Introduction to the wine tourism and agri-tourism industries, specifically in the region surrounding Sacramento. Emphasis on wine regions, wineries as event stages, wine mythology and wine in popular culture. Additionally, the course will cover the role of agricultural festivals, related agri-tourism products, slow-food, specialty crop tourism, winery and farm retail, culinary destinations, wine list creation, ag natural tourism products and the role of agri-tourism as part of Sacramento's cultural identity.

RPTA 191. Service Learning Option for Recreation, Parks and Tourism Administration Courses. 1 Unit
Term Typically Offered: Fall, Spring

Individual goals, activities, and academic requirements for community service work and the service-learning credit option are outlined in a Service Learning Option/Contract agreed upon and signed by the student, instructor, and agency sponsor. Enrolled students are required to attend mid-semester and final learning assessment workshops and to complete written evaluations. Credit for the course awarded only if contract and course requirements are completed.
Credit/No Credit

RPTA 195B. Partial Internship: Recreation and Park Management. 4 Units
Prerequisite(s): RPTA 1, RPTA 30, RPTA 32, RPTA 42, RPTA 101, RPTA 105, RPTA 106, RPTA 109, RPTA 110, RPTA 136 and approval of academic advisor and internship coordinator.
Term Typically Offered: Fall, Spring

Supervised part-time or short-term internship in a recreation, park or tourism organization or business. Supervision is provided by faculty and also by personnel at the host site.
Note: Refer to the RPTA Internship Manual for procedures and requirements.

RPTA 195D. Recreation Therapy Internship. 10 - 15 Units
Prerequisite(s): BIO 25, CHDV 30, PSYC 168, RPTA 1, RPTA 30, RPTA 102, RPTA 106, RPTA 110, RPTA 115, RPTA 117, RPTA 118, RPTA 119, and RPTA 136; completion of required administrative paperwork in the semester prior to internship, approval of major advisor.
Term Typically Offered: Fall, Spring

Supervised full-time therapeutic internship in a recreation, park or tourism organization or business. Supervision is provided by faculty and also by certified personnel at the host site. Meets the professional certification requirements at the national or state levels.
Note: Refer to the RPTA Internship Manual for procedures and requirements.

RPTA 195G. Partial Internship: Hospitality and Tourism Management. 4 - 6 Units
Prerequisite(s): RPTA 1, RPTA 30, RPTA 61, RPTA 80, RPTA 82, RPTA 101, RPTA 105, RPTA 106, RPTA 110, RPTA 183, and approval of academic advisor.
Term Typically Offered: Fall, Spring, Summer

Supervised, part-time work experience in hospitality or tourism designed to give students an increased understanding of the nature and scope of industry operations. Supervision is provided by the faculty and the cooperating agencies.
Note: Refer to the HTM Internship Manual for procedures and requirements.

RPTA 195H. Internship: Hospitality and Tourism Management. 10 - 15 Units
Prerequisite(s): RPTA 1, RPTA 30, RPTA 61, RPTA 80, RPTA 82, RPTA 101, RPTA 105, RPTA 106, RPTA 110, RPTA 183, and approval of academic advisor.
Term Typically Offered: Fall, Spring, Summer

Supervised, full-time work experience in hospitality or tourism designed to give students an increased understanding of the nature and scope of industry operations. Supervision is provided by the faculty and the cooperating agencies.
Note: Refer to the HTM Internship Manual for procedures and requirements.

RPTA 195Q. Partial Internship: Recreation, Park and Nonprofit Management. 4 - 6 Units
Prerequisite(s): RPTA 1, RPTA 30, RPTA 61, RPTA 80, RPTA 82, RPTA 101, RPTA 105, RPTA 106, RPTA 110, RPTA 183, and approval of academic advisor.
Term Typically Offered: Fall, Spring, Summer

Supervised, part-time work experience in hospitality or tourism designed to give students an increased understanding of the nature and scope of industry operations. Supervision is provided by the faculty and the cooperating agencies.
Note: Refer to the RPTA Internship Manual for procedures and requirements.

RPTA 195R. Internship: Recreation, Park and Nonprofit Management. 10 - 15 Units
Prerequisite(s): RPTA 1, RPTA 30, RPTA 61, RPTA 80, RPTA 82, RPTA 101, RPTA 105, RPTA 106, RPTA 110, RPTA 183, and approval of academic advisor.
Term Typically Offered: Fall, Spring, Summer

Supervised, part-time work experience in hospitality or tourism designed to give students an increased understanding of the nature and scope of industry operations. Supervision is provided by the faculty and the cooperating agencies.
Note: Refer to the HTM Internship Manual for procedures and requirements.
RPTA 196U. Advanced Leadership in Service Organizations. 3 Units
Prerequisite(s): RPTA 30 and RPTA 32, graduate student status, or instructor permission.
Term Typically Offered: Fall, Spring, Summer

To attain an overview of the leadership roles and responsibilities of the field of Recreation, Park & Tourism Administration. Gain a philosophical and contextual overview of leadership in the leisure services profession. Examination of various leadership techniques within the following recreation-based settings including Outdoor & Natural Resources, Community Recreation - Municipal and Non-Profit Organization, Hospitality and Tourism, and Recreational Therapy.

RPTA 198. Co-Curricular Activities. 1 - 3 Units
Prerequisite(s): Approval of an instructor and the Department chair.
Term Typically Offered: Fall, Spring

Co-curricular activities related to the subject matter and professional concerns of Recreation and Leisure Studies. For example, students may earn credit by participating as a tutor or discussion leader for recreation and leisure studies classes or a teacher or leader in programs offered by community organizations.

Note: The course may be repeated three times for a maximum total of 3 units. Students can enroll for a class that counts as 1, 2 or 3 units. No more than 3 units of RPTA 198 may be used to meet the major requirements.

Credit/No Credit

RPTA 199. Special Problems. 1 - 3 Units
Prerequisite(s): Approval of an instructor and the Department chair.
Term Typically Offered: Fall, Spring

Individual projects or directed reading.

Note: Open only to students who appear competent to carry on individual work. Can be repeated six times for a maximum total of 6 units. Students can enroll for a class that counts as 1, 2 or 3 units. No more than 6 units of RPTA 198 and RPTA 199 in combination may be used to meet major requirements.

Credit/No Credit

RPTA 200A. Orientation to Graduate Studies in Recreation, Hospitality, Parks, and Nonprofit Organizations. 1 Unit
Prerequisite(s): Restricted to MS in Recreation, Hospitality, Parks, & Nonprofit Management students
Term Typically Offered: Fall, Spring, Summer

This course covers several topics related to the M.S. degree program in Recreation, Hospitality, Parks, and Nonprofit Management. Topics include expectations of the graduate program and different options for the culminating experience. This course will review several other aspects important to graduate student work in the RPTA department, including department and university deadlines and paperwork; library and campus resources, Office of Graduate Studies resources, scholarships, life-school balance, graduate school terminology, and financial aid and funding resources.

Credit/No Credit

RPTA 200B. Culminating Experience Preparation in Recreation, Hospitality, Parks and Nonprofit Management. 2 Units
Prerequisite(s): RPTA 200A
Term Typically Offered: Fall, Spring, Summer

This course provides students with faculty and peer support for the process of developing their thesis, culminating project or comprehensive exam. This includes the clarification of expectations, familiarization with research resources, and support provided through feedback in a structured environment.

Credit/No Credit

RPTA 200C. Foundations of Recreation, Hospitality, Parks, and Nonprofit Management. 3 Units
Term Typically Offered: Fall, Spring, Summer

This course examines the foundation and role of recreation, hospitality, parks, and nonprofit management on the society. Discussions will address the historical, political, social and economic impact on the recreation, hospitality, parks and nonprofits industry. Students will identify evidence-based practice in the literature and identify theories associated in recreation, hospitality, parks, and nonprofit management.

RPTA 200D. Advanced Leadership in Service Organizations. 3 Units
Prerequisite(s): RPTA 30 and RPTA 32, graduate student status, or instructor permission.
Term Typically Offered: Fall, Spring, Summer

To attain an overview of the leadership roles and responsibilities of the field of Recreation, Park & Tourism Administration. Gain a philosophical and contextual overview of leadership in the leisure services profession. Examination of various leadership techniques within the following recreation-based settings including Outdoor & Natural Resources, Community Recreation - Municipal and Non-Profit Organization, Hospitality and Tourism, and Recreational Therapy.

RPTA 201. Advanced Studies in Leisure, Recreation, Parks and Tourism. 3 Units
Prerequisite(s): RPTA 200
Term Typically Offered: Fall, Spring

The purpose of this course is to move students beyond conceptual foundations of leisure, recreation, parks and tourism administration to more theoretically advanced aspects of the field. In this course, students will pursue an in-depth exploration of the theories and research related to leisure, recreation, parks and tourism.

RPTA 202. Policies, Trends, and Issues in Recreation, Hospitality, Parks, and Nonprofit Organizations. 3 Units
Term Typically Offered: Fall, Spring, Summer

Major environmental and recreational issues and problems affecting the recreation, hospitality, parks, and nonprofit field are discussed, analyzed, and evaluated. Ramifications involving the policy-making and planning processes of major federal, state, and local agencies involved with recreation, hospitality, parks, and nonprofit delivery services are also covered.
RPTA 203. Advanced Management in Recreation, Hospitality, Parks and Nonprofit Organizations. 3 Units
Term Typically Offered: Fall, Spring, Summer

Examination of contemporary resources, techniques, and tools available to managers in various types of RHPN organizations. Leadership and management are broad areas and a class such as this cannot realistically provide a full overview of all the skills necessary to effectively manage an organization in the 21st Century. What we can achieve is to identify and discuss some skills, techniques, tools, and issues that are particularly important to the management of organizations within the broad recreation field.

RPTA 204. Advanced Research Methods in Recreation, Hospitality, Parks, and Nonprofit Management. 3 Units
Term Typically Offered: Fall, Spring, Summer

Provides an analysis of major research methods used in recreation, hospitality, parks, & nonprofit organizations. Addresses basic and applied research orientations, research designs, research proposals, data collection tools and methods, data analysis, and reporting of research findings.

RPTA 206. Liability and Risk Management in Recreation, Parks and Tourism. 3 Units
Prerequisite(s): Graduate status or instructor permission.
Term Typically Offered: Fall, Spring

In-depth analysis of the principles of legal liability as they pertain to recreation, parks and tourism administration. An examination of the pervasive nature of risk as it pertains to the provision of recreation, parks and tourism programs and opportunities, and the concepts and methods of risk management. Includes field trips, mock trials or other related activities.
Field trip(s) may be required.

RPTA 206A. Introduction to Inclusive Recreation & Recreation Therapy. 3 Units
Term Typically Offered: Fall, Spring, Summer

Addresses the etiology and nature of common disabling conditions and examines issues of leisure participation and inclusion for underrepresented populations. Topics include: attitudinal barriers, advocacy, normalization, universal design, activity analysis and modification, and legislation. Including an emphasis on leadership, supervision, and organizational development of inclusive and therapeutic recreation programs.

RPTA 208. Liability and Risk Management in Recreation, Parks and Tourism. 3 Units
Term Typically Offered: Fall, Spring

In-depth analysis of the principles of legal liability as they pertain to recreation, parks and tourism administration. An examination of the pervasive nature of risk as it pertains to the provision of recreation, parks and tourism programs and opportunities, and the concepts and methods of risk management. Includes field trips, mock trials or other related activities.
Field trip(s) may be required.

RPTA 209. Seminar in Advanced Leisure Education. 3 Units
Term Typically Offered: Fall, Spring

Surveys current and historical perspectives of leisure education from a multicultural and life span viewpoint. Current modes of service delivery will be discussed as they relate to leisure theories. Methods of leisure education provision in diverse settings from school-park collaboratives, retirement and rehabilitation centers, to corporate wellness will be investigated. Development, implementation and management of viable leisure education services will be covered as well presentation, training and consultation skills.

RPTA 263. Grant Writing for Social, Community, and Human Service Organizations. 3 Units
Term Typically Offered: Fall, Spring

A detailed examination of grant writing as a means of augmenting agency revenues for social, community and human service organizations. Course focuses on techniques and strategies used for developing grant proposals, managing grants, and finding funders. Students will develop a full grant proposal including an evaluation and budget plan. Graduate students will conduct an in-depth comparison grant writing processes and budget analyses.

Note: Students may not take both RPTA 163 and RPTA 263 for credit.

RPTA 264. Leadership and Fundraising for Nonprofit Organizations. 3 Units
Term Typically Offered: Fall, Spring, Summer

The purpose of this course is to provide the principles and concepts of nonprofit leadership with an emphasis on youth and human service agencies. This course will explore and provide a historical and philosophical foundations of nonprofit organizations; board/committee development and operation; and the various roles of human service professionals as they relate to the nonprofit field. This course will consist of lectures, readings, discussion, guest speakers, nonprofit agency visitations, active learning exercises, and a community-learning component.

RPTA 265. Hospitality Administration. 3 Units
Term Typically Offered: Fall, Spring, Summer

Introduces students to resorts and hotels and their position within the tourism and hospitality industries. The scope of the hospitality industry and various issues concerning the successful development of a hospitality product will be discussed. Prepares students to engage in an internship or employment in this or a related industry, including restaurants and retail. It also helps these and other students to reinforce concepts and skills learned elsewhere by providing concrete, real-world examples of marketing and management methods.

RPTA 295. Practicum. 3 - 6 Units
Prerequisite(s): Approval of major advisor.
Term Typically Offered: Fall, Spring

Graduate internship experiences in a practical setting.

Note: Open only to graduate students. Can be repeated two times for a maximum total of 6 units. Students can enroll for a class that counts as 3, 4, 5 or 6 units. No more than 6 units of RPTA 295 and RPTA 299 in combination may be used to meet degree requirements.

Credit/No Credit
RPTA 299. Individual Study. 1 - 6 Units
Prerequisite(s): Approved petition filed in the department office.
Term Typically Offered: Fall, Spring

Individual project, problem, practical study, survey, and/or directed reading on the graduate level.
Note: Can be repeated six times for a maximum total of 6 units. Students can enroll for a class that counts as 1, 2, 3, 4, 5 or 6 units. No more than six units of RPTA 295 and RPTA 299 in combination may be used to meet major requirements.

Credit/No Credit

RPTA 500A. Culminating Experience: Thesis. 1 - 3 Units
Prerequisite(s): Advanced to candidacy and permission of graduate coordinator.
Term Typically Offered: Fall, Spring

Successful completion of a thesis approved for the Master’s degree. Student must have approval from first reader.
Credit/No Credit

RPTA 500B. Culminating Experience: Project. 1 - 3 Units
Prerequisite(s): Advanced to candidacy and permission of graduate coordinator.
Term Typically Offered: Fall, Spring

Successful completion of a project approved for Master’s degree. Student must have approval from the first reader.
Credit/No Credit

RPTA 500C. Culminating Experience: Comprehensive Exam. 1 - 3 Units
Prerequisite(s): Advanced to candidacy and permission of the graduate coordinator.
Term Typically Offered: Fall, Spring

Successful completion of a comprehensive examination approved for Master’s degree.
Credit/No Credit

BS in Hospitality and Tourism Management

Units required for Major: 57-59
Total units required for BS: 120

Program Description

Hospitality and tourism are two of California’s fastest growing and most important industries. The BS in Hospitality and Tourism Management allows students flexibility in the selection of courses related to hospitality and tourism management, commercial recreation, and event planning. Curriculum focuses on hotel management, tourism destination marketing, and convention and meeting planning, as well as the basics of entrepreneurial businesses, and the skills needed for working with for-profit, and experience industry agencies (e.g., resorts, ski lodges, conference and meeting facilities, cruise lines, theme parks, destination marketing agencies, spas, clubs, and travel agencies). Local industry professionals from the Sacramento Hotel Association and Visit Sacramento (Sacramento Convention and Visitors Bureau) work closely with department faculty to give students practical skills associated with internships and jobs in the industry.

Note:

• Students graduating with a Bachelor of Science Degree in Hospitality and Tourism Management are not be subject to the University’s Foreign Language Graduation Requirement. Students who change major may be subject to the University’s Foreign Language Graduation Requirement.
• No more than 6 units of RPTA 198 and RPTA 199 in combination may be used to meet program requirements. No more than 3 units of RPTA 198 may be used to meet major requirements.
• RPTA 21, RPTA 22, RPTA 100 and RPTA 122 may not be used to meet program requirements.

Minimum Grade Requirement
Grade of "C-" or better is required in all courses applied to the major.

BS in Recreation Administration

Units required for Major: 57-59
Total units required for BS: 120

Program Description

The BS in Recreation, Park and Nonprofit Management prepares students to work in a wide range of fields that serve the public; protect our natural, cultural and heritage resources; and support a healthy quality of life. Students follow a set of foundational core classes that are augmented with the student’s choice of additional courses in one or more of the following areas:

- Nonprofit and Community Engagement. Leadership, Community Events & Fundraising, Volunteer Management. In this area, students choose from courses that will help develop skills and improve confidence in the areas of grant writing, leadership, community outreach and advocacy, finding and managing volunteers, creating fundraising events, and other related areas. There is an...
emphasis on engaging diversity to help nonprofit agencies best serve their local communities.

- **Outdoor Recreation.**
  *Natural Resource. Experiential Education. Parks & Protected Areas.*
  In this area, students choose from courses that will prepare them for ranger, park law enforcement, or wilderness interpreter jobs in federal or state government funded agencies such as the National Park Service, the United States Forest Service, the Army Corps of Engineers, California Department of Parks and Recreation, or the Bureau of Land Management. Additional coursework prepares students to serve as adventure recreation or experiential education leaders for recreation providers such as Peak Adventures.

- **Public and Agency Recreation.**
  In this area, students will gain skills in planning, implementing, managing, and evaluating comprehensive recreation programs that are a vital part of healthy communities. Students choose from courses that will teach them age-appropriate recreation programming across a wide-range of location and facility types including campus recreation centers, community park settings, summer camps, military bases, after-school sites, and others.

Note:

- Students graduating with a Bachelor of Science Degree in Recreation, Park and Nonprofit Management are not be subject to the University's Foreign Language Graduation Requirement. Students who change major may be subject to the University's Foreign Language Graduation Requirement.
- No more than 6 units of RPTA 198 (https://catalog.csus.edu/search/?P=RPTA%20198) and RPTA 199 (https://catalog.csus.edu/search/?P=RPTA%20199) in combination may be used to meet program requirements. No more than 3 units of RPTA 198 (https://catalog.csus.edu/search/?P=RPTA%20198) may be used to meet major requirements.
- RPTA 21 (https://catalog.csus.edu/search/?P=RPTA%2021), RPTA 22, RPTA 100 (https://catalog.csus.edu/search/?P=RPTA%20100), and RPTA 122 (https://catalog.csus.edu/search/?P=RPTA %20122) may not be used to meet program requirements.

### Minimum Grade Requirement

Total Units: 43-46

1. To help you complete your degree in a timely manner and not take more units than absolutely necessary, there are ways to use single courses to meet more than one requirement (overlap). For further information, please visit the General Education page (p. 1103).

Note: There is no way to list all possible overlaps so please consult with a professional advisor. The Academic Advising Center can be visited online (http://www.csus.edu/acad/), by phone (916) 278-1000, or email (advising@csus.edu).

2. Department recommends RPTA 33 to meet Area D.

3. Required in Major; also satisfies GE.

BS in Recreation Therapy

Units required for Major: 70-71
Total units required for BS: 120

Program Description

The BS in Recreation Therapy focuses on recreation services for individuals who are ill, disabled, elderly, or incarcerated. It can be applied in clinical, transitional, and community based settings. Emphasis is on therapeutic recreation as it applies to children and adults who are physically, mentally, socially, and/or emotionally challenged.

Note:

- Students graduating with a Bachelor of Science Degree in Recreation Therapy will not be subject to the University's Foreign Language Graduation Requirement. Students who change major may be subject to the University’s Foreign Language Graduation Requirement.
- No more than 6 units of RPTA 198 and RPTA 199 in combination may be used to meet program requirements. No more than 3 units of RPTA 198 may be used to meet major requirements.
- RPTA 21, RPTA 100 and RPTA 122 may not be used to meet program requirements.

Minimum Grade Requirement

Grade of "C-" or better is required in all courses applied to the major.

**Certificate in Event Planning**

**Units required for Certificate: 12**

**Program Description**

The certificate program in Event Planning is designed for students interested in working for both private and public agencies in the areas of event planning, wedding planning, meeting planning, and recreational programming. Course work includes classes that teach the essentials in successful event management, including volunteer management, fundraising, sponsorships and leadership.

Completion of any of the program entitles a student to receive a certificate for that program in addition to the Bachelor of Science diploma. Certificates are officially recognized by the university and will appear on a student’s transcript and may be listed on a student’s résumé. **Students must be declared RPTA majors or minors in order to enroll in the certificate programs.** If a student fails to complete the major or minor, the certificate will not be awarded. All units must be taken in Recreation, Parks & Tourism Administration.

**Bachelor of Science students:** In addition to complete the requirements for the Bachelor of Science degree in Recreation Administration, students may also complete one or more of the certificate programs. Units in the certificates may overlap with required and supportive courses in the major.

**Minor students:** With advisor approval, students in the RPTA Minor Program may take courses in the certificate programs to partially fulfill the requirements of the minor (please read all of the minor requirements above). Students must complete all of the requirements for the minor to receive the certificate.

**Minimum Grade Requirement**

A grade of "C-" or better is required in all courses applied to the certificate.

Certificate in Natural Resources Administration

Units required for Certificate: 9

Program Description
The certificate program in Natural Resource Administration prepares students to work in outdoor recreation agencies such as California State Parks, National Parks, National Forests, and other agencies that manage our natural, cultural and heritage resources. Through an informative coursework, students will receive a strong foundation in recreation management related to providing the public with high-quality outdoor recreational opportunities.

Completion of any of the program entitles a student to receive a certificate for that program in addition to the Bachelor of Science diploma. Certificates are officially recognized by the university and will appear on a student’s transcript and may be listed on a student’s résumé.

Students must be declared RPTA majors or minors in order to enroll in the certificate programs. If a student fails to complete the major or minor, the certificate will not be awarded. All units must be taken in Recreation, Parks & Tourism Administration.

Bachelor of Science students: In addition to complete the requirements for the Bachelor of Science degree in Recreation Administration, students may also complete one or more of the certificate programs. Units in the certificates may overlap with required and supportive courses in the major.

Minor students: With advisor approval, students in the RPTA Minor Program may take courses in the certificate programs to partially fulfill the requirements of the minor (please read all of the minor requirements above). Students must complete all of the requirements for the minor to receive the certificate.

Minimum Grade Requirement
A grade of "C-" or better is required in all courses applied to the certificate.

Total Units: 9

Certificate in Non-Profit Administration

Units required for Certificate: 12

Program Description
The Non-profit and tax-supported agencies are increasingly under pressure to secure their own funding and provide evidence of the impact of their programs. The certificate program in Non-Profit Administration provides students with solid skills to lead agencies in the public sector with course work in grant writing, fundraising, volunteer management and several other aspects of management for non-profit agencies. Non-RTPA majors can declare the Minor in Non-Profit Administration.

Completion of any of the program entitles a student to receive a certificate for that program in addition to the Bachelor of Science diploma. Certificates are officially recognized by the university and will appear on a student’s transcript and may be listed on a student’s résumé.

Students must be declared RPTA majors or minors in order to enroll in the certificate programs. If a student fails to complete the major or minor, the certificate will not be awarded. All units must be taken in Recreation, Parks & Tourism Administration.

Bachelor of Science students: In addition to complete the requirements for the Bachelor of Science degree in Recreation Administration, students may also complete one or more of the certificate programs. Units in the certificates may overlap with required and supportive courses in the major.

Minor students: With advisor approval, students in the RPTA Minor Program may take courses in the certificate programs to partially fulfill the requirements of the minor (please read all of the minor requirements above). Students must complete all of the requirements for the minor to receive the certificate.

Certificate in Outdoor Adventure Administration

Units required for Certificate: 12
Program Description

The certificate program in Outdoor Adventure Administration is for students wanting to provide the public with experiences and programs to play and learn in the great outdoors. Students will extend the general park and recreation management foundation of the Recreation Administration core with courses that teach adventure recreation programming and experiential education skills.

Completion of any of the program entitles a student to receive a certificate for that program in addition to the Bachelor of Science diploma. Certificates are officially recognized by the university and will appear on a student’s transcript and may be listed on a student’s résumé. Students must be declared RPTA majors or minors in order to enroll in the certificate programs. If a student fails to complete the major or minor, the certificate will not be awarded. All units must be taken in Recreation, Parks & Tourism Administration.

Bachelor of Science students: In addition to complete the requirements for the Bachelor of Science degree in Recreation Administration, students may also complete one or more of the certificate programs. Units in the certificates may overlap with required and supportive courses in the major.

Total Units: 15

Minor in Non-Profit Management

Units required for Minor: 15

Program Description

The Minor in Non-Profit Management is a 15-unit program designed for non-RPTA majors (RPTA majors cannot complete the minor program and should see the link for the related RPTA Certificate Program). The Minor in Non-Profit Management will give students a solid background in grant writing and fundraising for non-profit agencies of all types, as well as skills in leadership, community engagement, and volunteer management for the non-profit sector.

The minor requires 15 units, with at least 9 upper division units taken in residence at Sacramento State.

Admission Requirements: Course prerequisites and other criteria for admission of students to the degree major program, and for their continuation in it.

Minimum Grade Requirement

A grade of "C-" or better is required in all upper division courses applied to the minor.

Minor in Hospitality and Tourism Management

Program Description

The Minor in Hospitality and Tourism Management is designed for non-RPTA majors interested in learning about career areas within the hospitality and tourism fields. This broad set of industries can lead to careers in hospitality and event planning, tourism, eco-tourism, activity programming, and destination marketing.

The minor requires 15 units, all of which must be taken in Recreation, Parks, and Tourism Administration. At least 9 units must be upper division, with at least 9 upper division units taken in residence at Sacramento State.

Minimum Grade Requirement

A grade of "C-" or better is required in all courses applied to the certificate.

Minor in Park Management

Units required for Minor: 15

Program Description

The Minor in Park Management is designed for non-RPTA majors interested in learning about career areas related to natural resource and park law enforcement. Park Management can lead to careers in several land management agencies including California State Parks, National Parks (US Department of Interior), National Forests (US Department of Agriculture), Army Corps of Engineers, and the Bureau of Land Management. Concepts related to recreation ecology, visitor management, cultural and heritage resources, and environmental interpretation are included.

The minor requires 15 units, and must include at least 9 units of upper division coursework taken in residence at Sacramento State.

Minimum Grade Requirement

A grade of "C-" or better is required in all upper division courses applied to the minor.

Select three units of elective coursework from RPTA courses. A student may count an elective course outside of RPTA with permission from their RPTA Minor Advisor.

Total Units: 15

Minor electives may not include RPTA 1, RPTA 21, RPTA 101, RPTA 102, RPTA 109, RPTA 110, RPTA 115, RPTA 116, RPTA 117, RPTA 118, RPTA 119, RPTA 195 series courses, RPTA 198, or one-unit courses (e.g. RPTA 50).

Minor in Recreation Management

Units required for Minor: 15

Program Description

The Minor in Recreation Management is designed for non-RPTA majors interested in learning about career areas within the recreation field. This broad set of industries can lead to careers in experiential education, community sports (for youths, teens, and adults), outdoor leadership, campus recreation, activity programming, military recreation, intramural league programming, and adventure recreation.

The minor requires 15 units, and must include at least 9 units of upper division coursework taken in residence at Sacramento State.

Minimum Grade Requirement

A grade of "C-" or better is required in all upper division courses applied to the minor.

Electives (12 Units)

Select 12 units from the following: 2, 3, 4

- RPTA 32 Leadership and Group Development
- RPTA 33 Race, Class Gender and Leisure
- RPTA 34 The Outdoor Recreation Experience
- RPTA 42 Recreation and Parks: Natural, Cultural, and Heritage Resources
- RPTA 60 Budgeting for Recreation Services
- RPTA 62 Introduction to Recreation Law
- RPTA 105 Management in Recreation, Parks and Tourism
- RPTA 106 Introduction to Inclusive Recreation and Recreation Therapy
- RPTA 125 Leisure, the Individual, and Contemporary Society
- RPTA 130 Community Sport Programming
- RPTA 131 Morale Welfare and Recreation (MWR): Military Recreation Services
- RPTA 132 Campus Recreation

Total Units: 15

1. Minor electives may not include RPTA 1, RPTA 21, RPTA 101, RPTA 102, RPTA 109, RPTA 110, RPTA 115, RPTA 116, RPTA 117, RPTA 118, RPTA 119, RPTA 195 series courses, RPTA 198, or one-unit courses (e.g. RPTA 50).
2. With minor advisor approval, up to 3 units of RPTA 199 may be applied to the minor.
3. Minor elective coursework to be selected in consultation with RPTA Minor Advisor.
Career competencies are dependent upon the professional goal of each student. Hence, these vary. After career objectives have been clarified, individual students usually will be educated to:

- develop valid and reliable measures of program evaluation based on theoretical constructs and practical field requirements;
- develop efficient, effective, and meaningful procedures for assessing recreation needs and for allocating resources;
- identify and demonstrate effective decision making processes in leisure service systems; and
- demonstrate an effective interpretation of leisure and recreation data, findings, and procedures, and communicate these in personal and professional environments.

**Admission Requirements**

Admission as a classified graduate student in Recreation, Parks & Tourism Administration requires:

- a baccalaureate degree in Recreation Administration or related discipline;
- a minimum 2.75 GPA overall and a minimum 3.0 GPA in the major;
- a detailed resume;
- three letters of recommendation;
- a writing sample;
- a personal statement;
- TOEFL/IELTS required for international applicants

A student with a baccalaureate degree from another discipline may be admitted to conditionally classified standing and complete certain designated courses in Recreation Parks & Tourism Administration, totaling 15 additional units (as determined by a faculty advisor), in order to acquire the academic background necessary to qualify for classified standing. A student from another discipline who wishes to qualify for state and/or national registration as a therapeutic recreation specialist may need to take additional coursework.

**Admission Procedures**

Applications are accepted as long as room for new students exists and the Office of Graduate Studies is still accepting applications. Currently, formal admissions to the graduate program in Recreation, Hospitality, Parks, and Nonprofit Management are for fall. Applications are accepted and reviewed in the spring for the fall semester. All prospective graduate students, including Sacramento State graduates, must file the following with the Office of Graduate Studies, River Front Center 215, (916) 278-6470, www.csus.edu/gradstudies/ (http://www.csus.edu/gradstudies/):

- an online application for admission; and
- one set of official transcripts from each college and/or university attended, other than Sacramento State.

For more admissions information and application deadlines please visit http://www.csus.edu/gradstudies/.

**Minimum Units and Grade Requirement for the Degree:**

Units required for the MS: 30

Minimum Cumulative GPA: 3.0; as an exception to university policy a maximum of two “B-” grades may be counted towards the degree.

1. Elective coursework is selected with the prior consent of the student's academic advisor to satisfy the following:
   - No more than 6 units of any combination of RPTA 295 and RPTA 299 may be counted towards the degree.
   - No more than 6 units of coursework may be taken outside of RPTA (students who have not previously completed an undergraduate major in Recreation, Parks & Tourism Administration must have the prior consent of the Graduate Coordinator before taking coursework outside RPTA).
   - At least 6 units of elective coursework must be at the 200 level (for a total of at least 18 units of 200 level coursework in the degree program).

---

**Social Work**

**Colleges of Health and Human Services**

**Program Description**

Social Work is a profession that strives to enhance the well-being of all people while attending specifically to the needs and empowerment of those in vulnerable life conditions. The Sacramento State program focus embraces the interdependent interests of both the individual and society, with particular attention to the social context that creates, contributes to, and addresses obstacles and resources for individual and community growth and development.

Social Workers seek to help people address their own needs and influence the responsiveness of organizations, communities, and other social institutions, thus promoting social justice and social change. Towards these ends, multilevel Social Work activities include group work, community organization, supervision, individual and family counseling, consultation, administration, advocacy, social and political action, policy development and implementation, education, research and evaluation. In practice, Social Workers are sensitive to cultural and ethnic diversity, and work to combat discrimination, oppression, poverty, and other forms of social injustice.

The principle objective of the Bachelor of Arts in Social Work degree program is to educate beginning professional practitioners as generalists. The Master of Social Work degree program supports advanced specialized professional practice.

**Degree Programs**

- BA in Social Work (p. 787)
- Master of Social Work (p. 789)

**Accreditation**

In addition to California State University, Sacramento's full accreditation by the Western Association of Schools and Colleges, the Bachelor of Arts in Social Work and Master of Social Work are also individually accredited by Council of Social Work Education (CSWE).

**Notice to Students RE: Professional Licensure and Certification**

California State University programs for professions that require licensure or certification are intended to prepare the student for California licensure and certification requirements. Admission into programs for professions that require licensure and certification does not guarantee that students will obtain a license or certificate. Licensure and certification requirements are set by agencies that are not controlled by or affiliated
with the California State University and licensure and certification requirements can change at any time.

The California State University has not determined whether its programs meet other states' educational or professional requirements for licensure and certification. Students planning to pursue licensure or certification in other states are responsible for determining whether, if they complete a California State University program, they will meet their state's requirements for licensure or certification. This disclosure is made pursuant to 34 CFR §668.43(a)(5)(v)(C).

Special Features

• The Bachelor of Arts in Social Work and the Master of Social Work degree programs are accredited by the Council on Social Work Education.

• Many required classes will have at least one section scheduled during evening hours.

• Social Work students earn academic credit for professionally supervised field experience in a human service agency. The practicum is two to three days per week.

• All BA and MSW students receive academic and career planning advisement. Employment information for students is updated continuously.

• Graduate and undergraduate Social Work students maintain active student organizations including a chapter of Phi Alpha, a national honor society for Social Work.

• The MSW degree fulfills most of the educational requirements for California licensure as Licensed Clinical Social Worker (LCSW) and the Pupil Personnel Services Credential for School Social Work.

Career Possibilities

Geriatric Social Worker · Forensic Social Worker · Medical Social Worker · Mental Health Social Worker · Social Planner · Substance Abuse Counselor · Social Service Administrator · Community Organizer · Child and Family Counselor · Child Protective Worker · Adult Protective Worker · Occupational/Industrial Social Worker · Employee Assistance Counselor · Adoptions Worker · School Social Worker · Agency Director Program Evaluator · Family Therapist · Individual, Child & Family Therapist

SWRK 95. Introduction to Social Work. 3 Units
Term Typically Offered: Fall, Spring
Provides an overview of the social work profession and of social welfare systems especially in relation to marginalized populations. Also introduces a generalist perspective to social work practice with emphasis on professional development. Students are exposed to the values and ethics of social work, as well as the important ideologies that have shaped social welfare and social work.
Note: Includes a 30 hour volunteer experience to aid in assessing student's appropriateness for the profession. A grade of "C" or better is required before taking SWRK 140A.

SWRK 102. Crosscultural Theory and Practice: Issues of Race, Gender and Class. 3 Units
General Education Area/Graduation Requirement: GE AREA D, Race & Ethnicity Graduation Requirement (RE)
Term Typically Offered: Fall, Spring, Summer
Increase student awareness of social, political, economic, and cultural diversity. Addresses patterns and consequences of discrimination and oppression as well as theoretical and practice content and strategies for social change.

SWRK 110. Statistics and Research for Social Workers. 3 Units
Term Typically Offered: Fall, Spring, Summer
Descriptive and inferential statistics, sampling, probability distribution, introduction to research methods, relationship of statistics to research methods; illustrations drawn from the field of human services.

SWRK 111. Research Methods and Program Evaluation. 3 Units
Prerequisite(s): SWRK 110.
Corequisite(s): SWRK 140B or SWRK 140C.
Term Typically Offered: Fall, Spring
User oriented research methods focusing on locating, understanding, and using the professional research literature relevant to the development of skills for the human service practitioner; and methods of evaluating ones own practice and agency programs.
SWRK 118. Chemical Dependency and Social Work Practice. 3 Units
Term Typically Offered: Fall, Spring

Introduction to social work practice with the alcoholic/addicted individual or family. The ecological framework will be utilized for studying alcohol and drug dependence and its prevention/intervention. Emphasis will be placed on addiction as a biopsychosocial problem with a special focus on oppressed and marginalized populations.

SWRK 125A. Human Behavior and the Social Environment: Theory. 3 Units
Prerequisite(s): SWRK Majors only with Junior status; completion of pre-major BIO 1, BIO 10, BIO 20 or ANTH 1; and ECON 1A, ECON 1B, PSYC 2, or SOC 1; and CRJ 1, GERO 100, SOC 3 or SOC 10.
Term Typically Offered: Fall only

Theory forms the foundation of all social work practice, attempting to explain complicated human behavior in interaction with diverse environments. This course examines core theories of human behavior, families, small groups, organizations, social movements, and human society from a variety of social science disciplines. Each theory will be critically examined in respect to application towards diverse groups and the vulnerable populations that social workers serve.

SWRK 125B. Human Behavior and the Social Environment: The Life Course. 3 Units
Prerequisite(s): SWRK majors only and SWRK 125A
Term Typically Offered: Spring only

This course examines growth and development with special focus on lifespan from birth through old age in the context of family, community, complex organizations, and society. With technological, economic, political and ecological systems rapidly changing, the course will also examine the effects on the interplay between human life and the environment.

SWRK 126. Theories of Criminal Behavior. 3 Units
Prerequisite(s): GWAR certification before Fall 09; or WPJ score of 80+; or 3-unit placement in ENGL 109M or ENGL 109W; or 4-unit placement in ENGL 109M or ENGL 109W and co-enrollment in ENGL 109X; or WPJ score 70 or 71 and co-enrollment in ENGL 109X.
General Education Area/Graduation Requirement: GE AREA D, Writing Intensive Graduation Requirement (WI)
Term Typically Offered: Fall, Spring, Summer

Analyzes various theories in terms of their logic, historical origins, and policy implications. Focus on developing a critical framework.

SWRK 129. Human Sexuality in Social Work Perspectives. 3 Units
Term Typically Offered: Fall only

Examines psycho-social-cultural influences on sexual identity and sexual behavior; analyzes problems confronting the victims of sex-discrimination and oppression; considers education and treatment programs.

SWRK 132. Social Work and Spirituality. 3 Units
Term Typically Offered: Spring only

This course examines how spirituality serves as a liberating, and at times constricting force in the lives of our clients and communities. Competencies for both assessing and engaging in discussions about our clients' spiritual world as well as self-awareness regarding social work practitioner spiritual orientations are emphasized. Diverse spiritual and religious backgrounds (including those who consider themselves non-spiritual or non-religious) are welcomed and celebrated in the classroom.

SWRK 134. Crimes Without Victims. 3 Units
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall only

Focuses on the study of particular behavior defined as criminal, including addiction, pornography, homosexuality, prostitution and abortion. The role of morality is examined.

SWRK 136. Poverty and Homelessness in America. 3 Units
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall, Spring

Analyzes social theory and its relationship to the generation and retention of institutional poverty. Within this context, public and private welfare programs serving low-income populations will be examined.

SWRK 137. The Child and the Law. 3 Units
Term Typically Offered: Spring only

Both civil and criminal aspects of the relationship of the applicability and effect of the law on minors, including juvenile court, wardship and dependency, liability for torts, the child and divorce.

SWRK 138. Violence In The Family. 3 Units
Term Typically Offered: Fall only

Provides basic information on victims and perpetrators of violence in the family. The focus is on child maltreatment, spouse/partner battering, abuse of the elderly, and the roles and responsibilities of social workers responding to family violence.

SWRK 140A. Social Work Practice. 3 Units
Prerequisite(s): SWRK 95 and SWRK 125A; SWRK majors only; Junior standing and a grade of "C" or better in all previous SWRK courses
Corequisite(s): SWRK 125B
Term Typically Offered: Fall, Spring

Provides an introduction to the profession and generalist social work practice with individuals, families, groups, organizations, and communities. Practice skills focus on application of the planned changed process from an empowerment approach.

SWRK 140B. Social Work Practice. 3 Units
Prerequisite(s): SWRK 95, SWRK 102, SWRK 125B, SWRK 140A, SWRK 150; SWRK majors only; senior standing; Minimum grade of "C" in all previously completed SWRK courses; GWAR certification or having met university writing requirements
Corequisite(s): SWRK 195A
Term Typically Offered: Fall, Spring

Generalist practice through a cross-cultural lens. Focuses on culturally competent relationship building, assessment, and intervention with individuals, organizations and communities.

SWRK 140C. Social Work Practice. 3 Units
Prerequisite(s): SWRK 195A and SWRK 140B.
Corequisite(s): SWRK 195B
Term Typically Offered: Fall, Spring

Focuses on family intervention through an emphasis on strengths-based case management and children and youth issues. Group work processes and intervention examined through experiential and formal learning.
Corequisite: SWRK 195B.
This elective provides students with an in-depth understanding and critical framework to conduct applied work with individuals who are LGBTQ+, and their kinship networks and communities. Various perspectives (e.g., person-in-environment, historical, political, psychological, critical theory, intersectional) are utilized to better understand contemporary issues, social and health inequities, and lived experiences of LGBTQ+ people. Assignments deepen self-awareness in service of professional development. This course is open to upper division undergraduates of all majors, and to all graduate students.

**SWRK 150. Welfare In America.**

3 Units

General Education Area/Graduation Requirement: GE AREA D

Term Typically Offered: Fall, Spring, Summer

Examines the history, purpose, structure, and costs of current American social welfare policy and programs and the role of social work in policy and program development.

**SWRK 151. Health Services and Systems.**

3 Units

General Education Area/Graduation Requirement: GE AREA D

Term Typically Offered: Fall, Spring, Summer

Examines the delivery of health and mental health service with a focus on problems experienced by economically disadvantaged and oppressed populations.

**SWRK 153. Child Welfare Services.**

3 Units

Term Typically Offered: Fall, Spring

Provides basic information on the recognition and treatment of problems of children in the home, school and community, and on the public and private social services and laws which promote and protect the welfare of children.

**SWRK 191. Exploration of Veteran Studies: An Ethnographic Approach.**

3 Units

Prerequisite(s): GWAR certification before Fall 09; or WPJ score of 80+; or 3-unit placement in ENGL 109M or ENGL 109W; or 4-unit placement in ENGL 109M or ENGL 109W and co-enrollment in ENGL 109X; or WPJ score 70 or 71 and co-enrollment in ENGL 109X.

General Education Area/Graduation Requirement: Writing Intensive Graduation Requirement (WI), GE AREA D

Term Typically Offered: Fall, Spring

Through the review of ethnographic works, qualitative research articles and other significant recent literature on veterans’ issues, students are introduced to the qualitative research process. Most significantly students simultaneously gain knowledge of the issues and challenges faced by veterans returning from combat as they transition to civilian life as well as the best practices in supporting positive transitions from combat to civilian life. Students will develop analytical thinking skills and writing skills for preparing literature reviews.

**SWRK 195A. Field Instruction + Integration Seminar.**

6 Units

Prerequisite(s): SWRK 102, SWRK 125A, SWRK 125B, SWRK 140A and SWRK 150 and permission of the Field Director (or designee).

Corequisite(s): SWRK 140B

Term Typically Offered: Fall only

Two-semester sequence of instruction that takes place in an approved social service agency. Under the supervision of a certified field instructor, students demonstrate their ability to apply knowledge, skills, critical thinking and professional competencies required of undergraduate generalist social workers. Students are required to provide own transportation to and from agency.

Note: Students must attend two separate field orientations prior to beginning field placement; enrollment is limited to students who have completed a field application, interviewed at a field agency and been accepted to an approved field placement.

Credit/No Credit

**SWRK 195B. Field Instruction + Integration Seminar.**

6 Units

Prerequisite(s): SWRK 95, SWRK 102, SWRK 125A, SWRK 125B, SWRK 140A, SWRK 140B, SWRK 195A and SWRK 150; and permission of the Field Director (or designee).

Corequisite(s): SWRK 140C

Term Typically Offered: Spring only

Two-semester sequence of instruction that takes place in an approved social service agency. Under the supervision of a certified field instructor, students demonstrate their ability to apply knowledge, skills, critical thinking and professional competencies required of undergraduate generalist social workers. Students are required to provide own transportation to and from agency.

Note: Enrollment is limited to students who have secured an approved field placement; Field placements begins in the first week of January.

Credit/No Credit

**SWRK 198. Co-Curricular Activities.**

1 - 3 Units

Prerequisite(s): Permission of the Undergraduate Social Work Coordinator.

Term Typically Offered: Fall, Spring

Co-curricular activities related to the subject matter and intellectual concerns of the Division of Social Work, including service on division policy-making committees and participation in ASI approved organizations.

Credit/No Credit

**SWRK 199. Special Problems.**

1 - 3 Units

Prerequisite(s): Approval of the faculty sponsor of the project and Division Chair.

Term Typically Offered: Fall, Spring

Independent research, project or directed reading.

Note: Open to students who are capable of independent work.

Credit/No Credit

**SWRK 202. Social Work and Diverse Populations.**

3 Units

Term Typically Offered: Fall, Spring

Prepares students to understand cultural and social diversity. Addresses theoretical and practice dimensions of social work with diverse and oppressed and vulnerable people for personal and social empowerment in behalf of human dignity and social justice.
Builds upon content of SWRK 204B and provides advanced knowledge and skills for mental health assessments, diagnosis and treatment and to provide long-term and acute mental health treatment, respond to acute trauma and indigent populations.

**Term Typically Offered:** Fall, Spring

**Corequisite(s):** SWRK 204B, SWRK 296B

**Note:** Enrollment is limited to students who have secured an approved Field placement.

---

**SWRK 207A. Multi-Level Practice for Children & Families.**

3 Units

Builds upon content of SWRK 207A and provides advanced knowledge and skills in areas affecting children and families with a specific focus on training students in Child Protective Services, abuse, neglect and human trafficking.

**Term Typically Offered:** Fall only

**Corequisite(s):** SWRK 207A, SWRK 297A

**Note:** Enrollment is limited to students who have secured an approved Field placement.

---

**SWRK 207B. Multi-Level Practice for Children & Families.**

3 Units

Builds upon content of SWRK 207A and provides advanced knowledge and skills in areas affecting children and families with a specific focus on training students in Child Protective Services, abuse, neglect and human trafficking.

**Term Typically Offered:** Spring only

**Corequisite(s):** SWRK 207A, SWRK 297B

**Note:** Enrollment is limited to students who have secured an approved Field placement.

---

**SWRK 208A. Multi-Level Practice for Health & Aging.**

3 Units

Builds upon content of SWRK 208A and provides advanced knowledge and skills for hospital and hospice care, respond to the needs of Baby Boomers, support diversity in aging choices while assisting clients with management of health care, housing and quality of life optimization.

**Term Typically Offered:** Fall only

**Corequisite(s):** SWRK 208A, SWRK 298A

**Note:** Enrollment is limited to students who have secured an approved Field placement.

---

**SWRK 208B. Multi-Level Practice for Health & Aging.**

3 Units

Builds upon content of SWRK 208B and provides advanced knowledge and skills for hospital and hospice care, respond to the needs of Baby Boomers, support diversity in aging choices while assisting clients with management of health care, housing and quality of life optimization.

**Term Typically Offered:** Spring only

**Corequisite(s):** SWRK 208A, SWRK 298B

**Note:** Enrollment is limited to students who have secured an approved Field placement.

---

**SWRK 209. Social Work Practice I.**

3 Units

Building on the liberal arts framework and using the ecological model, this course introduces students to generalist social work practice with individuals, families, small groups, organizations, disadvantaged populations, communities, and society.

**Term Typically Offered:** Fall, Spring

**Corequisite(s):** SWRK 295A

---

**SWRK 210. Methods of Social Research.**

3 Units

Examination of quantitative and qualitative methods of social work research. Includes problem formulation, selection of various conceptual frameworks, research designs, sampling, collecting data, experimental design and computer technology.

**Term Typically Offered:** Fall, Spring

**Prerequisite(s):** Undergraduate social statistics course.

---

**SWRK 213. Public Child Welfare Practice.**

3 Units

Integrates the concepts and skills learned in Advanced Practice, Advanced Policy, and Research courses of the MSW program and applies to the specific client population of public child welfare agencies. Required for Title IV-E stipend students; open to others on basis of space availability.

**Term Typically Offered:** Fall, Spring

**Prerequisite(s):** SWRK 204A, SWRK 204B.

---

**SWRK 215. Mediation & Restorative Justice.**

3 Units

The course examines the principles, policies, goals, and practice of mediation and restorative justice in social work settings including the adult and juvenile criminal justice systems, family court, child welfare, schools, mental health, health, and community dispute resolution centers. Students will learn mediation and restorative justice practice skills to work effectively with individuals as both clients and providers of services, as well as within various institutions, systems, and communities.

**Term Typically Offered:** Fall, Spring

**Prerequisite(s):** SWRK 204A, SWRK 204B.

---

**SWRK 218. Chemical Dependence: Strategies and Tactics for Social Work Practice.**

3 Units

Designed to increase the sensitivity of graduate social work students to the major intervening variables contributing to the problem of chemical dependence in contemporary American society.
SWRK 219. Social Work Practice in Health Care Settings. 3 Units
Term Typically Offered: Fall, Spring
Provides intervention strategies useful in health care settings. Individual, family and group practice strategies are presented as well as discharge planning, advocacy, ethnically sensitive issues, and collaboration practice within hospital settings.

SWRK 221. Community Organizing Practice. 3 Units
Prerequisite(s): SWRK 204A, SWRK 204B or instructor permission.
Term Typically Offered: Fall, Spring
Focuses on intervention at the community level with a special emphasis on grass roots organizing and advocacy.

SWRK 222. DSM New Developments in Psychodiagnosis. 3 Units
Term Typically Offered: Fall, Spring
Designed to give practitioners and students hands-on experience in using the DSM IV Manual. Videotapes, case vignettes, and small group discussions used.

SWRK 224. Advanced Mental Health Practice. 3 Units
Prerequisite(s): SWRK 204A, SWRK 204B or instructor permission.
Term Typically Offered: Fall, Spring
Examines a variety of theoretical views on adaptations of childhood and adulthood with accompanying models for assessment and treatment. Explores current views on intra-psychic and interpersonal functioning utilized in mental health settings.

SWRK 225. Advanced Group Work Methods: Process and Intervention Strategies. 3 Units
Term Typically Offered: Fall, Spring
Covers small group theory and process, and group method in a variety of settings, with emphasis on group development.

SWRK 226. Family Intervention: Contemporary Issues in Social Work Practice. 3 Units
Term Typically Offered: Fall, Spring
Critically addresses the origins and contemporary context and models of interventions with families.

SWRK 228. Clinical Intervention in Sexual Abuse. 3 Units
Term Typically Offered: Fall, Spring
Presents an intervention system that can assist professionals to work with sexually abusive families and victims of sexual abuse. Assessment, planning, and treatment are described and methods of intervention demonstrated.

SWRK 232. Spirituality and Social Work. 3 Units
Term Typically Offered: Fall, Spring
Considers the role of spirituality in the socialization process of the professional as well as the client by examination of spirituality, values, ethics, principles, and philosophies as influences on personal and professional interactions.

SWRK 235A. Theoretical Bases of Social Behavior. 3 Units
Term Typically Offered: Fall, Spring
Examines the growth, change and interaction of individuals, families and groups, organizations, and communities with special attention to lifespan development and systems theory.

SWRK 235B. Theoretical Bases of Social Behavior. 3 Units
Prerequisite(s): SWRK 235A.
Term Typically Offered: Fall, Spring
Focuses on major personality theories; principal theories of health, illness and disordered behavior; child and family dynamics; and theories of group and organizational behavior.

SWRK 238A. Issues and Practice in Schools. 3 Units
Prerequisite(s): Admission to the College of Social Work Program.
Corequisite(s): SWRK 204C, SWRK 295C.
Term Typically Offered: Fall, Spring
Introduces the student to the field of school social work in its dynamic social, educational, legal, political, and human complexity. Examines the challenges of rapid social and demographic change in California as well as the need for restructuring education and innovative responses.

Note: Required for Pupil Personnel Services Credential.

SWRK 238B. Issues and Practice in Schools. 3 Units
Prerequisite(s): SWRK 204C, SWRK 238A, SWRK 295C.
Corequisite(s): SWRK 204D, SWRK 295D.
Term Typically Offered: Fall, Spring
Continuation of SWRK 238A, course examines classroom management, case assessment, alternative education practices, discipline and attendance law, impediments to individual development as well as case studies, interagency collaboration, new community partnerships, and media and high technology uses.

Note: Required for Pupil Personnel Services Credential.

SWRK 244. Working with LGBTQ+ Publics. 3 Units
Prerequisite(s): MSW I or II, or other graduate student. Paired.
Term Typically Offered: Spring only
This elective provides students with an in-depth understanding and critical framework to conduct applied work with individuals who are LGBTQ+ and their kinship networks and communities. Various perspectives (e.g., person-in-environment, historical, political, psychological, critical theory, intersectional) are utilized to better understand contemporary issues, social and health inequities, and lived experiences of LGBTQ+ people. Assignments deepen self-awareness in service of professional development. This course is open to upper division undergraduates of all majors, and to all graduate students.

SWRK 245. Death, Grief And Growth. 3 Units
Term Typically Offered: Fall, Spring
Death and the process of terminating life seen from the social, cultural, personal and medical perspectives. Comparisons of competing, contradictory or complementary views of death among specific religions, social classes, ethnic groups and superstitions and taboos connected with the dead.

SWRK 250. Social Welfare Policy and Services. 3 Units
Term Typically Offered: Fall, Spring
Analyzes contemporary social welfare policy and the ways in which policy is carried out through a broad spectrum of agencies and services, in a historical and philosophical context relevant to professional social workers. This course meets the foundation competencies of social welfare policies and services within the specific context of thinking, reading and writing in social work policy practice.

Note: Graduate Writing Intensive (GWI) course.
SWRK 252. Advanced Policy for Behavioral Health. 3 Units
Prerequisite(s): SWRK 250.
Term Typically Offered: Fall only
Builds on the foundation content of SWRK 250 with deeper knowledge of diverse theoretical and practical approaches to policy analysis, development, implementation, and evaluation to empower communities and individuals, to advance and protect human rights, and to optimize social justice. Focuses on behavorial Health policy and services, involuntary commitment, access to care and patients’ rights, financing and organization of Behavioral Health services, legislation and community engagement around Behavioral Health issues.

SWRK 253. Advanced Policy for Children & Families. 3 Units
Prerequisite(s): SWRK 250
Term Typically Offered: Fall only
Builds on the foundation content of SWRK 250 with deeper knowledge of diverse theoretical and practical approaches to policy analysis, development, implementation, and evaluation to empower communities and individuals, to advance and protect human rights, and to optimize social justice. Focuses on sociopolitical issues, laws and court decisions, history and role of government in public child welfare practice, children’s and parents’ rights, child custody, sexual abuse laws, and emancipation.

SWRK 254. Advanced Policy for Health & Aging. 3 Units
Prerequisite(s): SWRK 250
Term Typically Offered: Fall only
Builds on the foundation content of SWRK 250 with deeper knowledge of diverse theoretical and practical approaches to policy analysis, development, implementation, and evaluation to empower communities and individuals, to advance and protect human rights, and to optimize social justice. Focuses on policies and services for meeting the health, economic, psychological, and the social needs of the older adults and those in health care settings.

SWRK 258. Advanced Policy - Children and Families. 3 Units
Prerequisite(s): SWRK 251
Term Typically Offered: Fall, Spring
Building upon SWRK 251, this course examines the history of child and family services, introduces the students to theories and methods of policy analysis, and focuses on analysis of selected federal, state, and local policies specifically relevant to children and families, as well as how social workers influence policy formulation and implementation.
Note: Required for title IV-E students.

SWRK 259. International Social Work. 3 Units
Term Typically Offered: Fall, Spring
SWRK 261. Grant Writing and Resource Development. 3 Units
Term Typically Offered: Fall, Spring
Prepares students for resource and grant proposal development as well as grant project management and evaluation. Students will develop various skills including how to identify and communicate with appropriate funding sources conceptualize, write and submit a grant proposal prepare a grant budget; administer a grant funded program; and evaluate program outcomes, and peer reviews of grant proposals.

SWRK 262. Social Work Practice in Rehabilitation. 3 Units
Prerequisite(s): Admission to MHSA cohort and instructor permission.
Term Typically Offered: Fall, Spring
Reflects the current best practices of psychosocial rehabilitation, and pays particular attention to the nuances of those practice expectations within the context of the Mental Health Services Act of 2004. The course requirement for all students who are recipients of the mental health stipend in the Division of Social Work.

SWRK 268. Advanced Clinical Social Work with Older Adults. 3 Units
The focus of this course is on specialized practice with aging clientele. The curriculum is intended to help students adapt social work theory (person-in-environment), practice principles, standards and values to practice with older adults. This course includes a critical analysis of the theoretical underpinnings of gerontological thought and assists students to view aging through multiple perspectives with an examination of physiological, psychological and sociological phenomenon.

SWRK 295A. Field Instruction. 3 Units
Prerequisite(s): Must be classified graduate Social Work student and approval of the Field Director or designee.
Corequisite(s): SWRK 204A.
Term Typically Offered: Fall, Spring
Field Instruction
Note: Enrollment is limited to students who have secured an approved Field placement
Credit/No Credit

SWRK 295B. Field Instruction. 4 Units
Prerequisite(s): SWRK 295A and 295B; Must be classified graduate Social Work student and approval of the Field Director or designee.
Corequisite(s): SWRK 204B.
Term Typically Offered: Fall, Spring
Field Instruction
Note: Enrollment is limited to students who have secured an approved Field placement.
Credit/No Credit

SWRK 295E. Post Master’s Pupil Personnel Services Fieldwork. 3 Units
Prerequisite(s): Admission to Post Master’s PPS program.
Term Typically Offered: Fall, Spring
School based sites for the development of Pupil Personnel Services skills. Two days per week.
Credit/No Credit

SWRK 295F. Post Master’s Pupil Personnel Services Fieldwork. 3 Units
Prerequisite(s): Admission to Post Master’s PPS program.
Term Typically Offered: Fall, Spring
School based sites for the development of Pupil Personnel Services skills. Two days per week.
Credit/No Credit
SWRK 296A.  Field Instruction for Behavioral Health.  5 Units
Prerequisite(s): SWRK 204B, SWRK 295B
Corequisite(s): SWRK 206A
Term Typically Offered: Fall only

Field Instruction for Behavioral Health
Note: Enrollment is limited to students who have secured an approved field placement.

Credit/No Credit

SWRK 296B.  Field Instruction for Behavioral Health.  5 Units
Prerequisite(s): SWRK 206A, SWRK 296A
Corequisite(s): SWRK 206B
Term Typically Offered: Spring only

Field Instruction for Behavioral Health
Note: Enrollment is limited to students who have secured an approved field placement.

Credit/No Credit

SWRK 297A.  Field Instruction for Children & Families.  5 Units
Prerequisite(s): SWRK 204B, SWRK 295B.
Corequisite(s): SWRK 207A
Term Typically Offered: Fall only

Field Instruction for Children & Families
Note: Enrollment is limited to students who have secured an approved field placement.

Credit/No Credit

SWRK 297B.  Field Instruction for Children & Families.  5 Units
Prerequisite(s): SWRK 207A, SWRK 297A.
Corequisite(s): SWRK 207B
Term Typically Offered: Spring only

Field Instruction for Children & Families
Note: Enrollment is limited to students who have secured an approved field placement.

Credit/No Credit

SWRK 298A.  Field Instruction for Health & Aging.  5 Units
Prerequisite(s): SWRK 204B, SWRK 295B.
Corequisite(s): SWRK 208A
Term Typically Offered: Fall only

Field Instruction for Health & Aging
Note: Enrollment is limited to students who have secured an approved field placement.

Credit/No Credit

SWRK 298B.  Field Instruction for Health & Aging.  5 Units
Prerequisite(s): SWRK 208A, SWRK 298A, and advancement to candidacy
Corequisite(s): SWRK 208B
Term Typically Offered: Spring only

Field Instruction for Health & Aging
Note: Enrollment is limited to students who have secured an approved field placement.

Credit/No Credit

SWRK 299.  Special Problems.  1 - 3 Units
Prerequisite(s): Approval by faculty sponsor and division director.
Term Typically Offered: Fall, Spring

Individual research and directed reading. Written report required.
Credit/No Credit

SWRK 500.  Culminating Experience.  2 - 4 Units
Prerequisite(s): Advanced to candidacy. SWRK 210.
Term Typically Offered: Fall, Spring

Completion of either: A. Thesis (an original contribution to knowledge) OR B. Research Project (addition to technical/professional knowledge or application of knowledge through case study, field study, documentary report, substantial annotated bibliography, or article of publishable quality) OR C. Directed Study and Comprehensive Examination (seminar, portfolio, examination).

SWRK 501.  Advanced Research Methods.  2 Units
Prerequisite(s): SWRK 202, SWRK 204A, SWRK 204B, SWRK 210, SWRK 250 and Advancement to Candidacy
Term Typically Offered: Fall, Spring

This course offers a classroom structure to project-based research education. Class includes both qualitative and quantitative study design, theory construction, advanced methods of data analysis. This course expands on the knowledge gained from SWRK 210 (Methods of Research). Students will experience a mixture of advanced research content including: quantitative research designs, sampling, data collection and analysis, advanced quantitative research designs, sampling, data collection and analysis.

SWRK 502.  Integrative Capstone Project.  2 Units
Prerequisite(s): SWRK 501
Term Typically Offered: Fall, Spring

This course is designed to reflect the student's proficiency in the core competencies of the social work profession. The focus of this course is the identification of a social work problem, developing a research design which appropriately addresses the problem, and presentation of the findings. Students demonstrate professional competencies in: ethics, communication, diversity, theory, research, direct and indirect and indirect practice, leadership and organizational processes and evidence of a professional self.

BA in Social Work

Units required for Major: 48
Total units required for BA: 120

Program Description

The Bachelor of Arts in Social Work is a 48-unit program that prepares students for beginning, generalist Social Work practice. All lower division general education courses must be completed prior to beginning the
Social Work major. The curriculum consists of 42 units in professional foundation/beginning generalist requirement, 6 units of Social Work electives. Grades of "C" or better are required in all 48 units of the major. The student must agree to abide by the Code of Ethics of the National Association of Social Workers and engage in ethical practice in conformity with the Professional Code of Ethics.

Upon successful graduation with the BASW, graduated students will be able to, among other knowledge and skills, effectively demonstrate, apply, engage with, and evaluate the nine social work competencies that are mandated for accredited social work programs per the Council on Social Work Education. This will be demonstrated at the generalist level. The nine mandated competencies are: 1) Demonstrate ethical and professional behavior; 2) Engage diversity and difference in practice; 3) Advance human rights and social, economic, and environmental justice; 4) Engage in practice-informed research and research-informed practice; 5) Engage in policy practice; 6) Engage with individuals, families, groups, organizations, and communities; 7) Assess individuals, families, groups, organizations, and communities; 8) Intervene with individuals, families, groups, organizations, and communities; and, 9) Evaluate practice with individuals, families, groups, organizations, and communities.

Undergraduate students enroll in one academic year of field instruction (internship) during their senior year after successfully completing all prerequisites in their junior year. Field instruction is 16 hours per week for 32 weeks during two semesters for a total of 512 hours. Field instruction takes place between the hours of 8:00 a.m. - 5:00 p.m. on either Mondays/Wednesdays or Wednesdays/Fridays. Placements only begin in the fall semester and are arranged by the Director of Field Education during the preceding spring semester through an application and interview process. Students are placed in a social services agency and practice under the supervision of an experienced MSW Social Worker. Since Social Work is an applied profession, the student is expected to be able to put into practice the knowledge gained in the classroom in order to receive the BA degree in Social Work.

Students must be capable of meeting field site/organization eligibility requirements which normally include obtaining a Department of Justice clearance (passing a criminal background), being free of communicable diseases, having a valid driver's license, and automobile insurance. In addition to the prerequisites and corequisites noted below, other eligibility requirements are delineated in the Field Curriculum and Policy Guide which is accessible from the Division's website (http://www.hhs.csus.edu/swrk/field/). Declaration of Social Work as the student's major does not guarantee enrollment in field instruction.

Pre-Major Requirements for Social Work Undergraduate Program

The Pre-Major is a total of 12 units: 3 units from G.E. Area B2, 3 units in Area D (Part A), 3 units in Area D (Part B), and SWRK 95 (3 units).

Students who want to become a Pre-Major in Social Work are required to take the courses from the following three G.E. areas and SWRK 95 and earn a "B" grade or better ("B-" is not accepted). Students must also have at least 2.5 GPA to declare the major.

Recommended Lower Division Preparation

Completion of all lower division General Education requirements is a prerequisite for taking courses in the Social Work major. Lower division courses in the following areas are strongly recommended and most can be taken as part of completing GE requirements. These courses provide the basis for a Liberal Arts perspective which is required by the Council on Social Work Education, the accrediting organization for the professional Social Work degree: written communication; critical thinking; physical science; a biology course with human anatomy content; quantitative reasoning; world civilizations; introduction to the arts; humanities; psychology; sociology; cultural diversity; American Institutions; and foundations in social and behavioral sciences. Community college transfer students should consult a counselor to identify courses which qualify for General Education transfer credit.

Minimum Grade Requirement

Grades of "C" or better are required in all 48 units of the major.

Total Units 40-43

1 To help you complete your degree in a timely manner and not take more units than absolutely necessary, there are ways to use single courses to meet more than one requirement (overlap). For further information, please visit the General Education page (p. 1103).

Note: There is no way to list all possible overlaps so please consult with a professional advisor. The Academic Advising Center can be visited online (http://www.csus.edu/acad/), by phone (916) 278-1000, or email (advising@csus.edu).

Department recommends BIO 1, BIO 10, BIO 20, or ANTH 1 to meet Area B2.

Department recommends ECON 1A, ECON 1B, PSYC 2, or SOC 1 to meet Area D (Part A).

Department recommends CRJ 1, GER 100, SOC 3, or SOC 10 to meet Area D (Part B).

Required in Major; also satisfies GE.

Master of Social Work

Total units required for MSW: 60

Program Description

The Master of Social Work program is a 60-unit program that prepares students for advanced, autonomous Social Work practice. The curriculum is composed of two semesters of professional foundation and two semesters of a specialized curriculum. In the foundation part of the
program, all students take a core of courses designed to provide them with the knowledge and skills expected of all professional Social Workers. The advanced curriculum prepares graduates for specialized practice in 1 of 3 areas: behavioral health; child, adolescent and family; or health and aging. The curriculum consists of a generalist practice foundation year and an advanced practice second year. Also required are advanced courses in Social Work practice and policy, and specialized practice electives are recommended.

Graduate students enroll for two years of field instruction. In the first year, they are assigned to a social service agency for two days a week (8 a.m. to 5 p.m., Thursday and Friday). First year students must be available Thursdays and Fridays (8 a.m. to 5 p.m.) for field instruction in order to complete the concurrent program. In the second year, they are assigned to an agency in their specialized practice area for three days a week (8 a.m. to 5 p.m., Monday, Tuesday, and Wednesday). These field instruction requirements may only be fulfilled during regular working hours. Students are responsible for their own transportation to field instruction sites and for required professional liability insurance.

Students must be capable of meeting field site/organization eligibility requirements which include obtaining a Department of Justice clearance (passing a criminal background), being free of communicable diseases, having a valid driver’s license, and automobile insurance. In addition to the prerequisites and corequisites noted below, other eligibility requirements are delineated in the Field Curriculum and Policy Guide which is accessible from the Division’s field website (http://csus.edu/hhs/sw/fieldeducation/). Admission into the graduate program does not guarantee enrollment in field instruction.

Students should develop a realistic plan for financial support for the period of time they are in school. Information about Financial Aid is included in the University’s Application for Admission booklet. The Division of Social Work cannot guarantee courses on days and times that will not conflict with employment hours. The program offers some courses on weekends and all required courses have at least one evening section. In addition to the two-year full time program, the division also offers a three-year program option, a weekend cohort program, and advanced placement.

Note: Please contact the Division of Social Work for a copy of the evaluation criteria for admission to the Master of Social Work program.

Admission Requirements
To be considered for admission to the Master of Social Work program, applicants must have:

- a baccalaureate degree from an accredited college or university;
- passed an approved course in statistics with a grade of "C" or better;
- completed a course with human biology content with a grade of "C" or better;
- a minimum GPA of 2.8 for the last 60 units of coursework;
- demonstrated writing proficiency; and
- completed the Liberal Arts foundation (GE requirements).

The Graduate Record Exam (Analytical Writing Score) is required.

The Analytical Writing score is weighted and combined with the last 60 unit GPA and the application review scores. There is no minimum score requirement for the GRE Analytical Writing Portion.

If admitted applicant scores less than 4.5 on the GRE Writing exam, she/he would not necessarily be eliminated from the pool, however, would be required to take and pass a writing intensive course in the summer, prior to Fall enrollment.

All applications are reviewed by Faculty Reviewers. Previous academic work, experience in human services, personal development, and potential for successful professional practice are important considerations in the evaluation of applicants.

Admission Procedures
Application materials are available from the Division of Social Work’s admissions office and our Web site at http://www.csus.edu/hhs/sw/msw/ mswappplication.html. For more admissions information and application deadlines please visit http://www.csus.edu/gradstudies/.

All applicants must complete an online university application for admission and a Sacramento State Division of Social Work Application.

Students rank their preferred specializations based upon the three options:

- Behavioral Health
- Children & Families
- Health & Aging.

All prospective graduate students, including Sacramento State graduates, must submit the following to the Division of Social Work Admissions Office:

- an application for admission and supplemental information needed by the Division of Social Work; including the choice of Specialized Area of practice in order of priority.
- an indication whether the application is for the two- or three-year program;
- three letters of recommendation from academic or employment references; and
- one set of unofficial transcripts from all colleges and universities attended, other than Sacramento State.

Applicants must submit the following to the Sacramento State Office of Graduate Studies, River Front Center 215, (916) 278-6470:

- an online application for admission; and
- one set of official transcripts from all college and universities attended, other than Sacramento State.

Attendance at an advising session prior to the beginning of classes is required. Students unable to attend must make special arrangements for the initial advising prior to the beginning of courses.

Advanced Standing Program
The Advanced Standing Program is available to a limited number of students who have a baccalaureate degree in Social Work from a Social Work program accredited by the Council on Social Work Education. The minimum GPA is 3.3 in the Social Work major. Minimum grades of "B" or "C+" must have been earned in undergraduate professional foundation coursework. Students who have a GPA of 3.5 or higher but have one of their equivalent undergraduate courses with the grade of "B" may apply for advanced standing. The degree must have been awarded within five years prior to application for admission to the graduate program. Submission of a letter of recommendation from a field instructor and from a Social Work faculty member of the college from which graduated
and an acceptable research prospectus for a thesis/research project is required before awarding advanced placement. Advanced placement students take 32 units in the second year of the MSW program. Advanced placement is determined only during the admissions process.

Minimum Units and Grade Requirement for the Degree

Units require for the MSW: 60

Minimum Cumulative GPA: 3.0

Students must take all required courses in a prescribed, sequential order to advance to the next level of courses. The program is normally completed in four semesters of full time study, beginning in the fall semester (a three-year program is also available; requirements are the same). The program consists of 28 units of professional foundation common courses that all students must take and 32 units of the concentration curriculum which consists of advanced content and nine units of electives. **Graduate students who achieve a grade of "C-" or lower will not be able to credit that course toward their degree; and, must maintain a minimum 3.0 GPA to remain in the program. A student could receive two "C" grades in the Master's program and continue as long as their GPA does not go below a 3.0.**

**Note:** The faculty of the Division of Social Work may require a student to leave under specified terms, terminate a student's enrollment, or decline to award a degree if the Director of the Division, upon the recommendation of faculty, determines that this is in the best interests of the division or the community which it serves or that a student is not qualified for admission to the Social Work profession because of factors other than academic standing. Determination about factors other than academic standing are made in accordance with the NASW Code of Ethics and the Division of Social Work's Student Performance Standards.

All professional Social Work programs are required to provide foundation content that consists of the knowledge, values, and skills that are basic for practice in any setting situation, and which prepare one for more advanced, specialized learning. Six areas of study are introduced in the foundation: Social Work research, Social Work practice, human behavior in the social environment, social welfare policy, multicultural theory, practice, and field instruction.

In the second year of the program students will be asked to select from three specializations:

- Behavioral Health
- Children & Families
- Health & Aging

**Advancement to Candidacy**

Each student must file an application for Advancement to Candidacy indicating a proposed program of graduate study. This procedure should begin as soon as the classified graduate student has:

- removed any grade deficiencies;
- completed at least 28 units; graduate students who achieve a grade of "C-" or lower will not be able to credit that course toward their degree;
- a minimum 3.0 GPA required
- obtained approval of culminating experience; and
- taken a Graduate Writing Intensive (GWI) course in their discipline within the first two semesters of coursework at California State University, Sacramento.

Advancement to Candidacy forms are available on the Office of Graduate Studies website. The student fills out the form after planning a degree program in consultation with his/her Advisor. The completed form is approved by the Division of Social Work, Graduate Director and the Office of Graduate Studies.

Every effort is made to match the second year specialized area of practice student with a SWRK 500, SWRK 501 or SWRK 502 experience that is designed as an advanced research experience within the student's selected area of specialized practice.

College of Natural Sciences and Mathematics

College Overview

The College of Natural Sciences and Mathematics emphasizes hands on experience and interaction with professors. Students in the classroom have access to state-of-the art instruments and unique facilities such as the two-story anechoic chamber for measuring sound and the well field for monitoring ground water. The College offers strong academic programs in Biological Sciences, Chemistry, Geography, Geology, Mathematics and Statistics, and Physics and Astronomy.

The College's six academic departments collectively offer thirteen baccalaureate degree programs, eight minor concentrations, four teaching credential programs, four certificate programs, and six Master's degree programs, including the Professional Science Master's. Unique strengths of programs within the College include the following:

Program Descriptions

Program Descriptions

Biology

The Department of Biological Sciences offers a wide array of educational opportunities in biology. Students may enroll in programs designed to give broad training across the biological sciences and earn a Bachelor of Arts or Bachelor of Science degree in General Biology. Students wishing to specialize in a sub-discipline of biology may enroll in several
concentrations within the Bachelor of Science Program. Available concentrations include Biomedical Sciences, Cell and Molecular Biology, Clinical Laboratory Science, Forensic Biology, Microbiology, and Ecology, Evolution and Conservation. The Department also offers the Minor in Biological Sciences to students from other Departments. The location of Sacramento State is ideal for diverse field trip experiences from the Sierra to the Pacific as well as both laboratory and field internship opportunities with County, State, and Federal agencies. The Department also offers state-of-the-art laboratory facilities including students access to the Advanced Cell Analysis Laboratory, the Center for Interdisciplinary Molecular Biology, and Moss Landing Marine Laboratory.

At the Graduate level, the Department of Biological Sciences offers both general and specialized Masters of Arts and Masters of Science degree programs in biological Sciences. This includes a Masters of Arts degree in Stem Cell Biology, funded by the California Institute of Regenerative Medicine in collaboration with the University of California, Davis. The Department also offers Masters of Science concentrations in General Biology, Cell and Molecular Biology, and Ecology, Evolution and Conservation.

Graduates from the Department of Biological Sciences may pursue a variety of professions, including health and medicine, biotechnology and other laboratory-based research, and work with state and federal agencies. Many also pursue graduate education within one of the many sub-disciplines of biology.

Chemistry
Chemistry prepares students for a wide variety of careers in areas such as environmental chemistry and toxicology, materials science, government and industry labs, biotechnology, high school science teaching, medicine and related health sciences, pharmacy and pharmacology, patent law, computational chemistry, forensic analysis, and many more. The Department of Chemistry offers the BS in Chemistry (certified by the American Chemical Society), a BS in Biochemistry, and BA degrees including concentrations in Biochemistry and Forensic Chemistry. A Chemistry Minor is also offered. The Department offers an MS in Chemistry and an MS in Chemistry, Biochemistry concentration. A signature feature of our programs is the extensive, hands-on experience with modern instrumentation. Our graduates are known in the region for their knowledge and ability to operate instruments. Every undergraduate degree program includes a capstone laboratory research experience in one or more upper division labs which further prepares students for industry employment and preparation for PhD programs.

Geography
Geography prepares students to do mapping and spatial analysis, international work, planning, and environmental management. The Department of Geography offers a BA degree that provides each student both breadth and specialization. Four concentrations are available: Geographic Information Systems (GIS) and Analysis, Human Geography, Metropolitan Area Planning, and Physical Geography. The Department also offers minors in Geography and GIS. Strengths of the program include numerous opportunities for field work and internships.

Geology
Geology is an interdisciplinary science that examines the processes that shape Earth’s resources, hazards and environments. The Geology Department offers BA, BS, and MS degrees in Geology, a BA in Earth Science, and a Minor in Geology. This Department, in conjunction with the on-campus staff of the United States Geological Survey, offers excellent preparation for careers in Geology and graduate study.

Mathematics and Statistics
The Department of Mathematics and Statistics offers a variety of options to cater to the particular interests of its majors. The flexibility of the major allows students to pursue their BA degree in pure mathematics, applied mathematics and statistics, or the teaching program. Graduates have met with much success in finding employment in both the public and private sectors, particularly in high school teaching and local private industry. The Department also offers Minors in Mathematics and Statistics, and a MA degree for those who wish to pursue advanced study that can open opportunities to teach at the community college level, to pursue a PhD in mathematics, or to take jobs in industry or government.

Physics and Astronomy
The Department of Physics and Astronomy offers several degree options in Physics. The BS in Physics is suited for those planning to earn an advanced degree in physics or a related field. The BS with the Applied Physics Concentration combines advanced physics coursework with practical skills such as instrumentation and computing for careers in the high technology sector. Our traditional BA degree in physics provides a flexible, yet rigorous program in the liberal arts tradition, while those electing the BA with the Teacher Preparation Concentration will be very well prepared for a career as a high school or middle school educator. The Department also offers Minors in Physics and Astronomy and Certificates in Scientific Instrument Development and Scientific Computing and Simulation.

The College also supports a number of college-wide programs. Some of the larger ongoing programs are:

Center for Science and Math Success
The Center for Science and Math Success (Success Center) is housed in the College of Natural Sciences and Mathematics (NSM) and provides innovative and comprehensive student and academic support services to students in math and science courses. Programs include:

- Peer Assisted Learning (PAL) (https://www.csus.edu/college/natural-sciences-mathematics/peer-assisted-learning-program-pal/)
- Pre-STEM Teaching (https://www.csus.edu/college/natural-sciences-mathematics/center-science-math-success/pre-stem-teaching.html)
- Undergraduate Research (https://www.csus.edu/college/natural-sciences-mathematics/center-science-math-success/)

The Success Center empowers students to achieve their personal and professional goals through equity-based programs that cultivate lifelong learning skills, leadership development and a sense of belonging community. For more information, you can contact the Success Center via email (scienceandmathsuccess@csus.edu) or visit their website (https://www.csus.edu/college/natural-sciences-mathematics/center-science-math-success/).
Center for Mathematics and Science Education
The mission of the MASE Center at Sacramento State is to improve the quality of mathematics and science teaching and learning in the schools of the Sacramento region. The MASE Center supports faculty from the Colleges of Natural Sciences and Mathematics and Education to develop and administer professional development projects for K-12 teachers and education research grants to improve the teaching of math and science at all levels. The MASE Center houses the Sacramento Area Science Project and the Sacramento State Mathematics Project, and hosts monthly short courses for teachers such as Science in the River City (SIRC) and Mathematics Saturday Seminars. For more information, contact Director Rich Hedman at (916) 278-5487 or via email (hedmanrd@csus.edu). For more information about the Center for Mathematics and Science Education, please click here (http://www.csus.edu/mase/).

Moss Landing Marine Laboratories
Moss Landing Marine Laboratories are located on Monterey Bay. The facility is operated by a consortium of six California State University campuses and offers upper division and graduate courses in marine sciences.

Premedical and Preprofessional Programs
The College of Natural Sciences and Mathematics offers coursework which allows students to prepare for medical, dental, optometry, podiatry, pharmacy, and veterinary school. Information on the preparation necessary for entry into these health professions is found in the Premedical pages of this catalog.

Subject Matter Preparation (Pre-Credential Preparation)
California State University, Sacramento has programs for students who are interested in becoming high school or middle school teachers in science or mathematics. These programs consist of two parts: subject matter preparation programs (in which students learn the background in the subject matter they will teach) and credential programs (in which students develop the knowledge and skills related to how to teach). The College of Natural Sciences and Mathematics offers subject matter preparation programs in Biological Sciences, Chemistry, Mathematics, and Physics. Single Subject Teaching Credential programs are offered by the California State University, Sacramento College of Education. Additionally, California State University, Sacramento offers a blended program in mathematics, in which students work on their subject matter preparation and teaching credential at the same time. Information on subject matter programs in Biological Sciences, Chemistry, and Physics is found in the Science Subject Matter Program pages in this catalog. Information on the subject matter program in mathematics and the blended program in mathematics is found in the Mathematics and Statistics pages.

Biological Sciences
College of Natural Sciences and Mathematics

Program Description
The Department of Biological Sciences offers both undergraduate and graduate degree programs. At the undergraduate level, students are able to earn a Bachelor of Arts degree, a Bachelor of Science degree, or a Minor in Biological Sciences. Within the Bachelor of Science degree program students may focus their work by selecting one or more of the following concentrations: Biomedical Sciences, Cell and Molecular Biology, Clinical Laboratory Sciences, Ecology, Evolution and Conservation, Microbiology; or students may choose to obtain the Bachelor of Science in General Biology.

At the Graduate level, students may earn a Master of Arts or Master of Science degree in Biological Sciences and may also focus their work by pursuing a concentration in Ecology, Evolution, and Conservation or in Molecular and Cellular Biology within the Master of Science in Biological Sciences.

Degree Programs
BA in Biological Science (p. 811)
BS in Biological Science (p. 820)
BS in Biological Science (Biomedical Sciences) (p. 812)
BS in Biological Science (Cell and Molecular Biology) (p. 814)
BS in Biological Science (Clinical Laboratory) (p. 816)
BS in Biological Science (Ecology, Evolution, and Conservation) (p. 818)
BS in Biological Science (General Biology) (p. 820)
BS in Biological Science (Microbiology) (p. 822)
Biological Sciences Honors Program (p. 812)
Minor in Biological Science (p. 827)
Subject Matter Program (Pre-Credential Preparation) (p. 835)
Certificate in Issues in Natural Resource Management (p. 823)
Cooperative Education Program (Work Experience) (p. 824)
MA in Biological Science (General) (p. 826)
MA in Biological Science (Stem Cell) (p. 824)
MS in Biological Science (Ecology, Evolution, and Conservation) (p. 827)
MS in Biological Science (General) (p. 831)
MS in Biological Science (Molecular and Cellular Biology) (p. 829)

Special Features

• Laboratory experiences are included with most major’s courses, giving students an exceptional level of on-hands training during the degree program.
• The Department maintains a large collection of thousands of living and preserved plants and animals that are used for instruction, research, and public outreach. A complete list of the Department’s current collections can be found on the Department’s webpage.
• Students have the opportunity to engage in research in a wide range of projects with individual faculty and through the courses affiliated with the SIRIUS Project.
• The campus is located on the American River with the Sierra Nevada and Pacific Coast equally accessible, providing field biology students the opportunity to study an extraordinary number of varied habitats.
• Sacramento State is one of the seven participating CSU campuses at Moss Landing Marine Laboratories (MLML) near Monterey.
• Located in the State Capital, Sacramento State provides a unique opportunity for students to become involved with various State and Federal agencies through biological internships and employment.
• Public agencies, hospitals, clinics, and private health practices in the Sacramento area provide opportunities for students interested in the health care fields.

BIO 1. Biodiversity, Evolution and Ecology. 5 Units
General Education Area/Graduation Requirement: Life Forms (B2), Laboratory (B3)
Term Typically Offered: Fall, Spring, Summer
Introduction to properties of life and cells leading to genetic and biological diversity. Survey of biological diversity emphasizing variation leading to natural selection; introduction to ecological concepts within an evolutionary framework; a survey of ecosystems and global climate change. Development of scientific skills will be emphasized. Designed for science majors. Lecture three hours; laboratory three hours; activity two hours; fee course.
Note: Field trips may be required.
Fee course.
Field trip(s) may be required.

BIO 2. Cells, Molecules and Genes. 5 Units
Prerequisite(s): BIO 1 and CHEM 1A.
Term Typically Offered: Fall, Spring
Introduction to molecular and cellular biology and genetics. Topics include biomolecules, cell structure and function, cellular energetics, molecular flow of information, cell division, and genetic inheritance. Development of scientific skills and a scientific mindset will be emphasized throughout the course, particularly in lab exercises and activities. Designed for science majors. Lecture three hours; laboratory three hours; activity two hours.
BIO 7.  Introduction to the Science of Biology.  4 Units
General Education Area/Graduation Requirement: Laboratory (B3), Life Forms (B2)
Term Typically Offered: Fall, Spring

Introduction to major concepts of biology, including properties of living things, cells and their molecular constituents, the unity and diversity of organisms, genetics, ecology, evolution, and the scientific methods of investigation employed by biologists. Satisfies requirements in biology for students planning to obtain the Multiple Subject Teaching Credential. Lecture three hours; laboratory three hours. Fee course.

BIO 9.  Our Living World: Evolution, Ecology and Behavior.  3 Units
General Education Area/Graduation Requirement: Life Forms (B2)
Term Typically Offered: Fall, Spring

Designed for non-majors, this course is an introduction to the biological science behind important issues that face us today, such as those surrounding evolution, endangered species, conservation of ecosystems, and the behavior of organisms. By gaining an understanding of the scientific approach and the principles of evolution, ecology and behavior, students will be equipped to evaluate scientific developments and arguments in these and other issues as informed citizens. Lecture three hours.

Note: Not open to Biological Sciences majors or students who have received credit for BIO 1 or BIO 2.

BIO 10.  Basic Biological Concepts.  3 Units
General Education Area/Graduation Requirement: Life Forms (B2)
Term Typically Offered: Fall, Spring

An intensive introductory course for non-majors who will take additional course work in biology or related disciplines, including the allied health sciences. Introduction to the biological sciences with strong emphasis on cellular structure and metabolism, molecular biology and genetics, as well as concepts and principles common to all living systems including ecology and evolution. Lecture three hours.

Note: Not open to Biological Sciences majors or students who have received credit for BIO 1 or BIO 2.

BIO 15L.  Laboratory Investigations in Biology.  1 Unit
Prerequisite(s): BIO 9, BIO 10 or BIO 20.
Corequisite(s): BIO 9, BIO 10 or BIO 20.
General Education Area/Graduation Requirement: Laboratory (B3)
Term Typically Offered: Fall, Spring

Introductory laboratory investigation of the major principles of biology, including properties of all living things, the unity and diversity of organisms, structure and function of cells, energy and metabolism, genetics, ecology, evolution, and the scientific methods of investigation employed by biologists. Laboratory three hours.

