with their assigned faculty advisor each semester) as well as with any licensing or credentialing boards related to their area(s) of specialization (i.e., California Board of Behavioral Sciences, Commission on Rehabilitation Counselor Certification) since licensing and credentialing requirements may change. Catalog rights hold only degree requirements; they do not protect students from changes such as prerequisites required for a given course, field study hours, individual course requirements, or additional requirements imposed by licensing or credentialing agents. Students should note that the Counselor Education course listings are subject to modification.

### MS in Counseling (School Counseling with Embedded PPS Credential)

**Total units required for MS: 60**

**Program Description**

The 60-unit Master of Science in Counseling prepares professional counselors for employment in a variety of settings such as public and private agencies, universities and colleges, schools and private practice. This degree meets the educational requirements for becoming a Licensed Marriage and Family Therapist (LMFT) and/or a Licensed Professional Clinical Counselor (LPCC) in the State of California. The 59-unit Pupil Personnel Services, School Counseling Credential prepares professional counselors for work within the K-12 educational system.

The programs are clinically oriented, with didactic and experiential courses, a 100-hour clinical practicum, and 600 hours of field experience. The program is a full time three-year program and students will take between 9-12 units each fall and spring to complete within the three years. Students are admitted into a cohort and will follow the course sequence designated by their program concentration. The cohort model allows students to advance together throughout their education while building support and connections within their peer group. Students are encouraged to advance their advocacy and professional experiences through such activities as participation in professional organizations, research, and presentations at the local, state, regional, and national level; involvement in the CSUS Multicultural Conference; (https://www.csus.edu/college/education/engagement/mce_conference/) and/or in the Counselor Education Student Counseling Society. Both leadership and research opportunities are supported through faculty mentorship. The curricular experience is organized around core foundation courses, an intensive on-campus practicum training clinic...
experience, interpersonal growth experiences, advanced theory and practice courses, and a culminating field study placement.

**School Counseling Concentration**

- The School Counseling Concentration is designed for individuals who seek to become elementary, middle, or secondary school counselors. This program meets the requirements for the K-12 California Pupil Personnel Services Credential, School Counseling (PPS-SC). Students in this program are prepared to function as key members of an educational team seeking to optimize children's academic, socio-emotional, and career development. Students obtain the expertise necessary to lead the educational team in working collaboratively with a broad range of education and human service professionals, paraprofessionals, and community representatives to identify, develop, implement, and evaluate programs that provide key services to both the individual child as well as the systems and subsystems in which the child interacts.

- Commission on Teacher Credentialing (CCTC) requires 600 hours of field study, therefore the School Counseling students will complete a 60 unit program.

- The School Counseling Concentration is also designed to provide students with all the educational competencies required by the California State Board of Behavioral Sciences (BBS) for licensure as a Licensed Professional Clinical Counselor (LPCC). The program is CACREP aligned which supports LPCC eligibility and meets most out of state standards for students wishing to move states where CACREP is required.

Students in the School Counseling Concentration who intend to be employed in California will need to obtain the Pupil Personnel Services Credential, School Counseling (PPS-SC).

*Note: Only students who are already enrolled in the School Counseling concentration at California State University, Sacramento may apply to the Pupil Personnel Services School Counseling Internship Credential Program (p. 492). This credential is embedded within the master's degree, School Counseling concentration.*

The Career Counseling; Marriage, Couple, and Family Counseling; Rehabilitation Counseling, and School Counseling concentrations at Sacramento State are nationally accredited by the Council for Accreditation of Counseling and Related Educational Programs (CACREP). The School Counseling concentration is accredited by the California Commission on Teacher Credentialing (CTC).

*Note: For additional information on credentials, see the "College of Education" section of this catalog. Program requirements are subject to change in order to maintain compliance with relevant state and national certification, licensure, and/or accreditation requirements. Interested parties should refer to the current student handbook for up to date program information.*

**Special Features**

- An on-campus Center for Counseling and Diagnostic Services brings clients from off campus to be counseled by students in the program and provides opportunity for video and audio feedback.

- The Masters in Counseling Program and participating school districts collaborate with the Migrant Education Advisor Program (MEAP), which is a collaborative partnership with the Office of Migrant Education.

- Faculty actively support diversity and focus on multicultural counseling skills throughout the curriculum.

- Classes are offered during the day, late afternoon, and evening.

**Admission Requirements**

Admission as a classified graduate student in the Master of Science in Counseling program requires:

- A baccalaureate degree;
- Good academic standing at the last college attended;
- A grade point average of at least 3.0 (on a 4.0 scale) in the last 60 semester (or 90 quarter units);
- Completion of the University application materials;
- Completion and submission of all Departmental application materials which include:
  - Application form;
  - Written statements delineated in application, including Personal Statement and Writing Prompt;
  - Copies of transcripts (from all universities and colleges attended);
  - Professional letters of recommendation (2 required);
  - Relevant work experience via a Resume/CV.
- Participation in an In-Person Admission Evaluation, which may include (but is not limited to) interviews, experiential activities, and writing samples.

*Selected applicants, based on paper screening of completed applications, will be invited for an In-Person Admission Evaluation. Decisions for admission into the Master of Science in Counseling program are made based on a comprehensive assessment of all application materials and performance in the In-Person Admission Evaluation.*

Individuals must satisfy the basic skills requirement by one of the CTC approved methods prior to receiving the Pupil Personnel Services Credentials.

**Admission Procedure**

The M.S. in Counseling accepts applications each fall for admission the following year. The program does not offer spring admissions. Applicants must complete a university application and program supplemental application by the posted application deadline date for the term applying.

For more admissions information and application deadlines, please visit the Office of Graduate Studies website ([https://www.csus.edu/graduate-studies/](https://www.csus.edu/graduate-studies/)).

Prospective applicants, including Sacramento State graduates, must submit one set of official transcripts from all colleges and universities attended, other than Sacramento State, to the Office of Graduate Studies either electronically to gradtranscripts@csus.edu or physical transcripts for those institutions that do not send official transcripts electronically can be addressed to:

**Total Units:** 15

**Culminating Requirement (1 Unit)**

All students in the M.S. in Counseling program must enroll in EDC 500 during their final semester in the program and complete the Counselor Preparation Comprehensive Examination (CPCE).

In order to pass this multiple choice examination, a student must meet the minimum criterion score set by the Counselor Education Program. Categories covered include:

- Human Growth and Development
- Social and Cultural Foundations
- Helping Relationships
- Group Work
- Career and Lifestyle Development
- Appraisal
- Research and Program Evaluation
- Professional Orientation and Ethics

1. Department petition required the semester prior to enrollment.

**Preliminary Administrative Services Credential**

Total units required for Credential: 24

**Program Description**

Educational Leadership and Policy Studies’ Preliminary Administrative Services Credential program aims to develop P-12 educational leaders from diverse backgrounds who will positively impact P-12 educational
settings. The program specifically focuses on cultivating leaders who promote learning, equity, social justice and achievement for all students.

Educational Leadership and Policy Studies seeks to prepare transformational leaders with the capacity to effectively facilitate and manage change.

**Admission Requirements**

1. Completion of a baccalaureate degree at the time of application;
2. GPA in the last 60 units of 2.5 or better;
3. Completion, and successful review, of CSU Mentor and program Supplemental application;
4. A minimum of 4 years teaching experience in a P-12 educational setting; and
5. Successful interview with faculty, demonstrating:
   - Preparation for graduate level study
   - Leadership experience
   - Familiarity with current issues in education
   - Knowledge of conflict resolution and negotiation skills
   - Knowledge of P-12 education as a field
   - Entry level understanding of ethical leadership
   - Vision for P-12 education

**Admission Procedures**

Prospective graduate students, including Sacramento State graduates, must file the following with the Office of Graduate Studies, Riverfront Center 215, (916) 278-6470:

- an online application for admission; and
- one set of official transcripts from all colleges and universities attended, other than Sacramento State.

For more admissions information and application deadlines, please visit the Office of Graduate Studies website (http://www.csus.edu/gradstudies/).

The graduate degree program is subject to general University and Departmental requirements. These requirements are explained in the Graduate Degree Requirements (p. 86) section of the University Catalog.

This is a three semester program but students will have the option of taking an additional (fourth) semester if needed.

Pupil Personnel Services School Counseling Credential

Total units required for Credential: 59

Program Description

California schools, kindergarten through high school, require their school counselors to have the PPS-SC. Students pursuing the 59-unit PPS-SC Credential follow the exact same course requirements as students with the 60-unit Master’s in Counseling Degree objective who are specializing in school counseling, with the exception of a 1-unit Culminating Requirement. The 60-unit master’s degree is not required, although most students elect to complete the degree. In addition to the PPS-SC course requirements, individuals who obtain the credential must pass the California Basic Educational Skills Test (CBEST), required for all TK-12 credentials in California. The program meets all standards established by the California Commission for Teacher Credentialing (CCTC).

Students pursuing the Pupil Personnel Services School Counseling Credential follow the same course requirements, with the exception of the Culminating Requirement, as do master’s degree students with the School Counseling specialization objective.

Pupil Personnel Services School Counseling Internship Credential

Total units required for Credential: 59

Program Description

The PPS-SCI enables school districts and other educational agencies to place candidates in school counseling positions prior to the completion of credential requirements, provided that the CBEST and practicum coursework have been passed. Requests must originate in writing from the district superintendent or other appropriate officers. The program meets all standards established by the California Commission for Teacher Credentialing (CCTC).

The Pupil Personnel Services Internship Credential Program is limited only to students who are already classified students in the Department of Counselor Education in the School Counseling Specialization. This program is not open to applicants from other institutions.

Admission Requirements

Requests to enter the Pupil Personnel Services School Counseling Internship Credential program must originate in writing from the district superintendent or other appropriate officer stating that the individual is in a position or being offered a position (for the duration of at least one year) which requires the authorization of a Pupil Personnel Services Credential in School Counseling.

Individuals must satisfy the basic skills requirement by one of the CTC approved methods prior to receiving the Pupil Personnel Services Internship Credential.

**Pupil Personnel Services School Psychology Endorsement Credential**

**Total units required for Credential: 91-95**

**Program Description**

The Pupil Personnel Services School Psychology Endorsement Credential is administered by the California Commission on Teacher Credentialing (CCTC). California State University, Sacramento, is accredited by the CCTC to award this credential to students meeting program requirements. The credential is required to practice as a school psychologist in the state of California. Possession of the MA in School Psychology or its equivalent, and the Pupil Personnel Services School Psychology Endorsement Credential also prepares an individual to meet the academic requirements for California’s Licensed Educational Psychologist license administered by the Board of Behavioral Science Examiners, California Department of Consumer Affairs.

Unique strengths of the program include supervised training in a clinic setting, early field experience that includes a minimum 325-hour field placement in public school settings, and instruction by faculty who hold school psychology credentials.

The program also offers a School Psychology Internship Program. The internship is typically paid and interns are selected by employing districts. Students are not eligible for the School Psychology Internship Program until they are ready to register for EDS 441A, Internship in School Psychology. For the full time student this usually occurs in the fifth semester of the program. A minimum 1,200-hour internship, completed in not more than four semesters, is required and must be approved by the School Psychology Program’s Internship Coordinator.

**Program Requirements**

The Pupil Personnel Services School Psychology Endorsement Credential requires the program outlined for the MA in School Psychology (p. 479) plus additional coursework. The requirements listed below include both MA in School Psychology courses AND the practicum and fieldwork requirements that are unique to the Pupil Personnel Services School Psychology Endorsement Credential.

**Note.** Students who were awarded an appropriate graduate degree prior to beginning the Pupil Personnel Services School Psychology Endorsement Credential may (with the approval of relevant faculty) substitute prior course work for selected courses listed in this Plan of Study Grid.

**Reading/Language Arts Specialist Credential**

**Total units required for Credential: 24**
Program Description

A graduate student may earn a Reading/Language Arts Specialist Credential (issued by CCTC) by completing the courses listed below. This credential prepares teachers for literacy related teaching positions pre-K to 12 as well as for leadership roles at school and district levels. Enrollment in the Master’s program is not required provided that the following admission requirements are met.

Note: Teachers must have three years of teaching experience before the Reading/Language Arts Specialist Credential can be awarded.

Admission Requirements

Admission to the Reading/Language Arts Specialist Credential requires:

- a valid California Basic Teaching Credential (e.g., Multiple Subject or Single Subject Credential);
- a minimum 3.0 GPA in the last 60 units;
- successful completion of a basic course in the Teaching of Reading from an accredited university; if reading methods course is older than seven years, must show evidence of: a) current staff development in Language and Literacy by participation in workshops, institutes, etc., (candidates must show documentation); or b) passing the RICA test within the past seven years; and
- completion of the Reading/Language Arts Specialist Credential Application (available in Eureka Hall 203 and on the College of Education’s website (http://csus.edu/coe/).)

Teaching Credentials

College of Education

For more information, please visit our website: Teaching Credentials (https://www.csus.edu/college/education/teaching-credentials/)

Preliminary Teaching Credentials Programs

1. Master of Arts in Special Education Teaching (Education Specialist Early Childhood) (p. 520)
2. Master of Arts in Special Education Teaching (Extensive Support Needs) (p. 523)
3. Master of Arts in Special Education Teaching (Extensive Support Needs) with Multiple Subject (p. 526)
4. Master of Arts in Special Education Teaching (Mild to Moderate Support Needs) (p. 530)
5. Master of Arts in Special Education Teaching (Mild to Moderate Support Needs) With Multiple Subject (p. 533)
6. Master of Arts in Teaching (Multiple Subject) (p. 537)
7. Master of Arts in Teaching (Single Subject) (p. 540)

Accreditation

In addition to California State University, Sacramento’s full accreditation by the Western Association of Schools and Colleges, our teacher education programs are accredited by the California Commission on Teacher Credentialing.

Bilingual Authorization

All credential candidates with oral and written fluency as well as cultural/historical knowledge of the target group (Spanish or Hmong) can complete additional requirements to add the Bilingual Authorization (https://www.csus.edu/college/education/teaching-credentials/authorizations.html) in Spanish or Hmong.

Supplementary Authorizations

All credential candidates are eligible to add a variety of supplementary authorizations (https://www.csus.edu/college/education/teaching-credentials/authorizations.html) to the basic teaching credential.

Notice to Students RE: Professional Licensure and Certification

California State University programs for professions that require licensure or certification are intended to prepare the student for California licensure and certification requirements. Admission into programs for professions that require licensure and certification does not guarantee that students will obtain a license or certificate. Licensure and certification requirements are set by agencies that are not controlled by or affiliated with the California State University and licensure and certification requirements can change at any time.

The California State University has not determined whether its programs meet other states’ educational or professional requirements for licensure and certification. Students planning to pursue licensure or certification in other states are responsible for determining whether, if they complete a California State University program, they will meet their state’s requirements for licensure or certification. This disclosure is made pursuant to 34 CFR §668.43(a)(5)(v)(C).

Teaching Credentials Website (https://www.csus.edu/college/education/teaching-credentials/)
EDMS 213. Strategies for Inclusive Classrooms: Multiple Subject. 3 Units
Prerequisite(s): Admission into a teacher preparation program.
Term Typically Offered: Fall, Spring

This course provides multiple subject and special education candidates with dispositions, knowledge, and skills needed to serve students with disabilities in general education classrooms. Strategies specific to students in their least restrictive environment will be covered emphasizing Universal Design for Learning, Multi-Tiered Systems of Support, social-emotional learning, co-teaching, differentiated instruction, roles and responsibilities of special/general education teachers, peer mediated learning strategies, modifications of standards and learning outcomes for students with disabilities, and assistive technology (low and high tech adaptations).
Cross listed: EDSS 282/EDSP 293/EDMS 213

EDMS 232. Assessment Center Laboratory for Multiple Subject Candidates. 2 Units
Corequisite(s): EDMS 430B or EDMS 434B or EDSP 420B.
Term Typically Offered: Fall, Spring

Individualized support to guide multiple subject candidates through the process of completing and submitting the culminating Teaching Performance Assessment (TPA) mandated by the program’s accrediting body and completion of their electronic program portfolio. The signature assignments, formative TPA assessments and summative TPA Teaching Event represent an electronic portfolio embedded throughout the program. In addition, the candidates will complete an annotated bibliography for readings across the credential program.
Credit/No Credit

EDMS 234A. Foundations of Teaching in a Diverse K-8 Classroom - A. 1 Unit
Prerequisite(s): Admission to the Multiple Subject Teacher Credential Program or the Master of Arts in Teaching with Multiple Subject Teaching Credential Program.
Corequisite(s): EDMS 234B
Term Typically Offered: Fall, Spring

Introduction to critical analysis of purpose and process of elementary level public schooling in the U.S. Examination of sociopolitical contexts of public schools and society; educational theories, philosophies, notions of culture and social justice, community and educational practice. Engagement with sociocultural, historical, and philosophical foundations of education, multicultural education, learning theories, and theories of cognitive and social development. Candidates examine own biases and work to mitigate negative impact on student learning. This lecture course paired with breakout discussion (EDMS 234B).
EDMS 234B. Foundations of Teaching in a Diverse K-8 classroom - B.  2 Units
Prerequisite(s): Admission to the Multiple Subject Teacher Credential Program or the MA in Teaching with Multiple Subject Credential Program.
Corequisite(s): EDMS 234A
Term Typically Offered: Fall, Spring
Introduction to critical analysis of purpose and process of elementary level public schooling in the U.S. Examination of sociopolitical contexts of public schools and society; educational theories, philosophies, notions of culture and social justice, community and educational practice. Engagement with sociocultural, historical, and philosophical foundations of education, multicultural education, learning theories, and theories of cognitive and social development. Candidates examine own biases and work to mitigate negative impact on student learning. This discussion course paired with lecture (EDMS 234A).

EDMS 235A. Advanced Principles of Teaching in a Diverse K-8 Classroom - A.  1 Unit
Corequisite(s): EDMS 235B
Term Typically Offered: Fall, Spring
This course is the lecture portion of a two-course series. It deepens candidates' knowledge of theories and practices necessary to execute the Plan-Instruct-Assess-Reflect cycle of mindful teaching for diverse students. Candidates will expand their understandings of how theoretical frameworks for teaching (learning theory, human development theory, multicultural education, inclusive and differentiated education, assessment frameworks, and models of teaching and curriculum planning) are applied in varied public school classrooms and contexts.

EDMS 235B. Advanced Principles of Teaching in a Diverse K-8 Classroom - B.  1 Unit
Corequisite(s): EDMS 235A
Term Typically Offered: Fall, Spring
This course is the discussion portion in a two-course series. In this course, candidates translate theories, concepts and frameworks presented in Advanced Principles of Teaching A into strategies and practices for instruction, assessment, and curriculum development in the K-8 classroom. Candidates will create activities, develop lesson and unit plans that integrate and apply various theories and frameworks for instruction. Candidates will design, lead and engage in simulations, peer teaching, and workshops.

EDMS 241. Action Research in Multicultural Settings.  5 Units
Prerequisite(s): Admission to the Master of Arts in Teaching with Multiple/Single Subject Teaching Credential program; Completion of EDMS 434B or EDMS 474B.
Term Typically Offered: Summer only
This course focuses on an introduction to Action Research in multicultural educational settings. It includes an overview of various research paradigms, with emphasis on Action Research and Teacher Action Research. Additional topics covered in this course include: critical pedagogy, forms of multicultural education, and issues related to educational equity and providing access of opportunity to students from underserved populations.

Cross listed: EDSS 241

EDMS 242. Critical Perspectives in Classroom Inquiry.  3 Units
Prerequisite(s): EDMS 241 or EDSS 241.
Term Typically Offered: Fall only
This course is part of the Master of Arts in Teaching with Multiple Subject Teaching Credential Program and builds on the knowledge that students gain in EDMS/EDSS 241. During this course students will complete a literature review of research related to their critical inquiry question. Students will additionally explore the historical and current trends in critical classroom inquiry and consider the implications for schools in diverse settings. Further course activities include developing a Classroom Inquiry Project and submitting the IRB.

Cross listed: EDSS 242.

EDMS 243. Data Collection for Action Research in Multicultural Settings.  3 Units
Prerequisite(s): EDMS 241 or EDSS 241.
Term Typically Offered: Fall only
This course builds students understanding of appropriate types and uses of data in Action Research in multicultural education settings. During this course students will be presented with the sociopolitical contexts for data collection and its subsequent use in educational policy. Students will apply theoretical knowledge by practicing to collect and initially interpreting multiple types of data. These experiences will lay the groundwork for students¿ development and implementation of the data collection plan for their own Classroom Inquiry Projects.

Cross listed: EDSS 243.

EDMS 244. Sociocultural & Sociopolitical Contexts of Data Analysis.  3 Units
Prerequisite(s): EDMS 242 or EDSS 242 and EDMS 243 or EDSS 243
Term Typically Offered: Spring only
This course builds students¿ understanding of appropriate methods of data analysis in Teacher Action Research in multicultural education settings. Students will learn how data analysis has been used to interpret research in diverse school settings. Students will apply theoretical knowledge by analyzing multiple types of data sets form both qualitative and quantitative sources. These experiences will lay the groundwork for students¿ implementation of analysis of their own data for their Action Research inquiry projects.

Cross listed: EDSS 244

EDMS 272. Methods for Teaching Second Language Learners, Multiple Subject (ELD and SDAIE).  3 Units
Prerequisite(s): EDUC 170
Term Typically Offered: Fall, Spring
Focus on teaching candidates the methods, techniques and strategies needed to make content accessible for second language learners. Candidates will learn to use the state ELD standards to create ELD lessons and SDAIE lessons within multicultural framework. Candidates will also learn how to interpret and implement formative and summative assessments. Lecture, demonstration, modeling, group work, discussions, field experience.

</table>
EDMS 330A. Educational Technology Lab I. 1 Unit
Prerequisite(s): Admission to Multiple Subject Credential Program.
Term Typically Offered: Fall only

Educational technology lab course will prepare the candidates use technology for three areas: coursework in the teaching credential program, enhancing teaching and learning and eportfolio development. Students are introduced to an array of digital technologies for teaching relevant for K-12 student learning. Among the topics include digital literacy, copyright, fair use, Internet safety, Creative Commons, presentation tools, ISTE standards, technology and Teaching Performance Expectations, presentation tools, interactive whiteboards, and many others. The focus is on students learning about technology use in teaching and learning in K-12 schools. Candidates are prepared to use technology in the Teaching Credential Program and for the development of an electronic portfolio.
Credit/No Credit

EDMS 330B. Educational Technology Lab II. 1 Unit
Prerequisite(s): EDMS 330A
Term Typically Offered: Spring only

In this course, candidates will learn to create, use, and manage appropriate and relevant educational technological processes and resources. The candidates will deepen their knowledge of technology in the K-12 public school environment and apply their understanding to improve student engagement and student learning outcomes. The candidates will also learn to use technology associated with the Teaching Credential Program and finalize their electronic portfolio for the program.
Credit/No Credit

EDMS 334C. Fundamentals of Teaching in a Diverse K-8 Classroom. 2 Units
Prerequisite(s): Admission into the Multiple Subject Credential Program or the MA in Teaching with Multiple Subject Teaching Credential program.
Term Typically Offered: Fall, Spring

This course introduces the relationship between elements of teaching and instructional organization to effectively teach in culturally and linguistically diverse and inclusive elementary classrooms through the use of backwards design, Universal Design for Learning, and differentiated instruction. The focus will be grounded in a Social Justice/Multicultural paradigm. Emphasis will include students’ development as a teacher, curriculum development, and specific theories for instructional practice.

EDMS 401. Observation and Participation in Elementary Schools. 2 Units
Prerequisite(s): Admission to Teacher Preparation Program
Term Typically Offered: Fall, Spring

Observations in classes in several situations and grade levels; service as an assistant in at least one classroom. Visits to community agencies which serve the school population.
Credit/No Credit

EDMS 420A. Field Experience: Multiple Subject. 4 Units
Prerequisite(s): Admission to Teacher Preparation Program.
Term Typically Offered: Fall, Spring

Two semesters of student teaching multiple subjects in public school classrooms providing experiences at two grade levels and with different cultural groups. Intensive, realistic experiences with continuous and varied responsibilities. This first semester student teaching with integrated methods course work requires half-day participation. Experiences in classroom teaching and participation in many of the out-of-class duties of a teacher.
Credit/No Credit

EDMS 420B. Student Teaching: Multiple Subject. 10 Units
Prerequisite(s): Admission to Teacher Preparation Program.
Term Typically Offered: Fall, Spring

Second semester student teaching with integrated methods course work requires full-day participation of the student. Emphasis on classroom teaching and further experience with community services.
Credit/No Credit

EDMS 430A. Student Teaching I Basic. 5 Units
Prerequisite(s): Admission to Teacher Preparation Program
Term Typically Offered: Fall, Spring

One semester of teaching multiple subjects in a public school setting with diverse learners. This first semester of student teaching is completed concurrently with integrated coursework.
Credit/No Credit

EDMS 430B. Student Teaching II: Basic. 7 Units
Prerequisite(s): Admission to Teacher Preparation Program
Term Typically Offered: Fall, Spring

One semester of teaching multiple subjects in a public school setting with diverse learners. This second semester of student teaching is completed concurrently with integrated coursework and focuses primarily on planning, implementing, and assessing instruction for whole classes of students.
Credit/No Credit

EDMS 434A. Field Experience for Elementary Teachers. 6 Units
Prerequisite(s): Admission to the Multiple Subject Credential program
Term Typically Offered: Fall, Spring

Candidates complete field experience in public school classrooms concurrently with integrated coursework. Field experiences focus primarily on observing model lessons and activities and on collaborative planning, implementing and assessing instruction for small groups of students.
Credit/No Credit

EDMS 434B. Student Teaching for Elementary Teachers. 8 Units
Prerequisite(s): EDMS 434A
Term Typically Offered: Fall, Spring

One semester of teaching multiple subjects in a public school setting with diverse learners. This final semester of student teaching is completed concurrently with integrated coursework and focuses primarily on planning, implementing and assessing instruction for whole classes of students.
Credit/No Credit
EDMS 434C. Intern Teaching for Elementary Teachers. 8 Units
Prerequisite(s): EDMS 434A and department approval
Term Typically Offered: Fall, Spring

One semester of multiple subjects intern teaching in a public school setting with diverse learners. This semester of intern teaching is completed concurrently with integrated coursework and focuses primarily on planning, implementing, and assessing instruction for a whole class of students while employed as teacher of record.

EDMS 500. Classroom Inquiry Project: Culminating Experience. 3 Units
Prerequisite(s): EDMS 242 or EDSS 242 and EDMS 243 or EDSS 243.
Term Typically Offered: Spring only

Course establishes that master candidates have acquired the essential knowledge and skills covered in each of the courses leading to the Master of Arts in Teaching with Multiple Subject Teaching Credential. Proficiency is demonstrated through a comprehensive examination of essential content of each course in the master’s degree program. Candidates will produce a written portfolio, accompanying executive summary, and oral presentation of the body of work completed during the Master of Arts in Teaching with Multiple Subject Teaching Credential Program.

EDSS 499. Continuous Master of Arts in Teaching Enrollment. 0 Units
Prerequisite(s): Student has completed all MAT coursework prior to EDMS 500 and earned an RP in EDMS 500 or EDSS 500.
Term Typically Offered: Fall, Spring

This is a zero-unit course for students in the Master of Arts in Teaching (MAT) program who earn an RP in their culminating experience course, EDMS/EDSS 500. The purpose of this course is to allow MAT students to maintain their continuous enrollment status while they complete the culminating experience requirements for the MAT program.

EDSP 101. Becoming an Education Specialist. 3 Units
Term Typically Offered: Spring only

The course introduces undergraduate students to a career working with children and youth with disabilities and their families. Students will explore the different career opportunities in the field of special education, the skills of an education specialist teacher, and credential requirements for becoming an educator working with students with disabilities including advocacy, reflection, organization, empathy, and credential program pre-requisites. Students will complete biographical readings, a career plan, and at least 30 hours of fieldwork with an education specialist teacher.

EDSP 119. Legal and Social Foundations of Inclusive Education. 3 Units
Prerequisite(s): EDUC 100A/B or consent of instructor.
Term Typically Offered: Fall, Spring

This course provides analysis of historical, philosophical, legal, and ethical foundations of special education and emerging issues in the disability rights/social justice movement to provide free and appropriate education (FAPE) for children and youth with diverse linguistic, cultural, socio-economic, physical, mental, social, emotional characteristics in the least restrictive environment (LRE). Legislation (e.g., IDEA 2004, ESSA, Section 504, ADA) and current legal requirements and best practices in identification, eligibility, assessment, IFSP/IEP/ITP development and implementation, and inclusive educational service delivery are examined.

EDSP 200. Seminar I: Early Childhood Special Education. 1 Unit
Prerequisite(s): Admission into the Early Childhood Special Education credential program
Term Typically Offered: Fall only

This seminar introduces Early Childhood Special Education (ECSE) candidates to their fieldwork experiences, technology, and development as an ECSE teacher. Candidates will examine their own teacher identity; identify anti-bias educational practices; analyze and reflect upon models of effective teaching and assessment; and develop technology, reflection, and critical thinking skills to engage in the teaching profession.

EDSP 201. Developing Collaborative Partnerships with Families, Professionals, and Communities in ECSE. 3 Units
Prerequisite(s): Admission into the MA in Teaching with Education Specialist Early Childhood Special Education Teaching Credential.
Term Typically Offered: Fall, Summer

Overview of ECSE historical, philosophical, theoretical/empirical, and legal bases for family centered, relationship based special education services. Emphasis is on developing cross-cultural competence and a strengths-based, student-centered approach to empowering families and advocating for students with disabilities. Students will develop skills required to build and maintain collaborative relationships through effective communication and teaming with families, students, professional colleagues, and community members. These skills will be applied in the context of school-family-community partnerships, professional partnerships, person-centered planning/future planning and IFSP/IEP development.

EDSP 205. Methods in Access and Inclusion in the GE Curriculum: Students with Extensive Support Needs. 3 Units
Prerequisite(s): EDSP 119, EDSP 206, EDSP 235, EDSP 220
Term Typically Offered: Fall, Spring

The focus of this course will be on the following three areas: 1) the processes for developing modified IEP goals which are based in the general education standards for all core curriculum as well as other individual information; 2) collaboration with general education teachers in the development of participation and support plans for inclusion in the general education classroom; and, 3) instructional strategies and adaptations which will enhance success across curricular areas for students with extensive support needs.
EDSP 206. Collaborative Program Planning with Families, Professionals, and Communities. 3 Units
Prerequisite(s): Admittance to Mild/Moderate or Moderate/Severe Credential program or advisor approval
Term Typically Offered: Fall, Spring

Students will develop skills in the areas of: family collaboration; school and community collaboration in the context of IEP development and school partnerships; cross-cultural competence; communication; person-centered planning/future planning, partnering with families; transdisciplinary teaming to develop the IEP and the ITP; and facilitating social relationships and friendships as part of the school experience.

EDSP 207. Secondary/Post-secondary methods and transition planning for Students with Extensive Support Needs. 2 Units
Prerequisite(s): EDSP 119
Corequisite(s): EDSP 413 or EDSP 414
Term Typically Offered: Fall, Spring

Students will develop knowledge and skills related to strategies for including students within the middle and high school environment. Students will develop skills in community-based instruction transition planning, in addition to designing outcomes and supports within the general education curriculum. Students will also gain knowledge and skills related to vocational and supported employment, and preparation for work after high school, and how to facilitate a successful transition to post-secondary education, supported living, and supported employment.

EDSP 208. Positive Behavioral Supports and Evidence-Based Practices for Youth with Autism and Related Issues. 3 Units
Prerequisite(s): EDSP 119
Term Typically Offered: Fall, Spring

Students will develop competencies in evidence-based and promising practices in assessment, interventions and instructional strategies for children and youth with autism spectrum disorder (ASD) and those with mental health concerns and/or dual diagnosis (severe behavior or emotional challenges and developmental, intellectual, sensory, and/or motor disabilities) in the natural contexts of general education classrooms, other school settings, home and community. Students will conduct a functional behavioral assessment and develop and implement a positive behavior support for a student with challenging behaviors.

EDSP 209. Developing Augmentative & Alternative Communication Systems: Assessment and Intervention. 3 Units
Prerequisite(s): Admission to the MAT plus Education Specialist Credential Program.
Term Typically Offered: Fall, Spring

Participants will learn: a) how to assess communicative forms from nonsymbolic to symbolic and unintentional to sophisticated in students with disabilities; b) how to collaborate with audiologists, vision specialists, physical, occupational, and speech therapists related to communication; c) to select from the range of light tech to high tech augmentative communication systems and related assistive technology, based on assessment; d) how to develop communication instructional plans; and, e) how to implement instruction embedded across multiple environments and with multiple partners.

EDSP 210. Assessment and Evaluation in Early Childhood Special Education. 3 Units
Prerequisite(s): Admittance to the MA in Special Education Teaching (Early Childhood Special Education)
Term Typically Offered: Fall, Spring

This course integrates family-centered and strengths-based approaches in early childhood special education into the assessment and evaluation process. Content will focus on developing quality practices in early childhood assessment including using a range of culturally, linguistically, and ability appropriate tools and techniques; parent–professional collaboration; transdisciplinary team assessment; assessment reporting; and translating results into intervention planning. Students will demonstrate skills in the assessment process including planning, collecting, interpreting, and communicating assessment information about infants, and young children with disabilities.

EDSP 211. Curriculum, Intervention Strategies, and Environments in ECSE I: Infants & Toddlers. 3 Units
Prerequisite(s): Admittance to the Master of Arts in Special Education Teaching (Early Childhood Special Education)
Term Typically Offered: Fall, Spring

The focus of this course is acquisition of knowledge and skills to support families and other caregivers in facilitating development for infants and toddlers at risk or with disabilities. Students will collaboratively plan and implement curriculum and intervention strategies for infants, toddlers and families. These strategies may be utilized in a range of natural learning environments including home, childcare, and community programs.

EDSP 212. Inclusive Curriculum, Intervention Strategies, and Environments in ECSE II: Preschool & Kindergarten. 3 Units
Prerequisite(s): Admittance to the Education Specialist Credential Program: Early Childhood Special Education
Term Typically Offered: Fall only

Candidates develop the skills and mindsets necessary to design and implement developmentally appropriate play-based environments and instruction for young children with disabilities in school-based learning environments including inclusive preschools and kindergarten programs. Using a tiered approach, candidates plan and implement universally designed lessons and create embedded instruction plans that require intentionally planning supports, assessments, and evidence-based interventions within daily routines and activities to ensure all students learn and belong.

EDSP 213. Early Language and Literacy Development, Instruction, and Intervention in ECSE. 3 Units
Prerequisite(s): Admittance to the Master of Arts in Teaching with Early Childhood Special Education credential program
Term Typically Offered: Fall, Spring

Course examines theories and historical context of language and literacy development and instruction in young children from infancy through kindergarten with an emphasis on English Learners and children with disabilities. Candidates will learn to create and implement integrated instructional units and lesson plans that teach early literacy through play-based centers, math, science, and the arts while supporting individual students with accommodations and embedded instruction. Candidates examine the role of technology, assistive technology, and authentic assessment to enhance and guide instruction.
EDSP 216. Understanding the Implications of Developmental Diversity in Children and Youth. 2 Units
Prerequisite(s): Admission to an Education Specialist Credential Program.
Term Typically Offered: Fall, Spring

Using a critical disability theory perspective, this course explores: 1) atypical development across areas (e.g., cognitive, social, physical, linguistic) due to prenatal, perinatal, and early childhood developmental risk factors; 2) childhood development theories and how they support educators' understanding of children, families, and developmentally appropriate practices; and 3) service delivery models and key transitions across the lifespan.

EDSP 217. Foundations of Positive Behavioral Supports: Creating Safe and engaging Learning Environments. 3 Units
Prerequisite(s): Admission to the MA in Special Education Teaching
Term Typically Offered: Fall, Spring, Summer

Students will learn the foundations of positive behavioral supports as a multi-tiered systems of supports for children and youth with mild to extensive support needs in preschool, elementary and secondary schools with an emphasis on class-wide and school-/program-wide interventions to create safe and engaging learning environments. The course also examines collaboration with families and other professionals (e.g., paraprofessionals, general education teachers) to effectively support students' behavior and learning and provides an overview of functional behavior assessment and individual behavioral supports.

EDSP 218. Advanced Program Planning/Instruction: Students with Extensive Support Needs/Multiple Disabilities. 3 Units
Prerequisite(s): EDSP 209, EDSP 216.
Term Typically Offered: Fall, Spring

This course focuses on 3 primary areas: 1) evidence-based practices for developing high-quality individualized educational plans for children and youth, from early childhood to young adulthood, with extensive support needs (ESN) - including students with multiple disabilities, severe intellectual disabilities, deaf-blindness, sensory and orthopedic disabilities; 2) collaboration with family members, related service professionals, general education teachers, and other community services; and, 3) strategies, adaptations, and technologies, for increasing positive outcomes for students with ESN in inclusive classrooms.

EDSP 220. Language and Literacy in Inclusive Classrooms I. 3 Units
Term Typically Offered: Fall, Spring

This course provides candidates with the evidence based principles and systematic and explicit techniques to develop phonological awareness, phonics, concepts about print, oral and written language, and word recognition strategies. Candidates will learn techniques specific to assessing a student in reading and applying the information to assist the student with reading difficulties. Accommodations and modifications for students with mild, moderate, and severe disabilities will be emphasized.

EDSP 221. Language and Literacy in Inclusive Classrooms II. 3 Units
Prerequisite(s): EDSP 220
Term Typically Offered: Fall, Spring

Course provides candidates with evidence based principles, systematic and explicit techniques, procedures in reading fluency, comprehension, and vocabulary development. Candidates will learn literal and higher level comprehension strategies that assist students in understanding narrative and expository text. Candidates will receive instruction on the principles, techniques, and procedures for teaching spelling, handwriting, and critical study skills. Accommodations and modifications for students with mild, moderate and severe disabilities will be emphasized.

EDSP 225. Assessment and Evaluation for Students with Mild to Moderate Support Needs. 3 Units
Prerequisite(s): EDSP 220, EDSP 221, EDSP 229
Term Typically Offered: Fall, Spring

Course examines relationship between assessment, curriculum, and instruction through application of formal and informal assessments to support curriculum and instructional development. Candidates administer and interpret norm-referenced, criterion-referenced, and curriculum-based instruments that assess academic achievement, social behavior, and emotional functioning. Candidates learn principles and strategies when collecting and interpreting qualitative and quantitative data from multiple sources. Authentic assessment strategies, specifically designed to support and inform instruction, are emphasized. Field based component included for administering, scoring, and analyzing results from assessments.

EDSP 225A. Assessment and Evaluation for Students with Mild/Moderate Disabilities. 2 Units
Prerequisite(s): Admittance to Mild/Moderate/Severe Credential program or permission of respective special education coordinator.
Corequisite(s): EDSP 225B
Term Typically Offered: Fall, Spring

Candidates examine relationships between assessment, curriculum, and instruction through application of a variety of formal and informal assessments and curricula. Candidates administer and interpret norm-referenced, criterion-referenced, and curriculum-based instruments that assess academic achievement, social behavior, and emotional functioning. Candidates learn basic principles and strategies related to using and communicating results of a variety of assessment and evaluation approaches. Authentic assessment strategies, specifically designed to support and inform instruction, will be emphasized.

EDSP 225B. Assessment and Evaluation for Students with Mild/Moderate Disabilities Lab. 1 Unit
Corequisite(s): EDSP 225A
Term Typically Offered: Fall, Spring

Field-based practice lab (30 hours). Lab will be a synthesis and application of course content (EDSP 225A) in a setting serving students with mild/moderate disabilities.
Credit/No Credit
EDSP 229. Curriculum and Instruction Strategies for Students with Mild/Moderate Disabilities. 3 Units
Prerequisite(s): Admission to Mild/Moderate, Moderate/Severe, Multiple Subjects, and Single Subject Credential programs or permission of respective special education advisors.
Term Typically Offered: Fall, Spring

Methods for designing and implementing instruction for students with mild/moderate disabilities. Topics include typical/atypical human development, resilience and protective factors, evidenced-based instructional strategies, designing and managing environments and materials, differentiated instruction, collaborative teaming to design and evaluate integrated services, technology (including assistive technology) to support access to general education curriculum, implementation of UDL, modifications and adaptations of state standards, components of IDEA and their implication for a multidisciplinary approach developing IEPs for special needs students included in general education classrooms.

EDSP 229B. Curriculum and Instruction Strategies for Students with Mild/Moderate Disabilities Lab. 1 Unit
Corequisite(s): EDSP 229
Term Typically Offered: Fall, Spring

Field-based practice lab (30 hours). Lab will be a synthesis and application of course content (EDSP 229) in a setting for students with mild/moderate disabilities who receive special education services. Students will verify multiple experiences across the age-span and in inclusive settings, agencies, and other natural environments.
Credit/No Credit

EDSP 230. Positive Behavior and Social-Emotional Supports for Students with Mild to Moderate Support Needs. 3 Units
Prerequisite(s): EDSP 217
Term Typically Offered: Fall, Spring

This course helps teacher candidates understand and support students who experience social, emotional, and behavior problems that negatively impact their school success and well-being. Teacher candidates will learn (a) how to address behavioral challenges in classrooms; (b) how to identify and assess support needs from the function-based and trauma-informed perspective; (c) how to design and implement positive intervention and support that are evidence-supported and compliant with federal IDEA law; and (d) how to provide social emotional learning opportunities.

EDSP 230B. Positive Behavior Supports for Students with Mild, Moderate, and Severe Behavioral Challenges Lab. 1 Unit
Prerequisite(s): Admission into Mild/Moderate or Moderate/Severe Credential program, APE program, or permission of respective special education coordinator.
Corequisite(s): EDSP 230
Term Typically Offered: Fall, Spring

Comprehensive study and application of intervention strategies that enhance the quality of life for students with mild/moderate disabilities. Students will learn (a) how to design learning environments that prevent and reduce problem behaviors, (b) learn how to identify and assess problem behavior using functional behavioral methods, (c) learn how to design and implement positive behavioral support interventions which are in compliance with federal IDEA law, and (d) apply behavioral procedures on a systemic, school wide basis.

EDSP 231. Assistive and Instructional Technologies for Students with Mild to Moderate Support Needs. 2 Units
Prerequisite(s): Admission to the MAT with Education Specialist Mild to Moderate Support Needs Credential Program.
Term Typically Offered: Fall, Spring

Candidates design and enact technology-enhanced instruction by purposefully using three different types of educational technologies: assistive technologies, general instructional technologies, and content-specific instructional technologies. Technology-enhanced instruction and individualized educational programs involve teachers developing technological pedagogical content knowledge that weaves technology, pedagogy, and content expertise. This course provides learning opportunities for an array of applications, tools, and instructional practices.
Credit/No Credit

EDSP 232. Initial Seminar: Reflective Teaching Practice, Collaboration, & Communicative Competence. 1 Unit
Term Typically Offered: Fall, Spring

This initial seminar focuses on the critical practice of reflection as the heart of teaching. A highly effective special education teacher practices deliberate, purposeful, and metacognitive thinking to address the education of students with mild to moderate support needs in an inclusive environment. To prepare special education teachers for a changing world, teacher candidates need to understand theories of learning and their roles in teaching, develop curricular vision, communication skills, and respond to the diverse learning needs of students.

EDSP 233. Final Seminar: Mild to Moderate Support Needs. 1 Unit
Prerequisite(s): EDSP 232.
Corequisite(s): EDSP 472 or EDSP 473 (in the last time that either of these two courses is taken).
Term Typically Offered: Fall, Spring

Designed to allow the education specialist candidate teacher or intern to focus upon three overall areas: 1) problems and resolutions particular and general to their teaching assignment, 2) development of their Individual Development Plan by identifying their strengths and areas of growth for further study during the candidates Induction Program and 3) create a Personal Reflection Model to support the development of the Individual Development Plan.
Credit/No Credit

EDSP 234. Seminar II: Early Childhood Special Education. 1 Unit
Prerequisite(s): EDSP 200
Corequisite(s): EDSP 475 or EDSP 476 or EDSP 478
Term Typically Offered: Fall, Spring, Summer

This seminar provides Early Childhood Special Education (ECSE) candidates with opportunities to engage in reflective conversations about their early fieldwork experience and development as a teacher with regard to program competencies. With support of their colleagues and instructor, candidates will analyze their own teaching practice and pedagogy, complete critical teaching tasks relevant to their fieldwork, and critically analyze issues in the field.
Credit/No Credit
EDSP 235. Curriculum and Instructional Methods for students with Extensive Support Needs. 3 Units
Prerequisite(s): Admittance into the MAT in Special Education (Extensive Support Needs)
Term Typically Offered: Fall, Spring

This is the first instructional methods course in the masters and specialist credential program for students with extensive support needs (ESN). Teacher candidates will learn to use the concepts of universal design for learning (UDL) and understanding by design (UbD) to create units of instruction in the core curriculum; various methods of progress monitoring; and, how to embed individualized participation plans and systematic instructional plans unique to individual learners with extensive support needs within general education and special education classrooms.

EDSP 236. Pro-Seminar in Teaching Students with Extensive Support Needs. 1 Unit
Corequisite(s): Any Mild-Moderate Support Needs field experience or intern teaching course
Term Typically Offered: Fall, Spring

This course addresses the following competencies: evaluating ethical principles and standards of special education practice; conducting effective meetings and collaborative problem-solving with families and colleagues; creating and carrying out an individualized positive behavioral support plan with the support of the school team and family; analyzing a school's current behavioral support system and developing a recommended plan for more effective school-wide positive behavioral support; and, effective strategies for coaching and providing training to paraprofessional staff.
Credit/No Credit

EDSP 237. Transition Strategies for Students with Mild to Moderate Support Needs. 3 Units
Term Typically Offered: Fall, Spring

Candidates will examine legal mandates specific to transition planning and implementation, and evaluate transitional life experiences for students with mild/moderate disabilities across the lifespan. Candidates will explore and implement social skills, and career and vocational program planning for secondary students with Mild/Moderate disabilities. Planning will include the student, community services, and other community resources such as parents and various professionals that will lead to increased student learning with career goals and objectives to support their transition to post-school settings.

EDSP 237B. Transition Strategies for Students with Mild/Moderate Disabilities Lab. 1 Unit
Corequisite(s): EDSP 237.
Term Typically Offered: Fall, Spring

Field-based practice lab (30 hours). Lab will be a synthesis and application of course content (EDSP 237) in inclusive setting for students with mild/moderate disabilities.
Credit/No Credit

EDSP 238. Culminating Seminar for Education Specialist Candidates. 3 Units
Term Typically Offered: Fall, Spring

Provides structured opportunities for Education Specialist teaching candidates who are in their culminating student/intern teaching experience to discuss, analyze, and reflect on their students' learning to support completion of Special Education Teaching Performance Assessment (TPA). Candidates will interpret, analyze, and complete prompts for all TPA tasks in preparation for the submission of their TPA teaching event. Additionally, candidates will implement their final fieldwork tasks to demonstrate critical skills of an education specialist.
Pre-requisite: EDSP 200 or final semester in the MMSN or ESN credential program Co-Requisite: EDSP 477 or EDSP 478 or EDSP 415 or EDSP 422 or EDSP 472 or EDSP 473 or approval of program coordinator.
Credit/No Credit

EDSP 250. Education Research. 3 Units
Prerequisite(s): Advancement to Candidacy for Special Education concentration; passing WPG exam for all other concentrations.
Term Typically Offered: Fall, Spring

Studies qualitative and quantitative methods in the development of reliable knowledge in the field of education. Includes identification and formulation of research problems, research designs and presentation of reports representative of different research strategies. Classified students are encouraged to take this course early in their graduation programs.

EDSP 251. Education in a Democratic, Pluralistic Society. 3 Units
Prerequisite(s): Passing WPG exam
Term Typically Offered: Fall, Spring

Advanced study of social and psychological issues which need to be considered in education relating to the client, the educator, the community and society. Addresses implications of theories of learning, assessment, individual differences and social/political influences.

EDSP 276A. Education of Students with Emotional and Behavioral Disorders. 2 Units
Prerequisite(s): Admittance into Mild/Moderate or Moderate/Severe Credential or M.A. in Education programs and EDSP 230 or equivalent
Corequisite(s): EDSP 276B
Term Typically Offered: Fall, Spring

Concentrate on the assessment, characteristics, interventions and classroom strategies, which uniquely address the educational needs of students with emotional and behavioral disorders. Students will review current laws, policies and selected literature specific to students identified as EBD and their families. Strategies to create and promote collaborative partnerships with parents, mental health representatives and/or other service providers will be presented.

EDSP 276B. Education of Students with Emotional and Behavioral Disorders - Lab. 1 Unit
Prerequisite(s): Admittance into Mild/Moderate or Moderate/Severe Credential or M.A. in Education programs and EDSP 230 or equivalent
Corequisite(s): EDSP 276A
Term Typically Offered: Fall, Spring

Field-based practice lab (30 hours). Lab will be a synthesis and application of course content (EDSP 276A) in serving students with emotional and behavioral disorders. Students are required to participate in class visitations, agency visitations, and interviews.
EDSP 281. Critical Issues in Special Education Research and Practice. 6 Units
Prerequisite(s): Successful completion of Education Specialist Credential coursework and student teaching—Mild/Moderate Disabilities Credential, Moderate/Severe Disabilities Credential or Early Childhood Special Education Credential program
Term Typically Offered: Summer only

This course provides an introduction to Action Research in the field of special education. The overall goal is to improve teacher effectiveness in the classroom through research and develop teacher-researchers, producers and consumers of empirical knowledge. Students will develop research writing skills to understand problems of practice, critical issues, and policy in special education. The course is designed to facilitate connections between methodological paradigm and teaching practices related to doing action research and covers quantitative, qualitative, and mixed-methods research approaches.

EDSP 282. Methods in Research Design and Practice with Diverse Children, Youth, and Families. 3 Units
Prerequisite(s): EDSP 281
Term Typically Offered: Fall only

This course is the second course in the final research sequence taken by the candidates in the Masters of Arts in Teaching for all three special education fields. The focus of this course is four-fold: 1) deepening candidates' knowledge of methods in both qualitative and quantitative research design intended for action research; 2) development of each candidate’s action research proposal; 3) preparing for Institutional Review Board (IRB); and 4) completing a draft of chapters 1, 2, and 3.

EDSP 283. Critical Analysis and Interpretation of Data within Diverse School and Community Contexts. 3 Units
Prerequisite(s): EDSP 281, EDSP 282
Corequisite(s): EDSP 500
Term Typically Offered: Spring only

This course focuses on students¿ understanding and use of appropriate data analysis methods for teacher action research in diverse schools/communities. Students will learn to critically analyze and interpret data from qualitative, quantitative and mixed-methods sources by using theoretical knowledge or conceptual frameworks, and to present findings to inform teacher practices and support systems change/reform efforts to improve the lives of individuals with disabilities. Students also will analyze, write and present findings from their thesis research in written and oral/visual formats.

EDSP 290. Seminar for Culminating Experiences. 3 Units
Prerequisite(s): Approval of Culminating Experience Proposal or instructor permission.
Seminar to focus on topics/elements/expectations to be included in the culminating experiences (thesis, project, or comprehensive exam). Successful completion of the course requires completion of Chapters 1 and 2 of the thesis/project and the beginning of Chapter 3 for the MA thesis/project option or an exam petition to be approved by the departmental exam committee, including annotated bibliographies and position papers on the focal topics for the MA comprehensive exam option.

EDSP 292. Teaching English Learners with Disabilities. 3 Units
Term Typically Offered: Fall, Spring

Candidates will learn basic principles, strategies and procedures for teaching English Learners with disabilities. Compliance and legal issues related to English Learners identified with disabilities, including writing linguistically appropriate goals and objectives, and implementing culturally responsive strategies will be addressed. Systematic and explicit strategies for accommodating and modifying curricular materials for English Learners with disabilities in inclusive classrooms will be emphasized.

EDSP 292B. Teaching English Learners with Disabilities Lab. 1 Unit
Corequisite(s): EDSP 292
Term Typically Offered: Fall, Spring

Field-based practice lab will be a synthesis and application of course content (EDSP 292) in the implementation of culturally responsive, systematic and explicit strategies, and curricular material involved in teaching English Learners with disabilities in inclusive classrooms. Credit/No Credit

EDSP 293. Strategies for Inclusive Classrooms. 3 Units
Prerequisite(s): Admission into a teacher preparation program.
Term Typically Offered: Fall, Spring

Knowledge and skills of teaching students with learning differences in inclusive classrooms require effective use of specific integrated pedagogical moves from an asset-based approach. In addition, professional judgment and contexts matter when modifying these pedagogical moves to successfully address the needs of all students, including those with extensive support needs. This course prepares all teacher candidates in teaching students with most complex learning and behavioral challenges four high-leverage practices in inclusive education through collaboration, assessment, social/emotional/behavior, and instruction. Cross listed: EDSS 282/EDSP 293/EDMS 213

EDSP 297. Current Issues in Special Education. 3 Units
Prerequisite(s): Passing WPG exam
Term Typically Offered: Fall, Spring

Examines current issues in special education through review of selected journal articles, presentations by guest lecturers and class discussion. Students will be required to write a series of brief position papers in professional style on selected topics.

EDSP 298. Master’s Seminar in Special Education. 3 Units
Prerequisite(s): EDSP 297
Corequisite(s): EDSP 297
Term Typically Offered: Fall, Spring

Students choosing Program A for the M.A. in Education, Special Education option must register for the seminar during their final semester of study, prior to attempting the written comprehensive examination. In the seminar, students will study problems and issues associated with specialty areas as well as with the field of special education as a whole.
EDSP 299. Special Problems: Special Education. 1 - 3 Units
Term Typically Offered: Fall, Spring

Individual projects for Special Education credential candidates at graduate/credential level especially for students capable of independent study. Admission by written approval of the instructor with whom the student will be working and the Department Chair.

Note: This course may be repeated for up to 9 units of credit.

EDSP 314. Mathematics Curriculum and Instruction for Diverse Learners. 3 Units
Prerequisite(s): Admission to a MAT plus Special Education Teaching Credential program.
Term Typically Offered: Fall, Spring

Mathematics teaching methodology course for Special Education teacher candidates to develop (a) pedagogical content knowledge in teaching mathematics; (b) favorable attitudes toward the subject of mathematics; (c) willingness to work hard and persevere to understand new mathematical ideas; and (d) motivation to learn more about the content and methodology of teaching mathematics. Focus on using the California content standards to teach all students, including English Learners and those with special needs.

EDSP 413. Field Experience I: Students with Extensive Support Needs. 5 Units
Prerequisite(s): Admission to the credential program or approval from the Coordinator.
Term Typically Offered: Fall, Spring

This fieldwork placement is designed for credential candidates in the MA in Special Education Teaching Emphasis in Students with Extensive Support Needs. Candidates, working under the guidance of a mentor teacher and a University supervisor, will complete the field-based assignments for coursework being taken concurrently. In addition, candidates will be evaluated on a set of competencies required by the end of the first year in the credential program.

EDSP 414. Field Experience II: Students with Extensive Support Needs. 6 Units
Prerequisite(s): EDSP 413
Term Typically Offered: Fall, Spring

This University supervised fieldwork placement is designed for credential candidates in the MA in Special Education Teaching Emphasis in Students with Extensive Support Needs. Building on the skills and competencies demonstrated in their first fieldwork experience, candidates will work towards demonstrating proficiency in 10 identified areas, including: professionalism, IEP development, curriculum, modifications and adaptations, systematic instruction, non-classroom/community environments, facilitating friendships, augmentative and alternative communication, positive behavioral supports, and methods for students with the most complex disabilities.

EDSP 415. Student Teaching: Students with Extensive Support Needs. 8 Units
Prerequisite(s): EDSP 414 or EDSP 420
Term Typically Offered: Fall, Spring

This final semester Student Teaching placement is designed for credential candidates in the MA in Special Education Teaching Emphasis in Students with Extensive Support Needs. Candidates must demonstrate that they are at a "proficient" level in 11 areas in order to receive a recommendation for their credential: professionalism, IEP development, curriculum, modifications and adaptations, systematic instruction, non-classroom/community instruction, facilitating friendships, augmentative and alternative communication, positive behavioral supports, teaching students with the most complex disabilities, and program management.

EDSP 420A. Multiple Subject Field Experience. 6 Units
Term Typically Offered: Fall, Spring

Initial Multiple Subject credential field experience, with integrated methods coursework, is a M-Th, half-day fieldwork requirement. Effective Instruction and classroom management are the focus of the Initial Multiple Subject field experience. Candidates complete field experience in public school classrooms concurrently with integrated coursework. Field experiences focus primarily on observing model lessons and activities and on collaborative planning, implementing and assessing instruction for small groups of students.

Note: This is a full semester field experience in general ed. classrooms.

EDSP 420B. Multiple Subject Student Teaching. 8 Units
Term Typically Offered: Fall, Spring

Final semester of a Multiple Subject credential student teaching with integrated methods coursework requires M-Th, full-day participation of the student. Emphasis on classroom teaching and further experience with community services. Candidates must meet the criteria for student teaching to be accepted to this course.

EDSP 421. Intern Teaching I: Students with Extensive Support Needs. 9 Units
Prerequisite(s): EDSP 413
Term Typically Offered: Fall, Spring

This Intern Teaching placement is designed for credential candidates in the MA in Special Education Teaching Emphasis in Students with Extensive Support Needs. Candidates must demonstrate that they are at a "developing proficiency" level in 11 areas in order to move into the final semester of Advanced Intern Teaching: professionalism, IEP development, curriculum, modifications and adaptations, systematic instruction, non-classroom/community instruction, facilitating friendships, augmentative and alternative communication, positive behavioral supports, teaching students with the most complex disabilities, and program management.
EDSP 422.  Advanced Intern Teaching: Students with Extensive Support Needs.   9 Units
Prerequisite(s): EDSP 421
Term Typically Offered: Fall, Spring
This final semester Internship is designed for credential candidates in the MA in Special Education Teaching and Emphasis in Students with Extensive Support Needs. Candidates must demonstrate that they are at a proficient level in 11 areas in order to receive a recommendation for their credential: professionalism, IEP development, curriculum, modifications and adaptations, systematic instruction, non-classroom/community instruction, facilitating friendships, augmentative and alternative communication, positive behavioral supports, teaching students with the most complex disabilities, and program management. Credit/No Credit

EDSP 471.  Mild to Moderate Support Needs Field Experience.   4 Units
Prerequisite(s): Admission to the MAT with Education Specialist Mild to Moderate Support Needs Credential Program.
Term Typically Offered: Fall, Spring
The first phase of fieldwork typically occurs in the second semester (M-Th, half day) in the credential program. This semester is designed for candidates who are prepared, educationally and emotionally, for a rigorous schedule of classes and student teaching in coming semesters. Credit/No Credit

EDSP 472.  Mild to Moderate Support Needs Student Teaching.   7 Units
Prerequisite(s): EDSP 471 or equivalent.
Term Typically Offered: Fall, Spring
Student teaching full day, M-Th, for the semester in a cooperating LEA District providing services for students with mild to moderate support needs. Cooperating teachers work with the University supervisor to support the candidate in completing the required assignments and competencies. An evaluation will be completed at the mid point and end of the semester. Note: Application for student teaching is required prior to course enrollment.
Credit/No Credit

EDSP 473.  Mild to Moderate Support Needs Intern Teaching.   9 Units
Prerequisite(s): All criteria related to recommendation for the intern credential and instructor approval.
Term Typically Offered: Fall, Spring
A credit/no credit directed internship in a district, county office of education, or program serving students with mild to moderate support needs. Candidates must meet the criteria for an internship to be accepted into this course. A University supervisor will support the candidate in completing all required competencies. An evaluation will be completed at mid point and end of the semester. Note: Application for Student Teaching and Intern Teaching Permit is required prior to course enrollment.
Credit/No Credit

EDSP 474.  ECSE Early Fieldwork Experience I.   3 Units
Prerequisite(s): Admission to the Early Childhood Special Education - Added Authorization or the MA in Special Education Teaching (Early Childhood Special Education).
Term Typically Offered: Fall, Spring
Candidates in the early childhood special education (ECSE) program complete early fieldwork activities at a site or program serving families and children with disabilities birth to kindergarten. Fieldwork is completed concurrently with integrated coursework. In this first early field experience, candidates focus primarily on observing evidence-based environments, instruction, and interventions as well as practicing skills including collaborating with a young child’s family and team, engaging in data-based decision making, and creating and implementing intervention plans. Credit/No Credit

EDSP 475.  ECSE Early Fieldwork Experience II.   3 Units
Prerequisite(s): EDSP 474
Term Typically Offered: Fall only
Candidates in the early childhood special education (ECSE) program complete more advanced early fieldwork activities at a site or program serving families and children with disabilities birth to kindergarten. Fieldwork is completed concurrently with integrated coursework. In this second early field experience, candidates build on their skills by collaboratively analyzing their teaching and assessment practices, reflecting on their experiences, and practicing with support more advanced pedagogy. Credit/No Credit

EDSP 476.  ECSE Student Teaching: Infants & Toddlers.   4 Units
Prerequisite(s): EDSP 211
Term Typically Offered: Fall, Spring, Summer
One of two culminating experiences, candidates complete the student teaching experience with a cooperating teacher in their school district, county office of education or appropriate privately operated program providing early intervention services for infants and toddlers with disabilities and their families. Completed concurrently with integrated coursework and focuses on candidates gradually taking the lead on assessing, planning, and coaching families raising infants and toddlers with disabilities or delays within their natural routines, environments, and activities. Note: Candidates may take EDSP 478 as a course equivalent. Credit/No Credit

EDSP 477.  ECSE Student Teaching: Preschool/Kindergarten.   6 Units
Prerequisite(s): EDSP 212, and EDSP 475 or EDSP 478
Corequisite(s): EDSP 238
Term Typically Offered: Spring only
One of two culminating experiences, candidates complete the student teaching experience with a cooperating teacher in their public school setting with preschoolers or kindergarteners with disabilities. Completed concurrently with integrated coursework and focuses on candidates gradually taking the lead on planning, implementing, and assessing instruction of all students in a school-based program while providing tiered levels of support and embedded instruction to target the needs of students with disabilities. Credit/No Credit
EDSP 478. ECSE Intern Teaching. 9 Units
Prerequisite(s): EDSP 119, EDSP 201, and EDSP 211 or EDSP 212, or permission from program coordinator
Term Typically Offered: Fall, Spring, Summer

Internship in a cooperating District or County Office of Education providing services for young children birth to kindergarten with disabilities receiving special education services and their families. Candidates must complete the intern application process in order to register. Intern serves as the teacher of record and is employed by the district. As the classroom teacher, develop and teach developmentally and accessible units and lesson plans, embed instruction and supports, collaborate with colleagues, support paraprofessionals, and lead the IFSP/IEP process.
Credit/No Credit

EDSP 479. Field Experience II: Early Childhood Special Education. 3 Units
Prerequisite(s): Admission to MA in Teaching with Education Specialist Early Childhood Special Education Teaching Credential program
Corequisite(s): EDSP 210, EDSP 212, and EDSP 293 or approval of ECSE program coordinator
Term Typically Offered: Fall, Spring

The second phase of field-based experience for ECSE candidates is a supervised practicum. Candidates will spend a minimum of two days per week with a community-based program or school where preschoolers with disabilities are being served. They will be assigned a cooperating education specialist and University supervisor who they will work with to complete assignments. An evaluation of program competencies will be completed at the end of the semester.
Credit/No Credit

EDSP 500. Classroom Inquiry/Action Research Portfolio-Culminating Experience. 3 Units
Prerequisite(s): EDSP 282
Corequisite(s): EDSP 283, Advancement to Candidacy
Term Typically Offered: Spring, Summer

This course establishes that the candidate has acquired the essential knowledge and skills covered in each of the courses leading to the Master of Arts in Teaching with Special Education Teaching credential. Proficiency is demonstrated through a comprehensive examination of essential content of each course in the MAT degree program. Each candidate will produce a written portfolio, accompanying executive summary, and oral poster presentation of the body of work completed during the MAT Special education program.
Credit/No Credit

EDSP 501. Master of Arts Project: Special Education. 3 Units
Prerequisite(s): Approval of Culminating Experience Proposal or instructor permission
Term Typically Offered: Fall, Spring

Completion of a project that integrates research with development of a product related to instruction of persons with disabilities.

EDSP 599. Continuous Master of Arts in Special Education Teaching Enrollment. 0 Units
Prerequisite(s): Student has completed all MASET coursework prior to EDSP 500 and earned a RP in EDSP 500.
Term Typically Offered: Fall, Spring

This is a zero unit course for students in the Master of Arts in Special Education Teaching program who earn a RP in their culminating experience course, EDSP 500. The purpose of this course is to allow them to maintain their continuous enrollment status while they complete the culminating experience requirements for the MASET program.
Note: There is no grade associated with this course.
Credit/No Credit

EDSS 241. Action Research in Multicultural Settings. 5 Units
Prerequisite(s): Admission to the Master of Arts in Teaching with Multiple/Single Subject Teaching Credential program; Completion of EDMS 4348 or EDMS 474B.
Term Typically Offered: Summer only

This course focuses on an introduction to Action Research in multicultural educational settings. It includes an overview of various research paradigms, with emphasis on Action Research and Teacher Action Research. Additional topics covered in this course include: critical pedagogy, forms of multicultural education, and issues related to educational equity and providing access of opportunity to students from underserved populations.
Cross listed: EDMS 241

EDSS 242. Critical Perspectives in Classroom Inquiry. 3 Units
Prerequisite(s): EDMS 241 or EDSS 241
Term Typically Offered: Fall only

This course is part of the Master of Arts in Teaching with Single Subject Teaching Credential Program and builds on the knowledge that students gain in EDMS/EDSS 241. During this course students will complete a literature review of research related to their critical inquiry question. Students will additionally explore the historical and current trends in critical classroom inquiry and consider the implications for schools in diverse settings. Further course activities include developing a Classroom Inquiry Project and submitting the IRB.
Cross listed: EDMS 242

EDSS 243. Data Collection for Action Research in Multicultural Settings. 3 Units
Prerequisite(s): EDMS 241 or EDSS 241.
Term Typically Offered: Fall only

This course builds students understanding of appropriate types and uses of data in Action Research in multicultural education settings. During this course students will be presented with the sociopolitical contexts for data collection and its subsequent use in educational policy. Students will apply theoretical knowledge by practicing to collect and initially interpreting multiple types of data. These experiences will lay the groundwork for students development and implementation of the data collection plan for their own Classroom Inquiry Projects.
Cross listed: EDMS 243.
EDSS 244. Sociocultural & Sociopolitical Contexts of Data Analysis. 3 Units
Prerequisite(s): EDMS 242 or EDSS 242 and EDMS 243 or EDSS 243
Term Typically Offered: Spring only
This course builds students' understanding of appropriate methods of data analysis in Teacher Action Research in multicultural education settings. Students will learn how data analysis has been used to interpret research in diverse school settings. Students will apply theoretical knowledge by analyzing multiple types of data sets form both qualitative and quantitative sources. These experiences will lay the groundwork for students implementation of analysis of their own data for their Action Research inquiry projects.
Cross listed: EDMS 244

EDSS 264. Critical Multiculturalism for Racial/Social Justice Education-Secondary. 3 Units
Prerequisite(s): Admission to the MA in Teaching with Single Subject Teaching Credential Program.
Term Typically Offered: Fall, Spring
This course serves as an introduction to Critical Multiculturalism, Racial/Social Justice pedagogy, and Anti-Bias education. The course will provide a critical perspective for analyzing the purposes and processes of U.S. public schooling. Students will examine the socio-historical political contexts of public schools and society, educational/learning theories, philosophical educational foundations, notions of culture, community, and educational practice. Teaching modalities will include lectures, whole group discussions, small group work and presentations, and on-line fieldwork assignments.

Prerequisite(s): Admission to MA in Teaching with Single Subject Teaching Credential program.
Term Typically Offered: Fall, Spring
This course serves as an introduction to Critical Multiculturalism, Racial/Social Justice pedagogy, and Anti-Bias education. The course will provide critical perspective for analyzing the purposes and processes of U.S. public schooling in a Linked Learning context. Students will examine the socio-historical political contexts of public schools and society, educational/learning theories, philosophical educational foundations, notions of culture, community, and educational practice. Teaching modalities will include lectures, whole group discussions, small group work and presentations, and on-line fieldwork assignments.

EDSS 265. Advanced Fundamentals of Teaching. 2 Units
Prerequisite(s): EDSS 365
Extends learning from EDSS 365 with deeper examination of the relationship between elements of teaching and instructional organization needed to effectively teach in culturally and linguistically diverse and inclusive secondary classrooms through the use of backward design, Universal Design for Learning, differentiated instruction and assessment. The focus will be grounded in a Social Justice/Multicultural paradigm. Emphasis will include students' development as teachers through exploration of curriculum development frameworks, long-and short-term planning approaches, and specific theories for instructional practice.

EDSS 265D. Advanced Fundamentals of Teaching, Workshop. 1 Unit
Prerequisite(s): EDSS 365A and EDSS 365B
Corequisite(s): EDSS 265C
Term Typically Offered: Fall, Spring
Extends learning in EDSS 365A, B and EDSS 265C by deepening knowledge about the relationship between elements of teaching and instructional organization. Focus on effective teaching for culturally and linguistically diverse and inclusive secondary classrooms through the use of backward design, Universal Design for Learning, differentiated instruction and assessment. Instructional framework will be grounded in a Social Justice/Multicultural paradigm. Emphasis will include students' development as a teacher including application of curriculum development theories, long-and short-term planning frameworks and specific theories.

EDSS 265L. Advanced Fundamentals of Teaching-Linked Learning. 2 Units
Prerequisite(s): EDSS 365L
Term Typically Offered: Fall, Spring
Extends learning from EDSS 365 with deeper examination of the relationship between elements of teaching and instructional organization needed to effectively teach in culturally and linguistically diverse and inclusive secondary classrooms through the use of backward design, Universal Design for Learning, differentiated instruction and assessment. The focus will be grounded in a Social Justice/Multicultural paradigm. Emphasis will include students' development as teachers through exploration of Linked Learning curriculum development frameworks, long-and short-term planning approaches, specific theories for instructional practice.

EDSS 266. Advanced Single Subject Seminar. 2 Units
Prerequisite(s): EDSS 366
Term Typically Offered: Fall, Spring
Second of two-course series. Provide structured opportunities for candidates to discuss, analyze, reflect upon data gathered from field; support completion of TPA. Further study of policies, school law, resources, strategies, routines, and activities needed for productive environments in classrooms as locations for student engagement/learning. Special emphasis on English Language Development, students with special needs, and specific management/implementation of activities. Course assignments/activities integrated with other core courses.
Credit/No Credit

EDSS 266L. Advanced Single Subject Seminar, L. 2 Units
Prerequisite(s): EDSS 366L
Term Typically Offered: Fall, Spring
Second of two-course series. Provide structured opportunities for candidates to discuss, analyze, reflect upon data gathered from field; support completion of TPA. Further study of policies, school law, resources, strategies, routines, and activities needed for productive environments in classrooms as locations for student engagement/learning. Special emphasis on English Language Development, students with special needs, and specific management/implementation of Linked Learning activities (e.g. multidisciplinary integrated units of study). Course assignments/activities integrated with other core courses.
Credit/No Credit
EDSS 279A. Method and Materials for Teaching Secondary English Learners, A. 1.5 Units
Prerequisite(s): EDUC 170; Admission to the Single Subject Credential program
Term Typically Offered: Fall, Spring

This course is the first of a two-course series. Introduces candidates to a repertoire of theory-based methods needed to facilitate and measure their own students' growth in English language development (ELD) as well as create learning environments which promote content area learning through the use of Specially Designed Academic Instruction in English (SDAIE). Candidates acquire knowledge and skills in methods of teaching a second language through readings, fieldwork, discussion, group interaction, lesson presentation, hands-on experience of methods, and materials exploration.

EDSS 279B. Methods and Materials for Teaching Secondary English Learners, B. 1.5 Units
Prerequisite(s): EDSS 279A
Term Typically Offered: Fall, Spring

Second course in a two-course series. Candidates expand their repertoire of theory-based methods to facilitate and measure their own students’ growth in English language development (ELD) as well as create learning environments which promote content area learning through the use of Specially Designed Academic Instruction in English (SDAIE). Candidates deepen knowledge and skills related to methods of teaching a second language through readings, fieldwork, discussion, group interaction, lesson presentation, hands-on experience of methods, and materials exploration.

EDSS 279C. Method and Materials for Teaching Secondary English Learners, C. 1.5 Units
Prerequisite(s): EDUC 170; Admission to the Single Subject Credential Program.
The first of two-course series. Introduces candidates to theory-based methods to facilitate/measure their own students’ growth in English language development and create learning environments which promote content area learning through Specially Designed Academic Instruction in English (SDAIE). Specific instruction given to develop skills in Linked Learning settings and learning activities therein. Candidates acquire knowledge/skills in methods of teaching a second language through readings, fieldwork, discussion, group interaction, lesson presentation, hands-on experience of methods, and materials exploration.

EDSS 279D. Method and Materials for Teaching Secondary English Learners, D. 1.5 Units
Prerequisite(s): EDSS 279C
Second in two-course series. Candidates expand repertoire of theory-based methods to facilitate/measure students’ growth in English language development and create learning environments which promote content area learning through Specially Designed Academic Instruction in English (SDAIE). Specific instruction given to develop skills in Linked Learning settings and learning activities therein. Candidates deepen knowledge and skills related to methods of teaching a second language through readings, fieldwork, discussion, group interaction, lesson presentation, hands-on experience of methods, and materials exploration.

EDSS 282. Strategies for Inclusive Classrooms: Single Subject. 3 Units
Prerequisite(s): Admission into a teacher preparation program or an MA in Teaching with Multiple/Single Subject Teaching Credential program.
Term Typically Offered: Fall, Spring

This course provides single subject and special education candidates with dispositions, knowledge, and skills needed to serve students with disabilities in general education classrooms. Strategies specific to students in their least restrictive environment will be covered emphasizing Universal Design for Learning, Multi-Tiered Systems of Support, social-emotional learning, co-teaching, differentiated instruction, roles and responsibilities of special/general education teachers, peer mediated learning strategies, modifications of standards and learning outcomes for students with disabilities, and assistive technology (low and high tech adaptations).

Cross listed: EDSP 293

EDSS 291. Foundations in Career Technical Education: Bridging Industry to the Classroom. 3 Units
Term Typically Offered: Fall, Spring

This course includes identification of current Career Technical Education practices, building an understanding of industry sectors, career pathways and standards, development of advisory committees, and exploration of Career Technical Student Organizations (CTSO’s). Candidates will prepare standards-based lesson plans, units of instruction in career exploration, develop recruitment tools, and identify and teach 21st Century Skills. Candidates will identify funding sources, necessary equipment, and plans for safe storage. They will develop plans to incorporate work based learning into their program.

EDSS 299. Special Problems: Single Subject. 1 - 3 Units
Term Typically Offered: Fall, Spring

Individual projects for Single Subject credential candidates at graduate/credential level especially for students capable of independent study. Admission by written approval of the instructor with whom the student will be working and the Department Chair.

Note: This course may be repeated for up to 9 units of credit.

Credit/No Credit

EDSS 364. Advanced Critical Multiculturalism for Racial/Social Justice Education- Secondary. 2 Units
Prerequisite(s): Admission into the Single Subject Credential Program; EDSS 264.
Term Typically Offered: Fall, Spring

This course continues a critical analysis of the purposes and processes of public schooling, including Critical Multiculturalism, Racial/Social Justice pedagogy, and Anti-Bias education. Students will examine the sociopolitical intersection of public and society, educational theories, philosophies, notions of culture, community, and educational practice through self-examination of dispositions related to gender, sexuality, race, social class, language, religion/spirituality and ability.
EDSS 364D. Advanced Theoretical Foundations of Teaching in a Multicultural Democratic Society, Workshop. 1 Unit

Prerequisite(s): Admission into the Single Subject Credential Program; EDSS 264A
Corequisite(s): EDSS 364C
Term Typically Offered: Fall, Spring

Further study of the purposes and processes of public schooling. Candidates develop a philosophy of education for teaching in a multicultural, multilingual, and democratic society through self-examination of dispositions related to gender, sexuality, race, social class, language, religion/spirituality and ability. Modalities include discussions, small group tasks, group projects and simulations.

EDSS 364L. Advanced Critical Multiculturalism for Racial/Social Justice Education - Secondary Linked Learning. 2 Units

Prerequisite(s): EDSS 264L
Term Typically Offered: Fall, Spring

This course continues a critical analysis of the purposes and processes of public schooling in Linked Learning settings, including Critical Multiculturalism, Racial/Social Justice pedagogy, and Anti-Bias education. Students will examine the sociopolitical intersection of public schools and society, educational theories, philosophies, notions of culture, community, and educational practice through self-examination of dispositions related to gender, sexuality, race, social class, language, religion/spirituality and ability.

EDSS 365. Fundamentals of Teaching. 3 Units

Prerequisite(s): Admission into the Master of Arts in Teaching with a Single Subject Credential program
Term Typically Offered: Fall, Spring

This course introduces the relationship between elements of teaching and instructional organization to effectively teach in culturally and linguistically diverse and inclusive classrooms through the use of backwards design, Universal Design for Learning, and differentiated instruction. The focus will be grounded in an Anti-Racist/Social Justice paradigm. Emphasis will include students’ development as a teacher, curriculum development, long and short-term planning, and specific theories for instructional practice in Linked Learning settings.

EDSS 365B. Theoretical Foundations of Teaching in a Multicultural Democratic Society, Workshop. 1.5 Units

Prerequisite(s): Admission into Single Subject Teacher Preparation Program
Corequisite(s): EDSS 365A
Term Typically Offered: Fall, Spring

This course introduces the relationship between elements of teaching and instructional organization to effectively teach in culturally and linguistically diverse and inclusive classrooms through the use of backwards design, Universal Design for Learning, and differentiated instruction. The focus will be grounded in a Social Justice/Multicultural paradigm. Emphasis will be on application of theories and frameworks learned in EDSS 365A, with a focus on students’ development as a teacher, curriculum development, long and short-term planning, and assessing student learning. Discussion, small group work and simulations.

EDSS 365L. Fundamentals of Teaching- Linked Learning. 3 Units

Prerequisite(s): Admission to the Master of Arts in Teaching with a Single Subject Credential program
Term Typically Offered: Fall, Spring

This course introduces is the relationship between elements of teaching and instructional organization to effectively teach in culturally and linguistically diverse and inclusive Linked Learning secondary classrooms through the use of backwards design, Universal Design for Learning, and differentiated instruction. The focus will be grounded in an Anti-Racist/Social Justice paradigm. Emphasis will include students’ development as a teacher, curriculum development, long and short-term planning, and specific theories for instructional practice in Linked Learning settings.

EDSS 366. Single Subject Seminar. 3 Units

Prerequisite(s): Admission to the MA in Teaching with Single Subject Teaching Credential Program
Term Typically Offered: Fall, Spring

First part of a 2-course sequence that provides structured opportunities for student teachers to discuss, analyze, and reflect upon data gathered from their field placements. Attention given to policies, school law, resources, strategies, routines, and activities that contribute to the productive management of the school and classroom as locations for student engagement and learning. Special emphasis will be on English Language Development and students with special needs. Course assignments and activities are integrated with other core courses.

EDSS 366L. Single Subject Seminar, L. 3 Units

Prerequisite(s): Admission to the MA in Teaching with Single Subject Teaching Credential Program
Term Typically Offered: Fall, Spring

First of a 2-course sequence that provides structured opportunities for student teachers to discuss, analyze, and reflect upon data gathered from their field placements in Linked Learning settings. Attention given to policies, school law, resources, strategies, routines, and activities that contribute to the productive management of the Linked Learning school and classroom as locations for student engagement and learning. Special emphasis will be on English Language Development and students with special needs.

EDSS 368. Inclusive Education in Secondary Schools. 1 Unit

Prerequisite(s): Admission to the Single Subject Credential Program
Term Typically Offered: Fall, Spring

Candidates learn historical, theoretical, and practical information related to key issues facing secondary public schooling currently, including how to educate learners with special needs, differentiate instruction in the content areas, develop assessments that fairly and accurately measure student learning, and use universal design to structure classroom and school practices, processes and policies to maximize access to core content for all students, regardless of language or ability. Lecture and discussion.
EDSS 373A. Educational Technology Lab I. 1 Unit
Prerequisite(s): Admission to the Single Subject Credential Program.
Term Typically Offered: Fall, Spring

Educational technology lab course will prepare the candidates use technology for three areas: coursework in the teaching credential program, enhancing teaching and learning and eportfolio development. The candidates will apply current research to their practice through development of lessons and problem-solving and reasoning skills. The candidates are introduced to an array of digital technologies for teaching relevant for K-12 student learning. The candidates are also prepared to use technology in the Teaching Credential Program and for the development of an electronic portfolio. Credit/No Credit

EDSS 373B. Educational Technology Lab II. 1 Unit
Prerequisite(s): EDSS 373A
Term Typically Offered: Fall only

This course will offer support and instructions of facilitating and improving learning of a diverse student population by creating, using, and managing appropriate technological processes and resources. The candidates will apply and develop knowledge of technology in K-12 teaching and student learning. The candidates are prepared to use technology in the Teaching Credential Program and for the development of an electronic portfolio. Credit/No Credit

EDSS 373L. Educational Technology Lab II- Linked Learning. 1 Unit
Prerequisite(s): Admission to the Master of Arts in Teaching with Single Subject Credential program and completion of EDSS 373A
Term Typically Offered: Fall, Spring

This course will offer support and instructions of facilitating and improving learning of a diverse student population in Linked Learning settings by creating, using, and managing appropriate technological processes and resources. Instruction occurs through labs, online resource center and individualized support. Candidates develop a range of technology skills and knowledge needed for effective instruction in the Linked Learning classroom and provides technology resources associated with project-based learning and integrated curricular units. Credit/No Credit

EDSS 376. Secondary Mathematics Methods for In-service Teachers. 3 Units
Prerequisite(s): California Teaching Credential (Multiple Subjects or Single Subject)
Term Typically Offered: Fall, Spring, Summer

This course provides instruction to organize instructional materials, techniques of presentation and methods of evaluation for secondary school mathematics. It will be based on the research of the National Council of Teachers of Mathematics (NCTM) and Mathematics Framework for California Teachers. The participants will learn how to apply current research to their practice through development of lessons and assessment tools. They will investigate a variety of instructional strategies that develop conceptual understanding, procedural fluency, and problem-solving and reasoning skills.

EDSS 378. Secondary Science Methods for In-Service Teachers. 3 Units
Prerequisite(s): California Teaching Credential (Multiple Subjects or Single Subject)
Term Typically Offered: Fall, Spring, Summer

This course is for teachers who hold a teaching credential and are pursuing an additional California Single Subject Credential in an area of science. It will introduce theoretical bases and practical applications of science pedagogy in secondary classrooms. Participants will investigate and apply instructional strategies aligned with the state-adopted K-12 academic content standards (Next Generation Science Standards) to ensure equitable access for all students to science, and engage students to reflect the intellectual rigor of scientific inquiry.

EDSS 383A. Methods in English Education, A. 1.5 Units
Prerequisite(s): Admission to the teacher preparation program
Corequisite(s): EDSS 474A
Term Typically Offered: Fall, Spring

A critical course for English teaching preparation, educational experiences will promote understandings, attitudes and competencies necessary for effective instruction in English Language Arts and literacy in grades 7-12. Candidates acquire skills related to literacy assessment, text selection, and lesson/unit planning designed to meet the needs of all learners, including mainstream populations, English learners and students with special needs. Students are provided with opportunities to acquire skills, knowledge, practice, and experience planning for and teaching secondary English language arts and literacy. Lecture and discussion.

EDSS 383B. Methods in English Education, B. 1.5 Units
Prerequisite(s): EDSS 383A
Corequisite(s): EDSS 474B
Term Typically Offered: Fall, Spring

A critical course for English teaching preparation, educational experiences will promote understandings, attitudes and competencies necessary for effective instruction in English Language Arts and literacy in grades 7-12. Candidates acquire skills related to literacy assessment, text selection, and lesson/unit planning designed to meet the needs of all learners, including mainstream populations, English learners and students with special needs. Students are provided with opportunities to acquire skills, knowledge, practice, and experience planning for and teaching secondary English language arts and literacy. Lecture and discussion.

Note: This course is the second in a two course series

EDSS 384A. Instruction and Assessment of Academic Literacy, A. 1.5 Units
Prerequisite(s): Admission to the Single Subject Teacher Credential Program
Corequisite(s): EDSS 474A
Term Typically Offered: Fall, Spring

Introduction to foundational understandings, attitudes and competencies necessary for effective instruction of academic language and literacy in 7-12 content area classrooms. Candidates acquire skills related to literacy assessment, text selection, and lesson planning designed to meet the needs of all learners, including mainstream population, English learners and students with special needs. Candidates develop an awareness of what constitutes effective content literacy instruction and a beginning repertoire of strategies to help students meet the demands of content reading, writing and discussion. Lecture and discussion.
EDSS 384B.  Instruction and Assessment of Academic Literacy, B.  1.5 Units
Prerequisite(s): EDSS 384A
Corequisite(s): EDSS 474B
Term Typically Offered: Fall, Spring

Second course in a two course series on understanding effective instruction of academic language and literacy in 7-12 content area classrooms. Candidates hone skills in literacy assessment, text selection, and lesson planning to meet the needs of all learners, including mainstream populations, English learners and students with special needs. Application of content literacy instruction (pre, during and post reading and writing strategies). Enhanced knowledge of strategies to support students’ attainment of the demands of content reading, writing and discussion. Lecture, discussion.

EDSS 385A.  Methods in World Language Education, A.  1.5 Units
Prerequisite(s): Admission into the Single Subject Teacher Credential Program
Corequisite(s): EDSS 474A
Term Typically Offered: Fall, Spring

This course is designed for candidates who are preparing to teach world languages in secondary school settings in California public schools. Candidates will learn about current theoretical bases for second-language acquisition and how such theories inform classrooms practice. Candidates have introductory opportunities to practice principles of learning from which teachers can draw as they make decisions about instruction. Lecture, discussion and simulation. Cross Listed: WLL 385A; only one may be counted for credit.

EDSS 385B.  Methods in World Language Education, B.  1.5 Units
Prerequisite(s): EDSS 385A or WLL 385A
Corequisite(s): EDSS 474B
Term Typically Offered: Fall, Spring

This course continues learning initiated in EDSS 385A and is designed for candidates who are preparing to teach world languages in secondary school settings in California public schools. Candidates will learn additional methodologies for planning and delivering instruction in world languages. Candidates will practice instructional strategies and will design lessons. Candidates will implement assessments that capture student learning of key world language outcomes, including oral language and written language development and reading fluency. Strategies for teaching cultural appreciation are also embedded. Lecture, discussion and simulation. Cross Listed: WLL 385B; only one may be counted for credit.

EDSS 386A.  Methods in Mathematics Education, A.  1.5 Units
Prerequisite(s): EDSS 386A
Corequisite(s): EDSS 474B
Term Typically Offered: Fall, Spring

First part of a two-course sequence that provides instruction to organize instructional materials, techniques of presentation and methods of evaluation for secondary school mathematics. Articulated with student teaching and should be taken the same semester. Activities include discussions, presentations and demonstrations.

EDSS 386B.  Methods in Mathematics Education, B.  1.5 Units
Prerequisite(s): EDSS 386A
Corequisite(s): EDSS 474B
Term Typically Offered: Fall, Spring

Second part of a two-course sequence that provides instruction to organize instructional materials, techniques of presentation, and methods of evaluation for secondary school mathematics. Articulated with student teaching and should be taken the same semester. Activities include discussion, presentations and demonstrations.

EDSS 387A.  Methods in History/Social Science Education, A.  1.5 Units
Prerequisite(s): Admission into the Single Subject Teacher Credential Program
Corequisite(s): EDSS 474A
Term Typically Offered: Fall, Spring

First of a two-part field and lecture-based course which will prepare candidates to teach history-social science content and analysis skills to secondary students, particularly those who are culturally and linguistically diverse, have special needs, or are English learners. Focus on identifying and evaluating curricular resources and instructional strategies that emphasize the active use of critical thinking skills and the development of civic values for informed participation in a democratic society.

EDSS 387B.  Methods in History/Social Science Education, B.  1.5 Units
Prerequisite(s): EDSS 387A
Corequisite(s): EDSS 474B
Term Typically Offered: Fall, Spring

Second of a two-part field and lecture-based course which will prepare candidates to teach history-social science content and analysis skills to secondary students, particularly those who are culturally and linguistically diverse, have special needs, or are English learners. Focus on implementing curriculum and instructional strategies and assessing student mastery of grade-level content and skills that are central to history-social science disciplines.

EDSS 388A.  Methods in Science Education, A.  1.5 Units
Prerequisite(s): Admission to Single Subject Teacher Credential Program
Corequisite(s): EDSS 474A
Term Typically Offered: Fall, Spring

First part of a two-course sequence that provides introduction to organization of instructional materials, techniques of presentation, and methods of evaluation for secondary school science. Articulated with student teaching and should be taken the same semester. Activities include discussion, presentations and demonstrations.

EDSS 388B.  Methods in Science Education, B.  1.5 Units
Prerequisite(s): EDSS 388A
Corequisite(s): EDSS 474B
Term Typically Offered: Fall, Spring

Second part of a two-course sequence that provides introduction to organization of instructional materials, techniques of presentation, and methods of evaluation for secondary school science. Articulated with student teaching and should be taken the same semester. Activities include discussion, presentations and demonstrations.
EDSS 392. Teaching Strategies for the CTE Classroom: Supporting All Students. 3 Units
Term Typically Offered: Fall, Spring

This course merges the professional world of industry and the profession of teaching, in an effort to support an industry professional to transition into an education professional. It does this by examining teaching strategies in general and specifically how to apply those strategies to a classroom filled with diverse learners, including students with special needs and English language learners. This is accomplished through reflections, discussions, interviews, observations, readings, and field-based assignments.

EDSS 393. Assessment for Instruction in the CTE Classroom. 0 Units
Term Typically Offered: Fall, Spring

In this course, candidates identify student prior knowledge and use assessments to adapt instruction. They use differentiated instructional strategies to make content accessible to neurodiverse learners and English learners. Candidates reflect on and evaluate the overall effectiveness of their curriculum plan. They understand and honor legal and professional obligations and appropriately use computer-based technology. In the capstone assignment, candidates plan for and teach a unit in the classroom, using assessment data to reflect upon the effectiveness of their instruction.

EDSS 401. Observation and Participation in Secondary Classrooms. 2 Units
Prerequisite(s): Admission to Teacher Preparation Program
Teacher candidates will observe and participate as teaching assistants in public school secondary classrooms.
Credit/No Credit

EDSS 440. Work-Based Learning Field Experience. 2 Units
Prerequisite(s): Admission to the Single Subject Credential program
This fieldwork course focuses on the work-based learning core component of Linked Learning/Career Pathways. After an orientation to work-based learning, its function in Linked Learning/Career Pathways, and how it can be integrated into core curriculum, candidates will experience a non-paid, one-week internship at a worksite associated with one of the 15 major CA industries. Candidates develop work-based knowledge and experiences to be applied when they create a subject-specific curricular unit incorporating their work-based learning. Fieldwork, discussion.

EDSS 470A. Field Experience: Secondary. 6 Units
Prerequisite(s): Acceptance into the Sacramento State Single Subject Teaching Credential Program.
Term Typically Offered: Fall, Spring

Provides candidates with field experiences of increasing complexity and responsibility as they engage in cycles of teaching. Public school assignment in a secondary school serving culturally and linguistically diverse community for one university semester with three periods of responsibility: English learner class, single subject content class, and an observation/consultation period. Observations and supervised teaching experiences will be systematic and structured.
Credit/No Credit

EDSS 470B. Student Teaching: Secondary. 12 Units
Term Typically Offered: Fall, Spring

Provides candidates with field experiences of increasing complexity and responsibility as they engage in cycles of teaching. Experiences will be systematic and structured. Student teachers will be placed for the public school’s semester at a school serving linguistically and culturally diverse students. Candidates become more independent with primary responsibility for cycle of teaching with equivalent of three periods supervised teaching and one consultation period.
Credit/No Credit

EDSS 471A. Elementary Physical Education Student Teaching. 5 Units
Prerequisite(s): Acceptance into the Sacramento State Single Subject Teaching Credential Program.
Term Typically Offered: Fall, Spring

The elementary physical education teacher will be placed in a setting where he/she is able to plan, implement, promote and assess a developmentally appropriate physical education program that meets the diverse needs, interests and abilities of elementary school children, K-6.
Credit/No Credit

EDSS 471B. Secondary Physical Education Student Teaching. 4 Units
Prerequisite(s): The successful completion of EDTE 471A.
Term Typically Offered: Fall, Spring

The secondary physical education student teacher will be placed in a setting where he/she is able to plan, implement, promote and assess a developmentally appropriate physical education program that meets the diverse needs, interests and abilities of secondary school children, 6-12.
Credit/No Credit

EDSS 474A. Field Experiences in Secondary Schools. 6 Units
Prerequisite(s): Admission into the Single Subject Teaching Credential Program
Term Typically Offered: Fall, Spring

Provides candidates with field experiences of increasing complexity and responsibility as they engage in cycles of teaching. Public school assignment in a secondary school serving culturally and linguistically diverse community for one university semester with three periods of responsibility: English learner class, single subject content class and an observation/consultation period. Observations and supervised teaching experiences will be systematic and structured.
Credit/No Credit

EDSS 474B. Student Teaching in Secondary Schools. 8 Units
Prerequisite(s): EDSS 474A; all subject matter competence and basic skills requirements met, per CTC program standards
Term Typically Offered: Fall, Spring

Candidates engage in student teaching, taking on tasks of increasing complexity and responsibility as they perform cycles of teaching. Student teaching will be systematic and structured. Student teachers will be placed for the public school’s semester at a school serving linguistically and culturally diverse students. Candidates become more independent with primary responsibility for cycle of teaching with equivalent of three periods supervised teaching and one consultation period.
Credit/No Credit
EDSS 474C. Intern Teaching in Secondary Schools. 8 Units
Prerequisite(s): EDSS 474A and department approval.
Term Typically Offered: Fall, Spring

Single subject intern teaching in a public school setting with diverse learners. Intern teaching is completed concurrently with integrated coursework and focuses primarily on planning, implementing, and assessing instruction for a whole class of students.
Credit/No Credit

EDSS 500. Classroom Inquiry Project: Culminating Experience. 3 Units
Prerequisite(s): EDMS 242 or EDSS 242 and EDMS 243 or EDSS 243.
Term Typically Offered: Spring only

Course establishes that master candidates have acquired the essential knowledge and skills covered in each of the courses leading to the Master of Arts in Teaching with Single Subject Teaching Credential. Proficiency is demonstrated through a comprehensive examination of essential content of each course in the master's degree program. Candidates will produce a written portfolio, accompanying executive summary, and oral presentation of the body of work completed during the Master of Arts in Teaching with Single Subject Teaching Credential program. Cross listed: EDMS 500.
Credit/No Credit

EDSS 599. Continuous Master of Arts in Teaching Enrollment. 0 Units
Prerequisite(s): Student has completed all MAT coursework prior to, and earned an RP in, EDMS 500 or EDSS 500.
Term Typically Offered: Fall, Spring

This is a zero-unit course for students in the Master of Arts in Teaching (MAT) program who earn an RP in their culminating experience course, EDMS/EDSS 500. The purpose of this course is to allow MAT students to maintain their continuous enrollment status while they complete the culminating experience requirements for the MAT program. Credit/No Credit

Early Childhood Special Education - Added Authorization

Units Required for Credential: 26

Program Description
The Early Childhood Special Education Added Authorization (ECSEAA) Program is available for both qualified current Education Specialist teaching credential candidates (those admitted to the Education Specialist programs for Extensive Support Needs or Mild to Moderate Support Needs) and qualified in-service Education Specialist teachers (who hold a current Education Specialist credential). The program is a fully online (in synchronous formats) distance-learning program designed to meet the growing need across California for early intervention, preschool, and kindergarten Education Specialist educators. Upon admittance to the ECSEAA program, the candidates will take 5 courses (alongside the ECSE candidates in the MAT program), complete 1 early fieldwork experience (which can be completed as an intern teacher), and complete 2 student or intern teaching experiences (Infant/Toddler and Preschool/Kindergarten). Additionally, as is offered for the ECSE preliminary credential, ECSEAA candidates are provided with individualized advising and have two options for completing their fieldwork experiences: student teaching or intern teaching. Program assessments include reflective papers, class activities and discussions, applied coursework projects, signature assignments, a comprehensive fieldwork evaluation rubric, and a program exit survey.

This program will consider two categories of candidates for admission:

1. Those who have already been admitted to the Master of Arts in Special Education Teaching (Extensive Support Needs or Mild to Moderate Support Needs) and will earn the authorization prior to or concurrent with the MASET, or
2. Those who hold a preliminary or clear Education Specialist: Mild to Moderate Disabilities (or Mild to Moderate Support Needs) or Education Specialist: Moderate to Severe Disabilities (or Extensive Support Needs).

Program Admission Requirements
Candidates already admitted to the Master of Arts in Teaching with Mild to Moderate Support Needs or Master of Arts in Teaching with Extensive Support Needs must meet the following additional admissions requirements in order to be considered for the Early Childhood Special Education Added Authorization:

1. Be in good academic standing;
2. Meet with their Faculty/Program Advisor and obtain a recommendation to submit with the ECSEAA application;
3. Complete a required interview;
4. Complete the required admissions application form which is available from the program coordinator or on the Teaching Credentials website.

Candidates applying for admission who hold a preliminary or clear Education Specialist: Mild to Moderate Disabilities (or Mild to Moderate Support Needs) or Education Specialist: Moderate to Severe Disabilities (or Extensive Support Needs) teaching credential must complete the campus application through Cal State Apply by all posted deadlines. Admissions requirements include:

1. Evidence of current Education Specialist: Mild to Moderate Disabilities (or Mild to Moderate Support Needs) or Education Specialist: Moderate to Severe Disabilities (or Extensive Support Needs) teaching credential.
2. Submit two references.
3. Certificate of Clearance (COC) security clearance issued by the Commission on Teacher Credentialing must be submitted.
4. Grade Point Average (GPA) of at least 2.5 overall or 2.75 in last 60 semester or 90 quarter units as evidenced from submitting official transcripts from every college/university attended.
5. Participate in the mandatory interview.

Detailed descriptions of all admissions requirements are contained in the program's application instructions, which are available on the Teaching Credentials Application website.

Additional Information for All Admitted Program Candidates

Continued Enrollment: Continued enrollment in the Early Childhood Special Education Added Authorization (ECSEAA) Program is contingent upon the candidate maintaining a GPA of 3.0 in all professional education courses. If incomplete grades or grades of "D", "F", and "NC" (No Credit) are received in professional education courses, the candidate must withdraw from the program unless a specific exception has been approved by the Credential Appeals Committee. Any student on academic
prohibition is subject to automatic disqualification unless approved by the Credential Appeals Committee to continue.

Grade Requirement for the ECSE Added Authorization: Any grade below C- in a course that meets a requirement must be retaken in order to meet authorization requirements.

Delays: Candidates who have to delay progress in the Early Childhood Special Education Added Authorization Program will file a "Program Delay Petition" in the Credentials Office. A student returning after a delay may be accommodated on a space available basis. Candidates must return and complete the program within the seven-year limit for graduate programs.

Appeal Process: A student who has been formally admitted to the program has the right to appeal to the Credential Appeals Committee about any policy affecting program continuation, except for those policies set by the Commission on Teacher Credentialing or state education code. Appeals petitions and assistance are available in the Teaching Credentials Office.

Education Specialist Credential Program: Mild/Moderate with Multiple Subject

This program is scheduled for discontinuation, please see the Master of Arts in Special Education Teaching (Mild to Moderate Support Needs) with Multiple Subject (p. 533)

Total units required for Credential: 54-62

Program Description

The Education Specialist Instruction Credential authorizes the holder to provide instruction and special education support as well as conduct Educational Assessments related to student’s access to the academic core curriculum. Support services can be provided according to the credential holder’s area of specialization in the following settings:

- Resource rooms or services
- Special education settings
- General education settings
- Special schools
- Home/hospital settings
- State hospitals
- Development centers
- Correctional facilities
- Non-public, non-sectarian schools and agencies
- Alternative and non-traditional instructional
- Public school settings other than classroom

Programs offered lead to Certificates of Eligibility and/or the Preliminary Credential in three specialties:

- Education Specialist: Teaching Credential Program: Early Childhood Special Education
- Education Specialist: Mild/Moderate Disabilities Specialist (M/M) and
- Education Specialist: Moderate/Severe Disabilities Specialist (M/S).

All above specialties comply with regulations and standards as issued by SB2042 and AB1059 (English Language Authorization).

University- and California Commission on Teacher Credentialing (CTC) approved program options also allow candidates to pursue the M/M or M/S specialty concurrently with the Multiple Subject Credential. Another approved program allows candidates to add an ECSE Certificate to existing Clear M/M, M/S or other California Special Education Specialist credentials. For additional information regarding the ECSE Certificate, please contact the ECSE Coordinator (current the program is on hiatus) or Teaching Credentials Office.

All credential programs undergo continual review and change; current requirements are available on the Teaching Credentials website (http://www.csus.edu/coe/academics/credentials/). All candidates are required to seek advisement regarding credential coursework and must complete a program advisement plan prior to the start of the program. Candidates must take prerequisites prior to the start of the program; candidates who continue without advisement or do not complete prerequisites prior to the start of the program may be disenrolled.

Special Education Internships

All Preliminary Education Specialist programs at Sacramento State have been approved by CCTC as internship programs. In order to be eligible for an Intern Education Specialist Credential, candidates must

- have been admitted and cleared all admission requirements for the credential program;
- have received the recommendation of a faculty member;
- have received an offer of employment from an employer; and
- be pursuing an internship with a district/school that has a written internship agreement (Memorandum of Understanding) with Sacramento State.
Only candidates in their final semester of the program can be considered for internships.

Note: Candidates working under an Education Specialist Internship Credential must concurrently fulfill the requirements of the credential program and the internship appointment.

### Preliminary Teaching Credentials

As new regulations become mandated by the California Commission on Teacher Credentialing (CTC) and the California Department of Education, requirements for meeting subject matter competency and/or requirements for all preliminary credential programs will be changed to comply with the new requirements. The preliminary credential program is legislated according to the SB 2042 (Preliminary) Credential Requirements. For further information, please contact the Academic and Program Services Office in Eureka Hall 401, (916) 278-6639.

### Preliminary Teaching Credential Requirements

Completion of the Preliminary Teaching Credential requires that the candidate:

- hold a baccalaureate or higher degree in a field other than professional education from a regionally accredited college or university;
- complete an approved program of teacher preparation, including student teaching;
- for an Education Specialist – Mild/Moderate or Moderate/Severe credential, if the plan is to teach Special Education at the elementary school level, complete either an approved subject matter program or pass the approved subject-matter examination (CSET: California Subject Examination for Teachers, Multiple Subject, Subtests I, II and III);
- for an Education Specialist – Mild/Moderate or Moderate/Severe credential, if the plan is to teach Special Education at the secondary school level, complete either an approved subject matter program in one of the core academic subject areas or pass an approved subject-matter examination in a core academic subject area (CSET: California Subject Examination for Teachers);
- for a Multiple Subject credential, pass the approved subject-matter examination (CSET: California Subject Examination for Teachers, Multiple Subject, Subtests I, II and III);
- for Single Subject, complete either an approved subject matter program or pass the approved subject-matter examination (CSET) in the appropriate teaching area;
- for Single Subject, complete an approved course in the teaching of reading;
- for Multiple Subject, complete an approved course in the teaching of reading and pass the Reading Instruction Competence Assessment (RICA) exam;
- pass a college-level course or examination on the U.S. Constitution; and
- demonstrate California Basic Educational Skills (see subsection below on options available).

Teaching Credentials offers a variety of pathways for completing the Preliminary Credential programs depending on the program:

- a one-year (two-semester) program;
- a three-semester program;
- a two-year (four-semester) program – Education Specialist programs only; part-time options are available which will increase time to program completion

Field experience and student teaching are integral parts of the program leading to Preliminary Credentials. In both the Multiple Subject and Single Subject Teacher Preparation programs, candidates move through the program in cohorts. Full-time Education Specialist candidates follow a tightly-sequenced series of courses. In all teacher preparation programs, candidates complete fieldwork in public schools. All candidates will have experience working with children or youth from a broad range of cultural, ethnic, economic and special learning needs backgrounds.

### Program Admission Requirements at a Glance

1. Experiences related to working with children or youth
2. References (2)
3. Essay
4. Official Transcripts from every college/university attended
5. Writing Proficiency
6. Basic Skills Competence (i.e., pass the CBEST)
7. Subject Matter Competence (i.e., pass the CSET)
8. Grade Point Average (GPA) of at least 2.67 overall or 2.75 in last 60 semester or 90 quarter units
9. Complete Credential Prerequisite Courses: EDUC 170, EDUC 100A, EDUC 100B, PUBH 136, and KINS 172 (MS only – equivalent workshop can be taken during the program)
10. Complete the Mandatory Interview

### Applications Required at a Glance

- Teaching credentials Supplemental Program Application
- CSU Graduate School Application
- Certificate of Clearance Application (and fingerprint clearance through CTC)

### Admission Requirements – General Information Only

Experiences Related to Working with Children or Youth (paid and/or volunteer)

A minimum of 45 hours of experience (closer to 100+ hours if you want to be competitive) with diverse populations is required to be considered for program admission. Possible field experiences can include: classroom instructional aide, tutoring, afterschool program, Peace Corps, camp counseling, child/youth recreation programs, coaching, group/home counseling, church school teaching, etc. Your responses will be evaluated using the following criteria:

- **Recency:** Experience needs to be recent – at least within 1-2 years of the application period. You can list all experiences gained on the supplemental application, but regency is key.
- **Settings:** Majority of your experiences should be in appropriate settings/schools (ideally public schools) with culturally, linguistically, and socioeconomically diverse students of the age group (i.e., elementary school, high school, etc.) or population (i.e., special
needs population) you plan to teach. You will list the diversity of your experiences on the supplemental application.

- **Supervision:** Has the verifiable experience been gained under supervision? If so, you will need to list names of your supervisors on the supplemental application.

**References**

Applicants submit two reference forms (included in the supplemental application). Letters of recommendation will not be accepted in lieu of reference forms. Only reference forms submitted in sealed envelopes will be accepted. It is recommended that one of the references be from a person who has observed the applicant’s academic competence (current or former instructor) and the other reference from a person who has observed the applicant working with children or youth. NOTE: References from family members will not be accepted.

**Essay**

Discuss a critical, current issue in teaching/education and the relationship of this issue to your motivation to become a teacher in a typed, two-page, double-spaced essay. NOTE: This prompt is subject to change.

**Transcripts**

Applicants must provide official, sealed transcripts from every community college/college/university attended, even if only ONE class was completed. Sacramento State students and Sacramento State graduates are exempt, unless coursework was completed at another college after you graduated.

**Writing Proficiency**

Satisfying writing proficiency is a program admission requirement. This requirement may be met in one of the following ways:

1. Pass the entire CBEST (must pass the writing portion with a minimum of 37 points); or
2. Pass the CSET: Writing Skills Test (Multiple Subject applicants only); or
3. Meet the graduation writing requirement (GWAR) at any CSU campus; or
4. Successfully complete an upper-division advanced English composition course, with a “B” grade or better.

**Basic Skills Requirement (BSR)**

Satisfying the basic skills requirement is a program admission requirement. Select one of the following options to meet this requirement. For detailed information visit the CTC website (https://www.ctc.ca.gov/credentials/leaflets/cl667.pdf).

1. Pass the California Basic Educational Skills Test (CBEST) – all sections must be taken and passed
2. Pass the CSU Early Assessment Program (EAP) English and Math sections (tests completed in high school)
3. Pass the CSU English Placement Test (EPT) and the Entry Level Math (ELM) Test (For more information, visit the Testing Center website (http://www.csus.edu/testing/))
4. Pass the CSET: Writing Skills Test (available to Multiple Subject applicants only)
5. Pass a basic skills examination from another state

Register online at the CTC Exams website (http://www.ctcexams.nesinc.com). Take exams no later than February for FALL admission consideration.

**Subject Matter Competence (SMC)**

Applicants are required to meet SMC to be considered for admission:

- **Special Education:** Applicants holding one of the following types of credentials may have met the subject matter competency requirement: five-year preliminary, clear, professional clear, or life credential in the following authorizations: Multiple Subject, Single Subject, Standard Elementary, Standard Secondary, General Elementary, or General Secondary. Applicants who do not hold one of the types of credentials listed above can meet SMC through one of the following options:

  - • CSET for Multiple Subjects option or
  - • Single Subject option (see requirements below)

- **Multiple Subject:** All applicants must satisfy SMC by passing the California Subject Examinations for Teachers (CSET): Multiple Subjects subtests I, II, and III. NOTE: CSET passing scores on all three (3) subtests are required for admission consideration. Take exams no later than February for FALL admission consideration. Register for tests online at: www.ctcexams.nesinc.com (http://www.ctcexams.nesinc.com/).

- **Single Subject:** Applicants may satisfy SMC in ONE of two ways, either (1) by examination or (2) by completing an approved undergraduate program of subject matter coursework.

1. **Examination(s)** Take and pass the California Subject Examinations for Teachers (CSET) in your subject area. Be sure to take all required subtests in your teaching area. NOTE: CSET passing scores on all subtests are required for admission consideration. Take exams no later than February for FALL admission consideration. Register for tests online at: www.ctcexams.nesinc.com (http://www.ctcexams.nesinc.com/).

2. **Coursework** Complete a California Commission-approved undergraduate academic subject matter preparation (SMP) program from an accredited California college/university.

**SMP Coursework Options**

- **The Sacramento State Subject Matter Program (SMP)** is a California approved baccalaureate program that prepares individuals for teaching. Sac State students completing a SMP must meet with an approved advisor as soon as possible in order to complete the Subject Matter Competence Verification Form. For a listing of faculty advisors visit the Teaching Credentials website (http://www.csus.edu/coe/apply/assets/credentials/smp-advisor-20160926.pdf).

- **Non-Sacramento State applicants** who completed an approved SMP on a California campus other than Sacramento State must submit verification of completion of the SMP on letterhead stationery of your school, signed by the approved evaluator, instead of using the Subject Matter Competence Verification Form. Check with your College’s Credentials Office for the approved evaluator.

**Grade Point Average (GPA) Required**

In order to be considered for admission to a Teaching Credential Program, applicants must have attained a cumulative GPA of at least 2.67 in all
baccalaureate and post-baccalaureate course work (if completed) OR a GPA of at least 2.75 in the last 60 semester or 90 quarter units attempted.

Pre-requisite Credential Courses – to be completed PRIOR to starting the credential programs:

1 For MS only. If admitted, an equivalent PE/Health methods workshop can be completed during the credential program.

List of equivalent courses, visit the Teaching Credentials website (http://www.csus.edu/coe/apply/assets/credentials/cred-equivalencies-prereqs-20160712.pdf).

Interview
All applicants must participate in a one-hour group interview as part of the screening process. After the supplemental program application is received by the Department, applicants are notified by email of the interview process and dates.

Applications Required

CSU Graduate School Application for the University:
Applicants not currently attending Sacramento State, Sacramento State graduating seniors, and Sacramento State students completing a master’s degree or second bachelor’s degree MUST apply for admission to graduate school through the Office of Graduate Studies (OGS) by completing and submitting the CSU application on-line.

Transcripts: Applicants who did not graduate from Sacramento State must submit one (1) set of sealed, official transcripts from ALL community colleges/colleges/universities attended, even if only ONE class was completed. If you have questions about the University graduate school application process, please contact the OGS at (916) 278-6470.

Foreign degrees: Transcripts from applicants with degrees from outside of the United States must review the information/instructions on the Office of Graduate Studies website (http://www.csus.edu/gradstudies/FutureStudents/ApplicantsWithForeignDocuments/).

NOTE: Foreign transcripts and other supporting documents are usually due much earlier than University and department application deadlines.

Teaching Credentials Program Supplemental Application:
All applicants must submit a supplemental program application packet that includes: a list of experiences related to teaching/working with children/youth, an essay, two completed & sealed reference forms, writing proficiency verification, subject matter competency verification, and basic skills requirement verification (CBEST or other approved verification). Beginning in OCTOBER every year, the supplemental program applications with instructions/current requirements are available on the Teaching Credentials website (http://www.csus.edu/coe/apply/credentials.html). Credential programs only begin in FALL semesters. Complete supplemental applications and all supporting documents must be submitted to the Teaching Credentials by February.

The exact submission deadline date is posted once applications are available on the website.

Certificate of Clearance (COC/Fingerprint Clearance):
ALL applicants must submit verification of having been issued a clearance by the CA Commission on Teacher Credentialing (CTC) before they will be allowed to officially start the credential program.

- Applicants who have already been issued a clearance/permit/credential must submit a printout from the CTC website (https://www.ctc.ca.gov/) showing the issuance date of a valid CA 30-day emergency permit, a valid CA Child Development Associate/Center permit, a valid CA credential, or a valid Certificate of Clearance.

- Applicants who have NOT been issued a clearance/permit/credential must apply for the Certificate of Clearance on the CTC website as well as complete the Live Scan fingerprinting process. Tips for completing the online application and Live Scan process can be found on the CTC website (https://www.ctc.ca.gov/credentials/online-services/pdf/web-app-tips.pdf). Proof of applying for the clearance and completing the Live Scan process MUST be submitted with the supplemental credential program application packet. Include as proof the following: a copy of the ‘Payment Receipt’ page from the on-line COC application AND a copy of your completed and scanned Live Scan form.

- Once your clearance is issued, you will receive an email from the CTC. Print this email and submit it with your supplemental program application packet. Or, if the email is received after you have submitted your application, submit the email directly to the Teaching Credentials Department in Eureka Hall - 401.

EXCEPTION – it is not necessary to apply for the Certificate of Clearance if you can verify you hold a valid California certificate or credential such as an emergency permit for substitute teaching, Pre-intern certificate, PPS credential, Child Development Associate or Supervisor Permit, Adult Vocational Education credential OR if you are applying for a Special Education credential program, verify a valid Multiple or Single Subject credential.

NOTE: If you answered “YES” to any of the Personal and Professional Fitness questions on the Certificate of Clearance application, you will need to obtain the official arrest record and court paperwork regarding each incident. Refer to the CTC website (https://www.ctc.ca.gov/educator-discipline/self-reporting.html) for the instructions, forms, and where to submit all additional paperwork. If you have arrests and/or convictions on your record, once you submit the additional paperwork/documentation to the CTC, the processing of your clearance application can take six months or longer. This means you may not be eligible to start the credential program if your clearance is not issued before the program begins. If you have any questions, contact the CTC directly via email (credentials@ctc.ca.gov).

Additional Information

Verification of Bachelor’s Degree
ALL applicants must obtain a bachelor’s degree from a regionally accredited college/university in the United States in order to be eligible for a credential. Proof can be obtained through official transcripts and listed as “Degree(s) Awarded” with the date the degree was awarded. To find out if your college/university is regionally accredited by one of the accrediting agencies approved by the California Commission on Teacher
Credentialing (CTC), visit the CTC website (https://www.ctc.ca.gov/credentials/accrreditation-bodies.html).

**Foreign Transcript Evaluation**
Individuals who have completed college or university course work at an institution in a country other than the United States must obtain a complete evaluation of foreign transcripts, degrees¹, and other relevant documents prior to applying for a teaching credential program. This evaluation is required by the California Commission on Teacher Credentialing (CCTC). It is recommended that credential program applicants have their documents evaluated by WES (http://www.wes.org/students/), since both the University Office of Graduate Studies and the Commission will accept the WES (http://www.wes.org/students/) evaluation. Applicants should select the WES INTERNATIONAL CREDENTIAL ADVANTAGE PACKAGE (ICAP) Course by Course Evaluation. For additional information on foreign transcript evaluations please visit the CTC website (https://www.ctc.ca.gov/credentials/leaflets/c1635.pdf).

¹ The bachelor's degree requirement for California credentials refers to the equivalent of a four-year (or more) college-level program.

**Verification of completing the United States Constitution Requirement**
California Education Code, Section 44335, requires all candidates for Multiple Subject, Single Subject, and Education Specialist credentials to demonstrate knowledge of the United States Constitution by completing a college-level course with a "C" or equivalent grade or better, or pass a college-level examination in the subject, or verify AP exam credit for American History or American Government/Politics. While this is not a program admission requirement, this requirement must be completed before the credential can be granted at the end of the credential program. Most CSU graduates have met this requirement.

**Additional Information for All Admitted Credential Candidates**
- **Continued Enrollment:** Continued enrollment in a Preliminary Credential Program is contingent upon the candidates maintaining a GPA of 3.0 in all professional education courses. If incomplete grades or grades of "D", "F", and "NC" (No Credit) are received in professional education courses, the candidate must withdraw from the program unless a specific exception has been approved by the Credential Appeals Committee.
- **Delays:** Candidates who have to delay progress in a Preliminary Credential Program file a "Program Delay Petition" in the Teaching Credentials Office. A student returning after a delay may be accommodated on a space available basis. Any student on academic probation is subject to automatic disqualification as a Credential candidate.

**Appeal Process:** A student who has been formally admitted to the program has the right to appeal to the Credential Appeals Committee about any policy affecting program continuation. Appeals petitions and assistance are available in the Teaching Credentials Office.

**Bilingual Authorization (BA)**
The BA is a specialized authorization that authorizes the credential holder to provide instruction in the primary language to candidates with limited English proficiency. This option is available concurrently for all credential candidates with oral and written fluency as well as cultural/historical knowledge of the target group (Spanish or Hmong). Candidates can complete additional requirements to add the Bilingual Authorization in Spanish or Hmong. For additional information on the BA option, contact the College of Education Equity Coordinator, Karina Figueroa-Ramirez (figueroaramirez@csus.edu), for an advising appointment to review your transcripts.

**Master of Arts in Special Education Teaching (Education Specialist Early Childhood)**

**Total Units for Completion: 65-77**

**Program Description**

The MA in Teaching (Early Childhood Special Education (ECSE)) blends a teacher preparation program with a Master of Arts in Teaching (MAT). This program is a distance learning program offered fully online to candidates across the state of California who are more than 30 miles away from the Sacramento State campus (those within 30 miles of campus can take some courses in person while distance learners join via remote technology). Courses are taken in the evening. Fieldwork is completed in a school district program located near the candidate, while supervision of fieldwork is provided online in a mostly live/synchronous format.

The Education Specialist ECSE Teaching Credential authorizes the holder to provide educational services to infants, toddlers, preschool, and kindergarten age children with disabilities and their families in home-based programs, center-based settings, and school-based settings. This credential embeds the English Learner Authorization (ELA) and Autism Spectrum Disorder (ASD) Authorization, which prepares candidates to work with second language learners and students with autism spectrum disorder, respectively. Additionally, teacher candidates may choose to apply to be an intern during the course of their program.

- The ECSE Teaching Credential provides candidates with applied experiences through coursework connecting theory to practice and supervised work with children (birth to kindergarten, all disabilities) across early field experiences and two student teaching experiences: 1) Infant/Toddler, and 2) Preschool/Kindergarten. Student teachers have the option of being employed on an intern credential. The teacher preparation coursework focuses on preparing effective teachers for working with diverse student populations with an emphasis on preparing socially just teachers and leaders for systems change, committed to equity and inclusion in culturally and linguistically diverse schools and communities.

- The MAT coursework focuses on inquiry-based education which includes hands-on instruction with problem-based learning and issue-centered curriculum and a focus on reflection during the teaching and research process. The program foundation rests in social justice and equity in education for all children and youth, including those with disabilities and their families.