Note: Not open to Biological Sciences majors or students who have received credit for BIO 1 or BIO 2.

BIO 20.  Biology: A Human Perspective.  3 Units
General Education Area/Graduation Requirement: Life Forms (B2)
Term Typically Offered: Fall, Spring

Introduction to biological concepts with emphasis on their application to humans. Topics include: Evidenced-based decision making with respect to food, nutritional supplements, drugs, pathogens, and biotechnology. How heredity and evolution contribute to our understanding of personality, sex, behavior, addiction, disease, and aging is also discussed. Lecture three hours.

Note: Not open to majors in biological sciences and/or students who have received credit for BIO 10.

BIO 22.  Introductory Human Anatomy.  4 Units
Prerequisite(s): BIO 1, BIO 2 or BIO 10
Term Typically Offered: Fall, Spring

Introduction to the study of the gross and microscopic structure of the human body using a systemic approach. Lecture three hours; laboratory three hours. Fee course.

Fee course.

BIO 25.  Human Anatomy and Physiology I.  4 Units
Term Typically Offered: Fall, Spring

BIO 25/26 series provides an introduction to the structure and function of the major organ systems of the human body. BIO 25 offers basic terminology and concepts pertaining to the disciplines of anatomy and physiology, including structure/function relationships, homeostasis, and organizational levels; and provides an introduction to the structure and function of the muscular and nervous systems.

Note: Not open to students who have successfully completed BIO 22 and BIO 131, or an equivalent combination of separate anatomy and physiology courses. Lecture three hours; laboratory three hours. Fee course.

Fee course.

BIO 26.  Human Anatomy and Physiology II.  4 Units
Prerequisite(s): BIO 25 or instructor permission.
Term Typically Offered: Fall, Spring

BIO 25/26 series provides an introduction to the structure and function of the major organ systems of the human body. BIO 26 provides an introduction to the structure and function of the cardiovascular, respiratory, renal and digestive systems, and emphasizes homeostatic control mechanisms.

Note: Not open to students who have successfully completed BIO 22 and BIO 131, or an equivalent combination of separate anatomy and physiology courses. Lecture three hours; laboratory three hours. Fee course.

Fee course.

BIO 30.  Anatomy & Physiology - Brief Course.  4 Units
Prerequisite(s): Physical Education majors only
Term Typically Offered: Fall, Spring

An overview of the basic anatomy and physiology of all systems. Designed to meet the standards for the Physical Education Subject Matter Program, but may also may prepare students for study in other health-related fields.
BIO 39. Microbiology for Allied Health Students. 4 Units
Prerequisite(s): BIO 10; CHEM 5 or CHEM 6A and CHEM 6B or equivalent.
Term Typically Offered: Fall, Spring

Introduction to micro-organisms, particularly bacteria and viruses, with emphasis on health care-related applications of microbiology using case studies. Laboratory work includes aseptic techniques, methods of cultivating and identifying bacteria, demonstration of microbial properties and will provide practice with basic microbiological skills. Lecture three hours; laboratory three hours. Fee Course.
Note: Does not satisfy microbiology requirement for Biological Sciences majors.

Fee course.

BIO 100. Introduction to Scientific Analysis. 3 Units
Prerequisite(s): BIO 1, BIO 2, and STAT 1; declared Biological Sciences majors only or instructor consent.
General Education Area/Graduation Requirement: Further Studies in Area B (B5)
Term Typically Offered: Fall, Spring

Prepares students for upper division Biology coursework and careers in science using a curriculum centered on critical thinking and evidence-based instruction and activities. Covers core competencies required for the practice of science: 1) evaluative reading, 2) written and oral communication, 3) analysis/quantitative reasoning, and 4) experimental design. Online lecture two hours. In-person laboratory three hours.
Note: Course cannot be taken concurrently with or after taking BIO 167.

BIO 102. The Natural History of Plants. 3 Units
Prerequisite(s): A college course in biology or instructor permission.
Term Typically Offered: Fall, Spring

Major plant communities of California provide a framework for understanding the interrelationships of natural environments and the dominant trees and shrubs of these areas. Identification of these species and the wildflowers of the communities are emphasized in the lab and field trips. Designed for minors in biology or for those with an interest in their natural surroundings, but is acceptable for majors who have not completed BIO 112. Lecture one hour; laboratory six hours. Fee course.
Fee course.
Field trip(s) may be required.

BIO 103. Plants and Civilization. 3 Units
Prerequisite(s): BIO 10 or equivalent.
Term Typically Offered: Fall, Spring

Study of the significance of plants in the development of human civilization. Emphasis will be placed on the botanical, sociological and economic aspects of plants useful to humans. Lecture three hours.

BIO 104. Physiology of Human Reproduction. 3 Units
Prerequisite(s): BIO 1, BIO 2 or BIO 10.
Term Typically Offered: Fall only

Study of the physiology of human reproduction. Topics to be covered include: gametogenesis, the basis of fertility, conception, prenatal development, parturition, lactation and the physiology of contraception. Lecture three hours.

BIO 105. Life in the Ocean. 3 Units
General Education Area/Graduation Requirement: Further Studies in Area B (B5)
Study of marine life and ocean ecosystems. Exploration of the unique adaptations of marine life, how marine organisms interact with their environment, diversity of marine habitats from coral reefs to deep sea, and conservation. Does not count toward the Biological Sciences Major.

BIO 106. Genetics: From Mendel to Molecules. 3 Units
Term Typically Offered: Fall, Spring

Introduction to the principles of genetics and scientific approaches used to define those principles. The physical basis of heredity, the impact of selective breeding and genetic engineering will be discussed. Lecture two hours; discussion one hour.
Note: BIO 10 recommended.

BIO 109. Biology of Dinosaurs. 3 Units
General Education Area/Graduation Requirement: Further Studies in Area B (B5)
Introduction to the biology of the dinosaurs. Dinosaurs came in a vast array of shapes and sizes and exemplify biodiversity. This course will examine the dinosaurs in an evolutionary framework, discussing their origin, the major lineages, phylogeny and what they look like today. The course will take advantage of the recent surge in scientific investigations into the biology of dinosaurs, such as parental care, sexual selection, group living, flight and feathers. Does not count toward the Biological Sciences Major.

BIO 112. Plant Taxonomy. 4 Units
Prerequisite(s): BIO 1 and BIO 2.
Term Typically Offered: Spring only

Spring flora of central California is used as the focus of study in the classification and identification of native vascular plants. Lecture two hours; laboratory six hours. Field trips may be required. Fee course.
Fee course.
Field trip(s) may be required.

BIO 113. Evolution and Speciation in Flowering Plants. 3 Units
Prerequisite(s): BIO 1 and BIO 2 or equivalent.
Term Typically Offered: Fall only – even years

A survey of the important tools and mechanisms used to study speciation in plants. Topics include the molecular basis of evolutionary change, intraspecific genetic variation at both the local and landscape levels, theory regarding mechanisms of speciation, and the importance of polyploidy. Readings will be from both a text and from the primary literature, and will include in-depth discussions of historical and modern studies in plant evolution. Lecture three hours.

BIO 115. Introduction to Neuroscience. 4 Units
Prerequisite(s): PSYC 2 and PSYC 8; PSYC or BIO majors only. PSYC 9 recommended.
Term Typically Offered: Fall, Spring

Investigation of the structure and function of the central nervous system including neuroanatomy and neurophysiology, sensorimotor integration. The lectures and readings emphasize the empirical questions, techniques and methods used in neuroscience research. Laboratory exercises focus on gross- and micro- neuroanatomy, models of membrane electrophysiology and motor system function. Lecture/discussion three hours; laboratory three hours.
Cross Listed: PSYC 115; only one may be counted for credit.

<td>Plant Anatomy and Physiology</td>
<td>4</td>
<td>BIO 1 and BIO 2.</td>
<td>Spring only</td>
<td>An integrative examination of our current understanding of plant structure and function. Students will apply fundamental principles of cell and molecular biology, evolution, and ecology to understand the relationships between plant anatomy and plant physiology that have enabled plants to achieve such a high level of success as primary producers on our planet. Lecture three hours, laboratory three hours. Fee course.</td>
</tr>
<tr>
<td>BIO 130</td>
<td>Histology</td>
<td>3</td>
<td>BIO 2</td>
<td>Fall only</td>
<td>Study of the morphology and physiology of cells in primary normal human tissues and the arrangement and adaptations of tissues in organs and organ systems. The characteristics and properties of abnormalities in human tissues will be covered if time permits. Lecture two hours; laboratory three hours.</td>
</tr>
<tr>
<td>BIO 131</td>
<td>Systemic Physiology</td>
<td>4</td>
<td>CHEM 1B or CHEM 6B and BIO 1 or BIO 2 or BIO 10 or BIO 22.</td>
<td>Fall, Spring</td>
<td>Physiology of organ systems with emphasis on control and integration of system function. Experiments using humans and selected vertebrate animal models are performed in the laboratory to illustrate functional characteristics of organ systems discussed in lecture and to provide direct experience with techniques, recording systems, and methods of data analysis commonly used in physiology and related fields. Lecture three hours; laboratory three hours. Fee course.</td>
</tr>
</tbody>
</table>
BIO 131A. Advanced Problems in Physiology. 1 Unit
Corequisite(s): BIO 131
Term Typically Offered: Fall, Spring

Advanced problem-solving in physiology designed for students concurrently enrolled in BIO 131. Students explore solutions to challenging problem sets under the direct supervision of an experienced section leader. Discussion: two hours.
Credit/No Credit

BIO 132. Neurophysiology. 3 Units
Prerequisite(s): BIO 131 or both BIO 25 and BIO 26.
Term Typically Offered: Fall, Spring

Organization and function of the nervous system will be explored. Topics include mechanisms of communication between neurons, integration of sensory and motor systems, and functional brain systems. Diseased states will be introduced, as appropriate. Lecture three hours.

BIO 133. Cardiovascular, Respiratory and Renal Physiology. 3 Units
Prerequisite(s): BIO 131.
Term Typically Offered: Fall only

Advanced consideration of the integrated physiology of the cardiovascular, respiratory, and renal systems, including acid-base physiology. Advanced problem-solving, analysis of case studies, and interpretation of experimental findings will be included. Lecture three hours.

BIO 134. Medical Mycology. 3 Units
Prerequisite(s): BIO 139.
Term Typically Offered: Spring only – even years

Study of the morphology, cultural characteristics and classification of fungi which are pathogenic for humans, as well as fungi which appear as common contaminants. Lecture two hours; laboratory three hours. Fee course.

BIO 135. Endocrinology. 3 Units
Prerequisite(s): BIO 121.
Term Typically Offered: Fall only

Advanced consideration of the principles of endocrinology with special emphasis on the role of hormones in growth, metabolism, stress (including the hormonal interactions during exercise) and disease. Various endocrine disorders, will serve as the model for case studies, current literature analysis and advanced problem-solving activities. Lecture three hours.

BIO 139. General Microbiology. 4 Units
Prerequisite(s): BIO 184; CHEM 20 or CHEM 24
Term Typically Offered: Fall, Spring

Introduction to microorganisms, particularly bacteria and viruses, their physiology and metabolism. Laboratory work includes aseptic techniques, methods of cultivating and identifying bacteria, and demonstration of microbial properties. Lecture three hours; laboratory three hours. Fee course.

BIO 140. Medical Microbiology and Emerging Infectious Diseases. 3 Units
Prerequisite(s): BIO 39 or BIO 139.
Term Typically Offered: Spring only

Lectures, discussions, and readings regarding infectious viruses, bacteria, fungi, and parasites, with an emphasis on highly relevant pathogens including emerging infectious agents and microbes that are regionally endemic. The clinical syndrome, along with the molecular and cellular aspects of the course of infection of each pathogen will be discussed. Additionally, the history of microbiology and medicine as well as a brief overview of laboratory methods used for diagnosis will also be covered. Lecture three hours.
Note: BIO 140 cannot substitute for BIO 144 in the CLS concentration in Biological Sciences.

BIO 143. General Virology. 3 Units
Prerequisite(s): BIO 121 and BIO 139
Term Typically Offered: Spring only

Lectures and demonstrations on the fundamental characteristics and properties of plant, animal and bacterial viruses. Lecture three hours.

BIO 144. Pathogenic Bacteriology. 4 Units
Prerequisite(s): BIO 139.
Term Typically Offered: Fall only

Morphological, physiological and immunological characteristics of pathogenic bacteria. In the laboratory, pure culture studies are emphasized. Lecture two hours; laboratory six hours. Fee course.

BIO 145. The Diversity of Microorganisms. 4 Units
Prerequisite(s): BIO 139.
Term Typically Offered: Spring only

Isolation, cultivation and characterization of a wide variety of soil and water microbes from natural habitats using a variety of culture and non-cultural based techniques; natural habitats also will be examined directly for the numbers and varieties of microbes which are present using bioinformatic and statistical tools. Lecture two hours; laboratory six hours.

BIO 149A. Immunology. 3 Units
Prerequisite(s): BIO 121 and BIO 139
Term Typically Offered: Fall only

Nature of antigens, antibodies and their reactions. The development of the immune response and its role in immunity and pathology. Lecture two hours.

BIO 149B. Immunology and Serology Laboratory. 1 Unit
Prerequisite(s): BIO 139, BIO 149A.
Term Typically Offered: Not offered

Laboratory exercises designed to provide familiarity with common clinical laboratory procedures in serology. Laboratory three hours. Fee course.
Fee course.
BIO 149C. Advanced Problems in Immunology. 1 Unit
Prerequisite(s): BIO 139 and CHEM 161.
Corequisite(s): BIO 149A.
Term Typically Offered: Fall only

Advanced problem-solving in immunology designed for students concurrently enrolled in BIO 149A. Discussions and problem sets are focused on the medical, clinical, and biotechnology applications of immunology. Discussion one hour.

Credit/No Credit

BIO 150. Forensic Biology. 3 Units
Prerequisite(s): BIO 1, BIO 2 and BIO 184.
Term Typically Offered: Spring only

Principles governing the application of biology and biological statistics to solve crimes. Topics include evidence examination and preservation, presumptive and confirmatory serological tests, hair comparison, generation and statistical analysis of mitochondrial and nuclear DNA profiles, structure and administration of the modern crime laboratory, and the role of the criminalist in the U.S. court system. Lecture two hours; laboratory three hours.

Fee course.

Note: Not offered every semester

BIO 151. Advanced Laboratory Techniques in Forensic Biology. 2 Units
Prerequisite(s): BIO 150 or instructor permission.
Term Typically Offered: Fall only

Laboratory exercises focusing on current research problems and skills in forensic serology, DNA typing, and court testimony. Topics will include DNA mixture and low copy number interpretation, advanced techniques in serological testing, research ethics, as well as skills for effective communication in the courtroom. Topics may also include Y-STR typing, animal and plant DNA identification and typing, microbial forensics, somatic mosaicism, ELISA specificity and sensitivity testing, and other current areas of active inquiry. Designed to prepare students for entry level positions as DNA analysts in federal, state, and local crime laboratories. Laboratory six hours. Fee course.

Fee course.

BIO 152. Human Parasitology. 3 Units
Prerequisite(s): BIO 1 and BIO 2.
Term Typically Offered: Spring only

Examines, in detail, the most important species of protozoans, flukes, tapeworms and roundworms that infect humans. Life cycles, pathology and prophylaxis constitue the principal topics in lectures. Morphology, physiology, taxonomy and diagnosis constitute the principal topics in the laboratory. Lecture two hours; laboratory three hours. Fee course.

Fee course.

BIO 155. Food Microbiology. 3 Units
Prerequisite(s): BIO 139.
Term Typically Offered: Fall, Spring

Microbiology of food fermentations, food preservation and spoilage. Lecture two hours; laboratory three hours. Fee course.

Fee course.
BIO 166.  Ornithology.  3 Units
Prerequisite(s): BIO 1 and BIO 2.
Term Typically Offered: Spring only – odd years

Biology of birds: structure, physiology, ecology, behavior, and classification. Methods of life history study, ecological studies, laboratory and field identification. Lecture two hours; laboratory three hours. Field trips required. Fee course.

Field trip(s) may be required.

BIO 167.  Quantitative Methods in Biology.  3 Units
Prerequisite(s): STAT 1 and BIO 100 or graduate status
Term Typically Offered: Spring only

Focuses on statistical hypothesis testing and experimental design in the biological sciences. Topics include the development of a hypothesis, study design and implementation, management and presentation of data, identification of data types, and appropriate use of statistical procedures. General application to a wide range of biological disciplines and will emphasize the scientific process, critical thinking skills, and the interpretation of statistical results, which will include a project culminating a scientific paper and presentation. Lecture two hours; laboratory three hours.

BIO 168.  Mammalogy.  4 Units
Prerequisite(s): BIO 1 and BIO 2.
Term Typically Offered: Fall only

Biology of mammals: structure, physiology, ecology, behavior, classification. Methods of life history, laboratory and field identification, collection and preservation. Lecture three hours; laboratory three hours. Field trips required. Fee course.

Fee course.

Field trip(s) may be required.

BIO 169.  Animal Behavior.  3 Units
Prerequisite(s): BIO 1 and BIO 2.
Term Typically Offered: Spring only

Introduction to the fascinating world of why animals do the things that they do. Focus is on the evolution and function of animal behavior through understanding the costs and benefits of different behavior including foraging, fighting and reproduction. Lecture two hours; laboratory three hours. Fee course.

Fee course.

BIO 170.  Advanced Nutrition and Metabolism.  3 Units
Prerequisite(s): CHEM 161, FACS 113; or instructor permission.
Term Typically Offered: Spring only – odd years

Study of the physiologic function of carbohydrates, lipids, protein and micronutrients including integrated metabolism, transport, regulation and relation to inborn errors/chronic disease. Introduction to gene-nutrient interaction.

Cross Listed: FACS 170; only one may be counted for credit.

BIO 171.  Principles of Fisheries Biology.  3 Units
Prerequisite(s): BIO 160, STAT 1.
Term Typically Offered: Fall only – odd years

Introduction to the biological principles basic to fisheries science, including enumeration, recruitment, growth, abundance and mortality. Mathematics, computer modeling, and field methods will be used to understand natural populations and the impact of fishing on those populations in keeping with modern approaches to fisheries science which are grounded in population ecology and conservation biology. Lecture two hours; laboratory three hours. Fee course.

Fee course.

BIO 172.  Marine Biology.  3 Units
Prerequisite(s): BIOS 160
Corequisite(s): BIO 188
Term Typically Offered: Spring

BIO 173.  Molecular Ecology.  4 Units
Prerequisite(s): BIO 184
Corequisite(s): BIO 188
Term Typically Offered: Fall, Spring

A survey of the use of molecular tools to understand ecological questions. Lecture will focus on the background and history of the use of molecular tools in ecological settings, including application of molecular tools to conservation of natural resources. Laboratory will include techniques for both wet lab and analysis of molecular data, including interpretation of results. Students will complete a capstone-style project that will culminate in the production of a research proposal.

BIO 174.  Conservation Biology & Wildlife Management.  3 Units
Prerequisite(s): BIO 100. BIO 160 recommended. Or instructor permission. Paired
Term Typically Offered: Spring only

Study of human effects and management of ecological systems, including populations, communities, and ecosystems. Topics include population and biodiversity responses to human activities, endangered species management, reserve design, and restoration. Paired course with BIO 279.

Note: Lecture two hours; laboratory and fieldwork three hours; meets in the same location with the same instructor as Bio 279; course cannot be taken concurrently with or after taking BIO 279; Bio 279 cannot be taken in the graduate program after completing Bio 179.

BIO 175.  Principles of Fisheries Management.  4 Units
Prerequisite(s): BIO 121 and BIO 184.
Term Typically Offered: Fall, Spring

Introduction to the biological principles basic to fisheries science, including enumeration, recruitment, growth, abundance and mortality. Mathematics, computer modeling, and field methods will be used to understand natural populations and the impact of fishing on those populations in keeping with modern approaches to fisheries science which are grounded in population ecology and conservation biology. Lecture two hours; laboratory three hours. Fee course.

Fee course.

BIO 176.  Invertebrate Zoology.  3 Units
Prerequisite(s): BIOS 160
Corequisite(s): BIO 188
Term Typically Offered: Spring

BIO 177.  Advanced Molecular Biology.  4 Units
Prerequisite(s): BIO 121 and BIO 184.
Term Typically Offered: Fall, Spring

Examination of the structure of genes and genomes, the mechanisms by which they change, and the use of evolutionary relationships to understand function. Mechanisms of the regulation of gene expression from gene to phenotype and the tools used to study these processes. Applications of molecular tools in medicine and biotechnology and the ethics around these approaches. Lecture two hours, laboratory six hours.

BIO 178.  Cancer Biology.  3 Units
Prerequisite(s): BIO 121 and BIO 184.
Term Typically Offered: Fall only

Study of cancer from the molecular level to the effect on whole tissues and organs. Topics to be covered include the classification and nomenclature of cancers, the process leading up to the formation of a cancer, the possible causes of cancer, and possible treatment. Lecture two hours.
BIO 183A. Advanced Problems in Cancer Biology. 1 Unit
Prerequisite(s): BIO 121 and BIO 184 and BIO 183 or instructor permission; BIO 183 may be taken concurrently
Term Typically Offered: Fall, Spring

Literature searches and discussions are focused on medical, clinical, and biotechnological applications of Cancer Biology.

BIO 184. General Genetics. 4 Units
Prerequisite(s): BIO 1 and BIO 2; declared major in Biological Sciences, Biochemistry, Chemistry or instructor consent
Term Typically Offered: Fall, Spring, Summer

Principles of inheritance as they relate to microorganisms, plants, animals and humans. Genetic mechanisms are analyzed according to evidence derived from both classical and current research. The nature, structure, and function of the genome are considered at the molecular level. Lecture three hours; laboratory three hours. Fee course.

BIO 185. Topics in Biology. 3 Units
Prerequisite(s): BIO 10 or both BIO 1 and BIO 2; CHEM 20.
Term Typically Offered: Fall, Spring

Current topics in cellular, developmental and/or molecular biology. Topics will vary. May be taken more than once provided that topics are different. Lecture three hours.

BIO 186A. Cell and Molecular Biology Seminar. 1 Unit
Prerequisite(s): BIO 10 or both BIO 1 and BIO 2.
Term Typically Offered: Fall only

Series of at least 10 seminars in cell and molecular biology. Topics within each seminar will vary each semester.
Note: May be repeated for credit. No more than one unit of BIO 186 may be counted toward the upper division major requirement.

Credit/No Credit

BIO 186B. Ecological and Environmental Issues Seminar. 1 Unit
Prerequisite(s): BIO 10 or both BIO 1 and BIO 2.
Term Typically Offered: Fall only

Series of at least 10 seminars in ecological and environmental issues. Topics within each seminar will vary each semester.
Note: May be repeated for credit. No more than one unit of BIO 186 may be counted toward the upper division major requirement. Cross Listed: ENVS 186B; only one may be counted for credit.

Credit/No Credit

BIO 186C. Introduction to Health Careers Seminar. 1 Unit
Term Typically Offered: Fall, Spring

Designed for pre-health professional students who are in the process of researching traditional and non-traditional health professions and careers. This course consists of at least 10 seminars presented by various practicing health professionals, health professional students, and health professional school admissions officers. Topics vary each semester. One hour per week.

Credit/No Credit

BIO 187. Advanced Cell Biology. 4 Units
Prerequisite(s): BIO 121 and BIO 184.
Term Typically Offered: Spring only

Advanced cellular and molecular biology of eukaryotic cells. Comparison to prokaryotic organism will be made as needed to illustrate key concepts. Emphasis will be placed on cellular functions and utilize two or more cellular systems; including cell to cell communication, regulation of gene expression, uptake and secretion, regulation of cytoskeletal configuration, cell migration and cellular reproduction. Lecture two hours, laboratory six hours.

BIO 188. Evolution. 3 Units
Prerequisite(s): BIO 184 or instructor permission.
Term Typically Offered: Fall, Spring

General survey of evolutionary processes: mechanisms of evolutionary change, adaptation and history of life. Designed for biological sciences majors. Lecture three hours.

BIO 194. Biology-Related Work Experience. 6 - 12 Units
Term Typically Offered: Fall, Spring

Supervised work-learn experience in biology with a public or private agency arranged through the Department of Biological Sciences and the Cooperative Education Program office. Requires preparation of application packet, completion of a three to six month, full-time or part-time work assignment, and a written report.
Note: Open only to upper division or graduate students with appropriate preparation. Consent of Department Cooperative Education Committee required, and Committee will determine the number of units to be granted. Students may enroll for no more than 12 total units, and units may not be used to meet biology major or graduate course work requirements.

Credit/No Credit

BIO 195. Biological Internship. 1 - 2 Units
Prerequisite(s): Department chair and instructor (representing the appropriate biological discipline) permission.
Term Typically Offered: Fall, Spring

Supervised work-learn experience in biology with a public or private organization. Up to 4 units may be taken. No more than 2 units from BIO 195, BIO 197 and BIO 199 combined can be applied to the biological sciences upper division major requirement.

Credit/No Credit

BIO 195D. Dental Internship. 1 - 2 Units
Prerequisite(s): Department chair and instructor (representing the appropriate preprofessional discipline) permission.
Term Typically Offered: Fall, Spring

Supervised non-paid internship experience in the medical-related and business-related aspects of dentistry. Includes a volunteer experience in the community. No more than 2 units from BIO 195, BIO 197 and BIO 199 combined can be applied to the biological sciences upper division major requirement.
Note: 1 unit = 40 hours of participation/semester and 2 units = 80 hours of participation/semester; May be repeated for up to 4 units of credit.

Credit/No Credit

BIO 197. Advanced Problems in Cancer Biology. 1 Unit
Prerequisite(s): BIO 121 and BIO 184 and BIO 183 or instructor permission; BIO 183 may be taken concurrently
Term Typically Offered: Fall, Spring

Supervised internship experience in the process of researching traditional and non-traditional health professions and careers. This course consists of at least 10 seminars presented by various practicing health professionals, health professional students, and health professional school admissions officers. Topics vary each semester. One hour per week.

Credit/No Credit

BIO 199. Biological Internship. 1 - 2 Units
Prerequisite(s): Department chair and instructor (representing the appropriate biological discipline) permission.
Term Typically Offered: Fall, Spring

Supervised work-learn experience in biology with a public or private organization. Up to 4 units may be taken. No more than 2 units from BIO 195, BIO 197 and BIO 199 combined can be applied to the biological sciences upper division major requirement.

Credit/No Credit
**BIO 195M. Medical Internship.** 2 Units

Prerequisite(s): Department Chair, Instructor and Placement Agency's permission required.

Term Typically Offered: Fall, Spring

Supervised non-paid internship experience in multiple aspects of health care. Includes a volunteer experience in the community, supplemental readings, and a presentation on current issues in medicine and health education. No more than 2 units of BIO 195, BIO 197 and BIO 199 combined may be applied to the Biological Sciences upper division major requirement.

Note: 80 hours of participation/semester

Credit/No Credit

**BIO 195P. Pharmacy Internship.** 1 - 2 Units

Prerequisite(s): Department Chair, Instructor, and Placement Agency permission required.

Term Typically Offered: Fall, Spring

Supervised non-paid internship experience in pharmacy. Includes a volunteer experience in the community. No more than 2 units from BIO 195, BIO 197 and Bio 199 combined can be applied to the biological sciences upper division major requirement. May be repeated for up to 4 units of credit. 1.0-2.0 units (40-80 hours of participation/semester).

Credit/No Credit

**BIO 195T. Teaching Internship.** 1 - 2 Units

Prerequisite(s): Department chair and instructor permission.

Term Typically Offered: Fall, Spring

Supervised non-paid internship experience in K-12 teaching. Includes regular meetings with supervising teacher and submission of a field experience journal. May be repeated for credit.

Note: No more than 2 units from BIO 195, 197 and 199 combined can be applied to the biological sciences upper division major requirement.

Credit/No Credit

**BIO 195C. Co-curricular Activities in Biology.** 1 - 2 Units

Term Typically Offered: Fall, Spring

Students may earn BIO 197C credit by participating as tutors and/or section or discussion leaders for biological sciences classes or teaching as voluntary instructors or tutors in K-12 courses or programs offered by other community organizations. Participation requires four to eight hours weekly. Admission requires approval of professor and Department Chair.

Note: May be taken more than once, but no more than 2 units from BIO 195, BIO 197 and BIO 199 combined can be applied to the Biological Sciences upper division major requirement.

Credit/No Credit

**BIO 197A. Laboratory Teaching Assistant.** 1 - 2 Units

Prerequisite(s): Department Chair and instructor permission.

Term Typically Offered: Fall, Spring

Supervised experiences will include aspects of laboratory preparation and aspects of teaching biology laboratory courses. Conferences and laboratory experiences four to eight hours weekly. Admission requires approval of professor and Department Chair.

Note: May be taken more than once, but no more than 2 units from BIO 195, BIO 197 and BIO 199 combined can be applied to the Biological Sciences upper division major requirement.

Credit/No Credit

**BIO 197B. Laboratory Techniques.** 1 - 2 Units

Prerequisite(s): Department Chair and instructor permission.

Term Typically Offered: Fall, Spring

Supervised laboratory experiences for advanced students in the organization and techniques for operation of a basic sciences laboratory. Conferences and laboratory experiences four to eight hours weekly. Admission requires approval of professor and Department Chair.

Note: May be taken more than once, but no more than 2 units from BIO 195, BIO 197 and BIO 199 combined can be applied to the Biological Sciences upper division major requirement.

Credit/No Credit

**BIO 197C. Advanced Laboratory Exploration.** 1 - 2 Units

Term Typically Offered: Fall, Spring

Students may earn BIO 197C credit by participating as tutors and/or section or discussion leaders for biological sciences classes or teaching as voluntary instructors or tutors in K-12 courses or programs offered by other community organizations. Participation requires four to eight hours weekly. Admission requires approval of professor and Department Chair.

Note: May be taken more than once, but no more than 2 units from BIO 195, BIO 197 and BIO 199 combined can be applied to the Biological Sciences upper division major requirement.

Credit/No Credit

**BIO 197D. Intermediate Laboratory Techniques.** 1 - 2 Units

Prerequisite(s): BIO 197A and instructor permission.

Term Typically Offered: Fall, Spring

Advanced, supervised experiences that explore the science behind laboratory experiences and discussion regarding aspects of specific laboratories that promote understanding of scientific content. Conferences and laboratory experiences four to eight hours weekly; written assignments and/or oral presentations required. Admission requires approval of professor and Department Chair.

Note: No more than 2 units from BIO 195, BIO 197, BIO 199 combined may be applied to the Biological Sciences upper division major requirement.

Credit/No Credit

**BIO 197E. Advanced Laboratory Teaching Assistant.** 1 - 2 Units

Prerequisite(s): BIO 197B and instructor or Department Chair permission

Term Typically Offered: Fall, Spring

Supervised laboratory experiences for skilled students in the organization and techniques for operation of a basic sciences laboratory. Conferences and laboratory experiences four to eight hours weekly. Admission requires approval of instructor and Department Chair.

Note: May be taken more than once, but no more than 2 units from BIO 195, BIO 197 and BIO 199 combined may be applied to the Biological Sciences upper division major requirement.

Credit/No Credit

**BIO 197F. Advanced Lab Techniques.** 1 - 2 Units

Prerequisite(s): BIO 197B and instructor permission.

Term Typically Offered: Fall, Spring

Advanced supervised laboratory experiences for skilled students in the organization and techniques for operation of a basic sciences laboratory. Conferences and laboratory experiences four to eight hours weekly. Admission requires approval of instructor and Department Chair.

Note: May be taken more than once, but no more than 2 units from BIO 195, BIO 197 and BIO 199 combined may be applied to the Biological Sciences upper division major requirement.

Credit/No Credit
### BIO 194, BIO 195, BIO 197 and BIO 199

These courses form the basis for an introduction to biological journals, the scientific method, and research as a professional pursuit. Each student develops a refined research proposal and prepares a seminar summarizing the proposal and the current state of knowledge in the topic area. Students will develop and refine their methodology under the direction of a faculty mentor.

**Term Typically Offered:** Fall, Spring

Contemporary topics in biology selected by students in the course will form the basis for an introduction to journals, the scientific method, and research as a professional pursuit. Each student develops a refined research proposal and prepares a seminar summarizing the proposal and the current state of knowledge in the topic area. Students will develop and refine their methodology under the direction of a faculty mentor.

**Term Typically Offered:** Fall, Spring

### BIO 198A. Honors Proseminar and Research. 2 Units

**Prerequisite(s):** Open only to honors students in biological sciences who have an overall GPA of 3.25 and a minimum of 3.0 GPA in biology courses (at least six units of upper division biology excluding BIO 106, BIO 108, BIO 194, BIO 195, BIO 197 and BIO 199).

**Term Typically Offered:** Fall, Spring

Directed research involving completion of an independently conducted research project for which a proposal and methodology was developed in BIO 198A. Data collection, summary and analysis, and formulation of conclusions based on the data will be discussed periodically with a faculty sponsor. Culmination will consist of preparation of an undergraduate thesis, poster and presentation of a seminar summarizing results and conclusions.

**Note:** Open only to honors students in Biological Sciences. Fee course.

### BIO 198B. Honors Research and Seminar. 2 Units

**Prerequisite(s):** BIO 198A.

**Term Typically Offered:** Fall, Spring

Directed research involving completion of an independently conducted research project for which a proposal and methodology was developed in BIO 198A. Data collection, summary and analysis, and formulation of conclusions based on the data will be discussed periodically with a faculty sponsor. Culmination will consist of preparation of an undergraduate thesis, poster and presentation of a seminar summarizing results and conclusions.

**Note:** Open only to honors students in Biological Sciences. Fee course.

### BIO 199A. Introductory Undergraduate Research. 1 - 2 Units

**Prerequisite(s):** Department Chair and instructor permission.

**Term Typically Offered:** Fall, Spring

Student conducts introductory, independent laboratory or field research on an original question. Research must culminate in a formal report. Weekly meetings may be required. Students must have a research prospectus approved by faculty mentor and Department Chair.

**Note:** May be taken more than once; no more than 2 units from BIO 195, BIO 197 and BIO 199 combined may be applied to the Biological Sciences upper division major requirement.

### BIO 199B. Directed Readings. 1 - 2 Units

**Prerequisite(s):** Department Chair and instructor permission.

**Term Typically Offered:** Fall, Spring

Directed Readings on a topic in Biology culminating in a research paper. Admission requires submission of a prospectus approved by the faculty member under whom the work is to be conducted and the Department Chair.

**Note:** May be taken more than once, but no more than 2 units from BIO 195, BIO 197 and BIO 199 combined can be applied to the Biological Sciences upper division major requirement.

### BIO 199C. Intermediate Undergraduate Research. 1 - 2 Units

**Prerequisite(s):** Department Chair and instructor permission.

**Term Typically Offered:** Fall, Spring

Student conducts independent laboratory or field research on an original question. Research must culminate in a formal report. Weekly meetings may be required. Students must have a research prospectus approved by faculty mentor and Department Chair.

**Note:** May be taken more than once; no more than 2 units from BIO 195, BIO 197 and BIO 199 combined may be applied to the Biological Sciences upper division major requirement.

### BIO 199D. Advanced Undergraduate Research. 1 - 2 Units

**Prerequisite(s):** Department Chair and instructor permission.

**Term Typically Offered:** Fall, Spring

Advanced laboratory or field research on an original question. The research must culminate in a formal report. Weekly meetings may be required. Students must have a prospectus approved by the faculty member and the Department Chair.

**Note:** May be taken more than once; no more than 2 units from BIO 195, BIO 197 and BIO 199 combined may be applied to the Biological Sciences upper division major requirement.

### BIO 214. Advanced Plant Ecology. 3 Units

**Prerequisite(s):** BIO 160.

**Term Typically Offered:** Fall, Spring

Fundamental properties of plant populations; population regulation; community productivity and structure; a study of ecotypic and ecocline variation in plant populations. Lecture one hour; laboratory and field six hours.

### BIO 220. Introduction to Scientific Inquiry. 2 Units

**Term Typically Offered:** Fall, Spring

Graduate level introduction to scientific inquiry in the biological sciences. Students learn to apply the scientific method, critically evaluate the scientific literature, initiate their graduate project, and develop written and oral scientific presentation skills. Lecture two hours.

**Note:** Graduate Writing Intensive (GWI).

### BIO 220A. Foundations in Scientific Inquiry. 3 Units

**Term Typically Offered:** Fall only

Introduces the foundations of scientific inquiry at the graduate level. Students learn how to apply the scientific method, obtain and critically evaluate the scientific literature, design experiments, interpret and present scientific data, and initiate their thesis research or project. Lecture three hours.

### BIO 220B. Scientific Writing and Communication. 3 Units

**Prerequisite(s):** BIO 220A or instructor permission

**Term Typically Offered:** Spring only

Graduate level written and oral scientific presentation skills aimed at preparing students for the creation and delivery of their thesis/project proposal in the Biological Sciences. Topics include proper structure, organization, and tone in scientific writing, writing concisely, effective peer review and self-editing, and communicating complex scientific information in different forms. Lecture three hours.
**BIO 221A. Cell and Molecular Methods and Techniques.** 2 Units  
**Term Typically Offered:** Spring only  
Prerequisite(s): BIO 220 (may be taken concurrently).  
Introduction to research methods in molecular and cellular biology. Students learn both cell and molecular techniques in the context of hypothesis-driven research to answer questions relating to a specific gene and cellular system. Experimental design and commonly used laboratory techniques will be explored. Two three-hour laboratory periods. Fee course.

**BIO 221B. Methods in Ecology, Evolution and Conservation.** 2 Units  
**Term Typically Offered:** Spring only  
Prerequisite(s): BIO 167, BIO 220 (may be taken concurrently).  
Introduction to research methods in ecology, evolution and conservation biology. Students learn field and laboratory techniques with a variety to taxa in a range of local ecosystems. Students will work with several faculty conducting research projects. Topics will include developing hypotheses, experimental design, study implementation, and statistical analyses. Students will be expected to present findings in oral and written form. Two three-hour laboratory periods. Fee course.

**BIO 221C. Exploration of Biological Methodology.** 3 Units  
**Term Typically Offered:** Fall, Spring  
Intended for students in the MA grant proposal track, this course explores a selected topic from multiple scientific perspectives. A discovery-based laboratory project using cell and molecular techniques complemented with lectures, discussions and field trips that investigate the ecological, environmental, and evolutionary aspects of the same topic. The laboratory project will focus on a current biological topic (such as genetically modified organisms) in accordance with the instructor's interests and expertise. One hour lecture, six hours lab per week.  
Note: Not open to students in the Master of Science in Molecular and Cellular Biology Concentration.

**BIO 222. Molecular Biology.** 3 Units  
**Prerequisite(s):** BIO 184, CHEM 161.  
**Term Typically Offered:** Fall, Spring  
Processes and control of DNA replication, transcription, and translation developed from a consideration of the current literature. Lecture three hours.

**BIO 223. Human Molecular Genetics.** 3 Units  
**Prerequisite(s):** BIO 184 and CHEM 161.  
**Term Typically Offered:** Fall, Spring  
In-depth study of the molecular basis of human disease, emphasizing current experimental approaches and technologies. Topics include the isolation and analysis of disease genes, the influence of teratogens and random environmental events on human embryonic development, the molecular and biochemical consequences of mutagenesis, and ethical issues that currently surround the field. Lecture 3 hours.

**BIO 224. Genomics, Proteomics, and Bioinformatics.** 3 Units  
**Prerequisite(s):** BIO 184, BIO 222 and graduate status or instructor permission.  
**Term Typically Offered:** Fall, Spring  
Examination of current approaches in structural genomics, functional genomics and proteomics, and the bioinformatics tools utilized to understand genome organization, the regulation of gene expression, gene function and the evolutionary relationships within and between genomes. Lecture two hours; laboratory 3 hours.

**BIO 225. Stem Cell Biology and Manufacturing Practices.** 1 Unit  
**Prerequisite(s):** Graduate status and instructor permission.  
**Term Typically Offered:** Fall, Spring  
Graduate level introductory course in human stem cell biology with specific emphasis on adult, embryonic, and induced pluripotent stem cells. Topics will include how stem cells are isolated or generated, how they are cultured, and how they are used for regenerative therapies. In addition, students will learn about Good Manufacturing Practice (GMP) and how to manufacture human stem cells.

**BIO 227. Development and Regenerative Medicine.** 3 Units  
**Prerequisite(s):** Graduate status and instructor permission.  
**Term Typically Offered:** Fall, Spring  
Graduate level introductory course in human stem cell biology with specific emphasis on adult, embryonic, and induced pluripotent stem cells. Topics will include how stem cells are isolated or generated, how they are cultured, and how they are used for regenerative therapies. In addition, students will learn about Good Manufacturing Practice (GMP) and how to manufacture human stem cells.

**BIO 245. Host/Pathogen Interactions.** 3 Units  
**Prerequisite(s):** BIO 121, BIO 139, BIO 184. Courses recommended but not required: BIO 144, BIO 149, BIO 180.  
**Term Typically Offered:** Fall, Spring  
Critical reading and discussion of current literature on host/pathogen interactions. Topics to be covered include: alteration of host intracellular trafficking, subversion of cell cytoskeleton for invasion, intracellular survival mechanisms, pathogen-induced cell killing, and evasion and subversion of the host immune system.

**BIO 247. Contemporary Topics in Immunology.** 2 Units  
**Prerequisite(s):** BIO 149A or instructor permission.  
**Term Typically Offered:** Fall, Spring  
Readings and discussions of current literature emphasizing new field developments and controversies. Lecture two hours.

**BIO 260. Advanced Ecology.** 3 Units  
**Prerequisite(s):** BIO 160 or equivalent.  
**Term Typically Offered:** Fall, Spring  
Principles and applications of theoretical and field ecology as they apply to populations, communities and ecosystems.

**BIO 269. Behavioral Ecology.** 3 Units  
**Prerequisite(s):** BIO 160 or instructor permission.  
**Term Typically Offered:** Fall, Spring  
Advanced study of animal behavior focusing on the life history consequences of social organization, spacing systems, sexual behavior, reproductive ecology, feeding ecology, competitive interactions and predator-prey interactions.
BIO 273. Advanced Fishery Biology and Management. 3 Units
Prerequisite(s): BIO 173 or instructor permission.
Term Typically Offered: Fall, Spring

Critical review and evaluation of current techniques and concepts relating to the management, protection, and improvement of fishery resources. Lecture three hours.

BIO 279. Conservation Biology and Wildlife Management. 3 Units
Prerequisite(s): BIO 160, or instructor permission.
Term Typically Offered: Spring only

Advanced study of human effects and management of ecological systems, including populations, communities, and ecosystems. Topics include population and biodiversity responses to human activities, endangered species management, reserve design, and restoration. Emphasis on the critical evaluation, review, and presentation of conservation literature and issues. Paired course with Bio 179.

Note: Lecture two hours; laboratory and fieldwork three hours; meets in the same location with the same instructor as Bio 179; course cannot be taken concurrently with or after taking BIO 179; Bio 279 cannot be taken in the graduate program after completing Bio 179. Field Trip(s).

Field trip(s) may be required.

BIO 280. Advanced Molecular Biology. 4 Units
Term Typically Offered: Fall, Spring

Advanced examination of the structure of genes and genomes, the mechanisms by which they change, and the laboratory tools used to study and understand gene function. Analysis of the molecular mechanisms of gene expression, their regulation, phenotypes, and the tools used to study these processes. Application of molecular tools in medicine and biotechnology and the ethics of these approaches. Emphasis on the critical evaluation, review, and presentation of molecular biology research literature. Paired with Bio 180. Fee course.

Note: Lecture two hours, laboratory six hours. Course requires Personal Protective Equipment.

Fee course.

BIO 282. Evolution. 3 Units
Prerequisite(s): Classified graduate standing in Biological Sciences
Term Typically Offered: Fall only

Introduction to evolutionary concepts and perspectives and their application to a variety of topics outside of evolutionary biology through discussion of peer-reviewed literature. Students will develop skills through group discussion, writing, and presentation.

BIO 283. Biogeography. 3 Units
Term Typically Offered: Fall, Spring

Study of the past and present plant and animal distributions, and the geologic, climatic and ecologic factors involved in their migration, establishment and extinction. Lecture/discussions three hours.

BIO 285. Topics in Biology. 3 Units
Prerequisite(s): Graduate status or instructor permission.
Term Typically Offered: Fall, Spring

Readings and discussions of current literature emphasizing new developments and controversies in a comparatively narrow range of biological topics. Topics will vary with each offering, encompassing one recognized specialty in biology. May be repeated for credit when the topics vary.

BIO 293. Research Conference. 2 Units
Prerequisite(s): Department Chair and instructor permission.
Term Typically Offered: Fall, Spring

Presentation and discussion of graduate student and faculty research and current literature with emphasis on critical evaluation of research design, data analysis and presentation techniques.

Note: Discussion two hours. May be taken twice for credit. Only two units may be applied to the University's requirement for 200-level courses; May be repeated for up to 4 units of credit.

Credit/No Credit

BIO 294A. Seminar in Molecular and Cellular Biology. 1 Unit
Prerequisite(s): Student must be a Biology major at the master's level to enroll in this class and/or have instructor permission.
Term Typically Offered: Fall, Spring

Review and discussion of scientific literature in cell and molecular biology. Seminar topics will vary by semester.

Note: May be repeated for up to 4 units of credit.

Credit/No Credit

BIO 294B. Seminar in Ecology, Evolution and Conservation. 1 Unit
Prerequisite(s): Student must be a Biology major at the master's level to enroll in this class and/or have instructor permission.
Term Typically Offered: Fall, Spring

Review and discussion of scientific literature in ecology, evolution, and conservation biology. Seminar topics will vary by semester.

Note: May be repeated for up to 4 units of credit.

Credit/No Credit

BIO 294C. Seminar in Scientific Communication. 1 Unit
Prerequisite(s): Student must be a Biology major at the master's level to enroll in this class and/or have instructor permission.
Term Typically Offered: Fall, Spring

Review, discussion, and evaluation of scientific communication skills and techniques, with emphasis on oral presentation of the thesis or project proposal and delivery of the graduate exit seminar. Prerequisite: Student must be a Biology major at the master's level to enroll in this class and/or have instructor permission.

Credit/No Credit

BIO 297A. Teaching Biology Seminar. 1 Unit
Prerequisite(s): Acceptance in the GTA Program or instructor permission.
Term Typically Offered: Fall only

Highly recommended training for graduate students who wish to participate in the Department's Graduate Teaching Associate (GTA) Program and others interested in teaching biology. Weekly seminar/discussion session covers educational theory, practical instructional strategies, and faculty policies and regulations for teaching biology courses, with a focus on laboratories. Lecture/discussion.

Credit/No Credit
degree in Marine Science is offered as an interdepartmental degree through Biological Sciences in cooperation with Moss Landing Marine Laboratories.

Degree Program
MS in Marine Science (p. 834)

Special Features
- Most courses are field-oriented, taking advantage of a diversity of nearby coastal and marine habitats, including Monterey Submarine Canyon, subtidal kelp forests, Elkhorn Slough, and rocky and sandy intertidal zones.
- Field activities are facilitated by the MLML fleet, the 135' R/V POINT SUR, the 35' R/V ED RICKETTS, two Boston Whalers, and a number of inflatable rafts.
- Ongoing research by faculty and graduate students further enhances the MLML learning experience.

MSCI 103. Marine Ecology. 4 Units
Prerequisite(s): Ecology, statistics; or concurrent registration in MSCI 104.
Term Typically Offered: Fall, Spring
Field-oriented introduction to the interrelationships between marine and estuarine organisms and their environment with emphasis on quantitative data collection and analysis. Lecture two hours; laboratory six hours.

MSCI 104. Quantitative Marine Science. 4 Units
Prerequisite(s): College mathematics.
Term Typically Offered: Fall, Spring
Mathematical methods for the analysis of biological, chemical and physical data from the marine environment; experimental design, parametric and nonparametric statistics. Lecture three hours; laboratory three hours.
Note: Not for major credit.

MSCI 105. Marine Science Diving. 3 Units
Prerequisite(s): Upper division science major status, thorough physical examination, ability to pass swimming test.
Term Typically Offered: Fall, Spring
Skin SCUBA diving course, pool-training culminates in ten ocean dives. Topics covered include diving physics, physiology, diving environments, night diving and research diving. Successful completion gives NAUI and MLML certification. Lecture one hour; laboratory six hours.
Note: Not for major credit.
MSCI 112. Marine Birds and Mammals. 4 Units
Prerequisite(s): Upper division college vertebrate zoology or instructor permission; MSCI 103 recommended.
Term Typically Offered: Fall, Spring

Systematic, morphology, ecology and biology of marine birds and mammals. Lecture two hours; laboratory six hours.

MSCI 113. Marine Ichthyology. 4 Units
Prerequisite(s): College zoology or equivalent or instructor permission; MSCI 103 recommended.
Term Typically Offered: Fall, Spring

Description of the taxonomy, morphology, and ecology of marine fishes. Both field and laboratory work concentrate on the structure, function and habits of marine fishes and the ecological interactions of these fishes with their biotic and abiotic surroundings. Lecture two hours; laboratory six hours.

MSCI 124. Marine Invertebrate Zoology I. 4 Units
Prerequisite(s): College zoology or instructor permission; MSCI 103 recommended.
Term Typically Offered: Fall, Spring

Field oriented introduction to the structure, systematics, evolution, and life histories of the major and minor marine phyla. Lecture two hours; laboratory and six hours.

MSCI 125. Marine Invertebrate Zoology II. 3 Units
Prerequisite(s): College zoology or instructor permission; MSCI 103 and MSCI 124 recommended.
Term Typically Offered: Fall, Spring

Field oriented introduction to the structure, systematics, evolution and life histories of the minor marine invertebrate phyla. Lecture one hour; laboratory and field six hours.

MSCI 131. Marine Botany. 4 Units
Prerequisite(s): MSCI 103 recommended.
Term Typically Offered: Fall, Spring

Introduction to the plants of the sea, marshes, and dunes, with emphasis on the morphology, taxonomy and natural history of seaweeds and vascular plants. Lecture two hours; laboratory six hours.

MSCI 135. Physiology of Marine Algae. 4 Units
Prerequisite(s): MSCI 103, MSCI 131, and MSCI 144. Lecture two hours; laboratory six hours.
Term Typically Offered: Fall, Spring

Physiological basis for understanding the adaptation of marine algae to their environment. Topics include respiration, enzyme activity, and biochemical composition. Hands-on experience in basic electronic instrumentation, chemical separations, optical measurements, culturing methods, and radioisotope techniques.

MSCI 141. Geological Oceanography. 4 Units
Prerequisite(s): MSCI 142, MSCI 143; may be taken concurrently.
Term Typically Offered: Fall, Spring

Study of the structures, physiography and sediments of the sea bottom and shoreline. Lecture two hours; laboratory and field six hours.

MSCI 142. Physical Oceanography. 4 Units
Prerequisite(s): College algebra, college physics recommended.
Term Typically Offered: Fall, Spring

Introduction to the nature and causes of various oceanic motions including currents, waves, tides, and mixing and the Physical properties of seawater. Limited use of calculus. Lecture three hours; laboratory three hours.

MSCI 143. Chemical Oceanography. 4 Units
Prerequisite(s): One year of college chemistry.
Term Typically Offered: Fall, Spring

Introduction to the theoretical and practical aspects of the chemistry of the oceans, including major salts, dissolved gases, nutrient ions, carbonate system, transient tracers, and shipboard sampling techniques. Lecture two hours; laboratory six hours.

MSCI 144. Biological Oceanography. 4 Units
Prerequisite(s): General biology, general chemistry.
Term Typically Offered: Fall, Spring

Ocean as an ecological system. Emphasis will be on the complexity of organismal-environmental interaction of the plankton, the transfer of organic matter between trophic levels and nutrient cycles. Laboratory sessions will include methods in sampling, shipboard techniques, identification of the plankton, and current analytical techniques. Lecture two hours; laboratory six hours.

MSCI 175A. Coastal Geol Processes. 1 Unit
Term Typically Offered: Fall, Spring

MSCI 175B. Intro To Marine Science. 1 Unit
Term Typically Offered: Fall, Spring

MSCI 180. Independent Study. 1 - 4 Units
Prerequisite(s): Instructor permission.
Term Typically Offered: Fall, Spring

Faculty-directed study of selected research problems; open to undergraduate students with adequate preparation. Three hours work per unit.

MSCI 201. Library Research Methods. 1 Unit
Prerequisite(s): Graduate standing in the Marine Science M.S. program and instructor permission.
Term Typically Offered: Fall, Spring

Students will gain advanced understanding of the nature of scientific information. Provides the framework for using and evaluating a variety of information sources in marine and ocean sciences. Strong emphasis will be placed on developing critical skills to interweave knowledge of the history of science into the context of bibliographic tools including the digital realm. Lecture: three hours.

MSCI 202. Oceanographic Instrumentation. 4 Units
Prerequisite(s): MSCI 141, MSCI 142 and instructor permission.
Term Typically Offered: Fall, Spring

Principles of instruments used in oceanographic research, introduction to electronics, and applications of instrument measurements. Emphasis will vary from CTD profilers, current meters, radiometry and chemical measurement. Lecture two hours; laboratory six hours.
MSCI 204. Sampling and Experimental Design. 4 Units
Prerequisite(s): MSCI 103, MSCI 104.
Term Typically Offered: Fall, Spring
Discussion of random sampling, systematic sampling, subsampling, survey techniques, and design of single and multifactorial experiments using randomized and block experimental designs: basic design of experiments and field sampling will be covered. Biases and problems of sampling marine biota will be presented and discussed by critiquing relevant literature. Lecture four hours.

MSCI 208. Molecular Ecology: Concepts and Methods. 4 Units
Prerequisite(s): Basic cellular/molecular biology course; consent of instructor.
Term Typically Offered: Fall, Spring
Use of genetic information affecting interactions of organisms with environment. Lectures on molecular markers used to assess diversity in communities, characterize spatial/temporal variation in species composition, assess genetic variability in populations, discriminant/reveal kinship among individuals, and detect/quantify gene expression important in organismal responses to environmental fluctuation. Basic molecular methods (DNA and RNA isolation/amplification/cloning/sequencing) taught. Students projects as budget permits. Enrollment limited. Lecture 2 hours; laboratory 6 hours.

MSCI 211. Ecology of Marine Birds and Mammals. 4 Units
Prerequisite(s): MSCI 103, MSCI 104, MSCI 112.
Term Typically Offered: Fall, Spring
Community approach to the ecology of marine birds and mammals using experimental and sampling methodology; examine the distribution, abundance, trophic ecology, and behaviors of birds and mammals in Elkhorn Slough and Monterey Bay. Lecture two hours; laboratory six hours.

MSCI 212. Advanced Topics in Marine Vertebrates. 4 Units
Prerequisite(s): MSCI 112 or MSCI 113 and instructor permission.
Term Typically Offered: Fall, Spring
Advanced consideration of the ecology, physiology and phylogeny of fishes, birds, reptiles or mammals, emphasizing current literature and research. Topics and emphasis will vary with term and instructor. Lecture two hours; laboratory six hours.
Note: May be repeated once for credit.

MSCI 212A. Adv Ichthyology. 4 Units
Term Typically Offered: Fall, Spring

MSCI 212B. Ichthyoplankton. 4 Units
Term Typically Offered: Fall, Spring

MSCI 212C. Marine Bird+Mammal Ecolgy. 4 Units
Term Typically Offered: Fall, Spring

MSCI 212D. Sampling+Expermntl Design. 4 Units
Term Typically Offered: Fall, Spring

MSCI 221. Advanced Topics in Marine Invertebrates. 4 Units
Prerequisite(s): MSCI 124 and instructor permission.
Term Typically Offered: Fall, Spring
Advanced considerations of the ecology, physiology and phylogeny of the various invertebrate phyla emphasizing current literature and research. Topics will vary from term to term. Lecture two hours; laboratory six hours.
Note: May be repeated for credit when topics change.

MSCI 221A. Marine Symbioses. 4 Units
Term Typically Offered: Fall, Spring

MSCI 221B. Sampling+Expermntl Design. 4 Units
Term Typically Offered: Fall, Spring

MSCI 221C. Coastal Ecology-Gulf of California. 3 Units
Prerequisite(s): MSCI 103, MSCI 104, MLML SCUBA certified, graduate status, instructor permission.
Term Typically Offered: Fall, Spring
Field-oriented examination of the interrelationships between intertidal and shallow subtidal organisms and their environment in the Gulf of California, Mexico. Information from lectures and review of primary literature on the ecology of the region will be used to write a research proposal. 1 hour lecture, 6 hours laboratory.

MSCI 221D. Immune Respn Marine Orgns. 2 Units
Term Typically Offered: Fall, Spring

MSCI 224. Advanced Biological Oceanography. 4 Units
Prerequisite(s): MSCI 144.
Term Typically Offered: Fall, Spring
Experimental techniques in biological oceanography with emphasis on problems important to plankton ecology. Includes lectures, labs, and discussions of current research problems. An individual research project involving analytical tools will be required. Lecture two hours; laboratory six hours.

MSCI 242. Plate Tectonics. 3 Units
Prerequisite(s): MSCI 141 or instructor permission.
Term Typically Offered: Fall, Spring
Historical background, modern theory, and geo-physical evidence of continental drift sea floor spreading and plate tectonics. Examinations of the impact of the recent revolution in historical geology. Lecture three hours.
MSCI 248. Marine Benthic Habitat Techniques.  4 Units  
Prerequisite(s): Graduate standing and instructor permission.  
Term Typically Offered: Fall, Spring  
Collection and interpretation of geophysical data used to characterize marine benthic habitats. Basic geophysical principles will be reviewed. Application of techniques to identify and characterize marine benthic habitats, including echosounders, multibeam bathymetry and backscatter, sidescan sonar, seismic profiling, and GIS. Lecture two hours; laboratory six hours.

MSCI 251. Marine Geochemistry.  4 Units  
Prerequisite(s): MSCI 143, quantitative analysis, one year calculus or instructor permission.  
Term Typically Offered: Fall, Spring  
Geophysical processes in the oceans: thermodynamics of low temperature aqueous reactions, processes occurring at the sea floor and air-sea interface. Lecture two hours; laboratory six hours.

MSCI 261. Ocean Circulation and Mixing.  4 Units  
Prerequisite(s): MSCI 142; college physics strongly recommended or instructor permission.  
Term Typically Offered: Fall, Spring  
Mathematical description of the distribution of properties (salinity, density, etc.) in the oceans relating to physical and biochemical processes. Equations of motion, geotropic method, and theory of distribution of variables. Lecture two hours; laboratory six hours.

MSCI 262. Satellite Oceanography.  4 Units  
Prerequisite(s): MSCI 142, MSCI 144, or instructor permission. MSCI 263 strongly recommended.  
Term Typically Offered: Fall, Spring  
Physical principles of remote sensing with application to the oceans including satellite image processing methods. Labs involve use of PC and Unix workstation. Lecture two hours; laboratory six hours.

MSCI 263. Application of Computers in Oceanography.  4 Units  
Prerequisite(s): College math and instructor permission.  
Term Typically Offered: Fall, Spring  
Lecture, discussion and technical programming with MATLAB for computation and visualization with applications in marine sciences. Use of existing program libraries for data I/O and analysis. Semester project required. Lecture two hours; laboratory six hours.

MSCI 271. Population Biology.  3 Units  
Prerequisite(s): MSCI 103, MSCI 104; or instructor permission.  
Term Typically Offered: Fall, Spring  
Principles of the interaction among marine organisms that result in the alteration of population structures. Techniques for assessment and management of populations. Lecture two hours; laboratory three hours.

MSCI 272. Subtidal Ecology.  4 Units  
Prerequisite(s): MLML diver certification and marine ecology (knowledge of marine algae, invertebrates, and statistics recommended).  
Term Typically Offered: Fall, Spring  
Ecology of nearshore rocky subtidal populations and communities with emphasis on kelp forests. Lectures and discussions of original literature. Field work with SCUBA including group projects on underwater research techniques and community analysis, and individual research on ecological questions chosen by the student. Lecture two hours; laboratory six hours.

MSCI 274A. Electron Micros+Microanl.  3 Units  
Term Typically Offered: Fall, Spring  
MSCI 274B. Geol Central Ca Margin.  4 Units  
Term Typically Offered: Fall, Spring  
MSCI 274C. Chem Of Marine Pollution.  4 Units  
Term Typically Offered: Fall, Spring  
MSCI 274D. Global Change.  3 Units  
Term Typically Offered: Fall, Spring

MSCI 280. Scientific Writing.  3 Units  
Prerequisite(s): Graduate status and instructor permission.  
Term Typically Offered: Fall, Spring  
Techniques and strategies of scientific writing used for proposals, journal submissions, and abstracts for meetings. Students will develop their writing skills by preparing, editing, and rewriting manuscripts. Lecture three hours.

MSCI 281. Coastal Dynamics.  4 Units  
Prerequisite(s): Graduate standing and MSCI 141 or MSCI 142.  
Term Typically Offered: Fall, Spring  
Addresses the oceanographic dynamics of coastal environments, within an emphasis on eastern boundary current systems influenced by coastal upwelling. Focuses on how physical and geological oceanography interact with each other and how both affect coastal ecosystem dynamics.

MSCI 285. Seminar in Marine Biology.  2 Units  
Prerequisite(s): Instructor permission.  
Term Typically Offered: Fall, Spring  
Seminar will be held on topics changing each semester. Each student will be required to give at least one seminar. Lecture two hours.  
Note: May be repeated once for credit.

MSCI 285A. Social Biology.  2 Units  
Term Typically Offered: Fall, Spring  
MSCI 285B. Repro+Dev Marine Organism.  2 Units  
Term Typically Offered: Fall, Spring  
MSCI 285C. Recent Adv Deep-Sea Bio.  2 Units  
Term Typically Offered: Fall, Spring  
MSCI 285D. Controversies Modern Biol.  2 Units  
Term Typically Offered: Fall, Spring  
MSCI 285E. Paradigms In Commun Ecol.  2 Units  
Term Typically Offered: Fall, Spring  
MSCI 285F. Appl Molecr Tech Mar Bio.  2 Units  
Term Typically Offered: Fall, Spring  
MSCI 285G. Aspects Of Deep-Sea Biol.  2 Units  
Term Typically Offered: Fall, Spring

MSCI 286. Seminar in Marine Geology.  2 Units  
Term Typically Offered: Fall, Spring  
Seminar will be held on topics changing each semester. Each student will be required to give at least one seminar.  
Note: May be repeated once for credit.
MSCI 287. Seminar In Oceanography. 2 Units
Term Typically Offered: Fall, Spring
Seminar will be held on topics changing each semester. Each student will be required to give at least one seminar.
Note: May be repeated once for credit.

MSCI 298. Research in the Marine Sciences. 1 - 4 Units
Prerequisite(s): Graduate standing and instructor permission.
Term Typically Offered: Fall, Spring
Independent investigations of an advanced character for the graduate student with adequate preparation.
Note: CSUH students must file a petition with their home campus department before admission to this class. CSU Stanislaus students must file Individual Study forms. CSUF students must file Research Approval forms.

MSCI 299. Master's Thesis. 1 - 4 Units
Term Typically Offered: Fall, Spring

BA in Biological Science

Units required for Major: 63-67
Total units required for BA: 120

Program Description
The Department of Biological Sciences offers both undergraduate and graduate degree programs. At the undergraduate level, students are able to earn a Bachelor of Arts degree, a Bachelor of Science degree, or a Minor in Biological Sciences.

Total Units: 63-67

1. Course also satisfies General Education (GE)/Graduation Requirement.
2. CHEM 24 and CHEM 124 may be taken in lieu of CHEM 20. (CHEM 124 is not counted toward the 24 upper division unit requirement in the major.)
3. CHEM 160A and CHEM 160B may be taken in lieu of CHEM 161. Only three units of the package may be counted toward the upper division major requirement.

Notes:
- Pre-Health Professional students should take the Chemistry and Math requirements as stated in the Pre-Health Professional Program section of this catalog.

Biological Sciences Honors Program

Program Description

Biological Sciences Honors Program provides undergraduate students with an in-depth research experience. An undergraduate research experience is highly recommended for entry into many graduate and professional programs. Culmination of the Honors Program will consist of an undergraduate thesis and an undergraduate seminar.

Admission Requirements

To enter this program, students must have an overall GPA of 3.25 and a minimum of 3.0 GPA in biology courses with at least 15 units of biology and have completed at least 6 units of upper division biology courses, excluding the following:

<table>
<thead>
<tr>

</tr>
</tbody>
</table>

Required in Major; also satisfies GE.

Program Requirements

The curriculum of the Honors Program is designed to be coupled with the BA or BS degree programs. The Honors Program requires the following courses, completed with a grade of “B” or better, for the BA or BS degree:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>

BS in Biological Science (Biomedical Sciences)

Units required for Major: 73-85, includes units of study in chosen concentration (see below).

Total units required for BS: 120

Program Description

The concentration in Biomedical Sciences is designed to prepare students for graduate study in the anatomical and physiological sciences or for health professional training (Medical, Veterinary, Physical Therapy, Nursing, Pharmacy, or other health professions).

Note:

• CHEM 24 and CHEM 124 are required instead of CHEM 20 for the Biomedical Sciences Concentration.

• Additional units may be required to meet the Sacramento State foreign language requirement.

Pre-Major Requirements

The Biological Sciences program at Sacramento State is one of the most highly sought after programs in Northern California. Due to the large number of applications, the program is now officially impacted. Students wishing to become Biological Science majors must complete a series of required lower division and then must apply for admission to
the program. Check the department website for requirements, and it is highly recommended that interested students speak with an advisor at the Natural Sciences Advising Center (NSAC) as soon as possible.

Freshmen interested in the major are admitted as pre-Biological Science majors.

To change to the Biological Sciences major, pre-major students are required to complete the following courses and grade requirements and submit a Declaration of Major form to the Biological Science Department Office along with transcript copies.

1. Completion of the following lower division "pre-major" courses with a minimum "C" or better. Only first or second attempt will be considered:

1. Overall GPA of 2.5 based on the pre-major courses listed above.
2. Minimum of 30 units completed at the college level.

Notes:

- Pre-Health Professional students should take the Chemistry and Math requirements as stated in the Pre-Health Professional Program section of this catalog.
- With approval, up to six units of upper division coursework from related fields may be applied as electives in the major.
- No more than 3 units from the following combined can be applied to the Biological Sciences upper division major requirement. No more than 2 units from BIO 195 and 197 series courses can be used toward this requirement.

Total Units: 33

Note: To help you complete your degree in a timely manner and not take more units than absolutely necessary, there are ways to use single courses to meet more than one requirement (overlap). For further information, please visit the General Education page (p. 1103).

Note: There is no way to list all possible overlaps so please consult with a professional advisor. The Academic Advising Center can be visited online (http://www.csus.edu/acad/), by phone (916) 278-1000, or email (advising@csus.edu).

BS in Biological Science (Cell and Molecular Biology)

Units required for Major: 73-85, includes units of study in chosen concentration (see below).
Total units required for BS: 120

Program Description

The concentration in Cell and Molecular Biology is designed for students interested in advanced studies at the Masters or Ph.D. level, students
pursuing career working in biotechnology, or pre-health professions majors pursuing a fundamental understanding of the bimolecular basis of disease. Students completing the degree requirements for the Cell and Molecular Biology concentration also fulfills the requirements for a minor in Chemistry.

### General Education Requirements

**Area A: Basic Subjects (9 Units)**

- A1 - Oral Communication 3
- A2 - Written Communication 3
- A3 - Critical Thinking 3

**Area B: Physical Universe and Its Life Forms**

- B1 - Physical Science 2 0
- B2 - Life Forms 2 0
- B3 - Lab (Note: Lab experience to be taken with one of the following: B1, B2 or B5) 2 0
- B4 - Math Concepts 2 0
- B5 - Additional Course (Any B to reach 12 units) - Take upper-division course to complete Area & upper division requirements. 2 0

**Area C: Arts and Humanities (12 Units)**

- C1 - Arts 3
- C2 - Humanities 3
- C1/C2 - Area C Course 3
- C1/C2 - Area C Course - Take upper-division course to complete Area & upper division requirements.

**Area D: The Individual and Society (9 Units)**

- Area D Course 3
- Area D Course 3
- Area D Course - Take upper-division course to complete Area & upper division requirements.

**Area E: Understanding Personal Development (3 Units)**

- Area E Course 3

**Area F: Ethnic Studies (3 Units)**

- Area F Course 3

**Total Units** 36

1. To help you complete your degree in a timely manner and not take more units than absolutely necessary, there are ways to use single courses to meet more than one requirement (overlap). For further information, please visit the General Education page (p. 1103).

Note: There is no way to list all possible overlaps so please consult with a professional advisor. The Academic Advising Center can be visited online (http://www.csus.edu/acad/), by phone (916) 278-1000, or email (advising@csus.edu).

2. Required in Major; also satisfies GE.

### Graduation Requirements

**Graduation Requirements (required by CSU) (9 Units)**

- American Institutions: U.S. History 3
- American Institutions: U.S. Constitution & CA Government 3
- Writing Intensive (WI) 3

**Graduation Requirements (required by Sacramento State) (12 Units)**

- English Composition II 3
- Race and Ethnicity in American Society (RE) 3
- Foreign Language Proficiency Requirement 2 6

1. To help you complete your degree in a timely manner and not take more units than absolutely necessary, there are ways to use single courses to meet more than one requirement (overlap). For further information, please visit the General Education page (p. 1103).

Note: There is no way to list all possible overlaps so please consult with a professional advisor. The Academic Advising Center can be visited online (http://www.csus.edu/acad/), by phone (916) 278-1000, or email (advising@csus.edu).

2. If not satisfied before entering Sacramento State, it may be satisfied in General Education Area C2 (Humanities). “C- or better required.” The alternative methods for satisfying the Foreign Language Proficiency Requirement are described here: www.csus.edu/college/arts-letters/world-languages-literatures/foreign-language-requirement.html (https://www.csus.edu/college/arts-letters/world-languages-literatures/foreign-language-requirement.html)

### BS in Biological Science (Clinical Laboratory Sciences)

Units required for Major: 73-85, includes units of study in chosen concentration (see below).
Total units required for BS: 120

#### Program Description

The curriculum in Clinical Laboratory Sciences meets the undergraduate coursework requirements of the State of California for eligibility to take a Clinical Laboratory Scientist (CLS) licensure examination. Eligibility to take a licensure examination also requires a one year (CLS) internship training program at a state approved clinical laboratory. Completion of BS degree requirements in the Clinical Laboratory Sciences concentration does not guarantee admission to a CLS internship training program. Information on admission criteria and application procedures for the various CLS internship training programs throughout the state is available through the California Association for Medical Laboratory Technology (CAMLT) at their website (http://www.camlt.org/cls/).

Information about state and out-of-state programs can be found at NAACLS.org.

BS in Biological Science (Ecology, Evolution, and Conservation)

Units required for Major: 73-85, includes units of study in chosen concentration (see below).

Program Description

The concentration in Ecology, Evolution, and Conservation is designed for students interested in wildlife management, conservation biology, or pursuing graduate study in ecological and evolutionary approaches in the Biological Sciences. By choosing the concentration, students get necessary training for a career working with local, state, or federal agencies as a biologist or environmental scientist. It will also prepare students for graduate study in the Biological Sciences.

At least one course must be from Part A and one course from Part B (each course must be a minimum of 3 units).

- No more than 3 units from the following combined can be applied to the Biological Sciences upper division major requirement. No more than 2 units from BIO 195 and 197 series courses may count toward this requirement.

1 At least one course must be from Part A and one course from Part B (each course must be a minimum of 3 units).
BS in Biological Science (General Biology)

Units required for Major: 73-85, includes units of study in chosen concentration (see below).
Total units required for BS: 120

Program Description

The general biology concentration is intended to give students a broad training in the Biological Sciences and an opportunity to explore a wide range of elective courses. It also provides necessary preparation for most graduate programs and selected entry level technical positions in industry and government. The BS in Biological Sciences meets the Subject Matter Competency requirement to enter a Biology Single Subject Teaching Credential Program (the Biology Subject Matter Waiver Program requires three additional geoscience and environmental studies courses) and also satisfies requirements for admission to health professional schools (with additional coursework in Math and Chemistry).

Total Units 39

1 To help you complete your degree in a timely manner and not take more units than absolutely necessary, there are ways to use single courses to meet more than one requirement (overlap). For further information, please visit the General Education page (p. 1103).

Note: There is no way to list all possible overlaps so please consult with a professional advisor. The Academic Advising Center can be visited online (http://www.csus.edu/acad/), by phone (916) 278-1000, or email (advising@csus.edu).

2 Required in Major; also satisfies GE.
BS in Biological Science (Microbiology)

Units required for Major: 73-85, includes units of study in chosen concentration (see below).
Total units required for BS: 120

Program Requirements

The concentration in Microbiology is designed to prepare students for entry level technical positions in the industry and graduate programs in Microbiology leading to careers in research and teaching. This curriculum meets the educational requirements for various entry level career positions for biotechnology, environmental, pharmaceutical, wastewater treatment, and agricultural areas of microbiology. Concentration includes a minor in Chemistry.

Certificate in Issues in Natural Resource Management

Units required for Certificate: 15, in addition to requirements for BS

Program Description

The Academic Achievement Certificate in Issues in Natural Resource Management is designed to provide an interdisciplinary perspective on the conflicts, controversies, and biopolitical issues that natural resource biologists must deal with in their careers, and to introduce students to the
non-biological considerations that influence decision making processes in natural resource utilization and management.

A minimum of 15 units selected from the following list in addition to requirements for the BS in Biological Sciences with a concentration in Biological Conservation. The certificate may also be awarded to students completing the BS in General Biology with the approval of the Biological Conservation advisors.

**Cooperative Education Program (Work Experience)**

**Program Description**

Biology majors can participate in the University's Cooperative Education Program. This program provides biology-related, paid, off-campus work experience in government agencies or private industry. The experience can enhance the student's employment prospects upon graduation. Participants in this program will complete at least one six-month period. During the work period, the participant generally will not attend classes on the Sacramento State campus but will enroll in BIO 194, Biology-Related Work Experience. (BIO 194 units do not replace the curricular requirements of the Biological Sciences degree programs.)

Students interested in this program should contact the Biological Sciences Department or the campus Cooperative Education Program Office for further information.

**MA in Biological Science (Stem Cell)**

*This program has been scheduled for discontinuation; please see the MS in Biotechnology ([https://catalog.csus.edu/colleges/natural-sciences-mathematics/biological-sciences/bs-biotechnology/](https://catalog.csus.edu/colleges/natural-sciences-mathematics/biological-sciences/bs-biotechnology/)).*

Units required for MA: 30 includes units required in areas of concentration.

**Program Description**

The graduate programs in Biological Sciences lead to either a Master of Arts (MA) or a Master of Science (MS) degree and provides an opportunity for students to receive advanced training and to pursue independent investigations in particular fields of biology. It allows students to upgrade their qualifications for educational advancement to doctoral programs or for professional advancement in teaching, laboratory work, or fieldwork. The MA degree requires the completion of a project which is a Grant Proposal, unless the student is in the Stem Cell Concentration which requires an Internship Project Report. The MS degree requires completion of a thesis which has concentrations in Ecology, Evolution and Conservation and in Molecular and Cellular Biology so as to provide advanced training and research experience in these fields.

All students are required to complete a project or thesis involving field, laboratory, or literature research. The project or thesis research may be conducted on campus with a biology faculty member or at an off-campus location. In either case, the student's research must make a new contribution to the field of biology. If the research is conducted off campus, a biology faculty member must be identified as the student’s graduate advisor. Following admission to the program, students are advised by a temporary graduate advisor or by the faculty member who has agreed to supervise the student in their project/thesis research. Students should plan their academic programs in consultation with a graduate advisor as early as possible, preferably prior to enrollment in the program.

For additional information regarding the Biological Sciences Graduate Program, students may contact the Biological Sciences Department Office, Biological Sciences website ([http://www.csus.edu/bios/](http://www.csus.edu/bios/)), or consult the Biological Sciences Graduate Program Handbook, available through the Department’s Web site.

**Admission Requirements**

Admission as a classified graduate student to the MA or MS program in Biological Sciences requires:

- a baccalaureate degree;
- completion of a major in biological sciences or closely related field; or completion of 24 units of upper division biological sciences courses or courses in closely related fields, each of which must be passed with a "C-" or better;
- a minimum GPA of 2.75 in all biology courses and a minimum GPA of 3.0 in upper division biology courses;
- GRE General Test scores (note: the GRE is not required for the Stem Cell Program);
- a faculty member who has agreed to serve as their graduate advisor;
- two letters of recommendation from persons qualified to judge the applicant’s potential for successful graduate study; and
- a statement of purpose.

It is important to note that meeting all admission requirements does not guarantee acceptance into the graduate program. Students who have deficiencies in admission requirements that can be removed by specified additional preparation, or who have not been accepted by a graduate advisor, may be admitted with conditionally classified graduate status. Admission as a conditionally classified graduate student does not guarantee fully classified status. Fully classified graduate status is conferred when all deficiencies identified at the time of admission are removed and a biology faculty member has agreed to serve as their thesis advisor. Any deficiencies in admissions requirements will be noted on a written response to the admission application.

**Admission Procedures**

Applicants must complete a university application by the posted application deadline date for the term applying.
• an online application for admission; and
• two sets of official transcripts from all colleges and universities attended, other than Sacramento State.

For more admissions information and application deadlines, please visit http://www.csus.edu/gradstudies/

In addition, all prospective graduate students must submit the following application materials directly to the Department of Biological Sciences:

• an online departmental application for admission;
• one set of unofficial transcripts from all colleges and universities attended, other than Sacramento State;
• GRE General Test scores (NOTE: GRE General Test scores will be accepted after the application deadline but only if the test was taken prior to the deadline; GRE scores are not needed for the MA Stem Cell Program);
• two letters of recommendation; and
• a statement of purpose.

Departmental applications for admission are due February 1. There is currently no general call for admission to begin in the spring semester. However a student may petition the department to begin the spring. Please contact your potential graduate advisor (i.e., a faculty member in your area of interest) to discuss this option. Approximately eight to ten weeks after receipt of all items listed above, a decision regarding admission will be mailed to the applicant.

No units from the following are acceptable toward the master’s degree:

**Minimum Units and Grade Requirement for the Degree**

Units required for MA: 30 (includes units required in areas of concentration).

Minimum Cumulative GPA: 3.0

**Advancement to Candidacy**

The Advancement to Candidacy process serves to ensure that a student is qualified for and making good progress toward successfully completing the Master’s degree. Each classified graduate student must file an application for Advancement to Candidacy, indicating a proposed program of graduate study. This procedure should begin as soon as the classified graduate student has:

• removed any deficiencies in admission requirements;
• completed at least 12 units in the graduate program with a minimum 3.0 GPA, including at least one course at the 200-level;
• begun a preliminary study for the thesis or project; and
• taken the Writing Placement for Graduate Students (WPG) or taken a Graduate Writing Intensive (GWI) course in their discipline within the first two semesters of coursework at California State University, Sacramento or secured approval for a WPG waiver.

An Application for Advancement to Candidacy forms are available on the Office of Graduate Studies Web site and the Department of Biological Sciences Web site. The student fills out the form after planning a degree program in consultation with his/her Biological Sciences graduate advisor. After approval by the Biological Sciences Graduate Committee and the student’s thesis committee, the completed form is returned to the Office of Graduate Studies for approval.

All requirements for the Master of Arts degree must be completed within seven (7) years starting from the time the first course is used to meet the master’s degree requirements.

**Total Units** 30

1 The 30 units must include a minimum of 18 units of 200-level courses.
No more than 2 units of BIO 502 may be applied toward the 30 unit requirement.

Each student who receives a Master of Arts degree from the Department of Biological Sciences must submit a written project based on a research problem in biology under the supervision of a graduate advisor. A project may be based on either of the following:

- Grant Proposal: a research proposal in the format required by a state or federal granting agency (e.g., National Science Foundation, National Institutes of Health) based on a novel hypothesis that addresses a biological problem; OR
- Internship Project Report: a project report on the student's internship experience.

MA in Biological Sciences

Units required for MA: 30 includes units required in areas of concentration.

Program Description

The Master of Arts (MA) in Biological Sciences offers advanced training in the biological sciences through coursework and completion of a non-thesis project. The MA degree prepares students for careers in education, government, and industry, as well as for doctoral programs or advancement in teaching, laboratory work, or fieldwork.

Faculty have specializations and expertise in a diverse range of areas within the biological sciences. Students work with a graduate faculty advisor to develop a coursework plan that meets their professional goals, and design and complete their culminating project.

The MA degree requires 30 credit hours of coursework and completion of a project, which takes the form of a grant proposal or a review paper.

For additional information regarding the MA in Biological Sciences, visit the Biological Sciences website (http://www.csus.edu/bios/).

Admission Requirements

Admission as a classified graduate student to the MA in Biological Sciences requires:

- a baccalaureate degree;
- completion of a major in biological sciences or closely related field; or completion of 24 units of upper division biological sciences courses or courses in closely related fields, each of which must be passed with a "C-" or better;
- a minimum GPA of 2.75 in all biology courses and a minimum GPA of 3.0 in upper division biology courses; and
- a faculty member who has agreed to serve as the applicant's graduate advisor.*

It is important to note that meeting all admission requirements does not guarantee acceptance into the graduate program. Applicants who have deficiencies in admission requirements (e.g., GPA, coursework) that can be removed by specified additional preparation may be admitted with conditionally classified graduate status. Admission as a conditionally classified graduate student does not guarantee fully classified status. Fully classified graduate status is conferred when all deficiencies identified at the time of admission are removed. Any deficiencies in admissions requirements will be noted in a written communication to the applicant.

*For your application to be considered for admission, a faculty member in the Department must agree to serve as your graduate advisor. This requires that you correspond directly with a faculty member with whom you would like to study. We recommend that you do this well ahead of the application deadline to allow sufficient time for correspondence. In your application, you will be asked to enter the name(s) of the faculty member(s) with whom you would like to study and have been in correspondence. This requirement does not apply to applicants to the MA Stem Cell Program.

Admission Procedures

To be considered for admission, all applicants must complete a Cal State Apply application by the posted application deadline date for the term applying and submit all requested application materials below.

A complete application for admission into the Graduate Program in Biological Sciences includes all of the following:

- an online Cal State Apply application for admission;
- one set of official transcripts from all colleges and universities attended, other than Sacramento State;
- a Department supplemental application submitted with the Cal State Apply application;
- two letters of recommendation from persons qualified to judge the applicant's potential for successful graduate study; and
- a statement of purpose.

Applications are due by February 15. For additional university admissions information and application deadlines, visit the Office of Graduate Studies (https://www.csus.edu/graduate-studies/future-students/graduate-programs-deadlines.html). Approximately eight to ten weeks after the application deadline, a decision regarding admission will be emailed to the applicant.

Note: The Department of Biological Sciences currently does not have a call for admission in the spring semester. However, under exceptional circumstances an applicant may petition the department to begin graduate study in the spring. A petition for spring admission requires a compelling reason and support by a faculty member in the department. Please contact your potential graduate advisor (i.e. a faculty member in your area of interest) to discuss this option.

No units from the following are acceptable toward the master's degree:

Units required for the MA: 30
Minimum Cumulative GPA: 3.0

Advancement to Candidacy
The Advancement to Candidacy process serves to ensure that the student is qualified for and making good progress toward successfully completing their master's degree. Each classified graduate student must file an application for Advancement to Candidacy, indicating a proposed program of study, and receive approval for their proposed project. This procedure can begin as soon as the student has:

- removed any deficiencies in admission requirements (i.e., attained fully classified status);
- completed at least 12 units in the graduate program with a minimum 3.0 GPA, including at least one course at the 200-level;
- completed an acceptable draft of the proposed project; and
- taken the Graduate Writing Intensive (GWI) course in their discipline within the first two semesters of coursework at California State University, Sacramento and passed the course with a grade of B or better.

Advancement to Candidacy forms are available on the Office of Graduate Studies website. The student must fill out and submit the form after planning a degree program in consultation with his/her graduate advisor and supervisory committee. After approval by the Department's Graduate Coordinator, the completed form is routed to the Office of Graduate Studies for approval.

Minor in Biological Science
Units required for Minor: 20

Program Description
The minor in Biological Sciences is designed to provide students in other majors with the opportunity to broaden their exposure to and understanding of the biological sciences. The minor complements several majors that require coursework in biological sciences, including Chemistry, Nursing, Environmental Studies, Health Science, Kinesiology, and Family and Consumer Sciences.

The minor requires 20 units. The 20 units must include a minimum of 10 upper division units at least one of the upper division courses must have a laboratory component. Three units of biochemistry may be counted toward the minor. Six upper division units must be earned in residence.

Program Requirements
No more than two units of the following may be counted toward the minor:

MS in Biological Science (Ecology, Evolution, and Conservation)
This program has been scheduled for discontinuation; please see the MS in Biological Sciences (https://catalog.csus.edu/colleges/natural-sciences-mathematics/biological-sciences/ms-in-biological-science-general/).

Total units required for MS: 30 includes units required in areas of concentration.
Program Description

The graduate programs in Biological Sciences lead to either a Master of Arts (MA) or a Master of Science (MS) degree and provides an opportunity for students to receive advanced training and to pursue independent investigations in particular fields of biology. It allows students to upgrade their qualifications for educational advancement to doctoral programs or for professional advancement in teaching, laboratory work, or fieldwork. The MA degree requires the completion of a project which is a Grant Proposal, unless the student is in the Stem Cell Concentration which requires an Internship Project Report. The MS degree requires completion of a thesis which has concentrations in Ecology, Evolution and Conservation and in Molecular and Cellular Biology so as to provide advanced training and research experience in these fields.

All students are required to complete a project or thesis involving field, laboratory, or literature research. The project or thesis research may be conducted on campus with a biology faculty member or at an off-campus location. In either case, the student’s research must make a new contribution to the field of biology. If the research is conducted off campus, a biology faculty member must be identified as the student’s graduate advisor. Following admission to the program, students are advised by a temporary graduate advisor or by the faculty member who has agreed to supervise the student in their project/thesis research. Students should plan their academic programs in consultation with a graduate advisor as early as possible, preferably prior to enrollment in the program.

For additional information regarding the Biological Sciences Graduate Program, students may contact the Biological Sciences Department Office, Biological Sciences website (http://www.csus.edu/bios/), or consult the Biological Sciences Graduate Program Handbook, available through the Department’s Web site.