Upon completion of the ECSE Teaching Credential coursework, program candidates may complete an additional sequence of four MAT courses (15 additional units), if they choose to finish the MAT. Throughout the MAT program, candidates will learn how to critically examine evidence-based practices, policy issues, and current research on teaching and learning in the field of special education. Candidates will be expected to apply analytical skills to develop and implement standards-based curriculum in diverse settings using best instructional and inclusive practices that positively impact the learning of all students, including English Learners and children and youth with disabilities. Candidates also will conduct original teacher action research using practice-based methods in diverse educational settings. The materials and associated activities presented in the MAT coursework are highly integrated to support candidates with successful completion of the Master of Arts in Teaching degree at the end of the program.

**Master of Arts in Special Education Teaching (Early Childhood Special Education)**

The California Commission on Teacher Credentialing (CTC) establishes admissions requirements for all preliminary teaching credential programs and the CSU Chancellor’s Office further specifies admissions requirements. The requirements listed below may be subject to change, based on actions of these two governing bodies. Interested applicants are encouraged to contact the Academic and Program Services Office in Eureka Hall 401, (916) 278-6639, an advisor in the Student Success Center (https://www.csus.edu/college/education/student-support/), or the MAT with Credential program website (https://www.csus.edu/college/education/teaching-credentials/apply.html) for the most current admissions requirements.

**Program Admission Requirements**

1. A Baccalaureate degree is required for admission to the MAT.

2. Minimum of 45 hours of experience working with children or youth in a preK-12 classroom or equivalent is recommended.

3. Submit two references: one from a person who has observed the applicant’s academic competence (current or former instructor) and the other from a person who has observed the applicant working with children or youth. **NOTE:** References from family members will not be accepted.

4. Submit a graduate writing sample.

5. Satisfy writing proficiency by meeting the Basic Skills Requirement.

6. Satisfy the Basic Skills Requirement. For more detailed information, visit the CTC website (https://www.ctc.ca.gov/). Example of ways to satisfy Basic Skills Competence include:

   a. Pass the California Basic Educational Skills Test (CBEST)
   b. Pass the CSET Multiple Subjects plus Writing Skills examination
   c. Pass the CSU Early Assessment Program (EAP) or the CSU Placement Examinations
   d. Achieve qualifying score on the SAT or ACT (see the CTC website (https://www.ctc.ca.gov/))
   e. Score a 3 or above on specific AP examinations (see the CTC website (https://www.ctc.ca.gov/))
   f. Earn a grade of “B-” or better in specific college or university courses as detailed on the (https://www.ctc.ca.gov/JCTC website (https://www.ctc.ca.gov/credentials/leaflets/basic-skills-requirement-(cl-667)/).
   g. Mix and Match as detailed on the CTC website (https://www.ctc.ca.gov/).
7. Grade Point Average (GPA) of at least 2.5 overall or 2.75 in last 60 semester or 90 quarter units as evidenced from official transcripts from every college/university attended.

8. Complete Credential Prerequisite Courses: CHAD 30 (https://catalog.csus.edu/search/?search=CHAD+30), EDUC 170, EDUC 100A, EDUC 100B. List of equivalent coursework is located on the Teaching Credentials website (https://www.csus.edu/college/education/teaching-credentials/apply.html).

9. Certificate of Clearance (COC) security clearance issued by the Commission on Teacher Credentialing; evidence of submitting the COC application and fingerprints must be submitted at application.

10. Participate in a Mandatory Interview.

Detailed descriptions of all admissions requirements are contained in the program’s application instructions, which are available on the Teaching Credentials Application website (https://www.csus.edu/college/education/teaching-credentials/apply.html).

Applications Required
CSU Graduate School Application for the University
Sacramento State graduating seniors, Sacramento State students completing a master’s degree or second bachelor’s degree, and applicants not currently attending Sacramento State MUST apply for admission to graduate school through the Office of Graduate Studies (OGS) by completing and submitting the CSU application on-line: Cal State Apply (https://www2.calstate.edu/apply/)

Supplemental Application
A separate Supplemental Application is only required for current undergraduate Sacramento State students who are not graduating, who are applying to take first semester program coursework while still classified as an undergraduate. Complete supplemental applications and all supporting documents must be submitted to Teaching Credentials by the deadline indicated on the Teaching Credentials website. The link is posted on the Teaching Credential website in October of the year prior to admission.

Additional Information
Certificate of Clearance (COC/Fingerprint Clearance)
All applicants must submit verification of having been issued a security clearance by the Commission on Teacher Credentialing (CTC) before they will be allowed to officially start the credential program.

EXCEPTION – it is not necessary to apply for the Certificate of Clearance if you can verify you hold a valid California certificate or credential such as an emergency permit for substitute teaching, Pre-intern certificate, PPS credential, Child Development Associate or Supervisor Permit, Adult Vocational Education credential or a valid Multiple or Single Subject credential.

NOTE: If you answered "YES" to any of the Personal and Professional Fitness questions on the Certificate of Clearance application, you will need to obtain the official arrest record and court paperwork regarding each incident. Refer to the CTC website (https://www.ctc.ca.gov/) for instructions, forms, and where to submit all additional paperwork. If you have arrests and/or convictions on your record, once you submit the additional documentation to CTC, the processing of your clearance application can take SIX MONTHS or longer. This means you may not be eligible to start the program if your clearance is not issued before the program begins. If you have any questions, contact the CTC directly via email (credentials@ctc.ca.gov).

Verification of Bachelor's Degree
All applicants must obtain a bachelor's degree from a regionally accredited college/university in the United States in order to be eligible for a credential. Proof can be obtained through official transcripts and listed as "Degree(s) Awarded" with the date the degree was awarded. To find out if your college/university is regionally accredited by one of the accrediting agencies approved by the California Commission on Teacher Credentialing (CTC), visit the CTC website (https://www.ctc.ca.gov/).

Foreign Transcript Evaluation
Individuals who have completed college or university course work at an institution in a country other than the United States must obtain a complete evaluation of foreign transcripts, degrees, and other relevant documents prior to applying for the program. This evaluation is required by the California Commission on Teacher Credentialing (CTC) and the university. It is recommended that credential program applicants have their documents evaluated by WES (http://www.wes.org/students/), since both the University Office of Graduate Studies and the Commission will accept the WES (http://www.wes.org/students/) evaluation. Applicants should select the WES INTERNATIONAL CREDENTIAL ADVANTAGE PACKAGE (ICAP) Course by Course Evaluation (https://www.ctc.ca.gov/) for additional information on foreign transcript evaluations please visit the CTC website (https://www.ctc.ca.gov/) and the Office of Graduate Studies website (https://www.csus.edu/graduate-studies/future-students/applicants-with-foreign-documents.html).

Verification of completing the United States Constitution Requirement
California Education Code, Section 44335, requires all candidates for Multiple Subject, Single Subject, and Education Specialist credentials to demonstrate knowledge of the United States Constitution by completing a college-level course with a "C" or equivalent grade or better, or pass a college-level examination in the subject, or verify AP exam credit for American History or American Government/Politics. While this is not a program admission requirement, this requirement must be completed before the credential can be granted at the end of the credential program. Most CSU graduates have met this requirement. More information can be found by contacting pre-credential advisors in the College of Education Student Success Center (https://www.csus.edu/college/education/student-support/).

Minimum Units and Grade Requirement for the MAT Degree
Units required for the MAT degree: 30
Minimum Cumulative GPA for the MAT degree: 3.0

Additional Information for All Admitted Program Candidates: Credential Coursework
Continued Enrollment: Continued enrollment in the MAT in Teaching with Early Childhood Special Education Teaching Credential Program is contingent upon candidates maintaining a GPA of 3.0 in all professional education courses. If incomplete grades or grades of "D", "F", and "NC" (No Credit) are received in professional education courses, the candidate must withdraw from the program unless a specific exception has been approved by the Credential Appeals Committee. Any student on academic probation is subject to automatic disqualification unless approved by the Credential Appeals Committee to continue.
Grade Requirement for the ECSE Credential: Any grade below C- in a course that meets a credential requirement must be repeated in order to meet credential requirements.

Delays: Candidates who have to delay progress in the MA in Teaching with Early Childhood Special Education Teaching Credential Program will file a "Program Delay Petition" in the Teaching Credentials Office. A student returning after a delay may be accommodated on a space available basis. Candidates must return and complete the program within the seven-year limit for graduate programs.

Appeal Process: A student who has been formally admitted to the program has the right to appeal to the Credential Appeals Committee about any policy affecting program continuation, except for those policies set by the Commission on Teacher Credentialing or state education code. Appeals petitions and assistance are available in the Teaching Credentials Office.

Licensure

Admission into programs leading to licensure does not guarantee that students will obtain a license. Licensure requirements are set by agencies that are not controlled by or affiliated with the CSU and requirements can change at any time. For example, licensure requirements can include evidence of the right to work in the United States (e.g., social security number or tax payer identification number) or successfully passing a criminal background check. Students are responsible for determining whether they can meet licensure. The CSU will not refund tuition, fees, or any associated costs, to students who determine subsequent to admission that they cannot meet licensure requirements.

Additional Information for All Admitted Program Candidates: MAT Degree

Grade Requirement for the Master's Degree: Courses required for the Master of Arts in Teaching degree require a grade of B- or better in order to be used to satisfy the requirements of the Master's degree. If a student receives below a B- in any course required for the Master's degree, the course must be successfully repeated with a grade of B- or better in order to satisfy the requirements of the degree program (grades of C- or better will satisfy the requirements for the teaching credential).

Delays: Candidates who have to delay progress in the MA in Teaching with Early Childhood Special Education Teaching Credential Program will file a "Program Delay Petition" in the Teaching Credentials Office. A student returning after a delay may be accommodated on a space available basis. Candidates must return and complete the program within the seven-year limit for graduate programs.

Advancement to Candidacy Procedures: Each student working toward a Master of Arts in Teaching degree must file an application for Advancement to Candidacy for the degree. The purpose of this application is to provide certification to the Office of Graduate Studies that the student will complete the necessary requirements and coursework for the Master's degree. The student must be advanced to candidacy the semester prior to enrolling in EDSP 500.

This procedure should begin as soon as the classified graduate student has:

• Completed 21 units in the graduate program with a minimum 3.0 GPA; and
• Met the Graduate Writing Requirement through completion of the Graduate Writing Intensive (GWI) course, EDSP 281, with a B grade or better.

Advancement to Candidacy forms are available online through the Office of Graduate Studies. The student should complete the form in consultation with the MAT Program Coordinator. The form must be submitted online with the Office of Graduate Studies for approval.

Culminating Experience Enrollment: Before enrolling in EDSP 500, the student must submit a reservation form for a Culminating Experience to the MAT Program Coordinator.

Continuous Enrollment in the Master's Degree: Enrollment in EDSP 500 for the culminating experience is for one semester. The expectation is that students will complete the culminating experience during EDSP 500. Up to three semesters of continuous enrollment (EDSP 599) are allowed if the Culminating Experience advisor deems a reasonable amount of progress has been made and assigns a grade of "RP" for EDSP 500. If students fail to make adequate progress while enrolled in EDSP 500 and there are no mitigating circumstances (e.g., illness), a grade of "no credit" is given, and the student must re-enroll in EDSP 500.

Bilingual Authorization (BA)
The BA is a specialized authorization that authorizes the credential holder to provide instruction in the primary language to candidates with limited English proficiency. This option is available concurrently for all program candidates with oral and written fluency as well as cultural/historical knowledge of the target group (currently approved languages include Spanish or Hmong; other languages are in the process of being approved). Candidates can complete additional requirements to add the Bilingual Authorization in Spanish or Hmong. For additional information on the BA option, contact the College of Education Equity Coordinator (https://www.csus.edu/college/education/student-support/equity-office.html) for an advising appointment to review your transcripts.

Master of Arts in Special Education Teaching (Extensive Support Needs)

Program Description

The MA in Special Education Teaching (Extensive Support Needs) blends a teaching credential program with a Master of Arts in Teaching. The MAT program focuses on inquiry-based education which includes hands-on instruction with problem-based learning and issue-centered curriculum and a focus on reflection during the teaching and research process. The program foundation rests in social justice and equity in education for all children and youth, including those with disabilities, and their families.

The Education Specialist Extensive Support Needs (ESN) Teaching Credential authorizes the holder to provide educational services to students with extensive support needs in Grades K-12, and up to the age of 21. This credential embeds the English Learner Authorization (ELA) and Autism Spectrum Disorder (ASD) Authorization, which prepare candidates to work with second language learners and students with autism spectrum disorder, respectively. Additionally, teacher candidates may choose to apply to be an intern during the course of their program.

The ESN Teaching Credential provides candidates with applied experiences through coursework which is competency based, connecting theory to practice. Teacher candidates have supervised field experiences every semester in which they work closely with mentor teachers to develop individualized program plans for students; conduct assessments and develop instructional plans; design modifications and adaptations for participation in the core curriculum; collaborate with general education teachers, and related service providers; and engage their students’ family members in the educational process. Placements are carefully planned in order to make sure candidates experience a wide range of student abilities and challenges as well as a range of age groups. The teacher preparation coursework focuses on preparing effective teachers for working with diverse student populations with an emphasis on preparing socially just teachers and leaders for systems change, committed to equity and inclusion in culturally and linguistically diverse schools and communities.

Upon completion of the ESN Teaching Credential coursework (71-76 units), program candidates may complete an additional sequence of three Master of Arts in Teaching (MAT) courses (15 units), if they want to complete the MAT after finishing the credential. Throughout the MAT program, candidates will learn how to critically examine evidence-based practices, policy issues, and current research on teaching and learning in the field of special education. Candidates will be expected to apply analytical skills to develop and implement standards-based curriculum in diverse settings using best instructional and inclusive practices that positively impact the learning of all students, including English Learners and children and youth with disabilities. Candidates also will conduct original teacher action research using practice-based methods in diverse educational settings. The materials and associated activities presented in the MAT coursework are highly integrated to support candidates with successful completion of the Master of Arts in Teaching degree at the end of the program.

Admission Requirements

The California Commission on Teacher Credentialing (CTC) establishes admissions requirements for all preliminary teaching credential programs and the CSU Chancellor’s Office further specifies admissions
requirements. The requirements listed below may be subject to change, based on actions of these two governing bodies. Interested applicants are encouraged to contact the Academic and Program Services Office in Eureka Hall 401, (916) 278-6639, an advisor in the Student Success Center (https://www.csus.edu/college/education/student-support/), or the MAT with Credential program website (https://www.csus.edu/college/education/teaching-credentials/apply.html) for the most current admissions requirements.

Program Admission Requirements

1. A Baccalaureate degree is required for admission to the MAT degree program.
2. Minimum of 45 hours of experience related to working with children or youth in a K-12 classroom or equivalent is recommended.
3. Submit two references: one from a person who has observed the applicant’s academic competence (current or former instructor) and the other from a person who has observed the applicant working with children or youth. **NOTE:** References from family members will not be accepted.
4. Submit a graduate writing sample.
5. Satisfy writing proficiency by meeting the Basic Skills Requirement.
6. Satisfy the Basic Skills Requirement. For more detailed information, visit the CTC website (https://www.ctc.ca.gov/credentials/leaflets/cl667.pdf). Example of ways to satisfy Basic Skills Competence include:
   a. Pass the California Basic Educational Skills Test (CBEST)
   b. Pass the CSET Multiple Subjects plus Writing Skills examination
   c. Pass the CSU Early Assessment Program (EAP) or the CSU Placement Examinations
   d. Achieve qualifying score on the SAT or ACT (see the CTC website (https://www.ctc.ca.gov/credentials/leaflets/basic-skills-requirement-(cl-667)/))
   e. Score a 3 or above on specific AP examinations (see the CTC website (https://www.ctc.ca.gov/credentials/leaflets/basic-skills-requirement-(cl-667)/))
   f. Earn a grade of "B-" or better in specific college or university courses as detailed on the CTC website (https://www.ctc.ca.gov/credentials/leaflets/basic-skills-requirement-(cl-667)/).
   g. Mix and Match as detailed on the CTC website (https://www.ctc.ca.gov/credentials/leaflets/basic-skills-requirement-(cl-667)/).
7. Satisfy the Subject Matter Competence requirement. For more detailed information, visit the CTC website. Examples of ways to demonstrate subject matter competence:
   a. Take and pass all subtests of any CSET examination (e.g. the Multiple Subject/Elementary California Subject Exam for Teachers-CSET),
   b. Complete a subject matter program,
   c. Complete an approved undergraduate major as detailed on the CTC website,
   d. Complete coursework with a grade of C- or better that meets the required subject matter domains as listed on the CTC website,
   e. Mix and Match as detailed on the CTC website (https://www.ctc.ca.gov/credentials/leaflets/basic-skills-requirement-(cl-667)/).
8. Grade Point Average (GPA) of at least 2.5 overall or 2.75 in last 60 semester or 90 quarter units as evidenced from official transcripts from every college/university attended.
9. Complete Credential Prerequisite Courses: EDUC 170, EDUC 100A, EDUC 100B. List of equivalent coursework is located on the Teaching Credentials website (https://www.csus.edu/college/education/teaching-credentials/apply.html).
10. Certificate of Clearance (COC) security clearance issued by the Commission on Teacher Credentialing: evidence of submitting the COC application and fingerprints must be submitted at application.
11. Participate in a Mandatory Interview.

Detailed descriptions of all admissions requirements are contained in the program’s application instructions, which are available on the Teaching Credentials Application website (https://www.csus.edu/college/education/teaching-credentials/apply.html).

Applications Required

CSU Graduate School Application for the University
Sacramento State graduating seniors, Sacramento State students completing a master’s degree or second bachelor’s degree, and applicants not currently attending Sacramento State MUST apply for admission to graduate school through the Office of Graduate Studies (OGS) by completing and submitting the CSU application on-line: Cal State Apply. (https://www2.calstate.edu/apply/)

Supplemental Application
A separate Supplemental Application is only required for current undergraduate Sacramento State students who are applying to take first semester program coursework while still classified as an undergraduate. The application link is posted on the Teaching Credential website in October of the year prior to admission.

Additional Information

Certificate of Clearance (COC/Fingerprint Clearance)
All applicants must submit verification of having been issued a security clearance by the Commission on Teacher Credentialing (CTC) before they will be allowed to officially start the credential program.

EXCEPTION – it is not necessary to apply for the Certificate of Clearance if you can verify you hold a valid California certificate or credential such as an emergency permit for substitute teaching, Pre-intern certificate, PPS credential, Child Development Associate or Supervisor Permit, Adult Vocational Education credential or a valid Multiple or Single Subject credential.

**NOTE:** If you answered "YES" to any of the Personal and Professional Fitness questions on the Certificate of Clearance application, you will need to obtain the official arrest record and court paperwork regarding each incident. Refer to the CTC website (https://www.ctc.ca.gov/educator-discipline/self-reporting.html) for instructions, forms, and where to submit all additional paperwork. If you have arrests and/or convictions on your record, once you submit the additional documentation to CTC, the processing of your clearance application can take SIX MONTHS or longer. This means you may not be eligible to start the program if your clearance is not issued before the program begins. If you have any questions, contact the CTC directly via email (credentials@ctc.ca.gov).

Verification of Bachelor’s Degree
All applicants must obtain a bachelor’s degree from a regionally accredited college/university in the United States in order to be eligible for a credential. Proof can be obtained through official transcripts and listed as “Degree(s) Awarded” with the date the degree was awarded. To find out if your college/university is regionally accredited by one of the accrediting agencies approved by the California Commission on Teacher
Foreign Transcript Evaluation
Individuals who have completed college or university course work at an institution in a country other than the United States must obtain a complete evaluation of foreign transcripts, degrees, and other relevant documents prior to applying for a teaching credential program. This evaluation is required by the California Commission on Teacher Credentialing (CTC). It is recommended that credential program applicants have their documents evaluated by WES (http://www.wes.org/students/), since both the University Office of Graduate Studies and the Commission will accept the WES (http://www.wes.org/students/) evaluation. Applicants should select the WES INTERNATIONAL CREDENTIAL ADVANTAGE PACKAGE (ICAP) Course by Course Evaluation. For additional information on foreign transcript evaluations please visit the CTC website (https://www.ctc.ca.gov/credentials/leaflets/cl635.pdf) and the Office of Graduate Studies website (https://www.csus.edu/graduate-studies/future-students/applicants-with-foreign-documents.html).

Verification of completing the United States Constitution Requirement
California Education Code, Section 44335, requires all candidates for Multiple Subject, Single Subject, and Education Specialist credentials to demonstrate knowledge of the United States Constitution by completing a college-level course with a "C" or equivalent grade or better, or pass a college-level examination in the subject, or verify AP exam credit for American History or American Government/Politics. While this is not a program admission requirement, this requirement must be completed before the credential can be granted at the end of the credential program. Most CSU graduates have met this requirement. More information can be found by contacting pre-credential advisors in the College of Education Student Success Center (https://www.csus.edu/college/education/student-support/).

Minimum Units and Grade Requirement for the MAT Degree
Units required for the MAT degree: 30
Minimum Cumulative GPA for the MAT degree: 3.0

Additional Information for All Admitted Program Candidates: MAT Degree

Advancement to Candidacy Procedures: Each student working toward a Master of Arts in Teaching degree must file an application for Advancement to Candidacy for the degree. The purpose of this application is to provide certification to the Office of Graduate Studies that the student will complete the necessary requirements and coursework for the Master's degree. The student must be advanced to candidacy the semester prior to enrolling in EDSP 500.

This procedure should begin as soon as the classified graduate student has:

- Completed 21 units in the graduate program with a minimum 3.0 GPA; and
- Met the Graduate Writing Requirement through completion of the Graduate Writing Intensive (GWI) course, EDSP 281, with a B grade or better.

Advancement to Candidacy forms are available online through the Office of Graduate Studies. The student should complete the form in consultation with the MAT in Special Education Program Coordinator. The form must be submitted online with the Office of Graduate Studies for approval.

Appeal Process: A student who has been formally admitted to the program has the right to appeal to the Credential Appeals Committee about any policy affecting program continuation, except for those policies set by the Commission on Teacher Credentialing or state education code. Appeals petitions and assistance are available in the Teaching Credentials Office.

Licensure
Admission into programs leading to licensure does not guarantee that students will obtain a license. Licensure requirements are set by agencies that are not controlled by or affiliated with the CSU and requirements can change at any time. For example, licensure requirements can include evidence of the right to work in the United States (e.g., social security number or tax payer identification number) or successfully passing a criminal background check. Students are responsible for determining whether they can meet licensure. The CSU will not refund tuition, fees, or any associated costs, to students who determine subsequent to admission that they cannot meet licensure requirements.
Culminating Experience Enrollment: Before enrolling in EDSP 500, the student must submit a reservation form for a Culminating Experience to the MASET Program Coordinator.

Continuous Enrollment in the Master’s Degree: Enrollment in EDSP 500 for the culminating experience is for one semester. The expectation is that students will complete the culminating experience during EDSP 500. Up to three semesters of continuous enrollment (EDSP 599) are allowed if the Culminating Experience advisor deems a reasonable amount of progress has been made and assigns a grade of "RP" for EDSP 500. If students fail to make adequate progress while enrolled in EDSP 500 and there are no mitigating circumstances (e.g., illness), a grade of "no credit" is given, and the student must re-enroll in EDSP 500.

Bilingual Authorization (BA)
The BA is a specialized authorization that authorizes the credential holder to provide instruction in the primary language to candidates with limited English proficiency. This option is available concurrently for all program candidates with oral and written fluency as well as cultural/historical knowledge of the target group (currently approved languages include Spanish or Hmong; other languages are in the process of being approved). Candidates can complete additional requirements to add the Bilingual Authorization in Spanish or Hmong. For additional information on the BA option, contact the College of Education Equity Coordinator (https://www.csus.edu/college/education/student-support/equity-office.html) for an advising appointment to review your transcripts.

Master of Arts in Special Education Teaching (Extensive Support Needs) with Multiple Subject

Program Description

The MA in Special Education Teaching (Extensive Support Needs) with Multiple Subjects blends a teaching credential program with a Master of Arts in Teaching. The MAT program focuses on inquiry-based education which includes hands-on instruction with problem-based learning and issues-centered curriculum and a focus on reflection during the teaching
and research process. The program foundation rests in social justice and equity in education for all children and youth, including those with disabilities, and their families.

The Education Specialist Extensive Support Needs Teaching Credential authorizes the holder to provide educational services to students with extensive support needs in Grades K-12, and up to the age of 21. This credential embeds the English Learner Authorization (ELA) and Autism Spectrum Disorder (ASD) Authorization, which prepare candidates to work with second language learners and students with autism spectrum disorder, respectively. Additionally, teacher candidates may choose to apply to be an intern during the course of their program. The Multiple Subjects teaching credential authorizes the holder to teach all subjects in a self-contained classroom, such as the classrooms in most elementary schools.

The ESN Teaching Credential provides candidates with applied experiences through coursework which is competency based, connecting theory to practice. Teacher candidates have supervised field experiences every semester in which they work closely with mentor teachers to develop individualized program plans for students; conduct assessments and develop instructional plans; design modifications and adaptations for participation in the core curriculum; collaborate with general education teachers, and related service providers; and engage their students’ family members in the educational process. Placements are carefully planned in order to make sure candidates experience a wide range of student abilities and challenges as well as a range of age groups. The teacher preparation coursework focuses on preparing effective teachers for working with diverse student populations with an emphasis on preparing socially just teachers and leaders for systems change, committed to equity and inclusion in culturally and linguistically diverse schools and communities.

Upon completion of the Extensive Support Needs and Multiple Subjects Credential coursework, program candidates may complete an additional sequence of four Master of Arts in Teaching (MAT) courses (with thesis) for a total of 15 units, if they desire to complete the MAT after finishing both credentials. Throughout the MAT program, candidates will learn how to critically examine evidence-based practices, policy issues, and current research on teaching and learning in the field of special education. Candidates will be expected to apply analytical skills to develop and implement standards-based curriculum in diverse settings using best instructional and inclusive practices that positively impact the learning of all students, including English Learners and children and youth with disabilities. Candidates also will conduct original teacher action research using practice-based methods in diverse educational settings. The materials and associated activities presented in the MAT coursework are highly integrated to support candidates with successful completion of the Master of Arts in Teaching degree at the end of the program.

Admission Requirements

The California Commission on Teacher Credentialing (CTC) establishes admissions requirements for all preliminary teaching credential programs and the CSU Chancellor’s Office further specifies admissions requirements. The requirements listed below may be subject to change, based on actions of these two governing bodies. Interested applicants are encouraged to contact the Academic and Program Services Office in Eureka Hall 401, (916) 278-6639, or an advisor in the Student Success Center (https://www.csus.edu/college/education/student-support/), for the most current admissions requirements.

Program Admission Requirements

1. A Baccalaureate degree is required for admission to the MAT.
2. Minimum of 45 hours of experience related to working with children or youth in a K-12 classroom or equivalent is recommended.
3. Submit two references: one from a person who has observed the applicant’s academic competence (current or former instructor) and the other from a person who has observed the applicant working with children or youth. NOTE: References from family members will not be accepted.
4. Submit a graduate writing sample.
5. Satisfy writing proficiency by meeting the Basic Skills Requirement.
6. Satisfy the Basic Skills Requirement. For more detailed information, visit the CTC website (https://www.ctc.ca.gov/credentials/leaflets/cl667.pdf). Example of ways to satisfy Basic Skills Competence include:
   a. Pass the California Basic Educational Skills Test (CBEST)
   b. Pass the CSET Multiple Subjects plus Writing Skills examination
   c. Pass the CSU Early Assessment Program (EAP) or the CSU Placement Examinations
   d. Achieve qualifying score on the SAT or ACT (see the CTC website (https://www.ctc.ca.gov/credentials/leaflets/basic-skills-requirement-(cl-667)/))
   e. Score a 3 or above on specific AP examinations (see the CTC website (https://www.ctc.ca.gov/credentials/leaflets/basic-skills-requirement-(cl-667)/))
   f. Earn a grade of "B" or better in specific college or university courses as detailed on the CTC website (https://www.ctc.ca.gov/credentials/leaflets/basic-skills-requirement-(cl-667)/)
   g. Mix and Match as detailed on the CTC website (https://www.ctc.ca.gov/credentials/leaflets/basic-skills-requirement-(cl-667)/)
7. Satisfy the Subject Matter Competence requirement for a Multiple Subjects teacher. For more detailed information, visit the CTC website. Examples of ways to demonstrate subject matter competence:
   a. Take and pass all subtests of any CSET examination (e.g. the Multiple Subject/Elementary California Subject Exam for Teachers-CSET),
   b. Complete a subject matter program,
   c. Complete an approved undergraduate major as detailed on the CTC website,
   d. Complete coursework with a grade of C- or better that meets the required subject matter domains as listed on the CTC website,
   e. Mix and Match as detailed on the CTC website (https://www.ctc.ca.gov/credentials/leaflets/basic-skills-requirement-(cl-667)/)
8. Grade Point Average (GPA) of at least 2.5 overall or 2.75 in last 60 semester or 90 quarter units as evidenced from official transcripts from every college/university attended.
10. Certificate of Clearance (COC) security clearance issued by the Commission on Teacher Credentialing: evidence of submitting the COC application and fingerprints must be submitted at application.

11. Participate in the Mandatory Interview.

Detailed descriptions of all admissions requirements are contained in the program’s application instructions, which are available on the Teaching Credentials Application website (https://www.csus.edu/college/education/teaching-credentials/apply.html).

Applications Required

CSU Graduate School Application for the University
Sacramento State graduating seniors, Sacramento State students completing a master's degree or second bachelor's degree, and applicants not currently attending Sacramento State MUST apply for admission to graduate school through the Office of Graduate Studies (OGS) by completing and submitting the CSU application on-line: Cal State Apply. (https://www2.calstate.edu/apply/)

Supplemental Application
A separate Supplemental Application is only required for current undergraduate Sacramento State students who are applying to take first semester program coursework while still classified as an undergraduate. The Supplemental Application link is posted on the Teaching Credential website in October of the year prior to admission.

Additional Information

Certificate of Clearance (COC/Fingerprint Clearance)
All applicants must submit verification of having been issued a security clearance by the Commission on Teacher Credentialing (CTC) before they will be allowed to officially start the credential program.

EXCEPTION – it is not necessary to apply for the Certificate of Clearance if you can verify you hold a valid California certificate or credential such as an emergency permit for substitute teaching, Pre-intern certificate, PPS credential, Child Development Associate or Supervisor Permit, Adult Vocational Education credential or a valid Multiple or Single Subject credential.

NOTE: If you answered “YES” to any of the Personal and Professional Fitness questions on the Certificate of Clearance application, you will need to obtain the official arrest record and court paperwork regarding each incident. Refer to the CTC website (https://www.ctc.ca.gov/educator-discipline/self-reporting.html) for instructions, forms, and where to submit all additional paperwork. If you have arrests and/or convictions on your record, once you submit the additional documentation to CTC, the processing of your clearance application can take SIX MONTHS or longer. This means you may not be eligible to start the program if your clearance is not issued before the program begins. If you have any questions, contact the CTC directly via email (credentials@ctc.ca.gov).

Verification of Bachelor’s Degree
All applicants must obtain a bachelor’s degree from a regionally accredited college/university in the United States in order to be eligible for a credential. Proof can be obtained through official transcripts and listed as “Degree(s) Awarded” with the date the degree was awarded. To find out if your college/university is regionally accredited by one of the accrediting agencies approved by the California Commission on Teacher Credentialing (CTC), visit the CTC website (https://www.ctc.ca.gov/credentials/accreditation-bodies.html).

Foreign Transcript Evaluation
Individuals who have completed college or university course work at an institution in a country other than the United States must obtain a complete evaluation of foreign transcripts, degrees, and other relevant documents prior to applying for a teaching credential program. This evaluation is required by the California Commission on Teacher Credentialing (CTC). It is recommended that credential program applicants have their documents evaluated by WES (http://www.wes.org/students/), since both the University Office of Graduate Studies and the Commission will accept the WES (http://www.wes.org/students/) evaluation. Applicants should select the WES INTERNATIONAL CREDENTIAL ADVANTAGE PACKAGE (ICAP) Course by Course Evaluation. For additional information on foreign transcript evaluations please visit the CTC website (https://www.ctc.ca.gov/credentials/leaflets/cl635.pdf) and the Office of Graduate Studies website (https://www.csus.edu/graduate-studies/future-students/applicants-with-foreign-documents.html).

Verification of completing the United States Constitution Requirement
California Education Code, Section 44335, requires all candidates for Multiple Subject, Single Subject, and Education Specialist credentials to demonstrate knowledge of the United States Constitution by completing a college-level course with a “C” or equivalent grade or better, or pass a college-level examination in the subject, or verify AP exam credit for American History or American Government/Politics. While this is not a program admission requirement, this requirement must be completed before the credential can be granted at the end of the credential program. Most CSU graduates have met this requirement. More information can be found by contacting pre-credential advisors in the College of Education Student Success Center (https://www.csus.edu/college/education/student-support/).

Additional Information for All Admitted Program Candidates: Credential Coursework

Continued Enrollment: Continued enrollment in the MA in Teaching with Education Specialist Extensive Support Needs with Multiple Subject Teaching Credential Program is contingent upon candidates maintaining a GPA of 3.0 in all professional education courses. If incomplete grades or grades of "D", "F", and "NC" (No Credit) are received in professional education courses, the candidate must withdraw from the program unless a specific exception has been approved by the Credential Appeals Committee. Any student on academic probation is subject to automatic disqualification unless approved by the Credential Appeals Committee to continue.

Grade Requirement for the ESN Credential: Any grade below C- in a required credential course must be retaken in order to meet credential requirements.

Physical Education Methods Requirement: Before earning the Multiple Subject Credential, candidates must complete KINS 172 or the equivalent workshop.

Delays: Candidates who have to delay progress in the MA in Teaching with Education Specialist Extensive Support Needs with Multiple Subject Teaching Credential Program will file a “Program Delay Petition” in the Teaching Credentials Office. A student returning after a delay may be accommodated on a space available basis. Candidates must return and complete the program within the seven-year limit for graduate programs.
Appeal Process: A student who has been formally admitted to the program has the right to appeal to the Credential Appeals Committee about any policy affecting program continuation, except for those policies set by the Commission on Teacher Credentialing or state education code. Appeals petitions and assistance are available in the Teaching Credentials Office.

Licensure
Admission into programs leading to licensure does not guarantee that students will obtain a license. Licensure requirements are set by agencies that are not controlled by or affiliated with the CSU and requirements can change at any time. For example, licensure requirements can include evidence of the right to work in the United States (e.g., social security number or tax payer identification number) or successfully passing a criminal background check. Students are responsible for determining whether they can meet licensure. The CSU will not refund tuition, fees, or any associated costs, to students who determine subsequent to admission that they cannot meet licensure requirements.

Additional Information for All Admitted Program Candidates: MAT Degree

Grade Requirement for the Master’s Degree: Courses required for the Master of Arts in Teaching degree require a grade of B- or better in order to be used to satisfy the requirements of the Master’s degree. If a student receives below a B- in any course required for the Master’s degree, the course must be successfully repeated with a grade of B- or better in order to satisfy the requirements of the degree program (grades of C- or better will satisfy the requirements for the teaching credential).

Delays: Candidates who have to delay progress in the MA in Teaching with Education Specialist Extensive Support Needs with Multiple Subject Teaching Credential Program will file a "Program Delay Petition" in the Teaching Credentials Office. A student returning after a delay may be accommodated on a space available basis. Candidates must return and complete the program within the seven-year limit for graduate programs.

Advancement to Candidacy Procedures: Each student working toward a Master of Arts in Teaching degree must file an application for Advancement to Candidacy for the degree. The purpose of this application is to provide certification to the Office of Graduate Studies that the student will complete the necessary requirements and coursework for the Master's degree. The student must be advanced to candidacy the semester prior to enrolling in EDSP 500.

This procedure should begin as soon as the classified graduate student has:

- Completed 21 units in the graduate program with a minimum 3.0 GPA; and
- Met the Graduate Writing Requirement through completion of the Graduate Writing Intensive (GWI) course, EDSP 281, with a B grade or better.

Advancement to Candidacy forms are available online through the Office of Graduate Studies. The student should complete the form in consultation with the MAT Program Coordinator. The form must be submitted online with the Office of Graduate Studies for approval.

Culminating Experience Enrollment: Before enrolling in EDSP 500, the student must submit a reservation form for a Culminating Experience to the MAT Program Coordinator.

Continuous Enrollment in the Master's Degree: Enrollment in EDSP 500 for the culminating experience is for one semester. The expectation is that students will complete the culminating experience during EDSP 500. Up to three semesters of continuous enrollment (EDSP 599) are allowed if the Culminating Experience advisor deems a reasonable amount of progress has been made and assigns a grade of "RP" for EDSP 500. If students fail to make adequate progress while enrolled in EDSP 500 and there are no mitigating circumstances (e.g., illness), a grade of "no credit" is given, and the student must re-enroll in EDSP 500.

Bilingual Authorization (BA)
The BA is a specialized authorization that authorizes the credential holder to provide instruction in the primary language to candidates with limited English proficiency. This option is available concurrently for all program candidates with oral and written fluency as well as cultural/historical knowledge of the target group (currently approved languages include Spanish or Hmong; other languages are in the process of being approved). Candidates can complete additional requirements to add the Bilingual Authorization in Spanish or Hmong. For additional information on the BA option, contact the College of Education Equity Coordinator (https://www.csus.edu/college/education/student-support/equity-office.html) for an advising appointment to review your transcripts.

Master of Arts in Special Education Teaching (Mild to Moderate Support Needs)

Program Description

The MA in Teaching (Education Specialist Mild to Moderate Support Needs Credential) blends a teaching credential program with a Master of Arts in Teaching. The MAT program focus is based on teacher candidates becoming leaders for systems change, committed to inclusive practices, social justice, advocacy, collaboration, and evidence-based practices with a focus on reflection during the teaching and research process.

The Education Specialist Mild to Moderate Support Needs Teaching Credential authorizes the holder to provide educational services to students with support needs in Grades K-12, and up to the age of 21. This credential embeds the English Learner Authorization (ELA) and Autism Spectrum Disorder (ASD) Authorization, which prepares candidates to work with second language learners and students with autism spectrum disorder, respectively. Additionally, teacher candidates may choose to apply to be an intern during the course of their program.

The MMSN Teaching Credential provides candidates with focused, rigorous coursework and structured, supervised field experiences throughout the program. Candidates acquire the knowledge, skills, and dispositions that will equip them to work within the continuum of service delivery models, including resource specialist setting, special day classrooms, inclusive general education classrooms, charter schools, and non-public school sites.

The collaborative relationship with school districts provides our program the opportunity to place candidates completing their fieldwork in different classroom settings, with various grade/age levels, allowing the candidates multiple opportunities to work with all students including culturally and linguistically diverse students with a wide range of abilities and challenges.

Upon completion of the MMSN Teaching Credential coursework (50-52 units), program candidates may complete an additional sequence of four master’s courses (15 additional units). Throughout the MAT program, candidates will learn how to critically examine evidence-based practices, policy issues, and current research on teaching and learning in the field of special education. Candidates will be expected to apply analytical skills to develop and implement standards-based curriculum in diverse settings using best instructional and inclusive practices that positively impact the learning of all students, including English Learners and children and youth with disabilities. Candidates also will conduct original teacher action research using practice-based methods in diverse educational settings. The materials and associated activities presented in the MAT coursework are highly integrated to support candidates with successful completion of the Master of Arts in Teaching degree at the end of the program.

Admission Requirements

The California Commission on Teacher Credentialing (CTC) establishes admissions requirements for all preliminary teaching credential programs and the CSU Chancellor’s Office further specifies admissions
requirements. The requirements listed below may be subject to change, based on actions of these two governing bodies. Interested applicants are encouraged to contact the Academic and Program Services Office in Eureka Hall 401, (916) 278-6639, an advisor in the Student Success Center (https://www.csus.edu/college/education/student-support/), or the MAT with Credential program website (https://www.csus.edu/college/education/teaching-credentials/apply.html) for the most current admissions requirements.

Program Admission Requirements

1. A Baccalaureate degree is required for admission to the MAT.
2. Minimum of 45 hours of experience working with children or youth in a preK-12 classroom or equivalent is recommended.
3. Submit two references: one from a person who has observed the applicant’s academic competence (current or former instructor) and the other from a person who has observed the applicant working with children or youth. NOTE: References from family members will not be accepted.
4. Submit a graduate writing sample.
5. Satisfy writing proficiency by meeting the Basic Skills Requirement.
6. Satisfy the Basic Skills Requirement. For more detailed information, visit the CTC website (https://www.ctc.ca.gov/credentials/leaflets/cl667.pdf). Example of ways to satisfy Basic Skills Competence include:
   a. Pass the California Basic Educational Skills Test (CBEST)
   b. Pass the CSET Multiple Subjects plus Writing Skills examination
   c. Pass the CSU Early Assessment Program (EAP) or the CSU Placement Examinations
   d. Achieve qualifying score on the SAT or ACT (see the CTC website (https://www.ctc.ca.gov/credentials/leaflets/basic-skills-requirement-cl667/))
   e. Score a 3 or above on specific AP examinations (see the CTC website (https://www.ctc.ca.gov/credentials/leaflets/basic-skills-requirement-cl667/))
   f. Earn a grade of "B" or better in specific college or university courses as detailed on the CTC website (https://www.ctc.ca.gov/credentials/leaflets/basic-skills-requirement-cl667/)
   g. Mix and Match as detailed on the CTC website (https://www.ctc.ca.gov/credentials/leaflets/basic-skills-requirement-cl667/).
7. Satisfy the Subject Matter Competence requirement. For more detailed information, visit the CTC website. Examples of ways to demonstrate subject matter competence:
   a. Take and pass all subtests of any CSET examination (e.g. the Multiple Subject/Elementary California Subject Exam for Teachers-CSET)
   b. Complete a subject matter program,
   c. Complete an approved undergraduate major as detailed on the CTC website,
   d. Complete coursework with a grade of C- or better that meets the required subject matter domains as listed on the CTC website,
   e. Mix and Match as detailed on the CTC website (https://www.ctc.ca.gov/credentials/leaflets/basic-skills-requirement-cl667/).
8. Grade Point Average (GPA) of at least 2.5 overall or 2.75 in last 60 semester or 90 quarter units as evidenced from official transcripts from every college/university attended.
9. Complete Credential Prerequisite Courses: EDUC 170, EDUC 100A, EDUC 100B, and PUBH 136. List of equivalent coursework is located on the Teaching Credentials website (https://www.csus.edu/college/education/teaching-credentials/apply.html).
10. Certificate of Clearance (COC) security clearance issued by the Commission on Teacher Credentialing: evidence of submitting the COC application and fingerprints must be submitted at application.
11. Participate in a Mandatory Interview.

Detailed descriptions of all admissions requirements are contained in the program’s application instructions, which are available on the Teaching Credentials Application website (https://www.csus.edu/college/education/teaching-credentials/apply.html).

Applications Required

CSU Graduate School Application for the University
Sacramento State graduating seniors, Sacramento State students completing a master’s degree or second bachelor’s degree, and applicants not currently attending Sacramento State MUST apply for admission to graduate school through the Office of Graduate Studies (OGS) by completing and submitting the CSU application on-line: Cal State Apply. (https://www2.calstate.edu/apply/)

Supplemental Application
A separate Supplemental Application is only required for current undergraduate Sacramento State students who are applying to take first semester program coursework while still classified as an undergraduate. Complete supplemental applications and all supporting documents must be submitted to Teaching Credentials by February 1. The link is posted on the Teaching Credential website in October of the year prior to admission.

Additional Information

Certificate of Clearance (COC/Fingerprint Clearance)
All applicants must submit verification of having been issued a security clearance by the Commission on Teacher Credentialing (CTC) before they will be allowed to officially start the credential program.

EXCEPTION – it is not necessary to apply for the Certificate of Clearance if you can verify you hold a valid California certificate or credential such as an emergency permit for substitute teaching, Pre-intern certificate, PPS credential, Child Development Associate or Supervisor Permit, Adult Vocational Education credential or a valid Multiple or Single Subject credential.

NOTE: If you answered "YES" to any of the Personal and Professional Fitness questions on the Certificate of Clearance application, you will need to obtain the official arrest record and court paperwork regarding each incident. Refer to the CTC website (https://www.ctc.ca.gov/educator-discipline/self-reporting.html) for instructions, forms, and where to submit all additional paperwork. If you have arrests and/or convictions on your record, once you submit the additional documentation to CTC,
the processing of your clearance application can take SIX MONTHS or longer. This means you may not be eligible to start the program if your clearance is not issued before the program begins. If you have any questions, contact the CTC directly via email (credentials@ctc.ca.gov).

Verification of Bachelor's Degree
All applicants must obtain a bachelor's degree from a regionally accredited college/university in the United States in order to be eligible for a credential. Proof can be obtained through official transcripts and listed as "Degree(s) Awarded" with the degree date was awarded. To find out if your college/university is regionally accredited by one of the accrediting agencies approved by the California Commission on Teacher Credentialing (CTC), visit the CTC website (https://www.ctc.ca.gov/credentials/accreditation-bodies.html).

Foreign Transcript Evaluation
Individuals who have completed college or university course work at an institution in a country other than the United States must obtain a complete evaluation of foreign transcripts, degrees, and other relevant documents prior to applying for the program. This evaluation is required by the California Commission on Teacher Credentialing (CTC) and the university. It is recommended that credential program applicants have their documents evaluated by WES (http://www.wes.org/students/), since both the University Office of Graduate Studies and the Commission will accept the WES (http://www.wes.org/students/) evaluation. Applicants should select the WES INTERNATIONAL CREDENTIAL ADVANTAGE PACKAGE (ICAP) Course by Course Evaluation. For additional information on foreign transcript evaluations please visit the CTC website (https://www.ctc.ca.gov/credentials/leaflets/cl635.pdf) and the Office of Graduate Studies website (https://www.csus.edu/graduate-studies/future-students/applicants-with-foreign-documents.html).

Verification of completing the United States Constitution Requirement
California Education Code, Section 44335, requires all candidates for Multiple Subject, Single Subject, and Education Specialist credentials to demonstrate knowledge of the United States Constitution by completing a college-level course with a "C" or equivalent grade or better, or pass a college-level examination in the subject, or verify AP exam credit for American History or American Government/Politics. While this is not a program admission requirement, this requirement must be completed before the credential can be granted at the end of the credential program. Most CSU graduates have met this requirement. More information can be found by contacting pre-credential advisors in the College of Education Student Success Center (https://www.csus.edu/college/education/student-support/).

Minimum Units and Grade Requirement for the MAT Degree
Units required for the MAT degree: 30

Minimum Cumulative GPA for the MAT degree: 3.0

Additional Information for All Admitted Program Candidates: Credential Coursework
Continued Enrollment: Continued enrollment in the Master of Arts in Teaching with Education Specialist Mild to Moderate Support Needs Teaching Credential Program is contingent upon candidates maintaining a GPA of 3.0 in all professional education courses. If incomplete grades or grades of "D", "F", and "NC" (No Credit) are received in professional education courses, the candidate must withdraw from the program unless a specific exception has been approved by the Credential Appeals Committee. Any student on academic probation is subject to automatic disqualification unless approved by the Credential Appeals Committee to continue.

Grade Requirement for the Mild to Moderate Support Needs Credential: Any grade below C- in a course that meets a credential requirement must be retaken in order to meet credential requirements.

Delays: Candidates who have to delay progress in the Master of Arts in Teaching with Education Specialist Mild to Moderate Support Needs Teaching Credential Program will file a "Program Delay Petition" in the Teaching Credentials Office. A student returning after a delay may be accommodated on a space available basis. Candidates must return and complete the program within the seven-year limit for graduate programs.

Appeal Process: A student who has been formally admitted to the program has the right to appeal to the Credential Appeals Committee about any policy affecting program continuation, except for those policies set by the Commission on Teacher Credentialing or state education code. Appeals petitions and assistance are available in the Teaching Credentials Office.

Licensure
Admission into programs leading to licensure does not guarantee that students will obtain a license. Licensure requirements are set by agencies that are not controlled by or affiliated with the CSU and requirements can change at any time. For example, licensure requirements can include evidence of the right to work in the United States (e.g., social security number or tax payer identification number) or successfully passing a criminal background check. Students are responsible for determining whether they can meet licensure. The CSU will not refund tuition, fees, or any associated costs, to students who determine subsequent to admission that they cannot meet licensure requirements.

Additional Information for All Admitted Program Candidates: MAT Degree
Grade Requirement for the Master's Degree: Courses required for the Master of Arts in Teaching degree require a grade of B- or better in order to be used to satisfy the requirements of the Master's degree. If a student receives below a B- in any course required for the Master's degree, the course must be successfully repeated with a grade of B- or better in order to satisfy the requirements of the degree program (grades of C- or better will satisfy the requirements for the teaching credential).

Delays: Candidates who have to delay progress in the Master of Arts in Teaching program will file a "Program Delay Petition" in the Teaching Credentials Office. A student returning after a delay may be accommodated on a space available basis. Candidates must return and complete the program within the seven-year limit for graduate programs.

Advancement to Candidacy Procedures: Each student working toward a Master of Arts in Teaching degree must file an application for Advancement to Candidacy for the degree. The purpose of this application is to provide certification to the Office of Graduate Studies that the student will complete the necessary requirements and coursework for the Master's degree. The student must be advanced to candidacy the semester prior to enrolling in EDSP 500.

This procedure should begin as soon as the classified graduate student has:
Bilingual Authorization (BA)

The BA is a specialized authorization that authorizes the credential holder to provide instruction in the primary language to candidates with limited English proficiency. This option is available concurrently for all program candidates with oral and written fluency as well as cultural/historical knowledge of the target group (currently approved languages include Spanish or Hmong; other languages are in the process of being approved). Candidates can complete additional requirements to add the Bilingual Authorization in Spanish or Hmong. For additional information on the BA option, contact the College of Education Equity Coordinator (https://www.csus.edu/college/education/student-support/equity-office.html) for an advising appointment to review your transcripts.

Master of Arts in Special Education Teaching (Mild to Moderate Support Needs) with Multiple Subject

Program Description

Master of Arts in Teaching with Preliminary Education Specialist Mild to Moderate Support Needs Teaching Credential (Multiple Subject)

The MA in Teaching with Education Specialist Mild to Moderate Teaching Credential with Multiple Subject Teaching Credential program blends a teacher preparation program (with both the Mild to Moderate Support Needs Special Education Teaching Credential and the Multiple Subject Teaching Credential) with a Master of Arts in Teaching (MAT). The MAT program focus is on teacher candidates becoming leaders for systems change, committed to inclusive practices, social justice, advocacy, collaboration, and evidence-based practices with a focus on reflection during the teaching and research process.

The Education Specialist Mild to Moderate Support Needs Teaching Credential authorizes the holder to provide educational services to students with support needs in Grades K-12, and up to the age of 21. This credential embeds the English Learner Authorization (ELA) and Autism Spectrum Disorder (ASD) Authorization, which prepares candidates to work with second language learners and students with autism spectrum
disorder, respectively. Additionally, teacher candidates may choose to apply to be an intern during the course of their program. The Multiple Subject Teaching Credential authorizes the holder to teach all subjects in a self-contained classroom, such as the classrooms in most elementary schools.

The MMSN Teaching Credential provides candidates with focused, rigorous coursework and structured, supervised field experiences throughout the program. Candidates acquire the knowledge, skills, and dispositions that will equip them to work within the continuum of service delivery models, including resource specialist setting, special day classrooms, inclusive general education classrooms, charter schools, and non-public school sites.

The collaborative relationship with school districts provides our program the opportunity to place candidates completing their fieldwork in different classroom settings, with various grade/age levels, allowing the candidates multiple opportunities to work with all students including culturally and linguistically diverse students with a wide range of abilities and challenges.

Upon completion of the MMSN and Multiple Subject Teaching Credential coursework, program candidates may complete an additional sequence of four master's courses for a total of 15 additional units, if they want to complete the MAT after finishing the credentials. Throughout the MAT program, candidates will learn how to critically examine evidence-based practices, policy issues, and current research on teaching and learning in the field of special education. Candidates will be expected to apply analytical skills to develop and implement standards-based curriculum in diverse settings using best instructional and inclusive practices that positively impact the learning of all students, including English Learners and children and youth with disabilities. Candidates also will conduct original teacher action research using practice-based methods in diverse educational settings. The materials and associated activities presented in the MAT coursework are highly integrated to support candidates with successful completion of the Master of Arts in Teaching degree at the end of the program.

The California Commission on Teacher Credentialing (CTC) establishes admissions requirements for all preliminary teaching credential programs and the CSU Chancellor’s Office further specifies admissions requirements. The requirements listed below may be subject to change, based on actions of these two governing bodies. Interested applicants are encouraged to contact the Academic and Program Services Office in Eureka Hall 401, (916) 278-6639, an advisor in the Student Success Center (https://www.csus.edu/college/education/student-support/), or the MAT with Credential program website (https://www.csus.edu/college/education/teaching-credentials/apply.html) for the most current admissions requirements.

**Program Admission Requirements**

1. A Baccalaureate degree is required for admission to the MAT.

2. Minimum of 45 hours of experience working with children or youth in a preK-12 classroom or equivalent is recommended.

3. Submit two references: one from a person who has observed the applicant’s academic competence (current or former instructor) and the other from a person who has observed the applicant working with children or youth. **NOTE:** References from family members will not be accepted.

4. Submit a graduate writing sample.

5. Satisfy writing proficiency by meeting the Basic Skills Requirement.

6. Satisfy the Basic Skills Requirement. For more detailed information, visit the CTC website (https://www.ctc.ca.gov/). Example of ways to satisfy Basic Skills Competence include:
   a. Pass the California Basic Educational Skills Test (CBEST)
   b. Pass the CSET Multiple Subjects plus Writing Skills examination
   c. Pass the CSU Early Assessment Program (EAP) or the CSU Placement Examinations
   d. Achieve qualifying score on the SAT or ACT (see the CTC website (https://www.ctc.ca.gov/))
   e. Score a 3 or above on specific AP examinations (see the CTC website (https://www.ctc.ca.gov/))
   f. Earn a grade of "B-" or better in specific college or university courses as detailed on the CTC website (https://www.ctc.ca.gov/).
   g. Mix and Match as detailed on the CTC website (https://www.ctc.ca.gov/).

7. Satisfy the Subject Matter Competence Requirement. For more detailed information, visit the CTC website (https://www.ctc.ca.gov/). Examples of ways to demonstrate subject matter competence:
   a. Take and pass all subtests of any CSET examination (e.g. the Multiple Subject/Elementary California Subject Exam for Teachers-CSET),
   b. Complete a subject matter program,
   c. Complete an approved undergraduate major as detailed on the CTC website,
   d. Complete coursework with a grade of C- or better that meets the required subject matter domains as listed on the CTC website,
   e. Mix and Match as detailed on the CTC website (https://www.ctc.ca.gov/).

8. Grade Point Average (GPA) of at least 2.5 overall or 2.75 in last 60 semester or 90 quarter units as evidenced from official transcripts from every college/university attended.

9. Complete Credential Prerequisite Courses: EDUC 170, EDUC 100A, EDUC 100B, and PUBH 136. List of equivalent coursework is located on the Teaching Credentials website (https://www.csus.edu/college/education/teaching-credentials/apply.html).

10. Certificate of Clearance (COC) security clearance issued by the Commission on Teacher Credentialing; evidence of submitting the COC application and fingerprints must be submitted at application.

11. Participate in a Mandatory Interview.

Detailed descriptions of all admissions requirements are contained in the program's application instructions, which are available on the Teaching Credentials Application website (https://www.ctc.ca.gov/).
Applications Required
CSU Graduate School Application for the University
Sacramento State graduating seniors, Sacramento State students completing a master’s degree or second bachelor’s degree, and applicants not currently attending Sacramento State MUST apply for admission to graduate school through the Office of Graduate Studies (OGS) by completing and submitting the CSU application on-line: Cal State Apply. (https://www2.calstate.edu/apply/)

Supplemental Application
A separate Supplemental Application is only required for current undergraduate Sacramento State students who are applying to take first semester program coursework while still classified as an undergraduate. Complete supplemental applications and all supporting documents must be submitted to Teaching Credentials by February 1. The link is posted on the Teaching Credential website in October of the year prior to admission.

Additional Information
Certificate of Clearance (COC/Fingerprint Clearance)
All applicants must submit verification of having been issued a security clearance by the Commission on Teacher Credentialing (CTC) before they will be allowed to officially start the credential program.

EXCEPTION — it is not necessary to apply for the Certificate of Clearance if you can verify you hold a valid California certificate or credential such as an emergency permit for substitute teaching, Pre-intern certificate, PPS credential, Child Development Associate or Supervisor Permit, Adult Vocational Education credential or a valid Multiple or Single Subject credential.

NOTE: If you answered “YES” to any of the Personal and Professional Fitness questions on the Certificate of Clearance application, you will need to obtain the official arrest record and court paperwork regarding each incident. Refer to the CTC website (https://www.ctc.ca.gov/) for instructions, forms, and where to submit all additional paperwork. If you have arrests and/or convictions on your record, once you submit the additional documentation to CTC, the processing of your clearance application can take SIX MONTHS or longer. This means you may not be eligible to start the program if your clearance is not issued before the program begins. If you have any questions, contact the CTC directly via email (credentials@ctc.ca.gov).

Verification of Bachelor’s Degree
All applicants must obtain a bachelor’s degree from a regionally accredited college/university in the United States in order to be eligible for a credential. Proof can be obtained through official transcripts and listed as “Degree(s) Awarded” with the date the degree was awarded. To find out if your college/university is regionally accredited by one of the accrediting agencies approved by the California Commission on Teacher Credentialing (CTC), visit the CTC website (https://www.ctc.ca.gov/).

Foreign Transcript Evaluation
Individuals who have completed college or university course work at an institution in a country other than the United States must obtain a complete evaluation of foreign transcripts, degrees, and other relevant documents prior to applying for the program. This evaluation is required by the California Commission on Teacher Credentialing (CTC) and the university. It is recommended that credential program applicants have their documents evaluated by WES (http://www.wes.org/students/), since both the University Office of Graduate Studies and the Commission will accept the WES (http://www.wes.org/students/) evaluation. Applicants should select the WES INTERNATIONAL CREDENTIAL ADVANTAGE PACKAGE (ICAP) Course by Course Evaluation. For additional information on foreign transcript evaluations please visit the CTC website (https://www.ctc.ca.gov/) and the Office of Graduate Studies website (https://www.csus.edu/graduate-studies/future-students/applicants-with-foreign-documents.html).

Verification of completing the United States Constitution Requirement
California Education Code, Section 44335, requires all candidates for Multiple Subject, Single Subject, and Education Specialist credentials to demonstrate knowledge of the United States Constitution by completing a college-level course with a “C” or equivalent grade or better, or pass a college-level examination in the subject, or verify AP exam credit for American History or American Government/Politics. While this is not a program admission requirement, this requirement must be completed before the credential can be granted at the end of the credential program. Most CSU graduates have met this requirement. More information can be found by contacting pre-credential advisors in the College of Education Student Success Center (https://www.csus.edu/college/education/student-support/).

Minimum Units and Grade Requirement for the MAT Degree
Units required for the MAT degree: 30
Minimum Cumulative GPA for the MAT degree: 3.0

Additional Information for All Admitted Program Candidates: Credential Coursework
Continued Enrollment: Continued enrollment in the Master of Arts in Teaching with Education Specialist Mild to Moderate Support Needs Teaching Credential Program (Multiple Subject) is contingent upon candidates maintaining a GPA of 3.0 in all professional education courses. If incomplete grades or grades of "D", "F", and "NC" (No Credit) are received in professional education courses, the candidate must withdraw from the program unless a specific exception has been approved by the Credential Appeals Committee. Any student on academic probation is subject to automatic disqualification unless approved by the Credential Appeals Committee to continue.

Grade Requirement for the Mild to Moderate Support Needs (Multiple Subject) Credential: Any grade below C- in a course that meets a credential requirement must be retaken in order to meet credential requirements.

Physical Education Methods Requirement: Before earning the Multiple Subject Credential, candidates must complete KINS 172 or the equivalent workshop.

Delays: Candidates who have to delay progress in the Master of Arts in Teaching with Education Specialist Mild to Moderate Support Needs Teaching Credential (Multiple Subject) Program will file a "Program Delay Petition" in the Teaching Credentials Office. A student returning after a delay may be accommodated on a space available basis. Candidates must return and complete the program within the seven-year limit for graduate programs.

Appeal Process: A student who has been formally admitted to the program has the right to appeal to the Credential Appeals Committee about any policy affecting program continuation, except for those policies set by the Commission on Teacher Credentialing or state education code. Appeals petitions and assistance are available in the Teaching Credentials Office.
Additional Information for All Admitted Program Candidates: MAT Degree

Grade Requirement for the Master's Degree: Courses required for the Master of Arts in Teaching degree require a grade of B- or better in order to be used to satisfy the requirements of the Master's degree. If a student receives below a B- in any course required for the Master's degree, the course must be successfully repeated with a grade of B- or better in order to satisfy the requirements of the degree program (grades of C- or better will satisfy the requirements for the teaching credential).

Delays: Candidates who have to delay progress in the Master of Arts in Teaching program will file a "Program Delay Petition" in the Teaching Credentials Office. A student returning after a delay may be accommodated on a space available basis. Candidates must return and complete the program within the seven-year limit for graduate programs.

Advancement to Candidacy Procedures: Each student working toward a Master of Arts in Teaching degree must file an application for Advancement to Candidacy for the degree. The purpose of this application is to provide certification to the Office of Graduate Studies that the student will complete the necessary requirements and coursework for the Master's degree. The student must be advanced to candidacy the semester prior to enrolling in EDSP 500.

This procedure should begin as soon as the classified graduate student has:
- Completed 21 units in the graduate program with a minimum 3.0 GPA; and
- Met the Graduate Writing Requirement through completion of the Graduate Writing Intensive (GWI) course, EDSP 281, with a B grade or better.

Advancement to Candidacy forms are available online through the Office of Graduate Studies. The student should complete the form in consultation with the MAT Program Coordinator. The form must be submitted online with the Office of Graduate Studies for approval.

Culminating Experience Enrollment: Before enrolling in EDSP 500, the student must submit a reservation form for a Culminating Experience to the MAT Program Coordinator.

Continuous Enrollment in the Master's Degree: Enrollment in EDSP 500 for the culminating experience is for one semester. The expectation is that students will complete the culminating experience during EDSP 500. Up to three semesters of continuous enrollment (EDSP 599) are allowed if the Culminating Experience advisor deems a reasonable amount of progress has been made and assigns a grade of "RP" for EDSP 500. If students fail to make adequate progress while enrolled in EDSP 500 and there are no mitigating circumstances (e.g., illness), a grade of "no credit" is given, and the student must re-enroll in EDSP 500.

Bilingual Authorization (BA)
The BA is a specialized authorization that authorizes the credential holder to provide instruction in the primary language to candidates with limited English proficiency. This option is available concurrently for all program candidates with oral and written fluency as well as cultural/historical knowledge of the target group (currently approved languages include Spanish or Hmong; other languages are in the process of being approved). Candidates can complete additional requirements to add the Bilingual Authorization in Spanish or Hmong. For additional information on the BA option, contact the College of Education Equity Coordinator (https://www.csus.edu/college/education/student-support/equity-office.html) for an advising appointment to review your transcripts.

Master of Arts in Teaching (Multiple Subject)

Program Description

The MA in Teaching (Multiple Subject) blends a teacher preparation program with a Master of Arts in Teaching (MAT). The Multiple Subject Teaching Credential authorizes the holder to teach all subjects in a self-contained classroom, such as the classrooms in most elementary schools. This credential embeds the English Learner Authorization (ELA), which prepares candidates to work with second language learners.

The teacher preparation coursework focuses on preparing effective teachers for urban classrooms. Becoming an effective teacher for an urban setting, including a foundation in social justice and equity, is the focus of all activities, tasks and learning. The candidates complete a program that requires full-time student status, with field experience and student teaching requirements in Sacramento Area districts as well as full-time coursework requirements. Upon completion of the Multiple Subject Teaching Credential coursework, program candidates will complete an additional sequence of five Master of Arts in Teaching (MAT) courses.

Throughout the MAT program candidates will learn how to critically examine the sociocultural and sociopolitical contexts related to the broad fields of educational research and schooling. Candidates will be expected to apply such analytical skills to develop and implement standards-based curriculum in diverse settings using best instructional and inclusive practices that positively impact the learning of all students including English Learners and students with disabilities. Candidates will also create an original Teacher Action Research Inquiry Project using practice-based methods in diverse educational settings. The materials and associated activities presented in the MAT coursework are highly integrated to support students with successful completion of the Master of Arts in Teaching degree at the end of the program.

The program is hybrid: blend of in-person courses and online courses.

Master of Arts in Teaching (Multiple Subject)

The California Commission on Teacher Credentialing (CTC) establishes admissions requirements for all preliminary teaching credential programs and the CSU Chancellor’s Office further specifies admissions requirements. The requirements listed below may be subject to change, based on actions of these two governing bodies. Interested applicants are encouraged to contact the Academic and Program Services Office in Eureka Hall 401, (916) 278-6639, an advisor in the program, or the MAT with Credential program website (https://www.csus.edu/college/education/teaching-credentials/) for the most current admissions requirements.

Program Admission Requirements

1. A Baccalaureate degree is required for admission to the MAT degree program.
2. Minimum of 45 hours of experience related to working with children or youth in a K-12 classroom or equivalent recommended.
3. Submit two references: one from a person who has observed the applicant’s academic competence (current or former instructor) and the other from a person who has observed the applicant working with children or youth. NOTE: References from family members will not be accepted.
4. Submit a graduate writing sample.
5. Satisfy writing proficiency by meeting the Basic Skills Requirement.
6. Satisfy the Basic Skills Requirement. For more detailed information, visit the CTC website (https://www.ctc.ca.gov/). Example of ways to satisfy Basic Skills Requirement include:
   a. Pass the California Basic Educational Skills Test (CBEST)
   b. Pass the CSET Multiple Subjects plus Writing Skills examination
   c. Pass the CSU Early Assessment Program (EAP) or the CSU Placement Examinations
   d. Achieve qualifying score on the SAT or ACT (see the CTC website (https://www.ctc.ca.gov/))
   e. Score a 3 or above on specific AP examinations (see the CTC website (https://www.ctc.ca.gov/))
   f. Earn a grade of "B" or better in specific college or university courses as detailed on the CTC website (https://www.ctc.ca.gov/).
   g. Applicants can "Mix and Match" options, as detailed on the CTC website (https://www.ctc.ca.gov/).
7. Satisfy the Subject Matter Competence requirement. For more detailed information, visit the CTC website. Examples of ways to demonstrate subject matter competence: take and pass all subtests of any Multiple Subject CSET examination, complete a subject matter program, or complete an approved undergraduate major as detailed on the CTC website.
8. Grade Point Average (GPA) of at least 2.5 overall or 2.75 in last 60 semester or 90 quarter units as evidenced from official transcripts from every college/university attended.
10. Certificate of Clearance (COC) security clearance issued by the Commission on Teacher Credentialing: evidence of submitting the COC application and fingerprints must be submitted at application.
11. Participate in a Mandatory Interview.

Detailed descriptions of all admissions requirements are contained in the program's application instructions, which are available on the Teaching Credentials Application website (https://www.csus.edu/college/education/teaching-credentials/apply.html).

Applications Required

CSU Graduate School Application for the University
Sacramento State graduating seniors, Sacramento State students completing a master's degree or second bachelor's degree, and applicants not currently attending Sacramento State MUST apply for admission to graduate school through the Office of Graduate Studies (OGS) by completing and submitting the CSU application on-line: Cal State Apply. (https://www2.calstate.edu/apply/)
Supplemental Application
A separate Supplemental Application is only required for current undergraduate Sacramento State students who are applying to take first semester program coursework while still classified as an undergraduate. The application link is posted on the Teaching Credential website in October of the year prior to admission.

Additional Information
Certificate of Clearance (COC/Fingerprint Clearance)
All applicants must submit verification of having been issued a security clearance by the Commission on Teacher Credentialing (CTC) before they will be allowed to officially start the credential program.

EXCEPTION – it is not necessary to apply for the Certificate of Clearance if you can verify you hold a valid California certificate or credential such as an emergency permit for substitute teaching, Pre-intern certificate, PPS credential, Child Development Associate or Supervisor Permit, Adult Vocational Education credential or a valid Multiple or Single Subject credential.

NOTE: If you answered “YES” to any of the Personal and Professional Fitness questions on the Certificate of Clearance application, you will need to obtain the official arrest record and court paperwork regarding each incident. Refer to the CTC website (https://www.ctc.ca.gov/) for instructions, forms, and where to submit all additional paperwork. If you have arrests and/or convictions on your record, once you submit the additional documentation to CTC, the processing of your clearance application can take SIX MONTHS or longer. This means you may not be eligible to start the program if your clearance is not issued before the program begins. If you have any questions, contact the CTC directly via email (credentials@ctc.ca.gov).

Verification of Bachelor's Degree
All applicants must obtain a bachelor's degree from a regionally accredited college/university in the United States in order to be eligible for a credential. Proof can be obtained through official transcripts and listed as "Degree(s) Awarded" with the date the degree was awarded. To find out if your college/university is regionally accredited by one of the accrediting agencies approved by the California Commission on Teacher Credentialing (CTC), visit the CTC website (https://www.ctc.ca.gov/).

Foreign Transcript Evaluation
Individuals who have completed college or university coursework at an institution in a country other than the United States must obtain a complete evaluation of foreign transcripts, degrees, and other relevant documents prior to applying for a teaching credential program. This evaluation is required by the California Commission on Teacher Credentialing (CTC). It is recommended that credential program applicants have their documents evaluated by WES (http://www.wes.org/students/), since both the University Office of Graduate Studies and the Commission will accept the WES (http://www.wes.org/students/) evaluation. Applicants should select the WES INTERNATIONAL CREDENTIAL ADVANTAGE PACKAGE (ICAP) Course by Course Evaluation. For additional information on foreign transcript evaluations please visit the CTC website (https://www.ctc.ca.gov/) and the Office of Graduate Studies website (https://www.csus.edu/graduate-studies/future-students/applicants-with-foreign-documents.html).

Verification of completing the United States Constitution Requirement
California Education Code, Section 44335, requires all candidates for Multiple Subject, Single Subject, and Education Specialist credentials to demonstrate knowledge of the United States Constitution by completing a college-level course with a “C” or equivalent grade or better, or pass a college-level examination in the subject, or verify AP exam credit for American History or American Government/Politics. While this is not a program admission requirement, this requirement must be completed before the credential can be granted at the end of the credential program. Most CSU graduates have met this requirement. More information can be found by contacting pre-credential advisors in the College of Education Student Success Center (https://www.csus.edu/college/education/student-support/).

Minimum Units and Grade Requirement for the MAT Degree
Units required for the MAT degree: 30
Minimum Cumulative GPA for the MAT degree: 3.0

Additional Information for All Admitted Program Candidates: Credential Coursework
Continued Enrollment: Continued enrollment in the MA in Teaching with Multiple Subject Teaching Credential Program is contingent upon candidates maintaining a GPA of 3.0 in all professional education courses. If incomplete grades or grades of "D", "F", and "NC" (No Credit) are received in professional education courses, the candidate must withdraw from the program unless a specific exception has been approved by the Credential Appeals Committee. Any student on academic probation is subject to automatic disqualification unless approved by the Credential Appeals Committee to continue.

Grade Requirement for the Credential: Any grade below C- in a required credential course must be retaken in order to meet credential requirements.

Physical Education Methods Requirement: Before earning the Multiple Subject Credential, candidates must complete KINS 172 or the equivalent workshop.

Delays: Candidates who have to delay progress in the MA in Teaching with Multiple Subject Teaching Credential Program will file a "Program Delay Petition" in the Teaching Credentials Office. A student returning after a delay may be accommodated on a space available basis. Candidates must return and complete the program within the seven-year limit for graduate programs.

Appeal Process: A student who has been formally admitted to the program has the right to appeal to the Credential Appeals Committee about any policy affecting program continuation, except for those policies set by the Commission on Teacher Credentialing or state education code. Appeals petitions and assistance are available in the Teaching Credentials Office.

Licensure
Admission into programs leading to licensure does not guarantee that students will obtain a license. Licensure requirements are set by agencies that are not controlled by or affiliated with the CSU and requirements can change at any time. For example, licensure requirements can include evidence of the right to work in the United States (e.g., social security number or tax payer identification number) or successfully passing a criminal background check. Students are responsible for determining whether they can meet licensure. The CSU will not refund tuition, fees, or any associated costs, to students who determine subsequent to admission that they cannot meet licensure requirements.
Additional Information for All Admitted Program Candidates: MAT Degree

Grade Requirement for the Master's Degree: Courses required for the Master’s Degree require a grade of B or better except for the following exception: up to 6 units or 2 courses (whichever is less) may count for the Master’s degree with a grade of C or better. If a student receives below a C in any course required for the Master’s degree beyond the exception outlined above, the course must be successfully repeated with a grade of B or better in order to satisfy the requirements of the degree program (grades of C- or better will satisfy the requirements for the teaching credential).

Delays: Candidates who have to delay progress in the MA in Teaching with Multiple Subject Teaching Credential Program will file a “Program Delay Petition” in the Teaching Credentials Office. A student returning after a delay may be accommodated on a space available basis. Candidates must return and complete the program within the seven-year limit for graduate programs.

Advancement to Candidacy Procedures: Each student working toward a Master of Arts in Teaching degree must file an application for Advancement to Candidacy for the degree. The purpose of this application is to provide certification to the Office of Graduate Studies that the student will complete the necessary requirements and coursework for the Master’s degree. The student must be advanced to candidacy the semester prior to enrolling in EDMS 500.

This procedure should begin as soon as the classified graduate student has:

• Completed 15 units in the graduate program with a minimum 3.0 GPA;
  and
• Met the Graduate Writing Requirement through completion of the Graduate Writing Intensive (GWI) course, EDMS 241, with a B grade or better.

Advancement to Candidacy forms are available online through the Office of Graduate Studies. The student should complete the form in consultation with the MAT Program Coordinator. The form must be submitted online with the Office of Graduate Studies for approval.

Continuous Enrollment in the Master's Degree: Enrollment in EDMS 500 for the culminating experience is for one semester. The expectation is that students will complete the culminating experience during EDMS 500. Up to three semesters of continuous enrollment (EDMS 599) are allowed if the Culminating Experience advisor deems a reasonable amount of progress has been made and assigns a grade of “RP” for EDMS 500. If students fail to make adequate progress while enrolled in EDMS 500 and there are no mitigating circumstances (e.g., illness), a grade of "no credit" is given, and the student must re-enroll in EDMS 500.

Bilingual Authorization (BA)
The BA is a specialized authorization that authorizes the credential holder to provide instruction in the primary language to candidates with limited English proficiency. This option is available concurrently for all program candidates with oral and written fluency as well as cultural/historical knowledge of the target group (currently approved languages include Spanish or Hmong; other languages are in the process of being approved). Candidates can complete additional requirements to add the Bilingual Authorization in Spanish or Hmong. For additional information on the BA option, contact the College of Education Equity Coordinator (https://www.csud.edu/college/education/student-support/equity-office.html) for an advising appointment to review your transcripts.

Master of Arts in Teaching (Single Subject)

Program Description

The MA in Teaching (Single Subject) blends a teacher preparation program with a Master of Arts in Teaching (MAT). The Single Subject Teaching Credential authorizes the holder to provide instruction in approved subject areas in a departmentalized classroom. Almost all junior and senior high school teachers hold the single subject credential.

Single Subject Teaching Credentials can be obtained in the areas of Art, Biology, Chemistry, English/Language Arts, French, Geoscience, General Science, German, Health Science, Home Economics, Mathematics, Music, Physical Education, Physics, History/Social Science, and Spanish. This credential embeds the English Learner Authorization (ELA), which prepares candidates to work with second language learners. The teacher preparation coursework focuses on preparing effective teachers for urban classrooms. Becoming an effective teacher for an urban setting, including a foundation in social justice and equity, is the focus of all activities, tasks, and learning.

The candidates complete a program that requires full-time student status, with field experience and student teaching requirements in Sacramento Area districts as well as full-time coursework requirements. Upon completion of the Single Subject Teaching Credential coursework, program candidates may complete an additional sequence of five Master of Arts in Teaching (MAT) courses if they want to complete the MAT after finishing the credential. Throughout the MAT program, candidates will learn how to critically examine the sociocultural and sociopolitical contexts related to the broad fields of educational research and schooling. Candidates will be expected to apply such analytical skills to develop and implement standards-based curriculum in diverse settings using best instructional and inclusive practices that positively impact the learning of all students including English Learners and students with disabilities. Candidates will also create an original Teacher Action Research Inquiry Project using practice-based methods in a diverse educational setting. The materials and associated activities presented in the MAT coursework are highly integrated to support students with successful completion of the Master of Arts in Teaching degree at the end of the program.

Career Pathways Certificate

Within the Single Subject (Secondary) Teaching Credential program coursework, candidates have the option to pursue a Career Pathways Certificate and can indicate upon admission into the program their desire to pursue the certificate. The Career Pathways Certificate prepares candidates to teach in Career Pathways; these are specialized programs in high schools designed to prepare middle and high school secondary students for both college and career in themed small learning communities connected to the 15 Major California Industries. Numerous high schools in the Sacramento Region offer Career Pathways.

Candidates admitted into the MA in Teaching with Single Subject Teaching Credential program will take the same courses as other candidates, but will enroll in the Career Pathways Linked Learning sections with designated L indicators (EDSS 365L). In addition, they will complete an additional two-unit work-based learning field experience course. At the end of the credential coursework, candidates will be recommended for a Single Subject teaching credential and will receive the Career Pathways Certificate.

The program is offered in a hybrid format: a blend of in-person courses and a limited number of online courses.

Master of Arts in Teaching (Single Subject)

The California Commission on Teacher Credentialing (CTC) establishes admissions requirements for all preliminary teaching credential programs and the CSU Chancellor’s Office further specifies admissions requirements. The requirements listed below may subject to change, based on actions of these two governing bodies. Interested applicants are encouraged to contact the Academic and Program Services Office in Eureka Hall 401, (916) 278-6639, an advisor in the Student Success Center (https://www.csus.edu/college/education/student-support/), or the MAT with Credential program website (https://www.csus.edu/college/education/teaching-credentials/apply.html) for the most current admissions requirements.

Program Admission Requirements

1. A Baccalaureate degree is required for admission to the MAT degree program.
   a. Minimum of 45 hours of experience related to working with children or youth in a K-12 classroom or equivalent is recommended.
   b. Submit two references: one from a person who has observed the applicant’s academic competence (current or former instructor) and the other from a person who has observed the applicant working with children or youth. **NOTE:** References from family members will not be accepted.
   c. Submit a graduate writing sample.
   d. Satisfy writing proficiency by meeting the Basic Skills Requirement.
   e. Satisfy the Basic Skills Requirement. For more detailed information, visit the CTC website ([https://www.ctc.ca.gov/credentials/leaflets/clf667.pdf](https://www.ctc.ca.gov/credentials/leaflets/clf667.pdf)). Example of ways to satisfy Basic Skills Competence include:
      a. Pass the California Basic Educational Skills Test (CBEST)
      b. Pass the CSET Multiple Subjects plus Writing Skills examination
      c. Pass the CSU Early Assessment Program (EAP) or the CSU Placement Examinations
   d. Achieve qualifying score on the SAT or ACT (see the CTC website ([https://www.ctc.ca.gov/credentials/leaflets/basic-skills-requirement-(cl-667)/](https://www.ctc.ca.gov/credentials/leaflets/basic-skills-requirement-(cl-667)/))
   e. Score a 3 or above on specific AP examinations (see the CTC website ([https://www.ctc.ca.gov/credentials/leaflets/basic-skills-requirement-(cl-667)/](https://www.ctc.ca.gov/credentials/leaflets/basic-skills-requirement-(cl-667)/))
   f. Earn a grade of “B-” or better in specific college or university courses as detailed on the CTC website ([https://www.ctc.ca.gov/credentials/leaflets/basic-skills-requirement-(cl-667)/](https://www.ctc.ca.gov/credentials/leaflets/basic-skills-requirement-(cl-667)/))
   g. Applicants can “Mix and Match” options, as detailed on the CTC website ([https://www.ctc.ca.gov/credentials/leaflets/basic-skills-requirement-(cl-667)/](https://www.ctc.ca.gov/credentials/leaflets/basic-skills-requirement-(cl-667)/)).

2. Satisfy the Subject Matter Competence requirement. For more detailed information, visit the CTC website. Examples of ways to demonstrate subject matter competence: take and pass all subtests of any Single Subject CSET examination, complete a subject matter program, or complete an approved undergraduate major as detailed on the CTC website ([https://www.ctc.ca.gov/educator-prep/subject-matter-requirements/](https://www.ctc.ca.gov/educator-prep/subject-matter-requirements/)).
7. Grade Point Average (GPA) of at least 2.5 overall or 2.75 in last 60 semester or 90 quarter units as evidenced from official transcripts from every college/university attended.

8. Complete Credential Prerequisite

9. Certificate of Clearance (COC) security clearance issued by the Commission on Teacher Credentialing: evidence of submitting the COC application and fingerprints must be submitted at application.

10. Participate in a Mandatory Interview.

Detailed descriptions of all admissions requirements are contained in the program's application instructions, which are available on the Teaching Credentials Application website (https://www.csus.edu/college/education/teaching-credentials/apply.html).

Applications Required
CSU Graduate School Application for the University
Sacramento State graduating seniors, Sacramento State students completing a master's degree or second bachelor's degree, and applicants not currently attending Sacramento State MUST apply for admission to graduate school through the Office of Graduate Studies (OGS) by completing and submitting the CSU application on-line: Cal State Apply. (https://www2.calstate.edu/apply/)

Supplemental Application
A separate Supplemental Application is only required for current undergraduate Sacramento State students who are applying to take first semester program coursework while still classified as an undergraduate. The application link is posted on the Teaching Credential website in October of the year prior to admission.

Additional Information
Certificate of Clearance (COC/Fingerprint Clearance)
All applicants must submit verification of having been issued a security clearance by the Commission on Teacher Credentialing (CTC) before they will be allowed to officially start the credential program.

EXCEPTION – it is not necessary to apply for the Certificate of Clearance if you can verify you hold a valid California certificate or credential such as an emergency permit for substitute teaching, Pre-intern certificate, PPS credential, Child Development Associate or Supervisor Permit, Adult Vocational Education credential or a valid Multiple or Single Subject credential.

NOTE: If you answered "YES" to any of the Personal and Professional Fitness questions on the Certificate of Clearance application, you will need to obtain the official arrest record and court paperwork regarding each incident. Refer to the CTC website (https://www.ctc.ca.gov/educator-discipline/self-reporting.html) for instructions, forms, and where to submit all additional paperwork. If you have arrests and/or convictions on your record, once you submit the additional documentation to CTC, the processing of your clearance application can take SIX MONTHS or longer. This means you may not be eligible to start the program if your clearance is not issued before the program begins. If you have any questions, contact the CTC directly via email (credentials@ctc.ca.gov).

Veriﬁcation of Bachelor's Degree
All applicants must obtain a bachelor’s degree from a regionally accredited college/university in the United States in order to be eligible for a credential. Proof can be obtained through official transcripts and listed as "Degree(s) Awarded" with the date the degree was awarded. To find out if your college/university is regionally accredited by one of the accrediting agencies approved by the California Commission on Teacher Credentialing (CTC), visit the CTC website (https://www.ctc.ca.gov/credentials/accreditation-bodies.html).

Foreign Transcript Evaluation
Individuals who have completed college or university course work at an institution in a country other than the United States must obtain a complete evaluation of foreign transcripts, degrees, and other relevant documents prior to applying for a teaching credential program. This evaluation is required by the California Commission on Teacher Credentialing (CTC). It is recommended that credential program applicants have their documents evaluated by WES (http://www.wes.org/students/), since both the University Office of Graduate Studies and the Commission will accept the WES (http://www.wes.org/) evaluation. Applicants should select the WES INTERNATIONAL CREDENTIAL ADVANTAGE PACKAGE (ICAP) Course by Course Evaluation. For additional information on foreign transcript evaluations please visit the CTC website (https://www.ctc.ca.gov/credentials/leaflets/cl63s.pdf) and the Office of Graduate Studies website (https://www.csus.edu/graduate-studies/future-students/applicants-with-foreign-documents.html).

Verification of completing the United States Constitution Requirement
California Education Code, Section 44335, requires all candidates for Multiple Subject, Single Subject, and Education Specialist credentials to demonstrate knowledge of the United States Constitution by completing a college-level course with a "C" or equivalent grade or better, or pass a college-level examination in the subject, or verify AP exam credit for American History or American Government/Politics. While this is not a program admission requirement, this requirement must be completed before the credential can be granted at the end of the credential program. Most CSU graduates have met this requirement. More information can be found by contacting pre-credential advisors in the College of Education Student Success Center (https://www.csus.edu/college/education/student-support/).

Minimum Units and Grade Requirement for the MAT Degree
Units required for the MAT degree: 30
Minimum Cumulative GPA for the MAT degree: 3.0

Additional Information for All Admitted Program Candidates: Credential Coursework
Continued Enrollment: Continued enrollment in the MA in Teaching with Single Subject Teaching Credential Program is contingent upon candidates maintaining a GPA of 3.0 in all professional education courses. If incomplete grades or grades of "D", "F", and "NC" (No Credit) are received in professional education courses, the candidate must withdraw from the program unless a specific exception has been approved by the Credential Appeals Committee. Any student on academic probation is subject to automatic disqualification unless approved by the Credential Appeals Committee to continue.

Grade Requirement for the Credential: Any grade below C- in a required credential course must be retaken in order to meet credential requirements.
**Delays:** Candidates who have to delay progress in the MA in Teaching with Single Subject Teaching Credential Program will file a "Program Delay Petition" in the Teaching Credentials Office. A student returning after a delay may be accommodated on a space available basis. Candidates must return and complete the program within the seven-year limit for graduate programs.

**Appeal Process:** A student who has been formally admitted to the program has the right to appeal to the Credential Appeals Committee about any policy affecting program continuation, except for those policies set by the Commission on Teacher Credentialing or state education code. Appeals petitions and assistance are available in the Teaching Credentials Office.

**Licensure**

Admission into programs leading to licensure does not guarantee that students will obtain a license. Licensure requirements are set by agencies that are not controlled by or affiliated with the CSU and requirements can change at any time. For example, licensure requirements can include evidence of the right to work in the United States (e.g., social security number or tax payer identification number) or successfully passing a criminal background check. Students are responsible for determining whether they can meet licensure. The CSU will not refund tuition, fees, or any associated costs, to students who determine subsequent to admission that they cannot meet licensure requirements.

**Additional Information for All Admitted Program Candidates: MAT Degree**

**Grade Requirement for the Master's Degree:** Courses required for the Master's Degree require a grade of B or better except for the following exception: up to 6 units or 2 courses (whichever is less) may count for the Master's degree with a grade of C or better. If a student receives below a C in any course required for the Master's degree beyond the exception outlined above, the course must be successfully repeated with a grade of B or better in order to satisfy the requirements of the degree program (grades of C- or better will satisfy the requirements for the teaching credential).

**Delays:** Candidates who have to delay progress in the MA in Teaching with Single Subject Teaching Credential Program will file a "Program Delay Petition" in the Teaching Credentials Office. A student returning after a delay may be accommodated on a space available basis. Candidates must return and complete the program within the seven-year limit for graduate programs.

**Advancement to Candidacy Procedures:** Each student working toward a Master of Arts in Teaching degree must file an application for Advancement to Candidacy for the degree. The purpose of this application is to provide certification to the Office of Graduate Studies that the student will complete the necessary requirements and coursework for the Master's degree. The student must be advanced to candidacy the semester prior to enrolling in EDSS 500.

This procedure should begin as soon as the classified graduate student has:

- Completed 15 units in the graduate program with a minimum 3.0 GPA; and
- Met the Graduate Writing Requirement through completion of the Graduate Writing Intensive (GWI) course, EDSS 241, with a B grade or better.

Advancement to Candidacy forms are available online through the Office of Graduate Studies. The student should complete the form in consultation with the MAT Program Coordinator. The form must be submitted online with the Office of Graduate Studies for approval.

**Continuous Enrollment in the Master's Degree:** Enrollment in EDSS 500 for the culminating experience is for one semester. The expectation is that students will complete the culminating experience during EDSS 500. Up to three semesters of continuous enrollment (EDSS 599) are allowed if the Culminating Experience advisor deems a reasonable amount of progress has been made and assigns a grade of "RP" for EDSS 500. If students fail to make adequate progress while enrolled in EDSS 500 and there are no mitigating circumstances (e.g., illness), a grade of "no credit" is given, and the student must re-enroll in EDSS 500.

**Bilingual Authorization (BA)**

The BA is a specialized authorization that authorizes the credential holder to provide instruction in the primary language to candidates with limited English proficiency. This option is available concurrently for all program candidates with oral and written fluency as well as cultural/historical knowledge of the target group (currently approved languages include Spanish or Hmong; other languages are in the process of being approved). Candidates can complete additional requirements to add the Bilingual Authorization in Spanish or Hmong. For additional information on the BA option, contact the College of Education Equity Coordinator (https://www.csus.edu/college/education/student-support/equity-office.html) for an advising appointment to review your transcripts.

Minor in Special Education

The Special Education minor consists of interdisciplinary coursework designed to familiarize students with the field of special education and disability studies and to gain knowledge and experience with theory and research in these areas. Students will explore the personal, historical, political, cognitive, and contextual factors that play a role in the lives of students with disabilities and in the lives of their advocates. Students will explore the career of Education Specialist while learning about various pathways to working with students with disabilities.

Students must earn a minimum grade of C- in all courses for the minor.

Total Units: 18

1. CHAD majors may not use EDSP 101 or EDSP 119 to fulfill requirements for the major.
2. Some of these courses have prerequisites. Consult the course catalog to ensure you have met them prior to enrolling.

Undergraduate Studies in Education Program Descriptions

Child and Adolescent Development is the study of the biological, physical, socio-emotional, and cognitive growth and development of the child from conception through emerging adulthood. Using theory, empirical research, and practice, this rigorous academic program prepares students to work as agents of social change with diverse populations of children, adolescents, emerging adults, and families in a variety of areas, including education, advocacy, research, policy, counseling, and/or other...
settings. BA degree, Minor, and MA degree programs are available in Child and Adolescent Development.

The Bachelor of Arts in Child and Adolescent Development offers three concentrations: Educational Contexts, Early Development, Care, and Education, and Social and Community Contexts. Students choosing the Concentration in Educational Contexts will be equipped to understand and apply developmental perspectives and engage in ethical and reflective practices within the educational context. Graduates will be prepared for careers in elementary school, and special education. Students choosing the Concentration in Early Development, Care, and Education will be equipped to apply developmental perspectives when working with young children (aged birth through 8 years) and their families. Graduates will be eligible for the Child Development Teacher Permit. The graduates of the Concentration in Social and Community Contexts are equipped to support developmental trajectories through application of theory and research into practice within diverse community settings. Graduates will be prepared for careers in community, social, government, or counseling settings. All three concentrations can prepare students for advanced degree and professional programs.

The Multiple Subject Matter Waiver is a series of courses that allow students to meet the California Commission on Teacher Credentialing (CTC) subject matter competency requirement for admission to a multiple subject or special education teaching credential program in California. The subject matter waiver is an alternative to the state-approved content exam, the California Subject Exam for Teachers (CSET), Multiple Subjects. The Subject Matter Waiver can be integrated with the Child and Adolescent Development (Educational Contexts) concentration to meet GE/GR and major requirements, with advising.

The Master of Arts in Child and Adolescent Development program offers opportunity for the advanced study of developmental theory and research in pursuit of a wide range of professional objectives. The program emphasizes scholarly reflection on developmental issues and academic excellence in oral and written communication, and prepares graduates for work with infants, children, adolescents, and their families in a variety of settings. Child and Adolescent Development MA students pursue careers in program administration, parent education, research, community college instruction, and work in counseling, social service, non-profit, and community agencies. The MA also prepares students for additional study toward a doctoral degree in child development, developmental psychology, or a related field.

The Minor in Child and Adolescent Development is designed to combine with a different major to prepare students to work as agents of social change with diverse populations of children, adolescents, emerging adults, and families in a variety of settings.

The Minor in Counseling (p. 572) can be paired with any major (including CHAD). Students will critically examine the theory and research on social and emotional development, and specifically explore the role of the family context in developmental processes, with specific attention to dynamic family processes within the larger society. Students will explore the career of counseling, and related cultural, social, and emotional factors.

Deaf Studies (https://www.csus.edu/college/education/undergraduate/deaf-studies.html)

Deaf Studies takes an interdisciplinary, deaf-centric approach to the study of deaf and hard-of-hearing people in American and global societies. The major and minor programs promote understanding of deaf individuals as members of diverse sociolinguistic groups with distinct cultures, traditions, literatures, and languages. Students will develop skills in analyzing stereotypes and policies around deaf people, which may allow them to work within this population and in their communities to affect and support deaf equity.

With a Deaf Studies Major, students will be prepared to undertake further training in order to enter the fields of interpreting, education, or other specialized fields working with deaf consumers. This degree is not meant to be a substitute for these types of programs, but a bridge toward them.

With an ASL and Deaf Studies Minor, students may obtain entry-level jobs in settings working with Deaf individuals such as residential supervisor, classroom aide, vocational trainer, and much more. Students may also combine an ASL and Deaf Studies Minor with a related major field of study such as education, counseling, audiology and speech therapy for a more well-rounded grounding in Deaf and hard-of-hearing issues in their field. Students in fields which are not specifically Deaf-related such as nursing, law, computer engineering, and many more may also experience an edge in gaining employment anywhere, with a minor in ASL and Deaf Studies compared to those without similar coursework or experience.

Further, students having completed the Deaf Studies Major and Minor may be able to waive similar coursework at other universities with specialized fields of study centered on Deaf and hard-of-hearing people that may not be offered in the Sacramento region.

Education

The EDUC program offers a Minor in Social Justice in Education (p. 572), which focuses on the theoretical, historical, and cultural constructs of power and oppression and the ways they intersect within education. The EDUC courses address current issues regarding race, ethnicity, culture, language, socioeconomic status, abilities, and gender diversity. The courses also underscore how education can be transformative and used as a tool to eradicate oppression and foster perspectives that promote social justice in education. The goal of the Minor is to empower students to teach or work towards building an antiracist, equitable, and inclusive place in education. The program also offers a variety of courses that meet General Education and Graduation Requirements, as well as courses taught in the Bachelor of Science in Career and Technical Studies program.

Career and Technical Studies (https://www.cce.csus.edu/bscts/)

Offered through a partnership between the College of Continuing Education and the College of Education, the Bachelor of Science in Career and Technical Studies (BSCTS (p. 568)) is an online degree completion program designed to prepare working adults with practical, marketable skills to successfully enter new careers or advance in their current fields. The program uses instructional techniques suited to adult learners, including real world instruction and personalized academic advising, and offers networking opportunities and accelerated programming. The program is versatile and can be applied to a variety of disciplines. The degree can serve as a springboard to a master's degree or as a career ladder into many professions.

Notice to Students RE: Professional Licensure and Certification
California State University programs for professions that require licensure or certification are intended to prepare the student for California licensure and certification requirements. Admission into programs for professions that require licensure and certification does not guarantee that students will obtain a license or certificate. Licensure and certification requirements are set by agencies that are not controlled by or affiliated with the California State University and licensure and certification requirements can change at any time.

The California State University has not determined whether its programs meet other states’ educational or professional requirements for licensure and certification. Students planning to pursue licensure or certification in other states are responsible for determining whether, if they complete a California State University program, they will meet their state’s requirements for licensure or certification. This disclosure is made pursuant to 34 CFR §668.43(a)(5)(v)(C).

CHAD 23. Observation and Assessment in Child Development. 3 Units

Term Typically Offered: Fall, Spring

Purposes of and methodological issues involved in assessing and observing early child development and learning in educational and developmental settings. Topics include selection of appropriate observation methods, survey of standardized measures, ethics, and interpretation and implications of assessment data for teaching and learning. Focus will be on becoming objective and unbiased observers, use of informal and formal assessment tools, and principles of observational assessment research. Students will be required to complete up to 10 hours of observation outside of class.

CHAD 30. Human Development. 3 Units

General Education Area/Graduation Requirement: Understanding Personal Development (E)

Term Typically Offered: Fall, Spring

Interdisciplinary study of human development with practical observations. Addresses physical, socio-cultural, intellectual and emotional aspects of growth and development from conception to death. A variety of field experiences will be required.

CHAD 30C. Human Development and Fieldwork in Community and Social Contexts. 3 Units

Prerequisite(s): CHAD 30 or CHAD 35, or the equivalent; CHAD 30 may be taken concurrently.

Term Typically Offered: Fall, Spring

This course aims to prepare students to become familiar with the operations of organizations serving children and adolescents in the community and identify professional opportunities in the field of child and adolescent development through class activities and 40 hours of fieldwork. Students will engage in directed field experiences in community and social settings and attend an on campus seminar. Students will translate theory into practice and reflect on experiences. Issues on equity and diversity within human development will be discussed.

Note: Fieldwork includes 40 hours of service-learning at approved sites that are primarily off campus; students must complete clearance process (fingerprinting, TB tests) prior to placement; Service Learning may be required.
CHAD 31. Adult Supervision and Mentoring In Early Childhood Programs. 2 Units
Prerequisite(s): CHAD 30 or CHAD 35 or equivalent.
Term Typically Offered: Spring only
Study of research and exemplary practices in the supervision of early childhood teachers, other program staff, parents and volunteers. Content emphasizes adult learning.

CHAD 32. Administration and Supervision of Early Childhood Programs. 3 Units
Prerequisite(s): CHDV 30 or CHDV 35 or equivalent.
Term Typically Offered: Fall only
Basic issues, procedures and practices in the administration and supervision of public and private schools. Requires administrative supervisory fieldwork in an early childhood program.

CHAD 35. Child and Adolescent Development. 3 Units
General Education Area/Graduation Requirement: Understanding Personal Development (E)
Term Typically Offered: Fall, Spring
This course examines development from conception through adolescence. Content will include development in physical, cognitive, social, linguistic, and emotional domains. Through activities such as observation and reflection, students will explore interactions among developmental pathways, individual differences, and contextual factors such as culture, family, race, gender, ability, and socioeconomic status.

CHAD 35E. Early Childhood Field Experience. 3 Units
Prerequisite(s): CHAD 35 or CHAD 30 or the equivalent. CHAD 35 may be taken concurrently.
Term Typically Offered: Fall, Spring
This course examines theory and research in human development as it applies to early childhood education settings (0-5 years). Concepts related to cognitive, social-emotional, linguistic, and physical development, establishing and maintaining high quality programming (e.g. optimal learning environments, observation, etc.), and influences on development (e.g., family, race, cultural perspectives) within these settings will be discussed. Fieldwork includes 40 hours of service-learning at approved sites that are primarily off campus; students must complete clearance process (fingerprinting, TB tests) prior to placement.
Note: Fieldwork requirements include 40 hours of service-learning at approved sites that are primarily off campus; students must complete clearance process (fingerprinting, TB tests) prior to placement; Service Learning may be required.

CHAD 35F. Human Development and Elementary Field Experience. 3 Units
Prerequisite(s): CHAD 35 or the equivalent; CHAD 35 may be taken concurrently.
Term Typically Offered: Fall, Spring
The purpose of this course is to examine theory and research in human development as it applies to the elementary classroom. Discussion topics include cognitive, social-emotional, physical and language development, multiple intelligence, special needs, characteristics of play and the impact on social and cognitive development. Influences integral to development (e.g., family, race, cultural perspectives) are also included. This class requires 40 hours of field experience at a designated elementary school site. Students must complete fingerprinting and TB prior to placement.
Note: Service Learning may be required.

CHAD 44. Community Service Learning in Developmental and Educational Settings. 1 - 3 Units
Term Typically Offered: Fall, Spring
Designed to provide a range of service learning experiences where students apply their academic knowledge and skills in community-based settings. The community-based experiences will be combined with classroom activities designed to develop student understanding of topics related to their service activities such as tutoring reading and math, mentoring students from disadvantaged backgrounds, working with special populations of children.
Note: May be taken up to four times for credit (maximum 12 units of credit).
Credit/No Credit

CHAD 101. Career and Major Exploration in Child and Adolescent Development. 2 Units
Term Typically Offered: Fall, Spring
This course builds on lower-division major coursework and fieldwork to promote balanced scholarship and professionalism in the field of Child and Adolescent Development. Students will: 1) investigate their major and explore reading and writing in the discipline; 2) survey the breadth of professional opportunities, refine professional interests, and begin developing their professional portfolio; 3) engage in personal reflection to develop an individualized plan to guide their trajectory within the major in preparation for their future academic and/or professional goals. Pre-requisite: (CHAD 30 or CHAD 35) and (CHAD 35F or CHAD 35E or CHAD 30C). CHAD 35F, CHAD 35E, or CHAD 30C may be taken concurrently. Must have 45 units completed.
Credit/No Credit

CHAD 123. Qualitative Methods in Human Development. 4 Units
Prerequisite(s): CHAD 30 or CHAD 35, or equivalent; CHAD 101.
CHAD 101 may be taken concurrently.
Term Typically Offered: Fall, Spring
Introduction to qualitative research methods, their philosophical underpinnings, and their implications for understanding human development. The focus will be on identifying, interpreting, and designing qualitative research to study developmental processes. Attention will be given to methodological strategies used to document and analyze development in context, including participant observation field notes, interviews, documents, and artifacts, with implications for theory and practice. Activities include interpreting qualitative research, qualitative data collection and analysis, and communicating findings utilizing APA style.
Note: For CHAD majors, must be taken prior to completion of 45 total units credit.
CHAD 128. Combined Research Methods in Human Development.  3 Units

Prerequisite(s): CHDV 30 or CHDV 35 or equivalent.
Term Typically Offered: Fall, Spring, Summer

Introduction to qualitative and quantitative research methods and their philosophical underpinnings. Consider theoretical, methodological, and ethical issues in studying learning and developmental processes from an interpretive and social constructivist perspective. Think critically about the generation of research questions and hypotheses and design and conduct of research inquiry, with implications for theory, policy, and practice. Students learn to locate, understand, critique, conduct, and report research findings from multiple approaches and be introduced to APA style writing as a tool for scholarly communication.

CHAD 130. Parent Education.  3 Units

Term Typically Offered: Fall, Spring

Ways parent education may be conducted in Child Development programs to meet legislated requirements as well as parent needs. Attention will be given to parent education programs which serve children of different ages, diverse language and cultural backgrounds, and children with special needs. The rights and responsibilities of children, parents and teachers will be discussed. Discussion and participation in such classroom activities as panels, presentations, demonstrations and cooperative learning assignments.

CHAD 131. Language Development.  3 Units

Prerequisite(s): CHAD 133. CHAD 133 may be taken concurrently.
Term Typically Offered: Fall, Spring

This course examines current views on language development and the interrelations between the cognitive, socio-cultural, and linguistic components of this process. Emphasis will be on early language development (0-6 years) with some attention paid to the school years and adolescence.

CHAD 133. Quantitative Methods in Human Development.  4 Units

Prerequisite(s): CHAD 30, or CHAD 35, or equivalent; CHAD 101; CHAD 101 may be taken concurrently.
Term Typically Offered: Fall, Spring

Introduction to quantitative research methods in human development and their philosophical underpinnings. Major topics include structures, design, and conduct of research inquiry; the generation of research questions and hypotheses; and collection and analysis of data. Students will be challenged to think critically about methodological issues, engage in quantitative research and conduct analyses, and increase their ability to locate, understand, critique, apply, and report research findings. APA style will be introduced to support the development of scholarly communication and writing.

Note: For CHAD majors, must be taken prior to completion of 90 units; completion of 45 total units credit

CHAD 134. Development of Young Children as Mathematical and Scientific Thinkers.  3 Units

Term Typically Offered: Fall, Spring

This course offers an introduction to theory, research and practice related to the development of mathematical and scientific reasoning in young children. The course will focus on effective assessment, teaching and learning strategies for young children. This course introduces concepts aligned with the California Preschool Learning Foundations in Mathematics and Scientific Reasoning.

CHAD 135. Culture and Human Development.  3 Units

Prerequisite(s): CHAD 123. CHAD 123 may be taken concurrently.
Term Typically Offered: Fall, Spring

This course examines the relationship between culture and human development. Comparisons will be made between the epistemological principles of cross-cultural and cultural approaches to human development in order to explore their implications for developmental theory and research. Research studies will serve as a foundation for learning and reflecting about diversity in human experience, and the ways that diverse cultural contexts shape how individuals think, act, and engage with others in local and global settings.

CHAD 136. Developmental Experiences, Methods and Curriculum.  3 Units

Prerequisite(s): CHAD 123 (may be taken concurrently).
Term Typically Offered: Fall, Spring

This course examines theory, research, and exemplary curriculum and practices for children in preschool through the elementary grades, including content-specific connections between and among a variety of disciplines, (i.e., literacy, social studies, the arts, science and mathematics). A developmental perspective will frame discussions about fundamental curricular concepts, values, and principles of the subject matter disciplines. This course introduces concepts aligned with the California Preschool Learning Foundations or Common Core.

CHAD 137. Cognitive Development.  3 Units

Prerequisite(s): CHAD 133.
Term Typically Offered: Fall, Spring

This course overviews cognitive development from conception through adolescence with consideration of biological and sociocultural influences. Emphasis will be placed on evaluating the major theories of cognitive growth. The course will include lectures, discussions, and participation in classroom activities such as research presentations, demonstrations, and cooperative learning assignments.

CHAD 138. Social and Emotional Development.  3 Units

Prerequisite(s): CHAD 133.
Term Typically Offered: Fall, Spring

This course overviews social and emotional development from conception through adolescence with consideration of biological and sociocultural influences. Emphasis will be placed on evaluating the major theories of social and emotional growth. The course will include lectures, discussions, and participation in such classroom activities such as research presentations, demonstrations, and cooperative learning assignments.

CHAD 139. Educational Play, Theory and Practice.  3 Units

Term Typically Offered: Fall, Spring

This course examines the role of play in children’s development and learning with an emphasis on early childhood. It discusses theories, research, and applied perspectives to play, as well as principles for designing inclusive and developmentally appropriate play environments and activities that are also culturally and linguistically sustaining for all children. Students will explore how play helps children develop physically, socially, emotionally, cognitively and creatively through a variety of playful modes. Activities include discussions, presentations, demonstrations and cooperative learning assignments.
CHAD 140. Coordination of Early Childhood Programs. 3 Units
Prerequisite(s): CHAD 30 or CHAD 35 or equivalent
Term Typically Offered: Fall, Spring

Advanced methodology of coordinating early childhood programs, to include organization, staff development and community relations. Includes the functions of parents, aides, volunteers and varied early childhood organizational patterns.

CHAD 141. History of Childhood: International and Interdisciplinary Perspectives. 3 Units
General Education Area/Graduation Requirement: Humanities (Area C2)
Term Typically Offered: Fall, Spring

Examination of what it means to be a child in today’s world by comparing social constructions of childhood across the broad historical periods and in contrasting parts of the world. Exploration of cultural beliefs, values and practices of childhood in different historical, social, and economic contexts. Comparative approach provides a critical framework from which to analyze scholarly inquiry about how children develop in families, schools, and broader society. Course content will interest students from a broad array of majors.

CHAD 142. Development of Learning and Memory. 3 Units
Prerequisite(s): CHAD 30 or CHAD 35 or the equivalent
Term Typically Offered: Fall, Spring

This course provides an empirical and theoretical examination of the processes of learning and memory across developmental phases. Topics include the neuroscience of learning and memory, the origin and history of concepts and theories in learning and memory (e.g., behaviorist approaches), and applications of research on memory development to a variety of contexts (e.g., law, education, counseling).

CHAD 143. Mind and Brain in Developmental Context. 3 Units
Prerequisite(s): CHAD 30 or 35; Introductory Biology.
General Education Area/Graduation Requirement: Further Studies in Area B (B5)
Term Typically Offered: Fall, Spring, Summer

Investigation of the biological processes underlying child development, from conception through adolescence. Emphasis will be on the genetic, neurological, and endocrine processes related to cognition, social, and emotional development. Students will explore the bidirectional nature of psychobiological processes, with specific emphasis on the psychobiological mechanisms underlying the transaction between cultural, educational, and social-emotional related to educational, and mental and physical health functioning.

CHAD 144. Community Service Learning in Developmental and Educational Settings. 1 - 3 Units
Prerequisite(s): Instructor permission.
Term Typically Offered: Fall, Spring

Designed to provide a range of service learning experiences where students apply their academic knowledge and skills in community-based settings. The community-based experiences will be combined with classroom activities designed to develop student understanding of topics related to their service activities such as tutoring reading and math, mentoring students from disadvantaged backgrounds, working with special populations of children.

Note: May be taken up to four times for credit (maximum 12 units of credit).

Credit/No Credit

CHAD 145. Controversial Issues in Childhood Development, Education, and Social Policy. 3 Units
Prerequisite(s): GWAR certification before Fall 09; or WPJ score of 80+; or 3-unit placement in ENGL 109M or ENGL 109W; or 4-unit placement in ENGL 109M or ENGL 109W and co-enrollment in ENGL 109X; or WPJ score 70 or 71 and co-enrollment in ENGL 109X.
General Education Area/Graduation Requirement: GE AREA D, Race & Ethnicity Graduation Requirement (RE), Writing Intensive Graduation Requirement (WI)
Term Typically Offered: Fall, Spring

Discussion-based examination of controversial issues linking development, education, and cultural practice in which scholarly inquiry has substantial implications for social policy. Specific topics vary by semester and include topics of both historical relevance and contemporary debates. Content relevant to multiple disciplines including issues such as adolescent risk behavior, bilingual education, brain-based pedagogy, child care, children and the law, cultural diversity, developmental theory and educational practice, gender, literacy practices, motivation, parenting styles, school violence, special education, standardized testing, and technological change.

CHAD 146. Fostering Healthy Youth Development. 3 Units
Prerequisite(s): CHAD 30 or CHAD 35 equivalent
Term Typically Offered: Fall, Spring

This course will examine theory, research, and practice related to youth development, including developmental assets, well-being, civic engagement, resilience, empowerment, and positive youth development from middle childhood to emerging adulthood. Students will gain an understanding of how communities can support youth in developing towards their full potential. Identification of strategies and tools that promote youth development in a variety of contexts and cultures will be discussed. Activities include lecture, discussions, presentations, and cooperative learning assignments.

CHAD 147. Influences of Public Policy on Children & Adolescents. 3 Units
Prerequisite(s): CHAD 133 or CHAD 123. CHAD 133 or CHAD 123 may be taken concurrently.
Term Typically Offered: Fall, Spring

This course will provide students with an overview of US social policy and programs as they relate to children and adolescents. The policy process will be explored with attention paid to the role of empirical research, advocacy, and engagement of individuals and groups. Topics will include policies and programs that address poverty, education, families, ability, immigration, and criminal justice, among others. Students will analyze how policy integrates empirical research, meets their stated goals, and supports the development of diverse children.
CHAD 150. Literacy Development for Monolingual and Multilingual Children. 3 Units
Prerequisite(s): CHAD 123
Term Typically Offered: Fall, Spring

Students will investigate emergent literacy and literacy development of monolingual and multilingual young children from birth to eight, including developmental progressions and the science-based evidence related to foundational language and literacy knowledge. Other focal points will include associations with literacy and home-school connections, cultural influences (socioeconomic status, linguistic, etc.), social and linguistic justice, observation and assessment, theory to practice, and developmental strategies for supporting and understanding literacy development.

CHAD 153. Apprenticeship in Advanced Child Development. 3 Units
Prerequisite(s): Instructor permission
Term Typically Offered: Fall, Spring

Faculty mentors will meet with graduate and undergraduate apprentices individually or in small groups for guided discussions of assigned readings and/or research data analysis/collection endeavors. Prerequisite: Instructor permission.
Note: Readings will depend on the specific mentor’s research or scholarly interest; May be repeated up to four times for 12 units of credit, with a limit of 6 units applied towards the CHAD major requirements.

CHAD 156. Child and Adolescent Development in Context. 3 Units
Prerequisite(s): CHAD 35 or CHAD 30 (or equivalent)
Term Typically Offered: Fall, Spring

Investigation of the dynamic nature of child and adolescent development in the context of families, schools, and community. Students will gain an understanding of how issues in these contexts influence development and explore the dynamic relationships between contexts in promoting development. Attention will be paid to socioeconomic status as a context as well as the role of gender, race and ethnicity within contexts as they relate to development. Students will examine practices that strengthen collaboration between families, schools, and communities.

CHAD 157. Infant and Toddler: Development and Care. 3 Units
Prerequisite(s): One of the following: CHAD 30 or CHAD 35, FACS 50, PSYC 148, or SWRK 125A
Term Typically Offered: Fall, Spring

Research theory and practice are examined in relation to each area of infant and toddler development (conception through 24 months): Physical, social, emotional, cognitive, and perceptual. Individual differences and needs are stressed. Issues pertinent to individual and group care will be covered. Activities include lecture, discussion, and observations.
Cross Listed: FACS 157; only one may be counted for credit.

CHAD 172. Identity Development. 3 Units
Prerequisite(s): CHAD 30 or CHAD 35; CHAD 123 or CHAD 133; CHAD 123 or CHAD 133 may be taken concurrently
Term Typically Offered: Fall, Summer

This course will examine theory and research related to identity development among children, adolescents, and emerging adults. Students will gain an understanding of how identity varies as a function of gender, sexual orientation, income, education, race and ethnicity, abilities, and other factors and how these identities intersect and shape social interactions. In addition, focus will be on how identity shapes experiences of oppression, marginalization, privilege, and power. Methodologies used to understand identity development will also be explored.

CHAD 190. Capstone in Child and Adolescent Development. 3 Units
Prerequisite(s): CHAD 123, CHAD 133; CHAD 137 OR CHAD 138.
Term Typically Offered: Fall, Spring

As a culminating experience for the major, students blend professional and academic knowledge and experience. Students prepare for next professional steps, synthesize scientific knowledge of human development on a relevant topic of their choosing, and complete a related project with application in a community setting. Students complete 40 hours of fieldwork. Projects will be original, evidence-based, and address identified needs in the fieldwork setting. Course culminates in a community-invited senior presentation forum. Recommended to be taken in the final semester.
Note: Fieldwork includes 40 hours of service-learning at approved sites that are primarily off campus; students must complete clearance process (fingerprinting, TB tests) prior to placement; Service Learning may be required.

CHAD 191. Early Childhood Education Practicum. 3 Units
Prerequisite(s): CHAD 123 and CHAD 133.
Term Typically Offered: Fall, Spring

Students will utilize classroom experiences to make connections between theory and practice and develop professional behaviors. Students will plan, organize, implement and evaluate classroom activities under the supervision of a CHAD faculty and a qualified early education professional. Reflective practice will be emphasized as students design, implement, and evaluate approaches, strategies, and techniques that promote development and learning. Completion of 120 hours of supervised practicum is required.

CHAD 194. Cooperative Education Experience. 3 Units
Prerequisite(s): Completion of 60 units total credit and instructor permission. May be taken four times for a maximum of 12 units credit.
Term Typically Offered: Fall, Spring

Cooperative Education (Co-op) relates academic theory to professional practice by providing paid work experience in the student’s major field of study and academic credit. Students receive supervised employment in school districts, state and community agencies, companies and other appropriate settings. Requires regular meetings with faculty supervisor; completion of field study assignment, evaluation by field-based supervisor; and a written final report. Credit/No Credit
CHAD 195. Internship in Child & Adolescent Development. 3 Units
Prerequisite(s): CHAD 30E, 35F, or 30C or equivalent. Completion of 60 units total credit and instructor permission.
Term Typically Offered: Fall, Spring

Designed to provide a range internship experiences where students apply academic knowledge to educational or community settings. Students receive supervised employment in school districts, state and community agencies, companies and other appropriate settings. The field experiences will be combined with class activities designed to develop students' understanding of topics related to their service. Requires regular meetings with faculty supervisor, completion of field study assignment, evaluation by field-based supervisor, and a written final report. The internships can be paid or unpaid.
Credit/No Credit

CHAD 196A. Approaches to Research Methods in Child Development A. 3 Units
Prerequisite(s): CHAD 30 or CHAD 35 or equivalent; completion of 45 total units; Must be taken prior to completion of 90 units.
Term Typically Offered: Fall, Spring

This course examines methodological issues involved in assessment, observation, analysis, and design in the field of child development. Topics include the research process, APA style writing, ethics, design and methods, use assessment tools, qualitative and quantitative data analysis and interpretation. The focus will be on becoming critical consumers of research and developing the skills of scientific inquiry.
Note: First course in a series. 196B must be taken in the semester immediately following completion of CHAD 196A.

CHAD 196B. Approaches to Research Methods in Child Development B. 3 Units
Prerequisite(s): CHAD 196A.
Term Typically Offered: Fall, Spring

Two semester sequence of instruction that examines methodological issues involved in assessment, observation, research design, and analytical concepts involved in the field of child and adolescent development. Topics include the research process, APA style writing, ethics, design and methods, use assessment tools, qualitative and quantitative data analysis and interpretation. The focus will be on becoming critical consumers of research and developing the skills for scientific inquiry.
Note: Must be taken prior to 90 units.

CHAD 196U. Child and Adolescent Development in Context. 3 Units
Prerequisite(s): CHAD 30 or CAHD 35 (or equivalent).
Term Typically Offered: Fall, Spring

Investigation of the dynamic nature of child and adolescent development in the context of families, schools, and community. Students will gain an understanding of how issues in these contexts influence development and explore the dynamic relationships between contexts in promoting development. Attention will be paid to socioeconomic status as a context as well as the role of gender, race and ethnicity within contexts as they relate to development. Students will examine practices that strengthen collaboration between families, schools and community.

CHAD 196X. Guided Human Development Experience Around the World. 3 Units
Prerequisite(s): CHDV 30 or CHDV 35, and 2.75 GPA, or instructor permission. Field trip.
Term Typically Offered: Summer only

Course provides a range of guided learning experiences outside the United States, allowing students to experience human development more broadly to promote a global perspective. Experiences include, but are not limited to, observation, fieldwork, data gathering, or other modes of interaction with the people and culture in the country. Students will reflect on experiences in writing and in discussion in light of readings on developmental theory and research.
Note: Course is credit/no credit. It may be taken twice with different instructors.
Credit/No Credit

CHAD 199. Special Problems. 1 - 3 Units
Term Typically Offered: Fall, Spring

Individual projects designed especially for students capable of independent study. Admission by written approval of the instructor and Department Chair.
Credit/No Credit

CHAD 200. Proseminar in Human Development. 3 Units
Prerequisite(s): Admission to MA Child Development program or instructor permission.
Term Typically Offered: Fall only

Introduction to graduate education in the Child and Adolescent Development Program. Orientation to advanced scholarship in human development with a focus on understanding and evaluating current directions in developmental research. Students will explore interrelations among theory, research, and practice as applied to human development. Students will critically evaluate developmental research as it applies to diverse populations, including issues of antiracism, equity, individual differences, contexts, and historical time. Students will employ writing conventions specific to the discipline.

CHAD 210. Seminar in Social Development. 3 Units
Term Typically Offered: Spring only

Advanced developmental seminar focusing on theoretical and empirical research covering topics in socio-emotional development. Specific topics will be related to socio-emotional development of children from conception through emerging adulthood with consideration of biological, environmental, and sociocultural influences. Students will critically evaluate socio-emotional developmental theories as they apply to diverse populations, individual differences, contexts, and historical time. Students will also reflect on how to use that knowledge to work towards antiracism, equity, and inclusion in the study of socio-emotional development.
CHAD 211.  Seminar in Cognitive Development.  3 Units  
Prerequisite(s): Admission to MA program or instructor permission.  
Term Typically Offered: Fall, Spring  
Advanced developmental seminar focusing on theoretical and empirical research covering topics in cognitive development. Specific topics will be related to cognitive development of children from conception through emerging adulthood with consideration of biological, environmental, and sociocultural influences. Students will critically evaluate cognitive developmental theories as they apply to diverse populations, individual differences, contexts, and historical time. Students will also reflect on how to use that knowledge to work towards antiracism, equity, and inclusion in the study of cognitive development.

CHAD 227.  Seminar in Social Development  3 Units  
Prerequisite(s): CHDV 200 or instructor permission. CHDV 200 may be taken concurrently.  
Term Typically Offered: Fall, Spring  
In-depth examination of the relationship between culture and human development. Opportunities will be provided to evaluate how different theoretical and methodological approaches are used in the study of human development across cultures, including their epistemological principles, scope, and limitations. Developmental research will be used as the foundation to evaluate how diversity in human experiences shape how individuals think, act, and engage with others in local and global settings.

CHAD 242.  Theoretical Approaches to Development.  3 Units  
Prerequisite(s): CHAD 137 or CHAD 138. Graduate standing or instructor permission.  
Term Typically Offered: Fall only  
An in-depth examination of theoretical approaches to various domains of human development. Content includes current and historical developmental theory and application of theory to developmental research. Critical thinking skills and scholarly writing will be emphasized.  
Note: Graduate Writing Intensive course

CHAD 244.  Community Service Learning in Developmental and Educational Settings.  1 - 3 Units  
Term Typically Offered: Fall, Spring  
Designed to provide a range of service learning experiences where students apply their academic knowledge and skills in community-based settings. The community-based experiences will be combined with classroom activities designed to develop student understanding of topics related to their service activities such as tutoring reading and math, mentoring students from disadvantaged backgrounds, working with special populations of children.  
Note: May be taken up to four times for credit (maximum 12 units of credit).  
Credit/No Credit

CHAD 245.  Selected Topics in Developmental Theory.  3 Units  
Prerequisite(s): Admission to MA program or instructor permission.  
Term Typically Offered: Fall, Spring  
In-depth study of a selected topic in human development. Topic varies with each offering by rotating instructors. This course explores contemporary advancements in theory and research in the selected sub-discipline or topical area within human development.  
Note: May be taken twice as long as topics and instructors differ.

CHAD 246.  Motivation and Learning in Children.  3 Units  
Prerequisite(s): Graduate standing, or instructor permission.  
Term Typically Offered: Fall, Spring  
Sources of and developmental changes in motivation, including biological predispositions, critical life events, individual differences, and social, cultural and educational experiences will be examined. Students will participate in a group research effort on motivation and educational practice.

CHAD 247.  Seminar in Culture and Human Development.  3 Units  
Prerequisite(s): CHDV 200 or instructor permission. CHDV 200 may be taken concurrently.  
Term Typically Offered: Fall, Spring  
In-depth examination of the relationship between culture and human development. Opportunities will be provided to evaluate how different theoretical and methodological approaches are used in the study of human development across cultures, including their epistemological principles, scope, and limitations. Developmental research will be used as the foundation to evaluate how diversity in human experiences shape how individuals think, act, and engage with others in local and global settings.

CHAD 248.  Curriculum and Instruction.  3 Units  
Prerequisite(s): Graduate standing or instructor permission.  
Term Typically Offered: Fall, Spring  
Advanced study of the sociocultural influences on curriculum development. Research, theory, and curricular practices will be analyzed, evaluated and applied to a variety of preschool and primary grade settings.

CHAD 249.  Language Processes in Development.  3 Units  
Prerequisite(s): Admission to MA program or instructor permission.  
Term Typically Offered: Fall, Spring  
Language is an important cognitive and communicative tool that promotes learning. Through an integrative approach to language and cognitive development, students will examine how children learn through language. Students will have practical experience in collecting and analyzing children's language learning in educational settings.

CHAD 250.  Advanced Quantitative Research Methods in Human Development.  3 Units  
Prerequisite(s): CHAD 133; admission to the MA program or instructor permission.  
Term Typically Offered: Fall, Spring  
Critical analysis of quantitative research methods used in the study of human development and their philosophical underpinnings. Major topics include design; ethical conduct of research inquiry; the generation of research questions and hypotheses; and data collection, analysis, and interpretation. Critical thinking and disciplinary style writing skills will be emphasized.

CHAD 253.  Apprenticeship in Advanced Child Development.  3 Units  
Prerequisite(s): Instructor permission.  
Term Typically Offered: Fall, Spring  
Faculty mentors will meet with graduate and undergraduate apprentices individually or in small groups for guided discussions of assigned readings and/or research data analysis/collection endeavors.  
Note: Readings will depend on the specific mentor's research or scholarly interest; May be repeated up to 4 times for credit.

CHAD 258.  Advanced Qualitative Research Methods in Human Development.  3 Units  
Term Typically Offered: Fall, Spring  
Critical analysis of qualitative research methods used in the study of human development and their philosophical underpinnings. Major topics include design; ethical conduct of research inquiry; the generation of research questions; and data collection, analysis, and interpretation. Critical thinking and disciplinary style writing skills will be emphasized.
CHAD 290. Writing a Proposal.  3 Units
Prerequisite(s): CHAD 200 and CHAD 242 or instructor permission.
Corequisite(s): CHAD 250 or CHAD 258
Term Typically Offered: Fall, Spring

Seminar to focus on creating a proposal for the culminating experience (thesis/project). Students will be required to review various source materials related to their topic in human development, and synthesize the extent knowledge to justify their study or project. Course culminates with the completion of the research proposal.
Credit/No Credit

CHAD 292. Culminating Seminar for Exam Option.  3 Units
Prerequisite(s): Completion of all foundation course requirements for MA program (CHAD 200A, CHAD 200B, CHAD 242, CHAD 247, CHAD 250) advancement to candidacy, or instructor permission.
Term Typically Offered: Fall, Spring

Seminar to focus on topics/elements/expectations for the exam option culminating experience: test preparation and tips, exam writing, practice exam questions, time management, and community building with other students. Students will complete reading and writing assignments related to each exam area and prepare for an exam question related to an approved elective topic of their choice. Students will submit an exam petition to be reviewed and approved by the departmental exam committee.
Credit/No Credit

CHAD 295. Practicum in Child Development.  1 - 3 Units
Prerequisite(s): Graduate standing, or instructor permission.
Term Typically Offered: Fall, Spring

Directed field based experience in preschool, elementary or other community based settings serving children from infancy through adolescence and their families. Designed to provide students the opportunity to develop professional skills and understandings in applied settings or explore career development opportunities with particular emphasis on leadership or administrative skills and knowledge.
Note: Students are required to work at an instructor-approved field site consistent with their career goals and interests and attend an on campus seminar.

CHAD 299. Special Problems.  1 - 3 Units
Prerequisite(s): Open only to upper division and graduate students with consent of faculty advisor and Department Chair.
Term Typically Offered: Fall, Spring

Individual projects at graduate level designed especially for students capable of independent study. Departmental petition, signed by instructor with whom student will be working and department chair, required.
Credit/No Credit

CHAD 504. Culminating Experience in Child Development: Thesis or Project.  3 Units
Prerequisite(s): Advancement to candidacy within the MA Child and Adolescent Development Program.
Term Typically Offered: Fall, Spring

Guidance toward completion of the culminating experience for the MA Child and Adolescent Development program. Credit is given upon successful completion of an approved culminating experience. Open only to graduate students who have 1) advanced to candidacy for the Master’s degree, and 2) secured the permission of their faculty advisor and the Department Chair one full semester prior to registration. Note: Taught in ASL without voice.

CHAD 505. Culminating Experience in Child Development: Exam Option.  3 Units
Prerequisite(s): Admission to and completion of all course requirements for the MA, Child Development program, CHAD 292 or instructor permission.
Term Typically Offered: Fall, Spring

Guidance in ongoing preparation for the examination option for the MA, Child Development program. Credit is given upon successful completion of the examination option for the culminating experience. Open only to the graduate student who has completed all other course requirements, has been advanced to candidacy for the Master's degree, and has secured the permission of the Department Chair one full semester prior to registration.
Credit/No Credit

DEAF 51. American Sign Language 1.  4 Units
Term Typically Offered: Fall, Spring

Students will learn basic vocabulary and grammar of American Sign Language. Upon completion of this course, students will be able to exchange basic information about themselves and their families such as their names, where they live, and their interests. Through out-of-class readings, in-class discussions and demonstrations, and experiences within the deaf community, students are exposed to elements of the deaf culture and community.

DEAF 52. American Sign Language 2.  4 Units
Term Typically Offered: Fall, Spring

Students will continue to expand vocabulary and concepts acquired in DEAF 51. Expansion of conversational range includes talking about other people and activities, giving directions, and making requests. Students develop discourse skills appropriate for establishing connections with deaf acquaintances and handling a variety of interruptions. Through in-class discussions/demonstrations, course readings, and out-of-class field experience, students are exposed to elements of the deaf culture and community.
Note: Taught in ASL without voice.

DEAF 53. American Sign Language 3.  4 Units
Prerequisite(s): DEAF 52 or equivalent.
General Education Area/Graduation Requirement: Foreign Language Graduation Requirement, Humanities (Area C2)
Term Typically Offered: Fall, Spring

Students will expand communicative repertoire developed in DEAF 52 to talk about people and places in a contextually-reduced framework. Students learn to describe places, objects, and events. Students develop basic narrative skills to tell about past events. Through in-class discussions/demonstrations, course readings, and out-of-class field experience, students are exposed to elements of the deaf community and culture.
Note: Taught in ASL without voice.
DEAF 56. ASL Fingerspelling and Numbers. 1 Unit
Prerequisite(s): DEAF 52
Term Typically Offered: Fall only

Students will develop increased fluency in their expressive and receptive abilities in fingerspelling through in-class practice and viewing of videotaped narratives. Students will also reinforce their abilities to utilize ASL numbering systems for time, money, measurements, and game scores, amount others.

DEAF 57. ASL Classifiers. 2 Units
Prerequisite(s): DEAF 53; may be taken concurrently
Term Typically Offered: Fall and Spring

Students will develop increased understanding of the types and uses of classifiers in ASL and develop further abilities to utilize this component of ASL in their expressive and receptive signing abilities through in-class practice, viewing of videotaped narratives, and individual practice outside of class.

DEAF 60. Introduction to Deaf Studies. 3 Units
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall and Spring

Course introduces students to topics central to the deaf and deaf community, including audiology, education, culture, and history. Utilizing readings, lectures and group discussion, students will learn about the anatomy and causes of deafness, early intervention and education of deaf children, communication strategies and their effectiveness, the deaf as a cultural group and deaf/hearing relationships. Upon course completion, students will understand deaf individuals and their community in a holistic perspective and apply this knowledge toward further studies into the deaf culture and community.

DEAF 154. American Sign Language 4. 4 Units
Prerequisite(s): DEAF 53
Term Typically Offered: Fall and Spring

Principles, methods and techniques of manual communication with deaf people using American Sign Language. Emphasis on the continuation of developing advanced manual communication skills with a focus on techniques for informing others of factual information and instruction about rules and methods for students who will work or interact with adult deaf persons. Continuation of the analysis of the culture of deafness with emphasis on participation in the community.

Note: Taught in ASL without voice.

DEAF 155. American Sign Language 5. 4 Units
Prerequisite(s): DEAF 154 or instructor permission
Term Typically Offered: Fall, Spring, Summer

Students will build upon communicative skills developed in EDS 154 to develop and expand on their abilities to discuss parts of the body and health conditions, tell a personal narrative about themselves and moments in theirs and others' lives, as well as to retell and translate simple stories into ASL.

DEAF 161. Deaf History. 3 Units
Prerequisite(s): DEAF 60, DEAF 154
Term Typically Offered: Fall, Spring

An overview of the education of the deaf from prehistoric times to the present will be provided. Roots of current trends and events in deaf education will be explored, with projections for the future. Current issues such as mainstreaming, cochlear implants, communication modalities for instruction and others are discussed in both a historical context and from a deaf perspective.

DEAF 162. Deaf Culture and Community. 3 Units
Prerequisite(s): DEAF 60, DEAF 154
Term Typically Offered: Fall, Spring

Course introduces students to deaf people as a cultural and linguistic minority in America through coverage of sociolinguistic, anthropological, and historic issues in the development of deaf culture and community in America and worldwide. Utilizing readings, lectures and group discussion, topics will include: theories of culture; language use; cross-cultural interaction and intercultural processes, and deaf literature and art. Upon course completion, students will understand current and past educational, legal and medical policies and their impact on deaf and hard-of-hearing people.

DEAF 163. ASL Literature. 3 Units
Prerequisite(s): DEAF 154
Term Typically Offered: Spring only

Students will learn several different forms of ASL literature. Aspects of both form and content will be analyzed as well as their role in the preservation and circulation of Deaf cultural forms. Students will also learn to perform narratives and/or poems in ASL. They will understand the effects of genre, style, perspective, and other artistic techniques on ASL signed art performances, and utilize similar techniques in their developed performances. Students may perform their stories for a general audience.

Note: Course taught in ASL with No Voice.

DEAF 164. Sign Language Structure and Usage. 3 Units
Prerequisite(s): DEAF 154 or instructor permission
Term Typically Offered: Fall only

Examines origins and linguistic structure of American Sign Language (ASL). Cross-linguistic comparisons with spoken and signed languages of other countries will be made. Students will learn aspects of ASL phonology, morphology and syntax. Sociolinguistic aspects of ASL usage in regard to gender, ethnicity, geographical region and educational status will be discussed. Conducted entirely in American Sign Language.

DEAF 165. Seminar: Current Issues in the Deaf World. 3 Units
Prerequisite(s): DEAF 154 or instructor approval
Term Typically Offered: Fall, Spring

This course will explore a specific theme of interest to faculty and students within the program, with course content changed each semester. Selected topics will touch upon issues of special concern and interest to the Deaf community such as genetics, multicultural issues, media representations of deafness, theatre and performance art, visual arts, and other subjects which may arise in the future. Course will consist of readings, discussion, independent research, and viewing of various media as appropriate.

Note: 1) May be repeated when different topic is offered with a different instructor of record 2) Course taught in ASL with No Voice.
DEAF 165A. Spec. topic: English/ASL Translation. 3 Units
Prerequisite(s): DEAF 154
Term Typically Offered: Fall only – even years

This course will focus on translation from written English to ASL. Texts will be examined at the lexical, phrasal, sentential, and extended text levels. Idiomatic and metaphorical language will also be explored. The aim of this course is to develop an understanding of the lexical and syntactical relationships between ASL and English, with the end goal being the students' ability to produce grammatically and conceptually correct signed translations of printed English texts.

DEAF 165B. Spec. Top: Deaf Education - Power & Politics. 3 Units
Prerequisite(s): DEAF 60, DEAF 154, DEAF 161, DEAF 162
Term Typically Offered: Spring only – even years

This course will explore issues of special concern and interest to the Deaf community; More specifically, this course will explore power dynamics and politics of Deaf education through four different dimensions: Language deprivation, audism, educational leadership, and parents of d/Deaf children. The course will consist of readings, discussion, independent research, and viewing of various media as appropriate.

DEAF 165C. Technology and The Deaf Community. 3 Units
Prerequisite(s): DEAF 154 or instructor permission.
Term Typically Offered: Fall only – odd years

This course will focus on technology for communication and sound access and its use within the Deaf Community. The history of this technology and its development will be examined for what makes it useful and acceptable to Deaf/HH individuals. This overview will include analysis of the processes of development and marketing of these devices. The hidden burden of device development and usage will be examined using need and usability analysis.

Note: Conducted entirely in American Sign Language.

DEAF 165D. Spec. Top: Global Deaf Languages & Cultures. 3 Units
Prerequisite(s): DEAF 60, DEAF 154, DEAF 162
Term Typically Offered: Spring only – odd years

This course explores the phenomenon of International Sign, centering around three themes: (1) Sociolinguistics – How languages emerge and change; (2) International Sign – What it is, what it isn’t, and how meaning is constructed; and (3) Deaf Communities around the globe.

DEAF 165E. Deaf Representation in Media. 3 Units
Prerequisite(s): DEAF 60, DEAF 154, DEAF 162
Term Typically Offered: Spring only – odd years

This course will explore issues of special concern and interest to the Deaf community, specifically relating to Deafness and mass media representation. Examples from journalism, TV, film, advertising, photography, documentaries, comic art, and the Internet will be provided and analyzed. The course will consist of readings, discussion, independent research, and viewing of various media as appropriate.

DEAF 166. Experiences in the Deaf Community - Dynamics of Oppression and Building Allyship. 3 Units
Prerequisite(s): DEAF 155, DEAF 161, DEAF 162.
Term Typically Offered: Fall, Spring, Summer

This course links active participation in the Deaf community to the content of previous Deaf Studies courses. In particular this course examines how to be a good ally within the Deaf community in the midst of a context of power, privilege and difference. Following a Service Learning model, students will collaborate on various service projects contributing to the Deaf community. Field trip.

Note: Course taught in ASL with No Voice.

Field trip(s) may be required.

DEAF 199. Independent Study in Deaf Studies. 1 - 3 Units
Prerequisite(s): DEAF 154
Term Typically Offered: Fall, Spring

Individual projects designed especially for students capable of independent study.

Note: Departmental petition required.

EDUC 1. Education, Equity, & American Society. 3 Units
General Education Area/Graduation Requirement: GE AREA D, Race & Ethnicity Graduation Requirement (RE)
Term Typically Offered: Fall, Spring, Summer

This introductory course provides an overview of the broad landscape of public education in the United States. The course includes three units: 1) Historical Moments in Education, 2) Contemporary Issues in Education, and 3) Social Justice Approaches in Education. Each unit introduces students to ways in which race, ethnicity, and intersectional identities have shaped students’ experiences in schools. The goal of the course is to acquaint students with historical practices and systems that inform present school conditions, and socially just reforms.

EDUC 10. Critical Thinking and the Educated Person. 3 Units
General Education Area/Graduation Requirement: Critical Thinking (A3)
Term Typically Offered: Fall, Spring

Examines thinking process patterns and dispositions, for self, children, parents and educators. Familiarizes students with critical thinking, provides a systematic approach to its process and components. Students will learn about problem solving, decision-making, logical and creative thinking. The study of critical thinking will be supplemented with readings, discussions, and written assignments. Implements critical thinking applications used both in student’s academic and personal lives.

EDUC 10H. Critical Thinking and the Educated Person: Honors. 3 Units
Prerequisite(s): Open only to Honors students.
General Education Area/Graduation Requirement: Critical Thinking (A3)
Term Typically Offered: Fall, Spring

This introductory course will examine the thinking process patterns and dispositions for self, children, parents and educators. The purpose of this course is to familiarize students with critical thinking, and to provide a systematic approach to its process and components. Students will learn about problem solving, decision-making, logical and creative thinking. The study of critical thinking will be supplemented with readings, discussions, and written assignments. The course will implement critical thinking applications used both in student’s academic and personal lives.

Introduction to diverse mathematical thought, action and practices across cultures. Mathematics will be seen from a diversity of contexts. Learners will consider how diverse contexts and traditions both reflect a culture's heritage and world view and influence the mathematics learned and used. Topics covered include: ethnomathematics, mathematical modeling, and cultural connections in relation to diverse forms of quantitative reasoning, problem solving, numbering, systems of organization, perceptions of time and space as experienced by diverse traditions and peoples.

Note: may be repeated for up to 12 units of credit.
EDUC 104. Teaching Issues of Diversity in Schools and Workplace. 3 Units
Prerequisite(s): Students must be admitted to the BSCTS program.
Term Typically Offered: Fall, Spring, Summer

Demonstrates how to encourage excellence among and design instruction from different gender, ethnic, sexual orientation, language, and ability groups. This course aims to include research and discussion on education and employment law in regards to sensitivity towards cultural heritages, principles of language acquisition, bias free instructional/ workplace materials and inclusive practices.

EDUC 105. Advanced Instructional Design, Program Evaluation and Leadership in Career Technical Studies. 3 Units
Prerequisite(s): Students must be admitted to the BSCTS program.
Term Typically Offered: Fall, Spring, Summer

Explores aspects of CTS program design and management. Investigates aspects of organizing a program following guidelines detailed in the California Career Technical framework. Considers methods of program evaluation following the model set forth by the Western Association of Schools and Colleges (WASC). Examines leadership qualities and values, analyzing potential benefits and liabilities of various leadership styles.

EDUC 106. Individual Growth Through the Examination of Personal Assets, Philosophies and Life Experiences. 3 Units
Prerequisite(s): Students must be admitted to the BSCTS program.
Term Typically Offered: Fall, Spring, Summer

This course is designed as a primer for EDUC 107 by introducing concepts, exercises, and research that focus on the personal elements associated with leadership and self-growth. Participants will develop greater self-awareness and understanding of key personal assets/ issues that impact leadership development and enhance organizational communication and growth. The impact of life experiences and personal philosophies will be discussed as they relate to effective leadership development. An inter-disciplinary approach to personal growth and development will be emphasized.

EDUC 107. Designing Solutions. 3 Units
Prerequisite(s): Students must be admitted to the BSCTS program.
Term Typically Offered: Fall, Spring, Summer

Offers student participation in innovative solutions to organization, team, and individual needs. Using design thinking’s iterative process, students will be able to identify needs and develop potential solutions to meet those needs to improve performance.

EDUC 109. Career Guidance in Career Technical Studies. 1 Unit
Prerequisite(s): Application for Review of Work Experience. Students must be admitted to the BSCTS program.
Term Typically Offered: Fall, Spring, Summer

Examines the professional history of students and assists them in gathering documentation to support their Experimental Learning Portfolio for submission to the CSU Reviewing Committee. Assists students in identifying goals for professional accomplishment.
Credit/No Credit

EDUC 110. Current Issues in Workforce Development. 3 Units
Prerequisite(s): Students must be admitted to the BSCTS program.
Term Typically Offered: Fall, Spring, Summer

Course provides an in-depth investigation of various challenges and issues facing workforce development professionals in the public and private sectors. Students will utilize Design Thinking tools in order to identify and study critical workforce development issues, and develop solutions that benefit the individual and organization.

EDUC 111. Education for Career Technical Students with Special Needs. 3 Units
Term Typically Offered: Fall, Spring

Introduces concepts and practices of inclusion of special needs students as provided for under federal legislation and case law. Methods of adapting instruction and devising positive behavioral supports for students of diverse abilities are studied. Methods of assessing the progress of students with diverse abilities are examined.

EDUC 112. Organizational Policies, Finance and Legislation. 3 Units
Prerequisite(s): Students must be admitted to the BSCTS program.
Term Typically Offered: Fall, Spring, Summer

This course aims to provide students with information which will enhance their understanding of organizational finance, legislation and policies. Critical to this course is the understanding that Career and Technical Education (CTE) organizations rely on local, state and national policy, finance and legislation to function.

EDUC 113. Implement Digital Technologies with Ethical Knowledge. 3 Units
Prerequisite(s): Students must be admitted to the BSCTS program.
Term Typically Offered: Fall, Spring, Summer

Develop professional competencies in digital and emerging technologies, defined by the National Association of Colleges and Employers (NACE) taskforce. Cultivate a keen awareness about digital technologies when blending fundamental ethical principles and foresight to make quality decisions. Identify and implement effective pathways to learn and ethically adapt emerging technologies strategically. Solve problems effectively to attain sustainable goals.

EDUC 114. Theories and Practices of Multiculturalism in Schools and Organizations. 3 Units
Prerequisite(s): Students must be admitted to the BSCTS program.
Term Typically Offered: Fall, Spring, Summer

An introduction to the study of multiculturalism and its impact on schools and the workplace. The primary objective is to provide a learning environment which is conducive to the development of knowledge, understanding, and skills consistent with multicultural training and pluralistic philosophies. Students will examine the work of adult education theorists and business scholars that impact schools and the workforce. The course examines social institutions, beliefs, customs, and social trends affecting adult education, organizations, and the workforce.
EDUC 115. Improvement Science for Organizational Effectiveness. 3 Units

Prerequisite(s): Student must be admitted to the BSCTS program.
Term Typically Offered: Fall, Spring, Summer

Course explores improvement science methods for disciplined inquiry to solve specific problems of practice. Using assessment tools, strategic planning, systems thinking and organizational development, this course focuses on creating innovative solutions to business and marketplace challenges.

EDUC 116. Methods of Inquiry in Career Technical Studies. 3 Units

Prerequisite(s): Student must be admitted to the BSCTS program
Term Typically Offered: Fall, Spring, Summer

This course provides students with a broad overview of methods and models of academic research. Students will evaluate sources and prioritize those with the highest quality according to key identifying factors. Students will gain understanding of how individual research models are matched to specific issues and problems within the domain of Career Technical Studies, and relate these to their own individual growth and career development based upon their particular interests, goals and strengths.

EDUC 117. Field Experience in Career Technical Education. 1 - 6 Units

Prerequisite(s): Student must be admitted to the BSCTS program
Term Typically Offered: Fall, Spring

Individualized field experience designed collaboratively by the student and instructor.

Note: Department consent required
Credit/No Credit

EDUC 118. Integrative Perspectives in Leadership. 3 Units

Prerequisite(s): Students must be admitted to BSCTS program.
Term Typically Offered: Fall, Spring, Summer

This course explores methods of integrative thinking, holistic leadership practices, cultural perspectives, and mindful communication techniques for current and future leaders. This course defines leadership styles and gives students the opportunity to apply integrative thinking models across multiple disciplines.

EDUC 120. Literature For Children. 3 Units

Prerequisite(s): Must have Junior or higher standing to enroll in this course
Term Typically Offered: Fall, Spring

Historical and modern children’s literature; standards of selection and acquaintance with the leading authors and illustrators; procedures and practices in methodology.

EDUC 121. Multicultural Children's Literature. 3 Units

Prerequisite(s): GWAR certification before Fall 09; or WPJ score of 80+; or 3-unit placement in ENGL 109M or ENGL 109W; or 4-unit placement in ENGL 109M or ENGL 109W and co-enrollment in ENGL 109X; or WPJ score 70 or 71 and co-enrollment in ENGL 109X.
General Education Area/Graduation Requirement: Writing Intensive Graduation Requirement (WI), Race & Ethnicity Graduation Requirement (RE), Humanities (Area C2)
Term Typically Offered: Fall, Spring, Summer

Survey of historical and modern multicultural children's literature examining standards of selection and acquaintance with the leading authors, illustrators and book awards; procedures and practice in methodology. Focus on children's literature which represents the diversity in America and fosters an understanding of the cultural values, identity, and heritage of those populations.

EDUC 124A. Tutoring Children in Mathematics. 2 Units

Corequisite(s): EDUC 124B.
Term Typically Offered: Fall, Spring

Orientation to concept and practice of tutoring basic mathematics skills including developing conceptual understanding and the ability to scaffold instruction of addition, subtraction, multiplication and division of whole numbers, fractions, and decimals. After completing on-campus training, students are placed in nearby school districts. May be taken by all undergraduate students and is strongly recommended for students considering careers in education, criminal justice, psychology, and social work. It may also be used as an elective in the Blended Teacher Education Program.

Note: May be taken twice for credit.
Credit/No Credit

EDUC 124B. Tutoring Children in Mathematics: Practicum. 1 Unit

Corequisite(s): EDUC 124A.
Term Typically Offered: Fall, Spring

Practicum of tutoring basic mathematics skills and scaffolding instruction of addition, subtraction, multiplication and division of whole numbers, fractions, and decimals. After completing on-campus training, students are placed in nearby school districts. May be taken by all undergraduate students and is strongly recommended for students considering careers in education, criminal justice, psychology, and social work. It may also be used as an elective in the Blended Teacher Education Program.

Note: May be taken twice for credit.
Credit/No Credit

EDUC 125A. Tutoring Children in Reading. 2 Units

Corequisite(s): EDUC 125B.
Term Typically Offered: Fall, Spring

Orientation to concept and practice of tutoring basic reading skills including sight word recognition, word analysis skills, oral fluency, and comprehension. After completing on-campus training, students are placed in nearby school districts.

Note: Strongly recommended for students considering careers in education, criminal justice, psychology and social work. May be repeated once for credit. May also be used as an elective in the Blended Teacher Education Program.

Credit/No Credit
EDUC 125B. Tutoring Children in Reading Practicum. 1 Unit
Corequisite(s): EDUC 125A
Term Typically Offered: Fall, Spring

Field-based course provides a synthesis and application of course content learned in EDUC 125B. Students are placed in a primary level setting for at-risk students who read approximately two grade levels below their peers. The twice-weekly practicum focuses on comprehension questioning strategies, learning styles and differences, multicultural and ESL strategies, Reader’s theater and poetry, and motivating students to achieve greater academic success.

Note: May be taken by all undergraduate students and must be taken concurrently with EDUC 125A.

Credit/No Credit

EDUC 126. Assisting the Elementary Classroom Teacher. 3 Units
Prerequisite(s): EDUC 125A.
Term Typically Offered: Fall, Spring

Directly connected to hands-on classroom experiences. Students will be intensively trained in workshops, and will work as teacher assistants in public schools (4 hours per week). Students will learn strategies for working with diverse groups of students at all grade levels; keep weekly tutoring logs; and write a case study on a student and present their findings to the class. Students will reflect on their own growth and development.

Note: May be repeated once for credit.

Credit/No Credit

EDUC 127A. Field Experience in After School STEM Programs. 2 Units
Corequisite(s): EDUC 127B
Term Typically Offered: Fall, Spring

Orientation to high quality Science, Technology, Engineering, and Mathematics (STEM) instruction. On-campus training includes skills to develop conceptual understanding and ability to scaffold instruction for elementary and middle school aged students in STEM after school programs. After completing on-campus training, students assist with instruction in nearby school STEM programs.

Note: May be taken twice for credit.

Credit/No Credit

EDUC 127B. Field Experience in After School STEM Programs: Practicum. 1 Unit
Corequisite(s): EDUC 127A
Term Typically Offered: Fall, Spring

This course is designed to connect students with local public school partners in after school programs that support inquiry based STEM activities with K-8 children. After completing on-campus training, students then complete the practicum.

Note: May be taken twice for credit

Credit/No Credit

EDUC 128. Education and Communication in Korean Society. 3 Units
Term Typically Offered: Fall, Spring

This course is designed to explore various dimensions of the education and the communication in Korea. It will focus on (a) the Korean educational philosophy, system, and practices of all levels - preschool to higher education; (b) the Korean language in a variety of communicative contexts; and (c) how education and communication shape and interface. The similarities and differences in education and communication between South Korea and the United States will be also investigated.

EDUC 129. Teaching Science in Outdoor Settings. 3 Units
Term Typically Offered: Fall, Spring

This course provides students with experiential learning in an outdoor setting with the aim of developing and implementing outdoor education activities for children grades 4-7. By engaging in the practices of mindfulness and ecotherapy, students will gain awareness and appreciation for the outdoors. Students will also gain knowledge on how to implement science-focused activities that incorporate the Next Generation Science Standards and California’s Environmental Principles and Concepts while incorporating Social Emotional Learning Principles and Standards.

Note: Students will be required to attend the field site during scheduled class meeting times and must complete fieldwork clearance paperwork. Course can be repeated.

Credit/No Credit

EDUC 130A. Typical & Atypical Developmental Characteristics and Outcomes for Young Children with Disabilities. 2 Units
Prerequisite(s): CHDV 30 or approved equivalent.
Corequisite(s): EDUC 130B.
Term Typically Offered: Fall, Spring

Examination of disabilities and risk factors and their influence on developmental competencies and outcomes for infants, toddlers, and young children. Content will include typical developmental patterns of young children, atypical development due to prenatal, perinatal and early childhood developmental risk factors including low incidence disabilities, and an introduction to interventions in a range of community settings to address the unique needs of these children and their families. Lecture.

EDUC 130B. Typical & Atypical Developmental Characteristics and Outcomes for Young Children with Disabilities Lab. 1 Unit
Prerequisite(s): CHDV 30 or approved equivalent.
Corequisite(s): EDUC 130A.
Term Typically Offered: Fall, Spring

Field-based practice lab (30 hours). Lab will be a synthesis and application of lecture/discussion course content in home based, center based, and community settings serving infants, toddlers, and young children with disabilities and their families.

Credit/No Credit
EDUC 131A. Introduction to Family Centered Service Delivery In Early Childhood Special Education. 2 Units

Prerequisite(s): EDUC 130A and EDUC 130B or its equivalent.
Corequisite(s): EDUC 131B.
Term Typically Offered: Fall, Spring

Designed to enable participants to gain knowledge and develop skills necessary to provide culturally responsive, family-centered approaches to assessment and intervention for infants and young children with disabilities. Focus will be on the historical, theoretical, and philosophical bases for family-centered service delivery, including an emphasis on understanding family systems and family life stages, respect for cultural diversity, the IFSP process, collaborative parent-professional relationships, parent advocacy, and transition planning. Lecture.

EDUC 131B. Introduction to Family Centered Service Delivery in Early Childhood Special Education Laboratory. 1 Unit

Prerequisite(s): EDUC 130A and EDUC 130B or its equivalent.
Corequisite(s): EDUC 131A.
Term Typically Offered: Fall, Spring

Field-based practice lab (30 hours). Lab will be a synthesis and application of lecture course content (EDUC 131A) in home-based, center-based and/or community settings serving infants and young children with disabilities and their families.
Credit/No Credit

EDUC 155. Introduction to Counseling. 3 Units

Term Typically Offered: Fall, Spring

Introduction to the profession of counseling, including differences between professional counseling and other professions, counseling theories, consultation skills and an introduction to basic counseling skills. Lecture three hours. Requirement for the Counseling minor, not included in 200-series 60 unit program for master’s degree.

EDUC 156. Power, Privilege and Self Identity in Counseling. 3 Units

Term Typically Offered: Fall, Spring

Focuses on understanding how one’s values, attitudes, belief systems impact perception of differences related to race, ethnicity, culture, etc. Experiential activities promote self awareness while developing capacity in becoming a culturally responsive/skilled counselor. Historical processes that created inter and intra group constructs are explored. Required for the Counseling Minor, not included in 200-series 60 unit master’s degree.

EDUC 157. Child and Family Psychopathology. 3 Units

Prerequisite(s): Students minoring in counseling must take CHDV 30 or CHDV 35 or PSYC 2.
Term Typically Offered: Fall, Spring

Examines the etiology of development and mental health issues in children, youth and caregivers, including genetic and socio-cultural factors. The classification and treatment of abnormal behavior within family contexts will also be explored. Recommended for human services majors such as child development, education, psychology, counseling, social work and criminal justice.

EDUC 158. Latinas/os/x in Education. 3 Units

General Education Area/Graduation Requirement: GE AREA D, Race & Ethnicity Graduation Requirement (RE)

Term Typically Offered: Fall, Spring, Summer

This course provides an overview of Latinas/os/x educational experiences within the United States. Students will analyze how historical, contemporary, social, political, and economic forces have shaped Latinas/os/x educational access and attainment. The course will examine how identity markers such as race, ethnicity, language, immigration status, gender, and sexuality inform Latinas/os/x educational pathways. While the course centers on Latinas/os/x, students will compare and contrast Latinas/os/x educational experiences with other Students of Color.

EDUC 160. Urban Education. 3 Units

Prerequisite(s): GWAR certification before Fall 09; or WPJ score of 80+; or 3-unit placement in ENGL 109M or ENGL 109W; or 4-unit placement in ENGL 109M or ENGL 109W and co-enrollment in ENGL 109X, or WPJ score 70 or 71 and co-enrollment in ENGL 109X.

General Education Area/Graduation Requirement: Race & Ethnicity Graduation Requirement (RE), Writing Intensive Graduation Requirement (WI), GE AREA D

Term Typically Offered: Fall, Spring

Designed to enhance students’ knowledge of urban schooling, especially related to dynamics of race, class, and culture. Along with a Service Learning component in urban schools, provides analysis of the following: historical, socioeconomic, and political factors influencing urban education; the distribution of opportunity in cities and their schools; and effective instructional organizational practices that close the achievement gap, including the development of positive school cultures and the use of community services and resources.

EDUC 165. Sex Role Stereotyping in American Education. 3 Units

Prerequisite(s): GWAR certification before Fall 09; or WPJ score of 80+; or 3-unit placement in ENGL 109M or ENGL 109W; or 4-unit placement in ENGL 109M or ENGL 109W and co-enrollment in ENGL 109X; or WPJ score 70 or 71 and co-enrollment in ENGL 109X.

General Education Area/Graduation Requirement: GE AREA D, Writing Intensive Graduation Requirement (WI), Race & Ethnicity Graduation Requirement (RE)

Term Typically Offered: Fall, Spring

This course is designed to introduce students to the educational programs and practices resulting from societal sex role and racial stereotyping. It analyzes the specific effects of sex and race inequalities in the total school setting.
EDUC 168. Foundational Issues for a Multicultural, Pluralistic Society, B.  3 Units
Prerequisite(s): Admission and enrollment in BMED multiple subject credential program; EDBM 117.
Corequisite(s): EDBM 402B.
Term Typically Offered: Fall, Spring
Critical examination of the socio-political relationship between California's public schools and its major population subgroups (as defined by culture, gender, social class, language, race/ethnicity, and ability). Candidates critically reflect on the philosophy and practices of schooling in relation to students' culture, family and community; analyze institutional and instructional practices for educational equity; and develop alternative instructional activities based on the principles of multicultural education and English language learning in a democratic society. Lectures, discussions, small group work, simulations, field tasks.

EDUC 169. Cross-Cultural Bridges: A Humanist Approach to Education.  3 Units
General Education Area/Graduation Requirement: Humanities (Area C2)
Term Typically Offered: Fall, Spring, Summer
This course is designed to expand students' knowledge of how history informs present day dynamics of race, culture, and socioeconomic status in education. Students will examine how humanists in history navigated cultural differences. A critical discourse that centers on humanist pedagogy will be used to show how future educators, leaders, and students can evolve in their own identities to understand cultural differences and how they can create change.

EDUC 170. Introduction to Bilingual Education: Policies, Principles, Programs, and Practices.  3 Units
Term Typically Offered: Fall, Spring
Introductory study and exploration of important themes regarding the education of emergent bi/multilingual students in the context of race, language and power. Covers the history of bilingual education; relevant legal mandates and court rulings; first and second language acquisition; linguistic development; theory and practice of effective programs; and beginning methods, materials and strategies responsive to the students' primary language and assessed levels of English proficiency. A fieldwork component involving the mentorship of an emergent bilingual student is required.

EDUC 171. Bilingualism in the Classroom.  3 Units
Term Typically Offered: Fall, Spring
Provides an overview of the language factors that impact first and second language acquisitions in the K-12 classrooms and will provide opportunities through which they will build a palette of strategies that can be utilized to enhance language development within the realms of listening, speaking, reading, writing, and thinking. A combination of theory and practice will provide the base as students read, discuss, listen to lectures, view videos, conduct in class and field-based tasks, and synthesize their thoughts in writing.

EDUC 172. Introduction to Hmong Literacy.  3 Units
Prerequisite(s): Fluent in Hmong
Term Typically Offered: Fall, Spring
This course covers fundamental literacy components of the Hmong language. It examines the historical development and maintenance of the Hmong oral and written language and related issues based on lectures, class discussions, group work, writing assignments, and a research paper. It fulfills one of the requirements for teaching credential students pursuing the Bilingual Cross Cultural Authorization (BCLAD).

EDUC 173. Hmong History and Culture.  3 Units
Term Typically Offered: Fall, Spring
This course covers history of the Hmong dated 5,000 years ago to the present. It examines Hmong history and culture as it evolves through living in various Asian countries and in the United States through lectures, class discussions, group work, writing assignments, and a research paper.

EDUC 175A. Pedagogy and Academic Language Skills in Spanish for Bilingual Educators (Multiple Subjects).  3 Units
Prerequisite(s): Spanish fluency/literacy required.
Term Typically Offered: Fall only
This course provides opportunities to improve Spanish language for academic and instructional purposes. Students will explore topics in bilingual/biliteracy development, research, and program models, language varieties in Spanish, issues of power and language, advocacy for bilingual students, and engagement with bilingual families, specifically for TK-8th grade dual language contexts. Students also will examine theoretical and pedagogical issues in bilingual education, learn to apply bilingual teaching and assessment methods, analyze TK-8th grade language use, and evaluate Spanish curricular materials.

EDUC 175B. Pedagogy and Academic Language Skills in Spanish for Bilingual Educators (Single Subject).  3 Units
Prerequisite(s): Spanish fluency/literacy required.
Term Typically Offered: Fall only
This course provides opportunities to improve Spanish language for academic and instructional purposes. Students will explore topics in bilingual/biliteracy development, research, and program models, language varieties in Spanish, issues of power and language, advocacy for bilingual students, and engagement with bilingual families, specifically for secondary bilingual contexts. Students also will examine theoretical and pedagogical issues in bilingual education, learn to apply bilingual teaching and assessment methods, analyze 7th-12th grade language use, and evaluate Spanish curricular materials. Includes field component.

EDUC 190A. Becoming an Educator I.  2 Units
Prerequisite(s): All of the following: CHDV 30 or CHDV 35; and CHDV 35F, or equivalents.
Term Typically Offered: Fall, Spring
This is the first in a 2-course series on education as an academic area and profession, designed for students enrolled in teaching credential courses prior to bachelor's completion. Examines personal and academic attributes and achievements necessary for becoming an educator in the general or special education context. This course focuses on fostering personal attributes and fulfilling requirements for entering the profession. Students will complete academic and biographical readings and 30 hours of elementary (TK-8th) classroom observation. Credit/No Credit
EDUC 190B. Becoming an Educator II. 1 Unit
Prerequisite(s): EDUC 190A.
Term Typically Offered: Spring only

This is the second in a 2-course series on education as an academic area and profession, designed for students enrolled in teaching credential courses prior to bachelor's completion. Examines personal and academic attributes and achievements necessary for becoming an educator in the general or special education context. This course focuses on gaining experience in the diverse classroom setting and engaging in reflective teaching practices. Students will complete biographical readings and at least 20 hours of elementary (TK-8th) classroom observation.

Credit/No Credit

EDUC 194. Cooperative Education Experience. 3 Units
Prerequisite(s): Approval of Department Chair.
Term Typically Offered: Fall, Spring

Cooperative Education (Co-op) relates academic theory to professional practice by providing paid work experience in the student's major field of study and academic credit. Students receive employment in school districts, state and community agencies, companies, and other appropriate settings. Requires attendance at weekly meetings, preparation of application packet, completion of field study assignment and a written final report.

Note: Units may not be used to meet course work requirements.

Credit/No Credit

EDUC 196J. Teaching Science in Outdoor Settings. 3 Units
Term Typically Offered: Spring only

This course provides students with experiential learning in an outdoor setting with the aim of developing and implementing outdoor education activities for children grades 4-7. By engaging in the practices of mindfulness and ecotherapy, students will gain awareness and appreciation for the outdoors. Students will also gain knowledge on how to implement science-focused activities that incorporate the Next Generation Science Standards and California's Environmental Principles and Concepts while incorporating Social Emotional Learning Principles and Standards.

Note: Students will be required to attend the field site during scheduled class meeting times and complete fieldwork clearance paperwork.

Credit/No Credit

EDUC 199. Special Problems. 1 - 3 Units
Term Typically Offered: Fall, Spring

Individual projects designed especially for students capable of independent study. Admission by written approval of the instructor with whom the student will be working and Department Chair.

Credit/No Credit

BA in Child and Adolescent Development (Early Development, Care, and Education)

Units required for Major: 52
Total units required for BA: 120

Program Description

The Child and Adolescent Development concentration in Early Development, Care and Education seeks to prepare students to understand and apply developmental perspectives and engage in ethical and reflective practices working with young children from birth through 8 years of age and their families.

This concentration is appropriate for students interested in working with diverse groups of young children and families in early childhood settings including early care and preschool settings and/or as preparation for advanced degree and professional programs. Upon completion of the BA in Early Development, Care, and Education, graduates are eligible for the Child Development Teacher Permit.

This concentration offers core curricula and fieldwork in early childhood development and pedagogy while highlighting family engagement in the context of family, culture, language, and society. Substantive training in language acquisition and literacy for early childhood Dual Language Learners and their families is embedded within the concentration. Students will be able to utilize developmental research, theory, and fieldwork in early childhood development settings to engage, support and improve their pedagogical practice working in early childhood settings.

A grade of "C-" or higher is required for all coursework in the Child and Adolescent Development major.

Area D Course | 3
Area D Course | 3
Area D Course | 0
Area D Course - Take upper-division course to complete Area & upper division requirements. | 0 - 3
Area E: Understanding Personal Development
Area E Course | 2

**Total Units:** 31-43

1 To help you complete your degree in a timely manner and not take more units than absolutely necessary, there are ways to use single courses to meet more than one requirement (overlap). For further information, please visit the General Education page (p. 1103).

2 Required in Major; also satisfies GE.

3 Department offers students a "select from the following" option:
   - If student chooses to take STAT 1, they will meet Area B4.

4 Department offers students a "select from the following" option:
   - If student chooses to take CHAD 143, they will meet Area B5.
   - If student chooses to take CHAD 141 or EDUC 121, they will meet upper division Area C.
   - If student chooses to take ANTH 101, CHAD 145, EDUC 165, ETHN 100, or SWRK 102, they will meet upper division Area D.

### Graduation Requirements

#### Code | Title | Units
---|---|---
Graduation Requirements (required by CSU) (3-9 Units)
American Institutions: U.S. History | 0 - 3
American Institutions: U.S. Constitution & CA Government | 3
Writing Intensive (WI) | 0 - 3
Graduation Requirements (required by Sacramento State) (9 Units)
English Composition II | 3
Race and Ethnicity in American Society (RE) | 0
Foreign Language Proficiency Requirement | 6

1 To help you complete your degree in a timely manner and not take more units than absolutely necessary, there are ways to use single courses to meet more than one requirement (overlap). For further information, please visit the General Education page (p. 1103).

Note: There is no way to list all possible overlaps so please consult with a professional advisor. The Academic Advising Center can be visited online (http://www.csus.edu/acad/), by phone (916) 278-1000, or email (advising@csus.edu).

2 Department offers students a "select from the following" option:
   - If student chooses to take ANTH 101, they will meet the U.S. History graduation requirement.

3 Department offers students a "select from the following" option:
   - If student chooses to take CHAD 145, EDUC 121, EDUC 165, or ETHN 100, they will meet the Writing Intensive (WI) graduation requirement.

4 Required in Major; also satisfies Graduation Requirement.

5 If not satisfied before entering Sacramento State, it may be satisfied in General Education Area C2 (Humanities). "C- or better required."

The alternative methods for satisfying the Foreign Language Proficiency Requirement are described here: https://www.csus.edu/college/arts-letters/world-languages-literatures/foreign-language-requirement.html (https://www.csus.edu/college/arts-letters/world-languages-literatures/foreign-language-requirement.html)

### BA in Child and Adolescent Development

#### Educational Contexts

Units required for Major: 48-49
Total units required for BA: 120

#### Program Description

Child and Adolescent Development is the study of the biological, physical, socio-emotional, and cognitive growth and development of the child from conception through emerging adulthood. Using theory, empirical research, and practice, this rigorous academic program prepares students to work as agents of social change with diverse populations of children, adolescents, emerging adults, and families in a variety of areas, including education, advocacy, research, policy, counseling, and/or other settings.

Students earning the BA in Child and Adolescent Development with a concentration in Educational Contexts will be able to utilize developmental research and theory in their teaching practices to support student learning in various educational contexts. This concentration is appropriate for students interested in working with individuals from

1 CHAD 123 and CHAD 133 are not recommended to be taken in the same semester.
2 Course also satisfies General Education (GE)/Graduation Requirement.
BA in Child and Adolescent Development (Social and Community Contexts)

Units required for Major: 49
Total units required for BA: 120

Program Description
Child and Adolescent Development is the study of the biological, physical, socio-emotional, and cognitive growth and development of the child from conception through emerging adulthood. Using theory, empirical research, and practice, this rigorous academic program prepares students to work as agents of social change with diverse populations of children, adolescents, emerging adults, and families in a variety of areas, including education, advocacy, research, policy, counseling, and/or other settings.

The concentration in Social and Community Contexts is appropriate for students interested in working with diverse groups of children, adolescents, emerging adults, and families in community, social, government or counseling settings and/or for advanced degree and professional programs.

The concentration in Social and Community Contexts seeks to prepare students to support developmental trajectories of children, adolescents, and emerging adults through application of theory and research into practice with diverse community settings. This concentration fosters students’ abilities to apply ecological perspectives and engage in ethical and reflective practices within the local and professional community. Graduates will be able to communicate developmental research to various audiences and collaborate with community stakeholders that provide resources to support the strengths of diverse individuals.

C- or higher is required for all coursework in the Child and Adolescent Development major

1 Students interested in elementary teaching are strongly urged to select courses that will assist in preparation for the CSET examination (see Subject Matter waiver program).

2 Area B5 fulfilled by Math 107A if enrolled in Subject Matter waiver program.

3 Students enrolled in the Subject Matter waiver program are exempt from the 9 unit lower division requirement in Area C.

4 Area C1 fulfilled by ART 133 if enrolled in Subject Matter waiver program.

5 MUSC 101 and HIST 132 together satisfy Area C unit requirements if enrolled in the Subject Matter waiver program.

6 Satisfied by the major, counts for GE.

7 If take STAT 1 or MATH 17, counts as a major elective.

2 Required in Major; also satisfies GE.

3 Department offers students a “select from the following” option:
   - If student chooses to take ANTH 101 for their general elective, they will meet the U.S. History graduation requirement.
   - If student chooses to take CHAD 145, EDUC 121, EDUC 160, or ETHN 100, they will meet the Writing Intensive (WI) graduation requirement.

4 If not satisfied before entering Sacramento State, it may be satisfied in General Education Area C2 (Humanities). “C- or better required.” The alternative methods for satisfying the Foreign Language Proficiency Requirement are described here: https://www.csus.edu/college/arts-letters/world-languages-literatures/foreign-language-requirement.html (https://www.csus.edu/college/arts-letters/world-languages-literatures/foreign-language-requirement.html)

BA in Deaf Studies

Units required for Major 41-44

Total units required for BA: 120

Program Description

Deaf Studies takes an interdisciplinary approach to the study of Deaf and hard-of-hearing people in American and world society. The program promotes the understanding of the Deaf community as a linguistic and cultural group and encourages students to analyze existing stereotypes and policies relating to Deaf and hard-of-hearing people in order to work both within their own communities and others in affecting change for the betterment of the Deaf and hard-of-hearing community.

Admission Requirements

There are no admission requirements, prerequisites or other criteria for admission into the BA in Deaf Studies. Students are encouraged to enter into the program with previously acquired ASL skills in order to continue and build upon their learning before going out into the field in working with Deaf people. Students need to maintain a C (or better) in all Deaf Studies major coursework in order to graduate with a degree in Deaf Studies.

BS in Career and Technical Studies

Program Description

The Bachelor of Science in Career and Technical Studies (BSCTS) is an online degree completion program designed to prepare working adults with practical, marketable skills to successfully enter new careers or advance in their current fields. The program is versatile and can be applied to a variety of disciplines. The degree can serve as a springboard to a master’s degree or as a career ladder into many professions.

This program uses instructional techniques suited to adult learners, including real world instruction and personalized academic advising. We also offer networking opportunities and accelerated programming.

The BSCTS program is offered through a partnership between the College of Continuing Education and the College of Education at Sacramento State. Students must earn a grade of C- or better in all BSCTS major courses in order to earn the degree.

The BSCTS Program requires that students have three years, full-time, paid work experience in a career technical/educational/business field.

The BSCTS Program requires that students have seven years, full-time, paid work experience in a career technical/educational/business field (or five years, full-time, paid work experience in a career technical/educational/business field and vis-

Total Units: 43

1 To help you complete your degree in a timely manner and not take more units than absolutely necessary, there are ways to use single courses to meet more than one requirement (overlap). For further information, please visit the General Education page (p. 1103).

Note: There is no way to list all possible overlaps so please consult with a professional advisor. The Academic Advising Center can be visited online (http://www.csus.edu/acad/), by phone (916) 278-1000, or email (advising@csus.edu).

2 Required in Major; also satisfies GE.
years, full-time, paid work experience and an associate's degree in that field). Remove

Admission to Sacramento State is required for this program. Candidates must complete general education and graduation requirements for Sacramento State and the Career and Technical Studies major.

Notes:

- In addition to the courses listed, students must receive credit through the Application for Review and Evaluation of Work Experience which will go through an evaluation process for past career technical/teaching experience and must be approved by the reviewer for the degree. Students may receive up to 30 elective units from this evaluation.

MA in Child and Adolescent Development

Total units required for MA: 30.0

Program Description

The Master of Arts in Child and Adolescent Development Program offers an opportunity for advanced study of developmental theories and their application in research and practice. Our Program emphasizes scholarly reflection on developmental issues and excellence in disciplinary forms of communication. The Program prepares students to consider the diversity of human development and to critically reflect on how to use that knowledge to work towards antiracism, equity, and inclusion in the field. Graduates of the Program will be able to apply their advanced understanding of theory and empirical research to work as agents of positive social change in a variety of settings including education, advocacy, research, policy, and/or other settings.

For further information please see the Academic Program Services Office, Eureka Hall 401, or check the College of Education's website (http://www.csus.edu/coe/academics/graduate/).

Admission Requirements

Admission as a classified graduate student in the Master of Arts in Child and Adolescent Development Program requires:

- a BA in Child and Adolescent/Human Development or a closely-related field
- minimum 3.0 GPA in the last 60 units completed;
- completion of an upper-division course in research methods (e.g., CHAD 123, CHAD 128, and/or CHAD 133, or equivalent);
- completion of an upper-division course in human development theories (e.g., CHAD 137 and/or CHAD 138, or equivalent)

Opportunity exists for conditional classification of applicants with an undergraduate major and experiences different from those listed above. This requires that students demonstrate convincingly that they are competent to pursue the degree.
Admission Procedures

All prospective graduate students, including Sacramento State graduates, must submit a University application. The application must be submitted by the deadlines stated on the College of Education and Office of Graduate Studies websites. Required application materials include:

- online application for admission;
- official transcripts from all colleges and universities attended, other than Sacramento State;
- statement describing the applicant's educational and professional background and how graduate study will advance the applicant's professional goals; and
- two academic and/or professional letters of recommendation.

For more admissions information and application deadlines, please visit the Office of Graduate Studies website (http://www.csus.edu/gradstudies/). Details about the application can be found on the application packet posted to the College of Education website.

Approximately six weeks after the posted application deadline, a decision regarding admission will be emailed to each applicant.

Minimum Units and Grade Requirement for the Degree

Units required for the MA: 30

Minimum Cumulative GPA: 3.0; no units with a grade lower than "B-" may apply toward the degree.

Advancement to Candidacy Procedures

Each student must file an application for Advancement to Candidacy indicating a proposed program of graduate study. This procedure should begin as soon as the classified graduate student has:

- removed any deficiencies in admission requirements;
- completed at least 12 units of courses in the graduate program (see Requirements) with a minimum 3.0 GPA; and
- met the Graduate writing requirement through completion of the Graduate Writing Intensive (GWI) course, CHAD 242, with a B grade or better.

Advancement to Candidacy forms are available on the Office of Graduate Studies website. The student should complete the Advancement to Candidacy form after planning a degree program in consultation with a Program faculty advisor. The form must be submitted to the Graduate Coordinator and the Office of Graduate Studies for approval.

Project/Thesis or Examination Registration

Enrollment in CHAD 504 Project/Thesis course requires that the student file an Intent to Register form at least one full semester in advance of registration. For students intending to complete a project or thesis, a proposal must be approved prior to beginning the project or thesis. The proposal requires approval from the thesis/project sponsor, a second reader, and the Graduate Coordinator or Department Chair. Please see your list of deadlines and consult with a Program advisor. Additional information about CHAD theses and projects may be found in the Thesis/Project handbook on the Department web page.

Check in the Department office for the policies regarding Report in Progress ("RP") grades and continuous enrollment.

Graduation

Prior to graduation, an application for graduation must be filed with the Office of Graduate Studies. In addition, all coursework leading to the Master's degree must be completed within a seven-year period.

1 Course may not count as both a Foundation and Core.

Note: Credit for CHAD 504 is given upon completion of a thesis, project, or other approved culminating experience. Open only to graduate students.
American Sign Language and Deaf Studies takes an interdisciplinary approach to the study of deaf and hard-of-hearing people in American and world society. The program promotes the understanding of the deaf community as a linguistic and cultural group and encourages students to analyze existing stereotypes and policies relating to deaf and hard-of-hearing people in order to work both within their own communities and others in affecting change for the betterment of the deaf and hard-of-hearing community.

With an ASL and Deaf Studies Minor, students may obtain entry-level jobs in settings working with the deaf such as residential supervisor, classroom aide, vocational trainer, and much more. Students may also combine an ASL and Deaf Studies Minor with a related major field of study such as education, counseling, audiology and speech therapy for a more well-rounded grounding in the issues relating to the deaf and hard-of-hearing in their field. Students in fields which are not specifically deaf-related such as nursing, law, computer engineering, and many more may also experience an edge in gaining employment, whether in deaf-related settings or not, with a minor in ASL and Deaf Studies compared to those without similar coursework or experience.

Further, students having completed the ASL and Deaf Studies Minor may be able to waive similar coursework at other universities with specialized fields of study relating to deafness that may not be offered in the Sacramento region.

Minor in Bilingual/Multicultural Education

Units required for Minor: 12

Program Description

In addition to University-based courses, the minor can include a field-based course in an educational setting with high numbers of children and adolescents from diverse backgrounds. Students develop a coherent course of study in education and diversity with a Bilingual/Multicultural Education (BMED) Advisor and approval from the BMED Chair. This minor is especially recommended for students seeking the bilingual authorization for their teacher credential offered through the BMED Multicultural/Multilingual Teacher Preparation Center.

Program Requirements

The Education Minor offered by the Bilingual/Multicultural Education Department (BMED) consists of 12 units or more of upper division education courses that focus on diversity and education. Courses in the minor offer students the opportunity to explore the issues of race, culture, language, class, gender, and ability/disability, and their relationship to education.
Minor in Counseling

Units required for Minor: 19

Program Description
The Counseling minor consists of 10 upper division units of Child and Adolescent Development coursework and 9 upper division units of Counseling coursework (EDUC). Students will critically examine the theory and research on social and emotional development, and specifically explore the role of the family context in developmental processes, with specific attention to dynamic family processes within the larger society. Students will explore the career of counseling, and the cultural, social, and emotional factors that contribute to unhealthy psychological adjustment and abnormal behavior within developmental and social contexts.

Minimum Grade Requirement
A grade of "C-" or higher is required for all coursework in the Counseling minor.

Note: Students majoring in Child and Adolescent Development and in the Counseling minor may overlap a maximum of 10 units (including electives) between the minor and major. Consult with a major advisor for more information. Students may take both CHAD 123 and CHAD 133 to meet CHAD 128 requirement.

1 For non Child and Adolescent Development majors, CHAD 128 may be substituted for CHAD 133

Minor in Social Justice in Education

Units Required for Minor: 18

The Minor in Social Justice in Education focuses on the theoretical, historical, and cultural constructs of power and oppression and the ways they intersect within education. The courses address current issues regarding race, ethnicity, culture, language, socio-economic status, abilities, and gender diversity. The minor underscores how education can be transformative and used as a tool to eradicate oppression and foster perspectives that promote social justice in education. The goal of the Minor is to empower students to teach or work towards building an antiracist, equitable, and inclusive place in education.

### Multiple Subject Matter Waiver

Units required for Waiver: **80**

#### Program Description

The Multiple Subject Matter Waiver is designed to meet the California Commission on Teacher Credentialing (CTC) multiple subject matter requirement for students entering a California Multiple Subject or Special Education teaching credential program. The subject matter requirement can be met either through a subject matter program approved by CTC or by taking a state approved content exam (currently the California Subject Exam for Teachers, the CSET).

Subject matter programs are not degrees or concentrations; instead they are a series of courses that allow a student to meet the requirements for admission to a teaching credential program. Subject matter coursework in the Multiple Subject Matter Waiver meets CSET requirements by offering specific curricula in seven different subjects: Language and Literature; Mathematics; Natural and Physical Sciences; Social Sciences and Humanities; the Arts; Human Development; and Physical Education.

In order to meet the Multiple Subject Matter Waiver, all courses must be completed with a grade of “C-” or better. Students must also complete a BA or BS degree (with any major) to enter a teaching credential program. The Subject Matter Waiver is open to all majors. The coursework for the multiple subject matter waiver is embedded within the Liberal Studies Major. To teach public school in California, students must also complete a teaching credential program.

The Multiple Subject Matter Waiver is most appropriate for students who intend to pursue an elementary/middle school (multiple subjects) or special education teaching credential. Students who intend to pursue a multiple subject or special education teaching credential should see a faculty advisor or the department chair in the department of their academic major. It is recommended that students pursuing the Waiver obtain advising early as it is critical that their subject matter coursework be carefully planned and coordinated to include the required subject matter program courses.

Note: Students taking the Multiple Subject Matter Waiver may have GE substitutions available, depending on their major requirements. See a major advisor to ensure all GE/GR requirements are met.

## College of Engineering and Computer Science

### Student Success Center Services

The College of Engineering and Computer Science Student Success Center (SSC) supports students with their academic, career, and professional development. Holistic support services are provided through major and GE advising, career advising, and by connecting students to other resources on campus. The SSC also offers support through the MESA Engineering Program (MEP) and free tutoring to all ECS majors.

Santa Clara Hall - 1200 Wing  
Phone: (916) 278-5426  
ecs-ssc@csus.edu

### Advising Services

The College of Engineering and Computer Science’s Advising Office is dedicated to engaging with students to improve student success and enhance each student’s academic and career aspirations through meaningful, customized advising services. The Advising Office improves the student experience by facilitating access to needed resources and expands student opportunities to achieve academic success.

The Advising Office offers and staff can provide assistance with the following advising-related topics:
Cooperative Education Program

The College endorses cooperative education (co-op) as a means to enrich a student’s education. Cooperative education relates theory to practice, provides "learning by doing" and connects students with industry. The co-op program provides periods of university study with paid work experience in the student’s major field of study. Students are encouraged to participate in the co-op plan by completing at least one four- to six-month work period before obtaining their degree. Credit is granted for successful completion of the co-op requirements. Students interested in the Cooperative Education Program should apply in 1204 Santa Clara Hall or by emailing ecs-coop@csus.edu.

ECS Internship and Career Services Office
Santa Clara Hall, Room 1204
(916) 278-7091
ecs-coop@csus.edu

MESA Engineering Program (MEP)

Participation in the MESA Engineering (MEP) increases the probability that students will be successful in their engineering coursework. Focusing on the recruitment, retention, and graduation of highly motivated students from educationally and financially disadvantaged backgrounds, MEP emphasizes participation by students from communities with low rates of enrollment in engineering majors.

MEP provides an on-campus home for its members with a large 24 hours-a-day study center that encourages study groups. MEP provides professional development, a freshman orientation course, and counseling. The program assists in the coordination of tutoring, counseling, and professional development services for all students in the College of Engineering and Computer Science.

Santa Clara Hall, Room 1207
(916) 278-6699
ecs-mep@csus.edu

ECS Peer-Assisted Learning (PAL) Program

The College of Engineering and Computer Science’s Peer-Assisted Learning (PAL) is a curricular structure that encourages cross-year support among students. PAL encourages students to learn cooperatively under the guidance of trained students, called PAL Facilitators, who have been very successful in the same course they facilitate, and have been highly trained in group facilitation and pedagogy.

PAL classes are optional 1-unit courses available for students enrolled in gateway engineering courses. During PAL sessions, students who get stuck and ask a question will be asked to dig deep for what they understand on a basic level and then gently guided (via more questions) to higher and higher levels of competence, until they are able to solve the original problem on their own. Students should take a PAL to optimize their performance in their course, enhance their confidence with the material, and engage with other students.

Additional information about the program and how to enroll can be found on the ECS PAL Website (https://www.csus.edu/college/engineering-computer-science/student-success/pal.html).

Troy Topping, Director
Riverside Hall, Room 4024
(916) 278-6658
ecs-pal@csus.edu

Computing, Communications, and Academic Technology Services

The College of Engineering and Computer Science’s Computing, Communications, and Academic Technology Services (ECS CCATS) team is the Information and Academic Technology (IT/AT) unit for the College. ECS CCATS is a part of the Dean’s Office and serves all faculty, staff and students in the College. It is the College unit charged with implementing and supporting the ECS Information Technology Plan, and provides comprehensive IT/AT support to the College.

This support includes managing hardware, software, networking, and consulting for both academic and research computing and communications. ECS CCATS manages all ECS computing facilities, including servers for academic computing, databases, learning
management systems, cloud computing, and web hosting, as well as forty-two Windows 10 or Linux workstation-equipped laboratories containing 600+ workstations.

ECS CCATS supports physical and virtual servers, running Linux or Windows Server. College servers are available 24/7 from on campus and off campus via VPN access. The College also maintains numerous multimedia classroom facilities and a Zoom-based teleconference facility.

General building hours for all labs are 8 a.m. – 5 p.m., Monday through Friday. However, ECS students can access buildings and labs 24/7 via a key fob. One of these labs also houses the ECS CCATS Help Desk, which is staffed with student consultants and provides direct, on-call faculty, staff, and student support. Multiple remotely accessible labs are also supported and available.

Students and faculty who need assistance with computing, communication, or academic technology issues can contact ECS CCATS directly at the Help Desk or visit the offices of our staff which are open and directly accessible to everyone in the College. In addition, there is on-line help available through the ECS CCATS web page (https://www.csus.edu/college/engineering-computer-science/computing-services/).

The Director of ECS Computing, Communications, and Academic Technology Services is an Operating Systems Analyst – Expert, who leads a staff of five and reports directly to the College Dean. The support staff team consists of three Operating Systems Analysts, one Analyst/Programmer, and one Information Technology Consultant. In addition, there are approximately ten student consultants monitoring and staffing the Help Desk and open labs.

Center for Information Assurance and Security

The College of Engineering and Computer Science’s Center for Information Assurance and Security (CIAS) was established in 2005. The mission of the center is to advance knowledge of information assurance and security practices through:

• Education, training, and awareness programs in information assurance and security issues and practices;
• Applied research in information assurance and security;
• Developing interdisciplinary programs in information assurance and security;
• Outreach programs to assist our community, including community colleges, K-12 schools, industry, and government in information assurance and security issues;
• Forming collaborations with other education, research, industry, and government institutions.

CIAS has been designated as a National Center of Academic Excellence (CAE) in Information Assurance Education (CAE-IA) since 2007. This designation is jointly sponsored by the National Security Agency (NSA) and Department of Homeland Security (DHS). The designation has to be renewed every five years, to ensure the designated institution meets stringent criteria with respect to curriculum, faculty, research, and institution-wide commitment to information assurance practices and education. CIAS has recently been awarded its re-designation as a CAE in Cyber Defense (CAE-C) for the academic years 2017-2022. The CAE designation was one of the key factors for the National Science Foundation (NSF) to award Sacramento State over $4 million in funding as part of the CyberCorps® Scholarship for Service (SFS) program to support students in computer science or computer engineering to become cybersecurity specialists for the academic years 2010-2014, and again 2015-2021.

Jun Dai, Director
Center for Information Assurance and Security

cias@csus.edu

Office of Water Programs

The Office of Water Programs (OWP) is a self-supported program providing cost-effective solutions for protecting and enhancing water resources, public health, and the environment. OWP develops and publishes the industry standard in drinking water and wastewater training materials and provides valuable science-based applied research services in California and elsewhere for a variety of water resource and water quality disciplines, including drinking water, wastewater, stormwater, watershed planning, soils, and groundwater.

Since 1972, OWP has provided high-quality training programs for operators of water treatment plants, water distribution systems, wastewater collection systems, and municipal/industrial wastewater treatment and reclamation facilities, as well as for pretreatment facility inspectors, environmental compliance inspectors, and utility managers. As an internationally recognized training leader, OWP publishes a continually evolving library of print, electronic, and online training materials to meet the changing needs of water industry operators, managers, and administrators seeking professional development. For more than two decades, OWP has also provided training, technical assistance, and applied research services for stormwater, watershed planning, soils, and groundwater disciplines. OWP collaborates with faculty members in economics, business, engineering, and the sciences to complete its funded projects. OWP’s experience spans the areas of stormwater program management, stormwater low impact development (LID), water conservation, technical assistance to small disadvantaged communities, and programming and software tool development using geographic information system (GIS) and other data analysis applications.

OWP also serves as the U.S. Environmental Protection Agency (USEPA) Region 9 Environmental Finance Center (EFC), which supports the region’s rural, disadvantaged, and tribal communities in financial planning and asset management to better enable funding environmental and public health services in the short term and to better adapt to regulatory, technological, and resource changes in the future.

Both the training and research programs employ student assistants who gain valuable skills and experience under the direction and mentorship of water sector professionals. OWP also offers competitive fellowship opportunities for graduate students in many disciplines.

Ramzi J. Mahmood, Director
Modoc Hall, Room 1001

Office of Water Programs Website (http://www.owp.csus.edu)
Preparation

High School

Students entering as freshmen build primarily upon the foundations established in high school: mathematics, physical sciences, computer programming and oral and written communication. High school study for all majors should include:

- Algebra: 2 years
- Plane Geometry: 1 year
- Trigonometry: 1/2 year
- Chemistry: 1 year
- Physics: 1 year
- Mechanical Drawing: 1 year (only for civil and mechanical engineering majors)

Computer literacy and programming, analytic geometry and calculus are desirable.

Transfer

Students transferring from community colleges with at least 65 transferable units including physics, calculus and differential equations, chemistry, computer programming and lower division engineering courses as listed in this catalog for each program, may complete their engineering, computer science or construction management bachelor of science degree programs within four semesters of additional full-time study. Articulation agreements with most of the community colleges in Northern California state exact course equivalencies. Community college counseling staff are prepared to answer questions regarding articulation. Students planning to transfer from community colleges or four-year institutions with upper division standing are advised to parallel closely the appropriate California State University, Sacramento engineering, construction management or computer science program in the lower division. Completion of General Education (GE) requirements before transfer is NOT recommended or desirable, but rather, emphasis should be placed on taking prescribed basic science and engineering courses. Students should be aware that some of the major requirements also satisfy GE requirements.

Professional Development

Engineering, computer science and construction management students are encouraged to become acquainted with the functions and the branches within their fields to evaluate their own interests and abilities more carefully. For this purpose, student chapters of national organizations have been established in the college. It is to the student's advantage to become affiliated with the technical society in their interest area soon after enrolling in the university. Students with high scholastic achievement may be invited to join Tau Beta Pi, the national engineering honor society or Upsilon Pi Epsilon, the national computer science honor society.

Whenever possible, students should consider summer and part-time employment in a professional organization or an industry related to their major interest. Students are encouraged to take advantage of internship and career services. (See above.) This employment will provide the undergraduate student with practical experience in real world problems. The College's Internship and Career Services Office, working with the faculty and local industry, assists students in securing employment.

Bachelor of Science

Bachelor of Science degree programs are offered in Civil Engineering, Computer Engineering, Computer Science, Construction Management, Electrical and Electronic Engineering, and Mechanical Engineering. The undergraduate engineering programs are accredited by:

Engineering Accreditation Commission of ABET (EAC/ABET)
415 North Charles Street
Baltimore, MD 21202-4012
Telephone: (410) 347-7700

The undergraduate computer science program is accredited by:
Computing Accreditation Commission of ABET (CAC/ABET)
415 North Charles Street
Baltimore, MD 21202-4012
Telephone: (410) 347-7700

The Construction Management program is accredited by:
American Council for Construction Education (ACCE)
300 Decker Drive, Suite 330
Irving, Texas 75062
Telephone: (972) 600-8800

Students in the College of Engineering and Computer Science are required to meet the general education requirements of the University.

Engineering students must satisfy the 16-unit humanities and social science requirement of EAC/ABET. Construction Management students must satisfy the 18-unit humanities and social science requirements of ACCE. Students should consult with their advisers to determine which courses meet accreditation requirements for social sciences and humanities. By choosing carefully, the student can satisfy the University's General Education requirements with these courses.

While the objective of a broad liberal education is served through independent humanities and social science courses, it is recommended that some courses in these subject areas be at an advanced level rather than a selection of unrelated beginning courses. Courses treating such subjects as accounting, industrial management, finance, personnel administration, art and music skills, introductory language, and ROTC studies do not fulfill the accreditation humanities-social science requirement.

Enrollment in upper division courses offered by the college is normally restricted to students who have satisfactorily completed all lower division requirements and who have been admitted to one of the majors in the college. Within each program, different patterns of study are possible through a judicious choice of electives.

Minor In Engineering

Non-majors in engineering may elect to minor in this field. Minor requirements may be satisfied by completing 21 approved units, of which 12 must be upper division. Students who have not completed the lower division requirements in calculus, including differential equations, physics, chemistry, and a few engineering courses will find it difficult to complete this minor in the four-year program due to the prerequisite requirements of upper division engineering courses.

Students wishing to minor in engineering must have their minor program approved by the ECS Associate Dean for Student Affairs. The program normally includes:

- Algebra: 2 years
- Plane Geometry: 1 year
- Trigonometry: 1/2 year
- Chemistry: 1 year
- Physics: 1 year
- Mechanical Drawing: 1 year (only for civil and mechanical engineering majors)

Computer literacy and programming, analytic geometry and calculus are desirable.
**Master of Science**

While graduates of baccalaureate programs enjoy successful careers in many aspects of engineering and computer science, graduate study is becoming more desirable for qualified students who expect to practice in research and development, teaching, management and many areas of design.

The MS degree programs offered in the College of Engineering and Computer Science include Civil Engineering, Computer Engineering, Computer Science, Electrical and Electronic Engineering, Mechanical Engineering, and Software Engineering.

In addition, special interdisciplinary studies are possible in selected areas chosen by the student in consultation with the faculty of the College.

The Master of Science programs require a minimum of 30 units of approved graduate study. The option availability of Plan A, B, or C is indicated with each specialization. Refer to the appropriate sections for detailed information concerning admission and degree requirements.

General information on admission requirements and general graduate study regulations are listed in the section, "Graduate Degree Curricula," of this catalog.

**Note:** Each graduate course is administered by one of the academic departments in the College. Information on these courses may be obtained in any of the academic department sections of the Catalog.

**Departments/Programs**

Programs of instruction leading to the following degrees offered by the college are listed in the catalog in separate sections.

- Civil Engineering, BS, MS
- Computer Science, BS, MS
- Computer Engineering, BS, MS
- Construction Management, BS
- Electrical & Electronic Engineering, BS, MS
- Mechanical Engineering, BS, MS

**College of Engineering & Computer Science Website** ([http://www.ecs.csus.edu/](http://www.ecs.csus.edu/))

**Civil Engineering**

**College of Engineering and Computer Science**

**Program Description**

Civil Engineering involves the application of scientific principles and knowledge of mathematics and computers to the planning, analysis, design, and construction of all types of private and public works. Reduction of air and water pollution, disposal of hazardous wastes, renewal of our old cities, planning and building of new communities, providing water, power, and high-speed ground transportation systems are the responsibilities of the civil engineer. It is a continual challenge to the civil engineer to provide these services efficiently by the construction of dams, buildings, bridges, tunnels, highways, airports, waterways, and waste handling facilities in harmony with the natural environment.

Because of the broad range of demands on the civil engineer's services, the undergraduate program is devoted to fundamental principles in mathematics, basic and engineering sciences; the spectrum of Civil Engineering practice in both analysis and design; and required courses in the humanities and the social sciences, so that engineers may better relate to the world and society they serve. The upper division program permits students to select 9 units (3 courses) of electives. Students may increase the breadth or depth of their knowledge in Civil Engineering by selecting these electives in several areas: environmental and water quality engineering, geotechnical engineering, structural engineering, transportation, and water resources engineering.

**Degree Programs**

BS in Civil Engineering (p. 585)
MS in Civil Engineering (p. 587)

Cooperative Education Program (Work Experience)

**Accreditation**

In addition to California State University, Sacramento’s full accreditation by the Western Association of Schools and Colleges, the Bachelor of Science in Civil Engineering is also individually accredited by ABET, Inc.

**Notice to Students RE: Professional Licensure and Certification**

California State University programs for professions that require licensure or certification are intended to prepare the student for California licensure and certification requirements. Admission into programs for professions that require licensure and certification does not guarantee that students will obtain a license or certificate. Licensure and certification requirements are set by agencies that are not controlled by or affiliated with the California State University and licensure and certification requirements can change at any time.

The California State University has not determined whether its programs meet other states’ educational or professional requirements for licensure and certification. Students planning to pursue licensure or certification in other states are responsible for determining whether, if they complete a California State University program, they will meet their state’s requirements for licensure or certification. This disclosure is made pursuant to 34 CFR §668.43(a)(5)(v)(O).
Special Features

- The BSCE degree is accredited by the Engineering Accreditation Commission of the Accreditation Board for Engineering and Technology, Inc. (EAC/ABET).
- A notable strength of the program is that most faculty are licensed professional engineers in California and have practical experience in industry. Thus, faculty bring an ability to relate theory to practice, and the program prepares the student for the profession as well as for advanced study.
- Emphasis is placed on design which is the definition and solution of engineering problems in a practical manner. Lower division and first semester junior year coursework provides the preparation for design in courses such as mathematics, physics, descriptive geometry, CAD, surveying, computer applications, and engineering economics. Design courses are available to students in their last three semesters including a senior design project course in the final semester.
- Class sizes are small providing for close interaction between students and faculty. This interaction is enhanced in laboratory courses which are an integral part of the curriculum.
- Computers are used in many courses and students have free access to computer laboratories.
- Communication skills and social and ethical responsibilities of professional practice are emphasized.
- Students are encouraged to participate in the Student Chapter of American Society of Civil Engineers and other student organizations, to develop organizational skills, and to interact with practicing civil engineers.
- Sacramento, the State Capital and the seat of county government, provides proximity to city, county, state and federal agencies, and many consulting firms with Civil Engineering departments. Thus, students have a unique environment to draw upon for semester projects, part-time or summer employment, and career opportunities.

Program Educational Objectives

The objectives of the civil engineering are to prepare graduates to:

- ethically apply their hands-on, practice-oriented civil engineering education to succeed professionally;
- engage in lifelong learning through graduate education, professional development, and/or active involvement in professional organizations; and
- communicate effectively on multi-disciplinary teams to address diverse challenges, creating solutions that serve the general public.

Academic Policies and Procedures

The following is a summary of policies and procedures specific to the Department of Civil Engineering. Other University policies and procedures in this catalog also apply to Civil Engineering majors. The Department will not hear petitions for deviation from articulated policies made by students who disregard catalog policy.

- **Course Repeat Policy:** Undergraduate engineering and Civil Engineering courses that are used to meet the Bachelor of Science in Civil Engineering degree requirements may be repeated only twice (for a total of three attempts). Grades of the second and third attempt will be averaged in grade point calculations.
- **Reinstatement Policy:** Students seeking reinstatement to the Civil Engineering major must complete a Reinstatement Petition (obtained at Admissions and Records). That petition will be reviewed by the Department Chair for approval or rejection.

Note: The only basis for reinstatement is the expectation (supported by evidence provided by the student) that the student is now likely to progress towards the satisfactory completion of the Department's degree requirements in a timely manner.

- **Minimum Grade Requirements:** The purpose of this requirement is to assure that all Civil Engineering majors attain the minimum level of competency in all their coursework required for a Bachelor of Science Civil Engineering Degree. All required courses in the major, all electives in the major, ENGL 5, and ENGL 20 must be completed with a grade of "C-" or better. A minimum grade point average of 2.0 ("C") is required in the major courses applied to the degree.

- **Incomplete Grades:** Incomplete grades are issued only in accordance with University policy. The student must be passing the course at the time an “Incomplete” is requested. An Incomplete Petition (obtained in the Department Office) must be submitted to the Department with the student’s and the course instructor’s signature. The Incomplete Petition must specify the work to be completed, the basis by which the student's final grade will be determined, and the last date for completion of the incomplete work. An incomplete grade that is not cleared by the set date will lapse to an F grade.

Career Possibilities

Bridge Engineer · Civil Engineer · Construction Engineer · Design Engineer · Environmental Engineer · Foundation Engineer · Geotechnical Engineer · Highway Engineer · Hydraulic Engineer · Hydrologic Engineer · Project Engineer · Public Works Engineer · Research Engineer · Sanitary Engineer · Soils Engineer · Structural Engineer · Traffic Engineer · Transportation Engineer · Urban Planner · Water Resources Engineer

CE 1. Civil Engineering Seminar. 1 Unit
General Education Area/Graduation Requirement: Understanding Personal Development (E)
Term Typically Offered: Fall, Spring
Introduces students to civil engineering as a profession. Topics include the technical disciplines (environmental, geotechnical, structural, transportation, and water resources), the role of civil engineers in planning, constructing and operating infrastructure, and professional responsibilities such as licensure and ethics. Case studies are used to explore both technical and nontechnical aspects of civil engineering projects such as design and environmental constraints, constructability, and social and political issues.

CE 4. Engineering Graphics and CAD. 2 Units
General Education Area/Graduation Requirement: Understanding Personal Development (E)
Term Typically Offered: Fall, Spring
In-depth graphic analysis and solution of typical three dimensional space problems by applying the principles of orthogonal projection. Fundamentals of interactive computer aided design and drafting. Lecture one hour; laboratory three hours.

CE 9. Plane and Topographic Surveying. 2 Units
Prerequisite(s): MATH 30 and CE 9L. CE 9L may be taken concurrently.
MATH 30 may be taken concurrently. Not currently enrolled in CE 9.
Term Typically Offered: Fall, Spring
Methods for the measurement of distance, direction, angles and elevations. Computational methods for locating points, closing traverses and determining areas and earthwork volumes. Horizontal and vertical curves. Introduction to legal aspects of surveying, geodetic surveys, maps, boundary surveys and new technologies used in surveying. Lecture two hours.

CE 9L. Plane and Topographic Surveying Laboratory. 1 Unit
Prerequisite(s): MATH 30 and CE 9. CE 9 may be taken concurrently.
MATH 30 may be taken concurrently. Not currently enrolled in CE 9L.
Term Typically Offered: Fall, Spring
Laboratory course that supports CE 9. Use of surveying instruments and measurement techniques in field setting. Laboratory three hours.
Note: This course requires safety training and personal protective equipment (PPE).

CE 100. Engineering Geology. 2 Units
Prerequisite(s): ENGR 112; may be taken concurrently.
Term Typically Offered: Fall, Spring
Soil and rock mechanics and their relations to geological features influencing design, construction and maintenance of engineering projects. Lectures and field problems.

CE 101. Computer Applications in Civil Engineering. 3 Units
Prerequisite(s): ENGR 30 and CE 4; CE 4 may be taken concurrently.
Term Typically Offered: Fall, Spring
Development of programming- and algorithm-based problem-solving skills in civil engineering using modern programming and scripting languages and scientific computing programs. Application to numerical methods, data science, and visualization.

CE 130. Water Resources Engineering. 3 Units
Prerequisite(s): CE 1, CE 101, ENGR 115, ENGR 132, CE 130L. CE 130L may be taken concurrently. CE 101 may be taken concurrently. Not currently enrolled in CE 130.
Term Typically Offered: Fall, Spring
Hydrologic and hydraulic fundamentals which are common to water resources projects; introduction to reservoirs, dams, pipelines, channels, hydraulic machinery, ground water, water rights, statistical analysis, engineering economy applications, and water resources planning.

CE 130L. Hydraulics Laboratory. 1 Unit
Prerequisite(s): CE 101 and CE 130. CE 130 may be taken concurrently. CE 101 may be taken concurrently. WPJ Score of 70+ or equivalent. Not currently enrolled in CE 130L.
Term Typically Offered: Fall, Spring
Laboratory experiments relating the principles of fluid mechanics to real fluid flow. Laboratory three hours.

CE 131. Hydrology. 3 Units
Prerequisite(s): CE 130 and CE 130L. Not currently enrolled in CE 131.
Term Typically Offered: Fall only
Introduction to surface water hydrology for engineering. Evapotranspiration and infiltration prediction. Precipitation analysis, hydrograph and flood routing applications for civil engineering. Statistical applications in hydrology.

CE 132. Groundwater Engineering. 3 Units
Prerequisite(s): CE 130 and CE 130L. Not currently enrolled in CE 132.
Term Typically Offered: Spring only

CE 133. Design of Urban Water and Sewer Systems. 3 Units
Prerequisite(s): CE 130 and CE 130L. Not currently enrolled in CE 133.
Term Typically Offered: Fall only
Hydraulic design of water distribution and sewerage systems. Computer-assisted pipe network analysis. Analysis of pump systems. Pump station design. Other selected topics.

CE 134. Open Channel Hydraulics. 3 Units
Prerequisite(s): CE 130 and CE 130L. Not currently enrolled in CE 134.
Term Typically Offered: Spring only
Civil engineering design problems in steady, uniform, gradually and rapidly varied open channel flow. Hydraulic analysis in structures, transitions, culverts, weirs and spillways. Channel design including roughness for subcritical and supercritical flow. Prediction of water surface profiles via simulation software.
CE 140. Transportation Engineering. 3 Units
Prerequisite(s): CE 1, CE 9, CE 9L, CE 101, ENGR 115, and CE 140L.
CE 140L may be taken concurrently. CE 101 may be taken concurrently.
Not currently enrolled in CE 140.
Term Typically Offered: Fall, Spring
Introduction to the fundamental topics in Transportation Engineering.
Focus on roadway geometric design, layout considerations, pavement
materials and design, traffic operations and analysis.

CE 140L. Transportation Engineering Laboratory. 1 Unit
Prerequisite(s): CE 1, CE 9, CE 9L, CE 101, ENGR 115, and CE 140. CE 140
may be taken concurrently. CE 101 may be taken concurrently. WPJ
Portfolio Score of 3+ or equivalent. Not currently enrolled in CE 140L.
Term Typically Offered: Fall, Spring
Laboratory course that supports CE 140. Activities include speed survey
and safety assessment, analysis of freeway level of service, analysis of
intersection delay and level of service, roadway geometry design, and
pavement design using field measurements, online datasets, and state-of-the-practice software. Laboratory three hours.
Note: This course requires safety training. This course requires personal
protective equipment (PPE).

CE 141. Traffic Analysis and Design. 3 Units
Prerequisite(s): CE 140 and CE 140L. Not currently enrolled in CE 141.
Term Typically Offered: Spring only
Introduction to the fundamental principles of traffic operations, traffic
data collection methods, intersection control, signal design and analysis
techniques. Methods and software for designing and optimizing
signalized and unsignalized intersection operation.

CE 142. Transportation Systems. 3 Units
Prerequisite(s): CE 140. Not currently enrolled in CE 142.
Term Typically Offered: Fall only
Transportation systems evaluation and management. Focus on
transportation planning methods, including data analysis, estimation of
future demand, evaluation of travel demand impacts on existing systems,
and transportation system decision-making.

CE 144. Geometric Design of Highways. 3 Units
Prerequisite(s): CE 140, CE 140L
Term Typically Offered: Fall, Spring
Theory and practice of the principles of geometric design of highways
and roads focusing on designing visual aspects of highways, highway
classification, design controls and criteria, design elements, safety,
vertical and horizontal alignment, cross section, intersections, and
interchanges. Emphasis on the latest Federal and California design
standards and tools, methods, and practices.

CE 150. Principles of Environmental Engineering. 2 Units
Prerequisite(s): CHEM 1E or CHEM 1A, ENGR 115, CE 1, CE 101, and
CE 150L. CE 150L may be taken concurrently. CE 101 may be taken concurrently.
Not currently enrolled in CE 150.
Term Typically Offered: Fall, Spring
Introduction to principles of environmental quality management. Physical
and chemical principles affecting environmental quality including
equilibrium and kinetics. Water quality parameters, their importance,
and natural processes that affect them. Application of thermodynamic
principles to environmental systems.

CE 150L. Environmental Engineering Laboratory. 1 Unit
Prerequisite(s): CHEM 1E or CHEM 1A, ENGR 115, CE 1, CE 101, and
CE 150. CE 150 may be taken concurrently. CE 101 may be taken concurrently.
WPJ Score of 70+ or equivalent. Not currently enrolled in CE 150L.
Term Typically Offered: Fall, Spring
This is the laboratory course that supports CE 150. Activities include
water quality testing and computer modeling. Laboratory three hours.
Note: This course requires safety training and personal protective
equipment (PPE).

CE 151. Environmental Engineering Practice. 2 Units
Prerequisite(s): CE 150. Not currently enrolled in CE 151.
Term Typically Offered: Fall, Spring
Introduction to environmental engineering professional practices. Water
and wastewater treatment processes. Solid waste management. Air
quality parameters and management. Sustainability.

CE 153. Design of Water Quality Control Processes. 3 Units
Prerequisite(s): CE 150B and ENGR 132. Not currently enrolled in CE 153.
Term Typically Offered: Spring only
Analysis and design of selected physical, chemical, and biological
facilities for water purification and wastewater treatment. Emphasis is
on design based on loading factors and integration of unit processes into
treatment systems.

CE 156. Geoenvironmental Engineering. 3 Units
Prerequisite(s): CE 150B and CE 170; CE 150B may be taken concurrently.
Not currently enrolled in CE 156.
Term Typically Offered: Not offered
Equilibrium distribution of contaminants among air, water and solid
phases of soil systems; analysis and modeling of soil vapor extraction
(SVE), pump and treat, and soil washing systems; movement of gasses
in landfills; infiltration through landfill cover; geosynthetic liner systems;
hazardous waste containment systems.

CE 160. Introduction to Structural Analysis. 3 Units
Prerequisite(s): CE 1, CE 101, ENGR 112, and (MATH 35 or MATH 100).
Not currently enrolled in CE 160.
General Education Area/Graduation Requirement: Further Studies in Area
B (BS)
Term Typically Offered: Fall, Spring
Analysis of statically determinate and indeterminate beams, frames, and
trusses. Includes energy principles, flexibility and stiffness analyses, and
influence lines. Computers are used to aid in the solution of complex
structural problems.

CE 160L. Structural Laboratory. 1 Unit
Prerequisite(s): CE 101 and ENGR 112. WPJ score of 70+ or equivalent.
Not currently enrolled in CE 160L.
General Education Area/Graduation Requirement: Further Studies in Area
B (BS)
Term Typically Offered: Fall, Spring
Introduction to the principles of structural analysis and design by testing
of structural elements. Experimental verification of the assumptions of
strength of materials. Introduction to laboratory techniques. Laboratory
three hours.
Note: This course requires safety training. This course requires personal
protective equipment (PPE).
CE 163. Structural Steel Design. 3 Units
Prerequisite(s): CE 160. Not currently enrolled in CE 163.
Term Typically Offered: Fall, Spring
Theory and practice in design of structural steel members and connections using current design specifications. Design of tension and compression members, laterally supported and unsupported beams, beam-columns, and bolted and welded connections.

CE 164. Reinforced Concrete Design. 3 Units
Prerequisite(s): CE 160 and CE 160L. CE 160L may be taken concurrently. Not currently enrolled in CE 164.
Term Typically Offered: Fall, Spring
Introduction to reinforced concrete design according to American Concrete Institute (ACI) 318 Building Code, including: design and safety concepts; loads and load path; structural systems; material properties; flexural analysis and design of reinforced concrete beams and one-way slabs; development of reinforcement; serviceability; shear; columns; and other topics.

CE 165. Masonry Design. 3 Units
Prerequisite(s): CE 160. Not currently enrolled in CE 165
Term Typically Offered: Spring only
History of masonry. Masonry materials. Masonry as a structural material. Design of masonry beams, concentrically and eccentrically loaded columns, walls for vertical and lateral loading including effects of wind and seismic forces. Design of a small building for wind and seismic loading including torsional effects.

CE 166. Seismic Behavior of Structures. 3 Units
Prerequisite(s): CE 101, CE 160, and ENGR 110. Not currently enrolled in CE 166
Term Typically Offered: Fall, Spring
Analyzes simple structures’ response to dynamic loads with emphasis on response to earthquake ground motion. Introduction to multi-story buildings dynamics. Modal and approximate analyses of earthquake response. Dynamic analysis and building code procedures.

CE 168. Prestressed Concrete Design. 3 Units
Prerequisite(s): CE 160 and CE 164. CE 164 may be taken concurrently. Not currently enrolled in CE 168.
Term Typically Offered: Fall only – even years
Introduction to prestressed concrete design, focusing on bridges and buildings. Topics include: basic concepts; technology for fabrication and construction; material properties; flexural analysis and design for non-composite and composite beams; development of strands; prestress losses; camber and deflections; shear; and other topics. Design conforming to American Concrete Institute (ACI) 318 Building Code or AASHTO LRFD Bridge Design Specifications is emphasized, as appropriate.

CE 169. Timber Design. 3 Units
Prerequisite(s): CE 160. Not currently enrolled in CE 169.
Term Typically Offered: Fall only
Wood as a structural material. Design of sawn and glulam beams, concentrically and eccentrically loaded columns, shear walls, flexible diaphragms and connections for vertical and lateral loading including effects of wind and seismic forces.

CE 170. Soil Mechanics. 3 Units
Prerequisite(s): CE 1, CE 100, CE 101, ENGR 112, and CE 170L. CE 170L may be taken concurrently. CE 101 may be taken concurrently. Not currently enrolled in CE 170.
Term Typically Offered: Fall, Spring
Composition and properties of soils; soil classification; soil compaction; soil-water interaction, including permeability and seepage analyses; soil stresses; soil compressibility, consolidation, and settlement analysis; soil shear strength.

CE 170L. Soil Mechanics Laboratory. 1 Unit
Prerequisite(s): Complete CE 1, CE 100, CE 101, ENGR 112, CE 170. CE 170 may be taken concurrently. CE 101 may be taken concurrently. WPJ Score of 70+ or equivalent. Not currently enrolled in CE 170L.
Term Typically Offered: Fall, Spring
Laboratory course that supports CE 170. Activities include soil testing and analysis of geotechnical site investigation data. Laboratory three hours.
Note: This course requires safety training and personal protective equipment (PPE).

CE 171. Soil Mechanics and Foundation Engineering. 3 Units
Prerequisite(s): CE 170 and CE 170L. Not currently enrolled in CE 171.
Term Typically Offered: Spring only
Lateral earth pressures and principles of retaining wall design; slope stability analysis and principles of slope stabilization design; ultimate bearing capacity of soils, allowable bearing pressures and settlement of structures; principles of foundation design including shallow foundations and deep foundations.

CE 175. Geotechnical Earthquake Engineering. 3 Units
Prerequisite(s): CE 170 and CE 170L. Not currently enrolled in CE 175.
Term Typically Offered: Fall only
Introduction to seismology and seismic hazard analysis; determination of building code design loads; prediction of soil-site effects; evaluation of liquefaction triggering, cyclic softening and associated consequences; introduction to mitigation techniques for liquefaction and ground failure hazards.

CE 182. Introduction to GIS in Civil Engineering. 3 Units
Prerequisite(s): ENGR 115, CE 9, CE 9L, and (CE 130 or CE 140 or CE 150 or CE 170). Not currently enrolled in CE 182.
Term Typically Offered: Fall only
Fundamental geographic information system (GIS) concepts; GIS data acquisition and analysis; GIS analytical methods. Lab exercises with GIS software used to introduce students to typical uses of GIS in civil engineering. This course may be paired with the graduate-level course GIS Applications in Civil Engineering. Lecture two hours; laboratory three hours.

CE 183. Concrete Technology. 3 Units
Prerequisite(s): ENGR 112.
Term Typically Offered: Spring only
History of portland cement, production, hydration, aggregates, supplementary cementitious materials, chemical admixtures, fresh and hardened concrete properties, concrete mixture design, and concrete construction. Introduction to concrete durability, concrete repair, and advances in concrete technology.
CE 190. Civil Engineering Project Skills. 3 Units
Prerequisite(s): CE 130 or CE 140 or CE 150 or CE 160 or CE 170. WPJ
Score of 70+ or equivalent. Not currently enrolled in CE 190.
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall, Spring

Introduction to professional engineering practice through case studies of existing projects, including estimating, scheduling, and specifications. Evaluation of design alternatives for engineering projects using principles of engineering economy and cost benefit analysis. Engineering ethics and professional responsibilities.
Note: This course is intended to be taken in the final year of study before taking CE 191.

CE 191. Senior Project. 3 Units
Prerequisite(s): CE 190
Term Typically Offered: Fall, Spring

Culminating degree requirement. Completion of a conceptual design and evaluation of alternatives under realistic constraints for proposed infrastructure projects. Students work in teams with practicing professionals providing mentoring. Draws upon full educational experience to date. Lecture two hours. Laboratory three hours.
Note: This course must be taken in the final semester.

CE 194. Career Development in Civil Engineering. 1 Unit
Prerequisite(s): Instructor permission.
Term Typically Offered: Fall, Spring

Designed for Civil Engineering students making career decisions. Instruction will include effective career planning strategies and techniques including skill assessments, employment search strategy, goal setting, time management, interview techniques and resume writing. Lecture one hour.
Note: Units earned cannot be used to satisfy major requirements. Cross Listed: ENGR 194, EEE194

Credit/No Credit

CE 195. Fieldwork in Civil Engineering. 1 - 3 Units
Prerequisite(s): Petition approval by supervising faculty member and Department chair.
Term Typically Offered: Fall, Spring

Supervised work experience in civil engineering with public agencies or firms in the industry.
Note: May be repeated for credit.

Credit/No Credit

CE 195A. Professional Practice. 1 - 12 Units
Prerequisite(s): Instructor permission.
Term Typically Offered: Fall, Spring

Supervised employment in a professional engineering or computer science environment. Placement arranged through the College of Engineering and Computer Science.
Note: Requires satisfactory completion of the work assignment and a written report.

Credit/No Credit

CE 196B. Stormwater Management. 3 Units
Prerequisite(s): CE 150, CE 150L, CE 130, CE 130L
Term Typically Offered: Spring only

CE 196I. Geometric Design of Highways. 3 Units
Prerequisite(s): CE140, CE 140L
Term Typically Offered: Fall, Spring

Theory and practice of the principles of geometric design of highways and roads focusing on designing visual aspects of highways, highway classification, design controls and criteria, design elements, safety, vertical and horizontal alignment, cross section, intersections, and interchanges. Emphasis on the latest Federal and California design standards and tools, methods, and practices.

CE 199. Special Problems. 1 - 3 Units
Term Typically Offered: Fall, Spring

Individual projects or directed reading.
Note: Open to students judged capable of carrying out individual work. Admission requires departmental approval and sponsorship of a supervising faculty member. Cannot be used as a technical elective in the major. Consult the CE Department for admission procedures and other requirements. May be repeated.

CE 199E. Independent Study Technical Elective. 3 Units
Prerequisite(s): GPA of 2.5 or greater in the upper division courses of the major; grade of "B" or better in the required major course associated with the proposed area of study (CE 130 or CE 140 or CE 150 or CE 160 or CE 170).
Term Typically Offered: Fall, Spring

Individual project, research, or directed reading on an advanced topic.
Note: Open to only those students prepared and capable of carrying out independent work.

CE 200. Civil Engineering Professional Writing. 3 Units
Term Typically Offered: Fall, Spring

Writing workshop course designed to immerse graduate students in the discourse of civil engineering. Instruction and practice in the writing process, professional writing styles used in the discipline, and editing. Multiple writing assignments totaling a minimum of 5000 words will be required.

CE 230. Water Resources Planning. 3 Units
Prerequisite(s): CE 281 or instructor permission.
Term Typically Offered: Fall only – odd years

Application of single and multi-objective planning to the design and operation of water resources projects. Objectives and constraints for water projects, criteria and procedures for evaluation, planning under uncertainty. Application in water development and water quality planning, with case studies.
CE 231.  Hydrometeorology.  3 Units
Prerequisite(s): CE 130 or CE 131 and ENGR 115.
Term Typically Offered: Spring only – odd years
An analyses of hydrologic processes closely linked to the atmosphere: evaporation, evapotranspiration, precipitation, and snowmelt. Penman and Penman-Montieth evaporation models, the eddy covariance method for land-atmosphere vapor and energy fluxes, atmospheric rivers and their impact on California water resources.

CE 232.  Groundwater Hydrology.  3 Units
Prerequisite(s): CE 130 or instructor permission.
Term Typically Offered: Fall only – even years
Occurrence and movement of groundwater; physical characteristics of aquifers; analysis of steady-state groundwater flow problems by mathematical, digital computer, electrical analog and graphical methods; analysis of unsteady-state problems in confined and unconfined, aquifers; multiple well systems.

CE 234.  Advanced Engineering Hydraulics.  3 Units
Prerequisite(s): CE 130 or equivalent, or instructor approval.
Term Typically Offered: Spring only – even years
Steady uniform and non-uniform open channel flows including gradually, rapid and spatially varied flows; analysis of supercritical flow in transition; basic principles of unsteady flows; long wave theory; Saint-Venant Equations and their solutions including method of characteristics, explicit and implicit finite difference numerical methods.

CE 235.  Hydrologic Modeling.  3 Units
Prerequisite(s): CE 234 or equivalent.
Term Typically Offered: Spring only – odd years
Theories and structure of hydraulic model components; application of HEC-RAS (River Analysis System) and HEC-HMS (Hydrologic Modeling System) computer programs; emphasis on flood routing methods; dam safety analysis methodology including dam break and dam overturning cases; application of microcomputers in hydraulics computations.

CE 241.  Analysis and Control of Traffic Systems.  3 Units
Prerequisite(s): CE 140 or CE 142; CE 243 or instructor permission.
Term Typically Offered: Spring only – odd years
Traffic data collection and analysis, practical application of theoretical methods of analysis such as capacity, level of service, and queuing theory. Investigation of traffic control techniques such as actuated signals and signal systems, and study of management techniques for traffic congestion.

CE 242.  Transportation Planning.  3 Units
Prerequisite(s): CE 142 or instructor permission.
Term Typically Offered: Fall only – odd years
Introduction to the complexities of comprehensive intermodal transportation planning. Study of transportation problems, system operating characteristics, alternative modes, and the planning process. Analyzes factors affecting travel behavior and methods of forecasting demand for travel by various modes.

CE 243.  Traffic Flow Theory.  3 Units
Prerequisite(s): CE 140 or CE 142; ENGR 203 or instructor permission.
Term Typically Offered: Fall only – even years
Study of traffic flow characteristics including flow rate, speed, and density, at both the microscopic and macroscopic levels. Traffic flow analysis using the theoretical methods including capacity analysis, traffic stream models, shockwave analysis, and queuing analysis. Emphasis is on theory with demonstration of practical applications.

CE 244.  Advanced Transportation Facility Design.  3 Units
Prerequisite(s): CE 140 or instructor permission.
Term Typically Offered: Fall only – even years
Advanced study of current topics in highway and mass transportation facility design including safety, curve design, pavement design and drainage facility design. Focuses on current design practice and recent or impending changes in design practice.

CE 245.  Pavement Design.  3 Units
Prerequisite(s): CE 140 and CE 170.
Term Typically Offered: Spring only – even years
Fundamental principles of pavement analysis, design, and evaluation. Topics include pavement materials, mechanics, traffic and environmental loadings, pavement performance, design methods, construction and economic evaluation.

CE 251.  Environmental Quality Processes I.  3 Units
Prerequisite(s): CE 150, 150L, and CE 151; or equivalent.
Term Typically Offered: Fall, Spring

CE 252.  Environmental Quality Processes II.  3 Units
Prerequisite(s): CE 150, 150L, and CE 151.
Term Typically Offered: Fall, Spring

CE 253.  Environmental Quality Processes III.  3 Units
Prerequisite(s): CE 150, 150L, and CE 151; or equivalent.
Term Typically Offered: Fall, Spring
Theory and practice of physical and chemical processes used in engineered water and wastewater systems. Adsorption, ion exchange, gas transfer, membrane processes, coagulation, flocculation, sedimentation, filtration, precipitation, disinfection, and stripping. Physical/chemical reactors. Note: CE 251 recommended.
## CE 264. Advanced Design in Reinforced Concrete. 3 Units
**Prerequisite(s):** CE 160, CE 163, CE 164.
**Term Typically Offered:** Spring only – even years

Advanced topics in behavior and design in reinforced concrete. Detailing for seismic response.

## CE 266. Dynamics and Earthquake Response of Structures. 3 Units
**Prerequisite(s):** CE 160; or equivalent.
**Term Typically Offered:** Fall only – odd years

Response of structures modeled as single-degree systems to harmonic, periodic, and arbitrary excitation and earthquake ground motion; effects of damping and material nonlinearity; numerical methods using spreadsheets; response spectra. Response of structures modeled as multi-degree systems: modeling of structure mass, damping and elastic stiffness; solution by modal superposition; time-history and response spectrum analysis; implications for codes for earthquake-resistant design. Microcomputer software is extensively used.

## CE 267. Structural Systems for Buildings. 3 Units
**Prerequisite(s):** CE 163, CE 164, and CE 166; or equivalent
**Term Typically Offered:** Spring only – even years

Analysis and design of structural systems for buildings including frames, shear walls, and tubes; interaction between structural systems; secondary effects including geometric and material nonlinearities.

## CE 268. Pre-stressed Concrete Bridge Design. 3 Units
**Prerequisite(s):** CE 164 or instructor approval.
**Term Typically Offered:** Fall only – even years

Behavior and design of short and medium-span prestressed concrete bridges using American Association of State Highway and Transportation Officials (AASHTO) Load Resistance Factor Design (LRFD) specifications. Topics include: bridge types, aesthetics; design process; superstructure load types and live load analysis; limit states and load combinations; prestressed concrete materials; flexural analysis and design; shear analysis and design; and introduction to substructure analysis and design, including seismic design criteria. A team project is required.

## CE 270. Advanced Soil Mechanics and Foundation Engineering I. 3 Units
**Prerequisite(s):** CE 260 or CE 170L or equivalent.
**Term Typically Offered:** Fall only – even years

Advanced analyses in soil mechanics and their practical applications in foundation engineering; compressibility of soils, settlement analysis, and tolerable settlement; lateral earth pressures and design of earth retaining structures; bearing capacity of shallow foundations; in-situ soil testing for foundation design; design of deep foundations, including driven piles, drilled shaft foundations, and laterally loaded piles.

## CE 271. Advanced Soil Mechanics and Foundation Engineering II. 3 Units
**Prerequisite(s):** CE 170 and CE 170L or equivalent.
**Term Typically Offered:** Fall only – odd years

Advanced analyses in shear strength of cohesionless and cohesive soils, including stress-strain characteristics of soils, total and effective stress analyses; slope stability analyses for natural slopes, fill slopes, earth dams, levees, and methods of slope stabilization; analysis and design of anchored bulkheads, cellular cofferdams, soil nail walls, tieback walls, mechanically stabilized earth walls, and segmental retaining walls.
Advanced analysis principles and procedures for calculating monotonic and cyclic soil element response effective stress and pore water pressure distributions, dynamic site response, and soil deformations; application to analysis of complex geotechnical engineering systems such as levees, dams, and wharfs. Laboratory time devoted to numerical analysis software and physical element and small scale tests. Lecture two hours. Laboratory three hours.

**CE 273. Ground Modification Engineering.**
Prerequisite(s): CE 170 and CE 170L or equivalent.
Term Typically Offered: Fall, Spring

Principles of soil stabilization and earth reinforcement; mechanical compaction and treatment of difficult soils, including expansive soils, collapsible soils, oversize materials, and compressible fill; prefabricated vertical drains and preloading; dynamic deep compaction; vibro compaction; vibro-replacement; rammed aggregate pier; compaction grouting; jet grouting; slurry grouting; chemical grouting; deep soil mixing; slurry trench walls.

**CE 274. Soil Dynamics and Earthquake Engineering.**
Prerequisite(s): CE 170 and CE 170L.
Term Typically Offered: Spring only – odd years

Introduction to vibration theory; wave propagation in soils and dynamic behavior of soils and foundations; dynamic tests; analysis of dynamically loaded foundations; causes of earthquakes; earthquake magnitude and zones; ground motions induced by earthquakes; earthquake-resistant design of foundations and earth dams.

**CE 275. Geosynthetics.**
Prerequisite(s): CE 170 and CE 170L or equivalent.
Term Typically Offered: Fall only – even years

Overview of geotextiles, geogrids and geonets; geosynthetic properties and test methods; geosynthetic functions and mechanisms as in separation, roadway and soil reinforcement, filtration, and drainage; applications and design methods; construction, fabrication and installation.

**CE 281. Systems Analysis of Resources Development.**
Prerequisite(s): Graduate status or instructor permission.
Term Typically Offered: Spring only – even years

Investigation of resource planning using the “systems approach”. Objectives of resource development; basic economic and technologic concepts, and economic factors affecting system design. Consideration of evaluation, institutional constraints, and uncertainty in water resources systems. Familiarization with modern computer techniques. Applications of concepts to air and land resources.

**CE 289. Project Management for Civil Engineers.**
Prerequisite(s): Graduate standing or instructor permission.
Term Typically Offered: Spring only

Theory and practice of project management in civil engineering. Interrelationship of planning, design, and construction. New technologies and techniques used in both US and international architectural/engineering/Construction (A/E/C) markets. Topics: Project initiation, early estimates, project budgeting, work plans, design proposals, scheduling, tracking, design coordination, construction, project close-out, team and personal management skills, and quality control.

**CE 296D. Stormwater Management.**
Prerequisite(s): CE 137 and CE 170
Term Typically Offered: Fall, Spring

**CE 296H. GIS Applications in Civil Engineering.**
Prerequisite(s): ENGR 115, CE 9 and CE 137 or CE 147 or CE 171A.
Term Typically Offered: Fall, Spring

Introduction to fundamental concepts of geographic information systems (GIS), methods, and applications in civil engineering. Design and develop GIS-based analytical methods and solutions for civil engineering problems. Lab exercises are used to design and practice GIS applications in civil engineering. This course may be paired with CE 196H.

**CE 299. Special Problems.**
Term Typically Offered: Fall, Spring

Special problems in graduate research.

**CE 500. Culminating Experience.**
Prerequisite(s): Advanced to candidacy and permission of the faculty advisor and Department Chair.
Term Typically Offered: Fall, Spring

Successful completion of either: A. Thesis (3-6 units), or B. Project (3-6 units) or C. Directed Study and Examination (3 units). Plan A requires a thesis and is primarily research-oriented. Plan B requires a project report that is primarily application-oriented. Plan C requires a detailed literature review or experimental data analysis resulting in a written report plus an examination by three faculty. A public presentation is required for all three plans.

**BS in Civil Engineering**

Units required for Major: 94 including GE courses
Total units required for BS: 124

**Program Description**

Civil Engineering involves the application of scientific principles and knowledge of mathematics and computers to the planning, analysis, design, and construction of all types of private and public works. Reduction of air and water pollution, disposal of hazardous wastes, renewal of our old cities, planning and building of new communities, providing water, power, and high-speed ground transportation systems are the responsibilities of the civil engineer. It is a continual challenge to the civil engineer to provide these services efficiently by the construction of dams, buildings, bridges, tunnels, highways, airports, waterways, and waste handling facilities in harmony with the natural environment.

Because of the broad range of demands on the civil engineer’s services, the undergraduate program is devoted to fundamental principles in
mathematics; basic and engineering sciences; the spectrum of Civil Engineering practice in both analysis and design; and required courses in the humanities and the social sciences, so that engineers may better relate to the world and society they serve. The upper division program permits students to select 12 units (4 courses) of electives. Students may increase the breadth or depth of their knowledge in Civil Engineering by selecting these electives in several areas: environmental and water quality engineering, geotechnical engineering, structural engineering, transportation, and water resources engineering.

Courses may be interchanged between semesters to accommodate the student’s schedule, as long as prerequisites are observed. Civil engineering is a demanding major, but with devoted study it can be completed in four years. Students who are working half-time or more often find it difficult to successfully pass a full load of classes each semester. Such students should plan to take fewer units per semester and a longer time to finish their degree.

Note: Students must satisfy the requirements of the Accreditation Board for Engineering and Technology (EAC/ABET). Consult the Civil Engineering Department Chair for specific General Education requirements.

Note: Students graduating with a BS in Civil Engineering will not be subject to the University’s Foreign Language Graduation Requirement. Students who change major may be subject to the University’s Foreign Language Graduation Requirement.

MS in Civil Engineering

Total units required for the MS: 30 - Includes research or independent study and units required in area of specialization (see Program Requirements below)

Program Description

Civil Engineering encompasses a broad range of professional activities. The four years of undergraduate preparation for the Bachelor of Science degree are devoted to fundamental analytical principles and basic design applications. For technical competence in specialized areas and continued effectiveness on the job, graduate study is becoming increasingly necessary.

The Civil Engineering Department offers a graduate program of study leading to a Master of Science degree in Civil Engineering in the following areas of specialization:

- **Environmental Engineering** - analysis, design, and management of natural and engineered water systems including drinking water, wastewater, and stormwater; solid and hazardous waste management and regulations; air quality management and pollution control technologies;
- **Geotechnical Engineering** - properties and behavior of soil; seepage analysis with application to design of foundation, retaining structures, earth dams and slopes; soil improvement and ground stabilization; geosynthetics inclusions, soil dynamics, and earthquake engineering;
- **Structural Engineering** - advanced structural analysis methods; structural systems; advanced concrete and steel analysis and design applied to buildings and bridges; seismic analysis and design;
- **Transportation Engineering** - transportation engineering and planning, traffic flow theory, and system management applicable to all modes with emphasis on highway and multi modal transportation; interdisciplinary study with other areas of civil engineering as well as with non-engineering areas may also be arranged; and
- **Water Resources Engineering** - advanced hydraulics and hydrologic design and analysis of water systems, modeling of hydraulic and

Electives are to be chosen from these courses in consultation with a faculty advisor and must include at least two design electives (indicated by 2).

Note: Other electives, such as a CE 196 series course or CE 199E may be chosen with the approval of a faculty advisor and Department Chair.

Indicates a design elective.

Note: There is no way to list all possible overlaps so please consult with a professional advisor. The Academic Advising Center can be visited online (http://www.csus.edu/acad/), by phone (916) 278-1000, or email (advising@csus.edu).
hydrologic water systems, hydrometeorology analysis, steady and non-steady analysis of groundwater movement of confined and unconfined aquifers, modeling of groundwater movement, and planning, management, and operation of water resource systems.

The MS in Civil Engineering consists of a choice of courses within a specialization, a choice of elective courses, a writing intensive course, a mathematics or statistics course, and culminating requirements; all selected by the student and approved by an advisor.

**Admission Requirements**

Admission as a classified graduate student in Civil Engineering requires:

- an undergraduate degree in Civil Engineering; and
- a minimum 2.8 GPA.

In addition, the merit of past academic endeavor and/or professional experience, potential for future study, and professional goals may also be considered for granting admission through submission of the civil engineering department supplemental application form.

Applicants who have deficiencies in admission requirements that can be removed by specified additional preparation may be admitted with conditionally classified graduate status.

Students with a baccalaureate degree in engineering majors other than Civil Engineering (e.g., Electrical and Electronic, Industrial, Mechanical, or Surveying) or in other non-engineering scientific disciplines (e.g., Mathematics, Physics, or Geology) who wish to pursue the graduate program in Civil Engineering may be considered on an individual basis. Such students may be admitted as conditionally classified students and will be required to complete a specifically designed list of undergraduate prerequisite courses in engineering and/or mathematics, physics, and chemistry to correct undergraduate deficiencies. Such a student must have an approved study program on file with the Department while undertaking this qualifying work. Upon completion of these courses with a GPA of 2.8 or better, the student may apply for classified graduate status in Civil Engineering.

**Admission Procedures**

All prospective graduate students, including Sacramento State graduates, must submit:

- an online application for admission; and
- one set of official transcript from all colleges and universities attended, other than Sacramento State.
- Civil Engineering department supplemental application form included in the online application.
- GRE test score if a student does not have an ABET-accredited engineering degree.
- GRE test score if a student does not meet the minimum 2.8 GPA requirement.

For more admissions information and application deadlines, please visit the Office of Graduate Studies website (http://csus.edu/gradstudies/).

After being admitted, students must meet with an advisor and complete a Graduate Student Advising Form (obtainable in the Civil Engineering Department). This advising form must be kept current and on file in the Department Office.

**Minimum Units and Grade Requirements for the Degree**

Total units Required for the MS: 30; includes research or independent study and units required in specializations (see Program Requirements below)

Minimum Cumulative GPA: 3.0. No course in the program of study may have a grade below "C+".

**Advancement to Candidacy**

Each student must file an application for Advancement to Candidacy, indicating a proposed program of graduate study. This procedure should begin as soon as the graduate student has:

- removed any deficiencies in admission requirements;
- obtained classified graduate status;
- completed at least 12 units in the graduate program with a minimum 3.0 GPA, including at least three courses at the 200-level;
- taken the Graduate Writing Intensive (GWI) course in the degree program within the first two semesters of coursework at California State University, Sacramento; and
- selected and obtained approval for a culminating requirement (Plan A, B, or C).

Advancement to Candidacy form is submitted online. The student fills out the form after planning a degree program in consultation with their faculty advisor. The completed form is then approved by the Graduate Coordinator of the Department and submitted to the Office of Graduate Studies. Any subsequent deviations from an approved Advancement to Candidacy form would require the submission of a petition for exception form.

All graduate degree programs are subject to general University requirements for graduate degrees, explained in the Graduate Degree Requirements section of this catalog.

**Program Requirements**

Total number of required units for degree is 30. Variable units are listed due to variable culminating requirement units.

</tbody>
</table>

Plan A
Master's Thesis (3 or 6 units) Approval by the faculty thesis advisor and by a second faculty or an expert in the area of study is required. The thesis must comply with University standards for format and is filed in the University Library. The Master's Thesis should be the written product of a systematic study of a significant problem. It identifies the problem, states the major assumptions, explains the significance of the undertaking, sets forth the sources for and methods of gathering information, analyze the data, and offers a conclusion or recommendation. The finished product evidences originality, critical and independent thinking, appropriate organization and format, and thorough documentation. The work should be associated with engineering research or innovation. No more than 3 units may be awarded for a topic directly related to a topic studied of CE 299. A public presentation is required.

Plan B

Master's Project (3 or 6 units) Approval by the faculty thesis advisor and by a second faculty or an expert in the area of study is required. A Master's Project should be a significant undertaking appropriate to the engineering profession. It evidences originality and independent thinking, appropriate form and organization, and rationale. It is described and summarized in a written report that includes a discussion of the project's significance, objectives, methodology and a conclusion or recommendation. The work should be associated with practical engineering applications. The report must comply with University standards for format and will be filed in the University Library. No more than 3 units may be awarded for a topic directly related to a topic studied for CE 299. A public presentation is required.

Plan C

Directed Study with Comprehensive Exam (3 units). Approval by one faculty member is required for Directed Study. The comprehensive examination is administered by a committee of three faculty members. A written report and a public presentation are required on the directed study. The format of the comprehensive examination can be written, oral, or both.

1 With advisor approval. Students pursuing an emphasis in Environmental Engineering, Water Resource Engineering or Transportation Engineering must take ENGR 203. Students pursuing an emphasis in Structural Engineering must take ENGR 201 or ENGR 202.

2 Elective courses (including CE 299) selected with prior approval of the student's faculty advisor in the area of interest. In addition to 200-level courses, these may also include the technical electives (but not the required courses) from the civil engineering undergraduate curriculum. Not more than 3 units of CE 299 may be taken without prior approval of the Graduate Coordinator.