Admission Requirements

Admission as a classified graduate student to the MA or MS program in Biological Sciences requires:

• a baccalaureate degree;
• completion of a major in biological sciences or closely related field; or completion of 24 units of upper division biological sciences courses or courses in closely related fields, each of which must be passed with a “C-” or better;
• a minimum GPA of 2.75 in all biology courses and a minimum GPA of 3.0 in upper division biology courses;
• a faculty member who has agreed to serve as their graduate advisor (Note: For your application to be considered for admission, you must correspond with a faculty member in the department with whom you would like to work prior to the application deadline. We suggest you do this well in advance of the application deadline. You will be asked to enter the name(s) of the faculty member(s) with whom you have been in correspondence on the Department Application. This requirement does not apply to applicants to the MA Stem Cell Concentration);
• two letters of recommendation from persons qualified to judge the applicant’s potential for successful graduate study; and
• a statement of purpose.

It is important to note that meeting all admission requirements does not guarantee acceptance into the graduate program. Students who have deficiencies in admission requirements that can be removed by specified additional preparation, or who have not been accepted by a graduate advisor, may be admitted with conditionally classified graduate status. Admission as a conditionally classified graduate student does not guarantee fully classified status. Fully classified graduate status is conferred when all deficiencies identified at the time of admission are removed and a biology faculty member has agreed to serve as their thesis advisor. Any deficiencies in admissions requirements will be noted on a written response to the admission application.

Admission Procedures

Applicants must complete a university application by the posted application deadline date for the term applying.

• an online application for admission; and
• two sets of official transcripts from all colleges and universities attended, other than Sacramento State.

For more admissions information and application deadlines, please visit http://www.csus.edu/gradstudies/.

In addition, all prospective graduate students must submit the following application materials directly to the Department of Biological Sciences:

• an online departmental application for admission;
• one set of unofficial transcripts from all colleges and universities attended, other than Sacramento State;
• two letters of recommendation; and
• a statement of purpose.

Departmental applications for admission are due February 1. There is currently no general call for admission for students to begin in the spring semester. However a student may petition the department to begin the spring. Please contact your potential graduate advisor (i.e., a faculty member in your area of interest) to discuss this option. Approximately eight to ten weeks after receipt of all items listed above, a decision regarding admission will be mailed to the applicant.

Minimum Units and Grade Requirements for the Degree

Units required for the MS: 30 includes units required in areas of concentration
Minimum Cumulative GPA: 3.0

**Advancement to Candidacy**

The Advancement to Candidacy process serves to ensure that a student is qualified for and making good progress toward successfully completing the Master’s degree. Each classified graduate student must file an application for Advancement to Candidacy, indicating a proposed program of graduate study. This procedure should begin as soon as the classified graduate student has:

- removed any deficiencies in admission requirements;
- completed at least 12 units in the graduate program with a minimum 3.0 GPA, including at least one course at the 200-level;
- begun a preliminary study for the thesis or project; and
- taken the Writing Placement for Graduate Students (WPG) or taken a Graduate Writing Intensive (GWI) course in their discipline within the first two semesters of coursework at California State University, Sacramento or secured approval for a WPG waiver.

An Application for Advancement to Candidacy forms are available on the Office of Graduate Studies website and the Department of Biological Sciences Web site. The student fills out the form after planning a degree program in consultation with his/her Biological Sciences graduate advisor. After approval by the Biological Sciences Graduate Committee and the student’s thesis committee, the completed form is returned to the Office of Graduate Studies for approval.

**Note:**

Supporting Fields: A maximum of 10 units from an approved supporting field (e.g., Chemistry, Physics, Environmental Studies, Geology, Physics) may be counted toward the degree, with graduate advisor and graduate committee approval obtained before taking the course(s).

No more than 10 units of BIO 299 and BIO 500 may be applied toward the 30 unit requirement.

Each student who receives a Master’s of Science degree from the Department of Biological Sciences must submit a thesis based on original research in biology. A thesis can be based on either of the following sources of data:

- data generated by the student’s original research in which the student performs the fieldwork or laboratory experiments and/or
- data obtained from sources other than the student’s own fieldwork or laboratory experiments, provided the data are analyzed in an original way.

The use of data must result in an original contribution to the problem being investigated.

All requirements for the Master’s degree must be completed within seven (7) years starting from the time the first course is used to meet the master’s degree requirements.

Additional Requirements for Concentrations (14 Units)

- Select a concentration from the following: 14
  - No Concentration
- Ecology, Evolution and Conservation
- Molecular and Cellular Biology

Total Units 30

1 The 30 units must include a minimum of 18 units of 200-level seminar courses.

An Application for Advancement to Candidacy forms are available on the Office of Graduate Studies website. The student fills out the form after planning a degree program in consultation with his/her Biological Sciences graduate advisor. After approval by the Biological Sciences Graduate Committee and the student's thesis committee, the completed form is returned to the Office of Graduate Studies for approval.

Note:

Supporting Fields: A maximum of 10 units from an approved supporting field (e.g., Chemistry, Physics, Environmental Studies, Geology, Physics) may be counted toward the degree, with graduate advisor and graduate committee approval obtained before taking the course(s).

No more than 10 units of BIO 299 and BIO 500 may be applied toward the 30 unit requirement.

Each student who receives a Master's of Science degree from the Department of Biological Sciences must submit a thesis based on original research in biology. A thesis can be based on either of the following sources of data:

- data generated by the student's original research in which the student performs the fieldwork or laboratory experiments and/or
- data obtained from sources other than the student's own fieldwork or laboratory experiments, provided the data are analyzed in an original way.

The use of data must result in an original contribution to the problem being investigated.

All requirements for the Master's degree must be completed within seven (7) years starting from the time the first course is used to meet the master's degree requirements.

Total Units 16

1 Approved electives in Biological Sciences or supporting fields. Electives must be selected in consultation with the graduate advisor and approved at the Advancement to Candidacy meeting. Up to two additional units of BIO 294A (up to 4 total) coursework taken as a graduate student in the program may be applied to the MS degree.

MS in Biological Sciences

Total units required for MS: 30

Program Description

The Master of Science (MS) in Biological Sciences offers advanced training in the biological sciences through coursework and completion of an original research-based thesis. The MS degree prepares students for careers in education, government, and industry, as well as for doctoral programs or advancement in teaching, laboratory work, or fieldwork.

Faculty have specializations and expertise in a diverse range of areas within the biological sciences. Students work with a graduate faculty advisor to develop a coursework plan that meets their professional goals, design an original research investigation, and complete their thesis. A student's thesis research may be conducted on campus or at an off-campus location under the supervision of their faculty advisor.

The MS degree requires 30 credit hours of coursework, original research, and completion of a thesis that involves biological field and/or laboratory research.

For additional information regarding the MS in Biological Sciences, visit the Biological Sciences website (http://www.csus.edu/bios/).

Admission Requirements

Admission as a classified graduate student to the MS in Biological Sciences requires:

- a baccalaureate degree;
- completion of a major in biological sciences or closely related field; or completion of 24 units of upper division biological sciences courses or courses in closely related fields, each of which must be passed with a "C-" or better;
- a minimum GPA of 2.75 in all biology courses and a minimum GPA of 3.0 in upper division biology courses; and
- a faculty member who has agreed to serve as the applicant's graduate advisor.*

It is important to note that meeting all admission requirements does not guarantee acceptance into the graduate program. Applicants who have
deficiencies in admission requirements (e.g., GPA, coursework) that can be removed by specified additional preparation may be admitted with conditionally classified graduate status. Admission as a conditionally classified graduate student does not guarantee fully classified status. Fully classified graduate status is conferred when all deficiencies identified at the time of admission are removed. Any deficiencies in admissions requirements will be noted in a written communication to the applicant.

*For your application to be considered for admission, a faculty member in the Department must agree to serve as your graduate advisor. This requires that you correspond directly with a faculty member with whom you would like to study. We recommend that you do this well ahead of the application deadline to allow sufficient time for correspondence. In your application, you will be asked to enter the name(s) of the faculty member(s) with whom you would like to study and have been in correspondence.

Admission Procedures
To be considered for admission, all applicants must complete a Cal State Apply application by the posted application deadline date for the term applying and submit all requested application materials below.

A complete application for admission into the Graduate Program in Biological Sciences includes all of the following:
• an online Cal State Apply application for admission;
• one set of official transcripts from all colleges and universities attended, other than Sacramento State;
• a Department supplemental application submitted with the Cal State Apply application;
• two letters of recommendation from persons qualified to judge the applicant’s potential for successful graduate study; and
• a statement of purpose.

Applications are due by February 15. For additional university admissions information and application deadlines, visit the Office of Graduate Studies website. The student must fill out and submit the form after completing their master’s degree. Each classified graduate student must file an application for Advancement to Candidacy, indicating a proposed program of study, and receive approval for their proposed thesis research. This procedure can begin as soon as the student has:
• removed any deficiencies in admission requirements (i.e., attained fully classified status);
• completed at least 12 units in the graduate program with a minimum 3.0 GPA, including at least one course at the 200-level;
• completed an acceptable draft of the proposed thesis; and
• taken a Graduate Writing Intensive (GWI) course in their discipline within the first two semesters of coursework at California State University, Sacramento.

Advancement to Candidacy
The Advancement to Candidacy process serves to ensure that the student is qualified for and making good progress toward successfully completing their master's degree. Each classified graduate student must file an application for Advancement to Candidacy, indicating a proposed program of study, and receive approval for their proposed thesis research. This procedure can begin as soon as the student has:

Minimum Units and Grade Requirements for the Degree
Units required for the MS: 30
Minimum Cumulative GPA: 3.0

Advancement to Candidacy forms are available on the Office of Graduate Studies website. The student must fill out and submit the form after planning a degree program in consultation with his/her graduate advisor and supervisory committee. After approval by the Department’s Graduate Coordinator, the completed form is sent to the Office of Graduate Studies for approval.

Note:
Supporting Fields: A maximum of 10 units from an approved supporting field (e.g., Chemistry, Physics, Environmental Studies, Geology, Physics) may be counted toward the MS in Biological Sciences; graduate advisor and Graduate Committee approval must be obtained before taking any of these course(s).

No more than 12 units of BIO 299 and BIO 500 may be applied toward the 30 unit requirement.

Each student who receives an MS in Biological Sciences must submit a Thesis based on original research in biology. A thesis can be based on either of the following sources of data:
• data generated by the student’s original research, in which the student performs the fieldwork or laboratory experiments; and/or
• data obtained from sources other than the student’s own fieldwork or laboratory experiments, provided that the data are analyzed in an original way.
The use of data must result in an original contribution to the problem being investigated.

All requirements for the Master’s degree must be completed within seven (7) years starting from the time the first course is used to meet the Master’s degree requirements.

Elective Courses (10 Units)

Select electives in consultation with graduate advisor

Total Units 30

1. The 30 units must include a minimum of 18 units of 200-level seminar courses.
2. Students must complete 6 units of BIO 299 to fulfill degree requirements.
3. Approved electives in Biological Sciences or supporting fields. Electives must be selected in consultation with the graduate advisor and approved at the Advancement to Candidacy meeting. Up to six units of upper division (100-level) coursework taken as a graduate student in the program may be applied to the MS degree.

MS in Biotechnology

Units required for MS: 30 includes units required in areas of concentration.

Program Description

The graduate programs in Biological Sciences offer advanced training and independent investigations in biology that lead to a Master of Science (MS) in Biotechnology. This degree program allows students who successfully complete the program to upgrade their qualifications for careers in the biotechnology sector or for educational advancement to doctoral programs. The MS in Biotechnology requires original research in a biotechnology-centered discipline and completion of a thesis.

All students are required to complete a thesis involving laboratory research. Research for the thesis may be conducted on campus with a biology faculty member or at an off-campus location. In either case, the student’s research must make a new contribution to the field of biotechnology. If the research is conducted off campus, a biology faculty member must be identified as the student’s graduate advisor. Following admission to the program, students are advised by a graduate advisor who will supervise their thesis research.

For additional information regarding the Biological Sciences Graduate Program, visit the Biological Sciences website (http://www.csus.edu/bios/).

Admission Requirements

Admission as a classified graduate student to the MS in Biotechnology requires:

- a baccalaureate degree;
- completion of a major in biological sciences or closely related field; or completion of 24 units of upper division biological sciences courses or courses in closely related fields, each of which must be passed with a "C-" or better;
- a minimum GPA of 2.75 in all biology courses and a minimum GPA of 3.0 in upper division biology courses;
- two letters of recommendation from persons qualified to judge the applicant’s potential for successful graduate study; and
- a statement of purpose.

It is important to note that meeting all admission requirements does not guarantee acceptance into the graduate program. Students who have deficiencies in admission requirements that can be removed by specified additional preparation may be admitted with conditionally classified graduate status. Admission as a conditionally classified graduate student does not guarantee fully classified status. Fully classified graduate status is conferred when all deficiencies identified at the time of admission are removed and a biology faculty member has agreed to serve as their thesis advisor. Any deficiencies in admissions requirements will be noted on a written response to the admission application.

Admission Procedures

Applicants must complete a university application by the posted application deadline date for the term applying:

- an online Cal State Apply application for admission; and
- one set of official transcripts from all colleges and universities attended, other than Sacramento State. For more admissions information and application deadlines, please visit (https://www.csus.edu/graduate-studies/future-students/graduate-programs-deadlines.html)

In addition, all prospective graduate students must submit the following application materials directly to the Department of Biological Sciences:

- an online departmental application for admission;
- one set of unofficial transcripts from all colleges and universities attended, other than Sacramento State;
- two letters of recommendation; and
- a statement of purpose.

Departmental applications for admission are due February 15. There is currently no general call for admission for students to begin in the spring semester. Approximately eight to ten weeks after the application deadline, a decision regarding admission will be emailed to the applicant.

No units from the following are acceptable toward the master’s degree:
Minimum Units and Grade Requirement for the Degree

Units required for MS: 30
Minimum Cumulative GPA: 3.0

Advancement to Candidacy

The Advancement to Candidacy process serves to ensure that a student is qualified for and making good progress toward successfully completing the Master’s degree. Each classified graduate student must file an application for Advancement to Candidacy, indicating a proposed program of graduate study. This procedure should begin as soon as the classified graduate student has:

• removed any deficiencies in admission requirements;
• completed at least 12 units in the graduate program with a minimum 3.0 GPA, including at least one course at the 200-level;
• begun a preliminary study for the thesis; and
• taken the Graduate Writing Intensive (GWI) course in their discipline within the first two semesters of coursework at California State University, Sacramento and passed the course with a grade of B or better.

An Application for Advancement to Candidacy forms are available on the Office of Graduate Studies Web site and the Department of Biological Sciences Web site. The student fills out the form after planning a degree program in consultation with his/her Biological Sciences graduate advisor. After approval by the Biological Sciences Graduate Committee and the student’s thesis committee, the completed form is routed to the Office of Graduate Studies for approval. All requirements for the Master of Science degree must be completed within seven (7) years starting from the time the first course is used to meet the master’s degree requirements.

Program Requirements

1  The 30 units must include a minimum of 23 units of 200-level courses.
2  BIO 294A must be taken twice for a total of 2 units.

MS in Marine Science

Total units required for MS: 31-34

Program Description

The Master of Science degree in Marine Science is offered as an interdepartmental degree through Biological Sciences in cooperation with Moss Landing Marine Laboratories.

Admission Requirements

The Master of Science degree in Marine Science program is administered through MLML and the Biological Sciences Department. The prospective student must meet the entrance requirements for the program and will be accepted into unclassified or conditionally classified graduate status by normal procedures. The student will become classified upon completion of MLML’s requirements.

A conditionally classified student may become fully classified in the Marine Science program as follows:

• obtain an advisor at MLML and one from the department of the student’s choice at the home campus. Each new student in the MS program at MLML will be assigned an advisor who may or may not be the final thesis advisor;
• make up any coursework deficiencies at either the home campus department (see their regulations) and/or MLML. MSCI 104, and three of the following five courses are prerequisites for classified graduate standing:

<table>

<td>4</td>
</tr>
</tbody>
</table>
Notes:
- The student must have submitted a thesis approved by the thesis advisory committee. The thesis must conform to the rules set forth by the home campus.
- The student must successfully give an oral thesis defense in the form of a seminar open to the general public. The thesis advisory committee must be present, may require further oral questioning after the seminar, and will evaluate the success of the presentation.

Minimum Units and Grade Requirement for the Degree
Units required for the MS: 31-34
Minimum Cumulative GPA: 3.0
A student becomes eligible for the MS degree in Marine Science after satisfying the following requirements:
- the student has been advanced to candidacy;
- the student has satisfied MLML's requirements for the degree; and
- the student has completed the following curriculum requirements.

Advancement to Candidacy
To be advanced to candidacy, the student must have:
- attained classified standing;
- selected a thesis problem and a thesis advisory committee. The thesis committee will be composed of at least three members, including one faculty member from MLML (who is ordinarily the thesis advisor) and, at the discretion of the home campus, a representative from that campus. The other member or members of the thesis committee may also be from MLML, or from the home campus, or elsewhere, with the approval of the thesis advisor; and
- taken the Writing Placement for Graduate Students (WPG) or taken a Graduate Writing Intensive (GWI) course in their discipline within the first two semesters of coursework at California State University, Sacramento or secured approval for a WPG waiver.

Subject Matter Program (Biology)
Units required for Subject Matter Program: 61-65

Program Description
The Science Subject Matter Program (in biology, chemistry, physics, or foundational level general science) is designed to meet the California Commission on Teacher Credentialing (CTC) subject matter requirement for students to enter a California Single Subject teaching credential program. Meeting the subject matter requirement is a credential program admission requirement, and can be met either through a subject matter program (such as those described below) or by taking a state approved content exam (currently the California Subject Exam for Teachers, the CSET). In order to meet the subject matter program requirement, all courses must be completed with a grade of “C” or better. In order to teach public school in California, you must also complete a teaching credential program.

Subject matter programs are not degrees or concentrations; instead they are a series of courses that allow a student to meet the requirements for admission to a teaching credential program. Students must also complete a BA or BS degree (with any major) to fulfill the credential requirements.

MSCI 285 Seminar in Marine Biology 2
MSCI 286 Seminar in Marine Geology 2
MSCI 287 Seminar in Oceanography 2
MSCI 289 Master's Thesis 1

Electives (24 Units) 1
Select 9 units of electives from MSCI 200-level courses 9
Select 15 units of electives from MSCI 100-level or above courses as approved by the thesis committee. The following courses may be used:
- MSCI 112 Marine Birds and Mammals
- MSCI 113 Marine Ichthyology
- MSCI 124 Marine Invertebrate Zoology I
- MSCI 125 Marine Invertebrate Zoology II
- MSCI 131 Marine Botany
- MSCI 201 Library Research Methods
- MSCI 202 Oceanographic Instrumentation
- MSCI 211 Ecology of Marine Birds and Mammals
- MSCI 212 Advanced Topics in Marine Vertebrates
- MSCI 221 Advanced Topics in Marine Invertebrates
- MSCI 231 Biology Of Seaweeds
- MSCI 234 Advanced Biological Oceanography
- MSCI 242 Plate Tectonics
- MSCI 248 Marine Benthic Habitat Techniques
- MSCI 251 Marine Geochemistry
- MSCI 261 Ocean Circulation and Mixing
- MSCI 271 Population Biology
- MSCI 272 Subtidal Ecology
- MSCI 280 Scientific Writing
- MSCI 298 Research in the Marine Sciences

Total Units 31-34

1 Other electives, including courses from home campus departments, may be included after consultation with the thesis advisory committee. See course descriptions for prerequisites.
Science majors who intend to pursue a teaching credential should see a faculty advisor or the department chair in the department of their academic major. It is recommended that they do so early as it is critical that their coursework be carefully planned and coordinated to include the required subject matter program courses. In addition, students are encouraged to become involved with education related activities like grading, assisting in labs, tutoring K-12 students, and visiting schools; please speak with the subject matter advisors in your area for more information.

**Total Units**: 61-65

1. Course also satisfies General Education (GE)/Graduation Requirement.

**Note:**

- BIO 195T is highly recommended for students interested in pursuing a biology credential in the CSU system; 45 hours of documented work with the target school age is required prior to admission in a credential program.

**Chemistry**

*College of Natural Sciences and Mathematics*

**Program Description**

Chemistry is the area of science in which the composition, structure, properties, and reactions of substances are studied. The Chemistry Department at Sacramento State offers a BS in Chemistry, a BS in Biochemistry, a BA in Chemistry (including concentrations in Biochemistry or Forensic Chemistry), and the MS degree in Chemistry (including a concentration in Biochemistry).

The BS degrees are recommended for students intending to pursue graduate work in Chemistry or Biochemistry or those desiring a strong technical background for work in the chemical or biotechnology industry or other highly technical areas. The BS Chemistry degree is approved by the American Chemical Society.

The BA degree is more flexible in terms of upper division electives and is recommended for students interested in professional health degrees, forensic chemistry, or other programs with a major component of chemistry. Students planning to teach Chemistry at the secondary school level are advised to obtain a BA in Chemistry.

The graduate program in Chemistry leads to a Master of Science (MS) degree. It provides students an opportunity to receive advanced training in chemistry, biochemistry, and chemical education and to pursue independent research. The MS program enhances a student’s overall knowledge in chemistry and experimental skills and prepares students for careers in industry and teaching and for entry into PhD and professional programs.

**Degree Programs**

- BA in Chemistry (Biochemistry) (p. 843)
- BA in Chemistry (Forensic Chemistry) (p. 844)
- BA in Chemistry (General) (p. 846)
- BS in Biochemistry (p. 847)
- BS in Chemistry (p. 849)
- Chemistry Honors Program (p. 850)
- Minor in Chemistry (p. 851)
- Subject Matter Program (Pre-Credential Preparation) (p. 855)
- MS in Chemistry (p. 851)
- MS in Chemistry (Biochemistry) (p. 853)

**Accreditation**

In addition to California State University, Sacramento’s full accreditation by the Western Association of Schools and Colleges, the Bachelor of Arts and the Bachelor of Science in Chemistry are also individually accredited by the American Chemical Society.

**Notice to Students RE: Professional Licensure and Certification**

California State University programs for professions that require licensure or certification are intended to prepare the student for California licensure and certification requirements. Admission into programs for professions that require licensure and certification does not guarantee that students will obtain a license or certificate. Licensure and certification requirements are set by agencies that are not controlled by or affiliated with the California State University and licensure and certification requirements can change at any time.

The California State University has not determined whether its programs meet other states’ educational or professional requirements for licensure and certification. Students planning to pursue licensure or certification in other states are responsible for determining whether, if they complete a California State University program, they will meet their state’s...
requirements for licensure or certification. This disclosure is made pursuant to 34 CFR §668.43(a)(5)(v)(C).

**Special Features**
- The Department of Chemistry is accredited by the American Chemical Society, and students graduating with the BS Chemistry degree will receive a certificate from the Society.
- Extensive available instrumentation includes two Agilent 7890 GC-Mass spectrometers; an Agilent 1260/6460 LC-Mass spectrometer (triple quadrupole); a Bruker Avance-500 NMR; a Bruker Avance-300 NMR; a Bruker MSL 300MHz wide bore NMR; a Nicolet IS-50 FTIR; a Shimadzu UV-2401 PC spectrometer; two Shimadzu spectrofluorometers (RF 6000 and RFS301PC); numerous uv-vis diode array spectrophotometers; a Beckman L2-50 ultracentrifuge; numerous Agilent/HPLC systems; a Perkin-Elmer atomic absorption spectrometer; a thermoanalyzer; a QuantumCube computational system; Spartan and Gaussian computational chemistry software; numerous gas chromatographs.
- Several science computing labs are available to students.
- The Chemistry faculty strongly believe that students majoring in Chemistry should have an opportunity to participate in basic or applied research and to work closely with faculty in developing their chemical skills and knowledge. Bachelor of Science and Bachelor of Arts majors are strongly encouraged to complete an independent research project. All graduate students must enroll in a graduate research course.
- All faculty serve as advisors to students and have a strong commitment to helping students find jobs or gain admission to graduate programs or professional schools.
- Our department environment is very similar to a small college liberal arts experience.

**Career Possibilities**
Students in our program learn both fundamental theory and practical application in all areas of chemistry (inorganic, analytical, organic, physical, biochemical) and they gain substantial experience operating highly sophisticated instrumentation. This prepares students for a wide variety of careers. Examples include: environmental chemistry, toxicology, materials science, government and industry laboratories, biotechnology, agricultural technology, high school science teaching, medicine, dentistry, optometry and other related health sciences, pharmacy and pharmacology, patent law, computational chemistry, forensic analysis, sales representative for instrument, chemical and pharmaceutical companies, art restoration and more.

**Faculty**
BAUER, JOHANNES  
CRAWFORD, SUSAN M.  
DIXON, ROY W.
CHEM 1E. General Chemistry for Engineering. 4 Units
Prerequisite(s): High school chemistry; Math 30 or eligibility to take MATH 30 as evidenced by the calculus readiness diagnostic exam; passing score on a standardized Chemistry diagnostic exam given prior to each semester, or minimum grade of "C" in CHEM 4
Term Typically Offered: Fall, Spring, Summer
A one-semester chemistry course for engineering students covering the fundamental principles and concepts of chemistry important to engineering applications. Lecture topics include atomic and molecular structure, solution chemistry, equilibrium, oxidation-reduction, thermodynamics, intermolecular forces; electrochemistry; radiochemistry; polymers; metallic bonding and alloys; chemical diffusion and kinetics. Lecture three hours, Lab three hours.
Note: Enrollment in this course is restricted to engineering majors.

CHEM 1A. Introduction to General Chemistry. 5 Units
Prerequisite(s): One year high school algebra; high school chemistry recommended.
Term Typically Offered: Fall, Spring
Chemistry 1A emphasizes chemical nomenclature and techniques of chemical problem solving. Topics covered include: dimensional analysis; conversions between measuring units; weight, mole and chemical equations; density; elementary gas laws; heat and temperature; elementary acid and base chemistry; oxidation and reduction; solutions. Three hours lecture.

CHEM 20. Organic Chemistry Lecture--Brief Course. 3 Units
Prerequisite(s): CHEM 1B.
Term Typically Offered: Fall, Spring, Summer
Basic principles of organic chemistry. Recommended for students majoring in life-sciences, but not recommended for preprofessional students.

CHEM 20L. Introductory Organic Chemistry Laboratory. 1 Unit
Prerequisite(s): CHEM 20; CHEM 20 may be taken concurrently.
Term Typically Offered: Fall, Spring
Basic organic experimental techniques. Experimental topics include: melting points, purification of solids, distillation, chromatography, extraction, and functional group qualitative analysis. Specifically designed for Biological Sciences majors and others who want to meet the Chemistry minor requirements for a lower division organic laboratory. Laboratory three hours.

CHEM 24. Organic Chemistry Lecture I. 3 Units
Prerequisite(s): CHEM 1B.
Term Typically Offered: Fall, Spring, Summer
Introduction to the basic principals of organic chemistry, including nomenclature, properties and reactions of various classes of organic compounds. Reaction mechanisms will be emphasized.
Note: Required for chemistry majors and recommended for preprofessional students.

CHEM 31. Quantitative Analysis. 4 Units
Prerequisite(s): CHEM 1B.
Term Typically Offered: Fall, Spring
Chemical measurements including associated statistics, chemical equilibrium in aqueous solutions, volumetric analysis, and an introduction to spectrophotometry and chromatography. Lecture two hours, laboratory six hours.

CHEM 58. An Introduction to Undergraduate Research. 1 - 3 Units
Term Typically Offered: Fall, Spring
Introduction to undergraduate research which requires students to become familiar lab safety policies, SDSs, and SOPs in the research lab (if applicable), attend group meetings (if applicable) and learn methods of experimental, educational and/or computational design. Students must show proficiency in these requirements in order to receive a final grade.
Credit/No Credit
CHEM 101. Science in the Public Debate. 3 Units
Prerequisite(s): ENGL 20
General Education Area/Graduation Requirement: Further Studies in Area B (B5)
Term Typically Offered: Fall, Spring

This course provides students with an introduction to the history, philosophy and practice of modern science, and examines how the social environment influences scientific analysis. Students apply this understanding to the critical evaluation of scientific sources in current social debates surrounding scientific topics.

Note: Does not fulfill credit requirements for the major or minor in chemistry.

CHEM 106. Chemical Concepts. 3 Units
Prerequisite(s): GEOL 8 or BIO 7 and ENGL 20 or an equivalent second semester composition course. Fee course.
General Education Area/Graduation Requirement: Further Studies in Area B (B5)
Term Typically Offered: Fall, Spring

Principles and concepts of chemistry with applications in the home and environment. Satisfies the upper division chemistry requirement for the multiple-subject teaching credential. Lecture one hour; discussion and activity four hours. Does not fulfill credit requirements for the major or minor in chemistry. Fee course.

CHEM 110. Inorganic Chemistry Lecture. 3 Units
Prerequisite(s): CHEM 125, CHEM 140B or CHEM 142 instructor permission; CHEM 140B may be taken concurrently, however, students are encouraged to complete CHEM 140B and CHEM 141 first.
Corequisite(s): CHEM 110L.
Term Typically Offered: Fall only

Application of atomic structure, the periodic law, molecular structure and bonding principles, electrochemical principles and other selected models and concepts to theoretical and descriptive inorganic chemistry. Physical and chemical properties of selected elements and inorganic compounds are studied.

CHEM 110L. Advanced Inorganic Chemistry Laboratory. 2 Units
Prerequisite(s): CHEM 125, ENGL 20 or an equivalent second semester composition course.
Corequisite(s): CHEM 110.
Term Typically Offered: Fall only

Preparation, purification and instrumental studies of inorganic compounds. Instrumental and experimental techniques will include EPR, magnetic susceptibility, FTIR, UV-VIS spectroscopy and inert atmosphere techniques.

CHEM 124. Organic Chemistry Lecture II. 3 Units
Prerequisite(s): CHEM 24 or instructor permission; concurrent enrollment in CHEM 25 recommended.
Term Typically Offered: Fall, Spring, Summer

Continued discussion of the principals of organic chemistry, including nomenclature, properties, and reactions of various classes of organic compounds and spectroscopic analysis. Reaction mechanisms will be emphasized.

CHEM 125. Advanced Organic Chemistry Laboratory. 3 Units
Prerequisite(s): CHEM 25, CHEM 124, ENGL 20 or an equivalent second semester composition course.
General Education Area/Graduation Requirement: Further Studies in Area B (B5)
Term Typically Offered: Fall, Spring

Focuses on advanced organic laboratory techniques and instrumental methods of analysis. Not intended for pre-health professional majors. Discussion one hour, laboratory six hours.

CHEM 126. Physical Organic Chemistry. 3 Units
Prerequisite(s): CHEM 124, and CHEM 140B or CHEM 142, or instructor permission.
Corequisite(s): CHEM 140B or CHEM 142 may be taken concurrently.
Term Typically Offered: Fall, Spring

Study of mechanistic organic chemistry, the physical tools used to study reaction mechanisms, and the relationship between structure and reactivity. Topics include bonding theories, stereoelectronic effects, transition state theory, thermodynamics, kinetic analysis, isotope effects, linear free energy relationships, and application of frontier molecular orbital theory to examine reactions including pericyclic reactions.

Note: Students who have taken CHEM 126 at Sacramento State cannot take CHEM 226 for credit.

CHEM 128. Organic Synthesis. 3 Units
Prerequisite(s): CHEM 124.
Term Typically Offered: Spring only

Application of functional group reactions to multistep syntheses. Recently developed synthetic methods and literature searching will be emphasized.

CHEM 133. Chemical Instrumentation. 4 Units
Prerequisite(s): CHEM 31, concurrent enrollment in CHEM 140B or completion of CHEM 142: ENGL 20 or an equivalent second semester composition course. Graded: Graded Student. Units: 4.0
Term Typically Offered: Fall, Spring

Modern instrumentation and methods for chemical analysis. Function of electronics and computers in instruments. Theory and use of instruments in the areas of electrochemistry, spectroscopy, mass spectrometry and chromatography. Lecture two hours, laboratory six hours.

CHEM 140A. Physical Chemistry Lecture I. 3 Units
Prerequisite(s): CHEM 1B, CHEM 24, CHEM 31, MATH 32, PHYS 5A, PHYS 5B, or PHYS 11A, PHYS 11B, PHYS 11C; PHYS 11B may be taken concurrently.
Term Typically Offered: Fall only

Introduction to chemical thermodynamics and kinetics.

CHEM 140B. Physical Chemistry Lecture II. 3 Units
Prerequisite(s): CHEM 140A.
Term Typically Offered: Spring only

Introduction to molecular quantum chemistry, structure of matter, molecular spectroscopy, and statistical thermodynamics.
CHEM 141. **Physical Chemistry Laboratory.** 3 Units
**Prerequisite(s):** ENGL 20 or an equivalent second semester composition course; CHEM 140A, CHEM 140B or CHEM 142, instructor permission; CHEM 140B may be taken concurrently.
**Term Typically Offered:** Fall, Spring

Selected exercises in the practice of physio-chemical laboratory methods. Lecture one hour; laboratory six hours.

CHEM 142. **Introduction to Physical Chemistry.** 4 Units
**Prerequisite(s):** CHEM 1B, CHEM 24, PHYS 5A, PHYS 5B, MATH 31.
**Term Typically Offered:** Fall, Spring

Introductory presentation of the theoretical and practical aspects of thermodynamics, quantum chemistry, spectroscopy, and kinetics. As time permits, other topics will be: solution chemistry, hydrodynamics, electrochemistry, and crystallography.
**Note:** Not acceptable for the BS or the BA without concentration.

CHEM 145. **Applications of Computational Chemistry.** 3 Units
**Prerequisite(s):** CHEM 140A and CHEM 140B or CHEM 142, or instructor permission.
**Term Typically Offered:** Fall only – odd years

Brief introduction/background in computational theory, with emphasis on chemical/biochemical applications. Demonstration/instruction of widely used modeling/computational software. Covering techniques including molecular mechanics, semi-empirical methods and "ab initio" methods. Application of computational methods to thermodynamics, kinetics, spectra, electrochemistry, molecular properties. Lecture three hours.
**Note:** 1) CHEM 245 students will complete an additional research project beyond that expected of students in CHEM 145; 2) Students who have taken CHEM 145 at Sacramento State cannot take CHEM 245 for credit.

CHEM 160A. **Structure and Function of Biological Molecules.** 3 Units
**Prerequisite(s):** CHEM 124; MATH 26A or MATH 30 is recommended. Fall only.
**Term Typically Offered:** Fall only

The chemistry and biochemistry of amino acids, proteins, nucleic acids, lipids and carbohydrates. Also includes enzyme kinetics, the structure and function of biological membranes and discussion of some common laboratory methods. Lecture three hours.

CHEM 160B. **Metabolism and Regulation of Biological Systems.** 3 Units
**Prerequisite(s):** CHEM 160A or equivalent course; one year of organic chemistry. Spring only.
**Term Typically Offered:** Spring only

The bioenergetics and regulation of anaerobic and aerobic metabolic pathways. Major topics include glycolysis, Kreb's cycle, fatty acid and amino acid oxidation, lipid biosynthesis and photosynthesis. Particular emphasis is given to pathway regulation and integration. Lecture three hours.

CHEM 161. **General Biochemistry.** 3 Units
**Prerequisite(s):** CHEM 20 or CHEM 124; one year of biological science is recommended.
**Term Typically Offered:** Fall, Spring, Summer

Introduction to the structure and function of biological molecules (carbohydrates, lipids, proteins, nucleic acids, enzymes and hormones), enzyme kinetics, the structure and function of membranes, and the bioenergetics and regulation of major anaerobic and aerobic metabolic pathways.

CHEM 162. **General Biochemistry Laboratory.** 3 Units
**Prerequisite(s):** CHEM 31; CHEM 160A or CHEM 161 (either CHEM 160A or CHEM 161 may be taken concurrently); ENGL 20 or an equivalent second semester composition course.
**Term Typically Offered:** Fall, Spring

Introduction to fundamental laboratory techniques for the purification and analysis of biological molecules, including chromatographic separation of amino acids and proteins, electrophoretic separation of proteins and nucleic acids, enzyme kinetics, and basic bioinformatics. Discussion one hour, laboratory six hours.

CHEM 164. **Advanced Biochemistry Laboratory.** 3 Units
**Prerequisite(s):** CHEM 162 or equivalent; ENGL 20 or an equivalent second semester composition course.
**Term Typically Offered:** Fall, Spring

Capstone course which emphasizes biochemical laboratory experimental design and trouble-shooting skills. Common biochemistry laboratory techniques are applied in semester-long individual student projects. Discussion one hour, laboratory six hours.

CHEM 189A. **Undergraduate Research.** 1 - 3 Units
**Prerequisite(s):** ENGL 20 or equivalent
**Term Typically Offered:** Fall, Spring

Directed undergraduate research involving a project that requires use of chemical literature and experimental design. A comprehensive written report and/or scientific poster must be submitted to receive a final grade.
**Note:** Only three units of CHEM 189A-C may be applied toward the major requirement in chemistry for the BA or BS degrees.

CHEM 189B. **Intermediate Undergraduate Research.** 1 - 3 Units
**Prerequisite(s):** ENGL 20 or equivalent and CHEM 189A
**Term Typically Offered:** Fall, Spring

Continuing directed undergraduate research involving a project with emphasis on experimentation and data analysis. A comprehensive written report and/or scientific poster must be submitted to receive a final grade.
**Note:** Only three units of CHEM 189A-C may be applied toward the major requirement in chemistry for the BA or BS degrees.

CHEM 189C. **Advanced Undergraduate Research.** 1 - 3 Units
**Prerequisite(s):** ENGL 20 and CHEM 189B
**Term Typically Offered:** Fall, Spring

Culminating directed undergraduate research with emphasis on comprehensive data analysis and formulation of conclusions. A comprehensive written report and/or scientific poster must be submitted to receive a final grade.
**Note:** Only three units of CHEM 189A-C may be applied toward the major requirement in chemistry for the BA or BS degrees.
CHEM 189D. Culminating Advanced Undergraduate Research. 1 - 3 Units
Prerequisite(s): ENGL 20 and CHEM 189C
Term Typically Offered: Fall, Spring

Extension of culminating undergraduate research with emphasis on finalizing data analysis and writing experimental methods for potential publication. A comprehensive written report (if a scientific poster was completed in 189C) and/or scientific poster (if a written report was completed in 189C) must be submitted to receive a final grade.

Credit/No Credit

CHEM 194. Chemistry-Related Work Experience. 6 - 12 Units
Prerequisite(s): Open only to upper division students and consent of Department Chair. Units may not be applied toward a major in Chemistry or Biochemistry.
Term Typically Offered: Fall, Spring

Supervised employment in a Chemistry related company or agency. Placement is arranged through the Department and the Cooperative Education Program office. Requires completion of a 3-6 month work assignment and a written report.

Credit/No Credit

CHEM 196B. Biochemistry of SARS-CoV-2. 3 Units
Prerequisite(s): CHEM 161 or CHEM 160A
Term Typically Offered: Spring only

This course will survey of the macromolecules of the coronavirus SARS-CoV-2, explore their function in relation to the viral life cycle, and examine the biochemistry of established and emerging Covid-19 therapeutics and vaccines. Learning activities will involve a significant amount of primary literature analysis, bioinformatics exercises and brief lectures.

CHEM 198. Senior Research. 3 Units
Prerequisite(s): One upper division chemistry laboratory class, ENGL 20 or an equivalent second semester composition course and instructor and department chair permission.
Term Typically Offered: Fall, Spring

The student will conduct an independent study of a chemical research topic that is based on experimental techniques or advanced computer modeling. Significant use of chemical literature and information retrieval is required. A well-written, comprehensive, and well-documented final report must be submitted to receive a final grade. A weekly seminar is required. Seminar one hour, laboratory activities are a minimum of six hours per week.

CHEM 198H. Chemistry Honors Thesis. 3 Units
Prerequisite(s): Open only to students who meet the Chemistry Honors Program criteria; CHEM 198 may be taken concurrently.
Term Typically Offered: Spring only

Completion of an undergraduate honors thesis and attendance at chemistry seminars. Students will develop a written thesis containing background, methodology, results, and discussion of an experimental or computational research project involving their own original data.

CHEM 200. Research Methods in Chemistry. 3 Units
Prerequisite(s): Must be a Chemistry graduate student or have instructor permission
Term Typically Offered: Fall, Spring

This course is designed to improve the ability of graduate students to research and interpret the chemical literature. Students work through a series of exercises in preparation for a major writing project such as a thesis proposal or a thesis chapter/section. Exercises include analysis of primary research articles, peer review of student writing samples, and presentation of scientific information. These activities will improve students' understanding of how scientific questions are developed and posed through proposals and dissemination of research results.

CHEM 220. Spectrometric Identification of Compounds. 3 Units
Term Typically Offered: Fall only

Theory, interpretation, and application of ultraviolet, infrared, nuclear magnetic resonance and mass spectra for the elucidation of organic compounds.

CHEM 226. Physical Organic Chemistry. 3 Units
Prerequisite(s): Enrollment in Chemistry master's degree program or instructor permission
Term Typically Offered: Fall, Spring

Study of mechanistic organic chemistry, the physical tools used to study reaction mechanisms, and the relationship between structure and reactivity. Topics include bonding theories, stereoelectronic effects, transition state theory, thermodynamics, kinetic analysis, isotope effects, linear free energy relationships, and application of frontier molecular orbital theory to examine reactions including pericyclic reactions.

Note: Students who have taken CHEM 126 at Sacramento State cannot take CHEM 226 for credit.

CHEM 230. Separation Methods in Chemistry. 3 Units
Term Typically Offered: Fall

Theoretical and practical aspects of separation sciences. Methods of separations that are included are liquid-liquid extraction and ion exchange, gas, and liquid chromatography. Lecture three hours.

CHEM 245. Applications of Computational Chemistry. 3 Units
Term Typically Offered: Fall only – odd years

Brief introduction/background in computational theory, with emphasis on chemical/biochemical applications. Demonstration/instruction of widely used modeling/instruction of software. Covering techniques including molecular mechanics, semi-imperical methods and "ab initio" methods. Application of computational methods to thermodynamics, kinetics, spectra, electrochemistry, molecular properties. Lecture three hours.

Note: 1) CHEM 245 students will complete an additional research project beyond that expected of students in CHEM 145; 2) Students who have taken CHEM 145 at Sacramento State cannot take CHEM 245 for credit.
CHEM 250. Selected Topics in Chemistry. 3 Units
Prerequisite(s): Enrollment in MS Chemistry graduate program or instructor permission.
Term Typically Offered: Fall, Spring

Intensive coverage of one or more advanced topics in chemistry. A variety of learning/teaching methodologies may be employed including lecture, team projects, computer modeling, oral presentations and poster projects. May be team-taught.

Note: May be team-taught. May be repeated once for credit if topics are different.

CHEM 251. Topics in Interdisciplinary Chemistry. 3 Units
Prerequisite(s): enrollment in Chemistry master's degree program or permission of instructor.
Term Typically Offered: Fall, Spring

Lecture course focusing on interdisciplinary topics in chemistry and related fields. Course activities may include literature review, individual and/or group oral presentations, independent research project. May be team-taught.

CHEM 252. Topics in Synthetic Chemistry. 3 Units
Prerequisite(s): enrollment in Chemistry master's degree program or permission of instructor.
Term Typically Offered: Fall, Spring

Lecture course focusing on synthetic chemistry. Focus may be on biochemical, inorganic, or organic synthetic chemistry. Course activities may include literature review, individual and/or group oral presentations, independent research project. May be team-taught.

CHEM 253. Topics in Applied Chemistry. 3 Units
Prerequisite(s): enrollment in Chemistry master's degree program or permission of instructor.
Term Typically Offered: Fall, Spring

Lecture course focusing on applications of chemistry to a variety of fields. Areas of focus my include biological, environmental, materials, and pharmaceutical applications. Course activities may include literature review, individual and/or group oral presentations, independent research project. May be team-taught.

CHEM 254. Topics in Physical Chemistry. 3 Units
Prerequisite(s): enrollment in Chemistry master's degree program or permission of instructor.
Term Typically Offered: Fall, Spring

Lecture course focusing on topics in physical chemistry. Areas of focus may include content areas such as quantum mechanics, physical/organic or biophysical chemistry, an/or in-depth treatment of structure analysis and determination. Course activities may include literature review, individual and/or group oral presentations, independent research project. May be team-taught.

CHEM 255. Topics in Chemistry Education. 3 Units
Prerequisite(s): enrollment in Chemistry master’s degree program or permission of instructor.
Term Typically Offered: Fall, Spring

Intensive coverage of one or more advanced topics in chemistry. A variety of learning/teaching methodologies may be employed, including lecture, team projects, computer modeling, oral presentations and poster projects. May be team-taught.

CHEM 260. Protein Biochemistry. 3 Units
Prerequisite(s): One semester of biochemistry.
Term Typically Offered: Fall, Spring

Provides a comprehensive review of proteins, with emphasis on protein structure and function relationships. Topics include methods for structure determination, stability and folding, catalysis and denovo protein design. Topical examples from the literature, particularly those related to disease states, are used to illustrate fundamental principles of protein structure and function.

CHEM 261. Nucleic Acid Chemistry. 3 Units
Prerequisite(s): Undergraduate course in biochemistry.
Term Typically Offered: Fall, Spring

The recent biochemical literature will be used to study the structural, chemical, and physical properties of nucleic acids. Chemical mechanisms of mutation, protein-nucleic acid interactions, and DNA-drug interactions will be used to illustrate these properties.

CHEM 294. Seminar in Chemistry. 0.5 Units
Term Typically Offered: Fall, Spring

Student presentations of topics from the chemical literature; presentations of current chemistry topics from speakers in academia, industry, and government positions. May be repeated for a total of 2 units.

Note: Grade of C/NC will be based on attendance and successful presentation of a seminar.

Credit/No Credit

CHEM 296. Experimental Offerings in Chemistry. 1 Unit
Prerequisite(s): Instructor approval.
Term Typically Offered: Fall, Spring

Presentation and discussion of graduate student and faculty research and current literature with emphasis on critical evaluation of research design, data analysis and presentation techniques. One hour discussion.

Note: May be taken up to four times for credit, but only one unit may be applied to the University’s requirement for 200-level courses.

Credit/No Credit

CHEM 299. Special Problems. 1 - 6 Units
Term Typically Offered: Fall, Spring

Graduate research. Approval must be obtained from a departmental committee and the faculty member under whom the work is to be conducted. Written report must be submitted before a final grade is given.

Credit/No Credit

CHEM 500. Culminating Experience. 2 - 4 Units
Prerequisite(s): Advanced to candidacy and chair permission of his/her thesis committee.
Term Typically Offered: Fall, Spring

Completion of a thesis or project approved for the Master's degree. Should be taken in final semester prior to the completion of all requirements for the degree. Number of units of credit is determined by the candidate's master's degree advisory committee.

Contact Lenses

For department policies, including safety policies, please visit our webpage www.csus.edu/chem (http://www.csus.edu/chem/).
BA in Chemistry (Biochemistry)

Units required for Major: 64-77
Total units required for BA: 120

Program Description

Three BA programs are available: One without a concentration (general) and two with concentrations (Biochemistry or Forensic Chemistry). The common requirements of the three programs are shown below under "Core Requirements."

Safety

Due to the potential hazards some chemicals may present, safety is an essential element of all Chemistry laboratory classes, including independent research. All students must adhere to the Department of Chemistry Laboratory Safety Policies (https://www.csus.edu/college/natural-sciences-mathematics/internal/safety/). Failure to adhere to the Safety Policies may constitute grounds for withdrawal from a course and/or dismissal from the program.

Advising

The Department believes advising of students is an important function. Members of the Chemistry Department who have a strong interest in advising have been selected to serve as advisors for students wishing to major in chemistry. Each represents a particular area of chemistry: analytical, inorganic, biochemistry, organic, and physical. Each Chemistry major will be assigned to one of these advisors when entering the Chemistry Department, coordinated to the area of each student’s expressed interest.

Prerequisite Requirements

When enrolling in a course, it is required that the student will have met the specific prerequisites listed. A course listed as a prerequisite may have its own set of prerequisites. All must be met prior to enrolling in a chemistry course. Students not meeting the prerequisite requirements for a course will be administratively removed from the class.

Minimum Grade Requirements

In all courses required for the Chemistry major and minor, a minimum grade of "C" must be earned with the exception of CHEM 1A which requires a grade of C or higher. A minimum grade of "C" is required in all prerequisite courses with the exception of CHEM 1A which requires a grade of C or better to meet the prerequisite requirement for CHEM 1B if a student has not achieved a "C" in all prerequisite courses for a particular chemistry course, the instructor of the course will administratively remove the student from class.

Transfer Majors and Minors

Transfer students majoring in Chemistry must complete at least three of the required courses in chemistry while fulfilling the residence requirements of California State University, Sacramento. Transfer students seeking a minor in Chemistry must complete at least one upper division chemistry course at the University.

1 To help you complete your degree in a timely manner and not take more units than absolutely necessary, there are ways to use single courses to meet more than one requirement (overlap). For further information, please visit the General Education page (p. 1103).

Note: There is no way to list all possible overlaps so please consult with a professional advisor. The Academic Advising Center can be visited online (http://www.csus.edu/acad/), by phone (916) 278-1000, or email (advising@csus.edu).

2 If not satisfied before entering Sacramento State, it may be satisfied in General Education Area C2 (Humanities). "C- or better required."

The alternative methods for satisfying the Foreign Language Proficiency Requirement are described here: https://www.csus.edu/college/arts-leters/world-languages-literatures/foreign-language-requirement.html (https://www.csus.edu/college/arts-leters/world-languages-literatures/foreign-language-requirement.html)

BA in Chemistry (Forensic Chemistry)

Units required for Major: 64-77
Total units required for BA: 120

Program Description

Three BA programs are available: One without a concentration (general) and two with concentrations (Biochemistry or Forensic Chemistry). The common requirements of the three programs are shown below under "Core Requirements."

Safety

Due to the potential hazards some chemicals may present, safety is an essential element of all Chemistry laboratory classes, including independent research. All students must adhere to the Department of Chemistry Laboratory Safety Policies (https://www.csus.edu/college/natural-sciences-mathematics/internal/safety/). Failure to adhere to the Safety Policies may constitute grounds for withdrawal from a course and/or dismissal from the program.

Advising

The Department believes advising of students is an important function. Members of the Chemistry Department who have a strong interest in advising have been selected to serve as advisors for students wishing to major in chemistry. Each represents a particular area of chemistry: analytical, inorganic, biochemistry, organic, and physical. Each Chemistry major will be assigned to one of these advisors when entering the Chemistry Department, coordinated to the area of each student’s expressed interest.

Prerequisite Requirements

When enrolling in a course, it is required that the student have met the specific prerequisites listed. A course listed as a prerequisite may have its own set of prerequisites. All must be met prior to enrolling in a chemistry course. Students not meeting the prerequisite requirements for a course will be administratively removed from the class.
Minimum Grade Requirements

In all courses required for the Chemistry major and minor, a minimum grade of "C-" must be earned with the exception of CHEM 1A which requires a grade of C or better. A minimum grade of "C-" is required in all prerequisite courses with the exception of CHEM 1A which requires a grade of C or better to meet the prerequisite requirement for CHEM 1B if a student has not achieved a "C-" in all prerequisite courses for a particular chemistry course, the instructor of the course will administratively remove the student from class.

Transfer Majors and Minors

Transfer students majoring in Chemistry must complete at least three of the required courses in chemistry while fulfilling the residence requirements of California State University, Sacramento. Transfer students seeking a minor in Chemistry must complete at least one upper division chemistry course at the University.

To help you complete your degree in a timely manner and not take more units than absolutely necessary, there are ways to use single courses to meet more than one requirement (overlap). For further information, please visit the General Education page (p. 1103).

Note: There is no way to list all possible overlaps so please consult with a professional advisor. The Academic Advising Center can be visited online (http://www.csus.edu/acad/), by phone (916) 278-1000, or email (advising@csus.edu).

1 Course also satisfies General Education (GE)/Graduation Requirement.

2 Required in Major; also satisfies GE.
Minimum Grade Requirements
In all courses required for the Chemistry major and minor, a minimum grade of "C-" must be earned with the exception of CHEM 1A which requires a grade of C or better. A minimum grade of "C-" is required in all prerequisite courses with the exception of CHEM 1A which requires a grade of C or better to meet the prerequisite requirement for CHEM 1B if a student has not achieved a "C-" in all prerequisite courses for a particular chemistry course, the instructor of the course will administratively remove the student from class.

Transfer Majors and Minors
Transfer students majoring in Chemistry must complete at least three of the required courses in chemistry while fulfilling the residence requirements of California State University, Sacramento. Transfer students seeking a minor in Chemistry must complete at least one upper division chemistry course at the University.

Program Requirements

Code | Title |
-----|-------|
CHEM 1A | General Chemistry I 1,2 |
CHEM 1B | General Chemistry II |
CHEM 24 | Organic Chemistry Lecture I |
CHEM 25 | Organic Chemistry Laboratory |
CHEM 31 | Quantitative Analysis |
CHEM 124 | Organic Chemistry Lecture II |
MATH 30 | Calculus I 1 |
MATH 31 | Calculus II |

Select one of the following sequences:

PHYS 5A & PHYS 5B | General Physics: Mechanics, Heat, Sound 
PHYS 5A & PHYS 5B | General Physics: Light, Electricity and Magnetism, Modern Physics |
PHYS 11A & PHYS 11B | General Physics: Heat, Light, Sound, Modern Physics |
PHYS 11A & PHYS 11C | Physics |

Total Units: 39-43

1. Course satisfies General Education (GE)/Graduation Requirement.
2. Passing a placement exam or obtaining a passing grade of "C" or better in CHEM 4 is required to enroll in CHEM 1A.

No Concentration (25 Units)

Code | Title |
-----|-------|
CHEM 140A | Physical Chemistry Lecture I |
CHEM 140B | Physical Chemistry Lecture II |
MATH 32 | Calculus III |

Select additional courses to a minimum of 24 upper division units in Chemistry. Must include two laboratory courses. Graduate courses may be used as elective courses with instructor and department Chair permission. Elective courses should be selected in consultation with an advisor.

Total Units: 25

BS in Biochemistry

Units required for Major: 81-85
Total units required for BS: 120

Program Description

The Bachelor of Science degrees are recommended for students intending to pursue graduate work in Chemistry or Biochemistry or those desiring a strong technical background for work in the chemical or biotechnology industry or other highly technical areas.

Safety

Due to the potential hazards some chemicals may present, safety is an essential element of all Chemistry laboratory classes, including independent research. All students must adhere to the Department of Chemistry Laboratory Safety Policies (https://www.csus.edu/college/natural-sciences-mathematics/internal/safety/). Failure to adhere to the Safety Policies may constitute grounds for withdrawal from a course and/or dismissal from the program.

Advising

The Department believes advising of students is an important function. Members of the Chemistry Department who have a strong interest in advising have been selected to serve as advisors for students wishing to major in chemistry. Each represents a particular area of chemistry: analytical, inorganic, biochemistry, organic, and physical. Each Chemistry major will be assigned to one of these advisors when entering the Chemistry Department, coordinated to the area of each student’s expressed interest.

Prerequisite Requirements

When enrolling in a course, it is required that the student will have met the specific prerequisites listed. A course listed as a prerequisite may have its own set of prerequisites. All must be met prior to enrolling in a chemistry course. Students not meeting the prerequisite requirements for a course will be administratively removed from the class.

Minimum Grade Requirements

In all courses required for the Chemistry major and minor, a minimum grade of "C-" must be earned with the exception of CHEM 1A which requires a grade of C or better. A minimum grade of "C-" is required in all prerequisite courses with the exception of CHEM 1A which requires a grade of C or better to meet the prerequisite requirement for CHEM 1B if a student has not achieved a "C-" in all prerequisite courses for a particular
chemistry course, the instructor of the course will administratively remove the student from class.

**Transfer Majors and Minors**

Transfer students majoring in Chemistry must complete at least three of the required courses in chemistry while fulfilling the residence requirements of California State University, Sacramento. Transfer students seeking a minor in Chemistry must complete at least one upper-division chemistry course at the University.

**Note:** Students graduating with a Bachelor of Science Degree in Biochemistry will not be subject to the University's Foreign Language Graduation Requirement. Students who change major may be subject to the University's Foreign Language Graduation Requirement.

Note: There is no way to list all possible overlaps so please consult with a professional advisor. The Academic Advising Center can be visited online (http://www.csus.edu/acad/), by phone (916) 278-1000, or email (advising@csus.edu).

2 If not satisfied before entering Sacramento State, it may be satisfied in General Education Area C2 (Humanities). "C- or better required."
The alternative methods for satisfying the Foreign Language Proficiency Requirement are described here: https://www.csus.edu/college/arts-letters/world-languages-literatures/foreign-language-requirement.html

Note: Students with a declared major of BS in Biochemistry are exempt from the Foreign Language Graduation Requirement.

BS in Chemistry

Units required for Major: 77
Total units required for BS: 120

Program Description

The Bachelor of Science degrees are recommended for students intending to pursue graduate work in Chemistry or Biochemistry or those desiring a strong technical background for work in the chemical or biotechnology industry or other highly technical areas. The BS Chemistry degree is approved by the American Chemical Society.

Safety

Due to the potential hazards some chemicals may present, safety is an essential element of all Chemistry laboratory classes, including independent research. All students must adhere to the Department of Chemistry Laboratory Safety Policies (https://www.csus.edu/college/natural-sciences-mathematics/internal/safety/). Failure to adhere to the Safety Policies may constitute grounds for withdrawal from a course and/or dismissal from the program.

Advising

The Department believes advising of students is an important function. Members of the Chemistry Department who have a strong interest in advising have been selected to serve as advisors for students wishing to major in chemistry. Each represents a particular area of chemistry: analytical, inorganic, biochemistry, organic, and physical. Each Chemistry major will be assigned to one of these advisors when entering the Chemistry Department, coordinated to the area of each student’s expressed interest.

Prerequisite Requirements

When enrolling in a course, it is required that the student will have met the specific prerequisites listed. A course listed as a prerequisite may have its own set of prerequisites. All must be met prior to enrolling in a chemistry course. Students not meeting the prerequisite requirements for a course will be administratively removed from the class.

Minimum Grade Requirements

In all courses required for the Chemistry major and minor, a minimum grade of "C-" must be earned with the exception of CHEM 1A which requires a grade of C or better. A minimum grade of "C-" is required in all prerequisite courses with the exception of CHEM 1A which requires a grade of C or better to meet the prerequisite requirement for CHEM 1B if a student has not achieved a "C-" in all prerequisite courses for a particular chemistry course, the instructor of the course will administratively remove the student from class.

Transfer Majors and Minors

Transfer students majoring in Chemistry must complete at least three of the required courses in chemistry while fulfilling the residence requirements of California State University, Sacramento. Transfer students seeking a minor in Chemistry must complete at least one upper division chemistry course at the University.

Note: Students graduating with a Bachelor of Science Degree in Biochemistry will not be subject to the University’s Foreign Language Graduation Requirement. Students who change major may be subject to the University’s Foreign Language Graduation Requirement.

### Notes:

1. To help you complete your degree in a timely manner and not take more units than absolutely necessary, there are ways to use single courses to meet more than one requirement (overlap). For further information, please visit the General Education page (p. 1103).

2. Required in Major; also satisfies GE.

### Chemistry Honors Program

#### Program Description

The purpose of the Chemistry Honors Program is to recognize and support the academic progress of our highest achieving students.
through undergraduate research culminating in a Chemistry Honors thesis. The Honors Concentration must be combined with one of the five undergraduate chemistry degrees: BA in Chemistry, BA in Chemistry (Biochemistry), BA in Chemistry (Forensic Chemistry), BS in Chemistry, or BS in Biochemistry. In order to fulfill the research requirement, students may engage in two semesters of research with a Chemistry faculty member at Sacramento State (e.g. enroll in CHEM 189A followed by CHEM 198) or they may use a summer research experience either on campus (e.g. NSM SURE, Russell-Forkey Research Award) or off campus (e.g. NSF-REU) in Chemistry or Biochemistry in place of CHEM 189A. All Honors students must enroll in CHEM 198H and complete a Chemistry Honors Thesis.

**Eligibility Requirements**

"Native" Students:
- Declared as a Chemistry/Biochemistry major;
- Junior standing;
- Minimum 3.5 GPA overall and a minimum 3.33 GPA in Math/Science courses;
- Complete CHEM 1A and MATH 30 with a "B" grade or higher; and
- Maximum of one repeated Math/Science course (in college career).

Transfer Students:
- Declared as a Chemistry/Biochemistry major;
- Junior standing;
- Entering minimum 3.5 GPA overall and a minimum 3.33 GPA in Math/Science courses (all institutions combined);
- Completed CHEM 1A and MATH 30 (or equivalents) with a "B" grade or higher;
- Maximum of one repeated Math/Science course (in college career); and
- Completed at least 9 units at Sacramento State with a minimum 3.33 GPA, including any one chemistry class which counts towards your chosen degree.

**Admission Requirements**

Admission to the program for eligible students requires nomination by a faculty member and review and approval by a department committee.

**Minimum GPA and Additional Requirements**

For students to remain in the program, they must:
1. maintain a minimum 3.5 GPA overall and a minimum 3.33 GPA in Math/Science courses; and
2. have no repeats in Math/Science courses.

**Program Requirements**

The curriculum of the Honors Program is designed to be coupled with the BA or BS degree programs. The Honors Program requires the following courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>CHEM 198</td>
<td>Senior Research</td>
<td>3</td>
</tr>
<tr>
<td>CHEM 198H</td>
<td>Chemistry Honors Thesis</td>
<td>3</td>
</tr>
</tbody>
</table>

**Minor in Chemistry**

Units required for Minor: 24

**Program Description**

Chemistry is the area of science in which the composition, structure, properties, and reactions of substances are studied.

**Minimum Grade Requirement**

A minimum grade of "C-" is required in all courses applied to the Chemistry minor.

**Program Requirements**

In consultation with an advisor, choose 24 units of chemistry coursework, 6 units must be upper division courses in chemistry.

**MS in Chemistry**

Total units required for MS: 30

**Program Description**

The graduate programs in the Department of Chemistry provide students with advanced study in synthesis, separation, and analysis of molecules with an emphasis on developing research skills in experimental and computational chemistry and in chemistry education. The graduate curriculum prepares students for careers in industry and teaching and for entry into PhD and professional programs.

**Admission Requirements**

Admission as a classified graduate student in the Department of Chemistry requires:
- a BA degree in chemistry, biochemistry or its equivalent as determined by the graduate committee;
- a minimum 2.5 GPA overall, in the last 60 units, and in chemistry, biochemistry, math, and physics courses;
- two letters of recommendation from persons qualified to judge the applicant’s potential for successful graduate study;
- a personal statement describing the applicant’s motivation for seeking a master’s degree, why the Sacramento State Chemistry department was selected for pursuing this degree, and the area of advanced study within chemistry, biochemistry or education research the applicant plans to focus.

Students desiring to apply to the chemistry graduate program should first examine the chemistry department’s web page for basic requirements and deadlines and then contact the Chemistry department graduate coordinator or department Chair for further information if needed. International students should also contact the Office of Global Education for specific application requirements for international applicants.

**Admission Procedures**

Students desiring to apply to the chemistry graduate program should first contact the Chemistry Department Graduate Coordinator or Department Chair. Information about the graduate program will be discussed with you.
In addition to a Departmental application, applicants must also complete a separate university application by the posted application deadline for the term applying. For more admissions information and application deadlines, please visit http://www.csus.edu/gradstudies/. The university application requires:

- an online application for admission; and
- two sets of official transcripts from all colleges and universities attended, other then Sacramento State.

Approximately six weeks after receipt of all items listed, an admission decision will be mailed to the applicant.

**Placement Examinations**

All new graduate students must take two placement exams, in organic and physical chemistry, administered at the beginning of each semester. These exams cover topics commonly found in undergraduate courses. Exam results are used to determine undergraduate deficiencies in these areas of chemistry. All deficiencies must be removed by either taking and passing with a grade of “B” an appropriate undergraduate course or by taking again and passing the placement exam. A placement exam can be taken only twice; if the exam is not passed after the second attempt, the appropriate undergraduate course must be completed with a minimum grade of “B” in the first attempt.

**Course Requirements**

The program centers on a core of four courses designed to increase a student’s knowledge and skills in applications of analytical techniques, general instrumentation techniques, chemical separation techniques, and analysis of spectra with applications in the field of biochemistry and organic chemistry primarily. Electives are offered to permit students to expand further their knowledge and skills in chemistry. A minimum overall and semester GPA of 3.00 must be maintained to sustain good standing in the graduate program. A grade of “C” or better in individual courses is required for graded work to be credited toward fulfillment of the master's degree. Students not meeting these requirements are subject to probationary status and potential disqualification from the program. In addition, students must regularly attend seminars offered approximately once a week each semester. Each student will give one seminar during his/her tenure as a graduate student that is on a literature topic not related to his/her thesis topic and another on his/her thesis results. Participation in seminar expands a student’s knowledge of current research in chemistry and also assists in developing his/her oral presentation skills.

**Thesis/Research**

All students are required to complete a thesis involving original research. The research may be conducted on campus with a chemistry faculty member or at an employer’s work site providing the work involves producing a new contribution to the field of chemistry. Research conducted at a work site requires a supervising chemistry faculty member. The work site mentor and project must be approved by the Graduate Committee.

**Advising**

Following admission to the chemistry graduate program, students are advised by the graduate coordinator and by the faculty thesis supervisor. Students must consult with three faculty members before deciding on a thesis advisor. Students who are fully qualified upon admission and make the expected progress can normally finish the degree in two years.

**Financial Aid**

Financial aid is available. Please contact the Financial Aid Office for more information (1006 Lassen Hall, www.csus.edu/faid (http://www.csus.edu/faid/)).

**Employment**

Qualified graduate students may be hired for a limited number of positions as teaching associates (TA). TAs teach undergraduate chemistry laboratories and discussions. Eligibility requirements include: classified status, minimum cumulative GPA 3.0, good English communication skills, passing score on a general chemistry examination. Continuing students desiring support as a TA will be evaluated on the basis of past performance as a TA and academic record as a graduate student in the program. Contact the Department Chair for current employment information.

**Safety**

Due to the potential hazards some chemicals may present, safety is an essential element of all Chemistry laboratory classes, including independent research. All students must adhere to the Department of Chemistry Laboratory Safety Policies (https://www.csus.edu/college/natural-sciences-mathematics/internal/safety/). Failure to adhere to the Safety Policies may constitute grounds for withdrawal from a course and/or dismissal from the graduate program.

**Laboratory Fees**

Students enrolling in chemistry laboratory courses or supervisory courses involving laboratory research are required to pay a laboratory fee for each course. In addition, if a student breaks an item in a laboratory, s/he is required to replace it or pay a breakage cost. An administrative hold is placed on a student's academic record if either is not paid. Details are given at the first class meeting.

**Repeating a Chemistry Course**

Students repeating a chemistry course must repeat an equivalent course in both units and content.

**Minimum Units and Grade Requirement for the Degree**

Units required for the MS: 30

Minimum Cumulative GPA: 3.0

**Advancement to Candidacy**

After completing at least 40% of the graduate degree coursework with an overall GPA of 3.0 or higher, a student may submit an application for Advancement to Candidacy, which indicates the proposed program of graduate study is acceptable to the student, faculty advisor, thesis committee, and the Chemistry graduate coordinator. This procedure may begin as soon as the classified graduate student has:

- removed any deficiencies in admission requirements
- met English proficiency requirements
- completed at least 12 units of 200-level courses (including CHEM 200) with a minimum 3.0 GPA;
- obtained approval of the thesis project by the thesis advisor and thesis committee. Students obtain thesis project approval through submission of a formal thesis project proposal and an oral presentation of the project to the thesis committee.
- successfully completed a literature seminar presentation

Total Units 30

1 Graduate or upper division courses in appropriate areas (BIO, GEOL, PHYS, ENVS) may be used upon approval by graduate advisor and department chair. A maximum of 2 units of upper division undergraduate coursework may be used toward fulfilling electives.

MS in Chemistry (Biochemistry)

Total units required for MS: 30

Program Description

The graduate programs in the Department of Chemistry provide students with advanced study in synthesis, separation, and analysis of molecules with an emphasis on developing research skills in experimental and computational chemistry and in chemistry education. The graduate curriculum prepares students for careers in industry and teaching and for entry into PhD and professional programs.

Admission Requirements

Admission as a classified graduate student in the Department of Chemistry requires:

- a BA degree in chemistry, biochemistry or its equivalent as determined by the graduate committee;
- a minimum 2.5 GPA overall, in the last 60 units, and in chemistry, biochemistry, math, and physics courses;
- two letters of recommendation from persons qualified to judge the applicant’s potential for successful graduate study;
- a personal statement describing the applicant’s motivation for seeking a master’s degree, why the Sacramento State Chemistry department was selected for pursuing this degree, and the area of advanced study within chemistry, biochemistry or education research the applicant plans to focus;

Students desiring to apply to the chemistry graduate program should first examine the chemistry department’s web page for basic requirements and deadlines and then contact the Chemistry department graduate coordinator or department Chair for further information if needed. International students should also contact the Office of Global Education for specific application requirements for international applicants.

Admission Procedures

Students desiring to apply to the chemistry graduate program should first contact the Chemistry Department Graduate Coordinator or Department Chair. Information about the graduate program will be discussed with you.

In addition to a Departmental application, applicants must also complete a separate university application by the posted application deadline for the term applying. For more admissions information and application deadlines, please visit http://www.csus.edu/gradstudies/. The university application requires:

- an online application for admission; and
- two sets of official transcripts from all colleges and universities attended, other than Sacramento State.

Approximately six weeks after receipt of all items listed, an admission decision will be mailed to the applicant.

Placement Examinations

All new graduate students must take two placement exams, in organic and physical chemistry, administered at the beginning of each semester. These exams cover topics commonly found in undergraduate courses. Exam results are used to determine undergraduate deficiencies in these areas of chemistry. All deficiencies must be removed by either taking and passing with a grade of “B” an appropriate undergraduate course or by taking again and passing the placement exam. A placement exam can be taken only twice; if the exam is not passed after the second attempt, the appropriate undergraduate course must be completed with a minimum grade of “B” in the first attempt.

Course Requirements

The program centers on a core of four courses designed to increase a student’s knowledge and skills in applications of analytical techniques, general instrumentation techniques, chemical separation techniques, and analysis of spectra with applications in the field of biochemistry and organic chemistry primarily. Total Units 30

1 Graduate or upper division courses in appropriate areas (BIO, GEOL, PHYS, ENVS) may be used upon graduate advisor and department chair. A maximum of 2 units of upper division undergraduate coursework may be used toward fulfilling electives.
Subject Matter Program (Chemistry)

Units required for the Subject Matter Program: 47-57

Program Description

The Science Subject Matter Program (in biology, chemistry, physics, or foundational level general science) is designed to meet the California Commission on Teacher Credentialing (CTC) subject matter requirement for students to enter a California Single Subject teaching credential program. Meeting the subject matter requirement is a credential program admission requirement, and can be met either through a subject matter program (such as those described below) or by taking a state approved content exam (currently the California Subject Exam for Teachers, the CSET). In order to meet the subject matter obtain a California K-12 Teaching Credential, a program requirement, all courses must be completed with a grade of "C-" or better. In order to teach public school in California, you must also complete a teaching credential program.

Subject matter programs are not degrees or concentrations; instead they are a series of courses that allow a student to meet the requirements for admission to a teaching credential program. Students must also complete a BA or BS degree (with any major) to fulfill the credential requirements.

Science majors who intend to pursue a teaching credential should see a faculty advisor or the department chair in the department of their academic major. It is recommended that they do so early as it is critical that their science coursework be carefully planned and coordinated to include the required subject matter program courses. In addition, students are encouraged to become involved with education related activities like grading, assisting in labs, tutoring K-12 students, and visiting schools; please speak with the subject matter advisors in your area for more information.

1 Course also satisfies General Education (GE)/Graduation Requirement.

Geography

College of Natural Sciences and Mathematics

Program Description

Geography students at Sacramento State explore Earth's natural and cultural environments using methods from the natural sciences and the social sciences. They study climate, weather, landforms, water resources, and plants and animals, as well as peoples, societies, economies, and cities. These phenomena overlap in intricate ways, giving rise to distinctive places and regions. Geography's approach emphasizes Earth's spatial relationships and patterns, and the processes that govern them, whether found in nature or in human behavior.

Students work with quantitative and qualitative data from a variety of sources, including published censuses and maps, aerial imagery, field and lab work, surveys, and interviews. They use a variety of tools, including Global Positioning Systems (GPS), Geographic Information Systems (GIS), and other computer applications to collect, display, and analyze spatial data. Geography students study and address complex issues, especially those with a human-environment interface, such as climate change, resource management, urban growth and design, globalization, immigration, ethnic identity, and territorial conflict. Geographical understanding is applied at different scales, from the local to the global, and regional expertise is cultivated.

Lower division offerings in physical geography, cultural geography, and geographical techniques introduce students to the discipline. At the upper division level, students can choose among regional classes, topical classes on subjects from meteorology to transportation, and technique classes that include GIS, map making, quantitative methods, remote sensing, and field work. Majors select a concentration in a geographic subfield. Although not required, the department encourages students to take elective courses and/or pursue a minor complementary to their geographical interests. It also encourages and facilitates students going on Education Abroad.

Degree Programs

BA in Geography (Geographic Information Science) (p. 861)

BA in Geography (Human Geography) (p. 863)

BA in Geography (Metropolitan Area Planning) (p. 864)

BA in Geography (Physical Geography) (p. 866)

Minor in Geography (p. 869)

Minor in Geographic Information Systems (p. 869)
Certificate in Pre-Planning (Metropolitan Planning or Resource Planning) (p. 868)

Special Features
- Numerous internships and jobs in the Sacramento area, including many with state and local government
- Many opportunities for field work in a variety of settings
- A senior project class in which each student conducts his/her own research
- A small major allowing for lots of interaction with faculty and fellow students, including attendance at state and regional professional meetings
- Various pathways to complete the major, providing flexibility and the opportunity to make efficient progress toward graduation

Career Possibilities
Geographer · Cartographer · Climatologist · Resource Scientist · Meteorologist · Geospatial Intelligence Professional · Environmental Scientist · Geographic Information System Specialist · Geographic Consultant · Surveyor · Sustainability Coordinator · Water Resources Analyst · Redevelopment Specialist · Environmental Planner · Energy Analyst · Foreign Area Specialist · Land Economist · Recreation Planner · Locational Analyst · Environmental Education Specialist · Conservationist · Urban Planner · Transportation Planner · Aerial Photo Interpreter · Remote Sensing Specialist · Community Development Specialist · Land Use Planner · Demographer · Cultural Resources Manager · Air Resources Specialist · Real Estate Research Analyst · Pedestrian and Bicycle Advocate · Teacher · Recycling Coordinator · Route Planner · Habitat Manager

GEOG 1. Physical Geography: The Distribution of Natural Phenomena. 3 Units
General Education Area/Graduation Requirement: Physical Science (B1)
Term Typically Offered: Fall, Spring, Summer
This course provides an overview of Earth's physical systems, including the atmosphere, biosphere, hydrosphere, and lithosphere. Topics covered include weather and climate, biological systems, plate tectonics, volcanoes and earthquakes, and weathering and erosion. Emphasis is placed on the role of humans in influencing Earth's physical systems.

GEOG 2. Cultural Geography. 3 Units
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall, Spring
Consideration of the diversity of patterns of land use, settlement and movement established and evolved by humans as a result of the interaction of cultural and physical factors; emphasis on student use of maps and other tools of geographic presentation for analyzing the nature, variation and distribution of cultural features of the earth's surface.

GEOG 2H. Cultural Geography - Honors. 3 Units
Prerequisite(s): Open to Honors students only.
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall, Spring, Summer
Consideration of the diversity of patterns of land use, settlement and movement established and evolved by humans as a result of the interaction of cultural and physical factors; emphasis on student use of maps and other tools of geographic presentation for analyzing the nature, variation and distribution of cultural features of the earth's surface.
Note: This is a special offering designed as part of the G.E. Honors program.

GEOG 3. Introduction to Maps and Geographic Technologies. 3 Units
Term Typically Offered: Spring only
Introduction to maps, map concepts, and geographic technologies. Maps are the most effective way to communicate spatial data, and introduces students to the quickly changing world of maps (both hard-copy and digital) and geographic technologies including map and aerial photograph interpretation, spreadsheet operations, introductory statistics, global positioning systems (GPS), Internet mapping, satellite and aerial images, and geographic information systems (GIS) that aid in data collection, analysis, and presentation. Lecture two hours; laboratory two hours.

GEOG 5. Violent Weather/Changing Atmosphere. 3 Units
General Education Area/Graduation Requirement: Physical Science (B1)
Term Typically Offered: Fall, Spring
Introduction to meteorological and climatological principles and concepts. These principles will be used to examine severe atmospheric phenomena, including hurricanes, tornadoes, thunderstorms, lightning, destructive winds, severe storms, heat waves, droughts and floods, particularly in relation to human-caused climate change and the effects of these phenomena on humanity.

GEOG 101. Introduction to the geographic distribution of life. Communities and biomes, changing continents and climates, dispersal, colonization, extinction, life on islands, and past and present human impacts are examined.

Note: Field trip required.

Field trip(s) may be required.

GEOG 102. Ideas and Skills in Geography. 3 Units

Term Typically Offered: Fall only

Prerequisite(s): GEOG 1 or GEOG 2 or GEOG 3 or GEOG 11.

GEOG 105. Cartography. 3 Units

Term Typically Offered: Spring only

Introduction to principles map design for the digital era. Use of illustration software for the production of printed and electronic maps, and other visualizations of spatial information. Theory and history of cartography, including color theory, map projections, visual variables and cartographic scale. Lecture two hours; laboratory three hours.

GEOG 112. Advanced Geographic Information Systems. 3 Units

Term Typically Offered: Fall only

Prerequisite(s): GEOG 109 or instructor permission.

Builds on the introduction to the hardware, software and operations of GIS offered with the previous courses, providing the essentials required by a beginning GIS analyst or applications support specialist. Emphasis will be placed on problem solving strategies in the context of GIS projects.
GEOG 118. Earth Transformed. 3 Units
Term Typically Offered: Fall, Spring

Explores the evolving human role in transforming Earth's physical environments. Topics range from prehistoric extinction to modern environmental problems in select regions. Emphasis is placed on wide-ranging effects of resource use and disposal, with particular reference to atmosphere and biological problems and sustainable solutions.

GEOG 119. Visualizing Global Environments. 3 Units
General Education Area/Graduation Requirement: Further Studies in Area B (B5)
Term Typically Offered: Fall, Spring

Using current geospatial technologies, such as remote sensing and GIS, the course provides an introduction to the distributions of climate, plant cover, soils, and landforms over the face of the earth. While examining processes and conditions that cause these distributions, students will also explore the methods and techniques that let us visualize these distributions, and use maps as communicative devices in our explorations of these topics.

GEOG 121. United States and Canada. 3 Units
Term Typically Offered: Fall, Spring

Present distribution and historical development of population, land use and industry in the U.S. and Canada in relation to regional variations in the physical environment and cultural heritage.

GEOG 125. Geography Of East Asia. 3 Units
Term Typically Offered: Fall, Spring

Geographic setting and nature of Far Eastern civilization; origins, development and present outlines of settlement; cultures, resource use, economic structures, population, levels of technological achievement, and land use in China, Japan and Korea.

GEOG 127. Geography Of Africa. 3 Units
Term Typically Offered: Spring only – odd years

Emphasis is on sub-Saharan Africa with consideration given to selected topics such as population problems, industrialization, regional groupings, transportation, and internal and external relationships.

GEOG 128. Geography Of Europe. 3 Units
Term Typically Offered: Spring only – even years

Survey of Europe with emphasis on its physical environment, contemporary demographic, economic, and ethnic patterns, and the changing political landscape. Consideration will also be given to Europe's historic and present-day links with other world regions, and to the geographic basis for many of the social, political, economic, and environmental challenges facing contemporary Europe.

GEOG 129A. Special Topics in Regional Geography A. 3 Units
Term Typically Offered: Fall only

Geographic survey of a selected region with emphasis on its physical environment and selected economic, demographic, political, and cultural patterns. Consideration may include its connection to other world regions and its role in current events. The specific region is identified by the Geography Department at scheduling. This course and GEOG 129B and GEOG 129C may be taken for up to 9 units.

GEOG 129B. Special Topics in Regional Geography B. 3 Units
Geographic survey of a selected region with emphasis on its physical and human geography. Topics may include climate, landforms, vegetation, economics, demographics, culture, and the region's connection to other world regions and its role in current events. The specific region is identified by the Geography Department at scheduling. This course and GEOG 129A and GEOG 129C may be taken for up to 9 units.

GEOG 129C. Special Topics in Regional Geography C. 3 Units
A selected world region is the focus of this course that geographically surveys the region's physical and human environment. Potential topics include climate, landforms, vegetation, economics, demographics, culture, and more. The specific region is identified by the Geography Department at scheduling. This course and GEOG 129A and GEOG 129B may be taken for up to 9 units.

GEOG 131. California. 3 Units
Term Typically Offered: Fall only

Study of landforms, climate, vegetation, population distribution and change, industry, transportation, water, energy, and agriculture in California.

GEOG 133. Geography of the Middle East. 3 Units
Term Typically Offered: Fall only

This course will help students to develop a nuanced understanding of the complexity and diversity of the Middle East. Focusing on the human geography of the Middle East, we will examine the politics and cultures of the region. Particular focus will be on post-World War I geopolitics, when contemporary nation-states came to existence and several different conflicts evolved.

GEOG 141. Geography of Economic Activity. 3 Units
Term Typically Offered: Fall only – even years

Spatial organization of man's activities related to production, exchange and consumption. Attention is given to resource development and the real variations of factors affecting it, to concepts of spatial interaction and to spatial aspects of agricultural, industrial and urban land use. An examination of problems related to regional economic development. Changing perceptions of spatial organization of economic activities is also considered. Emphasis is on both theoretical framework and case study applications.

GEOG 142. Feminist Geography. 3 Units
Term Typically Offered: Fall, Spring

Feminist geography has long aimed to unbind geography, asking challenging questions about who geographers are, and what counts as geographic theory and practice, which spaces geographers study, and whose spaces inform theory. In this course we bring the feminist project into the classroom by exploring the work of feminist geographers who seek to challenge the bounded whiteness in our field. We also aim to incorporate the decolonial practices to transform the geographic scholarship in an international and multi-disciplinary context.

GEOG 143. Environmental Hazards and Society. 3 Units
Term Typically Offered: Spring only – odd years

Focuses on how a place's social systems and physical systems intersect to create hazards. Considers the development of various theoretical approaches to hazards; risk perception and societal responses to hazard events; the history of U.S. disaster response; and approaches to risk/vulnerability assessment.
GEOG 144. Transforming the City.  3 Units
Examination of dynamic urban social, spatial, and political forces related to housing, gentrification, and public space. Attention is given to the roles of class, race, gender, and ethnicity in shaping the spaces and processes of urban transformation in cities across the world. Guest speakers, written assignments, and discussions complement weekly lectures.

GEOG 145. Population Geography.  3 Units
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Spring only
Spatial patterns of population numbers and characteristics; migration and spread of ideas; potential for economic and cultural developments.

GEOG 147. Urban Geography.  3 Units
Term Typically Offered: Spring only – odd years
Consideration of cities as centers of human activity from the rise of urban life in the Old and New Worlds to the present day patterns of metropolis and megalopolis. The functions and interactions of cities in Earth’s limited space and on Earth’s limited resources are studied historically and crossculturally. Also examined are changing perceptions of the urban phenomenon and attempts to enhance the quality of urban life.

GEOG 148. Urban and Regional Planning.  3 Units
Term Typically Offered: Fall, Spring
Introduction to the theory and practice of urban and regional planning. Topics include the history of planning, the development of comprehensive and land use plans, growth management, and transportation and environmental planning. Includes guest speakers from the planning community as well as the opportunity to work on a project with a community organization or government agency to put into practice what is discussed in class.

GEOG 149. Transportation Geography.  3 Units
Prerequisite(s): GEOG 141, GEOG 147, or GEOG 148 or instructor permission.
Term Typically Offered: Spring only – odd years
Explores the geography of transportation using both theory and applications, quantitative and qualitative methods. Topics include the history and economic importance of transportation systems for all major modes; their political, social, and environmental aspects; and basic analytical methods, including accessibility dynamics, network analysis, and spatial interaction models. Focus will be on the U.S., with frequent reference to local issues, though material will be drawn on from around the world.

GEOG 150. Programming for GIS.  3 Units
Term Typically Offered: Fall, Spring
This course is an introduction to programming and scripting for intermediate GIS users, using an object-oriented programming approach. You will develop and write clearly documented and structured geoprocessing programs using the Python programming language and ArcPy, a site package (library) for ArcGIS geoprocessing tools.

GEOG 151. Programming for GIS II.  3 Units
Prerequisite(s): GEOG 150 or instructor approval.
Term Typically Offered: Fall, Spring
This is an advanced course in programming and scripting for intermediate to advanced GIS users, using an object-oriented programming approach. You will develop well-documented and structured geoprocessing programs for data management, processing, and automation in the Python programming language, leveraging libraries such as ArcPy and GDAL.

GEOG 155. GIS Data Acquisition and Management.  3 Units
Prerequisite(s): GEOG 109
Term Typically Offered: Fall, Spring
This course focuses on acquisition and management of geospatial datasets and addresses the interpretation of a variety of data formats available in global information systems (GIS). It explores concepts of geospatial data management strategies, primary GIS data creation, secondary data acquisitions, and leveraging leading-edge geospatial data deployments.

GEOG 161. California's Water Resources.  3 Units
Term Typically Offered: Spring only
Study of the location and nature of the state’s surface and underground water, including development by government agencies, water needs of cities, farms, recreation and wildlife, implications of water rights, water marketing and conservation, and management of floods, droughts and pollution.

GEOG 163. Applied GIS.  3 Units
Prerequisite(s): GEOG 109.
Term Typically Offered: Fall only
GIS-based research methods and project management. Development of project proposals, data collection plans, and other research techniques in a group and/or individual setting. Readings and lab exercises build on previous GIS skills. Lecture 2 hours; Laboratory 3 hours.

GEOG 182. Qualitative Methods in Geography.  3 Units
Term Typically Offered: Spring only
Introduction to techniques useful in the analysis of spatial distributions and other geographic phenomena: basic aspatial descriptive and inferential techniques, correlation, regression, and spatial inferential techniques.

GEOG 183. Quantitative Methods in Geography.  3 Units
Term Typically Offered: Spring only
Introduction to techniques useful in the analysis of spatial distributions and other geographic phenomena: basic aspatial descriptive and inferential techniques, correlation, regression, and spatial inferential techniques.
Field trip(s) may be required.

GEOG 193B. Field Geography: Suburban-Rural. 3 Units
Prerequisite(s): Instructor permission.
Term Typically Offered: Spring only
Exercises competition for land use in suburban Sacramento, as urban sprawl overruns less intensive uses. Small towns in the lower Sacramento Valley also examined. Group field trips, interviews, field mapping, and discussions. Field trip(s) may be required.