3 Total required units for degree is 30. Variable units are listed due to variable culminating requirement units. If 3 units of culminating requirement are selected, 6 units of electives are required, and vice versa.

Specialization Courses

Units required: 15 – a minimum of 12 units must be taken from one of the following five areas of specialization. Up to 3 units can be satisfied by 200 level coursework (not including CE 299) outside the chosen area of specialization.

Computer Engineering

College of Engineering and Computer Science

Program Description

Computer Engineering is one of the newest areas of engineering, a dynamic field that thrives on innovation and challenges. Business, industry, and home applications create the need for products that often can be used both for work as well as for entertainment. In the high technology areas of the United States, Sacramento included, Computer Engineering has experienced tremendous growth, becoming one of the major driving forces behind the rapidly advancing electronics and
computer industry. Employment projections consistently predict that computer engineering and computer science will continue to experience more than a doubling of growth in a ten-year period.

Nationally, nearly all engineering universities offer a degree in Computer Engineering. Being close in course content to Electrical Engineering and to Computer Science, these degrees are found in various departmental and program configurations. At Sacramento State, Computer Engineering enjoys the advantage of both areas since it is a program jointly supported by the Electrical and Electronic Engineering Department and the Computer Science Department.

Lower division preparation in Computer Engineering parallels that of Computer Science, with the addition of a basic electrical circuit course and a logic design course. Except for the logic design course, most community colleges offer sufficient lower division courses in mathematics, chemistry, physics, and most importantly, computer science.

Degree Programs
BS in Computer Engineering (p. 593)
MS in Computer Engineering (p. 595)

Accreditation
In addition to California State University, Sacramento’s full accreditation by the Western Association of Schools and Colleges, the Bachelor of Science in Computer Engineering is also individually accredited by ABET, Inc.

Notice to Students RE: Professional Licensure and Certification
California State University programs for professions that require licensure or certification are intended to prepare the student for California licensure and certification requirements. Admission into programs for professions that require licensure and certification does not guarantee that students will obtain a license or certificate. Licensure and certification requirements are set by agencies that are not controlled by or affiliated with the California State University and licensure and certification requirements can change at any time.

The California State University has not determined whether its programs meet other states’ educational or professional requirements for licensure and certification. Students planning to pursue licensure or certification in other states are responsible for determining whether, if they complete a California State University program, they will meet their state’s requirements for licensure or certification. This disclosure is made pursuant to 34 CFR §668.43(a)(5)(v)(C).

Special Features
• Due to numerous generous donations from supportive industries, the computer engineering labs are well equipped with servers and workstations, and with software development tools for VLSI application-specific integrated circuits. Industries donate large electronic devices (FPGAs, CPUs) to each student in computer engineering laboratories.
• The Sacramento State Computer Engineering BS degree is accredited by the Engineering Accreditation Commission (EAC) of ABET, www.abet.org (http://www.abet.org/). Computer Engineering faculty value accreditation very highly.
• A mechanism of maintaining currency in technology, curriculum review, and outcomes assessment is in place to assure the university and graduates of the continued growth and high quality of the program.

Program Educational Objectives
The Computer Engineering Program’s specific educational objectives are to educate graduates that possess:
1. Core Knowledge: Our graduates will have careers in computer engineering, or be engaged in a related career path.
2. Application of Knowledge: Our graduates will apply their knowledge and skills to solve practical engineering problems.
3. Lifelong Learning: Our graduates will continue to develop their skills and seek knowledge after graduation in order to adapt to advancing technology and the needs of society. This may be indicated by the graduate's pursuit of an advanced degree or other formal instruction, and/or that the graduate has developed a professional specialty.
4. Professionalism: Our graduates will have the necessary professional skills, such as high ethical standards, effective oral and written communications, and teamwork, to be productive engineers and to advance in their careers.

Career Possibilities
Computer Engineer · Computer Architect · ASIC Designer · Chip Architect · VLSI Engineer · Real Time System Design Engineer · Design Engineer · Hardware Engineer · Software Engineer · Systems Engineer · Applications Engineer · Networking Engineer · Control Engineer · Marketing Engineer · Data Communications Engineer · Project Engineer · Research Engineer · Consulting Engineer · Test Engineer · Production Engineer · Telecommunications Engineer · Solid State Engineer · DSP Engineer

CPE 64. Introduction to Logic Design. 4 Units
Prerequisite(s): CSC 15 or CSC 25 or ENGR 50.
General Education Area/Graduation Requirement: Understanding
Personal Development (E)
Term Typically Offered: Fall, Spring, Summer

Covers the following topics: logic gates, binary number system, conversion between number systems, Boolean algebra, Karnaugh maps, combinational logic, digital logic design, flip-flops, programmable logic devices (PLDs), counters, registers, memories, state machines, designing combinational logic and state machines into PLDs, and basic computer architecture. Lab emphasizes the use of software equation entry design tools, the use of a schematic entry, and the use of a logic simulation design tool. Lab assignments are design-oriented. Lecture three hours; laboratory three hours.
Cross listed: EEE 64

CPE 64P. Peer-Assisted Learning CPE 64. 1 Unit
Corequisite(s): CPE 64
Term Typically Offered: Fall, Spring

Students concurrently enrolled in CPE 64 work through faculty-designed problems sets under the guidance of a trained student facilitator to improve their understanding of CPE 64 content. Pedagogical strategies that encourage active, engaged learning are employed to facilitate student success.
Credit/No Credit

CPE 64W. Introduction to Logic Design Workshop. 1 Unit
Corequisite(s): CPE 64
Term Typically Offered: Fall, Spring

Designated to assist students in developing a more thorough understanding of logic simulation and logic design. Focus is on problem solving and design. Activity two hours.
Cross Listed: EEE 64W; only one may be counted for credit.
Credit/No Credit

CPE 138. Computer Networking Fundamentals. 3 Units
Prerequisite(s): CSC 35, CSC 60, CSC 130. Not currently enrolled in CSC/CPE 138.
Term Typically Offered: Fall, Spring

Cross Listed: CSC 138; only one may be counted for credit.

CPE 139. Operating System Pragmatics. 3 Units
Prerequisite(s): CSC 137 or CPE 166 and CPE 185.
Term Typically Offered: Fall, Spring

Design and performance issues of computers. Instruction set architecture, computer arithmetic, processor design, survey of contemporary architectures, interfacing I/O devices, hierarchal memory design and analysis, parallelism and multiprocessing, distributed systems, techniques for enhancing performance, and an introduction to EDA tools for design and verification of computers. Design and simulation of a microcomputer in an HDL.
Note: Open to students with full CSC or CPE major standing only. Cross Listed: CPE 142; only one may be counted for credit.

CPE 142. Advanced Computer Organization. 3 Units
Prerequisite(s): CSC 137 or CPE 166 and CPE 185.
Term Typically Offered: Fall, Spring

Introduction to CMOS logic gates and the design of CMOS combinational and sequential functions at the gate level, including CMOS memory. CMOS transistor theory is covered including: DC equations, threshold voltage, body effect, subthreshold region, channel length modulation, tunneling, and punch through. A basic exposure to VLSI includes: CMOS processing technology, layout, and CMOS logic design including power, delay and timing considerations. Students will use industry standard Computer Aided Design tools to verify designs and layouts.

CPE 144. Dsp Architecture Design. 3 Units
Prerequisite(s): CPE 142.
Term Typically Offered: Fall, Spring

Discrete Fourier Transform, and Fast Fourier Transform. Emphasis on hardware design to achieve high-speed real and complex multiplications and additions. Pipelining, Harvard, and modified Harvard architectures are included. Concludes with architectural overviews of modern DSP applications: modems, speech processing, audio and video compression and expansion, and cellular.

CPE 151. CMOS and Digital VLSI Design. 3 Units
Prerequisite(s): CPE 64 and EEE 108.
Term Typically Offered: Fall, Spring

Review basic CMOS VLSI technology, circuit characterization and performance estimation, and provides detailed information on synthesis, placement and routing, clocking strategies, quality and reliability, and I/O structures. Design examples, design techniques, and testing techniques will be presented via current EDA design tools. Students assigned one project from concept design through validation.

CPE 153. Vlsi Design. 3 Units
Prerequisite(s): CPE 151.
Term Typically Offered: Fall, Spring

CPE 166. Advanced Logic Design. 4 Units
Prerequisite(s): CPE 64, ENGR 17.
Term Typically Offered: Fall, Spring

VHDL and Verilog Hardware Description Languages are studied and used on the following advanced level logic design topics: synchronous state machines, asynchronous state machines, metastability, hazards, races, testability, boundary scan, scan chains, and built-in self-tests. Commercial Electronic Design Automation (EDA) tools are used to synthesize lab projects containing a hierarchy of modules into Field Programmable Gate Arrays (FPGAs). Post synthesis simulations by these same tools verify the design before implementation on rapid prototyping boards in the lab.

CPE 185. Computer Interfacing. 4 Units
Prerequisite(s): CPE 64, CSC 35 and CSC 60.
Term Typically Offered: Fall, Spring

Design of microcomputer systems including memory systems, parallel and serial input/output, timer modules, and interrupt structures; designing "C" language code, in laboratory, to exercise interface modules of parallel and serial input/output, timer modules, and interrupts; extensive study of interrupt handlers, assemblers, linkers, and loaders. Practical features of interfaces, handshaking techniques, displays, keypads, and trackballs are included.

CPE 186. Computer Hardware System Design. 3 Units
Prerequisite(s): CPE 185 or EEE 174.
Term Typically Offered: Fall, Spring

Study of Intel and Motorola architectures, bus structures, interrupts, memory interface and controllers, bus arbitration, DMA controllers, I/O interface, bridges and microcontroller. Electromagnetic compatibility and regulations, cabling and shielding, grounding, digital circuit noise and layout.

CPE 187. Embedded Systems Design. 3 Units
Prerequisite(s): CPE 185 or EEE 174.
Term Typically Offered: Fall, Spring

Introduction to embedded systems with applied projects. The ISA, memory map, register architecture and configuration for one processor are studied in depth. Topics include: Overview of embedded systems; hardware, firmware, and software design; interrupt programming; application of contemporary interfacing protocols like USB and Bluetooth; use of an integrated development environment (IDE) for development; functional debugging; Real Time Operating Systems (RTOS) considerations and scheduling. One two hour lecture and one three hour lab per week.

CPE 190. Senior Design Project I. 2 Units
Prerequisite(s): CPE 166, CPE 187, EEE 108
Corequisite(s): CPE 142
Term Typically Offered: Fall, Spring

Centers on developing hardware and software project planning and engineering design skills. Emphasis is placed on design philosophies, problem definition, project planning and budgeting, written and oral communication skills, working with others in a team arrangement, development of specifications and effective utilization of available resources. Lecture one hour per week, laboratory three hours per week.

CPE 191. Senior Design Project II. 2 Units
Prerequisite(s): CPE 190, and (GWAR Certification before Fall 09, or WPJ score of 70+, or at least a C- in ENGL 190M or ENGL 109W).
Term Typically Offered: Fall, Spring

Continuation of CPE 190. Students are expected to complete the project started by design teams in CPE 190. The hardware will be completed, tested and redesigned if necessary. At the same time, software for the project will be finished and debugged. The final results of the team project will be presented to the CPE faculty and students at a prearranged seminar. Lecture one hour, laboratory three hours.

CPE 195. Fieldwork in Computer Engineering. 1 - 15 Units
Prerequisite(s): Petition approval by Program Coordinator.
Term Typically Offered: Fall, Spring

Directed observations and work experience in computer engineering with firms in the industry or public agencies. Supervision is provided by the instructional staff and the cooperating agencies. Faculty approval required.

Credit/No Credit

CPE 195A. Professional Practice. 1 - 12 Units
Prerequisite(s): Instructor permission.
Term Typically Offered: Fall, Spring

Supervised employment in a professional engineering or computer science environment. Placement arranged through the College of Engineering and Computer Science. Requires satisfactory completion of the work assignment and a written report.

Credit/No Credit

CPE 195B. Professional Practice. 1 - 12 Units
Prerequisite(s): Instructor permission.
Term Typically Offered: Fall, Spring

Supervised employment in a professional engineering or computer science environment. Placement arranged through the College of Engineering and Computer Science. Requires satisfactory completion of the work assignment and a written report.

Credit/No Credit

CPE 195C. Professional Practice. 1 - 12 Units
Prerequisite(s): Instructor permission.
Term Typically Offered: Fall, Spring

Supervised employment in a professional engineering or computer science environment. Placement arranged through the College of Engineering and Computer Science. Requires satisfactory completion of the work assignment and a written report.

Credit/No Credit

CPE 199. Special Problems. 1 - 3 Units
Prerequisite(s): Instructor permission.
Term Typically Offered: Fall, Spring

Individual projects or directed reading.

Note: Open only to those students who appear competent to carry on individual work. Admission to this course requires approval of the faculty member under whom the individual work is to be conducted, in addition to the approval of the advisor. May be repeated for credit.
CPE 201. Research Methodology.  2 Units
Prerequisite(s): Graduate standing or instructor permission.
Term Typically Offered: Fall, Summer

Immersion in the discourse of Computer Engineering: genres, literacies, stylistic conventions, research methodology. Collective and individual study of selected issues and problems relating to fields of study in the Computer Engineering. Orientation to the requirements for the master's degree culminating experience.
Note: Must be taken in the first semester of the graduate program.

Credit/No Credit

CPE 273. Hierarchical Digital Design Methodology.  3 Units
Prerequisite(s): CSC 205, EEE 285 or their equivalents.
Term Typically Offered: Fall, Spring

Advanced logic modeling, simulation, and synthesis techniques. Topics include modeling, simulation, and synthesis techniques, using Hardware Description Language (HDL’s), Register Transfer Level (RTL) representation, high level functional partitioning, functional verification and testing, computer-aided logic synthesis, logical verification and testing, timing and delay analysis, automated place and route process’, and design with Application Specific Integrated Circuits (ASICs) and programmable logic.

CPE 274. Advanced Timing Analysis.  3 Units
Prerequisite(s): EEE 273, CSC 273, CPE 273 or instructor permission.
Term Typically Offered: Fall, Spring

Timing analysis of Application Specific Integrated Circuit (ASIC) designs: Topics include ASIC design methodology, static timing analysis, timing design constraints, design reports, clock timing issues, timing exceptions, operating conditions, hierarchical analysis, analyzing designs with asynchronous logic, performance measurement and power issues. Cross-listed: EEE 274; only one may be counted for credit.

CPE 280. Advanced Computer Architecture.  3 Units
Prerequisite(s): CSC 205, fully satisfied graduate status.
Term Typically Offered: Fall, Spring

Introduction to parallel architecture covering computer classification schemes, fine and course grain parallelism, processor interconnections, and performance issues of multiprocessor systems. Includes parallel and pipelined instruction execution, structure of multiprocessor systems, memory hierarchy and coherency in shared memory systems, programming issues of multiprocessor systems, arithmetic pipeline design, and design for testability.

CPE 296T. Digital Speech Processing.  3 Units
Prerequisite(s): EEE 181 or instructor permission.
Term Typically Offered: Fall, Spring

The objective of this course is to cover the digital processing of speech signals. Topics include speech production and perception, speech processing in the time frequency domains. Short-time energy and Short-time Fourier analysis, homomorphic and linear predictive coding methods. Also covered are speech coding, basic introduction of text-to-speech synthesis and speech recognition. Cross listed: EEE 296T.

CPE 299. Special Problems.  1 - 3 Units
Prerequisite(s): Instructor permission.
Term Typically Offered: Fall, Spring

Open to qualified students who wish to pursue problems of their own choice. Projects must have approval and supervision of a faculty advisor.

CPE 500. Culminating Experience.  5 Units
Prerequisite(s): Advanced to candidacy and graduate coordinator’s permission.
Term Typically Offered: Fall, Spring

Completion of a thesis or project approved for the master’s degree.
Note: May be repeated for credit.

BS in Computer Engineering

Units required for Major: 97
Total units required for the BS: 124

Program Description

The Bachelor of Science degree in Computer Engineering is a four-year program that emphasizes engineering design of computer hardware and systems at all levels. Engineering design begins with logic design taught to entering students during their first semester. The thread of design continues through the study of architecture, CMOS and VLSI technology, ASIC design, operating systems, computer hardware design, and networking hardware. To complete their degree, students take a two-semester senior design and project course.

**Required Lower Division Courses (23 UNITS, Included Above)**

**Required Mathematics Courses - Included Above (11 UNITS: Math 30, Math 31 and Math 45)**

**Additional Required Courses - Included Above (13 UNITS: ENVS 10, ENGR 140, PHYS 11A, PHYS 11C)**

**Required Upper Division Courses (44 UNITS - Included Above)**

---

**Tech Electives I and II (6 UNITS: Included Above)**

**Total Units** 124

1. Course also satisfies General Education (GE)/Graduation Requirement.

**Note:**
- Students are expected to satisfy the general education requirements of the Accreditation Board for Engineering and Technology (ABET) as well as the University's General Education requirements. Students should consult the Program Coordinator for specific General Education requirements.
- A second-year foreign language course (2A or equivalent) may also satisfy 3 units of GE when the course is being taken to comply with the Sacramento State foreign language requirement. Students should consult with an advisor for exact GE eligibility of these courses.

2. ENGL 10 and ENGL 11 may be taken in lieu of ENGL 5 (only 3 units will be counted towards degree)

To help you complete your degree in a timely manner and not take more units than absolutely necessary, there are ways to use single courses to meet more than one requirement (overlap). For further information, please visit the General Education page (p. 1103).

Note: There is no way to list all possible overlaps so please consult with a professional advisor. The Academic Advising Center can be visited online (http://www.csus.edu/acad/), by phone (916) 278-1000, or email (advising@csus.edu).

**Required Basic Knowledge**

A student must have completed the following list of Required Basic Knowledge before becoming a fully classified graduate student in Computer Engineering. Courses listed in parentheses are the equivalent Sacramento State courses.

Minimum required GPA in the following subject areas: 3.0

- Electrical Fundamentals
- Analog/Digital Electronics
- CMOS and VLSI
- Digital Logic Design and Introduction to Computer Organization
- Assembly Language
- Computer Interfacing
- Object Oriented Programming
- Algorithms and Data Structure
Graduate Admission Procedures

Applications will be accepted as long as there is space available. All prospective graduate students, including Sacramento State graduates, must file all of the following with the Office of Graduate Studies, River Front Center 215, (916) 278-6470:

- an online application for graduate admission and fee at the time of application;
- one set of official transcripts from colleges and universities attended, other than Sacramento State; and
- Graduate Record Examination (GRE) scores;

For more admissions information and application deadlines, please visit the Office of Graduate Studies website (http://www.csus.edu/gradstudies/).

Minimum Units and Grade Requirement for the Degree

Units required for the MS: 30

Minimum cumulative GPA: 3.0. Up to three courses in the program of study may have a grade of "C+" or "B-". All other courses in the program of study must have a grade of "B" or higher.

Advancement to Candidacy

Each student must file an application for Advancement to Candidacy indicating a proposed program of graduate study. This procedure should begin as soon as the classified graduate student has:

- removed any deficiencies in the admission requirements;
- completed at least 12 units of graduate level (200 series) Computer Engineering courses with a minimum 3.0 GPA; and
- complete a Graduate Writing Intensive (GWI) course in their discipline with a grade of "B" or better at California State University, Sacramento.

Students must have been advanced to candidacy before they can register for Plan A, B or C. The student should fill out the form after planning a degree program in consultation with a Computer Engineering graduate advisor. The completed form must be signed by the CPE Graduate Coordinator and is then returned to the Office of Graduate Studies for approval.

Note: It should be recognized that the industry puts a high value on project and thesis problem-solving experience, and the demonstration of technical writing skills that these options require. Graduating under the Plan C option will not provide that experience. Students taking this option should consider, with their elective area advisors, other ways of gaining that valuable experience, such as through a CPE 299 Special Problems course.

<td>12</td>
</tr>
</tbody>
</table>

Students must cover at least two from the following five areas with equal number from CSC and EEE courses:

**Algorithms and Applications**

- CSC 206 Algorithms And Paradigms
- EEE 221 Machine Vision
- EEE 225 Advanced Robot Control
- EEE 244 Electrical Engineering Computational Methods and Applications
- EEE 246 Advanced Digital Control

**Computer Architecture and Digital Design**

- CSC 242 Computer-Aided Systems Design and Verification
- EEE 272 High Speed Digital System Design
- EEE 274 Advanced Timing Analysis
- EEE/CSC 280 Advanced Computer Architecture
- EEE 285 Micro-Computer System Design I
- EEE 286 Microcomputer System Design II

**Microelectric Design**

- EEE 230 Analog and Mixed Signal Integrated Circuit Design
- EEE 231 Advanced Analog and Mixed Signal Integrated Circuit Design
- EEE 232 Key Mixed-Signal Integrated Circuit Building Blocks
- EEE 234 Digital Integrated Circuit Design
- EEE 235 Mixed-Signal IC Design Laboratory
- EEE 236 Advanced Semiconductor Devices
- EEE 238 Advanced VLSI Design-For-Test I
- EEE 239 Advanced VLSI Design-For-Test II

**Networks and Security**

- CSC 250 Computer Security
- CSC 253 Computer Forensics
- CSC 254 Network Security
- CSC 255 Computer Networks

**Systems Software**

- CSC 151 Compiler Construction
- CPE/CSC 159 Operating System Pragmatics
- CSC 239 Advanced Operating Systems Principles and Design

**C. CSC Elective**

Courses from Area B (Required Breadth Courses) or any 200-level CSC courses subject to meeting the required prerequisites.

**D. EEE Elective**

Courses from Area B (Required Breadth Courses) or any 200-level EEE courses subject to meeting the required prerequisites.
E. Culminating Requirement

<table>
<thead>
<tr>
<th>Plan A: Thesis (5 units) 5,6</th>
</tr>
</thead>
<tbody>
<tr>
<td>CPE 500 Culminating Experience</td>
</tr>
</tbody>
</table>

Minimum 25 units of course work including 12 units from Area A (Required Core Courses), a minimum of 6 units from Area B (Required Breadth Courses), and a minimum of 3 units each from Area C (CSC Elective) and Area D (EEE Elective).

<table>
<thead>
<tr>
<th>Plan B: Project (2 units) 5,6</th>
</tr>
</thead>
<tbody>
<tr>
<td>Minimum 28 units of course work including 12 units from Area A (Required Core Courses), a minimum of 12 units from Area B (Required Breadth Courses), and a minimum of 4 units from the following options:</td>
</tr>
</tbody>
</table>

a) 3 units from Area C (CSC Elective) and 1 unit 299 from CPE or EEE;
b) 3 units from Area D (EEE Elective) and 1 unit 299 from CPE or CSC; or
c) 3 units from Area C (CSC Elective) and 3 units from Area D (EEE Elective).

<table>
<thead>
<tr>
<th>Plan C: Comprehensive Exam (0 units) 5,6</th>
</tr>
</thead>
<tbody>
<tr>
<td>Minimum 30 units of course work including 12 units from Area A (Required Core Courses), a minimum of 12 units from Area B (Required Breadth Courses), and a minimum of 3 units each from Area C (CSC Elective) and Area D (EEE Elective).</td>
</tr>
</tbody>
</table>

Total Units 30-32

1. All graduate students must concurrently take CPE 201 in the semester they take their first graduate course.
2. Students whose undergraduate degree preparation has covered a significant amount of the material in the course may be allowed to waive the course. The course waiver form must be approved by the Computer Engineering Coordinator. In this case, for each CSC course waived students must take an additional CSC course, and for each EEE course waived students must take an additional EEE course from Required Breadth Courses or Elective Courses to satisfy the program unit requirement.
3. Students whose undergraduate degree preparation has not covered a significant amount of the material in CSC 159/CPE 159 must take this course as one of the CSC Breadth Requirement courses.
4. No more than 6 units of under 200-level courses.
5. Additional units from Area B (Required Breadth Courses), Area C (CSC Elective), or Area D (EEE Elective), or 299, to fulfill the minimum course work units.
6. The Masters Degree requires 18 units of Graduate (200-level) seminar courses. No more than six units of 295, 296, or 299 may be counted towards a degree.

Information Security and Computer Forensics are available for students majoring in disciplines other than Computer Engineering.

The Department offers an MS in Computer Science and an MS in Software Engineering.

The Department also offers programs in conjunction with other units: with the Electrical and Electronic Engineering Department, a BS and an MS in Computer Engineering (refer to the Computer Engineering section of this catalog).

Degree Programs

Only matriculated students upon completing all the degree requirements are entitled to receive certificates. Certificates are not a priority and there are no guarantees that courses required for a certificate will be offered in time before graduation.

BS in Computer Science (https://catalog.csus.edu/colleges/engineering-computer-science/computer-science/bs-in-computer-science/)
Certificate in Game Engineering (https://catalog.csus.edu/colleges/engineering-computer-science/computer-science/certificate-in-game-engineering/)
Minor in Computer Science (https://catalog.csus.edu/colleges/engineering-computer-science/computer-science/minor-in-computer-science/)
MS in Computer Science (https://catalog.csus.edu/colleges/engineering-computer-science/computer-science/ms-in-computer-science/)
MS in Software Engineering (https://catalog.csus.edu/colleges/engineering-computer-science/computer-science/ms-in-software-engineering/)
Certificate in Advanced Studies (https://catalog.csus.edu/colleges/engineering-computer-science/computer-science/certificate-in-advanced-studies/)

Computer Science

College of Engineering and Computer Science

Program Description

The Bachelor of Science degree in Computer Science is accredited by the Computing Accreditation Commission (CAC) of ABET, Inc. (http://www.abet.org/), providing majors with a sound educational base in Computer Science. The Minor in Computer Science and the Minor in
Certificate in Computer Engineering (https://catalog.csus.edu/colleges/engineering-computer-science/computer-science/certificate-in-computer-engineering/)

Certificate in Data Mining (https://catalog.csus.edu/colleges/engineering-computer-science/computer-science/certificate-in-data-mining/)

Accreditation

In addition to the University's full accreditation by the Western Association of Schools and Colleges, the Bachelor of Science in Computer Science is also individually accredited by Computing Accreditation Commission (CAC) of ABET, Inc.

Notice to Students RE: Professional Licensure and Certification

California State University programs for professions that require licensure or certification are intended to prepare the student for California licensure and certification requirements. Admission into programs for professions that require licensure and certification does not guarantee that students will obtain a license or certificate. Licensure and certification requirements are set by agencies that are not controlled by or affiliated with the California State University and licensure and certification requirements can change at any time.

The California State University has not determined whether its programs meet other states' educational or professional requirements for licensure and certification. Students planning to pursue licensure or certification in other states are responsible for determining whether, if they complete a California State University program, they will meet their state’s requirements for licensure or certification. This disclosure is made pursuant to 34 CFR §668.43(a)(5)(v)(C).

Special Features

• The research interests of the department faculty span a broad spectrum of Computer Science including active databases, algorithm analysis, compilers, computer architecture, computer forensics, computer graphics and computer game design, computer networks and communications, computing theory, cryptography, data models and database management systems, data mining and machine learning, machine vision, artificial intelligence, distributed systems and real-time systems, formal methods, human-computer interfaces, information assurance and security, Internet and Web technologies, mobile and cloud computing, network security, operating systems, performance modeling and evaluation, programming languages and methodologies, software architecture, software project management, software requirements engineering, software system engineering, verification and validation, VLSI design.

• A large and heterogeneous network of Linux and Windows systems support the instructional programs. Specialized laboratories support systems, communications and networking, computer security, and computer architecture instruction.

• Majors are urged to join the student chapters of the Association for Computing Machinery (ACM) or the IEEE Computer Society. Students with high scholastic achievement may be invited to join Upsilon Pi Epsilon, the national honor society for Computer Science.

• The University's proximity to many California State agencies and major computer corporations provides numerous opportunities for part-time student employment as well as full-time employment after graduation.

Bachelor of Science Educational Objectives

Three to five years after graduation, a graduate of the B.S. in computer science should have:

1. Made contributions to the development, maintenance, and support of real world computing systems.
2. Taken initiative and assumed responsibilities as an effective member of project teams.
3. Worked independently and functioned effectively in an environment with incomplete information.
4. Progressed in the computing field, engaged in professional development, and/or pursued an advanced degree.
5. Produced quality technical and non-technical documents and presentations for a variety of audiences.
6. Adhered to the ethical standards of the profession and understood the implications of his/her professional activities.

Career Possibilities

Computer Scientist · Computer Engineer · Software Engineer · Computing Science Educator · Information Technology Specialist · Computer Systems Analyst · Scientific Application Programmer · Computer Operations Manager · Computer Services Coordinator · Database Administrator · Computer Game Developer · Data Communications Manager · Data Processing Manager · Data Processing Application Programmer · Network Administrator · Programmer Analyst · Software Requirements Engineer · Software Architect · Software Quality Assurance Specialist · Software Development Project Manager · Systems Manager · Systems Programmer · Computer Graphics Specialist · Knowledge Engineer · Systems Engineer · Cyber Security Specialist · Information Assurance Specialist · Information Security Officer · Data Mining Analyst · Web/eCommerce Developer · IT Business Analyst · IT Infrastructure Specialist · Technical Control Specialist · Technical Representative

CSC 1. Introduction to Computer Science. 3 Units
Prerequisite(s): Intermediate algebra.
Term Typically Offered: Fall, Spring
Fundamental concepts of computers, computation and programming; history and principles of computing; problem solving; input, output; data representation, storage, and file organization; computer hardware, networking and data communication; social, economic and ethical implications; computer security and privacy. Students will solve problems using a programming language. Lecture, two hours; technical activity and laboratory, two hours.

CSC 1A. Introduction to Computer Science for Advanced Students. 3 Units
Term Typically Offered: Fall, Spring
Same material as covered in CSC 1 but intended for students who already have significant knowledge of the fundamental concepts of computers and/or computer programming. Students must attend the orientation session during the first class meeting. Two placement tests, one on programming and one on concepts, will be scheduled and used to determine student's prior preparation.
Note: May be taken by those wishing to obtain credit by examination. Please refer to examination credit guidelines in the University catalog. Not open to students who have received credit for CSC 1 or MIS 5.
Credit/No Credit

CSC 5. Personal Computing. 3 Units
Term Typically Offered: Fall, Spring
Introduction to the role and use of personal computers, emphasizing the use and relevancy of common software for word processing, database, spreadsheet analysis, graphics, and communications. Examination of the personal computing milieu and the applications environment. Lecture two hours, technical activity and laboratory two hours.

CSC 8. Introduction to Internet Technologies. 3 Units
Prerequisite(s): Basic computer literacy recommended.
Term Typically Offered: Summer only
Internet applications such as email, instant messaging, file transfer, secure communications, the web, and related tools and protocols. Basics of the web-publishing process and methods used to locate authoritative information on the internet. Webpage design, internet security and emerging technologies on the internet.

CSC 8S. Self-Paced Introduction to Internet Technologies. 3 Units
Prerequisite(s): Basic computer literacy recommended.
Term Typically Offered: Fall, Spring
Covers the same material as CSC 8, Introduction to Internet Technologies. Provided by electronic means in addition to meetings for orientation, laboratory demonstrations, and tests. Internet applications such as Email, instant messaging, file transfer, secure communications, the Web, and related tools and protocols. Basics of the Web-publishing process and methods used to locate authoritative information on the Internet. Webpage design, Internet security and emerging/declining technologies on the Internet.
Credit/No Credit

CSC 10. Introduction to Programming Logic. 3 Units
Prerequisite(s): Math 11 or equivalent
Term Typically Offered: Fall, Spring
Introduction to computer science with an emphasis on programming concepts and methodology. Intended to assist students with little or no programming experience to understand the basic principles of programming logic. Topics include computer hardware and software, problem solving and algorithm development, flow of control, modular design using techniques that can be applied to common programming languages. Lecture two hours, technical activity and laboratory two hours.

CSC 10A. Accelerated Introduction to Programming Logic. 3 Units
Term Typically Offered: Fall, Spring
Introduction to computer science with an emphasis on programming concepts, logic, and methodology: computer hardware and software, problem solving and algorithm development, flow of control, and modular design. Accelerated and more in-depth study of programming concepts than CSC 10. Intended for computer science and computer engineering majors who have little or no programming experience. Lecture two house, technical activity and laboratory, two hours. Not open to students who have received credit for CSC 10. Prerequisite: Math 11
CSC 15. Programming Concepts and Methodology I. 3 Units
Prerequisite(s): CSC 10, or programming experience in a high-level programming language. Not currently enrolled in CSC 15.
Term Typically Offered: Fall, Spring, Summer

Programming concepts using an object-oriented programming language. Introduction to methodologies for program design, development, testing, and documentation. Topics include program design, algorithm design, number systems, classes and objects, methods (functions), control structures, arrays, and interactive input/output. Lecture two hours, technical activity and laboratory two hours.

CSC 15P. Peer-Assisted Learning CSC 15. 1 Unit
Corequisite(s): CSC 15
Term Typically Offered: Fall, Spring

Students concurrently enrolled in CSC 15 work through faculty-designed problem sets under the guidance of a trained student facilitator to improve their understanding of CSC 15 content. Pedagogical strategies that encourage active, engaged learning are employed to facilitate student success. Discussion, 2 hours.
Credit/No Credit

CSC 15W. Programming Methodology I Workshop. 1 Unit
Corequisite(s): CSC 15.
Term Typically Offered: Fall, Spring, Summer

Designed to assist students in developing a more thorough understanding of programming methodology and problem solving techniques. Activity two hours.
Credit/No Credit

CSC 20. Programming Concepts and Methodology II. 3 Units
Prerequisite(s): CSC 15.
Term Typically Offered: Fall, Spring

Application of object-oriented techniques for systematic problem analysis and specification, design, coding, testing, and documentation. Semester-long project approach emphasizing larger programs. Managing program complexity using abstraction. Introduction to algorithm analysis and Big-O notation. Advanced language features. Basic sorting and searching algorithms. Recursion. Lecture two hours, technical activity and laboratory two hours.

CSC 20P. Peer-Assisted Learning CSC 20. 1 Unit
Corequisite(s): CSC 20.
Term Typically Offered: Fall, Spring

Students concurrently enrolled in CSC 20 work through faculty-designed problem sets under the guidance of a trained student facilitator to improve their understanding of CSC 20 content. Pedagogical strategies that encourage active, engaged learning are employed to facilitate student success. Discussion, 2 hours.
Credit/No Credit

CSC 21. First Year Seminar: Becoming an Educated Person. 3 Units
General Education Area/Graduation Requirement: Understanding Personal Development (E)
Term Typically Offered: Fall only

Introduction to the nature and possible meanings of higher education, and the functions and resources of the University. Designed to help students develop and exercise fundamental academic success strategies and to improve their basic learning skills. Development of information competence and computer literacy. Students interact with fellow students and the seminar leader to build a community of academic and personal support.

CSC 22. Visual Programming in BASIC. 3 Units
Prerequisite(s): Intermediate Algebra.
Term Typically Offered: Fall, Spring

Computer Programming using Visual Basic. Topics include the Visual Basic Integrated Development Environment, visual user interface development, concepts of object-oriented programming, variables, control structures, arrays, functions, subroutines, strings, files, and database access. Applications will be created in areas such as business, games, and multimedia. Lecture two hours, technical activity and laboratory two hours.

CSC 25. Introduction to C Programming. 3 Units
Term Typically Offered: Fall only

Topics include: types, operators, control structures, input/output, arithmetic operations, the C library and preprocessor, functions and parameters, arrays, strings, pointers, and structures. Program design and style will be emphasized. Students will use a compiler.
Note: Students with significant programming experience should take CSC 60 rather than CSC 25. Lecture two hours, technical activity and laboratory two hours.

CSC 28. Discrete Structures for Computer Science. 3 Units
Prerequisite(s): Score of 76 or higher on ALEKS PPL exam or MATH 26A or MATH 29 or MATH 29B or MATH 30; and CSC 20. CSC 20 and MATH 30 may be taken concurrently.
Term Typically Offered: Fall, Spring

Introduction to the essential discrete structures used in Computer Science, with emphasis on their applications. Topics include: counting methods, elementary formal logic and set theory, recursive programming, digital logic and combinational circuits, real number representation, regular expressions, finite automata.

CSC 35. Introduction to Computer Architecture. 3 Units
Prerequisite(s): CSC 15.
Term Typically Offered: Fall, Spring

Internal representation of numeric and non-numeric data, assembly level machine architecture, addressing modes, subroutine linkage, polled input/output, interrupts, high-level language interfacing, macros and pseudo operations. Lecture two hours, technical activity and laboratory two hours.
CSC 60. Introduction to Systems Programming in UNIX. 3 Units
Prerequisite(s): CSC 20, CSC 35.
Term Typically Offered: Fall, Spring
Features of the C language commonly used in systems programming, application to systems programming in a UNIX environment. Topics include C preprocessor macros, I/O, bit-manipulation facilities, timesharing system concepts, file permissions, shell script programming, make files and source code control, basic system calls like fork and exec, pointers and dynamic memory allocation, libraries and relocation and linking concepts including assembler handling of symbol tables. Prior knowledge of a C like programming language is presumed.

CSC 80. Web Development with HTML/XHTML and Tools. 3 Units
Prerequisite(s): CSC 8 or equivalent computer and Internet experience.
Term Typically Offered: Fall, Spring, Summer
Hands-on course covering the processes and guidelines for creating and customizing interactive webpages. Emphasis on use of HTML/XHTML, CSS, and tools to create webpages. HTML/XHTML syntax to create, format, and link documents. Use of tables, graphics, styles, forms, multimedia, and other features in webpages. Effective webpage design and website organization. Lecture two hours and technical activity and laboratory two hours.

CSC 110. Introduction to Programming Logic for Teachers. 3 Units
Term Typically Offered: Fall, Spring, Summer
An introduction to computer science with an emphasis on programming concepts and methodology. Intended to assist students with no programming experience to understand the basic principles of programming logic for computational thinking. Programming language is blocky-style. Topics include: computer devices and software, programming concepts and methodology, blocky-style programming, K-12 computer science curriculum development for introduction to computational thinking.

CSC 111. Programming Concepts and Methodology for Teachers. 4 Units
Prerequisite(s): CSC 110
Term Typically Offered: Fall, Spring, Summer
Computer science teacher professional development based on equity, curriculum development, and computer science. Programming languages including blocky-style, web, and an object-oriented programming language. Introduction to computer science methodologies for program design, development, testing, and documentation. Computer science content includes program design, algorithm design, number systems, classes and objects, methods, control structures, arrays, and simple interactive input/output. Pedagogical content includes strategies for teaching and retaining students by developing engaging learning experiences and designing student assessment in computer science.

CSC 112. Data Structures, Algorithms, and Software Engineering for Teachers. 3 Units
Prerequisite(s): CSC 111
Term Typically Offered: Fall, Spring, Summer
Introduction of data structures, algorithms, and software engineering to give teachers the background to lead instruction in computer science curriculum. Topics include linked lists, queues, sets, algorithm analysis, recursion, basic searching, and sorting. Software Engineering topics include the methodologies and techniques in planning, engineering and implementing a software system to solve a problem, and social, ethical, and legal impacts of computing. Pedagogical content includes strategies for teaching students by developing engaging learning experiences in computer science.

CSC 113. Computer Networking and Cyber Security for Teachers. 3 Units
Prerequisite(s): CSC 110 and CSC 111. Not currently enrolled in CSC 113.
Term Typically Offered: Fall, Spring, Summer
Introduction to basic components of digital devices and computing systems. Overview, structure, and types of computer networks. The layered model of networks and common protocols in each layer, such as HTTP and IP. Introduction to common network applications such as web, email, and videos. Common cyber security problems and solutions. Cyber safety. Pedagogical content includes strategies for teaching and retaining students by developing engaging learning experiences and designing student assessment in computer science.

CSC 114. Digital Evidence and Computer Crime. 3 Units
Prerequisite(s): CSC 1 and CSC 8 or CSC 8S or CSC 80; or instructor permission.
Term Typically Offered: Fall, Spring
Topics include technology and law, computer basics for digital investigations, network basics for digital investigations, investigation of computer crime, and the handling of digital evidence.

CSC 115. Internet Security. 3 Units
Prerequisite(s): CSC 1 and CSC 8 or CSC 8S or CSC 80; or instructor permission.
Term Typically Offered: Summer only
Internet security problems and discussion of potential solutions: network vulnerabilities and attacks, secure communication and use of cryptography, Internet security protocols and tools to defend against network attacks, network intrusion detection, and wireless network security. Survey and use of software tools for network security.

CSC 116. Cyber Forensics. 3 Units
Prerequisite(s): CSC 1 and CSC 8 or CSC 8S or CSC 80; or instructor permission.
Term Typically Offered: Summer only
Fundamentals of computer forensics and cyber-crime scene analysis including laws, regulations, and international standards; formal methodology for conducting security incident investigations; categories of electronic evidence. Projects involving digital forensic tools.
CSC 120. Web Server Administration. 3 Units
Prerequisite(s): CSC 80.
Term Typically Offered: Fall, Spring
Managing and maintaining Web servers. Administering open source and commercial Web servers, Web hosting alternatives, professional standards and practices of hosting, Web server installation, configuration, management, and security. Selecting and using technologies to support professional quality websites. Lecture two hours; technical activity and laboratory two hours.

CSC 121. Client-Side Web Programming. 3 Units
Prerequisite(s): CSC 22, CSC 80 or equivalents; OR PCSC/CSC Major, CSC 60, CSC 130.
Term Typically Offered: Fall, Spring

CSC 122. Web Database Applications. 3 Units
Prerequisite(s): CSC 10 or CSC 22; and CSC 80 or equivalent.
Term Typically Offered: Fall, Spring
Fundamentals of building effective database-driven web applications. Particular emphasis on database access via web interfaces. Introduction to database management systems, their structure and usage, SQL, integrating web applications with databases, design and implementation of dynamic web database applications.

CSC 123. Web Application Development. 3 Units
Prerequisite(s): CSC 22, CSC 121, CSC 122, or equivalent experience; OR PCSC/CSC Major, CSC 60, CSC 134.
Term Typically Offered: Fall, Spring
Developing multi-tiered enterprise-level Web applications. Standards of Web services and other current Web technologies, including XML, AJAX, and server-side programming such as Java EE, .NET, or PHP. Development of Web applications such as those used for e-commerce, e-business, and content management. Format consists of two 1.5 hour lecture/lab sessions per week.

CSC 126. 3D Computer Modeling. 3 Units
Prerequisite(s): CSC 10 or ART 97 or equivalent.
Term Typically Offered: Fall only
Techniques and processes to create 3D computer models and environments. Exercises, assignments and projects designed to build skill levels with 3D computer modeling tools. Demonstrations and workshops in the use of 3D computer modeling software. Critiques, discussion and presentations to develop students' conceptual grasp of 3D computer modeling and virtual reality environments. Example applications in art/new media and computer gaming.
Note: May be taken twice for credit. Cross-listed as ART 142.

CSC 127. 3D Computer Animation. 3 Units
Prerequisite(s): ART 142 or CSC 126.
Term Typically Offered: Spring only
Creative skills and techniques for animating 3D computer-modeled objects/environments. Topics include animation techniques, keyframing and interpolation; deformation and morphing; path control; skeletal animation; model rigging and skinning; forward and inverse kinematics, constraints and IK solvers; particle systems; fluid, cloth, hair, and fur; simulation; shape keys; and soft body animation. Emphasis on both skill development and creative application of modeling and animation techniques. Includes demos, in class and homework exercises, and self directed projects. Cross-listed: ART 143.

CSC 130. Data Structures and Algorithm Analysis. 3 Units
Prerequisite(s): CSC 20, CSC 28, CSC 28 may be taken concurrently. Not currently enrolled in CSC 130.
Term Typically Offered: Fall, Spring
Specification, implementation, and manipulation of abstract data types and their structures: balanced trees, priority queues, sets, hash tables, and graphs; recursion; searching and sorting algorithms; asymptotic analysis; NP completeness; fundamental graph algorithms including graph search, shortest path, and minimum spanning trees.

CSC 131. Computer Software Engineering. 3 Units
Prerequisite(s): CSC 130; may be taken concurrently. Not currently enrolled in CSC 131.
Term Typically Offered: Fall, Spring
Principles of Software Engineering covering the software development life cycle, including software requirements engineering (elicitation, modeling, analysis and specification), software design, software implementation and testing. Main topics include various software development process models, method and techniques for specifying requirements, architectural and detailed design specification, prototyping, top-down and bottom-up software implementation and testing. Topics also include project management, project documentation and the development of communication skills through written documentation and oral presentation.

CSC 132. Computing Theory. 3 Units
Prerequisite(s): CSC 28, CSC 130; CSC 130 may be taken concurrently.
Term Typically Offered: Fall, Spring
Introduction to computing theory with examples and applications. Automata and formal languages; language recognition and generation; language hierarchy; deterministic and non-deterministic automata; regular expressions; pushdown automata and context-free grammars; properties of regular and context-free languages; Turing machines; computable and noncomputable functions; decidability.

CSC 133. Object-Oriented Computer Graphics Programming. 3 Units
Prerequisite(s): CSC 130, CSC 131, not currently enrolled in CSC 133.
Term Typically Offered: Fall, Spring
Introduction to computer graphics and to advanced topics in object-oriented programming. Mobile application development; implementation of event-driven systems; advanced object-oriented concepts such as inheritance and polymorphism; implementation of software design patterns; graphical user interface development; fundamentals of 2D graphics systems. Application of these topics to mobile programming.
CSC 134. Database Management Systems. 3 Units
Prerequisite(s): CSC 130, and not currently enrolled in CSC 134
Term Typically Offered: Fall, Spring

Entity-Relationship (ER) model; relational model; relational database design by ER-to-relational mapping; design of applications using database technology; SQL; schema definition, constraints, and queries; relational algebra; data normalization; access methods such as indexing and hash structures; introduction to transaction processing.

CSC 135. Computability and Formal Languages. 3 Units
Prerequisite(s): CSC 28, CSC 35, CSC 130, and not currently enrolled in CSC 135.
Term Typically Offered: Fall, Spring

Introduction to limits of computation and techniques for specifying and processing formal languages. Regular languages, regular expressions, finite automata, properties and limitations. Context-free languages, grammars, pushdown automata, properties and limitations. Applications in lexical and syntax analyses, including recursive-descent or table-driven parsing. Turing machines, halting problem, reductions. Introduction to functional programming and related programming language features.

CSC 136. Programming Languages. 3 Units
Prerequisite(s): CSC 35, CSC 132.
Term Typically Offered: Fall, Spring

Evolution and characteristics of programming languages. Scripting, procedural, object-oriented, functional and logic paradigms. Language specification; interpreters and compilers; virtual machines; parsing techniques. Design and implementation of selected features of programming languages. Programming languages used in the development of intelligent systems, with introduction to Artificial Intelligence. Trends in programming languages.

CSC 137. Computer Organization. 3 Units
Prerequisite(s): CSC 28, CSC 60, CSC 130, not currently enrolled in CSC 137.
Term Typically Offered: Fall, Spring

Introduction to computer organization and architecture. Combinational devices, sequential and synchronized circuits, memory organization, CPU architecture and organization, bus structures, input/output, interrupts, DMA, memory hierarchy, introduction to instruction level parallelism, multithreading, and multiprocessing.

CSC 138. Computer Networking Fundamentals. 3 Units
Prerequisite(s): CSC 60, CSC 130. Not currently enrolled in CSC/CPE 138.
Term Typically Offered: Fall, Spring

CSC 139. Operating System Principles. 3 Units
Prerequisite(s): CSC 60 and CSC 130 and either CSC 137 or CPE 185. Not currently enrolled in CSC 139.
Term Typically Offered: Fall, Spring

Concepts, principles, fundamental issues, organization and structure of contemporary operating systems. Topics include processes, threads, concurrency, parallelism on multi-processor and multi-core systems, CPU scheduling, inter-process communication and synchronization, deadlocks, real and virtual memory management, device management, file systems, security, and protection. Lecture three hours.

Note: Open to students with full CSC or CPE major standing only. Cross Listed: CPE 142; only one may be counted for credit.
CSC 153. Computer Forensics Principles and Practices. 3 Units
Prerequisite(s): CSC 138 or CPE 138.
Term Typically Offered: Spring only

Fundamentals of computer forensics, cyber-crime scene analysis and electronic discovery. Technical and formal methodology for conducting security incident investigations; file systems and storage analysis, data hiding techniques, network forensics; projects involving using, understanding, and designing digital forensics tools; anti-forensics; legal issues and standards.

CSC 154. Computer System Attacks and Countermeasures. 3 Units
Prerequisite(s): CSC 138 or CPE 138.
Term Typically Offered: Fall only

Introduction to network and computer security with a focus on how intruders gain access to systems, how they escalate privileges, and what steps can be taken to secure a system against such attacks. Topics include: Perimeter defenses, intrusion detection systems, social engineering, distributed denial of service attacks, buffer overflows, race conditions, trojans, and viruses.

CSC 155. Advanced Computer Graphics. 3 Units
Prerequisite(s): CSC 133.
Term Typically Offered: Fall only

Modeling, viewing, and rendering techniques in 3D computer graphics systems. Topics include modeling systems and data structures; polygonal and parametric surface representation; transformations, windowing, clipping and projections in 3D; hidden surface removal algorithms; techniques for realism such as shading, shadows, highlights, and texture; fractals and procedural models; introduction to animation; hardware support for computer graphics; and the application of graphics principles to virtual reality systems and 3D games.

CSC 159. Operating System Pragmatics. 3 Units
Prerequisite(s): CSC 139.
Term Typically Offered: Fall, Spring

Application of operating system principles to the design and implementation of a multitasking operating system. Students will write an operating system for a computer platform. Topics include: scheduling of processes, control and allocation of computer resources, and user interfacing.
Cross Listed: CPE 159; only one may be counted for credit.

CSC 163. Parallel Programming with GPUs. 3 Units
Prerequisite(s): CSC 60, CSC 130, CSC 137; and either MATH 30 or MATH 26A.
Term Typically Offered: Fall, Spring

Parallel programming with emphasis on developing GPU computing applications. Topics include the GPU architecture and programming model, mapping computations to parallel hardware, parallel computation patterns, parallel programming optimization techniques, and application case studies.

CSC 165. Computer Game Architecture and Implementation. 3 Units
Prerequisite(s): CSC 130; CSC 133; MATH 26A or MATH 30; PHYS 5A or PHYS 11A.
Term Typically Offered: Spring only

Architecture and implementation of computer game systems. Topics include game engine architecture; screen management and rendering control; geometric models; algorithms and data structures for spatial partitioning, occlusion, and collision detection; real-time interactive 3D graphics and animation techniques; behavioral control for autonomous characters; simulation of physical phenomena; sound and music in games; optimization techniques; multi-player games and networking; game development tools and environments. Substantial programming and project work.

CSC 170. Software Requirements and Specification. 3 Units
Prerequisite(s): CSC 131.
Term Typically Offered: Spring only – odd years

Analysis and specification of functional and non-functional requirements for real-time and non-real-time software systems in the context of a software development lifecycle. Determining customer and user software requirements and ensuring that specifications are correct, complete, and testable. Includes modeling techniques, methods for representing real-time requirements, and the use of Computer-Aided Software Engineering (CASE) tools to illustrate analysis concepts.

CSC 171. Software Engineering Project Management. 3 Units
Prerequisite(s): CSC 131.
Term Typically Offered: Spring only – even years

Fundamental issues in the management and economics of a software engineering project in the context of the software development lifecycle. Topics include: techniques for project planning (budgeting and scheduling), controlling (including quality assurance and configuration management), organizing, staffing, and directing a software project (leadership and motivation), and contemporary issues in management.

CSC 173. Data Visualization. 3 Units
Prerequisite(s): CSC 130, CSC 134, and STAT 50 or ENGR 115.
Term Typically Offered: Fall, Spring

Design principles and concepts for visualizing data; current visualization systems and languages, exploratory data analysis, interaction techniques, high-dimensional data, network visualization, and text visualization.

CSC 174. Advanced Database Management Systems. 3 Units
Prerequisite(s): CSC 131, CSC 134.
Term Typically Offered: Fall only

Enhanced Entity-Relationship (EER) modeling; relational database design based on EER; SQL views; integrity constraints and triggers; stored procedures and functions; database programming techniques; query processing and optimization; transactions concurrency and recovery techniques; relational decomposition and normalization algorithms; database schema and data security.
CSC 176. Database Architecture and Optimization. 3 Units
Prerequisite(s): CSC 174.
Term Typically Offered: Spring only

Advanced object-relational systems, advanced catalog systems, security mechanisms, distributed database processing, advanced schema design-partitioning, introduction to data warehousing and data mining, materialized views, Internet technologies, parallel query processing, system utilities, database tuning, DBA tools and techniques.

CSC 177. Data Analytics and Mining. 3 Units
Prerequisite(s): CSC 134 and STAT 50 or ENGR 115.
Term Typically Offered: Spring only

Theory and implementation of techniques for data analytics and mining with emphasis on big data. Topics include data cleaning, exploratory data analysis, data visualization, feature engineering, classification, clustering, association rule mining, predictive model evaluation, parameter tuning, natural language processing, and selected advanced data mining topics. Design and implementation of systems using contemporary data analysis and mining programming libraries for automatic discovery of patterns and knowledge.

CSC 179. Software Testing and Quality Assurance. 3 Units
Prerequisite(s): CSC 131.
Term Typically Offered: Spring only – even years

Testing, verification, validation, and control of real-time and non-real-time software systems in the context of a software development lifecycle. Topics include: unit, integration and system testing; verification and validation (V&V), quality assurance, metrics, and configuration management.

CSC 180. Intelligent Systems. 3 Units
Prerequisite(s): MATH 26B or MATH 31; STAT 50 or ENGR 115; CSC 130 and CSC 135.
Term Typically Offered: Spring only

Theory and implementation of a variety of techniques used to simulate intelligent behavior. Expert systems, fuzzy logic, neural networks, evolutionary computation, and two-player game-tree search will be covered in depth. Knowledge representation, pattern recognition, hybrid approaches, and handling uncertainty will also be discussed.

CSC 190. Senior Project - Part I. 2 Units
Prerequisite(s): Senior status, WPJ score of 70+ or at least a C- in ENGL 109M/W, completed CSC 130, CSC 131, and four additional 3-unit upper-division CSC courses that fulfill the major requirements (excluding CSC 192-195, 198, and 199), not currently enrolled in CSC190.
Term Typically Offered: Fall, Spring

The first of a two-course sequence in which student teams undertake an industry-grade a project to develop and deliver a software product. Teams apply software engineering principles in the preparation of a software proposal, a project management plan, a software product backlog, and a high-fidelity prototype. All technical work is published using guidelines modeled after IEEE documentation standards. Oral and written reports are required. Lecture one hour, laboratory three hours.

CSC 191. Senior Project - Part II. 2 Units
Prerequisite(s): CSC 190, not currently enrolled in CSC191.
Term Typically Offered: Fall, Spring

Continuation of the team group project begun in CSC 190. Teams apply software engineering principles to the design, implementation, testing, and deployment of their software product. All technical work is published using guidelines modeled after IEEE documentation standards. Oral and written reports are required. Senior project is completed with the successful delivery, installation and demonstration of the software along with all approved documentation. Lecture one hour, laboratory three hours.

CSC 192. Career Planning. 1 Unit
Prerequisite(s): CSC 130 and three additional upper-division courses that fulfill major requirements with a C- grade or better (excluding CSC 190-195, CSC 198, and CSC 199).
Term Typically Offered: Fall, Spring

Designed to help students learn more about the labor market and opportunities in the Computer Science field. Students will examine their interests, consider their goals, and learn how to conduct an effective proactive job search. Strategies for long term career growth will be identified. Credit/No Credit

CSC 193A. Web Programming. 1 Unit
Prerequisite(s): CSC 130 and not currently enrolled in CSC 193A
Term Typically Offered: Fall, Spring

Introduction to the World Wide Web; relationship between clients and servers, how web pages are created using several technologies: HyperText Markup Language (HTML), Cascading Style Sheets (CSS), JavaScript, Asynchronous JavaScript and XML (Ajax), server-side web services, integrate web applications with databases.

CSC 194. Computer Science Seminar. 1 Unit
Prerequisite(s): Upper division or graduate status in CSC.
Term Typically Offered: Spring only

Series of weekly seminars on Computer Science topics. These topics cover subjects not normally taught in the course of a school year and they range from the very theoretical in Computer Science through applications to presentations by industry on working conditions, real world environment and job opportunities.
Note: May be repeated for credit.

CSC 195. Fieldwork in Computer Science. 1 - 4 Units
Prerequisite(s): Instructor permission.
Term Typically Offered: Fall, Spring

Directed observations and work experience in computer science with firms in the industry or public agencies. Supervision is provided by the instructional staff and the cooperating agencies.
Note: Faculty approval required. May be repeated for credit. Credit/No Credit
CSC 195A. Professional Practice.  1 - 12 Units
Prerequisite(s): Instructor permission.
Term Typically Offered: Fall, Spring

Supervised employment in a professional engineering or computer science environment. Placement arranged through the Career Center.
Note: Requires satisfactory completion of the work assignment and a written report.
Credit/No Credit

CSC 195B. Professional Practice.  1 - 12 Units
Prerequisite(s): Instructor permission.
Term Typically Offered: Fall, Spring

Supervised employment in a professional engineering or computer science environment. Placement arranged through the Career Center.
Note: Requires satisfactory completion of the work assignment and a written report.
Credit/No Credit

CSC 196P. Cloud and Mobile Computing Pragmatics.  3 Units
Prerequisite(s): CSC 134, CSC 138, and CSC 139
Introduction to cloud computing. Cloud services. Deployment options. The installation, configuration, and deployment of a cloud infrastructure based upon industrial standards. Step-by-step cloud setup as well as the development of scripts for automated deployment. The installation, building, deployment, testing, and provisioning of a multi-tier cloud based mobile application as a cloud service.

CSC 196W. Web Programming.  1 Unit
Prerequisite(s): CSC 130
Term Typically Offered: Fall, Spring

Introduction to the World Wide Web: relationship between clients and servers, how web pages are created using several technologies: HyperText Markup Language (HTML), Cascading Style Sheets (CSS), JavaScript, Asynchronous JavaScript and XML (Ajax), server-side web services, integrate web applications with databases.
Note: Offered Online

CSC 198. Co-Curricular Activities in Computer Science.  1 - 3 Units
Term Typically Offered: Fall, Spring

Students will serve in leadership roles in computer science activities, provide tutoring or technical assistance in labs, assist instructors in grading coursework, or assist in other activities related to the subject matter and concerns of the department.
Credit/No Credit

CSC 199. Special Problems.  1 - 3 Units
Term Typically Offered: Fall, Spring

Individual projects or directed reading in specified topics in computer science.
Note: Open only to students who appear competent to carry on individual work; approval of faculty supervisor and advisor required. May be repeated for credit.
Credit/No Credit

CSC 200. Professional Writing in Computer Science.  3 Units
Prerequisite(s): Graduate standing in Computer Science or Software Engineering
Term Typically Offered: Fall, Spring

Immersion in the discourse of Computer Science: genres, literacies, stylistic conventions. Writing process, academic writing in various academic genres, revising, and editing. Tools for technical writing. Ethical issues in connection with scientific writing.

CSC 201. Programming Language Principles.  3 Units
Prerequisite(s): Fully classified graduate status in Computer Science or Software Engineering.
Term Typically Offered: Fall, Spring

Notations for the specification of programming language syntax and semantics; attribute, translational, operational, axiomatic, algebraic, denotational, and action semantics. Applications of programming language syntax and programming language semantics. Use of meta languages to generate executable language definitions for language implementation, program transformation, program property analysis, and rapid software prototyping. Principles of logic, functional, and object-oriented programming languages.

CSC 204. Data Models for Database Management Systems.  3 Units
Prerequisite(s): Fully classified graduate status in Computer Science or Software Engineering.
Term Typically Offered: Fall, Spring

Database management system (DBMS) architecture; database file organizations and access methods; the relational model and relational algebra; SQL query language; introduction to query optimization; concurrent transaction processing and backup and recovery; applications using embedded SQL, object types, and stored procedures; database analysis and design notations: EER, UML, and XML; web database environments; database security and administration throughout course.
Note: Not intended for students who have completed CSC 174.

CSC 205. Computer Systems Structure.  3 Units
Prerequisite(s): Fully classified graduate status in Computer Science, Software Engineering or Computer Engineering.
Term Typically Offered: Fall, Spring

Overview of computer systems organization and design. Concepts of instruction set architecture, interactions of hardware-software interface, principles of performance analysis, processor design, instruction level parallelism, survey of contemporary architectures, hierarchical memory design and analysis, interfacing I/O devices, parallel processing and multiprocessing, and introduction to EDA tools and methodologies for computer systems design and verification.

CSC 206. Algorithms And Paradigms.  3 Units
Prerequisite(s): Fully classified graduate status in Computer Science or Software Engineering.
Term Typically Offered: Fall, Spring

Design and analysis of algorithms. Classical design paradigms including greedy, divide-and-conquer, dynamic programming, and backtracking algorithmic methods. Alternative paradigms of computing including parallel and numerical approaches. Theoretical limits of computation. Selected additional topics such as genetic, approximation, and probabilistic algorithms.
CSC 209.  Research Methodology.  1 Unit
Prerequisite(s): Enrolled in at least 3 units of 200-level courses in Computer Science.
Term Typically Offered: Fall, Spring

Research methodology, problem formulation, and problem solving. Orientation to the requirements for Master’s Thesis or Project. Presentations on various research topics.

Credit/No Credit

CSC 212.  Bioinformatics: Data Integration and Algorithms.  3 Units
Prerequisite(s): CSC 130, STAT 50, and graduate status; BIO 10 recommended.
Term Typically Offered: Fall, Spring

The application of information technology and computer science to biological problems, in particular to biomedical science issues involving genetic sequences. Algorithms and their applications to DNA sequencing and protein database search; tools and techniques for data integration to transform genetic sequencing data into comprehensible information to study biological processes.

CSC 214.  Knowledge-Based Systems.  3 Units
Prerequisite(s): Fully classified graduate status in Computer Science or Software Engineering.
Term Typically Offered: Fall, Spring

Historical perspective of knowledge-based systems and their relationship to artificial intelligence. Concepts of knowledge representation and automated reasoning. Survey of expert systems in a variety of applications in engineering and other fields. Implementation of expert systems and expert system shells.

CSC 215.  Artificial Intelligence.  3 Units
Prerequisite(s): Fully classified graduate status in Computer Science, Software Engineering or Computer Engineering.
Term Typically Offered: Fall, Spring

Nature of intelligence and possibility of its realization on digital computers via algorithmic and heuristic programming methods. Informed and uninformed search, adversarial search, stochastic search, machine learning, regular and deep neural networks, and knowledge representation and inference over uncertainty. Computer vision topics. Natural language processing. Design and implementation of systems using contemporary programming libraries to solve a variety of artificial intelligence problems.

CSC 219.  Machine Learning.  3 Units
Prerequisite(s): Fully classified graduate status in Computer Science, Software Engineering or Computer Engineering.
Term Typically Offered: Fall, Spring

Introduction to major paradigms and methods of machine learning. Inductive learning, explanation-based learning, classifier systems and genetic algorithms, analogical reasoning, case-based learning, connectionist learning, data driven approaches to empirical discovery, and basis of learning theory. Focus is on representative systems that have been built.

CSC 230.  Software System Engineering.  3 Units
Prerequisite(s): Fully classified graduate status in Computer Science or Software Engineering; or Computer Engineering and CSC 131.
Term Typically Offered: Fall, Spring

Integration of managerial and technical activities in system engineering that control the cost, schedule, and technical achievement of the developing software system. Application of the principles, activities, tasks and procedures of system engineering and software engineering to the development of a software system.

CSC 231.  Software Engineering Metrics.  3 Units
Prerequisite(s): Fully classified graduate status in Computer Science or Software Engineering.
Term Typically Offered: Fall, Spring

Software quality and quantity metrics in software engineering. Measurement theory and metrics. Metrics include management metrics, indirect and direct metrics and predictive metrics. Uses of metrics include software cost and schedule estimates, model calibration, and software productivity measurements. Metrics techniques include the Goal-Question-Metric approach, COCOMO, and function point analysis.

CSC 232.  Software Requirements Analysis and Design.  3 Units
Prerequisite(s): Fully classified graduate status in Computer Science or Software Engineering.
Term Typically Offered: Fall, Spring

Software engineering requirements including elicitation, analysis, specification, verification and management. Emphasizes IEEE software engineering requirements and standards and the concept of operations (ConOps) document. Techniques include structured analysis, use cases and object-oriented analysis.

CSC 233.  Advanced Software Engineering Project Management.  3 Units
Prerequisite(s): Fully classified graduate status in Computer Science or Software Engineering.
Term Typically Offered: Fall, Spring

Advanced methods and procedures for managing a software development project. Includes project planning, scheduling, and cost estimation, project organizational types, staffing and training considerations, leading and motivating computer personnel, and methods for measuring and controlling a project. Emphasizes IEEE software engineering management standards and keys to project success.

CSC 234.  Software Verification and Validation.  3 Units
Prerequisite(s): Fully classified graduate status in Computer Science or Software Engineering; or Computer Engineering and CSC 131.
Term Typically Offered: Fall, Spring

Verification and validation (V & V) techniques to identify and resolve software problems and high-risk issues early in the software lifecycle. Application of V & V to all phases of the lifecycle process. Includes planning and reporting on the V & V effort. Topics also include software quality assurance and software testing.
CSC 235. Software Architecture. 3 Units
Prerequisite(s): Fully classified graduate status in Computer Science or Software Engineering.
Term Typically Offered: Fall, Spring

CSC 236. Formal Methods in Secure Software Engineering. 3 Units
Prerequisite(s): Fully classified graduate status in Computer Science or Software Engineering.
Term Typically Offered: Fall, Spring

Basic concepts of formal methods in secure software engineering: formal methods based software development models and methodologies; formal methods for software system specification, modeling, analysis, verification, information assurance and security; systems and tools for the application of formal methods in secure software engineering; advances of formal methods in secure software engineering.

CSC 237. Microprocessor Systems Architecture. 3 Units
Prerequisite(s): CSC 205.
Term Typically Offered: Fall, Spring

Microprocessor/microcomputer architecture and hardware/software interfacing design. RISC v. CISC architecture in-depth, case studies of several popular commercial advanced 32-bit microprocessors. Microcomputer firmware architecture is discussed and illustrated with detailed examples. Term project in which students specify, design and build the hardware and firmware of a computer system.

CSC 238. Human-Computer Interface Design. 3 Units
Prerequisite(s): Fully classified graduate status in Computer Science or Software Engineering.
Term Typically Offered: Fall, Spring

Issues involved in design of interaction between people and computers. Insight and experience in key issues of HCI design. Emphasis on identifying issues and tradeoffs in interaction design. Development and evaluation of alternative solutions to design problems.

CSC 239. Advanced Operating Systems Principles and Design. 3 Units
Prerequisite(s): Fully classified graduate status in Computer Science, Software Engineering, or Computer Engineering.
Term Typically Offered: Fall, Spring

Advanced concepts of concurrent processes, concurrent programming and operating systems. Virtual memory management systems, deadlock, file systems, operating system performance measurement and evaluation, device driver development.

CSC 242. Computer-Aided Systems Design and Verification. 3 Units
Prerequisite(s): CSC 205 or CSC/EEE 273.
Term Typically Offered: Fall, Spring

Design and verification methodology using hardware description and verification languages (HDVLs). Advances in IC chip design; introduction to HDVLs such as System Verilog; HDVL language basics including data types, arrays, structures, unions, procedural blocks, tasks, functions, and interface concepts; design hierarchy; verification planning and productivity; verification infrastructure; guidelines for efficient verification of large designs; assertion-based verification; comprehensive computer-related design projects.

CSC 244. Database System Design. 3 Units
Prerequisite(s): Fully classified graduate status in Computer Science or Software Engineering.
Term Typically Offered: Fall, Spring

SQL views, integrity constraints and triggers, stored procedures and functions. Advanced topics in database system design: an algebra for queries, query processing algorithms, query compiler, query optimization, transaction management, recovery, concurrency control. Special topics on data management.

CSC 245. Performance Modeling and Evaluation. 3 Units
Prerequisite(s): Fully classified graduate status in Computer Science or Software Engineering.
Term Typically Offered: Fall, Spring

Performance and cost measures; software and hardware performance monitors; data reduction and evaluation; analytic and simulation models of hardware and program behavior; performance-cost trade-offs and resource allocation.

CSC 250. Computer Security. 3 Units
Prerequisite(s): Fully classified graduate standing in Computer Science, Computer Engineering, or Software Engineering.
Term Typically Offered: Fall, Spring

Principles and technologies behind computer security. Introduction to encryption and decryption; security mechanisms in computer programs, operating systems, databases, and networks; administration of computer security, and legal and ethical issues.

CSC 251. Principles of Compiler Design. 3 Units
Prerequisite(s): CSC 151 or CSC 201.
Term Typically Offered: Fall, Spring

CSC 252. Cryptography Theory and Practice. 3 Units
Prerequisite(s): Fully classified graduate status in Computer Science, Computer Engineering, or Software Engineering.
Term Typically Offered: Fall, Spring

CSC 253. Computer Forensics. 3 Units
Prerequisite(s): Fully classified graduate status in Computer Science, Computer Engineering, or Software Engineering.
Term Typically Offered: Fall, Spring

Structured security incident investigations internal and external; emphasis on analysis of electronic evidence and proper audit; utilization of scientific aids in obtaining information from computing devices; legal electronic evidence.

CSC 254. Network Security. 3 Units
Prerequisite(s): Fully classified graduate status in Computer Science, Computer Engineering, or Software Engineering.
Term Typically Offered: Fall, Spring

In-depth study of network security problems and discussion of potential solutions. Topics include: network vulnerabilities and attacks, secure communication, Internet security protocols and tools to defend against network attacks, network intrusion detection, and wireless network security. Survey and demonstration of software tools used for network security.

CSC 255. Computer Networks. 3 Units
Prerequisite(s): Fully classified graduate status in Computer Science, Software Engineering, or a Computer Engineering.
Term Typically Offered: Fall, Spring

Computer networking fundamentals with emphasis on higher level protocols and functions. Network design considerations, software design and layering concepts, interface design, routing and congestion control algorithms, internetworking, transport protocol design, and end-to-end communication, session and application protocols. Specific examples of commercial and international standards.

CSC 258. Distributed Systems. 3 Units
Prerequisite(s): Fully classified graduate status in Computer Science, Software Engineering, or Computer Engineering.
Term Typically Offered: Fall, Spring

Distributed system architectures, distributed object model, component-based design, time and global states, coordination and agreement, distributed transactions and concurrency control, replication, security, distributed multimedia systems, message passing and distributed shared memory, Web services and Service-Oriented Architecture (SOA), Cloud and Ubiquitous computing. Emphasis on scalability, manageability, security, and dependability of distributed systems.

CSC 273. Hierarchical Digital Design Methodology. 3 Units
Prerequisite(s): CSC 205, CPE 64, or equivalent.
Term Typically Offered: Fall, Spring

Advanced logic modeling, simulation, and synthesis techniques. Topics include modeling, simulation, and synthesis techniques, using Hardware Description Language (HDL’s), Register Transfer Level (RTL) representation, high-level functional partitioning, functional verification and testing, computer-aided logic synthesis, logical verification and testing, timing and delay analysis, automated place and route process, and design with Application Specific Integrated Circuits (ASICs) and programmable logic.
Cross Listed: EEE 273; only one may be counted for credit.

CSC 275. Advanced Data Communication Systems. 3 Units
Prerequisite(s): Fully classified graduate status in Computer Science, Software Engineering, or Computer Engineering.
Term Typically Offered: Fall, Spring

Fundamental concepts, principles and issues of data communication systems. The ISO/OSI reference model is used as a vehicle for discussion and emphasizes the lower layer of the model. Specific topics include: motivation and objectives, layered architectures, physical layer principles and protocols, data link and medium access control principles and protocols, circuit, packet and cell switching, local area network design principles and performance comparisons, high speed networking, introduction to wide area network architectures. Typical examples and standards are cited for point-to-point, satellite, packet radio and local area networks.

CSC 280. Advanced Computer Architecture. 3 Units
Prerequisite(s): CSC 205 and fully classified graduate status in Computer Science or Software Engineering.
Term Typically Offered: Fall, Spring

Introduction to parallel architecture covering computer classification schemes, fine and coarse grain parallelism, processor interconnections, and performance issues of multiprocessor systems. Includes parallel and pipelined instruction execution, structure of multiprocessor systems, memory hierarchy and coherence in shared memory systems, programming issues of multiprocessor systems, arithmetic pipeline design, and design for testability. Cross Listed: EEE 280; only one may be counted for credit.

CSC 288. Special Topics in Computer Science - Software Engineering. 3 Units
Term Typically Offered: Fall, Spring

Contemporary topics in computer science will be offered as needed. Topics offered:

CSC 295. Fieldwork. 1 - 3 Units
Term Typically Offered: Fall, Spring

Directed observations and work experience in computer science with firms in the industry or public agencies. Supervision is provided by the instructional staff and the cooperating agencies.
Note: Faculty approval required. May be repeated for credit.
Credit/No Credit

CSC 296R. Computer Vision. 3 Units
Prerequisite(s): CSC 206, and Math 35 or Math 100; not currently enrolled in CSC 296R
Term Typically Offered: Fall, Spring

Topics in computer vision including fundamentals of image formation, image transformations and rotation, Fourier transform and frequencies, lighting and optics, filtering, edge and line detection and Hough transform, feature detection and matching, a brief introduction to machine learning and classifiers, recognition, large-scale retrieval, object detection, and face recognition. Mathematical fundamentals and methods, design and implementation of various computer vision applications.
CSC 296T. Fundamentals in Cybersecurity for Teachers. 3 Units
Prerequisite(s): Education, teaching, and/or professional experience qualified for admission into the National Cybersecurity Teaching Academy program at Sacramento State.
Term Typically Offered: Fall, Spring, Summer

Introduction to network and computer security with a focus on how intruders gain access to systems, how they escalate privileges, and what steps can be taken to secure a system against such attacks. Topics include: computer networking basics, operating system basics, vulnerability and attacks, intrusion penetration, cyber defenses, network hardening, system hardening, security administration. This course is designed for K-12 teachers, and does not meet regular degree requirements in Computer Science, Software Engineering, or Computer Engineering.

CSC 296U. Introduction to Digital Forensics for Teachers. 3 Units
Prerequisite(s): Education, teaching, and/or professional experience qualified for admission into the National Cybersecurity Teaching Academy program at Sacramento State.
Term Typically Offered: Fall, Spring, Summer

Introduction to computer forensics, cyber-crime scene analysis and electronic discovery. Digital forensics related legal issues, procedures and standards. Technical methodologies for setting up forensic workstations; data acquisition; file systems and storage analysis for Linux, Mac and Windows systems; data hiding techniques; graphics file recovery; network forensics; and mobile forensics. Hands-on activities for using and understanding digital forensic tools. This course is designed for K-12 teachers, and does not meet regular degree requirements in Computer Science, Software Engineering, or Computer Engineering.

CSC 296V. Cybersecurity Teaching Methods for Teachers. 3 Units
Prerequisite(s): Education, teaching, and/or professional experience qualified for admission into the National Cybersecurity Teaching Academy program at Sacramento State, and CSC 296T.
Term Typically Offered: Fall, Spring, Summer

Introduction to existing generally accepted guidelines and frameworks (such as HSCCG, CSEC, CAE Knowledge Units, NCWF) in the discipline of cybersecurity. Methods for teaching cybersecurity to transform cybersecurity subject matter, with pedagogical content knowledge, into student learning. Topics include: culturally-relevant methods, scaffolding knowledge, differentiation, assessment, and cybersecurity instructional technologies (ranges, CTFs, competitions, and unplugged activities). This course is designed for K-12 teachers, and does not meet regular degree requirements in Computer Science, Software Engineering, or Computer Engineering.

CSC 296W. Cybersecurity Practicum for Teachers. 3 Units
Prerequisite(s): Education, teaching, and/or professional experience qualified for admission into the National Cybersecurity Teaching Academy program at Sacramento State, CSC 296T and CSC 296U.
Term Typically Offered: Fall, Spring, Summer

Exposure to cybersecurity operations through service projects, research, or industry experience. This course is designed for students to work with industry or the community in a cybersecurity operations environment to apply knowledge in the development, implementation, testing and documentation of security controls. This course is designed for K-12 teachers, and does not meet regular degree requirements in Computer Science, Software Engineering, or Computer Engineering.

CSC 299. Special Problems. 1 - 3 Units
Term Typically Offered: Fall, Spring

Any properly qualified student who wishes to pursue a problem of his own choice may do so if the proposed subject is acceptable to the member of the staff with whom he/she works and to his/her advisor.
Note: May be repeated for credit.

Credit/No Credit

CSC 500. Master's Thesis. 1 - 5 Units
Prerequisite(s): CSC 209; advanced to candidacy.
Term Typically Offered: Fall, Spring

Completion of a thesis approved for the Master's degree.
Note: May be repeated for credit.

CSC 500C. Master's Thesis Continuous Enrollment. 1 Unit
Prerequisite(s): CSC 500
Term Typically Offered: Fall, Spring

Continuation of a thesis approved for the Master's degree.
Note: May be repeated for credit.

Credit/No Credit

CSC 502. Master's Project. 1 - 2 Units
Prerequisite(s): CSC 209; advanced to candidacy.
Term Typically Offered: Fall, Spring

Completion of a project approved for the Master's degree.

CSC 502C. Master's Project Continuous Enrollment. 1 Unit
Prerequisite(s): CSC 502
Term Typically Offered: Fall, Spring

Continuation of a project approved for the Master's degree.
Note: May be repeated for credit.

Credit/No Credit

BS in Computer Science

Units required for Major: 78
Total units required for BS: 120

Program Description

The Bachelor of Science degree in Computer Science is accredited by the Computing Accreditation Commission (CAC) of ABET, Inc. (http://www.abet.org/), providing majors with a sound educational base in Computer Science.

Pre-Major Requirements

Students requesting to become Computer Science majors must first complete the lower-division (pre-major) courses listed in this section. If a student requests to become a Computer Science major but has not yet completed these courses, they should change their major to pre-Computer Science. Changing to the pre-Computer Science major requires either completion of or enrollment in MATH 30 and a Sacramento State and overall GPA of at least 2.5. Changing to the Computer Science major requires a GPA of at least 2.7 in the courses listed in this section.
To change to the Computer Science or pre-Computer Science major, students are required to complete and submit a Change of Major form to the Computer Science Department Office along with transcript copies.

Registration in Computer Science courses numbered 133 and above is restricted to Computer Science and Computer Engineering majors. Other students need to obtain approval from the CSC Department Chair.

**Minimum Grade Requirement**
Grade of "C-" or better required in all courses applied to the Computer Science major.

**Program Requirements**

**Required Lower Division Courses (15 Units)**

</tbody>
</table>

**Total Units**  

- **78-81**

1. Course also satisfies General Education (GE)/Graduation Requirement.
2. Computer science students choosing between MATH 35 and MATH 100 should normally choose MATH 100 because it is more applied. MATH 35 at Sacramento State is designed for math majors.
3. In addition to the required lower-division and upper-division Computer Science courses, Computer Science majors must take additional elective courses, totaling at least nine (9) units, from undergraduate Computer Science courses numbered CSC 140 or above (excluding the listed courses).

Course choices should be made with advisor consultation. With advance written approval from their advisor, the course instructor, and the Department Chair, students with a GPA of 3.0 or greater may take graduate courses as electives. In any case students must meet any course prerequisite stated in the catalog prior to taking any elective course.

</table>

4. To help you complete your degree in a timely manner and not take more units than absolutely necessary, there are ways to use single courses to meet more than one requirement (overlap). For further information, please visit the General Education page (p. 1103).

Note: There is no way to list all possible overlaps so please consult with a professional advisor. The Academic Advising Center can be visited online (http://www.csus.edu/acad/), by phone (916) 278-1000, or email (advising@csus.edu).

5. A required course in the major satisfies this GE area.

6. Choosing BIO 1 or BIO 10 as the Computer Science science elective satisfies GE Area B2.

7. Students with a declared major of BS in Computer Science are exempt from the Foreign Language Graduation Requirement.

### Certificate in Advanced Programs - Graduate

#### Program Description

The Certificates in Computer Science program are designed to recognize students who have completed the following core graduate courses plus additional advanced coursework in a specialty area.

These certificates are available only for MS Computer Science matriculated students.

Note: Minimum required GPA for all courses taken in the program: 3.0

Certificate in Game Engineering

Units required for Certificate: 12

Program Description
This certificate is intended to give students an opportunity to explore the science and engineering of computer games, and to prepare students for careers in those fields of computing which utilize or are heavily impacted by advances in computer gaming. These include such areas as video and strategy game development, 3-D graphics, modeling and animation and their support tools, intelligent decision making, specialized user interface hardware, machine learning, and working in interdisciplinary teams.

Academic Certificates
In addition to completing the requirements for the Bachelor of Sciences in Computer Science degree program, students enrolled in the major may also complete one of the (optional) 9-12 unit Academic Certificate programs. Each certificate includes 9 required units which can overlap with elective coursework taken to satisfy the major requirements, with some of the certificates requiring 3 additional units (1 additional course) beyond the degree requirements. Students interested in earning a certificate in addition to their degrees should meet with an academic advisor.

Requirements for Certificates
Certain combinations of courses gives students a deeper understanding of specialized areas in Computer Science. Completion of any of the following course lists entitles the student to receive a certificate indicating that they concentrated their elective study in the particular area. The Computer Science Department will try and offer on a regular basis all courses required for each certificate, but course cancellations and scheduling conflicts do sometimes occur causing students difficulty in completing their desired course study. In such situations, students may need to forgo completion of their certificate. Printed certificates must be requested directly from the Computer Science Department office after a student graduates.

Certificate in Information Assurance and Security

Units required for Certificate: 12

Program Description
The Information Assurance and Security certificate is designed to help students advance their technical skills to prepare for a leadership role in planning, managing, certifying and accrediting a security and incident response plan for their organization - including methods to combat threats to organization information resources, which in today's world is becoming top priority for many businesses since most information is in electronic form.

Academic Certificates
In addition to completing the requirements for the Bachelor of Sciences in Computer Science degree program, students enrolled in the major may also complete one of the (optional) 9-12 unit Academic Certificate programs. Each certificate includes 9 required units which can overlap with elective coursework taken to satisfy the major requirements, with some of the certificates requiring 3 additional units (1 additional course) beyond the degree requirements. Certificate in Information Assurance and Security - Graduate

Units required for Certificate: 9

Program Description

The Certificates in Computer Science program are designed to recognize students who have completed the following core graduate courses plus additional advanced coursework in a specialty area.

These certificates are available only for MS Computer Science matriculated students.

Note: Minimum required GPA for all courses taken in the program: 3.0

Certificate in Software Engineering

Units required for Certificate: 12

Program Description

The Software Engineering certificate is designed to focus on the principles of designing, building, testing and maintaining reliable, efficient, and secure software systems. The certificate is designed to emphasize the knowledge, competencies, and skills needed to produce competent graduates to begin a professional career in the field of software engineering, or pursue graduate programs.

Academic Certificates

In addition to completing the requirements for the Bachelor of Sciences in Computer Science degree program, students enrolled in the major may also complete one of the (optional) 9-12 unit Academic Certificate programs. Each certificate includes 9 required units which can overlap with elective coursework taken to satisfy the major requirements, with some of the certificates requiring 3 additional units (1 additional course) beyond the degree requirements. MS in Computer Science

Total units required for MS: 30

Program Description

The Computer Science Department offers Master’s Degree programs in Computer Science and Software Engineering, Certificates of Advanced Study for students enrolled in the Computer Science program, and a Master’s Degree joint program in Computer Engineering.

The primary goal of each of these programs is to prepare students to serve as effective professional computer specialists in a society which increasingly depends on computer usage and technology.

A secondary goal is to prepare interested students for research, teaching, or further study toward the Ph.D. in Computer Science. The programs also enable individuals with background in other areas to obtain the skills and knowledge necessary to enter and advance in employment in computer-related industries.

Completion of the Master of Science in Computer Science requires advanced coursework in a minimum of three of the following areas: computer architecture/computer engineering, database management systems, information assurance and security, intelligent systems, networks and communications, software engineering, and systems software. Students must obtain approval from the department to take more than one course in one area.

Teaching associateships are occasionally available for qualified graduate students; these students assist in instruction of undergraduate courses, supervision of laboratory work, and aid faculty members in research projects. Interested persons should apply in the Department office.

Due to the large number of graduate students in Computer Science who are employed, most graduate level courses are offered in the late afternoon or evening.

Admission Requirements

Admission as a classified graduate student requires:

• a baccalaureate degree;
• a minimum 3.0 GPA in the last 60 units attempted;
• GRE general test;
• mathematical preparation including two semesters of calculus and one semester of calculus-based probability and statistics corresponding to Sacramento State courses:

<table>

Applicants with deficiencies in the admission requirements area are advised to remove any such deficiencies before applying.

**Admission Procedures**

Applicants must complete a university application and a separate departmental application by the posted application deadline dates for the term applying. For more admissions information and application deadlines, please visit the Office of Graduate Studies website ([http://www.csus.edu/gradstudies/](http://www.csus.edu/gradstudies/)):

- an online application for admission;
- two sets of official transcripts from all colleges and universities attended, other than Sacramento State; and
- official GRE general test scores.

**Minimum Units and Grade Requirement for the Degree**

Units Required for the MS: 30

Minimum Cumulative GPA: 3.0. No grade below "C" may count toward the degree.

**Note:** Only those courses completed within seven years prior to date of graduation will satisfy course requirements.

**Advancement to Candidacy**

Each student must file an application for Advancement to Candidacy, indicating a proposed program of graduate study. This procedure should begin as soon as the classified graduate student has:

- removed any deficiencies in admission requirements;
- completed at least 12 units of graduate level (200 series) Computer Science courses with a minimum 3.0 GPA; and
- taken a Graduate Writing Intensive (GWI) course in their discipline within the first two semesters of coursework at California State University, Sacramento.

Students must have been advanced to candidacy before they can register for Master's thesis or project. Advancement to Candidacy forms are available on the Office of Graduate Studies website. The student fills out the form after planning a degree program in consultation with a Computer Science graduate advisor. The completed form must be signed by the Graduate Coordinator or the Department Chair and is then returned to the Office of Graduate Studies for approval.

1 Students whose undergraduate preparation has covered a significant amount of the material in CSC 205 or CSC 206 may be given a waiver by the Department from taking one or more of these courses. In this case, for each course waived with department approval, the student must take three additional units from the list below.
Admission as a classified graduate student requires:

- Admission Requirements

- Projects. Interested persons should apply in the Department office.
- Supervision of laboratory work, and aid faculty members in research
- Teaching associateships are occasionally available for qualified graduate
- Testing, operation, and maintenance.
- Program covers the entire software application development process
- Involving some aspect of software engineering.
- Science (or related field) or a minimum of one-year's work experience
- Individuals wishing to pursue a degree must satisfy the Computer
- Science advanced preparation as evidenced by a 3.25 GPA
- Students should choose their electives according to the following
- 1. Any 200-level CSC courses not already used to satisfy the Breadth
- Requirement, with the exception of CSC 295 and CSC 299. Students not
- required to take CSC 205 or CSC 206 must, for each course waived, take an
- additional three units in this category.
- 2. Undergraduate upper division elective courses whose topics are not
- covered by any 200-level CSC courses as long as they have not been used
- towards another degree. (A maximum of 6 undergraduate units may be
- used in any graduate program.) Prior to taking any of these electives, students must obtain approval from the department.
- 3. Related 200-level courses from outside the Computer Science Department
- may only be taken with prior department approval and may not have been used
- in another program.

Students are required to make an oral presentation of their master’s
project or conduct an oral defense of their master’s thesis. The
recommended department-level deadline in each semester for
submitting an MS project or thesis signed by the committee chair
and its members to the Graduate Coordinator’s office is 10 working
days prior to the University deadline.

**MS in Software Engineering**

Total units required for MS: 30-33

**Program Description**

This degree provides the student with the ability to specialize in the
application of software engineering principles to the development of large
and complex computer systems.

The program's courses are structured to satisfy two groups of students:

- 1. those pursuing an MSSE degree and
- 2. those interested in individual courses.

Individuals wishing to pursue a degree must satisfy the Computer
Science graduate program entrance requirements. Those enrolling in
individual courses must have an undergraduate degree in Computer
Science (or related field) or a minimum of one-year’s work experience
involving some aspect of software engineering.

The MS Degree in Software Engineering offers, in addition to a core
curriculum, advanced studies in the software engineering area. This
program covers the entire software application development process
from problem definition through requirements, design, implementation,
testing, operation, and maintenance.

Teaching associateships are occasionally available for qualified graduate
students; these students assist in instruction of undergraduate courses,
supervision of laboratory work, and aid faculty members in research
projects. Interested persons should apply in the Department office.

**Admission Requirements**

Admission as a classified graduate student requires:

- a baccalaureate degree;
- a minimum 3.0 GPA in the last 60 units attempted;
- GRE general test;
- mathematical preparation including two semesters of calculus
  and one semester of calculus-based probability and statistics
  corresponding to Sacramento State courses:

- Computer Science lower-division preparation including programming
  proficiency, discrete structures, machine organization, and UNIX
  and PC-based program development environment proficiency
  corresponding to Sacramento State courses (see the following) and
  as evidenced by a pass on the graduate student placement test or a
  baccalaureate degree in Computer Science;

- Computer Science advanced preparation as evidenced by a 3.25 GPA
  in the following Sacramento State upper division Computer Science
  courses or their equivalent elsewhere:

**Minimum Units and Grade Requirement for the Degree**

Units Required for the MS: 30

Minimum Cumulative GPA: 3.0. No grade below "C" may count toward
the degree.

**Note:** Only those courses completed within seven years prior to date of
graduation will satisfy course requirements.
Advancement to Candidacy

Each student must file an application for Advancement to Candidacy, indicating a proposed program of graduate study. This procedure should begin as soon as the classified graduate student has:

- removed any deficiencies in admission requirements;
- completed at least 12 units of graduate level (200 series) Computer Science courses with a minimum 3.0 GPA; and
- taken a Graduate Writing Intensive (GWI) course in their discipline within the first two semesters of coursework at California State University, Sacramento and passed the course with a grade of B or better.

Total Units 30-33

1 Students who select CSC 502 (Master’s Project) for 2 units are required to take a 3-unit restricted elective. Students who select CSC 500 (Master’s Thesis) for 5 units are not required to take a restricted elective.

2 Prior to taking an elective course, students must obtain approval from their advisor, and either the Graduate Coordinator or the Department Chair. Students should choose their electives according to the following guidelines: (1) Undergraduate upper-division elective courses whose topics are not covered by any 200-level CSC courses as long as they have not been used towards another degree. (A maximum of 3 undergraduate units may be used in any graduate program); (2) Any 200-level CSC course not already used, with the exception of CSC 295 and CSC 299. An additional three units in this category must be taken if a core course is waived; (3) Related 200-level courses from outside the Computer Science Department may only be taken with prior approval from the Graduate Coordinator or Department Chair and may not have been used in another program.

3 Students are required to make an oral presentation of their master’s project or conduct an oral defense of their master’s thesis. The recommended department-level deadline in each semester for submitting an MS project or thesis signed by the Committee Chair and its members to the Graduate Coordinator’s office is 10 weekdays prior to the University deadline.

Construction Management

College of Engineering and Computer Science

Program Description

The Sacramento State University Construction Management degree prepares students for managerial positions with contractors and other organizations involved in the construction process. For a graduate, this preparation can combine with experience and lead to recognition as a construction professional, a Constructor. The construction professional is responsible for the execution of construction work, for the creation of completed projects from plans prepared by design professionals such as architects and engineers. What is to be built is defined by design professionals; how the work is to be accomplished is the concern of the Constructor. A Constructor determines the methods to be used and directs the economical application of resources in the construction of timely and safe projects at satisfactory prices, and to the required standards of quality.

The immediate objective of the program is to provide university-level preparation for managerial positions in construction and a foundation for continued learning. The curriculum emphasizes subject areas that are significant to the Constructor: engineering fundamentals, construction management, business administration, humanities and social sciences, and the development of analytical and communication skills.

Degree Program

BS in Construction Management with a Minor in Business Administration (p. 623)

Accreditation

In addition to California State University, Sacramento’s full accreditation by the Western Association of Schools and Colleges, the Bachelor of Science in Construction Management is also individually accredited by the American Council for Construction Education.

Notice to Students RE: Professional Licensure and Certification

California State University programs for professions that require licensure or certification are intended to prepare the student for California licensure and certification requirements. Admission into programs for professions that require licensure and certification does not guarantee that students will obtain a license or certificate. Licensure and certification requirements are set by agencies that are not controlled by or affiliated with the California State University and licensure and certification requirements can change at any time.

The California State University has not determined whether its programs meet other states' educational or professional requirements for licensure and certification. Students planning to pursue licensure or certification in other states are responsible for determining whether, if they complete a California State University program, they will meet their state's requirements for licensure or certification. This disclosure is made pursuant to 34 CFR §668.43(a)(5)(v)(O).
Special Features
To meet the objectives of this specialized professional program, the Construction Management curriculum consists of four distinct components:

Engineering: Based in sciences and mathematics, this component stresses engineering principles and their application to the construction process. This component provides sound engineering fundamentals.

Construction Management: This component utilizes the functional approach as a framework for studying the management of the construction process. In the individual courses, construction activities are analyzed from a managerial viewpoint and the functions of management are stressed.

Business Administration Courses: Business courses form the third component and reinforce the program’s management emphasis. A minor in Business Administration is obtained by combining the required lower and upper division business courses. Furthermore, completing the minor requirements can satisfy many of the core requirements of the graduate program in Business Administration at Sacramento State.

General Education Courses: The fourth component is critical to the success of construction students who must be sensitive to the issues driving contemporary society.

- This unique program is accredited by the American Council for Construction Education (ACCE).

Academic Policies and Procedures
The following is a summary of policies and procedures specific to the Construction Management program. Other university policies and procedures in this catalog also apply to Construction Management majors. The Department will not hear petitions for deviation from articulated policies made by students who disregard catalog policy.

- Most Construction Management courses require a grade of "C-" or better.
- Course Repeat Policy: Undergraduate Construction Management courses that are used to meet the degree requirements for the Bachelor of Science degree in Construction Management may be repeated only twice (for a total of three attempts). Grades of the second and third attempt will be averaged in grade point calculations.

Career Possibilities
Construction Manager · General Contractor · Sub-Contractor · Project Manager · Construction Estimator · Technical Salesperson · Construction Scheduler or Planner · Forensic Construction Specialist · Environmental Remediation Contractor · Construction Consultant

Faculty
ANDERSON, MIKAEL

FIGGESS, GARETH
HANSEN, KAREN L.
MANTELL, ANDY
SALAMA, TAREK

CM 9. Construction Surveying and Layout. 3 Units
Prerequisite(s): CM 10, CM 20, CM 21 and either Math 26A or MATH 30; CM 21 and Math 26A or MATH 30 may be taken concurrently.
Corequisite(s): CM 21.
Term Typically Offered: Fall, Spring

Geomatics and the principles of surveying measurements for distance, direction, and elevation. Special emphasis on the application of surveying skills relevant to the field of construction, including building, bridge, and sitework layout techniques and procedures, establishment of reference line and grade, topographic mapping, and earthwork computations. Lecture two hours. Laboratory 3 hours.

CM 10. The Construction Industry. 1 Unit
Term Typically Offered: Fall, Spring

Introduction to the Construction Management program and the many facets of the construction industry and to the various career opportunities. The unique products of construction, the organizations involved, and the people that make it happen. Guest speakers. Lecture one hour.
Credit/No Credit

CM 15. Fundamentals of Construction Management. 3 Units
Prerequisite(s): CM 10, CM 10 may be taken concurrently.
Term Typically Offered: Fall, Spring

Introduction to the Construction Management program and industry. Critical reading, thinking and writing for the construction profession. Introduction to visualization and graphic communication using both manual and computer assisted techniques. Introduction to quantitative software commonly used in the construction industry.

CM 20. Construction Materials and Processes. 3 Units
Prerequisite(s): CM 10, ENGL 1A; CM 10 may be taken concurrently.
Term Typically Offered: Spring only

Introduction to construction materials; to their properties in-place in completed projects, and to their characteristics that affect construction processes. The organizations, methods, equipment and safety considerations that are common to projects of all types and to all segments of the industry. Field trips. Lecture two hours; laboratory three hours.
Field trip(s) may be required.

CM 21. Construction Graphics. 3 Units
Prerequisite(s): ENGL 1A and CM 10; CM 10 may be taken concurrently.
Term Typically Offered: Fall only

Instruction and exercises in graphic techniques and procedures applicable to construction. Analysis of drawings in the civil, architectural, structural, mechanical, and electrical fields and how drawings affect construction planning. Freehand sketching. Isometric and oblique projections. Material quantity surveying. Lecture two hours; laboratory three hours.
CM 22. Construction Documents. 3 Units
Prerequisite(s): ENGL 1A, CM 20, and CM 21; CM 20 may be taken concurrently.
Term Typically Offered: Spring only

Analyzes construction contract documents. Technical and legal interpretations and implications to managers of the construction process. Quantity surveying. Lecture two hours; laboratory three hours.

CM 30. Engineering Mechanics-Statics. 3 Units
Prerequisite(s): MATH 26A or MATH 30; and PHYS 5A or PHYS 11A.
Term Typically Offered: Spring only

Introduction to the solution of engineering design problems. Concepts of units, vectors, equilibrium, forces, force systems, shear and moment diagrams. Lecture three hours.

CM 40. Properties of Construction Materials. 3 Units
Prerequisite(s): PHY5 5A.
Term Typically Offered: Fall only

Study of the engineering performance characteristics of materials. Covers testing concepts and procedures. Includes basic properties of metals, aggregates, cements, concrete, timber, asphalt, masonry and plastics with emphasis on construction applications. Lecture two hours; laboratory three hours.

CM 110. Legal Aspects of Construction. 3 Units
Prerequisite(s): Senior class standing, MGMT 101, CM 22.
Corequisite(s): CM 126
Term Typically Offered: Fall only

Application of advanced legal concepts to the construction process. Analyzes problems relating to contract formation, administration, and interpretation. Includes bidding and contract enforcement; litigation of disputes vs. arbitration; liability for negligence, warranty, and strict liability; safety; license law requirements; mechanics’ liens and stop notices; bond rights and obligations. Lecture three hours.

CM 111. Construction Labor Relations. 3 Units
Term Typically Offered: Spring only

Study of federal and state labor law; labor unions, and their importance in the construction industry; and an analysis of the growth of open-shop construction. Employment law. Lecture three hours.

CM 120. Construction Operations and Methods Analysis. 3 Units
Prerequisite(s): CM 22.
Corequisite(s): CM 121.
Term Typically Offered: Fall only

Introduction to the analysis and management of construction projects in terms of the work that must be performed in the construction process. Analyzes operations and methods using concepts and techniques, including video, that are applicable to all types of projects in all segments of the industry, variables affecting productivity. Safety as an integral part of project and operations management. Field trips. Lecture two hours; laboratory three hours. Field trip(s) may be required.

CM 121. Fundamentals of Construction Estimating. 3 Units
Prerequisite(s): CM 22.
Corequisite(s): CM 120.
Term Typically Offered: Fall only

Study of the basic approaches to estimating the cost of construction projects from a managerial viewpoint. Types of estimates and methods; elements of cost, variables and costing concepts; analysis procedures for detailed estimates. Lecture two hours; laboratory three hours.

CM 124. Engineering Construction. 3 Units
Prerequisite(s): CM 125, CM 135.
Term Typically Offered: Fall only

Study of engineering construction projects with emphasis on equipment-paced operations including safety aspects. Engineering fundamentals and other factors that affect equipment selection and production. Amplification of recording and analysis techniques. Unit price contracts. Field trips. Lecture two hours; laboratory three hours. Field trip(s) may be required.

CM 125. Advanced Estimating and Bidding. 3 Units
Prerequisite(s): CM 120, CM 121.
Term Typically Offered: Spring only

Study of the concepts and practices involved in the total estimating and bidding process in construction, from initial project selection to submission of final bids. Covers considerations in project selection, sub-bid analysis, contingency and risk analysis, pricing concepts, bidding models, and an introduction to computer applications. A complete project estimate and bid is prepared by each student. Lecture two hours; laboratory three hours.

CM 126. Construction Project Management. 3 Units
Prerequisite(s): CM 125, CM 127.
Corequisite(s): CM 110.
Term Typically Offered: Fall only

Introduction to the study of Project Management as it is used on the larger construction project. Students study how construction contractors manage cost, time, scope, and quality. The theory of Project Management is developed and compared to management of the on-going business enterprise. Matrix and functional organizations are examined within the context of the industrial, commercial and heavy contract construction industries using the principles of the management process. Lecture three hours.

CM 127. Planning, Scheduling and Control. 3 Units
Prerequisite(s): CM 121.
Term Typically Offered: Spring only

Study of the concepts used in planning and controlling construction projects. Arrow, PERT, precedence, and linear scheduling methods; resource leveling; time-cost analysis; bar charts; and time-scaled diagrams. Manual procedures followed by computer applications. Lecture three hours.
CM 129. Senior Project. 3 Units
Prerequisite(s): CM 110, CM 111, CM 124, CM 126, HROB 101.
Term Typically Offered: Spring only

Consideration of technical, legal, business and human factors (including safety) in applying the functional approach to the management of construction organizations, projects, and operations. The individual construction professional in a competitive industry: personal and professional development, ethics, stress, physical and mental health. The industry and the construction professional in relation to the social and physical environments. Lecture three hours.

CM 130. Structures I -- Design Principles and Structural Steel Design. 3 Units
Prerequisite(s): CM 30, CM 40; CM 40 may be taken concurrently.
Term Typically Offered: Fall only

Introduction to structural design. Consideration of load conditions, stresses, strain, beam deflection and column action. Basic design of structural steel members with emphasis on systems used in practical situations. Beams, trusses, and columns are designed using the Uniform Building Code as a reference and the results are shown on detailed drawings and sketches. Lecture three hours.

CM 135. Soils and Foundations. 3 Units
Prerequisite(s): CM 130.
General Education Area/Graduation Requirement: Upper Division Further Studies in Area B5
Term Typically Offered: Fall only

Quantitative analysis of the properties and behaviors of soils used as materials in construction. Index and physical properties of soils including compaction; permeability, compressibility, and shear strength. Methods of laboratory and field tests. Principles of foundation design, pavements, embankments and temporary soil support systems for trenches and cuts. Lecture two hours; laboratory three hours.

Note: This course requires safety training this; course requires personal protective equipment (PPE).

CM 136. Principles of Mechanical and Electrical Engineering. 3 Units
Prerequisite(s): PHYS 5B, CM 30.
Term Typically Offered: Fall only

Basic principles of thermodynamics with application to heating, ventilating and air conditioning systems. Introduction to electrical circuits and circuit analysis with construction applications. Lecture three hours.

CM 140. Structures II -- Timber and Formwork Design. 3 Units
Prerequisite(s): CM 130.
Term Typically Offered: Spring only

Basic design of structural timber members with emphasis on systems used in practical situations. Beams, trusses, and columns are designed using the Uniform Building Code as a reference and the results are shown on detailed drawings and sketches. Application of engineering principles to satisfy construction requirements that are not designed or shown in typical construction documents. Includes analysis and design of concrete form systems, shoring, and falsework, and construction dewatering. Lecture three hours.

CM 150. Structures III -- Reinforced Concrete and Reinforced Masonry. 3 Units
Prerequisite(s): CM 130.
Term Typically Offered: Fall only

Basic design concepts of reinforced concrete and reinforced masonry design. Topics and examples include design of beams, slabs, columns and walls. Students are required to demonstrate drafting ability. Assignments include design and drawings of various structural systems. Lecture three hours.

CM 196D. Virtual Design and Construction. 3 Units
Prerequisite(s): CM 125 & CM127
Term Typically Offered: Fall, Spring

This course consists of instructions and exercises in virtual design applications in construction. Students will learn to develop 2D CAD drawings, 3D building information models (BIM), 4D BIM models to link the 3D model with construction schedules, and 5D models to link the 4D model with construction cost. Students will also learn to visualize an augmented reality BIM model for construction using 3D goggles (Microsoft HoloLens 2), and to utilize 3D laser scanning in capturing the details of an existing.

CM 199. Special Problems. 1 - 3 Units
Term Typically Offered: Fall, Spring

Individual projects or directed reading.
Note: Open only to students competent to carry on individual work. Admission to this course requires approval of an instructor and the program coordinator.

Credit/No Credit
CM 296A. Sustainable Design and Construction. 3 Units
Prerequisite(s): Graduate standing or instructor permission.
Term Typically Offered: Fall only – even years

Provides a foundation in sustainable building concepts and design principles while giving students the opportunity to practice applying these principles to actual projects. Prepare the new generation of engineers to address complex societal problems and develop the vocabulary and skills to become proactive contributors to sustainable design and construction project teams. This course will be offered experimentally.

BS in Construction Management

Units required for Major: 105 (includes units required for Minor in Business Administration)
Total units required for BS: 134

Program Description
The Sacramento State University Construction Management degree prepares students for managerial positions with contractors and other organizations involved in the construction process. For a graduate, this preparation can combine with experience and lead to recognition as a construction professional, a Constructor. The construction professional is responsible for the execution of construction work, for the creation of completed projects from plans prepared by design professionals such as architects and engineers. What is to be built is defined by design professionals; how the work is to be accomplished is the concern of the Constructor. A Constructor determines the methods to be used and directs the economical application of resources in the construction
of timely and safe projects at satisfactory prices, and to the required standards of quality.

The immediate objective of the program is to provide university-level preparation for managerial positions in construction and a foundation for continued learning. The curriculum emphasizes subject areas that are significant to the constructor: engineering fundamentals, construction management, business administration, humanities and social sciences, and the development of analytical and communication skills.

**Note:** Students graduating with a BS in Construction Management will not be subject to the University's Foreign Language Graduation Requirement. Students who change major may be subject to the University’s Foreign Language Graduation Requirement.

**Note:** Students graduating with a BS in Construction Management consecutively earn a Minor in Business Administration.

### Electives (6 Units)

Select any 100 level BA course

Select one of the following:

- FIN 101 Business Finance
- MKTG 101 Principles Of Marketing
- OPM 101 Operations Management

**Total Units:** 105

1. Course also satisfies General Education (GE)/Graduation Requirement. For the degree, students must satisfy all the University’s General Education requirements for Construction Management. Students should contact the program office for a complete list of these requirements. A second year foreign language course (2A or equivalent) may also satisfy 3 units of GE when the course is being taken to comply with the Sacramento State foreign language requirement. Students should consult with an advisor for the University's foreign language requirement.

2. All majors and pre-majors shall demonstrate computer literacy and competency prior to taking 100-level construction management or business courses. This requirement is met by passing scores on examinations as administered by the College of Business Administration in each of the following areas:
   - Basic understanding and manipulation skills for operating system, Email system, and browser (covered in MIS 1);
   - Basic facility with spreadsheets using the College of Business Administration’s standard spreadsheet package (covered in MIS 3); and
   - Word processing and presentation graphics (covered in MIS 3).

3. Upper division Construction Management courses are open only to students who have satisfactorily completed all required lower division preparation and have been admitted to the major.

### Notes:

- High school chemistry (one year), mechanical drawing (one year), and trigonometry (one-half year) also required. Students without this high school preparation must take the necessary courses in addition to those listed above.
- The recommended course sequence may change. Students should consult the Construction Management program for current information.

Business Administration lower and upper division courses apply both to the major and to a Business Administration minor. Students interested in pursuing a pre-MBA sequence should contact the Degree Program Center in the College of Business Administration.

Area F Course 3

Total Units 33

1 To help you complete your degree in a timely manner and not take more units than absolutely necessary, there are ways to use single courses to meet more than one requirement (overlap). For further information, please visit the General Education page (p. 1103).

Note: There is no way to list all possible overlaps so please consult with a professional advisor. The Academic Advising Center can be visited online (http://www.csus.edu/acad/), by phone (916) 278-1000, or email (advising@csus.edu).

2 Required in Major; also satisfies Graduation Requirement.

3 If not satisfied before entering Sacramento State, it may be satisfied in General Education Area C2 (Humanities). "C- or better required." The alternative methods for satisfying the Foreign Language Proficiency Requirement are described here: https://www.csus.edu/college/arts-letters/world-languages-literatures/foreign-language-requirement.html

Note: Students with a declared major of BS in Construction Management are exempt from the Foreign Language Graduation Requirement.

**Electrical and Electronic Engineering**

**College of Engineering and Computer Science**

**Program Description**

Electrical Engineers design systems that generate, transmit and distribute electricity. Electronic engineers design electronic devices which perform computation, communication, or control of robots and machines. Electrical and electronic engineers work with technologies ranging from large power lines and generators to tiny integrated circuits containing billions of transistors.

The Department of Electrical and Electronic Engineering offers a Bachelor of Science (BS) in Electrical and Electronic Engineering. The Department also offers a Master of Science degree in Electrical and Electronic Engineering, with the following focus areas: control systems, power systems, communication systems, microelectronic design, and computer architecture & digital design.

Students receive a thorough grounding in mathematics and the basic sciences during their first four semesters. Engineering design and applications are stressed in the final four semesters. Prospective students are urged to discuss their plans as early as possible with their high school or community college counselor and with the Electrical and Electronic Engineering Department Chair who will advise students individually.

**Degree Programs**

BS in Electrical and Electronic Engineering (p. 636)  
Certificate in Electric Power Systems and Engineering (p. 638)  
MS in Electrical and Electronic Engineering (p. 638)  
Certificate in Mixed-Signal Integrated Circuit Design (p. 638)

**Accreditation**

In addition to California State University, Sacramento’s full accreditation by the Western Association of Schools and Colleges, the Bachelor of Science in Electrical and Electronic Engineering is also individually accredited by ABET, Inc.

**Notice to Students RE: Professional Licensure and Certification**

California State University programs for professions that require licensure or certification are intended to prepare the student for California licensure and certification requirements. Admission into programs for professions that require licensure and certification does not guarantee that students will obtain a license or certificate. Licensure and certification requirements are set by agencies that are not controlled by or affiliated...
with the California State University and licensure and certification requirements can change at any time.

The California State University has not determined whether its programs meet other states' educational or professional requirements for licensure and certification. Students planning to pursue licensure or certification in other states are responsible for determining whether, if they complete a California State University program, they will meet their state’s requirements for licensure or certification. This disclosure is made pursuant to 34 CFR §668.43(a)(5)(v)(C).

**Special Features**

- The BS degree in Electrical and Electronic Engineering is accredited by the Engineering Accreditation Commission (EAC) of ABET, http://www.abet.org (http://www.abet.org/)
- The major strengths of the Electrical and Electronic Engineering program lie in its faculty, whose industrial experience equips them to relate theory to practice and prepare students for the profession or for graduate study.
- The Department has outstanding laboratory facilities to provide hands-on instruction.
- A Committee of power industry leaders from throughout the State is a source of advice and assistance to the Department regarding the preparation of students for careers in power engineering.
- The EEE Department Industry Liaison Council (ILC) consists of industry professionals representing various disciplines within electrical and electronic engineering. The ILC provides feedback on program direction and our outcomes assessment efforts. The ILC is active in providing professional development opportunities for our faculty.
- The Department has a strong IEEE Student Branch. It is among the most active student chapters in the Sacramento Section of IEEE. The student branch has an elected core of officers, who plan and execute the programs of the chapter in consultation with the branch faculty advisor. The primary purpose of the student branch is to develop professional awareness among the students and provide them with opportunities to expand their leadership and communication skills.

**Program Educational Objectives**

The Electrical and Electronic Engineering Program has developed a set of Program Educational Objectives. These statements describe what the faculty is preparing the students to achieve within a few years after graduation:

- Core Knowledge: Our graduates will have active careers in Electrical and Electronic engineering, or be actively engaged in a related career path.
- Application of Knowledge: Our graduates will apply their knowledge and skills to solve practical engineering problems.
- Professionalism: Our graduates will demonstrate the professional skills, such as high ethical standards, effective oral and written communications, and teamwork, necessary to be productive engineers and to advance in their careers.
- Life-long Learning: Our graduates will continue to develop their skills and seek knowledge after graduation in order to adapt to advancing technology and the needs of society. This may be indicated by the graduate's pursuit of an advanced degree or other formal instruction, and/or that the graduate has developed a professional specialty.

**EEE 64. Introduction to Logic Design.** 4 Units

**Prerequisite(s):** CSC 15 or CSC 25 or ENGR 50

**General Education Area/Graduation Requirement:** Understanding Personal Development (E)

**Term Typically Offered:** Fall, Spring, Summer

Covers the following topics: logic gates, binary number system, conversion between number systems, Boolean algebra, Karnaugh maps, combinational logic, digital logic design, flip-flops, programmable logic devices (PLDs), counters, registers, memories, state machines, designing combinational logic and state machines into PLDs, and basic computer architecture. Lab emphasizes the use of software equation entry design tools, the use of a schematic entry, and the use of a logic simulation design tool. Lab assignments are design-oriented.

Cross Listed: CPE 64; only one may be counted for credit.

**EEE 64P. Peer-Assisted Learning EEE 64.** 1 Unit

**Corequisite(s):** EEE 64

**Term Typically Offered:** Fall, Spring

Students concurrently enrolled in EEE 64 work through faculty-designed problems sets under the guidance of a trained student facilitator to improve their understanding of EEE 64 content. Pedagogical strategies that encourage active, engaged learning are employed to facilitate student success. Discussion, 2 hours.

Credit/No Credit

**EEE 64W. Introduction to Logic Design Workshop.** 1 Unit

**Corequisite(s):** EEE 64

**Term Typically Offered:** Fall, Spring

Assists students in developing a more thorough understanding of logic simulation and logic design. Focus is on problem solving and design. Activity two hours. Lecture three hours; laboratory three hours.

Cross Listed: CPE 64W; only one may be counted for credit.

Credit/No Credit
EEE 108.  Electronics I.  3 Units
Prerequisite(s): EEE 117.
Corequisite(s): EEE 108L.
Term Typically Offered: Fall, Spring

Introduction to electronics, ideal OP-AMPS, BJTs, FETs, DC biasing, VI characteristics, single stage amplifiers, low frequency small signal models, power supplies and voltage regulation. PSPICE required.

EEE 108L.  Electronics I Laboratory.  1 Unit
Prerequisite(s): EEE 117, EEE 117L
Corequisite(s): EEE 108
Term Typically Offered: Fall, Spring

Characteristics and applications of semiconductor devices including diodes, BJTs and FETs, and analog integrated circuits including opamps. Introduction to circuit simulation using professional computer-aided design (CAD) software. Laboratory three hours.

EEE 109.  Electronics II.  4 Units
Prerequisite(s): EEE 108, EEE 108L, EEE 117, EEE 117L; and 1)GWAR Certification before Fall 09, or WPJ score of 70+, or at least a C- in ENGL 109M or ENGL 109W.
Term Typically Offered: Fall, Spring

Differential and multistage amplifiers, high frequency models (BJTs and FETs), feedback and sensitivity, power amplifiers, oscillators and waveform shaping circuits. Advanced use of PSPICE. Lecture three hours; laboratory three hours.

EEE 110.  Advanced Analog Integrated Circuits.  3 Units
Prerequisite(s): EEE 109 or consent of instructor.
Term Typically Offered: Fall only

The use of operational amplifiers in circuit designs for applications such as filtering, switched capacitor design, sample and hold design, instrumentation amplifiers, and voltage reference circuitry will be explored, as well as topics in Feedback Theory.

EEE 111.  Advanced Analog Integrated Circuits Laboratory.  1 Unit
Prerequisite(s): EEE 109; either EEE 110 or EEE 230. EEE 110 or EEE 230 may be taken concurrently.
Term Typically Offered: Fall only

Circuit design, mask design, and simulation of integrated circuitry. Use of CAD software to prepare design for fabrication. Individual and group design projects. Laboratory three hours.

EEE 117.  Network Analysis.  3 Units
Prerequisite(s): ENGR 17, MATH 45, and PHYS 11C
Corequisite(s): EEE 117L.
Term Typically Offered: Fall, Spring

Review of sinusoidal steady state, phasors, complex power, three phase power, mutual inductance, series and parallel resonance. Introduction to application of Laplace transforms in network analysis, transfer functions, Bode plots, Fourier series, two-port circuits.

EEE 117L.  Networks Analysis Laboratory.  1 Unit
Corequisite(s): EEE 117.
Term Typically Offered: Fall, Spring

Introduces fundamental laboratory techniques while demonstrating the concepts introduced in the EEE 117 lecture. The computer simulation language PSPICE is introduced and applied. Laboratory three hours.

EEE 120.  Electronic Instrumentation.  4 Units
Prerequisite(s): EEE 108, EEE 117; EEE 108 may be taken concurrently.
Term Typically Offered: Fall, Spring

Fundamental principles of sensors and instrumentation systems, together with their electrical implementation, such as biasing and signal conditioning circuits. Temperature, force, pressure, and mechanical sensors. Optical sensors, including a brief introduction to light sources and detectors. Applications to biomedical engineering and industrial control. Lecture three hours; laboratory three hours.

EEE 122.  Applied Digital Signal Processing.  3 Units
Prerequisite(s): EEE 117, EEE 180.
Term Typically Offered: Fall only

Application of digital signal processing to biomedical signals. Origin and characteristics of biomedical signals and contaminations. Preparation of biomedical signals for processing, including sensors, amplification, filtering, sampling, and quantization. Time-domain processing, including peak and zero-crossing detection, time interval measurement, peak height, and moving average estimates of mean and root mean square value. Frequency domain processing, including filtering to separate biomedical signal components and spectrum estimation. Joint time-frequency analysis.

EEE 130.  Electromechanical Conversion.  3 Units
Prerequisite(s): EEE 117 and EEE 161
Term Typically Offered: Fall, Spring

Magnetic circuits and principles of electromechanical energy conversion, Transformers, Rotating Magnetic Fields, Asynchronous AC machines, Synchronous AC machines, DC machines, Introduction to special machines, Introduction to power electronic drives.

EEE 131.  Electromechanics Laboratory.  1 Unit
Prerequisite(s): EEE 117, EEE 130 (EEE 130 may be taken concurrently), and 1)GWAR Certification before Fall 09, or WPJ score of 70+, or at least a C- in ENGL 109M or ENGL 109W.
Term Typically Offered: Fall, Spring

Direct current motor and generator characteristics, three phase synchronous motor and synchronous generator characteristics, single phase power transformer short circuit and no-load tests, frequency changer tests and tests on DC and AC machine models, potential and current transformers.

EEE 135.  Renewable Electrical Energy Sources and Grid Integration.  3 Units
Prerequisite(s): EEE 141 or EEE 130.
Term Typically Offered: Spring only

The study of existing sources of renewable electric energy such as wind, solar, geothermal, hydro, tidal, wave power, and biomass. Emphasis on wind and solar energy sources and their integration into the electric power grid. Various energy storage methods to accommodate the intermittent nature of these resources. Economic constraints, environmental benefits and institutional regulations.
EEE 136. Smart Electric Power Grid. 3 Units
Prerequisite(s): EEE 141
Term Typically Offered: Spring only

EEE 137. Applications of Power Electronics in Power Systems. 3 Units
Prerequisite(s): EEE 141
Term Typically Offered: Spring only

Analysis methods for power electronics. Power electronic devices and their control methodologies. Electric machinery drives and flexible alternating current transmission systems (FACTS) devices simulation of cases relevant to applications of power electronics in power systems.