GEOG 193C. Field Geography: Physical. 3 Units
Prerequisite(s): Instructor permission.
Term Typically Offered: Fall only
Survey of selected areas with systematic examination of elements of the natural landscape. Group field trips and individual preparation of reports and consultation with instructor. Field trip(s) may be required.

GEOG 194. Geography - Related Work Experience. 6 - 12 Units
Prerequisite(s): Consent of supervising faculty and Department Chair.
Term Typically Offered: Fall, Spring
Supervised employment in a company or agency doing geography-related work, arranged through the Department of Geography and the Cooperative Education Program office. Requires preparation of application packet, completion of a 3-6 month full- or part-time work assignment, and a written report. Units not applicable to the Geography major. Credit/No Credit

GEOG 195A. Geography Internship A. 1 - 3 Units
Term Typically Offered: Fall, Spring
Supervised work experience at the beginning level in an approved professional environment, working with professionals in public or private organizations. Supervision supplied by a geography faculty member and on-site supervisor. Placements require 4-12 hours per week, depending on units. Note: Open to all Geography majors and minors with permission of supervising faculty member and Department Chair. GEOG 195A, GEOG 195B, and GEOG 195C may be taken for up to 6 total units. Credit/No Credit

GEOG 195B. Geography Internship B. 1 - 3 Units
Term Typically Offered: Fall, Spring
Supervised work experience at the intermediate level in an approved professional environment, working with professionals in public or private organizations. Supervision supplied by a geography faculty member and on-site supervisor. Placements require 4-12 hours per week, depending on units. Note: Open to all Geography majors and minors with permission of supervising faculty member and Department Chair. GEOG 195A, GEOG 195B, and GEOG 195C may be taken for up to 6 total units. Credit/No Credit

GEOG 195C. Geography Internship C. 1 - 3 Units
Term Typically Offered: Fall, Spring
Supervised work experience at an advanced level in an approved professional environment, working with professionals in public or private organizations. Supervision supplied by a geography faculty member and on-site supervisor. Placements require 4-12 hours per week, depending on units. Note: Open to all Geography majors and minors with permission of supervising faculty member and Department Chair. GEOG 195A, GEOG 195B, and GEOG 195C may be taken for up to 6 total units. Credit/No Credit

GEOG 190. Senior Research Seminar in Geography. 3 Units
Prerequisite(s): GEOG 1, GEOG 2, GEOG 3, GEOG 102; senior standing, and GWAR certification before Fall 09; or WPJ score of 80+; or 3-unit placement in ENGL 109M or ENGL 109W; or 4-unit placement in ENGL 109M or ENGL 109W and co-enrollment in ENGL 109X; or WPJ score 70 or 71 and co-enrollment in ENGL 109X; instructor permission. General Education Area/Graduation Requirement: Writing Intensive Graduation Requirement (WI)
Term Typically Offered: Spring only
Writing-intensive capstone course requiring students to complete independent research projects displaying their mastery of geography’s content and methods. Projects undertaken in a given semester share a common thematic and/or regional focus. Students use bibliographic, field, spatial analytic, graphic, and verbal skills. Context for projects is provided by a review of the recent history of the discipline. Lecture/discussion three hours.

GEOG 192A. Geography Field Experience A. 1 - 2 Units
Prerequisite(s): one geography course or instructor permission.
Term Typically Offered: Fall, Spring
A particular geographical area is explored and studied via beginning-level field observation. Emphasis may be placed on physical features, cultural features, or both.
Credit/No Credit

GEOG 192B. Geography Field Experience B. 1 - 2 Units
Prerequisite(s): one geography course or instructor permission.
Term Typically Offered: Fall, Spring
A particular geographical area is explored and studied via intermediate-level field observation. Emphasis may be placed on physical features, cultural features, or both.
Credit/No Credit

GEOG 192C. Geography Field Experience C. 1 - 2 Units
Prerequisite(s): one geography course or instructor permission.
Term Typically Offered: Fall, Spring
A particular geographical area is explored and studied via advanced-level field observation. Emphasis may be placed on physical features, cultural features, or both.
Credit/No Credit

GEOG 193A. Field Geography: Urban-Metropolitan. 3 Units
Prerequisite(s): Instructor permission
Term Typically Offered: Spring only – odd years
Examines the internal structure and external relations of Sacramento as a metropolitan center and of nearby urban communities through field observation and exercises. Emphasis is placed on mapping and interviewing as ways of gaining useful information on urban patterns.

GEOG 193B. Field Geography: Suburban-Rural. 3 Units
Prerequisite(s): Instructor permission.
Examines competition for land use in suburban Sacramento as urban sprawl overruns less intensive uses. Small towns in the lower Sacramento Valley also examined. Group field trips, interviews, field mapping and discussions. Field trip(s) may be required.
GEOG 196F. Feminist Geography. 3 Units
Term Typically Offered: Fall, Spring, Summer

In this course we bring the feminist project into the classroom by exploring the work of feminist geographers who seek to challenge the embedded whiteness in our field. We also aim to incorporate the decolonial practices to transform the geographic scholarship in an international and multi-disciplinary context.

GEOG 196G. Programming for GIS II. 3 Units
Prerequisite(s): GEOG 150 or instructor approval.
Term Typically Offered: Spring only

This is an advanced course in programming and scripting for intermediate to advanced GIS users, using an object-oriented programming approach. You will develop well-documented and structured geoprocessing programs for data management, processing, and automation in the Python programming language, leveraging libraries such as ArcPy and GDAL.

GEOG 196W. Political Ecology, Nature, and Justice. 3 Units
Term Typically Offered: Fall only – odd years

This course will provide an overview of political ecology, a growing subfield in geography that examines the unequal political and socioeconomic power relations embedded in human-environment interactions. Students will develop advanced critical thinking skills related to real-world socio-environmental issues. The course will introduce major debates, scholarly intersections, and particular themes in contemporary political ecological research, including a discussion of urban issues, gender, race, water, and food justice.

GEOG 198. Co-Curricular Activities. 1 - 6 Units
Prerequisite(s): Consent of faculty Sponsor and department chair.
Term Typically Offered: Fall, Spring

Co-curricular activities related to subject matter and concerns of the Geography Department, e.g. students may qualify for credit by providing special tutorial assistance to EOP students or others in introductory courses.

Note: May be repeated for up to 6 units of credit.

Credit/No Credit

GEOG 199. Special Problems. 1 - 3 Units
Prerequisite(s): Approval of the faculty sponsor and Department chair.
Term Typically Offered: Fall, Spring, Summer

Individual projects or directed reading.

Note: Open only to students competent to carry on individual work.

Credit/No Credit

GEOG 199A. Geography Special Problems A. 1 - 3 Units
Prerequisite(s): Approval of the faculty sponsor and department chair.
Term Typically Offered: Fall, Spring

Individual projects or directed reading at a beginning level. Graded (CR/NC Available) Units: 1.0 - 3.0

Note: Open only to students competent to carry on individual work.

Credit/No Credit

GEOG 199B. Geography Special Problems B. 1 - 3 Units
Prerequisite(s): Approval of the faculty sponsor and department chair.
Term Typically Offered: Fall, Spring

Individual projects or directed reading at an intermediate level, ordinarily taken following completion of GEOG 199A. Graded (CR/NC Available) Units: 1.0 - 3.0

Note: Open only to students competent to carry on individual work.

Credit/No Credit

GEOG 199C. Geography Special Problems C. 1 - 3 Units
Prerequisite(s): Approval of the faculty sponsor and department chair.
Term Typically Offered: Fall, Spring

Individual projects or directed reading at an advanced level. Ordinary taken following completion of GEOG 199A and GEOG 199B. Graded (CR/NC Available) Units: 1.0 - 3.0

Note: Open only to students competent to carry on individual work.

Credit/No Credit

GEOG 299. Special Problems. 1 - 3 Units
Prerequisite(s): Approval of the faculty sponsor and Department Chair.
Term Typically Offered: Fall, Spring

Individual projects or directed reading.

Note: Open only to students competent to carry on individual work.

Credit/No Credit

BA in Geography (Geographic Information Science)

Units required for Major: 46
Total units required for BA: 120

Program Description

The Bachelor of Arts in Geography with a concentration in Geographic Information Science (GIScience) emphasizes student development of geospatial skills. Geographic Information Science, cartography, remote sensing, and qualitative and quantitative methods prepare students to tackle any problem with a spatial dimension—from advising an individual firm on good locations for a new branch or supplier to modeling the spread of wildfires across a region to analyzing the global spread of diseases or new technologies.

Note:

• Courses cannot double count for the core and the concentration.
• Courses in the concentration core requirements (Geog 109, Geog 110, Geog 150, and Geog 155) must be passed with a minimum grade of C- to satisfy requirements.

Program Requirements

**Total Units: 42**

1 To help you complete your degree in a timely manner and not take more units than absolutely necessary, there are ways to use single courses to meet more than one requirement (overlap). For further information, please visit the General Education page (p. 1103).

Note: There is no way to list all possible overlaps so please consult with a professional advisor. The Academic Advising Center can be visited online (http://www.csus.edu/acad/), by phone (916) 278-1000, or email (advising@csus.edu).

2 Required in Major; also satisfies GE.

### Graduation Requirements

**Graduation Requirements (required by CSU) (6 Units)**

1 Course also satisfies General Education (GE)/Graduation Requirement.
Program Requirements

1 To help you complete your degree in a timely manner and not take more units than absolutely necessary, there are ways to use single courses to meet more than one requirement (overlap). For further information, please visit the General Education page (p. 1103).

**Note:** There is no way to list all possible overlaps so please consult with a professional advisor. The Academic Advising Center can be visited online (http://www.csus.edu/acad/), by phone (916) 278-1000, or email (advising@csus.edu).

2 Required in Major; also satisfies Graduation Requirement.

3 If not satisfied before entering Sacramento State, it may be satisfied in General Education Area C2 (Humanities). "C- or better required." The alternative methods for satisfying the Foreign Language Proficiency Requirement are described here: https://www.csus.edu/college/arts-letters/world-languages-literatures/foreign-language-requirement.html

## BA in Geography (Human Geography)

**Units required for Major:** 46

**Total units required for BA:** 120

### Program Description

The Bachelor of Arts in Geography with a concentration in Human Geography examines how diverse human cultures and economies interact with natural environments to create distinctive places with unique achievements, challenges, and conflicts. Students acquire cross-cultural perspectives and knowledge relevant to globalization, international development, energy and other natural resource issues, hazards and disasters, migration and demography, and geopolitical situations.

**Note:**

- Every candidate must complete all of the Geography Core and one Concentration.
- Courses cannot double count for the core and the concentration.
- Students must take at least FOUR courses, with at least one each from Data Analysis and Data Output categories.

### Program Requirements

</table>

**Geography Core (12 Units)**

Select one course from each of the following four areas:

- **Geographic Techniques**
  - GEOG 105 Computer Cartography
  - GEOG 107 Remote Sensing

**Total Units**

1 Course also satisfies General Education (GE)/Graduation Requirement.

### Concentrations (15 Units)

Select a concentration from the following:

- Geographic Information Systems and Analysis Concentration
- Human Geography Concentration
- Metropolitan Area Planning Concentration
- Physical Geography Concentration

**Total Units**

15

### Concentration in Human Geography (15 units)

**Units**

Select two additional human geography courses from the following:

- GEOG 141 Geography of Economic Activity
- GEOG 143 Environmental Hazards and Society
- GEOG 145 Population Geography ¹
GEOG 147  Urban Geography  
GEOG 148  Urban and Regional Planning  
GEOG 149  Transportation Geography  
GEOG 161  California’s Water Resources  
GEOG 163  Applied GIS

Select two additional regional geography courses from the following: 6
GEOG 121  United States and Canada  
GEOG 125  Geography Of East Asia  
GEOG 127  Geography Of Africa  
GEOG 128  Geography Of Europe  
GEOG 129A  Special Topics in Regional Geography A  
GEOG 129B  Special Topics in Regional Geography B  
GEOG 129C  Special Topics in Regional Geography C  
GEOG 131  California

Select one additional technique course from the following: 3
GEOG 105  Computer Cartography  
GEOG 107  Remote Sensing  
GEOG 109  Geographic Information Systems  
GEOG 110  Advanced Geographic Information Systems  
GEOG 150  Programming for GIS  
GEOG 151  Programming for GIS II  
GEOG 163  Applied GIS  
GEOG 181  Quantitative Methods in Geography  
GEOG 182  Qualitative Methods in Geography  
GEOG 193A  Field Geography: Urban-Metropolitan  
GEOG 193B  Field Geography: Suburban-Rural

Total Units 15

1 Course also satisfies General Education (GE)/Graduation Requirement.
2 The technique cannot be a field course if a field course was taken for the core.

1 To help you complete your degree in a timely manner and not take more units than absolutely necessary, there are ways to use single courses to meet more than one requirement (overlap). For further information, please visit the General Education page (p. 1103).

Note: There is no way to list all possible overlaps so please consult with a professional advisor. The Academic Advising Center can be visited online (http://www.csus.edu/acad/), by phone (916) 278-1000, or email (advising@csus.edu).

2 Required in Major; also satisfies GE.

3 Students can meet upper division Area D by taking GEOG 145 in the Concentration Requirements.

**BA in Geography (Metropolitan Area Planning)**

Units required for Major: 46  
Total units required for BA: 120
Program Description
The Bachelor of Arts in Geography with a concentration in Metropolitan Area Planning helps students understand how cities have evolved, with an emphasis on spatial patterns and the role of transportation in structuring settlements. The concentration provides students with skills for designing cities that address important issues such as sustainability, affordable housing and transportation, a strong civic life, and public health and safety.

Note:
• Every candidate must complete all of the Geography Core and one Concentration.
• Courses cannot double count for the core and the concentration.
• Students must take at least FOUR courses, with at least one each from Data Analysis and Data Output categories.

To help you complete your degree in a timely manner and not take more units than absolutely necessary, there are ways to use single courses to meet more than one requirement (overlap). For further information, please visit the General Education page (p. 1103).

**Note:** There is no way to list all possible overlaps so please consult with a professional advisor. The Academic Advising Center can be visited online (http://www.csus.edu/acad/), by phone (916) 278-1000, or email (advising@csus.edu).

2 Required in Major; also satisfies Graduation Requirement.

3 If not satisfied before entering Sacramento State, it may be satisfied in General Education Area C2 (Humanities). “C- or better required.” The alternative methods for satisfying the Foreign Language Proficiency Requirement are described here: https://www.csus.edu/college/arts-letters/world-languages-literatures/foreign-language-requirement.html

**BA in Geography (Physical Geography)**

Units required for Major: 46
Total units required for BA: 120

**Program Description**
The Bachelor of Arts in Geography with a concentration in Physical Geography focuses on earth systems and human impacts on them, including global climate change. Students interested in natural science and environmental management study weather and climate, plant and animal communities, landforms, and water resources, emphasizing the growing human role in influencing and managing these complex interrelated systems.

**Note:**
• Every candidate must complete all of the Geography Core and one Concentration.
• Courses cannot double count for the core and the concentration.

¹ Course also satisfies General Education (GE)/Graduation Requirement.
² The technique cannot be a field course if a field course was taken for the core.
Certificate in Pre-Planning

Units required for Certificate: 15-16

Program Description
The Pre-Planning program consists of 15-16 units in addition to the major and culminates in a certificate. Select either the Metropolitan or Resource Planning Concentration below. No more than two courses may be taken in any one department.

Students must have an advisor and will not be allowed to proceed in the program without an advisor’s signature. In some cases courses may be accepted that have already been completed. There can be no double counting from among courses used in the major.

1 To help you complete your degree in a timely manner and not take more units than absolutely necessary, there are ways to use single courses to meet more than one requirement (overlap). For further information, please visit the General Education page (p. 1103).

Note: There is no way to list all possible overlaps so please consult with a professional advisor. The Academic Advising Center can be visited online (http://www.csus.edu/acad/), by phone (916) 278-1000, or email (advising@csus.edu).

2 Required in Major; also satisfies Graduation Requirement.

3 Students can complete Area B5 by taking GEOG 111, GEOG 115, or GEOG 116 in their Concentration Requirements.

Note: There is no way to list all possible overlaps so please consult with a professional advisor. The Academic Advising Center can be visited online (http://www.csus.edu/acad/), by phone (916) 278-1000, or email (advising@csus.edu).

3 If not satisfied before entering Sacramento State, it may be satisfied in General Education Area C2 (Humanities). "C- or better required.” The alternative methods for satisfying the Foreign Language Proficiency Requirement are described here: https://www.csus.edu/college/arts-letters/world-languages-litersatures/foreign-language-requirement.html (https://www.csus.edu/college/arts-letters/world-languages-litersatures/foreign-language-requirement.html)
Minor in Geographic Information Science

Units required for Minor: 18

Program Description

Geography students at Sacramento State explore Earth’s natural and cultural environments using methods from the natural sciences and the social sciences. They study climate, weather, landforms, water resources, and plants and animals, as well as peoples, societies, economies, and cities. These phenomena overlap in intricate ways, giving rise to distinctive places and regions. Geography’s approach emphasizes Earth’s spatial relationships and patterns, and the processes that govern them, whether found in nature or in human behavior.

Select three additional units in Geography, either lower division or upper division 1

Total Units: 18

1 Courses must be selected in consultation with and approved by a faculty advisor in Geography. A minimum of 6 upper division units must be earned in residence.

Geology

College of Natural Sciences and Mathematics

Program Description

Geology is the study of the earth, its environments, and its history. It is an interdisciplinary science that combines geological observations and concepts with those of biology, chemistry, physics, and mathematics. Its goals are to study rocks, minerals, fossils, and energy and water resources, and to understand geologic principles and processes that shape the earth and its environments.

The Sacramento State Geology program has three objectives:

1. to encourage students to think scientifically,
2. to provide students with the knowledge base to make progress in geology after leaving Sacramento State, and
3. to teach students basic skills such as using a petrographic microscope and field equipment, how to construct a geologic map, and how to write a technical geologic report.

The BA degree program is designed as a shorter, more flexible preparation for some geology jobs, earth science teaching in high school (see Teaching Credential), and jobs such as park naturalist, environmentalist, geologic planning specialist, or in geology-related businesses. The BA degree can be used in dual-track majors combining geology with biological sciences, chemistry, physics, or engineering.

The BS degree program is designed to be the best possible preparation for advanced work in geology in graduate school or for professional employment as a geologist. The Geology program offers a strong background in the major areas of geology including: mineralogy, petrology, paleontology, stratigraphy, structural geology, field mapping, hydrogeology, and report writing.
Degree Programs

BA in Earth Science (p. 877)
BA in Geology (p. 877)
BS in Geology (p. 878)
BS in Geology (Hydrogeology) (p. 880)
Minor in Geology (p. 881)
MS in Geology (p. 881)

Special Features

- Among the greatest attractions for studying geology at Sacramento State is the University’s location in a dynamic geologic environment; just 70 miles to the west is the San Francisco Bay Area and the San Andreas fault. About equidistant to the east is the magnificent Sierra Nevada mountain range. The active geology faculty conducts field trips in almost every course in the Geology major, providing excellent opportunities for students to learn field skills and to apply classroom knowledge to field situations.
- A small student/teacher ratio, plus a rigorous course of study, contributes to the excellent reputation of the Sacramento State Geology Department with employers and graduate schools. Contact the Department office for assistance in obtaining a faculty advisor.
- The Geology Department operates the largest on-campus well field in the nation, with twenty engineered wells for teaching and student research. The well field is complemented by a comprehensive collection of state-of-the-art geophysical and hydrological field equipment.
- The Geology Department shares Placer Hall with the United States Geological Survey (USGS). Students benefit from this unique collaborative enterprise between a university and a federal agency because of the educational, research, and employment opportunities provided by the combined scientific and educational resources of the Geology Department and the USGS.
- Students interested in marine geology may take courses at Moss Landing Marine Laboratories at Moss Landing, CA, 180 miles from the Sacramento State campus. The labs and available courses are described under the Marine Sciences section of this catalog. A program including Moss Landing courses may be formulated with a Geology advisor. Such a program usually requires living in or near Moss Landing for one or more semesters.

Career Possibilities

Geologist · Geophysicist · Groundwater Geologist · Oil and Gas Geologist · Mineralogist · Paleontologist · Marine Geologist · Environmental Geologist · Photogeologist · Seismologist · Consulting Geologist · Soils Engineer · Land Use Planner · Volcanologist · Astrogeologist · Geochemist · Economic Geologist · Mining Geologist · Hydrologist · Government Geologist · Coal Geologist · Glacial Geologist · Vertebrate Paleontologist · Geology Professor · Earth Science Teacher

GEOL 5. Geology Of Mexico. 4 Units
General Education Area/Graduation Requirement: Laboratory (B3), Physical Science (B1)
Term Typically Offered: Fall, Spring

Introduction to Geology through examination of aspects of the geology of Mexico. Emphasizes problem-based approach to learning Geology and the process of scientific investigation. Topics include a wide range of geological concepts including plate tectonic setting of Mexico, living with volcanoes: the Mexican volcanic belt, the Mexico City earthquake, issues of water supply, flooding and atmospheric pollution in Mexico City, the Chicxulub crater and geologic time, ore deposits of Mexico. Lecture three hours; laboratory three hours.

GEOL 5A. Geology of Mexico Field Trip. 2 Units
Prerequisite(s): GEOL 5
Term Typically Offered: Fall, Spring

Focuses on fundamental geologic concepts as seen from real world examples in Mexico that will be visited during several strategic field stops. Field stops will emphasize a problem-based approach to learning geology and the process of scientific investigation. Topics include a wide range of geological concepts including plate tectonic setting of Mexico, living with volcanoes, the Mexico City earthquake, issues of water supply, flooding, climate change and atmospheric pollution in Mexico City, the Chicxulub meteor impact crater, geologic time, ore deposits of Mexico, and natural hazards. Field trip ten days. Field trip(s) may be required.

GEOL 7. Natural Disasters. 3 Units
General Education Area/Graduation Requirement: Physical Science (B1)
Term Typically Offered: Fall, Spring

Examination of earth materials and earth processes through the study of natural disasters. Topics include earthquakes, volcanoes, landslides, floods, tsunamis, hurricanes, tornadoes and meteorite impacts. Examination of causes, effects and mitigation of natural disasters.

geology@csus.edu
GEOL 8. Earth Science. 3 Units
General Education Area/Graduation Requirement: Physical Science (B1)
Term Typically Offered: Fall, Spring, Summer

Earth and its neighbors in space. Scientific method and discovery in the study of stars, planets, weather, rivers, glaciers, oceans, rocks, volcanoes, earthquakes, landslides, mountains, drifting continents, the earth in time. Note: Students contemplating a geology major or minor in geology should enroll in GEOL 10, not GEOL 8. No credit for those who have taken GEOL 10 or equivalent.

GEOL 8L. Earth Science Lab. 1 Unit
Prerequisite(s): GEOL 8; may be taken concurrently.
General Education Area/Graduation Requirement: Laboratory (B3), Physical Science (B1)
Term Typically Offered: Fall, Spring

Emphasizes scientific methods and systematic laboratory procedures. Includes weather analysis, rock and mineral identification, study of geologic concepts by means of topographic maps, and exercises in astronomy and oceanography. Laboratory three hours.

GEOL 8T. Earth Science Lab for Teachers. 1 Unit
Prerequisite(s): GEOL 8; may be taken concurrently.
Term Typically Offered: Fall, Spring

Exploration of the solid Earth, its atmosphere and oceans, and the Earth's place in the solar system. Emphasizes learning Earth science through investigation, and uses Earth science to understand the processes of science. Laboratory three hours.

GEOL 10. Physical Geology. 3 Units
General Education Area/Graduation Requirement: Physical Science (B1)
Term Typically Offered: Fall, Spring

Rocks and their mineral constituents, geological processes such as weathering, erosion, glaciation, mountain building, etc., volcanoes, earthquakes, folds, faults, the earth's interior, plate tectonics and earth resources. Field trip. Fee course. Fee course. Field trip(s) may be required.

GEOL 10L. Physical Geology Lab. 1 Unit
Prerequisite(s): GEOL 10; may be taken concurrently.
General Education Area/Graduation Requirement: Physical Science (B1), Laboratory (B3)
Term Typically Offered: Fall, Spring

Laboratory supplement to GEOL 10. Emphasizes scientific method and systematic laboratory procedures. Identification of common minerals and rocks. Introduction to and analysis of topographic and geologic maps. Field trip. Laboratory three hours. Fee course. Fee course. Field trip(s) may be required.

GEOL 11. Digital Methods in Geoscience. 1 Unit
Prerequisite(s): GEOL 5 or GEOL 10/10L. GEOL 10L can be taken concurrently.
Term Typically Offered: Fall, Spring

Introductory course to the basic computing needs to be successful in the geosciences. Topics include Microsoft Office, Adobe Suite and reference software.

GEOL 12. Historical Geology. 3 Units
Prerequisite(s): GEOL 5 or GEOL 10 and GEOL 10L.
Term Typically Offered: Fall, Spring

Origin and geological history of the earth and the evolution of its animal and plant inhabitants. Fee course.

Note: Lecture 3 hours.

GEOL 12L. Historical Geology Lab. 1 Unit
Prerequisite(s): GEOL 12; and GEOL 5 or GEOL 10 and GEOL 10L. GEOL 12 may be taken concurrently.
Term Typically Offered: Fall, Spring

Supplements GEOL 12. Use of sedimentary rocks, fossils, geologic maps, and structural sections in interpreting ancient environments, tectonic settings, and geologic history. Age relations and correlation of rock and time-rock units. Introduction to fossil identification and biostratigraphy. Laboratory three hours.

GEOL 100. Earth Materials - Rocks and Minerals. 4 Units
Prerequisite(s): CHEM 1A, GEOL 5 or GEOL 10/10L, and GEOL 10 (GEOL 12 can be taken concurrently) Field Trip.
Term Typically Offered: Fall, Spring

Properties and identification of minerals and rocks; rock formation and the rock cycle. Lecture three hours; laboratory three hours; field trip. Field trip(s) may be required.

GEOL 101. Optical Mineralogy. 2 Units
Prerequisite(s): CHEM 1A, GEOL 5 or GEOL 10 + GEO 10L, GEOL 100 (GEOL 100 can be taken concurrently)
Term Typically Offered: Fall, Spring

Introduction to advanced mineral identification by physical and optical properties. Techniques and theory of optical mineral analysis and crystallography. Lecture 1 hour; laboratory 3 hours.

GEOL 102. Igneous and Metamorphic Petrology. 4 Units
Prerequisite(s): GEOL 100 and GEOL 103
Term Typically Offered: Fall, Spring

Study of the origin, evolution, occurrence, geochemistry, dynamics and physical characteristics of igneous and metamorphic systems. The laboratory will focus on both hand-specimen and petrographic-microscope studies. Lecture three hours, laboratory three hours. Fee course. Fee course.

GEOL 103. Sedimentology/Stratigraphy. 4 Units
Prerequisite(s): GEOL 12, GEOL 12L, and GEOL 100
Term Typically Offered: Spring only

Compositions, textures, classification, origins and structures of sediments and sedimentary rocks. Hand specimen observation and interpretation. Facies models, classification and correlation of stratigraphic units, subsurface techniques. Lab emphasizes hand specimen and microscope identification and subsurface techniques. Field trip. Lecture three hours; laboratory three hours. Fee course. Fee course. Field trip(s) may be required.
GEOL 105. Paleontology. 4 Units
Prerequisite(s): GEOL 5 or GEOL 10 and GEOL 10L, GEOL 12 and GEOL 12L.
Term Typically Offered: Spring only

Biology, evolution, classification and paleoecology of important groups of fossil organisms. Uses of fossils in solving geologic problems.

Note: Lecture = 3 units; Lab = 1 unit. Fee Course. Field Trip.

GEOL 110A. Structural Geology and Tectonics. 4 Units
Prerequisite(s): GEOL 111A and GEOL 111B, PHYS 5A or PHYS 11A, MATH 26A or MATH 30.
Term Typically Offered: Fall, Spring

Description, analysis and interpretation of geologic structures and tectonic settings. Theory of stress and strain as it pertains to the origin of folds, faults, joints, cleavage, and other structural elements. Laboratory includes techniques of structural analysis such as orthographic projections, stereonets, structure contours, Mohr diagrams, interpretation of maps and cross sections. Lecture three hours, laboratory three hours. Fee Course. Fee course.

GEOL 110B. Structural Geology Field. 1 Unit
Prerequisite(s): GEOL 103, GEOL 111A, GEOL 111B, and GEOL 110A. It is recommended that GEOL 110A be taken concurrently.
Term Typically Offered: Fall, Spring

Field description, mapping and interpretation of geologic structures. Includes techniques of taking detailed field notes, field photography measurement of structures using a pocket transit, geologic map and cross section construction, stereonet analysis, and report writing. Consists of off-campus fieldwork. Fee course.

GEOL 111A. Field Geology. 2 Units
Prerequisite(s): GEOL 12L and GEOL 100
Corequisite(s): GEOL 111B
Term Typically Offered: Spring only

Science and art of recognizing, describing and interpreting geologic features in the field. Lecture and laboratory course on the preparation and use of topographic and geologic maps, stratigraphic and cross sections, compass and GPS instrument. Lecture one hour; laboratory three hours. Fee course.

GEOL 111B. Field Techniques. 2 Units
Prerequisite(s): GEOL 100 and GEOL 103. GEOL 103 may be taken concurrently.
Corequisite(s): GEOL 111A
Term Typically Offered: Spring only

Introduction to geologic field methods including descriptions of rocks, geologic mapping, observation, interpretation and geologic report writing. Detailed mapping techniques will also be covered; these may include the use of plane table, total station theodolite and global position systems. Consists of off-campus fieldwork. Fee course.

GEOL 112. Geophysics For Geologists. 3 Units
Prerequisite(s): GEOL 5 or GEOL 10 and GEOL 10L, PHYS 5A, PHYS 5B which may be taken concurrently.
Term Typically Offered: Fall, Spring

Introduction to the principal geophysical concepts and techniques useful to geologists in the study of tectonics, the Earth's interior and resource exploration. Includes the study of seismology, heat flow, gravity, borehole geophysics, electromagnetism and geodynamics. Fee Course/Field Trip. Fee course.

GEOL 113. Geology of California. 4 Units
Prerequisite(s): GEOL 100; May be taken concurrently.
Term Typically Offered: Fall, Spring

Regional study of California and certain surrounding areas with regard to geologic development, plate tectonics, economic resources and geologic hazards. Lecture and field trip(s). Fee course. Field trip student fee.

GEOL 114. Volcanology. 3 Units
Prerequisite(s): GEOL 100; May be taken concurrently.
Term Typically Offered: Fall, Spring

An advanced exploration of physical volcanic processes, chemistry of magmas, interpretation of volcanic deposits, historic eruptions and volcanic hazard assessment.

Note: Field trip. Weekend field trip to volcanic areas (typically in California). Fee course. Field trip student fee.

GEOL 115. Volcanoes: An Introduction. 3 Units
General Education Area/Graduation Requirement: Further Studies in Area B (B5)
Term Typically Offered: Fall, Spring

An introductory to volcanoes including volcanic landforms, eruption styles, properties of magma, and volcanic hazards/ mitigation.

GEOL 120. Surficial Processes. 4 Units
Prerequisite(s): GEOL 5 or GEOL 10 and GEOL 10L; GEOL 12, GEOL 12L.
Term Typically Offered: Fall, Spring

Focused study on the basic forces that drive surficial processes such as wind water and gravity and the role of weathering, sediment transport and deposition on landform and landscape development. A laboratory component will enhance student understanding by solving applied problems as well as develop proficiencies with various geologic tools.

Note: 150 minutes Lecture = 3 units, 150 minutes Lab = 1 unit. Fee Course.

GEOL 121. Geology of California. 3 Units
Prerequisite(s): GEOL 5 or GEOL 10.
Term Typically Offered: Fall, Spring

Regional study of California and certain surrounding areas with regard to geologic development, plate tectonics, economic resources and geologic hazards. Lecture and field trip(s). Fee course. Fee course.

GEOL 122. Hydrology Research Experience. 3 Units
Hydrology research and professional development experience. Students will learn hypothesis development and testing, data interpretation, and science communication skills focusing on data collected during a summer Hydrology field experience. Students will also learn about Hydrology career paths, apply for internships, and present research findings. Students must participate in the summer Hydrology field experience prior to taking this class.

GEOL 123. Hydrogeology. 3 Units
Prerequisite(s): GEOL 122.
Term Typically Offered: Spring only

Introduction to hydrogeology, including hydrogeologic processes, groundwater flow, geologic materials, and groundwater modeling. Laboratory work includes field measurement, data analysis, and computer simulations.
GEOL 123. Geochemistry. 3 Units
Prerequisite(s): GEOL 5 or GEOL 10 and GEOL 10L, CHEM 1A.
Term Typically Offered: Fall, Spring
Fundamentals of the geochemistry of Earth materials. Thermodynamics and kinetics of geological environments, silicates and carbonates, major element geochemistry, trace and rare earth element geochemistry, stable and radiogenic isotopes. Applications to studies of aqueous, pedogenic, igneous, sedimentary, and metamorphic environments. Analysis of geochemical aspects of contemporary resource, environmental, and paleoenvironmental problems.

GEOL 125. Metallic Ore Deposits. 3 Units
Prerequisite(s): GEOL 100, CHEM 1A.
Term Typically Offered: Fall, Spring
Fee course.
Field trip(s) may be required.

GEOL 126. Environmental Field Methods. 3 Units
Prerequisite(s): GEOL 10 or GEOL 10L or instructor permission.
Field analysis of the local environment, including soil and water systems. Students will learn monitoring design, sample collections, sample analysis, data interpretation, and presentation methodologies for environmental geology applications.

GEOL 127. Hydrogeology. 4 Units
Prerequisite(s): CHEM 1A, GEOL 10, GEOL 10L, PHYS 5A, and MATH 26A or MATH 30, or instructor permission.
Term Typically Offered: Spring only
Presents fundamentals of groundwater flow, as influenced by topography and geology; geological aspects of groundwater supply, contamination, remediation, and protection of hydrogeological regions of the U.S. and their critical groundwater issues. Lecture three hours; laboratory three hours. Lecture three hours.

GEOL 130. Oceanography. 3 Units
General Education Area/Graduation Requirement: Further Studies in Area B (B5)
Term Typically Offered: Fall, Spring, Summer
Survey of geological, physical, chemical and biological oceanography including the sea floor; waves, tides, currents; the physical and chemical properties of seawater and their distribution in the sea; planktonic life and its relation to nutrients.

GEOL 132. Marine Geology. 3 Units
Prerequisite(s): GEOL 10 and GEOL 10L or GEOL 12 and GEOL 12L
Term Typically Offered: Spring only
Origin, structure and evolution of the ocean basins and their margins. Topics covered will include marine sediments, seafloor bathymetry, seismic stratigraphy, sea level history, and marine micropaleontology.
Fee course.
Field trip: Weekend trip to Moss Landing, California to collect marine samples.
Fee course.
Field trip(s) may be required.

GEOL 140. Geology and the Environment. 3 Units
Prerequisite(s): GEOL 10 or another physical geology course approved by instructor; Field Trip, 2 units. Fee course.
Term Typically Offered: Fall, Spring
Applies geologic data and principles to situations affecting our environment. The geologic study of earthquakes, volcanoes, floods, landslides, groundwater and similar topics supplies the background data for lectures on land use and other social choices. Topics such as geopolitics and mineral supply provide a basis for understanding international politics, social costs, and world economics. Fee course.

GEOL 150. Computer Mapping in Geology. 3 Units
Prerequisite(s): GEOG 109 or instructor permission
Term Typically Offered: Fall, Spring
This course is designed to enhance the mapping skills of geology majors by providing them an opportunity to learn modern computer aided mapping techniques - methods and tools widely used across industry, government, and academia. The course is designed to teach students how to effectively use various tools and mapping software by applying their developing skills in solving a variety of geological problems. This course strategy will help develop both student technical map making and innovative problem solving skills.

GEOL 170. Age of Dinosaurs. 3 Units
General Education Area/Graduation Requirement: Further Studies in Area B (B5)
Term Typically Offered: Fall, Spring
Applies to the fundamental principles of geology, biology, and ecology to understanding the evolution of the Mesozoic world. Emphasis is placed on the nature and evolution of dinosaurs in the context of global regional changes in the Mesozoic ecosystem. Included are considerations of the data, methods, and uncertainties in paleontology and other historical sciences.

GEOL 171. Petroleum Geology. 3 Units
Prerequisite(s): PHYS 5A & GEOL 103. GEOL 103 may be taken concurrently.
Term Typically Offered: Fall, Spring
Introduction to the origin, migration, and accumulation of hydrocarbons in the context of stratigraphic and structural systems. Exploration and production of both conventional and unconventional resources. Lecture three hours. Field trip. Fee Course.
Field trip(s) may be required.

GEOL 177. Hawaii Volcanic Field Trip. 2 Units
Prerequisite(s): Geology 10 or another physical geology course approved by instructor; Field Trip, 2 units. Fee course.
Term Typically Offered: Fall, Spring
An investigation and visit to the many interesting volcanic features and eruption activities of Hawaiian volcanism. Topics include tectonics, physical volcanology, and volcanic monitoring techniques.
Credit/No Credit
Fee course.
GEOL 180. Water Planet. 3 Units
General Education Area/Graduation Requirement: Further Studies in Area B (B5)
Term Typically Offered: Fall, Spring

Investigating the physical processes that control water movement and supply across the planet. Subjects include the hydrological cycle, oceans, waves and tides, fisheries, water in the atmosphere, water and wildfire, landslides, river systems, groundwater and water quality, water management, and the future of water resources on a changing planet.

GEOL 184. Geological Field Trip. 2 Units
Term Typically Offered: Fall only

10-day field trip to a region of outstanding geology. Attendance at preliminary meetings is required. Analyzes and interpretation of geologic features is emphasized. Fee course.

Note: Student should consult the Geology Department during the semester before planning to take the course. May be taken more than once for credit.

Credit/No Credit
Fee course.
Field trip(s) may be required.

GEOL 188. Advanced Geologic Mapping. 6 Units
Prerequisite(s): GEOL 102, GEOL 103, GEOL 110A, GEOL 110B, GEOL 111A, GEOL 111B and instructor permission.
Term Typically Offered: Fall, Spring

Advanced principles/methods of geologic mapping, interpretation and geologic report writing for selected field areas in the western United States. Mapping techniques include the use of aerial photographs and global position systems. Consists of on-campus field preparation and off-campus fieldwork. Fee course.

Fee course.

GEOL 189. Geology Colloquium. 1 Unit
Term Typically Offered: Fall, Spring

Students will attend and participate in the joint Geology, Environmental Studies, Ecology weekly colloquium series and will be exposed to a variety of geologic and environmental topics. Speakers include those from CSUS, the USGS, government and professional organizations, and other academic institutions. Topics and speakers vary each semester.

Note: This course must be taken twice.

Credit/No Credit

GEOL 190A. Geology and Tectonic Development of California Seminar. 3 Units
Prerequisite(s): GEOL 5 or GEOL 10, GEOL 12; GEOL 110A recommended.
Term Typically Offered: Fall, Spring

Seminar in the geologic and tectonic development of California.

GEOL 193C. Engineering Geology. 3 Units
Prerequisite(s): GEOL 5 or GEOL 10 and GEOL 10L, GEOL 12, PHYS 5A or PHYS 11A, MATH 29 or high school trigonometry.
Term Typically Offered: Fall, Spring

Investigates the engineering properties of earth materials, the engineering considerations required to build safe and durable structures on and within the Earth, and problems associated with structures designed and built neglecting physical environmental conditions. Designed to introduce engineering concepts to students who have a competent grasp of general geologic principles and processes. Lecture 3 hours.

GEOL 195. Geology Internship. 1 - 3 Units
Term Typically Offered: Fall, Spring

Supervised unpaid work experience in government or industry. Supervision is provided by the faculty instructor and responsible officials in the work situations.

Note: Open to all upper division Geology majors with instructor permission. Number of units earned depends on number of hours worked.

Credit/No Credit

GEOL 196C. Introduction to Volcanoes Field Trip. 1 Unit
Prerequisite(s): GEOL 115, can be taken concurrently.
Term Typically Offered: Fall, Summer

3-day field trip to regional volcanic sites such as Lassen Volcanic National Park. Course emphasizes analysis and interpretation of volcanic features as well as the impact of volcanic hazards on humans and society. Attendance at preliminary meetings is required. Fee course.

Prerequisite: GEOL 115, can be taken concurrently
Credit/No Credit
Fee course.
Field trip(s) may be required.

GEOL 197. Advanced Laboratory Techniques for Geology. 1 - 3 Units
Prerequisite(s): Appropriate upper division courses and instructor permission.
Term Typically Offered: Fall, Spring

Supervised individual instruction on techniques applied in geology laboratories for advanced research in mineralogy, petrology, geochemistry, geophysics, and paleontology.

Credit/No Credit

GEOL 198A. Senior Research Preparation. 1 Unit
Prerequisite(s): Senior status and appropriate courses as determined by a Departmental faculty committee. The proposed project must be approved by a Department committee; instructor permission.
Term Typically Offered: Fall, Spring

Selection and design of an independent research project. A final written report is required and includes: research proposal, bibliography, and results of preliminary review of the literature. Student must choose a supervising instructor.
GEOL 198B. Senior Research Project. 2 Units  
Prerequisite(s): Senior status and appropriate courses as determined by a Departmental faculty committee. The proposed project must be approved by the Department faculty committee; instructor permission.  
Term Typically Offered: Fall, Spring  
Completion of an independent research project. A final written report is required. Progress reports may be required by the supervision instructor. Presentation of an oral report on the research project during the same semester is required. 

GEOL 199A. Beginning Special Problems. 1 - 3 Units  
Term Typically Offered: Fall, Spring  
Individual projects or special studies at a beginning level, including fieldwork, lab work, library study, or other learning activities.  
Note: Open only to students judged competent to carry on individual work. Credit/noncredit grading also available. 

GEOL 199B. Intermediate Special Problems. 1 - 3 Units  
Individual projects or special studies at an intermediate level, including fieldwork, lab work, library study, or other learning activities.  
Note: Open only to students judged competent to carry on individual work. Credit/noncredit grading also available. 

GEOL 199C. Advanced Special Problems. 1 - 3 Units  
Individual projects or special studies at an advanced level, including fieldwork, lab work, library study, or other learning activities.  
Note: Open only to students judged competent to carry on individual work. Credit/noncredit grading also available. 

GEOL 200. Graduate Research Methods Seminar. 3 Units  
Term Typically Offered: Fall, Spring  
Developing a research proposal, library and internet searches, seeking external funding, presentation graphics, and publication formats. Students will develop a research project in preparation for thesis requirement. Seminar three hours.  
Note: Graduate Writing Intensive (GWI). 

GEOL 201. Seminar in Petrology. 3 Units  
Prerequisite(s): GEOL 102, GEOL 103, graduate-level status in Geology, or instructor permission.  
Term Typically Offered: Fall, Spring  
Advanced study of petrology. Topics may include the origin and evolution of igneous/metamorphic/sedimentary rocks in different tectonic settings; application of advanced petrologic tools to explore current research questions including rock and mineral chemistry, optical analysis, geochronology, thermochronology.  
Note: This course requires one or more field trips. May be taken for credit multiple times if covering different topics. 
Field trip(s) may be required. 

GEOL 202. Aqueous Geochemistry. 3 Units  
Prerequisite(s): CHEM 1B; instructor permission.  
Term Typically Offered: Fall, Spring  

GEOL 204. Contaminant Hydrogeology. 3 Units  
Prerequisite(s): CHEM 1B and CHEM 6B or CHEM 20, GEOL 202.  
Term Typically Offered: Fall, Spring  
Contaminants and contaminant transport in near-surface environments. Fluid-sediment interaction, fluid partitioning, common geochemical reactions, stability and mobility of groundwater contaminants, multi-phase systems, sampling considerations and overview of analytical techniques. 

GEOL 208. Groundwater Modeling. 3 Units  
Prerequisite(s): GEOL 127, MATH 45.  
Term Typically Offered: Fall, Spring  
Computer modeling of groundwater systems using 2 and 3 dimensional numerical solutions and common software packages. Topics will include data acquisition, constructing a numerical model, model calibration, flow paths, particle tracking and model output. 

GEOL 212. Geologic Remote Imaging. 3 Units  
Prerequisite(s): PHYS 5B or PHYS 11B; GEOL 102, GEOL 110A; and proficiency using a personal computer.  
Term Typically Offered: Fall, Spring  
Use of remote imaging in geologic applications. Types of imagery, acquisition, production, processing, and interpretation are covered. 

GEOL 213. Seminar in Structural Geology and Tectonics. 3 Units  
Prerequisite(s): GEOL 110A, MATH 30, graduate-level status in geology, or instructor permission.  
Term Typically Offered: Fall, Spring  
Advanced treatment of deformation of the lithosphere of the Earth over short and long timescales. Topics may include structural analysis, tectonic geochemistry, field studies, geochronology, use of technical analytical software, and interpretation of geologic mapping; review of published literature, collection and analysis of data, and preparation of technical manuscript.  
Note: This course requires one or more field trips. May be repeated for credit if covering different topics. 
Field trip(s) may be required. 

GEOL 214. Advanced Volcanology. 3 Units  
Term Typically Offered: Fall, Spring  
Analyzes volcanic eruption processes. Interpretation of volcanic deposits in the evaluation of volcanic hazards, risk, eruption processes, and geologic history. Field trip. 
Field trip(s) may be required. 

GEOL 218. Seminar in Geophysics. 3 Units  
Prerequisite(s): PHYS 5B or PHYS 11C, GEOL 112, graduate-level status in geology, or instructor permission.  
Term Typically Offered: Fall, Spring  
Advanced study of geophysics. The focus of this course is the quantitative analysis of physical processes and the physical properties of the Earth at both local and global scale. Course may include field measurements in addition to analytical and numerical modeling. Topics covered in the course may include heat flow, seismology, gravity, magnetics, geodesy, plate tectonics, borehole techniques, and near surface exploration.  
Note: This course requires one or more field trips. May be taken for credit multiple times if covering different topics. 
Field trip(s) may be required.
GEOL 220. Seminar in Surficial Processes. 3 Units
Prerequisite(s): GEOL 120 or equivalent, graduate status in Geology, or instructor permission.
Term Typically Offered: Fall, Spring

Course explores the dynamics of geological and hydrologic processes operating at the earth's surface and the landscapes in which they interact. Topics may include hydrologic and geologic surface processes, system thresholds and responses, process linkages, problem solving, data generation and evaluation that characterize processes and the landscapes with which they interact.

Note: May be taken for credit multiple times if covering different topics.

GEOL 223. Seminar in Advanced Geochemistry. 3 Units
Prerequisite(s): CHEM 1A or equivalent, graduate-level status in Geology, or instructor permission.
Term Typically Offered: Fall, Spring

Advanced topics covering geochemistry on Earth and of Earth materials. Topics may include: thermodynamics and kinetics of geological environments, silicate and carbonate systems, major element geochemistry, trace and rare earth element geochemistry, stable and radiogenic isotopes; applications to studies of aqueous, pedogenic, marine, igneous, sedimentary, or metamorphic environments; analysis of geochemical aspects of contemporary resource, environmental, and paleoenvironmental problems.

Note: May be taken for credit multiple times if covering different topics.

GEOL 227. Seminar in Advanced Hydrogeology. 3 Units
Prerequisite(s): GEOL 127, graduate-level status in geology, or instructor permission.
Term Typically Offered: Fall, Spring

Advanced study of hydrogeology. Topics may include: water budgets, groundwater flow to wells, aquifer testing, fracture flow, dewatering, salt water intrusion, groundwater chemistry and dating, tracers, and contaminant transport and remediation.

Note: May be taken for credit multiple times if covering different topics.

GEOL 230. Seminar in Geology. 3 Units
Term Typically Offered: Fall, Spring

Reading, analysis and discussion of the geologic literature on selected topics in geology. Student presentations and reports are required.

Note: May be taken twice for credit.

GEOL 240. Advanced Special Topics in Geology. 3 Units
Prerequisite(s): Graduate-level status in geology and/or instructor permission.
Term Typically Offered: Fall, Spring

Advanced special topics in Geology that may include structural geology, volcanology, hydrogeology, engineering geology or other specialized topics selected to meet student demand or respond to industry trends in geology.

Note: May be taken for credit multiple times if covering different topics.

GEOL 275. Quantitative and Numerical Research Methods. 3 Units
Prerequisite(s): MATH 31
Term Typically Offered: Fall, Spring

Introduction to quantitative and numerical methods of solving geologic problems using high level programming.

GEOL 280. Seminar in Earth's Climate History. 3 Units
Prerequisite(s): Graduate-level status in geology and/or instructor permission.
Term Typically Offered: Fall, Spring

Seminar course on global climate change through Earth's geologic history. Topics may include the mechanisms of climate change, climate archives (how we determine Earth's climate history), the snow-ball earth hypothesis, Paleocene-Eocene Thermal Maximum, glacial/interglacial climate change, humans and climate change, and mitigation and adaptation to climate change.

Note: May be taken for credit multiple times if covering different topics.

GEOL 290. Regional Geology of the Western US. 3 Units
Prerequisite(s): GEOL 100, GEOL 102, GEOL 103 and GEOL 110A.
Term Typically Offered: Fall, Spring

Application of advanced geological concepts in tectonics, stratigraphy, sedimentology, petrology, and volcanism to the geologic evolution of the Western United States from Precambrian to present. Field trip. Course Fee.

Field trip(s) may be required.

GEOL 293. Engineering Geology. 3 Units
Prerequisite(s): GEOL 193C.
Term Typically Offered: Fall, Spring

Takes a geological approach to evaluating engineering issues associated with building with or on natural earthen materials. Rock and soil mechanics, slope stability, geophysical investigation of rock and soil properties.

Note: 150 minutes Lecture = 3 units.

GEOL 299. Special Problems in Geology. 1 - 4 Units
Prerequisite(s): Graduate-level status in geology, approval of project by a faculty sponsor and Department Chair; instructor permission.
Term Typically Offered: Fall, Spring

Graduate research. Independent research in geology that may include library research, short-term original research, technique development, fieldwork, or laboratory research. May include research toward thesis proposal. Culminating experience will be in the form of a written report, oral presentation, or scientific paper.

GEOL 500. Master's Thesis. 6 Units
Prerequisite(s): Advanced to candidacy and chair permission of his/her thesis committee.
Term Typically Offered: Fall, Spring

Completion of a thesis approved for the Master's degree. Should be taken in the final semester prior to the completion of all requirements for the degree.

GEOL 596. Comprehensive Examination. 0 Units
Term Typically Offered: Fall, Spring

A written comprehensive examination administered by a committee of three faculty members. Assesses the student's ability to integrate knowledge from core and elective courses, show critical and independent thinking, and demonstrate mastery of the subject matter. Required for the non-thesis option. Graded: CR/NC. May be retaken one time after 4 calendar months. Units: 0.
Credit/No Credit
BA in Earth Science

Units required for Major: 62-64

Program Description

The BA degree program is designed as a shorter, more flexible preparation for some geology jobs, earth science teaching in high school, and jobs such as park naturalist, environmentalist, geologic planning specialist, or in geology-related businesses. The BA degree can be used in dual-track majors combining geology with biological sciences, chemistry, physics, or engineering.

1 To help you complete your degree in a timely manner and not take more units than absolutely necessary, there are ways to use single courses to meet more than one requirement (overlap). For further information, please visit the General Education page (p. 1103).

Note: There is no way to list all possible overlaps so please consult with a professional advisor. The Academic Advising Center can be visited online (http://www.csus.edu/acad/), by phone (916) 278-1000, or email (advising@csus.edu).

2 Required in Major; also satisfies GE.

### BS in Geology

Units required for Major: 72

Total units required for BS: 120

### Program Description

The BS in Geology (General Geology) degree program is designed to prepare students for professional employment or advanced study in geology. The Geology program emphasizes a strong background in the major areas of geology including: mineralogy, petrology, stratigraphy, structural geology, field mapping, and report writing.
## Program Requirements

2 If not satisfied before entering Sacramento State, it may be satisfied in General Education Area C2 (Humanities). "C- or better required." The alternative methods for satisfying the Foreign Language Proficiency Requirement are described here: https://www.csus.edu/college/arts-letters/world-languages-literatures/foreign-language-requirement.html

BS in Geology (Hydrogeology)

Units required for Major: 72
Total units required for BS: 120

Program Description

The BS in Geology with a concentration in Hydrogeology is designed to prepare students for professional employment or further studies in hydrogeology and water resources. The program emphasizes the fundamentals of geology, including mineralogy/petrology, stratigraphy, structural geology, and field geology, then builds on this foundation with coursework focusing on the water cycle and related Earth processes.

Total Units 18

MS in Geology

Total units required for MS: 30

Program Description

The graduate program in Geology offers two tracks to a Master of Science degree in Geology: a thesis-based option in which students pursue a research project and a non-thesis option that culminates in a comprehensive examination. Students who successfully complete the program will upgrade their educational qualifications and be able to advance to doctoral programs or professional positions that require an in-depth knowledge of geologic topics such as tectonics, hydrogeology, environmental geology, and geologic hazards. The University’s location in the state capital provides direct access to many local, federal, and state agencies through internship and fieldwork opportunities.

Each student should plan their program according to their background, interests and objectives, in consultation with a faculty academic advisor. Students who are interested in pursuing the thesis-based option should contact potential advisors prior to application to the program. All students enter the program in the non-thesis option and those interested in a thesis must apply to switch to the thesis-based option with the agreement of a faculty advisor.

Graduate students who want to engage in teaching can request an appointment as a Graduate Teaching Associate. Graduate Teaching Associates have the opportunity to teach one to two lower division laboratory courses per semester and are paid at a rate commensurate with their teaching load.

All work toward the degree must be completed within a seven-year period. The general University requirements for graduate degrees are explained in the "Graduate Studies" section of this Catalog or visit the Geology Department's website (http://www.csus.edu/geology/).

Admission Requirements

Admission as a classified graduate student in Geology requires:
a degree in Geology, or 24 units of equivalent upper-division coursework in Geology which must have been passed with a grade of "C-" or better and includes:

These core undergraduate courses cannot be used as graduate electives by students who do not hold a degree in Geology or equivalent;

- a minimum 3.0 GPA in upper division Geology courses;
- three letters of recommendation from persons familiar with your academic record and professional capabilities, sent directly to the Department;
- a brief statement of interest, faculty sponsorship (for the thesis-based option), area of specialty and long-term goals;
- successful completion of two semesters of inorganic Chemistry with a lab (CHEM 1A and CHEM 1B);
- successful completion of two semesters of Physics with a lab (PHYS 11A and PHYS 11B or PHYS 5A and PHYS 5B); and
- successful completion of two semesters of Math (MATH 30 and MATH 31).

Students who have deficiencies in Admission Requirements that can be removed by specified additional preparation may be admitted with conditionally classified graduate status. Any deficiencies will be noted on a written response to the admission application. You must be admitted to the degree program before graduate level courses will count toward the degree. Students with questions about their qualifications for the program are encouraged to contact the Geology Department Graduate Program Coordinator.

**Admission Procedures**

All prospective classified graduate students, including Sacramento State graduates, must follow the application procedures specified by both the Geology Department and the Office of Graduate Studies. For more admissions information and application deadlines please visit the Office of Graduate Studies website (http://www.csus.edu/gradstudies/) and the Geology Department website (https://www.csus.edu/college/natural-sciences-mathematics/geology/).

Applications are accepted as long as space for new students exists. A decision regarding admission will be mailed to the applicant upon review of all application materials.

**Minimum Units and Grade Requirement for the Degree**

Units for the MS: 30

Minimum Cumulative GPA: 3.0

- Students must maintain an overall GPA of 3.0 or better in the Program. This means that students who earn a "C" grade in a course can count it towards advancement to candidacy (and count it towards graduation) as long as the overall cumulative GPA remains a 3.0 or better. No more than 6 units of "C" grade will be accepted for graduate credit.

**Advancement to Candidacy**

Each student must file an application for Advancement to Candidacy, indicating a proposed program of graduate study. This procedure should begin as soon as the classified graduate student has:

- removed any deficiencies in admission requirements;
- completed at least 12 units in the graduate program with a minimum 3.0 GPA, including at least two courses at the 200-level; Students must maintain an overall GPA of 3.0 or better in the Program. This means that students who earn a "C" grade in a course can count it towards advancement to candidacy (and count it towards graduation) as long as the overall cumulative GPA remains a 3.0 or better. No more than 6 units of "C" grade will be accepted for graduate credit.
- obtained the graduate committee's acceptance of the thesis proposal (for the thesis-based option); and
- taken the Graduate Writing Intensive (GWI) course in their discipline within the first two semesters of coursework at California State University, Sacramento.

Advancement to Candidacy forms are available on the Office of Graduate Studies website. The student must fill out the form after planning a degree program in consultation with their faculty advisor. After approval by the Geology Department Graduate Committee, the completed form is returned to the Office of Graduate Studies for approval.

**Graduate electives (15-21 Units)**

Select 15-21 units of the following:

- GEOL 201 SEMINAR IN PETROLOGY
- GEOL 208 Groundwater Modeling
- GEOL 212 Geologic Remote Imaging
- GEOL 213 Seminar in Structural Geology and Tectonics
- GEOL 218 Seminar in Geophysics
- GEOL 220 Seminar in Surficial Processes
- GEOL 223 Seminar in Advanced Geochemistry
- GEOL 227 Seminar in Advanced Hydrogeology
- GEOL 230 Seminar In Geology
- GEOL 240 Advanced Special Topics in Geology
- GEOL 280 SEMINAR IN EARTH'S CLIMATE HISTORY
- GEOL 299 Special Problems in Geology

**Culminating Requirements (0-6 Units)**

Select one of the following plans:

- **Plan A**
  - GEOL 500 Master's Thesis
- **Plan B**
GEOL 596

Comprehensive Examination

Total Units 30-36

Courses taken to meet the graduate core requirement will not count as elective courses. Elective courses will be selected with prior approval of the student's faculty advisor. In addition to 200-level courses, these may also include up to 6 units of approved technical electives (but not required courses) from the undergraduate curriculum. GEOL 299 requires prior approval of the Graduate Coordinator, and may constitute no more than 6 units toward the graduate degree.

Mathematics and Statistics

College of Natural Sciences and Mathematics

Program Description

In today’s highly technological society, the study of Mathematics takes on an increasingly important role. The Sacramento State Mathematics Department designs its courses with the goal of providing students with the mathematical concepts appropriate to the student’s field.

The program consists of sequences of courses that lead to a Bachelor of Arts with a major in Mathematics, with emphasis in Pure Mathematics, Applied Mathematics, Statistics, or a Teacher Preparation Program. A minor in Mathematics or Statistics and a Master of Arts in Mathematics is also offered.

Degree Programs

Minor in Mathematics (p. 896)

Minor in Statistics (p. 897)

BA in Mathematics (p. 891)

Integrated Mathematics Major/Single Subject Credential Program (p. 893)

MA in Mathematics (p. 895)

Special Features

- The study of mathematics at Sacramento State has several strong advantages. The flexibility of the major gives students enough freedom to mold their degree along their particular interest.
- An excellent computer facility gives mathematics students easy access to the campus computer resources.
- Currently there is a demand for majors in mathematics with training in applied mathematics and statistics. Program graduates have had success in finding employment in public and private sectors.
- Since there is presently a need for high school mathematics teachers, some majors pursue a secondary teaching career. Graduate students in mathematics are finding opportunities for public and private employment in jobs requiring more advanced training in mathematics and statistics. Sacramento State Master’s Degree graduates now teach at community colleges throughout the state. Upper division majors may check with the mathematics administrative support coordinator on the possibility of applying for paid positions as student assistants.
- Student assistants work from 10-20 hours per week in math-related duties on campus.

Note: Students interested in a major or minor in mathematics should contact the Department secretary for an advising appointment with a mathematics advisor.

Career Possibilities

Mathematics Teacher · Mathematician · Encryption Analyst · Quantitative Analyst · Engineering Analyst · Systems Analyst · Operations Analyst · Actuary · Risk Analyst · Image Scientist · Technical Writer · Statisticians involved in: Surveying/Polling, Biology/Agriculture, Business/Economics, Physical Sciences/Engineering

MATH 1. Mathematical Reasoning. 3 Units
General Education Area/Graduation Requirement: Math Concepts & Quantitative Reasoning (B4)
Term Typically Offered: Fall, Spring, Summer

Recommended for students whose majors do not include a specific mathematics requirement. Objectives are to show some of the essence and quality of mathematics, and to enhance precision in the evaluation and expression of ideas, thereby developing a student's quantitative reasoning skills. Designed to give students an understanding of some of the vocabulary, methods, and reasoning of mathematics with a focus on ideas.

MATH 10. Essentials of Algebra. 3 Units
Term Typically Offered: Fall, Spring, Summer

Prepares students for courses requiring fundamental algebra skills. Topics include: review of basic algebra; scientific notation, rounding, and percents; factoring; exponents; linear equations and inequalities with applications; quadratic equations with applications; graphing with applications; absolute value equations and inequalities; systems of linear equations and inequalities; and an introduction to exponential and logarithmic expressions.

MATH 12. Algebra for STEM Courses. 4 Units
Term Typically Offered: Fall, Spring, Summer

Prepares students for Precalculus and other higher math courses requiring intermediate algebra. Topics include: linear equations and inequalities, absolute value equations and inequalities, systems of linear equations, quadratic equations, polynomial expressions and equations, rational expressions and equations, roots and radicals, and exponential & logarithmic properties and equations.

Note: Students who have received a C- or higher in a college level precalculus or calculus course are not eligible to enroll for credit without the permission of the instructor.

MATH 15H. Honors Mathematical Reasoning. 3 Units
Prerequisite(s): Open only to Honors students.
General Education Area/Graduation Requirement: Math Concepts & Quantitative Reasoning (B4)
Term Typically Offered: Fall, Spring

Introduction to the composition and interpretation of mathematical ideas and to the mathematical reasoning necessary to derive results in a variety of mathematical topics. Emphasis on developing concepts and analyzing results.

MATH 17. An Introduction to Exploration, Conjecture, and Proof in Mathematics. 3 Units
Prerequisite(s): Score of 46 or higher on ALEKS PPL exam or MATH 10
General Education Area/Graduation Requirement: Math Concepts & Quantitative Reasoning (B4)
Term Typically Offered: Fall, Spring

Prepares students for MATH 107A and MATH 107B. Students will explore mathematical patterns and relations, formulate conjectures, and prove their conjectures. Topics from number theory, probability and statistics, and geometry.

MATH 24. Modern Business Mathematics. 3 Units
Prerequisite(s): Score of 51 or higher on ALEKS PPL exam or MATH 10
General Education Area/Graduation Requirement: Math Concepts & Quantitative Reasoning (B4)
Term Typically Offered: Fall, Spring, Summer

Mathematics for business world, including functions, math of finance, linear programming and rates of change. Applications to economics and business will be emphasized throughout.

MATH 26A. Calculus I for the Social and Life Sciences. 3 Units
Prerequisite(s): Score of 61 or higher on ALEKS PPL exam or MATH 12
General Education Area/Graduation Requirement: Math Concepts & Quantitative Reasoning (B4)
Term Typically Offered: Fall, Spring, Summer

Limits, differentiation with applications, integration and applications in the Social Sciences and Life Sciences.

MATH 26B. Calculus II for the Social and Life Sciences. 3 Units
Prerequisite(s): MATH 26A or appropriate high school based AP credit.
General Education Area/Graduation Requirement: Math Concepts & Quantitative Reasoning (B4)
Term Typically Offered: Fall, Spring

Continuation of MATH 26A, integration and applications to the Social Sciences and Life Sciences. Multi-variate analysis including partial differentiation and maximization subject to constraints; elementary differential equations; sequences and series. Calculus of the trigonometric functions as time allows.

Note: Not open to students already having credit for MATH 31 or equivalent.

MATH 29. Pre-Calculus Mathematics. 4 Units
Prerequisite(s): Score of 61 or higher on ALEKS PPL exam or MATH 12
General Education Area/Graduation Requirement: Math Concepts & Quantitative Reasoning (B4)
Term Typically Offered: Fall, Spring, Summer

Designed to prepare students for calculus. Topics: trigonometry, points and lines in the Cartesian plane; lines and planes in space; transformation of coordinates; the conics; graphs of algebraic relations; the elementary transcendental functions.

MATH 29A. Pre-Calculus Mathematics A. 2 Units
Prerequisite(s): MATH 12
Term Typically Offered: Fall, Spring, Summer

First semester of a two semester course that is designed to prepare students for calculus. Topics: functions and graphs, polynomial functions, rational functions and applications. Lecture two hours.
MATH 29B. Pre-Calculus Mathematics B. 2 Units
Prerequisite(s): MATH 29A.
Corequisite(s): MATH 29M.
Term Typically Offered: Fall, Spring, Summer

Second semester of a two semester course that is designed to prepare students for calculus. Topics: exponential and logarithmic functions, trigonometric functions, analytic geometry, and applications. Lecture two hours.

MATH 29L. Lab for Pre-Calculus Math A. 1 Unit
Corequisite(s): MATH 29B.
Term Typically Offered: Fall, Spring

Workshop designed to deepen the understanding of pre-calculus developed in MATH 29A.
Note: May be taken for workload credit toward establishing full-time enrollment status, but is not applicable to the baccalaureate degree. Laboratory

MATH 29M. Lab for Pre-Calculus Math B. 1 Unit
Corequisite(s): MATH 29B.
Term Typically Offered: Fall, Spring

Workshop designed to deepen the understanding of pre-calculus developed in MATH 29B.
Note: May be taken for workload credit toward establishing full-time enrollment status, but is not applicable to the baccalaureate degree. Laboratory

MATH 30. Calculus I. 4 Units
Prerequisite(s): Score of 76 or higher on ALEKS PPL exam or MATH 29 or MATH 29B
General Education Area/Graduation Requirement: Math Concepts & Quantitative Reasoning (B4)
Term Typically Offered: Fall, Spring, Summer

Functions and their graphs; limits; the derivative and some of its applications; trigonometric and hyperbolic functions and their inverses; the integral; the fundamental theorem; some applications of the integral.

MATH 30L. Laboratory for First Semester Calculus. 1 Unit
Corequisite(s): Enrollment in a designated section of MATH 30.
Term Typically Offered: Fall, Spring

Workshop designed to deepen the understanding of calculus developed in MATH 30.
Note: May be taken for workload credit toward establishing full-time enrollment status, but is not applicable to the baccalaureate degree. Laboratory

Credit/No Credit

MATH 31. Calculus II. 4 Units
Prerequisite(s): MATH 30 or appropriate high school based AP credit.
General Education Area/Graduation Requirement: Math Concepts & Quantitative Reasoning (B4)
Term Typically Offered: Fall, Spring, Summer

MATH 31L. Laboratory for Second Semester Calculus. 1 Unit
Corequisite(s): Enrollment in a designated section of MATH 31.
Term Typically Offered: Fall, Spring, Summer

Workshop designed to deepen the understanding of calculus developed in MATH 31.
Note: May be taken for workload credit toward establishing full-time enrollment status, but is not applicable to the baccalaureate degree. Laboratory

Credit/No Credit

MATH 32. Calculus III. 4 Units
Prerequisite(s): MATH 31.
Term Typically Offered: Fall, Spring, Summer

Continuation of Calculus II. Algebra and calculus of vectors; functions of several variables; partial differentiation; multiple integration; vector analysis.

MATH 35. Introduction to Linear Algebra. 3 Units
Prerequisite(s): MATH 30 or a score of 4 or higher on the AP Calculus AB exam or instructor approval.
General Education Area/Graduation Requirement: Math Concepts & Quantitative Reasoning (B4)
Term Typically Offered: Fall, Spring

Careful development of matrices, systems of equations, determinants, vector spaces, linear transformations, orthogonality, real and complex eigenvalues; R3 viewed as a vector space with generalization to Rn.

MATH 45. Differential Equations for Science and Engineering. 3 Units
Prerequisite(s): MATH 31.
Term Typically Offered: Fall, Spring, Summer

First order differential equations, second order differential equations with constant coefficients. Laplace transforms, small systems of linear differential equations, numerical methods, introduction to second order differential equations with variable coefficients.

MATH 64. Mathematical Programming. 3 Units
Prerequisite(s): MATH 30 or a score of 4 or higher on the AP Calculus AB exam or instructor approval.
Term Typically Offered: Fall, Spring

Computational strategies in mathematical problem solving; implementation of mathematical algorithms; programming concepts including variables, functions, data structures, and control flow; data visualization, typesetting, and report generation.

MATH 96C. Academic Strategies for Math 10 - NSM:Mathematics and Statistics. 1 Unit
Corequisite(s): Math 10
Term Typically Offered: Fall, Spring

Supplemental instruction for Math 10 focused on developing study skills and effective learning strategies.
Credit/No Credit

MATH 96D. Academic Strategies for Math 24 - NSM:Mathematics and Statistics. 1 Unit
Corequisite(s): MATH 24
Term Typically Offered: Fall, Spring, Summer

Supplemental instruction for Math 24 focused on developing study skills and effective learning strategies.
Credit/No Credit
MATH 96E.  Elem Math Content Adv Viewpoin.  1 Unit
Term Typically Offered: Fall, Spring, Summer

MATH 96E is a 1-unit, 1-week early start course for baccalaureate credit designed to prepare students for fall GE area B4. Working independently and collaboratively, students will use an inquiry-based approach to learning through research, reflection, and engagement with real-world scenarios. Students will develop various academic literacies in order to understand the conventions of quantitative reasoning required for success in a college setting.

Cross listed: ALS 96

Credit/No Credit

MATH 96F.  Mathematical Programming.  3 Units
Prerequisite(s): MATH 30 or appropriate high school based AP credit
Term Typically Offered: Fall, Spring

Computational strategies in mathematical problem solving; implementation of mathematical algorithms; programming concepts including variables, control flow, data structures, and functions; data visualization, typesetting, and report generation.

MATH 99.  Special Problems.  1 - 6 Units
Term Typically Offered: Fall, Spring

Individual projects or directed reading. Permits a student to pursue study and research in an area not otherwise available through the regular curriculum.

Note: Open only to students who appear competent to carry on individual work; admission requires the approval of the faculty member under whom individual work is to be conducted, and approval of the advisor and the Department Chair.

Credit/No Credit

MATH 100.  Applied Linear Algebra.  3 Units
Prerequisite(s): MATH 26B or MATH 31.
Term Typically Offered: Fall, Spring

Linear algebra and its elementary applications. Topics: Matrix algebra; simultaneous linear equations; linear dependence and vector spaces; rank and inverses; determinants; numerical solution of simultaneous linear equations; linear transformations; eigenvalues and eigenvectors; unitary and similarity transformations; quadratic forms.

Note: May not be taken for credit toward a mathematics major.

MATH 101.  Combinatorics.  3 Units
Prerequisite(s): MATH 31
Term Typically Offered: Spring only

Introduction to the art of counting. The focus will be on actually listing the objects being counted in small cases and using the knowledge gained in working with small cases to build toward general principles. Sum and product principles, models of counting, permutations and combinations, equivalence relations and partitions, inclusion-exclusion principle, recurrence relations, and generating functions.

MATH 102.  Number Theory.  3 Units
Prerequisite(s): MATH 31
Term Typically Offered: Fall, Spring

Theory of divisibility; some number theoretical functions; congruencies (linear and quadratic); some Diophantine equations. Simple continued fractions.

MATH 103.  Vector Analysis.  3 Units
Prerequisite(s): MATH 32.
Term Typically Offered: Spring only

Vector and scalar fields, integral theorems, orthogonal curvilinear coordinates, vector spaces and linear transformations, applications to physical fields and operators.

MATH 105A.  Advanced Mathematics for Science and Engineering I.  4 Units
Prerequisite(s): MATH 32, MATH 45.
Term Typically Offered: Fall only

MATH 105B.  Advanced Mathematics for Science and Engineering II.  4 Units
Prerequisite(s): MATH 105A.
Term Typically Offered: Spring only

Partial differential equations continued, complex function theory and its applications.

MATH 107A.  Fundamental Mathematical Concepts.  3 Units
Prerequisite(s): MATH 17, MATH 107B, and CHDV 30 or CHDV 35.
Term Typically Offered: Fall, Spring

First half of a one-year course in the structure of the real number system and its sub-systems and in the basic properties and concepts of geometry. Topics will include: definitions and properties of the arithmetic relations and operations for the natural numbers, whole numbers, integers.

Note: May not be taken for credit toward a mathematics major or minor.

MATH 107B.  Fundamental Mathematical Concepts.  3 Units
Prerequisite(s): MATH 107A.
Term Typically Offered: Fall, Spring

Continuation of MATH 107A. Topics will include: rational numbers, real numbers, measurement, Euclidean Geometry.

Note: May not be taken for credit toward a mathematics major or minor.

MATH 107C.  Elementary Mathematics and the Learning Process.  3 Units
Prerequisite(s): MATH 17, MATH 107A or MATH 107B, and CHDV 30 or CHDV 35.
Term Typically Offered: Fall, Spring

Students will build on their understanding of material of Math 17, Math 107A/B by deepening their understanding of the concepts taught in these courses. This will be done by examining these concepts in relationship to theories of learning and development. Students will examine mathematical concepts related to K-8 with respect to the treatment of reasoning, communication, and the perspective of cognitive and social constructivism; and throughout the course will consider the question of “What is mathematics?” and “How is mathematics learned?”
MATH 108. Introduction to Formal Mathematics. 3 Units
Prerequisite(s): MATH 31, MATH 35.
Term Typically Offered: Fall, Spring

Logic of mathematical proof, set theory, relations, functions. Examples and applications from set cardinality, algebra, and analysis.

MATH 110A. Modern Algebra. 3 Units
Prerequisite(s): MATH 108.
Term Typically Offered: Fall, Spring

First half of a one-year introductory course in algebraic concepts. Topics include: groups, subgroups, properties of groups, permutation groups, factor groups, homomorphism theorems.

MATH 110B. Modern Algebra. 3 Units
Prerequisite(s): MATH 110A.
Term Typically Offered: Fall, Spring

Continuation of MATH 110A.
Note: Topics include

MATH 117. Linear Algebra. 3 Units
Prerequisite(s): MATH 110A.
Term Typically Offered: Fall, Spring

Abstract linear spaces and linear transformations; invariant subspaces; canonical forms.

MATH 121. College Geometry. 3 Units
Prerequisite(s): MATH 31; MATH 32 or MATH 35.
Term Typically Offered: Fall, Spring

Study of the axioms and theorems of Euclidean geometry. A comparison of several geometry axiom systems and their theorems, including those of some non-Euclidean and finite geometries.

MATH 130A. Functions of a Real Variable. 3 Units
Prerequisite(s): MATH 32 and MATH 108.
Term Typically Offered: Fall, Spring

First half of a one-year upper division course in functions of a real variable. The first semester will consist of a rigorous development of the theory of real-valued sequences and continuity and differentiation for functions of one real variable.

MATH 130B. Functions of a Real Variable. 3 Units
Prerequisite(s): MATH 130A.
Term Typically Offered: Fall, Spring

Continuation of MATH 130A. This semester will be devoted to a rigorous development of the theory of Riemann integration, infinite series, and sequences and series of functions.

MATH 134. Functions of a Complex Variable and Applications. 3 Units
Prerequisite(s): MATH 32.
Term Typically Offered: Spring only

Complex plane; analytic functions; integration and Cauchy’s Theorem; sequences and series; residue calculus; applications to potential theory; Fourier and Laplace transforms.

MATH 150. Introduction to Numerical Analysis. 3 Units
Prerequisite(s): MATH 31
Term Typically Offered: Spring only

Numerical solutions of algebraic and transcendental equations; interpolation, inverse interpolation, finite differences, cubic splines, and applications; numerical differentiation and integration; direct and iterative numerical solutions of linear systems; discrete and continuous least squares approximation.

MATH 161. Mathematical Logic. 3 Units
Prerequisite(s): MATH 108.
Term Typically Offered: Fall, Spring

Advanced study of logic with special application to mathematics.

MATH 162. Set Theory. 3 Units
Prerequisite(s): MATH 108.
Term Typically Offered: Fall only

Axiomatic study of set theory. Topics usually considered include: relations and functions; set theoretical equivalence; finite and infinite sets; cardinal arithmetic; ordinal numbers and transfinite induction; variants of the Axiom of Choice.

MATH 170. Linear Programming. 3 Units
Prerequisite(s): MATH 31; MATH 35 or MATH 100.
Term Typically Offered: Fall only

Theory of linear programming, duality, simplex method, integer programming, applications.

MATH 190. History Of Mathematics. 3 Units
Prerequisite(s): MATH 31 and upper division status in mathematics.
Term Typically Offered: Fall, Spring

Study of the development of mathematical ideas and techniques and their impact on the general course of the history of western civilization.

MATH 193. Capstone Course for the Teaching Credential Candidate. 3 Units
Prerequisite(s): Successful completion of at least five of the following: MATH 102, MATH 110A, MATH 110B, MATH 121, MATH 130A, MATH 130B or MATH 190; MATH 110A or MATH 130A may be taken concurrently.
Term Typically Offered: Fall, Spring

Reviews the major themes presented in the upper division program in Mathematics, and relates the themes to junior high school and high school curriculum. Required for all subject matter students.
Note: Not accepted for credit for non-Teaching Credential students.

MATH 196K. Introduction to Differential Geometry. 3 Units
Prerequisite(s): MATH 32, and MATH 35 or instructor’s permission
Term Typically Offered: Spring only

Calculus methods are applied to the study of curves and surfaces in three dimensional space. After an introduction to the geometry of curves (curvature, torsion, and Frenet’s formulas), the course explores the geometry of surfaces. Some of the geometrical properties of a surface that will be investigated are its first and second fundamental forms, its various curvatures (normal, principal, mean, and Gaussian curvatures), and its geodesic curves.
MATH 198. Seminar for Mathematics Tutors. 2 Units
Prerequisite(s): Students must be working as tutors in a campus-based program.
Term Typically Offered: Fall, Spring

Supports Sacramento State students who are working in tutorial and related roles in mathematics programs on campus. Focus on questioning as a fundamental strategy for teaching mathematics, on classroom observation, and on communication among mathematics instructors in support of effective teaching and learning.
Note: May be repeated up to two times for credit.
Credit/No Credit

MATH 199. Special Problems. 1 - 6 Units
Term Typically Offered: Fall, Spring

Individual projects or directed reading. Open only to those students who appear competent to carry on individual work. Admission to this course requires the approval of the faculty member under whom the individual work is to be conducted, in addition to the approval of the advisor and the Department Chair.
Credit/No Credit

MATH 202. Theory of Numbers. 3 Units
Prerequisite(s): Math 110A or equivalent; Math 110B is recommended.
Term Typically Offered: Fall, Spring

Divisibility properties of the integers, primes, modular arithmetic, Chinese Remainder Theorem, quadratic reciprocity and quadratic forms, arithmetic functions, the Möbius inversion formula, and Diophantine equations. Possible additional topics include elliptic curves, algebraic numbers, primes in arithmetic progressions, the geometry of numbers, p-adic numbers, primality tests, modular forms, and encryption.

MATH 210A. Algebraic Structures. 3 Units
Prerequisite(s): MATH 110B.
Term Typically Offered: Fall only

Graduate level course in algebraic structures. Topics include group theory including permutation groups, subgroups, homomorphisms, quotient groups, group actions, Sylow theorems and the theory of finite Abelian groups, as well as an introduction to ring theory including ideals, quotient rings, and integral domains.

MATH 210B. Algebraic Structures. 3 Units
Prerequisite(s): MATH 210A.
Term Typically Offered: Fall, Spring

Fields; vector spaces; Galois theory.

MATH 220A. Topology. 3 Units
Prerequisite(s): MATH 130B.
Term Typically Offered: Fall, Spring

Point set topology, continuity, compactness, connectedness.

MATH 220B. Topics In Topology. 3 Units
Prerequisite(s): MATH 220A.
Term Typically Offered: Fall, Spring

Continuation of MATH 220A with topics selected from: General topology, Geometric Topology, Continuum Theory, Homology Theory, Homotopy Theory, Topological Dynamics.
Note: May be taken twice with approval of the graduate coordinator.

MATH 230A. Real Analysis. 3 Units
Prerequisite(s): MATH 130B.
Term Typically Offered: Fall, Spring

Metric topology; the theory of the derivative; measure theory.

MATH 230B. Real Analysis. 3 Units
Prerequisite(s): MATH 230A.
Term Typically Offered: Fall, Spring

Continuation of MATH 230A, with topics selected from: Theory of the integral, including Riemann, Riemann Stieltjes, and Lebesgue integrals.
Note: May be taken twice with approval of the graduate coordinator.

MATH 234A. Complex Analysis. 3 Units
Prerequisite(s): MATH 130B; MATH 105B or MATH 134 is recommended.
Term Typically Offered: Fall, Spring

Complex numbers, complex functions, analytic functions, complex integration, harmonic functions.

MATH 234B. Topics in Complex Analysis. 3 Units
Prerequisite(s): MATH 234A.
Term Typically Offered: Fall, Spring

Continuation of MATH 234A with topics selected from: Partial Fractions and Infinite Products, Entire Functions, Riemann Zeta Function, Normal Families, Riemann Mapping Theorem, Conformal Mapping of Polygons, Dirichlet Problem, Analytic Continuation.
Note: May be taken twice with approval of the graduate coordinator.

MATH 241A. Methods of Applied Mathematics. 3 Units
Prerequisite(s): MATH 134 recommended.
Term Typically Offered: Fall, Spring

Note: May be repeated for credit provided topic is not repeated.

MATH 241B. Topics in Applied Mathematics. 3 Units
Prerequisite(s): MATH 241A.
Term Typically Offered: Fall, Spring

Continuation of MATH 241A with topics: Calculus of Variations, Functional Analysis, Dynamical Systems, Integral Equations, Sobolev Spaces, Fourier Analysis, Potential Theory, and Optimal Control Theory.
Note: May be taken twice with approval of the graduate coordinator.

MATH 248. Lie Theory. 3 Units
Prerequisite(s): Math 110A and Math 130A, or consent of instructor.
Term Typically Offered: Fall, Spring

Introduction to Lie algebras, Lie groups, and their connection. Emphasis is placed on examples given by matrices. Representation theory of Lie algebras or groups. Additional topics may include: applications to physics, the Baker-Campbell-Hausdorff Formula, one-parameter subgroups, root systems, the structure and classification of simple Lie algebras, and the topology of Lie groups.
This class will cover divisibility properties of the integers, primes and primality tests, modular arithmetic, Chinese Remainder Theorem, quadratic reciprocity and quadratic forms, arithmetic functions, the Mobius inversion formula, and Diophantine equations. Possible additional topics include elliptic curves, algebraic numbers, primes in arithmetic progressions, the geometry of numbers and encryption.

MATH 296C. Lie Theory. 3 Units
Prerequisite(s): Math 110A and Math 130A, or consent of instructor.
Term Typically Offered: Fall, Spring

The course gives a basic introduction to Lie algebras and their connections to Lie groups. Emphasis will be on examples given by matrices. Beyond an introduction to Lie algebras and groups, possible specific topics are: the classification and construction of simple Lie algebras; ADE classification; universal enveloping algebras; semi-simple Lie algebras and their representation theory; Lie group representations; subgroups and subalgebras; one-parameter subgroups; and the exponential map.

MATH 299. Special Problems. 1 - 6 Units
Term Typically Offered: Fall, Spring

Any properly qualified student who wishes to pursue a problem may do so if the proposed subject is acceptable to the supervising instructor and to the student's advisor. Credit/No Credit

MATH 316. The Psychology of Mathematics Instruction. 2 Units
Prerequisite(s): Admission to the Mathematics Blended Program.
Term Typically Offered: Fall only

A survey course for students in the Blended Program in Mathematics that relates broad areas of educational psychology and theories of learning to instruction in the secondary mathematics classroom. The focus is on practical applications of theories through the design of lesson and unit plans. Students will design learning activities for diverse classes of learners, including English Language Learners, and build and refine assessment plans that include formative assessments. Lecture two hours.

MATH 371A. Schools and Community A. 2 Units
Corequisite(s): Enrollment in EDTE 470A.
Term Typically Offered: Fall, Spring

The first of a two-part sequence supporting student teachers in the Mathematics Blended Program. Focus is on strategies for secondary mathematics instruction, the process of reflection on teaching, communication among mathematics teachers in support of effective teaching and learning, strategies for engagement, questioning, creating a safe classroom environment, classroom management, assessment, and familiarity with school and community resources. Emphasis on issues related to English Language Learners, special needs students, and intervention strategies. Seminar two hours. Credit/No Credit

MATH 371B. Schools and Community B. 2 Units
Corequisite(s): Enrollment in EDTE 470B.
Term Typically Offered: Fall, Spring

The second of a two-part sequence supporting student teachers in the Mathematics Blended Program. Focus is on strategies for secondary mathematics instruction, the process of reflection on teaching, communication among mathematics teachers in support of effective teaching and learning, strategies for engagement, questioning, creating a safe classroom environment, classroom management, assessment, and familiarity with school and community resources. Emphasis on issues related to English Language Learners, special needs students, and intervention strategies. Seminar two hours. Credit/No Credit

MATH 500. Culminating Experience. 1 - 3 Units
Prerequisite(s): Advanced to candidacy and permission of the graduate coordinator.
Term Typically Offered: Fall, Spring

Directed reading programs for master’s candidates preparing for written comprehensive examinations.

STAT 1. Introduction to Statistics. 3 Units
Prerequisite(s): Math 10 or a score of 51 or higher on a proctored ALEKS PPL exam.
General Education Area/Graduation Requirement: Math Concepts & Quantitative Reasoning (B4)
Term Typically Offered: Fall, Spring

Descriptive statistics, basic concepts of probability and sampling with the aim of introducing fundamental notions and techniques of statistical inference.

STAT 10A. Introductory Statistics with Developmental Mathematics. 3 Units
Term Typically Offered: Fall, Spring, Summer

Prepares students for STAT 10B that requires background in data analysis process, descriptive statistics and the concept of randomness. Topics include: Summarizing the data distribution graphically and numerically; reasoning about bivariate numerical data; linear correlation and regression; linear, quadratic and exponential functions as a way of modeling a correspondence between two variables; reasoning about bivariate categorical data; basic concepts of probability and the law of large numbers; conditional probability; discrete random variables; binomial distribution; and an introduction to continuous random variables. Lecture three hours.
STAT 50. Introduction to Probability and Statistics. 4 Units
Prerequisite(s): MATH 26A, MATH 30, or appropriate high school based AP credit.
General Education Area/Graduation Requirement: Math Concepts & Quantitative Reasoning (B4)
Term Typically Offered: Fall, Spring, Summer

Sample spaces, combinatorics, and random variables. Density and distribution functions. Expectation, variance, and covariance. The binomial, uniform, poisson, negative binomial, hypergeometric, exponential, gamma, beta, and normal distributions. Sampling distributions, estimation, and hypothesis tests. Students are given periodic writing assignments which encourage them to think through concepts of the course.