EEE 141. Power System Analysis I. 3 Units
Prerequisite(s): EEE 117
Term Typically Offered: Fall, Spring

Introduction to modern electric power systems, fundamentals of AC and DC systems, power definitions, per-unit analysis, steady-state analysis of power systems, models of power system components such as transformers, generators, motors, power electronic converters and loads.

EEE 142. Power System Analysis II. 3 Units
Prerequisite(s): EEE 141, EEE 161, and EEE 184 (EEE 184 may be taken concurrently)
Term Typically Offered: Fall, Spring

Transmission line parameters and modeling, power flow analysis, analysis of power systems under faulted conditions, introduction to economic operation of power systems, introduction to power system stability and control.

EEE 143. Power System Laboratory. 1 Unit
Prerequisite(s): EEE 142 (EEE 142 maybe taken concurrently), received WPJ score
Term Typically Offered: Fall, Spring

Simulation and measurements on single-phase and three phase circuits, power generation, paralleling, and integration of multiple generation systems, transmission line operations including voltage regulation and line compensation.

EEE 144. Electric Power Distribution. 3 Units
Prerequisite(s): EEE 141
Term Typically Offered: Fall only

Operation and design of utility and industrial distribution systems including distribution system planning; load characteristics; application of distribution transformers; design of subtransmission lines, distribution substations, primary systems, secondary systems; application of capacitors; voltage regulation and reliability.

EEE 145. Power System Relay Protection and Laboratory. 4 Units
Prerequisite(s): EEE 141
Term Typically Offered: Fall only

Principles of protective relaying (classical and modern), current and voltage transformers, setting and testing or relaying elements, including differential, impedance, over/under current, voltage, and frequency relay types and/or elements, and their applications in protection of power system elements, including lines, generators, transformers, motors, and buses. Lecture 3 hours; laboratory 3 hours.

EEE 146. Power Electronics. 3 Units
Prerequisite(s): EEE 108.
Term Typically Offered: Fall, Spring

Introduction to solid state device applications in power control. Modeling and review of thyristors, controlled rectifiers, DC-DC converters, and DC to AC inverters. Brief introduction to control of DC drives. Strong design emphasis. Control of power electronics systems. UPS systems, power supplies.

EEE 147. Power System Operation and Control Laboratory. 1 Unit
Prerequisite(s): EEE 142.
Term Typically Offered: Fall, Spring

Computer simulation methods to describe power system behavior under steady state and dynamic conditions. Experiments conducted using MATLAB and Simulink for load flow in distribution lines, optimal power dispatch, synchronous machine transient behavior under short circuit conditions, transient stability, voltage and reactive power control, classical and modern load frequency control. Laboratory three hours.

EEE 148. Power Electronics Laboratory. 1 Unit
Prerequisite(s): EEE 146; may be taken concurrently.
Term Typically Offered: Fall, Spring

EEE 161. Applied Electromagnetics. 4 Units
Prerequisite(s): MATH 32, MATH 45, PHYS 11C, and ENGR 17.
Term Typically Offered: Fall, Spring

EEE 162. Applied Wave Propagation. 3 Units
Prerequisite(s): EEE 117, EEE 161.
Term Typically Offered: Fall, Spring

Review of distributed circuit theory and the Smith chart. Impedance
matching using series or shunt lumped and distributed circuits or near-
quarterwave-matching sections. Noise temperature and noise figure.
Scattering coefficient characterization of two-ports. Stability circles for
high frequency transistors. Constant gain and noise figure circles. Basic
antenna theory. Illustrated by their use for cell phones and other wireless
systems.

EEE 163. Traveling Waves Laboratory. 1 Unit
Prerequisite(s): EEE 117, EEE 162 (EEE 162 may be taken concurrently),
and (WPJ score of 70+, or at least a C- in ENGL 109M/W)
Term Typically Offered: Fall, Spring

Selected experiments in the transmission and reflection of waves
in coaxial lines and waveguides. Antenna impedance and pattern
measurements. Laboratory three hours.

EEE 165. Introduction To Optical Engineering. 3 Units
Prerequisite(s): EEE 161, EEE 180, EEE 185; EEE 185 may be taken
concurrently.
Term Typically Offered: Fall, Spring

Generation, propagation and detection of light. Fresnel equations, Snells
law, diffraction, polarization and interference. Operating principles of
LEDs, lasers, photodiodes and optical fibers. Introduction to optical
communications systems, integrated optical devices, and optical
instrumentation.

EEE 166. Physical Electronics. 3 Units
Prerequisite(s): EEE 108 and CHEM 1E or CHEM 1A
Term Typically Offered: Spring only

Semiconductor physics, atomic models and crystal structures. Quantum
theory, energy bands, motion of charge carriers, minority/majority carrier
profiles and pn junctions. Manufacturing processes for and operating
characteristics of diodes, bipolar transistors and field effect devices.

EEE 167. Electro-Optical Engineering Lab. 1 Unit
Prerequisite(s): EEE 161, EEE 180, EEE 165; EEE 165 may be taken
concurrently, and (WPJ score of 70+, or at least a C- in ENGL 109M/W)
Term Typically Offered: Fall, Spring

Provides senior level undergraduates with hands-on experience in optical
engineering and design. Experiments involving laser characteristics,
spectral radiometry, diffraction, polarization, modulation of light,
holography and spatial filtering will be performed. Laboratory three hours.

EEE 174. Introduction to Microprocessors. 4 Units
Prerequisite(s): Junior status, EEE 64.
Term Typically Offered: Fall, Spring, Summer

Topics include: microcomputer systems, microprocessor architecture,
machine and assembly language programming, timing operations, bus
arbitration and exception processing logic, addressing modes, parallel
and serial ports, memory, assemblers and development systems. The
lab uses development systems and target systems in the Computer
Engineering laboratory to assemble, link, test and debug and run various
assignments. Lecture three hours; laboratory three hours.

EEE 178. Introduction to Machine Vision. 3 Units
Prerequisite(s): EEE 180 or ME 172, or instructor approval.
Term Typically Offered: Spring only

Fundamental digital image processing and machine vision concepts and
their application to the fields of robotics and automation. Topics include:
digital image processing, image formation, two dimensional transforms,
boundary descriptors, motion, camera calibration, vision for robot control,
3-D vision, and hardware architectures to support vision.

EEE 180. Signals & Systems. 3 Units
Prerequisite(s): ENGR 17, MATH 45, EEE 117; EEE 117 may be taken
concurrently.
Term Typically Offered: Fall, Spring

Rigorous development of the fundamental relationships governing time-
domain and frequency-domain analysis of linear continuous-time and
discrete-time systems. Topics include Fourier, Laplace and z-transforms,
sampling theorem, modulation, system stability, and digital filters.

EEE 181. Introduction to Digital Signal Processing. 3 Units
Prerequisite(s): EEE 64, EEE 180
Term Typically Offered: Spring only

Focuses on the application of linear systems theory to design and
analysis of digital signal processing systems. Discrete systems, the
z transform, and discrete Fourier transform are reviewed. Design of
infinite impulse response filters, finite impulse response filters, and digital
spectral analysis systems is presented. Computer simulation is used to
study the performance of filters and spectral analysis systems. Signal
processing architectures are introduced.

EEE 182. Digital Signal Processing Lab. 1 Unit
Prerequisite(s): EEE 180, EEE 181; EEE 181 may be taken concurrently.
Term Typically Offered: Spring only

Provides senior level undergraduate students with experience in the
software/hardware design of discrete-time systems, and modern DSP
techniques. Laboratory projects will include the following: spectral
analysis of analog and digital signals, design of sampling and quantizer
circuits, design and realization of IIR and FIR Digital Filters. Hardware
projects will include acquisition, analysis, and filtering of speech,
biomedical and video signals using Digital Signal Processors (DSPs).

EEE 183. Digital and Wireless Communication System Design. 3 Units
Prerequisite(s): EEE 161, EEE 180; EEE 185 may be taken concurrently.
Term Typically Offered: Fall only

Provides senior level undergraduates with experience in the software/hardware design of digital signal processing systems. Discrete systems, the
z transform, and discrete Fourier transform are reviewed. Design of
infinite impulse response filters, finite impulse response filters, and digital
spectral analysis systems is presented. Computer simulation is used to
study the performance of filters and spectral analysis systems. Signal
processing architectures are introduced.
Dynamic system modeling by transfer function and state-space methods using differential equation, time-response and frequency-response methods. Determination of steady-state errors due to step, ramp and parabolic inputs and disturbances for closed-loop systems. Mapping of block diagrams and state-space representations to signal flow graphs (SFG) as well as finding the transfer function of the system represented by the SFG by Mason's Rule. Closed-loop system stability is examined via poles and eigenvalues and by using the Routh-Hurwitz criterion. Introduction to observability and controllability of systems. Design of compensators for feedback systems using root-locus, frequency response and state-space methods. Introduction to digital control. Computer simulation methods such as MATLAB and SIMULINK are used to support the above subjects.

EEE 185. Modern Communication Systems. 3 Units
Prerequisite(s): EEE 180, ENGR 120; ENGR 120 may be taken concurrently.
Term Typically Offered: Fall, Spring
Review of signal and system analysis, sampling theorem and Nyquist’s criteria for pulse shaping, signal distortion over a channel, study of digital and analog communication systems, line coding, signal to noise ratios, performance comparison of various communication systems.

EEE 186. Communication Systems Laboratory. 1 Unit
Prerequisite(s): EEE 117 (EEE 185 may be taken concurrently), and (GWAR Certification before Fall 09, or WPJ score of 70+, or at least a C- in ENGL 109M or ENGL 109W).
Term Typically Offered: Fall, Spring
Experimental study of modulation and demodulation in AM, FM, and digital communication systems, A/D and D/A conversion, measurement of power spectra, noise characterization in frequency domain.

EEE 187. Robotics. 4 Units
Prerequisite(s): EEE 180 or equivalent, or instructor permission.
Term Typically Offered: Fall only
Lecture introduces principles of robotics and design of robot systems. Includes robot architectures, sensing position/velocity, digital circuit noise, actuator and path control, robot coordinate systems, kinematics, differential motion, computer vision/architectures, and artificial intelligence. Laboratory will apply lecture theory in design experiments utilizing five degree-of-freedom robots, an industrial robot, and vision systems.

EEE 188. Digital Control System. 3 Units
Prerequisite(s): EEE 180, WPJ score of 70+, or at least a C- in ENGL 109M/W.
Term Typically Offered: Spring only

EEE 189. Controls Laboratory. 1 Unit
Prerequisite(s): EEE 184 (EEE 184 may be taken concurrently), and (WPJ score of 70+, or at least a C- in ENGL 109M or ENGL 109W).
Term Typically Offered: Spring only
Study, simulation and design of linear feedback control systems using digital control methods such as MATLAB and SIMULINK. Practical examples of analysis and compensation for closed loop systems.

EEE 190. Controls. 3 Units
Prerequisite(s): EEE 192A (EEE 192A may be taken concurrently), GE Area A and (WPJ score of 70+, or at least a C- in ENGL 109M or ENGL 109W).
General Education Area/Graduation Requirement: Upper Division Further Studies in Area B5
Term Typically Offered: Fall, Spring
Concentrates on design projects begun by the previous semester design teams in EEE 192A. The hardware will be completed, tested for the meeting of specifications and other requirements, and redesigned if necessary. Required software will be written, debugged and incorporated in a written report. The final results of the team project will be presented orally to the class and invited faculty in a publicized seminar. Lecture one hour; laboratory three hours.
EEE 194. Career Development in Electrical and Electronic Engineering. 1 Unit
Prerequisite(s): EEE 192A or EEE 193A, may be taken concurrently.
Term Typically Offered: Fall, Spring
Designed for Electrical and Electronic Engineering students making career decisions. Instruction will include effective career planning strategies and techniques including skill assessments, employment search strategy, goal setting, time management, interview techniques and resume writing. Lecture one hour.
Note: Units earned cannot be used to satisfy major requirements.
Credit/No Credit

EEE 195. Fieldwork in Electrical and Electronic Engineering. 1 - 3 Units
Term Typically Offered: Fall, Spring
Supervised work experience in Electrical and Electronic Engineering with public agencies or firms in the industry. Requires approval of a petition by the supervising faculty member and Department Chair.
Note: May be repeated for credit.
Credit/No Credit

EEE 195A. Professional Practice. 1 - 12 Units
Prerequisite(s): Instructor permission.
Term Typically Offered: Fall, Spring
Supervised employment in a professional engineering or computer science environment. Placement arranged through the College of Engineering and Computer Science. Requires satisfactory completion of the work assignment and a written report.
Note: Units earned cannot be used to satisfy major requirements.
Credit/No Credit

EEE 195B. Professional Practice. 1 - 12 Units
Prerequisite(s): Instructor permission.
Term Typically Offered: Fall, Spring
Supervised employment in a professional engineering or computer science environment. Placement arranged through the College of Engineering and Computer Science. Requires satisfactory completion of the work assignment and a written report.
Note: Units earned cannot be used to satisfy major requirements.
Credit/No Credit

EEE 195C. Professional Practice. 1 - 12 Units
Prerequisite(s): Instructor permission.
Term Typically Offered: Fall, Spring
Supervised employment in a professional engineering or computer science environment. Placement arranged through the College of Engineering and Computer Science. Requires satisfactory completion of the work assignment and a written report.
Note: Units earned cannot be used to satisfy major requirements.
Credit/No Credit

EEE 195D. Professional Practice. 1 - 12 Units
Prerequisite(s): Instructor permission.
Term Typically Offered: Fall, Spring
Supervised employment in a professional engineering or computer science environment. Placement arranged through the College of Engineering and Computer Science. Requires satisfactory completion of the work assignment and a written report.
Note: Units earned cannot be used to satisfy major requirements.
Credit/No Credit

EEE 196A. PCB Design Fundamentals. 1 Unit
Prerequisite(s): EEE 102, CPE 102 or EEE 108.
Term Typically Offered: Fall, Spring
Printed circuit board (PCB) design fundamentals including library component creation, schematic capture, layout, routing, signal integrity and transmission line analysis, IEEE/IPC rules and standards, materials, manufacturing processes, and other physical properties of a PCB.

EEE 199. Special Problems. 1 - 3 Units
Prerequisite(s): Instructor permission.
Term Typically Offered: Fall, Spring
Individual projects or directed reading.
Note: Open only to students who appear qualified for independent work. Approval of the faculty sponsor and the academic advisor must be obtained before registering. May be repeated for credit.

EEE 201. Research Methodology. 2 Units
Prerequisite(s): Graduate standing or instructor permission
General Education Area/Graduation Requirement: Writing Intensive Graduation Requirement (WI)
Term Typically Offered: Fall, Spring
Immersion in the discourse of Electrical and Electronic Engineering: genres, literacies, stylistic conventions, research methodology. Collective and individual study of selected issues and problems relating to fields of study in Electrical and Electronic Engineering. Orientation to the requirements for the master’s degree culminating experience.
Note: Must be taken in the first semester of the graduate program.
Credit/No Credit

EEE 211. Microwave Engineering. 3 Units
Prerequisite(s): EEE 161; EEE 108 or instructor permission.
Term Typically Offered: Fall, Spring
High-frequency passive electronic circuit design, specifically S-parameters, impedance matching, microstrip lines, filters, couplers and antennas.

EEE 212. Modern Antenna Design. 3 Units
Prerequisite(s): EEE 161.
Term Typically Offered: Fall, Spring
EEE 213. Microwave Devices and Circuits.  3 Units
Prerequisite(s): EEE 162.
Term Typically Offered: Fall, Spring

Theory and application of electromagnetic radiation at microwave frequencies; study of microwave impedance and power measurement and characteristics of microwave circuit components, and electronic devices.

EEE 214. Computer Aided Design for Microwave Circuits.  3 Units
Prerequisite(s): EEE 211 or instructor permission.
Term Typically Offered: Fall, Spring

Introduction to design methodology of the basic building blocks of communication systems. Use of solid state devices in communications and microwave technology. Implementation of transmitter and receiver architectures. Impedance matching, S-parameters and small-signal, large-signal device operation. Design of transmitter and receiver components using a professional software tool. Design and simulations of gain and low noise amplifiers, detectors, mixers, power amplifiers and oscillators. Tradeoffs involved in the design of a complete transmitter and a receiver.

EEE 215. Lasers.  3 Units
Prerequisite(s): EEE 180 and EEE 161 or instructor permission.
Term Typically Offered: Fall, Spring

Review of electromagnetic theory. Ray tracing in an optical system, Gaussian beam propagation. Resonant optical cavities, study of excitation and lasing mechanisms in gas and semiconductor lasers. General characteristics and design of CW, Q switched and traveling wave lasers.

EEE 221. Machine Vision.  3 Units
Term Typically Offered: Spring only

Introduces the student to fundamental digital imaging processing concepts and their application to the fields of robotics, automation, and signal processing. Topics include: digital image filters, two dimensional transforms, boundary descriptors, Hough transform, automated visual inspection techniques, vision for robot control, 3-D vision, and hardware architectures to support vision.

EEE 222. Electronic Neural Networks.  3 Units
Term Typically Offered: Spring only – even years

Current neural network architectures and electronic implementation of neural networks are presented. Basics of fuzzy logic is covered. Application software will be used to simulate training. Testing of various neural net architectures. Learning strategies such as back-propagation, Kohonen, Hopfield and Hamming algorithms will be explored. A final project requires the student to design, train and test a neural network for electronic implementation that solves a specific practical problem.

EEE 225. Advanced Robot Control.  3 Units
Prerequisite(s): EEE 184 or equivalent.
Term Typically Offered: Fall only

Introduction to robot kinematics and dynamics followed by a comprehensive treatment of robot control. Topics include: independent joint control, multivariable control, force control, feedback linearization, real-time parameter estimation, and model-reference adaptive control.

EEE 230. Analog and Mixed Signal Integrated Circuit Design.  3 Units
Prerequisite(s): EEE 109 or instructor permission.
Term Typically Offered: Fall, Spring

Covers core topics and circuits important for analog and mixed-signal integrated circuits. Topics include: device structures and models, single-stage and differential amplifiers, current mirrors and active loads, operational amplifier design, stability and compensation, fully-differential circuits and common-mode feedback, noise in integrated circuits and the impact of IC processes on analog performance.

EEE 231. Advanced Analog and Mixed Signal Integrated Circuit Design.  3 Units
Prerequisite(s): EEE 230 or consent of the instructor.
Term Typically Offered: Fall only

A companion course to EEE 230, covers additional topics important in analog and mixed-signal integrated circuit design. Topics include traditional issues such as device matching and analog layout techniques, as well as important building blocks such as bandgap references and bias circuits. Also included are current-mode techniques such as high-speed current-mode logic (CML), and an introduction to noise in integrated circuits. Circuit and layout projects are assigned using CAD software.

EEE 232. Key Mixed-Signal Integrated Circuit Building Blocks.  3 Units
Prerequisite(s): EEE 230 or consent of instructor.
Term Typically Offered: Spring only

Covers key mixed-signal integrated circuit building blocks most often used in modern ICs. Topics covered include data converter fundamentals, comparators, and important circuit architectures for Analog-to-Digital Converters (ADCs), Digital-to-Analog Converters (DACs), and Phase-Locked Loops (PLLs).

EEE 234. Digital Integrated Circuit Design.  3 Units
Prerequisite(s): EEE 230 or instructor permission.
Term Typically Offered: Fall, Spring

The background and techniques needed to design and layout digital circuits at the transistor level for mixed-signal integrated circuits are covered. Topics include the design, layout and characterization of digital logic gates at the transistor level, typical CMOS process flows, device models and physics, and chip level considerations.

EEE 235. Mixed-Signal IC Design Laboratory.  1 Unit
Prerequisite(s): EEE 230 or consent of the instructor.
Term Typically Offered: Fall only

Methods to develop successful mixed-signal integrated circuits using an industrial design methodology and computer-aided design tools. Proven design techniques presented; hands-on experience gained through each student designing their own integrated circuit. Communications skills developed through periodic presentations, including reviews for the circuit architecture, design and layout.

EEE 236. Advanced Semiconductor Devices.  3 Units
Term Typically Offered: Spring only

Semiconductor device modeling, including the application of the continuity equation and Poissons equation to abrupt and graded p/n junctions, semiconductor/metal contacts, junction field effect transistors (JFET), metal-oxide-semiconductor transistors (MOSFET), and bipolar junction transistors (BJT). Special topics include compound semiconductor devices and heterostructures.
EEE 238. Advanced VLSI Design-For-Test I.  
**Prerequisite(s):** CPE 151 and CPE 166.  
**Term Typically Offered:** Fall only  
Focus on integrated circuit design-for-test-techniques; semiconductor reliability factors and screening; semiconductor fabrication processes, device physics and related performance limitations; quantifying cost/quality tradeoffs; IC manufacturing flows and high-accuracy parametric test methods.

EEE 239. Advanced VLSI Design-For-Test II.  
**Prerequisite(s):** EEE 238.  
**Term Typically Offered:** Fall, Spring  
Advanced topics in VLSI testing and Design-For-Test applications. Memory-specific test methodology and special features of memory designs employed in high volume manufacturing for improved testability, yield, and reliability. VLSI failure modes, their detection and prevention. Application of trim, redundancy, wear leveling, and error correction.

EEE 241. Linear Systems Analysis.  
**Prerequisite(s):** EEE 180 or equivalent.  
**Term Typically Offered:** Spring only – odd years  
Analyzes linear systems in the state-space. System realization and modeling, solutions of linear systems, stability including the method of Lyapunov, controllability and observability, state feedback and observers for both continuous and discrete-time systems. Familiarity with MATLAB is required.

**Prerequisite(s):** ENGR 120, EEE 180  
**Term Typically Offered:** Fall, Spring  
Introduces the student to modern statistical approaches for solving electronic system noise problems. A few of the topics covered are: Stochastic processes, Wiener and Kalman filters, linear prediction, lattice predictors and singular-value decomposition.  
**Note:** The knowledge of ENGR 120 and EEE 180 or equivalent courses is recommended to take this course.

**Prerequisite(s):** ENGR 120.  
**Term Typically Offered:** Fall, Spring  
Introduction to sequence of random variables and multivariable distributions; models of stochastic processes; stationary stochastic processes and their applications; Markov processes, Markov chains, continuous Markov chains; renewal processes; birth-death processes; time-series applications in stochastic processes in filtering, reliability and forecasting, prediction and control.

EEE 244. Electrical Engineering Computational Methods and Applications.  
**Prerequisite(s):** EEE 180.  
**Term Typically Offered:** Fall, Spring  
Computational methods for solving problems in engineering analysis. Topics include variational methods, finite-difference analysis, optimization methods, and matrix methods. Focuses predominantly on applications of the methods, and students are required to solve real-world, engineering problems on the computer.

**Prerequisite(s):** ENGR 60, ENGR 120, EEE 181; or instructor permission  
**Term Typically Offered:** Fall only  
Advanced signal processing topics include: multirate signal processing, adaptive filter design and analysis, spatial filtering and the application of FIR filter theory to beamforming. Applications of digital signal processing in communication systems, radar systems, and imaging systems are covered.

EEE 246. Advanced Digital Control.  
**Prerequisite(s):** EEE 241.  
**Term Typically Offered:** Spring only – even years  

EEE 249. Advanced Topics in Control and Systems.  
**Prerequisite(s):** EEE 142 or equivalent.  
**Term Typically Offered:** Spring only – even years  
Topics from recent advances in control, systems and robotics control selected from IEEE Journals and related professional publications. May be taken twice for credit.

**Prerequisite(s):** EEE 142 or equivalent.  
**Term Typically Offered:** Spring only  
Characteristics of modern power transmission systems, Transmission line parameters, Steady-state, Dynamic and Transient behavior of AC/DC transmission systems, Flexible AC Transmission Systems (FACTS), High-Voltage Direct Current (HVDC) systems, Analysis of faulted transmission systems and AC/DC hybrid grids.

**Prerequisite(s):** EEE 141 or equivalent.  
**Term Typically Offered:** Fall only  
Study of a number of engineering and economic matters involved in planning, operating, and controlling power generation and transmission systems in electric utilities. Effects of hydro and nuclear plants on system economics. Economic and environmental constraints. Theoretical developments and computer methods in determining economic operation of interconnected power systems with emphasis on digital computers.

**Prerequisite(s):** EEE 142 or equivalent.  
**Term Typically Offered:** Spring only  
Power system economics, generation, transmission and distribution reliability. Production costing and generation planning, transmission planning.

**Prerequisite(s):** EEE graduate standing.  
**Term Typically Offered:** Fall only  
The fundamental concepts of control and stability in power systems. Topics include: power systems dynamics and linearized models, small and large disturbances, voltage and frequency stability. Introduction to power systems dynamic simulation for stability studies using CAD tools.
EEE 254. Large Interconnected Power Systems. 3 Units
Prerequisite(s): EEE 142.
Term Typically Offered: Spring only

Computer control, optimization and organization of large power systems. Loan and frequency control, voltage control, large load flow and contingency studies. Introduction to state estimation and load forecasting.

EEE 255. Future Power Systems and Smart Grids. 3 Units
Prerequisite(s): EEE 141, EEE 146, EEE 180, and EEE 250 or instructor permission.
Term Typically Offered: Spring only

Future power systems from component and system perspectives. Smart grids, micro-grids, and interactive power systems using renewable resources and energy storage elements. National standards for certification of distributed generation involving machine-based and inverter-based technologies. Essential elements of advanced sensing, communications and information technology and their roles in adaptive automation, control, protection, and security.

EEE 256. Advanced Power Systems Protection. 3 Units
Prerequisite(s): EEE 141; EEE 145 or instructor permission.
Term Typically Offered: Fall, Spring

Advanced concepts and schemes used in power system protection including the various protective schemes used for transmission lines, transformers, machines, and other elements of a large interconnected power system. Concepts in digital and microprocessor based relay design and analysis of typical protection subsystems, in conjunction with the protection of the power system as a whole.

EEE 257. Wind Energy Electrical Conversion Systems. 3 Units
Prerequisite(s): Fully classified graduate standing in EEE or instructor permission.
Term Typically Offered: Fall only

Fundamentals of current technologies and methods in wind energy conversion systems, including turbines, generators and converters as well as control and integration of these devices in power grids. Topics include: power conversion, grid converters for wind systems, system integration, methods for power, voltage and frequency control, and wind farms simulation and aggregation methods.

EEE 259. Advanced Topics in Power Systems. 3 Units
Prerequisite(s): EEE 142.
Term Typically Offered: Spring only

Topics from recent advances in Electrical Power Engineering selected from IEEE Journal on "Power Systems" and "Power Systems Delivery." May be taken twice for credit.

EEE 260. Digital Communications. 3 Units
Prerequisite(s): EEE 185, or instructor permission.
Term Typically Offered: Fall only

This course introduces the fundamental principles and design of digital communication systems. Main topics to be covered include representation of digitally modulated signals, signal spectral characteristics, optimum demodulation and detection methods in AWGN channels, and evaluation of the error-rate performance in AWGN channels.

EEE 261. Information Theory, Coding, and Detection. 3 Units
Prerequisite(s): ENGR 120 and EEE 185; or instructor permission.
Term Typically Offered: Spring only

EEE 262. Wireless Communications Systems. 3 Units
Prerequisite(s): EEE 185 or instructor permission.
Term Typically Offered: Fall only

Wireless communication techniques, systems and standards. Topics include cellular systems, RF transmission and analog/digital modulation techniques. Modern techniques such as multiple access and spread spectrum systems. Channel coding and diversity will also be included.

EEE 264. Advanced Topics in Wireless Communications. 3 Units
Prerequisite(s): EEE 262 or instructor permission.
Term Typically Offered: Fall only

Advanced theoretical and practical aspects of modern wireless communications. Specific topics include: advanced cellular concepts, modern small-scale and large-scale propagation models, complex equalization and diversity system design, 3G (third generation) wireless networks, Bluetooth and Personal Area Networks (PANs), GPRS (General Packet Radio Service) and wireless measurement techniques.

EEE 265. Optoelectronic Engineering. 4 Units
Prerequisite(s): Graduate standing or instructor permission.
Term Typically Offered: Fall, Spring

Generation, propagation and detection of light. Fresnel equations, Snell's law, diffraction, polarization, and interference. Operating principles of LEDs, lasers, photodiodes, optical fibers, photovoltaic devices. Introduction to optical communications systems and optical instrumentation.

Note: EEE 265 and EEE 165 may not be both taken for graduate credit.

EEE 266. Modern Digital Communication Systems. 3 Units
Prerequisite(s): EEE 260 or instructor permission.
Term Typically Offered: Spring only

This course introduces the fundamentals of digital communications over band-limited channels. Topics covered include inter-symbol interference, performance analysis of digital transmission schemes over fading channels, and diversity techniques. Other topics include overview of MIMO communication systems and diversity multiplexing trade-offs in multi-antenna systems.

EEE 267. Fiber Optic Communications. 3 Units
Prerequisite(s): EEE 185 or instructor permission.
Term Typically Offered: Fall, Spring

EEE 268. Telecommunication Networks. 3 Units
Prerequisite(s): EEE 185 or instructor permission.
Term Typically Offered: Spring only

This course discusses the architecture of current and next generation telecommunication networks. Main topics to be covered include introduction to modern telecommunication networks, multi-access channels, media access control, resource allocation, performance analysis of transmission techniques, and ad-hoc wireless networks. Emphasis will be on the datalink and physical layers of the communication network.

EEE 270. Advanced Topics in Logic Design. 4 Units
Prerequisite(s): EEE 274; only one may be counted for credit.

Synchronous and asynchronous state machines. Timing issues in high-speed digital design. Design of a complex system using VHDL and Verilog Hardware Description Languages in a CAD environment. Automation toolsets to synthesize projects containing a hierarchy of modules into Field Programmable Gate Arrays (FPGAs). Simulations using CAD tools to verify the design before implementation on rapid prototyping boards in the lab. Lecture 3 hours; laboratory 3 hours.

EEE 272. High Speed Digital System Design. 3 Units
Prerequisite(s): EEE 161, fully classified graduate standing and instructor permission.
Term Typically Offered: Fall, Spring

Theoretical topics and practical applications relating to high speed digital systems. Review of basic transmission line theory, crosstalk, impact of PCB traces, vias, and connectors on signal integrity, return current paths, simultaneous switching noise, high frequency power delivery, high speed timing budgets, high speed bus design methodologies, radiated emissions, and system noise.

EEE 273. Hierarchical Digital Design Methodology. 3 Units
Prerequisite(s): EEE 64 or equivalent.
Term Typically Offered: Spring only

Hierarchical digital design course that includes: State machine design, Programmable Logic Devices, digital simulation techniques, digital interface, design with ASIC (Application Specific Integrated Circuits), programmable Gate Arrays, and designing with Gas high speed logic devices. Problems with EMI, RFI and EMC will be presented along with design guidelines. Lecture three hours. Cross listed: CSC 273; only one may be counted for credit.

EEE 274. Advanced Timing Analysis. 3 Units
Prerequisite(s): EEE 273, CSC 273, CPE 273 or instructor permission.
Term Typically Offered: Fall, Spring

Timing analysis of Application Specific Integrated Circuit (ASIC) designs: Topics include ASIC design methodology, static timing analysis, timing design constraints, design reports, clock timing issues, timing exceptions, operating conditions, hierarchical analysis, analyzing designs with asynchronous logic, performance measurement and power issues. Cross-listed: CPE 274; only one may be counted for credit.

EEE 280. Advanced Computer Architecture. 3 Units
Prerequisite(s): CSC 205 or instructor permission.
Term Typically Offered: Fall, Spring

Introduces computer classification schemes, structures of uni- and multiprocessor systems, parallelism in uniprocessor systems, design and performance analysis of pipelined and array processors; survey and analysis of interconnection networks and parallel memory organizations; programming issues of multiprocessor systems; and fault tolerant computing and design for testability. Cross Listed: CSC 280; only one may be counted for credit.

EEE 285. Micro-Computer System Design I. 3 Units
Prerequisite(s): EEE 174 or CPE 185.
Term Typically Offered: Fall, Spring

Focuses on: design of the microprocessor based computer system, study of bus structures, interrupt schemes, memory interfacing, timing, bus arbitration, system architecture, data communications, introduction to multiprocessor systems, and software development.

EEE 286. Microcomputer System Design II. 3 Units
Prerequisite(s): EEE 285 or CPE 186.
Term Typically Offered: Fall, Spring

Includes PCI and PCI express bus specifications/architecture, PCI bridges transaction ordering, PCI express transactions and handshake protocols, electromagnetic interference, methods of eliminating interference, shielding grounding, balancing, filtering, isolation, separation, orientation, cancellation techniques and cable design. Involves design projects and research presentations on PCI and PCI Express Bridge.

EEE 296C. Transients in Power Systems. 3 Units
Prerequisite(s): EEE 130 and EEE 141
Term Typically Offered: Fall, Spring

Transients in electric power systems due to shunt capacitor switching, voltage flicker and nonlinear loads such as electric arc furnaces. Lightning surges and their effect on the power system health and operation. Transformer inrush currents and motor starting. The knowledge of EEE 130 and EEE 141 or equivalent courses is required for taking this course.

EEE 296T. Digital Speech Processing. 3 Units
Prerequisite(s): EEE 181 or instructor permission.
Term Typically Offered: Fall, Spring

The objective of this course is to cover the digital processing of speech signals. Topics include speech production and perception, speech processing in the time frequency domains. Short-time energy and Short-time Fourier analysis, homomorphic and linear predictive coding methods. Also covered are speech coding, basic introduction of text-to-speech synthesis and speech recognition.

EEE 299. Special Problems. 1 - 3 Units
Prerequisite(s): Instructor permission.
Term Typically Offered: Fall, Spring

Open to qualified students who wish to pursue problems of their own choice. Projects must have approval and supervision of a faculty advisor.
Program Requirements

BS in Electrical and Electronic Engineering

Units required for Major: 92
Total units required for BS: 122

Program Description

The field of Electrical and Electronic Engineering continues to expand in scope, driven by advances in technology and new challenges faced by society. To prepare our graduates for careers in this demanding field, we equip them with a strong background in the fundamental principles of the discipline, and subsequent advanced courses in specific areas. Our curriculum provides practical, hands-on experience through laboratory courses.

The Electrical and Electronic Engineering program provides breadth (core courses), depth (elective sequence), and a culminating design project to apply the knowledge gained through the curriculum. The curriculum allows flexibility by offering a number of elective courses providing our graduates with depth in their respective areas of interest. The electives offered provide depth in one or more of the following areas: Analog/Digital Electronics, Control Systems, Communication Engineering, and Power Engineering. Students select a senior project either in power engineering or in the general area of electronics. Each of these options includes a sequence of two courses for the completion of the project, and has its own pre-requisite requirements.

Note: Students graduating with a BS in Electrical and Electronic Engineering will not be subject to the University’s Foreign Language Graduation Requirement. Students who change major may be subject to the University’s Foreign Language Graduation Requirement.

Minimum Grade Requirement

A grade of "C+" or better is required in all courses applied to an Electrical and Electronic Engineering major.

**ADDITIONAL ELECTIVE REQUIREMENTS FOR BOTH POWER/PRODUCT DESIGN PROJECT SERIES**

Select 6 units of lecture and 1 unit of laboratory from one of the four areas listed below.

Select 6 additional units from any of the four areas listed below.

TOTAL UNITS: 92

---

1. Course also satisfies General Education (GE)/Graduation Requirement. The designation "General Education course" denotes a course which meets GE requirements other than those which also serve as prerequisites to courses in the major. Students are expected to satisfy the University’s GE requirements. Consult the Department Chair for specific GE requirements. Students should take ENGL 5 as early as possible since it is required for admission to the upper division.

2. CPE 64W, EEE 64W or ENGR 17W may be available to augment understanding of material; however, these courses cannot be used to satisfy graduation requirements.
It is imperative that students take the University’s Writing Placement for Juniors (WPJ) during the first semester of the junior year, as it is a prerequisite to some laboratory courses after EEE 117L.

**Depth Requirement Areas and List of Electives**

**Depth Area Requirement for both Power Design and Product Design Series:**

- Select 6 units of lecture and 1 unit of laboratory from one of the four areas below.
- Select 6 additional units from any of the four areas listed below.

**Total Units** 30

1. To help you complete your degree in a timely manner and not take more units than absolutely necessary, there are ways to use single courses to meet more than one requirement (overlap). For further information, please visit the General Education page (p. 1103).

**Note:** There is no way to list all possible overlaps so please consult with a professional advisor. The Academic Advising Center can be visited online (http://www.csus.edu/acad/), by phone (916) 278-1000, or email (advising@csus.edu).
Certificate in Electric Power Systems and Engineering

Program Description
The certificate in Electric Power Systems and Engineering will recognize the commitment and accomplishments of students studying in this area, and provide potential employers with evidence of the skills students have developed. Students studying in this area will become knowledgeable and proficient in the different skills this demanding field requires. This requires studying multiple subjects such as power system analysis, electric power distribution, relay protection, and smart grids. In addition, students will learn the methods and tools used to analyze and design power systems.

Admission Requirements
Must be enrolled as an Electrical and Electronic Engineering major

Certificate in Mixed-Signal Integrated Circuit Design

Units required for Certificate: 16

Program Description
The certificate in mixed-signal integrated circuit design will recognize the commitment and accomplishments of graduate students studying in this area, and provide potential employers with evidence of the skills students have developed. Graduate students studying mixed-signal integrated circuit (IC) design will become knowledgeable and proficient in the different skills this demanding field requires. This requires studying multiple subjects such as amplifier design, device physics and matching, analog layout techniques, and key mixed-signal building blocks. In addition, students will learn the methods and tools used to design and layout ICs.

MS in Electrical and Electronic Engineering

Total units required for MS: 30

Program Description
The Master of Science degree program in Electrical and Electronic Engineering is designed to provide students with advanced study in a variety of Electrical and Electronic Engineering topics, and opportunities to conduct independent research to broaden their professional scope.

The scheduling of courses and the Culminating Experience options in the program are designed to provide flexibility for working professionals. All students complete a one-unit research methodology course, three-unit computational methods course, and at least two of the designated elective area core courses. This requirement is designed to provide a strong academic foundation. In consultation with the Graduate Coordinator and faculty advisors, students then focus their studies in one...
or more of the following areas, adapting to the needs and interests of the practicing engineer or post-graduate candidate:

- Control Systems
- Communication Systems
- Power Systems
- Microelectronic Design
- Computer Architecture & Digital Design

Coordinated courses are offered in advanced microprocessors, electromagnetic theory and microwaves, lasers and fiber optics, semiconductor devices, robotics and intelligent machines, systems and control, networks, and communication systems. Other coordinated courses facilitate the study of estimation and stochastic control, advanced communications and signal processing, large interconnected power systems, power systems reliability, and planning, advanced design and organization of digital computer systems, and advanced integrated circuit design. The program is also sufficiently flexible to allow special independent studies of problems of current interest.

The Department has a strong relationship with the local engineering community. Students of the program have access to Department laboratories and facilities and to University computer services.

**Admission Requirements**

Admission as a classified graduate student in Electrical and Electronic Engineering requires:

- a BS in Electrical and Electronic Engineering or equivalent;
- at least a 3.0 GPA in the BS in Electrical Engineering or equivalent; or
- at least a 3.25 GPA in the last 60 units of the BS in Electrical and Electronic Engineering or equivalent.

Under special circumstances, a student who does not satisfy the Admission Requirements may be admitted as a conditionally classified graduate student. Deficiencies will be specified in the acceptance letter to the student and must be removed by the student before the student can become a classified graduate student.

A student registered as an unclassified graduate student should carefully note that graduate courses taken as an unclassified graduate or as an open university student cannot be used to improve the student’s grade point average for admittance to the Electrical and Electronic Engineering graduate program. Only undergraduate Electrical and Electronic Engineering courses can be taken or retaken to improve the GPA of the student for admittance to the graduate program.

**Admission Procedures**

Applications are accepted as long as room for new students exists. However, students are strongly urged to apply by April 1 for the following fall or October 1 for the following spring. All prospective graduate students, including Sacramento State graduates, must file the following with the Office of Graduate Studies, River Front Center 215, (916) 278-6470:

- an online application for admission; and
- one set of official transcripts from all colleges and universities attended, other than Sacramento State.

At the same time, students not meeting the above admission requirements should submit to the Electrical and Electronic Engineering Graduate Coordinator two letters of recommendation, Graduate Record Examination scores, and/or other evidence of their potential for successful graduate study in this program.

Approximately six weeks after receipt of all items listed above, a decision regarding admission will be mailed to the applicant.

**Minimum Units and Grade Requirement for the Degree**

Units Required for the MS: 30

Minimum Cumulative GPA: 3.0. No more than three (3) courses in the program of study may have a grade below “B” and no course may have a grade below “C+.”

**Advancement to Candidacy**

By the end of the first semester, after admission to the program, each student in the EEE Department is required to have a program of study approved by an elective area core faculty advisor and the Graduate Coordinator. Students will fill out a form (contract) outlining what courses they plan to take to complete the MS degree. This contract will be signed by the student and the faculty advisor, and filed in the EEE Department Office.

In addition, each student must file an application for Advancement to Candidacy with the Office of Graduate Studies indicating a proposed program of graduate study for the completion of the MS EEE. This procedure should begin as soon as the classified graduate student has:

- removed any deficiencies in Admission Requirements;
- completed a minimum of 12 units in the graduate program with a minimum 3.0 GPA; at least nine units of the 12 units must be EEE 200 level courses; and
- taken the Writing Placement for Graduate Students (WPG) or taken a Graduate Writing Intensive (GWI) course in their discipline within the first two semesters of coursework at California State University, Sacramento or secured approval for a WPG waiver.

Each student must be advanced to candidacy prior to registering for EEE 500.

Advancement to Candidacy forms are available in the Office of Graduate Studies and in the Electrical and Electronic Engineering Department Office.

<thead>
<tr>
<th>Culminating Requirement (0-5 Units)</th>
</tr>
</thead>
</table>
| EEE 500 Culminating Experience      | 0 - 5  
| Plan A Thesis (5 units)             |  
| Plan B Project (2 units)            |  
| Plan C Comprehensive Exam (0 units) |  

**Total Units**: 30

1. Only one of these two courses will be counted as a core requirement. The other may be taken as an elective.

2. Select at least 14 units if completing a 5 unit Plan A thesis, or select at least 17 units if completing a 2 unit Plan B project, and select at least 19 units if completing a Plan C exam. This selection must be made in consultation with the elective area faculty advisor and the Graduate Coordinator, and may include approved courses from other areas. A maximum of 7 units of undergraduate technical electives in electrical and electronic engineering or computer engineering may be applied to this requirement if approved by the Graduate Coordinator and if they have not been used to satisfy the BS program requirements or MS EEE admission requirements.

**Notes:**

- The student cannot register for the Culminating Experience until the student passes the Writing Placement for Graduate Students (WPG), and advances to candidacy. In subsequent semesters, students will enroll in Continuous Enrollment through the College of Continuing Education after qualifications for enrollment are verified.

- Before registering for EEE 500, students choosing Plan A, Master Thesis (5 units), or Plan B, Master Project (2 units), must submit an approved Topic Form to the Graduate Coordinator.

- Students opting for Plan C, Comprehensive Exam, must have that option approved by their elective area advisor. They will not receive degree credit for EEE 500. They must complete a total of 30 units of approved coursework, including core, elective core, and elective courses. They must advance to candidacy for the degree, and take a written comprehensive exam that will cover all of the material in their MS Program of Study. After a student’s first failed attempt at the Plan C examination, the student shall receive advising from the graduate coordinator designed to prepare the student for a second attempt at the examination. Such advising may include a recommendation for the student to take additional course(s) to improve preparation for the next attempt. According to the Office of Graduate Studies policy, students are allowed no more than two attempts at the examination: however, if the EEE Department determines that there are extreme extenuating circumstances, the student may be recommended to the Office of Graduate Studies for a third attempt at the examination. Students are advised that a change from the exam option to project or thesis option is **not allowed** after the first attempt at the exam. Additionally, after two unsuccessful attempts at the exam, the student is subject to discontinuation from the graduate program.

**Note:** It should be recognized that industry puts a high value on project and thesis problem-solving experience, and the demonstration of technical writing skill that these options require. Graduating under Plan C option will not provide that experience. Students taking this option should consider, with their elective area advisors, other ways of gaining that valuable experience, such as through an EEE 299 Special Problems course.
• As soon as possible after the student has registered for EEE 500, it is expected that the student will select a committee appropriate to the chosen plan of study. The Thesis Committee is to consist of the student’s Thesis Advisor, who is the Chairperson of the student’s Thesis Committee, and two other faculty members. The Project Committee is to consist of the student’s Project Advisor, who is the Chairperson of the student’s Project Committee, and one other faculty member. The committee members selected by the student must be approved by the Electrical and Electronic Engineering Department’s Graduate Coordinator.

• The Thesis (Plan A) must be orally presented and defended, approved by the student’s Thesis Committee, and approved by the Electrical and Electronic Engineering Graduate Coordinator prior to submittal of the Thesis to the Office of Graduate Studies.

• The Project (Plan B) is to culminate in a report and a device or simulation, which is to be demonstrated to the student’s Project Committee. The Project Report must be approved by the student’s Project Committee and approved by the Electrical and Electronic Engineering Graduate Coordinator prior to its submittal to the Office of Graduate Studies.

Engineering

College of Engineering and Computer Science

Engineering Minor Description

Non-majors in Engineering may elect to minor in this field. Minor requirements may be satisfied by completing 21 approved units, of which 12 must be upper division. Students who have not completed the lower division requirements in calculus, including differential equations, physics, chemistry, and a few engineering courses will find it difficult to complete this minor in the four-year program due to the prerequisite requirements of upper division engineering courses. Students wishing to minor in Engineering must have their minor program approved by the Associate Dean of the College of Engineering and Computer Science.

Degree Program

Minor in Engineering (p. 645)

ENGR 1. Introduction to Engineering. 1 Unit
Prerequisite(s): Engineering major status or instructor permission
General Education Area/Graduation Requirement: Understanding Personal Development (E)
Term Typically Offered: Fall, Spring

Engineering study skills, fundamentals of the engineering design process and problem solving, current engineering challenges. Distinctions and similarities of different engineering disciplines. The engineering profession, ethics, teamwork, communication skills. Course helps students make an informed choice of their engineering majors.
Credit/No Credit

ENGR 1A. Fundamentals of Engineering. 3 Units
Prerequisite(s): Algebra and trigonometry or instructor permission.
Term Typically Offered: Fall, Spring

Problem solving skills needed in all areas of engineering offered at Sacramento State. Exposure to the different areas of engineering, and understanding of the relationship between them. Students will work in teams and complete hands-on engineering laboratory experiments and projects. Development of effective communication skills by presenting periodic oral and written reports. Computers will be used throughout. Lecture two hours, laboratory three hours.
Note: Not for degree credit.
Credit/No Credit

ENGR 2. Robotics Explorations. 3 Units
Prerequisite(s): Algebra and Trigonometry.
Term Typically Offered: Fall, Spring

Introduction to robotics. History of robotics, recent advances in the field, common devices such as sensors and actuators. Use of modular robotic kits. Students will be assigned competition based projects.

ENGR 6. Engineering Graphics and CADD (Computer Aided Drafting and Design). 3 Units
General Education Area/Graduation Requirement: Understanding Personal Development (E)
Term Typically Offered: Fall, Spring,

In-depth graphical analysis and solution of typical three-dimensional space problems by applying the principles of orthogonal projection. Fundamentals of interactive computer aided design and drafting. Preparation of engineering drawings utilizing the CAD system. Lecture two hours; laboratory three hours.

ENGR 6W. Engineering Graphics and CADD Workshop. 1 Unit
Corequisite(s): ENGR 6.
Term Typically Offered: Fall, Spring,

Problem solving and discussion of topics in Engineering Graphics and CADD (Computer Aided Drafting and Design) to enhance students’ understanding of subject matter. Not for degree credit. Technical activity and laboratory, two hours.
Credit/No Credit
ENGR 7. 3-D CAD Solid Modeling. 3 Units
Prerequisite(s): ENGR 4 or ENGR 6.
Term Typically Offered: Fall, Spring

Applications of three-dimensional representation techniques as used in a typical CAD (computer aided drafting) software package (AutoCAD). Fundamentals employed in creating, modifying, analyzing and filing engineering drawings. This course will have a mechanical emphasis. Lecture two hours; laboratory three hours.

ENGR 17. Introductory Circuit Analysis. 3 Units
Prerequisite(s): PHYS 11C, MATH 45; either the math or physics may be taken concurrently, but not both.
Term Typically Offered: Fall, Spring, Summer

Writing of mesh and node equations. DC and transient circuit analysis by linear differential equation techniques. Application of laws and theorems of Kirchoff, Ohm, Thevenin, Norton and maximum power transfer. Sinusoidal analysis using phasors, average power.

ENGR 17P. Peer-Assisted Learning ENGR 17. 1 Unit
Corequisite(s): ENGR 17
Term Typically Offered: Fall, Spring

Students concurrently enrolled in ENGR 17P work through faculty-designed problems sets under the guidance of a trained student facilitator to improve their understanding of ENGR 17P content. Pedagogical strategies that encourage active, engaged learning are employed to facilitate student success. Discussion, 2 hours.

ENGR 17W. Circuits Workshop. 1 Unit
Corequisite(s): ENGR 17
Term Typically Offered: Fall, Spring, Summer

Elaborates on fundamentals and enhances students' understanding of circuits.
Note: Not for degree credit.

ENGR 30. Analytic Mechanics: Statics. 3 Units
Prerequisite(s): PHYS 11A and MATH 31
Term Typically Offered: Fall, Spring, Summer

ENGR 30P. Peer-Assisted Learning ENGR 30. 1 Unit
Corequisite(s): ENGR 30
Term Typically Offered: Fall, Spring

Students concurrently enrolled in ENGR 30 work through faculty-designed problems sets under the guidance of a trained student facilitator to improve their understanding of ENGR 30 content. Pedagogical strategies that encourage active, engaged learning are employed to facilitate student success. Discussion, 2 hours.

ENGR 45. Engineering Materials. 3 Units
Prerequisite(s): CHEM 1E and MATH 30. CHEM 1E may be taken concurrently.
Term Typically Offered: Fall, Spring, Summer

Basic principles of mechanical, electrical and chemical behavior of metals, polymers and ceramics in engineering applications; topics include bonding, crystalline structure and imperfections, phase diagrams, corrosion, and electrical properties. Laboratory experiments demonstrate actual behavior of materials; topics include metallography, mechanical properties of metals and heat treatment. Lecture two hours; laboratory three hours.

Note: Fee course.

ENGR 45P. Peer-Assisted Learning ENGR 45. 1 Unit
Corequisite(s): ENGR 45
Term Typically Offered: Fall, Spring

Students concurrently enrolled in ENGR 45 work through faculty-designed problems sets under the guidance of a trained student facilitator to improve their understanding of ENGR 45 content. Pedagogical strategies that encourage active, engaged learning are employed to facilitate student success. Discussion, 2 hours.

Credit/No Credit

ENGR 45W. Engineering Materials Workshop. 1 Unit
Term Typically Offered: Fall, Spring, Summer

Problem solving and discussion of topics in materials science to enhance students' understanding of subject matter. Activity two hours.

Note: Can not be used for the degree requirement.

Credit/No Credit

ENGR 50. Computational Methods and Applications. 3 Units
Prerequisite(s): Math 30 and PHYS 11A; Physics 11A may be taken concurrently.
Term Typically Offered: Fall, Spring

Computational methods for solving problems in analysis and design. Introduces lower division students to the use of computer technology for the computations required to solve real world problems in science and engineering. Includes introduction to numerical techniques, introduction to structured programming, and graphic visualization. Practical applications of analysis and design using tools such as MATLAB and C++. Emphasis is on developing confidence and skill in finding computational solutions to practical science and engineering problems. Portable computer recommended. Lecture three hours.

ENGR 50P. Peer-Assisted Learning ENGR 50. 1 Unit
Corequisite(s): ENGR 50
Term Typically Offered: Fall, Spring

Students concurrently enrolled in ENGR 50 work through faculty-designed problems sets under the guidance of a trained student facilitator to improve their understanding of ENGR 50 content. Pedagogical strategies that encourage active, engaged learning are employed to facilitate student success. Discussion, 2 hours.

Credit/No Credit
ENGR 60. MEP Orientation and Problem Solving.  2 Units
Term Typically Offered: Fall, Spring

Mandatory class for MEP freshman students on orientation to the University, its resources, facilities and faculty. Students will be encouraged to form a group atmosphere where they can freely interact with each other and value each other as resources. Students will be provided with instruction and materials on study skills, note taking, time management, preparing for tests and dealing with stress. Presentation by working engineers and field trips to engineering firms will be taken. Personal and professional development will also be part of the freshman orientations with leadership, public speaking and career planning being topics of discussion. Lecture one hour; activity two hours.

Note: Not for use as an engineering major technical elective and is not applicable to the baccalaureate degree.

Field trip(s) may be required.

ENGR 70. Engineering Mechanics.  3 Units
Prerequisite(s): PHYS 11A.
Term Typically Offered: Fall, Spring

ENGR 96A. Interdisciplinary Topics in Engineering.  1 Unit
Term Typically Offered: Fall, Spring

Course will enable students to make an informed choice of their engineering majors, engage on interdisciplinary discussions between engineering fields, and equip them with relevant study skills. An introduction to engineering and the fundamentals of problem solving. Distinctions between different disciplines within engineering as well as other similarities. The engineering profession and ethics. Study skills for an engineering education.

Credit/No Credit

ENGR 105. Sustainable Design and Construction.  3 Units
Prerequisite(s): Upper division standing or instructor permission.
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall, Spring

Strategies, analysis methods, and processes of environmentally conscious planning, design, construction, operation, deconstruction, and assessment of engineered facilities. Presents a systematic framework for problem solving, decision making, design, and construction using the principles of sustainability as guiding objectives. Tools, and techniques for gathering information, generating, analyzing, and evaluation alternatives, and developing implementation strategies are presented and demonstrated.

ENGR 106. Energy and Modern Life.  3 Units
General Education Area/Graduation Requirement: Further Studies in Area B (B5)
Term Typically Offered: Fall, Spring, Summer

Our modern life is intimately and increasingly intertwined with energy utilization. This course deals with where energy comes from, how it is converted to desirable forms, where it is consumed, and what the consequences of this consumption are. In each case, historical prospective, current status, and future projections will be discussed. The ultimate objective of this course is to help students to make informed decisions on energy-related issues in their personal life and as responsible citizens of the society.

ENGR 110. Analytic Mechanics - Dynamics.  3 Units
Prerequisite(s): Student must pass ENGR 30, MATH 45, and MATH 32 or MATH 35 or MATH 100 with a minimum grade of C- or better.
Term Typically Offered: Fall, Spring, Summer

Fundamental principles of kinematics and kinetics, study of motion and force analysis of particles and rigid bodies, application to idealized structures and physical systems, introduction to free and forced vibrations.

ENGR 110W. Analytic Mechanics-Dynamics Workshop.  1 Unit
Corequisite(s): ENGR 110.
Term Typically Offered: Fall, Spring, Summer

Problem solving and discussion of topics in dynamics to enhance students' understanding of subject matter. Activity two hours.

Note: Can not be used for degree requirement.

Credit/No Credit

ENGR 112. Mechanics Of Materials.  3 Units
Prerequisite(s): ENGR 30, ENGR 45; MATH 45; and either CE 4 or ENGR 6 (CE 4 or ENGR 6 may be taken concurrently).
Term Typically Offered: Fall, Spring, Summer

Stresses, strains and deformations in elastic behavior of axial force, torsion and bending members, and design applications. Statically indeterminate problems. Strain energy. Column stability.

ENGR 112P. Peer-Assisted Learning ENGR 112.  1 Unit
Corequisite(s): ENGR 112.
Term Typically Offered: Fall, Spring

Students concurrently enrolled in ENGR 112 work through faculty-designed problems sets under the guidance of a trained student facilitator to improve their understanding of ENGR 112 content. Pedagogical strategies that encourage active, engaged learning are employed to facilitate student success. Discussion, 2 hours.

Credit/No Credit

ENGR 115. Statistics For Engineers.  3 Units
Prerequisite(s): MATH 31, may be taken concurrently.
Term Typically Offered: Fall, Spring

Application of statistical methods to the analysis of engineering and physical systems. Data collection, characteristics of distributions, probability, uses of normal distribution, linear and nonlinear regression analysis, hypothesis testing, and decision-making under uncertainty.
ENGR 177W. Networks Workshop. 1 Unit
Corequisite(s): EEE 117.
Term Typically Offered: Fall, Spring

Elaborates on fundamentals and enhances students' understanding of networks.
Note: Not for degree credit.

Credit/No Credit

ENGR 120. Probability and Random Signals. 3 Units
Prerequisite(s): EEE 180; may be taken concurrently.
Term Typically Offered: Fall, Spring

Probability and random signals and their application in engineering systems. Topics include the random sample space model, concept of axiomatic probability, conditional probability, discrete and continuous random variables, probability density and distribution functions, functions and statistics of random variables, random vectors multivariate distributions, and correlation and covariance of random vectors. Applications include estimation, risk, signal detection, random signals and noise in linear systems, reliability, and estimation.

ENGR 124. Thermodynamics. 3 Units
Prerequisite(s): CHEM 1E, PHYS 11A, and MATH 32 or MATH 35 or MATH 100.
Term Typically Offered: Fall, Spring, Summer

Study of thermodynamic principles and their applications to engineering problems. Includes a study of the first and second laws, the properties of pure substances and ideal gas, gas/vapor mixtures, and an introduction to thermodynamic cycles.

ENGR 124W. Thermodynamics Workshop. 1 Unit
Corequisite(s): ENGR 124.
Term Typically Offered: Fall, Spring, Summer

Problem solving and discussion of topics in thermodynamics to enhance students' understanding of subject matter. Activity two hours.
Credit/No Credit

ENGR 132. Fluid Mechanics. 3 Units
Prerequisite(s): ENGR 110 (may be taken concurrently)
Term Typically Offered: Fall, Spring, Summer

Lectures and problems in the fundamental principles of incompressible and compressible fluid flow.

ENGR 140. Engineering Economics. 2 Units
Prerequisite(s): ENGR 17 or ENGR 30
Evaluation of economic consequences of engineering design proposals on projects. Emphasis on marginal or incremental economic analysis using Net Present Value, Annual Equivalence, Rate of Return and Benefit-Cost methods including multiple alternatives, taxes, uncertainty, inflation, organizational constraints and money market factors.

ENGR 150. Technical Communication. 3 Units
Prerequisite(s): Recommendation based on the results of the WPG or instructor permission
Term Typically Offered: Fall, Spring

Practical technical communication for engineers and computer scientists. Topics covered include practical technical writing, improving technical writing style, development of strategies to improve writing, oral presentations, running effective meetings, and the use of visual aids. The use of appropriate communication technology is emphasized throughout the course.

ENGR 181. Electronic Materials. 3 Units
Prerequisite(s): CHEM 1A, PHYS 11A, MATH 45.
Term Typically Offered: Fall, Spring

Basic principles of materials behavior pertaining to electronics applications. Topics include electrical conductivity, bonding, crystal structures, optical properties, magnetic properties, energy transfer, and the fundamentals of some simple electronic devices. Lecture 3 hours.

ENGR 193. Emerging Leaders in STEM. 1 Unit
Prerequisite(s): Sophomore standing (must have completed 30 units prior to registration).
Term Typically Offered: Fall, Spring

This course focuses on in-depth leadership training for professional STEM success. Students will explore aspects of effective leadership, uncover their own leadership capacity and skills, and enhance their leadership prowess by studying and applying recognized best practices. Topics include setting personal and professional goals, becoming a productive team member, how to step into a leadership role, how to motivate team members, and how to develop productive work-flow processes.
Cross listed: NSM 193.

ENGR 194. Career Development Seminar. 1 Unit
Term Typically Offered: Fall, Spring

This course is designed for all ECS majors making career decisions and developing a job search strategy. Instruction will include: effective career planning strategies and techniques including skill assessment, interests, values, job search organization and strategies, goal setting, and time management as well as professional image development including interview techniques, resume writing, employment related correspondence and portfolio construction. Guest speakers from industry will be featured.
Credit/No Credit

ENGR 196B. Energy and Modern Life. 3 Units
Term Typically Offered: Fall, Spring

Our "modern life" is intimately and increasingly intertwined with energy utilization. This course deals with where energy comes from, how it is converted to desirable forms, where it is consumed, and what the consequences of this consumption are. In each case, historical prospective, current status, and future projections will be discussed. The ultimate objective of this course is to help students to make informed decisions on energy-related issues in their personal life and as responsible citizens of the society.

ENGR 196G. Advancing Leaders in STEM. 1 Unit
Prerequisite(s): ENGR 193 or NSM 193.
Term Typically Offered: Fall, Spring

This course continues the in-depth leadership training for professional STEM success introduced in ENGR/NSM 193. Students will apply and evaluate various strategies for effective leadership. Students will increase their capacity to recognize various situations and best leadership practices for each. Topics include setting personal and professional goals, becoming a productive team member, stepping into a leadership role, motivating team members, and developing productive work-flow processes.
ENGR 197. Seminar in Peer-Assisted Learning. 2 Units
Prerequisite(s): Instructor Permission
Corequisite(s): Acceptance as PAL Facilitator
Term Typically Offered: Fall, Spring
Classroom training and support for students concurrently serving as ECS Peer-Assisted Learning (PAL) facilitators. Classroom training will focus on facilitating problem-solving within groups, communicating effectively, and mentoring peers from diverse backgrounds. Action research on learning theory as applied to a classroom setting with culminating research presentation.

ENGR 199. Special Problems. 1 - 3 Units
Term Typically Offered: Fall, Spring, Summer
Individual projects or directed study.
Credit/No Credit

ENGR 201. Engineering Analysis I. 3 Units
Prerequisite(s): MATH 45.
Term Typically Offered: Fall, Spring
Mathematical methods for the solution of advanced engineering problems. Vector analysis, tensors and matrix algebra, complex variable techniques. The applications of these methods to practical engineering problems are demonstrated.

ENGR 202. Engineering Analysis II. 3 Units
Prerequisite(s): MATH 45.
Term Typically Offered: Fall, Spring
Mathematical methods for the solution of advanced engineering problems. Solutions of ordinary and partial differential equations, Fourier series and Laplace transforms and operational calculus. The applications of these methods to practical engineering problems are demonstrated.

ENGR 203. Engineering Statistics. 3 Units
Prerequisite(s): ENGR 115 or equivalent.
Term Typically Offered: Fall, Spring
Applications of statistics to engineering problems. Collection and analysis of data, sampling methods, design of experiments, probability theory, decision theory, analysis of variance, regression analysis, and mathematical curve fitting.

ENGR 296. Experimental Methods for Fluids. 3 Units
Prerequisite(s): ENGR 132, and either MATH 32 or ENGR 202
Term Typically Offered: Spring only
Experimental methods for flow and transport phenomena are studied in the lecture and applied in the lab/field. Topics include planar laser induced fluorescence, acoustic velocimetry, and sediment transport.

ENGR 296A. Quality Management Systems for Engineers. 3 Units
Prerequisite(s): Graduate Standing
Term Typically Offered: Fall, Spring
Designed to equip students with understanding of basic terms and definitions related to quality, a brief history and basic quality concepts, understanding measurement systems and tools, understanding differences of quality control (QC), quality assurance (QA) and quality management (QM), getting familiar with the applications of different tools, systems and standards and how to select proper tools for different quality requirements. Understanding basic inspection, auditing, assessment and evaluation techniques.

### Minor in Engineering

Units required for Minor: 21, of which 12 must be upper division

#### Program Description

Non-majors in Engineering may elect to minor in this field. Students who have not completed the lower division requirements in calculus, including differential equations, physics, chemistry, and a few engineering courses will find it difficult to complete this minor in the four-year program due to the prerequisite requirements of upper division engineering courses.

Students wishing to minor in Engineering must have their minor program approved by the Associate Dean of the College of Engineering and Computer Science.

### Introductory Supplementary Authorization in Computer Science

The Introductory Supplementary Authorization in Computer Science allows holders of a Multiple Subject (Elementary) Teaching Credential to teach computer science content to students in grades 9 and below. In addition, the authorization may be added to the Single Subject Teaching Credential to teach computer science content that is normally found in grades 9 and below, to students in grades K-12.

To earn this Introductory Supplementary Authorization, students must complete 20 semester units or 10 upper division semester units of coursework which covers the following four areas: computational thinking, computing practice and programming, computers and communication devices, and impacts of computing. At least one course must cover each of the first three listed areas; impacts of computing may be part of other completed courses. The balance of the ten or twenty units may be in any course related to computer science.

Courses in computing and computers topics not offered by the Computer Science department do not automatically meet the requirements without submission of transcripts to the department pre-teaching advisor(s), to verify all the required content areas have been fulfilled. This listing of courses will assist future teachers who are interested in teaching computer science in K-12 settings. Please see a Computer Science department pre-teaching advisor (or inquire at the department office) for more information or for a transcript evaluation.

Please view the Example Course Completion Pathways for suggestions on efficient ways to complete the following criteria.

**Computational thinking:** involves solving problems and designing systems, using fundamental computing concepts such as decomposition, data representation, generalization/abstraction, and algorithms.
Recommended courses that meet this requirement include CSC 10, CSC 15, CSC 20, CSC 25, CSC 28, CSC 60, or CSC 130.

Computing practice and programming: includes expertise in at least one block-based, visual (drag-and-drop) programming language (e.g., Alice, Blockly, Kodu, Logo, Scratch, Snap!) or a modern, high-level programming language. Recommended courses that meet this requirement include CSC 15, CSC 20, CSC 25, CSC 60, or CSC 130.

Computer and communications devices: covers the major components and functions of digital devices and the computing systems they compose. Courses that meet this requirement include CSC 35.

Impacts of computing: includes the social, ethical, and legal issues and impacts of computing, as well as the contributions of computer science to current and future innovations in the arts, business, humanities, medicine, and science. Courses that meet this requirement include PHIL 103, EDSS 373 A&B, or EDMS 330 A&B (EDSS and EDMS are required teaching credential courses), as well as other approved courses with a subject matter focus on impacts of computing.

Example Course Completion Pathways:
Computational thinking: CSC 10 (3)
Computing practice and programming: CSC 15 (3), CSC 20 (3)
Computer and communications devices: CSC 35 (3)
Impacts of computing: PHIL 103 (3), EDMS 330A (1), EDMS 330B (1)
Any other 3-credit CSC course

Computational thinking: CSC 10 (3)
Computing practice and programming: CSC 15 (3), CSC 20 (3)
Computer and communications devices: CSC 35 (3)
Impacts of computing: PHIL 103 (3), EDSS 373A (1), EDSS 373B (1)
Any other 3-credit CSC course

Mechanical Engineering
College of Engineering and Computer Science

Program Description
Mechanical Engineering involves the design of all types of machines and equipment including vehicles used in ground, air, and space transportation; machines for the conversion of fuels into energy; food processing; consumer products; robots; biomedical devices; the machines used to manufacture all of the above; and the climate control of buildings. Mechanical engineers bring together the fields of design graphics, manufacturing, engineering materials, thermodynamics and heat transfer, and the principles of mathematics and science to find solutions to societal needs. They often work directly in the design and operation of food processing plants, power plants, manufacturing plants, refineries, and other industrial operations. A major goal of the curriculum is to provide the graduates with the analytical and practical skills needed to perform mechanical design in a variety of fields, preparing graduates to take advantage of the many employment opportunities.

The Mechanical Engineering Program includes courses on design, thermal sciences, manufacturing, properties, and selection of materials, and computer applications related to these topics. The curriculum maintains a balance among basic fundamentals, analytical methods, and design applications of current knowledge, preparing the graduates for both entry into the profession and a life-long career.

The employers of Mechanical Engineering graduates include aircraft and automobile companies, food processing companies, machinery and equipment companies, gas and electric utilities, architectural and engineering firms, and many agencies in federal, state, and local governments. Some graduates continue their education by completing advanced degrees in Engineering or Management.

Degree Programs
BS in Mechanical Engineering (p. 656)
Blended BS/MS in Mechanical Engineering Program (p. 656)
MS in Mechanical Engineering (p. 658)

Accreditation
In addition to California State University, Sacramento’s full accreditation by the Western Association of Schools and Colleges, the Bachelor of Science in Mechanical Engineering is also individually accredited by ABET, Inc.

Notice to Students RE: Professional Licensure and Certification
California State University programs for professions that require licensure or certification are intended to prepare the student for California licensure and certification requirements. Admission into programs for professions that require licensure and certification does not guarantee that students will obtain a license or certificate. Licensure and certification requirements are set by agencies that are not controlled by or affiliated with the California State University and licensure and certification requirements can change at any time.

The California State University has not determined whether its programs meet other states’ educational or professional requirements for licensure and certification. Students planning to pursue licensure or certification in other states are responsible for determining whether, if they complete a California State University program, they will meet their state’s requirements for licensure or certification. This disclosure is made pursuant to 34 CFR §668.43(a)(5)(v)(C).

Special Features
- The Mechanical Engineering program is ABET accredited by the Engineering Accreditation Commission (EAC/ABET), Engineering Accreditation Commission (EAC/ABET)
111 Market Place, Suite 1050
Baltimore, Maryland 21202
(410) 347-7700
In keeping with its accreditation, the Mechanical Engineering program has strong engineering design content. In particular, the program includes a four-semester sequence on modern design and manufacturing methods.
- Faculty members have backgrounds in Mechanical, Aeronautical, Manufacturing, and Materials Science. The faculty has a variety of research interests; the majority has industrial experience which contributes to the applied emphasis in the Mechanical Engineering
program. Most of the faculty have doctorates; some are registered Professional Engineers (PE).

- Lectures and lab are arranged so students can participate in meaningful discussions and a real exchange of ideas between students and faculty.
- Upper division students do cooperative work on team projects and often develop study groups for other courses.
- Courses taken in the freshman and sophomore years form a foundation for the upper division program; e.g., the dynamics and strength of materials studied in the junior year depend on the sophomore mechanics, calculus, and physics courses. Building on analytical and communications skills learned in the lower division, students take a four semester design-project sequence which includes the study of design methods, and the procedures for developing a design solution from concept through a fully-developed design and finally to production. The courses in mechanics, energy transformation, manufacturing, and materials support this sequence.
- Students can take elective courses in computer analysis, heating, ventilating and air-conditioning, manufacturing methods, and systems and materials engineering.

**Program Educational Objectives**

Mechanical Engineering Graduates will have:

- utilized a foundation in engineering and science to engage in successful careers in mechanical engineering or other fields to the benefit of society.
- become effective participants or leaders in innovation and multi-disciplinary collaboration to address global technical, social, and industrial issues.
- engaged in career and professional development through self-study, continuing education, or graduate studies in engineering or other professional fields.

**Academic Policies and Procedures**

**Course Repeat Policy** - Undergraduate engineering and mechanical engineering courses that are used to meet the Bachelor of Science in Mechanical Engineering degree requirements may be repeated only twice (for a total of three attempts). Grades of the second and third attempts will be averaged in grade point calculations.

**Incomplete Grades** - Incomplete grades are issued only in accordance with University policy. The student must be passing the course at the time an “Incomplete” is requested. An Incomplete Petition must be submitted to the Department with the student’s and the course instructor’s signature. The Incomplete Petition (obtained in the Department Office) must specify the work to be completed, the basis by which the student’s final grade will be determined, and the last date for completion of the incomplete work. An incomplete grade that is not cleared by the set date will lapse to an “F” grade.

**Career Possibilities**

Aeronautical Engineer · Automotive Engineer · Design Engineer · Development Engineer · Energy Management Engineering Manager · Environmental Engineer · Food Processing Machine Designer · Manufacturing Engineer · Plant Engineer · Project Engineer · Research Engineer · Technical Sales Engineer

**ME 37.** Manufacturing Processes. 3 Units

*Term Typically Offered:* Fall, Spring, Summer

Principles of manufacturing processes in the areas of metal removal, forming, joining and casting and fundamentals of numerical control. Study includes applications of equipment, e.g., lathe, milling machine, drill press, saw, grinder, welder, molding equipment and core makers. Emphasis on safety during hands-on operations. Two hours lecture, one three-hour lab.

**ME 76.** Programming and Problem Solving in Engineering. 2 Units

*Prerequisite(s):* Math 30; Phys 11A; Phys 11A may be taken concurrently

*Term Typically Offered:* Fall, Spring, Summer

Introduction to the use of computers for engineering, science and mathematical computations. Provides basic computer operation skills, and includes the use of modern interactive symbolic and numerical computation packages as well as an introduction to programming methods for solving engineering problems. Both analytical and graphical tools will be used for applications. Sample applications will be drawn from a variety of science and engineering areas.

**ME 105.** Introduction to Technical Problem Solving. 3 Units

*Prerequisite(s):* ENGR 17 and ENGR 30.

*Term Typically Offered:* Fall, Spring, Summer

Introduction to the use of computers for engineering, science and mathematical computations. Introduction to linear algebra and matrix applications. Introduction to concepts of programming and visualization using MATLAB and PBasic. Practical applications involving design using a microcontroller. Applications will be drawn from a variety of science and engineering areas. Lecture two hours, Laboratory three hours.
ME 106. Applications of Programming in Mechanical Engineering. 1 Unit

Prerequisite(s): ME 76 or equivalent
Term Typically Offered: Fall, Spring, Summer

Application of programming in the solution of practical engineering problems. Topics include problem formulation, algorithm development, advanced graphical user-interface development, and generating simulations using software packages such as Simulink. A project that involves programming a robot to perform designated tasks is included. Laboratory 1 unit.

ME 108. Professional Topics for Mechanical Engineers. 2 Units

Prerequisite(s): MATH 31. MATH 31 may be taken concurrently.
Term Typically Offered: Fall, Spring

Introduction to statistical methods applied to analysis of engineering systems. Topics include data collection, distribution characteristics, probability, uses of regression analysis, and decision-making under uncertainty. Introduction to economic analysis applied to engineering designs. Topics include marginal or incremental economic analysis using multiple standard methods while addressing organizational constraints and market factors. Investigations into the roles engineers play in society in working toward sustainability, and ethical decision making in a technological world.

ME 114. Vibrations. 3 Units

Prerequisite(s): ENGR 110, ME 105.
Term Typically Offered: Fall, Spring

ME 115. Dynamics of Machinery and Multi-Body Systems. 3 Units

Prerequisite(s): ENGR 110, ME 105.
Term Typically Offered: Fall, Spring

Kinematic and kinetic analysis of mechanisms. Rigid and flexible multi-body assembly models in two and three dimensions. Use of solid modeling, dynamic analysis and finite element methods. Study of loads on linkages, cams, gears as integral functioning components of machines, ground and space vehicles. Study of forces and moments in machinery under impulsive and impact forces, balancing, and elements of vibration.

ME 116. Machinery Design I. 2 Units

Prerequisite(s): ENGR 112, and ME 37. ENGR 112 and ME 37 may be taken concurrently.
Term Typically Offered: Fall, Spring, Summer

Introduction to basic design methodology for mechanical systems and devices. Detail design of machine components; application of analytical methods in the design of complex machines. Failure mode analysis, theories of failure, yield, fracture, deflection, and fatigue analysis of machine elements. Design of common machine elements such as bearings and shafts.

ME 117. Machinery Design II. 2 Units

Prerequisite(s): ME 116.
Term Typically Offered: Fall, Spring

Introduction to design of machine components; application of analytical methods in the design of complex machines. Design of common machine elements such as threaded fasteners, springs, flexible drive components, gears, and friction devices. Introduction to stress and deflection analysis using finite element software.

ME 120. Fluid Mechanics for Mechanical Engineers. 3 Units

Prerequisite(s): ENGR 110 or concurrent enrollment.
Term Typically Offered: Fall, Spring, Summer

Fundamentals of fluid mechanics, including fluid statics; mass, momentum and energy conservation laws and analysis; inviscid and viscous (laminar, turbulent) flow; pumps, turbines, internal flow in pipes; external flow on moving or submerged objects; dimensional analysis, modeling, applications. Lecture. 3 units.

ME 121. Solar Thermal and Energy Storage Systems. 3 Units

Prerequisite(s): ENGR 124.
Term Typically Offered: Fall, Spring

Study of solar thermal heat and power and energy storage including the characterization, theory, operation, analysis and modeling of solar thermal and energy storage systems.

ME 122. Geothermal and Bioenergy Systems. 2 Units

Prerequisite(s): ENGR 124.
Term Typically Offered: Fall, Spring

Study of geothermal and bioenergy systems including the characterization, theory, operation and modeling.

ME 123. Wind, Hydro and Ocean Energy. 3 Units

Prerequisite(s): ENGR 124 and ME 120.
Term Typically Offered: Fall, Spring

Exploring sustainable energy and power generation, through study of wind, hydro and ocean energy systems, including the characterization, theory, operation, analysis and modeling, planning impacts and design process.

ME 126. Heat Transfer. 3 Units

Prerequisite(s): ENGR 124 and ME 120.
Term Typically Offered: Fall, Spring, Summer

Basic principles of heat transfer, including processes of conduction, convection, radiation, evaporation and condensation. Lecture three hours.

ME 126W. Heat Transfer Workshop. 1 Unit

Corequisite(s): ME 126.
Term Typically Offered: Fall, Spring, Summer

Problem solving and discussion of heat transfer to enhance students’ understanding of subject matter.

Note: May be repeated for credit.

Credit/No Credit
ME 128. Thermal-Fluid Systems. 3 Units
Prerequisite(s): ME 126 (may be taken concurrently).
Term Typically Offered: Fall, Spring, Summer

Fundamentals of the Otto, Diesel, Brayton and Rankine power cycles, vapor-compression refrigeration, psychrometric processes and chemical reactions. Theory and application of temperature, pressure, flow, and velocity instruments, introduction to experiment design, errors, uncertainty and data acquisition, data analysis and presentation.

ME 129. Power Plant Engineering. 3 Units
Prerequisite(s): Thermodynamics (ENGR 124) and Thermal-Fluid Systems (ME 128). ME 128 may be taken concurrently.
Term Typically Offered: Fall, Spring

In this course, the students will be able to understand the fundamentals of power industry, including electricity production, transmission, and distribution. They will also apply their engineering knowledge gained in the fundamental courses to understand and conceptually design various modern power plant technologies for electric power generation and cogeneration, including steam power plants, gas turbines, combined cycles, and nuclear power plants and their components.

ME 132. Solar Energy, Geothermal Energy, and Bioenergy Systems. 3 Units
Prerequisite(s): Thermodynamics (ENGR 124)
Term Typically Offered: Fall, Spring

In this course, the students will study solar energy, geothermal energy, and bioenergy systems. They will apply their engineering knowledge gained in the fundamental courses to design these systems. They will also learn about theoretical foundations, characterization, operation, and environmental impacts of these energy systems.

ME 136. Numerical Control Programming. 3 Units
Prerequisite(s): ME 37 and ME 105; ME 105 may be taken concurrently.
Term Typically Offered: Fall, Spring

Computer programming languages for automated manufacturing, including CNC manual programming, cutter compensation, geometric definition of products, cutting tool definition, continuous path part programming, computation, decision, looping, computer graphics programming and intelligent machines.

ME 137. Product Design for Manufacturing and Automation. 3 Units
Prerequisite(s): ME 117.
Term Typically Offered: Fall, Spring

Various manufacturing and automation aspects of product design, including design for machining, design for automation, applications of CAD/CAM software in product design and automation, and rapid prototyping. Virtual design and manufacturing and agile manufacturing will also be discussed.

ME 138. Concurrent Product and Process Design. 3 Units
Prerequisite(s): ME 37 and ME 116.
Term Typically Offered: Fall, Spring

Manufacturing considerations in product design including: design for manufacturing (DFM), design for assembly (DF A), design to cost (DTC), design to life cycle cost (DTLCC), design for quality and reliability (DFQR); introduction to concurrent engineering. Two hours lecture, three-hour lab.

ME 140. Introduction to Motors and Actuators. 2 Units
Prerequisite(s): ME 172 or EEE 184.
Term Typically Offered: Fall, Spring

Power conversion hardware used in electromechanical systems. Operation and sizing of electric motors, both DC and AC systems, motor controllers, and power electronics; sensors; design in fluid power systems, both pneumatic and hydraulic; and power transmission systems such as ball screws and belt drivers.

ME 141. Introduction to Tolerance Analysis. 2 Units
Prerequisite(s): ME 116
Term Typically Offered: Fall, Spring

Introduction to techniques used in manufacturing tolerance analysis. Assembly tolerance analysis using standard industry practices; application of geometric dimensioning techniques to tolerance analysis; drawing practices for indicating dimensional tolerances; statistical techniques; tolerance allocation. Introduction to computer aided tolerance analysis.

ME 143. Vehicle Dynamics and Design. 3 Units
Prerequisite(s): ENGR 110 and ME 117.
Term Typically Offered: Fall, Spring

ME 145. Vehicle Crash Reconstruction. 3 Units
Prerequisite(s): ENGR 110
Term Typically Offered: Fall, Spring

Study of forensic engineering using state of the art technology. Application of principles of dynamics for forensic investigation and reconstruction of vehicle collisions. Cases involving, cars, motorcycles, bicycles and commercial vehicles. Study of devices that contribute to passenger safety and stability. Analysis of seat belts, airbags, and electrohydraulic stabilizers. Data analysis of Event Data Recorders (EDRs) and verification with real cases using state of the art reconstruction techniques, photogrammetry and the use of computer simulations in two and three dimensions.

ME 151. Fundamentals of Combustion. 3 Units
Term Typically Offered: Fall, Spring

Principles of combustion and pyrolysis of gaseous, liquid, and solid materials. Applications of principles, including analysis and design of stationary and mobile powerplants, waste management, and fire safety.

ME 152. Turbomachinery Design. 3 Units
Prerequisite(s): ME 120 and ENGR 124
Term Typically Offered: Fall, Spring

Theoretical analysis of energy transfer between fluid and rotor; principles of axial, mixed, and radial flow compressors and turbines. Applications and computer-aided design of various types of turbomachines.
ME 153. Thermodynamics of Combustion Engines.  3 Units  
Prerequisite(s): ENGR 124, ENGR 132, ME 105.  
Term Typically Offered: Fall, Spring  
Application of thermodynamic and fluid mechanical analysis to various kinds of engines, including those based on Otto, Diesel, Brayton, Rankine, and Stirling cycles. Development of computer models and comparison of cycles in terms of applications to land, marine, and aerospace propulsion.

ME 154. Alternative Energy Systems.  3 Units  
Prerequisite(s): ENGR 124.  
Term Typically Offered: Fall, Spring  
Study of alternative energy technologies, such as renewable fuels, wind, solar, oceanic and geothermal power. Concentration on fundamental thermodynamic principles, modern design features and non-technical aspects of each technology.

ME 155. Gas Dynamics.  3 Units  
Prerequisite(s): ME 105.  
Term Typically Offered: Fall, Spring  

ME 156. Heating and Air Conditioning Systems.  3 Units  
Prerequisite(s): ENGR 124, ENGR 132.  
Term Typically Offered: Fall, Spring  
Theory and design of heating, ventilating and air conditioning for industrial and comfort applications. Topics include refrigeration cycles, heating and cooling load calculations, psychrometrics, solar heating and cooling component, and system design.

ME 157. Solar Energy Engineering.  3 Units  
Prerequisite(s): ME 126; may be taken concurrently.  
Term Typically Offered: Fall, Spring  
In-depth study of the basics of solar engineering, including the nature and availability of solar radiation; operation, theory and performance of solar collectors; energy storage and model of solar systems.

ME 159. High Efficiency HVAC.  3 Units  
Prerequisite(s): ME 156 or instructor permission.  
Term Typically Offered: Fall, Spring  
Starts with a review of the theory and design of HVAC systems. Recent improvements and new developments in cooling and heating equipment are studied in detail. Computer models such as the Trane TRACE Program are used to size an HVAC system with an emphasis on high efficiency. Computer based controls and energy management systems are discussed and demonstrated. Field trips to energy efficient installations are included. Field trip(s) may be required.

ME 164. Introduction to Test Automation.  3 Units  
Prerequisite(s): ME 105, ME 117.  
Term Typically Offered: Fall, Spring  
Basic concepts to automate testing procedures. Introduction to sensors, signal conditioning, sampling theory, design of experiments, data acquisition software, and data reduction techniques. Hands-on experience with PC based data acquisition software and hardware which will be used to create testing programs. Lecture two hours; laboratory three hours.

ME 165. Introduction To Robotics.  3 Units  
Prerequisite(s): ME 105, ME 116  
Term Typically Offered: Fall, Spring  
Fundamentals of design and application of industrial robotics. Manipulator kinematics, trajectory planning and controller design, design of end effectors and actuators, sensors, programming languages, and machine vision. Applications in manufacturing, approach to implementing robotics, economic analysis for robotics. Lecture two hours; laboratory three hours.

ME 171. Modeling and Simulation of Mechatronics and Control Systems.  3 Units  
Prerequisite(s): ENGR 110, ME 105.  
Term Typically Offered: Fall, Spring, Summer  
Computer modeling and mathematical representation of mechanical, electrical, hydraulic, thermal, and electronic systems or combinations of these. Development of system design criteria and solutions using computer simulation. Use of state of the art automated modeling and simulation methods to build models of multi-energy mechatronics and control systems. Vibration concepts, applied, natural frequencies, eigenvectors, and solution of differential equations using computer simulation. Introduction to state variable feedback control systems. A design project is required.

ME 172. Control System Design.  3 Units  
Prerequisite(s): ME 171.  
Term Typically Offered: Fall, Spring, Summer  
Use of mathematical models for the generation of equations of motion for mechanical and electrical systems. Evaluation of single and multiple degrees of freedom systems in the time and frequency domain. Topics include feedback control systems, Laplace transform, state space representation, transfer functions, error analysis, stability of control systems and system response. Automatic control system design using root locus and frequency response methods. Design of compensating controls using state of the art software and automation tools. Introduction to digital control.

ME 173. Applications of Finite Element Analysis.  3 Units  
Prerequisite(s): ENGR 112, ME 105.  
Term Typically Offered: Fall, Spring  

ME 176. Product Design & CAD.  3 Units  
Prerequisite(s): ENGR 6, ME 105 and ME 116.  
Term Typically Offered: Fall, Spring  
Digital product development using an integrated CAD system. Philosophy of parametric design. Component and assembly design, basic drawing creation, and simulations. Team product design investigating the effects of variations in geometry, dimensions, and material selection. Lecture two hours; laboratory three hours.
ME 177. Product Design and 3D Parametric Solid Modeling. 3 Units
Prerequisite(s): ENGR 6, ME 105 and ME 116.
Term Typically Offered: Fall, Spring

Introduction to Solid Modeling and its application to mechanical product design. Digital product development using 3D Parametric Solid Modeling tools. Also covers component and assembly design, basic drawing creation. Reverse design project engineering investigating the effects of variations in geometry, dimensions, and material selection. Lecture two hours; laboratory three hours.

ME 180. Mechanical Properties of Materials. 3 Units
Prerequisite(s): ENGR 112
Term Typically Offered: Fall, Spring, Summer

Principles of mechanical properties of metals, including strength under combined loads, fatigue, and fracture mechanics. Laboratory includes study of strengthening mechanisms, and principles of experimental stress analysis. Lecture two hours; Laboratory three hours.

ME 180W. Mechanical Properties of Materials Workshop. 1 Unit
Corequisite(s): ME 180.
Term Typically Offered: Fall, Spring, Summer

Problem solving and discussion of mechanical properties of materials to enhance students' understanding of subject matter.
Credit/No Credit

ME 182. Introduction to Composite Materials. 3 Units
Prerequisite(s): ME 180.
Term Typically Offered: Fall, Spring

Properties, mechanics, and applications of anisotropic fiber-reinforced materials with an emphasis on the considerations and methods used in the design of composite structures.

ME 183. Materials Selection in Engineering Design. 3 Units
Prerequisite(s): ENGR 45 and ME 116. ME 116 may be taken concurrently.
Term Typically Offered: Fall, Spring

Quantitative treatment of materials selection for engineering applications. Discussion of the relationship between design parameters and materials properties. Emphasis on the influence of processing and fabrication on the properties of metals, ceramics, polymers and composites as related to the overall design process. Sustainability, Eco-Design, and manufacturability considerations.

ME 184. Corrosion and Wear. 3 Units
Prerequisite(s): ME 180.
Term Typically Offered: Fall, Spring

Introduction to the phenomena of corrosion and wear, including the electro-mechanical bases of corrosion, examples of corrosion of iron, steel and stainless steels, and prevention of corrosion. Fundamentals of wear are covered including effects of loads, material properties, and lubrication on wear rates.

ME 186. Fracture Mechanics in Engineering Design. 3 Units
Prerequisite(s): ME 180.
Term Typically Offered: Fall, Spring

Fracture mechanics approach to mechanical design; role of microstructure in fracture toughness and embrittlement; environmentally-induced cracking under monotonic and fatigue loads; laboratory techniques; service failures in various industries and failure mechanisms.
ME 196B. Engineering Systems Approach to Product Design. 2 Units
Prerequisite(s): ME 116
Term Typically Offered: Fall, Spring

Study of product design process and formal design methodologies. Various topics in product and system design including creativity, visualizations and communications, human factors, design for X methodology decision science, economics, product design and robust quality design.

ME 196C. Computer Programming for Mechanical Engineering Applications. 2 Units
Prerequisite(s): ME 105
Term Typically Offered: Fall, Spring

Computer programming languages such as C/C++, Java, Processing, and their applications to engineering problem solving using computer graphics, simulations, and physical prototyping. Programming computer communications with microprocessors for controlling sensors and motors.

ME 196D. Ground Vehicle Aerodynamics. 3 Units
Prerequisite(s): ENGR 132
Term Typically Offered: Fall, Spring

Fundamental and applied subjects of aerodynamics for ground vehicle design and performance including flow features, aerodynamic forces, drag reduction strategies, and different methodologies for evaluation of aerodynamic forces and vehicle design. Numerical modeling approaches with experience of running a commercial computational fluid dynamics program. Units: 3 Units (2 Unit Lecture and 1 Unit Lab)

ME 196E. Vehicle Safety and Crash Reconstruction. 3 Units
Term Typically Offered: Fall, Spring

Study of forensic engineering using state of the art technology in vehicles that contribute to passenger safety and stability. Application of principles of dynamics for forensic investigation and reconstruction of vehicle collisions. Study of seat belts, airbags, and electrohydraulic stabilizers. Study of the Event Data Recorders (EDRs), data analysis and verification with real cases using classical reconstruction techniques, and the use of computer simulations in two and three dimensions.

ME 196F. Materials Selection in Engineering Design. 3 Units
Prerequisite(s): ENGR 45 and ME 116. ME 116 may be taken concurrently.
Term Typically Offered: Fall, Spring

Quantitative treatment of materials selection for engineering applications. Discussion of the relationship between design parameters and materials properties. Emphasis on the influence of processing and fabrication on the properties of metals, ceramics, polymers and composites as related to the overall design process. Sustainability, Eco-Design, and manufacturability considerations.

ME 196G. Air Resources Engineering. 2 Units
Prerequisite(s): ENGR 124 and ENGR 132. ENGR 132 may be taken concurrently.

Air quality standards. Stationary and transportation emission sources. Chemical and physical interactions of air pollutants, including greenhouse gases, with the atmosphere. Introduction to air quality modeling, including atmospheric temperature effects due to longwave thermal radiation. Air Quality measurement. Emission control strategies and design. Air resources economics and policy.

ME 196H. Engineering Research Methodology and Communication for Undergraduate Students. 3 Units
Prerequisite(s): ME 108
Term Typically Offered: Fall, Spring, Summer

This course will prepare students for engineering research by introducing them to how to identify, plan, conduct, and present a research project as well as research methods, literature review process, research ethics, writing proposal, writing technical reports, and oral and poster research presentations. The students will be conducting an independent supervised engineering research on an agreed-upon research project. They will refine their communication skills by working one-on-one with the instructor to present their research in a professional setting.

ME 196Q. Ceramic Materials. 3 Units
Prerequisite(s): ENGR 112
Term Typically Offered: Fall, Spring

Fundamentals of structure, processing and properties of engineering ceramics with an emphasis on the relationships between them. Industrial applications for ceramic and glass components along with the processing and materials selection options available for a given material and application. Topics covered include common ceramic structures, thermal and physical properties of ceramics, powder processing, creep resistance and toughening mechanisms, electronic properties of ceramics, and glass forming.

ME 196R. Fundamentals of Physical Metallurgy and Materials. 3 Units
Prerequisite(s): ENGR 112 or equivalent course.
Term Typically Offered: Fall, Spring

Fundamentals of structure, processing and properties of metals and metal alloys with emphasis on relationships between them. Thermodynamics and kinetics of common phase transformations and resulting microstructures and mechanical properties. Slip mechanisms in single crystals, and metallic alloy strengthening mechanisms including grain size, solute, precipitation, cold-work, and martensite. Specific heat treatment and mechanical processing procedures for steel and aluminum alloys as well as application of these processes to other alloy systems.

ME 199. Special Problems. 1 - 3 Units
Term Typically Offered: Fall, Spring

Individual projects or directed reading.
Note: Open only to students who appear competent to carry on individual work. Admission requires approval of an instructor and the student's advisor. May be repeated for credit.
Credit/No Credit

ME 206. Stochastic Modeling for Engineers. 3 Units
Prerequisite(s): MATH 45 or equivalent.
Term Typically Offered: Fall, Spring

Fundamentals and applications of stochastic processes for engineers, including a review of engineering statistics, autoregression moving average (ARMA) models, characteristics of ARMA models, ARMA modeling and forecasting, and transformation from discrete models to continuous models. Applications of stochastic processes in engineering field, e.g., precision manufacturing, monitoring and diagnosis of machines, tools, and processes, system identification, vibrations, and statistical process control (SPC).

Applications of pattern recognition in automated inspection. Quality including the use of coordinate measuring machines; system considerations and sensor technology in automated visual inspection; applications of pattern recognition in automated inspection.

Advanced multidisciplinary design analysis, finite element modeling, computer simulations, and statistical methods to increase product safety and reduce product liability. Investigate and recreate cases of failures of machines, vehicles, structures and assemblies under dynamic or static loads or material failures using current software tools. Design with safety considerations. Use of two and three-dimensional models to study failures. Use of the theory of reliability and forensic engineering to increase product safety.

Mathematical methods of optimum design using linear and non-linear optimization; constrained and unconstrained optimum design. Optimization of mechanical elements and assemblies to meet design requirements, material characteristics and geometry. Numerical methods and computer usage in optimal design. Application of these principles to realistic design problems.

Study of the interaction of the human body kinematics and dynamic biomechanics in accidents involving the workplace, activities and vehicles. Impact injury mechanisms, response of the human body using computer models and software analysis tools. Biomechanical response to impact, and tolerance levels. Human factors that influence the biomechanical reactions of people with their vehicles and the environment. Photographic and video analysis, computer graphics, and computer simulations. Forensic engineering to determine the dynamic forces that cause injury in different situations.

Analyzes convective heat and mass transfer. Development of the Navier-Stokes and energy equations for two-dimensional flows. Boundary layer theory and numerical techniques in solving convection problems. Analyzes turbulence, transport by Reynold's stresses and Prandtl's mixing length theory.

Analytical and numerical analysis of Navier-Stokes equations for laminar flow; stability of laminar flow and its transition to turbulence. Analyzes stream functions and the velocity potential, and vorticity dynamics. The mathematical analysis of incompressible turbulent flows; development of Reynolds stress equations, turbulent boundary layer equations, turbulent flow in pipes and channels, and turbulent jets and wakes.

Advanced topics in heat transfer including analytical and numerical solutions to heat conduction equations in both the steady and unsteady state; use of approximate and analytical techniques for the prediction of convective heat transfer in laminar and turbulent flows, heat transfer in high-velocity flows; analysis of the nature of thermal radiation and radiative heat transfer in enclosures.

Application of the laws of fluid mechanics and thermodynamics to problems of compressible flow in two and three dimensions; small perturbation theory, hodograph method and similarity rules for subsonic flow. Method of characteristics, shock wave analysis for steady, unsteady and supersonic, one-dimensional flows.

Advanced topics in thermodynamics including applications of fundamental postulates to chemical, mechanical, magnetic and electric systems, theory of fluctuations, and irreversible thermodynamics.

Fundamentals of computational fluid dynamics, modeling of physical processes, including the fluid flow, heat and mass transfer, and computer skills. Basic concepts of numerical analysis using computer, including the solutions of ordinary and partial differential equations. Basic hands-on experience on using commercial computational fluid dynamics software packages.

Systems Engineering approach to plan and direct engineering projects. Emphasizes systems engineering process, requirement design fundamentals, subsystem fundamentals, trade studies, integration, technical reviews, case studies and ethics. Space exploration used as an example; skills applicable to any engineering project. Project-orientated course to plan the design of space and ground vehicles, satellites, airplanes and multidisciplinary subsystems.
ME 280. Advanced Mechanical Properties of Materials. 3 Units
Prerequisite(s): ME 180
Term Typically Offered: Fall, Spring

Mechanical properties of materials, with special attention to dislocations/defects and deformation and fracture control mechanisms. Mechanical properties of conventional engineering materials as well as advanced materials such as nanostructured materials are considered. Effects of defects on mechanical behavior at ambient and elevated temperature are discussed with attention given to strengthening mechanisms, creep, fatigue and fracture.

ME 285. Materials for Extreme Environments. 3 Units
Prerequisite(s): ME 180 or PHYS 110
Term Typically Offered: Fall, Spring

Comprehensive study of material applications in extreme environments, with special attention to mechanical, thermal and electronic behavior. Extreme temperature, pressure, corrosive or toxic environments and high rate deformation are considered. Currently available materials as well as emerging materials are explored for specific applications such as undersea, outer space, ballistic, nuclear, combustion, and other extreme application arenas.

ME 295. Fieldwork. 1 - 3 Units
Prerequisite(s): Permission of Graduate Coordinator or Department Chair.
Term Typically Offered: Fall, Spring

Supervised employment in industry or government that provides practical work experience. Requires satisfactory completion of the work assignment and a written report.

Note: Units may not be applied toward meeting the 30-unit requirement of the degree.

Credit/No Credit

ME 296L. Creative Engineering Design for Quality Products. 3 Units
Prerequisite(s): ME 138 and ME 180.
Term Typically Offered: Fall, Spring

Introduction to analytical and systematic design methodologies in creative and quality product design. Topics include product design process, creative conceptual design tools such as axiomatic design, theory of inventive problem solving (TRIZ), and engineering decision making. Quality product design including design of experiments, robust design techniques, and design optimization. Assignments include application of these principals to solving open-ended design problems using computing tools. Two hour lecture; Three hour laboratory.

ME 296M. Space Mission Design and Analyses. 3 Units
Term Typically Offered: Fall, Spring

This course examines the methods of systems design and analyses required to design and optimize the space mission over its life cycle. The process of optimization covers all the major elements of a space mission such as the ground systems, launch vehicles, spacecraft/payload, space environment, in-orbit operation and maintenance, and end-of-life disposal. The optimization of the overall mission must balance between performance, cost and reliability of all the major elements.

ME 296O. Advanced Heat Transfer. 3 Units
Prerequisite(s): ME 126 and ENGR 202.
Corequisite(s): ENGR 202.
Term Typically Offered: Fall, Spring

Advanced topics in heat transfer including analytical and numerical solutions to heat conduction equations in both the steady and unsteady state; use of approximate and analytical techniques for the prediction of convective heat transfer in laminar and turbulent flows, heat transfer in high-velocity flows; analysis of the nature of thermal radiation and radiative heat transfer in enclosures.

ME 296P. Advanced Dynamics. 3 Units
Prerequisite(s): Graduate Standing
Term Typically Offered: Fall, Spring

ME 296Q. Advanced Solid Modeling. 3 Units
Prerequisite(s): Student must pass ME 116.
Term Typically Offered: Fall, Spring

Advanced topics in computer-aided design for mechanical product design. Reviews on fundamental part and assembly modeling, and engineering drawings. Advanced modeling topics such as surface modeling, top-down assembly, macros and API programming, manufacturing oriented design such as sheet metal, plastic and mold design.

ME 296S. Advanced CAD for Aerospace Applications. 3 Units
Term Typically Offered: Fall, Spring

Design of aerospace systems including profile definition, constraints, operations and visualizations, component design, transformation features, and insertions using advanced CAD software such as CATIA. Creation of complete assembly design including creation of product files, identifying, inserting and displacing components, constraining parts, numbering parts and scene creation. Specifics of sheet metal design for aerospace design including creation of flange, cut-out, joggle, holes, stampings and patterns.

ME 296U. Advanced Computer-Aided Product Design. 3 Units
Prerequisite(s): ENGR 6 and ME 116, or graduate-level status
Term Typically Offered: Fall, Spring

Advanced topics in computer-aided design and applications for mechanical product design. Reviews of fundamental parts, assembly modeling, and engineering drawings. Advanced modeling topics such as surface modeling, design for manufacturing, simulation-based design, top-down assembly, macros and API programming.
ME 296V. Advanced Control System Design. 3 Units
Prerequisite(s): ME 172
Design of Multi-Input/Multi-Output controllers using linear quadratic regulator method and advanced controls architectures. Architectures include Proportional, Proportional Integrator and Proportional Integrator Derivative (filter) schemes. The course also includes Digital Control, Optimal Control, Introduction to Guidance, Navigation and Control techniques.

ME 296W. Accident Biomechanics. 3 Units
Prerequisite(s): ENGR 110
Study of the interaction of human body kinematics and dynamic biomechanics in accidents involving human activities and vehicles. Impact injury mechanisms, response of the human body using computer models and software analysis tools. Biomechanical response to impact, and tolerance levels. Human factors that influence the biomechanical reactions of people with their vehicles and the environment. Photographic and video analysis, computer graphics, and computer simulations. Forensic engineering to determine the dynamic forces that cause injury in different situations.

ME 299. Special Problems. 1 - 3 Units
Term Typically Offered: Fall, Spring
Any properly qualified student who wishes to pursue a problem of his/her own choice may do so if the proposed subject is acceptable to the faculty member with whom he/she works and to his/her advisor.
Credit/No Credit

ME 500. Master’s Thesis. 1 - 6 Units
Prerequisite(s): Open to students who have advanced to candidacy and have secured approval of a Thesis proposal form one full semester prior to registration
Term Typically Offered: Fall, Spring
Completion of a thesis. Credit given upon successful completion of a Master’s Thesis (4 - 6 units; maximum 6 units).
Note: Course may be repeated for no more than 6 units total.

Blended BS/MS in Mechanical Engineering Program
Total units required for Blended BS/MS: 150

Program Description
The Blended BS/MS program in Mechanical Engineering allows qualified students in the BS degree program to simultaneously complete requirements for both the BS and MS degree. Students in the program can progress from undergraduate to graduate status without applying for admission through the Office of Graduate Studies.

Eligibility Requirements
Students majoring in Mechanical Engineering will be eligible to apply to the program if they meet the following criteria:

- Completion of the WPJ or equivalent, eligible for WI course, and completion of the prerequisites for ME 190 (Project Engineering I);
- Have not yet enrolled in ME 190;
- Are not double majoring; and
- Have a minimum GPA in major courses of 3.00.

Application Procedures
Students interested in applying to the Blended BS/MS Program should follow the following procedure:

- Prior to the tenth week during the semester before taking ME 190, students must complete the department application.
- Applicants do not need to pay the graduate program application fee.
- Electronic applications will be submitted to the ME Graduate Coordinator for review.
- Upon acceptance to the program, the department will notify the Registrar’s Office and the Office of Graduate Studies in the change in status of the student.

Program of Study
In the two semesters of their senior year, students admitted to the program will be required to take the following graduate classes:

- ME 209 Research Methodology (2 units)
- Two graduate-level courses (200 level) in Mechanical Engineering selected in consultation with the Graduate Coordinator (3 units each)

When the students have completed the core courses for the undergraduate program and have completed the 8 units of graduate courses listed above, they will be converted to graduate status and the BS degree can be awarded. Students will be eligible to receive the MS degree when the remaining requirements for the graduate degree are completed (i.e., the requirements for the MS degree are the same whether taken separately or blended).

During their first semester in graduate status, students will be required to submit a thesis proposal to the ME department and to apply for advancement to candidacy.

Opt-Out Option
Students who wish to opt out after completing all other BS major requirements except the 6 units of ME electives may do so and the two graduate courses will count as two of the electives required in the normal undergraduate program. The total number of units taken for the BS degree will be the same (122 units) as for students who are not in the blended program.

BS in Mechanical Engineering
Units required for Pre-Major: 42 plus GE/GR courses
Units required for Major: 50 plus GE/GR courses
Total units required for BS: 122

Program Description
Sequence of Study: Courses taken in the Freshman and Sophomore years, either at Sacramento State, or at a Community College or transfer college, directly contribute to the upper division (Junior-Senior) program. For example, upper division work in Computer-Aided Design (CAD) develops skills introduced in freshman graphics and CAD courses; upper division analytical courses depend on the freshman and sophomore calculus and physics courses. Communication skills learned in the lower division are developed through the writing of reports and oral presentations.

Mechanical Engineering design involves far more than solving the types of problems found in chemistry, physics, and calculus courses; design work involves a large measure of analytical and creative work.
The principles of mathematics and science are extremely useful when developing a detailed design solution but contribute little to the critical issues of correctly defining the problem, specifying the solution, and locating and organizing needed information. In addition, the design cannot violate fundamental physical laws and must be built from real materials using real manufacturing methods at a reasonable cost while satisfying safety and environmental factors.

The work in the four semester design-project sequence and other courses addresses these issues by including the study of design methods, procedures for developing a design solution from concept through a fully-developed design, and construction of a prototype. The courses in mechanics, thermodynamics, manufacturing, and materials complement the design sequence. The design work includes a mixture of problem and project work in individual courses; some of the course-level projects are team projects to help the student develop the ability to efficiently and effectively work with other engineers making decisions, use the abilities of different colleagues, and distribute the work of large projects. The design sequence includes classical as well as computer aided design and analysis techniques. The work in the two-semester, capstone and senior project sequence involves team effort on a significant design problem. Students interested in furthering their skills in analysis, including finite element analysis, and dynamic modeling of systems, can choose from a number of elective courses which rely heavily on computer methods.

Advising: Each student has a faculty advisor who meets with him/her at least once a semester to discuss academic progress, plan the following semester, explain University requirements, and answer questions about the Mechanical Engineering program.

Note: Students graduating with a BS in Mechanical Engineering will not be subject to the University's Foreign Language Graduation Requirement. Students who change major may be subject to the University's Foreign Language Graduation Requirement.

Minimum Grade Requirement
A grade of "C-" or better is required in all courses applied to a Mechanical Engineering major.

1. Lower division requirements are essentially common for Civil, Electrical and Electronic, and Mechanical Engineering. Note: Courses are listed in a recommended sequence, and may be interchanged among semesters to accommodate the student's schedule, as long as prerequisites are met.

2. Course also satisfies General Education (GE)/Graduation Requirement.

3. Students are allowed to enroll in upper division Engineering or Mechanical Engineering courses with the Department's approval. Pre-Major students must complete a Change of Major form and submit it to the Mechanical Engineering Department Office during the application filing period.

4. An upper division course in Engineering, Mathematics, and Science may be selected with prior approval of the student's advisor. Note: All elective courses are NOT offered every semester. The Mechanical Engineering Department Office maintains a listing showing when particular courses will be offered.

**Graduation Requirements**

1. To help you complete your degree in a timely manner and not take more units than absolutely necessary, there are ways to use single courses to meet more than one requirement (overlap). For further information, please visit the General Education page (p. 1103).

2. Required in Major; also satisfies GE.

**MS in Mechanical Engineering**

**Total units required for MS: 30**

**Program Description**

The Master of Science program in Mechanical Engineering prepares students for leadership in the practice of Mechanical Engineering. The program includes the study of scientific and technical principles underlying modern engineering practice and advanced mathematical techniques needed for their application in research and design.
Specializations
Four areas are offered as specializations: Design and Dynamic Systems; Manufacturing and Material Engineering; Thermal and Fluids Systems; and Aerospace Systems. In each area there are specific course requirements to be met; all four specializations encompass Engineering Design.

Elective courses allow for the development of each student's particular interests. An individual's applied research or design study, presented in a Master's thesis or project, complements the formal class work and completes the program.

Admission Requirements
Admission as a classified graduate student in Mechanical Engineering requires:

- a Bachelor of Science degree in Mechanical Engineering, or equivalent;
- a minimum GPA of 3.0 in the last 60 semester or 90 quarter units of BS Degree; and
- English Language Requirement (for foreign students or domestic students with foreign documents).

Applicants who do not meet the three admission requirements listed above because they have a Baccalaureate degree in a field other than Mechanical Engineering, or equivalent, and/or because their GPA is below 3.0 but above 2.5 in the last 60 semester or 90 quarter units of BS Degree, may be admitted with conditionally classified status. Any deficiencies will be noted in a written response to the applicant.

If a student lacks some of the undergraduate courses needed for successful completion of the graduate program, such prerequisite courses must be taken before the student can be fully accepted to the program.

Admission Procedures
Applications are accepted as long as space for new students exists. All prospective graduate students, including Sacramento State graduates, must file the following with the Office of Graduate Studies, River Front Center 215, (916) 278-6470:

- Online application for admission (CalStateApply or equivalent);
- one set of official transcripts from all colleges and universities attended other than Sacramento State; and
- English Language Requirement (for foreign students or domestic students with foreign documents).

For more admissions information and application deadlines, please visit the Office of Graduate Studies website (http://csus.edu/gradstudies/).

Approximately six weeks after receipt of all items listed above, a decision regarding admission will be mailed.

Minimum Units and Grade Requirement for the Degree
Units Required for the MS: 30

Minimum Cumulative GPA: 3.0. Up to six units of grade "C" or better may be credited toward fulfillment of the requirements for the master's degree. All other graded units must be completed with a grade of "B" or better. Grades of "C-, D-, F-, WU-, I-, W" and "NC" may not be used to fulfill any MS degree requirements.

Advancement to Candidacy
Each student must file an application for Advancement to Candidacy, indicating a proposed program of graduate study. This procedure should begin as soon as the classified graduate student has:

- removed any deficiencies in admission requirements;
- completed at least 12 units in the graduate program with a minimum 3.0 GPA, including ME 209 (2 units) and at least 7 other units at the 200 level. Note: For our program completion of ME 209 with a grade of "B" or above satisfies the Graduate Writing Assessment Requirement (GWAR); and
- obtained approval of a thesis/project topic using the Department of Mechanical Engineering Master's Thesis/Project Approval Form.

Advancement to Candidacy forms are available on the Office of Graduate Studies website. The student fills out the form after planning a degree program in consultation with a faculty advisor. After approval by the Mechanical Engineering Graduate Coordinator, the form is then returned to the Office of Graduate Studies for approval.

Notes:
- The student cannot register for the culminating experience (ME 500), until he/she has been advanced to candidacy. One full semester prior to registering for (ME 500), the student must submit a proposed topic from to the Department office.
- The Thesis Committee consists of the student's Thesis Advisor, who is the Chairperson of the Thesis Committee, and another faculty member who serves as the second advisor.
- Advising: The Department of Mechanical Engineering has a Graduate Coordinator who is the liaison between each graduate student and the Office of Graduate Studies. After Advancing to Candidacy (see above), the student proceeds with research for the thesis. Guidance of this phase of study is done by a faculty member with expertise in the particular thesis topic.

Total Units
30-32
Selected in consultation with advisor. May include two undergraduate courses.

2 Master's Thesis (4-6 units) program consists of the following minimum requirements:
Core courses (8 units)
Specialty Area (9 units)
Electives (7-9 units)
ME 500 (4-6 units)

**Thesis Defense/Presentation:** The Thesis must be orally presented and defended, approved by the student’s Thesis Committee and approved by the ME Graduate Coordinator or the Department Chair prior to submittal of the thesis to the Office of Graduate Studies.

**Additional Requirements for Suggested Specializations**

**Note:** With advisor approval select at least three courses to develop a focus area of study.

**Specialization - Aerospace Systems**

This area focuses on the design of aerospace systems. Classical and computer-aided techniques are studied to provide a strong background in mechanical design theory and practice. Industrial software tools are used to perform finite-element modeling, dynamic system analysis, and optimum design.

Or other courses selected in consultation with an advisor.

**Specialization - Manufacturing and Materials Engineering**

This area includes the use of mathematical methods as well as current computer techniques to solve problems encountered in planning, designing, and/or controlling manufacturing systems. Study of the techniques for product design and Manufacturing, Neural Networks, Artificial Intelligence, and Industrial Management is conducted. This area also focuses on the design of products and on the manufacturing systems needed for their production. Classical and computer-aided techniques are studied to provide a strong background in mechanical design theory and practice. Industrial software tools are used to perform finite-element modeling, dynamic system analysis, and optimum design.

Or other courses selected in consultation with an advisor.

**Specialization - Thermal and Fluid Systems**

This area concentrates on the principles of thermodynamics, heat transfer, and fluid mechanics as applied to such products as heat exchangers, internal combustion engines, gas turbines, and solar energy systems. Courses make use of computational fluid dynamics (CFD) and finite element analysis (FEA) software tools to explore the behavior of a variety of thermal energy conversion systems and components. In this area of interest, innovative system design is becoming more important as progress is made toward increasing the efficiency of thermal systems while reducing the adverse effects on the environment.

**College of Health and Human Services**

The **College of Health and Human Services** at Sacramento State has a long and proud history of providing the region with health and human services professionals that are leaders in the region through their innovation, engagement, and impact. The College plays important roles in addressing the workforce needs of the region, in community engagement, and in research that matters. With over 40,000 alumni from the College, chances are that if you interact with a nurse, a social worker, or a police officer in the region, they are a Sac State alum. With over 7,300 student majors, making it the largest college on campus, the programs offered in the College continue to be in high demand. The faculty and staff are
committed to student success, which is one of the primary values of our mission.

The College of Health and Human Services houses the Bachelor of Science in Health Science meta-degree program, and has eight academic units, including the Department of Communication Sciences and Disorders (including the Audiology Doctorate program), the Division of Criminal Justice, the Department of Kinesiology, the School of Nursing, the Department of Physical Therapy, the Department of Public Health, the Department of Recreation, Parks and Tourism Administration, and the Division of Social Work. Within each of these departments there are a number of programs for students to choose from: 15 of these programs are externally accredited by professional accrediting associations. In addition, the College is the home for seven centers including the Center for Health Practice, Policy & Research, the Student Success Center, ten community clinics, and the Law Enforcement Candidate Scholars (LECS) Program.

The College operates the Maryjane Rees Language, Speech and Hearing Center which treats over 950 clients each year with speech and hearing disorders. The College also operates the Center for African Peace and Conflict Resolution (CAPCR) which provides education and training, research, and direct services pertaining to mediation, negotiation, and arbitration. With the addition of new space in Folsom Hall, the College of Health and Human Services has established a Center for Health Practice, Policy & Research (CHPPR). This is the site of the College’s School of Nursing with, state-of-the-art teaching/research facilities including skills labs and a number of high-fidelity simulation labs. The Doctoral Program in Physical Therapy and the Department of Communication Science and Disorders have also moved into new research and teaching laboratories in Folsom Hall.

The College faculty are recognized for their expertise as teachers, scholars, and practitioners. They serve as professional role-models for students and are actively involved in the life of the surrounding community and their professional organizations. The College faculty and staff are also committed to the values of student success, community engagement, diversity and inclusion, leadership, professional ethics, excellence, social responsibility, and collaboration.

In summary, the College of Health and Human Services provides quality academic programs that educate and empower students, serve and enrich diverse communities, promotes well-being, and inform policy and best practices.

Departments/Programs
Programs of instruction leading to the following degrees offered by the College are listed in this catalog in separate sections.

- Communication Sciences and Disorders, BS, MS, AuD
- Criminal Justice, BS, Minor, MS
- Health Science, BS
- Kinesiology, BS programs, Minor, MS
- Nursing, BS, MS
- Physical Therapy, DPT
- Public Health, BS, MPH
- Recreation, Parks, and Tourism Administration, BS programs, Minors, MS, Certificates
- Social Work, BA, Minor, MSW

BS in Health Science
Units required for Major: 51-55
Total units required for BS: 120

Program Description
The Bachelor of Science program in Health Science prepares students for a variety of roles within the allied health professions. The curriculum integrates coursework from disciplines across the University to provide students with a broad foundation of knowledge and skills related to life sciences, social sciences, communications, health ecology, public service, ethical practice, and data analysis.

The curriculum is designed to provide students with the necessary prerequisite courses to pursue careers or training in clinical or non-clinical practice professions after graduation, such as Occupational Therapy, Nursing, Physician Assistance, or Public Health. The curriculum also prepares students to transition to clinical majors at Sacramento State if they wish. Students have the flexibility to select a program of study that suits their career goals within the allied health professions.

Note: Students graduating with a BS in Health Science will not be subject to the University’s Foreign Language Graduation Requirement. Students who change major may be subject to the University’s Foreign Language Graduation Requirement.

Minimum Grade Requirement
All courses must be completed with at least a "C" grade.

Additional Information
Credit by Examination: A student who seeks course credit by examination is to enroll in the course to be challenged. No course may be challenged.
after the first two weeks of the semester. The instructor of the course will conduct an assessment of the student's readiness for the challenge for credit examination. Refer to Credit by Examination section of the Sacramento State Catalog.

**Advising:** It will be necessary to work closely with an advisor to complete the BS degree in a timely manner. Therefore, it is strongly recommended that all Health Science students consult with an advisor prior to enrollment for any course. This procedure should be followed each semester.

1. To help you complete your degree in a timely manner and not take more units than absolutely necessary, there are ways to use single courses to meet more than one requirement (overlap). For further information, please visit the General Education page (p. 1103).  
   **Note:** There is no way to list all possible overlaps so please consult with a professional advisor. The Academic Advising Center can be visited online ([http://www.csus.edu/acad/](http://www.csus.edu/acad/)), by phone (916) 278-1000, or email (advising@csus.edu).

2. Required in Major; also satisfies GE.

**Communication Sciences and Disorders**

**College of Health and Human Services**

**Program Description**

The fields of Speech-Language Pathology and Audiology are concerned with disorders of speech, language, communication, swallowing, and hearing. A Speech-Language Pathologist is trained to diagnose and treat language, speech, swallowing and cognitive disorders. An Audiologist is trained to identify impairments and dysfunction of auditory, balance, and other related systems.

The Department offers a Bachelor of Science degree in Communication Sciences and Disorders and a Master of Science degree in Communication Sciences and Disorders. The Bachelor of Science degree provides a background in the theoretical and clinical foundations of Speech-Language Pathology and Audiology. The Master’s degree provides professional training for a career in Speech-Language Pathology. The Department also offers a Second Bachelor of Science degree in Communication Sciences and Disorders through the College of Continuing Education. The Doctor of Audiology Degree (Au.D.) prepares students for clinical practice as Audiologists.

Employment as a Speech-Language Pathologist in California requires both a Master’s degree and a credential or license. Completion of the Master’s degree provides the training necessary for students to qualify for the American Speech-Language-Hearing Association’s Certificate of Clinical Competence in Speech-Language Pathology, California State License as a Speech-Language Pathologist and the Speech-Language Pathology Services Credential for working as a Speech-Language Pathologist in the California public schools. The Department also prepares students to apply for the Special Class Authorization, an extension of the Speech-Language Pathology Services Credential, required to teach a classroom for children with language disorders. Employment as an Audiologist requires a clinical doctorate of Audiology (Au.D) and appropriate certification.

The broad, yet challenging, nature of the Bachelor’s degree in Communication Sciences and Disorders prepares students to apply for graduate study in the fields of speech-language pathology and audiology and for employment requiring a background in human development, communication, health, and education. Graduates have pursued further education and work in the fields of special education, counseling, and rehabilitation, as well as careers in the health insurance industry, disability law, career advising, and government health programs.
Degree Programs

BS in Communication Sciences and Disorders (p. 673)

Doctor of Audiology (Au.D.) (p. 675)

MS in Communication Sciences and Disorders (p. 678)

Accreditation

Communication Sciences and Disorders Master of Science (M.S.) Program

In addition to California State University, Sacramento’s full accreditation by the Western Association of Schools and Colleges Senior College and University Commission (WSCUC), the Communication Sciences and Disorders Master of Science (M.S.) education program in Speech-Language Pathology at California State University, Sacramento is accredited by the Council on Academic Accreditation in Audiology and Speech-Language Pathology of the American Speech-Language-Hearing Association, 2200 Research Boulevard #310, Rockville, Maryland 20850, 800-498-2071 or 301-296-5700. Current period of 8 years beginning December 1, 2019 through November 30, 2027.

The Speech-Language Pathology Services Credential with or without Special Class Authorization is approved by the California Commission on Teacher Credentialing (CCTC)

Doctor of Audiology (Au.D.) Program

The Doctor of Audiology program has received approval from the CSU Chancellor’s Office and the Western Association of Schools and Colleges (WASC) Senior College and University Commission (WSCUC). In addition, the Accreditation Commission for Audiology Education (ACAIE) has granted the program “Developing Status” and the Doctor of Audiology (Au.D.) education program in audiology at California State University, Sacramento is a Candidate for Accreditation by the Council on Academic Accreditation in Audiology and Speech-Language Pathology (CAA) of the American Speech-Language-Hearing Association, 2200 Research Boulevard #310, Rockville, Maryland 20850, 800-498-2071 or 301-296-5700. Candidacy is a “pre-accreditation” status with the CAA, awarded to developing or emerging programs for a maximum period of five years.

Notice to Students RE: Professional Licensure and Certification

California State University programs for professions that require licensure or certification are intended to prepare the student for California licensure and certification requirements. Admission into programs for professions that require licensure and certification does not guarantee that students will obtain a license or certificate. Licensure and certification requirements are set by agencies that are not controlled by or affiliated with the California State University and licensure and certification requirements can change at any time.

The California State University has not determined whether its programs meet other states’ educational or professional requirements for licensure and certification. Students planning to pursue licensure or certification in other states are responsible for determining whether, if they complete a California State University program, they will meet their state’s requirements for licensure or certification. This disclosure is made pursuant to 34 CFR §668.43(a)(5)(v)(C).

Special Features

- Graduate students pursuing a degree in the Communication Sciences and Disorders Master of Science or Doctor of Audiology programs participate in supervised clinical practica through the campus-based Mary Jane Rees Language, Speech, and Hearing Center.
- Graduate practica in Communication Sciences and Disorders include three semesters of on-campus clinic followed by an internship in the public schools and an internship in local hospitals or other agencies. Upon completion of the Master’s degree, students will have acquired a variety of supervised clinical experiences totaling a minimum of 388 clock hours.
- Graduate practica in the Au.D. Program include at least three semesters of on-campus clinic, a variety of internships in the Sacramento area, and a full-time externship in the final year of the program.

Career Possibilities

Please note that most of the career possibilities listed below require additional education beyond the baccalaureate degree.

Speech-Language Pathology Assistant (SLPA) · Speech-Language Pathologist in medical, school and private practice settings · Speech-Language Pathologist with Special Class Authorization to teach a classroom of communicatively disabled children · Audiologist · Employment requiring a background in human development, communication, health, and education · Fields of audiology, special education, counseling, rehabilitation, the health insurance industry, disability law, career advising, hospital administration, school administration and government health programs.

CSAD 101. Introduction to Communication Sciences and Disorders. 3 Units
Term Typically Offered: Fall, Spring
This survey course serves as an introduction to the field of communication sciences and disorders (CSAD; speech-language pathology and audiology) and serves three general groups of students: (1) undergraduate majors in CSAD, (2) undergraduate students considering a major in CSAD, and (3) students from related fields, such as education, nursing, health sciences, etc. Through the course, students will gain a broad understanding of clinical work and research in the field of communication sciences and disorders.

CSAD 110. Physics of Sound and Phonetics. 4 Units
Prerequisite(s): CHDV 30, DEAF 51, PSYC 2, and STAT 1
Corequisite(s): CSAD 111
Term Typically Offered: Fall only
Physical production, acoustic characteristics of sounds of speech. International Phonetic Alphabet as applied to speech sounds; practice in phonetic transcription of dialects and deviant speech; applications in speech education, speech and hearing therapy. Introduction to physiological acoustics, psychoacoustics, and acoustic phonetics. Perception of speech including voice, resonance, individual speech segments; instrumentation for acoustic and perceptual analysis of speech.

CSAD 111. Anatomy and Physiology of the Speech Mechanism. 3 Units
Prerequisite(s): CHDV 30, DEAF 51, PSYC 2, and STAT 1
Corequisite(s): CSAD 110
Term Typically Offered: Fall only
Anatomical, physiological and neurological bases of speech. Covers development, normal structure and function. A general course in human anatomy is recommended as background.

CSAD 112. Language Science and Development. 3 Units
Prerequisite(s): CHDV 30, DEAF 51, PSYC 2, and STAT 1
Corequisite(s): CSAD 110 and CSAD 111
Term Typically Offered: Fall only
Overview and comparison of normal and abnormal child language development from infancy through upper elementary school. Establishes a framework for understanding language disorders including autism and pervasive developmental delay. Includes theories of language acquisition, basic principles of language sampling, systems of language, elements of grammar, and preparation for informal and standardized assessment of language disorders. Introduces students to the impact of variables such as attention deficit disorder, poverty, bilingualism on developing language skills.

CSAD 123. Voice and Fluency. 3 Units
Prerequisite(s): CSAD 125, CSAD 126, CSAD 148, PSYC 2, STAT 1, CHAD 30, and DEAF 51.
Term Typically Offered: Fall, Spring

CSAD 125. Developmental and Acquired Neurogenic Language Disorders Across the Lifespan. 3 Units
Prerequisite(s): CSAD 112, CHDV 30, PSYC 2, STAT 1, and DEAF 51.
Term Typically Offered: Spring only
Language disorders and the dynamic, reciprocal relationships between the disability, the client, his/her family, and the environment. Developmental and acquired neurogenic language disorders from infancy through adulthood will be covered including neurophysiology and neuropathology.

CSAD 126. Speech Sound Development and Disorders in Children: Aspects of Articulation and Phonology. 3 Units
Prerequisite(s): CSAD 110, CHDV 30, PSYC 2, and DEAF 51.
Term Typically Offered: Spring only

CSAD 127. Introduction to Medical Speech Pathology. 3 Units
Prerequisite(s): CSAD 123, CSAD 125, CSAD 126, PSYC 2, STAT 1, CHDV 30, and DEAF 51.
Term Typically Offered: Fall, Spring
Current concepts regarding anatomy and physiology, etiology, assessment, and treatment of craniofacial disorders, laryngectomy, tracheostomy and dysphagia.

CSAD 130. Introduction to Audiology. 3 Units
Prerequisite(s): CHDV 30, DEAF 51, PSYC 2, STAT 1, CSAD 110 and CSAD 111.
Term Typically Offered: Spring only
Introduction to the field of audiology. Covers the principles of sound, the anatomy and physiology of the auditory system, audiometry, physiological measures of auditory function, disorders of the auditory system, sound and various assessment approaches.

CSAD 133. Introduction to Aural Rehabilitation. 3 Units
Prerequisite(s): CSAD 125, CSAD 126, CSAD 130, CSAD 148, PSYC 2, STAT 1, CHAD 30, and DEAF 51.
Term Typically Offered: Fall, Spring
Principles of aural (re)habilitation across the lifespan. Topics include psychosocial aspects of hearing impairment, communication strategies, amplification, and intervention approaches for children and adults with hearing loss.

CSAD 140. SLPA Methods. 3 Units
Prerequisite(s): CSAD 145 and instructor permission.
Corequisite(s): CSAD 140L
Term Typically Offered: Fall, Spring
Taken by students as one of their senior level courses when they wish to pursue a Speech-Language Pathology Assistant (SLPA) licensure. Graduate students who have not had a similar course and wish to obtain this licensure will also need to enroll prior to pursuing the licensure.
CSAD 140L. SLPA Practicum, Ethical and Legal Parameters. 3 Units
Prerequisite(s): CSAD 145 and instructor permission.
Corequisite(s): CSAD 140.
Term Typically Offered: Fall, Spring

Taken by students as one of their senior level courses when they wish to pursue a Speech-Language Pathology Assistant (SLPA) licensure. Graduate students who have not had a similar course and wish to obtain this licensure will also need to enroll prior to pursuing the licensure.

CSAD 142. Topics in Autism Spectrum Disorders. 2 Units
Prerequisite(s): CSAD 112, CSAD 125, CSAD 148, PSYC 2, STAT 1, CHAD 30, and DEAF 51.
Term Typically Offered: Fall, Spring

Detailed look at characteristics of autism spectrum disorders (including Asperger’s Syndrome, PDD-NOS and Autism). Issues related to diagnosis/assessment, early intervention, school-based intervention, functional therapeutic techniques and theories, and current "hot topics" in Autism (Theory of Mind, joint attention, biomedical issues, dietary restrictions, sensory regulation and intervention paradigms) will be a part of this course.

CSAD 143. Communication Disorders in Multicultural Populations. 3 Units
Prerequisite(s): CHAD 30, DEAF 51, PSYC 2, STAT 1, CSAD 110, CSAD 125, CSAD 126 and CSAD 148.
Term Typically Offered: Fall, Spring

Identification, evaluation, and treatment of multicultural, multilingual clients with communication disorders. Discussion of normal second language acquisition, bilingual development, and cultural values related to effective service delivery for multicultural clients.

CSAD 145. Supervised Field Observations. 1 Unit
Prerequisite(s): CSAD 110, CSAD 111, CSAD 112, PSYC 2, STAT 1, CHDV 30, and DEAF 51.
Corequisite(s): CSAD 125, CSAD 126, CSAD 130 and CSAD 148.
Term Typically Offered: Spring only

Directed observations of speech and hearing testing (screening and diagnostic); therapy and case staffing in schools, service clinics and hospitals.

CSAD 146. Introduction to Clinical Issues and Methods. 3 Units
Prerequisite(s): CHDV 30, DEAF 51, PSYC 2, STAT 1, CSAD 110, CSAD 111, CSAD 125, CSAD 126, CSAD 130, and CSAD 145. Minimum major GPA of 3.2 with no CSAD course below a grade of “C”.
Term Typically Offered: Fall, Spring

Work with graduate students and clients. Introduction to clinical procedures, ASHA Code of Ethics, legal issues, funding sources, supervision and scope of practice. Survey of professional settings for speech and language services, including multidisciplinary settings. Required for applicants of the CSAD Master’s program. Recommended for students who plan to apply to graduate programs at other universities. Optional for students who do not plan to attend graduate school. Background check, immunizations, and HIPPA training required prior to enrollment (see Department webpage).

CSAD 147. Assessment Procedures. 3 Units
Prerequisite(s): CSAD 125, CSAD 126, CSAD 145, PSYC 2, STAT 1, CHAD 30, and DEAF 51.
Term Typically Offered: Fall, Spring

Current principles, methods and materials used by the speech-language pathologist to assess communication disorders are presented. Issues related to a model of assessment, informal and formal testing, dynamic assessment, interview techniques, administration, scoring and interpretation of test results, report writing and related issues will be discussed.

CSAD 148. Research in Speech - Language Pathology and Audiology. 3 Units
Prerequisite(s): CHDV 30, DEAF 51, PSYC 2, STAT 1, CSAD 110, CSAD 111, CSAD 112.
Term Typically Offered: Fall, Spring

Survey of research strategies and methods in Speech-Language Pathology and Audiology. Statistical procedures and single-subject designs. Emphasis on interpreting research reports in the literature and on developing research projects. Writing research proposals and reports.

CSAD 177. Appreciation of Diversity in Communication Sciences and Disorders. 1 Unit
Prerequisite(s): CSAD Major.
Term Typically Offered: Fall, Spring

This peer-led course is designed to partner students enrolled within and outside of the department of Communication Sciences and Disorders (CSAD) for a mutual exchange opportunity. Information obtained in CSAD coursework will be used by CSAD students to provide them with hands-on learning experiences relating to the topics covered in those courses. Topics for discussion include concepts relating to intercultural sensitivity and diversity as they apply to communication sciences and disorders.

CSAD 199. Special Problems. 1 - 3 Units
Term Typically Offered: Fall, Spring

Individual projects or directed reading. Open only to students competent to carry on individual work.

Note: Departmental petition required.

Credit/No Credit

CSAD 217. AAC and Assistive Technologies. 2 Units
Term Typically Offered: Spring only

Biological, acoustic, psychological, development, linguistic, and cultural bases for motor speech disorders, focusing on augmentative and alternative communication an assistive technologies as well as their assessment and treatment techniques.

CSAD 218. Motor Speech Disorders. 3 Units
Prerequisite(s): Classified graduate status.
Term Typically Offered: Fall only

Background pertinent to understanding neurophysiology associated with congenital and acquired dysarthria and dyspraxia. Descriptions and classifications of disorders and their causes, methods of assessment and treatment.
Term Typically Offered: Fall only

Development of strategies for counseling and interviewing clients with communication disorders and their families. Development of specific skills such as effective listening, dealing constructively with emotions, working with families, and leading support groups. Students will learn to deal effectively with the affective side of communication disorders to help clients benefit maximally from assessment and treatment.

CSAD 221. Neurogenic Language Disorders.
Term Typically Offered: Spring only

In-depth study of language and cognitive disorders in adult, secondary to cerebrovascular accident, dementia, and/or traumatic brain injury. Assessment and intervention strategies are covered with particular emphasis on functional outcomes.

Prerequisite(s): Instructor permission.
Term Typically Offered: Spring only

Language acquisition as a continuum from oral language to reading and writing, the role of the speech-language specialist in working with reading disabilities; the interactions among speech-language intervention and curricula areas including mathematics, spelling, handwriting, social studies and language arts; and various service delivery models, including collaborative consultation and learning centers.

CSAD 223. Advanced Seminar in Child Language Disorders.
Prerequisite(s): CSAD 125 or equivalent
Term Typically Offered: Fall only

In-depth study of childhood language disorders emphasizing the use of critical thinking to integrate evidence-based practice into discussion of current assessment and intervention practices for children with primary and secondary language impairment. Specific topics include language sampling, early intervention, connecting intervention with Common Core State Standards, and team-based service delivery. Populations addressed include bilingual learners, those with working memory deficits, and autism spectrum disorder. The impact of the digital era and screen exposure on children with language impairment is discussed.

CSAD 227. Dysphagia and the Medical Setting.
Prerequisite(s): CSAD 218, CSAD 221, instructor permission.
Term Typically Offered: Fall, Spring

Swallowing problems from infancy through old age; growth patterns and failures in younger populations; feeding and swallowing problems related to normal aging processes and those associated with neurogenic disorders. Assessment and treatment. Includes theoretical and experiential components. Overview of the role of Speech-Language Pathologist in the hospital setting including learning how to read medical charts, basic insurance information, understanding other disciplines and how they affect the job and career of an SLP in the hospital, and medical terms/abbreviations.

CSAD 228A. Speech Sound Disorders: Concepts and Methods.
Prerequisite(s): Admission to the graduate program. CSAD 125, CSAD 126, CSAD 143, CSAD 145, CSAD 146, CSAD 148.
Corequisite(s): CSAD 229A.
Term Typically Offered: Fall, Spring

Speech sound disorders for graduate students in speech-language pathology. Foundations of speech sound disorders, as well as techniques and materials for assessing and treating speech sound differences and disorders of varying etiologies and presentations. Weekly content will be integrated with practical experiences to promote learning.

Prerequisite(s): CSAD 123, CSAD 127, CSAD 228A, instructor permission.
Corequisite(s): CSAD 229B.
Term Typically Offered: Fall, Spring

Foundations of fluency, voice and resonance, as well as techniques and materials for assessing and treating speech disorders, emphasizing fluency and voice. Staffings and discussion of cases on the current caseload. Weekly content integrated with practical experiences to promote learning.

CSAD 228C. Methods: Speech Disorders III.
Prerequisite(s): CSAD 218, CSAD 228B; CSAD 221 may be concurrent; instructor permission.
Corequisite(s): CSAD 229C.
Term Typically Offered: Fall, Spring

Techniques and materials for assessing and treating clients with disordered speech secondary to developmental disabilities and syndromes, degenerative diseases or complex problems associated with English as a second language (ESL). Discussions of cases in the current caseload.

CSAD 229A. Practice: Speech Disorders I.
Prerequisite(s): Instructor permission
Corequisite(s): CSAD 228A
Term Typically Offered: Fall, Spring

Supervised clinical practice emphasizing articulation and phonological disorders, and phonological difficulties associated with English as a second language (ESL). Clients may include both children and adults.

CSAD 229B. Practice: Speech Disorders II.
Prerequisite(s): Instructor permission
Corequisite(s): CSAD 228B
Term Typically Offered: Fall, Spring

Supervised clinical practice emphasizing clients whose speech is disrupted by abnormal rhythm and rate (e.g. stuttering and cluttering) or abnormal vocal pitch, loudness, and/or quality.

CSAD 229C. Practice: Speech Disorders III.
Prerequisite(s): Instructor permission
Corequisite(s): CSAD 228C
Term Typically Offered: Fall, Spring

Supervised clinical practice emphasizing children and adults whose speech is disrupted secondary to developmental disorders and syndromes, degenerative disorders or complex problems.
Supervised clinical practice in the administration of hearing screening tests. The student must furnish his/her own transportation. Fifteen to twenty hours for one unit.

Credit/No Credit

CSAD 242A. Methods: Language Disorders I & Professional Writing-Field of Speech-Language Pathology & Audiology. 2 Units
Prerequisite(s): Admission to Graduate Program
Corequisite(s): CSAD 243A
Term Typically Offered: Fall, Spring

Methods, materials and procedures in language disorders with emphasis on working with children and adults with peripheral hearing loss or central auditory processing disorders (CAPD). Includes staffing and discussion of cases in the current caseload. Focus on professional writing in the field of Speech-Language Pathology through the development of treatment plan proposals, critical responses, and clinic reports.

CSAD 242B. Methods: Language Disorders II. 1 Unit
Prerequisite(s): CSAD 223, CSAD 242A; instructor permission.
Corequisite(s): CSAD 243B.
Term Typically Offered: Fall, Spring

Techniques and materials for assessing and treating children with disordered language secondary to a myriad of contributing factors including delayed development, neurological problems and various genetic conditions. Discussion of cases in the current caseload.

CSAD 242C. Methods: Language Disorders III. 1 Unit
Prerequisite(s): CSAD 218, CSAD 242B; CSAD 221 may be taken concurrently; instructor permission.
Corequisite(s): CSAD 243C.
Term Typically Offered: Fall, Spring

Techniques and materials for assessing and treating speech and language disorders emphasizing disorders secondary to cerebral vascular accidents, traumatic brain injury, or other neurological disorders. Discussion of cases in the current caseload.

Note: May be repeated.

CSAD 243A. Practice: Language Disorders I. 2 Units
Prerequisite(s): Instructor permission
Corequisite(s): CSAD 242A
Term Typically Offered: Fall, Spring

Supervised clinical practice in language disorders emphasizing children and adults with peripheral hearing loss or central auditory processing disorders (CAPD).

CSAD 243B. Practice: Language Disorders II. 2 Units
Prerequisite(s): Instructor permission
Corequisite(s): CSAD 242B
Term Typically Offered: Fall, Spring

Supervised clinical practice with children demonstrating language disorders secondary to a myriad of contributing factors including delayed development, neurological problems, and various genetic conditions.

CSAD 243C. Practice: Language Disorders III. 2 Units
Prerequisite(s): CSAD 243B; instructor permission
Corequisite(s): CSAD 242C
Term Typically Offered: Fall, Spring

Supervised clinical practice emphasizing adult clients whose speech and language are disordered secondary to neurogenically related problems such as cerebrovascular accident, traumatic brain injury, or other neurological disorders.

CSAD 244. Methods: Speech -- Language Assessment. 1 Unit
Prerequisite(s): CSAD 147 or equivalent; CSAD 228B, CSAD 242B; instructor permission.
Corequisite(s): CSAD 245.
Term Typically Offered: Fall, Spring

Methods and materials for initial assessment in Speech-Language Pathology.

CSAD 245. Practice: Speech -- Language Assessment. 1 Unit
Prerequisite(s): Instructor permission
Corequisite(s): CSAD 244
Term Typically Offered: Fall, Spring

Supervised clinical practice in assessment with a variety of communication disorders in children and adults. Experience with interdisciplinary teams.

CSAD 250. Speech/Language Internships Seminar. 2 Units
Corequisite(s): CSAD 295I, or CSAD 295M, or CSAD 295P, or CSAD 295S.
Term Typically Offered: Fall, Spring

Assessment, scheduling and conducting language speech and hearing programs in schools. Related issues including scope of practice, managed care, interagency cooperation and interdisciplinary approaches.

CSAD 295I. Internship: Speech-Language and Hearing Services in Schools (SLHS). 4 Units
Prerequisite(s): All previous semester’s clinical practica and coursework must be completed, achievement of a passing score on the CBEST.
Corequisite(s): CSAD 250. Graded: Credit/No Credit Units: 4
Term Typically Offered: Fall, Spring

Supervised clinical practice in the school setting. Students are expected to conform to the schedules of the placement(s) to which they are assigned. The student must furnish his/her own transportation.

CSAD 295M. Internship: Speech-Language Pathology in a Medical Setting. 4 Units
Prerequisite(s): All previous semester’s clinical practica and coursework must be completed, achievement of a passing score on the CBEST.
Corequisite(s): CSAD 250. Graded: Credit/No Credit Units: 4
Term Typically Offered: Fall, Spring

Supervised clinical practice in a medical setting. Students are expected to conform to the schedules of the placement(s) to which they are assigned. The student must furnish his/her own transportation.
CSAD 295P. Internship: Speech-Language Pathology in Private Practice. 4 Units
Prerequisite(s): CSAD 250. All previous semester’s clinical practica and coursework must be completed, achievement of a passing score on the CBEST. Graded: Credit/No Credit. Units: 4
Term Typically Offered: Fall, Spring
Supervised clinical practice in a private practice setting. Students are expected to conform to the schedules of the placement(s) to which they are assigned. The student must furnish his/her own transportation. Credit/No Credit

CSAD 295S. Internship: Special Class Authorization Eligibility. 4 Units
Prerequisite(s): CSAD 250. All previous semester’s clinical practica and coursework must be completed, achievement of a passing score on the CBEST. Graded: Credit/No Credit. Units: 4
Term Typically Offered: Fall, Spring
Supervised clinical practice in a medical setting. Students are expected to conform to the schedules of the placement(s) to which they are assigned. The student must furnish his/her own transportation. Credit/No Credit

CSAD 299. Special Problems. 1 - 3 Units
Term Typically Offered: Fall, Spring
Individual projects or directed reading. Open only to students who appear competent to carry on individual work. Note: Departmental petition required. Credit/No Credit

CSAD 500C. Culminating Experience: Comprehensive Exam. 2 Units
Prerequisite(s): Advanced to Candidacy. Graded: Credit/No Credit. Units: 2.0
Term Typically Offered: Fall, Spring
Written exam comprised of eight questions. Examinees are given one and a half hours to complete each question. Credit/No Credit

CSAD 500P. Culminating Experience: Project. 2 Units
Prerequisite(s): Advancement to Candidacy. Graded: Credit/No Credit. Units: 2.0 - 4.0
Term Typically Offered: Fall, Spring
Independent work conducted under the supervision of faculty members. A project is a significant undertaking appropriate to the professional fields of Speech-Language Pathology or Audiology. It must evidence originality, independent thinking, appropriate form and organization, and a rationale. It must be described and summarized in a written document that includes the project’s significance, objectives, methodology, and a conclusion or recommendation. Students must follow all department and university project guidelines. Credit/No Credit

CSAD 500T. Culminating Experience: Thesis. 2 Units
Prerequisite(s): Advanced to Candidacy. Graded: Credit/No Credit.
Term Typically Offered: Fall, Spring
Independent research study, conducted under the supervision of faculty members. Thesis must involve a research question or hypothesis, review of pertinent literature, collection and analysis of data. It is the student’s responsibility to locate and recruit subjects, to collect data, and to write the thesis. Students must follow all department and university thesis guidelines. Credit/No Credit

CSAD 501. Audiology Doctoral Project I. 1 Unit
Prerequisite(s): CSAD 510
Term Typically Offered: Fall only
Independent research conducted under the supervision of audiology faculty members. Must include research question, literature review, hypotheses, data collection, and analysis. Students are responsible for identifying and recruiting participants, collecting data, and developing a plan for analysis. Case studies and systematic reviews should follow program guidelines. Credit/No Credit

CSAD 502. Audiology Doctoral Project II. 1 Unit
Prerequisite(s): CSAD 501
Term Typically Offered: Spring only
Independent research conducted under the supervision of audiology faculty members. Must include research question, literature review, hypotheses, data collection, and analysis. Students are responsible for identifying and recruiting participants, collecting data, and developing a plan for analysis. Case studies and systematic reviews should follow program guidelines. Credit/No Credit

CSAD 503. Audiology Doctoral Project III. 1 Unit
Prerequisite(s): CSAD 502
Term Typically Offered: Summer only
Independent research conducted under the supervision of audiology faculty members. Must include research question, literature review, hypotheses, data collection, and analysis. Students are responsible for identifying and recruiting participants, collecting data, and developing a plan for analysis. Case studies and systematic reviews should follow program guidelines. Credit/No Credit

CSAD 504. Audiology Doctoral Project IV. 1 Unit
Prerequisite(s): CSAD 503
Term Typically Offered: Fall only
Independent research conducted under the supervision of audiology faculty members. Must include research question, literature review, hypotheses, data collection, and analysis. Students are responsible for identifying and recruiting participants, collecting data, and developing a plan for analysis. Case studies and systematic reviews should follow program guidelines. Credit/No Credit

CSAD 505. Audiology Doctoral Project V. 1 Unit
Prerequisite(s): CSAD 504
Term Typically Offered: Spring only
Dissemination, written and oral, of capstone research. Credit/No Credit

CSAD 510. Audiology Progress Exam. 1 Unit
Prerequisite(s): Admission to Doctor of Audiology program; CSAD 611, CSAD 612, CSAD 613, CSAD 614, CSAD 620, CSAD 620C, CSAD 621, CSAD 622, CSAD 622L, CSAD 623, CSAD 624, CSAD 630, CSAD 630C, CSAD 631, CSAD 632.
Term Typically Offered: Summer only
Formative written and practical exam based on coursework and clinical experiences from the first year of the Doctor of Audiology program. Credit/No Credit
CSAD 520. Audiology Comprehensive Exam. 1 Unit
Prerequisite(s): Admission to Doctor of Audiology program: CSAD 610, CSAD 611, CSAD 612, CSAD 613, CSAD 614, CSAD 620, CSAD 620C, CSAD 621, CSAD 622, CSAD 622L, CSAD 623, CSAD 624, CSAD 630, CSAD 630C, CSAD 631, CSAD 632, CSAD 340, CSAD 640C, CSAD 641, CSAD 642, CSAD 643, CSAD 650, CSAD 650C, CSAD 651, CSAD 652, CSAD 653, CSAD 660, CSAD 660C, CSAD 661, CSAD 662, CSAD 663, CSAD 670, CSAD 670C, CSAD 671, CSAD 672, CSAD 673
Term Typically Offered: Spring only

Summative written and practical exam based on coursework and clinical experiences from the first three years of the Doctor of Audiology program.

Credit/No Credit

CSAD 610. Introduction to Clinic. 1 Unit
Prerequisite(s): Admission to doctorate program in audiology.
Term Typically Offered: Fall only

Introduction to on-campus clinic operations, including electronic documentation procedures, clinic policies, and documentation.

CSAD 611. Anatomy and Physiology of the Auditory and Vestibular Systems. 3 Units
Prerequisite(s): Admission to doctorate program in audiology.
Term Typically Offered: Fall only

Anatomical, physiological, and neurological bases of the auditory system and central nervous system and central nervous system. Covers embryologic development, including genetic factors, and normal structure and function.

CSAD 612. Acoustics and Psychoacoustics. 3 Units
Prerequisite(s): Admission to Doctorate program in Audiology.
Term Typically Offered: Fall only

Basic properties of the acoustics of simple and complex sounds. Psychophysical aspects of frequency and pitch, intensity and loudness, and temporal processes will be discussed. Speech perception for listeners with normal hearing and those with hearing loss.

CSAD 613. Instrumentation in Audiology. 3 Units
Prerequisite(s): Admission to doctorate program in audiology.
Term Typically Offered: Fall only

Basic principals of electrical systems, calibration, signal processing, and analysis. Review of national standards related to calibration and instrumentation used in audiology.

CSAD 614. Audiologic Evaluation. 3 Units
Prerequisite(s): Admission to doctorate program in audiology.
Term Typically Offered: Fall only

Introduction to the purpose, diagnostic use, and procedures for basic clinical tests of auditory function in children and adults. Assessments including pure-tone audiometry, speech audiometry, masking, and immittance measures are discussed. Supervised, hands-on experiences will accompany lecture topics.

CSAD 620. Clinical Methods: Communicating with Patients. 1 Unit
Prerequisite(s): Admission to doctorate program in audiology; CSAD 610.
Corequisite(s): CSAD 620C.
Term Typically Offered: Spring only

Communicating with patients. The nature of health communication among providers, patients, families, and caregivers. Topics related to multicultural issues will also be presented.

CSAD 620C. Audiology Clinic II. 1 Unit
Prerequisite(s): Admission to Doctor of Audiology program; CSAD 610
Corequisite(s): CSAD 620
Term Typically Offered: Spring only

Supervised clinical practice in audiology with an emphasis on developing second-semester clinical skills for audiologic evaluations, amplification, and aural rehabilitation.

CSAD 621. Research Methods in Audiology. 3 Units
Prerequisite(s): Admission to Doctor of Audiology program; CSAD 611, CSAD 612, CSAD 613, CSAD 614
General Education Area/Graduation Requirement: Writing Intensive Graduation Requirement (WI)
Term Typically Offered: Spring only

Treatment of human subjects and research methods. Overview of the research process, including research designs, development of data collection instruments, and data collection, and introduction to basic statistical concepts for the Au.D. doctoral project. Ethical considerations of research are also discussed.

CSAD 622. Amplification I. 3 Units
Prerequisite(s): Admission to the Doctor of Audiology program; CSAD 611, CSAD 612, CSAD 613, and CSAD 614.
Corequisite(s): CSAD 622L
Term Typically Offered: Spring only

Introduction to electroacoustic analysis and characteristics of hearing aids. Includes components of hearing aids, hearing aid gain and fitting formulae, and basic signal processing.

CSAD 622L. Amplification I Lab. 1 Unit
Prerequisite(s): Admission to Doctor of Audiology program; CSAD 611, CSAD 612, CSAD 613, and CSAD 614.
Corequisite(s): CSAD 622.
Term Typically Offered: Spring only

Laboratory component of CSAD 622: Amplification I. Hands-on experience with concepts presented in CSAD 622.

CSAD 623. Disorders of the Auditory System. 3 Units
Prerequisite(s): Admission to Doctor of Audiology program; CSAD 611, CSAD 612, CSAD 613, and CSAD 614.
Term Typically Offered: Spring only

Pathologies of the auditory system, including diagnosis, management, and treatment.

CSAD 624. Genetics for Audiology. 1 Unit
Prerequisite(s): Admission to Doctor of Audiology program; CSAD 611, CSAD 612, CSAD 613, CSAD 614.
Term Typically Offered: Spring only

Introduction to genetics, inheritance, and causes of hearing loss and balance disorders.
CSAD 630. Clinical Methods: Report Writing. 1 Unit
Prerequisite(s): Admission to Doctor of Audiology program; CSAD 610, CSAD 620.
Corequisite(s): CSAD 630C.
Term Typically Offered: Summer only
Principles of clinical report writing. Foundations of professional writing and recordkeeping for the diagnostic and rehabilitative processes. Writing requirements for practicum experiences will be discussed.

CSAD 630C. Audiology Clinic III. 2 Units
Prerequisite(s): Admission to Doctor of Audiology program; CSAD 610, CSAD 620C.
Corequisite(s): CSAD 630.
Term Typically Offered: Summer only
Supervised clinical practice in audiology with an emphasis on developing first-year clinical skills for audiologic evaluations, amplification, and aural rehabilitation.

CSAD 631. Amplification II. 3 Units
Prerequisite(s): Admission to Doctor of Audiology program; CSAD 611, CSAD 612, CSAD 613, CSAD 614, CSAD 621, CSAD 622, CSAD 622L, CSAD 623, CSAD 624
Term Typically Offered: Summer only
Advance study of digital amplification systems, including hearing aids and assistive listening devices. Practical approaches to the fitting of devices are discussed.

CSAD 632. Pediatric and Educational Audiology. 3 Units
Prerequisite(s): Admission to Doctor of Audiology program; CSAD 611, CSAD 612, CSAD 613, CSAD 614, CSAD 621, CSAD 622, CSAD 622L, CSAD 623, CSAD 624.
Term Typically Offered: Summer only
Introduction to etiologies of childhood hearing impairment, including genetics, syndromic and non-syndromic causes of hearing loss, and risk factors. Objective and behavioral measures of assessing auditory function and hearing in newborns, infants, toddlers, and children. Review of screening procedures.

CSAD 640. Clinical Methods: Current Topics in Audiology. 1 Unit
Prerequisite(s): Admission to Doctor of Audiology program; CSAD 610, CSAD 620, CSAD 630
Corequisite(s): CSAD 640C
Term Typically Offered: Fall only
Review and discussion of current topics in audiology such as hidden hearing loss, cerumen management, tinnitus, speech perception in noise, central auditory processing, or technological advancements in amplification.

CSAD 640C. Audiology Clinic IV. 1 Unit
Prerequisite(s): Admission to Doctor of Audiology program; CSAD 610, CSAD 620C, CSAD 630C
Corequisite(s): CSAD 640
Term Typically Offered: Fall only
Supervised clinical practice in audiology with an emphasis on developing fourth-semester clinical skills for audiologic evaluations, amplification, and aural rehabilitation.

CSAD 641. Auditory Evoked Potentials. 3 Units
Prerequisite(s): Admission to Doctor of Audiology program; CSAD 611, CSAD 612, CSAD 613, CSAD 614, CSAD 621, CSAD 622, CSAD 622L, CSAD 623, CSAD 624, CSAD 631, CSAD 632
Corequisite(s): CSAD 641L
Term Typically Offered: Fall only
Physiological measures for evaluating the integrity of the auditory system. Emphasis on the administration and interpretation of the auditory brainstem response.

CSAD 641L. Auditory Evoked Potentials Lab. 1 Unit
Prerequisite(s): Admission to Doctor of Audiology program; CSAD 611, CSAD 612, CSAD 613, CSAD 614, CSAD 621, CSAD 622, CSAD 622L, CSAD 623, CSAD 624, CSAD 631, CSAD 632
Corequisite(s): CSAD 641
Term Typically Offered: Fall only
Lab component includes administration and reporting of physiological assessments presented in CSAD 641: Auditory Evoked Potentials.

CSAD 642. Industrial Audiology and Hearing Conservation. 3 Units
Prerequisite(s): Admission to Doctor of Audiology program; CSAD 611, CSAD 612, CSAD 613, CSAD 614, CSAD 621, CSAD 622, CSAD 622L, CSAD 623, CSAD 624, CSAD 631, CSAD 632.
Term Typically Offered: Fall only
Study of the effects of noise on the auditory system and measurement of noise levels. Theories and resources for the implementation of hearing conservation programs for recreational/leisure noise exposure, industrial settings, and schools.

CSAD 643. Tinnitus. 3 Units
Prerequisite(s): Admission to Doctor of Audiology program; CSAD 611, CSAD 612, CSAD 613, CSAD 614, CSAD 621, CSAD 622, CSAD 622L, CSAD 623, CSAD 624, CSAD 631, CSAD 632.
Term Typically Offered: Fall only
Psychological and physiological models of tinnitus and hyperacusis, diagnostic methods, and management.

CSAD 650. Clinical Methods: Billing and Coding. 1 Unit
Prerequisite(s): Admission to Doctor of Audiology program; CSAD 610, CSAD 620, CSAD 630, CSAD 640
Corequisite(s): CSAD 650C
Term Typically Offered: Spring only
Overview of coding, billing, and reimbursement for audiology services and devices. Students will learn current federal regulations and laws that affect audiology practice.

CSAD 650C. Audiology Clinic V. 1 Unit
Prerequisite(s): Admission to Doctor of Audiology program; CSAD 610, CSAD 620C, CSAD 630C, CSAD 640C
Corequisite(s): CSAD 650
Term Typically Offered: Spring only
Supervised clinical practice in audiology with an emphasis on refining second-year clinical skills and working independently.
Credit/No Credit
CSAD 651. Objective Measures. 3 Units
Prerequisite(s): Admission to Doctor of Audiology program; CSAD 611, CSAD 612, CSAD 613, CSAD 614, CSAD 621, CSAD 622, CSAD 622L, CSAD 623, CSAD 624, CSAD 631, CSAD 632, CSAD 641, CSAD 641L, CSAD 642, CSAD 643.
Term Typically Offered: Spring only

Fundamentals of otoacoustic emissions, and advanced study of immittance testing and the auditory brainstem response with some practical exercises.

CSAD 652. Pediatric Habilitation. 3 Units
Prerequisite(s): Admission to Doctor of Audiology program; CSAD 611, CSAD 612, CSAD 613, CSAD 614, CSAD 621, CSAD 622, CSAD 622L, CSAD 623, CSAD 624, CSAD 631 CSAD 632, CSAD 641, CSAD 641L, CSAD 642, CSAD 643.
Term Typically Offered: Spring only

Early identification, assessment, and rehabilitation for infants and children with hearing loss. Focus on speech and language outcomes, communication strategies, technology, and counseling of families.

CSAD 653. Diagnosis and Management of Vestibular Disorders. 3 Units
Prerequisite(s): Admission to Doctor of Audiology program; CSAD 611, CSAD 612, CSAD 613, CSAD 614, CSAD 621, CSAD 622, CSAD 622L, CSAD 623, CSAD 624, CSAD 631 CSAD 632, CSAD 641, CSAD 641L, CSAD 642, CSAD 643.
Term Typically Offered: Spring only

Anatomical and physiological bases of the vestibular system, including congenital, peripheral and central, and neurologic factors will also be introduced. Physiological measures of the vestibular system, clinical assessment, and management and rehabilitation.

CSAD 660. Clinical Methods: Legal and Ethical Issues. 1 Unit
Prerequisite(s): Admission to Doctor of Audiology program; CSAD 610, CSAD 620, CSAD 630, CSAD 640, CSAD 650
Corequisite(s): CSAD 660C
Term Typically Offered: Summer only

Ethics for clinical practice and research and legal issues for audiologists. Focuses on local and national issues that influence service delivery.

CSAD 660C. Audiology Clinic VI. 2 Units
Prerequisite(s): Admission to Doctor of Audiology program; CSAD 610, CSAD 620C, CSAD 630C, CSAD 640C, CSAD 650C.
Corequisite(s): CSAD 660
Term Typically Offered: Summer only

Supervised clinical practice in audiology with an emphasis on refining advanced clinical skills and working independently. Credit/No Credit

CSAD 661. Aural Rehabilitation. 3 Units
Term Typically Offered: Summer only

Rehabilitative techniques and communication needs for adults and the aging population. Focus on minimizing communication difficulties and managing psychosocial aspects of hearing loss. Prerequisite: Admission to Doctor of Audiology program; CSAD 611, CSAD 612, CSAD 613, CSAD 614, CSAD 621, CSAD 622, CSAD 622L, CSAD 623, CSAD 624, CSAD 631, CSAD 632, CSAD 641, CSAD 641L, CSAD 642, CSAD 643, CSAD 651, CSAD 652, CSAD 653.

CSAD 662. Implantable Devices and Technology. 2 Units
Prerequisite(s): Admission to Doctor of Audiology program; CSAD 611, CSAD 612, CSAD 613, CSAD614, CSAD 621, CSAD 622, CSAD 622L, CSAD 623, CSAD 624, CSAD 631, CSAD 632, CSAD 641, CSAD 641L, CSAD 642, CSAD 643, CSAD 651, CSAD 652, CSAD 653
Term Typically Offered: Summer only

Pre-operative assessment and post-operative management of cochlear implants and other implantable devices. Includes patient counseling for expectations, introduction to surgical procedures, mapping, use of assistive devices, and current developments in research.

CSAD 662C. Aural Rehabilitation. 2 Units
Corequisite(s): CSAD 670C
Term Typically Offered: Fall, Spring

Supervised clinical practice in audiology with an emphasis on refining third-year clinical skills and working independently.

CSAD 670. Clinical Methods: Professional Issues. 1 Unit
Prerequisite(s): Admission to Doctor of Audiology program; CSAD 610, CSAD 620, CSAD 630, CSAD 640, CSAD 650, CSAD 660
Corequisite(s): CSAD 670C
Term Typically Offered: Fall only

Professional issues for audiologists. Topics covered include licensure, certification, and professional involvement at the local, state, and national levels.

CSAD 670C. Audiology Clinic VII. 2 Units
Prerequisite(s): Student must be admitted to Doctor of Audiology program; complete CSAD 610, CSAD 620C, CSAD 630C, CSAD 640C, CSAD 650C, and CSAD 660C to enroll in this course.
Corequisite(s): CSAD 670C
Term Typically Offered: Fall only

Supervised clinical practice in audiology with an emphasis on refining third-year clinical skills and working independently.

CSAD 671. Counseling in Audiology. 3 Units
Prerequisite(s): Admission to Doctor of Audiology program; CSAD 611, CSAD 612, CSAD 613, CSAD 614, CSAD 621, CSAD 622, CSAD 622L, CSAD 623, CSAD 624, CSAD 631, CSAD 632, CSAD 641, CSAD 641L, CSAD 642, CSAD 643, CSAD 651, CSAD 652, CSAD 653, CSAD 661, CSAD 662.
Term Typically Offered: Fall only

Introduction to the principles and theories of counseling. Emphasis on communication skills and applied techniques. Considerations for assessing multicultural populations. Influences of cultural background on attitudes, beliefs, disabilities, utilization of health care services, and deafness.

CSAD 672. Central Auditory Processing Disorders. 3 Units
Prerequisite(s): Admission to Doctor of Audiology program; CSAD 311, CSAD 312, CSAD 313, CSAD 314, CSAD 321, CSAD 322, CSAD 322L, CSAD 323, CSAD 324, CSAD 331, CSAD 332, CSAD 411, CSAD 414L, CSAD 642, CSAD 643, CSAD 651, CSAD 652, CSAD 653, CSAD 661, CSAD 362.
Term Typically Offered: Fall only

Definition and role of audiologists in the assessment, diagnosis, and management of children, adults, and older adults with auditory processing disorder.
CSAD 673. Pharmacology and Ototoxicity. 1 Unit
Prerequisite(s): Admission to Doctor of Audiology program; CSAD 611, CSAD 612, CSAD 613, CSAD 614, CSAD 621, CSAD 622, CSAD 622L, CSAD 623, CSAD 624, CSAD 631, CSAD 632, CSAD 641, CSAD 641L, CSAD 642, CSAD 643, CSAD 651, CSAD 652, CSAD 653, CSAD 661, CSAD 662.
Term Typically Offered: Fall only
Introduction to the basic concepts of pharmacology, including pharmacokinetics, polypharmacy, and ototoxicity (cochleotoxicity, vestibulotoxicity, and neurotoxicity), for audiologists. Overview of drug classifications, interactions, and regulations.

CSAD 680. Clinical Methods: Differential Diagnosis. 1 Unit
Prerequisite(s): Admission to Doctor of Audiology program; CSAD 610, CSAD 620, CSAD 630, CSAD 640, CSAD 650, CSAD 660, CSAD 670
Corequisite(s): CSAD 680C
Term Typically Offered: Spring only
Discussion of clinical cases to encourage critical thinking and decision-making processes.

CSAD 680C. Audiology Clinic VIII. 2 Units
Prerequisite(s): Admission to Doctor of Audiology program; CSAD 610, CSAD 620C, CSAD 630C, CSAD 640C, CSAD 650C, CSAD 660C, CSAD 670C.
Corequisite(s): CSAD 680
Term Typically Offered: Spring only
Supervised clinical practice in audiology with an emphasis on refining clinical skills and working independently in preparation for the externship.

CSAD 681. Practice Management. 2 Units
Prerequisite(s): Admission to Doctor of Audiology program; CSAD 611, CSAD 612, CSAD 613, CSAD 614, CSAD 621, CSAD 622, CSAD 622L, CSAD 623, CSAD 624, CSAD 631, CSAD 632, CSAD 641, CSAD 641L, CSAD 642, CSAD 643, CSAD 651, CSAD 652, CSAD 653, CSAD 661, CSAD 662, CSAD 671, CSAD 672, CSAD 673
Term Typically Offered: Fall, Spring
Topics relating to business models, terminology, accounting, reimbursement, equipment needs, and office management. Focus on private practice and managed care.

CSAD 682. Aging and the Auditory System. 2 Units
Prerequisite(s): Admission to Doctor of Audiology program; CSAD 611, CSAD 612, CSAD 613, CSAD 614, CSAD 621, CSAD 622, CSAD 622L, CSAD 623, CSAD 624, CSAD 631, CSAD 632, CSAD 341, CSAD 641L, CSAD 642, CSAD 643, CSAD 651, CSAD 652, CSAD 653, CSAD 661, CSAD 662, CSAD 671, CSAD 672, CSAD 673.
Term Typically Offered: Spring only
Overview of physical, psychological, social, and cognitive changes that are associated with normal aging. Prevalent disorders, diseases, and conditions in older adults will be discussed. Effects of aging on diagnostic tests and rehabilitation for older adults. Interdisciplinary in nature.

CSAD 683. Speech-Language Pathology for Audiologists. 1 Unit
Prerequisite(s): Admission to Doctor of Audiology program; CSAD 611, CSAD 612, CSAD 613, CSAD 314, CSAD 621, CSAD 622, CSAD 622L, CSAD 623, CSAD 624, CSAD 331, CSAD 332, CSAD 641, CSAD 641L, CSAD 642, CSAD 643, CSAD 651, CSAD 652, CSAD 653, CSAD 661, CSAD 662, CSAD 671, CSAD 672, CSAD 673
Term Typically Offered: Spring only
Overview of speech and language development, including screening for speech and language disorders and risk factors for speech and language delay, from the perspective of audiology. Principles of auditory-verbal therapy.

CSAD 710. Clinical Methods: Externship I. 2 Units
Prerequisite(s): CSAD 520
Corequisite(s): CSAD 710E
Term Typically Offered: Summer only
Seminar and discussion of cases from externship placements.

CSAD 710E. Audiology Externship 1. 7 Units
Prerequisite(s): CSAD 520
Corequisite(s): CSAD 710
Term Typically Offered: Summer only
First full-time externship in audiology I.
Credit/No Credit

CSAD 720. Clinical Methods: Externship II. 2 Units
Prerequisite(s): CSAD 710.
Corequisite(s): CSAD 720E.
Term Typically Offered: Fall only
Seminar and discussion of cases from externship placements.

CSAD 720E. Audiology Externship 2. 7 Units
Prerequisite(s): CSAD 710E.
Corequisite(s): CSAD 720.
Term Typically Offered: Fall only
Second full-time externship in audiology II.
Credit/No Credit

CSAD 730. Clinical Methods: Externship III. 2 Units
Prerequisite(s): CSAD 720.
Corequisite(s): CSAD 730E.
Term Typically Offered: Spring only
Seminar and discussion of cases from externship placements.

CSAD 730E. Audiology Externship 3. 7 Units
Prerequisite(s): CSAD 720E.
Corequisite(s): CSAD 730.
Term Typically Offered: Spring only
Third full-time externship in audiology III.
Credit/No Credit

BS in Communication Sciences and Disorders

Units required for Major: 53-56 (40-43 CSAD courses + 13 major prerequisites)
Total units required for BS: 120
Program Description

In addition to obtaining a 2.0 in the overall 53-56 unit major, a student must achieve an overall average 2.5 GPA in the 40 units of required CSAD major coursework in order to graduate with a Bachelor of Science Degree in Communication Sciences and Disorders. In order to achieve these GPAs, students may repeat courses for which grades of C- or below were earned, contingent upon their eligibility to do so under the campus policy on repeating courses. Repeated course grades will either be forgiven or averaged with the new grade according to the campus policy. Repeated course grades will either be forgiven or averaged with the new grade according to the campus policy. Repeated course grades will either be forgiven or averaged with the new grade according to the campus policy. Repeated course grades will either be forgiven or averaged with the new grade according to the campus policy. Repeated course grades will either be forgiven or averaged with the new grade according to the campus policy.

Undergraduate courses are designed for students to begin in the fall semester and progress in a proscribed sequence.

It is strongly recommended that students:

• Take a course in physics and/or chemistry as some programs offering the Master's Degree in Speech-Language Pathology or Communication Sciences and Disorders will require it.
• Finish all Undergraduate General Education units before beginning major coursework.

| Total Units | 56 |

1 Course also satisfies General Education (GE)/Graduation Requirement

2 Offered Fall or Spring. Required for students who plan to apply to Sacramento State for the Master's in Communication Sciences and Disorders. Recommended for students who plan to apply to graduate programs at other universities. Optional for students who do not plan to attend graduate school.

Note: Students must submit a signed record of all observation hours and supervised clinical clock hours to the Communication Sciences and Disorders Department. Students should retain a second copy for their personal records.

Prior to enrolling in CSAD 146, students must fulfill the following requirements:

• Pass/complete the Sacramento State undergraduate writing requirement as delineated in the University Policy Manual posted on the campus website.
• 3.2 GPA within the major (CSAD) with no CSAD courses below a grade of "C".
• Proof of negative tuberculin (PPD) test and verification of measles, rubella, and hepatitis B immunizations.
• Completion of a Level 1 criminal background screening. Screenings must be conducted by the department-sanctioned agency. Refer to Department webpage for current agency instructions. Background checks performed by other agencies are not accepted.

Area D Course - Take upper-division course to complete Area & upper division requirements.
The Center for Health and Human Services at Sacramento State, located in Folsom Hall, provides the community with speech, language, and hearing services through the Rees Language, Speech, and Hearing Center, which is located on campus.

The Doctor of Audiology (Au.D.) program at Sacramento State is designed to prepare students for professional practice of audiology. The Au.D. program provides coursework in the theoretical foundations of audiology practice and evidence-based practice, as well as varied clinical training experiences in the Sacramento community and surrounding areas. The Maryjane Rees Language, Speech, and Hearing Center, which is located on campus, provides the community with speech, language, and hearing services for children and adults with communication disorders. In addition, the department is located in Folsom Hall, home of the The Center for Health and Human Services, giving students opportunities to work alongside and learn from and with other health professions students.

**Admission Requirements**

- Students must have an undergraduate degree from an accredited institution.
- Students must have completed a course in each of the following:
  - Human Development Across the Lifespan
  - Introduction to Psychology
  - Introduction to Statistics
  - American Sign Language
  - Biological Science
  - Physical science
- Students must have completed the equivalent of the following Sacramento State Communication Sciences and Disorders courses:

**Doctor of Audiology**

Units required for Doctorate of Audiology (Au.D.): 118

**Program Description**

The Doctor of Audiology (Au.D.) program at Sacramento State is a four-year clinical doctorate that is designed to prepare students for professional practice of audiology. The Au.D. program provides coursework in the theoretical foundations of audiology practice and evidence-based practice, as well as varied clinical training experiences in the Sacramento community and surrounding areas. The Maryjane Rees Language, Speech, and Hearing Center, which is located on campus, provides the community with speech, language, and hearing services for children and adults with communication disorders. In addition, the department is located in Folsom Hall, home of the The Center for Health and Human Services.
### Doctor of Audiology Graduate Program Policies and Procedures

1. A student must have, at minimum, a 3.0 GPA in the graduate coursework in order to graduate with a Doctor of Audiology degree. Students may not earn a grade of less than a B in any major didactic course or clinical practicum. The Au.D. Program Director will review each student's grade reports at the end of the second clinical semester to identify students who receive less than a B in any graduate level course or clinical practicum or students who have less than a 3.0 GPA for the semester. The course instructor (for didactic courses) or clinical supervisor (for practicum sites) will meet with the Au.D. Program Director and student to discuss steps for the student to remediate the coursework, address areas of weakness in clinical performance, etc. Students failing to maintain a GPA of 3.00 are automatically placed on academic probation. Students on academic probation must independently remediate the coursework or address the deficiencies identified by the course instructor and Au.D. Program Director or s/he will not be allowed to continue the graduate program and will be dismissed. Any student who has less than B in any two didactic or B in any clinical practicum courses will not be allowed to continue in the graduate program and will be dismissed.

2. Prior to enrolling in any clinical practica, students must fulfill the following criteria.
   - Proof of required immunizations consistent with Department Policy. See Department webpage for details.
   - Completion of background check consistent with Department Policy. See Department webpage for details.
   - Students must complete all clinical practica in the prescribed sequence. Students who have not completed a given semester's clinical practica will not be allowed to progress into subsequent clinical practica, including internships and the externship.
   - Current certification in Cardiopulmonary Resuscitation (CPR) for Health Care Providers.

3. There are specific clock-hour requirements for the California License in Audiology, as well as requirements for the Accreditation Commission for Audiology Education (ACAED) and Council on Academic Accreditation (CAA). Students who wish to pursue the Certificate of Clinical Competence (CCC) prior to graduation must meet those requirements in consultation with the Clinic Coordinator.

4. Internship requirements: Documentation of the following is required by the end of the second clinical semester.
   - Current certification in Cardiopulmonary Resuscitation (CPR) for Health Care Providers.
   - Complete Certificate of Clearance.

5. Students must furnish their own transportation to off-campus practicum sites.

6. Students must explore and complete additional internship requirements as delineated by each site.

7. Clock hours from the following may be counted for the California License in Audiology only if the on-site supervisors have their CCCs and California License in Audiology.

### Audiology Doctoral Project

1. Students must meet the clinical practicum requirements, including approved hours, for the California License in Audiology at the time of graduation in order to receive the Au.D. degree.

2. Students must submit a signed record of all observation hours and supervised clinical clock hours to the Communication Sciences and Disorders Department. Students should retain multiple copies for their personal records.

3. Students earning less than a B in clinical practicum must repeat the clinical experience during the following semester. Hours earned for the semester in which the student earned less than a B will not be counted.

**Definition:** The Au.D. doctoral project is an independent research study conducted by the student under the supervision of members of the faculty. The project must include a testable research question and hypothesis, review of pertinent literature, and the collection and analysis of data. It is the student's responsibility to locate and recruit subjects and to collect the data, as well as to write the paper. Papers that are based on original data are preferred; however, those based on secondary data sources will also be considered.

**Supervision:** The doctoral project is supervised by a committee of three faculty members in the Department of Communication Sciences and Disorders. The "first reader" is the chair of the committee and the student's primary advisor and editor. The "second reader" and "third reader" evaluate the proposal at the beginning, consult on the development of the paper as necessary, and must approve the final paper.
Credit: A student enrolls in one unit of Audiology Doctoral Project each semester he/she works on the project for a total of five units. Students must complete the project before the end of the third year in order to complete degree requirements.

Audiology Progress Exam (CSAD 510)
Consists of written and clinical portions. Both portions must be passed according to the criteria below:

Formative written exam: Based on coursework taken in the first year of the Au.D. program (anatomy and physiology, acoustics and psychoacoustics, instrumentation, audiologic evaluation, amplification, disorders of the auditory system, genetics, research methods, and pediatric and educational audiology). The exam is administered during the summer of the first year. The exam period is over two days, and students will write for up to four hours each day.

1. Faculty will develop questions and scoring rubrics for each of the nine subject areas assessed based on expertise and subject areas taught.
2. Each response will be scored by two faculty members. If two faculty members award different scores (e.g. pass and no-pass), a third faculty member will serve as a tie breaker. Faculty scores are confidential.
3. Upon completion and review by the examiners, each question is given a grade of "Pass," "Conditional Pass," or "No-Pass"
   a. "Pass" indicates a satisfactory completion of the question.
   b. "Conditional Pass" indicates a pass, but the examiners require additional work or remediation. Examiners are required to provide written feedback of the student's responses. Deficiencies can be addressed through an oral exam for further clarification or course work remediation (reading, independent study, etc.), which is determined by the faculty examiner and Au.D. Program Director. A timeline for this remediation plan and a method for verifying completion of the work must be determined by the faculty examiners, Au.D. Program Director, and the student.
   c. "No-Pass" indicates an unsatisfactory answer. Students are required to meet with the examiners and Au.D. Program Director to review their performance. Students who receive "No-Pass" results on less than or equal to 25% of the questions will meet with the examiners to address deficiencies.
4. Students must receive a "Pass" on all areas of the exam to proceed to the second year.
5. Students receiving conditional "Pass" results on more than 50% of the questions may be placed on academic probation and given the opportunity to retake the exam by the end of the summer semester after completing remediation work. Failure to receive a "Pass" on the second administration of the exam will result in dismissal from the program.
6. Students receiving "No-Pass" results on more than 25% of the questions will be dismissed from the program.

Clinical exam: Includes a practical portion and a case study. Students will perform clinical procedures related to the topics presented in CSAD 614: Audiologic evaluation, CSAD 622: Amplification I, CSAD 622L: Amplification I lab, CSAD 631: Amplification II, and CSAD 632: Pediatric and Educational Audiology. Students will perform the evaluation in the presence of an Au.D. faculty member. The second part of the clinical exam will involve the presentation of a case study in which students will discuss their preparation for the appointment, possible diagnostic results, clinical interpretation of findings, and recommendations.

1. Grading
   a. Students must pass the clinical portion of the exam at 80% or higher in order to enroll in CSAD 504.
   b. Students receiving less than 80% will have one opportunity to retake the clinical portion of the exam and receive a "Pass" result.
   c. Students who fail to receive a "Pass" result on the second attempt will be removed from the program.

Audiology Comprehensive Exam (CSAD 520)
Definition: Summative written and oral exam that assesses knowledge and skills gained through coursework and/or clinical practica, and evaluates problem-solving and critical thinking skills for clinical cases. The written exam will be completed within the first week of the testing period during the spring semester, and the oral exam will be scheduled during the second week of testing.

1. The written portion consists of 200 questions that evaluate students' knowledge of the first two years of didactic and clinical coursework. Students must score 80% or better on this section to pass. The exam period is up to four hours on one day.
   a. Students who receive less than 80% on the exam must develop a plan for remediation with the Au.D. program faculty. Students may retake the written portion of the exam once. Failure to achieve a passing score on the second attempt will result in dismissal from the program.
2. The oral exam includes three cases (e.g. pediatric, adult, vestibular, etc.). The student will discuss the case history information, diagnostic results, and management plan with the examining committee. Questions pertaining to interpretation of the test results, site-of-lesion determination, recommendations or referrals, and rehabilitation of cases will be asked. Students will be expected to reference research and/or evidence-based practice guidelines in their responses. Students will also be asked additional questions to respond to during this examination period.
   a. Each response to the oral exam will be evaluated by three Au.D. faculty members. Faculty will evaluate responses using a rubric for thorough discussion, appropriate assessments and recommendation, and correct responses to questions.
   b. Upon completion and review by the examiners, each question is given a grade of "Pass" or "No-Pass."
      i. "Pass" indicates a satisfactory completion of the question.
      ii. "No-Pass" indicates an unsatisfactory answer to any of the discussion questions of the oral exam. Students who receive a "No-Pass" result are not permitted to begin the third-year externship. Students will be given the opportunity to develop a remediation plan with Au.D. program faculty before retaking the exam at the end of the summer semester. Failure to receive a "Pass" result on the second attempt will result in dismissal from the program.

Additional Information
Licensure, Certification, and Fellowship
Students completing the program will be eligible to apply for California licensure in audiology and fellowship from the American Academy of Audiology. Students seeking the Certificate of Clinical Competence from the American Speech-Language and Hearing Association (ASHA) must
notify the clinical coordinator to find ASHA-certified supervisors for the placements.

**Licensure**

Admission into programs leading to licensure does not guarantee that students will obtain a license. Licensure requirements are set by agencies that are not controlled by or affiliated with the CSU and requirements can change at any time. For example, licensure requirements can include evidence of the right to work in the United States (e.g., social security number or tax payer identification number) or successfully passing a criminal background check. Students are responsible for determining whether they can meet licensure requirements. The CSU will not refund tuition, fees, or any associated costs, to students who determine subsequent to admission that they cannot meet licensure requirements.

**Program Requirements**

Coursework in the Doctor of Audiology program are lockstep and begin in the fall semester. Students are admitted to the program on a yearly basis. There are eleven semesters in the program.

Units required for Doctorate of Audiology Program: 118 units

**MS in Communication Sciences and Disorders**

Total units required for MS: 58-60 units

**Program Description**

Employment as a Speech-Language Pathologist in California requires both a Master's degree and a credential or license. Completion of the Master's degree provides the training necessary for students to qualify for the American Speech-Language-Hearing Association's Certificate of Clinical Competence in Speech-Language Pathology, the California State License in Speech-Language Pathologist and the California Speech-Language Pathology Services Credential. The Department also prepares students to apply for the Special Class Authorization, an extension of the Speech-Language Pathology Services Credential, required to teach a classroom of students with primary disabilities in the area of speech and
language impairment (Other experiences and exams are also required; these will be described below under "Additional Information").

**Admission Requirements**

- Students must have an undergraduate degree (or its equivalent) in Speech-Language Pathology, Communication Sciences and Disorders, or its approved equivalent.
- Students must understand that admission preference is given to students whose undergraduate curriculum is equivalent to Sacramento State’s Communication Sciences and Disorders Undergraduate Curriculum.
- Students must have completed the required major prerequisite coursework as delineated in the Undergraduate Program Catalog description for Communication Sciences and Disorders at Sacramento State before beginning graduate-level coursework in Communication Sciences and Disorders. [Pre-requisites: CHAD 30, PSYC 2, Statistics, DEAF 51, or their equivalents].
- Students must have completed one university-level biological science course and one university-level course covering the basic principles of either physics or chemistry.
- Students must have an overall GPA of 2.75 and a 3.00 GPA in the major.
- Domestic applicants with foreign documents and international students (F-1 or J-1 visa applicants) must consult the Office of Graduate Studies and Global Education/International Admissions Department for specific application instructions. These students must also submit TOEFL scores. Consult the Department website for department-specific TOEFL scores.
- Successful passage of all three sections of CBEST (waived for the Fall 2021 Admissions Cycle due to COVID-19).
- GRE scores obtained in the last 5 years (waived for the Fall 2021 Admissions Cycle due to COVID-19).
- Three letters of recommendation.
- Oral and written essay.
- Resume of related work, volunteer and multicultural experience, and any scholarships, awards or other commendations.
- Documentation of completed observation hours.
- Students must understand that admission preference is given to students whose undergraduate curriculum is equivalent to Sacramento State’s Communication Sciences and Disorders Undergraduate Curriculum.

**Communication Sciences and Disorders Graduate Program Policies and Procedures**

1. A student must have a 3.0 GPA in the major in order to graduate with a Master of Science Degree in Communication Sciences and Disorders. To achieve this GPA, students may not earn a grade of less than B in any major didactic course or a grade of less than B- in any clinical practicum. Repeated course grades will either be forgiven or averaged with the new grade according to the campus graduate policy on repeating courses. Students failing to maintain a GPA of 3.00 are automatically placed on academic probation. The student then has one semester to make up the grade point deficiency or s/he will not be allowed to continue the graduate program and will be dismissed. Any student who has failed any two clinical practicum courses will not be allowed to continue in the graduate program and will be dismissed.

2. Prior to enrolling in any Clinical Practica, students must fulfill the following criteria:

   a. Proof of required immunizations consistent with Department Policy. See Department webpage for details.
   b. Complete a background check consistent with Department Policy. See Department webpage for details.
   c. Students must complete all clinical practica in the proscribed sequence. Students who have not completed a given semester’s clinical practica will not be allowed to progress into subsequent clinical practica including internships.
   d. Current certification in Cardiopulmonary Resuscitation (CPR) for Health Care Providers.

3. Students must meet clock-hour requirements for the American Speech-Language and Hearing Association (ASHA) Certificate of Clinical Competence (CCC), California License in Speech-Language Pathology and the California Speech-Language Pathology Services Credential with or without Special Class Authorization.

4. Internship requirements: Documentation of the following is required by the end of the second clinical semester.

   a. Current certification in Cardiopulmonary Resuscitation (CPR) for Health Care Providers.
   c. Pass the California Basic Educational Skills Test (CBEST)
   d. Students must complete CSAD 295I and CSAD 295M. Optional additional clinical practica are: CSAD 295S and CSAD 295P

5. Students must furnish their own transportation to off-campus practicum sites.

6. Students must explore and complete additional internship requirements as delineated by each site.

7. Clock hours from the following may be counted for the CCC and California License in Speech-Language Pathology only if the on-site supervisors have their CCCs and California License in Speech-Language Pathology.

<td>Internship: Speech-Language Pathology in Private Practice</td>
<td>4</td>
</tr>
<tr>
<td>CSAD 295S</td>
<td>Internship: Special Class Authorization Eligibility</td>
<td>4</td>
</tr>
</tbody>
</table>

8. Students must complete 100 supervised, direct-client-contact practica hours over forty-five work days in CSAD 295I and in the optional CSAD 295S.

9. Students must meet the clinical practicum requirements for the Certificate of Clinical Competence (CCC) and the California License in Speech-Language Pathology at the time of graduation in order to receive the Master’s Degree.

10. Students must submit a signed record of all observation hours and supervised clinical clock hours to the Department of Communication Sciences and Disorders. Students should retain multiple copies for their personal records.

11. Advancement to Candidacy: Students must file for Advancement to Candidacy per Office of Graduate Studies procedures as posted on their website.
Additional Information

Program Completion
If the Bachelor’s Degree in Communication Sciences and Disorders, or its equivalent, has been completed at another University, additional time may be needed to complete the undergraduate requirements not already met. If courses are waived at Sacramento State because they were taken at another University, the student must have an adequate number of graduate units at Sacramento State in the major to meet the MS degree requirements and ASHA graduate-level requirements.

Certificate of Clinical Competence
The Master of Science Degree from Sacramento State is designed to fulfill the academic and clinical requirements for the Certificate of Clinical Competence (CCC), which is granted by the American Speech-Language-Hearing Association (ASHA). The student must complete a Clinical Fellowship (one year of paid professional experience under supervision) and pass the appropriate PRAXIS exam before the certificate is granted.

Licensure
The Master of Science Degree from Sacramento State is designed to fulfill the academic and clinical requirements for the California License in Speech-Language Pathology. The license is required for employment in settings other than schools or federal agencies. Students must complete a Clinical Fellowship Year (one year of paid professional experience under supervision) and pass the appropriate PRAXIS exam before the license is granted.

Credential
The Master of Science Degree from Sacramento State is designed to fulfill the academic and clinical requirements for the California Speech-Language Pathology Services Credential. This credential authorizes the individual to work as an itinerant speech-language pathologist in the California public schools. In addition, the applicant may also qualify as a teacher of a special day class for students with primary disabilities in the area of speech and language impairment by acquiring the Special Class Authorization. This authorization, an extension of the Speech-Language Pathology Services Credential, requires completion of the SPHP 295S: Special Day Class Internship, passage of the Reading Instruction Competence Assessment (RICA), and passage of appropriate California Subject Matter examinations for Teachers (CSET: Multiple Subjects OR a single subject CSET in the areas of art, English, foreign language, mathematics including foundational-level mathematics, music, social science, or foundational-level general science). Note: For students with undergraduate degrees in the single subject areas listed above, completion of a subject matter program in one area or an applicable subject matter waiver program may fulfill this subject matter requirement.

For more information on these examinations, the student is referred to the CTC Exams website (http://www.ctcexams.vesinc.com/).

Candidates must pass the California Basic Education Skills Test (CBEST).

Note:
Admission into programs leading to license, credential, and certification does not guarantee that students will obtain a license, credential, or certification. License, credential, and certification requirements are set by agencies that are not controlled by or affiliated with the CSU and requirements can change at any time. Additionally, licensure or credential requirements can include evidence of the right to work in the United States (e.g., social security number or tax payer identification number) or successfully passing a criminal background check. Students are responsible for determining whether they can meet license, credential, or certification requirements. The CSU will not refund tuition, fees, or any associated costs, to students who determine subsequent to admission or after completion that they cannot meet license, credential, or certification requirements. Information concerning license, credential, or certification requirements are available from the department graduate coordinator who can be reached at (916) 278-4867.

Minimum Units and Grade Requirement for the Degree
Units required for the MS: 58-60
Minimum Cumulative GPA: 3.0

Advancement to Candidacy
Students must advance to candidacy before they can enroll in CSAD 500C, CSAD 500P or CSAD 500T (see culminating experience below).

Program Requirements
Graduate courses are designed for students to begin in the fall semester and progress in a proscribed sequence. Students are admitted into the program in two cohorts. The first cohort (Fall Clinical Practica Cohort) begins clinical practica and coursework in the fall semester and can expect to graduate in a minimum of 4 semesters. The second cohort (Spring Clinical Practica Cohort) begins coursework in the fall semester and begins clinical practica in the spring semester. This group can expect to graduate in a minimum of 5 semesters.

### Unit Requirements

- Minimum of 8 units of internships required for the Master of Science Degree in Communication Sciences and Disorders.
- If a student elects to pursue an additional internship experience, then the student may enroll in one or more of these experiences.
- Students completing a thesis or project must enroll in two units of CSAD 500T or CSAD 500P in semester 3 AND semester 4. Students completing the comprehensive examination must enroll in 2 units of CSAD 500C in semester 4.

---

1. Minimum of 8 units of internships required for the Master of Science Degree in Communication Sciences and Disorders.
2. If a student elects to pursue an additional internship experience, then the student may enroll in one or more of these experiences.
3. Students completing a thesis or project must enroll in two units of CSAD 500T or CSAD 500P in semester 3 AND semester 4. Students completing the comprehensive examination must enroll in 2 units of CSAD 500C in semester 4.
Culminating Experience

In order to enroll in CSAD 295P or CSAD 500P in semester 3 AND semester 4. Students completing the comprehensive examination must enroll in 2 units of CSAD 500C in semester 4.

1 Minimum of 8 units of internships required for the Master of Science Degree in Speech-Language Pathology.
2 If a student elects to pursue an additional internship experience, then the student may enroll in one or more of these experiences.
3 Students completing a thesis or project must enroll in two units of CSAD 500T or CSAD 500P in semester 3 AND semester 4. Students completing the comprehensive examination must enroll in 2 units of CSAD 500C in semester 4.

Culminating Experience

1. A student working toward a master's degree may choose as a Culminating Experience either a Thesis CSAD 500T, Project CSAD 500P, or Comprehensive Examination CSAD 500C.
2. In order to enroll in CSAD 500T, CSAD 500P, or CSAD 500C a student must have been advanced to candidacy.
3. A student may not register for CSAD 500T unless the following conditions have been met:
   • The first and second readers judge that the first two chapters of the thesis or project (literature review and methodology) are sufficiently well-developed.
   • Her/his proposal has been approved by the Culminating Experience Committee no later than the 11th week of the second clinical semester. The proposal must include the first two chapters specified above.
   • Institutional Review Board (IRB) approval has been obtained. It is possible for this process to take up to a full academic year.
   • Written approval of the first reader has been accepted by the Department Chair.
4. No subjects may be recruited until the student has registered for CSAD 500T and has received Institutional Review Board (IRB) approval.
5. A student may not register for CSAD 500P until the following conditions have been met:
   • The first and second readers judge that her/his written proposal describing the project's significance, objectives, methodology, and conclusions or recommendations are sufficiently well-developed.
   • Her/his proposal has been approved by the Culminating Experience Committee no later than the 11th week of the second clinical semester. The proposal must include the first project description specified above.
   • Written approval of the first reader has been accepted by the Department Chair.
   • Institutional Review Board (IRB) approval obtained, if applicable.
     It is possible for this process to take up to a full academic year.
6. A student enrolled in CSAD 500T or CSAD 500P may switch to the CSAD 500C Comprehensive Exam with approval from the Culminating Experience Committee and submission of a Petition for Exception form. There is no reversal of this change.

Thesis (CSAD 500T)

• Definition: A thesis is an independent research study conducted by the student under the supervision of members of the faculty. A thesis must involve a research question or hypothesis, review of pertinent literature, and the collection and analysis of data. It is the student’s responsibility to locate and recruit subjects and to collect the data, as well as to write the thesis. A thesis that includes the generation of original data is preferred; however, proposals based on file data or other secondary data sources will be considered.
• Supervision: A thesis is supervised by a committee of two or more faculty members in the Department of Communication Sciences and Disorders. The "first reader" is the chair of the committee, and the student’s primary advisor and editor. The "second reader" evaluates the thesis at the beginning, consults on the development of the manuscript as necessary, and must approve the final manuscript.
• Credit: A student enrolls in two units of CSAD 500T each semester he/she works on the thesis, up to a total of four units. If the thesis is not completed within two semesters the student may enroll in continuous enrollment (CSAD 599), if not otherwise actively enrolled, for two additional semesters. Students are allowed a maximum of three semesters past the semester of first registering in CSAD 500T to complete their thesis for a maximum of four semesters total. Students who do not finish the thesis within the first semester of enrolling in CSAD 500T will receive a grade of "Report in Progress" (RP). If a student does not complete the thesis within the four total semesters, s/he will receive a No Credit (NC) grade for the original units and must enroll in CSAD 500C for the culminating experience.

Project (CSAD 500P)

• Definition: A project is a significant undertaking appropriate to the professional fields of Speech-Language Pathology or Audiology. It must evidence originality and independent thinking, appropriate form and organization, and a rationale. It must be described and summarized in a written document that includes the project's significance, objectives, methodology, and a conclusion or recommendation. The project can be, but is not limited to, a curriculum project that contributes to the fields by enhancing communication of the subject matter or a research project that contributes to the fields by adding to the professional knowledge base.
• Supervision: A project is supervised by a committee of two or more faculty members in the Department of Communication Sciences and Disorders. The "first reader" is the chair of the committee, and the student’s primary advisor and editor. The "second reader" evaluates the project at the beginning, consults on the development of the project as necessary, and must approve the final project.
• Credit: A student enrolls in two units of CSAD 500P each semester he/she works on the project, up to a total of four units. If the project is not completed within two semesters, the student may enroll in continuous enrollment (CSAD 599), if not otherwise actively enrolled, for two additional semesters. Students are allowed a maximum of three semesters past the semester of first registering in the CSAD 500P to complete their project for a maximum of four semesters total. Students who do not finish the project within the first semester of enrolling in CSAD 500P will receive a grade of "Report in Progress" (RP). If a student does not complete the project within the four total semesters, she/he will receive a No Credit (NC) grade for the original units and must enroll in CSAD 500C for the culminating experience.
Comprehensive Exam (CSAD 500C)

- Definition: Written exam comprised of eight questions. Examinees are given one-and-a-half hours to complete each question.
- Comprehensive Exams are scheduled once per semester at the discretion of the department.
- Upon completion and review by the examiners, each question is given a grade of "Outstanding", "Pass", "Pass with Conference" or "No-Pass."
  a. "Pass" indicates a satisfactory completion of the question.
  b. "Pass with Conference" indicates a pass, but the examiner requires oral or written clarification of the answer from the student. This must be completed before the 14th week of the semester in which the exam is taken. Conferences are scheduled at the discretion of the examiner.
  c. "No-Pass" indicates an unsatisfactory answer.
- The student may receive a "No-Pass" for up to two questions without retaking the entire exam. These "No-Pass" questions must be rewritten under the direction of the examiner.
- Question rewrites must be successfully completed with a grade of "Pass" before the 14th week of the semester in which the exam is taken.
- If any rewritten question is not passed, the student receives a grade of No Credit (NC) for CSAD 500C.
- If three or more questions of the exam receive a grade of "No-Pass", the student receives a grade of No Credit (NC) for CSAD 500C.
- Student receiving a grade of No Credit (NC) for CSAD 500C must register again in CSAD 500C and retake the comprehensive exam in its entirety at the next scheduled administration.
- The same conditions for grading apply on a retaken comprehensive exam as on the first attempt. Students may take CSAD 500C no more than two times.

Criminal Justice

College of Health and Human Services

Program Description

Criminal Justice encompasses multidisciplinary examinations of crime, crime control, the justice process, and justice institutions. The discipline addresses definitions, causation, prevention, investigation, legal process, treatment, rehabilitation, and research relating to crime and justice as well as the institutions of the justice system and their administration.

The comprehensive program at Sacramento State covers every aspect of the field. Courses are offered which span the entire system of justice administration in both public and private sectors.

The Division of Criminal Justice:

- Seeks to identify and increase understanding of major social issues related to crime, offenders, prevention and control, and victims.
- Features a large and diverse faculty combining scholars from a variety of disciplines who have contributed extensively to the justice field with practitioners who have many years of experience in justice administration.
- Offers a flexible undergraduate major, including the option of internship, and highly-structured advising. Advising allows the student to shape an undergraduate program specifically to prepare for employment in multiple areas of criminal justice, advanced study in criminal justice, or law school.
- Features a Master of Science program that offers students a generalist degree focused on a variety of areas within the field of Criminal Justice including, but not limited to, criminological theory and research methods, corrections, policing, law and justice, restorative justice, victimology, juvenile justice, white collar crime, terrorism, and comparative criminal justice. In addition, we offer experimental courses in areas with a growing body of research such as the mentally ill and the criminal justice system and emergency management.

Many graduates find positions with various federal, state, and local criminal justice agencies. Others have pursued advanced study in criminology and law. Employment opportunities for Criminal Justice majors have remained strong for the past decade, both with government agencies and in private security, and future demand appears assured.

The Criminal Justice program at Sacramento State is one of the most highly sought-after programs in Northern California. Due to the large number of applications, the program is now officially impacted. Students wishing to become Criminal Justice majors must complete a series of required lower division courses and then apply for admission to the program. It is highly recommended that interested students speak with the Criminal Justice Student Advising Center as early as possible.

Degree Programs

BS in Criminal Justice (p. 693)

Minor in Forensics Investigations (Chemistry and Biology Majors Only) (p. 696)

Certificate in Law Enforcement (p. 696)

MS in Criminal Justice (p. 697)

Career Possibilities

Investigative positions, most with law enforcement authority, with federal, state, and local agencies such as the FBI, ATF, Secret Service, DEA, Homeland Security Administration, state level Departments of Justice, Alcohol Beverage Control, Department of Motor Vehicles, District Attorney’s and Public Defender’s Offices · Includes uniformed police officer positions within local and state governments, such as: police officer, deputy sheriff, highway patrol, and natural resources officer, including crime scene specialists, and crime analysts · Correctional peace officer positions including state and local probation officers and parole agents within adult and juvenile correctional systems · Includes non-sworn correctional counselors and administrators. Private corporate security agents and investigators such as those employed by banks and insurance companies and transportation companies, including loss-prevention specialists · Victim services and officer services positions within a wide variety of social service agencies related to crime, justice, and rehabilitation · In addition, graduates can pursue advanced degrees in law or research disciplines, and may apply to military officer candidate schools.

which prepare students for the study and practice of law.

The areas of study encompass these recommendations and suggest courses which give training in these skills. The following topics are taught by attorneys licensed by the bar. In addition, the major in law and constitutional theory courses among its electives. The department offers intern placements in law related positions. Law courses are instructed in the case study method used in law schools. This instruction allows a student to determine their level of interest and aptitude for legal studies while still an undergraduate. Several members of the teaching faculty are attorneys, and law courses are taught by attorneys licensed by the bar. In addition, the major in criminal justice offers a general orientation to the justice field and provides students a suggested pre-law course of study engineered to provide an excellent foundation for the study of law.

Law as a Career

Lawyers are often called upon to fill many varied and complex roles. At various times they function as advocates, social planners, and mediators. Because society turns most frequently to the legal profession when it looks for a method of balancing changing conditions and traditional values, lawyers are social planners. Lawyers play a weighty role in our society and have a tremendous responsibility, not only to the citizenry which they serve, but also to the law itself, and to the concept of justice, to which they must be committed.

Pre-Law Education

The student's cumulative undergraduate GPA and his/her score on the Law School Admissions Test (LSAT) are the primary factors on which law schools base their admissions decisions. The importance of these factors cannot be overestimated. Assuming that you qualify in this manner for admissions, your undergraduate course of study plays a role in preparing for the study and practice of law. Students interested in law school should visit the Law School Admission Council's website www.lsac.org (http://www.lsac.org/) early in their college careers in order to learn about the process of preparing for and applying to law school.

Undergraduate Program

It would be unwise and, perhaps, impossible to prescribe a specific course of study and assert that it is the best one can receive in preparation for entering law school. Therefore, there is no established major for pre-law students. In 1988, the Association of American Law Schools (AALS) expressed the view that the "quality of education is concerned with the development of basic skills and insights. It thus involves education for:

1. comprehension and expression in words;
2. critical understanding of the human institutions and values with which the law deals;
3. creative power in thinking;
4. knowledge of computers and word processing."

While no one major embraces all of these characteristics and, while personal development in these areas is an individualistic effort molded to one's particular strengths, weaknesses, and interests, the University offers numerous courses which give training in these skills. The following areas of study encompass these recommendations and suggest courses which prepare students for the study and practice of law.

- **Business:** When an individual becomes a lawyer, he/she also becomes a member of the business community; hence, classes in business are beneficial to the pre-law student. Competence in this field can make the difference between an organized, successful lawyer and a bewildered, ineffective one. Furthermore, the practical judgment one develops in business classes frequently allows one to penetrate the legal maze and to quickly reach the important issues of any case.

  - **Computer Science:** In an age where information storage and problem solving is increasingly accomplished by computers, a lawyer cannot afford to venture into the future without a working knowledge of computers.

  - **Criminal Justice:** The Division of Criminal Justice includes three law courses in its core curriculum and offers the option of additional law and constitutional theory courses among its electives. The department offers intern placements in law related positions. Law courses are instructed in the case study method used in law schools. This instruction allows a student to determine their level of interest and aptitude for legal studies while still an undergraduate. Several members of the teaching faculty are attorneys, and law courses are taught by attorneys licensed by the bar. In addition, the major in criminal justice offers a general orientation to the justice field and provides students a suggested pre-law course of study engineered to provide an excellent foundation for the study of law.

  - **Economics:** As the AALS asserts: "Economics is a science that calls upon the student to master patterns of thought, to explore questions of causation and to probe potentials for solutions." Since many legal problems ultimately involve economic issues, a study of economics will benefit the pre-law student.

  - **History and Government:** We are a product of yesterday in our society, our customs and our laws. Without a general understanding of history and how it relates to our present state, the lawyer cannot appreciate the intimate relationship laws have with our culture. By failing to comprehend the relationship between our society, its governmental institutions, and its laws, one risks not understanding certain laws intelligible only in terms of their historical and institutional significance.

  - **Logic and Mathematics:** Since the law is abstract, those considering law school need training in the reasoning powers essential for dealing with abstract concepts. The study of logic and mathematics provides the practice needed for developing the ability to think logically.

  - **Oral and Written Communication:** The lawyer is primarily a communicator; whether in the courtroom or in the legislature, as a counselor or negotiator, he/she must know how to communicate on many levels with precision and style.

  - **Philosophy:** A sizable number of students of philosophy go on to law school and there are now many successful philosopher-lawyers. This is no mere coincidence. Legal questions often raise issues of profound philosophical import. And the two fields share many of the same methods of reasoning and argumentation. The Philosophy Department's Major Concentration in Applied Ethics and Law is specifically designed to prepare prospective students for the intellectual rigors of law school.

  - **Science and Engineering:** Students who concentrate in the sciences or in engineering develop the ability to think clearly and concisely. The rigor and discipline required in these courses is valuable training for the law school years.

  - **Social Sciences:** Since both law and social science deal with behavior and its implications, lawyers draw on the social sciences for an understanding of human behavior. Applying the tools of the other social sciences to the practice of law enhances the effectiveness of the attorney.
Obviously, one cannot receive degrees in all of these areas; it is suggested that the pre-law student choose a major which interests him/her and supplement this curriculum with as many courses from other areas as possible. In addition to this, the pre-law student should read widely in areas outside the major.

**Pre-Law Student Organization**

The Phi Alpha Delta Law Fraternity International has been formed by pre-law students to meet the needs of students interested in preparing for a career in law. CSU, Sacramento has an active Phi Alpha Delta chapter and information about joining can be acquired by visiting one of the campus pre-law advisors.

**Grades**

Good grades are essential to those interested in being accepted at a well regarded school. However, it should be clear that one does not benefit from being so grade conscious that the major criterion for course selection becomes the likelihood of receiving an “A.” Tough, demanding professors and courses are essential for training the mind to perform well under the pressures of law school. Challenging, thought-provoking courses are the best way to prepare for the LSAT, for success in law school and as a member of the legal profession. Moreover, when undergraduate transcripts are viewed by law school admission committees, a great deal of attention is given to the difficulty and the desirability of the courses chosen by the student. For law school admission, grades of “I” (incomplete) or “W” (Withdrawal) are not included in computing the overall GPA. However, a grade of “WU” or “NC” (No Credit) is counted as an “F,” and if a course is repeated, the two grades are averaged. Students should also note that failure to complete work for a grade posted as “I” will result in the “I” converting to an “F” after two semesters.

**LSAT**

The LSAT is the second major factor considered by law schools in determining admissibility. It is administered by the Law School Admission Council (LSAC). Everything a student needs to know about the LSAT is available at www.lsac.org (http://www.lsac.org/). The test measures abilities and skills related to problem identification, analysis, logical reasoning, and reading. In addition, the LSAT includes a written essay, copies of which will be sent to individual law schools to enable them to evaluate a candidate’s writing ability. Because many law schools consider the LSAT as influential, or more influential, than the GPA, it is important that students prepare for the test very carefully. Students who believe they may qualify for a fee waiver because of serious financial need should apply for the LSAC fee waiver at www.lsac.org. The fee waiver will cover the student’s LSAT and Credential Assembly Service fees as well as provide materials that will enable the student to prepare for the LSAT.

There are a number of preparation courses available for students intending to take the LSAT. Students are advised to investigate particular review classes and to assess their ability to prepare successfully for the LSAT without benefit of these often costly courses. The best LSAT preparation materials are those published by the LSAC.

**Letters of Recommendation**

Most law schools require between one to three letters of recommendation from individuals who can comment on the applicant’s potential as a law student. The individuals selected to write letters of recommendation should be able to comment extensively on the applicant’s academic capabilities. And, obviously, the evaluation should be a positive one. Letters should also discuss the applicant’s ability to comprehend, to communicate, and to critically analyze concepts.

**Credential Assembly Service**

Student’s must register for the Credential Assembly Service (CAS) at www.lsac.org (http://www.lsac.org/) in order to submit applications for American Bar Association accredited law schools. There is a fee associated with registration for the CAS which is waived if the student is approved for the LSAC fee waiver. The CAS compiles a report that contains the student’s personal information, LSAT score(s), transcripts, letters of recommendation and, if prepared, recommender evaluations. The student completes each individual law school application online using their account at www.lsac.org (http://www.lsac.org/). Once the student has submitted the application the law school requests the CAS report and it is transmitted electronically to them by the LSAC.

**Personal Statement**

Most law schools require the applicant to submit a personal statement in which the applicant tells the law school something about the applicant’s background, the reasons why the applicant wants to study law, and, in some instances, what the applicant hopes to do following law school. This is an extremely important component of the application. It provides the student with an opportunity to share their personal background and experiences with the law school admissions committee. Students should take time to carefully craft the personal statement and should seek advice from trusted friends, professors and their pre-law advisor to help them in the writing process.

**Pre-Law Advisors**

Laurie Kubicek, Criminal Justice
Alpine Hall 103, 278-5066

Russell Loving, Criminal Justice
Alpine Hall 110, 278-6473

Stephanie Mizrahi, Criminal Justice
Alpine Hall 107, 278-6387

Jennifer Noble, Criminal Justice
Alpine Hall 209, 278-5706

CRJ 1. Introduction to Criminal Justice and Society. 3 Units
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall, Spring
Reviews the problem of crime and the societal response to criminals. Institutions discussed are those intended to discover the crime and the criminal and those designed to deal with the criminal, the victim, and society, once the criminal has been labeled. Finally, the bureaucracy of crime and its measurement as a social phenomenon are discussed.

CRJ 2. Law of Crimes. 3 Units
Term Typically Offered: Fall, Spring
Introduction to the case method of studying criminal law. Understanding and correlating the common law crimes and substantive law crimes. Study and emphasis on the classification and nature of crimes, the requisite elements of the major common law felonies and criminal responsibility of various persons involved in crime.
CRJ 4. **General Investigative Techniques.** 3 Units  
Term Typically Offered: Fall, Spring

Techniques involved in the investigation of crimes; interview of victims and witnesses; questioning of suspects; organization and procedure in the investigation of crimes; crime scene searches; surveillance, use of scientific aids; and sources of information.

CRJ 5. **The Community and the Justice System.** 3 Units  
Term Typically Offered: Fall, Spring

Examines complex, dynamic relationships between communities and the justice system in addressing crime and conflict with emphasis on the challenges and prospects of administering justice within a diverse, multicultural population and the roles played by race, ethnicity, gender, religion, sexual orientation, age, social class, culture, and justice professionals in shaping relationships within the justice system. Special topics include crime prevention, restorative justice, and conflict resolution and pure justice.

CRJ 101. **Introduction to Criminal Justice Research Methods.** 3 Units  
Prerequisite(s): Restricted to Criminal Justice majors  
Term Typically Offered: Fall, Spring

Introduction to research methodologies used in the social sciences, with a special emphasis on those methods most often used in the study of crime and criminal behavior, police/court systems, and correctional institutions, policies, and programs. Students will acquire the knowledge and skills necessary to understand, critically analyze and assess descriptive and quantitative research studies. Topics include the roles of theory and ethics in research, hypothesis testing, and research design.

CRJ 102. **Crime And Punishment.** 3 Units  
Prerequisite(s): Criminal Justice major  
Term Typically Offered: Fall, Spring

This course provides an overview of the causes, consequences and responses to crime in society, with special emphasis on the use of theory and research to guide criminal justice policy and practice. The course surveys major theories of crime causation, examines consequences of crime on individuals and societies, and explores various perspectives on the appropriate role of criminal sanctions and offender treatment in modern day systems of justice.

CRJ 105. **Delinquency, Prevention and Control.** 3 Units  
Prerequisite(s): CRJ 101 and CRJ 102; restricted to declared majors or chair permission.  
Term Typically Offered: Fall only

Comprehensive juvenile delinquency planning process and its contribution to effective delinquency prevention and control; new roles for delinquency control agencies (police, courts, and corrections); the Youth Service Bureau; innovative strategies in delinquency prevention programming.

CRJ 106. **Analysis of Career Criminals.** 3 Units  
Prerequisite(s): CRJ 101 and CRJ 102; restricted to declared majors or chair permission.  
Term Typically Offered: Fall, Spring

Observation and analysis of criminal career patterns using the following approaches: anthropological, autobiographical, psychological, psychiatric, and sociological. The examination of career criminal behavior patterns will focus upon: the process of induction into criminal activity; the deviant orientation of the professional criminal; the organization, lifestyle, and activities of the specialized criminal; and the methodological problems associated with the measurement of recidivism.

CRJ 108. **Domestic Crime and Violence.** 3 Units  
Prerequisite(s): CRJ 101 and CRJ 102; restricted to declared majors or chair permission.  
Term Typically Offered: Fall, Spring

Detailed examination of the multiple causes, effects and dynamics of crime against children, spouses, domestic partners and the dependent elderly, the response of criminal justice agencies to these crimes and the impact of these crimes on their victims.

CRJ 109. **Media, Crime, and Criminal Justice.** 3 Units  
Prerequisite(s): CRJ 101 and CRJ 102; restricted to declared majors or chair permission.  
Term Typically Offered: Fall only

Analyzes the social construction of crime by news and entertainment media and introduces criminal justice students to the manner in which the media influences and shapes crime in their own society and in the criminal justice system. Analyzes images of crime and the criminal justice system that are presented through the major mass media within America, including a detailed analysis of media institutions, American pop culture, and the construction of crime and justice. Exposes students to a new way of looking at crime problems and provide them with a deeper understanding of how crime and the criminal justice system are both socially constructed by the news and entertainment media.

CRJ 111. **Women and the Criminal Justice System.** 3 Units  
General Education Area/Graduation Requirement: GE AREA D  
Term Typically Offered: Fall only

Survey of the roles of women as offenders, victims and employees in the criminal justice system. Examines statistics, research and the literature as it relates to female crime. Evaluates current patterns and practices of law enforcement, criminal courts and corrections relative to women as offenders, victims, and employees.

CRJ 112. **Gangs and Threat Groups in America.** 3 Units  
General Education Area/Graduation Requirement: GE AREA D  
Term Typically Offered: Fall, Spring

Examination of criminal organizations in America. The problems posed by "anti-social groups," their structure and their history in contemporary American society. The spectrum of social sciences is employed in an examination of "illegal groups" and such issues as aggression and group dynamics. Styles such as street gangs, prison gangs and traditional organized crime are defined and studied.
CRJ 114.  Sexual Offenses and Offenders.  
General Education Area/Graduation Requirement: GE AREA D  
Term Typically Offered: Fall, Spring

Exploration of relevant factors and dimensions of sexual offenses and offenders related to the Criminal Justice system, its cliental and practitioners.

CRJ 115.  Violence and Terrorism.  
General Education Area/Graduation Requirement: GE AREA D  
Term Typically Offered: Fall, Spring

Systemically examines political violence, responses by government institutions to that violence and implications of both for the administration of justice. Content is structured along a continuum, ranging from small scale violence to mass violence - assassinations, terrorism by sub-national and transnational organizations, state terror and genocide. In recent years political violence has progressively drawn the American governmental institutions, particularly justice agencies, into the global picture of violence committed by both domestic and international terrorists.

General Education Area/Graduation Requirement: GE AREA D  
Term Typically Offered: Fall, Spring

Examines concepts, principles, techniques of conflict resolution and restorative justice in contemporary US legal system, global peacebuilding, across cultures, and comparative justice practices. The centerpiece is a classroom simulation that introduces students to theoretic analysis and practical knowledge on resolution of conflicts and crime. Addresses nonviolent responses to inter/intra state and community conflicts. Topics include negotiation, mediation, victim offender reconciliation, alternative dispute resolution (ADR), circle sentencing, transitional justice, peace treaty, transformative justice, intergroup dialogues, etc.

CRJ 117.  American Criminal Justice and Minority Groups.  
General Education Area/Graduation Requirement: Race & Ethnicity  
Graduation Requirement (RE), GE AREA D  
Term Typically Offered: Fall, Spring

Course examines the origins of racial/ethnic/gender/sex discrimination and disparities in the US justice system. Additionally, course provides a critical examination of the processes and outcomes of the justice system by reviewing the major theories of crime and number of minorities reported in crime data. Using discussions about various criminal justice policies and their impact on minority groups, the course assesses the changing dynamic of race relations and diversity in society and their influences on justice administration.

CRJ 118.  Drug Abuse and Criminal Behavior.  
General Education Area/Graduation Requirement: GE AREA D  
Term Typically Offered: Fall, Spring

Sociogenic review of the case histories and life styles of selected juvenile and adult offenders with a history of drug abuse. An inquiry into the drug scene, "street" drugs, an examination of people who have abused drugs and have been guilty of delinquent or criminal acts for the purpose of determining the known and identified relationships between drug abuse and crime, and probing the many unknown relationships. A sustained and disciplined examination of the main issues and problems by the use of case studies, discussion groups, and student involvement.

CRJ 121.  The Structure and Function of the American Courts.  
Term Typically Offered: Fall, Spring

Overview of the Federal and State court structures including jurisdiction, venue, roles of court participants, due process and post arrest procedures employed in adjudication, trial process, appellate review. Constitutional issues such as discretion, indigent rights, right to counsel, discovery, pleas, bail and preventive detention, competency, evidence suppression, double jeopardy, and speedy trial will also be addressed.

CRJ 123.  Law of Arrest, Search and Seizure.  
Term Typically Offered: Fall, Spring

Current and recent developments relating to arrest, searches, and seizures; study of constitutional rights predominately associated with the Fourth, Fifth, Sixth and Fourteenth Amendments as related to criminal justice and its administration – warrants, warrantless seizures, exclusionary rule, confession, eye-witness identification, electronic surveillance, entrapment, and state variance with federal rules. Case study method law course.

CRJ 125.  Law of Responsibility.  
Term Typically Offered: Spring only

Substantive criminal law of responsibility and culpability. Topics include legal cause, mens rea, negligence, intent and its equivalents, motive, immaturity, mental incapacitates, mistake, and affirmative defenses including authority and privilege as found in American statute and case law. A case method law course.

CRJ 126.  Law of Evidence.  
Term Typically Offered: Fall only

Law of evidence as codified and its complimentary interpretations by the courts. Topics include the admission and exclusion of evidence, relevance, the hearsay rule and its exceptions, the use of writings and demonstrative evidence, judicial notice, order of proof and presumptions, and issues relating to witness competency and privileges. Constitutional exclusions and their impacts are not covered.

Term Typically Offered: Fall, Spring

Overview of legal concepts and principles affecting the adjudication of delinquent children in juvenile and adult court systems, develops the ability to read and analyze difficult legal issues relating to juvenile law, and provides the information required to evaluate the effectiveness of the juvenile court system in the context of its stated rehabilitative goals and the potential impact of a shift in focus to a more retribution-oriented structure.
CRJ 128. Administrative Law for Public Safety Personnel. 3 Units
Prerequisite(s): CRJ 121 and CRJ 123; restricted to CRJ majors or chair permission
Term Typically Offered: Spring only
Administrative law is the study of the adjudicatory and law making processes that take place within administrative agencies of the executive branches of government. Further, it is a study of the legal relationship between those agencies and the legislature, the courts, and private parties. Particular attention will be paid to the Federal Administrative Procedures Act, and the California Administrative Procedure Act.

CRJ 130. Fundamentals of Corrections. 3 Units
Prerequisite(s): Restricted to declared CRJ majors or minors or department chair permission.
Term Typically Offered: Fall, Spring
Overview and critical analysis of contemporary correctional theory and practice. Comparison of mainline American corrections with historical, cross-cultural, philosophical and non-traditional views of corrections. Controversial issues in contemporary corrections, including prisoner rights, victimization, the death penalty, unions, institutional corrections, community corrections, future of corrections, correctional careers, and administration and staffing of correctional programs.

CRJ 131. Correctional Institutions. 3 Units
Prerequisite(s): CRJ 101, CRJ 102 and CRJ 130; restricted to declared majors or chair permission.
Term Typically Offered: Fall, Spring
Role and function of the correctional institution in the administration of criminal justice. A review of institutional procedures: reception, classification, program assignment, mass custody, treatment programs, and release, including parole and discharge. The inmate social system and its relationship to the official world that contains it. The following topics will receive special attention: the determinate sentence; the confinement of repetitively violent offenders; the death penalty and its impact on prison management, inmate social services; prison reform; and the stresses experienced by institutional personnel.

CRJ 134. Community Based Corrections. 3 Units
Prerequisite(s): CRJ 101, CRJ 102 and CRJ 130; restricted to declared majors or chair permission.
Term Typically Offered: Fall only
Role of local and state government in the development of community-based correctional programs; regional detention facilities; recent trends in jail organization and management; ex-offenders and employment; the impact of community corrections on the criminal justice system.

CRJ 136. Corrections Administration. 3 Units
Prerequisite(s): CRJ 101, CRJ 130 and CRJ 160; restricted to declared majors or chair permission.
Term Typically Offered: Fall, Spring
Concepts of administration; corrections as a component of criminal justice; organization and management of correctional services and correctional institutions for delinquent youth and adult offenders; probation and parole; and the legal and political contexts of corrections.

CRJ 141. Police and Society. 3 Units
Prerequisite(s): Restricted to declared CRJ majors or minors or department chair permission.
Term Typically Offered: Fall, Spring
Examination of the origins, philosophy, objectives and priorities of the police service in the U.S. A holistic analysis of political, social, economic, legal and other factors impacting the relationship between the police and the society they serve. Police use of discretion, police roles, police and minority groups, police and protest groups, police brutality, and police ethics are also studied.

CRJ 142. Police Administration. 3 Units
Prerequisite(s): CRJ 101, CRJ 141 and CRJ 160; restricted to declared majors or chair permission.
Term Typically Offered: Fall only
Concepts of organization and management; relationships between police agencies and the public; other criminal justice agencies, and other agencies of government; organization for delivery of police services: first response, crime investigation, youth services, vice, communications, and information management.

CRJ 144. Contemporary Issues in Police Administration. 3 Units
Prerequisite(s): CRJ 101 and CRJ 141; restricted to declared CRJ majors or chair permission.
Term Typically Offered: Fall, Spring
Roles of police in a democratic society; analysis of public disobedience to law; racial and ethnic group relationships with police; public, official, and police corruption; police discretion; professionalism; development of criminal intelligence.

CRJ 151. White Collar Crime. 3 Units
Prerequisite(s): Junior/Senior status, Criminal Justice or Fire Service Management major or chair permission.
Term Typically Offered: Fall, Spring
Introduces students to a variety of white collar crime issues, including definitional complexities, the causes, frequency and impact of economic crime, and victim and offender profiles. Governmental corruption, organizational fraud, consumer and environmental offenses, anti-trust violations and international schemes will be covered. Students will also become familiar with methods used to investigate, prosecute and sentence white collar offenders. Policy considerations will be discussed for controlling national and international white collar crime.

CRJ 152. Interviewing and Detection of Deception. 3 Units
Prerequisite(s): CRJ 102; restricted to declared CRJ majors or chair permission.
Term Typically Offered: Fall, Spring
Principles and techniques of interviewing and detection of deception studied from communication, physiological and psycho-social points of view. Introduction to the use of the polygraph; laws pertaining to confessions and admissions.
CRJ 153. Advanced Criminal Investigation. 3 Units
Prerequisite(s): CRJ 102; restricted to declared CRJ majors or declared Forensic minor or have chair permission.
Term Typically Offered: Fall, Spring

Principles involved in the investigation of crimes; utilization of scientific aids in obtaining information from physical objects; concepts in obtaining information from and about people; concept of reconstruction of crime and profile of suspect; development of leads; investigative problems in major crimes; special problems in crime investigation.

CRJ 154. Introduction to Physical Evidence. 3 Units
Prerequisite(s): CRJ 102; restricted to declared CRJ majors or Forensic Investigation minor or chair permission.
Term Typically Offered: Fall, Spring

Provides an overview of the role of science in collecting and evaluating physical evidence as a component of the criminal investigation and legal processes. Various operations in the examination and interpretation of physical evidence are examined with emphasis on the role of science in supporting the investigator and in the litigation process. Suitable for both science and non-science majors.

CRJ 156. Introduction to Crime and Intelligence Analysis. 3 Units
Prerequisite(s): CRJ 101; must be a declared CRJ major or have chair permission.
Term Typically Offered: Fall, Spring

Introduction to crime and intelligence analysis with a special emphasis on those methods most often used in the study of crime and criminal behavior patterns. Students will acquire the knowledge and skills necessary toward understanding crime analysis, intelligence analysis and mapping geospatial data. Topics include theory, the history of crime analysis, crime analysis technologies, intelligence analysis, and types/functions of crime analysis.

CRJ 160. Justice and Public Safety Administration. 3 Units
Prerequisite(s): restricted to declared CRJ majors or minors or department chair permission.
Term Typically Offered: Fall, Spring

Examines the nature and development of public safety and criminal justice organizations in American society with attention to how the unique functions performed by these agencies has shaped and developed their nature. Particular emphasis is placed on understanding the unique problems generated by administration of bureaucratic, public agencies in a highly politicized environment. Examines the influence of social and political factors on justice and public safety organizations.

CRJ 162. Intergovernmental Relations, Finance and Budgeting for Public Safety Personnel. 3 Units
Prerequisite(s): CRJ 160 or PPA 100; Junior or Senior standing; must be a Criminal Justice or Fire Service Management Major.
Term Typically Offered: Fall only

An examination of the structure, organization and management of state and local government with particular attention to the interplay between governmental agencies that is focused on the operations and management of public safety agencies. Government leadership models, such as mayor and city manager will be examined. Finance, the state and local budgets, taxation, revenue and spending will be addressed.

CRJ 163. Leadership in Criminal Justice and Public Safety. 3 Units
Prerequisite(s): CRJ 160; restricted to declared CRJ majors or chair permission.
Term Typically Offered: Fall, Spring

Addresses role of leadership in shaping and directing complex justice and public safety organizations. Leadership styles, roles, communication, group dynamics and organizational culture are examined and applied to organizational maintenance, adaptation, and change. Also addresses the role of employee organizations and personal practices in shaping leadership options and styles in public agencies. Particular attention is focused on implementing leadership in the bureaucratic and public agencies typical to the fields of criminal justice and public safety administration.

CRJ 165. Planning for Justice and Public Safety. 3 Units
Prerequisite(s): CRJ 101, CRJ 102 and CRJ 160; restricted to declared CRJ majors or chair permission.
Term Typically Offered: Spring only

Addresses planning in complex justice and public safety organizations. Focuses on the role of planning in preparing for change, maximizing utilization of resources and addressing crime and public safety. Emphasis is placed on the use of planning to unify fragmented public agencies at multiple levels of government in preparing for disaster, controlling crime, and assuring public safety.

CRJ 166. Personnel Administration in Criminal Justice and Public Safety Organizations. 3 Units
Prerequisite(s): CRJ 160; declared CRJ major or chair permission
Term Typically Offered: Fall, Spring

This course provides an understanding of history, theories, laws, and practices related to contemporary as well as future criminal justice/public safety personnel administration and practice.

CRJ 167. Collective Bargaining and Arbitration Issues in Public Safety. 3 Units
Prerequisite(s): Must be a declared CRJ major or chair permission.
Term Typically Offered: Fall, Spring

This course is designed to provide the public safety student and/or criminal justice student, practitioner and/or administrator with an understanding of public safety personnel practices in the area of collective bargaining. Labor-management relations, dispute resolution, arbitration, and the various laws that govern labor-management relations, at all levels of government, will be covered.

CRJ 168. Justice and Public Safety Information Systems. 3 Units
Prerequisite(s): Restricted to declared majors or chair permission.
Term Typically Offered: Fall, Spring

Introduction to criminal justice and public safety information systems. Provides a framework for understanding the needs, types, capabilities and applications of information systems to the field. Current uses are surveyed and future potential applications are examined.
CRJ 169. Emergency Management. 3 Units
Prerequisite(s): CRJ 164; Criminal Justice or Fire Service Management major, or instructor permission.
Term Typically Offered: Fall, Spring
Course reviews the history of emergency management, the current systems in place to manage mitigation, preparedness, response and recovery and the coordination and communication required to do so. Diverse responses to various emergencies will be presented with detailed examination of the roles of various levels of government and integration required. The formal declaration of emergencies and federal aid procedures, agencies involved and their administration will be covered.

CRJ 170. Human Trafficking and Slavery. 3 Units
Prerequisite(s): Junior/Senior level and CRJ majors only; or department chair permission.
Term Typically Offered: Fall, Spring
The course explores the international and domestic legal framework that defines human trafficking and slavery and analyzes the major theories and current research on related causes and risk factors. The role of involvement of transnational organized criminal groups and vulnerability of social groups are discussed. Lastly, the course provides a critical analysis of effective strategies in victim identification, protection, prosecution, and prevention as instrumental components in assessment of crime control policy.

CRJ 172. Comparative Criminal Justice Systems. 3 Units
Prerequisite(s): Junior status; restricted to declared CRJ majors or chair permission.
Term Typically Offered: Fall, Spring
Examines representative criminal justice systems from a variety of nations with emphasis on the role of history, culture, social and political values and economic institutions in shaping institutions of justice including law, police, courts, corrections, and juvenile justice systems and practice. Attention is paid to conflict and cooperation between criminal justice systems and ideologies that occur when peoples of different cultures and systems are in close proximity.

CRJ 174. Criminal Justice Systems of the Future. 3 Units
Term Typically Offered: Fall, Spring
Societal structures, definitions of deviance and criminal behavior, social problems related to criminality, the nature of systems for handling criminals and sanctions in future societies.

CRJ 176. Security Systems. 3 Units
Prerequisite(s): CRJ 101 and CRJ 102; restricted to declared CRJ majors or chair permission.
Term Typically Offered: Fall, Spring
Purposes, functions and historical development of industrial security in the U.S. Co-responsibilities of security personnel and line supervisors; principles of physical security, document protection, pilferage prevention and employee programs for plant and inventory protection. Survey of related laws and cooperating agencies of government.

CRJ 181. Topics in Criminal Justice. 3 Units
Prerequisite(s): CRJ 100 and CRJ 110; must be a CRJ major.
Term Typically Offered: Fall, Spring
Topics of interest to criminal justice students and faculty will be offered as the need arises.
Note: May be repeated provided the topic is different.

CRJ 190. Contemporary Issues in Criminal Justice. 3 Units
Prerequisite(s): CRJ 101, CRJ 102, CRJ 121, CRJ 130, CRJ 141, CRJ 160; restricted to declared CRJ majors or chair permission with senior status, and GWAR certification before Fall 09; or WPJ score of 80+; or 3-unit placement in ENGL 109M or ENGL 109W; or 4-unit placement in ENGL 109M or ENGL 109W and co-enrollment in ENGL 109X; or WPJ score 70 or 71 and co-enrollment in ENGL 109X.
General Education Area/Graduation Requirement: Writing Intensive Graduation Requirement (WI)
Term Typically Offered: Fall, Spring
Examination of current issues in criminal justice with an emphasis on the application of law, management, practice and ethics to analysis of contemporary criminal justice policy. The culminating event for criminal justice majors with an emphasis upon written and oral communication, research and analytical thinking.

CRJ 191. Topics in Criminal Justice Administration. 3 Units
Prerequisite(s): CRJ 101 and CRJ 102; restricted to declared CRJ majors or chair permission.
Term Typically Offered: Fall, Spring

CRJ 195. Internship. 1 - 6 Units
Prerequisite(s): Restricted to declared majors or chair permission and senior status
Term Typically Offered: Fall, Spring
Supervised work and experience in justice or public safety related agencies designed to expand the student’s understanding of techniques, procedures and problems that occur in these agencies. Supervision provided by both faculty and agency personnel.
Note: may be repeated for credit

Credit/No Credit

CRJ 196. Experimental Offerings in Criminal Justice. 2 - 4 Units
Prerequisite(s): Restricted to declared majors and minors or instructor permission.
Term Typically Offered: Fall, Spring
To be offered in the various fields of Criminal Justice in response to student needs.

CRJ 196A. The Mentally Ill Individual in the Criminal Justice System. 3 Units
Term Typically Offered: Fall, Spring
Overview and analysis of how mentally ill individuals interface with the criminal justice system, from first contacts with the police, to their entry into the jails, courts, and prisons, and then reentry into the community via parole and probation. The history of how the mentally ill became so embedded in the criminal justice system, whether mental illness has become criminalized, evidence-based mental health programs, and treatment for this population will be covered.
CRJ 196B. Law of Homeland Security and Emergency Management. 3 Units

Term Typically Offered: Fall, Spring

Current and historical developments relating to the laws surrounding homeland security and emergency management. Topics include the legal framework for the U.S. domestic preparedness and national incident management system, the role of the military in emergency response and homeland security, and the legal jurisdiction and authority of federal, state, and local public safety, as well as private sector institutions, in terrorism prevention and response. Course utilizes cases, statutes, executive orders, government reports, and scholarly research.

CRJ 196S. Ethics and the Criminal Justice System. 3 Units

Prerequisite(s): CRJ Majors or department chair permission

Term Typically Offered: Fall, Spring

Purpose of course is to learn various ethical considerations within the criminal justice system. Course will briefly explore the classical, philosophical foundations of ethics and proceed into surveying modern, ethical decision-making among the various criminal justice components. Criminal justice system ethics and decision-making of the police, prosecution, courts, corrections, and probation/parole from a managerial standpoint and a line perspective will be examined and critiqued. Emphasis will be placed on viable, practical solutions to ethical conundrums.

CRJ 198. Co-Curricular Activities. 1 - 3 Units

Prerequisite(s): Permission of the sponsoring professor and the Division Chair.

Term Typically Offered: Fall, Spring

Co-Curricular activities related to the subject matters and intellectual concerns of the Division of Criminal Justice, including service learning, related community service assignments, and service on University and community policy making bodies.

Credit/No Credit

CRJ 199. Special Problems. 1 - 3 Units

Prerequisite(s): Restricted to declared CRJ majors or chair permission and senior status.

Term Typically Offered: Fall, Spring

Individual projects or directed reading, open only to those students who appear competent to carry on individual work.

Credit/No Credit

CRJ 200. Research Methods in Criminal Justice. 3 Units

Prerequisite(s): Classified graduate status, satisfactory completion of a basic statistics course.

Term Typically Offered: Fall, Spring

Research theory and methodology in Criminal Justice; research designs; conceptual models; design and preparation of Master's thesis prospectus.

Note: Graduate Writing Intensive (GWI) course.

CRJ 201. Advanced Research Design and Data in Criminal Justice. 3 Units

Prerequisite(s): CRJ 200

This course provides applied explanations of advanced research designing, use of data development strategies, and techniques for effective data analysis using statistical software. Topics generally covered include: (1) issues and techniques in advanced research design with emphasis on theory testing and hypothesis formulation; (2) measurement, data collection strategies, reliability and validity of measures and results, sampling, surveys; and, (3) examination of qualitative versus quantitative research techniques, working with observational data, field research issues, and triangulation.

Note: Required core course

CRJ 205. Criminal Justice Policy Analysis. 3 Units

Prerequisite(s): Classified Graduate status, CRJ 200, CRJ 201, CRJ 255, and CRJ 260.

Term Typically Offered: Fall, Spring

Examination of responses of the criminal justice system to major current issues with attention to factors influencing their effects; review of uses and limitations of various responses; appraisal of the consequences of various criminal justice policy alternatives.

CRJ 207. Criminal Justice Research and Program Evaluation. 3 Units

Prerequisite(s): CRJ 200, CRJ 201, CRJ 255 and CRJ 260

Term Typically Offered: Fall, Spring

Systematic review of selected evaluations of major criminal justice programs, demonstration projects, experiments, and innovations; introduction to basic techniques of interpretation and analysis of research findings to determine outcomes.

CRJ 210. Critical Examination of Law and Justice. 3 Units

Prerequisite(s): CRJ 200, CRJ 201, CRJ 255 and CRJ 260

Term Typically Offered: Fall, Spring

Examines the multiple challenges to that model, including legal realism, the sociology of law, legal formalism, critical legal studies, and critical race theory. Will critically examine the intersection of the American legal tradition with issues concerning the possibility and implementation of social justice strategies in diverse, and increasingly global contexts.

CRJ 220. Politics of Crime Legislation. 3 Units

Prerequisite(s): Classified Graduate status, CRJ 200, CRJ 201, CRJ 255, and CRJ 260.

Term Typically Offered: Fall, Spring

Familiarizes students with the legislative process, the performance of the legislature as it relates to the handling of crime bills and the role of interest groups and politics in the process of initiating and passing laws. Topics include: theoretical models of lawmakers, factors in legislative decision-making, the politics of crime legislation, ethics in politics, and how people influence and use the legislative process.

CRJ 230. The Prison. 3 Units

Prerequisite(s): CRJ 200, CRJ 201, CRJ 255 and CRJ 260

Term Typically Offered: Fall, Spring

Contemporary penal institutions will be studied using the literature in the social sciences, the biographies of prisoners, and the writings of prison critics.
CRJ 231. Graduate Seminar in Corrections. 3 Units
Prerequisite(s): CRJ 200, CRJ 201, CRJ 255 and CRJ 260
Term Typically Offered: Fall, Spring

Provides a historical analysis and discussion of the current state of corrections and correctional management. Theories of punishment will be addressed and management techniques will be covered. Goes beyond concepts of institutionalized corrections to explore modern correctional alternatives, correctional policy and special topics relevant to corrections.

CRJ 233. Psychodynamics of Confinement. 3 Units
Prerequisite(s): CRJ 200, CRJ 201, CRJ 255 and CRJ 260
Term Typically Offered: Fall, Spring

Examination of current conditions of confinement; review of confinement related factors common to populations in penal institutions, military installations, mental hospitals, prisoner of war camps, and concentration camps; investigation into the broader implications of conditions of confinement for society; survey of practical strategies for developing and implementing standards for confined populations.

CRJ 240. Contemporary Issues in Policing. 3 Units
Prerequisite(s): CRJ 200, CRJ 201, CRJ 255 and CRJ 260
Term Typically Offered: Fall, Spring

In-depth study of contemporary issues in policing in the U.S., including management, organization and issues confronting law enforcement at federal, state and local levels.

CRJ 250. Comparative Analysis of the Criminal Justice System. 3 Units
Prerequisite(s): CRJ 200, CRJ 201, CRJ 255 and CRJ 260
Term Typically Offered: Fall, Spring

Examination of alternative systems for criminal justice provides a basis for improved understanding of organizational and functional components within given sociopolitical environments. Through comparison of formal and operational levels, decision-making processes are made explicit with reference to historical, legal, social, and economic parameters in the administration of justice.

CRJ 251. White-Collar Crime. 3 Units
Prerequisite(s): CRJ 200, CRJ 201, CRJ 255 and CRJ 260
Term Typically Offered: Fall, Spring

Examines the underlying theories and the diverse nature of white-collar crime. Studies offenses associated with corporations, occupations, governments, enterprises and individuals. Examines the offenders and the organizational culture that facilitates criminal action. Topics include embezzlement, political corruption, employee theft, fraud, computer crime, and environmental crime. Study consequences for victims, offender characteristics and the theoretical explanations for the decisions by criminals to commit white-collar crimes.

CRJ 252. Violence and Victims. 3 Units
Prerequisite(s): CRJ 200, CRJ 201, CRJ 255 and CRJ 260
Term Typically Offered: Fall, Spring

Comprehensive survey of the literature on violence emphasizing high-fear crimes; the repetitively violent criminal; the emerging field of victimology; improved delivery of social services to victims; juvenile gangs; and the response of criminal justice agencies to urban violence.

CRJ 255. Crime, Criminology and Criminal Justice. 3 Units
Prerequisite(s): Classified graduate status.
Term Typically Offered: Fall, Spring

Study of major criminological theories, their ideological premises and basic assumptions, interrelationships, and the shifts in emphasis and focal points in the study of criminality. Analyzes post and current applications of theory to the intervention strategies of crime control.

CRJ 256. Historical Analysis of the American Criminal Justice System. 3 Units
Prerequisite(s): Classified graduate status; CRJ 200, CRJ 201, CRJ 255 and CRJ 260
Term Typically Offered: Fall, Spring

Evolution and historical foundations of American patterns of crime and violence, criminological theories, law enforcement structures and philosophies, the adult criminal justice system, and the juvenile system will be traced through three distinct historical periods: Colonial and Early American Roots, 1609-1814; Creating the American Criminal Justice System, 1815-1900; and Reforming the Criminal Justice System, 1900 to present.

CRJ 257. The Nature Of Terrorism. 3 Units
Prerequisite(s): CRJ 200, CRJ 201, CRJ 255 and CRJ 260
Term Typically Offered: Fall, Spring

Theoretical approaches to the study of terrorism and analysis of terrorist theory and strategies. Topics include operational definitions of terrorism, typologies of terrorism, threat analysis of terrorism in the U.S., and responses of the criminal justice system to acts of hostage-taking, bombing, political murder, and narco-terrorism.