STAT 96. Experimental Offerings in Statistics. 1 - 6 Units
Term Typically Offered: Fall, Spring

When there is a demand from a sufficient number of qualified students, one of the staff will conduct a seminar on some topic in statistics.

STAT 103. Intermediate Statistics. 3 Units
Prerequisite(s): STAT 50 or instructor consent
Term Typically Offered: Spring only – even years

STAT 115A. Introduction to Probability Theory. 3 Units
Prerequisite(s): MATH 31 and either STAT 1 or STAT 50
Term Typically Offered: Fall only

Probability axioms, discrete and continuous random variables, functions of random variables, joint densities, expectation, moment generating functions. Chebyshov’s inequality, transformations, weak law of large numbers, central limit theorem.

STAT 115B. Introduction to Mathematical Statistics. 3 Units
Prerequisite(s): STAT 115A.
Term Typically Offered: Spring only

Point Estimation, interval estimation, hypothesis testing, the multivariate normal distribution, non-parametric tests.

STAT 128. Statistical Computing. 3 Units
Prerequisite(s): (STAT 1 or STAT 50) and (MATH 26A or MATH 30) or consent of the instructor.

Computer methods for accessing, transforming, summarizing, graphing and making statistical inferences from data; focus is on command-line statistical software, but menu-driven software may be introduced; application of computer methods to solve problems selected from the areas of modeling, simulation, inference and statistical learning.

STAT 129. Analyzing and Processing Big Data. 3 Units
Prerequisite(s): (STAT 1 or STAT 50) and (MATH 26A or MATH 30) and (STAT 128 or CSC 20), or consent of the instructor.
Term Typically Offered: Fall, Spring

Statistical analysis of large, complex data sets. Topics include memory efficient data processing, the split-apply-combine strategy, rewriting programs for scalability, handling complex data formats, and applications such as statistical learning, dimension reduction, and efficient data representation. Students will access data and run code on remote servers.

STAT 155. Introduction to Techniques of Operations Research. 3 Units
Prerequisite(s): MATH 31; STAT 50, STAT 103, or STAT 115A; MATH 31 may be taken concurrently.
Term Typically Offered: Spring only – odd years

Formulation and analysis of mathematical models with emphasis on real systems applications. Introduction to Queueing theory and Markov Processes for application.

STAT 196J. Statistical Computing. 3 Units
Prerequisite(s): STAT 1 or STAT 50, and MATH 26A or MATH 30
Term Typically Offered: Fall only

Computer methods for accessing, transforming, summarizing, graphing, and making statistical inferences from data. Both a command-line statistical software package such as R and menu-driven package such as SAS will be used. Students will learn to apply computer methods to solve problems selected from the areas of modeling, simulation, inference and statistical learning. The intent of this course is to provide students with the software skills needed for statistical work in industry or academia.

STAT 196L. Linear Models. 3 Units
Prerequisite(s): (Stat 1 or Stat 50) and (Math 35 or Math 100); an introductory programming course such as Math 64 or Stat 128 is recommended.
Term Typically Offered: Fall, Spring

Practical statistical modeling of data using professional-grade statistical software. Simple and multiple linear regression; analysis of variance; logistic regression; variable transformation; variable selection; model selection; residual analysis.

STAT 199. Special Problems. 1 - 6 Units
Term Typically Offered: Fall, Spring

Individual projects or directed reading. Open only to students who appear competent to carry on individual work. Admission to this course requires approval of the instructor in addition to the approval of the advisor and the Department Chair. Credit/No Credit

STAT 215A. Introduction to Mathematical Statistics. 3 Units
Prerequisite(s): STAT 115A, STAT 115B; MATH 134 is recommended.
Term Typically Offered: Fall, Spring

Probability measure, conditional probability and independence, random variables, characteristic and moment-generating functions, modes of convergence.

STAT 215B. Topics in Introduction to Mathematical Statistics. 3 Units
Prerequisite(s): STAT 215A.
Term Typically Offered: Fall, Spring

Note: May be taken twice with approval of Graduate Coordinator.

STAT 299. Special Problems. 1 - 6 Units
Term Typically Offered: Fall, Spring

Any properly qualified student who wishes to pursue a problem may do so if the proposed subject is acceptable to the department committee, the supervising instructor and the student’s advisor.
BA in Mathematics

Units required for BA: 48-54
Total units required for BA: 120

Program Description

In today’s highly technological society, the study of Mathematics takes on an increasingly important role. The Sacramento State Mathematics Department designs its courses with the goal of providing students with the mathematical concepts appropriate to the student’s field.

Placement - Mathematics Courses

Students who have not completed four years of high school mathematics consisting of

- Beginning Algebra (one year)
- Geometry (one year)
- Intermediate Algebra-Trigonometry (one year)
- Analytic Geometry-Mathematical Analysis (one year)

may need to complete part of this preparation at the University. The following diagram, which is based upon course prerequisites and major objectives, may be of assistance in selecting the necessary coursework.

Satisfactory completion of the Entry Level Mathematics (ELM) requirement is a prerequisite to enroll ment in any mathematics or statistics course in Area B-4 (Quantitative Reasoning) of General Education. The mathematics and statistics courses listed in Area B-4 are:

<table>

A brochure describing the diagnostic tests and containing sample questions is available in the campus bookstore. The following table gives the course and appropriate diagnostic test.

Those students who want to prepare for the ELM may purchase the Entry Level Mathematics workbook at the Hornet Bookstore (see Placement Tests section of this catalog).

All students planning to take MATH 30, Calculus I, must take the Calculus Readiness test prior to the semester of enrollment in MATH 30.

Prerequisite Requirements

- Prerequisites must be completed with grade "C-" or better.
- Grade "C-" or better required in all courses applied to Mathematics major or to the Mathematics or Statistics minors.
- PHYS 11A and PHYS 11C are recommended for all Mathematics majors.

Total Units 46
To help you complete your degree in a timely manner and not take more units than absolutely necessary, there are ways to use single courses to meet more than one requirement (overlap). For further information, please visit the General Education page (p. 1103).

Note: There is no way to list all possible overlaps so please consult with a professional advisor. The Academic Advising Center can be visited online (http://www.csus.edu/acad/), by phone (916) 278-1000, or email (advising@csus.edu).

Required in Major; also satisfies GE.

¹ To help you complete your degree in a timely manner and not take more units than absolutely necessary, there are ways to use single courses to meet more than one requirement (overlap). For further information, please visit the General Education page (p. 1103).

² If not satisfied before entering Sacramento State, it may be satisfied in General Education Area C2 (Humanities). "C- or better required." The alternative methods for satisfying the Foreign Language Proficiency Requirement are described here: https://www.csus.edu/college/arts-letters/world-languages-literatures/foreign-language-proficiency.html

Note: Due to continuing policy changes, it is important to consult a credential advisor for current details.

Admission Requirements

Admission requirements for the Blended Program include junior class standing with a minimum overall GPA of 2.67, a grade of "C-" or better in MATH 108, passing the Writing Placement for Juniors Exam (WPJ), spending and documenting at least 45 hours observing classes, tutoring, or teaching in a variety of settings in grades 7-12, taking all three sections of the California Basic Education Skills Test (CBEST), and submitting an application packet to the Department of Mathematics and Statistics. A completed application packet includes:

- an application form;
- an essay outlining reasons for entering a career in teaching;
- two letters of recommendation;
- two sets of transcripts from each college or university attended, other than Sacramento State; and
- one complete Sacramento State transcript.

The application packet may be submitted during the semester in which the requirements for admission are being completed, so the application may be submitted during the semester in which enrollment in MATH 108 occurs.

Prerequisite/Corequisite Requirements

There are three courses which are prerequisites or corequisites to the Blended Program and students are encouraged to take these courses prior to formal admission:

Integrated Mathematics Major/Single Subject Credential Program

Units required for Major and Credential: 90

Program Description

Teaching credential candidates must complete the Professional Education Program in addition to other requirements for a teaching credential. Consult the Department credential advisor for details. You may also obtain information about the Professional Education Program from the Teacher Preparation and Credentials Office, Eureka Hall 216, (916) 278-6403.

Students in the Integrated Mathematics Major/Single Subject Credential Program (also called the Blended Program in Mathematics) begin their pedagogical studies while they are completing the mathematics courses required for the Bachelor’s degree in Mathematics. The mathematics requirements include all of the courses required for the subject matter program in mathematics (see above), and MATH 198. Students who are interested in being admitted to the Blended Program in Mathematics must plan ahead, and must see their advisor as soon as possible.
Integrated Mathematics Major/Single Subject Credential Program

MATH 130B Functions of a Real Variable 3

**Additional Requirements for Specialized Study (12-18 Units)**

Select an emphasis from the following four options:

- Emphasis in Pure Mathematics 12
- Emphasis in Applied Mathematics 18
- Emphasis in Statistics
- Teacher Preparation Program

**Total Units** 48-54

1 Course also satisfies General Education (GE)/Graduation Requirement.

**Emphasis in Teacher Preparation Program**

1 To help you complete your degree in a timely manner and not take more units than absolutely necessary, there are ways to use single courses to meet more than one requirement (overlap). For further information, please visit the General Education page (p. 1103).

**Note:** There is no way to list all possible overlaps so please consult with a professional advisor. The Academic Advising Center can be visited online (http://www.csus.edu/acad/), by phone (916) 278-1000, or email (advising@csus.edu).

2 Required in Major; also satisfies GE.

If not satisfied before entering Sacramento State, it may be satisfied in General Education Area C2 (Humanities). "C- or better required." The alternative methods for satisfying the Foreign Language Proficiency Requirement are described here: https://www.csus.edu/college/arts-letters/world-languages-literatures/foreign-language-requirement.html

The alternative methods for satisfying the Foreign Language Proficiency Requirement are described here: https://www.csus.edu/college/arts-letters/world-languages-literatures/foreign-language-requirement.html
**MA in Mathematics**

Total units required for MA: 30, including at least 24 units of approved 200-level courses

**Program Description**

The Department of Mathematics and Statistics offers a Master of Arts degree in Mathematics. The MA program is designed to provide qualified students with an opportunity to increase the breadth and depth of their mathematical knowledge and understanding. Beyond assuring that successful candidates are proficient in the basic areas of mathematics, the program is sufficiently flexible to permit graduates to pursue individual professional and mathematical interests ranging from teaching at the secondary or community college level to a career in the private sector, to preparation for graduate study beyond the master's degree. Graduate courses are usually offered in the late afternoon to accommodate students who work full-time.

**Admission Requirements**

Admission as a classified graduate student in Mathematics requires:

- an undergraduate major in Mathematics which includes one year each of Modern Algebra and Advanced Calculus or an undergraduate major in a related field together with one year each of Modern Algebra and Advanced Calculus;

- a minimum 2.5 GPA; and

- a minimum 2.5 GPA in the last 60 units attempted and a 3.0 GPA in Mathematics coursework.

Students who have deficiencies in admission requirements that can be removed by specified additional preparation may be admitted with conditionally classified graduate status. Any such deficiencies will be noted on a written response to the admission application. No credit will be given towards the MA for the following:

- MATH 117
- MATH 120
- MATH 121
- MATH 122

**Admission Procedures**

Applications are accepted as long as room for new students exists. However, students are strongly urged to apply by the posted university application deadline for the fall or spring terms, in order to allow time for admission before registration. All prospective graduate students, including Sacramento State graduates, must file the following with the Office of Graduate Studies, River Front Center 215, (916) 278-6470:

- an online application for admission; and

- one set of official transcripts from all colleges and universities attended, other than Sacramento State.

For more admissions information and application deadlines please visit [http://www.csus.edu/gradstudies/](http://www.csus.edu/gradstudies/).

Admission decisions are made approximately six to eight weeks after the application deadline date. Applicants will be notified of an admission decision via e-mail.

**Minimum Unit and Grade Requirement for the Degree**

Units required for the MA: 30 (including at least 24 units of approved 200-level courses).

Minimum Cumulative GPA: 3.0

**Note:** A foreign language is not required for the MA degree. However, students who plan further graduate study are encouraged to take coursework in French, German, or Russian since proficiency in two of these languages is usually required in doctoral programs.

**Advancement to Candidacy**

Each student must file an application for Advancement to Candidacy, indicating a proposed program of graduate study. This procedure should begin as soon as the classified graduate student has:

- removed any deficiencies in admission requirements;

- completed at least 12 units in the graduate program with a minimum 3.0 GPA, including at least 12 units at the 200 level; and

- taken a Graduate Writing Intensive (GWI) course in their discipline within the first two semesters of coursework at California State University, Sacramento or secured approval for a WPG waiver.

Advancement to Candidacy forms are available on the Office of Graduate Studies website. The student fills out the form after planning a degree program in consultation with a Mathematics advisor. The completed form is then returned to the Office of Graduate Studies for approval.

Minor in Mathematics

Units required for Minor: 20-23

Program Description

In today's highly technological society, the study of Mathematics takes on an increasingly important role. The Sacramento State Mathematics Department designs its courses with the goal of providing students with the mathematical concepts appropriate to the student's field.

All units must be taken in Mathematics or Statistics. A minimum of 8 upper division units is required. At least 6 upper division units must be taken at Sacramento State.

Placement - Mathematics Courses

Students who have not completed four years of high school mathematics consisting of

- Beginning Algebra (one year)
- Geometry (one year)
- Intermediate Algebra-Trigonometry (one year)
- Analytic Geometry-Mathematical Analysis (one year)

may need to complete part of this preparation at the University. The following diagram, which is based upon course prerequisites and major objectives, may be of assistance in selecting the necessary coursework.

Satisfactory completion of the Entry Level Mathematics (ELM) requirement is a prerequisite to enrollment in any mathematics or statistics course in Area B-4 (Quantitative Reasoning) of General Education. The mathematics and statistics courses listed in Area B-4 are:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 1</td>
<td>Mathematical Reasoning</td>
<td>3</td>
</tr>
<tr>
<td>MATH 17</td>
<td>An Introduction to Exploration, Conjecture, and Proof in Mathematics</td>
<td>3</td>
</tr>
<tr>
<td>MATH 24</td>
<td>Modern Business Mathematics</td>
<td>3</td>
</tr>
<tr>
<td>MATH 26A</td>
<td>Calculus I for the Social and Life Sciences</td>
<td>3</td>
</tr>
<tr>
<td>MATH 26B</td>
<td>Calculus II for the Social and Life Sciences</td>
<td>3</td>
</tr>
<tr>
<td>MATH 29</td>
<td>Pre-Calculus Mathematics</td>
<td>4</td>
</tr>
<tr>
<td>MATH 30</td>
<td>Calculus I</td>
<td>4</td>
</tr>
<tr>

</tr>
<tr>
<td>STAT 1</td>
<td>Introduction to Statistics</td>
<td>3</td>
</tr>
<tr>
<td>STAT 50</td>
<td>Introduction to Probability and Statistics</td>
<td>4</td>
</tr>
</tbody>
</table>

Students Planning to take any of the following courses must pass a diagnostic test.

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 9</td>
<td></td>
<td>3</td>
</tr>
<tr>
<td>MATH 11</td>
<td></td>
<td>3</td>
</tr>
<tr>
<td>MATH 17</td>
<td>An Introduction to Exploration, Conjecture, and Proof in Mathematics</td>
<td>3</td>
</tr>
<tr>
<td>MATH 24</td>

</tr>
<tr>
<td>MATH 29</td>
<td>Pre-Calculus Mathematics</td>
<td>4</td>
</tr>
<tr>
<td>MATH 29A</td>
<td>Pre-Calculus Mathematics A</td>
<td>2</td>
</tr>
<tr>
<td>MATH 30</td>
<td>Calculus I</td>
<td>4</td>
</tr>
<tr>
<td>MATH 107A</td>
<td>Fundamental Mathematical Concepts</td>
<td>3</td>
</tr>
<tr>
<td>STAT 1</td>
<td>Introduction to Statistics</td>
<td>3</td>
</tr>
</tbody>
</table>

A brochure describing the diagnostic tests and containing sample questions is available in the campus bookstore. The following table gives the course and appropriate diagnostic test.

Those students who want to prepare for the ELM may purchase the Entry Level Mathematics workbook at the Hornet Bookstore (see Placement Tests section of this catalog).

All students planning to take MATH 30, Calculus I, must take the Calculus Readiness test prior to the semester of enrollment in MATH 30.

Prerequisite Requirements

- Prerequisites must be completed with grade "C-" or better.
- Grade "C-" or better required in all courses applied to Mathematics major or to the Mathematics or Statistics minors.
- PHYS 11A and PHYS 11C are recommended for all Mathematics majors.

Program Requirements

Select one of the two following options.

<table>
<thead>
<tr>

**Minor in Statistics**

Units required for Minor: 21

**Program Description**

In today’s highly technological society, the study of Mathematics takes on an increasingly important role. The Sacramento State Mathematics Department designs its courses with the goal of providing students with the mathematical concepts appropriate to the student’s field.

All units must be taken in Mathematics or Statistics. A minimum of 6 upper division units is required. At least 6 upper division units must be taken at Sacramento State.

**Placement - Mathematics Courses**

Students who have not completed four years of high school mathematics consisting of

- Beginning Algebra (one year)
- Geometry (one year)
- Intermediate Algebra-Trigonometry (one year)
- Analytic Geometry-Mathematical Analysis (one year)

may need to complete part of this preparation at the University. The following diagram, which is based upon course prerequisites and major objectives, may be of assistance in selecting the necessary coursework.

Satisfactory completion of the Entry Level Mathematics (ELM) requirement is a prerequisite to enrollment in any mathematics or statistics course in Area B-4 (Quantitative Reasoning) of General Education. The mathematics and statistics courses listed in Area B-4 are:

**Prerequisite Requirements**

- Prerequisites must be completed with grade “C-” or better.
- Grade “C-” or better required in all courses applied to Mathematics major or to the Mathematics or Statistics minors.
- PHYS 11A and PHYS 11C are recommended for all Mathematics majors.

**Program Requirements**

**Physics and Astronomy**

*College of Natural Sciences and Mathematics*

**Program Description**

Physics is the most fundamental science and underlies our understanding of nearly all areas of science and technology. In a broad sense, physics is concerned with the study of energy, space, and matter, and with the interactions between matter and the laws that govern these interactions. More specifically, physicists study mechanics, heat, light, electric and magnetic fields, gravitation, relativity, atomic and nuclear physics, and condensed matter physics.

The Department of Physics and Astronomy at Sacramento State offers four degree programs: the BS in Physics, a BS in Physics with a concentration in Applied Physics, the BA in Physics, and the BA in...
Physics, Physics Teacher Concentration. The Department also offers Minor programs in Physics and Astronomy and Certificates in Scientific Instrument Development and Scientific Computing and Simulation. The BS degrees are recommended for students seeking a career in the technology sector or planning to pursue a graduate degree. The BA degree is recommended for students who are interested in teaching Physics in high school or who want a liberal arts education with an emphasis in Physics. Physics majors are encouraged to take additional mathematics and to develop skills in the use of computers.

Approximately 40 percent of the graduating physics majors from Sacramento State continue on to graduate school earning advanced degrees in Physics, Mathematics, Engineering, Environmental Science, Medicine, or Business. Another 50 percent find job opportunities in industrial and government laboratories or agencies. The remaining 10 percent obtain their teaching credential.

Degree Programs
Astronomy (p. 898)
Physics (p. 900)

Special Features
- In addition to providing a broad academic background and facility in analytic thinking, the study of physics fosters and emphasizes independent study experiences. Most physics students at Sacramento State typically spend a year working on a Senior Project, often in conjunction with a faculty member. These independent projects not only provide a vehicle for applying material learned in class and give students experience in electronics, measurement systems, computers, and machine shop work, but also teach students to work and think on their own. Faculty in the Department have been active in research in atomic physics, astrophysics, biophysics, condensed matter physics, high energy physics, instrumentation, liquid crystals, low temperature physics, optics, and physics education research.
- An advising system has been established by the Department of Physics and Astronomy to help students plan their schedules each semester, to discuss independent project possibilities, and to provide career and current job information. Because of the large number of sequential courses in the degree programs, the Department requires that each student contact his/her advisor before registering for classes each semester. Any student without an advisor should contact Professor Christopher Taylor in Sequoia Hall 230, or call (916) 278-6518.

Career Possibilities
A degree in physics will prepare you for a wide range of careers. The advanced problem solving, technical, and communication skills one develops alongside the physics knowledge in our degrees are highly valued by many industries. Recent graduates from our programs have an extremely diverse range of careers including: faculty members at colleges and universities, employees at National and State Laboratories and Agencies, teachers at middle and high school, engineers, scientific technicians, analysts, technical writers, computer programmers, and science policy.

Astronomy
College of Natural Sciences and Mathematics

Program Description
Astronomy has played an important role in the development of modern science. Recent advances in technology and space exploration have made possible many remarkable new discoveries in astronomy. For both these reasons, the study of astronomy is an excellent way for the liberal arts student to gain an appreciation of scientific knowledge and methods, and is especially recommended for students who are preparing for a teaching career. The minor in astronomy, in combination with a major in a physical science, can help prepare students for graduate study in astronomy or astrophysics, or for a career in this field. More information about these possibilities is available from advisors in the Department of Physics and Astronomy.

Degree Program
Minor in Astronomy (p. 900)

Special Features
- Observation sessions are held in our facility on the roof of Amador Hall with a 14-inch Schmidt-Cassegrain instrument.
- Portable 10-inch Schmidt-Cassegrain telescopes, a solar telescope and a radio telescope are also available for use in courses and student projects.
- A modern computing facility is used for digital image analysis and data reduction, providing access to all major astronomical analysis software.
- 120 seat digital planetarium used as a classroom, and which provides public outreach opportunities for astronomy students and faculty.

ASTR 4A. Introduction to the Solar System. 3 Units
Prerequisite(s): One year of high school geometry or instructor permission.
General Education Area/Graduation Requirement: Physical Science (B1)
Term Typically Offered: Spring only

ASTR 4B. Introduction to Stars, Galaxies, and Cosmology. 3 Units
Prerequisite(s): One year high school geometry or instructor permission.
General Education Area/Graduation Requirement: Physical Science (B1)
Term Typically Offered: Fall, Spring
Description and explanations of astronomical phenomena related to stars, galaxies, and cosmology. Structure and evolution of stellar and galactic systems. Occasional observation periods.

ASTR 4C. Introduction to Astrobiology. 3 Units
Prerequisite(s): One year high school geometry or instructor permission.
General Education Area/Graduation Requirement: Physical Science (B1)
Term Typically Offered: Fall only

ASTR 6. Astronomical Observation Laboratory. 1 Unit
Prerequisite(s): ASTR 4A, ASTR 4B, or ASTR 4C with C- or better; may be taken concurrently.
General Education Area/Graduation Requirement: Physical Science (B1), Laboratory (B3)
Term Typically Offered: Fall, Spring, Summer
Study and use of various telescopes; field observation of planets, stars, meteors, asteroids, the moon and sun; laboratory activities relevant to astronomy. Lab three hours.

ASTR 131. The Solar System and Space Exploration. 3 Units
Prerequisite(s): ASTR 4A or ASTR 4B or 4C or PHYS 11A or CHEM 1A and GWAR certification before Fall 09; or WPJ score of 80+; or 3-unit placement in ENGL 109M or ENGL 109W; or 4-unit placement in ENGL 109M or ENGL 109W and co-enrollment in ENGL 109X; or WPJ score 70 or 71 and co-enrollment in ENGL 109X.
General Education Area/Graduation Requirement: Writing Intensive Graduation Requirement (WI), Further Studies in Area B (B5)
Term Typically Offered: Fall only
Planets and satellites, including their composition, structure, and atmospheres, with emphasis on modern techniques and observations. Solar surface phenomena and their influence on planets through the solar wind. Comets, meteorites, and their implications for the origin and evolution of planets. Physical effects governing feasible forms of space exploration and colonization.
Note: This course is approved as a Writing Intensive course.

ASTR 132. Stars, Galaxies and Cosmology. 3 Units
Prerequisite(s): ASTR 4A or ASTR 4B or 4C or PHYS 11A or CHEM 1A and GWAR certification before Fall 09; or WPJ score of 80+; or 3-unit placement in ENGL 109M or ENGL 109W; or 4-unit placement in ENGL 109M or ENGL 109W and co-enrollment in ENGL 109X; or WPJ score 70 or 71 and co-enrollment in ENGL 109X.
General Education Area/Graduation Requirement: Writing Intensive Graduation Requirement (WI), Further Studies in Area B (B5)
Term Typically Offered: Spring only
Types and evolution of stars; structure and evolution of galaxies; overall structure of the universe; current developments in astronomy.
Note: This course is approved as a Writing Intensive course.

ASTR 150. Dark Matter and Dark Energy. 3 Units
Prerequisite(s): PHYS 106
Corequisite(s): PHYS 110
Term Typically Offered: Spring only – odd years
Introduction to historical, observational and theoretical principles of dark matter and dark energy in the Universe. Topics will include dark matter in galaxies (rotation curves, stellar motions), dark matter in clusters (virial theorem, x-ray observations), MACHOs and WIMPs as dark matter candidates, as well as the discovery of dark energy through supernovae observations, and additional probes of dark energy. Dark matter and dark energy will be discussed in the cosmological context of the Big Bang theory.

ASTR 180. Through Space and Time in the Planetarium. 3 Units
Prerequisite(s): Completion of GE Area B1 and B4.
General Education Area/Graduation Requirement: Further Studies in Area B (B5)
Term Typically Offered: Fall, Spring
An exploration of the heavens through space and time using the planetarium as an investigative tool. This course covers the historical, observational and theoretical principles of astronomy. Topics include the nature of science, structure of the universe, the sky view, orbital motions, precession, constellations, lunar phases and eclipses. The course will also explore the observational evidence for modern and ancient world views.

Physics

Program Description

Physics is the most fundamental science and underlies our understanding of nearly all areas of science and technology. In a broad sense, physics is concerned with the study of energy, space, and matter, and with the interactions between matter and the laws that govern these interactions. More specifically, physicists study mechanics, heat, light, electric and magnetic fields, gravitation, relativity, atomic and nuclear physics, and condensed matter physics.

Approximately 40 percent of the graduating physics majors from Sacramento State continue on to graduate school earning advanced degrees in Physics, Mathematics, Engineering, Environmental Science, Medicine, or Business. Another 50 percent find job opportunities in industrial and government laboratories or agencies. The remaining 10 percent obtain their teaching credential.

Degree Programs

BA in Physics (p. 905)

BA in Physics (Teacher Preparation) (p. 906)

BS in Physics (p. 908)

BS in Physics (Applied Physics) (p. 910)

Minor in Physics (p. 912)

Certificate in Scientific Computing and Simulation (p. 912)

Certificate in Scientific Instrument Development (p. 912)

Special Features

• In addition to providing a broad academic background and facility in analytic thinking, the study of physics fosters and emphasizes independent study experiences. Most physics students at Sacramento State typically spend a year working on a Senior Project, often in conjunction with a faculty member. These independent projects not only provide a vehicle for applying material learned in class and give students experience in electronics, measurement systems, computers, and machine shop work, but also teach students to work and think on their own. Faculty in the Department have been active in research in atomic physics, astrophysics, biophysics, condensed matter physics, high energy physics, instrumentation, liquid crystals, low temperature physics, optics, and physics education research.

• An advising system has been established by the Department of Physics and Astronomy to help students plan their schedules each semester, to discuss independent project possibilities, and to provide career and current job information. Because of the large number of sequential courses in the degree programs, the Department requires that each student contact his/her advisor before registering for classes each semester. Any student without an advisor should
contact Professor William DeGraffenreid in Sequoia Hall 230, or call (916) 278-6518.

Career Possibilities
A degree in physics will prepare you for a wide range of careers. The advanced problem solving, technical, and communication skills one develops alongside the physics knowledge in our degrees are highly valued by many industries. Recent graduates from our programs have an extremely diverse range of careers including: faculty members at colleges and universities, employees at National and State Laboratories and Agencies, teachers at middle and high school, engineers, scientific technicians, analysts, technical writers, computer programmers, and science policy.

TAYLOR, CHRISTOPHER L.

PHYS 1. Physical Reasoning and Calculation. 2 Units
Term Typically Offered: Fall, Spring

Introduction to the analytical skills needed for the study of Physics. The focus is to prepare students to take PHYS 11A; however, PHYS 1 is also suitable as preparation for PHYS 5A. Emphasis is on reasoning and problem-solving, including conceptualualization, visualization, and interpretation of written descriptions of physical situations, and on the connection of physical laws to the mathematical techniques used in their solution.

PHYS 2. Topics in Elementary Physics. 4 Units
Prerequisite(s): A recent one year course in high school algebra and one year of plane geometry or a college course in algebra (MATH 9).

General Education Area/Graduation Requirement: Physical Science (B1)
Term Typically Offered: Fall, Spring

One semester introductory physics course including a laboratory. Covers the fundamental concepts of physics with an emphasis on everyday life situations and applications. The range of material includes mechanics, waves, electricity and optics. One hour lecture, two hour discussion, and a three hour laboratory session.

PHYS 5A. General Physics: Mechanics, Heat, Sound. 4 Units
Prerequisite(s): Recently completed three years of high school algebra and geometry; and a college course in algebra and trigonometry (MATH 9 recommended) for those having an inadequate mathematics background.

General Education Area/Graduation Requirement: Laboratory (B3), Physical Science (B1)
Term Typically Offered: Fall, Spring, Summer

PHYS 5A-B sequence is a two-semester course in introductory physics in which fundamental concepts are emphasized including some physiological applications. Lecture two hours; discussion one hour; laboratory three hours.

PHYS 5B. General Physics: Light, Electricity and Magnetism, Modern Physics. 4 Units
Prerequisite(s): PHYS 5A or instructor permission.
Term Typically Offered: Fall, Spring, Summer

Lecture two hours; discussion one hour; laboratory three hours.

PHYS 10. Physics In Our World. 3 Units
General Education Area/Graduation Requirement: Physical Science (B1)
Term Typically Offered: Fall, Spring

Introductory course designed for non-science students completing general education requirements. Students will be introduced to basic concepts in Physics through the study of astronomy, atomic nature of matter, electromagnetic waves, energy, sound and earthquake waves, current electricity, magnetism, and nuclear processes. Development of reasoning and quantitative skills and applying them to scientific and technological topics of current importance will be emphasized.

PHYS 10L. Physics in Our World Laboratory. 1 Unit
Prerequisite(s): PHYS 10; may be taken concurrently.
Term Typically Offered: Fall, Spring

Laboratory course complements PHYS 10 and satisfies the general education science lab requirement. Emphasis is placed on the nature of scientific observation and measurement and their relationship to general physical concepts. Students will be given a concrete, hands-on sense of observing and interpreting data from a variety of experimental environments.
PHYS 11A. General Physics: Mechanics. 4 Units
Prerequisite(s): MATH 30, MATH 31; or equivalent certificated high school courses. MATH 31 may be taken concurrently.
General Education Area/Graduation Requirement: Laboratory (B3), Physical Science (B1)
Term Typically Offered: Fall, Spring, Summer

PHYS 11B. General Physics: Heat, Light, Sound, Modern Physics. 4 Units
Prerequisite(s): PHYS 11C.
Term Typically Offered: Fall, Spring

PHYS 11C. General Physics: Electricity and Magnetism. 4 Units
Prerequisite(s): MATH 31, PHYS 11A.
Term Typically Offered: Fall, Spring, Summer

PHYS 30. Science and Pseudoscience. 3 Units
General Education Area/Graduation Requirement: Critical Thinking (A3)
Term Typically Offered: Fall, Spring

PHYS 99. Special Problems. 1 - 3 Units
Term Typically Offered: Fall, Spring

Individual projects or directed reading.
Note: Open only to students who appear competent to assume individual work on the approval of the instructor. For students with lower division status. Up to 4 units may be taken for grade.
Credit/No Credit

PHYS 105. Mathematical Methods in Physics. 3 Units
Prerequisite(s): MATH 32, MATH 45, PHYS 11A, PHYS 11B, PHYS 11C or PHYS 5A, PHYS 5B.
Term Typically Offered: Fall only

Linear algebra, linear vector spaces, linear transformations, the eigenvalue problem, Sturm-Liouville Theory. Solving PDEs common to physical systems. Fourier transforms, Dirac delta function, differential and integral vector calculus with a focus on applications to problems in physics, such as classical mechanics, thermodynamics, quantum mechanics, and electromagnetism.

PHYS 106. Introduction to Modern Physics. 3 Units
Prerequisite(s): MATH 31, PHYS 11A, PHYS 11B, PHYS 11C or PHYS 5A, PHYS 5B.
Term Typically Offered: Fall, Spring

Basic concepts of special relativity and quantum theory of matter. Phenomenological study of atomic and molecular energy states and spectra. Elements of solid-state and nuclear physics.

PHYS 107. Conceptual Physics and Scientific Inquiry. 4 Units
Prerequisite(s): BIO 7, CHEM 106, GEOL 8, MATH 17.
Corequisite(s): CHEM 106
Term Typically Offered: Fall, Spring

Concepts include matter, waves and energy, force and motion, electricity and magnetism, and scientific inquiry. Emphasizes hands-on cooperative learning engaging students in scientific inquiry by posing testable scientific questions, conducting experiments, and analyzing and presenting findings to their peers. Appropriate for Liberal Studies and Blended Multiple Subject Credential students. Weekly activity and discussion sessions.

PHYS 108. Classical Mechanics. 3 Units
Prerequisite(s): MATH 45, PHYS 11C, PHYS 105.
Term Typically Offered: Spring only

Fundamental principles of statics and dynamics, including Newton’s equations and conservation laws, damped and forced oscillations, central force motion, accelerated coordinate systems, coupled oscillations, normal modes, Lagrangian and Hamiltonian methods, introduction to nonlinear systems and chaos theory.

PHYS 115. Electronics and Instrumentation. 4 Units
Prerequisite(s): PHYS 11C or PHYS 5B with instructor permission.
Term Typically Offered: Fall only

Linear and non-linear circuits, operational amplifiers, transducers, basics of digital circuitry, and an introduction to computerized data acquisition. Lecture two hours; laboratory six hours.

PHYS 116. Advanced Electronics and Instrumentation. 3 Units
Prerequisite(s): PHYS 115.
Term Typically Offered: Spring only – even years

Noise reduction techniques, signal recovery, frequency analysis, computerized instrument control, and instrument development. Lecture one hour; laboratory six hours.

</table>

Basic concepts and laws of thermodynamics and thermal properties of matter; kinetic theory of gases; use of distribution functions and ensembles in statistical mechanics; connection of probability and entropy; quantum statistics; applications to various systems.

Theoretical and experimental study of sound sources, sound waves and sound measurement. Basic properties of waves in continuous media; spectral analysis of vibrations; use of acoustic impedance and circuit analogies; applications to environmental noise analysis, room acoustics, and loudspeaker and microphone design and use; experience with acoustic instrumentation. Lecture two hours; laboratory three hours.

Electromagnetic waves, wave propagation in material media, reflection and refraction, polarization, cavities and waveguides, optical fibers, simple radiating systems, radiation from an accelerated charge and special relativity. Introduction to plasma physics and electromagnetic properties of superconductors.

Elementary treatment of crystal structure and lattice and electron dynamics. Physics of semiconductor junctions, diodes, transistors and MOSFETS, solar cells, lasers, electro-optic and acousto-optic devices. Introduction to basic physical properties such as electrical conduction of selected amorphous solids and their applications. Laboratory experience.

Theoretical and experimental treatment of wave optics; interference, diffraction, absorption, scattering, dispersion, polarization. Selected topics from contemporary optics: Fourier optics, coherence theory, lasers, holography. Lecture two hours; laboratory three hours.

Foundations of wave mechanics, including wave packets, superposition, and the uncertainty principle. The Schroedinger equation and its relation to operators and eigenstates. Symmetric systems and conserved quantities. Introduction to matrix mechanics, spin, scattering, and perturbation theory.

Structure of matter including basic elements of atoms, molecular, solid state, nuclear and particle physics. Topics will also include photon and electron gases, lasers, superconductivity, Bose-Einstein condensation and superfluidity.

Basic methods and skills of applying computers to the solution of scientific problems. Numerical calculation methods, numbers and data, algebraic equations, rate processes, iterative techniques, approximation methods, statistical analysis and data fitting, relaxation methods, and use of software and other programming resources on the web. Practical experience emphasized throughout.

Application of computer modeling, simulation, and visualization to the solution of scientific problems. Projects drawn from various scientific disciplines will be used to develop the necessary skills, including a capstone project. Examples include projectile motion with air drag, time development of a biological population, chemical reactions with several reactants, and random walk and Monte Carlo methods. Practical experience emphasized throughout.

Investigation of subcellular and cellular biological systems using the fundamentals of physics. Topics will include a quantitative treatment of: the role of forces and energy in biology; thermodynamics of living systems; biopolymer, cytoskeletal and cellular mechanics; the physics of molecular motors and intracellular transport; applications of physical tools to study biological systems. Focus is on the interplay between physics and biology, and on how physical properties determine the biological function and behavior of living systems.

Note: PHYS 11B or PHYS 5B may be taken concurrently with instructors consent; no biology coursework is required, though some knowledge of cell biology is helpful, and it is recommended that students consider taking a lower-division college course in biology prior to enrollment.
PHYS 175. Advanced Physics Laboratory. 2 Units
Prerequisite(s): 12 units of upper division physics, including PHYS 106 and either PHYS 115 or PHYS 145 and a satisfaction of the Advanced Writing requirement.
Term Typically Offered: Fall, Spring

Advanced experiments chosen from several of the major areas of physics, performed usually on an individual basis. Laboratory six hours.

PHYS 181. Modern Physics for Everyone. 3 Units
Prerequisite(s): Completion of GE Area B1 and B4.
General Education Area/Graduation Requirement: Further Studies in Area B (B5)
A conceptual course in the topics of modern physics including Quantum Mechanics, Special Relativity, and other contemporary topics for a general audience. This course meets General Education Area B5 (Further Studies in Physical Science, Life Forms, and Quantitative Reasoning) and satisfies the upper-division Area B requirement.

PHYS 182. Physics of Sports. 3 Units
Prerequisite(s): Completion of GE Area B1 and B4.
General Education Area/Graduation Requirement: Further Studies in Area B (B5)
Term Typically Offered: Fall, Spring

A conceptual course in the application of the laws of physics in the context of sport. Focusing mainly on classical physics, we will cover topics such as force, energy, momentum, collisions, pressure, and fluids to explain what we see on the court, field, pool, and road. This course meets General Education Area B5 (Further Studies in Physical Science, Life Forms, and Quantitative Reasoning) and satisfies the upper-division Area B requirement.

PHYS 184. Physics of Energy and the Environment. 3 Units
Prerequisite(s): Completion of GE Area B1
General Education Area/Graduation Requirement: Further Studies in Area B (B5)
Term Typically Offered: Fall, Spring

Our society requires and consumes energy. In this course, students will gain an understanding of the wide variety of our energy sources and how the energy is generated, distributed, and stored. We will examine the large scale and small scale role that energy plays in society and the impact that energy policy and practices have on the environment.

PHYS 186. Musical Acoustics: Science and Sound. 3 Units
Prerequisite(s): Completion of GE Area B1
General Education Area/Graduation Requirement: Further Studies in Area B (B5)
Term Typically Offered: Fall, Spring

Physical principles of vibration and wave motion, with illustrations involving musical instruments and concert hall acoustics; principles of electronic synthesis, recording, and reproduction of sound; operation of the human ear and brain in receiving and analyzing sound; relation of the harmonic series to sound quality, harmony and scales; proper roles for science in explaining music as an artistic activity.
Note: No technical background required; course cannot be used to meet Physics BS program requirements. It is recommended that student have already completed their B1 and B4 requirement prior to enrollment. Some experience with music is also helpful.

PHYS 187. Seeing the Light. 3 Units
Prerequisite(s): Completion of GE Area B1 and B4.
General Education Area/Graduation Requirement: Further Studies in Area B (B5)
Term Typically Offered: Fall only

An extensive study of light, mostly in the context of applications. Topics include basics of light and natural phenomena, optics, color, light and energy (solar power), and holography; as well as more advanced topics such as wave/particle model of light, diffraction and polarization. The course will also cover optical instrumentation such as cameras, microscopes, telescopes, displays, and photoreceptors.

PHYS 190. Physics Seminar. 1 - 2 Units
Term Typically Offered: Fall, Spring

Special lecture series on announced topics by local and visiting speakers, emphasizing current research developments, with related reading assignments.
Note: May be taken for credit in sequential semesters for a maximum of two units total.

PHYS 191. Senior Project. 1 - 2 Units
Prerequisite(s): Department chair permission.
Term Typically Offered: Fall, Spring

Research Project under faculty supervision. Project may consist of laboratory or theoretical research project, instrumentation/demonstration development, or literature research project. Projects require written and oral reports.
Note: May be taken for credit in sequential semesters for a maximum of four units total. Grade assigned upon completion of the project.

PHYS 194. Physics Related Work Experience. 6 - 12 Units
Prerequisite(s): Upper-division status and Department Chair permission.
Term Typically Offered: Fall, Spring

Supervised employment in a physics or astronomy related company or agency. Placement is arranged through the department and the Cooperative Education Program office. Requires completion of a three-to-six month work assignment and a written report.
Note: PHYS 194 may not be used to meet major requirements in Physics; May be taken for credit in sequential semesters

PHYS 195. Teaching Internship. 1 - 2 Units
Prerequisite(s): Completion of all math and physics lower division courses for the B.A. in Physics. Approval from the Teacher Preparation Concentration Coordinator.
Term Typically Offered: Fall, Spring

Supervised teaching internship for high school physics class, or for one of the following courses: PHYS 2, 5A-B, 10, 11A-C, 107, or ASTR4. The students will meet weekly with the faculty teaching this class, and with their supervisor or mentor to help prepare and teach the class.
Note: May be taken for credit in sequential semesters for a maximum of six units total.
PHYS 197. Laboratory Teaching Assistant. 1 - 2 Units
Prerequisite(s): Completion of all physics and math lower division courses required for the B.A. in Physics. Completion of the same course in which the student will take this class with a grade higher than B and/or consent from the Teacher Preparation Concentration program coordinator.
Term Typically Offered: Fall only

Student will be a supervised laboratory teaching assistant for one of the following courses: PHYS 2, 5A-B, 10, 11A-C, 107, or ASTR 6. The student will meet weekly with the faculty teaching this class, and with their supervisor or mentor to help prepare and teach the laboratory.
Note: May be taken for credit in sequential semesters for a maximum of six units total.

PHYS 198. Co-Curricular Activities. 1 - 3 Units
Term Typically Offered: Spring only

Students may provide special tutoring to students taking physics courses, participate in community oriented projects, assist in activity sessions for teacher training courses, or engage in activities related to the subject matter and concerns of the Physics and Astronomy Department. Up to 4 units may be taken.
Credit/No Credit

PHYS 199. Special Problems. 1 - 3 Units
Term Typically Offered: Fall, Spring

Individual projects or directed reading. Open only to students who appear competent to assume individual work on the approval of the instructor. Up to 4 units may be taken.
Credit/No Credit

PHSC 75. Introduction to Machine Shop Practices. 2 Units
Term Typically Offered: Fall, Spring

Safe machine operation techniques on common fabrication equipment. Reading and calibrating measuring devices, gauging and optical gauging. Study of measuring conventions and understanding of precision. Interpretation of drawings, tolerances and tactics for maintaining tolerances. Jigs and mounts for dynamic data collection equipment. Prototype manufacturing. Students completing this course qualify to perform work in the shop with minimum supervision. Lecture one hour; Laboratory three hours.

PHSC 107. History of the Physical Sciences. 3 Units
General Education Area/Graduation Requirement: Further Studies in Area B (B5)
Term Typically Offered: Fall, Spring

Study of the development of the major physical laws presently used in describing our physical world. Some considerations of the influences of these developments on other areas of knowledge and on society in general.
Cross Listed: HIST 107; only one may be counted for credit.

PHSC 199. Special Problems. 1 - 3 Units
Term Typically Offered: Fall, Spring

Individual projects or directed reading.
Note: Open only to students who appear competent to assume individual work on the approval of the instructor. Up to 4 units may be taken for grade.
Credit/No Credit

BA in Physics

Units required for Major: 65-67
Total units required for BA: 120

Program Description

The BA degree is recommended for students who are interested in teaching Physics in high school or who want a liberal arts education with an emphasis in Physics. Physics majors are encouraged to take additional mathematics and to develop skills in the use of computers.

Total Units 42

BA in Physics (Teacher Preparation)

Units required for Major: 86-87
Total units required for BA: 120

Program Description

The Science Subject Matter Program (SSMP), with emphases in Biological Sciences, Chemistry, and Physics, leads to a BA degree in the area of emphasis. It also meets the latest California Commission on Teacher Credentialing (CCTC) subject-matter requirement to
enter a teaching credential program in California. In order to obtain a California K-12 Teaching Credential, a program of professional education preparation (a teaching credential program) is required in addition to completing the SSMP. Completing the SSMP and teaching credential program allows graduates to teach all four sciences (biology, chemistry, geoscience, and physics) at the general/integrated 7th-12th grade science level, in addition to the student’s area of concentration at the advanced high school level. A typical credential might read, for example, SCIENCE: Chemistry.

Physics is the most fundamental science and underlies our understanding of nearly all areas of science and technology. In a broad sense, physics is concerned with the study of energy, space, and matter, and with the interactions between matter and the laws that govern these interactions. More specifically, physicists study mechanics, heat, light, electric and magnetic fields, gravitation, relativity, atomic and nuclear physics, and condensed matter physics.

The BA degree is recommended for students who are interested in teaching Physics in high school or who want a liberal arts education with an emphasis in Physics. Physics majors are encouraged to take additional mathematics and to develop skills in the use of computers.

Currently there is a serious need in public school education for well-educated science teachers. Physics majors who have an interest in teaching should see the credential advisor in the Department (Dr. Vera Margoniner) to plan an academic program and to explore ways to get involved in teaching-related activities such as tutoring, grading, and working in the schools.

Currently there is a great need for K-12 teachers educated in science. Changes in State Board of Education Standards and increasing interest in Biological Sciences have created significant demands for students with this credential. Biological Sciences majors who have an interest in teaching should contact one of the credential advisors in the Biological Sciences Department, Melanie Loo.

**Note:**

- It is also possible to obtain admission to the Professional Education Program by passing a series of subject-matter examinations specified by the CTC in lieu of this Science Subject Matter Program. For information about this option contact the Teacher Preparation Program Office, Eureka Hall 216, (916) 278-6403.
- Due to policy changes from the California Commission on Teacher Credentialing and the federal No Child Left Behind mandate, the Science Subject Matter program was under review at the time of this catalog printing and is subject to revision. As a result it is important to consult a credential advisor for current details.

**Minimum Grade Requirement**

A grade of at least a "C-" in all required Science Subject Matter Program courses is necessary in order to meet subject matter requirements for admission to a teaching credential program. If a grade of "C-" is not achieved in all SSMP courses, then the current CTC approved subject matter exam must be successfully passed in order to be eligible for admission to a teaching credential program (the current exam is the CSET, tests I, II, and III).

**Note:** It is recommended that all coursework for the SSMP be completed before starting the Teacher Education Program. At least 15 units of the coursework or equivalent work experience must be current, i.e., completed within the past six years.

1 To help you complete your degree in a timely manner and not take more units than absolutely necessary, there are ways to use single courses to meet more than one requirement (overlap). For further information, please visit the General Education page (p. 1103).

Note: There is no way to list all possible overlaps so please consult with a professional advisor. The Academic Advising Center can be visited online (http://www.csus.edu/acad/), by phone (916) 278-1000, or email (advising@csus.edu).

If not satisfied before entering Sacramento State, it may be satisfied in General Education Area C2 (Humanities). “C- or better required.” The alternative methods for satisfying the Foreign Language Proficiency Requirement are described here: https://www.csus.edu/college/arts-letters/world-languages-literatures/foreign-language-requirement.html

Note: Students with a declared major of BS in Physics or BS in Physics (Applied Physics) are exempt from the Foreign Language Graduation Requirement.
Certificate in Scientific Computing and Simulation

Units required for Certificate: 14 minimum

Program Description
A certificate program in Scientific Computing and Simulation designed for science and engineering majors is offered by the Department of Physics and Astronomy. It focuses on the basic skills of applying the computer to the solution of scientific problems which today encompass a broad range of applications in science and technology. Such skills include modeling and formulating the problem, solving the resulting equations, and displaying the results graphically. Students that earn this certificate will acquire a good grounding in such skills and be better prepared for today's industrial and academic careers.

Eligibility Information
To receive the certificate in Scientific Computing and Simulation, students must:

• achieve a 2.5 GPA in the certificate program courses;
• must be working towards a degree at Sacramento State or have special approval from the Chair of the Department of Physics and Astronomy.

Certificate in Scientific Instrument Development

Units required for Certificate: 11 minimum

Program Description
A certificate in Scientific Instrument Development is available through the Department of Physics and Astronomy. The Scientific Instrument Development certificate program focuses not only on using scientific instruments, but also will teach the fundamentals of electronics, computer interfacing, and machining. Students that earn this certificate will be prepared to design, prototype, and construct instruments for a wide range of scientific applications.

Eligibility Information
To receive the certificate in Scientific Instrument Development, students must:

• achieve a 2.5 GPA in the certificate program courses;
• must be working towards a degree at Sacramento State or have special approval from the Chair of the Department of Physics and Astronomy.

Minor in Physics

Units required for Minor: 21, all of which must be taken in Physics, and a minimum of 9 upper division units is required

Written approval from a Physics faculty advisor is required.

Program Description
Physics is the most fundamental science and underlies our understanding of nearly all areas of science and technology. In a broad sense, physics is concerned with the study of energy, space, and matter, and with the interactions between matter and the laws that govern these interactions. More specifically, physicists study mechanics, heat, light, electric and magnetic fields, gravitation, relativity, atomic and nuclear physics, and condensed matter physics.

It is strongly recommended that students interested in applying to university and may omit a course that is required by another university. The requirements listed in this section are those identified by most universities offering the identified professional program. Therefore, requirements for specific health professional schools follow the list of elective requirements for the baccalaureate degree.

The pre-health professional advising patterns described in this section are not majors. For example, Sacramento State does not offer a "Pre-med major." Instead, the advising patterns identify the set of courses that must be completed before admission to particular types of health professional schools. In the case of some majors (e.g., Biological Sciences and Chemistry) there is considerable overlap in course requirements. However, the courses can be taken along with any major (e.g., English, Philosophy, Psychology, etc.) and used to satisfy General Education or elective requirements for the baccalaureate degree.

The common set of courses recommended for all of the medical-related professional schools covered in this section are listed below. Additional requirements for specific health professional schools follow the list of recommended core curriculum. It is important to note that requirements for a particular type of professional school (e.g., Dental School) may differ from one university to another, and that requirements are subject to change. The requirements listed in this section are those identified by most universities offering the identified professional program. Therefore, the lists may include courses that are not required by a particular university and may omit a course that is required by another university. It is strongly recommended that students interested in applying to professional schools contact one of the advisors listed in this section for assistance in planning their programs. It is also strongly recommended that students visit the Web sites of the universities they plan to apply to in order to be sure that they meet all requirements.

All health professional schools require strong academic ability and a good foundation in the sciences. In addition, good problem solving ability, effective oral and written communication skills, an awareness of interpersonal dynamics, an appreciation for cultural diversity, and an understanding of health care issues are important. Therefore, in addition to science courses, pre-health professional students should take general education courses that will enrich their non-science preparation in these areas.

It is also crucial that students have volunteer experience related to their professional goals. Such experience will provide more insight into how well suited you are to the work setting you are considering. Academic credit may be received for volunteer work by seeing an advisor and registering for BIO 195.

For more information about the Pre-Health Professional Program, please click here (http://www.csus.edu/prehealth/).

**Note:** PHYS 5A, PHYS 5B may be substituted for PHYS 11A, PHYS 11C, but the 21-unit minimum must be met by additional courses in one of two ways:

- PHYS 106 plus three other upper division Physics courses OR
- PHYS 106 plus PHYS 11B plus two other upper division Physics courses.
require Sociology (SOC 1) as one of the courses from the social and behavioral sciences.

Recommended Field Specific Curricula

Allopathic Medical Schools

When most people use the term “Medical School,” they are usually referring to Allopathic Medical Schools that grant the M.D. (Doctor of Medicine) degree. There is, however, another type of Medical School, called Osteopathic Medical School (described below) that grants the D.O. (Doctor of Osteopathic Medicine) degree. Both M.D.’s and D.O.’s are eligible for licensure to practice medicine as physicians and surgeons in the State of California.

Applicants do not need a 4.0 GPA to get into an allopathic medical school. However, GPA is a reflection of your ability to handle university work and is an important part of your application. A successful applicant must be able to offer more than a good GPA. The attributes of motivation, social concern, communication skills, and maturity are given great weight in the selection process.

All students applying to allopathic medical schools must complete the recommended course requirements listed above. In addition to the common courses, most allopathic medical schools require one semester to one year of college mathematics. In general, the mathematics requirement can be satisfied by taking a full year of calculus. However, some medical schools specify that one of the courses must be statistics. Therefore, if you want to be sure that you have completed the math requirement for the greatest number of medical schools, you should take the following courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 26A</td>
<td>Calculus I for the Social and Life Sciences</td>
<td>3</td>
</tr>
<tr>
<td>or MATH 30</td>
<td>Calculus I</td>
<td>4</td>
</tr>
<tr>
<td>MATH 26B</td>
<td>Calculus II for the Social and Life Sciences</td>
<td>3</td>
</tr>
<tr>
<td>or MATH 31</td>
<td>Calculus II</td>
<td>4</td>
</tr>
<tr>
<td>STAT 1</td>
<td>Introduction to Statistics</td>
<td>3</td>
</tr>
</tbody>
</table>

Total Units: 9-11

It should be noted that there are variations in medical school admission requirements. For example, some schools also require or recommend one or more of the following courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIO 127</td>
<td>Developmental Biology (embryology)</td>

<td>General Genetics (genetics)</td>
<td>4</td>
</tr>
<tr>
<td>BIO 121</td>
<td>Molecular Cell Biology (cellular or molecular biology)</td>
<td>3</td>
</tr>
<tr>
<td>or BIO 180</td>
<td>Advanced Molecular Biology</td>
<td></td>
</tr>
<tr>
<td>CHEM 161</td>
<td>General Biochemistry (biochemistry)</td>
<td>3</td>
</tr>
</tbody>
</table>

And/or one year of a foreign language

For information on requirements for specific schools, contact your pre-health advisor or visit the Web site of the school you are interested in attending.

Applicants must take the Medical College Admissions Test (MCAT). The test should be taken after completing the recommended core curriculum. You should allow at least 10 months between taking the exam and the
date of planned matriculation. The schedule for the MCAT is currently under review. It is expected that beginning January 2007, the MCAT will become computer based and will be offered two to four times per year. For more information about dates, students should go to: www.aamc.org (http://www.aamc.org/). To ensure timely submission of all application materials (including letters of recommendation), students are strongly advised to take the exam no later than April of the year preceding planned matriculation. Your MCAT scores, especially your verbal reasoning score, are an important part of your application.

Most Allopathic Medical Schools subscribe to an application service called The Association of Medical Colleges Application Service (AMCAS). What this means is that you will have to complete a single (but very lengthy and complicated) initial application and submit a single set of transcripts and MCAT scores to AMCAS. In turn, AMCAS, for a fee, will distribute the materials to the medical schools you identify on the application. The AMCAS application is usually available in June of the year preceding the year you wish to matriculate. For example, the AMCAS application for admission in fall 2007 is available in June 2006. Participating medical schools set their own deadlines for receipt of application materials from AMCAS. The earliest deadline is usually November 1 of the year preceding planned admission. It is strongly recommended that you complete your AMCAS application soon after it becomes available, even if you plan to take the August MCAT.

The medical schools will review your AMCAS application and MCAT scores. After this review, the school will either reject your application or invite you to submit a school specific secondary application and letters of recommendation. Following a review of these materials, the school will either reject your application or invite you for an interview.

Osteopathic Medical School

Doctors of Osteopathic Medicine (D.O.’s) are “complete physicians.” This means that they are fully trained and licensed to diagnose illness, prescribe medication, and perform surgery. D.O.’s and allopathic physicians (M.D.’s) are the only two types of complete physicians in the United States. In California, as in most other states, the law accords holders of the D.O. and M.D. equal professional status and privileges as licensed physicians and surgeons. D.O.’s may practice all branches of medicine, including specialties like Pediatrics, Obstetrics and Gynecology, and Emergency Medicine.

To become a D.O., you must attend a School/College of Osteopathic Medicine. At the time of this catalog, 19 schools/colleges offered programs leading to the D.O. degree. The main difference between the training of osteopathic and allopathic physicians is that osteopathic medical students must take additional training in osteopathic manipulative medicine. To learn more about osteopathic medicine, students should visit the Web site of The American Association of Colleges of Osteopathic Medicine (AACOM).

To be admitted to a School/College of Osteopathic Medicine, a student must complete the recommended core curriculum listed above. As is the case for most health professional schools, students may be admitted without a baccalaureate degree. However, 97% of students enrolled in Osteopathic Medical Schools hold at least a baccalaureate degree. Most osteopathic medical schools do not specify a college mathematics requirement. However, it is recommended that students complete the same math courses that are required for admission to an allopathic medical school. In addition, like allopathic medical schools, some osteopathic medical schools also recommend or require upper division courses in biology and biochemistry.

Students seeking admission to osteopathic medical school must also take the Medical College Admissions Test (MCAT). Most osteopathic medical schools subscribe to an application service called The American Association of Colleges of Osteopathic Medicine Application Service (AACOMAS). Therefore, applicants file one application, a single set of transcripts, and one set of MCAT scores to AACOMAS, and the service distributes these materials to each of the colleges designated on the application.

Like allopathic medical schools, osteopathic medical schools require letters of recommendation at some stage in the process. However, it is important to note that one of the letters must be from a practicing doctor of osteopathic medicine. Therefore, students thinking about applying to osteopathic medical school should try to make contact with a D.O. early in their undergraduate studies.

Dental Schools

To become a dentist, students must complete a program leading to the D.D.S. (Doctor of Dental Surgery) or D.M.D. (Doctor of Dental Medicine) degree. Most dental school programs are four-year programs. However, a few dental schools (e.g., University of the Pacific) offer a three-year program. To be admitted to dental school, students must complete the recommended core curriculum listed above. In addition, many dental schools recommend or require that students complete one or more of the following courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIO 22</td>
<td>Introductory Human Anatomy (anatomy)</td>
<td>4</td>
</tr>
<tr>
<td>BIO 131</td>
<td>Systemic Physiology (physiology)</td>
<td>4</td>
</tr>
<tr>
<td>BIO 184</td>
<td>General Genetics (genetics)</td>
<td>4</td>
</tr>
<tr>
<td>BIO 127</td>
<td>Developmental Biology (embryology)</td>
<td>4</td>
</tr>
<tr>
<td>CHEM 161</td>
<td>General Biochemistry (biochemistry)</td>
<td>3</td>
</tr>
<tr>
<td>STAT 1</td>
<td>Introduction to Statistics (statistics)</td>
<td>3</td>
</tr>
</tbody>
</table>

Dental school applicants must take the Dental Aptitude Test (DAT) which is given year-round by appointment on computers. The test should be taken at least 10 months prior to matriculation.

Most dental schools subscribe to an application service called the Associated American Dental Schools Application Service (AADSAS). Therefore, students applying to participating schools must complete a single initial application and submit a single set of transcripts and DAT scores to AADSAS. However, after reviewing a students AADSAS application and DAT scores, most participating dental schools will require that students submit secondary applications and letters of recommendation.

Pharmacy Schools

To become a pharmacist, students must complete a program leading to the Doctor of Pharmacy (Pharm.D.) degree. Some, but not all, schools require the Pharmacy College Admission Test (PCAT). Prerequisite coursework also varies by school. Therefore, you should check with your pre-health advisor and the school’s Web site for information about standardized test and course requirements. Completion of the recommended core curriculum plus the following courses will satisfy course requirements for most pharmacy schools:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIO 22</td>
<td>Introductory Human Anatomy</td>
<td>4</td>
</tr>
<tr>
<td>BIO 131</td>
<td>Systemic Physiology</td>
<td>4</td>
</tr>
<tr>
<td>BIO 139</td>
<td>General Microbiology</td>
<td>4</td>
</tr>
</tbody>
</table>
course requirements for most optometry schools: recommended core curriculum plus the following courses will satisfy course requirements vary by school. However, completion of the matriculation (e.g., in Fall 2009 for admission in Fall 2010). Prerequisite taken no later than the fall of the year preceding the intended date of twice a year, once in October and once in February. The test should be take the Optometry Admissions Test (OAT). The OAT is administered leading to the Doctor of Optometry (O.D.) degree. Applicants must To become an optometrist, students must complete a program of study Veterinary Schools
To become a veterinarian, students must complete a program of study leading to the Doctor of Veterinary Medicine (D.V.M.) degree. Although it is becoming less difficult to gain admission to any U.S. veterinary school without being a resident of the state in which the school is located, residents of California most often attend the School of Veterinary Medicine at UC Davis. Applicants to the UC Davis Veterinary School must take the Graduate Record Examination (GRE) General Aptitude Test. The GRE must be taken no later than October 1 of the year preceding planned matriculation. Applicants to other veterinary schools are usually required to take the Veterinary College Admission Test (VCAT). Applicants to veterinary school must have formal animal/veterinary experience.

In addition to the recommended core curriculum listed above, students planning to attend the School of Veterinary Medicine at UC Davis should take the following courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIO 127</td>
<td>Developmental Biology</td>

Center for Mathematics and Science Education
Sequoia Hall 330
(916) 278-5487
Center for MASE Website (http://www.csus.edu/mase/)

Subject Matter Program (Foundational Level General Science)
The Science Subject Matter Program in foundational level general science is designed to meet the California Commission on Teacher Credentialing (CTC) subject matter requirement for students to enter a California Single Subject teaching credential program. Meeting the subject matter requirement is a credential program admission requirement, and can be met either through a subject matter program (such as those described below) or by taking a state approved content exam (currently the California Subject Exam for Teachers, the CSET). In order to meet the subject matter obtain a California K-12 Teaching Credential, a program requirement, all courses must be completed with a grade of "C-" or better. In order to teach public school in California, you must also complete a teaching credential program.

Subject matter programs are not degrees or concentrations; instead they are a series of courses that allow a student to meet the requirements for admission to a teaching credential program. Students must also complete a BA or BS degree (with any major) to fulfill the credential requirements.

The foundational science subject matter program is typically an entry-level credential. It is important for students obtaining the foundational science credential to see a faculty advisor or the department chair in the department of their academic major or the success center in the College of Education for feedback on the potential career paths for this credential. It is recommended that they do so early as it is critical that
their science coursework be carefully planned and coordinated to include the required subject matter program courses. In addition, students are encouraged to become involved with education related activities like grading, assisting in labs, tutoring K-12 students, and visiting schools; please speak with the subject matter advisors in your area for more information.

College of Social Sciences and Interdisciplinary Studies

College Overview

The College of Social Sciences and Interdisciplinary Studies (SSIS) provides dynamic curricula and activities that examine all aspects of human society through the study of social justice, policy, mental and physical health, culture, social behavior, and the natural environment within innovative departments, programs, and centers/institutes. Key to our students’ success is their awareness of culture and community, scientific thinking and analysis, anti-racist practices, and ethical decision-making.

The College offers bachelor’s and master’s degrees, as well as concentrations, minors, certificates. The University also offers a Doctorate in Educational Leadership, which reflects a partnership between our department of Public Policy and Administration and the College of Education. The knowledge and skills developed by the College’s programs are applicable to a wide variety of careers. Students should consult with individual departments for further career and graduate and professional school opportunities.

For more information about the College of Social Sciences and Interdisciplinary Studies, please click here (http://www.csus.edu/ssis/).
Program Descriptions

Anthropology
Located at the nexus of Natural Sciences, Social Sciences, and Humanities, Anthropology integrates diverse forms of knowledge into practical indexes for engagement with our everyday concerns. The program provides students "hands-on" experience to complement their in-class learning. Undergraduate and graduate students can participate in various projects including archaeological excavations, community engagement programs, and intern at various governmental and non-governmental agencies.

Asian Studies
The Asian Studies Program at California State University, Sacramento is an interdisciplinary program that seeks to prepare our students for a future in an economically and politically important and inter-connected Pacific Basin by providing an in-depth understanding of Asia from a political, cultural, and historical perspective.

Economics
The Economics major is designed to provide students with a broad education with special emphasis on the economic aspects of society and familiarization with techniques for the analysis of contemporary economic problems. A graduate degree is also offered.

Environmental Studies
The Bachelor of Arts or Bachelor of Science in Environmental Studies provides students with an interdisciplinary understanding of challenging issues like pollution, wildlife and wilderness preservation and restoration, land use, biodiversity loss, resource depletion, energy and natural resource conservation. They learn how policy and practice assess and address those challenges towards resilient natural systems and a sustainable society.

Ethnic Studies
Ethnic Studies offers an undergraduate degree through an interdisciplinary approach to the study of the cultures, languages, historical, and contemporary issues relating to African Americans, Asian Americans, Chicano-Latinx, and Native Americans. The program directs students to critically examine the contributions made by these groups to Americans, Chicanx-Latinx, and Native Americans. The program directs students to critically examine the contributions made by these groups to American society.

Family and Consumer Sciences
The Family and Consumer Sciences Department offers a Bachelor of Science degrees in Family Studies and Human Development; Fashion Merchandising and Management; Nutrition and Food, with the option of a Didactic Program in Dietetics; and Family and Consumer Sciences Education (Pre-credential Single Subject Program). Our majors study relationships between people and their diverse environments, focusing on the integration of physical, biological, cultural, economic and social influences on human behavior, lifespan development, and health.

Gerontology
Gerontology is an applied interdisciplinary program offering courses from a variety of departments and colleges. The Program prepares students to address challenges and positive life transitions related to individual and family health and illness in an aging society. Students apply concepts and theories in several service learning courses and two academically structured internships which aids in providing a solid knowledge and experiential base for careers in a wide variety of settings serving elders.

Liberal Studies
Students enjoy a wide-ranging selection of courses in different disciplines as they prepare for careers in K-12 education or in business and government.

Political Science
The Department of Political Science offers three majors including Political Science, International Relations, and Political-Science Journalism. We also offer a minor and a Masters in Political Science. Ideally located in the state capital, the Department offers students unique opportunities to integrate their studies of politics and theory through an extensive range of internships in state and local government.

Psychology
The undergraduate program in Psychology allows students to develop a scientific understanding of the behavioral, biological, cognitive, cultural, developmental, and social aspects of human behavior. Graduate programs offer an opportunity to pursue coursework and research experience in Applied Behavior Analysis, General Psychology, or Industrial-Organizational Psychology.

Public Policy Administration
The Department of Public Policy and Administration focuses on professional training for graduate students interested in working in or adjacent to the public sector. It offers a Master of Public Policy and Administration, a Certificate in Collaborative Governance for matriculated graduate students, and a Certificate in Judicial Administration through the College of Continuing Education. It also participates actively in the Doctorate in Educational Leadership Program.

Social Science
The Social Science Program provides a major and concurrent subject matter preparation for the Single Subject Teaching Credential in Social Science.

Sociology
The study of Sociology gives students the ability to observe human behavior, analyze data, and collaborate with others to achieve desired social change. The mission of the Sociology Department is to provide our students with the theoretical and substantive knowledge to participate as skilled professionals within the institutions and organizations that shape our region. Students have the opportunity to deepen their experience through internships at non-profits, and state and local government.

Women's and Gender Studies
Women's and Gender Studies is a dynamic interdisciplinary field preparing students to be future leaders, scholars, and social justice activists. We are dedicated to studying the social production of gender, and women's experiences in relation to formations of sexuality, race, class, nationality, ability, ageism, and other categories of difference. Students are prepared for careers in teaching, counseling, psychological or family therapy; law; health, social work, human services, and public service.

Departments/Programs

- Anthropology: BA; MA; Minor
- Asian Studies: BA; Minor
• Economics: BA; Certificate; MA; Minor
• Environmental Studies: BA; BS; Minor
• Ethnic Studies: BA; Certificate; Minors
• Family and Consumer Sciences: BS programs; Certificate; Minor; Subject Matter
• Gerontology: BS; Certificate; Minor
• Liberal Studies: BA
• Military Studies: Minor
• Peace Corps Prep: Certificate
• Political Science: BA programs; Certificate; MA; Minors
• Psychology: BA; Certificate; MA; Minor
• Public Policy and Administration: MPPA, Certificate
• Social Science: BA
• Sociology: BA; MA; Minor
• Women's and Gender Studies: BS; Minor

Centers/Institutes
The College of Social Sciences and Interdisciplinary Studies has a long history of involvement in social policy-oriented scholarship and instruction. That history, and the College’s current roster of talented researchers and instructors, has placed SSIS at the forefront of the University’s efforts to meet diverse community needs, consistent with the stated values of the University’s strategic plan. These efforts are channeled through the following centers, institutes, and other entities:

• Archaeological Curation Facility
• Center for Pacific Asian Studies
• Cooper-Woodson College Enhancement Program
• Educational Insights Center (EdInsights)
• Full Circle Project
• Institute for Social Research (ISR)
• Iranian and Middle Eastern Studies Center
• Hazel Cramer Endowed Chair
• Rekhi Singh Endowed Professor in Happiness

African Studies

Program Description
The Minor and Certificate in African Studies are identical programs. The Minor is recommended for students undertaking completion of a Bachelor’s degree. The Certificate is recommended for students who have already completed a Bachelor’s degree.

The program is intended to improve students’ understanding of modern Africa. As a significant part of the world community, Africa merits focused and sustained study. This program provides a cohesive, directed effort to develop students’ knowledge and appreciation for Africa’s peoples, geography, institutions, arts, customs, languages, traditions, resources, politics, and social structures. The program is designed and structured in a way that will be useful to the student, both professionally and academically. The Minor is of particular relevance for students interested in acquiring an integrated perception and understanding of Africa. The program provides different options: a specific emphasis in international relations; interests in a particular aspect of African life such as art, history, or society; or general intellectual curiosity.

The CSU International Programs provide opportunities for students at Sacramento State to study and live in Africa. This constitutes a valuable adjunct to African Studies on the campus. Students are strongly urged to take at least one year of a language used in Africa other than English. Course selection for each student is worked out with an advisor from the African Studies faculty in conjunction with the Director of Pan African Studies.

Anthropology

College of Social Sciences and Interdisciplinary Studies

Program Description

Anthropology is the study of humans, past and present. Anthropologists take a broad approach to understanding the varieties of human experience, which uniquely places us at the juxtaposition of the social sciences, natural sciences and the humanities. Anthropology is traditionally organized into four subfields that offer distinctive skills.

Cultural and Social Anthropology deals with the social lives of people around the world, including our own society: economic systems, legal practices, kinship, religions, medical practices, folklore, arts and political systems, as well as the interrelationship of these systems in environmental adaptation and social change. Anthropological Linguistics deals with varied aspects of human language and the characteristics of nonhuman communication systems, to achieve an understanding of past and present human language systems and their significance in social life.

Biological Anthropology is a biological science that deals with adaptations, variability and evolution of humans, and our living and fossil relatives. It is also a social science because biological anthropologists study human biology within the context of culture and behavior. Simply put, they study humans from a biocultural perspective across space and time. Physical Anthropology describes and compares world human
Special Features

MA in Anthropology

Minor in Anthropology

BA in Anthropology (Culture, Language and Society)

BA in Anthropology (Archaeology and Biological Anthropology)

BA in Anthropology (General Anthropology)

concentrations that share a common foundation.

Anthropology focuses on the material remains of human societies from the remote and recent past with emphasis on reconstructing and understanding past modes of human cultural adaptation and change.

While maintaining exposure to these four subfields, the Anthropology program allows students to sharpen their skills in specific domains of anthropological thought and practice. Students may choose from three concentrations that share a common foundation.

- **Archaeology and Biological Anthropology (ABA):** emphasizes a scientific approach to anthropology. Studying diverse topics including; evolutionary processes, human variation, ecology, skeletal analysis and zoo-archaeology, it prepares students for careers in the anthropological sciences in both the public and private sectors, such as cultural resources management, forensic science; collections management, and advanced graduate studies in anthropological sciences or related disciplines.

- **Culture, Language and Society (CLS):** introduces students to knowledge and skills necessary for a nuanced understanding and engagement with the world we live in. It prepares students for graduate studies in socio-cultural and linguistic anthropology, professional careers in government, business, law, healthcare and any contexts that require attention to cultural, social and linguistic dynamics.

- **General Anthropology (GA):** constitutes a solid liberal arts foundation that prepares students for careers and graduate studies in fields that call for a broad exposure to anthropological knowledge. Students, under the guidance of a faculty advisor, can also choose to customize a program of study to pursue individualized academic or professional interests.

**Degree Programs**

BA in Anthropology (General Anthropology) (p. 937)

BA in Anthropology (Archaeology and Biological Anthropology) (p. 933)

BA in Anthropology (Culture, Language and Society) (p. 935)

Minor in Anthropology (p. 940)

MA in Anthropology (p. 939)

**Career Possibilities**

Anthropology equips students with the necessary knowledge to engage with the political, economic, cultural, and social complexities of the world. In addition to providing students analytical and critical thinking skills, anthropology exposes students to the intersection of culture, biology, and history on peoples’ lived experiences. Majoring in Anthropology provides students a solid foundation for advanced studies in diverse fields such as anthropology, business, cultural resources management, law, journalism, medicine, communication, social work, urban studies, public policy, informatics, and any other profession that calls for the sustained engagement with cultural diversity, critical thinking, analytical abilities and people skills. Given the training they receive, anthropologists are increasing sought by the business world, government agencies and non-government organizations. Traditionally Anthropology majors have pursued careers in primary and secondary teaching; consumer market research; human resource development; local, state, and federal governmental agencies; non-governmental organizations (NGOs); archaeological field or laboratory technicians; forensic analysis, community development organizations; trade union organizations and allied fields. The globalized world economy has expanded this horizon to include career opportunities in communication, health care, entertainment, information technology, consumer product development, etc.

ANTH 1. Introduction to Biological Anthropology. 3 Units
General Education Area/Graduation Requirement: Life Forms (B2)
Term Typically Offered: Fall, Spring, Summer

Introduces students to the methods and theories used by anthropologists to study human evolution and the application to the human species. The course also becomes familiar with the stages of human and primate evolution.

ANTH 4. Language, Culture, and Critical Thinking. 3 Units
General Education Area/Graduation Requirement: Critical Thinking (A3)
Term Typically Offered: Fall, Spring

Introduces the abstract and formal structures of language and cultural dimensions of human communication via major linguistic anthropological concepts, theoretical assumptions, and methodologies. Addresses the logical, formal relationship between underlying rules of natural languages while critically analyzing how speakers from different cultures use language to convey complex social and cultural information. Course illuminates how language is used to create and reinforce relationships of power (race, class, gender); develops ability to recognize linguistic fallacies; and instructs in basic critical thinking skills.

ANTH 16. Comparative Early Civilizations. 3 Units
General Education Area/Graduation Requirement: Humanities (Area C2)
Term Typically Offered: Fall, Spring

Examines the emergence and development of early civilizations. Studies state formation, urbanization, market system development, and other processes relevant to the evolution of early civilizations from the standpoints of cross-cultural comparison and modern anthropological theory. The goal is to identify cross-cultural regularities as well as critical differences that can explain the various evolutionary trajectories of these societies. The civilizations that will be contrasted include societies from Mesopotamia, Egypt, the Indus Valley, China, Mesoamerica, Andean South America, and other regions.

ANTH 3. Introduction to Archaeology. 3 Units
General Education Area/Graduation Requirement: GE Area D
Term Typically Offered: Fall, Spring

Introduces students to the methods and theories used by archaeologists to find, recover, and interpret such remains in an effort to reconstruct and understand the lives of earlier peoples. The class uses archaeological case studies, films, and hands-on examples of tools and other artifacts produced by simple stone age hunters and more complex civilizations that lived in California and other parts of the world.

ANTH 101. Cultural Diversity. 3 Units
General Education Area/Graduation Requirement: Race & Ethnicity
Graduation Requirement (RE), United States History, GE Area D
Term Typically Offered: Fall, Spring, Summer

Focuses on analyzing the historically conditioned political, economic and social factors that have contributed to cultural diversity in the U.S.; a critical anthropological approach is developed to explore the intersection of race, class, gender, ethnicity and sexuality; the political economy of institutions and ideas, such as racism, classism, sexual stereotyping, family, religion, state, color-blindness, multiculturalism, etc.; and, discourses of cultural diversity in the U.S.
An upper division general introduction to cultural anthropology. Divided into two major parts: a survey of theories, methods and concepts of cultural anthropology, and an introduction to applied cultural anthropology.

**ANTH 103. Psychological Anthropology.** 3 Units

Prerequisite(s): ANTH 2 or ANTH 102.

Term Typically Offered: Fall, Spring

Cross-cultural comparative approach to human cognition, child-training practices, personality development, deviant behavior, cultural psychiatry, and data gathering techniques.

**ANTH 104. The History of Anthropology.** 3 Units

Prerequisite(s): ANTH 146 or instructor permission.

Term Typically Offered: Fall, Spring

Anthropological theory in historical perspective.

**ANTH 105. Anthropology of War.** 3 Units

Prerequisite(s): ANTH 146 or instructor permission.

Term Typically Offered: Fall, Spring

Examination of the nature of war, primarily as it occurs in pre-industrial societies, and a survey of the kinds of explanations of this phenomenon current in anthropology. Emphasis is on understanding the complexity, variability, and cultural imbeddedness of war as it occurs around the world.

**ANTH 106. Culture and Personality of the Chicano Child.** 3 Units

Term Typically Offered: Fall, Spring

Study of child growth and development patterns universal to all children with focus on the pressures and effects of the Mexican and Anglo cultures on the development of the Chicano child.

**ANTH 107. Anthropology of Hunters and Gatherers.** 3 Units

Prerequisite(s): ANTH 3

Term Typically Offered: Fall, Spring

Survey of the rapidly disappearing life way which anthropologists call hunting and gathering, with economies based on the use of wild plant and animal resources. Using ethnographic examples from the Arctic, southern Africa, rainforests in South America, deserts of Australia, and western North America, explores variation in hunter-gatherer societies with respect to differences in environment, technology, social organization, and the historical effects of interaction with more complex cultural groups. Models that attempt to explain long-term changes in this life way are also explored.

**ANTH 108. Economic Anthropology.** 3 Units

Prerequisite(s): ANTH 146 or instructor permission.

Term Typically Offered: Fall, Spring

Examines the fundamentals of economic anthropology through a focus on production, exchange, and consumption in a range of historical and ethnographic contexts. Introduces different frameworks for theorizing the economy and explaining human behavior and decision-making. Addresses central questions and issues in cultural anthropology on the origins of value, wealth and social stratification, the meanings of work, gift exchange and reciprocity, property regimes, morality and debt, marketing and desire.

**ANTH 109. Ecological and Evolutionary Approaches to Anthropology.** 3 Units

Prerequisite(s): ANTH 3

Term Typically Offered: Fall, Spring

Survey of anthropological research regarding the relationships between human behavior, ecology, and evolution. Reviews historic development of research in this field, and contrasts approaches based in ecological and evolutionary theory. Reviews and evaluates of case studies. Topics include hunter-gatherer and hominid economy and social organization, foraging theory, work effort, population growth and regulation, origins of agriculture, warfare, ritual and resource conservation, and origins of complex society.

**ANTH 110. Archaeological Method and Theory.** 3 Units

Prerequisite(s): ANTH 3.

Term Typically Offered: Fall, Spring

Traces the development of archaeology from its inception in the eighteenth century up to the present time. Readings, lectures, and class assignments follow the evolution of archaeological method and theory in relation to changing ideas about the role of culture, environment, and technology within the broader discipline of anthropology.

**ANTH 111. California Archaeology.** 3 Units

Prerequisite(s): ANTH 3

Term Typically Offered: Fall, Spring

Pre-contact California encompassed some of the most extensive environmental and cultural diversity ever to exist on the planet, containing widely divergent biota, many distinct languages and cultures, and among the densest hunter-gatherer populations ever recorded. At least 11,000-12,000 years of human occupation have been marked by multiple migrations and major shifts in technological and social organization. Explores long-term trends in cultural development across the state, and examines models used to explain why semi-permanent settlements, intensive subsistence strategies, and complex social institutions arose in some times/places and not others.
ANTH 112. Great Basin Archaeology. 3 Units
Prerequisite(s): ANTH 3
Term Typically Offered: Fall, Spring
Explores the cultural and natural history of the Great Basin from the last glacial maximum into the historic era. Though largely arid, this region in fact manifest considerable environmental variability and has seen significant climatic alterations since the Pleistocene. Human occupation of the Great Basin witnessed major changes in demography, technology, subsistence practices, and sociopolitical organization over the last 10-12,000 years. The course looks to understand cultural and environmental variability across the region through examination of the long-term material record and consideration of anthropological and biological models.

ANTH 113. Prehistory of the Southwest. 3 Units
Prerequisite(s): ANTH 3
Term Typically Offered: Fall, Spring
Survey of the prehistory of the Arizona, New Mexico, Western Colorado, Utah, and adjacent regions of Nevada, Texas and northwestern Mexico. Major prehistoric cultures of the Southwest (Hohokam, Anasazi, Mogollon, Fremont) are covered in detail. Focus on major transitions in subsistence and social organization emphasizing current issues of archaeological research. Cultural influences from outside areas are also considered.

ANTH 114. North American Prehistory. 3 Units
Prerequisite(s): ANTH 3
Term Typically Offered: Fall, Spring
Familiarizes students with the archaeological record of North America, and provides an analytical framework through which it may be understood in anthropologically meaningful terms. This will be accomplished by considering some of the explanations that have been proposed to account for the prehistory of the continent, and by examining the archaeological remains and cultural sequences found in various areas, including the North and Southeast, Great Plains, Pacific Northwest, and arctic/subarctic regions.

ANTH 115. Origins of Agriculture. 3 Units
Prerequisite(s): ANTH 3
Term Typically Offered: Fall, Spring
Surveys and evaluates worldwide anthropological perspectives of the origins of agriculture and the rise of complex society. Traces the development of major archaeological theories for the inception and spread of agriculture and civilization, acquainting students with groundbreaking archaeological research associated with each theoretical perspective. Current archaeological research is reviewed in-depth, providing a context for critique of the theories. Examples from North America, Latin America, the Middle East, India and China are compared and contrasted using movies, readings, and lectures.

ANTH 116. Old World Prehistory: Paleolithic Archaeology. 3 Units
Term Typically Offered: Fall, Spring
Old World Paleolithic archaeology from the emergence of hominids until the development of agriculture and civilization. Cultural developments in Africa, Asia, Europe and Australia are examined with the aim of highlighting similarities and differences in the process of technological, demographic, and sociopolitical change within each region. Explanatory models are offered to account for cultural evolution in various parts of the Old World are explored and assessed.

ANTH 117. World Prehistory and the Evolution of Modern Humanity. 3 Units
Prerequisite(s): Any lower-division Area B2 GE course
General Education Area/Graduation Requirement: Further Studies in Area B (B5)
Term Typically Offered: Fall, Spring
Covers human prehistory, from the emergence of culture through the domestication of plants and animals, and the origins of complex societies. Included are major cultural developments on every continent, emphasizing similarities and differences in the nature and timing of key technological, cultural, and sociological changes. Methodologies for learning about the past, major archaeological discoveries, important personalities, and contributions to the modern world are discussed in the context of understanding the strengths of a scientific approach to understanding the human past.

ANTH 118. The Anthropocene: Human Impacts on Ancient Environments. 3 Units
General Education Area/Graduation Requirement: Further Studies in Area B (B5)
Term Typically Offered: Fall, Spring
Designed to challenge students to critically evaluate past human relationships with their environment at the local, regional, and global scale over the past 10,000 years. The diachronic perspective of the course provides students with a broader understanding of contemporary challenges, such as anthropogenic climate change and declining biodiversity, that is rooted in our prehistoric past.

ANTH 119. Analysis of Faunal Remains. 4 Units
Prerequisite(s): ANTH 3 and Anthropology (Archaeological and Biological Anthropology) concentration.
Seminar on techniques and methods employed in analysis of faunal remains from archaeological sites, coupled with a laboratory providing hands-on identification of mammalian remains from these settings. Large focus on quantitative methods used in zooarchaeology to infer behavioral patterns of the human past and their paleoenvironments.

ANTH 120. Introductory Statistics for Anthropologists. 3 Units
Prerequisite(s): Anthropology (Archaeological and Biological Anthropology) concentration.
Term Typically Offered: Fall, Spring
Covers the conceptual framework involved in quantitative methods of data analysis commonly employed in anthropology. The emphasis is primarily on understanding concepts and secondarily on learning techniques of data analysis. Topics include data description and distributions, estimation procedures, hypothesis testing, and model fitting. Illustration of concepts in lecture are made with data from archaeology, physical anthropology, and social/cultural anthropology.

ANTH 121. Archaeology of Mexico. 3 Units
General Education Area/Graduation Requirement: Humanities (Area C2)
Term Typically Offered: Fall, Spring
Provides an upper division introduction to the archeology of Mesoamerica for students not majoring in anthropology. Discusses the evolution of the ancient civilizations of Mesoamerica, including Mexico, Guatemala, Belize, Honduras, and El Salvador. Examines the development of societies from the earliest inhabitants to the growth of empires. Includes coverage of the Olmecs, Monte Alban, Teotihuacan, the Classic Maya, the Toltecs, and the Aztecs.
Note: Cannot be used to meet the requirements of the Anthropology major; interested majors should take ANTH 122.
ANTH 122. The Evolution of Early Mesoamerican States. 3 Units
Prerequisite(s): ANTH 3
Term Typically Offered: Fall, Spring

Traces the emergence of pre-hispanic state societies in Mesoamerica from the growth of the earliest settlements to the collapse of the Aztec empire. Analyzes how complex societies evolved in Mesoamerica, focusing on such evidence as household and village social organization, craft specialization and interregional exchange, religion and ideology, and the logistics of state management and imperial expansion.

ANTH 123. Ancient Technology. 3 Units
Term Typically Offered: Fall, Spring

Examines the importance of various preindustrial technologies, and the techniques and methods involved in their manufacture and use. Topics include stone, bone, wood, and hide working, ceramics, weaving, metallurgy, and other crafts essential to human survival in ancient and contemporary societies around the world.