CRJ 260. Management of Complex Justice Organizations. 3 Units
Prerequisite(s): Classified graduate status.
Term Typically Offered: Fall, Spring

Description, analysis, solution, and synthesis of contemporary management problems in criminal justice organizations; presentation and exemplary implementation of management concepts significant to criminal justice organizations; review of case studies for management problem recognition; and the study of operational systems.

CRJ 262. Administration of Juvenile Justice. 3 Units
Prerequisite(s): CRJ 200, CRJ 201, CRJ 255 and CRJ 260
Term Typically Offered: Fall, Spring

Theoretical and empirical study of the cause and control of delinquent behavior. Assessment of policies and practices of agencies involved in juvenile justice including the impact of recent federal and state legislation.

CRJ 266. Personnel Administration in Justice Organizations. 3 Units
Prerequisite(s): CRJ 200, CRJ 201, CRJ 255 and CRJ 260
Term Typically Offered: Fall, Spring

Provides an in depth understanding of the history, theories, laws, processes, issues and unique environment shaping contemporary personnel administration in a variety of criminal justice agencies.
CRJ 267. Criminal Justice Issues in Collective Bargaining and Arbitration.  3 Units
Prerequisite(s): Classified graduate status; CRJ 200, CRJ 201, CRJ 255 and CRJ 260.
Term Typically Offered: Fall, Spring

Designed to provide the criminal justice practitioner and administrator with an understanding of criminal justice labor-management relations and collective bargaining and difference resolution, along with conflict resolution practices as applied to inmate-custody and control situations.

CRJ 281. Special Topics in Criminal Justice.  3 Units
Prerequisite(s): CRJ 200 & CRJ 255, or equivalent.
Term Typically Offered: Fall, Spring

Introduces students to a variety of pressing issues as special topics that impact Criminal Justice and provides an opportunity to explore those special topics in greater depth. Students conduct research using multiple sources on a variety of topics, participate in seminar discussions, and present findings in presentations and reports.

Note: May be repeated for credit with permission of the Graduate Coordinator when the special topic is different.

CRJ 289. Criminal Justice Systems of the Future.  3 Units
Prerequisite(s): CRJ 200, CRJ 201, CRJ 255 and CRJ 260
Term Typically Offered: Fall, Spring

Societal structures, definitions of deviance and criminal behavior, social problems related to criminality, the nature of systems for handling criminal and sanctions in future societies.

CRJ 295. Internship.  3 Units
Prerequisite(s): Classified graduate status
Term Typically Offered: Fall, Spring

Supervised graduate student placement in selected criminal justice agencies with emphasis on research and evaluation project assignments.

Credit/No Credit

CRJ 296A. The Mentally Ill Individual in the Criminal Justice System.  3 Units
Prerequisite(s): Graduate student status
Term Typically Offered: Fall, Spring

A critical analysis of how mentally ill individuals interface with the criminal justice system, from first contacts with the police, to their entry into the jails, courts, prisons, and then reentry into the community via parole and probation. Current and historical topics about the mentally ill will be explored via an in-depth analysis of the current literature regarding the mentally ill in the criminal justice system, which will be reviewed and critiqued.

CRJ 296K. Emergency Management.  3 Units
Prerequisite(s): Graduate status; CRJ 200, CRJ 255, CRJ 256 and CRJ 260 or chair permission.
Term Typically Offered: Fall, Spring

Introduction to the authority, organization, responsibilities, challenges, and issues related to emergency management in California and the U.S., examines the implications of citizen involvement in preparation for and management of natural and man-made disasters. Graduate students will consider impact of terrorism on democratic governance issues and potential future trends and issues.

CRJ 299. Special Problems.  1 - 3 Units
Prerequisite(s): CRJ 200, CRJ 201, CRJ 255 and CRJ 260
Term Typically Offered: Fall, Spring

Individual projects or directed reading. Open only to students who are competent to carry on individual work.

Credit/No Credit

CRJ 500. Culminating Experience.  3 Units
Prerequisite(s): Advanced to candidacy.
Term Typically Offered: Fall, Spring

Completion of a thesis or project approved for the Master's degree. A thesis requires an original contribution to knowledge in a traditional research format. A project is a significant undertaking of a pursuit appropriate to the profession. It must evidence originality and independent thinking, appropriate form and organization and a rationale.

CRJ 501. Culminating Experience: Thesis/Project Development.  3 Units
Prerequisite(s): Advancement to candidacy.
Term Typically Offered: Fall, Spring

Provides students with an opportunity to develop a foundation for their culminating experience. Students will complete the initial components of their project or thesis including the Statement of the Problem, Literature Review, and Human Subjects application. Students are expected to read assigned materials and engage in weekly discussions about their progress and experience with other students, the instructor, and their advisor (as needed).

Credit/No Credit

CRJ 502. Culminating Experience: Thesis or Project.  3 Units
Prerequisite(s): Advanced to candidacy; satisfactory completion of CRJ 501.
Term Typically Offered: Fall, Spring

Completion of a thesis or project approved for the Master's degree. A thesis requires an original contribution to knowledge in a traditional research format. A project is a significant undertaking of a pursuit appropriate to the profession. It must evidence originality and independent thinking, appropriate form and organization and a rationale.

Credit/No Credit

BS in Criminal Justice

Units required for Major: 60
Total units required for BS: 120

Program Description

Criminal Justice encompasses multidisciplinary examinations of crime, crime control, the justice process, and justice institutions. The discipline addresses definitions, causation, prevention, investigation, legal process, treatment, rehabilitation, and research relating to crime and justice as well as the institutions of the justice system and their administration.

The Criminal Justice program at Sacramento State is one of the most highly sought after programs in Northern California. Due to the large number of applications, the program is now officially impacted. Students wishing to become Criminal Justice majors must complete a series of required lower division courses and then must apply for admission to the program. It is highly recommended that interested students speak with a Criminal Justice advisor as soon as possible.
**Pre-Requisite Requirements**

To become a Criminal Justice major, the student must first have successfully completed the following courses or their equivalent with a grade of "C" or better:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>CRJ 1</td>
<td>Introduction to Criminal Justice and Society</td>
<td>3</td>
</tr>
<tr>
<td>CRJ 2</td>
<td>Law of Crimes</td>
<td>3</td>
</tr>
<tr>
<td>CRJ 4</td>
<td>General Investigative Techniques</td>
<td>3</td>
</tr>
<tr>
<td>CRJ 5</td>
<td>The Community and the Justice System</td>
<td>3</td>
</tr>
</tbody>
</table>

Students who wish to become a Criminal Justice minor must contact the Division of Criminal Justice.

Most upper division Criminal Justice courses are restricted to Criminal Justice majors or minors or permission of instructor. Students interested in Criminal Justice majors or minors are encouraged to contact the Criminal Justice Student Advising Center.

Criminal Justice majors are assigned a faculty advisor at the time they are approved for admission into the major. Majors must meet with their assigned faculty advisor during their first semester. Advising appointments are scheduled in the Criminal Justice Office Alpine Hall 137.

**Minimum Grade Requirement**

Students majoring in Criminal Justice must achieve a "C" grade or better in each lower division and a "C-" or better in each upper division course applied to the major and a GPA of at least 2.0 ("C") for all upper division required courses applied to the major.

1 Course also satisfies General Education (GE)/Graduation Requirement.
2 Prerequisite: Restricted to declared majors and minors or instructor permission.
3 Students will collaborate with their Criminal Justice advisor to develop a plan of electives that reflects the student's academic and professional interests. Electives must be drawn from at least two of the listed “Areas of Interest,” of which one must be from the “Supporting Courses” area. The Writing Intensive graduation requirement may be completed in the major. An approved minor may be substituted for up to 12 units of the major elective courses and fulfills the requirement for selection of a course from the “Supporting Courses”.
4 No more than 6 units of Credit/No Credit courses will be allowed toward completion of the degree.

Certificate in Law Enforcement

Units required for Certificate: 18

Program Description

Students participating in the Law Enforcement Candidate Scholars’ (LECS) program who wish to obtain a Certificate of Academic Achievement in Law Enforcement must complete the following courses with a minimum grade of "C" or higher. Courses for the Certificate program are applicable toward course requirements for the Criminal Justice major.

All courses and petitions for substitutions will need to be approved by the Law Enforcement Candidate Scholars’ Program and Criminal Justice Division and will reflect the criteria and learning outcomes of the Law Enforcement Certificate.

Additional eligibility criteria and certificate information can be obtained from the Law Enforcement Candidate Scholars’ (LECS) Program or Criminal Justice Division Advising Center. Visit the LECS website (http://www.csus.edu/hhs/lecs/) for more information.

Minor in Forensics Investigations

Units required for Minor: 21

Program Description

This minor is only available to students who are either a Chemistry or Biological Science major.

Minimum Grade Requirement

The following courses must be completed with a minimum grade of "C" or higher.

MS in Criminal Justice
Total units required for MS: 30

Program Description
The Master of Science program in Criminal Justice is designed to provide broad knowledge and understanding of the field of criminal justice, law enforcement, legal processes, and rehabilitation of offenders. It also provides an extensive academic foundation for a growing variety of professional opportunities and facilitates professional development in preparation for positions of increasing responsibility. Curriculum objectives are based on the philosophy that the function of the professional criminal justice practitioner and educator is to aid the orderly development of society, to contribute significantly to the improvement of the quality of services, and to advance the criminal justice system. Students who anticipate pursuing graduate studies should prepare themselves for work on this level by selecting undergraduate courses which provide competence in the following areas: statistical analysis, behavioral science methodology, independent library research, and the writing of research papers.

The University's location in the state capital provides direct access to many local, federal, and state agencies through internship and fieldwork opportunities. All graduate students should consult the Criminal Justice Graduate Coordinator when planning their program of courses for each upcoming semester.

All work toward the degree must be completed within a seven-year period. The general University requirements for graduate degrees are explained in the "Graduate Studies (p. 86)" section of this Catalog.

Admission Requirements
Admission as a classified graduate student in Criminal Justice requires:

- a baccalaureate degree from an institution accredited by a regional accrediting association;
- a minimum 3.0 GPA in the last 60 units attempted and a 3.0 GPA in the major field;
- a score of 4 or more in the Analytical Writing Section of the Graduate Record Examination (GRE) General Test;
- a letter outlining in some detail the applicant's interests, goals, and expectations in pursuing the MS in Criminal Justice; and
- three letters of recommendation from individuals who can evaluate the applicant's potential for graduate study.

In addition, applicants are expected to have an undergraduate major in Criminal Justice or its equivalent. Whatever the applicant's undergraduate major, however, it is essential that each student have adequate preparation for graduate study. For this reason, some applicants (regardless of their undergraduate program) may be asked to remove deficiencies in their education by taking courses from the undergraduate curriculum before being admitted as a classified graduate student. In such cases, conditionally classified graduate status may be granted subject to completion of these courses with grade "B" or better. The number of units required to remove deficiencies will total no more than 15 and these must be taken in addition to the 30 units required for the MS. Any deficiencies will be noted on a written response to the admission application.

Admission Procedures
Applications are accepted as long as space for new students is available. If applications for graduate admissions exceed the capacity of the Department, the Department will limit admissions. Applicants will be rank ordered for admission based on an evaluation of the academic record, GRE scores, professional and life experience, references, proposed academic plan and potential for diversifying, and enriching the Criminal Justice graduate program. For more admissions information and application deadlines, please visit http://www.csus.edu/gradstudies/.

All prospective graduate students, including Sacramento State graduates, must provide the following:

- an online application for admission;
- two sets of official transcripts from all colleges and universities attended, other than Sacramento State; and
- Graduate Record Exam (GRE) scores.
- a letter outlining in some detail the applicant's interests, goals, and expectations in pursuing the MS in Criminal Justice; and
- three letters of recommendation from individuals who can evaluate the applicant's potential for graduate study.

Approximately six weeks after receipt of all items listed above, a decision regarding admission will be emailed by the University to the applicant.

Minimum Units and Grade Requirement for the Degree
Units required for the MS: 30
Minimum Cumulative GPA: 3.0

Advancement to Candidacy
Each student must file an application for Advancement to Candidacy for the master's degree indicating the proposed program of graduate study. This procedure should begin as soon as the classified graduate student has:

- removed any deficiencies in admissions requirements;
- completed at least 12 units in the graduate program with a minimum 3.0 GPA; and
- taken the Writing Placement for Graduate Students (WPG) or taken a Graduate Writing Intensive (GWI) course in their discipline within the first two semesters of coursework at California State University, Sacramento or secured approval for a WPG waiver.

Students may not enroll in CRJ 502 before they are advanced to candidacy.

Advancement to Candidacy forms are available on the Office of Graduate Studies website. The student fills out the form after planning a degree program in consultation with the Criminal Justice Graduate Coordinator. The completed form should then be returned to the Office of Graduate Studies for approval.

Program Description

Kinesiology is an academic area of study concerned with the art and science of human movement. The Department offers a Bachelor of Science degree with six concentrations of study, a Master of Science with two concentrations of study (Exercise Science and Movement Studies), and a Personal Trainer/Strength and Conditioning Certificate. Two Minor programs (Coaching and Supplementary Authorization in Physical Education) are also available.

Degree Programs

- BS in Exercise Science (Clinical Exercise & Rehabilitation Specialist) (p. 711)
- BS in Exercise Science (Health Fitness/Strength Conditioning) (p. 713)
- BS in Kinesiology (Athletic Administration) (p. 714)
- BS in Kinesiology (Athletic Care) (p. 716)
- BS in Kinesiology (Athletic Coaching Education) (p. 717)
- BS in Kinesiology (Physical Activity and Wellness) (p. 719)
- BS in Kinesiology (Physical Education Teacher Education) (p. 720)
- Certificate in Personal Trainer/Strength and Conditioning (p. 722)
- Credential in Adapted Physical Education Specialist (p. 722)
- Minor in Coaching (p. 722)
- Minor in Supplementary Authorization in Physical Education (p. 723)
- MS in Kinesiology (Exercise Science) (p. 723)
- Single Subject Credential in Physical Education (K-12) (p. 725)
- Subject Matter Program Athletic Training (p. 725)

The Health Fitness/Strength Conditioning option is a National Strength Conditioning Association (NSCA) recognized program that prepares students for graduate work in the areas of exercise and sport science, as well as for careers as a strength and conditioning specialist in corporate and community wellness, college/professional-based athletics, commercial fitness & health club settings. The Clinical Exercise & Rehabilitation option provides students with in-depth science-based coursework which meets the prerequisite requirements for most physical therapy, occupational therapy, and other health related professional programs. Career options include cardiac rehabilitation, clinical exercise specialist, and other clinical/technical specialties in allied health fields.

Accreditation

In addition to California State University, Sacramento’s full accreditation by the Western Association of Schools and Colleges, the Bachelor of Science in Kinesiology (Physical Education) is also individually accredited by California Commission on Teacher Credentialing (CCTC).

Notice to Students RE: Professional Licensure and Certification

California State University programs for professions that require licensure or certification are intended to prepare the student for California licensure and certification requirements. Admission into programs for professions that require licensure and certification does not guarantee that students will obtain a license or certificate. Licensure and certification requirements are set by agencies that are not controlled by or affiliated
with the California State University and licensure and certification requirements can change at any time.

The California State University has not determined whether its programs meet other states’ educational or professional requirements for licensure and certification. Students planning to pursue licensure or certification in other states are responsible for determining whether, if they complete a California State University program, they will meet their state’s requirements for licensure or certification. This disclosure is made pursuant to 34 CFR §668.43(a)(5)(v)(C).

Special Features

- The Kinesiology facilities include state-of-the-art high tech laboratories for motor learning, biomechanics, exercise physiology, sport performance, and physical therapy/therapeutic exercise and rehabilitation.
- Several activity spaces are available, including dance, weight training, and gymnastics rooms. Outside facilities include a lap pool, racquetball and tennis courts, jogging trails, sports fields, putting green, driving range, and aquatic center.
- Kinesiology majors at Sacramento State have opportunities for unique experiences at the undergraduate level. In the Physical Education Concentration, students observe and teach children in both on and off campus field sites.
- Sacramento State has an accredited CCTC Accredited Physical Education Teacher Education program.
- Exercise Science students gain useful experience through their internships at various on and off campus locations.
- Students interested in Physical Therapy build a valuable background of experience in community hospitals and rehabilitation centers.
- At the graduate level, students engage in a variety of research projects, both on and off campus in the areas of Exercise Science and Movement Studies.

Note: Students interested in majoring or minorin in Kinesiology are encouraged to go to the Department of Kinesiology Office for an assignment to a faculty advisor.

Career Possibilities

Biomechanist · Cardiac Catheterization Technician · Cardiac Electrophysiologist · Cardiac Rehabilitation Specialist · Cardiac Technician · Cardiovascular Sonography Technician · Clinical Exercise Physiologist · Coach · Community Center Leader · Corporate Wellness/ Fitness · Corrective Therapist · Doctor of Osteopathy School · Echocardiogram Technician · Endurance Sport Coach · Exercise Physiologist · Exercise Scientist · Health Fitness Specialist · Intramural Recreational Sports Specialist · Medical School · Nursing School · Occupational Therapist School · Personnel Fitness Trainer · Pharmacy Sale Representative · Physician Assistant · Physical Therapy Aide · Physical Therapist · Physical Education Teacher · Recreation Sports Coordinator · Sportscaster · Strength Conditioning Specialist · University Student Fitness/Wellness Coordinator

KINS 4. Beginning Swimming. 1 Unit

General Education Area/Graduation Requirement: Understanding Personal Development (E)

Term Typically Offered: Fall, Spring

Development of physical and mental adjustment to the water. Basic instruction in front crawl, back crawl, elementary backstroke, breast and side strokes and survival is stressed.

Note: May be repeated for credit.

KINS 5. Intermediate Swimming. 1 Unit

General Education Area/Graduation Requirement: Understanding Personal Development (E)

Term Typically Offered: Fall, Spring

Development of physical skills involving strokes, turns, safety and survival techniques.

Note: May be repeated for credit.
Prerequisite(s): 50 yards swimming ability.
Term Typically Offered: Fall, Spring

Instruction in the fundamentals of sailing including safety and a
discussion of terminology and technology of sailing. Additional charge
for off-campus services.
Note: May be repeated for credit.

KINS 10. Intermediate Sailing.
Term Typically Offered: Fall, Spring

Continuation of KINS 25, using our fleet of C-15s, Laser and Hobie Turbo
14s. Covers rigging, boating safety, sailing, theory and racing tactics.
Note: May be repeated for credit.

KINS 11. Basic Windsurfing.
Term Typically Offered: Fall, Spring

Introduces the student to the basic fundamentals of windsurfing. Covers
rigging, terminology, balance, stance, sail adjustment, safety, rescue skills,
and tricks.
Note: May be repeated for credit.

Prerequisite(s): 50 yards swimming ability.
Term Typically Offered: Fall, Spring

Basic water skiing, boat and boating safety and in the fundamental skills
in water skiing. Additional charge for off-campus services.
Note: May be repeated for credit.

Term Typically Offered: Fall, Spring

Teaches the novice rower oar control, basic commands, and correct style.
Students will begin rowing on a modern eight-oared racing shell and be
introduced to the one person rowing single.
Note: May be repeated for credit.

KINS 15. Introduction to Fly Fishing.
Term Typically Offered: Fall, Spring

KINS 15 is a course designed for Sacramento State students of all
experience levels to develop proficiency in the sport of fly fishing while
promoting an appreciation of the sport as a socio-cultural and lifetime
recreational pursuit. Instruction/participation will include, but is not
limited to the following topics: conditioning, conservation techniques,
equipment use/care/selection, fly casting, aquatic entomology, stream
hydrology, interpretation of fly fishing opportunities, fly fishing tactics,
basic knots, and field trips to local streams.
Field trip(s) may be required.

KINS 21. First Year Seminar: Becoming an Educated Person.
General Education Area/Graduation Requirement: Understanding
Personal Development (E)
Term Typically Offered: Fall, Spring

Introduction to the nature and possible meanings of higher education,
and the functions and resources of the University. Designed to help
students develop and exercise fundamental academic success strategies
and to improve their basic learning skills. Provides students with the
opportunity to interact with fellow classmates and the seminar leader to
build a community of academic and personal support.

KINS 22. Creative Aerobic Fitness I.
General Education Area/Graduation Requirement: Understanding
Personal Development (E)
Term Typically Offered: Fall, Spring

Provides student with a wide range of flexibility, strength, muscular
endurance and creative cardiovascular endurance (aerobic) exercises
that promote physical fitness, positive changes in body composition and
stress reduction when performed regularly.
Note: May be repeated for credit.

Term Typically Offered: Fall, Spring

Using the unique buoyancy and resistance properties of water, the course
includes aquatic exercises for flexibility, strength, and cardiovascular
endurance to promote general fitness, body conditioning, and stress
reduction. As the course will take place in shallow water, swimming
proficiency is not required.
Note: May be repeated for credit.

KINS 26. Exercise For Fitness.
General Education Area/Graduation Requirement: Understanding
Personal Development (E)
Term Typically Offered: Fall, Spring

Designed to encourage self-improvement through posture evaluation,
biomechanic analysis of exercises performed and through participation
in varied exercise forms. Students will develop a personalized repertoire
of strength, suppleness and stamina exercises calculated to improve
possible deficiencies in posture or movement to optimize enjoyment of
living.
Note: May be repeated for credit.

General Education Area/Graduation Requirement: Understanding
Personal Development (E)
Term Typically Offered: Fall, Spring

Jogging will expose the student to the fundamentals of jogging/running,
its potential physiological and sociological benefits as a lifetime activity,
fitness testing and individualized conditioning programs.
Note: May be repeated for credit.

KINS 30. Bicycling.
General Education Area/Graduation Requirement: Understanding
Personal Development (E)
Term Typically Offered: Fall, Spring

Cycling as a lifetime sport; physiological benefits derived from bicycle
riding; individual functional evaluation and conditioning, cycle touring.
Lecture one hour; activity two hours.
Note: May be repeated for credit.

KINS 33. Intermediate Weight Training.
General Education Area/Graduation Requirement: Understanding
Personal Development (E)
Term Typically Offered: Fall, Spring

Weight training as a lifetime fitness activity; emphasis on going beyond
the beginning level through development of an individualized program
designed to meet the needs of each individual.
Note: May be repeated for credit.
KINS 36.  Beginning Olympic Weight Lifting.  1 Unit
Prerequisite(s): KINS 33 or equivalent.
Term Typically Offered: Fall, Spring
Introduces the lifter to the sport of weight lifting which consists of the
two lifts (two hands snatch and the two hands clean and jerk) used in
Olympic competition. It includes the complete breakdown of the two lifts,
the assistive lifts necessary to learn the parts of the two lifts, and the
proper training sequence. The students will also be introduced to training
cycles, proper diet, and the use of assistive equipment.
Note: May be repeated for credit.

KINS 40.  Tai Chi.  1 Unit
General Education Area/Graduation Requirement: Understanding
Personal Development (E)
Term Typically Offered: Fall, Spring
Examines the historical, philosophical, psychological and physiological
aspects of Tai Chi. Students will be provided the opportunity to
experience a wide range of movement patterns that focus on the
integration of mind and body. The form and structure of technique as well
as breathing exercises will be included.
Note: May be repeated for credit.

KINS 43.  Beginning Tae Kwon Do.  1 Unit
General Education Area/Graduation Requirement: Understanding
Personal Development (E)
Term Typically Offered: Fall, Spring
Primary emphasis on throwing, blocking, punching and kicking. The
philosophy of Truism and Confucianism is explored.
Note: May be repeated for credit.

KINS 46.  Beginning Judo.  1 Unit
Term Typically Offered: Fall, Spring
Instruction in beginning judo tactics including throws and falls,
conditioning, and protective devices for self-defense.
Note: May be repeated for credit.

KINS 50.  Uechi-Ryu Karate.  1 Unit
Term Typically Offered: Fall, Spring
Examines the historical, philosophical, and physical aspects of Uechi-Ryu
Karate. Students will be asked to learn the basic techniques and skills
used in this Okinawan system as well as to develop and improve in body
conditioning, and protective devices for self-defense.

KINS 56.  Beginning Self-Defense for Women.  1 Unit
General Education Area/Graduation Requirement: Understanding
Personal Development (E)
Term Typically Offered: Fall, Spring
Prepares women to deal psychologically, sociologically and physically
with rape and violent assault. The physical tactics taught are based on
the use of hands and feet as weapons. They are simple yet an effective
use of one’s strength and mental attitude.
Note: May be repeated for credit.

KINS 59.  Self Defense and Conditioning.  1 Unit
Term Typically Offered: Fall, Spring
Multifaceted conditioning course that utilizes self defense techniques to
develop self discipline, confidence and respect for physical capabilities
and limitations of others.
Note: May be repeated for credit.

KINS 63.  Beginning Ballroom Dance.  1 Unit
Term Typically Offered: Fall, Spring
Development of proficiency in ballroom dance, including history,
vocabulary, ballroom dance etiquette and basic steps for foxtrot, waltz,
hustle, cha cha, tango, rhumba, salsa, and merengue.
Note: May be taken for credit more than once for credit.

KINS 72.  Beginning Basketball.  1 Unit
Term Typically Offered: Fall, Spring
Development of fundamental skills and tactics of the game, knowledge of
basic strategy and rules. Emphasis given to individual and team concepts
as they relate to performance and competition.
Note: May be repeated for credit.

KINS 73.  Intermediate Basketball.  1 Unit
Term Typically Offered: Fall, Spring
Advancement of basketball skills and strategy. Emphasis is given to
individual and team concepts as they relate to performance competition
and officiating basketball.
Note: May be repeated for credit.

KINS 75.  Beginning Volleyball.  1 Unit
Term Typically Offered: Fall, Spring
Development of fundamental skills, basic offensive and defensive systems of team
play, basic strategies and rules. Emphasis on team work and developing
supportive attitudes and behavior which encourages continued
involvement in volleyball as a physical activity.
Note: May be repeated for credit.

KINS 79.  Beginning Soccer.  1 Unit
Term Typically Offered: Fall, Spring
Development of basic skills of ball handling, passing, dribbling, trapping,
tackling, individual and team tactics and strategies; rules interpretation
and officiating; promotion of bio-psychosocial well being.
Note: May be repeated for credit.

KINS 83.  Beginning Golf.  1 Unit
General Education Area/Graduation Requirement: Understanding
Personal Development (E)
Term Typically Offered: Fall, Spring
Development of sufficient basic proficiency in golf to recognize and
enjoy it as a lifetime activity; including U.S.G.A. rules, etiquette and the
fundamental mechanics involved in the use of irons and woods.
Note: May be repeated for credit.
KINS 86. Beginning Tennis.
General Education Area/Graduation Requirement: Understanding
Personal Development (E)
Term Typically Offered: Fall, Spring
Development toward proficiency in tennis, including basic court skills, knowledge, and elementary strategies. Development of enjoyable and appropriate cooperative and competitive modes of behavior, including etiquette and self-awareness. Attention is given to healthful approaches to vigorous lifetime physical activity.
Note: May be repeated for credit.

KINS 87. Intermediate Tennis.
Term Typically Offered: Fall, Spring
Development and refinement of skills at the intermediate level in all strokes. Development and refinement of playing techniques and strategies. Learning how to enjoy competitive situations and to relate well to others in competition. Adjustment to stressful competitive conditions and improvement of personal responses under stress.
Note: May be repeated for credit.

KINS 88. Beginning Badminton.
Term Typically Offered: Fall, Spring
Development of fundamentals in badminton including beginning skills, offensive and defensive tactics and strategy; singles, doubles and mixed doubles tournament play.
Note: May be repeated for credit.

KINS 89. Intermediate Badminton.
Term Typically Offered: Fall, Spring
Development of movement skills, strokes, tactics in singles and doubles at a more advanced level. Emphasis on "cut" or deceptive strokes, rotation or diagonal system of doubles play, increased ability to move on the court, application of laws to move difficult playing situations. Singles, doubles and mixed doubles play in tournaments.
Note: May be repeated for credit.

KINS 90. Beginning Racquetball.
General Education Area/Graduation Requirement: Understanding
Personal Development (E)
Term Typically Offered: Fall, Spring
Fundamental theory and practice of the game of racquetball including service, receiving the service, back wall play, basic shots, variations, court positioning and general tactics; history rules, and safety precautions.

KINS 91. Intermediate Racquetball.
Term Typically Offered: Fall, Spring
Development of proficiency at the intermediate level. Includes service and return, back wall play, offensive and defensive shots with emphasis on techniques, strategy and tactics of competition.
Note: May be repeated for credit.

KINS 92. Beginning Tennis.
General Education Area/Graduation Requirement: Understanding
Personal Development (E)
Term Typically Offered: Fall, Spring
Development toward proficiency in tennis, including basic court skills, knowledge, and elementary strategies. Development of enjoyable and appropriate cooperative and competitive modes of behavior, including etiquette and self-awareness. Attention is given to healthful approaches to vigorous lifetime physical activity.
Note: May be repeated for credit.

KINS 93. Intermediate Racquetball.
Term Typically Offered: Fall, Spring
Development of proficiency at the intermediate level. Includes service and return, back wall play, offensive and defensive shots with emphasis on techniques, strategy and tactics of competition.
Note: May be repeated for credit.

KINS 94. Exercise for Healthy Living.
Corequisite(s): One unit skill or fitness class; may be taken concurrently.
General Education Area/Graduation Requirement: Understanding
Personal Development (E)
Term Typically Offered: Fall, Spring
Exposes students to a broad range of information related to the understanding and development of personal fitness and health, including psycho-social well-being. Examines the elements of exercise, nutrition, and stress management as they relate to healthful living. Students will explore a variety of personal choices and the options for developing and maintaining lifetime wellness.

Term Typically Offered: Fall, Spring
KINS 101 is an introduction to the study of human movement, including its role in daily life and its place in higher education. Career opportunities related to sport, movement, exercise, and fitness will be examined. Students in this course will explore various educational pathways, requirements, and professional opportunities in the sub-disciplines of Kinesiology.

KINS 106C. Advanced Weight Training.
Term Typically Offered: Fall, Spring
Advanced instruction in weight lifting including Olympic weight lifting, power lifting, body building, lifting for athletic competition and lifting for physical fitness.

KINS 110. Women and Sport.
Term Typically Offered: Fall, Spring
Role of women in sport; an inquiry into traditional and contemporary attitudes and practices regarding the woman's role in the sporting world.

KINS 118A. Martial Arts: Karate.
General Education Area/Graduation Requirement: Humanities (Area C2), Race & Ethnicity Graduation Requirement (RE)
Term Typically Offered: Fall, Spring
Explodes the ancient tradition of the Asian martial arts in conjunction with actual participation in a selected martial arts course. Asks the student to critically examine the cultural contributions of specific Asian communities such as Japan, China, and Korea, to the Martial Arts as practiced in the U.S.

KINS 118B. Martial Arts: Tae Kwon Do.
General Education Area/Graduation Requirement: Race & Ethnicity Graduation Requirement (RE), Humanities (Area C2)
Term Typically Offered: Fall, Spring

KINS 118C. Martial Arts: Tai Chi.
General Education Area/Graduation Requirement: Race & Ethnicity Graduation Requirement (RE), Humanities (Area C2)
Term Typically Offered: Fall, Spring
KINS 120. Strength and Conditioning. 3 Units
Prerequisite(s): Restricted to Kinesiology, Pre-Exercise Science, or instructor approval.
Term Typically Offered: Fall, Spring

The course is designed to introduce students, persons interested in the personal training field, strength & conditioning and/or prospective coaches at the high school, college, or professional level, public, private settings to what are commonly referred to as training units. These training units are part of the total training program an individual/student/athlete would use to prepare for participation in fitness activity or sport. Included are practical hands-on participatory experiences, program design strategy and practical field tests.

KINS 121. Peak Performance Through Psychological Skills. 3 Units
Term Typically Offered: Fall only

Examination of, and practical experience in, techniques for maximizing sport and creative performance through the development of mental skills and strategies for stress control, imagery, goal setting, and concentration.

KINS 122B. Cardiopulmonary Resuscitation. 1 Unit
Term Typically Offered: Fall, Spring

Designed to meet American Red Cross or American Heart Association Certification in CPR.
Note: May be repeated for credit.

Credit/No Credit

KINS 130. Elementary Physical Education Curriculum and Content. 3 Units
Prerequisite(s): KINS 138; Restricted to junior or senior Kinesiology majors-Physical Education concentration.
Term Typically Offered: Spring only

Overview of the total elementary physical education curriculum. Designed specifically for physical education concentration students. The primary focus will be placed on cooperative activities, movement education, development of locomotor, non-locomotor, manipulative skills, perceptual motor activities, fitness, games, and the correlation of classroom subjects with physical education. Introduces students to developmentally and instructionally appropriate physical education for children. Students will be able to develop a scope and sequence for an elementary physical education curriculum.

KINS 131. Secondary Physical Education Curriculum. 2 Units
Prerequisite(s): KINS 138; Kinesiology major - Physical Education concentration students only.
Term Typically Offered: Fall only

Designed for senior level students in the Kinesiology major, Physical Education Option, Credential Concentration who wish to deliver an effective, meaningful physical education curriculum to diverse students. Covers curriculum components that include content, content organization, distinctive curriculum models and aspects of curriculum application. Students will learn how to sustain a positive learning experience, conceive and plan meaningful curricula for school based instruction, and to link the school program to opportunities for adolescents outside of school.

KINS 132. Planning, Designing and Managing a Fitness Center. 3 Units
Term Typically Offered: Fall, Spring

Designed to provide students with the basic guidelines for starting and managing multiple health and fitness centers in the private setting; focus on initial start-up of a health and fitness center and operating procedures with emphasis on equipment selection and arrangement, employee training, program planning for safe and optimally beneficial health and fitness results.

KINS 133. Integration of Concepts. 3 Units
Prerequisite(s): KINS PETE or PACC majors only; and GWAR certification before Fall 09; or WPJ score of 80+-; or 3-unit placement in ENGL 109M or ENGL 109W; or 4-unit placement in ENGL 109M or ENGL 109W and co-enrollment in ENGL 109X; or WPJ score 70 or 71 and co-enrollment in ENGL 109X.
General Education Area/Graduation Requirement: Writing Intensive Graduation Requirement (WI)
Term Typically Offered: Fall, Spring

Critical perspective of how theoretical concepts and integrated knowledge can be applied to various aspects of physical education, sport, and physical activity. Emphasis is on a coherent understanding of the interrelationships that exist in the subdisciplines of kinesiology and other related subject areas. Capstone experience for students in the Physical Education Concentration; must be taken during the final semester of the student’s plan of study.

KINS 134. History and Philosophy of Physical Education and Sport. 3 Units
Prerequisite(s): KINS 101. KINS 101 may be taken concurrently.
Term Typically Offered: Fall, Spring

Examination of historical events in physical education and sport; examination of how these historical events have influenced the varying philosophies of physical education, sport, and physical activity, past and present; identification of societal forces in cultures which lead to philosophical beliefs and concepts relative to the structure of the disciplines of physical education, sport, and physical activity.

KINS 135. Assessment Strategies in Physical Education. 3 Units
Term Typically Offered: Fall, Spring

Selection, analysis, construction and administration of norm-referenced and criterion-referenced tests used for formative and summative evaluation in the physical education public school setting. Includes both traditional and alternative assessment strategies. Computers are used for data collection, development of assessment instruments, development of grading programs, and for descriptive statistical analysis.

KINS 136. Sport And Aging. 3 Units
Term Typically Offered: Fall, Spring

Considers the positive and negative aspects of vigorous exercise and/or sport activity throughout the aging process. Included will be inquiry into the opportunities for activity among adults over the age of thirty, through the active career years, and beyond.
### KINS 137. Sociology Of Sport. 3 Units
**Prerequisite(s):** KINS 101. KINS 101 may be taken concurrently.
**Term Typically Offered:** Fall, Spring

Analyzes sport as a social institution and the interrelations between sport and societal subsystems. Consideration of the attitudes, values, and behaviors associated with sport. Analyzes contemporary problems associated with sport: race relations, the traditional and emergent role of women, leisure behavior, aggression and violence, and political and economic concerns. Analyzes a sociological problem within the context of sport.

### KINS 138. Sport Pedagogy. 3 Units
**Prerequisite(s):** Kinesiology Majors, Minors and Liberal Studies PE Concentration.
**Term Typically Offered:** Fall, Spring

Sport pedagogy examines learning, teaching and instruction in sport, physical education and related areas of physical activity. Content is focused on differentiated instructional strategies, effective teaching and learning skills, designing instructional plans, managerial behaviors, organizational arrangements, communication skills, and professionalism.

### KINS 139. Leadership and Communication. 3 Units
**Term Typically Offered:** Fall, Spring

Social actions and behavioral patterns as influenced by the communication process; experiential approaches to techniques of interpersonal and small group relationships and leadership; the constantly evolving communication media as instruments of behavioral change.

### KINS 141. PRO ACT I - Dual Sports. 3 Units
**Prerequisite(s):** KINS 138
**Corequisite(s):** KINS 138
**Term Typically Offered:** Fall only

Designed to prepare physical education students to analyze and teach developmentally appropriate activities designed for dual participation in the public school setting. Student will be given opportunity to learn and apply the basic techniques of tennis, badminton and pickleball as well as the offensive and defensive net strategies for game play. Emphasis will be given to skill acquisition analysis.

### KINS 142. Professional Activities II - Creative Movement and Dance. 3 Units
**Prerequisite(s):** KINS 138
**Term Typically Offered:** Spring only

Students will develop an understanding of the content specific to the design and delivery of educational gymnastics and rhythm/dance activities in a K-12 setting. Gymnastics components include: skills, appropriate progressions, spotting techniques, safety and methods of organization. Rhythm and dance will include basic locomotive skill development; basic rhythm activities; and contemporary, line, square, round, contra, folk, country and Western and social/ballroom dance. Historical and multicultural concepts related to dance are also included.

### KINS 144. Analysis of Weight Training & Muscular Fitness. 2 Units
**Prerequisite(s):** Restricted to Kinesiology, Pre-Exercise Science, Coaching Minor or instructor approval
**Term Typically Offered:** Fall, Spring

The course is designed to prepare students to teach, design, and implement strength/conditioning for various fitness/athletic populations. Included are skill techniques, skill analysis, class/group organization, equipment analysis, muscular fitness related to athletics, fitness, rehabilitation, and other factors related to effective teaching of muscular fitness in high school, college, private, public and corporate settings. Emphasis is on kinesiology/biomechanics principles, human anatomy, and physiological adaptations to the various strength/conditioning for fitness/athletic training covered in the course.

### KINS 145. Pro Act III - Team Sports. 3 Units
**Prerequisite(s):** KINS 138
**Corequisite(s):** KINS 138
**Term Typically Offered:** Fall only

This is an introductory course designed for students within the Kinesiology Major Physical Education Concentration to analyze the teaching of field sports in secondary school settings. This course provides the student the opportunity to learn basic techniques, strategies, and rules of flag football, volleyball, softball, soccer and basketball. Emphasis will be given to skill performance, skill development, teaching methodology, skill analysis, lead-up activities, and sport participation.

### KINS 146. PRO ACT IV Individual Sports. 3 Units
**Prerequisite(s):** KINS 138
**Corequisite(s):** KINS 138
**Term Typically Offered:** Spring only

Designed to prepare physical education students to analyze and teach developmentally appropriate activities designed for individual participation in the public school setting. Student will be given the opportunity to learn and apply the basic techniques of golf, track and field and aquatics as well as the strategies necessary for effective participation. Emphasis will be given to skill acquisition and analysis.

### KINS 148. ProAct V - Nontraditional Games and Sports. 3 Units
**Prerequisite(s):** KINS 138
**Corequisite(s):** KINS 138
**Term Typically Offered:** Fall only

Students will develop an understanding of the content specific to the design and delivery of non-traditional games and sports. Instruction will focus on performance, skill analysis, methods of teaching, strategies for instruction, and evaluation of skills in K-12 settings. The students will be introduced to a variety of nontraditional games and outdoor activities, as well non-traditional team sports including Lacrosse, Ultimate Frisbee, Speedball, Team Handball, and Field Hockey.
KINS 149. Professional Activities of Health and Skill Related Fitness. 3 Units
Prerequisite(s): KINS 138
Corequisite(s): KINS 138
Term Typically Offered: Spring only

Students will develop an understanding of the content specific to the design/delivery of a variety of innovative fitness/wellness learning experiences for individuals in K-12 settings. Emphasis will be placed on movement and its relationship to the components of health fitness when pursuing and promoting a physically active lifestyle. Students will develop skills in assessing fitness levels and implementing strategies for supporting positive behaviors and attitudes toward fitness/wellness for individuals from diverse populations.

KINS 150. Exercise and Sport Physiology. 3 Units
Prerequisite(s): BIO 26 or equivalent, with grade of C or better
General Education Area/Graduation Requirement: Laboratory (B3), Further Studies in Area B (B5)
Term Typically Offered: Fall, Spring

Sports physiology with special emphasis on studying the various systems in the body that are involved in work, exercise and sport. Training programs to improve these systems and their responses will be discussed in a wide variety of settings including exercise for health, fitness, recreation, and sports competition. Lecture two hours; laboratory 2.5 hours.

Note: Does not satisfy exercise physiology requirement for Exercise Science majors.

KINS 151. Kinesiology. 3 Units
Prerequisite(s): BIO 22 or equivalent.
Term Typically Offered: Fall, Spring

Anatomical concepts and physical laws as applied to human movement emphasizing the effects of individual and environmental variables. Includes analysis of normal and pathological gait. Lecture two hours; laboratory three hours.

KINS 151A. Biomechanics. 3 Units
Prerequisite(s): KINS 151.
Term Typically Offered: Fall, Spring

Introduction to fundamental mechanical concepts as they apply to human movement. A broad range of human movement will be explored including activities from sport, industrial settings, normal and pathological locomotory skills, and movements involved in manipulating the environment in which we live. Laws of physics, mechanical principles and mathematical concepts will be integrated in studying man as a biological entity. Lecture two hours; laboratory three hours.

KINS 151B. Biomechanics II. 3 Units
Prerequisite(s): BIO 10, BIO 22, KINS 151, and KINS 151A
Term Typically Offered: Fall, Spring

The study of biomechanical theory in regards to quantifying and analyzing human movement. Human movement will be examined from an advanced perspective, including tissue mechanics, the pathomechanics of chronic disease, and exercise and sport performance.

KINS 151C. Dance Kinesiology. 3 Units
Prerequisite(s): BIO 22 or equivalent.
Term Typically Offered: Fall, Spring

Human musculoskeletal and neurological systems, energy production, and biomechanical interrelationships of human motion applied to dance. Emphasis on the nervous, muscular and tendinous structures and the mechanical function of levers and force application and injury prevention for the dancer.

KINS 151D. Applied Kinesiology and Biomechanics. 3 Units
Prerequisite(s): BIO 26 with a grade of C or better.
Term Typically Offered: Fall, Spring

Fundamentals of human movement patterns with an emphasis on applied anatomy, movement principles, movement sequences, applied biomechanics, developmental motor stages and basic movement analysis.

Note: Does not satisfy kinesiology or biomechanics requirements for Exercise Science majors.

KINS 152. Physiology Of Exercise. 3 Units
Prerequisite(s): CHEM 1B or CHEM 6B and BIO 131
Term Typically Offered: Fall, Spring

Study of circulatory, respiratory and metabolic response to exercise in humans under various physiological and ambient conditions. Lecture 2 hours; laboratory 2.5 hours.

KINS 152A. Fundamentals of Exercise Programs. 3 Units
Prerequisite(s): KINS 152.
Term Typically Offered: Fall, Spring

Study of current training programs used in different types of activity. Emphasis will be placed on specific training techniques, nutritional needs, methods of testing/evaluating, and special considerations needed for various populations.

KINS 152B. Exercise Physiology of Women. 3 Units
Prerequisite(s): BIO 22 or 26
Term Typically Offered: Fall, Spring

Examines the general physiology of women, how physical activity affects women's physiological functions, and how physiological functions affect women in sport and exercise performance. A comprehensive review of scientific literature is included.

KINS 152C. Prolonged Exercise. 2 Units
Prerequisite(s): An introductory college biology or zoology course.
Term Typically Offered: Fall, Spring

Extensive review of the energy metabolism, cardiovascular and pulmonary function, endocrine response, nutritional need, training effect, and biochemical response to prolonged exercise of 1-6 hours in duration.

KINS 152D. Blood Lactate and Exercise. 2 Units
Prerequisite(s): KINS 152.
Term Typically Offered: Fall, Spring

Reviews the basic aspects of lactate formation, release, and uptake by skeletal muscle and blood during exercise and training. Presents recent clinical and research findings related to physical performance.
KINS 152S. Energy Production & Sports Performance. 3 Units
Prerequisite(s): KINS 152 and co-enrollment in KINS 153 or Instructor Permission Recommended: FACS 10 & FACS 113
Term Typically Offered: Fall, Spring
Study of ergogenic aids, exercise nutrition and exercise performance enhancing drugs/supplements and their physiological effects on energy production and exercise performance. Lecture: 3 hours

KINS 153. Cardiovascular Testing and Exercise Prescription. 3 Units
Prerequisite(s): KINS 152 or instructor permission.
Term Typically Offered: Fall, Spring
Designed to train exercise leaders, exercise test technologists, and exercise program directors. Focus is upon development of basic skills, both administrative and technical, needed to develop a program of graded exercise testing and exercise prescription for asymptomatic and symptomatic populations. Lecture two hours; laboratory three hours.

KINS 153C. Cardiac Rehabilitation & Exercise Electrocardiography. 3 Units
Prerequisite(s): KINS 153 or Instructor Permission
Term Typically Offered: Fall, Spring
Study of cardiac rehabilitation and exercise electrocardiography, reviews clinical pathophysiology and ECG abnormalities during rest, exercise stress testing and cardiac rehabilitation. Lecture 3 hours.

KINS 154A. Principles and Techniques in a Clinical Setting. 3 Units
Prerequisite(s): Athletic Training or Kinesiology majors only; instructor permission
Term Typically Offered: Fall, Spring
Introduction to professional ethics and attire, the allied health care system, patient transfers, wheelchair and ambulation aids, medical terminology and record keeping. Fundamental principles and concepts underlying the therapeutic application of modalities, including methods of administering heat, cold, electricity, sound, light and water are covered.

KINS 154B. Management and Health Care Administration in Athletic Training. 3 Units
Prerequisite(s): Instructor permission only
Term Typically Offered: Fall, Spring
Organization, management and health care administration of athletic training programs. Includes communication skills, budget, facility design and management, legal aspects, drug testing, education, computer use, insurance and record keeping, personnel development (job search, CEUs, licensure), professional and governing organizations, athletic training reporting systems, emergency action plans, blood borne pathogen procedures, preparticipation exam management, health care issues and fundraising.

KINS 154C. Therapeutic Modalities Laboratory. 1 Unit
Prerequisite(s): BIO 22 or BIO 26, and KINS 154A, and KINS 156, and instructor permission.
Term Typically Offered: Fall, Spring
Techniques and clinical skills in the treatment of injuries using therapeutic modalities. Hands-on experience in the clinical application of contemporary therapeutic modalities (electrotherapeutic modalities, hydrotherapeutic modalities, cryotherapy, radiant energy, paraffin, intermittent compression units, traction units, massage) including patient preparation, set-up, dosage determination and operational procedures. Lab two hours.

KINS 155A. Clinical Evaluation of the Upper Extremity. 2 Units
Prerequisite(s): BIO 22 or BIO 26 or Equivalent and KINS 156.
Term Typically Offered: Fall, Spring
Analyzes and performance of evaluation procedures of the upper extremity, head and spine. Includes the development of skills in a patient interviewing, palpation methods, manual muscle testing, neurological and orthopedic assessments and special tests.

KINS 155B. Clinical Evaluation of the Lower Extremity. 2 Units
Prerequisite(s): BIO 22 or BIO 26, KINS 154A, KINS 156.
Term Typically Offered: Fall, Spring
Analyzes and performance of evaluation procedures of the lower extremity, trunk and low back. Includes the development of skills in patient interviewing, palpation methods, manual muscle testing, neurological and orthopedic assessments and special tests.

KINS 156. Care Of Athletic Injuries. 3 Units
Term Typically Offered: Fall, Spring
Application and methods of caring for and preventing athletic injuries through strapping, padding, conditioning, etc.; practical application of first aid and a basic introduction to treatment and rehabilitation of common athletic injuries.

KINS 156A. Emergency Response. 2 Units
Term Typically Offered: Fall, Spring
Underlying principles and applied techniques of first aid. Meets the requirements for the Emergency Response and CPR for the Professional Rescuer certificates of the American Red Cross. Lecture one hour, laboratory two hours.

KINS 157. Therapeutic Exercise. 3 Units
Prerequisite(s): BIO 22 or BIO 26, KINS 155A or KINS 155B, and KINS 156. KINS 155A or KINS 155B can be taken concurrently with KINS 157
Term Typically Offered: Fall, Spring
Biomechanical principles in the prescription of musculoskeletal rehabilitation exercises. Topics include passive, active and resistive range of motion, manual muscle testing, and exercises for strength, stamina and suppleness for every part of the body.

KINS 157B. Therapeutic Exercise for Chronic Conditions. 3 Units
Prerequisite(s): BIO 22 & BIO 131, or BIO 26, or instructor permission
Term Typically Offered: Fall, Spring
This course is designed to develop knowledge of fundamental disease processes in common chronic conditions and related exercise management. The general concepts of common chronic disease, including etiology, basic pathogenesis, co-morbidities and basic exercise prescription will be investigated. Evidence will be investigated and presented about the role of exercise in the prevention and management of disease, disability and lifestyle.

KINS 158. Motor Learning and Control. 3 Units
Prerequisite(s): BIO 26 or BIO 131 or equivalent
Term Typically Offered: Fall, Spring
Study of the motor and cognitive characteristics of individuals involved in learning and controlling motion skills and the conditions that can influence that learning and control. Lecture two hours; laboratory three hours.
KINS 160. Sport and Exercise Psychology. 3 Units
Term Typically Offered: Fall, Spring
Application of research findings as they apply to psychological performance factors in sport, physical education and exercise settings, such as motivation/adherence, stress management, personality and psychological skills training.

KINS 161. Theory of Sport and Fitness Management. 3 Units
Term Typically Offered: Fall only
This course is designed to introduce students to the basic theory underlying the multiple components of the sport and fitness industry. Fundamental concepts and theories of sports and fitness management will be applied to various segments of the sports industry: professional sports, collegiate sports, community sports and recreation, intramural sports and corporate fitness.

KINS 165. Theory of Coaching. 3 Units
Term Typically Offered: Spring only
Students will be introduced to coaching theory as it relates to developing leadership skills to work with athletes, and teams in the context of organized sport. Topics will include motivation, self-esteem, leadership, communication, competition and cooperation, team management, and optimal performance skills (goal setting, concentration, composure, recovery from mistakes/loss, consistency, and stress management).

KINS 166. Ethics, Inclusion and Equity in Coaching. 3 Units
Term Typically Offered: Fall only
This course educates future coaches on the moral and ethical dilemmas typically encountered in competitive athletics. Students will also develop strategies to address various forms of exclusion and inequity in sports and athletics.

KINS 167. The African American Sport Experience. 3 Units
Term Typically Offered: Fall, Spring
Examination of the experiences of the African American athlete in sport and society, from the period of enslavement to the contemporary era. Topics include gender experiences, intercollegiate experiences, professional sport, and the Olympic games, as well as the interconnections between African American communities and the role of sport. The experiences of African Americans will be compared to those of other ethnic and cultural groups.

KINS 168. Sport and Film. 3 Units
Term Typically Offered: Fall, Spring
This course uses sport films to examine relationships of power in society and the way those relationships are contested and often reinforced. Particular attention will be paid to cultural tensions and negotiations around issues related to race, gender, class, and sexuality. This course utilizes films, with accompanying readings, to understand the institution of sport in American culture, as well to understand how sport is setting where issues of race, class, gender, religion, ability/disability, and sexuality are contested and reinforced.

KINS 169. The Modern Olympic Games. 3 Units
Term Typically Offered: Fall, Spring
A study of the historical development of the modern Olympic Games. Areas covered include politics, nationalism, commercialism, marketing and amateurism. The contribution of athletes and administrators who have help shape the Olympic tradition will be assessed.

KINS 171. Adapted Physical Education: Basic Skill/Fitness Activities and Assessment. 3 Units
Prerequisite(s): KINS 177.
Term Typically Offered: Fall, Spring
Development of competencies for planning, developing, and evaluating effective skill and fitness activities for students with disabilities. Emphasis will be placed on basic skill development, fitness and traditional and alternative assessment strategies and postures assessment and programming for students with disabilities. Information regarding the application of specific standardized assessment instruments for placement decisions will be examined. Students will be required to participate in 15 hours of service learning. Class meets for 2 hours lecture and 2 hours activity.

KINS 172. Movement Education. 3 Units
Prerequisite(s): Liberal Studies or Child Development majors only, or instructor permission
Term Typically Offered: Fall, Spring
Examination of activities and theoretical concepts that relate to the physical, social, emotional and intellectual development of the individual. Content includes: health-related physical fitness, movement concepts, stability, locomotor and manipulative skills, rhythms and dance, gymnastics, games and sport activities.

KINS 176. Perceptual Motor Development. 3 Units
Term Typically Offered: Fall, Spring
Study of the genetic, prenatal, perinatal and postnatal factors affecting the sequential perceptual motor development of children. Inquiry is made into reflexes, sensory motor testing and stimulation, perceptual motor testing and remedial activities in motor development.

KINS 177. Introduction to Adapted Physical Education. 3 Units
Term Typically Offered: Spring only
Historical and philosophical bases for adapted physical education, including the development and management of programs with emphasis on the psychomotor, affective and cognitive domains. The impact of federal and state legislation, legal liability and special health and safety problems will be studied in relationship to the role of the adapted physical education teacher, the interdisciplinary team, the parent and the pupil.

KINS 179. Adapted Physical Education: Program Planning. 3 Units
Prerequisite(s): KINS 171 and KINS 177.
Term Typically Offered: Fall, Spring
Study of the variables in physical education curriculum and program planning - assessment, goals and objectives, development of program content, and evaluation - as related to individuals with disabilities.

KINS 188. The Effects of Physical Activity on the Brain and Neurological Disorders. 3 Units
Prerequisite(s): KINS 158 or instructor permission
Term Typically Offered: Fall, Spring, Summer
This course will provide an in-depth evaluation of the molecular and systems-level neurophysiological changes as well as behavioral (movement, cognitive, affective/emotional) changes that manifest from physical activity and exercise. The changes resulting from acute vs. chronic exercise as well as different exercise modalities, intensities, frequencies, and durations will be explored. Pathophysiology of common neurological disorders, such as Parkinson's disease, Stroke, Multiple Sclerosis and dementia, and the role of physical activity/exercise in the development and treatment will be examined.
KINS 194A. Assigned Field Experience in Kinesiology. 1 - 2 Units
Term Typically Offered: Fall, Spring

Assigned experience in Kinesiology. Students keep records of daily experiences and prepare periodic progress reports. Students receive one unit of credit for three hours per week for one semester of field experience.
Note: Registration requires prior approval of the department coordinator. May be repeated for a total of five units.

Credit/No Credit

KINS 194B. Assigned Internship in Exercise Science. 1 - 3 Units
Prerequisite(s): KINS 151 and/or KINS 152; or instructor permission.
Term Typically Offered: Fall, Spring

Assigned internship other than in the Human Performance Lab. The student will assist in laboratory experiments and other special procedures; will learn the operation of equipment and sequentially will be expected to administer tests and interpret the results. Interns will be expected to attend monthly conferences.
Note: May be repeated for a total of 3 units.

Credit/No Credit

KINS 194C. Assigned Field Experiences in Pre-Physical Therapy. 1 - 2 Units
Term Typically Offered: Fall, Spring

Assigned experience under the direction of a physical therapist. Students keep records of their experiences. Registration requires prior approval of the pre-physical therapy coordinator.
Note: May be repeated up to a total of 6 units. Open to Physical Education majors in the pre-physical therapy option.

Credit/No Credit

KINS 194D. Assigned Field Experience in Coaching. 1 - 2 Units
Term Typically Offered: Fall, Spring

Assigned experience in coaching (two hours daily for the full schedule of the sport for two units of credit). Students keep records of daily experiences and prepare periodic progress reports. Succeeding enrollments should be in different sports.
Note: May be repeated for a total of 6 units.

Credit/No Credit

KINS 194E. Assigned Internship in Adapted Physical Education. 1 - 3 Units
Prerequisite(s): Any two of the following: KINS 171, KINS 176, KINS 177, or KINS 179; permission of adapted credential advisor.
Term Typically Offered: Fall, Spring

Assigned experience in the conduct of Adapted Physical Education Programs. Students will keep records of their experiences. Three clock hours per week per unit of credit. Credential candidates may not use in lieu of Phase III requirements.
Note: May be repeated up to six times for credit for a maximum of 6 units.

Credit/No Credit

KINS 194F. Assigned Field Experience in Allied Health. 1 - 3 Units
Term Typically Offered: Fall, Spring

Practical experience in Occupational Therapy, Chiropractic or other allied health professions. Students keep records of their experiences while working under the direct supervision of a licensed clinician. Registration requires prior approval of a Pre-Physical Therapy advisor.
Note: May be repeated up to a total of 6 units.

Credit/No Credit

KINS 194G. Assigned Professional Experience. 1 - 2 Units
Term Typically Offered: Fall, Spring

Assigned professional experience in organization and evaluation of physical education, athletic training, exercise or pre-therapy. Students work closely with a Sacramento State faculty member and receive one unit of credit for three hours of work per week for one semester.
Note: May be repeated for a total of 3 units toward graduation. These units may not be applied to the major.

Credit/No Credit

KINS 194H. Assigned Field Experience in Athletic Training. 1 - 3 Units
Prerequisite(s): Instructor's permission only
Term Typically Offered: Fall, Spring

Practical experience in athletic training under the direct supervision of an NATA Certified Athletic Trainer in one of the following settings: professional athletics, high school, clinic, industrial or private business.
Note: Registration requires prior approval of the program director. May be repeated up to a total of 3 units.

Credit/No Credit

KINS 195A. Directed Field Experience in Kinesiology. 1 - 2 Units
Term Typically Offered: Fall, Spring

Directed experience in the conduct of physical education. Students keep records of daily experiences and prepare periodic progress reports. Students receive one unit of credit three hours per week for one semester of field experience.
Note: Registration requires prior approval of the department coordinator. May be repeated for a total of 5 units.

Credit/No Credit

KINS 195B. Directed Internship in Exercise Science. 1 - 3 Units
Prerequisite(s): KINS 151 and/or KINS 152; or instructor permission.
Term Typically Offered: Fall, Spring

Directed internship in the Human Performance Laboratory under the supervision of one or more members of the faculty. The student will assist in laboratory experiments and other special procedures; will learn the operation of equipment and sequentially will be expected to administer tests and interpret the results. Interns will be expected to attend monthly conferences.
Note: May be repeated for a total of 3 units.

Credit/No Credit
KINS 195C. Directed Observation in Athletic Training. 1 - 2 Units
Prerequisite(s): Requires prior approval of Program Director
Term Typically Offered: Fall, Spring
Planned student observation of the health care practices of the Athletic Trainer and other sports medicine personnel in a clinical setting. Selected NATA competencies may be completed on site. 60 hours per unit.
Note: May be repeated for up to 4 units total credit.
Credit/No Credit

KINS 195D. Practicum in Athletic Training. 4 Units
Prerequisite(s): Instructor’s permission only
Term Typically Offered: Fall, Spring
Supervised athletic training experience in the athletic training room under the direct supervision of a Certified Athletic Trainer. Included are a series of guest lectures from the medical and paramedical field presenting lectures and demonstrations on topics in sports medicine. 300 hours plus all lectures are 4 units.
Note: Can be taken a minimum of four times and maximum of five times for credit, with the total units not to exceed 20 units.
Credit/No Credit

KINS 196. Experimental Offerings in Kinesiology. 2 - 3 Units
Term Typically Offered: Fall, Spring
Guided study and discussion of problems and topics in kinesiology. Supplemental readings, reports, and term projects are included. Proseminars dealing with specific topics or problems will be scheduled when the need exists.
Note: May be repeated for credit up to three times for credit.

KINS 196G. Sleep, Health and Athletic Performance. 3 Units
Term Typically Offered: Fall, Spring
This course is designed to introduce concepts related to sleep, circadian rhythm, human physiology, and behavior as they impact physical function, health and athletic performance. Concepts related to sleep, sleep deprivation, cognitive function, and learning outcomes in college students will be investigated. Students will have an opportunity to learn about devices used to collect data and analyze individual sleep patterns.

KINS 198A. Seminar in Physical Education - Elementary. 2 Units
Prerequisite(s): KINS 381 and EDTE 474A.
Corequisite(s): KINS 380 and EDTE 474B.
Term Typically Offered: Fall, Spring
Open to physical education single subject credential candidates this course accompanies an eight-week elementary student teaching experience. The focus is twofold: a) engage student teachers in the planning, instruction and assessment of an elementary physical education program aligned with state standards b) support student teachers with the Performance Assessment for California Teachers (PACT). Candidates will be expected to create a class environment that ensures the safe and productive participation in developmentally appropriate elementary physical education.

KINS 198B. Seminar in Physical Education - Secondary. 1 Unit
Prerequisite(s): KINS 198A.
Corequisite(s): EDTE 474B.
Term Typically Offered: Fall, Spring
Open to physical education single subject credential candidates this eight-week course accompanies an eight-week secondary student teaching experience. The focus is twofold: a) engage student teachers in the planning, instruction and assessment of a secondary physical education program aligned with state standards b) support student teachers with the Performance Assessment for California Teachers (PACT). Candidates will be expected to create a class environment that ensures the safe and productive participation in developmentally appropriate secondary physical education.

KINS 199. Directed Individual Study. 1 - 3 Units
Term Typically Offered: Fall, Spring
Individual research, project or directed reading. Open only to majors who appear competent to carry on individual work. Approval of the faculty under whom the individual work is to be conducted, and approval of the Department Chair required. Formal written report required.
Note: May be repeated for credit.
Credit/No Credit

KINS 203. Specificity of Conditioning. 3 Units
Term Typically Offered: Fall, Spring
Survey of current research in training regimen of conditioning programs designed to optimize physical conditioning in preparation for specific athletic competitions.

KINS 209. Graduate Studies in Kinesiology. 3 Units
Term Typically Offered: Fall, Spring
An overview of the varied subdisciplines, such as sport pedagogy, motor learning, strength and conditioning, sport psychology, cultural studies of sport, exercise physiology, and biomechanics. Students will read research from each subdiscipline and be able to make interdisciplinary connections.

KINS 210. Research Methods in Kinesiology. 3 Units
Term Typically Offered: Fall, Spring
Various methods and techniques of educational research as they are commonly applied in the field of Kinesiology; study of examples of their use in published research; practice in applying them to problems of interest to the student; analyzing data and writing research reports.

KINS 211. Research Seminar. 1 Unit
Term Typically Offered: Fall, Spring
Students develop and defend research proposals. Students registering for KINS 500 for the first time must register for KINS 211 concurrently.
Note: Student must re-enroll if proposal is not completed and accepted during the first registration
Credit/No Credit
KINS 236. Sport and Society.  
Term Typically Offered: Fall, Spring

Society and the institution of sport interact in a variety of ways. Students are given the opportunity to investigate and discuss in-depth a wide range of topics linking sport and society. Among these topics are violence and aggression, politics, racism, sexism, counter-cultures, mass media and the future of sport. The application of research to the real world is an integral part of the course.

KINS 245. Administration of Physical Education and Athletics. 3 Units  
Term Typically Offered: Fall, Spring

The organization and administration of physical education and athletic programs and the functional considerations involved. Primary areas include: personnel, curriculum, budgeting, contract management, public relations, liability and safety, critical issues, and procedures essential to quality programs.

KINS 250. Advanced Exercise Physiology Laboratory. 3 Units  
Prerequisite(s): KINS 152 or instructor permission.  
Term Typically Offered: Fall, Spring

Describes, explains, and practices the application of selected measurement techniques in the laboratory as they relate to pertinent research in the areas of exercise physiology. Emphasis will be placed on the use and calibration of equipment as well as adaptation of equipment to different research settings. Lecture two hours; laboratory three hours.

KINS 252. Advanced Exercise Physiology. 3 Units  
Prerequisite(s): 1 year of General Chemistry, BIO 131 or equivalent, KINS 152 or equivalent, and KINS 153 or equivalent.  
Term Typically Offered: Fall, Spring

Human physiological responses, from the cellular level to organ system level, to both acute and chronic exercise will be studied in detail with an emphasis on integrative physiological responses to exercise. The course will emphasize a complex regulatory systems approach to the changes and adaptations that occur with exercise. Specifically, how the regulatory systems dictate these changes. The course will aid in the understanding of both theoretical and integrative concepts in the area of exercise physiology. The course will provide a solid foundation that is needed to review and understand complex research in exercise physiology.

KINS 254. Advanced Biomechanics. 3 Units  
Prerequisite(s): KINS 151, KINS 210; or instructor permission.  
Term Typically Offered: Fall, Spring

Study human movement from a mechanical perspective utilizing laws of physics and relevant functional anatomical principles. Human movement will be looked at from a broad perspective, including basic movements to more complex skills. Students will use a variety of techniques to study the biomechanical principles of movement production including laboratory work, library research and examination of the appropriate theoretical constructs. Lecture two hours; laboratory three hours.

KINS 258. Research in Motor Learning. 3 Units  
Prerequisite(s): KINS 158, KINS 210, or instructor permission.  
Term Typically Offered: Fall, Spring

Designed to provide students with a solid foundation experience in motor learning; focus is on an intensive examination of a selected topic in motor learning; directed individual pilot study and the nature of original laboratory research.

KINS 259. Research in Exercise Physiology. 3 Units  
Prerequisite(s): KINS 152, KINS 210, or instructor permission.  
Term Typically Offered: Fall, Spring

Provides students with a solid foundation experience in human performance research. Primary focus is on intensive examination of selected advanced topics in exercise physiology.

KINS 260. Psychology Of Sport. 3 Units  
Term Typically Offered: Fall, Spring

The in-depth study of parameters of human behavior as specifically related to sport including personality factors, motivational techniques, expectancy effects, group dynamics, leadership issues, aggression, arousal, concentration, and goal setting.

KINS 262. Psychological Aspects of Peak Performance. 3 Units  
Term Typically Offered: Fall, Spring

In-depth examination of current research relating to theories of and techniques for performance enhancement in sport and dance through psychological skills strategies.

KINS 270. Instructional Strategies for Physical Activity and Sport. 3 Units  
Term Typically Offered: Fall, Spring

Study of theoretical concepts, models and research that relates to organizational and instructional strategies for physical activity and sport. Along with developing problem solving and critical thinking skills, provides the student with the opportunity to partake in self-directed and cooperative learning experiences, and develops communications skills that will enhance staff development and teaching of individuals and groups in a variety of physical activity and sport environments.

KINS 276. Teaching and Coaching Effectiveness. 3 Units  
Term Typically Offered: Fall, Spring

Study of the research methodology, systematic observation, and findings that relate to effective teaching and coaching in the school environment. Provides an analytical approach to the investigation of teaching and coaching behaviors by examining models and critical variables involved in describing, analyzing and interpreting the instructional process.

KINS 284. Contemporary Topics in Sport Performance. 1 - 3 Units  
Prerequisite(s): KINS 210.  
Term Typically Offered: Fall, Spring

Advanced research seminars on topics of contemporary interest. Specific topics will vary.  
Note: May be taken more than once for credit, provided topic is not repeated.

KINS 294A. Contemporary Topics in Exercise Physiology. 1 - 3 Units  
Prerequisite(s): KINS 210.  
Term Typically Offered: Fall, Spring

Advanced research seminars on topics of contemporary interest. Specific topics will vary.  
Note: May be taken more than once for credit, provided topic is not repeated.
KINS 294C. Special Topics in Biomechanics. 1 - 3 Units
Prerequisite(s): KINS 254.
Term Typically Offered: Fall, Spring

Advanced research seminars on varied topics of contemporary interest.
Note: May be taken more than once for credit, provided topic is not repeated.

KINS 295. Practicum. 1 - 3 Units
Prerequisite(s): Approval of graduate faculty advisor and graduate coordinator.
Term Typically Offered: Fall, Spring

Graduate experiences in a practical setting.
Note: Open only to graduate students within the Physical Education Department.

Credit/No Credit

KINS 296A. Experimental Elementary Physical Education Workshop. 1 Unit
Term Typically Offered: Fall, Spring

Overview of the total elementary physical education curriculum. Major focus will be on appropriate practices, national content standards, establishing a learning environment, movement concepts, skill themes, and health-related physical fitness. Designed to meet the physical education component for graduate students seeking a multiple subject credential.
Note: Not open to undergraduate students, and it does not substitute for KINS 172.

Credit/No Credit

KINS 299. Directed Individual Study. 1 - 3 Units
Term Typically Offered: Fall, Spring

Individual research, project, or directed reading.
Note: Open only to majors who appear competent to carry on individual work. Admission to this course requires approval of the graduate advisor and the graduate coordinator. Formal written report required. May be repeated for credit.

Credit/No Credit

KINS 380. Methods of Teaching Elementary Physical Education. 1.5 Units
Prerequisite(s): KINS 130, Corequisite(s): KINS 198A
Term Typically Offered: Fall, Spring

KINS 380 is an 8 week course designed for the future physical educator who wishes to deliver an effective, meaningful elementary physical education curriculum to a diverse population of students. Emphasis is on physical education pedagogy - the skills and techniques that successful teachers use to ensure student learning.

KINS 381. Methods of Teaching Secondary Physical Education. 1.5 Units
Corequisite(s): EDTE 366A
Term Typically Offered: Fall, Spring

An 8 week course, KINS 381 is designed for the future physical educator who wishes to deliver an effective meaningful physical education curriculum to a diverse population of students. Emphasis is on physical education pedagogy - the skills and techniques that successful teachers use to ensure student learning.

KINS 500. Culminating Experience. 1 - 4 Units
Prerequisite(s): Advanced to candidacy. Completion of KINS 211 or concurrent enrollment.
Term Typically Offered: Fall, Spring

Completion of a thesis or project under the direction of a department committee.

BS in Exercise Science (Clinical Exercise & Rehabilitation Specialist)

Units required for Major: 60
Total units required for BS: 120

Program Description

Exercise Science program mission is to study the scientific basis of how the human body functions across the lifespan in response to physical activity, exercise, and sport. Exercise Science curriculum integrates knowledge from such science disciplines as biology, chemistry, and physiology so that students will gain a deep integrative understanding of human body functions at the mechanical, cellular, organ, and systems levels.

The major in Exercise Science qualifies an individual for career possibilities in cardiac rehabilitation, sports medicine, chiropractic, athletic training, geriatrics, health related fitness programming (fitness and corporate), and further scientific training in graduate school.

The Clinical Exercise and Rehabilitation Specialist concentration is designed for students who want to develop the knowledge, skills, and expertise required to work in a clinical rehabilitation setting. Students who complete this emphasis are prepared for careers in cardiac rehabilitation, clinical exercise physiology, electrophysiology, and clinical graduate programs such as Physical Therapy, Occupational Therapy, and other health related professional preparation programs.

Note: Students graduating with a BS in Exercise Science will not be subject to the University's Foreign Language Graduation Requirement. Students who change major may be subject to the University's Foreign Language Graduation Requirement.

Pre-Major Requirements

Freshman or transfer students interested in the BS in Exercise Science are admitted as Pre-Exercise Science Major students.

To change to a BS in Exercise Science, Pre-major students are required to complete the following grade and course requirements and submit a Declaration of Major/Concentration to the Kinesiology Department Office along with transcript copies.

1. An overall GPA of 2.0.
2. Completion of the Pre-Major required courses with a "C-" or better. Only first and second attempts will be considered.

Minimum Grade Requirement

All courses counted for the Exercise Science major must be completed with a "C-" or better.

¹ To help you complete your degree in a timely manner and not take more units than absolutely necessary, there are ways to use single courses to meet more than one requirement (overlap). For further information, please visit the General Education page (p. 1103).

Note: There is no way to list all possible overlaps so please consult with a professional advisor. The Academic Advising Center can be visited online (http://www.csus.edu/acad/), by phone (916) 278-1000, or email (advising@csus.edu).

² Required in Major; also satisfies GE.

³ Department offers students a "select from the following option" within the Concentration:

• If student chooses to take STAT 1, they will meet Area B4.
4 Department offers students a "select from the following option" within the Concentration:
   • If student chooses to take NUFD 113, they will meet Area BS.

5 Department offers students a "select from the following option" within the Concentration:
   • If student chooses to take NUFD 10, they will meet Area E.

1 To help you complete your degree in a timely manner and not take more units than absolutely necessary, there are ways to use single courses to meet more than one requirement (overlap). For further information, please visit the General Education page (p. 1103).

Note: There is no way to list all possible overlaps so please consult with a professional advisor. The Academic Advising Center can be visited online (http://www.csus.edu/acad/), by phone (916) 278-1000, or email (advising@csus.edu).

2 If not satisfied before entering Sacramento State, it may be satisfied in General Education Area C2 (Humanities). "C- or better required.”

The alternative methods for satisfying the Foreign Language Proficiency Requirement are described here: https://www.csus.edu/college/arts-letters/world-languages-literatures/foreign-language-requirement.html

Note: Students with a declared major of BS in Exercise Science are exempt from the Foreign Language Graduation Requirement.

---

**BS in Exercise Science (Health Fitness/Strength Conditioning)**

*Units required for Major: 60  
Total units required for BS: 120*

**Program Description**

Exercise Science program mission is to study the scientific basis of how the human body functions across the lifespan in response to physical activity, exercise and sport. Exercise Science curriculum integrates knowledge from such science disciplines as biology, chemistry, and physiology so that students will gain a deep integrative understanding of human body functions at the mechanical, cellular, organ, and systems levels.

The major in Exercise Science qualifies an individual for career possibilities in cardiac rehabilitation, sports medicine, chiropractic, athletic training, geriatrics, health related fitness programming (fitness and corporate), and further scientific training in graduate school.

The Health Fitness/Strength Conditioning Specialist Concentration is designed for students who are interested in advanced scientific knowledge of how physical activity, exercise and sport alter health and human performance. Many students from this option pursue careers in fitness and corporate wellness, strength conditioning, and further their scientific training in graduate school.

Note: Students graduating with a **BS in Exercise Science** will not be subject to the University's Foreign Language Graduation Requirement. Students who change major may be subject to the University's Foreign Language Graduation Requirement.

**Pre-Major Requirements**

Freshman or transfer students interested in the BS in Exercise Science are admitted as Pre-Exercise Science Major students.

To change to a BS in Exercise Science, Pre-major students are required to complete the following grade and course requirements and submit a Declaration of Major/Concentration to the Kinesiology Department Office along with transcript copies.

1. An overall GPA of 2.0.
2. Completion of the Pre-Major required courses with a "C-" or better. Only first and second attempts will be considered.

**Minimum Grade Requirement**

All courses counted for the Exercise Science major must be completed with a "C-" or better.

1 Course also satisfies General Education (GE)/Graduation Requirement.

**Health Fitness/Strength Conditioning Specialist Concentration**

In prior consultation with an exercise science advisor, a minimal of 13 units from the recommended list of courses below are required in addition to the core courses above:
To help you complete your degree in a timely manner and not take more units than absolutely necessary, there are ways to use single courses to meet more than one requirement (overlap). For further information, please visit the General Education page (p. 1103).

Note: There is no way to list all possible overlaps so please consult with a professional advisor. The Academic Advising Center can be visited online (http://www.csus.edu/acad/), by phone (916) 278-1000, or email (advising@csus.edu).

2 Required in Major; also satisfies GE.

3 Department offers students a "select from the following option" within the Concentration:
   • If student chooses to take STAT 1, they will meet Area B4.

4 Department offers students a "select from the following option" within the Concentration:
   • If student chooses to take NUFD 113, they will meet Area B5.

5 Department offers students a "select from the following option" within the Concentration:
   • If student chooses to take NUFD 10, they will meet Area E.

Graduation Requirements

1 To help you complete your degree in a timely manner and not take more units than absolutely necessary, there are ways to use single courses to meet more than one requirement (overlap). For further information, please visit the General Education page (p. 1103).

Note: There is no way to list all possible overlaps so please consult with a professional advisor. The Academic Advising Center can be visited online (http://www.csus.edu/acad/), by phone (916) 278-1000, or email (advising@csus.edu).

2 Required in Major; also satisfies GE.

3 Students with a declared major of BS in Exercise Science are exempt from the Foreign Language Graduation Requirement.

Program Description

The Bachelor of Science degree in Kinesiology provides students with a multi-disciplinary approach to the study of human movement, a
strong foundation in the natural and social sciences, and the knowledge and skills necessary to prepare students for careers in fields such as physical education, athletic coaching, athletic administration, corporate or commercial wellness, older adult fitness, athletic training, and other physical activity related professions.

The BS in Kinesiology offers five concentrations designed to meet students' specific academic needs and career interests in the areas of Physical Education Teacher Education, Athletic Coaching Education, Athletic Administration, Physical Activity and Wellness, and Athletic Care.

The Athletic Administration Concentration helps prepare students for future careers in the business of sports at the amateur, collegiate, and professional levels. The curriculum provides students with knowledge in the multiple sub-disciplines of Kinesiology as well as foundational business skills and hands-on experience in one or more areas of sport management including leadership, marketing, law, finance, and event planning. Students will also develop stronger communication, critical thinking, and problem-solving skills.

Note: Additional units may be required to meet the Sacramento State foreign language requirement.

Minimum Grade Requirement
All courses listed must be completed with a grade of "C" or better.

BS in Kinesiology (Athletic Care)

Units required for Major: 59-60

Total units required for BS: 120

Program Description

The Bachelor of Science degree in Kinesiology provides students with a multi-disciplinary approach to the study of human movement, a strong foundation in the natural and social sciences, and the knowledge and skills necessary to prepare students for careers in fields such as physical education, athletic coaching, athletic administration, corporate or commercial wellness, older adult fitness, athletic training, and other physical activity related professions.

The BS in Kinesiology offers five concentrations designed to meet students’ specific academic needs and career interests in the areas of Physical Education Teacher Education, Athletic Coaching Education, Athletic Administration, Physical Activity and Wellness, and Athletic Care.

The Athletic Care Concentration is designed to provide students with the basics in injury evaluation, immediate care, rehabilitation, and injury prevention. Students in this concentration will develop knowledge and practical skills to pursue advanced study and future careers in athletic training, sports medicine, and other paramedical areas. Upon completion of the degree, students are also encouraged to pursue a teaching credential.

Note: Additional units may be required to meet the Sacramento State foreign language requirement.

Minimum Grade Requirement

All courses listed must be completed with a grade of "C" or better.

### Foreign Language Proficiency Requirement

1. To help you complete your degree in a timely manner and not take more units than absolutely necessary, there are ways to use single courses to meet more than one requirement (overlap). For further information, please visit the General Education page (p. 1103).

2. Required in Major; also satisfies Graduation Requirement.

3. If not satisfied before entering Sacramento State, it may be satisfied in General Education Area C2 (Humanities). "C" or better required; The alternative methods for satisfying the Foreign Language Proficiency Requirement are described here: https://www.csus.edu/college/arts-letters/world-languages-literatures/foreign-language-requirement.html

## BS in Kinesiology (Athletic Coaching Education)

Units required for Major: 59-60

### Program Description

The Bachelor of Science degree in Kinesiology provides students with a multi-disciplinary approach to the study of human movement, a strong foundation in the natural and social sciences, and the knowledge and skills necessary to prepare students for careers in fields such as physical
education, athletic coaching, athletic administration, corporate wellness, commercial fitness, older adult fitness, and athletic training.

The BS in Kinesiology offers five concentrations designed to meet students' specific academic needs and career interests in the areas of Athletic Administration, Athletic Care, Athletic Coaching Education, Physical Activity and Wellness, and Physical Education.

The Athletic Coaching Education concentration provides students with knowledge and practical experience in supporting careers in athletic and community settings, athletic coaching, mental performance enhancement, and community and youth physical activity and sport programs. Students will also be eligible to earn a Coaching Certification from the American Sport Education Program (ASEP), which is required to coach at the high school level in the state of California (as mandated by the California Interscholastic Federation). This concentration also prepares students for advanced study in athletic coaching, administration, and other sport-related programs (e.g., sport psychology, sport sociology). Note: *The ASEP coaching certification does not fulfill the requirements for a Single Subject Physical Education California Teaching Credential. To be eligible for the teaching credential, students should meet the requirements for the Physical Education Teacher Education Concentration.

Note: Additional units may be required to meet the Sacramento State foreign language requirement.

Minimum Grade Requirement
All courses listed must be completed with a grade of "C" or better.

1. To help you complete your degree in a timely manner and not take more units than absolutely necessary, there are ways to use single courses to meet more than one requirement (overlap). For further information, please visit the General Education page (p. 1103).

**Note:** There is no way to list all possible overlaps so please consult with a professional advisor. The Academic Advising Center can be visited online (http://www.csus.edu/acad/), by phone (916) 278-1000, or email (advising@csus.edu).

2. Required in Major; also satisfies GE.

**Program Description**

The Bachelor of Science degree in Kinesiology provides students with a multi-disciplinary approach to the study of human movement, a strong foundation in the natural and social sciences, and the knowledge and skills necessary to prepare students for careers in fields such as physical education, athletic coaching, athletic administration, corporate or commercial wellness, older adult fitness, athletic training, and other physical activity related professions.

The BS in Kinesiology offers five concentrations designed to meet students' specific academic needs and career interests in the areas of Physical Education Teacher Education, Athletic Coaching Education, Athletic Administration, Physical Activity and Wellness, and Athletic Care.

The Physical Activity and Wellness Concentration provides students with knowledge and practical experience in supporting careers in areas such as personal training, fitness center management, commercial and corporate wellness, and older adult fitness. It will also prepare students for advanced studies in sport and exercise psychology or other physical activity related programs.

**Note:** Additional units may be required to meet the Sacramento State foreign language requirement.

**Minimum Grade Requirement**

All courses listed must be completed with a grade of "C" or better.

2. Required in Major; also satisfies Graduation Requirement.

3. If not satisfied before entering Sacramento State, it may be satisfied in General Education Area C2 (Humanities). "C- or better required:"

The alternative methods for satisfying the Foreign Language Proficiency Requirement are described here: https://www.csus.edu/college/arts-letters/world-languages-literatures/foreign-language-requirement.html

### BS in Kinesiology (Physical Education)

**Units required for Major: 59-60**

**Total units required for BS: 120**

### Program Description

The Bachelor of Science degree in Kinesiology provides students with a multi-disciplinary approach to the study of human movement, a strong foundation in the natural and social sciences, and the knowledge and skills necessary to prepare students for careers in fields such as physical education, athletic coaching, athletic administration, corporate or commercial wellness, older adult fitness, athletic training, and other physical activity related professions.
The BS in Kinesiology offers five concentrations designed to meet students’ specific academic needs and career interests in the areas of Physical Education Teacher Education, Athletic Coaching Education, Athletic Administration, Physical Activity and Wellness, and Athletic Care.

The **Physical Education Teacher Education** concentration is designed to prepare students for a teaching career in physical education. This is a subject matter approved program through the California Commission on Teacher Credentialing (CCTC). Students who complete the program in physical education will have the breadth and depth of knowledge regarding developmentally appropriate physical education and will take coursework for both subject matter content and pedagogy for teaching physical education at the K-12 level. Students who choose this option will then have the opportunity to attain their Single Subject Physical Education California Teaching Credential, an additional two semester program through the Department of Teacher Education at Sacramento State.

**Note:** Additional units may be required to meet the Sacramento State foreign language requirement.

### Minimum Grade Requirement
All courses listed must be completed with a grade of "C" or better.

Total Units: 19-21

Note: Substitutions can be made with permission of Department Chair.

MS in Kinesiology (Exercise Science)

Total units required for the MS: 30, including 15 units for concentrations (see below).

Program Description
The graduate program leading to the Master of Science degree in Kinesiology is designed to expand the students’ knowledge and to augment their qualifications for leadership in their chosen profession.

The objectives of the program are to increase the students’ breadth and depth of knowledge relative to the discipline of Kinesiology; to provide the opportunity for students to engage in scholarly activity that includes creative and analytical thinking, interpreting, evaluating and reporting published research, designing and conducting research; and to provide a focus of study that will enhance career commitment and allow for experiences that will lead to continued self-development and growth.

Admission Requirements
For students with an undergraduate major in Kinesiology, admission to the MS program as a classified graduate student requires:

- an overall GPA of 2.8 or 3.0 in the last 60 semester and 90 quarter units; and
- a statistics course (e.g., STAT 1 or equivalent).
- GRE scores;
- a statement outlining academic and professional goals related to graduate study in Kinesiology, including a selection of 2 faculty members with whom the student would like to study;
- a recent writing sample (e.g., research paper, creative project)
- 3 letters of recommendation that speak specifically to academic ability.
- passing score on the CSCS/NSCA exam (Strength and Conditioning Option students only)

Students who have deficiencies in admission requirements which can be removed by specific additional preparation may be admitted to unclassified or conditionally classified graduate status for the purpose of removing deficiencies. Coursework taken to qualify for classified graduate status is in addition to and not counted toward the master’s program. While completing admission deficiencies, students may, if they possess the necessary prerequisites, enroll also in degree coursework, but no more than 6 units as an unclassified student or 12 units as a conditionally classified student can be applied toward the MS degree. Students must remove all admission deficiencies before being considered for classified status.

Students applying for admission to the Kinesiology graduate program who do not have a degree in Kinesiology, are required to take a minimum of 20 specified units in Kinesiology. These students should see the graduate coordinator or a graduate advisor for details.

Admission Procedures
Applications are accepted for Fall admission only. All prospective graduate students, including Sacramento State graduates, must file the following with the Office of Graduate Studies, River Front Center, Room 215 (916) 278-6470:
an online application for admission;
- two sets of official transcripts from all colleges and universities attended, other than Sacramento State; and
- GRE scores
- writing sample
- three letters of recommendation
- evidence of passing score on the CSCS/NSCA exam (Strength and Conditioning Option students only)

For more admissions information and application deadlines please visit the Office of Graduate Studies website (http://www.csus.edu/gradstudies/).

Following closure of the application period, faculty will review the applicant pool, and will make a recommendation to either admit, place on the waitlist, or deny admission. The review process will take approximately four weeks. Once a decision is made, the applicant will be notified by the Office of Graduate Studies. Students who earn a place on the waitlist will be notified by the Office of Graduate Studies if their admission status changes.

Note: A 15-unit core of courses is required of all students; 11 units of required courses and four units that are earned through the completion of a thesis or project. The thesis or project is required of all candidates for the Master of Science in Kinesiology. The courses in the core are designed to focus on an advanced study of the knowledge which is of common interest and concern to all graduate students pursuing a degree in Kinesiology. Within the remaining 15 units, the student is focused in an area of special interest by selecting a concentration: Exercise Science or Movement Studies. Each concentration includes a set of required courses and a specified number of elective units.

Note: Six semester units of graduate work taken at other accredited institutions may be approved by the Graduate Coordinator or the student’s graduate advisor. Prerequisite units, units taken for undergraduate majors/minors, and units taken to qualify for fully classified graduate status, will not be counted for graduate credit. Only rarely are undergraduate Kinesiology courses approved for graduate credit. A maximum of six elective units may be taken in upper division undergraduate courses with advisor approval. A maximum of four units of graduate Practicum or Directed Individual Study may be taken for degree credit with advisor approval.

Minimum Units and Grade Requirements for the Degree

Units required for the MS: 30, including 15 units for concentrations (see below).

Minimum Cumulative GPA: 3.0

Advancement to Candidacy

Each student must file an application for Advancement to Candidacy indicating a proposed program of graduate study. The procedure may begin as soon as the classified graduate student has:

- removed any deficiencies in admission requirements;
- completed at least 12 units of 200-level courses with a minimum 3.0 GPA; and
- taken a Graduate Writing Intensive (GWI) course in their discipline within the first two semesters of coursework at California State University, Sacramento.

This application must be filed no later than the semester prior to enrolling in KINS 211. Advancement to Candidacy forms are available on the Office of Graduate Studies website. See the Department’s graduate coordinator for more information about this process.

Select one of the following concentrations:

- Exercise Science Concentration
- Exercise Science/Strength Conditioning Option
- Movement Studies Concentration
- Movement Studies/Sports Psychology Option
- Movement Studies/Sport Pedagogy Option

**Total Units**: 30

1. KINS 294A may be taken for 1 unit each time, for a total of 4 units in 4 different topical areas.
2. The first time the student registers for KINS 500, he/she must also register for KINS 211. During this semester, students will have to formally choose their culminating experience: a thesis or comprehensive exam option. Student’s planning on completing a thesis will develop their culminating project (thesis) with assistance from others in the seminar, the seminar professor and the student’s committee. When the culminating proposal is completed, formal presentations are made to the seminar with the student’s committee in attendance. If the student does not complete the culminating project proposal and have it approved, they must enroll and attend KINS 211 another semester. Students choosing to complete a comprehensive exam, rather than a thesis, will not be subject to the same conditions regarding the formal culminating project proposal requiring approval in KINS 211.

Note: The following must be attained before student teaching can begin:
- Standard First Aid Certification;
- Current CPR Certification; and
- Receive passing scores on the California Basic Educational Skills Test (CBEST).

Subject Matter Program Athletic Training

Program Description

Athletic Training students interested in teaching must meet the Commission on Teacher Credentialing standards prior to entrance into a credential program. Courses to meet standards can be taken concurrently with the Athletic Training courses.

Program Requirements

Note: The program is currently under review by the Commission on Teacher Credentialing and students are strongly encouraged to consult the Program Director for appropriate coursework.

Nursing

College of Health and Human Services

School of Nursing Mission and Vision

The School of Nursing (SON) prepares nurses to lead diverse individuals, families, and communities in achieving optimal health through nursing science, collaborative practice, advocacy, and service.

The School of Nursing transforms health care through innovative nursing education, community partnerships, and policy engagement. We believe that the SON serves its students and the society at large by creating an environment in which faculty and students pursue the knowledge of nursing practice guided by the following core values:
- caring;
- integrity;
- advocacy;
- collaboration;
- inclusion;
- equity; and
- leadership.

Degree Programs

BS in Nursing (Pre-Licensure) (p. 732)
LVN 30 Unit Option Non-Degree Program (p. 737)
MS in Nursing (p. 736) (includes ADN with degree - MSN option)
RN-BSN and ADN-BSN Collaborative Tracks (http://catalog.csus.edu/colleges/health-human-services/nursing/rn-bsn-and-adn-bsn-collaborative-tracks/)
School Nurse Credential (p. 737)
Special Teaching Authorization in Health (STAH) (p. 738)

Programs Descriptions

The baccalaureate program consists of a four-year curriculum of lower and upper division coursework. There are two (2) years of General Education including prerequisites and two (2) years of clinical nursing. The time to complete the prerequisites may increase the time to complete the degree. The Nursing program content prepares competent professional practitioners of nursing who will help meet the changing health care needs of society.

The School of Nursing offers two pathways for students who start their nursing education in a non-baccalaureate program to earn a bachelor’s degree (BSN). These pathways are: an RN-BSN Traditional 15-Week Semester track and an Associates Degree in Nursing (ADN) to BSN Collaborative track. Both tracks are designed to be completed in 12-15 months if attending full-time; the RN-BSN track has a part-time attendance option. Scheduling of program offerings and hybrid (mainly online) classes provides maximum flexibility and the opportunity for self-directed study.

The Master of Science in Nursing (MSN) is designed to prepare registered nurses with baccalaureate degrees for roles in nursing education, community, adult clinical roles, and credentialed school nurses. Nurses with an ADN and a non-nursing bachelors degree may enter the program after completing two (2) bridge courses offered in a 6-week summer session. The MSN curriculum emphasizes the systematic study of professional nursing practice and preparation for leadership roles. The program is designed for nurses who want, or are require, to earn graduate preparations to qualify for positions of greater responsibility and complexity. Scheduling of program offerings and hybrid (mostly online) classes provides maximum flexibility and the opportunity for self-directed study.

Accreditation

California State University, Sacramento is fully accredited by the Western Association of Schools and Colleges (WASC).

The baccalaureate degree in nursing program and master’s degree in nursing program at California State University, Sacramento are
Special Features

- The specific purposes of the baccalaureate program are to: 1) provide a program of study which includes the developing theory and practices of nursing leading to a Bachelor of Science degree with a major in Nursing, 2) prepare a generalist in nursing practice who is able to utilize the nursing process to meet the health care needs of the community, and 3) provide the student with a base for graduate study.

- In the baccalaureate program, students are provided with a variety of learning experiences both on and off campus. Examples of clinical facilities used in the Sacramento and surrounding areas include acute care hospitals, skilled nursing and extended care facilities, outpatient clinics, schools, and community health and social service agencies.

- Admission to ADN to BSN Collaborative track is restricted to students currently in good standing and actively enrolled in one of four community college nursing programs; American River, Sacramento City, Sierra College, and Yuba College. Pre-requisite courses must be met prior to admission.

- ADN students with a non-nursing bachelor’s degree interested in the MSN program apply to the MSN program through the Office of Graduate Studies and complete two (2) bridge courses (NURS 180 & NURS 181) through the College of Continuing Education before starting the program. NURS 180 & NURS 181 are offered in the first 6-week summer session.

- Students are encouraged to participate in the California Nursing Students’ Association (CNSA) as they pursue their academic studies. In their fourth semester of clinical nursing coursework, students are eligible for membership in Zeta Eta, the local chapter of Sigma Theta Tau, International Honor Society for Nursing.

- The Sacramento State program in professional nursing is approved by the California State Board of Registered Nursing. The baccalaureate degree in nursing program and the master’s degree in nursing program at California State University, Sacramento are accredited by the Commission on Collegiate Nursing Education (http://www.ccneaccreditation.org).

- The student satisfactorily completing the baccalaureate program is awarded a Bachelor of Science degree in Nursing (BSN) and is eligible to apply for licensure by the California Board of Registered Nursing. Graduates are also eligible to apply for a Public Health Certificate. For the RN-BSN and the ADN to BSN Collaborative students, there is a clinical elective course which, along with community health theory, allows the student to apply to the California Board of Registered Nursing for a Public Health Nursing certificate.

- Graduation from programs leading to licensure, credentialing, or certification eligibility does not guarantee that students will obtain a license, credential, or certification. Licensure, credentialing, or certification requirements are set by agencies that are not controlled by, or affiliated with, the California State University and licensure and certification requirements can change at any time.

Notice to Students RE: Professional Licensure and Certification

California State University programs for professions that require licensure or certification are intended to prepare the student for California licensure and certification requirements. Admission into programs for professions that require licensure and certification does not guarantee that students will obtain a license or certificate. Licensure and certification requirements are set by agencies that are not controlled by or affiliated with the California State University and licensure and certification requirements can change at any time.

The California State University has not determined whether its programs meet other states’ educational or professional requirements for licensure and certification. Students planning to pursue licensure or certification in other states are responsible for determining whether, if they complete a California State University program, they will meet their state’s requirements for licensure or certification. This disclosure is made pursuant to 34 CFR §668.43(a)(5)(v)(C).

Students are responsible for determining whether they can meet licensure, credentialing, or certification requirements. The CSU will not refund tuition, fees, or any associated costs, to students who determine subsequent to admission that they cannot meet licensure, credentialing, or certification requirements. Information concerning licensure, credentialing, or certification requirements are available from Teri Lyn Fretz, Office Manager, at 916/278-6714 or fretz@csus.edu. Mailing address: 6000 J Street, Sacramento, CA 95819-6096. Physical address: 7667 Folsom Boulevard, Sacramento, CA 95826.

Career Possibilities

Registered Nurse (RN, BSN or RN, MSN): Hospital, e.g., Medical, Surgical, Emergency Room, Operating Room, Pediatrics, Obstetrics, Mental Health, Critical Care, Oncology, Rehabilitation · Community Health · Home Health · Extended Care · Physician’s Office · Clinics and Industry · Advanced Practice (MS) roles: Educator · Nurse Administrator · School Nurse · Advanced Clinical Role

NURS 9.  Reasoning and Critical Thinking on Health Topics.  3 Units
General Education Area/Graduation Requirement: Critical Thinking (A3)
Term Typically Offered: Fall, Spring, Summer

Provides students with an introduction to critical thinking and reasoning in evaluating societal issues related to health. Students will examine sources of health information, including mass and social media, and critically examine fact versus fiction. Emphasizes logical steps in problem-solving, decision-making, reasoning, and the construction of arguments about health problems and promotion. The study of critical thinking will be supplemented with readings, discussions, collaboration, presentations, dialogues, and written assignments around the topic of health.

NURS 10.  Health Care: Issues and Delivery Systems.  3 Units
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall, Spring

Explores the relationships between social, political and economic systems, and the health care and delivery systems currently operational in the U.S. today. Provides a format to debate current biomedical issues and explores crosscultural health practices. Lecture three hours.

NURS 14.  Pharmacology.  2 Units
Prerequisite(s): Entry level physiology course, such as BIO 25 or BIO 26
Term Typically Offered: Fall, Spring

Basic principles of pharmacology with a focus on pharmacokinetics, pharmacodynamics and related therapeutic implications for major drug categories. May be taken by pre-nursing or non-nursing students. Lecture two hours.

NURS 21.  First Year Seminar: Becoming an Educated Person.  3 Units
General Education Area/Graduation Requirement: Understanding Personal Development (E)
Term Typically Offered: Fall, Spring

A first-year seminar intended to provide students with an introduction to the meaning of higher education, resources of the University, and skills for lifelong learning. This course is designed to help students develop academic success strategies, and to improve information literacy, intercultural competence, and integrative thinking. The seminar also provides students with the opportunity to interact with fellow students, and seminar faculty to build a community of academic and personal support.
NURS 119. Mental Health Nursing for the LVN 30-Unit Option. 4 Units
Prerequisite(s): Microbiology with a lab, Physiology with a lab, and California licensure as a Vocational Nurse.
Corequisite(s): NURS 123.
Term Typically Offered: Fall, Spring

Theoretical basis for the nursing care of individuals who require nursing intervention to achieve and maintain mental health through adaptive processes. The course includes a supervised practicum which incorporates therapeutic modalities. A variety of psychodynamic theories related to anxiety, interpersonal relationships, crisis intervention, and group process are discussed.

NURS 120. Nursing Application of Research and Critical Analysis. 3 Units
Prerequisite(s): NURS 111, NURS 112, NURS 113 or instructor permission. GWAR certification before Fall 09; or WPJ score of 80+; or 3-unit placement in ENGL 109M or ENGL 109W; or 4-unit placement in ENGL 109M or ENGL 109W and co-enrollment in ENGL 109X; or WPJ score 70 or 71 and co-enrollment in ENGL 109X.
General Education Area/Graduation Requirement: Writing Intensive Graduation Requirement (WI), Humanities (Area C2)
Term Typically Offered: Fall, Spring

Evaluation and application of research to nursing practice. Emphasis is placed on application of evidence to improve quality and safety in healthcare and advance nursing practice. Develop an understanding of the human sciences and diverse cultures through the lens of nursing practice. Application of a critical framework of sociocultural, historical, and economic perspectives to analyze scholarly inquiry of health and healthcare.

NURS 123. Nursing Families in Complex Illness. 6 Units
Prerequisite(s): NURS 111, NURS 112 and NURS 113; or instructor permission.
Term Typically Offered: Fall, Spring

Provides students with the opportunity to learn and apply nursing concepts through the care of individuals and families experiencing complex illness across the adult lifespan. The focus is on skill development and the synthesis of data from multiple sources to formulate nursing interventions. Lecture three hours; laboratory six-eight hours.

Note: This course require safety training and personal protective equipment (PPE).

NURS 129. Mental Health Nursing. 5 Units
Prerequisite(s): NURS 111, NURS 112 and NURS 113; or instructor permission.
Term Typically Offered: Fall, Spring

Provides an overview of multidimensional factors, perspectives, and approaches associated with mental health across the lifespan. Mental health concepts and interventions are applied across multiple settings. Lecture three hours; laboratory six-eight hours.

Note: This course require safety training.

NURS 133. Leadership and Management for the LVN to RN. 2 Units
Prerequisite(s): Microbiology with a lab; Physiology with a lab; NURS 119 and NURS 123
Corequisite(s): NURS 137 and NURS 138
Term Typically Offered: Fall, Spring

This course is designed to present leadership and management skills for the Licensed Vocational Nurse transitioning to the Registered Nurse role. The principle and processes of administration, management, and supervision will be discussed within an organizational framework. Lecture two hours.

NURS 136. Nursing Laboratory for the Childbearing Family. 1 Unit
Prerequisite(s): NURS 120, NURS 123 and NURS 129, or instructor permission
Corequisite(s): NURS 137
Term Typically Offered: Fall, Spring

Application of skills and assessment in the care of the childbearing family and women experiencing reproductive health changes across the lifespan.

Credit/No Credit

NURS 137. Nursing the Childbearing Family. 5 Units
Prerequisite(s): NURS 120, NURS 123 and NURS 129 or instructor permission.
Corequisite(s): NURS 136.
Term Typically Offered: Fall, Spring

Application of nursing concepts in the care of the childbearing family and women experiencing reproductive health changes across the lifespan.

Note: This course require safety training and personal protective equipment (PPE).

NURS 138. Nursing the Childrearing Family. 5 Units
Prerequisite(s): NURS 120, NURS 123, NURS 129, or instructor permission
Corequisite(s): NURS 139
Term Typically Offered: Fall, Spring

Introduction and application of nursing concepts in meeting health needs of the child from birth through adolescence. Emphasis is placed on health promotion and disease management within the context of the family and applied across multiple settings. Lecture three hours; laboratory six-eight hours.

NURS 139. Nursing Laboratory for the Childrearing Family. 1 Unit
Prerequisite(s): NURS 120, NURS 123, NURS 129, or instructor permission
Corequisite(s): NURS 138
Term Typically Offered: Fall, Spring

Acquisition of knowledge and practice using tools and techniques for assessing the child and the family in a variety of settings. Laboratory three hours.

Note: May be repeated for credit

Credit/No Credit
NURS 143. Leadership and Management in Nursing Practice. 3 Units
Prerequisite(s): NURS 136, NURS 137, NURS 138, and NURS 139, or instructor permission.
Term Typically Offered: Fall, Spring

Integration of leadership and management principles to promote health across the lifespan and care settings. Application of leadership and management principles in the examination of organizational structures, processes, and approaches to quality and safety concepts in health care systems and practice environments. Emphasis will be placed on career development and transition to professional practice.

Note: May be repeated for credit. Lecture three hours.

NURS 144. Community Health Nursing. 5 Units
Prerequisite(s): NURS 136, NURS 137, NURS 138, and NURS 139, or instructor permission.
Term Typically Offered: Fall, Spring

Contemporary role of the community health nurse is presented within a public health framework, emphasizing the concept of community as client. Presents nursing interventions related to groups and aggregates identified as high risk for the development of health problems. Clinical experience is provided across community settings. Lecture and clinical hours.

NURS 145. Clinical Leadership and Professional Role Development. 6 Units
Prerequisite(s): NURS 136, NURS 137, NURS 138, NURS 139 or instructor permission.
Corequisite(s): NURS 144.
Term Typically Offered: Fall, Spring

The purpose of this culminating senior practicum is to facilitate the transition of the nursing student into the role of a professional BSN graduate nurse. The course will integrate the theoretical and clinical nursing concepts acquired throughout the curriculum into a precepted senior practicum. Students will apply principles of clinical nursing, nursing management and nursing leadership in a selected clinical setting. Credit/No Credit

NURS 146. Human Sexuality. 3 Units
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall, Spring

Designed to explore the physiological, sociological, and psychological components of human sexuality in a sufficiently detailed manner to dispel the myths and confusion enveloping this sensitive subject. Students will be able to integrate these components in a meaningful pattern into their own lives, be better able to understand and accept their own sexual needs and behavior, and be more accepting and understanding of persons whose sexual attitudes and behavior might from their own.

NURS 165. Hospice and Palliative Nursing Care. 3 Units
General Education Area/Graduation Requirement: Race & Ethnicity
Graduation Requirement (RE), GE AREA D
Term Typically Offered: Fall, Spring, Summer

Evaluation of the role of the nurse in providing family-centered care throughout the death and dying process within a historical and cultural context. Exploration of differences in organizational models to end-of-life care, including hospice and palliative care. Integration of nursing care into unique cultural values and beliefs. Examination of significant aspects of cultural and social differences in death and dying.

NURS 167. Women’s Health. 3 Units
Term Typically Offered: Fall, Spring

Designed for people seeking knowledge about women’s health, women’s health risks, and the delivery of traditional and non-traditional medical interventions for the maintenance of health and management of illness. Covers the physiological and psychological components of women’s health. The leading acute and chronic illnesses which affect women are introduced. Discussions include: means of sustaining a wellness lifestyle; identification, management and consultation for acute and chronic illness; normal physiological life changes and adaptations to aging; mind/body connection in the control of health and illness; pharmacology and drug therapy for women; health management for infants and children; access and control of care for women in traditional and non-traditional health settings; and research in women’s health. Lecture-discussion three hours.

NURS 168. The Brain and Gender-Related Differences. 3 Units
General Education Area/Graduation Requirement: Further Studies in Area B (B5)
Term Typically Offered: Fall, Spring

Gender-related differences which are mediated by the brain are examined from the theoretical framework of evolution. The place of molecular genetics, hormone physiology, neural function, biomedical research, human development, personality theory and research, and crosscultural research are studied in an attempt to understand the processes that affect sex differences. Gender-related differences in normal and abnormal behavior resulting from chronic and acute disease, and pathological states, will be introduced. The student should acquire the fundamentals of a scientific understanding of gender-related differences between humans, and an appreciation of the unique role the brain plays in the mediation of these differences.

NURS 170. Foundations for Evidence-Based Nursing Practice. 3 Units
Prerequisite(s): Acceptance into the RN to BSN Program or instructor permission.
Term Typically Offered: Fall, Spring

This course provides an overview of nursing research and application to practice. Students will identify components of evidence-based practice and develop skills in critiquing research and in professional writing.

NURS 171. Transitional Concepts: The Baccalaureate Nurse. 6 Units
Prerequisite(s): NURS 170, may be taken concurrently.
Term Typically Offered: Fall, Spring

This course expands students’ knowledge of theories, concepts, and social issues which have implications for nursing practice. Assignments and experiences are designed to transition the RN to the baccalaureate level of proficiency.

NURS 171A. Transitional Concepts: The Baccalaureate Nurse Role. 3 Units
Prerequisite(s): NURS 170, may be taken concurrently.
This course expands students’ knowledge of theories, concepts, and social issues which have implications for the role of the nurse in any professional setting. Assignments and experiences are designed to transition the RN to the baccalaureate level of proficiency.

NURS 171B. Transitional Concepts: The Client Lifespan. 3 Units
Prerequisite(s): NURS 170, may be taken concurrently.
This course expands students’ knowledge of theories, concepts, and social issues which have implications for health across the lifespan. Assignments and experiences are designed to transition the RN to the baccalaureate level of proficiency.
NURS 173. Theoretical Foundations for Leadership and Management. 6 Units
Prerequisite(s): NURS 170, may be taken concurrently.
Term Typically Offered: Fall, Spring

This course provides the theoretical foundations for leadership and management across multiple settings. Theories related to the principles and processes of leadership and management will be applied to select practice experiences.

NURS 173A. Theoretical Foundations for Leadership. 3 Units
Prerequisite(s): NURS 170, may be taken concurrently
This course provides the theoretical foundations for leadership across multiple settings. Theories related to the principles and processes of leadership will be applied to select practice experiences.

NURS 173B. Theoretical Foundations for Management. 3 Units
Prerequisite(s): NURS 170, may be taken concurrently
This course provides the theoretical foundations for management across multiple settings. Theories related to the principles and processes of management will be applied to select practice experiences.

NURS 174. Community Health Nursing: Concepts and Practice. 4 Units
Prerequisite(s): NURS 170, may be taken concurrently.
Term Typically Offered: Fall, Spring

This course presents the role of the community health nurse within a public health framework and examines public health systems, policies, and socioecological factors that shape the health of individuals, groups, and communities. Students will be introduced to principles of population health, epidemiology, disease prevention, and health promotion, to plan community health nursing interventions.

NURS 174C. Community Health Nursing: Clinical Elective. 2 Units
Prerequisite(s): NURS 170, NURS 174, both may be taken concurrently.
Term Typically Offered: Fall, Spring, Summer

In this course students will integrate and apply knowledge of population-based nursing and evaluate the role of the community health nurse in various systems. Students will provide care to individuals, families, or communities within a public health framework. This course meets the California BRN clinical requirements for the Public Health Nurse Certificate.

Note: NURS 174C is an elective course that is only required for students wishing to apply for the California Board of Registered Nursing Public Health Nurse Certificate; students not planning to apply for a Public Health Nurse Certificate must petition for an exemption from this clinical course; students who are granted exemption for NURS 174C will only complete 44 units.

NURS 178. Culminating Project. 3 Units
Prerequisite(s): Completion of 19 units in the program or instructor permission.
Term Typically Offered: Fall, Spring

Students will apply leadership and management principles within a community to determine a defined need or issue, identify goals to meet or solve the issue, and complete the culminating project based on previous course work.

NURS 179. Professional Communication and Reasoning Development. 3 Units
Prerequisite(s): NURS 170, may be taken concurrently; and either department permission or GWAR certification before Fall 09; or WPJ score of 80+; or 3-unit placement in ENGL 109M or ENGL 109W and co-enrollment in ENGL 109X; or WPJ score 70 or 71 and co-enrollment in ENGL 109X.

General Education Area/Graduation Requirement: Writing Intensive Graduation Requirement (W), Humanities (Area C2)
Term Typically Offered: Fall, Spring

This hybrid course is designed to expand communication and leadership skills among RN to BSN students in their professional practice. Students will develop an understanding of the humanities and diverse cultures through the lens of nursing practice. Specifically, students will reflect on how culture and experience determines the human condition which is reflected in their animating ideas and values towards health and healthcare.

NURS 180. Transition to Graduate Nursing Education through Writing. 2 Units
Prerequisite(s): Acceptance into the Advanced Nursing Bridge pathway or department permission.
Term Typically Offered: Spring, Summer

This course provides an introduction to the role of the nurse leader by exploring theoretical and ethical concepts, professional communication, and evidence-based practice. Students will undertake critical analysis of nursing practice and healthcare systems with a focus on professional role development.

NURS 181. Research as the Foundation for Evidence-Based Nursing Practice. 3 Units
General Education Area/Graduation Requirement: Upper Division Further Studies in Area B5
Term Typically Offered: Fall, Spring, Summer

This course provides students with a clear understanding of the interrelationship between research, theory, and evidence-based nursing practice. Interpretation of quantitative and qualitative research findings to determine statistical and clinical significance. Application of research and epidemiological concepts to improve patient and population health outcomes.

NURS 194. Work Study in Nursing. 1 - 12 Units
Prerequisite(s): NURS 120, NURS 123 and NURS129; School of Nursing faculty recommendation; Instructor permission; Minimum 2.5 GPA
Corequisite(s): Enrollment in undergraduate nursing program
Term Typically Offered: Fall, Spring

Nursing students participate in clinical nursing experiences that reflect the realities of the healthcare environment and have opportunity to master learned skills.

Note: May be repeated for credit
Credit/No Credit

NURS 195. Field Study. 1 - 6 Units
Prerequisite(s): Instructor permission.
Term Typically Offered: Fall, Spring

Guided study and experience in a specified nursing area. Credit/No Credit
NURS 199. Special Problems. 2 Units
Term Typically Offered: Fall, Spring

Individual projects and directed reading for students who are competent to assume independent work. Admission to this course requires approval of faculty member under whom the independent work is to be conducted. Credit/No Credit

NURS 209. Advanced Role Development in Nursing. 3 Units
Prerequisite(s): Admission to Graduate Program.
Term Typically Offered: Fall, Spring

Students will explore emerging issues in healthcare and consider how these issues shape their practice. Through examination of current issues and challenges confronting the nursing profession, analysis of the literature, examination of personal values, rights, and obligations, and the application of ethical decision-making processes, students’ ability to engage in ethical discussions will be enhanced, as well their ability to provide professional leadership.

Note: Satisfies the GWAR requirement.

NURS 210. Research as the Foundation for Advanced Nursing. 3 Units
Prerequisite(s): Admission to the graduate program for nursing
Term Typically Offered: Fall, Spring

Participants will explore nursing research as the foundation for clinical and organizational decision making. Content will include understanding key elements of evidence-based practice, developing skills to access data bases in nursing and healthcare, evaluation of evidence in nursing including published nursing research, problem identification within the practice setting, and incorporation of evidence in initiating change and improving clinical practice.

NURS 213. Seminar in Organizational and Systems Leadership. 3 Units
Prerequisite(s): NURS 209 and NURS 210, and 21 units of graduate coursework.
Term Typically Offered: Fall, Spring

This course requires that students operationalize knowledge, skills, and dispositions acquired in previous courses. Students will identify contemporary healthcare issues and apply graduate core competencies to guide nursing practice in the planning, implementation and evaluation of quality healthcare for individuals, families, groups and communities.

NURS 213C. Seminar in Specialized Nursing Processes: School Nursing I. 4 Units
Prerequisite(s): Admission to School Nurse Credential Program.
Term Typically Offered: Fall, Spring

Provision and application of concepts needed for nursing practice in the schools. Focuses on the three major competencies of school nursing practice: providing health and wellness services, providing direct client care services for school age children (pre-k through age 22), and professional management of school nursing services. Emphasis is on the foundations of school nursing practice, legal and ethical issues, special education services, and management of episodic illness and chronic health conditions.

NURS 213D. Seminar in Specialized Nursing Processes: School Nursing II. 4 Units
Prerequisite(s): NURS 213C.
Term Typically Offered: Fall, Spring

Provision and application of concepts needed for nursing practice in the schools. Focuses on the three major competencies of school nursing practice: providing health and wellness services, direct client care services for school age children (pre-k through age 22), and health service program coordination and management. Emphasis is on ethical issues and federal laws addressing education for students with disabilities, health promotion programs, issues of adolescent health, and behavior assessment and management including considerations for students receiving special education services.

NURS 214. Educational Program Development in Nursing. 3 Units
Prerequisite(s): NURS 209 and NURS 210 or instructor's permission.
Term Typically Offered: Fall, Spring

Introduction to curriculum development and instructional design concepts in preparation for the role of educator in an educational institution or health care setting. Emphasis will be on instructional design, instructional strategies, and measurement of learner outcomes. Lecture three hours.

Note: FOCUS alternates between K-12 and higher education.

NURS 214C. Educational Program Development in Nursing II. 3 Units
Prerequisite(s): NURS 214B.
Corequisite(s): NURS 294C.
Term Typically Offered: Fall, Spring

Introduction to curriculum development and instructional design concepts in preparation for the role of educator in an educational institution or health care setting. Continues emphasis on instructional design, related to curriculum development and implementation, and to program evaluation. Lecture three hours.

Note: FOCUS alternates between K-12 and higher education.

NURS 215. Community Health Services and Policy. 3 Units
Prerequisite(s): NURS 209 and NURS 210, or instructor’s permission.
Term Typically Offered: Fall, Spring

Examines issues of health policy, financing, and the organization and delivery of health services at the local, national, and global levels. Health promotion will be defined and the influence of community on the individual, group, and family’s health will be explored. Epidemiological data bases will be identified. These data bases will be critiqued and used to develop a health promotion program.

NURS 216. Vision and Scoliosis Screening. 1 Unit
Term Typically Offered: Fall, Spring

Theory and practice of detecting idiopathic scoliosis, and visual disorders resulting from inadequate refraction, ocular mal-alignment, and color deficiency in the school setting. The pathophysiology of said conditions will be presented, the nursing role delineated, and opportunities for paired screening practice provided.

NURS 230. Advanced Concepts in Pathophysiology. 3 Units
Term Typically Offered: Fall, Spring

Seminar designed to promote the understanding and application of fundamental disease processes and physiological principles in cross-clinical settings for the purpose of improving nursing assessments and patient care management. Lecture three hours.
NURS 231. Pharmacology for Advanced Practice. 3 Units
Term Typically Offered: Fall, Spring

Conceptual and systematic study of pharmacodynamics, pharmacokinetics, pharmacoeconomics and therapeutic implications for healthcare practitioners. Efficient use of traditional and web based pharmaceutical resources is encouraged. Designed to meet Board of Registered Nursing requirements for prescriptive privileges. Requires familiarity with disease process. Lecture three hours.

NURS 232. Advanced Physical Assessment Across the Lifespan. 3 Units
Prerequisite(s): NURS 209 and NURS 210.
Term Typically Offered: Fall, Spring

Advanced concepts and skills in health and physical assessment are essential to the clinical decision making and caring process for the nurse in advanced practice and leadership roles. The emphasis is on eliciting an accurate and thorough history considering the client's multiple dimensions, development of advanced physical examination skills and the development of documentation skills to provide a database for continuous improvement of nursing practice.

Note: Availability of a stethoscope is required. Individual practice outside of class is required.

NURS 232A. Advanced Physical Assessment: Infant, Child, Adolescent. 3 Units
Prerequisite(s): Instructor permission.
Term Typically Offered: Fall, Spring

Seminar designed to present techniques related to the physical assessment, in the school or home setting, of the child, age birth through 18 years. Emphasis is on the common morbidities and mortalities of these age groups including interrelationship of the physical, emotional and socioeconomic causes of health problems and illnesses. Availability of an otoscope and stethoscope required. Individual practice required outside of class. Lecture three hours.

NURS 293. Practicum in Organizational and Systems Leadership. 3 Units
Prerequisite(s): NURS 209, NURS 210, NURS 214, NURS 230, NURS 231, NURS 232, and instructor permission.
Corequisite(s): NURS 213.
Term Typically Offered: Fall, Spring

This course provides supervised field experience to provide the student with an opportunity to apply theoretical concepts from NURS 213 in a clinical practice setting focusing on the care of adult clients. The emphasis of this experience will be to application of graduate core competencies to guide leadership in nursing praxis in the planning, implementation and evaluation of quality healthcare for individuals, families, and groups.

Credit/No Credit

NURS 293D. Practicum in Specialized Nursing Processes: School Nursing. 4 Units
Prerequisite(s): NURS 213C.
Corequisite(s): NURS 213D.
Term Typically Offered: Fall, Spring

Application of a planned sequence of supervised clinical experiences in one or more California public school districts offering nursing services to infants, children and adolescents for the purpose of developing a clinical leadership role in school nursing. Focuses on the three major competencies of school nursing practice: providing health and wellness services, providing direct client care services for school-age children (pre-k through age 22, including students with special health care needs), and professional management of school nursing services.

Credit/No Credit

NURS 294. Practicum in Educational Program Development in Nursing. 3 Units
Prerequisite(s): NURS 214, may be taken concurrently.
Term Typically Offered: Fall, Spring

Opportunity for analysis and synthesis of concepts of management and leadership in an educational setting while practicing the role of a nursing educator.

Credit/No Credit

NURS 295. Field Study. 1 - 6 Units
Term Typically Offered: Fall, Spring

Experiences in an off-campus facility are provided for the continued development of clinical or functional role skills. Each student spends 45 hours per unit. Field study is not designed to be used in lieu of regularly scheduled practicums. Enrollment in NURS 295 requires permission of a faculty member who will serve as sponsor and coordinator of the experience.