ANTH 124. Environmental Archaeology. 3 Units
Prerequisite(s): ANTH 3 and Anthropology (Archaeological and Biological Anthropology) concentration.
Term Typically Offered: Fall, Spring

All human societies depend on their natural surroundings, and so the reconstruction of prehistoric environments is an essential part of archaeological interpretation. Three interrelated aspects of environmental archaeology are considered: (1) general approaches to paleoenvironmental reconstruction, employing various biological and geological indicators; (2) the analysis of human plant and animal food remains; and (3) the geological and other processes that are responsible for the formation of archaeological deposits.

ANTH 125. Historical Archaeology. 3 Units
Term Typically Offered: Fall, Spring

Written history only records a small portion of human activities that occurred in the recent past. Explores the numerous methods of investigation, analysis and interpretation that are available to aid the historical archaeologist in discovering missing information and in some cases correcting erroneous statements, assumptions and interpretations about the past.

ANTH 126. Techniques of Archaeological Analysis. 3 Units
Prerequisite(s): ANTH 3 and Anthropology (Archaeological and Biological Anthropology) concentration.
Term Typically Offered: Fall, Spring

Introduces students to various approaches to archaeological analysis, focusing on how different classes of data are collected, classified, and interpreted to resolve research issues. Includes such topics as the handling, treatment, and analysis of flaked and ground stone tools, plant and animal food remains, and other types of archaeological materials. Lecture one hour, laboratory six hours.
Note: May be repeated once for credit.

ANTH 127. Cultural Resource Management in Theory and Practice. 3 Units
Prerequisite(s): ANTH 3
Term Typically Offered: Fall, Spring

Takes a wide-ranging look at how cultural resources are managed and preserved in California, the greater U.S., and other parts of the world. More than just a review of applicable laws and regulations, it is designed to offer a history of historic preservation, examine its role in our society, and explore the prospects for its continued presence. Practical aspects of Cultural Resource Management (CRM) are reviewed with respect to designing, budgeting, and performing archaeological surveys, site evaluation studies, and data recovery or mitigation programs.

ANTH 128. Indians of California. 3 Units
Term Typically Offered: Fall, Spring

Provides a survey of the traditional cultures of California Native American groups as they existed immediately after Western contact. Exploration of the ecological linguistic, economic, social, political, and religious diversity of California Native American groups provides a background for analysis of current anthropological theories of hunter-gatherer adaptations, subsistence intensification, political economy, cultural complexity, and California prehistory.

ANTH 130. Social Justice in Interdisciplinary Perspective. 3 Units
Prerequisite(s): Sophomore standing or instructor permission.
Term Typically Offered: Fall, Spring

Examines the nature and forms of social justice and injustice. Addresses key philosophical and theoretical models and debates over the meaning of social justice, using historical and contemporary examples to highlight important concepts and controversies. Faculty from different departments within SSIS, and occasionally from other colleges, will address how their discipline understands and analyzes issues of social justice. Students will be encouraged to critically assess the assumptions of various perspectives on social justice, and to address the relationship of academe and social activism in achieving social justice. Cross listed as ID 124, ENVS 124, ETHN 124, FACS 124 and SOC 124. Only one may be counted for credit.

ANTH 131. Europe in the Ethnographic Imagination. 3 Units
Prerequisite(s): ANTH 146 or instructor permission.
Term Typically Offered: Fall, Spring

More than a place or "continent," Europe is a social and ideological construction employed to unite diverse linguistic and cultural communities. Focuses on major themes in contemporary Europeanist anthropology, including transformations within and between local communities and regions (especially with regards to Northern Ireland, the former Society bloc, and Yugoslav federation), immigration, neo-nationalist extremism, the changing character of religious institutions, and the European Union as a framework for organizing identity and society.
The relationship between health, culture, and power, from the perspective of critical medical anthropology. Students will develop cross-cultural, historical, and ethical perspectives on health and explore the socio-cultural factors that contribute to health inequity. We will explore various health-oriented social movements to understand how injustice is embodied, as health has become a key vernacular of justice in a biopolitical era.

**ANTH 133. Life of Primates.**

*Prerequisite(s):* Any lower-division Area B2 GE course

**General Education Area/Graduation Requirement:** Upper Division Further Studies in Area B5

**Term Typically Offered:** Fall, Spring, Summer

Introduction to the biology of non-human primates - our closest living relatives with evolutionary histories that are simultaneously linked with and independent of our own, leading to a startling diversity of species and lifeways. Covers the living diversity of primates, their evolutionary origins and the relationships among living and fossil species, the social and ecological pressures selecting for anatomical/physiological and cognitive adaptations, the structures of their communities, and the existential threats faced by non-human primate species in a human-impacted world.

**ANTH 134. Japanese Culture and Society.**

**General Education Area/Graduation Requirement:** Humanities (Area C2)

**Term Typically Offered:** Fall, Spring

Culture of the Japanese: traditional and modern, rural and urban, cultural and social institutions; village and urban organization; and family structure. Aspects of social change in contemporary rural and urban Japan.

**ANTH 135. Indians of North America.**

**Term Typically Offered:** Fall, Spring

Provides a survey of traditional Native American societies and culture areas north of Mexico. Readings, lectures, and discussions emphasize primary ethnographic and historic data that provide the richest accounts of Amerindian cultures at the time of European contact and shortly thereafter.

**ANTH 138. Peopling of North America.**

*Prerequisite(s):* ANTH 3

**Term Typically Offered:** Fall, Spring

Introduction to the earliest evidence of human occupation of North America. Covered topics include the origins of the indigenous populations, the timing of the initial colonization, the number of migration events, paleoenvironment reconstruction, and causes for megafaunal extinctions. A variety of evidence will be discussed in detail, including chronology, paleoenvironmental data, the material culture, modern and ancient genetics, and linguistic prehistory. Political and social dimensions of conducting research on origins of Native Americans are also reviewed.
ANTH 146. Ethnographic Analysis. 3 Units
**Prerequisite(s):** ANTH 2.
**Term Typically Offered:** Fall, Spring

Introduces students to current techniques, theories, and debates in ethnographic research and analysis through the use of ethnographies and related works. Critically examines the production of ethnographic knowledge in socio-cultural anthropology from historical and contemporary perspectives.

ANTH 147. Peoples of Southeast Asia. 3 Units
**General Education Area/Graduation Requirement:** GE AREA D
**Term Typically Offered:** Fall, Spring, Summer

Survey of the native peoples of Southeast Asia (Laos, Vietnam, Thailand, Philippines, Malaysia, Indonesia, Burma and Singapore). Emphasis is on examining the forms of social and cultural pluralism in contemporary Southeast Asian societies.

ANTH 148. Anthropology of Chinese Societies. 3 Units
**Term Typically Offered:** Fall, Spring

Exploration of the cultures of three Chinese societies (Taiwan, Hong Kong, and the People's Republic of China) in each of their unique historical contexts. A comparison and contrast of how these societies, though sharing a common cultural heritage, have had different paths of development in recent times. Aspects of culture examined include: the state and political institutions; religious systems; kinship and social organization; economic processes; and issues of regional integration, nationalism and transnationalism.

ANTH 149. Cultures of South Asia. 3 Units
**General Education Area/Graduation Requirement:** GE AREA D
**Term Typically Offered:** Fall, Spring

Exploration of cultural practices in different South Asian societies. Analyzes the impact of colonialism, post-colonialism and discourses of modernity on South Asian societies. Examines the process of state formation, nation-building, communal conflict, economic transformations and the politics of caste, gender and class in contemporary South Asia.

ANTH 150. Human Osteology. 4 Units
**Prerequisite(s):** ANTH 1 and ANTH 1A, or BIO 22; and Anthropology (Archaeological and Biological Anthropology) concentration.
**Term Typically Offered:** Fall only

Provides students a hands-on, in-depth study of human osteology. Learn growth and development of the skeletal tissues and identification of the individual skeletal elements, and practice basic measurements, sexing and aging of skeletal material. A prerequisite for advanced techniques in forensic anthropology. Students will work with the department’s osteological materials.

ANTH 151. Human Paleontology. 3 Units
**Prerequisite(s):** ANTH 1 and ANTH 1A.
**Term Typically Offered:** Fall, Spring

Survey of the field of human evolution from primate beginnings to modern humans. Emphasizes the interpretation of the fossil evidence and the major trends in hominid evolution, including the origins and relationships of the extinct forms of humans.

ANTH 152. Comparative Primate Morphology. 3 Units
**Prerequisite(s):** ANTH 1 & ANTH 1A
**Term Typically Offered:** Fall, Spring

Study of skeletal and soft-anatomical components of living non-human apes in the context of evolution and development. Covers evolutionary theory, embryology, growth and development, taxonomy, systematics, and basic functional morphology of the skeletal system in primates. Three-hour seminar, with some lecture and hands-on experience with skeletons and casts.

**Note:** BIO 1, BIO 2 or BIO 7 recommended, but not required.

ANTH 153. Evolutionary Medicine. 3 Units
**Term Typically Offered:** Fall, Spring

Introduction to the application of evolutionary theory to human health and disease. Evolutionary medicine is a rapidly growing interdisciplinary specialization utilizing insights from evolutionary theory and human evolutionary ecology to inform understandings of human health, development and disease; and also to critique existing biomedical theory about the human condition. Topics include reproduction, child birth, lactation, growth and development, infectious diseases, parasites, diet and nutrition, mental and behavioral disorders, and substance use and addiction.

**Note:** ANTH 1, BIO 10, BIO 11, or PSYC 2 recommended.

ANTH 154. Primate Behavior. 3 Units
**Term Typically Offered:** Fall, Spring

Provides an introduction to primate social systems and the factors that influence their maintenance and evolution, including foraging strategies, demographic processes, mating and rearing strategies, conflicts and coalitions, and communication. Discussion of the theory guiding primate behavioral research will be supplemented with readings emphasizing current research in the field, to provide an understanding of how behavioral research is conducted and the diversity of primate behavior.

ANTH 155. Fundamentals of Biological Anthropology. 3 Units
**Prerequisite(s):** ANTH 1 and ANTH 1A.
**Term Typically Offered:** Fall, Spring

Survey of the development of method and theory in physical anthropology from its origins in zoology, anatomy, and medicine, to the various approaches currently used in the study of human biology and evolution. Concepts considered include the scientific method, modern genetics, evolutionary theory, the race concept and other approaches to explaining human variation, taxonomy and systematics, and macro-evolutionary models. Critical reading and analytical skills will be emphasized.

ANTH 156. Evolution of Human Behavior. 3 Units
**Prerequisite(s):** ANTH 1, BIO 10, or PSYC 2 recommended.
**Term Typically Offered:** Fall, Spring

Introduction to the application of evolutionary theory to human behavior and psychology. Reviews and contrasts contemporary perspectives of human behavioral evolution with emphasis on insights from the emerging field of evolutionary psychology. Topics include human behavior and cognition as adaptations, "selfish genes," game theory, evolution of social behavior, evolution of altruism, human mating strategies, parenting, behavioral disorders, evolution of the life cycle, human behavioral ecology, Darwinian medicine, and evolutionary psychology.
ANTH 157. Human Variation. 3 Units
Prerequisite(s): ANTH 1, BIO 10, or instructor permission.
Term Typically Offered: Fall, Spring
Survey of the basic principles of human genetics with emphasis on the mechanisms that shape human evolution and the development of human races. Analyzes the laws of heredity as exhibited in modern human populations and human adaptability to climatic extremes. Historical development of concepts. Discussion of most current research.

ANTH 158. Human Skeletal Analysis. 4 Units
Prerequisite(s): ANTH 150. Paired Course
Term Typically Offered: Spring only
Provides advanced techniques in osteology and forensic anthropology essential for many practicing physical anthropologists. Discussion and survey of the primary literature, followed by intensive hands-on experience with human skeletal remains. Included: techniques for determining age, sex and ethnicity; measurement; pathology; and trauma. The role of the forensic anthropologist and archaeologist, ethical considerations, and human rights issues are also covered. Two-hour seminar, and a six-hour lab involving substantial hands-on experience with human skeletal remains.

ANTH 159. Forensic Anthropology. 3 Units
Prerequisite(s): Any lower-division GE Area B2 course.
General Education Area/Graduation Requirement: Further Studies in Area B (B5)
Term Typically Offered: Fall, Spring
Overview of forensic anthropology - an applied field of biological anthropology that works with law enforcement, medical examiners, and human rights agencies. Forensic anthropologists answer questions of medico-legal significance by applying techniques designed for analysis of human skeletal remains. Includes determining time since death, the biological profile, trauma analysis and the role of the forensic anthropologist in human rights investigations.

ANTH 160. Linguistic Anthropology. 3 Units
Prerequisite(s): ANTH 4 or instructor permission.
Term Typically Offered: Fall, Spring
Introduction to language and linguistics for anthropologists with emphasis on the role of linguistic anthropology in the development of theory and method within the discipline; non-human communication systems, language acquisition, and culture theory; the fundamentals of descriptive and structural linguistics; types of human languages; the diversity and distribution of languages from prehistoric to modern times; fundamentals of historical linguistics and proto-cultural studies.

ANTH 161. African Cultures and Societies. 3 Units
Prerequisite(s): ANTH 146 or instructor approval
Term Typically Offered: Fall, Spring
Explores the cultural richness and regional variation of African societies. Engages students with central issues and debates pertaining to Africa in relation to the deepening global interconnectedness of the human socio-cultural worlds. Topical discussions include: colonial legacy, the postcolonial state and traditional authority; ethnic identity and cultural diversity; family, kinship and the African youth; masculinity, sexuality and women; Islam, Christianity and indigenous spirituality; health, poverty and development; migration and globalization; ecotourism and African cultures.

ANTH 162. Language and Culture. 3 Units
Prerequisite(s): ANTH 4 or instructor permission.
Term Typically Offered: Fall, Spring
Relationship between language and culture; historical relationships between languages; language families and major cultural traditions; cross-cultural studies of how the language influences perception and the organization of reality; the ways in which language is embedded in social life and practices, and the ways in which various cultural patterns and values are reflected in language.

ANTH 163. Urban Anthropology. 3 Units
Prerequisite(s): ANTH 146 or instructor permission.
Term Typically Offered: Fall, Spring
Overview of both anthropological method and theory applied to research of urban environments and a survey of significant anthropological studies that have been conducted in these settings. Examines such topics as the urbanization process, the culture of cities, urban sub-cultures, social problems in urban areas, social networks and adaptive kinship strategies in cities, and the concentration and exercise of power, wealth and influence in urban centers.

ANTH 164. Culture Change. 3 Units
Prerequisite(s): ANTH 146 or instructor permission.
Term Typically Offered: Fall, Spring
Anthropological study of mechanisms and process of social and culture change; basic theories of ecological adaptation and cultural evolution; action chains and cultural patterns; technological innovation, migration, acculturation, cultural dissonance, conflict, and cultural revitalization; analysis of case studies emphasizing contemporary conditions and problems; rapid technological innovation, population control, immigration and acculturation, social diversification, ethnic conflict.

ANTH 165. Applied Anthropology. 3 Units
Prerequisite(s): ANTH 105 or ANTH 108 or ANTH 140 or ANTH 141 or ANTH 142 or ANTH 167 or ANTH 168 or ANTH 176; and Anthropology (Culture, Language, and Society) concentration.
Term Typically Offered: Fall, Spring
Provides tools for exploring the application of an anthropological paradigm to various aspects of culture change and conflict. Content is organized into a series of critical topical areas such as modernization, economic development, human services, and urbanization.

ANTH 166. Rise of Religious Cults. 3 Units
General Education Area/Graduation Requirement: Humanities (Area C2)
Term Typically Offered: Fall, Spring, Summer
Examination of cult movements, involving comparisons of the ideals, objectives and symbolic processes common to ecstatic religious movements throughout the world -- from Melanesian cargo cults to the Peoples’ Temple. Anthropological perspectives are used to examine religious cults as conscious attempts to perpetuate traditional values and social goals or to radically change the status quo; millenarian movements, crisis cults, nature communes, exotic religious imports, and cult characteristics of modern secular movements.
ANTH 167. Religion and Culture.
Prerequisite(s): ANTH 146 or instructor permission.
Term Typically Offered: Fall, Spring

Examines ethnographic perspectives on the character and intersections of religion, ritual, and culture. Surveys the thought of "classical" social theorists (e.g., Durkheim, Tylor, Weber, and Evans-Pritchard), and concentrates on central topics in the anthropology of religion. Including the political nature of embodiment and trance, religion and nationalism, the significance of language and performance, the gendered character of many religious phenomena, and science and religion as competing epistemologies.

ANTH 168. Folklore in Anthropological Perspective.
Prerequisite(s): ANTH 160 or ANTH 162 or instructor permission.
Term Typically Offered: Fall, Spring

Anthropological contributions to the study of folklore; survey of oral literature and other folklore forms, such as myth, folklore, legend, proverb, riddle, and games, in their social contexts; folklore as "autobiographical ethnography," folklore in everyday life, survey and comparison of folklore traditions in several culture areas.

Prerequisite(s): ANTH 160 or ANTH 162, and Anthropology (Culture, Language, and Society) concentration.
Term Typically Offered: Fall, Spring

Consideration of language in its social context: language and power, language and gender, interethnic communication, language and race, pidgins and creoles, multilingualism, standardization, language ideology. Instruction in ethnographic and linguistic methods of data collection and analysis; identification of socially significant linguistic variables. Contributions of the study of contextualized speech to linguistic theory.

ANTH 170. The Religious Landscape of the Sacramento Valley.
Prerequisite(s): GWAR certification before Fall 09; or WPJ score of 80+; or 3-unit placement in ENGL 109M or ENGL 109W; or 4-unit placement in ENGL 109M or ENGL 109W and co-enrollment in ENGL 109X; or WPJ score 70 or 71 and co-enrollment in ENGL 109X.
General Education Area/Graduation Requirement: Humanities (Area C2), Writing Intensive Graduation Requirement (WI)
Term Typically Offered: Fall

Introduction to the field study of religious communities. Addresses the nature of religious pluralism in the U.S. today. The practice and belief systems of at least five different religious communities will be studied each semester. Students are required to do an in-depth term project based on research in one or more religious communities. Cross Listed: HRS 170; only one may be counted for credit.

Prerequisite(s): ANTH 1 and ANTH 1A or instructor permission
Term Typically Offered: Fall, Spring

An exploration of research conducted on human remains from archaeological sites, including historical and ethical perspectives. Examines the effects of funerary context and preservation on skeletal remains. Demonstrates relevance of human skeletal analysis to understanding demography, causes of human skeletal variation, dietary patterns, and relevant themes in paleopathological research. Special emphasis placed on infectious disease, growth and development, activity patterns, injury and trauma, craniofacial adaptations, and methods for identifying genetic relationships in human skeletal remains.

Prerequisite(s): ANTH 146 or instructor permission
Term Typically Offered: Fall, Spring

Introduces students to current anthropological research on social groups and cultural practices that orient around and draw inspiration from music, where and however it is conceived. Course focus is not on music theory or structure; rather, it critically examines anthropological and ethnographic works that focus on the relations among such social domains and features as visual and aural aesthetics, political belief, gender, ritual, religion, race, and ethnicity.

ANTH 173. Anthropology of Contemporary Asia.
Prerequisite(s): ANTH 146 or instructor permission
Term Typically Offered: Fall, Spring

This course examines contemporary Asia as an articulation of intersecting historical, cultural, political and economic processes. The course will focus on postcolonial developments and critically explore the manner in which process of globalization and neoliberal strategies embed themselves within, and the responses they elicit from societies across Asia.

ANTH 174. Anthropology of Food.
Prerequisite(s): ANTH 146 or instructor permission
Term Typically Offered: Fall, Spring

Examines food and eating from an anthropological perspective. Demonstrates how food communicates social messages about individual or group identity, creates social boundaries or forges belonging, and can reflect one's politics, values, and ethics. Through ethnographic examples and attention to global processes, this course explores food production, circulation, and consumption.

ANTH 175. Anthropology of Globalization.
Prerequisite(s): ANTH 146 or instructor permission
Term Typically Offered: Fall, Spring

The course introduces students to major themes that inform anthropological understanding of globalization. This course will explore theoretical perspectives, topics, and methods of analysis developed in anthropology to capture the effects of intermingling global/local cultural forces and the diverse relations of power that structure them and in which they are embedded.
ANTH 176. Museums, Culture, and Society. 3 Units
Prerequisite(s): ANTH 146 or instructor permission.
Term Typically Offered: Fall, Spring

Provides an introduction to museum anthropology. Surveys the emergence of modern anthropology from its origins in 17th century natural history to its late 19th century institutionalization in museums. Explores the role of collectors, curators and financial patrons in the development of museums and social theory. Examines the contemporary poetics and politics of museums and cultural interpretation, including cultural property rights, cultural self-representation, collaborative exhibit development, and the ethnography of museums.

ANTH 177. Museum Methods. 3 Units
Prerequisite(s): ANTH 176 and Anthropology (Culture, Language, and Society) concentration.
Term Typically Offered: Fall, Spring

Combined lecture and laboratory course designed to teach basic museum methods. Surveys contemporary issues and practices in museum governance, management, interpretation, and evaluation. Provides hands-on collections and exhibit experience, including participation in the design, fabrication and installation of an exhibition.

ANTH 178. Internship. 3 - 4 Units
Term Typically Offered: Fall, Spring

Practical experience in an approved professional environment. Student intern will work directly with professionals in public and private agencies where opportunities exist for anthropological work. Supervision and evaluation are provided by a faculty internship director and the on-site supervisor. Placements require from 15-20 hours per week. Note: May be repeated for credit.

Credit/No Credit

ANTH 179. Observing Primate Behavior. 3 Units
Prerequisite(s): ANTH 1 and ANTH 1A and Anthropology (Archaeological and Biological Anthropology) concentration or instructor permission.
Field trip
Term Typically Offered: Spring only – odd years

Introduces research design and methods employed in the study of non-human primate behavior. Topics covered include developing ethograms, behavioral and ecological sampling techniques, and basic methods for data analysis, including simple descriptive and analytical statistics. Culminates in a research report to address a specific research question through behavioral observations conducted at the Sacramento Zoo.

ANTH 181. Anthropology of Human Rights. 3 Units
Prerequisite(s): ANTH 146 or instructor permission.
Term Typically Offered: Fall, Spring

Examines multiple dimensions of human rights from an anthropological perspective. Explores the history and development of human rights ideas and legal conventions, and how these ideas and conventions are appropriated, adapted, contested or rejected in different cultural and political contexts. Using ethnographic case studies from around the world, addresses how the human rights discourse mediates the relationship between specific groups of people, their national states and international conventions and institutions.

ANTH 183. Women Cross-Culturally. 3 Units
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall, Spring

Position of women in various societies, preliterate through contemporary industrial; the evolution of women’s roles and rights cross-culturally.

ANTH 186. Culture and Poverty. 3 Units
Prerequisite(s): GWAR certification before Fall 09; or WPJ score of 80+; or 3-unit placement in ENGL 109M or ENGL 109W; or 4-unit placement in ENGL 109M or ENGL 109W and co-enrollment in ENGL 109X; or WPJ score 70 or 71 and co-enrollment in ENGL 109X.
General Education Area/Graduation Requirement: Writing Intensive Graduation Requirement (WI), Race & Ethnicity Graduation Requirement (RE), GE AREA D
Term Typically Offered: Fall, Spring

Analyzes poverty in American society: the cross-cultural context, social inequality in the U.S., theoretical perspectives and their influence on policy, present trends and implications for the future.

ANTH 187. Health Research in Biological Anthropology. 3 Units
Prerequisite(s): ANTH 1 and instructor permission.
Term Typically Offered: Spring only – even years

A laboratory-based introduction to health research methods in biological anthropology, with an emphasis on biological and behavioral health indicators in populations of living humans. The course will introduce students to health research design, measurement methods, and analysis. Lab topics will include biomarkers, survey methods, qualitative approaches, anatomical measurement, energetics and diet, vital statistics, and the use of behavioral health research instruments.

ANTH 188. Anthropology of the Body. 3 Units
Term Typically Offered: Fall, Spring

Study of the diverse ways that humans explain and attempt to alter the human body. Focus is on the meanings and implications of our own bodily experiences through objective comparison of the experiences, explanations and techniques found in our society with those in others.

ANTH 189. Critical Medical Anthropology. 3 Units
Prerequisite(s): ANTH 146
Term Typically Offered: Fall, Spring

Critical Medical Anthropology examines the interplay of cultural, environmental, and biological processes in diverse experiences of health and illness. Students will develop an understanding of the history of Medical Anthropology, its key themes and theoretical perspectives, and its present concerns. We will consider biomedicine as a cultural sphere, track the persistence of ‘alternative’ healing practices and the impact of social determinants on health, and analyze the formation of new demands on states and subjects in the name of suffering.

ANTH 190. Advanced Topics in Linguistic Anthropology. 3 Units
Prerequisite(s): ANTH 160 or ANTH 162 or instructor permission.
Term Typically Offered: Fall, Spring

Seminar examining contemporary developments in theories and methods of linguistic anthropology.

Note: May be repeated for credit providing the topic and instructor are not the same.
ANTH 191. Anthropology Practicum. 3 Units
Prerequisite(s): ANTH 165 or ANTH 169 or ANTH 177 or ANTH 192B; and senior level
Term Typically Offered: Fall, Spring

Students work 3-6 hours per week off campus in one of several research institutions under the supervision of institutional personnel. Students are required to become familiar with the scholarly literature relevant to their placement, to participate in on-campus meetings, and to write a research paper integrating the research and fieldwork aspects of the practicum. Permission of instructor and ANTH coordinator required prior to registration. Open to seniors only.

ANTH 192A. Laboratory Work in Archaeology. 1 Unit
Prerequisite(s): ANTH 195A; may be waived with instructor permission.
Term Typically Offered: Fall, Spring

Introduces methods used in the basic laboratory preservation, cataloging, and initial analysis of various materials recovered through ANTH 195A survey and excavation projects; always offered in conjunction with ANTH 195A.

Note: May be repeated for credit.

ANTH 192B. Laboratory in Ethnographic Techniques. 1 Unit
Prerequisite(s): ANTH 105 or ANTH 108 or ANTH 140 or ANTH 141 or ANTH 142 or ANTH 167 or ANTH 168 or ANTH 176, and Anthropology (Culture, Language, and Society) concentration.
Corequisite(s): ANTH 195B.
Term Typically Offered: Fall, Spring

Design and discussion of research strategies, primary ethnographic techniques, the development of interviewing skills, and practice in the use of various recording technologies.

ANTH 195A. Fieldwork in Archaeology. 2 Units
Prerequisite(s): ANTH 195A
Corequisite(s): ANTH 192B
Term Typically Offered: Fall, Spring

Introduction to archaeological field methods, covering practical aspects of how to identify and investigate isolated artifact finds, particular sites and features, and entire landscapes. Covering survey and excavation techniques, basic approaches to sampling, mapping and navigation, stratigraphic excavation, artifact and feature recording, and recovery methods.

Note: May be repeated for credit.

ANTH 195B. Fieldwork in Ethnology. 2 Units
Prerequisite(s): ANTH 105 or ANTH 108 or ANTH 140 or ANTH 141 or ANTH 142 or ANTH 167 or ANTH 168 or ANTH 176, and Anthropology (Culture, Language, and Society) concentration.
Corequisite(s): ANTH 192B
Term Typically Offered: Fall, Spring

Directed team fieldwork in ethnology.

ANTH 195C. Fieldwork in Physical Anthropology. 2 - 3 Units
Term Typically Offered: Fall, Spring

Individual or group fieldwork in various areas of physical anthropology, under the supervision of individual faculty members; may involve related supervised laboratory work.

ANTH 195S. Senior Seminar in Anthropology. 3 Units
Prerequisite(s): Anthropology majors with senior standing
Term Typically Offered: Fall, Spring

Anthropology approaches knowledge about the human condition from multidisciplinary perspectives. This senior seminar synthesizes fundamental themes from among the sub-disciplines. Students will engage with concepts and issues from different anthropological perspectives, and then work to identify common historical, methodological and theoretical anthropological themes. On completion of the course, students will have learned to seek and interpret anthropological knowledge in a holistic fashion.

ANTH 196T. Zooarchaeology. 3 Units
Prerequisite(s): ANTH 3
Term Typically Offered: Fall, Spring

An examination of past and recent research conducted on animal remains from archaeological sites. Discussion and survey of the primary literature in evaluating the role animal exploitation plays in human evolution and among small scale foraging, pastoralist, and complex societies. Emphasis on vertebrate taphonomy, reconstruction of diet from faunal remains, and ecological and evolutionary theory to understand human-animal relationships through time.

ANTH 196U. Language, Digital Literacies, & the Self. 3 Units
Prerequisite(s): ANTH 4
Term Typically Offered: Fall, Spring

Explores ethnographic approaches to digitally-mediated language and the self, examining how social actors acquire the digital skills and communicative norms that make up ‘digital literacies’ across cultural contexts and media ecologies. Topics include linguistic interaction in virtual worlds, media ideologies, technological constraints on digitally-mediated conversation, the role of language in the maintenance of digital communities and protest movements, new forms of meaning-making and affect enabled by the acquisition of digital literacies, and digital research methods.

ANTH 199. Special Problems. 1 - 3 Units
Prerequisite(s): Approval of the faculty member under whom the individual work is to be conducted and the Department chair.
Term Typically Offered: Fall, Spring

Individual projects or directed reading.

Note: Open only to students who appear competent to carry on individual work. May be repeated for credit.

Credit/No Credit

ANTH 200. General Methods in Anthropology. 3 Units
Term Typically Offered: Fall, Spring

Explores uses of scientific methodology in anthropology through the examination of specific case studies in the various specialties. Focus is on the relationship among techniques, methods, and methodology; hypothesis and theory; units of analysis and comparison; deductive and inductive reasoning; inferential processes; various types of comparison (casual, controlled, hologeistic); limitations of, and objections to, “the comparative method.”
ANTH 201. Anthropological Theory. 3 Units
Prerequisite(s): Graduate status in anthropology or instructor permission.
Term Typically Offered: Fall, Spring

Intensive reading and seminar discussion in topics on anthropological theory and research.
Note: May be repeated for credit provided topic is not repeated.

ANTH 202. Biological Anthropology Seminar. 3 Units
Term Typically Offered: Fall, Spring

Survey of contemporary issues in physical anthropology.

ANTH 203. Archaeology. 3 Units
Term Typically Offered: Fall, Spring

Explores the intellectual development of archaeological method and theory; examines the history of archaeological thought from its advent to the present day, looking in detail at pre-scientific, culture-historical, processual, and post-processual approaches to the discipline; emphasis is placed on the role of archaeology as a branch of anthropology and as a historical, humanistic, and/or scientific enterprise.

ANTH 204. Current Problems in Archaeological Method and Theory. 3 Units
Term Typically Offered: Fall, Spring

Explores recent methodological and theoretical developments within archaeology; focuses on contemporary debates within the discipline; topical coverage varies; examines conceptual and practical concerns, highlighting possibilities and limitations of new approaches to archaeological problems.
Note: May be repeated for credit provided topic and instructor are not repeated.

ANTH 205. Ethnology. 3 Units
Term Typically Offered: Fall, Spring

Seminar is designed for students to develop a working knowledge of anthropological approaches to a number of major issues in ethnology. The focus is on the analysis of case studies.
Note: May be repeated once for credit with different instructor.

ANTH 207. Language and Culture. 3 Units
Term Typically Offered: Fall, Spring

Critical examination of contemporary studies in the relationship between language and culture; nonhuman primate communication and the origin of speech; non-verbal communication; historical linguistics; comparative semiology; ethnosemantics; applications of linguistic models of analysis in the study of culture.
Note: May be repeated for credit given that the instructor changes.

ANTH 210. Research Design in Anthropology Seminar. 3 Units
Prerequisite(s): instructor permission,
Term Typically Offered: Fall, Spring

Emphasizes research design in anthropology with a focus on proposal writing in the discipline. Centers on the development of the thesis research proposal while gaining insight on the process of acquiring competitive funding from government agencies and private foundations. Covers the fundamentals of identifying a research question, developing hypotheses, comprehensive literature reviews, intellectual merit and broader impacts of research, and budget justification.

ANTH 211. Communicating Anthropology Graduate Colloquium. 1 Unit
Prerequisite(s): Graduate status in anthropology.
Term Typically Offered: Fall, Spring

Seminar for graduate students to develop oral and written communication skills within the discipline, to discuss current topics in the four fields of anthropology, and to introduce students to professional standards in the discipline. Specific topics covered in presentations and workshops will vary each semester.
Note: May be repeated for credit; no more than 3 units may count towards degree.

ANTH 219. Analysis of Faunal Remains. 4 Units
Prerequisite(s): Graduate status in Anthropology or instructor permission.
Term Typically Offered: Fall only – even years

Seminar on techniques and methods employed in analysis of faunal remains from archaeological sites, coupled with a laboratory providing hands-on identification of mammalian remains from these settings. Large focus on quantitative methods used in zooarchaeology to infer behavioral patterns of the human past and their paleoenvironments.

ANTH 222. Bioarchaeology Seminar. 3 Units
Prerequisite(s): Graduate status in anthropology.
Term Typically Offered: Fall, Spring

Provides an intensive, detailed discussion of method and theory in the skeletal biology of past human populations. Topics discussed include: demography, dietary analysis, mortuary dimensions, health and disease, biological distance and DNA analysis. Focuses on the interaction of biology and behavior, particularly the influence of culture and the environment on the skeletal and dental tissues.

ANTH 223. Areal Archaeology. 3 Units
Term Typically Offered: Fall, Spring

Provides an intensive examination of archaeological problems within a selected regional or topical area. Through general readings and case studies, students will critically assess how current perspectives regarding relevant issues have evolved and determine how contemporary viewpoints might be improved or expanded.
Note: May be repeated for credit provided topic and instructor are not repeated.

ANTH 226. Advanced Techniques of Archaeological Analysis. 3 Units
Prerequisite(s): ANTH 126 or instructor permission.
Term Typically Offered: Fall, Spring

Examines more refined approaches to archaeological analysis, focusing on how various classes of data are collected, classified, and interpreted to resolve directed research problems. Emphasis is on such topics as sampling procedures and statistical assessment of data rather than descriptive analysis and interpretation. Lecture one hour; laboratory six hours.

ANTH 251. Human Paleontology. 3 Units

Survey of the field of human evolution from primate beginnings to modern humans. Emphasizes the interpretation of the fossil evidence and the major trends in hominid evolution, including the origins and the relationships of the extinct forms of humans.
ANTH 254. Primate Behavioral Ecology. 3 Units
Prerequisite(s): Graduate status in Anthropology or instructor permission.
Term Typically Offered: Fall, Spring

Provides an intensive, detailed discussion of theoretical models and empirical studies of the behavior of non-human primates. Topics discussed include: grouping patterns, mating strategies, dominance, cooperation, and the adaptive values of social bonds. Focuses on the interaction of ecology and social behavior, particularly the influence of behavioral strategies that enhance reproductive success, and corresponding emergent group-level properties.

ANTH 258. Human Skeletal Analysis. 4 Units
Prerequisite(s): ANTH 150 or instructor permission. Paired course
Term Typically Offered: Spring only

Provides advanced techniques in osteology and forensic anthropology essential for many practicing physical anthropologists. Discussion and survey of the primary literature, followed by intensive hands-on experience with human skeletal remains. Included: techniques for determining age, sex and ancestry; measurement; pathology; and trauma. The role of the forensic anthropologist and archaeologist, ethical considerations, and human rights issues are also covered. Course format is a two-hour seminar, and a six-hour lab involving substantial hands-on experience with human skeletal remains.

ANTH 274. Environmental Anthropology. 3 Units
Term Typically Offered: Fall, Spring

Examines the mutual constitution of nature-culture, society-environment in diverse ethnographic settings. Demonstrates that ideas about nature and material engagements with it are shaped by the dynamics of social, political, and economic relations in historical contexts. Surveys a range of environmental issues and the cultural politics of environmental struggles through different conceptual, theoretical, analytical approaches in cultural anthropology.

ANTH 276. Museum Anthropology. 3 Units
Prerequisite(s): Graduate status in Anthropology or instructor permission.
Term Typically Offered: Fall, Spring

Surveys the practical, theoretical, and historical dimensions of museum anthropology and material culture studies, with particular emphasis on the U.S. and California. Situates contemporary issues related to the collection, exhibition, and repatriation of ethnographic and archaeological materials within the sociopolitical context of the globally based indigenous rights movement.

Note: Recommended for graduate students who plan to intern in the Anthropology Museum.

ANTH 278. Internship. 3 - 4 Units
Term Typically Offered: Fall, Spring

Practical graduate level experience in an approved professional environment. Student intern will work directly with professionals in public and private agencies where opportunities exist for anthropological work. Supervision and evaluation are provided by a faculty internship director and the on-site supervisor. Placements require from 15-20 hours per week.

Note: May be repeated for credit given that topic and instructor changes.

Credit/No Credit

ANTH 292A. Laboratory Work in Archaeology. 1 Unit
Prerequisite(s): ANTH 192A.
Corequisite(s): ANTH 295A.
Term Typically Offered: Fall, Spring

Laboratory preservation, cataloging and initial analysis of materials recovered through archaeological fieldwork. Graduate students are expected to help supervise undergraduate students and complete a self-directed project under the supervision of the instructor.

Note: Participant must have already completed ANTH 192A or its equivalent. May be repeated once for credit.

ANTH 295A. Fieldwork in Archaeology. 2 Units
Prerequisite(s): ANTH 195A or equivalent.
Corequisite(s): ANTH 292A.
Term Typically Offered: Fall, Spring

Students will assist the instructor in supervising undergraduate students or complete an assigned project in addition to the required fieldwork.

Note: May be repeated given that the topic and instructor changes.

ANTH 295B. Fieldwork in Ethnology. 2 - 3 Units
Term Typically Offered: Fall, Spring

Supervised graduate level fieldwork in ethnology and ethnography.

ANTH 295C. Fieldwork in Physical Anthropology. 2 - 3 Units
Term Typically Offered: Fall, Spring

Supervised graduate level fieldwork in physical anthropology. May include laboratory research.

ANTH 299. Special Problems. 1 - 3 Units
Prerequisite(s): Approval of faculty member under whom individual work is to be conducted and the Department chair.
Term Typically Offered: Fall, Spring

Individual projects or directed reading.

Note: Open only to students who appear competent to carry on individual work at the graduate level; May be repeated given that topic and instructor changes; May be taken twice in the same semester.

Credit/No Credit

ANTH 500. Master's Thesis. 3 Units
Prerequisite(s): Advanced to Candidacy, successful completion of thesis research proposal, and chair permission of his/her thesis committee.
Term Typically Offered: Fall, Spring

Completion of a thesis approved for the master's degree. Number of units of credit is determined by the candidate's Master's degree advisory committee. Should be taken in final semester prior to the completion of all requirements for the degree.

BA in Anthropology (Archaeology and Biological Anthropology)

Units required for Major: 52, includes units of study in chosen concentration
Total units required for BA: 120

Program Description

The Archaeological and Biological Anthropology concentration provides students with the knowledge, skills and perspectives of scientific anthropology. It prepares students for careers in the anthropological
sciences, such as cultural resources management, skeletal identification, zoological or museum technicians, or for graduate training.

**Minimum Grade Requirement**
Except for General Electives, all requirements must be completed with a grade of "C-" or better.

28

1. To help you complete your degree in a timely manner and not take more units than absolutely necessary, there are ways to use single courses to meet more than one requirement (overlap). For further information, please visit the General Education page (p. 1103).

**BA in Anthropology (Culture, Language and Society)**

Units required for Major: 52 units, includes units of study in chosen concentration

Total units required for BA: 120

**Program Description**

The Culture, Language & Society concentration develops knowledge, skills and perspectives to understand and engage with our diverse, interconnected world. It is designed to meet the needs of students who wish to pursue graduate work or post-baccalaureate careers in government, the non-profit sector, education, healthcare or other contexts that require attention to cultural and linguistic dynamics.

**Minimum Grade Requirement**

Except for General Electives, all requirements must be completed with a grade of "C-" or better.

**Graduation Requirements**

To help you complete your degree in a timely manner and not take more units than absolutely necessary, there are ways to use single courses to meet more than one requirement (overlap). For further information, please visit the General Education page (p. 1103).

Note: There is no way to list all possible overlaps so please consult with a professional advisor. The Academic Advising Center can be visited online (http://www.csus.edu/acad/), by phone (916) 278-1000, or email (advising@csus.edu).

Required in Major; also satisfies GE.
Race and Ethnicity in American Society (RE) 3

Foreign Language Proficiency Requirement 2 6

1 To help you complete your degree in a timely manner and not take more units than absolutely necessary, there are ways to use single courses to meet more than one requirement (overlap). For further information, please visit the General Education page (p. 1103).
Note: There is no way to list all possible overlaps so please consult with a professional advisor. The Academic Advising Center can be visited online (http://www.csus.edu/acad/), by phone (916) 278-1000, or email (advising@csus.edu).

2 If not satisfied before entering Sacramento State, it may be satisfied in General Education Area C2 (Humanities). "C- or better required."
The alternative methods for satisfying the Foreign Language Proficiency Requirement are described here: https://www.csus.edu/college/arts-letters/world-languages-literatures/foreign-language-requirement.html (https://www.csus.edu/college/arts-letters/world-languages-literatures/foreign-language-requirement.html)

MA in Anthropology
Total units required for MA: 30

Program Description
The Master of Arts program in Anthropology is designed for students who plan to continue their graduate studies in Anthropology at the Ph.D. level as well as for students who plan to pursue any of the numerous opportunities for graduate anthropologists, such as in private research, cultural resource management, private foundations, Foreign Service, education, and government.

The program provides general graduate-level training in four interrelated fields: sociocultural anthropology, archaeology, biological anthropology, and linguistic anthropology. Beyond this foundation, each student designs a plan of coursework specific to their post-graduate goals in one of the four subfields. Students are then expected to demonstrate mastery of their subfield by preparing a thesis of original scholarly research.

Students may develop their special interests through individual arrangements with their faculty advisors, or they may take advantage of opportunities for special training in such areas of Applied Anthropology as cultural resource management, museology, Anthropology in education, and medical Anthropology through participation in ongoing informal programs which may include special field work or intern placement with local agencies. Prospective students should visit the department website or contact the Graduate Coordinator for updated information on special opportunities.

Admission Requirements
Admission to classified graduate standing in Anthropology requires:

• a baccalaureate degree;
• a minimum 3.0 cumulative GPA for all undergraduate coursework.

Applicants lacking an undergraduate degree in anthropology may be conditionally accepted upon satisfactorily completing a set of prerequisite upper-division coursework based on the applicant’s interests and goals in anthropology.

Admission Procedures
To apply, applicants must complete a university application and a separate departmental application by the posted application deadline dates. Please submit the following to the Sacramento State Office of Graduate Studies:

• an online application for admission via CalState Apply;
• one set of official transcripts from all colleges and universities attended, other than Sacramento State. Physical transcripts can be addressed to or dropped off at:
  Office of Graduate Studies
  California State University, Sacramento
  River Front Center 215, MS 6112
  6000 J Street
  Sacramento, CA 95819

For electronic transcripts submissions systems that allow for you to enter an e-mail address, please use the following e-mail address: Grad_Admissions@csus.edu. It is the responsibility of the applicant to enter the correct e-mail address and to confirm that the Office of Graduate Studies has received their transcript(s).

• official Graduate Record Exam (GRE) official scores. The CSUS Institution code is 4671.

For more admissions information and application deadlines, please visit http://www.csus.edu/gradstudies/.

At the same time, each applicant must file online with the Anthropology Department:

• a completed Supplemental Application Form
• in no more than two pages, provide a statement of interest that includes a brief autobiographical sketch, a statement of your research goals in anthropology, how and why the Anthropology program at Sacramento State can help you achieve your goals (including specific potential faculty mentors), and any other information that may help distinguish you from other applicants.
• two signed letters of recommendation on official letterhead from individuals who can assess the applicant’s potential for graduate study

Each applicant may also submit a CV or resume that reflects relevant professional experience.

For more information regarding the department supplemental application, please visit https://www.csus.edu/anth/

Minimum Units and Grade Requirement for the Degree
Units required for the MA: 30

Minimum Cumulative GPA: 3.0

Advancement to Candidacy
Each student must file an application for Advancement to Candidacy indicating a proposed program of graduate study. This procedure may begin as soon as the classified graduate student has:

• removed any deficiencies in admission requirements;
• completed at least 12 units of 200-level Anthropology courses with a minimum 3.0 GPA;
• completed an approved draft of the thesis research proposal; and
• successfully passed a preliminary exam in their area of study
• completed a Graduate Writing Intensive (GWI) course in their discipline (ANTH 202, ANTH 203, ANTH 205, or ANTH 207) with a grade of "B" or better within the first two semesters of coursework at California State University, Sacramento.

Students should contact the Graduate Coordinator for current deadlines.

Note: Students may not enroll in ANTH 500 until Advanced to Candidacy, successful completion of thesis research proposal, and chair permission of his/her thesis committee. Advancement to Candidacy forms are available on the Office of Graduate Studies website. The student fills out the form after planning a program of study in consultation with his/her Anthropology faculty advisors. The completed form is then returned to the Office of Graduate Studies for approval.

1 Grade "B" or better required in each course listed to count towards the core seminar requirement. Grade "B" or better required in one core seminar to count towards the Graduate Writing Intensive (GWI) requirement.

2 ANTH 200, 201, 204, 211 and 223 may be repeated under different instructor or topic.

3 Specific electives must be approved in advance by the student's Thesis Committee. For paired undergraduate-graduate lecture courses, graduate students must enroll at the 200-level. Graduate students who completed the 100-level paired course as an undergraduate may not retake the same course at the 200-level. No more than six semester units of paired coursework may count towards the degree. No more than six semester units of approved course credit from another department may be accepted towards general electives. No more than 3 units of ANTH 211, ANTH 278 or ANTH 299 may be applied to the MA. ANTH 278 and ANTH 299 courses that have passed the seven-year University limit may not be applied to the MA.

4 Students may not enroll in ANTH 500 until Advancement to Candidacy, successful completion of the thesis research proposal, and chair permission of his/her thesis committee. Students who do not finish their thesis within the semester of enrollment in ANTH 500 must enroll in ANTH 599 for up to three consecutive semesters to sustain their graduate standing. Students must re-enroll in ANTH 500 if they do not complete the thesis within four semesters.

Minor in Anthropology

Units required for Minor: 18, twelve of which must be in upper division

Program Description

Anthropology is the study of humans, past and present. Anthropologists take a broad approach to understanding the varieties of human experience, which uniquely places us at the juxtaposition of the social sciences, natural sciences and the humanities. Anthropology is traditionally organized into four subfields that offer distinctive skills.

1 There are no specific course requirements. However, no more than 3 units of the courses below may be counted toward the minor.

Asian Studies

College of Social Sciences and Interdisciplinary Studies

Program Description

Our Asian Studies Program geographically encompasses East Asia (China/Taiwan, Japan, the Koreas, and Mongolia), Southeast Asia (Brunei, Cambodia, East Timor, Indonesia, Laos, Malaysia, Myanmar, the Philippines, Singapore, Thailand, and Vietnam), and South Asia (Afghanistan, Bhutan, India, Maldives, Nepal, Pakistan, and Sri Lanka). We offer in depth examinations of particular countries while also analyzing
transnational issues that connect Asia, other regions, and the rest of the world including the United States.

The major is designed to provide students with a coherent introduction to the language, history, and culture of these Asian societies and to develop an interdisciplinary understanding of the major social and political forces at work in the region, supported by appropriate language training. Graduates of the program either continue their studies at graduate institutions or utilize their knowledge and training through employment in government, business, education, or the non-profit sector relating to this increasingly important region of the world.

The minors offer students a framework to explore one or more Asian societies from an interdisciplinary perspective. It is particularly relevant for students in various academic or applied disciplines who have a regional interest in Asia.

**Degree Programs**

BA in Asian Studies (p. 943)

BA in Asian Studies (Chinese Studies) (p. 945)

BA in Asian Studies (Japanese Studies) (p. 947)

BA in Asian Studies (Korean Studies) (p. 949)

Minor in Asian Studies (p. 952)

Minor in Korean Studies (p. 952)

Minor in South and Southeast Asian Studies (p. 952)

**Special Features**

- The program comprises faculty in departments such as Anthropology, Art, Education, Ethnic Studies, History, Humanities and Religious Studies, Philosophy, Political Science, Psychology, and World Languages and Literatures.
- The program strongly encourages students to expand their horizons through training in Asian languages and study abroad opportunities.
- Our major can help you develop tangible skills: language ability, adaptability, open-mindedness, care & compassion, cultural awareness, knowledge of the region, and more. It is also a program that is well-suited to partnering with your current pathway, earning a credential with a second major, or a minor in Asian Studies, Korean Studies, or South and Southeast Asian Studies.

**ASIA 1. Asia in the World Today.** 3 Units

General Education Area/Graduation Requirement: GE AREA D

Term Typically Offered: Fall only

This course provides a foundation in the area studies discipline of Asian Studies as a distinct thematic and geographic area of inquiry. Offers a brief introduction to trending issues in East, Southeast, and South Asia, such as migration, human rights, religion, development, food, film, music, etc. through the lens of art, geography, history, culture, economics, society, religion, and politics.

**ASIA 96. The Way of Chanoyu: An Interdisciplinary Approach to the Japanese Tea Gathering.** 3 Units

Term Typically Offered: Fall, Spring

This course traces the development of a multifaceted cultural practice integrating architecture, garden design, art, painting, and calligraphy into a carefully constructed hospitality ritual. Students explore multiple aspects of Japanese Chado via hands-on learning including aesthetic, economic, scientific, socio-political and cultural dimensions associated with tea. The course is taught in the Nakatani Tea Room, including weekly classroom lectures and discussions, demonstrations, on-line learning modules, a group project, and typically, a day field trip to San Francisco. Field trip(s) may be required.

**ASIA 110. Anthropology of Contemporary Asia.** 3 Units

Prerequisite(s): ANTH 146 or instructor permission

This course examines contemporary Asia as an articulation of intersecting historical, cultural, political and economic processes. The course will focus on postcolonial developments and critically explore the manner in which process of globalization and neoliberal strategies embed themselves within, and the responses they elicit from societies across Asia.
ASIA 111. Asian Diaspora and Migration. 3 Units
General Education Area/Graduation Requirement: GE AREA D, Race & Ethnicity Graduation Requirement (RE)
Term Typically Offered: Fall only
Survey of the social, political, and economic factors surrounding contemporary transnational migration across and beyond Asia. Presents a comparative analysis of the impact of colonialism and the Cold War on Asian diaspora and engages with theoretical debates in migration studies. Examines the intersectionality of class, gender, and ethnicity upon immigrant communities in the U.S. and around the world.

ASIA 134. History of Modern Korea. 3 Units
General Education Area/Graduation Requirement: Humanities (Area C2)
Term Typically Offered: Fall only
Traces the historical development of modern Korea since the colonial era of the late 19th century. Explores historiographies, theoretical debates, and films dealing with the following themes: national ideology and national bodies, economic and political contentions, modern education and scientific management, class and gender formation, capitalism and urbanization, colonial migration and cosmopolitanism, anti-colonialism, and socialist/revolutionary thought.

ASIA 135. Contemporary Korean Culture. 3 Units
Term Typically Offered: Spring only
This course provides a comprehensive understanding of Korean culture and society through the analysis of contemporary Korean popular media. By critically examining the particular cultural phenomenon of the Korean Wave, this course upholds various Korean popular media (film drama, documentaries, and music) as significant forms of visual culture, which reflect as well as shape the reality of people’s everyday lives both within and outside Korea.

ASIA 136. Korean Development and Behavior. 3 Units
This course examines critical issues in Korean human development and behavior with particular attention given to current theoretical perspectives within a fast developing society. Topics include identity, cognitive development, mental health, tiger parenting, gender roles, socio-emotional development, body image, and transracial adoptions. This course integrates an interdisciplinary approach and includes indigenous discourse on Confucianism and Eastern and Western thought to understand the underlying processes of the Korean heritage person as an individual and as a member of a larger society.

ASIA 137. North Korean Politics and Society. 3 Units
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall only
Examines the unique type of North Korean socialism, nationhood, and 'peoplehood', and provides a new historical and theoretical understanding of militarization, socialist transition in a global economy, social hierarchy, political leadership, and foreign policy. Explores theories of state and socialism, historical narratives, ethnographies, firsthand witness stories, journalistic analysis, documentaries, and films made in and beyond North Korea.

ASIA 140. Modern East Asian Cinema. 3 Units
Prerequisite(s): GWAR certification before Fall 09; or WPJ score of 80+; or 3-unit placement in ENGL 109M or ENGL 109W; or 4-unit placement in ENGL 109M or ENGL 109W and co-enrollment in ENGL 109X; or WPJ score 70 or 71 and co-enrollment in ENGL 109X.
General Education Area/Graduation Requirement: Writing Intensive Graduation Requirement (WI), Arts (Area C1)
Term Typically Offered: Fall, Spring, Summer
Survey of the development of cinema in Asia, focusing primarily on cinematic masterpieces from China, Hong Kong, and Japan. Focuses on directors, actors, and studios that left a lasting mark on cinema history. Also focuses on how the Asian aesthetic sense differs from the Hollywood norm.
Cross-Listed: HIST 140; only one may be counted for credit.

ASIA 146. US-China Relations. 3 Units
General Education Area/Graduation Requirement: Humanities (Area C2)
Term Typically Offered: Fall, Spring, Summer
This course explores the historical foundation of US-China relations, tracing from 19th century encounters through world wars, ideological confrontation, rapprochement, and into the contemporary era. Focus on international and political dimension of diplomatic and strategic interests, also explores cultural and social connections through trade, investment, migration, and tourism.
Cross-listed: POLS 146.

ASIA 151. Genocide in Southeast Asia. 3 Units
Term Typically Offered: Fall, Spring
Survey of human rights abuses and genocides that have occurred in post-colonial Southeast Asia. Focuses on mass killings in Indonesia and Cambodia and communal riots often targeting the ethnic Chinese community, religious minorities, or highland peoples like the Hmong. Topics include cultural genocide, ideological pressure, and ethnic intolerance. An interdisciplinary literature will interpret the causes and conditions while introducing students to the diverse societies and cultures of Southeast Asia.

ASIA 190. Travel Study in Asia. 1 - 6 Units
Term Typically Offered: Fall, Spring, Summer
A faculty-led study abroad course to Asia. Students will learn about one or more Asian countries through living and traveling in the country(ies), classroom instruction, and field trips to various sites. Fee course. Field trip(s) may be required.

ASIA 195. Internship: Asian Studies. 1 - 3 Units
Term Typically Offered: Fall, Spring
Supervised work experience on topics related to the study of Asia's art, culture, economics, geography, environment, politics, and government and social issues.
Credit/No Credit
ASIA 198. Modernity and Globalization in Asia. 3 Units
Prerequisite(s): GWAR certification before Fall 09; or WPJ score of 80+; or 3-unit placement in ENGL 109M or ENGL 109W; or 4-unit placement in ENGL 109M or ENGL 109W and co-enrollment in ENGL 109X; or WPJ score 70 or 71 and co-enrollment in ENGL 109X.

General Education Area/Graduation Requirement: Writing Intensive Graduation Requirement (W), Humanities (Area C2)

Term Typically Offered: Spring only

Survey of the history, politics, culture, and economy across Asia. Engages with key topics that have shaped Asia as of today and introduces the rise of the modern, building of nation-states, and globalization. Examines the impact of colonialism, imperialism, cold war politics, developmentalism, and global concerns across and beyond Asian countries.

ASIA 199. Special Problems. 1 - 3 Units
Term Typically Offered: Fall, Spring

Individual research projects, including directed readings, under the direction of an Asian Studies faculty person.
Credit/No Credit

BA in Asian Studies

Units required for Major: 39-43

Total units required for BA: 120

1 The major requires a minimum of 12 upper division units.

Our Asian Studies Program geographically encompasses East Asia (China/Taiwan, Japan, the Koreans, and Mongolia), Southeast Asia (Brunei, Cambodia, East Timor, Indonesia, Laos, Malaysia, Myanmar, the Philippines, Singapore, Thailand, and Vietnam), and South Asia (Afghanistan, Bhutan, India, Maldives, Nepal, Pakistan, and Sri Lanka). We offer in depth examinations of particular countries while also analyzing transnational issues that connect Asia, other regions, and the rest of the world including the United States. Students may also find interest in minors in Korean Studies and South and Southeast Asian Studies or in Chinese or Japanese language.

The major is designed to provide students with a coherent introduction to the language, history, and culture of these Asian societies and to develop an interdisciplinary understanding of the major social and political forces at work in the region, supported by appropriate language training. Graduates of the program either continue their studies at graduate institutions or utilize their knowledge and training through employment in government, business or education relating to this increasingly important region of the world.

**Language Study**

Language proficiency is not required for the major, however, students are highly encouraged to study an Asian language.

**Total Units** 39-43

1. Course also satisfies General Education (GE)/Graduation Requirement.
2. Students must take seven total courses from at least four groups. Seven 3 unit classes will equal 21 units. Kinesiology courses may be 1 unit, while second year Language courses may count for 4 units. Thus, students must complete a minimum of 7 courses that equals a minimum of 21 units, though seven classes that include language may total up to 25 units.

To help you complete your degree in a timely manner and not take more units than absolutely necessary, there are ways to use single courses to meet more than one requirement (overlap). For further information, please visit the General Education page (p. 1103).

Note: There is no way to list all possible overlaps so please consult with a professional advisor. The Academic Advising Center can be visited online (http://www.csus.edu/acad/), by phone (916) 278-1000, or email (advising@csus.edu).

Graduation Requirements (required by CSU) (9 Units)
- American Institutions: U.S. History
- American Institutions: U.S. Constitution & CA Government
- Writing Intensive (WI)

Graduation Requirements (required by Sacramento State) (6 Units)
- English Composition II
- Race and Ethnicity in American Society (RE)
- Foreign Language Proficiency Requirement

1 To help you complete your degree in a timely manner and not take more units than absolutely necessary, there are ways to use single courses to meet more than one requirement (overlap). For further information, please visit the General Education page (p. 1103).

Note: There is no way to list all possible overlaps so please consult with a professional advisor. The Academic Advising Center can be visited online (http://www.csus.edu/acad/), by phone (916) 278-1000, or email (advising@csus.edu).

2 Satisfies Graduation Requirement.

3 If not satisfied before entering Sacramento State, it may be satisfied in General Education Area C2 (Humanities). “C- or better required.” The alternative methods for satisfying the Foreign Language Proficiency Requirement are described here: https://www.csus.edu/college/arts-letters/world-languages-literatures/foreign-language-requirement.html

BA in Asian Studies (Chinese Studies)

Units required for Major: 36
Total units required for BA: 120

1 These 36 units include 12 units of study in a student’s chosen concentration and units equivalent to the last two semesters of an Asian language appropriate to student’s concentration by coursework or a language proficiency examination provided by the Department of Foreign Languages (see below)

Program Description

Pacific Asia, including the nation states on the Asian shores of the Pacific Rim, the Koreas, Japan, China, Taiwan, the Philippines, Vietnam, Cambodia, Thailand, Myanmar, Laos, Malaysia, Singapore, Brunei Darussalam, and Indonesia, is a region of great economic, political and strategic importance, possessing immense natural and human resources.

The major is designed to provide students with a coherent introduction to the language, history, and culture of Asian societies on the western rim of the Pacific Basin. While focusing on Pacific Asia, the program also supports the study of cultures from the Indian subcontinent and other regions of Asia. Each concentration provides an interdisciplinary understanding of the major social and historical forces at work in the region, supported by appropriate language training.

Graduates of the program either continue their studies at graduate institutions or utilize their knowledge and training through employment in government, business or education relating to this increasingly important region of the world.

</tbody>
</table>

**Total Units**: 36

1. Course also satisfies General Education (GE)/Graduation Requirement.
2. Students must take 9 units of electives from three different groupings. Students are not permitted to take an elective from their area of concentration. In other words, Japanese Studies Concentration Majors cannot take courses from group 1, Chinese Studies Concentration Majors cannot take courses from group 2, and Southeast Asia Concentration Majors cannot take courses from group 3.
3. Students must demonstrate proficiency at a level equivalent to four semesters of an Asian language appropriate to their concentration by coursework or a language proficiency examination provided by the Department of Foreign Languages. Students concentrating in South or Southeast Asia can demonstrate proficiency in any South or Southeast Asian Language.

**Concentration in Chinese Studies (12 units)**

Group 7: Advanced Language
- CHIN 110 Advanced Mandarin: Modern Chinese Fiction
- JAPN 110 Introduction to Japanese Literature
- JAPN 116A Third Year Japanese 1 - Language and Culture of Japan
- JAPN 116B Third Year Japanese 2 - Language and Culture of Japan
- JAPN 150 Advanced Japanese Grammar, Conversation

Group 8: Fieldwork-Internships

Select one of the following:
- ASIA 195 Internship: Asian Studies
- Approved Internships or Fieldwork in other departments

Language Proficiency Requirement

Select from the following courses to fulfill the proficiency requirements:
- CHIN 1A Elementary Mandarin
- CHIN 1B Elementary Mandarin
- CHIN 2A Intermediate Mandarin
- CHIN 2B Intermediate Mandarin
- KORN 1A Elementary Korean 1A
- KORN 1B Elementary Korean 1B
- KORN 2A Intermediate Korean 2A
- KORN 2B Intermediate Korean 2B
- JAPN 1A Elementary Japanese
- JAPN 1B Elementary Japanese
- JAPN 2A Intermediate Japanese
- JAPN 2B Intermediate Japanese
- PUNJ 1A Elementary Punjabi
- PUNJ 1B Elementary Punjabi

Total Units 36

1 Course also satisfies General Education (GE)/Graduation Requirement.
2 Students must take 9 units of electives from three different groupings. Students are not permitted to take an elective from their area of concentration. In other words, Japanese Studies Concentration Majors cannot take courses from group 1, Chinese Studies Concentration Majors cannot take courses from group 2, and Southeast Asia Concentration Majors cannot take courses from group 3.

BA in Asian Studies (Korean Studies)

Units required for Major: 36

Total units required for BA: 120

Program Description

Pacific Asia, including the nation states on the Asian shores of the Pacific Rim, the Koreas, Japan, China, Taiwan, the Philippines, Vietnam, Cambodia, Thailand, Myanmar, Laos, Malaysia, Singapore, Brunei Darussalam, and Indonesia, is a region of great economic, political and strategic importance, possessing immense natural and human resources.

The major is designed to provide students with a coherent introduction to the language, history, and culture of Asian societies on the western rim of the Pacific Basin. While focusing on Pacific Asia, the program also supports the study of cultures from the Indian subcontinent and...
other regions of Asia. Each concentration provides an interdisciplinary understanding of the major social and historical forces at work in the region, supported by appropriate language training.

Graduates of the program either continue their studies at graduate institutions or utilize their knowledge and training through employment in government, business or education relating to this increasingly important region of the world.

**Total Units**: 36

1. Course also satisfies General Education (GE)/Graduation Requirement.
2. Students must take 9 units of electives from three different groupings. Students are not permitted to take an elective from their area of concentration. In other words, Japanese Studies Concentration Majors cannot take courses from group 1, Chinese Studies Concentration Majors cannot take courses from group 2, and Southeast Asia Concentration Majors cannot take courses from group 3.
3. Students must demonstrate proficiency at a level equivalent to four semesters of an Asian language appropriate to their concentration by coursework or a language proficiency examination provided by the Department of Foreign Languages. Students concentrating in South or Southeast Asia can demonstrate proficiency in any South or Southeast Asian Language.

### Graduation Requirements

1. **Graduation Requirements (required by CSU) (9 Units)**
   - American Institutions: U.S. History: 3 units
   - American Institutions: U.S. Constitution & CA Government: 3 units
   - Writing Intensive (WI): 3 units

2. **Graduation Requirements (required by Sacramento State) (6 Units)**
   - English Composition II: 3 units
   - Race and Ethnicity in American Society (RE): 3 units
   - Foreign Language Proficiency Requirement: 2 units

**Total Units**: 34

1. To help you complete your degree in a timely manner and not take more units than absolutely necessary, there are ways to use single courses to meet more than one requirement (overlap). For further information, please visit the General Education page (p. 1103).

2. Required in Major; also satisfies GE.

3. If not satisfied before entering Sacramento State, it may be satisfied in General Education Area C2 (Humanities). "C- or better required:" The alternative methods for satisfying the Foreign Language Proficiency Requirement are described here: https://www.csus.edu/college/arts-letters/world-languages-literatures/foreign-language-requirement.html
Minor in Asian Studies

Units required for Minor: 18, twelve of which must be in upper division

Program Description
The minor offers students a foundation to understand the dynamic changes across the region of East, South, and Southeast Asia through required pan-Asia courses that compare and analyze the region in comparative perspective. Students will develop a framework to explore Asia from an interdisciplinary perspective, and may choose to focus their interests through elective offerings.

Total Units 18-24
California Studies

Department of Public Policy Administration

Program Description
California Studies is an interdisciplinary program designed to provide an understanding of California’s institutions, culture, and environment in a manner that will be occupationally and academically useful to students in a variety of majors. With the state’s central role as a gateway to the Pacific basin, substantial knowledge of California will be necessary for those preparing to engage in commerce and international trade. In addition, for students who are planning careers in the public sector, the California Studies minor will furnish background applicable to their future employment.

Economics

College of Social Sciences and Interdisciplinary Studies

Program Description
Economics is a social science that examines the functioning of markets, the determination of prices and distribution of income, and the determination of the overall level of income and rates of unemployment and inflation. In addition, Economics deals with various social problems. The Economics major at Sacramento State is designed to provide students with a liberal education with special emphasis on the economic aspects of society, on familiarization with techniques for the analysis of contemporary economic problems, developing the ability to think critically, and to conceptualize and to possess the communication and computer skills to evaluate private and public policy issues.

The Economics program is appealing to students due to the quality of its faculty, the breadth of its course offerings, and the amount of choice it offers the student in planning his or her coursework. In addition to training in the traditional economics areas, the program offers such diverse courses as the California economy, state and local finance, energy, environmental and resource economics, and urban economics. Students find the Department of Economics congenial to their educational and career objectives.

A minor in Economics may be especially attractive to students majoring in Business Administration, Government, and Environmental Studies or in one of the other Social Science disciplines. The Economics minor adds both theoretical and analytical depth. In addition, it provides the historical and institutional background important to an understanding of contemporary economic issues. It offers students in other majors a broader-based undergraduate education while widening the choice of job possibilities. Employers view the minor in Economics favorably.

Degree Programs
BA in Economics (p. 959)
Minor in Economics (p. 962)
Certificate in Economics Education (p. 961)
MA in Economics (p. 961)

Special Features
- Students in the Sacramento State Economics program benefit from a wide range of opportunities to work in the private and public sectors. The Economics Department offers internships for academic credit to students who are interested in the application of economics in the private and public sectors. This kind of practical experience enhances employment opportunities after graduation.
Former Sacramento State Economics students are working at all levels of government and in many private businesses in the fields of finance, real estate, professional services, etc. Some are in the teaching profession, K-12 and community colleges, while others have continued their studies toward a Masters degree or a Ph.D. at such institutions as Notre Dame, Washington University at St. Louis, the University of Pittsburgh, University of California, Santa Cruz, Johns Hopkins University, and University of California, Davis.

The Sacramento State Economics faculty is diverse in areas of specialization and draws upon both its advanced academic training and practical experience. Faculty members have published articles, papers, and books, and enjoy reputations as experts in their fields. Besides providing a reputable and experienced faculty, the Economics Department offers personal advising for students in the planning and meeting of academic and career goals.

Pre-Major Requirements
Freshman or transfer students interested in the Economics Major are admitted as Pre-Major Economics students.

To change to an Economics major, all students are required to complete the following grade and course requirements and submit a Declaration of Major form to the Economics Department along with transcript copies:

1. An overall GPA of 2.0 and be in good academic standing.
2. Completion of the Pre-Major Required Courses with a "C" or better in each course. Only first or second attempts will be considered.

Career Possibilities
Actuary · Advertising Executive · Auditor · Bank Officer · Bond Trader · Budget Analyst · Business Forecaster · Business Manager · College Professor · Commodity Price Forecaster · Cost Analyst · Credit Analyst/Loan Officer · Demographer · Economic Forecaster · Energy Economist · Entrepreneur · Estate Planner · Financial Analyst/Planner · Financial Officer · Government Administrator · Healthcare Administrator · Human Resources Administrator · Industrial/Institutional Buyer · Industry Analyst · Information Scientist · Insurance Salesperson · Intelligence Agent · International Trade Specialist · Journalist · Labor Relations Specialist · Lawyer · Litigation Analyst · Management Consultant/Analyst · Market Researcher · Analyst · Natural Resource Economist · Policy Analyst · Politician · Public Utilities Manager · Real Estate Agent/Broker · Sales Manager · Securities Salesperson/Broker · Statistician · Teacher · Technical Writer Transportation Specialist · Underwriter · Urban/Regional Planner

ECON 1A. Introduction to Macroeconomic Analysis. 3 Units
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall, Spring
Introductory inquiry into the workings and interrelationships of the aggregate economic system. The primary focus is on total production and its distribution, employment and price levels, and the forces influencing them. Other considerations are the roles of government, the monetary sector, and related areas.

ECON 1B. Introduction to Microeconomic Analysis. 3 Units
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall, Spring
Introductory microeconomic analysis of the workings of supply and demand in the determination of price, resource allocation, and distribution. Markets are analyzed as they affect economic efficiency and income distribution.

ECON 21. First Year Seminar: Becoming an Educated Person. 3 Units
General Education Area/Graduation Requirement: Understanding Personal Development (E)
Term Typically Offered: Fall, Spring
Introduction to higher education for an economics major or student interested in social sciences, to the resources of the University, and to the skills for lifelong learning. Designed to help students develop academic success strategies, time management, and to improve information literacy, intercultural competence, and integrative thinking. Special attention to how economists view the world and an understanding of current events and social issues. Provides students with the opportunity to interact with peers and faculty, building a community of support.

ECON 100A. Intermediate Macroeconomic Theory. 3 Units
Prerequisite(s): ECON 1A, ECON 1B, and MATH 24 or MATH 26A or MATH 30 with a minimum "C" grade.
Term Typically Offered: Fall, Spring
Analysis of the determinants of the aggregate level of output, income, employment and prices.
ECON 108. Intermediate Microeconomic Theory. 3 Units
Prerequisite(s): ECON 1B and MATH 24 or MATH 26A or MATH 30 with a minimum "C" grade.
Term Typically Offered: Fall, Spring

Analysis of household and firm behavior as the foundation of supply and demand.

ECON 101. History of Economic Thought. 3 Units
Prerequisite(s): ECON 1A, ECON 1B.
Term Typically Offered: Fall, Spring

Analysis of the development of economic theory from the predecessors of Adam Smith through John Maynard Keynes. The contributions made to the discipline by its principal figures are compared and evaluated.

ECON 104. Introduction to the United States Economy. 3 Units
Term Typically Offered: Fall, Spring

One semester survey of the principles of economics, basic methods of economic analysis, and their application to public policy and current events.

Note: Not open to students who have had ECON 1A or ECON 1B or those majoring in economics.

ECON 110. Cost Benefit Analysis. 3 Units
Prerequisite(s): ECON 1B and MATH 24 or MATH 26A or MATH 30 with a minimum "C" grade.
Term Typically Offered: Fall, Spring

Examines the rationale for government provision of goods and services and presents cost-benefit analysis as a method to evaluate public participation in a market economy.

ECON 112. European Economic History. 3 Units
General Education Area/Graduation Requirement: Humanities (Area C2)
Term Typically Offered: Fall, Spring

Analysis and evaluation of the economic forces and institutions shaping European economic development through the present period. Attention will be paid to the relationship between changes in the economic environment and attendant cultural, political, and ideological developments in the stages of tribalism, slavery, feudalism, capitalism, and socialism.

ECON 113. Economic History of the United States. 3 Units
Prerequisite(s): ECON 1A or ECON 104.
Term Typically Offered: Fall, Spring

Consideration of the economic growth and development of the U.S. with emphasis on a theoretical analysis of the economic factors shaping the national destiny.

ECON 114. The California Economy. 3 Units
Prerequisite(s): ECON 1A and ECON 1B, or ECON 104.
Term Typically Offered: Fall only

Examination of the process of the development of the State's economy as well as analysis of the various public economic issues that are of contemporary concern to Californians.

ECON 120. Economics and Environmental Degradation. 3 Units
Term Typically Offered: Fall, Spring

Analyzes environmental issues as economic issues. Economics as both a cause and cure for environmental destruction.

ECON 123. Resource Economics. 3 Units
Prerequisite(s): ECON 1B and MATH 24 or MATH 26A or MATH 30 with a minimum "C" grade.
Term Typically Offered: Fall, Spring

Analyzes the economic based problem of exhaustion in both renewable and non-renewable resources. Emphasis is given to the optimal use of these resources over time and the effects that various market and non-market factors have on their future availability.

ECON 130. Public Finance. 3 Units
Prerequisite(s): ECON 1A, ECON 1B, and MATH 24 or MATH 26A or MATH 30 with a minimum "C" grade; ECON 100B recommended.
Term Typically Offered: Fall, Spring

Economic analysis of the public sector and its impact on the allocation of resources and the distribution of income. Emphasis given to the economics of government expenditure and taxation.

ECON 132. State and Local Government Finance. 3 Units
Prerequisite(s): ECON 1A, ECON 1B, and MATH 24 or MATH 26A or MATH 30 with a minimum "C" grade.
Term Typically Offered: Fall only

Analysis of the economics of state and local government finance, with an emphasis on California's fiscal system.

ECON 135. Money and Banking. 3 Units
Prerequisite(s): ECON 1A and MATH 24 or MATH 26A or MATH 30 with a minimum "C" grade.
Term Typically Offered: Fall, Spring

Examines the role of financial markets, the banking system, and the Federal Reserve System in the economy. Included are an introduction to present value and the behavior of interest rates, analysis of money creation, and evaluation of monetary policy.

ECON 138. Monetary and Fiscal Policy. 3 Units
Prerequisite(s): ECON 100A and ECON 140 with a minimum "C" grade.
Term Typically Offered: Fall, Spring

Analyzes the policies of central banks and fiscal authorities as they relate to the stability and growth of the macroeconomy. Examines the theoretical and empirical literature regarding the conduct of monetary and fiscal policy and applies the tools of economic analysis to understand macroeconomic policy debates.

ECON 140. Quantitative Economic Analysis. 3 Units
Prerequisite(s): ECON 1A, ECON 1B, STAT 1, and MATH 24 or MATH 26A or MATH 30 with a minimum "C" grade.
Term Typically Offered: Fall, Spring

Examination of the basics of conducting quantitative economic analysis. Included are basic concepts and methods of data analysis and research. Students will examine economic data using spreadsheets, will develop presentation skills, and be introduced to career opportunities.

ECON 141. Introduction to Econometrics. 3 Units
Prerequisite(s): ECON 1A, ECON 1B, ECON 140, and MATH 24 or MATH 26A or MATH 30 with a minimum "C" grade; ECON 100A or ECON 100B recommended.
Term Typically Offered: Fall, Spring

Covers the basics of regression analysis, estimation, and forecasting.
### ECON 145. Economic Research Methods. 3 Units  
**Prerequisite(s):** ECON 100A, ECON 100B, ECON 140 with a minimum "C" grade; GWAR certification before Fall 09, WPJ score of 70+, or at least a C- in ENGL 109 M/W.  
**Term Typically Offered:** Fall, Spring

Covers the basics of conducting applied economic research: the selection of topic, literature survey, choice of research method, formulation of hypothesis, testing of hypothesis using empirical analysis, and summary and conclusions. Designed to enhance the students ability to integrate economic theory, quantitative research skills, and research.

### ECON 150. Labor Economics. 3 Units  
**Prerequisite(s):** ECON 1B, ECON 1B, and MATH 24 or MATH 26A or MATH 30 with a minimum "C" grade.  
**Term Typically Offered:** Fall only

Economic analysis of labor markets, with special reference to employment, wage determination, and the role of government.

### ECON 152. Economics of Education. 3 Units  
**Prerequisite(s):** ECON 1B and MATH 24 or MATH 26A or MATH 30 with a minimum "C" grade.  
**Term Typically Offered:** Fall only

Introduction to the various aspects of the economics of education. Applies the tools of economic analysis to education policy and problem solving. Topics include cost-benefit analysis of education, the signaling vs. human capital debate, race and gender issues in education, education production functions, and financing education at the elementary, secondary, and post-secondary levels. Emphasis placed on individual and social choice in education.

### ECON 153. Health Economics. 3 Units  
**Prerequisite(s):** ECON 1B and MATH 24 or MATH 26A or MATH 30 with a minimum "C" grade.  
**Term Typically Offered:** Fall only

Introduction to the field of health economics. Applies the tools of economics to the production of health and health care. Special emphasis on health care institutions, the role of industry, health care reform, and the role of government, in addition to the public provision of care to the disadvantaged.

### ECON 160. Industrial Organization. 3 Units  
**Prerequisite(s):** ECON 1B and MATH 24 or MATH 26A or MATH 30 with a minimum "C" grade.  
**Term Typically Offered:** Spring only

Analyzes firm decision-making in a variety of market settings. Topics include pricing and output decisions, entry and exit issues, marketing strategies, horizontal mergers, vertical integration, technological change, and U.S. antitrust policy.

### ECON 161. Fundamentals of Game Theory. 3 Units  
**Prerequisite(s):** ECON 1B, STAT 1, and MATH 24 or MATH 26A or MATH 30 with a minimum "C" grade.  
**Term Typically Offered:** Spring only

An analysis of strategic games with sequential or simultaneous moves under complete information and uncertainty. Discussion of theory and techniques is combined with examination of specific classes of games and their application to real-world examples such as markets, voting, auctions, and international relations.

### ECON 162. Energy Economics. 3 Units  
**Prerequisite(s):** ECON 1B and MATH 24 or MATH 26A or MATH 30 with a minimum "C" grade.  
**Term Typically Offered:** Fall, Spring

Analyzes the structure, conduct, and consequences of domestic and international energy markets. Particular emphasis on regulated industries including petroleum, electrical, and other power sources. The economic impact on energy markets of emerging technology is examined.

### ECON 163. Behavioral and Experimental Economics. 3 Units  
**Prerequisite(s):** ECON 100B  
**Term Typically Offered:** Fall only

Introduction to the fields of behavioral and experimental economics. Applies tools of microeconomic theory to the decisions made by individuals. Special emphasis on the utility maximization hypothesis, decision making in the face of risk and uncertainty, intertemporal choice, other regarding preferences, game theory, and neuroeconomics.

### ECON 170. Public Economics and Regulation. 3 Units  
**Prerequisite(s):** ECON 1B and MATH 24 or MATH 26A or MATH 30 with a minimum "C" grade.  
**Term Typically Offered:** Spring only

Examination of government regulation of industry in the North American context: transportation, communication, energy, and other industries. Issues include deregulation, public ownership, pricing, and investment.

### ECON 180. Urban Economics. 3 Units  
**Prerequisite(s):** ECON 1B and MATH 24 or MATH 26A or MATH 30 with a minimum "C" grade.  
**Term Typically Offered:** Spring only

Economic analysis and appraisal of models of urban development. Includes consideration of the rise of cities, land use, unemployment, poverty, housing, urban renewal, transportation, and the local public sector.

### ECON 181. Economics of Racism. 3 Units  
**General Education Area/Graduation Requirement:** Race & Ethnicity  
**Graduation Requirement (RE), GE AREA D**  
**Term Typically Offered:** Spring only

Economic analysis of the origins and development of racism, focusing mainly on its impact in the U.S. Differing theoretical explanations surrounding racism will be compared and evaluated.

### ECON 184. Women and the Economy. 3 Units  
**Term Typically Offered:** Fall only

Investigation of the current economic status of women in the U.S., of past and present economic discrimination experienced by women in the labor market, of the historical reasons for that discrimination and of the means and methods of ending that discrimination.
ECON 186. Sports Economics. 3 Units
Prerequisite(s): ECON 1B and MATH 24 or MATH 26A or MATH 30 with a minimum "C" grade.
Term Typically Offered: Fall, Spring
Applies the essential economic concepts and develops them with examples and applications from the sports industry. Covers basic economic concepts: economic principles, supply and demand, perfect competition, and monopoly behavior. It also applies these concepts to a variety of topics: the public finance of sports franchises, the costs/benefits of a sports franchise to a city, labor markets and labor relations, discrimination, and amateurism and college sports.

ECON 189. Economics at the Movies. 3 Units
Term Typically Offered: Fall only
Analysis of the use and treatment of economic theory and history in popular American films. Emphasis is placed on the topics of game theory, industrial organization, entrepreneurship, law and economics, labor economics, the stock market, and American economic history. The entertainment industry will also be examined from an economic perspective.

ECON 190. International Trade. 3 Units
Prerequisite(s): ECON 1A, ECON 1B and MATH 24 or MATH 26A or MATH 30 with a minimum "C" grade.
Term Typically Offered: Fall, Spring
Analysis of the causes and results of trade among nations. Introduction to modern trade theory is combined with examination of trade instruments and policy analysis.

ECON 191. International Finance. 3 Units
Prerequisite(s): ECON 1A, ECON 1B and MATH 24 or MATH 26A or MATH 30 with a minimum "C" grade.
Term Typically Offered: Fall, Spring
Critical examination of the theories and practices of financing trade among nations. International financial and monetary theories focus on how the world and financial system works, given globalization and international economic integration.

ECON 192. Development Economics. 3 Units
Prerequisite(s): ECON 1A, ECON 1B, and MATH 24 or MATH 26A or MATH 30 with a minimum "C" grade.
Term Typically Offered: Fall, Spring
An analysis of the factors involved in the growth of economies. The focus is on the application of development economics and growth theory to the process of economic growth in developing countries. Particular attention is given to variables that explain growth, namely, technological progress, population growth, saving, trade, human capital and education, and the role of institutions.

ECON 195. Economic Internship. 1 - 3 Units
Term Typically Offered: Fall, Spring
Supervised economic-related work experience, research, or teaching assistance to provide an opportunity for the student to apply principles and theories learned in the classroom to the "real world."
Credit/No Credit

ECON 196P. Economics of Personal Finance. 3 Units
Prerequisite(s): ECON 1A or ECON 1B
Term Typically Offered: Fall, Spring
Applies economic tools and models to evaluate personal financial decisions including investment in higher education, housing, retirement accounts, and traditional and emerging financial markets with a focus on risk and return. Assessment of personal decision-making including career choice, marriage, divorce, and retirement timing to maximize utility and smooth consumption throughout the lifecycle.

ECON 196R. Economic Programming and Data Analysis. 3 Units
Prerequisite(s): Econ 1A, Econ 1B, and Econ 140
Term Typically Offered: Fall, Spring
Inquiry into the basic principles of data analysis and computer programming. The primary focus is on data management and the associated visual optimization and statistical inference in economics using programming languages, such as R and Python. More advanced topics include the use of cross validation, algorithms, and theoretical modeling for data analysis and problem-solving.

ECON 196S. Economics of Financial Markets. 3 Units
Prerequisite(s): STAT 1, ECON 1A, ECON 100B
Term Typically Offered: Fall, Spring
Study and critical analysis of economic theories of financial markets to include rational expectations, the efficient markets hypothesis, roles of time, uncertainty and information in economic transactions, risk aversion in the context of utility maximization and portfolio choice theory, the Capital Asset Pricing Model and multi-factor asset pricing models, an introduction to behavioral finance, and an examination of financial instability and distributional effects of increasing financialization. Includes rigorous development of relevant theories and study of published empirical literature.

ECON 197A. Economics Exchange Mentee. 1 Unit
Prerequisite(s): Instructor permission.
Term Typically Offered: Fall, Spring
Provides opportunity for lower division students, transfer students, and newly declared majors to be mentored by more advanced upper division students or graduate students. The peer mentoring will help students meet academic deadlines, achieve academic success, become engaged in campus activities and get integrated into the Economics Department.
Note: Units may not be applied towards unit requirement of the Economics major.
Credit/No Credit

ECON 197B. Economics Exchange Mentor. 1 - 3 Units
Prerequisite(s): Upper division or graduate student standing and instructor permission.
Term Typically Offered: Fall, Spring
Provides opportunity for advanced upper division students or graduate students to mentor lower division students. The peer mentoring will help students meet academic deadlines, achieve academic success, become engaged in campus activities and be integrated into the Economics Department.
Note: Units may not be applied towards unit requirement of the Economics major; May be repeated for up to 3 units credit from ECON 197A & ECON 197B combined.
Credit/No Credit
ECON 198. Tutoring in Economics. 1 - 3 Units
Term Typically Offered: Fall, Spring
Supervised tutorials at educational institutions including Sacramento State where and when appropriate arrangements can be made. Prior approval for tutoring must be obtained from the Economics Department. Emphasis is on the development of effectiveness in the teaching of economics.
Credit/No Credit

ECON 199. Special Problems. 1 - 3 Units
Term Typically Offered: Fall, Spring
Individual projects or directed reading. Admission requires approval of the faculty sponsor and the Department Chair.
Credit/No Credit

ECON 200A. Advanced Macroeconomic Theory. 3 Units
Prerequisite(s): ECON 141 and ECON 200M.
Term Typically Offered: Fall, Spring
Theories of the determinants of aggregate income, employment and prices. May be taken independently of ECON 200B.

ECON 200B. Advanced Microeconomic Theory. 3 Units
Prerequisite(s): ECON 200M.
Term Typically Offered: Fall, Spring
Theories of the consumer, producer, and market structure. May be taken independently of ECON 200A.

ECON 200C. Advanced Applied Economics. 3 Units
Prerequisite(s): ECON 200A, ECON 200B, and ECON 241.
Term Typically Offered: Fall, Spring
Applies empirical analysis to topics in microeconomics and macroeconomics. Topics may include stationarity, vector autoregression, vector error correction models, calibration, fixed effects, instrumental variables, multinomial logit, and duration models. Students implement these models using econometric software. Students will write an empirical paper intended to become a prospectus for the master’s thesis.

ECON 200M. Mathematics for Economists. 3 Units
Prerequisite(s): ECON 100A, ECON 100B, MATH 26A.
Term Typically Offered: Fall, Spring
Equips students with the mathematical techniques necessary for the study of economics and econometrics at the graduate level. Covers linear algebra, derivatives, comparative static analysis, optimization, integrals, and differential equations, with specific applications from economic and econometric theory.

ECON 204. Business Economics. 3 Units
Term Typically Offered: Fall, Spring
Intensive one-semester course covering both macroeconomics and microeconomics. Emphasis is on economic analysis and policy. Designed for graduate students who have not taken ECON 1A and ECON 1B or their equivalents.

ECON 213. U.S. Economic Development in Historical Perspective. 3 Units
Prerequisite(s): Admission to MA program in Economics.
Term Typically Offered: Fall, Spring
Introduction and analysis of American economic development from a historical perspective, focusing on the trajectory of American economic development from recent advances in theoretical and empirical economics literature. Cover topics on long-term economic growth, technological change, business cycles and fluctuations, financial markets, labor markets, and economic impacts of social change.

ECON 230. Public Finance. 3 Units
Prerequisite(s): ECON 200B.
Term Typically Offered: Fall, Spring
An analysis of the allocation and distribution effects of government expenditures and taxation.

ECON 238. Monetary and Fiscal Policy. 3 Units
Prerequisite(s): ECON 200A.
Term Typically Offered: Fall, Spring
Analyzes the policies of central bank and fiscal authorities as they relate to full employment and stability of the national economy.

ECON 241. Applied Econometric Analysis. 3 Units
Prerequisite(s): ECON 141
Corequisite(s): ECON 200M
Term Typically Offered: Fall only
Applied econometric analysis emphasizes the use of econometric techniques in actual economic research settings and expressing economic theory in the form of econometric models, data collection, estimation, and interpretation of results. Students will develop an understanding of the econometric tools used to analyze empirical economic questions by working individually on a research project developed in consultation with the instructor.

ECON 251. Urban Problems, Economics and Public Policy. 3 Units
Term Typically Offered: Fall, Spring
Historical development, economics and possible policy solutions of the most pressing problems facing central cities and urban areas in the U.S. are presented. Problems discussed include poverty, crime, urban abandonment/suburban sprawl, edge cities, deteriorating infrastructures, and fiscal stress.
Cross Listed: PPA 251; only one may be counted for credit.

ECON 260. Industrial Organization and Performance. 3 Units
Prerequisite(s): Classified graduate status in Economics or instructor permission.
Term Typically Offered: Fall, Spring
A modern analysis of industry structure, conduct, and performance. Emphasis is placed on the use of game theory to address firm behavior, including price and output decisions, entry and exit, horizontal mergers, technological change, and marketing issues.
ECON 263. Food Economics. 3 Units
Prerequisite(s): Graduate standing or instructor permission.
Term Typically Offered: Fall, Spring

Introduction to advanced economic theory and econometric methods applied to the economics of food with emphasis on food consumption and the complexity of individual food choices. Utilizing cost-benefit analyses and concepts like constrained utility maximization, household production, opportunity costs of time, and information search, implications for a global food system will be derived. We will apply learned concepts to health and environmental concerns by discussing the recent applied economics and policy evaluation literature.

ECON 265. Cost Benefit Analysis. 3 Units
Term Typically Offered: Fall, Spring

Examination of the theories, foundations, and philosophies of economic welfare. Specifically, the basic techniques of cost-benefit analysis will be presented and applied to various policy issues.

ECON 290. International Trade. 3 Units
Prerequisite(s): Classified graduate status in Economics or instructor permission.
Term Typically Offered: Fall, Spring

Analysis of modern trade theories, their empirical relevance, and the role of multinational firms in the evolution of international trade patterns. Discussion focuses on theoretical and empirical evaluation of trade policy instruments. Various trade agreements are also discussed in the context of economic integration and globalization. Attention is also given to foreign direct investment as a vehicle of globalization and the challenges it poses to both multinational firms and host countries.

ECON 295. Economic Internship. 1-3 Units
Term Typically Offered: Fall, Spring

Supervised work experience or research on economic topics in government, financial, business, charitable or other kinds of institutions to provide an opportunity for the student to apply principles and theories learned in the classroom to the "real world." Partial supervision may be supplied by persons in the institution under study.
Credit/No Credit

ECON 298. Tutoring In Economics. 1-3 Units
Term Typically Offered: Fall, Spring

Supervised tutorials at educational institutions including Sacramento State where and when appropriate arrangements can be made. Prior approval for tutoring must be obtained from the Economics Department. Emphasis is on the development of effectiveness in the teaching of economics.
Credit/No Credit

ECON 299. Special Problems. 1-3 Units
Term Typically Offered: Fall, Spring

Individual projects or directed reading. Admission requires approval of the faculty sponsor and the Department Chair.
Credit/No Credit

ECON 500. Master's Thesis. 3 Units
Prerequisite(s): Advanced to candidacy and chair permission of his/her thesis committee.
Term Typically Offered: Fall, Spring

Completion of a thesis approved for the Master's degree. Should be taken in final semester prior to the completion of all requirements for the degree.

BA in Economics

Units required for Major: 42-45
Total units required for BA: 120

Program Description

The Economics program is appealing to students due to the quality of its faculty, the breadth of its course offerings, and the amount of choice it offers the student in planning his or her coursework. In addition to training in the traditional economics areas, the program offers such diverse courses as the California economy, state and local finance, energy, environmental and resource economics, and urban economics. Students find the Department of Economics congenial to their educational and career objectives.

Note: Students planning ahead for graduate work in Economics should consult an advisor regarding additional and/or focused coursework in mathematics, statistics, and computer science.

Note: The Department schedules courses so that the upper division requirements for the BA can be completed at night within two academic years. Evening students should contact the Department for assistance in planning a two-year program. Failure to do so may mean a delay in graduation due to scheduling problems.

Pre-Major Requirements

Freshman or transfer students interested in the Economics Major are admitted as Pre-Major Economics students.

To change to an Economics major, all students are required to complete the following grade and course requirements; complete a Department of Economics Change of Major form; and meet with a faculty advisor.

1. An overall GPA of 2.0 and be in good academic standing.
2. Completion of the Pre-Major Required Courses with a "C" or better in each course. Only first or second attempts will be considered.

Program Requirements

<table>
<thead>
<tr>
<th>Code</th>

ECON 145 Economic Research Methods 3

Electives (18 Units)
Select 18 units of upper division Economics courses

Total Units 45

1 Course also satisfies General Education (GE)/Graduation Requirement.
2 Additional upper division courses in Economics, selected in consultation with a faculty advisor.

Notes:
- Minimum grade of "C" required in all courses listed above.
- ECON 145 must be completed in the student's graduating semester. The following must be completed prior to enrolling in ECON 145:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>ECON 100A</td>
<td>Intermediate Macroeconomic Theory</td>
<td>3</td>
</tr>
<tr>
<td>ECON 100B</td>
<td>Intermediate Microeconomic Theory</td>
<td>3</td>
</tr>
<tr>
<td>ECON 140</td>
<td>Quantitative Economic Analysis</td>
<td>3</td>
</tr>
</tbody>
</table>
- MATH 24 requirement can also be met by completing MATH 26A or MATH 30 with a grade of "C" or better.
- MATH 26A or MATH 30, or an upper division course in math or statistics, selected in consultation with an advisor, may also substitute for three of the 33 upper division units in Economics.
- ECON 104 does not meet major requirements.

No more than 3 units total of the following may be included in the 33 total required upper division units:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>ECON 195</td>
<td>Economic Internship</td>
<td>1-3</td>
</tr>
<tr>
<td>ECON 198</td>
<td>Tutoring in Economics</td>
<td>1-3</td>
</tr>
<tr>
<td>ECON 199</td>
<td>Special Problems</td>
<td>1-3</td>
</tr>
</tbody>
</table>

No more than 3 units from the following set of courses may be used to meet the requirements of the Economics major:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>ECON 112</td>
<td>European Economic History</td>

1 To help you complete your degree in a timely manner and not take more units than absolutely necessary, there are ways to use single courses to meet more than one requirement (overlap). For further information, please visit the General Education page (p. 1103).

Note: There is no way to list all possible overlaps so please consult with a professional advisor. The Academic Advising Center can be visited online (http://www.csus.edu/acad/), by phone (916) 278-1000, or email (advising@csus.edu).

2 Required in Major; also satisfies GE.
Certificate in Economics Education

Units required for Certificate: 15

Program Description
The Economics Education Certificate Program is designed to give participants a solid foundation in economics that will enable them to teach the subject in primary and secondary schools. The Certificate Program is intended for

1. future or practicing teachers who desire credential authorization to teach the one-semester economics course required of all California public high school students; and
2. future or practicing teachers who wish to infuse economics into other K-12 curricula.

Students majoring in Liberal Studies or Social Science or completing a teacher credential program are especially encouraged to participate.

Note: Participants who are not enrolled in Sacramento State may take these courses through the College of Continuing Education.

For more information about the program, contact: Director of the Center for Economic Education, Professor David M. Lang, (916) 278-7077.

Minimum Grade Requirement
A grade of "B" or higher must be obtained in each course for the Certificate.

Select any two upper division economics course ² | 6

Total Units | 15

¹ The ECON 195 requirement will enable the student to serve as a Teaching Assistant to a professor teaching either ECON 1A or ECON 1B. Students must receive the permission of the Director of the Center for Economic Education prior to enrolling in ECON 195 for the Certificate program and will be assigned to a professor by the Director.

² not including ECON 104

MA in Economics

Total units required for MA: 30

Program Description
The Master of Arts program in Economics is designed to assist students in developing the analytical skills and reflective capacities required to think clearly and coherently about economic matters and to apply their skill and knowledge effectively to problem areas. The program seeks to prepare students for careers in business, government, and education where applied skills are appropriate. To this end, the Department offers coursework and supervised study in economic theory, quantitative analysis, and a number of other fields of interest.

In line with the applied emphasis of the graduate program, the Department maintains a relationship with both the California state government and many private organizations in the Sacramento area. Recent graduates have gone on to jobs in government at all levels as well as to careers in labor unions, banks, manufacturing corporations, and other private organizations.

Admission Requirements
Admission as a classified graduate student in Economics requires:

- a minimum 3.0 GPA in the last 60 units attempted;
- a minimum 3.0 GPA in undergraduate Economics work;
- ECON 100A (Intermediate Macroeconomic Theory) or equivalent; and ECON 100B (Intermediate Microeconomic Theory) or equivalent;
- ECON 141 (Introduction to Econometrics) or equivalent;
- MATH 26A (Calculus I) or equivalent; recommend MATH 26B (Calculus II) or equivalent;
- two letters of recommendation from undergraduate instructors;
- a minimum score of 550 on the TOEFL (this requirement applies only to students earning degrees abroad whose primary language is not English); and
- a baccalaureate degree.

Students not meeting the above requirements may be granted conditionally classified graduate status with permission of the Economics Department Graduate Committee, providing the applicant submits in writing the reasons why he/she desires graduate training and why the Committee should waive one or more of the above requirements. GRE scores are not required, but will be considered by the admissions committee if they are included with an application. Analytical writing GRE scores above 4.5 allow admitted students to waive the GWAR requirement. Students accepted on this basis may be required to complete a set of courses prior to beginning the Economics Graduate core, or to fulfill other conditions prior to approval for fully classified status. Failure to conform to this stipulation will result in the revocation of the conditionally classified status.
Admission Procedures

Applicants must complete a university application and also meet departmental requirements by the posted application deadline date for term applying. For more admission information and application deadlines, please visit http://www.csus.edu/gradstudies/. Admission based on the deadlines allows students to meet registration deadlines. Applications submitted after the above-mentioned deadlines will only be reviewed in the event that room for new students exists. All prospective graduate students, including Sacramento State graduates, must file the following documents with the Office of Graduate Studies, River Front Center 215, (916) 278-6470:

- an online application for admission;
- two sets of official transcripts from all colleges and universities attended, other than Sacramento State;
- TOEFL scores, if applicable.

In addition to the above documents, arrange for two letters of recommendation to be sent to the Economics Department. Any applicant not meeting the first three admission requirements as specified above should submit to the Department in writing his/her reasons for requesting a waiver of the admission requirements.

Approximately six weeks after receipt of all items listed above, a decision regarding admission will be mailed to the applicant.

Minimum Units and Grade Requirement for the Degree

Units required for the MA: 30

Minimum Cumulative GPA: 3.0

Advancement to Candidacy

Each student must file an application for Advancement to Candidacy as soon as the graduate student has:

- successfully completed the following, and with a minimum grade of "B":
- be enrolled, or have successfully completed ECON 200C;
- been recommended for advancement by the Graduate Committee; and
- take a Graduate Writing Intensive (GWI) course in their discipline within the first two semesters of coursework at California State University, Sacramento.

Advancement to Candidacy forms are available on the Office of Graduate Studies website. The student fills out the form after planning a degree program in consultation with the Economics Department Graduate Coordinator. The completed form is then returned to the Office of Graduate Studies for approval.

Program Requirements

The following cannot be used as part of the 30 units toward the master’s degree:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>ECON 112</td>

Other Requirements (12 Units)

Select 12 units of electives 1

Culminating Requirement (3 Units)

ECON 500 | Master’s Thesis                            | 3     |

Total Units 30

1 Of these 12 units, six units (i.e., 2 courses) must come from 200-level courses. Note the following:

- There can be no 100-level/200-level duplication of similar courses (e.g., you cannot receive credit for ECON 130 and ECON 230, ECON 138 and ECON 238, etc.).
- Selected courses (e.g., Math, Statistics, or Computer Science) from other departments may be allowed as substitutes with the approval of the Graduate Coordinator.
- ECON 295 and ECON 298 do not count as electives toward satisfying the 12 unit requirement without the approval of the Graduate Coordinator.

Minor in Economics

Units required for Minor: 21, twelve of which must be upper division Economics units

Program Description

A minor in Economics may be especially attractive to students majoring in Business Administration, Government, and Environmental Studies or in one of the other Social Science disciplines. The Economics minor adds both theoretical and analytical depth. In addition, it provides the historical and institutional background important to an understanding of contemporary economic issues. It offers students in other majors a broader-based undergraduate education while widening the choice of job possibilities. Employers view the minor in Economics favorably.

Environmental Studies

*College of Social Sciences and Interdisciplinary Studies*

Program Description

The Environmental Studies program can help students use the resources of the entire University to gain an interdisciplinary understanding of such increasingly serious issues as pollution, wildlife and wilderness preservation, land use, biodiversity loss, resource depletion, energy conservation, and a generally healthful relationship between nature and society. The program offers both a major and a minor and also assists students in constructing special majors and identifying programs and individual courses in various departments that concern themselves with environmental questions.

The major is designed to help students understand environmental issues in their political, social, and scientific context. Because dealing with environmental issues requires an interdisciplinary approach, we emphasize the development of strong writing, research, and quantitative skills and a broad liberal arts perspective.

Environmental Studies students find work primarily in research, analysis, and enforcement activities in state, federal, and local governments. Others work for nonprofit organizations such as The Nature Conservancy, Audubon Society, and Sierra Club. Some work as consultants to private firms, and some graduates become teachers in primary schools, secondary schools, and universities. A few have created their own careers in such areas as organic farming, managing cooperatives, and social action.

Environmental Studies students often go on to professional and graduate schools in such fields as law, ecology, engineering, journalism, economics, public health, political science, public administration, special education, environmental policy, and human ecology.

Degree Programs

- BA in Environmental Studies (p. 967)
- BS in Environmental Studies (p. 969)
- Minor in Environmental Studies (p. 970)

Special Features

- Sacramento, as the state capital, offers excellent opportunities for study and employment. One of several ways to incorporate these opportunities into a student’s academic program is through Environmental Studies internship experiences. The Major offers an Internship program to provide career-relevant experience for students and assist their transition to employment. Students find internships with a remarkable array of government agencies, non-government organizations, businesses and community groups.

- The faculty also carries on a field study program to introduce students to as many features as possible of the extraordinarily varied Northern California region.

- Faculty in the Environmental Studies Department represent disciplines including Biology, Ecology, Toxicology, Political Science, Environmental Engineering, among others.

Career Possibilities

- Environmental Analyst · Pollution Analyst · Pollution Measurement Technician · Environmental Planner · Naturalist · Environmental Consultant · Energy Conservation Specialist · Environmental Journalist · Environmental Health Specialist · Lobbyist · Environmental Educator · Environmental Economist · Recycling Coordinator · Hazardous Materials Specialist · Legislative Researcher · Water Quality Technician · Park Interpretative Specialist · Transportation Planner · Waste Management Specialist · Levee Management Specialist · Conservation Analyst · Environmental Investigator · Environmental Interpreter · Environmental Resource Planner · Park Ranger · Permitting Officer · Ranger · Habitat Assessment Specialist · Environmental Compliance Officer · Legislative Aide · Air Pollution Specialist · Energy Manager · Game Warden · Wildlife Manager · Hazardous Waste Specialist · Pollution Prevention Specialist · Compliance Program Manager · Community Education Officer · Environmental Health and Safety Officer · Mosquito Control Technician · Public Works Program Manager · Water Conservation Manager · Environmental Impact and Review Assessment · Environmental Scientist · Environmental Policy Analyst

Faculty

FLOWERS, CHRISTINE
FULTON, JULIAN
GOLDSTENE, JAMES

Linklater, Wayne
ENVS 10. Introduction to Environmental Science. 3 Units
General Education Area/Graduation Requirement: Life Forms (B2)
Term Typically Offered: Fall, Spring, Winter

Course looks at the earth as an ecosystem composed of biological, chemical, and physical systems. Focus is on the interaction of these systems with each other and with human population, technology, and production. Students should acquire the fundamentals of a scientific understanding of the ecological implications of human activities. Specific topics treated within the context of ecosystem analysis include energy flows, nutrient cycles, pollution, resource use, climate change, species diversity, and population dynamics.

ENVS 10H. Honors Environmental Science. 3 Units
General Education Area/Graduation Requirement: Life Forms (B2)
Term Typically Offered: Fall, Spring, Summer

The earth as an ecosystem composed of biological, chemical, and physical systems. Focus is on the interaction of these systems with each other and with human population, technology, and production. Students should acquire the fundamentals of a scientific understanding of the ecological implications of human activities. Specific topics treated within the context of ecosystem analysis include energy flows, nutrient cycles, pollution, resource use, climate change, species diversity, and population dynamics. Students read important original research on topics. All students participate in a semester long project that applies the principles of the course to a real environmental issue.

ENVS 11. Environmental Issues and Critical Thinking. 3 Units
General Education Area/Graduation Requirement: Critical Thinking (A3)
Term Typically Offered: Fall, Spring

Examines Western cultural values and personal beliefs toward the environment. Teaches critical thinking skills to analyze issues to make informed choices that may impact the earth, its resources and their management as consumers, leaders, professionals and moral agents.

ENVS 21. First Year Seminar: Becoming an Educated Person. 3 Units
General Education Area/Graduation Requirement: Understanding Personal Development (E)
Term Typically Offered: Fall, Spring

Introduction to the nature and possible meanings of higher education, and the functions and resources of the University. Designed to help students develop and exercise fundamental academic success strategies and to improve their basic learning skills. Provides students with the opportunity to interact with fellow classmates and the seminar leader to build a community of academic and personal support.

ENVS 110. Contemporary Environmental Issues. 3 Units
Term Typically Offered: Fall, Spring

Examination of a variety of environmental issues with emphasis on the social aspects of the problems and solutions. The class is conducted primarily through discussion, with an unusually high degree of student responsibility. Group and individual projects are designed to involve students in community affairs as well as to give them an opportunity to develop a personal perspective on environmental issues.

ENVS 111. Environmental Ethics. 3 Units
Prerequisite(s): ENVS 10 or ENVS 10H or ENVS 11 or permission from instructor.
General Education Area/Graduation Requirement: Humanities (Area C2)
Term Typically Offered: Fall, Spring

Consideration of the ethical dimensions of human interactions with the natural world and with each other in the context of complex societal needs. Students will employ critical thinking skills to integrate insights from the biological sciences, social sciences, and humanities to make ethical decisions about controversial environmental topics. Students are encouraged to examine multiple perspectives on these issues through debate, discussion and personal reflection. No prior experience with philosophy is required.

ENVS 112. International Environmental Problems. 3 Units
Prerequisite(s): GWAR certification before Fall 09; or WPJ score of 80+; or 3-unit placement in ENGL 109M or ENGL 109W; or 4-unit placement in ENGL 109M or ENGL 109W and co-enrollment in ENGL 109X; or WPJ score 70 or 71 and co-enrollment in ENGL 109X. Environmental Studies majors only.
General Education Area/Graduation Requirement: Writing Intensive Graduation Requirement (WI)
Term Typically Offered: Fall, Spring

Global perspective on current problems of environmental protection and resource use. Population growth, food production, industrialization, technology and cultural change are considered, with heavy emphasis on the social dynamics of environmental problems. A variety of political views is studied, and an attempt is made to develop a perspective useful to students in personal and political decisions.

Note: PCR/IR students are encouraged to contact the department regarding enrollment into this course.

ENVS 120. Quantitative Methods for Environmental Science. 3 Units
Prerequisite(s): Must be an ENVS major or minor; STAT 1 or instructor permission.
Term Typically Offered: Fall, Spring

Research tools and methods used by environmental professionals including selected statistical procedures, data sources and presentation and interpretation of results. Students will become familiar with the wide range of equipment available to fit their special needs including the computer time-sharing system.
ENVS 121. Field Methods in Environmental Science. 2 Units
Prerequisite(s): Must be an ENVS major or minor
Term Typically Offered: Fall, Spring, Summer

This field course includes the direct observation of human impact on specific environments and examples of mitigation strategies. Students will learn information gathering and data presentation methodologies useful in environmental impact assessment. Lecture three hours per week; one-day and weekend field trips will be arranged.
Note: Course also substitutes for ENVS 175.

Field trip(s) may be required.

ENVS 122. Environmental Impact Analysis: CEQA and NEPA. 3 Units
Prerequisite(s): Must be an ENVS major or minor
Term Typically Offered: Fall only

Review of legislative and judicial requirements for environmental impact analysis. Students will be asked to review actual project environmental impact reports, analyze the methods employed, understand the relationship of the report to the planning process, and prepare such a document.
Note: It is recommended that students complete ENVS 128 or have some actual experience with environmental impact documentation before taking this course.

ENVS 124. Social Justice in Interdisciplinary Perspective. 3 Units
Prerequisite(s): Sophomore standing or instructor permission.
Term Typically Offered: Fall, Spring

Examines the nature and forms of social justice and injustice. Addresses key philosophical and theoretical models and debates over the meaning of social justice, using historical and contemporary examples to highlight important concepts and controversies. Faculty from different departments within SSIS, and occasionally from other colleges, will address how their discipline understands and analyzes issues of social justice. Students will be encouraged to critically assess the assumptions of various perspectives on social justice, and to address the relationship of academe and social activism in achieving social justice.
Cross listed as ANTH 130, ID 124, ETHN 124, FACS 124 and SOC 124. Only one may be counted for credit.

ENVS 128. Environment and the Law. 3 Units
Term Typically Offered: Spring only

Introduction to environmental law, including: the evolution of environmental legislation, environmental issues in the court system, environmental regulation and administrative law, and environmental torts. Emphasis is on understanding legal process and the special challenges environmental problems present to the legal system.
Cross Listed: POLS 128; only one may be counted for credit.

ENVS 130. Environmental Toxicology. 3 Units
Prerequisite(s): CHEM 1A or CHEM 6A or instructor permission.
Term Typically Offered: Spring only

Students will study the source and occurrence of contaminants in the environment; their fate and transport; and their adverse effects on humans and non-human populations, species and ecosystems. The course focuses on studying environmental issues concerning human and ecosystem health, the impact of human activity since World War II in contributing to human disease and ecosystem disruption. Risk perception and communication as it concerns environmental toxicology will also be discussed.

ENVS 135. California Water and Society. 3 Units
Term Typically Offered: Fall, Spring

This course provides the historical, scientific, legal, institutional, and economic background needed to understand the social and ecological challenges of providing water for California’s growing population, agricultural economy, and other uses- all of which are made more complex by climate change. We will look at past and current debates around cases ranging from local issues on the American River to statewide issues that converge in the Sacramento-San Joaquin Delta. Both physical and social science research skills will be developed.

ENVS 137. Conservation and Society. 3 Units
Prerequisite(s): ENVS 10 or ENVS 10H, and BIO 1
Term Typically Offered: Fall, Spring, Summer

Course will introduce students to the interdisciplinary field of conservation biology through the lens of modern society. Students will acquire a basic understanding of the history of the field of conservation, and the values that drive our desire to preserve species and natural systems. Students will learn about conservation challenges, will analyze the scientific and social factors that contribute to addressing those challenges, and will learn to appreciate the diverse perspectives that are vital in modern conservation.

ENVS 138. Introduction to Environmental Sociology. 3 Units
Term Typically Offered: Fall, Spring

The study of human society, the natural environment, and their mutual interactions. Examines environmental sociology at several levels, from the micro level of individual communities to the meso level of government policies to macro theoretical considerations. Analyzes environmental issues in a global context also included.
Cross Listed: SOC 138.

ENVS 140. Energy, Society, and the Environment. 3 Units
Prerequisite(s): Upper division standing
Term Typically Offered: Fall, Spring

This course covers the concepts and tools necessary to understand society’s diverse technology and policy choices around energy production and use. Students will apply both quantitative and qualitative methods to analyze opportunities and impacts of energy systems with consideration for environmental sustainability, international development, and social equity. We will consider a range of energy technologies, their historical trajectories, current drivers, and prospects for addressing energy challenges at different scales, from households to the global climate.

ENVS 144. Sustainability Science & Policy. 3 Units
Prerequisite(s): ENVS 10, BIO 1, or instructor permission
Term Typically Offered: Fall, Spring

Examines issues of environmental, social, and economic sustainability in domestic and international contexts. Students will study the science, policy, and implementation of sustainable practices regarding water, food, and energy resources. Students will learn the history of sustainability, definitions of sustainability, how sustainability is measured, and how sustainability applies to urban and rural landscapes.
ENVS 147. Urban Agriculture and Aquaponics. 3 Units
Term Typically Offered: Fall, Spring

This course uses campus initiatives in food and bio-waste recycling, combined with vermiculture and aquaponics, to address larger topics in urban food production. This subject has significance for addressing concerns about food access, security, quality, and even local economic development. The course will include hands-on activities on campus, projects with local urban agriculture organizations, and reports connecting the specifics of the course with core questions in environmental science and policy.

ENVS 149. Agroecology. 3 Units
Term Typically Offered: Fall, Spring

Ecological aspects of the production of food and fiber, with emphasis on the sustainability and adequacy of the global food supply to meet the needs of a growing, urbanized population. Covers topics basic to all agricultural systems - soil development, fertility, irrigation, nutrient cycles, crop selection - while contrasting methods developed for large-scale industrial food production with traditional and/or organic farming methods.

Note: Required field trips.

Field trip(s) may be required.

ENVS 151. Restoration Ecology. 3 Units
Term Typically Offered: Spring only

Overview of concepts and practices in restoration ecology, emphasizing the application of ecological principles to restoration design, implementation, and monitoring. Major course topics will include historical ecology, soils and hydrology, plant and animal ecology, exotic species, endangered species concerns, mitigation, monitoring, planning, and assessment as they apply in a restoration context. Students will work in local restoration projects; field trips required.

Field trip(s) may be required.

ENVS 155. Environmental Management and Decision-Making. 3 Units
Prerequisite(s): ENVS 10 or the equivalent, or instructor permission.
Term Typically Offered: Fall only

Course investigates the motivations and barriers to engaging in pro-environmental behaviors. Focus on theories from multiple social and behavioral sciences to understand how individuals form judgments and decisions regarding natural resource and ecosystem management. Specific topics may include principal-agent theory, dual-process theory, multi-criteria decision-making, theory of planned behavior, norm-value-belief, community-based social marketing, and structured decision-making. Students will build skills in stakeholder engagement and science communication.

ENVS 158. Wetlands Ecology. 3 Units
Term Typically Offered: Fall only

Introduces and discusses characteristics of wetland systems; principles of wetland ecology; functions of wetlands; and regulations and permitting process regarding development near and within wetlands. Appropriate for students planning careers in natural resource management. Though not a substitute for professional training in wetlands delineation and functional assessment, students will gain a basis for such assessments. Familiarity with basic principles of chemistry, physics, and biology recommended.

Note: Field trips required.

Field trip(s) may be required.
ENVS 186B. Ecological and Environmental Issues Seminar. 1 Unit
Prerequisite(s): BIO 10 or both BIO 1 and BIO 2.
Term Typically Offered: Fall, Spring

Series of at least 10 seminars in ecological and environmental issues. Topics with each seminar will vary each semester.
Note: May be repeated for credit. No more than one unit of ENVS 186B may be counted toward the upper division major requirement. Cross Listed: BIO 186B; only one may be counted for credit.
Credit/No Credit

ENVS 187. Environmental Studies Seminar. 1 Unit
Term Typically Offered: Fall, Spring

Students will participate in the semester-long University seminar and will be exposed to a variety of environmental issues and topics presented by speakers from CSUS, the USGS, government and professional organizations, among many others. Topics include issues such as climate change, water use and conversation, environmental sustainability, environmental policy and decision-making, and many important regional issues.
Credit/No Credit

ENVS 190. Senior Thesis. 3 Units
Prerequisite(s): ENVS 112 (International Environmental Problems, writing intensive), or instructor permission.
Term Typically Offered: Fall, Spring

Explores an environmental problem or issue in great depth. It includes a detailed review of the scientific literature, synthesis, and integration of information from the literature, and evaluation of the information leading to conclusions and recommendations that address the problem or issue. Thesis subjects are chosen by the student and can be from a myriad perspectives addressed in the Environmental Studies curriculum including scientific, social, political, economic, and cultural issues.
Enrollment ordinarily occurs in a senior’s final semester.
Note: The course is usually taken in a student’s final semester but might be taken in the penultimate semester with the instructor’s permission.

ENVS 195. Environmental Studies Internship. 3 Units
Term Typically Offered: Fall, Spring

Supervised work experience in an approved legislative or administrative office at some level of local, state or federal government, or in a public or private organization that is concerned with the environment. Supervision is provided by the faculty instructor and responsible officials in the work situation.
Note: Open to majors only, subject to instructor permission.
Credit/No Credit

ENVS 195M. Mini Internship. 1 Unit
Term Typically Offered: Fall, Spring

This introductory work experience is designed for sophomores and juniors. The student must complete 45 hours of environmentally related work in a volunteer position with an environmental organization or participation in an environmentally focused event. Supervision is provided by the faculty instructor and responsible officials in the work situation.
Note: Open to majors only, subject to instructor permission.
Credit/No Credit

ENVS 196G. Youth Recreation in Camp Settings. 3 Units
Term Typically Offered: Fall, Spring

This course examines camp programs in a wide variety of settings, for a variety of populations. Topics cover camp theories, camp management, risk-management, activity planning, inclusive programming, and staff training. Includes an emphasis on leadership, supervision, and organizational development of camp programs. Course uses lecture, field experiences, guest speakers, and service learning.

ENVS 199. Special Problems. 1 - 3 Units
Term Typically Offered: Fall, Spring

Individual projects or directed reading.
Note: Open only to students who are competent to carry on individual work. Admission requires permission of the Director and the faculty member who will direct the work.
Credit/No Credit

ENVS 295. Practicum. 2 - 6 Units
Prerequisite(s): Permission of faculty advisor and director.
Term Typically Offered: Fall, Spring

Graduate internship experiences in practical setting.
Note: Open only to graduate students specializing in environmental studies.

ENVS 296. Experimental Offerings in Environmental Studies. 1 - 3 Units
Prerequisite(s): Instructor permission.
Term Typically Offered: Fall, Spring

Courses offered on an experimental basis.

ENVS 299. Special Problems: Individual Study. 1 - 3 Units
Term Typically Offered: Fall, Spring

Individual projects or directed reading.
Note: Departmental petition required.
Credit/No Credit

BA in Environmental Studies

Units required for Major: 66-69
Total units required for BA: 120

Program Description

The Environmental Studies program can help students use the resources of the entire University to gain an interdisciplinary understanding of such increasingly serious issues as pollution, wildlife and wilderness preservation, land use, biodiversity loss, resource depletion, energy conservation, and a generally healthful relationship between nature and society.

The major is designed to help students understand environmental issues in their political, social, and scientific context. Because dealing with environmental issues requires an interdisciplinary approach, we emphasize the development of strong writing, research, and quantitative skills and a broad liberal arts perspective.

Minimum Grade Requirement

A minimum grade of “C-” is required in all courses required for the Environmental Studies B.A. and B.S. majors.

**Total Units**: 66-69

1. Course also satisfies General Education (GE)/Graduation Requirement.

To help you complete your degree in a timely manner and not take more units than absolutely necessary, there are ways to use single courses to meet more than one requirement (overlap). For further information, please visit the General Education page (p. 1103).

Note: There is no way to list all possible overlaps so please consult with a professional advisor. The Academic Advising Center can be visited online (http://www.csus.edu/acad/), by phone (916) 278-1000, or email (advising@csus.edu).
Environmental Studies B.A. and B.S. majors. A minimum grade of "C-" is required in all courses required for the Minimum Grade Requirement. Emphasize the development of strong writing, research, and quantitative skills and a broad liberal arts perspective. Because dealing with environmental issues requires an interdisciplinary approach, we consider increasingly serious issues as pollution, wildlife and wilderness preservation, land use, biodiversity loss, resource depletion, energy conservation, and a generally healthful relationship between nature and society.

The major is designed to help students understand environmental issues in their political, social, and scientific context. Because dealing with environmental issues requires an interdisciplinary approach, we emphasize the development of strong writing, research, and quantitative skills and a broad liberal arts perspective.

Minimum Grade Requirement
A minimum grade of "C-" is required in all courses required for the Environmental Studies B.A. and B.S. majors.

BS in Environmental Studies
Units required for Major: 67-69
Total units required for BS: 120

Program Description

Minor in Environmental Studies

Units required for Minor: 22

Program Description

The Environmental Studies program can help students use the resources of the entire University to gain an interdisciplinary understanding of such increasingly serious issues as pollution, wildlife and wilderness preservation, land use, biodiversity loss, resource depletion, energy...
conservation, and a generally healthful relationship between nature and society.

**Minimum Grade Requirement**
A minimum grade of "C-" is required in all courses required for the Environmental Studies minor.

**Total Units** 22

**Ethnic Studies**

*College of Social Sciences and Interdisciplinary Studies*

**Program Description**
Ethnic Studies is an interdisciplinary approach to the study of the cultures, languages, historical, and contemporary issues relating to African Americans, Asian Americans, Chicanx-Latinx, and Native Americans. The program directs students to critically examine the cultural contributions made by these groups to world civilization and to American society. Ethnic Studies challenges all students to analyze existing generalizations, theories, and concepts about racial and ethnic groups in order to develop valid generalizations, concepts, and theories about the people and their experiences. Students are encouraged to actively work to eliminate problems based on discrimination.

Students are also encouraged to blend professional area studies with Ethnic Studies. For example, a student may major in Ethnic Studies and minor in Business Administration. Similarly, students with a degree in Engineering Technology may minor in Ethnic Studies and emerge well-prepared professionally to assume middle management and supervisory positions in a diverse society. Ethnic Studies majors and minors enter careers and professions in both the public and private sectors. Program advising and other information can be obtained from the Ethnic Studies Office.

**Degree Programs**

- BA in Ethnic Studies (Asian American Studies) (p. 977)
- BA in Ethnic Studies (Chicanx/Latinx Studies) (p. 979)
- BA in Ethnic Studies (General Studies) (p. 980)
- BA in Ethnic Studies (Native-American Studies) (p. 982)
- BA in Ethnic Studies (Pan African Studies) (p. 983)
- BA in Ethnic Studies (Teachers in Bilingual Education) (p. 985)
- BA in Ethnic Studies (Teachers in Urban Settings) (p. 986)
- Minor in Ethnic Studies (p. 989)
- Minor in Asian American Studies (p. 988)
- Minor in Chicano and Latinx Studies (p. 989)
- Minor in Native American Studies (p. 990)
- Certificate in Pan African Studies (p. 990)

**Special Features**
- A student who majors in Ethnic Studies will not only have a strong background in one of the seven areas of specializations but will also gain broad background knowledge of other ethnic groups. Each program area develops its major focus in coordination with other program areas.
- Ethnic Studies encourages students to actively participate in community service learning projects. These projects afford students such opportunities as working directly with community-based organizations and/or agencies, local high schools, and/or middle schools.
- Ethnic Studies regularly sponsors cultural programs providing an opportunity for learning more about the experiences of the social groups framing the content of the Ethnic Studies program.

**Career Possibilities**
The rich educational experience of Ethnic Studies majors and minors are excellent preparation for careers and professions in the public and private sectors, as well as graduate school. Ethnic Studies majors and minors enter government service, politics, community/social service, business, public school teaching/administration, higher education teaching/administration, social work, counseling, law, journalism, and much more.

BAKER, BRIAN
BOSTON, MARTIN
Studies explores contemporary challenges and opportunities of Asian American history, purpose, and development of the field. Fundamental concepts

Introduction to the discipline of Asian American Studies, including the

Ethn 11B. Elementary Swahili. 3 Units
Term Typically Offered: Fall, Spring

Introduction to the language of Swahili speaking people. Emphasis is on developing vocabulary and writing skills. Attention will be given to understanding the relationship of language to culture.

Prerequisite(s): ETHN 1A or its equivalent; or instructor permission.

Term Typically Offered: Fall, Spring

Continuation of ETHN 1A with more emphasis on developing reading and listening skills along with further developing writing abilities. Provides deeper knowledge of the customs, traditions and experiences of Swahili speaking people.

ETHN 10. Africa: Myths and Realities. 3 Units
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall, Spring

Introduction to African Studies. Examines the most common myths found in both popular and academic literature about Africa and its people.

ETHN 11. Introduction to Ethnic Studies. 3 Units
Term Typically Offered: Fall, Spring

This course introduces foundational concepts and themes of the discipline of Ethnic Studies. The course focuses on the four historically defined racialized core groups: Native Americans, African Americans, Asian Americans, and Chicano/a/Latinx.

ETHN 11H. Introduction to Ethnic Studies (Honors). 3 Units
Term Typically Offered: Fall, Spring

This course introduces foundational concepts and themes of the discipline of Ethnic Studies. The course focuses on the four historically defined racialized core group: Native Americans, African Americans, Asian Black Americans, and Chicano/a/Latinx.

ETHN 14. Introduction to Asian American Studies. 3 Units
Term Typically Offered: Fall, Spring

Introduction to the discipline of Asian American Studies, including the history, purpose, and development of the field. Fundamental concepts and approaches in Asian American Studies will be discussed. Course also explores contemporary challenges and opportunities of Asian American Studies.

ETHN 21. First Year Seminar: Becoming an Educated Person. 3 Units
General Education Area/Graduation Requirement: Understanding Personal Development (E)
Term Typically Offered: Fall, Spring

Introduction to the nature and possible meanings of higher education, and the functions and resources of the University. Designed to help students develop and exercise fundamental academic success strategies and to improve their basic learning skills.

Note: Only open to students admitted to EOP Learning Communities Program.

ETHN 22. Contemporary Issues and Social Change. 3 Units
Prerequisite(s): ETHN 21
Term Typically Offered: Spring only

Generation after generation, university students have been key constituents in movements for social change. From public demonstrations to research studies, colleges and universities afford countless opportunities for students to advocate for a better world. This course explores how students can utilize university resources to explore interests and concerns, hone academic skills, and contribute to social change.

ETHN 30. Introduction to Chicano/Latino Studies. 3 Units
Term Typically Offered: Fall, Spring

Introduction to exploring the Chico/a/Latino experience in the U.S. An overview of the diverse and multiple experiences of people of Mexico, Cuba, Puerto Rico, Dominican Republic, Central and South America. From a socio-historical perspective, the intersections of class, race/ethnicity, and gender will be explored.

ETHN 50. Native American Religion and Philosophy. 3 Units
Term Typically Offered: Spring only

In-depth study into the principles of Native American religion and philosophical thought and the resulting impact of European culture upon the Native American societies.

ETHN 53. Introduction to Native American Studies. 3 Units
Term Typically Offered: Fall, Spring

Broad overview to the field of Native American Studies, including history, sovereignty, popular imagery, economic development, literature, philosophy, religion, urbanization, gender, social issues, and cultures of native peoples. Introduction to Native American Studies; recognizes intra-tribal, trans-national, and various historical, cultural, and political relationships, and issues through an interdisciplinary approach. The primary focus will be post 1900.

ETHN 70. Introduction to Pan African Studies. 3 Units
Term Typically Offered: Fall, Spring

Introduction to Pan African Studies. It is intended to introduce students to the context from which Pan African Studies arose as an academic discipline. It provides an overview of the academic, cultural, economic, and political inclusion of the pre/post colonial experience contributions of peoples of African descent. It is intended to show the interdisciplinary character of the study of Pan Africanism.
ETHN 71. Leadership in the African Diaspora. 3 Units
Term Typically Offered: Spring only

Provides students with an understanding of the unique contours of leadership throughout the African Diaspora through an interdisciplinary approach to understanding particular problems, necessities and styles of leadership. Examines leaders and leadership roles within the African Diaspora with an emphasis on a variety of positions and contexts in the areas of politics, religion, art, and education, including the international, national, and local community (grassroots) arenas.

ETHN 72. Black Images in Popular Culture. 3 Units
Term Typically Offered: Fall, Spring

This course is designed as a survey of the Black image within popular culture. Students will interrogate the roots of African American stereotypes within North American culture. Through an understanding of this history, we will assess how these stereotypes have evolved over time and the role they have played in constructing and positioning African Americans in American society. Students examine the ways in which African Americans actively construct images of themselves for a variety of political and social purposes.

ETHN 94. CAMP Transition and Problem Solving. 3 Units
Term Typically Offered: Fall, Spring

Designed for CAMP students new to University life, form and functions. The three hour lecture/discussions per week are focused on assisting students with making a successful transition to the University.

Note: May be repeated once for credit.

Credit/No Credit

ETHN 96B. Contemporary Issues and Social Change. 3 Units
Term Typically Offered: Fall, Spring

Generation after generation, university students have been key constituents in movements for social change. From public demonstrations to research studies, colleges and universities afford countless opportunities for students to advocate for a better world. This course explores how students can utilize university resources to explore interests and concerns, hone academic skills and contribute to social change.

ETHN 98. Co-Curricular Activities. 1 - 3 Units
Term Typically Offered: Fall, Spring

Co-curricular activities related to the subject matter and intellectual concerns in Ethnic Studies.

Note: Recommended for students new to the university experience and students having completed fewer than 45 units of course work. May be repeated twice for total credits not to exceed 6 units.

Credit/No Credit

ETHN 100. Ethnic America. 3 Units
Prerequisite(s): GWAR certification before Fall 09; or WPJ score of 80+; or 3-unit placement in ENGL 109M or ENGL 109W; or 4-unit placement in ENGL 109M or ENGL 109W and co-enrollment in ENGL 109X; or WPJ score 70 or 71 and co-enrollment in ENGL 109X.

General Education Area/Graduation Requirement: GE AREA D, Race & Ethnicity Graduation Requirement (RE), Writing Intensive Graduation Requirement (WI)

Term Typically Offered: Fall, Spring, Summer

Through an interdisciplinary approach, introduces the four major American ethnic groups - Black, American Indian, Chicano, Asian American. Focuses on themes common to all four groups (racism, economic and political oppression) and demonstrates the varied contributions of each culture to American social and economic life.

ETHN 110. The Asian American Experience. 3 Units
General Education Area/Graduation Requirement: GE AREA D

Term Typically Offered: Fall, Spring

Survey of the experiences of various Asian groups in the U.S. from the mid-nineteenth century to present. The historical forces affecting the immigration and settlement patterns of Chinese, Japanese, Filipinos, Koreans, Asian Indians and Southeast Asians (Vietnamese, Cambodians, Laotians) will be compared and contrasted. Students will analyze the problems resulting from limited access to the social, political, and economic institutions of U.S. society.

ETHN 111. Southeast Asians in the US. 3 Units
Term Typically Offered: Spring only

Examines several issues and factors shaping the experiences of recent immigrant groups (Vietnamese, Mien, Hmong, Cambodians, Laotians) from Southeast Asia to the U.S. Focuses on the dynamic relationship between ethnicity, minority assignment and social integration as these affect the experiences of these immigrant groups.

ETHN 112. Contemporary Asian American Issues. 3 Units
General Education Area/Graduation Requirement: GE AREA D

Term Typically Offered: Fall, Spring

Examines several important social issues such as emerging communities, education, employment and occupations, anti-Asian violence, media images and stereotypes, families and identities, and political empowerment shaping the contemporary experiences of diverse Asian American groups.

ETHN 113. Asian American Communities. 3 Units
General Education Area/Graduation Requirement: GE AREA D

Term Typically Offered: Fall, Spring

Examination of the historical and contemporary experiences of various Asian American communities through active investigation. The concepts, methods, and theories commonly utilized in community research will be covered.

ETHN 114. Asian Americans and Globalization. 3 Units
General Education Area/Graduation Requirement: GE AREA D

Term Typically Offered: Fall, Spring

Examination of the Asian American immigration within the context of the larger Asian global migration. Emphasis will be placed on the period from the 16th century to the contemporary Asian global migration. A critical examination of the perspectives on the Pacific region and how the economic, social, political and historical forces affected migration and the formation of Asian global communities.
ETHN 115. Biracial and Multiracial Identity in the US. 3 Units
Term Typically Offered: Fall, Spring
Examination of biracial/multiracial populations, their social histories, social experiences and social identities within various sociological and social psychological theoretical frameworks. An exploration of the relationship biracial/multiracial groups have had, and continue to have, with the larger white majority and monoracially identified minorities.

ETHN 116. Asian American Politics and Public Policy. 3 Units
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall, Spring
Critical examination of the historical and contemporary political experiences of Asian Americans and their pursuits of immigration rights, citizenship, political identity, equality, freedom, and incorporation into the U.S. political system.

ETHN 117. Black Political Thought. 3 Units
Term Typically Offered: Spring only
To systematically and analytically introduce the predominant political trends and concepts presently entertained and harbored in the Black Community. A necessary adjunct to this dialogue is the racist theme in American society since on balance this is the matrix out of which the political alternatives and concepts grew.
Cross Listed: GOVT 117; only one may be counted for credit.

ETHN 118. Asian American Women. 3 Units
General Education Area/Graduation Requirement: Humanities (Area C2)
Term Typically Offered: Fall
Using an interdisciplinary approach, course offers a broad introduction to the principle values and traditions shaping Asian American women's lives in the U.S. Examines cultural diversity, gender inequality and conflicts between traditions and social practices through critical analysis of literature, film and cultural theories as expressions of identity. Topics covered include: cultural heritage and philosophies, intergenerational conflict, transnationalism, gender roles and socio-economic practices. Provides comprehensive understanding of principle factors governing Asian American women's lives at the nexus of Asian and American cultures.
Cross-listed: WOMS 118.

ETHN 119. The Filipino American Experience. 3 Units
Term Typically Offered: Fall, Spring
Overview of the Filipino American experience from the 16th century to the present. Immigration and settlement of Filipinos in the U.S. will be critically examined within the context of historical, social, economic, and political forces in American society. How the Filipino labor market status, race, class, and sex/gender relations affected the evolution and formation of Asian American communities will be critically examined.

ETHN 121. Hmong American Experiences. 3 Units
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall only
Explores the multi-generational and multi-faceted experiences of Hmong Americans. Focusing on the historical and contemporary experiences of Hmong populations in the U.S., the course addresses important topics such as U.S. empire and militarism, war, community development, generational differences, health, gender, sexuality, media and representation, race relations, violence, and community engagement and empowerment.

ETHN 122. Sikh Americans and Globalization. 3 Units
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Spring only
Examines the history and migration of Sikhs throughout the world, including the United States. Topics include the origin of Sikhism, Sikh history/religion/culture/social institutions and social relations, direct and secondary migration, race and ethnic relations, second-generation identity issues, and global diaspora/transnationalism.

ETHN 123. Asian Americans in Media and Popular Culture. 3 Units
General Education Area/Graduation Requirement: Humanities (Area C2)
Term Typically Offered: Spring only
A critique of dominant representations of Asian Americans in media and popular culture. The ways in which media and art are used by Asian Americans for social change will also be explored. Students create their own forms of media and art to accurately represent Asian Americans.

ETHN 125. Advanced Topics Race & Intersectionality in Film. 3 Units
General Education Area/Graduation Requirement: Arts (Area C1)
Term Typically Offered: Spring only
This course examines the social and material stakes in American cinematic representations of race, gender, and sexuality. Utilizing an intersectional framework that sees these social categories as always defined by one another, we discuss film as an artistic medium that is integral to the construction and contestation of ideas of social difference. In the process, we move beyond debates about positive or negative cinematic representations and instead discuss the ways that the art of film shapes and reflects social structures.

ETHN 130. Chicano/Mexican-American Experience. 3 Units
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall, Spring, Summer
Transmits knowledge and understanding of how racism confronts and divides American society. Attention will be given to the effects of racism on the experiences of Chicanos/Mexican Americans in American society.

ETHN 131. La Raza Studies. 3 Units
General Education Area/Graduation Requirement: Race & Ethnicity Graduation Requirement (RE), GE AREA D
Term Typically Offered: Fall, Spring
Ethnohistorical analysis of La Raza Cosmica designed to convey crosscultural knowledge and understanding of peoples from Mexico, Cuba, Puerto Rico and Central America. Includes a comparative analysis of ethnic identity and a survey of socio-cultural, political and economic changes which have influenced U.S./Latin American policy and immigration patterns of Latinos to the U.S.

ETHN 132. La Mujer Chicana. 3 Units
Term Typically Offered: Fall, Spring
Critical analysis of the cultural influence that the family, community, religion, economic status and peers play upon the decisions, the values and roles held by Chicanas. An examination of the processes which have resulted in the change of attitudes, values and roles of the contemporary Chicana.
ETHN 133. Crosscultural Aging in America. 3 Units  
General Education Area/Graduation Requirement: Race & Ethnicity 
Graduation Requirement (RE) 
Term Typically Offered: Fall, Spring 
Examines aging crossculturally among ethnic groups in America. Emphasis will be placed on a review of the current literature on aging and ethnicity. Also examines changing roles and values in Black, Hispanic, Asian and Native American families.

ETHN 136. US Mexican Border Relations. 3 Units  
General Education Area/Graduation Requirement: GE AREA D 
Term Typically Offered: Fall, Spring 
Contemporary issues affecting the daily lives of people living in the U.S.-Mexico Borderlands. Theories, gender issues, political, economic and social relationships on both sides of the border will be examined.

ETHN 137. Race and Ethnicity in Latin America and Caribbean. 3 Units  
General Education Area/Graduation Requirement: GE AREA D 
Term Typically Offered: Fall, Spring 
Socio-economic, historical and contemporary issues affecting the various peoples living in the Latin America and the Caribbean. We will examine the intersection of race and ethnicity as well as class, gender, and identity, with attention paid to the contributions and presence of Asians, Africans, Europeans, and Indigenous peoples.

ETHN 140. Native American Experience. 3 Units  
General Education Area/Graduation Requirement: GE AREA D 
Term Typically Offered: Fall, Spring, Summer 
Advanced course in American Indian history, political and social relations, with emphasis upon current movements and problems of Native American life.

ETHN 141. Politics of the African Diaspora. 3 Units  
General Education Area/Graduation Requirement: Race & Ethnicity 
Graduation Requirement (RE), GE AREA D 
Term Typically Offered: Fall only 
Examines the social, political, cultural, and economic factors which have been important to the African diaspora. Examines how African people have responded to those factors, both in terms of formal, political thought, and in terms of political movements and political institutions. Examines thought and proactive, comparability to Africa, U.S., Caribbean, Central and South America. Cross Listed: GOVT 141; only one may be counted for credit.

ETHN 142. Native American Tribal Governments. 3 Units  
General Education Area/Graduation Requirement: GE AREA D 
Term Typically Offered: Fall, Spring 
Examines the regulatory powers that American Indian tribes possess over their peoples and territories. Students will acquire an understanding of tribal governmental history, internal affairs, jurisdictional conflicts, government relations, federal Indian public policy and economic development. The political aspects of tribal government administration and the emergence of self-governance as a foundation for self-determination, development and sustainability will be explored.

ETHN 143. American Indians, Film and Popular Culture. 3 Units  
General Education Area/Graduation Requirement: Humanities (Area C2) 
Term Typically Offered: Spring only 
Students will examine various ways American Indians are imagined by popular culture through film, including drama, comedy and documentary. Beyond identifying and analyzing images of Indians as well as myths about their historical and contemporary circumstances, students will be challenged to investigate and understand the tenuous relationship between fact and fiction in popular culture.

ETHN 144. Native Voice, Memory, and Biography. 3 Units  
Prerequisite(s): GWAR certification before Fall 09; or WPJ score of 80+; or 3-unit placement in ENGL 109M or ENGL 109W; or 4-unit placement in ENGL 109M or ENGL 109W and co-enrollment in ENGL 109X; or WPJ score 70 or 71 and co-enrollment in ENGL 109X. 
General Education Area/Graduation Requirement: Writing Intensive 
Graduation Requirement (WI), Humanities (Area C2) 
Term Typically Offered: Fall, Spring 
Through the genre of biography and autobiography, students will examine the relevance of Native voice and memory in reference to the development of identity, cultural transformation, indigenous knowledge, political activism, and historical consciousness. Students will analyze the political, economic and cultural contexts in which Native voices and memories emerge.

ETHN 145. California Indian Studies. 3 Units  
Term Typically Offered: Fall, Spring 
This upper division course surveys California Indian Studies. The course is a place-based approach to anti-racist and anti-colonial movements through community centered learning and is a foundational overview of contemporary political, social, economic, and environmental representations through California Indian perspectives and epistemologies. Topics can include but are not limited to: tribal citizenship, self-determination, decolonization, sovereignty, cultural revitalization, and settler colonialism.

ETHN 146. Native American Oral Tradition and Storytelling. 3 Units  
General Education Area/Graduation Requirement: Humanities (Area C2) 
Term Typically Offered: Fall, Spring 
Study of how Native American oral tradition and storytelling affect the experience of tribal expression. Examines the foundation of this tradition through an analysis and comparison of traditional and contemporary forms.

ETHN 147. Native American Women. 3 Units  
Term Typically Offered: Fall only 
Examination of the traditional, non-traditional, and contemporary roles of Native American women. The relationship of these roles to both Indian and non-Indian societies. An exploration of Native women’s issues through histories, literatures, and oral traditions, focusing on Native American women’s perspectives. Colonization has drastically impacted native women and the lives of their families, nations and communities. Resistance and de-colonization efforts by Native women will be illuminated and analyzed.
ETHN 152. American Indians, Sovereignty and US Laws. 3 Units
Term Typically Offered: Spring only
Examines the legal history developed between American Indians and Euro-Americans. Includes an introduction to events, circumstances, and relationships that developed social and legal concepts. There will be an examination of constitutional principles, laws and United State's policies from the early 1800's to the present and the impacts of these doctrines on American Indian sovereign powers. The students will acquire a basic understanding of the sources of political conflict in contemporary American Indian communities and American society.

ETHN 155. Genocide and Holocaust Studies. 3 Units
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall, Spring, Summer
Examines genocide cases, such as the Armenian genocide, the Jewish Holocaust, the genocide of Roma, the Cambodian "Killing Fields", genocide in East Timor, ethnic cleansing in Bosnia, the genocide of the Tutsi in Rwanda and genocide in the Darfur region of Sudan, as well as the genocide of Native Americans, and other indigenous peoples. Addresses causes of, and responses to, genocide around the world, especially in Africa, Asia and Latin America. This phenomenon is examined historically, descriptively, comparatively and theoretically.

ETHN 156. Indigenous People. 3 Units
Term Typically Offered: Fall, Spring
Common existential experiences of indigenous people all over the world namely the Batwa and Pygmies in Central Africa, the Khoisan of Southern Africa, the Berber in Northern Africa, the Sami in Northern Europe, the Basque in France and Spain, the Hawaiians in the Pacific, the Ainu of Japan, the Aborigines in Australia, and Native Americans in the Americas.

ETHN 161. Chicano/Latino Politics and Public Policy. 3 Units
Term Typically Offered: Fall, Spring
Explores the historical and contemporary development of Chicano/Latino political activity in the United States. Will review essential components of the U.S. political system and examines relevant theories and concepts that have impacted public policy debate related to education, employment, health, housing, immigration, and income inequity. Primarily focuses on the political history and present day circumstances of the three largest Latino groups, Mexican Americans, Puerto Ricans, and Cuban Americans.

ETHN 166. American Indigenous Families: Issues and Perspectives. 3 Units
Term Typically Offered: Fall, Spring
Application of research and theory specific to Latino/Chicano and American Indian families; strategies for applying this knowledge to areas of service, therapy, policy, and education. Lecture/discussion, internet enhancement.
Cross Listed: FACS 166A; only one may be counted for credit.

ETHN 167. Asian American Families: Issues and Perspectives. 3 Units
Term Typically Offered: Fall, Spring
Family is an adaptable and changing institution of society. Research and theory on Asian American families will be highlighted with an emphasis on applying the information to areas of service, therapy, policy, and education. Experiences of various Asian groups in the U. S. will be compared.
Cross Listed: FACS 166B; only one may be counted for credit.

ETHN 170. Pan African Studies. 3 Units
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall, Spring
Investigation into the subjective aspects of Pan African Studies (Black Studies). Covers such topical areas as the struggle by Black Americans for education, the genesis of the Black Studies movement, Black culture, institutional change, etc. The very nature of the course permits the coverage of a broad range of subject matter. Students are encouraged to take specific courses offered by the Pan African Studies program for more extensive investigation.

ETHN 171. African Religions and Philosophies. 3 Units
General Education Area/Graduation Requirement: Humanities (Area C2)
Term Typically Offered: Fall, Spring
Study of the African's concept of God with particular emphasis on His works, His relationship to His creations, and His worship. Also covers the concepts of evil, ethics, justice and various metaphysical ideas.

ETHN 172. Black Women In America. 3 Units
Term Typically Offered: Spring only
Examines the historical and social forces that shape the lives of Black women. Examines the Black woman's role in the family, community, work force and society in general.

ETHN 173. The Black Family in the United States. 3 Units
Term Typically Offered: Fall, Spring
Using the interdisciplinary approach, several institutional factors affecting the structure, evolution, and function of the Black Family unit in the U.S. will be studied. Permits a broad, yet systematic, examination of the Black Family in order to understand the several dynamics affecting the Black Family in particular and Black Americans in general.

ETHN 177. Topics In African Studies. 3 Units
Term Typically Offered: Fall, Spring
Special topics in African studies.

ETHN 177A. Genocide and Human Rights: Africa. 3 Units
Term Typically Offered: Fall only
This course focuses on the human rights abuses and Genocides that occurred in colonial and post-colonial Africa. It explores Genocide in Rwanda, Darfur, Namibia, and mass killings in Congo. It examines Campaigns of cultural Genocide, ideological pressure, and the involvement of former colonial powers in mass killings. Different approaches of conflict resolution such as the South African Truth and Reconciliation model will be examined. Causes and conditions of Genocide will be interpreted through interdisciplinary literature.

ETHN 179. Black Music and Black Consciousness. 3 Units
Term Typically Offered: Fall only
Provides students with an understanding of the essential role Black music assumes in the development of people of African descent throughout the Black Diaspora. Major topics include the historical development of Black music, the role of music in Black resistance and other forms of political behavior, the economic exploitation of Black music and the Black musician and the influence of globalization.
ETHN 180A. Forms of African-American Poetry. 4 Units
Prerequisite(s): GWAR certification before Fall 09; or WPJ score of 80+; or 3-unit placement in ENGL 109M or ENGL 109W; or 4-unit placement in ENGL 109M or ENGL 109W and co-enrollment in ENGL 109X; or WPJ score 70 or 71 and co-enrollment in ENGL 109X.
General Education Area/Graduation Requirement: Writing Intensive Graduation Requirement (WI)
Term Typically Offered: Fall, Spring
Focuses on four or more African-American poets, representing a historical succession of literary periods.

ETHN 180B. Forms African-Am Fiction. 4 Units
Prerequisite(s): GWAR certification before Fall 09; or WPJ score of 80+; or 3-unit placement in ENGL 109M or ENGL 109W; or 4-unit placement in ENGL 109M or ENGL 109W and co-enrollment in ENGL 109X; or WPJ score 70 or 71 and co-enrollment in ENGL 109X.
General Education Area/Graduation Requirement: Writing Intensive Graduation Requirement (WI)
Term Typically Offered: Fall, Spring
Focuses on four or more African-American writers of fiction, surveying texts representing a historical succession of literary periods.

ETHN 181. Cinematic Representations of Pan African Identities. 3 Units
This course is designed as an intensive survey of African American cinema that engages questions of history, culture, politics and the overall function of race and representation in American society. Our focus in this class is to understand Pan African filmmakers and their respective films. We will focus on cultural factors intrinsic to Pan African societies and how cinema fits into this context, as well as how issues of gender, sexuality and class impact the films.

ETHN 182. Protest in Hip Hop. 3 Units
This course is designed to be an intensive survey of the evolution of hip hop as a form of social protest that developed into a global cultural movement. The course draws parallels from hip hop's historical function with past and present U.S. social movements advocating for social justice, including the recent #BlackLivesMatter movement. Students will also examine cultural studies theoretical concepts analyzing mainstream's exploitation and marginalization of race, class, gender and sexuality representations in hip hop.

ETHN 183. Research in Ethnic Studies. 3 Units
Prerequisite(s): One upper-division Ethnic Studies course.
Term Typically Offered: Fall, Spring
Designed to provide students with contemporary theoretical knowledge and practical skills for conducting research in the African American, Asian American, Chicano/Latino, and Native American communities. Methodology which addresses issues and research perspectives distinctly germane to researching a targeted community is examined.

ETHN 195A. Ethnic Studies Fieldwork. 1 Unit
Prerequisite(s): Ethnic Studies majors only
Corequisite(s): ETHN 195B
Term Typically Offered: Fall, Spring
Allow students, with faculty supervision, to work closely with the ethnic minority communities. Students may work with a community agency, community organization, or other site with instructor approval.
Credit/No Credit

ETHN 195B. Ethnic Studies Seminar. 2 Units
Prerequisite(s): Ethnic Studies majors only
Corequisite(s): ETHN 195A
Term Typically Offered: Fall, Spring
Seminar discussions designed to synthesize and assess knowledge in Ethnic Studies courses applied to fieldwork experiences.

ETHN 198. Co-Curricular Activities. 1 - 3 Units
Term Typically Offered: Fall, Spring
Co-curricular activities related to the subject matter and intellectual concerns in Ethnic Studies. For example, students may earn ETHN 198 credits by participating in Ethnic Studies classes as tutors and/or section or discussion leaders; teaching as voluntary instructors or tutors in courses offered by community organizations.
Note: May be repeated twice for total credits not to exceed 6 units.
Credit/No Credit

ETHN 199. Special Problems. 1 - 3 Units
Term Typically Offered: Fall, Spring
Individual projects or directed reading. Admission requires approval of the faculty member under whom the individual work is to be conducted, the appropriate program director and the Chair of Ethnic Studies.
Credit/No Credit

ETHN 203. Contemporary Ethnic Studies Issues. 3 Units
Prerequisite(s): MA Education (Multicultural Education) Students only.
Term Typically Offered: Fall only
Examines important social issues that shape the contemporary experience of African Americans, Asian Americans, Latinx/Chicano, and Native Americans. Social issues such as: 1) Discrimination and violence, 2) Economic inequality (employment, income, wealth, retirement), 3) Educational challenges, and 4) Global context of race and class inequality.

ETHN 204. Foundations & Theories. 3 Units
Prerequisite(s): MA in Education (Multicultural Education) students only.
Term Typically Offered: Spring only
Foundations and theories in Ethnic Studies, identifies, analyzes, and critically examines the experience of African Americans, Asian Americans, Latinx/Chicano, and Native Americans.
Note: This course is a lecture/discussion that is 45 hours, 3-unit course offered in eight weeks (including several Saturdays).

ETHN 299. Special Problems/Individual Study. 3 Units
Term Typically Offered: Fall, Spring
Open to classified and unclassified graduate students. Allow qualified students to explore topics, issues, and subjects pertinent to ethnic groups in the U.S.
Credit/No Credit

BA in Ethnic Studies (Asian American Studies)

Units required for Major: 36
Total units required for BA: 120
Program Description

Ethnic Studies is an interdisciplinary approach to the study of the cultures, languages, historical, and contemporary issues relating to African Americans, Asian Americans, Chicana/os-Latina/os, and Native Americans. The program directs students to critically examine the cultural contributions made by these groups to world civilization and to American society. Ethnic Studies challenges all students to analyze existing generalizations, theories, and concepts about racial and ethnic groups in order to develop valid generalizations, concepts, and theories about the people and their experiences. Students are encouraged to actively work to eliminate problems based on discrimination.

Students are also encouraged to blend professional area studies with Ethnic Studies. For example, a student may major in Ethnic Studies and minor in Business Administration. Similarly, students with a degree in Engineering Technology may minor in Ethnic Studies and emerge well-prepared professionally to assume middle management and supervisory positions in a multicultural society. Ethnic Studies majors and minors enter careers and professions in both the public and private sectors.

Note: Program advising and other information can be obtained from the Ethnic Studies Department.

BA in Ethnic Studies (Native-American Studies)

Units required for Major: 36
Total units required for BA: 120

Program Description

Ethnic Studies is an interdisciplinary approach to the study of the cultures, languages, historical, and contemporary issues relating to African Americans, Asian Americans, Chicana/os-Latina/os, and Native Americans. The program directs students to critically examine the cultural contributions made by these groups to world civilization and to American society. Ethnic Studies challenges all students to analyze and evaluate the historical, cultural, and social factors that have shaped American society. Ethnic Studies encourages everyone to understand the multicultural experiences of African Americans, Asian Americans, Chicana/os-Latina/os, and Native Americans. The program directs students to critically examine the cultural contributions made by these groups to world civilization and to American society. Ethnic Studies challenges all students to analyze and evaluate the historical, cultural, and social factors that have shaped American society. Ethnic Studies encourages everyone to understand the multicultural experiences of African Americans, Asian Americans, Chicana/os-Latina/os, and Native Americans.

Students are also encouraged to blend professional area studies with Ethnic Studies. For example, a student may major in Ethnic Studies and minor in Business Administration. 2 Required in Major; also satisfies Graduation Requirement.

3 If not satisfied before entering Sacramento State, it may be satisfied in General Education Area C2 (Humanities). “C- or better required.” The alternative methods for satisfying the Foreign Language Proficiency Requirement are described here: https://www.csus.edu/college/arts-letters/world-languages-literatures/foreign-language-requirement.html

BA in Ethnic Studies (Pan African Studies)

Units required for Major: 36
Total units required for BA: 120
Program Description

Ethnic Studies is an interdisciplinary approach to the study of the cultures, languages, historical, and contemporary issues relating to African Americans, Asian Americans, Chicana/os-Latina/os, and Native Americans. The program directs students to critically examine the cultural contributions made by these groups to world civilization and to American society. Ethnic Studies challenges all students to analyze existing generalizations, theories, and concepts about racial and ethnic groups in order to develop valid generalizations, concepts, and theories about the people and their experiences. Students are encouraged to actively work to eliminate problems based on discrimination.

Students are also encouraged to blend professional area studies with Ethnic Studies. For example, a student may major in Ethnic Studies and minor in Business Administration. Similarly, students with a degree in Engineering Technology may minor in Ethnic Studies and emerge well-prepared professionally to assume middle management and supervisory positions in a multicultural society. Ethnic Studies majors and minors enter careers and professions in both the public and private sectors.

Note: Program advising and other information can be obtained from the Ethnic Studies Department.

Minor in Chicanx and Latinx Studies

Units required for Minor: 21

Program Description
Ethnic Studies is an interdisciplinary approach to the study of the cultures, languages, historical, and contemporary issues relating to African Americans, Asian Americans, Chicanx and Latinx, and Native Americans. The program directs students to critically examine the cultural contributions made by these groups to world civilization and to American society. Ethnic Studies challenges all students to analyze existing generalizations, theories, and concepts about racial and ethnic groups in order to develop valid generalizations, concepts, and theories about the people and their experiences. Students are encouraged to actively work to eliminate problems based on discrimination.

Students are also encouraged to blend professional area studies with Ethnic Studies. For example, a student may major in Ethnic Studies and minor in Business Administration. Similarly, students with a degree in Engineering Technology may minor in Ethnic Studies and emerge well-prepared professionally to assume middle management and supervisory positions in a multicultural society. Ethnic Studies majors and minors enter careers and professions in both the public and private sectors.

Note: Program advising and other information can be obtained from the Ethnic Studies Department.

### Family and Consumer Sciences

*College of Social Sciences and Interdisciplinary Studies*
Department Description

The Department of Family and Consumer Sciences offers four distinct programs and one concentration. The focus of these programs is to enhance the skills and knowledge that will promote the well-being of individuals, families, and communities. Our programs and profession focus on individuals and families in order to achieve an optimum balance between people and their environments. The mission of Family and Consumer Sciences is to empower individuals and families to function interdependently in a global society.

Family and Consumer Science Education (Pre-Credential Single Subject Matter Program)

The major meets the California Career Technical Education (CTE) Curriculum Standards and Home Economics Teacher Preparation Standards of Quality and Effectiveness for Subject Matter Programs.

Graduates are prepared to enter a Single Subject Teaching Credential Program required to teach Family and Consumer Sciences/Home Economics in middle and high schools. Coursework includes Nutrition and Food, Fashion Merchandising & Management, and Family Studies & Human Development combined with an internship in a middle or high school in the Sacramento area.

Family Studies and Human Development

The major prepares students for careers in various human service fields. The program emphasizes an asset-based approach to understanding lifespan human development, family systems and family diversity. The major is approved by the National Council on Family Relations (NCFR) for academic programs in Family Life Education.

Certificate in Family Life Education

The goal of the certificate is to prepare students to provide family life education in a variety of settings such as schools, churches, youth programs, health care, and family service agencies. The certificate program is designed to cover the ten, family life education content areas delineated by the National Council on Family Relations NCFR. The certificate is not a teaching credential. In conjunction with a Bachelor or Master degree or a state teaching credential, it may be helpful in obtaining employment as a Family Life Educator.

Fashion Merchandising and Management

The major prepares students for careers in the global fashion industry, including management, marketing, buying, advertisement, promotion, manufacturing, sourcing, distribution, retailing, and many more. The program also emphasizes the contemporary and historical ways of meeting the economic, physiological, aesthetic, psychological, sociological, and cultural needs of consumers relative to fashion products.

The program offers a vast array of courses that cover different areas of the fashion industry. Students learn the basics of fashion by taking foundation courses. Upper division marketing classes allow students to become more familiar with the business side of fashion. Courses focusing on the basic design skills introduce students to the creative side of the industry. This program provides a well-rounded education that prepares students for jobs in any area of the fashion industry.

The Minor in Fashion Merchandising and Management provides students an understanding of the role fashion plays in social/cultural environment, business/economic environment, and natural environment. The minor is complementary to students pursuing careers in communication studies, psychology, journalism, marketing, entrepreneurship, management, business, art, and design.

Nutrition and Food

The major prepares students for careers in the field of nutrition, food management, community nutrition, and food sustainability. The program emphasizes the roles of nutrition and food in individual and family health, cultural and behavioral influences on food selection, and the management of commercial and noncommercial food systems.

The optional Concentration in Dietetics (Didactic Program in Dietetics) prepares students for supervised practice leading to eligibility for the Commission on Dietetic Registration credentialing exam to become a registered dietitian nutritionist (RDN), as well as to prepare students for graduate school and a variety of careers in clinical nutrition, community nutrition, private practice, food service administration, and food science.

The graduate program includes specialized coursework in nutrition science, advanced community nutrition, behavioral nutrition, and food and nutrition policy plus a wide array of interdisciplinary electives. Designed for career advancement in food access and nutrition education agencies and to complement Sacramento State’s Dietetic Internship for those on the path to becoming Registered Dietitian Nutritionists.

The Dietetic Internship administered by the Department is a post-baccalaureate, 42-week internship accepting 10 interns annually. This program provides full-time supervised practice at a variety of health care and community facilities.

The minor provides students an understanding of the role food and nutrition play in health and disease prevention. The minor could be a relevant addition to many majors.

Degree Programs

BS in Family and Consumer Science Education (Pre-Credential, Single Subject Matter Program)

BS in Family Studies and Human Development (p. 999)

BS in Fashion Merchandising and Management (p. 1000)

BS in Nutrition and Food (p. 1001)

BS in Nutrition and Food (Dietetics) (p. 1002)

Minor in Family and Consumer Sciences (p. 1004)

Minor in Fashion Merchandising and Management

Minor in Nutrition and Food (p. 1004)

MS in Nutrition and Food (p. 1005)

Certificate in Family Life Education

Certificate in Grocery Management

Accreditation

In addition to California State University, Sacramento’s full accreditation by the Western Association of Schools and Colleges, the Bachelor of Science in Nutrition and Food Dietetics Concentration is also individually accredited by the Accreditation Council for Education in Nutrition and Dietetics (ACEND), the accrediting agency for the Academy of Nutrition
and Dietetics. The department also administers a Dietetics Internship (DI) program accredited by ACEND.

Notice to Students RE: Professional Licensure and Certification
California State University programs for professions that require licensure or certification are intended to prepare the student for California licensure and certification requirements. Admission into programs for professions that require licensure and certification does not guarantee that students will obtain a license or certificate. Licensure and certification requirements are set by agencies that are not controlled by or affiliated with the California State University and licensure and certification requirements can change at any time.

The California State University has not determined whether its programs meet other states’ educational or professional requirements for licensure and certification. Students planning to pursue licensure or certification in other states are responsible for determining whether, if they complete a California State University program, they will meet their state’s requirements for licensure or certification. This disclosure is made pursuant to 34 CFR §668.43(a)(5)(v)(C).

Special Features
• Faculty in Family and Consumer Sciences come from diverse educational backgrounds and expertise. Faculty members promote and integrate a holistic approach to understanding individuals and families while preparing students for professional careers or graduate study.
• All programs in the department are committed to reflecting in our study and in our practices the diverse populations with which our students will work, including diversity in ability, age, educational level, ethnicity, gender identity, immigration status, nationality, race, religion, sexual orientation, and socioeconomic status.
• The Department is equipped with laboratories for textiles, food, and teacher credentialing preparation courses.
• Support facilities include a Costume Collection gallery. Visit the virtual gallery at http://www.csus.edu/facs/.
• The Didactic Program in Dietetics (DPD) and the Dietetics Internship (DI) programs are accredited by the Accreditation Council for Education in Nutrition and Dietetics (ACEND).
• The Family Studies and Human Development program is approved by the National Council on Family Relations for academic programs in Family Life Education.
• The Pre-Credential Single Subject Matter program in FACS Education is approved by the California Commission on Teacher Credentialing.
• Service Learning courses (FASH 146, FSHD 162, NUFD 117), Academic Internships (FACS 195A, FACS 195C, FSHD 195F), Education practica and other opportunities for Community Engaged Learning are a hallmark of our degree programs. These provide an opportunity for students to work under the supervision of a professional in business, education, government, or public service settings. Internships are planned a semester in advance with an adviser.
• The Department sponsors four student organizations for students to participate in professional development and community service related to their major programs.
• In addition to serving majors and minors, the Department provides several general education courses for other majors including classes that meet the graduation requirements for the writing intensive, and race and ethnicity categories.

Career Possibilities

**Fashion Merchandising and Management:** Buyer · Merchandiser · Marketing Manager · Retail Manager · Regional Manager · District Manager · Distributor · Sales Representative · Product Analyst · Sourcing Analyst · Quality Control Analyst · Inventory Specialist · Apparel Engineer · Fashion Coordinator · Stylist · Visual Merchandiser · Fashion Designer · Fashion Editor · Fashion Forecaster · Fashion Reporter · Magazine Editor

**Family Studies and Human Development:** Consumer and Family Resources · Community-Based Social Services · Community Education · Family Life Educator · Family Planning · Family Support Services Provider · Health Care and Family Wellness · Marriage and Family Enrichment · Parenting Educator · Prenatal and Maternity Services · Sexuality Educator · Youth Adviser · Child Life Specialist

**Nutrition and Food:** Nutrition and Health Educator · Community/ Public Health Nutrionist · Food Service Manager/Hospitality · Foodservice Inspector · Grocery Retailing · State Nutrition Program Assistant, Consultant, or Analyst · School Nutrition Services Specialist · Entrepreneur/Consultant · Nutrition Program Representative · University/ Medical Research Centers.

**Additional careers in Dietetics:** Registered Dietitian Nutritionist (RDN) · Nutrition and Dietetics Technician, Registered (NDTR) · Clinical Dietetics-Hospitals, Clinics, or other Health Care Facilities#Community and Public Health #Private Practice#Sports Nutrition#Corporate Wellness#University/Medical Centers#Research#Food and nutrition-related business and industries

**Family and Consumer Sciences Education (Pre-Credential Single Subject Program):** High school and middle school teacher · Extension specialist · Consultant in Home Economics Careers and Technology · Life Coach · Resources Specialist · Entrepreneur · Consumer Educator · Credit Counselor · California State Department of Education · FCCLA State Adviser.

FACS 100. Research: Methods and Application in Family and Consumer Sciences. 3 Units
**Prerequisite(s):** 6 FACS units completed. FACS majors only
**Term Typically Offered:** Fall, Spring, Summer

Study of methods and application of research in the field of Family and Consumer Sciences. Focus on scientific inquiry, methodology, evidence-based practice, interpretation of research results, program and project evaluation, and professional communication. Includes the examination of ethical practices, professional presentation skills, and technical writing skills.

FACS 140. Family Resource Management. 3 Units
**Term Typically Offered:** Fall, Spring

Management of resources in family systems. Interaction of families with other societal and environmental systems in acquiring and using resources to meet goals and other demands.

FACS 141. Family Finance. 3 Units
**Term Typically Offered:** Fall, Spring

Economic problems of and financial management by the individual and family. Topics include: income patterns, inflation, credit, contracts, housing, financial services, insurance, taxes, investments, retirement income planning.

FACS 168. Senior Seminar. 3 Units
**Prerequisite(s):** 21 FACS units.
**Term Typically Offered:** Fall, Spring

Designed to synthesize knowledge in Family and Consumer Sciences. Examination of the concentration in the major and career exploration. Analysis of public policy and ethical issues, professionalism and leadership strategies. Includes personal and professional competency assessment and development of an academic and professional portfolio.

FACS 195C. Internship. 1 - 3 Units
**Prerequisite(s):** Upper division status; instructor permission obtained in the preceding semester; 2.5 GPA or above.
**Term Typically Offered:** Fall, Spring

Directed observation and supervised work experience in an approved business, government, or service agency. Internships are offered for the purpose of increasing student understanding of the nature and scope of agency operations and giving students orientation in occupational specialties. Supervision is provided by authorized persons in the cooperating agencies and collaborative supervision is provided by the Family and Consumer Sciences faculty. Each student is required to maintain a record of activities and assignments and to prepare periodic reports.
**Note:** Student must make arrangements with a faculty member for a work program one semester prior to admittance to the course. A minimum of three hours per week per unit of credit is required.

Credit/No Credit

FACS 199. Special Problems. 1 - 3 Units
**Term Typically Offered:** Fall, Spring

Individual projects or directed reading.
**Note:** Departmental petition required.

Credit/No Credit

FASH 30. Fashion and Human Environment. 3 Units
**General Education Area/Graduation Requirement:** GE AREA D
**Term Typically Offered:** Fall, Spring, Summer

This course serves as an introduction to the study of fashion and human environment and how fashion is perceived, marketed, and internalized within individuals across Western and non-Western cultures. A focus on both internal factors such as psychological, aesthetic and self-image, and external factors such as social, economic, cultural and political experiences will be addressed.

FASH 31. Science of Textile. 3 Units
**General Education Area/Graduation Requirement:** Physical Science (B1)
**Term Typically Offered:** Fall, Spring, Summer

Introduction to textile science fundamentals to guide daily textile product selection, use, and care. Overview of physical and chemical properties of textile composition and its impact on textile product performance. Emphasis of textile as a unique medium for studying physical science through an approachable and real-life applicable lens. Discussion of environmental impact of the textile industry as well as scientific innovations in sustainable textile production.

FASH 32. Fundamentals of Apparel Production. 3 Units
**Prerequisite(s):** You must be a FACS major or FASH major to enroll in this course.
**Term Typically Offered:** Fall, Spring

Principles of fit and design. Applied basic construction with emphasis on standards and custom techniques. Characteristics of fabrics used; individual pattern adjustment. Lecture, discussion, demonstration one hour, laboratory four hours.
**3 Units**

**General Education Area/Graduation Requirement:** Critical Thinking (A3)  
**Term Typically Offered:** Fall, Spring

Introduction to critical reasoning, evaluating, and thinking skills through the social, environmental, and economic issues in fashion sustainability. Students will use research, reflection, acquisition of information, structuring arguments, and other critical thinking processes to analyze individual decision making as consumers, and gain an understanding of the greater global impact in fashion sustainability.

FASH 130.  History Of Western Fashion.  
**3 Units**

**General Education Area/Graduation Requirement:** Arts (Area C1)  
**Term Typically Offered:** Fall, Spring, Summer

An overview of dress and fashion in western civilization from antiquity to the present. An interdisciplinary approach is used to examine how western fashion has evolved over time and functions as a reflection of trends in technology, political events, social ideals, and cultural developments such as art and music. Emphasis on the contributions and perspectives of women, as well as the differing roles in the production, dissemination, and consumption of clothing in relation to socioeconomic groups. Lecture, discussion.

**3 Units**

**Prerequisite(s):** FACS 31, FACS 32.  
**Term Typically Offered:** Spring only

Analysis of apparel construction and production; current industrial and technological developments. Discussion of sizing and quality standards with emphasis on identification of fabrics, garment styles, finding and trims. Lecture, discussion, demonstration, field trips. Field trip(s) may be required.

FASH 133.  Creative Principles of Apparel Design.  
**3 Units**

**Prerequisite(s):** FACS 30 and FACS 31  
**Term Typically Offered:** Fall only

Study of the functional and aesthetic elements of apparel design. The creative process and development of illustrative techniques. Development of creative approaches through projects of experimental, contemporary and traditional techniques with emphasis on elements of design, and selection and organization of colors, forms, materials and accessories for apparel production. Studio-activity six hours.

FASH 134.  Introduction to Fashion Industry.  
**3 Units**

**Term Typically Offered:** Fall, Spring

Designed to develop an awareness and understanding of the total fashion industry including past, present and future directions of costume design, manufacturing, textiles, retailers’ publications, buying offices, advertising and the consumer.

FASH 135.  Merchandise Buying.  
**3 Units**

**Prerequisite(s):** FASH 134.  
**Term Typically Offered:** Fall only

Detailed study of merchandising mix, purchasing plan, inventory plan, assortment plan, pricing, markdown, markup, and reports. Review of planning and control processes and the buyer's role in merchandise management and decision-making. Lecture, discussion.

FASH 136.  Fashion Retailing.  
**3 Units**

**Prerequisite(s):** FASH 134.  
**Term Typically Offered:** Spring only

A in-depth exploration of fashion retailing from different perspectives, including organizational structure, store location and image with a focus on visual merchandising techniques, and fashion advertising and promotion strategies.

FASH 137.  Clothing, Society, and Culture.  
**3 Units**

**General Education Area/Graduation Requirement:** GE AREA D  
**Term Typically Offered:** Fall, Spring

Study of the relationship of humans and clothing within their cultural and social environment. Introduction to the fundamentals of social psychology in the examination of clothing and appearance. Clothing and appearance are studied as forms of nonverbal communication and as devices for expressing cultural and social values.

FASH 139.  Textiles and Apparel in the Global Economy.  
**3 Units**

**Prerequisite(s):** FASH 134 or MKTG 101.  
**Term Typically Offered:** Spring only

Overview of global factors affecting the textiles and apparel industries and trade, the impact of textiles and apparel industries on the economy and consumers, the US textiles and apparel in the global economy, and strategies for balancing conflicting interest.

FASH 146.  Fashion Entrepreneurship.  
**3 Units**

**Prerequisite(s):** FASH 134.  
**Term Typically Offered:** Fall, Spring

This is a Service Learning course addressing the essentials of entrepreneurship in the fashion industry, enabling students to learn effective entrepreneurial and general management practice through service learning. Emphasis is placed on the essentials of planning that are vital to entrepreneurial success, step by step guide for starting a fashion business and effective business models, which focus on problems, solutions, key metrics and competitive advantages that will assist in pitching the business. Students complete 45 hours of fieldwork.

FASH 148.  Fashion Law.  
**3 Units**

**Term Typically Offered:** Fall only

This course provides an overview of legal issues affecting the fashion industry and its professionals with an emphasis on fashion entrepreneurship, design, advertising and promotion, production, sourcing, marketing and retailing. Students will also learn about fashion regulatory and policy issues, intellectual property (copyright, trademarks, patents), contractual agreements, leasing, commercial operations and expansion, and the international development of a fashion business.

**3 Units**

**Prerequisite(s):** FASH 134 or MKTG 101.  
**Term Typically Offered:** Fall, Spring

This course provides an overview of legal issues affecting the fashion industry and its professionals with an emphasis on fashion entrepreneurship, design, advertising and promotion, production, sourcing, marketing and retailing. Students will also learn about fashion regulatory and policy issues, intellectual property (copyright, trademarks, patents), contractual agreements, leasing, commercial operations and expansion, and the international development of a fashion business.

FASH 250.  The Family and Social Issues.  
**3 Units**

**General Education Area/Graduation Requirement:** GE AREA D, Race & Ethnicity Graduation Requirement (RE)  
**Term Typically Offered:** Fall, Spring

Family structure, systems and functioning in marriage and other partnerships, parenting, work issues, domestic violence, divorce, and remarriage. Focus on social issues including gender, race, ethnicity, and class. Historical and theoretical perspectives on families in America. Introduction to research in family sciences and public policy implications. Lecture, discussion.

**Note:** Not open for credit to students who have taken SOC 5.
FSHD 52. The Child In The Family. 3 Units
General Education Area/Graduation Requirement: Understanding Personal Development (E)
Term Typically Offered: Fall, Spring

Physical, social, emotional and cognitive development of the child, conception through adolescence, in relation to the family. Strong theoretical emphasis. Introduction to methods of study, including observation and interview. Lecture, discussion, fieldwork.

Note: Not open for credit to students who have taken CHDV 137, CHDV 138, or PSYC 148.

FSHD 108. Family Communication. 3 Units
Prerequisite(s): COMS 8, FACS 50, SOC 166, or instructor permission.
Term Typically Offered: Fall, Spring

Study of the family as a small group with emphasis on understanding and interpreting the dynamics of family communication using various communication and social-psychological theories. Opportunity to develop an analytical framework.

Cross Listed: COMS 108; only one may be counted for credit.

FSHD 150. Family Stress and Coping: Multicultural Focus. 3 Units
Prerequisite(s): GWAR certification before Fall 09; or WPJ score of 80; or 3-unit placement in ENGL 109M or ENGL 109W; or 4-unit placement in ENGL 109M or ENGL 109W and co-enrollment in ENGL 109X; or WPJ score 70 or 71 and co-enrollment in ENGL 109X.
General Education Area/Graduation Requirement: GE AREA D, Race & Ethnicity Graduation Requirement (RE), Writing Intensive Graduation Requirement (WI)
Term Typically Offered: Fall, Spring

Study of multicultural families and diverse family forms, with a focus on how families function under stress. Family theory and research are applied to the interpretation and analysis of selected literary work, both in print and film formats.