Credit/No Credit

NURS 299. Special Problems. 1 - 3 Units
Term Typically Offered: Fall, Spring

Individual research, study, and directed reading in an area not directly covered in the Division's core courses, role preparations or electives. Students pursue a particular course of study on a one-to-one basis with a faculty member. Educational objectives must be specified in advance.

Credit/No Credit

NURS 500. Culminating Experience. 3 Units
Prerequisite(s): Advanced to candidacy for the Master's degree and must be in the final semester of the program.
Term Typically Offered: Fall, Spring

The Culminating Experience is in the form of a comprehensive examination. The comprehensive examination is an original scholarly paper that reflects an in-depth problem-solving proposal or a business proposal. Students that wish to do a thesis or project as the culminating experience must petition the Division of Nursing Graduate Committee and will be approved on an individual basis.

BS in Nursing (Pre-Licensure)

Units required for Pre-Clinical: 29
Units required for Major: 61
Total units required for BS: 120
Program Description

The School of Nursing prepares nurses to lead diverse individuals, families, and communities in achieving optimal health through nursing science, collaborative practice, advocacy, and service.

Admission Requirements

Admission to the Sacramento State baccalaureate Nursing program is a two-step process:

1. admission to the University and
2. admission to the Clinical Nursing program

Prospective first-time freshmen and transfer students, who will not complete certain Clinical Nursing prerequisites by the time they enroll, may apply for University admission at any time up to the regular application deadline. They will be considered "expressed interest" until they enter the Clinical Nursing program.

Up to 80 traditional pre-licensure students are admitted to the clinical portion of the baccalaureate Nursing program each semester. A competitive selection process has been established since applications exceed program space in the traditional pre-licensure program. Newly admitted students are selected from among candidates who meet the prerequisite requirements and follow the supplemental application procedures described below. Continuing Sacramento State, transfer students, and second baccalaureate degree applicants are given equal consideration in the selection process for available new seats.

The clinical portion of the nursing program is open only to those who can satisfy the California residence requirements. Students who qualify for Deferred Action for Childhood Arrivals (DACA) status, AB 540 status, or military fee waiver are eligible.

Admission Advising

Group advising meetings are scheduled throughout the academic year. Times of these meetings and program publications are available on the School of Nursing website (http://www.csus.edu/hhs/nrs/).

Application Procedures - Nursing Pre-Licensure BSN Program

Clinical Nursing Selection Criteria

- The GPA of the pre-clinical and corequisite courses completed at the time of application, the results of the ATI Test of Essential Academic Skills (TEAS), and the optional criteria, if selected by the student, will be used to determine program admission.
- Applicants who satisfy the minimum admission point total are selected from a rank ordering or total points assigned to different GPA and TEAS result levels as well as points assigned to the optional criteria.

Prerequisites Requirements - Nursing Pre-Licensure BSN

The following prerequisites are to be met by time of enrollment unless otherwise stated.

- Completion of six of the eight specific courses listed under pre-clinical courses. One science and one non-science pre-clinical course may be in progress at the time of application. All eight pre-clinical courses must be completed in December when applying for a spring term; June for fall. When applying for a fall term, coursework completed in summer will not be considered or accepted. Pre-Clinical courses are acceptable regardless of date completed, but current knowledge is essential.
- Applicants are encouraged to complete the corequisite courses prior to admission. Introductory Psychology, Nutrition, and Life Span Human Development must be completed prior to the second semester of the nursing program. A societal-cultural patterns course must be completed prior to licensure and graduation.
- A minimum science GPA of 3.0 is required on the pre-clinical science courses completed at the time of application (anatomy, physiology, microbiology, and chemistry). One science course may be in progress at the time of application.
- A minimum GPA of 3.3 is required on the pre-clinical and corequisite courses completed at the time of application. Applicants may omit up to two grades from their GPA calculation providing they have a minimum of eight grades total, including 2 science grades. For example, an applicant applying with nine grades may omit one grade; an applicant with 10-12 grades may omit up to two grades. All pre-clinical and corequisite courses must be completed with a grade of "C" or better. Up to 50 admission points will be assigned based on the applicant’s GPA (see School of Nursing website for details).
- All GPAs will be calculated using standard weights, not varying institutional unit assignments. Science lab courses will be weighted four (4) units; all other coursework will be weighted three (3) units. Pluses and minuses are not considered.
- Only three (3) of the twelve (12) grades in the Nursing GPA calculation may be repeats; only one (1) of the three (3) repeats may be a science course. A third attempt will not be considered. Courses over seven (7) years old are acceptable, but not included in repeat count.
- Completion of the ATI, Test of Essential Academic Skills (TEAS).

A minimum score of 75.0% is required. The test must be taken no later than March 1 for the following fall semester or October 1 for the following spring semester. The test may be taken three times within a five-year period preceding the Supplemental Nursing Application deadline. The highest score will be used. Points will be assigned based on the applicant's total score from the best testing. See School of Nursing website for current point details and amounts.

- A minimum admission point total is required. The total will be based on current applicant pool statistics and posted on the Nursing website.

Optional points for admission (see School of Nursing website for current point details and amounts) are awarded in the following categories:

Bilingual Skills in Spanish, Chinese, South East Asian Languages, Indian Languages (Hindi, Punjabi), Tagalog, Russian, Farsi, Arabic, or American Sign Language will be determined by:

- completion of an oral proficiency examination;
- transcript documenting instruction provided in approved language.

Health-Related Work Experience. Candidates may receive points for documentation of paid or volunteer work in acute, long term, clinical, or community settings which involves direct human-client/patient interactions. Hours may be combined from multiple locations. Points are awarded for the following increments of time:

- 50 hours – minimum possible points
- 75 hours
- 100 hours – maximum possible points

Background. Details can be found on the nursing website.
• First-Generation College Student. Neither parent graduated with an associate or higher degree.

• Environmental Background: (see School of Nursing website for details).

**GPA Calculation:** Candidates may receive points for having no course omits for total GPA calculation and/or not having a repeat of a pre- or co-requisite course. Details can be found on the nursing website.

**Additional Information**

**Health Requirements**

Students admitted to the Clinical Nursing program are required to have specified immunizations by the Student Health Center or a private physician prior to beginning nursing coursework. Drug and alcohol screening is required before beginning clinical nursing (see below for details). Health insurance is required. Complete information on health requirements for nursing students may be secured from the School of Nursing.

**Technology Competence**

To be successful in the curriculum, students must be able to demonstrate competency in computer technology, such as word processing, use of the Internet, e-mail, and database searches. Clinical nursing students are required to own a personal computer.

**Professional Liability Insurance, Automobile Insurance, Transportation and CPR Certification**

All students enrolled in clinical laboratory courses in the nursing major must pay the University fee for professional liability insurance, provide proof of automobile insurance, and have a means of transportation to extended campus facilities. Professional liability insurance is mandatory prior to beginning clinical experiences. CPR certification for medical professionals is required as a prerequisite to the program and recertification must be maintained according to the requirements of the American Heart Association.

**Background Checks**

Nursing students must satisfactorily complete all clinical, community, and laboratory requirements in order to progress in courses, progress in the program, and to receive their degree. In order to make an initial determination as to whether there are any current barriers to admitted students qualifying for and/or participating in clinical programs, all admitted students must submit to a background check and drug screen under the direction of the nursing program prior to enrollment. Requirement for drug screening is consistent with the California Board of Registered Nursing guidelines for safe nursing practice. Results of background checks and drug screens will be provided to the nursing program’s affiliating clinical agencies (partner agencies) which must approve the background checks and drug screens in order for students to qualify for participation in and fulfillment of the required clinical component. Students will be advised of any identified issues impacting their eligibility for participation in required clinical and community placements prior to making their decision to enroll. The full policy concerning background checks and drug screening in the nursing program can be found on the School of Nursing website (http://www.csus.edu/hhs/nrs/). Students should also be aware that the State of California Board of Registered Nursing makes determinations for licensure based in part on background checks. Students who have concerns regarding their background checks should review the BRN website (http://www.rn.ca.gov/enforcement/convictions.shtml/) for information related to initial licensure before determining whether to apply and/or enroll in the nursing program.

**Challenge by Examination**

The School of Nursing offers the opportunity of petitioning certain nursing courses for credit by examination. Students who by reason of special study, experience or training, already possess the skills, knowledge, and attitudes which are the objectives of the given course, may petition for credit by examination. A maximum of 30 units may be challenged. Licensed Registered Nurses, Licensed Vocational Nurses, and Corpsmen are examples of students who may be eligible to challenge specific nursing courses. Additional information may be obtained by referring to “Credit by Examination” in this catalog or by contacting the School of Nursing.

**Note:** Students graduating with a Pre-Licensure BS Program in Nursing (traditional) will not be subject to the University’s Foreign Language Graduation Requirement. Students who change major may be subject to the University’s Foreign Language Graduation Requirement.

Notes:

• Applicants with a prior baccalaureate degree are exempt from General Education requirements.

• In addition to the major in Nursing, students may also complete a minor in another discipline. There are numerous disciplines which would enrich the baccalaureate degree in Nursing (e.g., Gerontology). Information on minors can be obtained by contacting the department of interest.

• Satisfactory completion of the program requires a grade of "C" or better in every nursing course. The policy in the School of Nursing permits one repeat of only one failed course. However, opportunity to repeat a failed nursing course will depend upon the number of students enrolled in the course, the availability of clinical and community experiences (if applicable), and a successful petition to repeat from the School of Nursing. Course repeats are not permitted to increase grade.

When possible, students are encouraged to apply their pre-clinical courses to General Education requirements.

To help you complete your degree in a timely manner and not take more units than absolutely necessary, there are ways to use single courses to meet more than one requirement (overlap). For further information, please visit the General Education page (p. 1103).

**Note:** There is no way to list all possible overlaps so please consult with a professional advisor. The Academic Advising Center can be visited online (http://www.csus.edu/acad/), by phone (916) 278-1000, or email (advising@csus.edu).

### Required in Major; also satisfies Graduation Requirement.

- have an overall GPA of 3.0 (if the GPA requirement is unmet, the student may apply for conditional classification and demonstrate academic ability by enrolling in, and successfully passing with a "B" (83%) or better, NURS 209 and NURS 210 in one attempt);
- possess a current unencumbered RN license in California; and
- submit a statement of purpose that outlines the goals and objectives for the pursuit of graduate study.

### Professional Liability and Automobile Insurance and Health Requirements

All students enrolled in clinical laboratory courses in the Master’s program must pay the fee for the University professional liability insurance. Professional liability insurance is mandatory prior to beginning clinical experiences. Proof of automobile insurance may be required for clinical experience. The student admitted to the Master’s program is required to have specified immunizations by the Student Health Service or a private physician prior to beginning nursing coursework. Drug and alcohol and background screening is required. Health insurance is required. Complete information on health requirements may be secured from the School of Nursing.

### Technology Competence

To be successful in the curriculum, students must be able to demonstrate competency in computer technology, such as word processing, use of the Internet, e-mail, and database searches.

### Admission Procedures

Prospective graduate students, including Sacramento State graduates, must file the following materials as a complete admission packet with the Office of Graduate Studies:

- an online application for admission;
- one set of official transcripts from all colleges and universities attended, other than Sacramento State;

For more admissions information and application deadlines please visit the School of Nursing website (http://www.csus.edu/gradstudies/).

Notice of the decision regarding admission will be mailed to the applicant after files are complete and reviewed. Students will be assigned a faculty advisor at the beginning of the school year.

### Minimum Units and Grade Requirement for the Degree

Units required for the MS: 33

Minimum Cumulative GPA: 3.0

### Advancement to Candidacy

Each student must file an application for Advancement to Candidacy, indicating a proposed program of graduate study. The procedure should begin as soon as the classified graduate student has:

- removed any deficiencies in admission requirements;
- completed at least 12 units in the graduate program, with a minimum 3.0 GPA; and
- taken the Writing Placement for Graduate Students (WPG) or taken a Graduate Writing Intensive (GWI) course in their discipline within the first two semesters of coursework at California State University, Sacramento or secured approval for a WPG waiver.
Advancement to Candidacy forms are available online at www.csus.edu/gradstudies/forms (http://www.csus.edu/gradstudies/forms/), Office of Graduate Studies. The student fills out the form after planning a degree program in consultation with his/her advisor. The completed form is then returned to the Office of Graduate Studies for approval. Students may not register for the Culminating Requirement until they have advanced to candidacy.

**School Nurse Credential**

Units required for Credential: 22-25

**Program Description**

Students who are eligible for the California School Nurse Services Preliminary Credential from the California Commission on Teacher Credentialing and who meet the graduate program admission criteria may apply to the program. Admission criteria and procedures are similar to those for the MS program except the application and recommendation forms are directed to the School Nurse Program Coordinator. Students are held to the same professional liability and automobile insurance and health requirements as MS students.

**Total Units** 22-25

In addition to the above courses, the Professional Credential for MS candidates requires two years of full-time school nurse experience (or its part-time equivalent).

---

**LVN 30 Unit Option Non-Degree Program**

Units required for Major: 30

**Program Description**

California law allows Licensed Vocational Nurses to take the Registered Nurse licensure exam after completing 30 units of academic coursework in Nursing and related science subjects. For more information on this option contact the School of Nursing to make an appointment to speak with an advisor. Admission to the University and a 3.0 combined average GPA on the two prerequisite science courses is required.
Special Teaching Authorization in Health (STAH)

Program Description
The STAH option is available to school nurses who wish to position themselves to become faculty of record for health classes within public school districts. The STAH is not required for the school nurse credential but is considered a supplemental credential. Candidates for the STAH must hold a school nurse credential or apply for both credentials at the same time. The STAH authorizes nurses to provide health education instruction beyond that of periodic guest presentations (e.g., Family Life Education) and allows school administrators to utilize nurses in the capacity of health educators through the provision of direct and regular health instruction.

Program Requirements
Completion of nine units of educational pedagogy including a supervised student (practice) teaching experience and passing of the CBEST (California Basic Educational Skills Test).

Physical Therapy

College of Health and Human Services

Program Description
The primary mission of the California State University, Sacramento Doctor of Physical Therapy program is to graduate knowledgeable, effective, adaptable, and reflective physical therapist generalist practitioners and health care leaders. Graduates demonstrate ethical, responsible, professional behavior, are sensitive to cultural and psychosocial differences, use evidence derived from the scientific and professional literature to inform independent judgments to meet patient needs and to advance the profession. They utilize critical and integrative thinking and problem-solving, practice lifelong learning, and provide services that contribute to the optimal health and function of community residents.

Physical Therapy at Sacramento State is one of several professional curricula in the College of Health and Human Services. The program complements others in the College and provides opportunities for scholarship, instructional collaboration, and interaction.

The doctoral curriculum of 3 years, including summers, encompasses didactic instruction, laboratory experience, and clinical education. The clinical component is thirty-six weeks of full-time, off-campus clinical experiences.

Degree Program
Doctor of Physical Therapy (p. 745)

Accreditation
In addition to California State University, Sacramento’s full accreditation by the Western Association of Schools and Colleges, the Doctor of Physical Therapy is also individually accredited by Commission on Accreditation in Physical Therapy Education (CAPTE).

Notice to Students RE: Professional Licensure and Certification
California State University programs for professions that require licensure or certification are intended to prepare the student for California licensure and certification requirements. Admission into programs for professions that require licensure and certification does not guarantee that students will obtain a license or certificate. Licensure and certification requirements are set by agencies that are not controlled by or affiliated with the California State University and licensure and certification requirements can change at any time.

The California State University has not determined whether its programs meet other states’ educational or professional requirements for licensure and certification. Students planning to pursue licensure or certification in other states are responsible for determining whether, if they complete a California State University program, they will meet their state’s requirements for licensure or certification. This disclosure is made pursuant to 34 CFR §668.43(a)(5)(v)(C).

Special Features
• Following successful completion of both the clinical and regular academic program, students are awarded a Doctor of Physical Therapy and will be eligible to take the National Physical Therapy Licensure Examination.
• The Doctor of Physical Therapy degree program at Sacramento State is fully accredited by the Commission on Accreditation in Physical Therapy Education/APTA. The Commission can be contacted for questions at:
  1111 North Fairfax Street
  Alexandria, VA 22314-1488
  (703) 684-2782

Notes:
• Admission is for fall semester only.
• Classes are offered primarily during daytime hours, and full-time study is required.

Career Possibilities
Hospitals · Ambulatory Care Centers · Private Practice · Sports Medicine Centers · Rehabilitation Centers · Industries · Extended Care Facilities · Home Health Care · Schools · University Teaching and Research · Consulting

PT 280. Graduate PT Seminar II. 1 Unit
Term Typically Offered: Fall, Spring

Presented after the final clinical field experience, will review students’ experiences in the clinic and promote reflection on the professional practice of physical therapy. Serves as a review of a variety of physical therapy subjects in preparation for the licensure examination. Students will use computer interactive software to assist with preparation for this standardized national test format.

Note: Open to Physical Therapy majors only.

PT 295. Physical Therapy Clinical Experience. 1 - 3 Units
Term Typically Offered: Fall, Spring

Supervised clinical affiliation equivalent to two full-time weeks up to six full-time weeks in a physical therapy setting under the direct supervision of a licensed Physical Therapist.

Note: Placement is arranged through the Program. Permission of Clinical Coordinator required.

Credit/No Credit

PT 299. Special Problems. 1 - 3 Units
Term Typically Offered: Fall, Spring

Individual projects or directed reading designed for students capable of independent study.

Note: Admission requires written approval of instructor and program director.

Credit/No Credit

PT 510. Audiology Progress Exam. 1 Unit

Prerequisite(s): Admission to Doctor of Audiology program; CSAD 611, CSAD 612, CSAD 613, CSAD 614, CSAD 620, CSAD 620C, CSAD 621, CSAD 622, CSAD 622L, CSAD 623, CSAD 624, CSAD 630, CSAD 630C, CSAD 631, CSAD 632.

Term Typically Offered: Summer only

Formative written and practical exam based on coursework and clinical experiences from the first year of the Doctor of Audiology program.

Credit/No Credit

PT 500. Pathokinesiology. 5 Units

Prerequisite(s): Open to Physical Therapy majors only.

Corequisite(s): BIO 633, PT 602, PT 608, PT 630.

Term Typically Offered: Fall, Spring

This course will address functional anatomy, surface anatomy with palpation, arthrology, biomechanics, pathologies related to the musculoskeletal and nervous systems. Both normal motion and pathological motion will be addressed. Students will gain competence in surface anatomy and palpation skills.
PT 614. Neuroscience for Physical Therapy. 3 Units
Prerequisite(s): BIO 633, PT 600, PT 602, PT 608, PT 630.
Corequisite(s): PT 604, PT 606, PT 618, PT 620, PT 622.
Term Typically Offered: Fall, Spring

This course is designed to prepare clinicians to better understand the neurological control of human behavior. A systems approach is used to examine the major anatomical and physiological principles and mechanisms by which the nervous system controls behavior under normal and pathological conditions. Because the course is being taught to health care professionals, clinical correlates of each system will also be presented. One class session is dedicated to presentation of human gross anatomical specimens.

PT 618. Foundations for Patient Management. 1 Unit
Prerequisite(s): BIO 633, PT 600, PT 602, PT 608, PT 630.
Corequisite(s): PT 604, PT 606, PT 614, PT 618, PT 620, PT 622.
Term Typically Offered: Fall, Spring

This course introduces the disablement model that forms the conceptual framework for understanding and organizing the practice of physical therapy. The model delineates the possible consequences of disease and injury for the person and society. The course goes on to identify how the model informs the five elements of patient management: Examination, Evaluation, Diagnosis, Prognosis (including Plan of Care), and Intervention. The course will further expand on professionalism introduced in PT 608.

Note: Open to Physical Therapy majors only.

PT 620. Physical Therapy Interventions I. 3 Units
Prerequisite(s): BIO 633, PT 600, PT 602, PT 608, PT 630.
Corequisite(s): PT 604, PT 606, PT 614, PT 618, PT 620, PT 622.
Term Typically Offered: Fall, Spring

In this course students learn, practice and demonstrate the clinical application of basic exercise regimes for the prevention of limitations, improvement of functional abilities and the treatment of disorders associated with the neuromuscular, skeletal and cardiopulmonary systems. In addition, the application of motor control principles to exercise and aquatic therapy are addressed.

Note: Open to Physical Therapy majors only.

PT 622. Evidence Informed Practice II. 3 Units
Corequisite(s): PT 604, PT 606, PT 614, PT 618, PT 620.
Term Typically Offered: Fall, Spring

Designed to build upon the data analysis and research design topics covered in PT 602. Emphasis will be placed on evidence based methodologies currently used in the physical therapy literature evaluating the effectiveness of interventions, the validity of outcome measures, the validity of diagnostic measures, and the identification of prognostic measures.

Note: Open to Physical Therapy majors only. Prerequisite

PT 624. Adult Neuromuscular Patient Management I. 4 Units
Prerequisite(s): BIO 633, PT 600, PT 602, PT 604, PT 606, PT 608, PT 614, PT 618, PT 620, PT 622, PT 624, PT 626, PT 630, PT 632, PT 634, PT 636, PT 640, PT 646.
Term Typically Offered: Fall, Spring

This course is first in a three course sequence focused on acquisition and integration of knowledge and skills needed to manage patients with movement dysfunction caused by neurological damage (Referred to in the Guide as Neuromuscular Practice Patterns). Focus is on development and implementation of plans of care based on sound evaluative, treatment and problem-solving skills.

Note: Open to Physical Therapy majors only.

PT 625. Musculoskeletal Patient Management I. 4 Units
Prerequisite(s): BIO 633, PT 600, PT 602, PT 604, PT 606, PT 608, PT 614, PT 618, PT 620, PT 622, PT 630, PT 632, PT 634, PT 638.
Corequisite(s): PT 624, PT 626, PT 636, PT 640, PT 646.
Term Typically Offered: Fall, Spring

This course, the first of three, focuses on acquisition, integration, knowledge and skills involved in developing and implementing a patient management plan for the patient with musculoskeletal dysfunction based on sound evaluative findings. Lectures address etiology, signs and symptoms, medical, surgical, and physical therapy management of musculoskeletal dysfunction. Labs address skill development for performing evaluation and interventions safely and effectively. The course addresses the management of lower extremity dysfunction.

Note: Open to Physical Therapy majors only.

PT 626. Clinical Agents. 2 Units
Prerequisite(s): BIO 633, PT 600, PT 602, PT 604, PT 606, PT 608, PT 614, PT 618, PT 620, PT 622, PT 630, PT 632, PT 634, PT 638.
Corequisite(s): PT 624, PT 625, PT 636, PT 640, PT 646.
Term Typically Offered: Fall, Spring

This course presents theory, demonstration and laboratory practice in physical therapy modalities and techniques including thermal agents, hydrotherapy, ultrasound (US), ultraviolet, diathermy and massage. Theory, demonstration and practice using electrical modalities are included. Case studies will be utilized for decision making in the proper application of modalities based on current research evidence, knowledge of indications, contradictions and physiologic effects.

Note: Open to Physical Therapy majors only.

PT 627. Physical Therapy Educator. 1 Unit
Prerequisite(s): BIO 633, PT 600, PT 602, PT 604, PT 606, PT 608, PT 614, PT 618, PT 620, PT 624, PT 625, PT 626, PT 630, PT 632, PT 634, PT 636, PT 638, PT 640, PT 646.
Corequisite(s): PT 644, PT 645, PT 648, PT 662, PT 669.
Term Typically Offered: Fall, Spring

This course presents the role of the physical therapist as health educator. The course introduces teaching and learning theory, learning domains, the identification of learning styles, and teaching strategies to address different learner needs across the life-span. Students will practice instructional formats and prepare and analyze patient education materials. Students will practice applications of appropriate technology for the design of professional presentations. Self-assessment, reflection and peer-assessment are required course components.

Note: Open to Physical Therapy majors only.
PT 630. Pathophysiology. 3 Units
Prerequisite(s): Admission to the Doctor of Physical Therapy Program.
Corequisite(s): BIO 633, PT 600, PT 602, PT 608.
Term Typically Offered: Fall, Spring

This course is designed to promote the understanding and application of fundamental disease processes in clinical settings. General concepts of disease, including etiology, pathogenesis, morphology, and clinical significance are discussed within the context of cases. General pathophysiology concepts include: cell injury, necrosis, inflammation, wound healing and neoplasia. These concepts are applied in a systems-orientated approach to disease processes affecting musculoskeletal, cardiopulmonary, renal, nervous, gastrointestinal, immune, hematological and endocrine systems.

PT 632. Pharmacology for Physical Therapists. 2 Units
Prerequisite(s): BIO 633, PT 600, PT 602, PT 604, PT 606, PT 608, PT 614, PT 618, PT 620, PT 622, PT 630.
Corequisite(s): PT 634, PT 638.
Term Typically Offered: Fall, Spring

This course provides a study of pharmacological agents and their effects on the musculoskeletal, neuromuscular, cardiopulmonary and integumentary systems. Particular emphasis is placed on recognition of adverse reactions and side effects of various drugs as they affect patients receiving physical therapy.
Note: Open to Physical Therapy Majors only.

PT 634. Diagnostic Imaging for Physical Therapy. 2 Units
Prerequisite(s): BIO 633, PT 600, PT 602, PT 604, PT 606, PT 608, PT 614, PT 618, PT 620, PT 622, PT 630.
Corequisite(s): PT 632, PT 638.
Term Typically Offered: Fall, Spring

This course provides an overview of imaging techniques commonly used in radiology and their implications to the role of physical therapists in professional practice. The role of imaging techniques in the diagnostic and intervention-planning processes for physical therapists is presented.
Note: Open to Physical Therapy Majors only.

PT 636. Geriatrics/Gerontology for Physical Therapists. 2 Units
Prerequisite(s): BIO 633, PT 600, PT 602, PT 604, PT 606, PT 608, PT 614, PT 618, PT 620, PT 622, PT 630, PT 632, PT 634, PT 638.
Corequisite(s): PT 624, PT 625, PT 626, PT 640, PT 646.
Term Typically Offered: Fall, Spring

This course explores normal and pathological aging and the implications of both on Physical therapist practice. It will explore the ramifications of aging components of patient management interventions including major practice patterns: musculoskeletal, neuromuscular, cardiopulmonary, and integumentary. It will also explore how aging may impact patient teaching.
Note: Open to Physical Therapy Majors only.

PT 638. Health, Wellness and Ergonomics in Physical Therapy. 2 Units
Prerequisite(s): BIO 633, PT 600, PT 602, PT 604, PT 606, PT 608, PT 614, PT 618, PT 620, PT 622, PT 630.
Corequisite(s): PT 632, PT 634.
Term Typically Offered: Fall, Spring

This course presents basic philosophical, historical, psychological and scientific foundations in wellness; reviews cultural forces/theories that affect individuals and society; applies concepts of healthy lifestyle education to reach an understanding of the importance of wellness and to establish an effective and potentially fulfilling lifestyle.
Note: Open to Physical Therapy majors only.

PT 640. Physical Therapy Interventions II. 3 Units
Prerequisite(s): BIO 633, PT 600, PT 602, PT 604, PT 606, PT 608, PT 614, PT 618, PT 620, PT 622, PT 630, PT 632, PT 634, and PT 638.
Corequisite(s): PT 624, PT 625, PT 626, PT 636, PT 646
Term Typically Offered: Fall, Spring

This course is a continuation of Physical Therapy Interventions I. This course focuses on the presentation of selected topics in acute care and cardiopulmonary Physical Therapy. Students will learn how to perform appropriate and comprehensive examinations, interpret the examination findings as well as design and implement a plan of care based upon the next available evidence.
Note: Open to Physical Therapy majors only.

PT 644. Adult Neuromuscular Patient Management II. 4 Units
Prerequisite(s): BIO 633, PT 600, PT 602, PT 604, PT 606, PT 608, PT 614, PT 618, PT 620, PT 622, PT 624, PT 625, PT 626, PT 630, PT 632, PT 634, PT 636, PT 638, PT 640 and PT 646.
Corequisite(s): PT 627, PT 645, PT 648, PT 662, PT 669.
Term Typically Offered: Fall, Spring

This course is the second in a three course sequence focused on acquisition and integration of knowledge and skills needed to manage patients with movement dysfunctions caused by neurological damage (Referred to in the Guide as Neuromuscular Practice Patterns). Focus is on development and implementation of plans of care based on sound evaluative findings and evidence of efficacy. Case presentation, video demonstrations, and patient contact is used to develop evaluation, treatment and problem solving skills.
Note: Open to Physical Therapy majors only.

PT 645. Musculoskeletal Patient Management II. 4 Units
Prerequisite(s): BIO 633, PT 600, PT 602, PT 604, PT 606, PT 608, PT 614, PT 618, PT 620, PT 622, PT 624, PT 625, PT 626, PT 630, PT 632, PT 634, PT 636, PT 638, PT 640 and PT 646.
Corequisite(s): PT 627, PT 644, PT 645, PT 648, PT 662, PT 669.
Term Typically Offered: Fall, Spring

This course, the second of three, focuses on acquisition and integration of knowledge and skills involved in developing and implementing management plans for patients with musculoskeletal dysfunction from sound evaluative findings. Lectures address etiology, signs and symptoms, medical, surgical, and physical therapy management of musculoskeletal dysfunction. Labs address safe and effective evaluation and interventions, specifically joint mobilizations. Joint mobilizations will cover one technique per joint restriction. This course addresses upper extremity and spine dysfunction.
Note: Open to Physical Therapy majors only.
PT 646. Acute Care and Cardiopulmonary Physical Therapy. 2 Units
Prerequisite(s): BIO 633, PT 600, PT 602, PT 604, PT 606, PT 608, PT 614, PT 618, PT 620, PT 622, PT 630, PT 632, PT 634, PT 636 and PT 638.
Corequisite(s): PT 624, PT 625, PT 626, PT 640.
Term Typically Offered: Fall, Spring

This course focuses on the presentation of selected topics in acute care and cardiopulmonary Physical Therapy. The course includes a discussion of common pathologies in the cardiopulmonary system and those associated with an acute care setting, as well as common medical tests, laboratory tests, surgical procedures and pharmacological interventions used with this patient population.

Note: Open to Physical Therapy majors only.

PT 648. Health Care Delivery in Physical Therapy I. 2 Units
Prerequisite(s): BIO 633, PT 600, PT 602, PT 604, PT 606, PT 608, PT 614, PT 618, PT 620, PT 622, PT 624, PT 625, PT 626, PT 630, PT 632, PT 634, PT 636, PT 638, PT 640 and PT 646.
Corequisite(s): PT 627, PT 644, PT 645, PT 662, PT 669.
Term Typically Offered: Fall, Spring

This course provides a historical overview of health care delivery and financing in the U.S., up to and including the current effects on the delivery of physical therapy care. The continuum of care concept, an overview of national economic policy and the mechanisms for financing physical therapy services will be presented. Administrative topics including human resources, financial management, planning, marketing, patient’s rights, and medical records management will be covered.

Note: Open to Physical Therapy majors only.

PT 660A. Graduate Physical Therapy Seminar A: Research. 1 Unit
Prerequisite(s): BIO 633, PT 600, PT 602, PT 608, PT 630
Term Typically Offered: Fall, Spring, Summer

This seminar is the first designed for advanced study and mentoring in physical therapy research. Students will be participating in faculty-directed research projects. Students’ activities will vary depending on the faculty member and research project being conducted. Students are required to perform at least 50 hours of activities toward the directed research project to receive credit for this course. This course satisfies one of two requirements for selected seminars in the curriculum.

Note: Open to Physical Therapy majors only.

PT 660B. Graduate Physical Therapy Seminar B: Research. 1 Unit
Prerequisite(s): BIO 633, PT 600, PT 602, PT 608, PT 630
Term Typically Offered: Fall, Spring, Summer

This seminar is the second designed for advanced study and mentoring in physical therapy research. Students will be participating in faculty-directed research projects. Students’ activities will vary depending on the faculty member and research project being conducted. Students are required to perform at least fifty hours of activities toward the directed research project to receive credit for this course. This course satisfies one of two requirements for selected seminars in the DPT curriculum.

Note: Open to Physical Therapy majors only.

PT 660C. Graduate Physical Therapy Seminar C: Research. 1 Unit
Prerequisite(s): BIO 633, PT 600, PT 602, PT 608, PT 630
Term Typically Offered: Fall, Spring, Summer

This seminar is the third designed for advanced study and mentoring in physical therapy research. Students will be participating in faculty directed research projects. Students’ activities will vary depending on the faculty member and research project being conducted. Students are required to perform at least 50 hours of activities toward the directed research project to receive credit for this course. This course satisfies one of two requirements for selected in the DPT curriculum.

Note: Open to Physical Therapy majors only.

PT 660D. Graduate Physical Therapy Seminar D: Electrotherapeutics. 2 Units
Prerequisite(s): BIO 633, PT 600, PT 602, PT 604, PT 606, PT 608, PT 614, PT 618, PT 620, PT 622, PT 624, PT 625, PT 626, PT 627, PT 630, PT 632, PT 634, PT 636, PT 638, PT 640, PT 646.
Corequisite(s): PT 627, PT 644, PT 645, PT 648, PT 662, PT 669.
Term Typically Offered: Fall, Spring

This is a seminar laboratory experience focusing on electromyography and electrodiagnostics in physical therapy. The lab will allow students to research and apply evidence-based practice and gain advanced hands-on practice in performing and interpreting the results of electromyographic and nerve conduction velocity testing with clients. This course satisfies one of two requirements for selected seminars in the curriculum.

Note: Open to Physical Therapy majors only.

PT 660E. Graduate Physical Therapy Seminar IE: NeuroPediatric Laboratory. 2 Units
Prerequisite(s): BIO 633, PT 600, PT 602, PT 604, PT 606, PT 608, PT 618, PT 620, PT 622, PT 624, PT 625, PT 626, PT 627, PT 630, PT 632, PT 634, PT 636, PT 638, PT 640, PT 644, PT 645, PT 646, PT 648, PT 662, PT 669.
Corequisite(s): PT 663, PT 664, PT 665, PT 668, PT 680, PT 690.
Term Typically Offered: Fall, Spring

This seminar laboratory experience focuses on pediatric patient management. The lab will allow students to research and apply evidence-based practice and gain advanced hands-on practice in pediatric physical therapy. This course is best suited for students planning a career in pediatric patient management. The course satisfies one of two requirements for selected seminars in the curriculum.

Note: Open to Physical Therapy majors only.

PT 660F. Graduate Physical Therapy Seminar IF: Adult Neuromuscular Laboratory. 2 Units
Prerequisite(s): BIO 633, PT 600, PT 602, PT 604, PT 606, PT 608, PT 618, PT 620, PT 622, PT 624, PT 625, PT 626, PT 627, PT 630, PT 632, PT 634, PT 636, PT 638, PT 640, PT 646, PT 662, PT 669.
Corequisite(s): PT 663, PT 664, PT 665, PT 668, PT 680, PT 690.
Term Typically Offered: Fall, Spring

This seminar laboratory experience focuses on adult neuromuscular patient management. The laboratory will allow students to research and apply evidence-based practice and gain advanced hands-on practice in adult neurorehabilitation. Students will also serve as mentors for the Mock Clinic portion of PT 624. This course satisfies one of two requirements for selected seminars in the curriculum.

Note: Open to Physical Therapy majors only.
**PT 660G. Certified Strength and Conditioning Specialist (CSCS). 2 Units**

**Prerequisite(s):** BIO 633, PT 600, PT 602, PT 604, PT 606, PT 608, PT 614, PT 618, PT 620, PT 622, PT 624, PT 625, PT 626, PT 630, PT 632, PT 634, PT 636, PT 638, PT 640, PT 644, PT 645, PT 646, PT 648, PT 662, PT 669.

**Corequisite(s):** PT 663, PT 664, PT 665, PT 668

**Term Typically Offered:** Fall, Spring

This seminar is designed to prepare students to take the Certified Strength and Conditioning Specialist Examination. The seminar covers the topics of exercise physiology, bioenergetics, nutritional factors in performance, resistance, speed, and agility training, and the clinical applications of these concepts. Video demonstrations, and actual patient contact will be used to develop the student's clinical skills. This course satisfies one of two requirements for selected seminars in the curriculum.

**Note:** Open to Physical Therapy majors only.

**PT 660H. Graduate Physical Therapy Seminar H: Cardiovascular Wellness Clinic Experience. 1 Unit**

**Prerequisite(s):** BIO 633, PT 600, PT 602, PT 604, PT 606, PT 608, PT 614, PT 618, PT 620, PT 622, PT 624, PT 625, PT 626, PT 630, PT 632, PT 634, PT 636, PT 638, PT 640, PT 644, PT 645, PT 646, PT 648, PT 662, PT 669.

This elective provides mentored clinical experience for students in the area of cardiovascular wellness. The student will design and implement an evaluation of a volunteer client in a cardiovascular wellness program, develop an individualized plan of care, and monitor the impact of the intervention. A written comprehensive case report will analyze the impact of the interventions on the cardiovascular well being of the client.

**Note:** Open to Physical Therapy majors only.

**PT 660J. Graduate Physical Therapy Seminar IJ: Adv. Biomechanics I. 2 Units**

**Prerequisite(s):** BIO 633, PT 600, PT 602, PT 604, PT 606, PT 608, PT 614, PT 618, PT 620, PT 622, PT 624, PT 625, PT 626, PT 630, PT 632, PT 634, PT 636, PT 638, PT 640, PT 644, PT 645, PT 646, PT 648, PT 662, PT 669.

**Corequisite(s):** PT 624, PT 625, PT 626, PT 636, PT 640, PT 646

**Term Typically Offered:** Fall, Spring

This elective is designed to prepare students to run a gait analysis clinic. The course covers the topics of assessment of balance, lower extremity strength assessment, special tests, and running analysis from both the research “gold standard” as well as the clinically feasible perspective with a particular focus on running.

**Note:** Open to Physical Therapy majors only.

**PT 660K. Graduate Physical Therapy Seminar 1K Adv. Biomechanics II. 2 Units**

**Prerequisite(s):** BIO 633, PT 600, PT 602, PT 604, PT 606, PT 608, PT 614, PT 618, PT 620, PT 622, PT 632, PT 634, PT 636, PT 638, PT 624, PT 625, PT 626, PT 640, PT 696J

**Corequisite(s):** PT 627, PT 644, PT 645, PT 648, PT 669, PT 662

This elective is designed to prepare students to run a gait analysis clinic in the biomechanics laboratory. The course is one unit of lecture and one unit of lab, and covers the topics of assessment of balance, lower extremity strength assessment, special tests, and running analysis from both the research “gold standard” as well as the clinically feasible perspective with a particular focus on running.

**Note:** Open to Physical Therapy Majors only.
PT 665. Musculoskeletal Patient Management III.  3 Units
Prerequisite(s): BIO 633, PT 600, PT 602, PT 604, PT 606, PT 608, PT 614, PT 618, PT 620, PT 622, PT 624, PT 625, PT 626, PT 627, PT 630, PT 632, PT 634, PT 636, PT 638, PT 640, PT 644, PT 645, PT 646, PT 648, PT 662, PT 669, PT 695A. Corequisite: PT 663, PT 664, PT 668, PT 690.
Term Typically Offered: Fall, Spring

This course builds on the foundational intervention techniques established for management of the patient with musculoskeletal dysfunction in PT 625 and PT 645. It will address additional manual therapy skills and students will apply their developing skills under faculty supervision to patients referred from the Student Health Center. Students will be responsible for patient management of a case load including accurate documentation and submission of patient records to the Student Health Center.

Note: Open to Physical Therapy Majors only.

PT 668. Health Care Delivery in Physical Therapy II.  2 Units
Prerequisite(s): BIO 633, PT 600, 602, 604, 606, 608, 614, 618, 620, 622, 624, 625, 626, 627, 630, 632, 634, 636, 638, 640, 644, 645, 646, 648, 662, 669 and 695A.
Corequisite(s): PT 663, PT 664, PT 665, PT 680, PT 690.
Term Typically Offered: Fall, Spring

In this course, students will have professional practice behavior expectations and requirements previously introduced in other courses reinforced through the review of the American Physical Therapy Association documents: the Standard of Practice for Physical Therapy and the Code of Ethics, as well as the State of California’s Physical Therapy Practice Act. Additionally, students will hear from other health care professionals on their expectations of the physical therapist’s role on a health care team.

Note: Open to Physical Therapy majors only.

PT 669. Psychosocial Issues in Physical Therapy.  1 Unit
Prerequisite(s): BIO 633, PT 600, PT 602, PT 604, PT 606, PT 608, PT 614, PT 618, PT 620, PT 622, PT 624, PT 625, PT 626, PT 630, PT 632, PT 634, PT 636, PT 638, PT 640 and PT 646.
Corequisite(s): PT 627, PT 644, PT 645, PT 648, PT 662.
Term Typically Offered: Fall, Spring

This course examines psychological and social impact of and reactions to illness and physical disability. Explores elements of the psycho-social dynamics related to disability with a focus on adjustments required of the disabled and the provider. The course addresses social, cultural, personal, and familial factors which impact comprehensive rehabilitation in the clinical setting. Attention will be placed on interpersonal relationships between patients, family, health care providers, and society.

Note: Open to Physical Therapy majors only.

PT 680. Graduate Physical Therapy Seminar II.  1 Unit
Prerequisite(s): BIO 633, PT 600, 602, 604, 606, 608, 614, 618, 620, 622, 624, 625, 626, 627, 630, 632, 634, 636, 638, 640, 644, 645, 646, 648, 662 and 669.
Corequisite(s): PT 663, PT 664, PT 665, PT 668, PT 690.
Term Typically Offered: Fall, Spring

This course, presented just prior to the final clinical internships, will review student's experiences in the curriculum and promote reflection on the professional practice of physical therapy. The course will review professional core values and expectations for clinical internships. The course will also review portfolio requirements to determine students' readiness to proceed into final internships. In addition, students will be expected to develop five year personal professional development plans.

Note: Open to Physical Therapy Majors only.

PT 689. Doctoral Project Proposal.  1 Unit
Corequisite(s): BIO 633, PT 600, PT 602, PT 604, PT 606, PT 608, PT 614, PT 618, PT 620, PT 622, PT 624, PT 625, PT 626, PT 630, PT 632, PT 634, PT 636, PT 638, PT 640, and PT 646
Corequisite(s): PT 627, PT 644, PT 645, PT 648, PT 662, and PT 669
Term Typically Offered: Spring only

The Doctoral Project Proposal must demonstrate students' understanding of the application of current evidence-based practice to physical therapist practice in a multicultural and complex health care environment. The case report proposal and oral defense are the final requirements for Advancement to Candidacy in the Doctor of Physical Therapy program. The 3000-word minimum case report completes the Writing Enriched Curriculum began in PT608 for fulfilling the Graduate Writing Assessment Requirement (GWAR) in the DPT program.

Note: Graduate Writing Intensive (GWI) course that is part of the Writing Enriched Curriculum (WEC) of the program; Open to Physical Therapy Majors only.

Credit/No Credit

PT 690. Doctoral Project/Culminating Experience.  3 Units
Prerequisite(s): BIO 633, PT 600, PT 602, PT 604, PT 606, PT 608, PT 614, PT 618, PT 620, PT 622, PT 624, PT 625, PT 626, PT 630, PT 632, PT 634, PT 636, PT 638, PT 640, PT 644, PT 645, PT 646, PT 648, PT 662, PT 663, PT 664, PT 665, PT 668, PT 669, and PT 695A
Term Typically Offered: Fall, Spring

The Doctoral Project/Culminating Experience may include evidence-based practice projects, clinical research projects, or case reports consistent with the Chancellor's Office Executive Order. Culminating events must demonstrate students' understandings of the application of current evidence-based practice in a multicultural and complex health care environment. They must be of sufficient rigor to ensure students' demonstrations of critical and independent thinking and abilities to interpret the research literature and apply to current physical therapist practice.
PT 695A. Clinical Experience I. 6 Units
**Prerequisite(s):** BIO 633, PT 600, 602, 604, 606, 608, 614, 618, 620, 622, 624, 625, 626, 627, 630, 632, 634, 636, 638, 640, 644, 645, 646, 648, 669 and 689.
**Term Typically Offered:** Fall, Spring, Summer

The first full-time clinical experience in the Doctor of Physical Therapy (DPT) program curriculum totals 12 weeks of clinical education in an assigned clinical setting under the direct supervision of a licensed physical therapist. Students improve and refine evaluation and treatment abilities developed during their first two academic years and integrate knowledge and skills in a selected variety of clinical settings.

**Note:** Open to Physical Therapy majors only who have successfully completed the first five semester of the DPT curriculum.

Credit/No Credit

PT 695B. Clinical Experience II. 6 Units
**Prerequisite(s):** BIO 633, PT 600, 602, 604, 606, 608, 614, 618, 620, 622, 624, 625, 626, 627, 630, 632, 634, 636, 638, 640, 644, 645, 646, 648, 669, 689, 663, 664, 665, 668, 690 and 695B.
**Term Typically Offered:** Fall, Spring, Summer

The second full-time clinical education experience in the Doctor of Physical Therapy (DPT) program curriculum totals 12 weeks of clinical education in an assigned clinical setting under the direct supervision of a licensed physical therapist. Students improve and refine patient management skills and abilities developed during their first seven semesters.

**Note:** Open to Physical Therapy majors only who have successfully completed the first seven semesters of the DPT curriculum.

Credit/No Credit

PT 695C. Clinical Experience III. 6 Units
**Prerequisite(s):** BIO 633, PT 600, 602, 604, 606, 608, 614, 618, 620, 622, 624, 625, 626, 627, 630, 632, 634, 636, 638, 640, 644, 645, 646, 648, 669, 689, 663, 664, 665, 668, 690, 695A, and 695B.
**Term Typically Offered:** Fall, Spring, Summer

The third full-time clinical education experience in the Doctor of Physical Therapy (DPT) program curriculum totals 12 weeks of clinical education in an assigned clinical setting under the direct supervision of a licensed physical therapist. Students improve and refine patient management skills and abilities developed during their first eight semesters.

**Notes:** Open to Physical Therapy majors only who have successfully completed the first eight semesters of the DPT curriculum.

Credit/No Credit

PT 695J. Graduate Physical Therapy Seminar IJ Adv. Biomechanics I. 2 Units
**Prerequisite(s):** BIO 633, PT 600, 602, PT 608, PT 630, PT 604, PT 606, PT 614, PT 618, PT 620, PT 622, PT 632, PT 634, PT 636, PT 638, PT 624, PT 625, PT 626, PT 640, and PT 646
**Corequisite(s):** PT 627, PT 644, PT 645, PT 648, PT 669, and PT 662

This elective is designed to prepare students to run a gait analysis clinic in the biomechanics laboratory. The course is one unit of lecture and one unit of lab, and covers the topics of assessment of balance, lower extremity strength assessment, special tests, and running analysis from both the research “gold standard” as well as the clinically feasible perspective with a particular focus on running.

**Note:** Fall semester only

Credit/No Credit

Doctor of Physical Therapy

Total units required for Doctorate: 104-113

Program Description

Physical Therapy at Sacramento State is one of several professional curricula in the College of Health and Human Services. The program complements others in the College and provides opportunities for scholarship, instructional collaboration, and interaction.

The doctoral curriculum of 3 years, including summers, encompasses didactic instruction, laboratory experience, and clinical education. The clinical component is thirty-six weeks of full-time, off-campus clinical internships.

Admission Requirements

To be eligible for admission consideration, students must meet the following criteria:

- Attain a baccalaureate degree from an accredited college or university prior to enrollment in the program;
- Eligible for admissions as a graduate student in good standing;
- Complete nine of the eleven prerequisite courses by the application deadline. The two remaining courses must be completed in the Spring and/or Summer semester (a maximum of one of these course may be completed during the summer);
- Complete a minimum 50 total Observation hours (work/volunteer experience) observing licensed physical therapists at work. Please check the PTCAS program page or the Departmental website to see the current application cycle requirements on inpatient and outpatient setting minimums, if any;
- Three letters of recommendation, one from a college professor and two from licensed physical therapists;
- GRE taken within five years of application.

Admission Procedures

Submit the following applications:

1. Physical Therapist Centralized Application Service (PTCAS) online application by the listed deadline;
2. CSU, Sacramento's Department of Physical Therapy (DPT) Supplemental Application, by the listed deadline.

Both applications are accessible via the department website. Following the initial screening, the top 100 applicants will be invited to interview and to submit a Cal State Apply application.

Applicants will submit the following requirements with their PTCAS application:

- Official transcripts from all colleges and universities that you have attended.
- Verification of completing a minimum 100 total hours of work/volunteer experience in at least one "Inpatient" and one "Outpatient" setting. Each setting must have at least twenty-five (25) hours of exposure. All PT experience hours must be completed and verified by the deadline.
- Three letters of recommendation, two from U.S. licensed physical therapists and one from a college professor.
• Graduate Record Examination (GRE) scores taken within five years of applying to the DPT program using code: 7588.
• Applicants who do not possess a baccalaureate degree from a post-secondary institution where English is a principal language must take the TEST of English as a Foreign Language (TOEFL). Submit TOEFL scores with your PTCAS application.
• Applicants who previously attended another professional entry-level physical therapy program must submit a letter from the director of the previous physical therapy program designating their academic standing (if applicable).

Admission is granted on a competitive basis. Meeting the admission requirements does not guarantee acceptance into the DPT program.

Selection Procedures
Application materials are reviewed by the DPT Admissions Committee. During the first screening applications are reviewed for the prerequisite coursework GPA, recommendation forms from two licensed physical therapists and one academic professional, GRE scores, volunteer hours, and additional background criteria. Based on the results of this first screening, the top applicants will be invited for a panel interview. The top thirty-two applicants along with alternates will be notified of their status within two weeks of the final interviews.

Additional Information
Health Requirements
Students admitted to the graduate program in the Department of Physical Therapy are required to have specified immunizations by the Student Health Center or a private physician prior to any clinical participation. Complete information on health requirements will be provided to incoming students.

Costs and Fees
In addition to University tuition and fees, students can be expected to incur costs of approximately $1,800 per year for books, and supplies. Students are required to assume responsibility for transportation and housing costs for clinical internships which may be anywhere in a contracted site in California.

Health Insurance, Transportation Schedules, CPR Certification, and Background Screens
All students accepted into the graduate program in the Department of Physical Therapy must provide their own health insurance and transportation to clinical facilities. Major medical health insurance is mandatory prior to beginning clinical experiences. CPR certification (Basic Adult and Pediatric for healthcare providers) must be maintained according to the requirements of the American Heart Association or American Red Cross. Students will be required to complete a criminal background check prior to clinical placements. A positive criminal history may limit or preclude student participation in the clinical courses.

Required Prerequisite Courses (41-42 units)
Prerequisite coursework must have been completed at an accredited college or university with a minimum grade of "C" or better.

Minimum Units and Grade Requirement for the Degree
Units Required for the DPT: 104-113

Minimum Cumulative GPA: 3.0; students must earn a grade of "B" in all courses taken in the Doctor of Physical Therapy Program.

Advancement to Candidacy
Each student must file an application for Advancement to Candidacy indicating a proposed program of graduate study. This procedure may begin as soon as the classified graduate student has:

• removed any deficiencies in admission requirements and achieved classified status;
• successfully completed all courses with a grade of "B" or higher in the first 4 terms with a minimum of 3.0 ("B") overall grade point average in all DPT graduate level coursework;
• passed (with a grade of "B" or higher) a Graduate Writing Intensive (GWI) course (PT 608) and
• passed the faculty candidacy assessment.

Public Health

Department of Public Health

Program Description

Students pursue a Public Health concentration leading to a degree with specialization and job skills applicable to one of three professional areas of study: community health; healthcare administration; or occupational health and safety. The faculty supports focused academic preparation in each concentration to prepare Public Health program graduates for success in their chosen professional field.

The field of Public Health includes a wide variety of agencies, professionals and programs that keep people healthy by encouraging healthy behaviors and creating conditions that support human health. Public Health has three primary aims: to Prevent injury and illness, Protect the health of the public, and Promote healthy behaviors, policies, institutions, and infrastructure. These aims are achieved using methods that embody the professional values of prevention, health equity, social justice, evidence-based science, and community problem-solving.

Students can expect to be involved, via classroom and field experiences, in areas that address significant issues within a selected concentration. Examples include health program planning, health communication strategies, community engagement, health care costs, quality improvement, organizational development, injury and illness prevention, health management, workplace safety, epidemiology, research methods, and many other topics related to modern Public Health practice.

Students interested in pursuing advanced degrees in the Public Health will find that the BS program provides an excellent foundation for graduate education, including a Master of Public Health or similar graduate program related to the concentration area.

The Public Health Bachelor of Science program at Sacramento State is a highly sought after degree. Due to the large number of applications, the program has pre-major requirements that must be met before admission to the major can be granted. Students wishing to become Public Health majors must complete a series of required lower division courses and submit an Eligibility Form that documents successful completion of the pre-major requirements in order to gain admission to the program. Check the Department website (https://www.csus.edu/college/health-
human-services/public-health/impaction.html) for requirements and recommended timing. It is highly recommended that interested students speak with the Public Health Academic Advisor in the CHHS Student Success Center.

**Degree Programs**

BS in Public Health (Community Health Education) (p. 753)

BS in Public Health (Health Care Administration) (p. 755)

BS in Public Health (Occupational Health and Safety) (p. 756)

Master of Public Health (p. 758)

Minor in Occupational Health and Safety (p. 760)

**Special Features**

- A key feature of the program involves the diversity of the field experiences available. Students may select from state, county, city, or local health and safety related agencies, hospitals, as well as any private voluntary not-for-profit agency. This on-site experience continues to be a valuable professional experience that may lead to employment.

- Employment opportunities can be identified in any of the school/community health/safety/health care related programs, as well as in the private sector. Employment opportunities often evolve from the networking that develops naturally from students’ field experiences.

- Because of the unique location of the University in the state capital, students majoring in Public Health benefit from professional health resources of numerous state and local health agencies that include, but are not limited to the Sacramento County Department of Health and Human Services, California State Departments of Health Services, Mental Health, Aging and Alcohol and Drug Abuse. A variety of health/safety related agencies provide opportunities for field work experiences, internships, part-time, and summertime employment.

- The faculty consists of experts with specialized preparation in the Public Health field. Our full-time faculty is augmented by the use of adjunct instructional staff selected from the above mentioned Public Health agencies.

**Career Possibilities**

Public Health comprises an enormous range of possible career pathways and areas of application. Below is a sample of the common Areas of Expertise and related job titles that program graduates could pursue (note that some options listed below may require training additional coupled with a degree in Public Health):

**Chronic Disease:** Health Educator, Health Program Director, Behavioral Scientist, Public Health Dentist

**Disaster Response:** Emergency Preparedness Specialist, U.S. Public Health Service Member

**Drug Safety:** Clinical Researcher, Pharmacist, Biostatistician, Regulatory Affairs Specialist

**Environmental Health:** Toxicologist, Hydrologist, Environmental Engineer, Hazardous Waste Inspector

**Food Safety & Nutrition:** Consumer Safety Officer, Food Scientist 

**Global Health:** Peace Corps Volunteer, Genetics Researcher, Entomologist, Translator, Ethnographer

**Health Administration:** Health Commissioner, Medical Director, Hospital Administrator

**Health Communication:** Journalist, Communications Director, Social Marketer 

**Health Disparities:** Minority Health Director, Patient Navigator, Community Organizer

**Health Education:** Health Teacher, Professor, Health Education Coordinator, Worksite Wellness Director

**Infectious Disease:** Epidemiologist, Medical Offer, Public Health Nurse, Public Health Veterinarian

**Maternal & Child Health:** Health Administrator, Home Visit Nurse, Community Health Worker, Nutritionist

**Mental Health:** Mental Health Researcher, Public Health Social Worker, Behavioral Health Coordinator

**Nonprofit Management:** Grant Writer, Development Director, Program Officer 

**Occupational Safety:** Industrial Hygienist, Occupational Safety Specialist, Sanitarian/Safety Inspector

**Public Health Policy & Law:** Policy Analyst, Health Economist, Public Health Attorney, Consumer Advocate

**Public Safety:** Injury Prevention Specialist, Emergency Medical Services Director, Forensic Pathologist

**Quality Improvement:** Program Evaluator, Informatics Specialist, Patient Safety Specialist, Health Facility Surveyor

**Faculty**

**PUBH 50. Healthy Lifestyles.** 3 Units

**General Education Area/Graduation Requirement:** Understanding Personal Development (E)

**Term Typically Offered:** Fall, Spring

Examines the concepts of: health and wellness; the determinants of health and wellness; and the concept of self-responsibility for health and wellness. These health and wellness concepts shall be applied to the areas of: mental wellness, nutrition, fitness, human sexuality, and drugs. The lecture/discussion format provides for a sharing of views regarding the integrated concepts of health that emphasizes the physical, mental, emotional, social, spiritual, and environmental factors that influence an individual’s health status.
PUBH 98. Health Science ProSeminar. 3 Units
Term Typically Offered: Fall, Spring

Potential and beginning Health Science students become oriented to the Health Science discipline. They will acquire and develop the knowledge and understanding needed to fulfill the Health Science major learning outcomes. Students will develop their individual learning plans designed to assure fulfillment of the Health Science major, General Education, and University graduation requirements.

PUBH 100. Fundamentals of Safety and Health. 3 Units
Prerequisite(s): must be a Public Health or a Fire Service Management major or minor to enroll in this class
Term Typically Offered: Fall, Spring

Explores global and national issues in occupational and non-occupational safety and health. Subjects include motor vehicle, consumer, workplace, fire, school, and home safety. Examines concepts and principles related to the cause, control, and mitigation of unintentional injuries and illnesses. Emphasizes the development, implementation, and integration of effective safety and health program strategies in the prevention and control of loss.

PUBH 106. Occupational Health. 3 Units
Prerequisite(s): Public Health majors or minors only, or instructor permission.
Term Typically Offered: Spring only

Concepts of occupational health as they pertain to appraising and controlling occupational health hazards, including occupational diseases, chemical, biological, and physical agents. Discusses techniques for the recognition, evaluation, prevention, and control or occupational health hazards.

PUBH 107. Occupational Safety. 3 Units
Prerequisite(s): Public Health majors or minors only, or instructor permission.
Term Typically Offered: Spring only

Examines common hazards and problems encountered in the workplace, including concepts and principles related to the control and mitigation of occupational safety hazards. Emphasizes the development, implementation, and integration of effective occupational safety and health program components.

PUBH 108. Occupational Health and Safety Laws and Regulations. 3 Units
Prerequisite(s): Public Health majors or minors only, or instructor permission.
Term Typically Offered: Fall only

Overview of regulatory agencies involved in occupational health and safety and their functions in the enforcement of regulation and/or compliance of safety laws. Special emphasis on Cal/OSHA. Other topics: application of surveillance, research, control technology, and trained personnel to maintain compliance. Recognizes that strategies to achieve a safe workplace includes an analysis of economic and employment impacts on the employer.

PUBH 109. Cause and Control of Occupational Loss. 3 Units
Prerequisite(s): Public Health majors or minors only, or instructor permission.
Term Typically Offered: Fall only

Study of the characteristics, causes, and control of occupational loss; influence of the work environment and system structure on incident outcomes; and analysis of occupational injuries and illnesses through the application of incident investigation and system safety techniques. Course will use occupational injuries and illnesses to focus on the process of problem identification and analysis, including the development and implementation of control measures.

PUBH 110. Issues in Occupational Health and Safety. 3 Units
Prerequisite(s): PUBH 100 or instructor permission
Term Typically Offered: Fall, Spring

Examines current and emerging issues in occupational health and safety, including historical, philosophical, and conceptual factors that serve as a basis for predicting, understanding, and resolving occupational health and safety issues. Examples include: Issues in high hazard industries, special populations at risk, emerging technologies, occupational hazards, and traumatic injuries.

PUBH 112. Disease Prevention. 3 Units
Prerequisite(s): Public Health majors or minors only, or instructor permission
Term Typically Offered: Fall, Spring

Surveys the current methods of promoting high level wellness through a preventive medicine approach for the promotion of more enjoyable and productive living. Attention directed toward the specific methods of promoting personal health through various current methodologies including the "holistic health" movement. Meets the needs of major students as well as those in allied fields such as nursing, social work and other interested students.

PUBH 114. Human Ecology and Health. 3 Units
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall, Spring, Summer

Emphasizes the social and natural environmental influences that have a direct impact upon the health of the individual. Primary consideration is directed to an analysis of health as influenced by a person's interaction with his/her environment.

PUBH 116. Public Health Policy, Management & Administration. 3 Units
Prerequisite(s): Must be a Public Health, Health Sciences, or Gerontology major or minor or admitted by permission of instructor
Term Typically Offered: Fall, Spring

In Public Health Policy, Management and Administration we will build an understanding of: how public health systems are structured and managed; how public health policy is shaped and implemented; and the reciprocal relationship between culture, context, and economics and public health policies and systems. We will compare and contrast public policies, systems and management at local, national, and global levels.
PUBH 117. Global Health.  3 Units  
**Prerequisite(s):** Public Health majors or minors only, or instructor permission  
**Term Typically Offered:** Fall, Spring  
Introduction to the globalization of public health and the critical health issues facing all citizens of the world, with special emphasis on health concerns of developing countries. Topics include global malnutrition, primary health care, maternal and child health, international environmental health, comparative health care systems, epidemiology and international health threats, and sustainable health and development programs undertaken by nongovernmental organizations.

PUBH 118. Introduction to Public Health.  3 Units  
**Prerequisite(s):** Must be a Public Health major or minor  
**Term Typically Offered:** Fall, Spring  
The course introduces students to a range of topics, issues, methods, approaches, and frameworks to help understand current public health issues, systems and areas of practice. This course explores the ways in which public health practice prevents harm and promotes and protects health and well-being of people, communities and their environments.

PUBH 119. Community Health Promotion.  3 Units  
**Prerequisite(s):** Must be a Public Health major or minor with a minimum "C" grade or better in PUBH 118 or have instructor permission  
**Term Typically Offered:** Fall, Spring  
In this course, we will explore the theoretical constructs of community, community building, community organizing and community-based participatory action research as levers to address social determinants of health to promote individual and community health and well-being. Emphasis on developing effective community health promotion materials, strategies and advocacy activities.

PUBH 122. Health Psychology.  3 Units  
**Prerequisite(s):** Must be a Public Health or Child Development major or minor  
**Term Typically Offered:** Fall, Spring  
Introduction to behavioral and social factors which influence health and illness. Explores the causes of premature death, the relationships between personality and health, and the development of health problems. Includes an overview of psychological principles in behavioral medicine, physiological foundations of health psychology, the role of emotions in immune function, and topical theories of, techniques for, and research on how psychology can help people live longer, healthier lives.

PUBH 124. Ethical Considerations in Public Health.  3 Units  
**Prerequisite(s):** WPJ score of 80 or above, or 3-unit placement in ENGL 109M/W; or 4-unit placement in ENGL 109M/W + co-enrollment in ENGL; or WPJ score of 70/71 + co-enrollment in ENGL 109X  
**General Education Area/Graduation Requirement:** Writing Intensive Graduation Requirement (WI)  
**Term Typically Offered:** Fall, Spring, Summer  
This course examines ethical issues related to public health practice, policy, and research. Questions of autonomy, liberty, individual rights, power, coercion, social justice, discrimination, stigma, community, paternalism, and the common good are the basis of ethical challenges in public health. Public health ethical considerations in health promotion, health policy, healthcare, and issues of safety where people work, live and play will be the focus both domestically and globally. Students will develop an analytical methodology to apply to public health work.  
**Note:** Students must be eligible to take a writing intensive course.

PUBH 130. Alcohol and Other Drugs.  3 Units  
**General Education Area/Graduation Requirement:** GE AREA D  
**Term Typically Offered:** Fall, Spring, Summer  
Various aspects of drug usage will be studied with emphasis on the role of health education in reducing abuse. This course is designed to explore contemporary issues related to alcohol and other drugs. The course will examine the physiological, psychological, social, and cultural impact of licit and illicit drugs.

PUBH 134. Understanding Human Sexuality.  3 Units  
**General Education Area/Graduation Requirement:** GE AREA D  
**Term Typically Offered:** Fall, Spring  
This course is designed to explore gender and social issues associated with human sexuality. The course will examine the impact of physiological, psychological, social, and cultural differences and similarities on the sexual health of diverse groups. The course will explore issues related to age, ability/disability, sexual identity, sexual myths, misconceptions, gender and gender expression.

PUBH 136. School Health Education.  2 Units  
**Prerequisite(s):** CPR training; may be taken concurrently.  
**Term Typically Offered:** Fall, Spring, Summer  
Provides teacher candidates, social workers, and nurses an understanding of the educational methods, processes, and content of the scope of health education as provided in the Framework for Health Instruction of the California State Department of Education. Offers an understanding of current problems related to personal, family and community health. General theories and organization for teaching health education will be discussed. Meets the requirement for teacher candidates under the SB2042.  
**Note:** Not open to lower division students.

PUBH 144. Community Health Planning and Evaluation.  3 Units  
**Prerequisite(s):** PUBH 118, PUBH 148; GWAR certification before Fall 09; or WPJ score of 80+; or 3-unit placement in ENGL 109M or ENGL 109W; or 4-unit placement in ENGL 109M or ENGL 109W and co-enrollment in ENGL 109X; or WPJ score 70 or 71 and co-enrollment in ENGL 109X; or instructor permission; restricted to Public Health majors and minors.  
**Term Typically Offered:** Fall, Spring  
Introduces students to the process and practice of program planning and evaluation. Examines the social and physical determinants of health, the impact of the community structure on health status; and, the influence of personal health behavior on community health education practice. These concepts shall be applied in the planning, implementation, and evaluation of health education services.

PUBH 147. Health Data Analysis.  3 Units  
**Prerequisite(s):** STAT 1, Public Health major or instructor permission.  
**Term Typically Offered:** Fall, Spring  
Introduction to methods and statistical practices used in the health sciences. Emphasis on the methods of collection, analysis, interpretation, and presentation of health data. Conceptual learning will be facilitated by sessions using computational software.
PUBH 148. Epidemiology. 3 Units
Prerequisite(s): STAT 1 or instructor permission; Public Health or Biological Sciences major or minor.
Term Typically Offered: Fall, Spring, Summer

Designed to offer cognitive insights into community health epidemiology. Provides understanding of the study of the distribution and determinants of communicable, infectious and chronic disease, and of injuries in the human population.

PUBH 150. Aging and Health. 3 Units
Prerequisite(s): Student must be admitted to the Public Health, Kinesiology, or Gerontology major or minor, or have instructor permission to enroll in this course.
Term Typically Offered: Fall, Spring

Designed to introduce students to the basic aging and health concerns of older people and to broader issues of aging, health and society. Examines the: demography of the aging population, biological theories of aging, social and psychological aspects of aging. Includes such issues as nutrition, drugs, exercise, sexuality, patterns of health services utilization, institutionalization, alternatives to the provision of long-term care in institutions, and dying.

PUBH 151. Introduction to the U.S. Healthcare System. 3 Units
Prerequisite(s): Student must be admitted to the Public Health major or minor, or have instructor permission to enroll in this course.
Term Typically Offered: Fall, Spring

This course presents an overview of the historical, structural, and operational aspects of the nation’s healthcare systems. Students will examine the factors that shape public policy regarding the allocation of health care resources and will gain an understanding of the relationship between healthcare costs, quality of care, and the access to health services. The influence of professional associations, medical technology, and social values in health reform initiatives is discussed.

PUBH 152. Healthcare Systems and Operations. 3 Units
Prerequisite(s): Public Health majors and minors only; or instructor permission
Term Typically Offered: Fall, Spring

Introduce students to a broad range of issues related to managing healthcare organizations. Students will explore areas such as organizational behavior and theory applied to healthcare organizations and the role of administrators in planning, organizing, and overseeing the delivery of healthcare services. Organizational principles and decision-making strategies are applied to functional areas of health administration including finance, human resources, performance improvement, strategic planning, and healthcare information systems.

PUBH 153. Administration of Healthcare Organizations. 3 Units
Prerequisite(s): Public Health majors only
Term Typically Offered: Fall, Spring

Introduction to the study of healthcare administration. Examines the broad field of healthcare administration. Topics include healthcare management, leading healthcare professionals, strategic planning in healthcare, healthcare budgeting and finance, healthcare insurance, healthcare marketing, healthcare information technology, healthcare ethics and law, and healthcare fraud and abuse.

PUBH 154. Healthcare Organizational Behavior. 3 Units
Prerequisite(s): Public Health majors only

The study of healthcare organizational behavior including individual and group dynamics in the context of healthcare settings. Examines the impact of organizational contexts on the behavior of individuals and groups in healthcare organizations. Topics include individual motivation, power and influence, leadership theory, stress in the workplace, decision-making, conflict and negotiation, group dynamics, and change planning in healthcare.

PUBH 155. Introduction to Healthcare Process Improvement. 3 Units
Prerequisite(s): Public Health majors only
Term Typically Offered: Fall, Spring

An exploration of the basic principles and techniques of process improvement in healthcare through a range of topics, including measurement of health care system performance to creating high-quality services that result in organizational improvement and customer satisfaction.

PUBH 195. Fieldwork - Health or Safety. 2 - 4 Units
Prerequisite(s): Permission of faculty advisor, program coordinator and Department chair.
Term Typically Offered: Fall, Spring, Summer

To obtain insights into the practical application of the classroom teachings, fieldwork experiences are required of those preparing for a career in community health education or other areas of health and safety studies.

Note: Submit an application for field work no later than the fourth week of the semester prior to taking HLSC 195. May be repeated once for credit.

Credit/No Credit

PUBH 196. Experimental Offerings in Health Science. 1 - 3 Units
Term Typically Offered: Fall, Spring

Undergraduate seminar designed to provide an in-depth examination and discussion of current topics in the area of personal and community health and safety.

PUBH 196A. Public Health International Study Abroad. 3 Units
Term Typically Offered: Summer only

Students experience a unique culture first-hand and through designed learning experiences, view a different society through the lens of health and wellbeing while expanding one's cultural awareness. Students will understand and compare the organization of different healthcare and the public health systems, and gain insight into how to bring positive change into the systems in which they work.

PUBH 199. Special Problems. 1 - 3 Units
Prerequisite(s): Permission of faculty under whom individual work will be conducted, program coordinator, and Department chair; PUBH 116, PUBH 118, PUBH 119, and PUBH 148 are strongly recommended.
Term Typically Offered: Fall, Spring

Note: Open only to HLSC majors and minors who appear competent to conduct independent work such as

Credit/No Credit
PUBH 201. Behavioral and Social Sciences in Public Health. 3 Units
Prerequisite(s): MPH major or instructor approval.
Term Typically Offered: Fall, Spring

Psychological and social concepts and models relevant to population health are reviewed and critiqued. The course will enable students to describe core theoretical perspectives from each of the social science disciplines of psychology, sociology, and anthropology. Students will learn how to select and apply appropriate social and behavioral models to the design of public health interventions and policies. The course will also cover the critical interrelationships among social determinants, environmental influences, behavioral risk factors, and health disparities.

PUBH 202. Ecological Determinants of Human Health. 3 Units
Term Typically Offered: Fall, Spring

This course will explore both natural and built environments and their impact and consequences on human health. It will examine the social, structural & political determinants affecting ecology, examining social & environmental justice. An emphasis will be placed on unintentional consequences of human interactions with respect to their physical environment. The course will examine current national and international issues in environmental health, including but not limited to anthropogenic climate change, biodiversity loss, ocean acidification, and carbon footprinting.

PUBH 203. Public Health Management and Leadership. 3 Units
Prerequisite(s): MPH major or instructor permission.
Term Typically Offered: Fall, Spring

This course examines the role of management and leadership practices in public health organizations and draws on theory to explore the role of public health leaders in planning, budgeting, staffing, and controlling performance. Students will explore relevant leadership topics such as organization development, employee motivation, and emotional intelligence. The nuances of leading in a government agency are also considered. These topics are set in the context of ethical management and leadership practices.

PUBH 204. Healthcare Systems, Structures, and Policies. 3 Units
Prerequisite(s): MPH major or instructor permission.
Term Typically Offered: Fall, Spring

This course explores health care systems from a macro perspective, including historical development, information technology, healthcare policy and resource allocation, the healthcare workforce, issues surrounding access to healthcare, prevention in healthcare, population health and medicine, various delivery models, and public health's partnership with healthcare. Comparisons are made between the US health care system and other nations in relation to costs and quality.

PUBH 207A. Health Research Methods and Analysis (A). 3 Units
Prerequisite(s): MPH major or instructor permission.
Term Typically Offered: Fall, Spring

Introduces students to the fundamentals of research methodology in applied epidemiology, biostatistics and evaluation research. Students learn quantitative, qualitative, mixed method and participatory approaches to research, as well as ethical behavior in conducting research. Through the mix of texts, articles from the public health literature and course work, students will build skills for conducting research and analysis across a variety of public health applications.

PUBH 207B. Health Research Methods and Analysis (B). 3 Units
Prerequisite(s): MPH major or instructor approval.
Term Typically Offered: Fall, Spring

Explores intermediate and advanced research methods in applied epidemiology, biostatistics and evaluation research. Students learn about tools for describing central tendency and variability in data, methods for performing inference on population parameters via sample data, statistical hypothesis testing and its application to group comparisons, issues of power and sample size in study design, and sampling techniques. Students will also examine common research methods used in program evaluation.

PUBH 220. Health Policy Analysis. 3 Units
Prerequisite(s): MPH major or instructor approval.
Term Typically Offered: Fall, Spring

Students develop strategies for the analysis of health policy issues and learn to communicate effectively in the policy environment. Students gain a local, state, and federal perspective on the historical and political context of health policy and its effects on public health and health care systems, with an emphasis on population health outcomes.

PUBH 221. Strategies for Community Engagement. 3 Units
Prerequisite(s): MPH major or instructor permission.
Term Typically Offered: Fall, Spring

Students master the concepts and practices of community engagement, including defining a community, developing community coalitions, forming multi-sector partnerships, social network theory, community-based participatory research, the community engagement continuum of impact, trust, and readiness, models of community change/intervention, community psychology, and community organizing. Students will apply these concepts in a culminating semester project that includes developing a community engagement strategy to address a health issue. Ethics in community engagement underlies the basic approach taken throughout the course.

PUBH 222. Methods of Health Promotion. 3 Units
Prerequisite(s): Master of Public Health major or instructor permission.
Term Typically Offered: Fall, Spring

This course explores theories of health communication, teaching and learning, marketing and advertising, and health behavior to prepare students to design effective health promotion interventions. Students will learn to utilize multiple methods of health promotion, including presentation planning, social marketing, material design, and mediated communication. This course also emphasizes the importance of public engagement and the development of effective communication with public health stakeholders including consumers, community groups, policy makers, health care providers, news media, and the general public.

PUBH 223. Leadership in Public Health Practice. 3 Units
Prerequisite(s): MPH major or instructor permission.
Term Typically Offered: Fall, Spring

Examines the role of leadership in public health practice at the program, agency, and community-organization level, with an emphasis on leading community health improvement efforts. Students become aware of their leadership style through assessment and experiential activities, while learning to adapt their approach to leading across multiple settings. Particular emphasis is placed on leading groups and teams in practice settings often encountered by public health professionals.
PUBH 224. Program Planning and Evaluation. 3 Units
Prerequisite(s): Master of Public Health majors or instructor permission.
Field trip.
Term Typically Offered: Fall, Spring
Covers the essential elements of planning, implementing, and evaluating a health promotion program. Aspects of the course include the application of health behavior theory and program planning models, consideration of the social and physical determinants of health, structural influences on personal health status, and the influences of social and health policy on communities.

PUBH 225. Topics in Public Health Seminar. 3 Units
Prerequisite(s): MPH major or instructor permission.
Term Typically Offered: Summer only
Introduces students to a variety of pressing issues impacting current public health practice and provides an opportunity to explore one or more of those issues in greater depth. Students conduct research using multiple sources on a variety of topics, present findings to the class, and create a solution-centered project with potential applications for practice.

PUBH 295. Public Health Practicum. 3 Units
Prerequisite(s): Master of Public Health major or instructor permission.
Term Typically Offered: Fall, Spring, Summer
Provides students with an in-depth, supervised experience in an applied practice setting. Students explore broad areas of public health practice and conduct supervised field research on a specific area of professional interest. Students further develop expertise in an area of interest by providing consultation and technical assistance to a project or organization engaged in public health work.

PUBH 500. Public Health Capstone. 3 Units
Prerequisite(s): MPH major or instructor permission.
Term Typically Offered: Fall, Spring
Guides students through a culminating experience in the Master of Public Health program. Seminars discuss and review the integration of core public health concepts and concentration competencies. Students create materials that demonstrate the analysis, synthesis, and intersection of course work, while demonstrating mastery of the broad field of public health.

BS in Public Health (Community Health Education)
Pre-Major Requirements
Freshman or transfer students interested in the Public Health Major are admitted as Pre-Major Public Health students.

To declare the Public Health major, all students are required to complete the following grade and course requirements and submit a Declaration of Major form to the Public Health Department along with transcript copies:

1. An overall GPA of 2.5 and be in good academic standing.
2. Completion of the Pre-Major Required Courses, as identified in the Program Requirements, with a "C" or better in each course. Only first or second attempts will be considered.
3. Completion of more than 45 units.

Additional Information
Repeat Policy: Health Science majors and minors can only repeat Health Science courses one time if they receive less than a "C." Students must meet with their academic advisor before petitioning the department to repeat the course. Refer to the Repeat Policy section of the Sacramento State Catalog for additional information.

Credit by Examination: A student who seeks course credit by examination is to enroll in the course to be challenged. No course may be challenged after the first two weeks of the semester. The instructor of the course will conduct an assessment of the student's readiness for the challenge for credit examination. Refer to Credit by Examination section of the Sacramento State Catalog.

Advising: It will be necessary to work very closely with an advisor to complete the BS degree in a timely manner. Therefore, the Health Science faculty strongly recommends that all Health Science students consult with an advisor prior to enrollment for any course. This procedure should be followed each semester.

Pre-Major Requirements
Freshman or transfer students interested in the Public Health Major are admitted as Pre-Major Public Health students.

To change to a Public Health major, all students are required to complete the follow grade and course requirements and submit a Declaration of Major form to the Public Health Department along with transcript copies:

1. An overall GPA of 2.5 and be in good academic standing.
2. Completion of the Pre-Major Required Courses with a "C" or better in each course. Only first or second attempts will be considered.
3. Completion of more than 45 units.

Additional Information
Repeat Policy: Public Health majors can only repeat Public Health courses one time if they receive less than a "C." Students must meet with their academic advisor before petitioning the department to repeat the course. Refer to the Repeat Policy section of the Sacramento State Catalog for additional information.

Credit by Examination: A student who seeks course credit by examination is to enroll in the course to be challenged. No course may be challenged after the first two weeks of the semester. The instructor of the course will conduct an assessment of the student's readiness for the challenge for credit examination. Refer to Credit by Examination section of the Sacramento State Catalog.

Advising: It will be necessary to work very closely with an advisor to complete the BS degree in a timely manner. Therefore, the Public Health faculty strongly recommends that all Public Health students consult with an advisor prior to enrollment for any course. This procedure should be followed each semester.

¹ To help you complete your degree in a timely manner and not take more units than absolutely necessary, there are ways to use single courses to meet more than one requirement (overlap). For further information, please visit the General Education page (p. 1103).

Note: There is no way to list all possible overlaps so please consult with a professional advisor. The Academic Advising Center can be visited online (http://www.csus.edu/acad/), by phone (916) 278-1000, or email (advising@csus.edu).

2 Required in Major; also satisfies GE.
If not satisfied before entering Sacramento State, it may be satisfied in General Education Area C2 (Humanities). "C- or better required." The alternative methods for satisfying the Foreign Language Proficiency Requirement are described here: https://www.csus.edu/college/arts-letters/world-languages-literatures/foreign-language-requirement.html

Note: Students with a declared major of BS in Public Health (Occupational Health and Safety), BS in Public Health (Health Care Administration), or BS in Public Health (Community Health Education) are exempt from the Foreign Language Graduation Requirement.

BS in Public Health (Health Care Administration)

Units required for Major: 58-63
Total units required for BS: 120

Program Description

The academic area of study in Public Health is part of the College of Health and Human Services. Students pursue a Public Health concentration leading to a degree with specialization and job skills applicable to one of three professional areas of study: community health, healthcare administration, or occupational health and safety. The faculty supports the idea of focused academic preparation in each concentration such that Public Health BS graduates will have job appeal in their chosen professional field.

Students can expect to be involved, both in class and field experiences, in areas that deal with significant issues within general Public Health practice and within each concentration, such as health care costs and quality, consumer health issues, alcohol and other drugs, human sexuality, health promotion, health management and administration, unintentional injury causes and prevention, and other personal, occupational, and community health and safety issues.

The Public Health Bachelor of Science program at Sacramento State is a highly sought-after degree. Due to the large number of applications, the program has a pre-major status. Students wishing to become Public Health majors must complete a series of required lower division courses in order to be eligible to declare the major. Students should check the Department website (https://www.csus.edu/college/health-human-services/public-health/) for requirements and speak with the Public Health academic advisor to help with their academic plans.

Note: Students graduating with a BS in Public Health (all concentrations) will not be subject to the University’s Foreign Language Graduation Requirement. Students who change major may be subject to the University’s Foreign Language Graduation Requirement.

Pre-Major Requirements

Freshman or transfer students interested in the Public Health Major are admitted as Pre-Major Public Health students.

To change to a Public Health major, all students are required to complete the follow grade and course requirements and submit a Declaration of Major form to the Public Health Department along with transcript copies:

1. An overall GPA of 2.5 and be in good academic standing.
2. Completion of the Pre-Major Required Courses with a "C" or better in each course. Only first or second attempts will be considered.
3. Completion of more than 45 units.

Additional Information

Repeat Policy: Public Health majors can only repeat Public Health courses one time if they receive less than a "C." Students must meet with their academic advisor before petitioning the department to repeat the course. Refer to the Repeat Policy section of the Sacramento State Catalog for additional information.

Credit by Examination: A student who seeks course credit by examination is to enroll in the course to be challenged. No course may be challenged after the first two weeks of the semester. The instructor of the course will conduct an assessment of the student's readiness for the challenge for credit examination. Refer to Credit by Examination section of the Sacramento State Catalog.

Advising: It will be necessary to work very closely with an advisor to complete the BS degree in a timely manner. Therefore, the Public Health faculty strongly recommends that all Public Health students consult with an advisor prior to enrollment for any course. This procedure should be followed each semester.

**Program Description**

The academic area of study in Public Health is part of the College of Health and Human Services. Students pursue a Public Health concentration leading to a degree with specialization and job skills applicable to one of three professional areas of study: community health, healthcare administration, or occupational health and safety. The faculty supports the idea of focused academic preparation in each concentration such that Public Health BS graduates will have job appeal in their chosen professional field.

Students can expect to be involved, both in class and field experiences, in areas that deal with significant issues within general Public Health practice and within each concentration, such as health care costs and quality, consumer health issues, alcohol and other drugs, human sexuality, health promotion, health management and administration, unintentional injury causes and prevention, and other personal, occupational, and community health and safety issues.

The Public Health Bachelor of Science program at Sacramento State is a highly sought-after degree. Due to the large number of applications, the program has a pre-major status. Students wishing to become Public Health majors must complete a series of required lower division courses in order to be declared major. Students should check the Department website (https://www.csus.edu/college/health-human-services/public-health/) for requirements and speak with the Public Health academic advisor to help with their academic plans.

**Pre-Major Requirements**

Freshman or transfer students interested in the Public Health Major are admitted as Pre-Major Public Health students.

To change to a Public Health major, all students are required to complete the follow grade and course requirements and submit a Declaration of Major form to the Public Health Department along with transcript copies:

1. An overall GPA of 2.5 and be in good academic standing.
2. Completion of the Pre-Major Required Courses with a "C" or better in each course. Only first or second attempts will be considered.
3. Completion of more than 45 units.

**Additional Information**

**Repeat Policy:** Public Health majors can only repeat Public Health courses one time if they receive less than a "C." Students must meet with their academic advisor before petitioning the department to repeat the course. Refer to the Repeat Policy section of the Sacramento State Catalog for additional information.

**Credit by Examination:** A student who seeks course credit by examination is to enroll in the course to be challenged. No course may be challenged after the first two weeks of the semester. The instructor of the course will conduct an assessment of the student’s readiness for the challenge for credit examination. Refer to Credit by Examination section of the Sacramento State Catalog.

**Advising:** It will be necessary to work very closely with an advisor to complete the BS degree in a timely manner. Therefore, the Public Health faculty strongly recommends that all Public Health students consult with an advisor prior to enrollment for any course. This procedure should be followed each semester.

1 To help you complete your degree in a timely manner and not take more units than absolutely necessary, there are ways to use single courses to meet more than one requirement (overlap). For further information, please visit the General Education page (p. 1103).

2 Required in Major; also satisfies GE.

3 Department offers students a "select from the following option":

- If student chooses to take ENVS 165, they will meet upper division Area D.

Master of Public Health

Total units required for MPH: 42

Program Description

Sacramento State offers a Master of Public Health (MPH) degree with a concentration in Health Promotion, Policy, and Leadership. The MPH degree is offered in a hybrid format to students who are working professionals, providing flexibility to complete the degree in two years (five consecutive semesters). The MPH consists of 42 units incorporating the foundational concepts and competencies of public health as identified by the Council on Education for Public Health (CEPH). The program focuses on preparing public health professionals to develop effective strategies for preventing illness and disease within diverse communities, while increasing the student’s capability in conducting health policy analysis and development. The program is offered in a cohort format to help facilitate teamwork and learning. The program also includes a residency program with three intensive residencies at program start, middle and end. The residency program focuses on leadership development and creating strong personal connections between students, and between students and faculty.

The MPH program has a practice-oriented approach, emphasizing community-based training in coursework. The program's mission is to prepare public health leaders and practitioners to promote, protect, and advocate for the health and well-being of diverse communities at the local, state and global levels. This mission is achieved through the following coordinated efforts: offering core public health content through applied experiences which develop passionate, informed, and practice-based public health professionals; fostering faculty and student engagement in scholarly activities that contribute to the theory and practice of public health using evidence-based applications; and establishing connections between faculty, students and community partners to address public health problems among diverse populations.
Admission Requirements
To be considered for admission to the Master of Public Health program, applicants must meet the minimum qualifications:

- a completed baccalaureate degree from an accredited college or university;
- a minimum GPA of 3.0 from the last undergraduate or graduate degree completed;
- 2 years of full-time, professional work experience in public health or a related field is preferred.

Domestic applicants with foreign documents and international students (F-1 or J-1 visa applicants) must consult the Office of Graduate Studies (http://www.csus.edu/gradstudies/) and International Programs & Global Engagement (http://www.csus.edu/ipge/international-admissions/) for specific application instructions. These students must also submit TOEFL scores; for more information, please visit the Office of Graduate Studies website (http://www.csus.edu/gradstudies/).

Applicants must submit the following requirement documents to be considered for admissions:

- Completed CalStateApply application;
- MPH Supplemental Application Form;
- Official transcripts from all higher education (unofficial transcripts may be submitted with the application, but official transcripts must be received before matriculation);
- A professional resume or CV;
- Personal statement (essay).

Minimum Units and Grade Requirements
Units required for the MPH: 42

Minimum cumulative GPA: 3.0

Policies and Procedures
- A student must maintain a minimum of a 3.0 GPA in the graduate coursework. Only courses approved by the Program of Study will count toward the MPH degree. It is expected that all courses will be passed with a grade of B or higher in order to count toward the MPH degree. Courses with a grade of C are permitted, as long as the overall GPA is above a 3.00 for the semester, and the course grade of a C is not earned in any course prior to Advancement to Candidacy.
- Students failing to maintain a GPA of 3.0 are automatically placed on academic probation. Students placed on academic probation must meet with the Program Director to discuss steps the student must take to remediate coursework or to address the deficiencies identified by the course instructor.
- MPH program policy related to violations of student conduct, which includes cheating and/or plagiarism is as follows: the first incident of academic dishonesty in the program will result in a zero for the assignment; the second such incident in the program will result in a failing grade for the course; the third such incident in the program will result in dismissal from the MPH program.
- Students must complete the program within 7 years of enrollment in the first MPH program course.

Advancement to Candidacy
Each student must file an application for Advancement to Candidacy for the master’s degree indicating the proposed program of graduate study. This procedure should begin as soon as the classified graduate student has:

- removed any deficiencies in admissions requirements;
- completed at least 17 units in the graduate program with a minimum 3.0 GPA; and
- taken a Graduate Writing Intensive (GWI) course in their discipline within the first two semesters of coursework at California State University, Sacramento.

Advancement to Candidacy forms are available on the Office of Graduate Studies website (http://www.csus.edu/gradstudies/forms/). Students will complete the form after planning a degree program in consultation with the Graduate Coordinator. The completed form should then be returned to the Office of Graduate Studies for approval.

Capstone Project
The program requires that all students complete a culminating experience, called the Public Health Capstone Project, during the last semester before graduation. The goal of the Capstone Project is to assess each student’s (i) mastery of public health concepts and skills, and (ii) ability to integrate and apply these concepts and skills in practice.

PUBH 500 (https://catalog.csus.edu/search/?P=PUBH%20500) is designed to provide a degree of flexibility, such that students can select from the list of program Learning Outcomes in consultation with the instructor. Achievement of these learning outcomes will be documented in the written Capstone Project and certified by the instructor.

To meet these requirements, students choose a public health problem to solve that reflects current health concerns within a specified population.
Students will analyze the problem using applied research and propose a feasible solution that reflects the capabilities of a public health organization. Student products will demonstrate a thorough grasp of the concepts, background, and tools necessary to address the issue through health promotion planning, policy development, leadership, and community engagement.

Residency Sessions

MPH Students are also required to attend three multi-day intensive residency sessions during the program. These sessions are designed to immerse students in leadership development, foster community connections, and facilitate cohesion across cohorts.

Minor in Occupational Health and Safety

Units required for the Minor: 18, all of which must be Public Health courses. There are 12 units of required upper division courses and 6 units of upper division electives.

Program Description

Students can expect to be involved in areas that deal with significant issues within the public health pertaining to occupational health and safety, such as occupational diseases, biological, and physical agents; control, mitigation and management of health and safety hazards; laws and regulations; unintentional injury causes and prevention; analysis and investigation of occupational injuries and illness; and other personal, occupational, and community health and safety issues. The curriculum emphasizes the interdisciplinary nature of occupational health and safety.

The Occupational Health and Safety Minor requirements are achievable and relevant to all disciplines, especially sciences, engineering, environmental studies, health and business. Undergraduate students in any discipline can choose this minor as part of their curriculum. This minor will help students prepare for jobs in various settings such as state and federal agencies, hospitals, manufacturing, construction, insurance, automotive industry, and warehouses, typically in roles such as occupational health and safety specialists, safety managers, safety engineers, EHS specialist, industrial hygienist, safety inspectors and insurance specialists. It will also prepare them for higher studies and research in the area of occupational health and safety.

Admission Requirements

Students need to have an overall GPA of 2.5 or more and be in good academic standing to declare the Minor in Occupational Health and Safety.

Minimum Grade Requirement

All Public Health courses must be completed with a "C" grade or better.

Recreation, Parks, and Tourism Administration

College of Health and Human Services

Program Description

The Department of Recreation, Parks and Tourism Administration offers three separate Bachelor of Science degrees, a Master of Science degree, and several Minor and Certificate programs. The department's programs provide students with the skills to manage people, programs, and events in a variety of recreational settings that include city parks and recreation programs, state and national parks, hotels, playgrounds, forests, beaches, health clubs, tourism destinations, recreational therapy programs, and non-profit community centers. Students will also gain an understanding of professional advocacy, ethics, inclusion, and current evaluation procedures applicable in a variety of employment settings.

RPTA students and graduates will find a wide range of internship and job opportunities with public and private agencies in the Greater Sacramento Region, the State of California, and throughout the United States.

Degree Programs

BS in Recreation Administration (p. 772)

BS in Recreation Therapy (p. 774)

BS in Hospitality and Tourism Management (p. 771)

Minor in Non-Profit Management (p. 777)

Minor in Recreation Management (p. 778)

Certificate in Event Planning (p. 775)

Certificate in Natural Resources Administration (p. 776)

Certificate in Non-Profit Administration (p. 776)

Certificate in Outdoor Adventure Administration (p. 776)

MS in Recreation Administration (p. 779)

Accreditation

In addition to California State University, Sacramento’s full accreditation by the Western Association of Schools and Colleges, the Bachelor of Science in Recreation Administration and the Bachelor of Science in Recreation Therapy are also individually accredited by Council on Accreditation of Parks, Recreation, Tourism and Related Professions (COAPRT).
Notice to Students RE: Professional Licensure and Certification
California State University programs for professions that require licensure or certification are intended to prepare the student for California licensure and certification requirements. Admission into programs for professions that require licensure and certification does not guarantee that students will obtain a license or certificate. Licensure and certification requirements are set by agencies that are not controlled by or affiliated with the California State University and licensure and certification requirements can change at any time.

The California State University has not determined whether its programs meet other states’ educational or professional requirements for licensure and certification. Students planning to pursue licensure or certification in other states are responsible for determining whether, if they complete a California State University program, they will meet their state’s requirements for licensure or certification. This disclosure is made pursuant to 34 CFR §668.43(a)(5)(v)(C).

Special Features and Fast Facts
• The Sacramento area provides a wide variety of resources to supplement the formal classroom education of students enrolled in the concentrations offered by the Department.
• Sacramento County, the City of Sacramento, and a variety of smaller cities and special districts have numerous park and recreation programs, and facilities.
• The State Capitol offers opportunities to observe state government in operation and numerous state and federal agencies have central or regional offices within the urban area.
• Faculty and students work closely with a variety of natural resource agencies that include: California State Parks, the U.S. Forest Service, Bureau of Land Management, and the National Park Service.
• Students completing necessary coursework in the Recreation Therapy and Recreation and Park Management Concentrations are eligible for both state and national certifications (e.g. CTRS, MPI, CHA, and CPRP).
• California has more National Parks than any other state in the country.
• Both clinical and community based recreation therapy programs provide services to a variety of special populations.
• Leisure businesses of all types abound in the immediate area, and in the Sierra Nevada and California Coastal regions within a 90 mile radius of the campus.
• California is one of the world’s most-visited tourism destinations, and Sacramento provides access to the Central Valley, the mountains, the coast, wine country, and numerous adventure recreation and recreational sporting opportunities.
• The RPTA program at Sacramento State is the oldest COAPRT accredited program in Recreation Administration in California.

Career Possibilities
Recreation Therapist · Recreation Administrator · Event Planner · Conference Center Manager · Campus Recreation Facilities Manager · Recreation Program Planner · Intramural Sports Coordinator · Environmental Interpreter · Hotel Manager · Park Manager · Park Ranger · Outdoor Recreation Specialist · Camp Supervisor · Recreation Resources Manager · Community Center Director · ADA/Inclusion Consultant · Employee Recreation Manager · Fitness Club Manager · Vacation Resort Manager · Ski Resort Manager · Water Park Manager · Amusement Park Manager · Entertainment Facility Manager · Leisure Products · Resort Sales Representative · Recreation Specialist · Recreation Supervisor · Leisure Educator

RPTA 1. Orientation to Recreation, Parks and Tourism Administration. 1 Unit
Term Typically Offered: Spring, Summer
Introduction to the RPTA major with an emphasis on degree options, major advising, referrals to GE for general advising, information about the RPTA undergraduate student association, other local, statewide and national professional associations, scholarship opportunities, the 600-hour volunteer/paid placement prior to the internship, an overview of the internship process. Credit/No Credit
RPTA 21. First Year Seminar: Becoming an Educated Person. 3 Units
General Education Area/Graduation Requirement: Understanding Personal Development (E)
Term Typically Offered: Fall only
A first-year seminar intended to provide students with an introduction to the meaning of higher education, resources of the University, and skills for lifelong learning. This course is designed to help students develop academic success strategies and to improve information literacy, intercultural competence, and integrative thinking. The seminar also provides students with the opportunity to interact with fellow students and seminar faculty to build a community of academic and personal support.

RPTA 22. Happiness, Quality of Life, and Recreation Over the Lifespan. 3 Units
General Education Area/Graduation Requirement: Understanding Personal Development (E)
Term Typically Offered: Fall, Spring
This course focuses on the interrelationship between happiness, positive leisure, recreation, one's personal growth and development, and quality of life. Emphasis is placed on the interplay between psychological, physical, and social factors that affect one's development and lifestyle choices. The course offers a survey of philosophical and scientific concepts linked to happiness and well-being as pertains to important components of the life experience ranging from conception to the end of life.

RPTA 30. Recreation, Parks and Tourism in Contemporary Society. 3 Units
Term Typically Offered: Fall, Spring
Orientation to the nature, scope and significance of the recreation, park and tourism in today's world. Analyzes philosophical and related elements essential to the effective delivery of leisure services, including the role of affective, cognitive and social motivations and outcomes.

RPTA 32. Leadership and Group Development. 3 Units
General Education Area/Graduation Requirement: Understanding Personal Development (E)
Term Typically Offered: Fall, Spring
The purpose of this course is for students to develop an understanding of the theory and practice of leadership in various recreational organizational settings. The course will allow students the opportunity to develop leadership skills through lectures, self-assessments, experiential exercises, class discussions and case studies. Students are exposed to diverse theories and perspectives on leadership and are encouraged to apply critical thinking skills to develop their own working philosophy of the leadership that will serve them in their career contexts.

RPTA 33. Race, Class Gender and Leisure. 3 Units
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall, Spring
Examination of the role of leisure in the social construction of markers of identity across gender, race, class, sexuality and disability; and leisure's role in the construction of institutional oppressions such as racism, sexism, homophobia and discrimination based on class and disability.

RPTA 34. The Outdoor Recreation Experience. 3 Units
General Education Area/Graduation Requirement: Understanding Personal Development (E)
Term Typically Offered: Fall, Spring
Encourages the student to identify and demonstrate an understanding of the value, meaning and benefits of outdoor recreation experiences and to explore a variety of outdoor adventure experiences. Outing skills such as trip planning, meal preparation, camp selection and set-up, equipment and clothing, map and compass, hygiene and first aid will be discussed and practiced. Students will also develop an awareness of and appreciation for minimum impact wilderness travel techniques and environmental responsibility and ethics.

RPTA 42. Recreation and Parks: Natural, Cultural, and Heritage Resources. 3 Units
Term Typically Offered: Fall, Spring
Examines the use of natural, cultural, and heritage resources for recreation, tourism and leisure purposes in a variety of settings and under the auspices of various agencies. Includes study of various protected areas and facilities, including parks, forests, museums, and cultural sites and how they are influenced by social trends, conflicting use demands, agency responsibilities, environmental considerations, and fiscal implications.

RPTA 50. Introduction to Rock Climbing. 1 Unit
Term Typically Offered: Fall, Spring
Designed to provide students with the basic knowledge, skills, and techniques of modern rock climbing. Students will learn skills pertaining to indoor top-roping and lead climbing, indoor and outdoor bouldering, and outdoor sport climbing. Students will also learn and discuss outdoor ethics and environmental impact in relation to rock climbing.

RPTA 60. Budgeting for Recreation Services. 3 Units
Prerequisite(s): RPTA major and minors only, or instructor permission.
Term Typically Offered: Fall only
Introduces students to budget topics in Recreation, Parks, and Tourism, through the use of theoretical readings, case studies, and a series of professional speakers. Students will gain a broad understanding of the planning and implementation of the budget process for a leisure service agency, primarily those that are non-profit or tax-supported.
Note: Only one of RPTA 60 or RPTA 61 may be counted for credit

RPTA 61. Cost Management for Hospitality. 3 Units
Prerequisite(s): RPTA major and minors only, or instructor permission.
Term Typically Offered: Spring only
Introduces students to a broad range of topics related to cost management in hospitality, and teaches students to analyze numerical data for decision-making in hospitality operations. Considers systems, techniques, information types, and presentational forms commonly used by hospitality managers. Additional topics include, financial statements and ratio analysis, various pricing methods, types of costs in hospitality and service industries, cost-volume-profit techniques, and the application of standard cost controls used in hospitality.
Note: Only one of RPTA 60 or RPTA 61 may be counted for credit
RPTA 62. Introduction to Recreation Law. 3 Units
Prerequisite(s): RPTA majors and minors only, or instructor permission.
Term Typically Offered: Fall, Spring

Introduces students to legal topics and regulations in Recreation, Parks and Tourism industries. Students are given a practical knowledge of the law, operation of the legal system, contracts, and legal applications to agency management, human rights and personnel. Course uses text book readings, case law from actual published decisions in the field of Recreation law, courtroom visitations, and professional speakers.

RPTA 80. Introduction to Hospitality and Tourism. 3 Units
Term Typically Offered: Fall only

Hospitality and tourism are vitally important to California’s image and economy, and these two related industries are among the world’s top employment providers. This course provides an introductory overview of the broad hospitality and tourism industries, covering several topics, including growth and development, trends and current concerns, and professional employment sectors.

RPTA 82. Introduction to Hospitality and Tourism Law. 3 Units
Term Typically Offered: Fall, Spring

This course provides insight into the laws and regulations governing the hospitality and tourism industries with an emphasis on labor relations and human resources best practices. The course addresses the general concepts of tort, contracts, liability, risk management, employment practices, licensing, and insurance needs. The course also explores the legal issues that today’s industry professionals face such as privacy, labor laws, the common law system for innkeepers and newer hospitality products in the shared economy such as AirBnB or VRBO. Field Trip(s). Field trip(s) may be required.

RPTA 84. Hotel and Lodging Operations. 3 Units
Term Typically Offered: Fall, Spring

This course is designed to provide knowledge of hotel and lodging operations. Students will acquire an understanding of how a variety of lodging types, specifically hotels, operate by detailed examination of the departments common to most lodging properties, including the front office, sales and marketing, housekeeping, maintenance, and others. Additionally, topics relevant to operations like green initiatives and revenue optimization will be discussed in this course. Field Trip(s). Field trip(s) may be required.

RPTA 100. Recreation and Leisure Lifestyle Development. 3 Units
Term Typically Offered: Fall, Spring

Broad general overview of the recreation and leisure movement followed by a specific examination of changing leisure lifestyles and their impact on the individual’s choice of recreation and leisure patterns. Also examine the impact that the choice of leisure lifestyles has on other aspects of the individual’s life as well as the negative effects of restrictive or inadequate leisure involvement.

RPTA 101. Senior Seminar. 1 Unit
Prerequisite(s): RPTA 1 and senior status
Term Typically Offered: Fall, Spring, Summer

Students will focus on identifying potential internships, refining resumes and writing cover letters for securing internships. Students will also complete the RPTA Department Exit Exam.
Credit/No Credit

RPTA 102. Recreation Therapy Professional Practice. 1 Unit
Prerequisite(s): RPTA 1, RPTA 106, RPTA 115, RPTA 116, RPTA 117, RPTA 118 and senior level.
Corequisite(s): RPTA 115, RPTA 116, and/or RPTA 118 may be taken concurrently.
Term Typically Offered: Fall, Spring

This senior level course is intended to build upon a student’s previous coursework in recreation therapy, and link the theoretical foundation with day-to-day practical applications. Students will fine-tune skills and interests in recreation therapy, learn methods for effective networking, and develop interviewing techniques in order to identify appropriate internships and employment opportunities.

RPTA 105. Management in Recreation, Parks and Tourism. 3 Units
Prerequisite(s): RPTA 30 or instructor permission
Term Typically Offered: Fall or Spring

Analyzes the functions of managers including planning, organizing, staffing, leading and controlling. Also examines basic principles, techniques and tools associated with these functions. Consideration of internal and external environments which influence the managerial process and the manager’s role in various areas of enterprise activity.

RPTA 106. Introduction to Inclusive Recreation and Recreation Therapy. 3 Units
Prerequisite(s): RPTA majors or minors or HLSC majors or minors only, or instructor permission.
Term Typically Offered: Fall, Spring, Summer

Addresses the etiology and nature of common disabling conditions and examines issues of leisure participation and inclusion for underrepresented populations. Topics include: attitudinal barriers, advocacy, normalization, universal design, activity analysis and modification, and legislation. Emphasis on leadership, supervision and organizational development of inclusive and recreation therapy programs.

RPTA 110. Research and Evaluation in Recreation, Parks and Tourism. 3 Units
Prerequisite(s): RPTA 1 and RPTA 30.
Term Typically Offered: Fall, Spring

Provides students with tools to analyze leisure behavior, interests and the motivational basis of leisure as they apply to the field of recreation and leisure services. Emphasizes applied research techniques including qualitative, descriptive and analytical methods, and program evaluation.

RPTA 115. Recreation Therapy Assessment and Documentation. 3 Units
Prerequisite(s): CHDV 30, PSYC 168, RPTA 30, RPTA 106 and RPTA 117, or instructor permission.
Term Typically Offered: Fall, Spring

Assessment procedures and instruments used to assure competence in assessment of client function in leisure. Documentation, assessment, regulations in different settings (i.e., community hospital, and clinical settings), protocols and development of individual treatment plans. Students are exposed to the Recreation Therapy process (APIE) in a variety of clinical and community settings.
RPTA 116. Recreation Therapy Principles and Practices and the Recreation Therapy Process.  3 Units
Prerequisite(s): CHDV 30, RPTA 30, RPTA 106 and RPTA 117; or instructor permission. RPTA 117 may be taken concurrently.
Term Typically Offered: Fall, Spring

Philosophy and principles underlying the work performed by the recreation therapist are studied including assessment, individual program planning, interpersonal interaction skills, and working with families.

RPTA 117. Recreation Therapy and Contemporary Aspects of Disability.  3 Units
Prerequisite(s): RPTA 106; RPTA 106 may be taken concurrently.
Term Typically Offered: Fall, Spring

In-depth exploration of a variety of disabilities and diseases, including physical disabilities, developmental disabilities, intellectual disabilities, mental health, hearing and vision impairments, and disabilities related to aging. Content will focus on etiology, prognosis, symptomatic conditions, prescription drugs, and recreation therapy interventions. Medical terminology will be covered.

RPTA 118. Recreation Therapy Facilitation Techniques.  3 Units
Prerequisite(s): CHDV 30, PSYC 168, RPTA 30, RPTA 106 and RPTA 117; or instructor permission.
Term Typically Offered: Fall, Spring

Covers basic concepts, methods and techniques associated with the practice of recreation therapy. Students will understand and apply the recreation therapy process through intervention and facilitation methods that are critical to helping clients in health and human service settings. The goal is to assist students in developing the ability to use recreation, leisure and play in recreation therapy programs as interventions in the treatment process.

RPTA 119. Recreation Therapy Management and Advancement of the Profession.  3 Units
Prerequisite(s): BIO 25, CHDV 30, PSYC 168, RPTA 105, RPTA 106, RPTA 115, RPTA 116, RPTA 117 and RPTA 118; or instructor permission.
Term Typically Offered: Fall, Spring

Examination of existing recreation programs in clinical settings (acute care hospitals, rehabilitation centers, state hospitals, skilled nursing facilities, intermediate care facilities, etc.); review of standards and regulations pertaining to recreation programs, development of recreation therapy programs, review of the roles of practitioners in related disciplines. Review of intervention techniques, program organization, management, and advancement of the profession and professional ethics.

RPTA 120. Leisure Education.  3 Units
Prerequisite(s): RPTA 106.
Term Typically Offered: Fall, Spring

History, scope and process of leisure education. A survey of guidance theories and procedures, including assessment techniques, program development, implementation and evaluations. The role of leisure education in diverse leisure delivery systems and with diverse populations. Legal, ethical, and professional aspects of leisure education.

RPTA 121. Innovations in Recreation for Health and Wellness.  3 Units
Term Typically Offered: Fall, Spring

This course provides an introduction to the outcomes and benefits of engagement in recreation, parks, and tourism activities. Examines how play, recreation, and engagement in nature, travel, and social activities contribute to enhancing the health and wellness of individuals and society. Innovative trends and issues will be explored from a holistic health perspective looking at quality of life.

RPTA 122. Perspectives On Leisure.  3 Units
Prerequisite(s): GWAR certification before Fall 09; or WPJ score of 80+; or 3-unit placement in ENGL 109M or ENGL 109W; or 4-unit placement in ENGL 109M or ENGL 109W and co-enrollment in ENGL 109X; or WPJ score 70 or 71 and co-enrollment in ENGL 109X.
General Education Area/Graduation Requirement: Understanding Personal Development (E), Writing Intensive Graduation Requirement (WI)
Term Typically Offered: Fall, Spring, Summer

Basic philosophical, historical, psychological and scientific foundations and developments in leisure and recreation theory; review of the cultural forces, institutions and theories that affect individuals and society.

RPTA 124. The Science of Nature Engagement and Human Health & Wellbeing.  3 Units
General Education Area/Graduation Requirement: Further Studies in Area B (BS)
Term Typically Offered: Fall, Spring

This course examines contemporary and emerging research evidence on human health and wellbeing impacts from nature engagement. It is anecdotally understood that spending leisure time outdoors is beneficial, but public understanding of the science behind this phenomenon is lacking. Areas of scientific literature covered include relevant scientific theories, validity of evidence-based forms of nature engagement, and mechanistic pathways of benefits. Analyzes the scientific research methodologies utilized globally and impacts on equity issues for different population groups access to nature-based activities.

RPTA 125. Leisure, the Individual, and Contemporary Society.  3 Units
Prerequisite(s): Students must have passed the WPE or Eng 109W/E prior to enrollment in RPTA 125
General Education Area/Graduation Requirement: GE AREA D, Writing Intensive Graduation Requirement (WI)
Term Typically Offered: Fall, Spring

Provides an understanding of the social science of leisure in contemporary society by examining the philosophical, socio-cultural, ethical, economic, behavioral, political and historical dimensions of leisure; exploration of the interrelationship between individuals, groups, and society in the context of leisure. Course also examines beliefs, values, and social structures, and compares and contrasts them with individual and social influences such as race, ethnicity, gender, gender expression, sexuality, age, economic status and ability.

**Note:** The course will be a lecture format.

This course introduces students to campus recreation programs. Students will be introduced to theories of student development in these recreational settings; the organizational context and history of recreational programs within a college setting; and the range of programming, facilities, and managerial duties within campus and base recreation. This will provide a great starting point for students preparing for a profession on campus, institutional and/or military recreation, or students wanting to broaden their knowledge in the overall field.

**Prerequisite(s):** RPTA 32.

**Term Typically Offered:** Fall, Spring

The program/event planning process will be described and explained. Relevant principles and methods will be identified. Students will develop a program/event plan for a local organization. Field trips may be required. Field trip(s) may be required.

**Term Typically Offered:** Fall, Spring

Study of institutions and leisure service systems within the community, and the dynamics of community organization practices and actions. The role of the recreation and leisure service practitioner in bringing about community changes. Defining and promoting citizen participation through advisory council membership, survey applications, and public hearing attendance.

**Term Typically Offered:** Fall, Spring

Analyzes this varied, growth industry. Considers the range of conferences and meetings, from small corporate retreats to international conventions. Topics include: the scope of the industry, the role of convention centers, hotel and resort based meeting facilities, organizations that hold meetings and the nature of those meetings, meeting planning and the role of the professional planner and industry related careers. Field trips may be required. Field trip(s) may be required.

**Term Typically Offered:** Spring only

Exposes the students to theoretical and philosophical concepts of experiential education and provides a means through which they can put theory into practice in outdoor recreation settings. Using methods such as demonstrations, observation, presentations, and discussions, the course will explore the history and current trends of experience-based learning.
RPTA 149. Developing and Programming Adventure Experiences. 3 Units
Term Typically Offered: Fall only

Provides students with the working knowledge needed to produce enriching and fulfilling adventure leisure experiences. In order to most effectively aid and assist others in the process of maximizing their leisure experiences, the student of leisure must first know how to maximize these experiences for and within themselves. Therefore, students will be participating in leisure adventure experiences so they can be as effective as possible when developing and programming leisure adventure experience opportunities for others.

RPTA 150. Ecology Of Resource Areas. 3 Units
Term Typically Offered: Fall, Spring

Study of the fundamentals of ecology, silvics, soil science and manipulations of an ecosystem with emphasis on the whole biota as it relates to outdoor recreation areas. Designed to provide an understanding of the scientific basis for and the operational rationale of manipulation of natural resources for a variety of recreation uses.

RPTA 151. Visitor Management in Recreation Areas. 3 Units
Term Typically Offered: Fall, Spring

Visitor safety in recreation areas as it relates to the role and functions of management. Emphasis is given to principles and current legislation in hazard reduction, deviant behavior, liability, law enforcement, and other related topics.

RPTA 152. Law Enforcement for Forest and Park Rangers. 3 Units
Term Typically Offered: Spring only

State, county and federal park rangers and wardens differ from other peace officers in that they are trained to protect visitors and cultural and natural resources on our public lands. This course offers a survey of topics related to the Peace Officer level of rangers across America’s diverse public land systems, with an emphasis on career opportunities in park, forest, and wildlife management.

RPTA 153. Environmental Interpretation. 3 Units
Term Typically Offered: Fall, Spring

Connecting visitors to natural, cultural, and historic resources is the primary focus of this course. Theories, principles and techniques are covered focusing on interpreting park and protected area values to people during their leisure. Personal and non-personal communication techniques will be practiced. Field sites in and around the Sacramento region will be visited to understand the diverse nature of the practice of interpretation. Designed for ranger naturalists, park interpretive staff, teachers, camp leaders, outdoor educators, and recreation program staff.

RPTA 154. Management of Recreation Facilities. 3 Units
Term Typically Offered: Fall only

An introduction to aspects of recreation facility administration for several facility types, including campus recreation facilities, health clubs, community centers, park facilities and aquatic centers. Course topics include administration techniques related to staffing and outsourcing, the roles of the facility manager, analyzing financing sources, best practices in facility maintenance, and issues related to facility design. The course utilizes class discussions, guest speakers and facility site visitations on and off campus.

RPTA 155. Visitor Management in Recreation Areas. 3 Units
Term Typically Offered: Fall, Spring

Visitor safety in recreation areas as it relates to the role and functions of management. Emphasis is given to principles and current legislation in hazard reduction, deviant behavior, liability, law enforcement, and other related topics.

RPTA 156. Administration in Recreation, Parks and Tourism. 3 Units
Prerequisite(s): RPTA 105.
Term Typically Offered: Fall, Spring

Designed to provide the student with various in-depth perspectives regarding the use of management/administrative process in recreation, parks and tourism.

RPTA 157. Professional Organization Leadership. 3 Units
Prerequisite(s): RPTA 30, RPTA 32, and RPTA 105, or instructor permission
Term Typically Offered: Fall, Spring

This course is designed to introduce students to the historical and philosophical foundations of professionalism, and provide the necessary conceptual and technical competencies to organize and lead a successful professional organization/association. Political, legal and ethical issues will be discussed as well as the functions and roles of professional organizations/associations. The relationship between professionalism and advocacy will be examined.
RPTA 169. Traumatology: An Introduction to Posttraumatic Growth. 3 Units

General Education Area/Graduation Requirement: Upper Division Further Studies in Area B5
Term Typically Offered: Fall, Spring

Traumatic and challenging life events occur. Although there are levels and degrees of significance and damage, when these events happen, individual survivors, families, friends, health care professionals and communities are affected. This life science course uses critical experiences and observations, pre-existing assumptions, trauma informed care, neuroscience, genetics and contemporary research to analyze and compare ideas and practices involving current rehabilitation models in an effort to guide survivors toward personal resilience, grit and posttraumatic growth (PTG).

RPTA 178. Human Resources Management in the Hospitality Industry. 3 Units

Prerequisite(s): RPTA 80 or Instructor Permission.
Term Typically Offered: Spring only

Comprehensive study of personnel management in today’s hospitality profession, familiarizing students with many of the functions related to recruiting, selecting, orienting, training, and retaining outstanding lodging industry staff. Additionally, the course familiarizes students with the effects of rising labor costs, increasing competition for quality staff, changing employees attitudes, evolving guest expectations, and a proliferation of new laws that impact human resources policies and activities.

RPTA 179. Profit and Revenue Management for Hospitality. 3 Units

Prerequisite(s): RPTA 61 or Instructor Permission.
Term Typically Offered: Spring only

Revenue management is critical to the hospitality industry due to the perishable nature of a service based product. This course introduces students to topics related to revenue management in hospitality and teaches students techniques to manage revenue in a dynamic hospitality environment with all of the goal of managing profits for the company. Capacity management, demand and revenue forecasting, discounting, overbooking practices, channel management, and pricing execution for the hospitality operations are discussed.

RPTA 180. Foundations of Commercial Recreation. 3 Units

Term Typically Offered: Fall only

Overview of the historical and philosophical foundations of the commercial recreation field. Identification of providers of commercial recreation goods and services. Analyzes current functions and trends in the operation of commercial leisure enterprises.

RPTA 182. Travel And Tourism. 3 Units

Term Typically Offered: Fall only

Examination of the history, significance and nature of travel and tourism in the world with emphasis on the U.S. Analyzes economic, cultural and social factors underlying development and growth of travel and tourism and a review of related research. Identification and description of travel and tourism service providers including their organization, financing and management practices. Prerequisite: Declared RPTA majors and minors only or instructor permission

RPTA 183. Marketing Recreation Services. 3 Units

Prerequisite(s): RPTA 30 or instructor permission
Term Typically Offered: Fall, Spring

Fields of recreation (including therapeutic, commercial, municipal, etc.), tourism and hospitality, while diverse, all offer products that are primarily intangible. The management and marketing of such service products can differ profoundly from those of goods products (often the focus of traditional business programs). Addresses the nature of the service product and services marketing in the people intensive, experiential world of recreation.

RPTA 184. Hospitality Administration. 3 Units

Prerequisite(s): Restricted to declared RPTA major and minors or instructor permission
Term Typically Offered: Spring only

Introduces students to resorts and hotels and their position within the tourism and hospitality industries. The scope of the hospitality industry and various issues concerning the successful development of a hospitality product will be discussed. Prepares students to engage in an internship or employment in this or a related industry, including restaurants and retail. It also helps these and other students to reinforce concepts and skills learned elsewhere by providing concrete, real-world examples of marketing and management methods.

RPTA 185. Advanced Seminar in Commercial Recreation Administration. 3 Units

Prerequisite(s): RPTA 180, RPTA 105 and RPTA 183; RPTA 183 may be taken concurrently; or instructor permission.
Term Typically Offered: Fall, Spring

In-depth analysis of the management of recreational business on a for-profit basis. Focuses on advanced topics, analytical skills, and problem solving in the management arena.

RPTA 187. Food Tourism. 3 Units

Prerequisite(s): RPTA 80 or Instructor Permission.
Term Typically Offered: Spring only

Tourists are increasingly motivated to travel for food and drink. Visiting the location and touring the production facilities is also important. This course provides an overview of the global culinary and gastronomic tourism industry, focusing on the ability of a destination to market itself (both people and place) through food. The various social and cultural contexts in which gastronomic tourism takes place are discussed as well as positive and negative impacts of global and local gastronomic tourism (food tourism).

RPTA 188. Sacramento Region Craft Beer Industry Tourism. 3 Units

Prerequisite(s): Declared RPTA major or minor, or instructor permission
Term Typically Offered: Fall only

Introduction to visitation and tourism related to California’s craft beer industry, specifically in the Sacramento region. This course will provide students with a basic knowledge of craft beer as one of several local products that combine to create a unique agritourism selling proposition for Sacramento. Tourism-related products (beer festivals and contests, beer trails, beer bikes, and beer apps), hospitality (brewery tasting rooms and beer retail), as well as beer laws, and beer pairings will also be discussed.

Note: Must be 21 or over to enroll in the course. Field Trip(s).

Field trip(s) may be required.
RPTA 189. California Wine and Agri-Tourism. 3 Units
Prerequisite(s): Restricted to declared RPTA majors and minors or instructor permission
Term Typically Offered: Spring only