FSHD 152. Adolescent Development. 3 Units
Prerequisite(s): CHDV 30, or CHDV 35, or FACS 52, or instructor permission.
Term Typically Offered: Fall, Spring

In-depth study of the achievements and challenges associated with the adolescent stage of development. Focus on understanding the needs and motivations of adolescents and the challenges they face within their socio-cultural environment. Lecture, discussion.

Note: Not open to students who have taken PSYC 149. Previous or concurrent enrollment in CHDV 133 strongly recommended.

FSHD 154. Issues in Parenting. 3 Units
Prerequisite(s): CHDV 30, or CHDV 35, or FACS 52, or instructor permission
Term Typically Offered: Fall, Spring

Survey of historical and contemporary attitudes toward parenting. Review of research on child-rearing and parent-child relationships. Use of case studies to explore the influence of personality, developmental stage, family structure, ethnic and cultural factors on parenting. Lecture, Case Study.

Note: Previous or concurrent enrollment in CHDV 133 strongly recommended. Cross-listed: CHDV 154; only one may be counted for credit.

FSHD 155. Family Life Education. 3 Units
Prerequisite(s): FACS 50; and FACS 100 or CHDV 133; and senior standing.
Term Typically Offered: Fall, Spring

Historical and philosophical perspective on family life education across the lifespan. Practice in curriculum development including content, objectives, and teaching strategies.

FSHD 156. Child Life and Family-Centered Care. 3 Units
Prerequisite(s): FACS 52 or CHDV 30 or CHDV 35 or a course in child development/human development, covering at least birth through adolescence with instructor permission.
Term Typically Offered: Summer only

Overview of the Child Life profession and child life practices. Focus on family-centered care for children in the healthcare environment and their families. Major course topics include: scope of practice in child life; ethical and professional practice; impact of illness, injury and health on patients and family; techniques and outcomes of preparation; therapeutic play; grief and bereavement.

Note: This course is designed to meet the specifications set forth by the Association of Child Life Professionals (ACLP) for the child life course required for certification as a Certified Child Life Specialist (CCLS)

FSHD 159. Adulthood and Aging in Human Development. 3 Units
Term Typically Offered: Fall, Spring

Analyzes the interrelation between physical, psychological, and social development in the middle and later years of adulthood with attention to personal, family and community challenges and opportunities in their cultural context.

FSHD 162. Family Support Services. 3 Units
Prerequisite(s): A minimum of 12 units in FACS and/or FSHD upper division family area courses.
Term Typically Offered: Fall, Spring

Application of family science to the development, implementation, and evaluation of family support services. Implications of research for practice with diverse families. Focus on developing skills in family-centered services, family-professional collaboration, and resource- and asset-based intervention. Lecture two hours; fieldwork in the community three hours.

FSHD 195F. Practicum in Family Life Education. 1 - 3 Units
Prerequisite(s): senior status; GPA of 2.75 or above; NURS 160 or PSYC 134 or HLSC 134; and FACS 155.
Corequisite(s): If not taken as a prerequisite, FACS 155 may be taken concurrently with instructor’s approval.
Term Typically Offered: Fall, Spring

Directed observation and supervised work experience in an approved educational setting, service agency, business or government agency that provides family life education. Students will move from observing and assisting to developing, delivering and assessing lessons and programs in family life education. Students will gain experience applying educational and developmental theories, curriculum development, and teaching methods to delivering evidence-based and culturally sensitive lessons in the content areas of family life education: parent education, strengthening relationships, and/or sexuality education.

Note: Students must make arrangements with the supervising faculty member one semester prior to admittance to the course.

Credit/No Credit
NUFD 5.  Science of Food.  3 Units  
General Education Area/Graduation Requirement: Physical Science (B1)  
Term Typically Offered: Fall, Spring, Summer  

Introduction to food science fundamentals including food composition, chemical and physical reactions, and nutritional properties of food. Overview of evidence-based practices for food selection, storage, and preparation. Examination of specific issues such as food safety, food technology, food supply, and food law. Lecture 3 hours.

NUFD 9.  Food Safety and Sanitation.  3 Units  
Term Typically Offered: Fall, Spring, Summer  

Introduction to food safety principles and application, microbiology of food safety, infection control, and safety issues. Examination of laws and regulations related to consumer and food service operations. Preparation for national food service sanitation certification exam.

NUFD 10.  Nutrition And Wellness.  3 Units  
General Education Area/Graduation Requirement: Understanding Personal Development (E)  
Term Typically Offered: Fall, Spring, Summer  

Introduction to the basic principles of nutrition and the relationship of the human diet to health. Overview of the nutrition profession, the biological uses of nutrients and tools for dietary planning. Examination of specific issues such as weight loss, sports nutrition, food safety, the diet-disease relationship and global nutrition. Analysis of special nutritional requirements and needs during the life cycle. Evaluation of personal dietary habits using current dietary guidelines and nutritional assessment methods.

NUFD 11.  Principles of Food Preparation.  3 Units  
Prerequisite(s): NUFD majors and FACS majors only.  
Term Typically Offered: Fall, Spring  

Chemical, physical, sensory, and nutritional properties of food related to processes used in food preparation. Activity includes preparation and evaluation of individual food products.

NUFD 100.  Research: Methods and Application in Nutrition and Food.  3 Units  
Prerequisite(s): 6 NUFD units completed. NUFD majors or minors only.  
Term Typically Offered: Fall, Spring, Summer  

Study of methods and application of research in the field of Nutrition & Food. Focus on scientific inquiry, methodology, evidenced-based practice, interpretation of research results, program and project evaluation, and professional communication. Includes the examination of ethical practices, professional presentation skills, and technical writing skills.

NUFD 107.  Nutrition Education, Communication, and Counseling.  3 Units  
Prerequisite(s): NUFD 10 and an additional 3 NUFD units  
Term Typically Offered: Fall, Spring  

Nutrition Education, communication and counseling techniques for use by the nutrition/dietetics professional. Introduction and application of various health behavior theories to promote change in diverse target audiences. Development of nutrition care plans, educational materials and activities for individual groups. Understand and apply methods of dietary assessment and motivational interviewing.

NUFD 110.  Food Production and Sustainability.  4 Units  
Prerequisite(s): NUFD 9, NUFD 10 and NUFD 11  
Term Typically Offered: Fall, Spring, Summer  

Study and laboratory experience in planning, procuring, production, serving and evaluation of food for individuals, families, commercial, and institutional foodservice operations. Application of menu development techniques such as recipe modification and standardization to various target populations. Examination and application of marketing analysis and promotion. Understanding of current issues and sustainability topics related to food production.

NUFD 111.  Grocery Procurement & Merchandising.  3 Units  
Prerequisite(s): NUFD 5 or NUFD 10; and NUFD 9  
Term Typically Offered: Fall, Spring  

This course examines the processes for purchasing and receiving food and non-food products in a retail market setting. The course focuses on procurement and merchandising strategies in the grocery industry which tap into consumer trends and preferences.

NUFD 112.  Current Topics in Nutritional Sciences.  3 Units  
Prerequisite(s): GWAR certification before Fall 09; or WPJ score of 80+; or 3-unit placement in ENGL 109M or ENGL 109W; or 4-unit placement in ENGL 109M or ENGL 109W and co-enrollment in ENGL 109X; or WPJ score 70 or 71 and co-enrollment in ENGL 109X.  
General Education Area/Graduation Requirement: Further Studies in Area B (B5), Writing Intensive Graduation Requirement (WI)  
Term Typically Offered: Fall, Spring, Summer  

Examination of contemporary and controversial topics in nutrition science and how they relate to nutritional needs of different population groups. Analyzes the research process and evaluation of validity of nutrition research. Lecture, discussion.

NUFD 113.  Nutrition And Metabolism.  3 Units  
Prerequisite(s): NUFD 10; BIO 2 or BIO 10 or BIO 20; and Chem 1A or Chem 5 or Chem 6A  
General Education Area/Graduation Requirement: Upper Division Further Studies in Area B5  
Term Typically Offered: Fall, Spring, Summer  

Study of the structures, types and metabolism of carbohydrates, lipids and proteins. Discussion of the biological roles of vitamins and minerals. Application and integration of metabolic knowledge with health promotion and chronic disease. Lecture, discussion.

NUFD 114.  Cultural and Social Aspects of Food.  3 Units  
Prerequisite(s): FACS/NUFD 10  
General Education Area/Graduation Requirement: Humanities (Area C2)  
Term Typically Offered: Fall, Spring  

Examination of the cross-cultural and social meaning of food and dietary behaviors. Regional, ethnic, religious, economic, and environmental influences on food habits and health status. Study of how cultural and societal values affect intake, health belief practices, and communication styles. Overview of health disparities in the context of socioeconomic status, race, ethnicity, and education. Understanding implicit bias, cultural differences, diversity, equity, and inclusion while working in a multicultural and diverse environment.
NUFD 115. Nutrition: Pre-conception Through Childhood. 3 Units
Prerequisite(s): NUFD 113
Term Typically Offered: Fall, Spring

Examination of nutritional requirements, metabolism and issues during stages of the early life cycle, including: pre-conception, pregnancy, lactation, infancy, and early and late childhood. Study of assessment and methods for achieving nutritional needs through dietary selection and promotion of maternal, infant, and child health. Analysis of social, environmental, physical and economic factors affecting nutritional status.

NUFD 116. Food Service Management. 3 Units
Prerequisite(s): NUFD 110.
Term Typically Offered: Fall, Spring

Study of financial, facility, human resource management in commercial and noncommercial foodservice operations. Application of accounting principles, evaluation and selection of equipment, layout and design, and principles and practices of human resource management as an entry-level manager.

NUFD 117. Community Nutrition. 3 Units
Prerequisite(s): NUFD 107, and either NUFD 115 or NUFD 119.
Term Typically Offered: Fall

Study of theory, concepts and philosophy affecting nutrition education and services in the community. Introduction to techniques of interviewing and counseling clients. Emphasis on culturally sensitive approaches to dietary assessment, counseling and community nutrition research. Use of a variety of teaching methods to improve nutrition status of the community. Field study involves practical experience in a community nutrition program. Lecture, discussion two hours; field study three hours.

NUFD 118A. Medical Nutrition Therapy I. 3 Units
Prerequisite(s): NUFD 113, NUFD 121, and BIO 131.
Term Typically Offered: Fall only

Study of the principles of medical nutrition therapy and the Nutrition Care Process. Use the Nutrition Care Process to make decisions, identify nutrition-related problems and determine and evaluate nutrition interventions with patients/clients with various conditions, including, cardiovascular and gastrointestinal disorders.

NUFD 118B. Medical Nutrition Therapy II. 3 Units
Prerequisite(s): NUFD 118A, and CHEM 161 or instructor permission.
Term Typically Offered: Spring only

Continuation of principles, methods, and skills as developed in NUFD 118A. Review of the etiology, development and dietary prevention and intervention of diseases influenced by nutrition such as: diabetes mellitus, hepatic and biliary diseases, cancer, renal disease, pulmonary disease, neurological disorders, HIV and AIDS, and inborn errors of metabolism. Lecture, discussion two hours; activity two hours.

NUFD 119. Nutrition: Adolescence Through Older Adulthood. 3 Units
Prerequisite(s): NUFD 113
Term Typically Offered: Fall, Spring

Examination of nutritional requirements, metabolism and issues during stages of the life cycle, including: adolescence, adulthood, and old age. Study of assessment and methods for achieving nutritional needs through dietary selection and promotion of adolescent, adult, and elderly adult health. Analysis of social, environmental, physical and economic factors affecting nutritional status.

NUFD 120. Practical Application in Sports Nutrition. 3 Units
Prerequisite(s): NUFD 113
Term Typically Offered: Fall, Spring

A survey course in nutrition with an emphasis on the relationship among diet, physical activity, and health; exploration of the changes in the metabolism of carbohydrates, lipids, protein and water; discussion of the function of vitamins and minerals; practical application of evidence-based dietary recommendations for common sports and varying physical intensity.

NUFD 121. Nutrition Assessment, Methods and Support. 3 Units
Prerequisite(s): NUFD 113
Term Typically Offered: Fall, Spring, Summer

Study of health care systems, the nutrition care process including assessment and support, and clinical implications of malnutrition. Topics include nutrition-focused physical examination, anthropometric, biochemical, dietary, body composition, and functional status evaluation and an understanding of advantages and disadvantages of assessment approaches. Application of various assessment methods and problem solving will be achieved through hands on training and clinical case studies in the context of malnutrition, nutrition support, cancer, eating disorders, and obesity.

NUFD 122. Social Media for Nutrition Communication. 3 Units
Prerequisite(s): NUFD 10 and NUFD 100 or NUFD 113
Term Typically Offered: Fall, Spring

Examine the uses of social media in the nutrition field and develop a framework to apply to future social media use in professional ventures. Focus on the critical analysis of the appropriateness, potential target populations, health behavior change strategies, the risks and benefits, and overall intended outcomes of social media communication. Create the design and evaluation framework of a social media campaign/initiative.

NUFD 168. Senior Seminar. 3 Units
Prerequisite(s): 21 NUFD and/or FACS units
Term Typically Offered: Fall, Spring, Summer

Designed to synthesize knowledge in the Nutrition and Food discipline. Examination of the major and career exploration. Analysis of public policy and ethical issues, professionalism and leadership strategies. Includes a capstone project and development of an academic and/or professional portfolio.

NUFD 190D. Dietetic Pathways. 1 Unit
Prerequisite(s): Senior standing in the Dietetics Concentration or instructor permission.
Term Typically Offered: Fall only

Examination of dietetics career paths, processes and options. Students will learn about the profession of dietetics, including professionalism, the professional organization, pathways, mentoring and the code of ethics.
NUFD 200. Research Methods. 3 Units
Prerequisite(s): Admittance to the NUFD graduate program or instructor permission.
Term Typically Offered: Spring only

A critical examination of quantitative and qualitative research methods used in the nutrition and food discipline. Develop skills in research design selection, measurement, analysis, and interpretation and presentation of results. Study human research ethics and IRB submission protocol. Explore techniques to ensure assessment tools are valid, reliable, and culturally appropriate.

NUFD 213. Advanced Nutrition with Community Program Applications. 3 Units
Prerequisite(s): Admittance into the MS program or instructor permission.
Term Typically Offered: Fall only

In-depth review of current knowledge and research of nutrients in food and application to nutrition policy and public health practice within the US and globally. Examination of physiological function, metabolism, transport, deficiency, toxicity, and interrelationships of macro and micronutrients in relation to the nutrient-disease relationship. Evaluating scientific findings relating to nutrient function, with an emphasis on nutrients of public health concern and food components that pose public health challenges.

NUFD 221A. Advanced Clinical Nutrition A. 3 Units
Prerequisite(s): Admission into Dietetic Internship Program or instructor permission.
Term Typically Offered: Fall only

Perform nutrition assessment of patients with complex medical conditions. Integration of pathophysiology into medical nutrition therapy. Development, supervision and evaluation of nutrition care plans. Select, calculate, monitor and evaluate nutritional support regiments for patients. Lecture, composition.

NUFD 221B. Advanced Clinical Nutrition B. 1 Unit
Prerequisite(s): Admission into Dietetic Internship Program or instructor permission.
Term Typically Offered: Spring only

Continuation of principles and skills as developed in FACS 221A with application to other complex disease conditions and integration to multiple diseases. Application of genetics and pathophysiology to complex disease conditions. Demonstration of skills in assignments and presentations. Lecture, composition.

NUFD 222. Advanced Community Nutrition and Nutrition Education. 3 Units
Prerequisite(s): Admission into NUFD graduate program, Dietetic Internship program, or instructor permission.
Term Typically Offered: Fall only

The course will examine the implementation of nutrition care for population groups across the lifespan. Explore assessment and evaluation methodologies of community based food and nutrition programs. Nutrition policy development and evaluation based on community needs and resources to address health disparities. Learn advanced nutrition education intervention techniques applying behavioral models and theories.

NUFD 223. Advanced Foodservice Management and Administration. 2 Units
Prerequisite(s): Admission into Dietetic Internship Program or instructor permission.
Term Typically Offered: Fall only

Management of procurement, distribution, and service of food, and integration of financial, human, physical and material resources. Production of food that meets nutrition guidelines, cost parameters, and consumer acceptance; safety and sanitation issues related to food. Analysis of the operations of food service organization. Lecture, written assignments and practical experience.

NUFD 224. Advanced Community Nutrition and Policy. 3 Units
Prerequisite(s): Admission into NUFD graduate program, Dietetic Internship Program, or instructor permission.
Term Typically Offered: Spring only

Learn and apply the nutrition care process and manage nutrition care for population groups. Conduct outcome assessment, planning, implementation, marketing and evaluation of nutrition programs. Apply the research process and critically evaluate nutrition research. Develop an understanding of nutrition policy and resources.

NUFD 225. Food Production and Sustainability Policy. 3 Units
Prerequisite(s): Admittance into the NUFD graduate program or instructor permission.
Term Typically Offered: Fall only

Exploration of a variety topics including food policies, food systems and sustainable food production. The course will review the political landscape of both food and agriculture and current social movements towards sustainable and just food systems.

NUFD 280. Teaching Methods in Family and Consumer Sciences/Home Economics. 3 Units
Prerequisite(s): Current enrollment in a teaching credential program or instructor permission.
Term Typically Offered: Summer only

This course is designed to provide students with materials, classroom management strategies and methods necessary to successfully teach Family & Consumer Sciences (FCS)/Home Economics Careers and Technology (HECT) at the secondary level. Teacher candidates will become acquainted with legislation, standards, teaching strategies, resources, research and student leadership programs.

NUFD 295. Field Study. 1 - 7 Units
Prerequisite(s): Enrolled in Graduate Studies in NUFD Dietetic Internship Program
Term Typically Offered: Fall, Spring

Guided study, observation or work experience in an area in which the graduate student needs advanced and specialized study.
Note: May be repeated for credit

Credit/No Credit

NUFD 299. Special Problems. 1 - 3 Units
Prerequisite(s): Undergraduate major or minor in Family and Consumer Sciences.
Term Typically Offered: Fall, Spring

Any properly qualified student may pursue a problem after approval by his/her advisor and the staff member with whom he/she works.
Credit/No Credit
NUFD 500. Culminating Experience. 3 Units
Prerequisite(s): Advanced to candidacy or permission of the graduate coordinator.
Term Typically Offered: Spring only
Guides students through the completion of a thesis or project approved for the Master of Nutrition and Food degree.

BS in Family Studies and Human Development

Units required for Major: 51
Total units required for BS: 120

Program Description
The major prepares students for careers in various human service fields. The program emphasizes an asset-based approach to understanding lifespan human development, family systems, and family diversity in cultural context. The major is approved by the National Council on Family Relations (NCFR) for academic programs in Family Life Education. (Also see certificate program in Family Life Education.)

Career Possibilities
Child Life Specialist · Community-Based Social Service Provider · Community Educator · Consumer and Family Resource Specialist · Early Childhood Educator · Family Life Educator · Family Planning Provider · Family Support Services Provider · Government and Public Policy Specialist · Health Care and Family Wellness Provider · Marriage and Family Enrichment Provider · Parent Educator · Prenatal and Maternity Service Provider · Preschool and Adult Day Care Director · Resource and Referral Services Specialist · Sexuality Educator · Youth Advisor

Requirements for BS in Family Studies and Human Development:
- 120 units minimum with 40 upper division units
- General Education requirements including 9 upper division General Education units

BS in Fashion Merchandising and Management

Units required for Major: 51
Total units required for BS: 120

Program Description

The major prepares students for careers in the global fashion industry, including management, marketing, buying, advertisement, promotion, manufacturing, sourcing, distribution, retailing, and many more. The program also emphasizes the contemporary and historical ways of meeting the economic, physiological, aesthetic, psychological, sociological, and cultural needs of consumers relative to fashion products.

Minimum Grade Requirement

A minimum grade of "C-" is required for all prerequisite courses within and outside the Department.

Graduation Requirements

BS - Additional Course (Any B to reach 12 units) - Take upper-division course to complete Area & upper division requirements.

Area C: Arts and Humanities (9-12 Units)
- C1 - Arts 2,3,4
- C2 - Humanities
- C1/C2 - Area C Course
- C1/C2 - Area C Course - Take upper-division course to complete Area & upper division requirements.

Area D: The Individual and Society (3 Units)
- Area D Course
- Area D Course 2
- Area D Course - Take upper-division course to complete Area & upper division requirements.

Area E: Understanding Personal Development (3 Units)
- Area E Course

Area F: Ethnic Studies
- Area F Course

Total Units 34-37

1 To help you complete your degree in a timely manner and not take more units than absolutely necessary, there are ways to use single courses to meet more than one requirement (overlap). For further information, please visit the General Education page (p. 1103).

Note: There is no way to list all possible overlaps so please consult with a professional advisor. The Academic Advising Center can be visited online (http://www.csus.edu/acad/), by phone (916) 278-1000, or email (advising@csus.edu).

2 Required in Major; also satisfies GE.

3 Department offers students an "OR" option for ECON 1A and PHOT 11:
   - If student chooses to take ECON 1A, they will meet one area of Area D and will still be required to complete an Area C1 course.
   - If student chooses to take PHOT 11, they will meet Area C1 and will not need this area of Area D which is met through FACS 30.

4 Department offers students an "OR" option for ECON 1B and GPHD 5:
   - If student chooses to take ECON 1B, they will meet one area of Area D and will still be required to complete an Area C1 course.
   - If student chooses to take GPHD 5, they will meet Area C1 and will not need this area of Area D which is met through FASH 30.

BS in Nutrition and Food

Units required for Major: 54
Total units required for BS: 120

Program Description

The major prepares students for careers in the field of nutrition, food management, and community nutrition, and food sustainability. The major emphasizes the role of nutrition and food in individual and family health, cultural and behavioral influences on food selection, and the management of commercial and noncommercial food systems. The major is offered in three modalities to meet student needs: in-person, hybrid (combination of online and in-person courses), and online. The online major courses will include asynchronous and synchronous formats.

Minimum Grade Requirement

A minimum grade of “C-” is required for all prerequisite courses within and outside the Department.

BS in Nutrition and Food (Dietetics)

**Program Description**

The major prepares students for careers in the field of nutrition, food management, community nutrition, and food sustainability. The program emphasizes the role of nutrition and food in individual and family health, cultural and behavioral influences on food selection, and the management of commercial and noncommercial food systems.

**Pre-Major Requirements**

To declare the Dietetics Concentration, freshman or transfer students admitted to the BS in Nutrition and Food are required to complete the following grade and core course requirements, and then submit a Major Change form to the Family and Consumer Sciences Department Office along with all transcript copies:

1. To help you complete your degree in a timely manner and not take more units than absolutely necessary, there are ways to use single courses to meet more than one requirement (overlap). For further information, please visit the General Education page (p. 1103).

   **Note:** There is no way to list all possible overlaps so please consult with a professional advisor. The Academic Advising Center can be visited online (http://www.csus.edu/acad/), by phone (916) 278-1000, or email (advising@csus.edu).

2. Required in Major; also satisfies GE.

---

**Required Upper Division Courses (6 Units)**

Select two of the following:

- NUFD 112 Current Topics in Nutritional Sciences 1
- NUFD 116 Food Service Management
- NUFD 117 Community Nutrition
- NUFD 118A Medical Nutrition Therapy I
- NUFD 120 Practical Application in Sports Nutrition
- NUFD 121 Nutrition Assessment, Methods and Support

**Total Units** 54

1. Course also satisfies General Education (GE)/Graduation Requirement.
2. Dietetics concentration students must take CHEM 1A

**Note:** CHEM 1A, CHEM 1B, and CHEM 20 are recommended for students who plan to complete the dietetics concentration or graduate studies in nutrition.

**General Education Requirements 1**

Total Units 24

Minor in Fashion Merchandising and Management

Units required for Minor: 21, all of which must be taken in Fashion Merchandising and Management.

Program Description
The Minor in Fashion Merchandising and Management provides students an understanding of the role fashion plays in social/cultural environment, business/economic environment, and natural environment through course work in textiles, fashion industry, fashion globalizations, fashion entrepreneurship, fashion law and elective options in historic costume, fashion design/creation, fashion buying, and retailing. The minor is particularly well-suited towards students pursuing careers in journalism, marketing, entrepreneurship, management, business, art, design, and other professions.

Minimum Grade Requirement
A minimum grade of "C-" is required for all prerequisite courses within and outside the Department.

Minor in Nutrition and Food

Units required for Minor: 21, all of which must be taken in Nutrition and Food.

Program Description
The minor in Nutrition and Food gives students an understanding of the role food and nutrition play in health and disease prevention through coursework in food safety, cultural foods, nutrition & wellness, and metabolism and elective options in life-cycle nutrition, sports nutrition, and current nutrition controversies. The minor could be a relevant addition to any major and is particularly well-suited towards students pursuing careers in public health, gerontology, psychology, human development, health science, education, medicine, nursing, and other healthcare professions.

Minimum Grade Requirement
A minimum grade of "C-" is required for all prerequisite courses within and outside the Department.

MS in Nutrition and Food

The Sacramento State Master of Nutrition and Food program prepares students for leadership and advocacy in nutrition programs and policy. Students apply nutrition and food research to improve individual and community health by developing strategies to promote food access, health equity and dietary change.

The 30-unit program includes specialized coursework in nutrition science, advanced community nutrition, behavioral nutrition, and food and nutrition policy plus a wide array of interdisciplinary electives to be tailored to interests and career goals.

The Master of Nutrition and Food program is designed to:

- provide career advancement opportunities in federal, state and local food access and nutrition education agencies,
- complement the Sacramento State’s Dietetic Internship for those on the path to become Registered Dietitian Nutritionists.*

*Note: The Sacramento State Dietetic Internship, requires a separate application. More information about the Internship can be found at: www.csus.edu/facs/dietetic-internship/.

Admission Requirements

Applicants must possess a bachelor’s degree with a minimum 3.0 GPA for the last 60 units attempted.

Prerequisites

Prerequisites or their equivalents at other colleges or universities as determined by the Graduate Coordinator

To help you complete your degree in a timely manner and not take more units than absolutely necessary, there are ways to use single courses to meet more than one requirement (overlap). For further information, please visit the General Education page (p. 1103).

Note: There is no way to list all possible overlaps so please consult with a professional advisor. The Academic Advising Center can be visited online (http://www.csus.edu/acad/), by phone (916) 278-1000, or email (advising@csus.edu).

Family Life Education

College of Social Sciences and Interdisciplinary Studies

Program Description

The goal of the certificate is to prepare students to provide family life education in a variety of settings such as schools, churches, youth programs, health care, and family service agencies. The certificate program is designed to cover the ten family life education content areas delineated by the National Council on Family Relations NCFR. The certificate is not a teaching credential. In conjunction with a Bachelor or Master degree or a state teaching credential, it may be helpful in obtaining employment as a Family Life Educator.

Note: This program is taken concurrently with established degree requirements. The majority of courses for the certificate program are applicable toward course requirements for a Bachelor's degree in Family Studies and Human Development. The certificate is not a teaching credential. In conjunction with a Bachelor or Master degree or a state teaching credential, it may be helpful in obtaining employment as a Family Life Educator.

Admission Requirements

1. Students must either be in a degree program at Sacramento State or must apply for graduate admission to the University.
2. Both undergraduates and graduate students must have a GPA of at least 2.5.
3. Students must meet with a Family Studies and Human Development major advisor for planning and verification that certificate requirements are met.

Program Requirements

1. Complete a baccalaureate degree program with a major in Family Studies and Human Development or a related field.
2. A GPA of 3.0 (B grade or higher) must be attained for all courses taken in the program.
3. At least 9 of the 21 required units must be taken in residence at Sacramento State.

National Council on Family Relations Family Life Content Areas
- Families and Individuals in Societal Contexts
- Internal Dynamics of Families
- Human Growth and Development Across the Lifespan
- Human Sexuality
- Family Resource Management
- Interpersonal Relationships
- Parent Education and Guidance
- Family Law and Public Policy
- Professional Ethics and Practice
- Family Life Education Methodology

Career Possibilities
The Sacramento State certificate in Family Life Education can stand alone or serve as a step toward national certification through the National Council on Family Relations (NCFR). Family Life Educators have employment opportunities in a variety of public service areas: social services, health and welfare, recreation, youth programs, community action, preschool/daycare, after school programs, drug/alcohol rehabilitation centers, senior citizens programs, military family support, parent education, community education, extension services, and family service agencies. For information on certification at the national level see www.ncfr.org (http://www.ncfr.org/).

FACS 195C Internship 3
Total Units 30

Gerontology

College of Social Sciences and Interdisciplinary Studies

Program Description
The Gerontology Program provides an applied interdisciplinary approach to studying the human aging process and the challenges encountered by older adults and their families as they interact in contemporary society. The curriculum is anchored in life course and humanistic theory, and concentrates on the needs of both healthy and chronically ill elders.

In order to better understand life's complexities, the program guides students to critically examine and explore the issues, impacts, and interventions for elders and their families from an interdisciplinary framework. Throughout coursework, students are exposed to the biopsychosocial-cultural and gender contexts that exist individually and in aggregate groups within society. Course content challenges all students to identify and analyze existing generalizations, theories, and concepts about aging in order to develop valid understandings based on current research in the discipline. Throughout the program, students are encouraged to actively advocate concerning elder issues.

The program offers a major and minor in Gerontology. Students are encouraged to blend other disciplines of study with Gerontology in order to facilitate varied career alternatives. They are helped in constructing an individual (elective) program of study within their major that reflects their own interests. Using elective courses to begin to build a minor in this area is highly encouraged. The program also assists students in constructing a special master's degree.

Career opportunities for gerontologists are growing rapidly. Employers are realizing the benefits of employing people who have backgrounds in aging along with abilities to address the needs of their older consumers. Gerontology graduates enter careers in both the public and private sectors with healthy and chronically ill elders. The careers are as varied as the goals of the individual and the needs of the organization. Graduates often work in such positions as counselors, advocates, analysts in state agencies for older adults, social workers, nurses, and information and referral specialists. Others have created their own careers in such areas as dental hygiene, human services, food services, travel, and Web design.

Gerontology graduates also often go on to graduate and professional schools in fields such as sociology, psychology, counseling, nursing, criminal justice, family services, and social work.

Degree Programs
BS in Gerontology (p. 1011)
Minor in Gerontology (p. 1013)
Certificate in Gerontology (Graduate) (p. 1013)

Accreditation
In addition to California State University, Sacramento's full accreditation by the Western Association of Schools and Colleges, the Bachelor of
Science in Gerontology is also individually accredited by the Association of Gerontology in Higher Education.

Notice to Students RE: Professional Licensure and Certification
California State University programs for professions that require licensure or certification are intended to prepare the student for California licensure and certification requirements. Admission into programs for professions that require licensure and certification does not guarantee that students will obtain a license or certificate. Licensure and certification requirements are set by agencies that are not controlled by or affiliated with the California State University and licensure and certification requirements can change at any time.

The California State University has not determined whether its programs meet other states' educational or professional requirements for licensure and certification. Students planning to pursue licensure or certification in other states are responsible for determining whether, if they complete a California State University program, they will meet their state's requirements for licensure or certification. This disclosure is made pursuant to 34 CFR §668.43(a)(5)(v)(C).

Special Features
The focus of the curriculum is upon the biological/psychological/social aspects of aging; social policies; services and research in aging; and practice, administration, and program development, implementation and evaluation skills related to aging.

- An integrated interdisciplinary program of courses and field experiences leads to a Bachelor of Science degree with a Major or Minor in Gerontology.
- Multiple major courses include integrated Service Learning to connect theory, practice, and community service.
- Individuals are prepared for careers in varied gerontological practice areas based upon demographic projections of need for personnel in planning, administering, coordinating, and delivering older adult services.
- Gerontological practitioners' awareness of the effects of social policy on aging individuals and families is emphasized.
- The program helps facilitate students' progression from community colleges to the University when acquiring a BS degree in Gerontology.
- Individuals currently working in the community are afforded opportunities to learn advanced skills and acquire professional training in gerontology.
- The strong relationships between the Gerontology Program and Sacramento area agencies and institutions planning or delivering services for older persons, and their families are key components to this program’s success.
- The Gerontology Program helps enhance the interest and commitment of diverse faculty and the University while providing a vehicle for collaboration regarding community engagement, interdisciplinary study and research in the field of Gerontology.
- The Program provides comprehensive academic preparation for graduate study in Gerontology or other related fields.

Potential Career Possibilities
Counselor · Adult Protective Services · Assessment/Intake Case Worker · California Department of Aging · Case Manager · Consultant · Department of Health Services · Department of Social Services-Older Adult Educator · Guardian/Conservator Staff · Information and Referral Specialist · Legal Aid Assistant · Ombudsman/Advocate · Program Activities Director · Program Specialist · Senior Community Outreach · Geriatric Social Worker · Geriatric Clinical Nurse · Rehabilitation/Job Training Agencies · Senior Retirement/Adult Day Care Centers · Area Agencies on Aging

GERO 21. First Year Seminar: Becoming an Educated Person. 3 Units
General Education Area/Graduation Requirement: Understanding Personal Development (E)
Term Typically Offered: Fall, Spring

Introduction to the nature and possible meanings of higher education, and the functions and resources of the University. Designed to help students develop and exercise fundamental academic success strategies and to improve their basic learning skills. Provide students with the opportunity to interact with fellow students and the seminar leader and to build a community of academic and personal support, as well as explore gerontological concepts needed to respond to demographic changes in today’s world.

GERO 100. Aging Issues in Contemporary America. 3 Units
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall, Spring, Summer

Introduction to the field of Gerontology and how the discipline addresses society’s aging needs. An examination of current issues in gerontology using a life span perspective focusing on older adults’ needs/concerns along life’s continuum in various environments. Major topics include implications of the demographic imperative, common aging changes/conditions, myths and stereotypes, effects of health/illness on individual and family roles, basic social issues and policies arising from the graying of America, media, cultural and gender influences.

GERO 101. Older Adult Services and Strategies. 3 Units
Term Typically Offered: Fall, Spring

Exploration and analysis of the older adult service continuum within the context of changing diverse societal needs, service availability and accessibility, current public policy, and administrative and management issues facing care providers. A multidisciplinary examination of the spectrum of services and programs targeted for older adults and their families. Includes information and referral processes and agencies, recreational and social options, housing alternatives, in-home, residential and skilled care options, including health care eligibility criteria, funding sources, and adult protective services.

Note: This is a service learning course.
GERO 102. Social Policy for an Aging Society. 3 Units
Term Typically Offered: Fall, Spring

Explores context and process for policy making by national and California state governments including ethical dimensions. Applications are developed from students' and instructor's areas of interest including K-12 and higher education, land-use policy, and aging issues such as elder advocacy, Social Security, and Medicare/Medicaid. Provides background and skills for entry level positions in public or non-profit organizations. Cross Listed: PPA 100; only one may be counted for credit.

GERO 103. Applied Care Management in Gerontological Practice. 3 Units
Term Typically Offered: Fall, Spring

Students will analyze issues, services, methods, and interventions related to practice for older adult care, their families, and caregivers. Outcomes include understanding the of unique characteristics/needs of older adults, systems approach to working with older adults, issues affecting service delivery (diversity, gender, ethics, special health, mental health needs), basic practice skills for effective service delivery to older adults and families/caregivers, attitudes and roles when working with older adults, and the business practices of geriatric care management.

Note: This is a service learning course.

GERO 121. Strategies for Optimal Aging. 3 Units
Term Typically Offered: Fall, Spring

This course is an in-depth, interdisciplinary, and holistic exploration of health promotion and adaptation paradigms that facilitate optimal and productive longevity. Hardiness and self-efficacy theories along with expectations and experiences enhancing quality of life are explored. Interactions among such variables as activity, diet, exercise, work/leisure, attitudes/beliefs, humor, living environments, spirituality, and social networks are investigated within the contexts of gender, economic, and cultural perspectives.

Cross listed: GERO 221

GERO 122. Interprofessional Approaches to Health Care in Older Adults. 3 Units
Term Typically Offered: Fall, Spring

Offers in-depth study/anlalysis of prevalent pathophysiological-based diseases and psychological disorders commonly experienced by older adults and frail elder populations. Disease/disorder causes and the effects of chronic illness on individuals' activities of daily living, sexuality, relationships, and coping abilities with changing lifestyles are examined using a life course framework and evidenced-based research. Assessment tools, lab value changes, medication needs, complications/disabilities, traditional/alternative treatments and ethical issues arising from meeting needs are investigated along with implications for caregivers. Paired Course: GERO 222

GERO 123. Research on Aging & the Life Course. 3 Units
General Education Area/Graduation Requirement: Upper Division Further Studies in Area B5
Term Typically Offered: Fall, Spring

Analysis, evaluation, and application of existent gerontological research. Hands-on practice carrying out aging-related research projects, including defining the research question, selecting data collection tools, collecting and analyzing quantitative and qualitative data, and presenting results in narrative and visual formats. Special emphasis on connecting gerontological theory, research, and interdisciplinary practice, accommodating participants with sensory, physical, or cognitive limitations, and ethical issues.

GERO 124. Perspectives on Death and Dying. 3 Units
Prerequisite(s): Student's academic level must be Junior of higher to enroll in this class.
Term Typically Offered: Fall, Spring

Examination of the beliefs, attitudes, and behaviors associated with death and dying. Topics covered include children's and adult's concepts of dying and death; causes and types of death; self-destructive behavior; grief and mourning in the dying person and their survivors; physicians' aid in dying and other legal and ethical issues; and cross-cultural and historical perspectives on death.

Cross listed: PSYC 151

GERO 125. Moving Toward Equity in California Aging Policy and Practice. 3 Units
Term Typically Offered: Fall, Spring, Summer

This course examines California's state programs, services, and funding streams that support low-income older adults and persons with disabilities. It is focused on addressing equity, parity, funding and access. Students will be introduced to California's innovative Master Plan for Aging. Through studying past shortfalls and new approaches, this course will inform a new and diverse workforce in order to serve historically underserved communities, including BIPOC, Latinx, API, and LGBTQ+.

GERO 130. Gerontology Practicum. 3 Units
Prerequisite(s): 24 Major units including GERO 101, GERO 102, GERO 103, GERO 121, GERO 122 and instructor permission.
Term Typically Offered: Fall, Spring

Supervised practicum experience in a community agency planning for or delivering professional services to older adults. This practicum experience is part of two culminating courses for the major and focuses on application of the interdisciplinary nature of the discipline while affording students direct, hands on experiences. Includes a field seminar. Seminar discussions focus on the application of gerontological concepts derived from all gerontology courses and are applied to each student's specific practicum area.

Note: This is a service learning course.

Credit/No Credit
GERO 131. Gerontology Capstone Practicum. 3 Units
Prerequisite(s): 36 Major units including GERO 101, GERO 102, GERO 103, GERO 121, GERO 122, GERO 130 and instructor permission.
Term Typically Offered: Fall, Spring
Supervised internship experience in a community agency planning for or delivering professional services to older adults. This capstone practicum experience builds on the first internship course and is the final culminating course for the major and focuses on advanced application of the interdisciplinary nature of the discipline while affording students direct, hands-on experiences. Includes a field seminar. Seminar discussions focus on the application of gerontologic concepts derived from all gerontology courses and are applied to each student’s specific Practicum area.
Note: This is a service learning course. Minors may take this course without taking GERO 130
Credit/No Credit
GERO 199. Special Problems. 1 - 3 Units
Prerequisite(s): Advanced approval of project goal and objectives by program director.
Term Typically Offered: Fall, Spring
Independent research, project, or directed reading.
Note: Open to students who are capable of independent work. A maximum of 3 units may count toward elective major requirements.
Credit/No Credit
GERO 200. Adaptation To Age Related Changes, Illnesses and Caregiving. 3 Units
Term Typically Offered: Fall, Spring
Exposure to and analysis of positive and negative functional consequences arising from age related changes and illnesses in elders. Content elucidates changes and their effects on elders’ levels of wellness using interdisciplinary research and holistic, life course frameworks. Screening assessments, interventions, community resources and services, and ethical issues are addressed for each topic. Caregiving issues and solutions are explored within life span and problem solving frameworks.
GERO 222. Interprofessional Approaches to Health Care in Older Adults. 3 Units
Term Typically Offered: Fall, Spring
This course examines prevalent health issues commonly experienced by older adults. The course utilizes an interprofessional evidence-based approach to address the impact of chronic illness and related issues on older adults, their families, and caregivers. The focus of this course is on health promotion and includes holistic therapies and ethical issues that arise in late-life care.
GERO 225. Moving Toward Equity in California Aging Policy & Practice. 3 Units
Term Typically Offered: Fall, Spring, Summer
This course examines California’s programs, services, and funding streams that support low-income older adults and persons with disabilities. Students will be introduced to California’s innovative Master Plan for Aging with its focus on equity, parity, and access. Using analytical, evaluative and leadership skills, students mentor GERO 125 students to address policy and program needs of vulnerable constituencies. This course will inform a new and diverse workforce prepared to engage underserved communities, including BIPOC, Latinx, API, and LGBTQ+.
GERO 295. Internship/Project. 3 Units
Prerequisite(s): GERO 200, GERO 221, GERO 222.
Term Typically Offered: Fall, Spring
Supervised fieldwork internship or project that is a culminating experience and applies learned gerontological theories and concepts in a community setting where planning, developing, or delivering services to older adults or their families occurs. Students choose an area of practice and negotiate their learning experiences or project with their faculty advisor and field supervisor. Advanced approval of project goal and objectives by program director are required.
Credit/No Credit
GERO 299. Special Problems. 1 - 3 Units
Prerequisite(s): Instructor permission.
Term Typically Offered: Fall, Spring
Independent research, project, or directed reading. Open to students who are capable of independent work. A maximum of 3 units may count toward elective major requirements. Advanced approval of project goal and objectives by program director.
Credit/No Credit
BS in Gerontology
Units required for Major: 48
Total units required for BS: 120
Program Description
The Gerontology Program provides an applied interdisciplinary approach to studying the human aging process and the challenges encountered by older adults and their families as they interact in contemporary society. The curriculum is anchored in life course and humanistic theory, and concentrates on the needs of both healthy and chronically ill elders and their families.
Minimum Grade Requirement
Students must receive a “C” or better in all major and multidisciplinary core/elective courses.

| C1/C2 - Area C Course - Take upper-division course to complete Area & upper division requirements. | 3     |
The Gerontology Program provides an applied interdisciplinary approach to studying the human aging process and the challenges encountered by older adults and their families as they interact in contemporary society. The curriculum is anchored in life course and humanistic theory, and concentrates on the needs of both healthy and chronically ill elders. Candidates must maintain an overall GPA of 3.0 in courses submitted for the certificate.

Graduate students wishing to pursue independent study focusing on aspects of Gerontology are encouraged to also take GER 299: Special Problems.

Eligibility Information
Students must either be in a graduate degree program at Sacramento State or must apply for graduate admission to the University.

Total Units: 18

Minor in Gerontology

Units required for Minor: 21

Program Description
The Gerontology Program provides an applied interdisciplinary approach to studying the human aging process and the challenges encountered by older adults and their families as they interact in contemporary society. The curriculum is anchored in life course and humanistic theory, and concentrates on the needs of both healthy and chronically ill elders.

Minimum Grade Requirement
Students must receive a "C" or better in all Gerontology Minor courses.

Certificate in Gerontology

Units required for Certificate: 18

Program Description
The Gerontology Program provides an applied interdisciplinary approach to studying the human aging process and the challenges encountered by older adults and their families as they interact in contemporary society.
Interdisciplinary Studies

College of Social Sciences and Interdisciplinary Studies

Program Description

The Interdisciplinary Studies program recognizes that some subject matter is more thoroughly explored by drawing on various perspectives and methodologies from more than one discipline. Students, with faculty supervision, engage learning opportunities that encourage combining a range of information and experiences into a challenging individualized learning project. In addition, Interdisciplinary Studies is the administrative home to the Military Studies Minor, the Peace Corps Prep Certificate, and field experience courses associated with the Peer Health Educator Internship Program. The office administering, guiding, reviewing, and monitoring the interdisciplinary efforts, when they cross College or Divisional lines, is that of the Dean of the College of Social Sciences and Interdisciplinary Studies. Offerings are listed under the heading Interdisciplinary (ID) in the Class Schedule. Questions pertaining to the establishment and “equivalency” of courses should be directed to the Dean of the College of Social Sciences and Interdisciplinary Studies.

Labor Studies

College of Social Sciences and Interdisciplinary Studies

Program Description

The Labor Studies Program is concerned with the world of work, workers, and their organizations. It investigates the cultural, economic, and political forces which provide the environment in which people make a living. It is an inter-disciplinary program which combines broad perspectives with specific skills.

The program emphasizes the world of work from the view of the individual in the workplace, the labor market, and as a member of a work group or labor union. The roles of employers, government, and labor unions, as adversaries and cooperators in an increasingly competitive world, are covered. Courses combine analytical and practical elements, bridging academia with the world of work.

LBRS 100. Labor and the American Social Structure. ♦ 3 Units
Prerequisite(s): GWAR certification before Fall 09; or WPJ score of 80+; or 3-unit placement in ENGL 109M or ENGL 109W; or 4-unit placement in ENGL 109M or ENGL 109W and co-enrollment in ENGL 109X; or WPJ score 70 or 71 and co-enrollment in ENGL 109X.
General Education Area/Graduation Requirement: GE AREA D, Writing Intensive Graduation Requirement (WI)
Term Typically Offered: Fall, Spring

Introduction to the study of labor in the U.S., including the nature of work, characteristics of the work force, and an overview of contemporary labor and industrial relations systems within the framework of current U.S. economic and political developments.
Cross Listed: SOC 176; only one may be counted for credit.

LBRS 195. Labor Studies Internship. 1 - 3 Units
Term Typically Offered: Fall, Spring

Supervised work experience or research in relevant institutions providing an opportunity to apply classroom theories and principles to the "real world." Partial supervision may be supplied by host institution. Requires approval of the Labor Studies Coordinator.
Credit/No Credit

LBRS 199. Special Problems. 1 - 3 Units
Term Typically Offered: Fall, Spring

Individual projects or directed reading open to students competent to carry on individual work under the direction of a faculty sponsor. Admission requires approval of the faculty sponsor and the Labor Studies Coordinator.
Credit/No Credit

Liberal Studies

College of Social Sciences and Interdisciplinary Studies

Program Description
The Liberal Studies program is an interdisciplinary major, which encompasses a wide variety of areas of knowledge in a multidisciplinary curriculum. The program provides a broad academic program that encourages academic excellence, diversity, community, and collaboration. There are two tracks in the Liberal Studies Program: Pre-credential and General.

- The Pre-Credential program is a multidisciplinary major designed for students who intend to become K-8 or special education teachers in California, and it has been approved by the California Commission on Teacher Credentialing. Its purpose is to provide beginning teachers with a strong grounding in the wide ranging subject matter that will be needed to be effective teachers. The major compromises the core section, with courses in reading, language and literature, mathematics, natural science, history and social sciences, visual and performing arts, physical education, human development, and health. The pre-credential program requires a 12-unit area of focus.

- The General program is designed for students who are interested in a multidisciplinary major, but who do not necessarily plan to become teachers. The Liberal Studies major is an excellent preparation for careers in government service, public administration, business, management, community service, counseling, law, librarianship, public health, as well as professional or graduate school. This major requires students to include a minor.

The Liberal Studies major is a complex program requiring early and continuing contact with an advisor. Advisors meet with an advisor at least once each semester with students to provide a hands-on approach to learning. Students must complete 120 units and meet the University foreign language requirement in order to earn a Bachelor of Arts degree. Students are urged to obtain advice as early as possible to avoid delays in the completion of these requirements. The Liberal Studies program director and faculty and staff advisors are located in Lassen Hall 2008, (916) 278-6342.

Degree Program
BA in Liberal Studies (p. 1016)

Accreditation
In addition to California State University, Sacramento’s full accreditation by the Western Association of Schools and Colleges, the Bachelor of Arts in Liberal Studies (pre-credential) is also individually accredited by the California Commission on Teacher Credentialing (CCTC). Early planning is strongly advised to prepare students to apply to the professional education program. Details about multiple subject credential programs and regular information sessions are provided by the Teaching Credentials Office in Eureka Hall 401, (916) 278-6639.

Notice to Students RE: Professional Licensure and Certification
California State University programs for professions that require licensure or certification are intended to prepare the student for California licensure and certification requirements. Admission into programs for professions that require licensure and certification does not guarantee that students will obtain a license or certificate. Licensure and certification requirements are set by agencies that are not controlled by or affiliated with the California State University and licensure and certification requirements can change at any time.

The California State University has not determined whether its programs meet other states’ educational or professional requirements for licensure and certification. Students planning to pursue licensure or certification in other states are responsible for determining whether, if they complete a California State University program, they will meet their state’s requirements for licensure or certification. This disclosure is made pursuant to 34 CFR §668.43(a)(5)(v)(C).

Career Possibilities
The Liberal Studies major provides students with a wide variety of career opportunities and options. Liberal Studies provides essential learning employers want for workforce readiness: knowledge of human cultures and the physical and natural world, intellectual and practical skills, personal and social responsibility, and integrated learning.

Requirements for Areas of Emphasis

The Liberal Studies major requires that students complete an Area of Emphasis. All Areas of Emphasis require a minimum of 12 units, 3 of which may overlap with the core course requirements. Students may not combine courses from different areas of emphasis.

Minors may be used in lieu of an Area of Emphasis. Students interested in pursuing a Minor should discuss this option with their Liberal Studies advisor and with an advisor from the Minor program.

Minimum Grade Requirement

A minimum grade of “C-” is required in all courses applied to the Liberal Studies major.
Human Development

CHAD 35  Child and Adolescent Development  3

Integrative Study  3

Choose one of the following:

EDUC 121  Multicultural Children’s Literature
EDUC 160  Urban Education
EDUC 165  Sex Role Stereotyping in American Education
EDUC 170  Introduction to Bilingual Education: Policies, Principles, Programs, and Practices
HIST 161  The American Vision
HIST 169  Hollywood and America
HRS 162  American Space and Identity
HRS 168  Images Of America
WGS 136  Gender, Race, and Class

Field Experience

CHAD 35F  Human Development and Elementary Field Experience  3

Select one of the following:  3

EDUC 124A & EDUC 124B  Tutoring Children in Mathematics & Practicum
EDUC 125A & EDUC 125B  Tutoring Children in Reading & Practicum
EDUC 127A & EDUC 127B  Field Experience in After School STEM Programs & Practicum

The Liberal Studies Pre-Credential Program is in compliance with California Commission on Teacher Credentialing standards, and students who complete this major are waived from taking the California Subject Matter Examination (CSET).

Requirements for Area of Emphasis (12 Units)  2

Select one of the following areas. Areas MAY NOT be combined.  12

Art
Human Development
Linguistics
Literature
Mathematics
Multicultural Studies
Music
Natural Science
Physical Education
Theatre
United States History
World History

Total Units  101

1  The Core Requirements for the General program are similar to the Core Requirements for the Pre-Credential program except there are a number of substitutions that can be made. Please see an adviser for more information.

2  Units may range from 98 - 101 depending on the Area of Emphasis a student chooses due to overlapping courses. Areas of Emphasis that have some overlapping courses with core requirements courses: Art, Human Development, Linguistics, Literature, Music, Natural Science, Physical Education, Theatre, United States History, and World History.

Minor in Military Studies

Units required for Minor: 21

Program Description

The Military Studies Minor is an interdisciplinary minor of 21 units which provides a broad range perspective on a vital contemporary issue. The program focuses on the nature of human conflict, conflict resolution, international power relations, historical battles and campaigns, the military in domestic society, and myriad sub-topics. It enhances student exposure to, and understanding of, relevant military subjects. The Military Studies Minor is compatible with, and complements, several majors, i.e., Economics, Geography, Government, and History.

Military Studies

College of Social Sciences and Interdisciplinary Studies

Program Description

The Military Studies Minor is an appropriate and timely course of study for any student interested in defense policy, the military’s role in society, and military history. The successful completion of the minor will provide additional recognition for students wishing to understand these important subjects.

The Military Studies Minor is an interdisciplinary minor of 21 units which provides a broad range perspective on a vital contemporary issue. The program focuses on the nature of human conflict, conflict resolution, international power relations, historical battles and campaigns, the military in domestic society, and myriad sub-topics. It enhances student exposure to, and understanding of, relevant military subjects. The Military Studies Minor is compatible with, and complements, several majors, i.e., Economics, Geography, Political Science, and History. It is also compatible with the ROTC Aerospace Studies academic training program.
Peace and Conflict Resolution

**College of Social Sciences and Interdisciplinary Studies**

**Program Description**

Peace and Conflict Resolution is an interdisciplinary minor with most of its courses drawn from the Social Sciences. The courses introduce students to the processes of understanding and changing social conditions in order to lead to a more peaceful, just, and conflict-free society and world.

We find that war and oppression are subject to study and to change, and the university is an appropriate setting for the study and pursuit of alternate means of resolving conflicts.

The minor complements a number of majors, including many in the Humanities, Social Sciences, and Professional Schools.

**Degree Program**

Minor in Peace and Conflict Resolution (p. 1022)

**Special Features**

- A philosophy basic to the study of Peace and Conflict Resolution is praxis, the creative combination of analysis and action. Students in the program are encouraged to develop the knowledge base, skills, and political courage necessary for effective leadership in a democratic society.
- The program's faculty is widely published and active in a number of fields related to peace and conflict resolution.
- The goal of the program is to educate adults to be responsible and courageous citizens, and, if the students choose, to become professional peace workers. To achieve this end we practice an interdisciplinary approach, drawing upon courses and faculty in several academic areas including anthropology, communication studies, economics, education, government, environmental studies, ethnic studies, and women's and gender studies.

The following courses may only be taken by Peace Corps Prep students who are Health Science Majors

- PUBH 136 School Health Education

The following courses may only be taken by Peace Corps Prep students who are History Majors

- HIST 198 Summative Assessment for Teachers

The following courses may only be taken by Peace Corps Prep students who are Music Majors

- MUSC 162 Foundations of Music Education
- MUSC 164 Music in General Education

The following courses may only be taken by Peace Corps Prep students who are Physical Education Majors

- BIO 30 Anatomy & Physiology - Brief Course

Environment Work Sector

The following courses may be taken by any Peace Corps Prep student

- ANTH 108 Economic Anthropology
- ANTH 109 Ecological and Evolutionary Approaches to Anthropology
- ANTH 115 Origins of Agriculture
- ANTH 124 Environmental Archaeology
- ANTH 174 Anthropology of Food
- ANTH 175 Anthropology of Globalization
- ANTH 181 Anthropology of Human Rights
- ANTH 196T Zooarchaeology
- BIO 1 Biodiversity, Evolution and Ecology
- BIO 2 Cells, Molecules and Genes
- BIO 7 Introduction to the Science of Biology
- BIO 9 Our Living World: Evolution, Ecology and Behavior
- BIO 10 Basic Biological Concepts
- BIO 15L Laboratory Investigations in Biology
- BIO 103 Plants and Civilization
- BIO 118 Natural Resource Conservation
- BIO 160 General Ecology
- BIO 179 Conservation Biology & Wildlife Management
- BIO 186B Ecological and Environmental Issues Seminar
- COMS 145 Organizational Communication
- ECON 120 Economics and Environmental Degradation
- ECON 123 Resource Economics
- ENV 10 Introduction to Environmental Science
- ENV 11 Environmental Issues and Critical Thinking
- ENV 122 Environmental Impact Analysis: CEQA and NEPA
- ENV 128 Environment and the Law
- ENV 138 Introduction to Environmental Sociology
- ENV 165 American Environmental History
- ENV 171 Environmental Politics and Policy
- ENV 187 Environmental Studies Seminar
- GEOG 1 Physical Geography: The Distribution of Natural Phenomena
- GEOG 2 Cultural Geography
- GEOG 3 Introduction to Maps and Geographic Technologies
- GEOG 5 Violent Weather/Changing Atmosphere

RPTA 149 Developing and Programming Adventure Experiences
RPTA 150 Ecology Of Resource Areas
RPTA 151 Visitor Management in Recreation Areas
RPTA 152 Law Enforcement for Forest and Park Rangers
RPTA 153 Environmental Interpretation
SOC 138 Environmental Sociology
SOC 139 Animals in Society

The following courses may only be taken by Peace Corps Prep students who are in the Honors Program

- ENV 10H Honors Environmental Science
- GEOG 2H Cultural Geography - Honors
Peace Corps Prep Certificate

HONR 101: Science and the Public Good

The following courses may only be taken by Peace Corps Prep students who are Engineering Majors:

CE 100: Engineering Geology
CE 130: Water Resources Engineering
CE 131: Hydrology
CE 133: Design of Urban Water and Sewer Systems
CE 134: Open Channel Hydraulics
CE 153: Design of Water Quality Control Processes
CE 170: Soil Mechanics
EEE 135: Renewable Electrical Energy Sources and Grid Integration
EEE 136: Smart Electric Power Grid
ENGR 105: Sustainable Design and Construction
ME 121: Renewable Energy Storage Systems
ME 122: Geothermal and Bioenergy Systems
ME 123: Wind, Hydro and Ocean Energy
ME 154: Alternative Energy Systems
ME 157: Solar Energy Engineering

The following courses may only be taken by Peace Corps Prep students who are Environmental Studies Majors:

ENVS 110: Contemporary Environmental Issues
ENVS 111: Environmental Ethics
ENVS 112: International Environmental Problems
ENVS 120: Quantitative Methods for Environmental Science
ENVS 121: Field Methods in Environmental Science
ENVS 130: Environmental Toxicology
ENVS 144: Sustainability Science & Policy
ENVS 147: Urban Agriculture and Aquaponics
ENVS 149: Agroecology
ENVS 151: Restoration Ecology
ENVS 158: Wetlands Ecology
ENVS 163: Ethnoecology

The following courses may only be taken by Peace Corps Prep students who are Recreation, Parks, and Tourism Administration Majors:

RPTA 42: Recreation and Parks: Natural, Cultural, and Heritage Resources

Health Work Sector

The following courses may be taken by any Peace Corps Prep student:

ANTH 150: Human Osteology
ANTH 153: Evolutionary Medicine
ANTH 155: Fundamentals of Biological Anthropology
ANTH 156: Evolution of Human Behavior
ANTH 163: Urban Anthropology
ANTH 174: Anthropology of Food
ANTH 181: Anthropology of Human Rights
BIO 10: Basic Biological Concepts
BIO 15L: Laboratory Investigations in Biology
BIO 20: Biology: A Human Perspective
BIO 22: Introductory Human Anatomy

If you choose to take courses in the following tracks, you must consult with an advisor to ensure that they count toward the Peace Corps Prep certificate.

BIO 25: Human Anatomy and Physiology I
BIO 26: Human Anatomy and Physiology II
BIO 39: Microbiology for Allied Health Students
BIO 104: Physiology of Human Reproduction
BIO 131: Systemic Physiology
BIO 131A: Advanced Problems in Physiology
BIO 132: Neuropathology
BIO 133: Cardiovascular, Respiratory and Renal Physiology
BIO 140: Medical Microbiology and Emerging Infectious Diseases
BIO 152: Human Parasitology
BIO 185: Topics in Biology
BIO 186A: Cell and Molecular Biology Seminar
BIO 186C: Introduction to Health Careers Seminar
CHAD 30: Human Development
CHAD 143: Mind and Brain in Developmental Context
CHAD 157: Infant and Toddler: Development and Care
CHEM 6B: Introduction to Organic and Biological Chemistry
CHEM 160A: Structure and Function of Biological Molecules
CHEM 160B: Metabolism and Regulation of Biological Systems
CHEM 161: General Biochemistry
CHEM 162: General Biochemistry Laboratory
ECON 153: Health Economics
FACS 10
FACS 112
FACS 113
FSHD 52: The Child In The Family
FSHD 152: Adolescent Development
FSHD 159: Adulthood and Aging in Human Development
GEOG 143: Environmental Hazards and Society
GERO 100: Aging Issues in Contemporary America
GERO 101: Older Adult Services and Strategies
GERO 103: Applied Care Management in Gerontological Practice
GERO 121: Strategies for Optimal Aging
GERO 122: Interprofessional Approaches to Health Care in Older Adults
HIST 18: Health, Medicine, and Science in America, 1600-Present
HIST 175A: Sex, Population, and Birth Control in America
NURS 14: Pharmacology
NURS 160: Human Sexuality
NURS 168: The Brain and Gender-Related Differences
PHIL 104: Bioethics
PHIL 192B: Topics in Bioethics
POLS 131: International Organization
POLS 139B: International Politics and International Development
POLS 139S: Topics in Human Security
PSYC 2: Introductory Psychology
PSYC 111: Foundations of Behavioral Neuroscience
PSYC 117: Drugs and Behavior
PSYC 134: Psychology of Human Sexuality

**Work Sector Field Experience (1-15 Units)**

Complete at least 50 hours of field experience in the same work sector in which you took coursework. There are three options for satisfying the field experience requirement:

a) Service learning course(s) where the service is related to your chosen work sector (must be pre-approved by the program advisor)
b) (1-6) ID 195 Field Experience (must be related to your chosen work sector, pre-approved by the program advisor, and supervised by the faculty)
c) An approved internship course in your chosen work sector listed below

Options may be combined if necessary to achieve the required number of hours of field experience. The Student Handbook lists possible field experience sites.

**Approved Internship Courses**

**Agriculture Work Sector**

The following courses may only be taken by Peace Corps Prep students who are Geography Majors

- GEOG 195A Geography Internship A
- GEOG 195B Geography Internship B
- GEOG 195C Geography Internship C

The following courses may only be taken by Peace Corps Prep students who are in the Honors Program

- HONR 195 Community Fieldwork and Internship

**Community Economic Development Work Sector**

The following courses may be taken by any Peace Corps Prep student

- ACCY 194 Cooperative Education Experience in Accountancy
- AIS 194 Cooperative Education Experience in Accounting Information Systems Problems
- GM 194 Cooperative Education Experience in Management
- HROB 194 Cooperative Education Experiences in Human Resources Management
- JOUR 197A
- JOUR 197B
- MIS 194 Cooperative Education Experience in Management Information Systems
- PSYC 195C Fieldwork in Industrial and Organizational Psychology

The following courses may only be taken by Peace Corps Prep students who are Business Majors

- ACCY 195 Internship in Accountancy
- AIS 195 Internship in Accounting Information Systems
- FIN 195 Internship In Finance
- GM 195 Internship in Strategic Management
- HROB 195 Internship in Human Resources Management
- IBUS 195 Internship in International Business

Professional and Leadership Development Skills

Complete both of the following:

- College 2 Career Readiness Program
- Green Certificate of the Leadership Initiative

Total Units: 43-57

Political Science

*College of Social Sciences and Interdisciplinary Studies*

**Program Description**

Political Science is devoted to the study of the theory and practice of government and politics. The Political Science Department at Sacramento State offers courses in several fields of study, including: Political Theory, American Politics; Public Law; International Relations; Comparative Politics; and Public Policy. Over 70 courses cover all the major aspects of political science. Lower division courses satisfy General Education requirements and help to prepare students for advanced work.

The Political Science major complements a student’s liberal arts education with an emphasis on understanding the theoretical and practical aspects of government and politics. The department offers a BA in Political Science, a BA in International Relations, a BA in Political Science-Journalism, and the minor in Political Science. Our majors are structured to provide students with a background in the basic fields of political science, as well as to permit them a range of choice in completing the program. The Political Science Department offers several courses integral to interdisciplinary programs such as California Studies, Environmental Studies, Ethnic Studies, Peace and Conflict Resolution Studies, and Women’s and Gender Studies.

Students should select a faculty advisor who shares the student’s academic interests. For students who wish to pursue graduate work in Political Science, a Master of Arts degree is offered.

**Degree Programs**

- BA in International Relations (p. 1049)
- BA in Political Science (p. 1051)
- BA in Political Science and Journalism (p. 1052)
- Minor in Political Science
- MA in Political Science (California and its Political Environment) (p. 1054)
- MA in Political Science (International Relations/Comparative Government) (p. 1055)
- MA in Political Science (Political Theory) (p. 1057)
- Capital Fellows Certificate in Applied Policy and Government (p. 1053)

**Special Features**

- Located in the state capital, the Sacramento State program offers unusual opportunities for the study of government and politics and especially for internships. Students have served internships with state legislators, legislative committee staffs, special interest and lobbying groups, and administrative agencies. Placement is also possible in local government executive agencies and with county supervisors, city council members, and selected political campaigns. Students applying for internships should have had (or be taking in the same semester) POLS 180, California State and Local Government, and must have passed the Writing Placement for Juniors Examination.

- Sacramento State students may apply for the Sacramento Semester Program, which brings students from all California State University campuses to Sacramento for one semester to take advantage of the unique learning experience at the State Capitol. The heart of this program is six units of internship with the legislature or other state offices. An accompanying 6 unit seminar course in state government and politics allows students to integrate their practical internship experience with academic work.

- Students who work in the day will be interested to know that class scheduling permits completion of the general Government major in the late afternoon and evening hours.

**Career Possibilities**

Government majors enter careers in government at the local, state, or federal level, political campaigns, non-profit and non-governmental organizations, lobbying, urban planning, or policy-related fields of all kinds. Others go into teaching at all levels, journalism, business, and Government, of course, is a popular major for students interested in pursuing legal careers. Examples of possible careers include: policy analyst, specialist in legislative and governmental relations, budget analyst, campaign manager, Foreign Service officer, attorney, paralegal, high school teacher.
POLS 1. Essentials Of Government. 3 Units
General Education Area/Graduation Requirement: GE AREA D, U.S. Constitution + California State & Local Govt
Term Typically Offered: F_S_S_W

Examines the U.S. Constitution, the U.S. system of governments and the ideas and values on which they are based. Fulfills state code requirements for U.S. Constitution and California State and Local Government. Students who believe they have a good fundamental knowledge of the institutions of American Government are encouraged to consider a designated upper division course to fulfill the state requirement.

POLS 1H. Honors Government. 3 Units
General Education Area/Graduation Requirement: GE AREA D, U.S. Constitution + California State & Local Govt
Term Typically Offered: Fall, Spring

Explores some of the most influential works of politics and political writing in American history, and challenges contemporary analysis of political institutions and processes. Examines the structure of the Constitution, issues of federalism, the growth of civil rights, and the processes of government, with a comparative element. Explores the unique characteristics of California state politics.

POLS 10. The Meaning of Government: An Introduction to Political Ideas. 3 Units
General Education Area/Graduation Requirement: Humanities (Area C2)
Term Typically Offered: Fall only

Examination of the ideas of various authors about governing and being governed. Topics include: the scope and limits of freedom, the causes and characteristics of the state, the content of politics, the nature of authority, the problems of power and the duty to obey.

POLS 21. First Year Seminar: Becoming an Educated Person. 3 Units
General Education Area/Graduation Requirement: Understanding Personal Development (E)
Term Typically Offered: Fall, Spring

Introduction to the meaning of higher education, the resources of the University, and skills for lifelong learning. Designed to help students develop academic success strategies, and to improve information literacy, intercultural competence, and integrative thinking. Provides students with the opportunity to interact with fellow students and seminar faculty to build a community of academic and personal support. Units may not be applied toward Political Science, International Relations, or Political Science-Journalism majors, or Political Science minor.

POLS 35. World Politics. 3 Units
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall, Spring

Basic introduction to global politics focusing on a broad range of issues and problems relating to conflict and cooperation among nations, and on similarities and differences among nations’ governmental institutions, structures and processes.

POLS 96. California Constitution & Government. 1 Unit
Prerequisite(s): Instructor approval required.

Examines the California state constitution, the structure and role played by both the state government and local governments in California. Students who pass the course will petition the Dean of Undergraduate Studies for credit in meeting the California Government portion of the American Institution requirement. Note: Experimental course.

Credit/No Credit

POLS 100. Introduction to Research Methods in Political Science. 3 Units
Term Typically Offered: Fall, Spring

Examines the foundations of scientific research methodology in political and social science. Designed to introduce students to the basic conceptual, observational and analytical methods of empirical research in political science and related social sciences.
POLS 102. Quantitative Reasoning in Political Science. 3 Units

General Education Area/Graduation Requirement: Further Studies in Area B (B5)

Term Typically Offered: Fall only

Exploration and applications of analytical reasoning to topics and issues in political science. Focuses on the quantitative aspects of political behavior, interactions, and institutions. Topics may include electoral systems, rational choice, models of voting, polling, redistricting, and game theory.

POLS 110. Political Thought I. 3 Units

Term Typically Offered: Fall, Spring

History of political theory, covering some important thinkers and topics during the Ancient, Medieval and Early Modern periods.

POLS 111. Political Thought II. 3 Units

Term Typically Offered: Fall, Spring

History of political theory, covering some important thinkers and topics from the Early Modern period to the early 20th century.

POLS 112. Current Political Thought. 3 Units

Term Typically Offered: Fall, Spring

Current issues in political thought, with emphasis upon developments in the political philosophies of democracy, fascism, communism, conservatism, liberalism. Ideas are analyzed with reference to assumptions on which they are based and their relevance for political institutions and problems.

POLS 113. American Political Thought. 3 Units

General Education Area/Graduation Requirement: U.S. Constitution + California State & Local Govt, GE AREA D

Term Typically Offered: Fall, Spring

Assessment of ideas that are central to the development of an American political tradition, as those ideas influence government at the federal, state and local levels. Meets the state requirements in U.S. Constitution and California State and Local Government.

POLS 115. Democratic Theory. 3 Units

Term Typically Offered: Spring only

Introduction to basic questions of democracy. Draws on classical and contemporary writings to explore what democracy means and various forms of democratic government, politics, and culture: direct, representative, liberal, republican, pluralist, elitist. Specific topics may include: definitions of democracy, justifications for democracy, arguments for increasing or limiting democratic participation, tasks of political representatives, democratization of social institutions, and the relationship between globalization and democracy.

POLS 117. Black Political Thought. 3 Units

Term Typically Offered: Spring only

Systematically and analytically introduces the predominant political trends and concepts presently entertained and harbored in the Black Community. A necessary adjunct to this dialogue is the racist theme in American society since on balance this is the matrix out of which the political alternatives and concepts grew.

Cross Listed: ETHN 117; only one may be counted for credit.

POLS 118. Just War, Natural Right, and the Law of Nations. 3 Units

Term Typically Offered: Fall only

Examines fundamental conceptual questions about morality, law, and international relations through great works of political theory. Topics will cover natural right, sovereignty, just war, imperialism, national security, and international obligations. Authors read will include Thucydides, Aristotle, Aquinas, Machiavelli, Grotius, Montesquieu, Kant, Hegel, Marx, Mill and Nietzsche.

POLS 119A. Socialism Marxism-Communism. 3 Units

Term Typically Offered: Fall only

Analyzes the basic writings and ideas of Socialist and Marxist writers and the implications of their ideas.

POLS 119B. Greek Political Thought. 3 Units

Term Typically Offered: Fall only

Study of the political thought of Greece from Homer to Demostenes, including Plato, Thucydides, Sophocles, and other Greek thinkers. Topics include the birth of democracy, the sciences and philosophy, Athens' rise to prominence, its defense of freedom against Persia, and its own development of an empire. Examination of Greek thoughts about justice, authority, freedom, equality, and culture. The events that shaped ideas and ideas that shaped events, as well as our understanding of the modern world, will be covered.

POLS 119D. Shaping of the Modern World. 3 Units

Term Typically Offered: Spring only

This course examines major problems that have shaped the modern world, the historical and intellectual roots of the modern world, and debates over the meaning of modernity. Considers how both advocates and critics of modernity have understood the relation of history, philosophy, politics, nature, religion, economics, and other key concepts. Specific topics may include: the development of modern science, technological progress, democratic institutions, capitalism, colonialism, secularization, religious tolerance, and individual freedom.

POLS 120A. Constitutional Law. 3 Units

Prerequisite(s): GOVT 1 or GOVT 150

Term Typically Offered: Fall, Spring

Basic junior level course in Public Law. A study of leading decisions of the U.S. Supreme Court and other materials pertaining to the power of Congress, the President and the Judiciary; relations between states and nation; and civil rights. Considers such topics as the separation of powers, judicial review, Congress, and the President.

POLS 120B. Constitutional Rights and Liberties. 3 Units

Prerequisite(s): GOVT 1 or GOVT 150

Term Typically Offered: Fall, Spring

Basic junior level course in Public Law. A study of rights and immunities under the U.S. Constitution: examines leading decisions of the U.S. Supreme Court and other materials pertaining to freedom of expression, freedom of association, equality and due process of law.
POLS 121. American Legal History. 3 Units
Term Typically Offered: Fall only
Examines the interaction of law, society, and politics in America from the colonial period to the present with special emphasis on law as an arena of social and cultural conflict. Major topics include the development of the common law in early America; the law of slavery and its impact on constitutional development; the role of the law in defining controversies over race and gender; legal thought and education; and the role of the Supreme Court in 20th Century America. Cross Listed: HIST 180; only one may be counted for credit.

POLS 122. The Law and Bureaucracy. 3 Units
Prerequisite(s): GOVT 1 or GOVT 150
Term Typically Offered: Not offered
Examines constitutional and statutory limits of bureaucratic power in the American political system.

POLS 123. Elements Of Law. 3 Units
Prerequisite(s): GOVT 1 or GOVT 150
Term Typically Offered: Fall only
Current legal thought in the U.S. with special emphasis on the relationship of law to history, economics, anthropology, and government; the nature of law; the role of legislators, lawyers, and judges in making the legal system.

POLS 126. Politics and Lawyers. 3 Units
Prerequisite(s): GOVT 1 or GOVT 150
Term Typically Offered: Fall, Spring
Examines and analyzes the pervasiveness of lawyers and their activities in political realities; what do lawyers do; politics of prosecution and defense; politics within the profession; professional mobility; politics of the judiciary; lawyers in government.

POLS 127. International Law. 3 Units
Term Typically Offered: Spring only
This course links both theoretical and practical aspects of international law and international relations, from the traditional law of nations to individual subjects, jurisdictions, and immunities. The course surveys topics such as genocide, human rights, immigration, the use of force, international courts and tribunals, the environment, and the law of the sea, using illustrative court cases, treaties, and customs that establish important precedents in international law.

POLS 128. Environment and the Law. 3 Units
Term Typically Offered: Spring only
Introduction to environmental law, including: the evolution of environmental legislation, environmental issues in the court system, environmental regulation and administrative law and environmental torts. Emphasis is on understanding legal process and the special challenges environmental problems present to the legal system. Cross Listed: ENVS 128; only one may be counted for credit.

POLS 130. International Politics. 3 Units
Term Typically Offered: Fall, Spring
Basic junior-level course in International Relations. Current international tensions; the motivating forces influencing world politics; and the role of diplomacy and international organizations in resolving conflicts.

POLS 131. International Organization. 3 Units
Prerequisite(s): GOVT 1 or GOVT 150
Term Typically Offered: Spring only
Examines human efforts to create supranational organizations to promote world peace and prosperity. The focus will be on social, political, and economic activities and problems which have developed and proliferated since the end of the Second World War.

POLS 132. War and Peace in the Nuclear Age. 3 Units
Term Typically Offered: Not offered
Covers the discovery of atomic fission, the development of the atomic bomb and the evolution of U.S. nuclear weapons and strategy from 1945 to the present. It examines political, strategic, bureaucratic, economic and cultural forces that have shaped U.S. nuclear policy since Hiroshima. The problem of international security in the Nuclear Age is also addressed.

POLS 133. American Defense and National Security. 3 Units
Term Typically Offered: Spring only
Analyzes U.S. security policy, looking at the structure and ideologies of the security system, the requirements of national defense, and the roles played by conventional and nuclear weapons in protecting and promoting American security.

POLS 134. War, Peace and the Mass Media. 3 Units
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Spring, Summer
Concerned with the relationship of mass media to war and the possibilities for peace, with emphasis on recent concepts of political communication. Cross Listed: JOUR 134; only one may be counted for credit.

POLS 135. American Foreign Policy. 3 Units
Prerequisite(s): GOVT 1 or GOVT 150
Term Typically Offered: Fall only
Institutions, practices and development of American foreign policy; the interaction of domestic and foreign factors on the formulating of American foreign policy since World War II.

POLS 136. International Political Economy. 3 Units
Term Typically Offered: Fall, Spring
Analyzes the interaction between politics and economics at the international level. Covers basic theoretical approaches; historical evolution of international economy; creation and role of international financial institutions; development issues; globalization and integration.

POLS 137. Nationalism. 3 Units
Prerequisite(s): GOVT 35 or GOVT 130 or instructor permission
Term Typically Offered: Fall, Spring
Focuses on major theories of nationalism. Examines the literature dealing with theories explaining the emergence of nationalism and its political consequences; develops a comprehensive set of empirical indicators of nationalism, together with several working hypotheses regarding political manifestations of nationalism; provides the analytic frame for understanding nationalism; and applies theories to explain political behaviors of nations.
POLS 138. UN Simulation. 3 Units
Prerequisite(s): Junior status or above, a minimum 3.0 GPA in the major, GOVT 130 and/or GOVT 140, or instructor permission.
Term Typically Offered: Fall, Spring

Seminar experience for upper level Government and International Relations concentration majors. Students will prepare for and participate in a national intercollegiate model UN conference.
Note: Course repeatable with instructor permission.

POLS 138B. UN Simulation Practicum. 3 Units
Prerequisite(s): POLS 138. instructor permission only.
Term Typically Offered: Spring only

Practicum experience for role-playing in a UN simulation. Students will prepare for a national intercollegiate model UN conference, practicing persuasion and negotiation tactics and skills in a debating format.
Note: The course may be repeated with instructor permission up to a total of six units.

Credit/No Credit

POLS 139A. Globalization. 3 Units
Prerequisite(s): An upper division course in the field and/or instructor permission.
Term Typically Offered: Fall only – odd years

Explores the nature of, and issues in, globalization. It does so in five parts. Part I examines alternative conceptions of globalization. Part II identifies and examines the primary forms of economic globalization. Part III considers globalization’s effects on the territorial state, the welfare state, organized violence, culture, immigration, gender, and the environment. Part IV investigates the politics of the anti-globalization backlash. Part V concludes with an assessment of the shape and future of contemporary globalization.

POLS 139B. International Politics and International Development. 3 Units
Prerequisite(s): GOVT 130 or Instructor Permission
Term Typically Offered: Fall only – even years

This course examines the origins and evolution of the theory and practice of international development; considers the meaning of international development; examines theoretical models and approaches to understanding the conditions, effects, and processes of international development. It explores the history and current state of theories and approaches to international development and addresses contemporary and essential issues in the field.

POLS 139C. Critical Writings in International Relations. 3 Units
Prerequisite(s): POLS 130
Term Typically Offered: Fall only – odd years

This undergraduate seminar examines writings and other materials that analyze how race and economic exploitation, gender and patriarchy, and intersectionality have influenced the theory and practice of international relations from the sixteenth through the twenty-first centuries.

POLS 139E. International Conflict and Ethnicity. 3 Units
Term Typically Offered: Fall, Spring

This course examines the role of ethnicity or identity in violent and nonviolent international conflicts. This course traces the dynamics of violent and nonviolent conflicts around the globe from a comparative approach, and unpacks the role identity plays in the mobilization, strategies, and responses of the international community to these conflicts.

POLS 139G. Intelligence and Espionage. 3 Units
Term Typically Offered: Fall only

Involves students in the study of the field of intelligence, as it relates to national security, foreign policy, law and ethics. Comparative analysis of the practice and experience of the U.S., the former Soviet Union and other nations will be emphasized.

POLS 139S. Topics in Human Security. 3 Units
Term Typically Offered: Spring only

This course introduces students to the broad field of the study of human security and many essential current topics in that field, such as access to food and water, security against personal violence, and economic security. Students will examine how international forces and structural elements of society can endanger or ensure the security of groups and individuals within the borders of nation-states. Students will learn to research, analyze, and address the connections between international forces and their affects upon human beings around the world.

POLS 140. Comparative Politics. 3 Units
Prerequisite(s): GOVT 1 or GOVT 150
Term Typically Offered: Fall, Spring

Survey of the field of comparative government and politics including a review of historic uses of comparison in political science research but with emphasis on the methods of study and analytical means of research currently employed. The subject matter of study: national political systems of all types and the component parts of political systems will be an integral feature.

POLS 141. Politics of the African Diaspora. 3 Units
General Education Area/Graduation Requirement: GE AREA D, Race & Ethnicity Graduation Requirement (RE)
Term Typically Offered: Fall only

Examines the social, political, cultural, and economic factors which have been important to the African diaspora. Examines how African people have responded to those factors, both in terms of formal, political thought, and in terms of political movements and political institutions. Examines thought and practice, comparability to Africa, U.S., Caribbean, Central and South America. Cross Listed: ETHN 141; only one may be counted for credit.

POLS 142. Government and Politics in Africa. 3 Units
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Spring only – even years

Deals with the politics and governments of Africa. The most important themes concern precolonial African systems, colonialism, nationalism and nation-building. Previous exposure to African Studies is desired but not required.
POLS 143. Causes of War, Causes of Peace. 3 Units
Prerequisite(s): GOVT 1 or GOVT 150
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall only

Explores the entire conflict process associated with war from a variety of theoretical and methodological angles, including rationalist and behavioral models. Examines the concept of war and why wars begin. Looks at how violent international conflict is resolved. Investigates the role of the international community in the management of violent conflict, how peace processes are implemented, what leads to successful negotiations, and how war crimes and post-conflict reconciliation issues are resolved.

POLS 144. European Politics. 3 Units
Prerequisite(s): GOVT 1 or GOVT 150
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall only

Study of national and regional politics, governmental institutions and public problems in Europe since 1945. In different semesters there may be investigation of several, but varying, national systems, of cross-national political behavior, or of regional integration processes. May be taken more than once if there are different topics and instructor permission.

POLS 145. Asian Politics. 3 Units
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall, Spring

Survey of governmental institutions and political processes in East and Southeast Asia. Focuses on the region’s politics, dynamic economic growth, complex security context, resurgence of nationalism, and attempts to build multilateral institutions.

POLS 146. US-China Relations. 3 Units
General Education Area/Graduation Requirement: Humanities (Area C2)
Term Typically Offered: Fall, Spring, Summer

This course explores the historical foundation of US-China relations, tracing from 19th century encounters through world wars, ideological confrontation, rapprochement, and into the contemporary era. Focus on international and political dimension of diplomatic and strategic interests, also explores cultural and social connections through trade, investment, migration, and tourism.

Cross-listed: ASIA 146.

POLS 147. Latin American Government and Politics. 3 Units
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Spring only

Two-part examination of government, politics, political change and political groups in Latin America. Part one examines the development of government, politics, political change and political groups. Part two presents national case studies.

POLS 148. Governments and Politics in the Middle East. 3 Units
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Spring only

Survey of the governmental institutions and the political processes in the region, with emphasis on the problems of social change. Focuses on the colonial situation, the growth of nationalism, the revolution of rising expectations, Islamic political theory and its contemporary manifestations, the role of the military, and the current regional conflicts.

POLS 149A. Original Research in Comparative Politics. 3 Units
Prerequisite(s): GWAR certification before Fall 09; or WPJ score of 80+; or 3-unit placement in ENGL 109M or ENGL 109W; or 4-unit placement in ENGL 109M or ENGL 109W and co-enrollment in ENGL 109X; or WPJ score 70 or 71 and co-enrollment in ENGL 109X. POLS or IR majors or instructor consent only.
General Education Area/Graduation Requirement: Writing Intensive Graduation Requirement (WI)
Term Typically Offered: Fall, Spring

Students will engage in a cross-national research agenda. Students will conduct original research in comparative politics. Countries and topics acceptable for comparison will vary with instructor.

POLS 149R. Comparative Revolutions. 3 Units
Term Typically Offered: Fall, Spring

This course is primarily concerned with the causes, trajectories, and consequences of major revolutions and revolutionary movements of the 20th and 21st centuries. The course addresses the questions: what defines a revolution? What are the causes of revolutionary social change? Why do some revolutions fail to achieve their intended objectives and others succeed? How can political scientists investigate the possibility of objectively assessing revolutionary success or failure?

POLS 150. American Governments. 3 Units
General Education Area/Graduation Requirement: U.S. Constitution + California State & Local Govt, GE AREA D
Term Typically Offered: Fall, Spring, Summer

Federal system of government; the U.S. Constitution; legislative, executive, and judicial processes; political parties, interest groups, and the relationships and obligations of citizens to their government(s). Fulfills the California state graduation and credential requirements for U.S. Constitution and California State and Local Government. May be substituted for GOVT 1, but may not be used as an elective toward the major.

POLS 151. Bureaucracy. 3 Units
Prerequisite(s): GOVT 1 or GOVT 150
Term Typically Offered: Not offered

Evaluation of the role and background of a professionalized bureaucracy with references to American national, state and local administrative systems as well as non-American administrative systems.

POLS 152. Political Psychology. 3 Units
Term Typically Offered: Fall, Spring

Examines the ways in which political behavior is shaped by individual beliefs, personalities, cognitive patterns, biases, and other psychological mechanisms. Students will engage with a wide range of research on topics such as cognitive styles, personality, obedience, psychological roots of terrorism, the psychology of ideology, and the role of emotion in politics.

Cross-listed: PSYC 153

POLS 153. The American Presidency. 3 Units
Prerequisite(s): GOVT 1 or GOVT 150
Term Typically Offered: Spring only

Examines the development of the Presidency as an institution; sources and uses of presidential power in contemporary politics; the President’s relationship with Congress and the bureaucracy; and current issues relating to the office.
Examination and analysis of American political parties. An exploration of the nature and functions of political parties including party organization, electorate, and government. Topics include the various historical party systems, the two-party system, elections, and campaign financing. Includes discussion of the presidential nominating process.

**POLS 154. Political Parties in America.**
3 Units
Prerequisite(s): GOVT 1 or GOVT 150
Term Typically Offered: Fall, Spring

Examination and analysis of interest groups in American political systems. The nature, role, formation, organization and activities of interest groups; how interest groups influence the public, political campaigns, public policy-making, and policy implementation. Representative interest groups will be studied.

**POLS 156. Interest Groups.**
3 Units
Prerequisite(s): GOVT 1 or GOVT 150
Term Typically Offered: Fall only

Focuses on the role the mass media plays in the political life of our democracy. Five primary topics are covered: the proper media role in a democracy; the relationship between the media, public opinion and agenda setting; the effects of media coverage on campaigns, elections, and voting; how elected officials influence and "spin" coverage; and the impact of media on policy-making. Students will develop critical analysis skills and emerge as more savvy media consumers and citizens.

**POLS 157. Politics, Opinion, and Participation.**
3 Units
Term Typically Offered: Fall, Spring

Explores the history of American political parties and the role they play in the political process. Examines the development and organization of the institution, the role of leadership and political parties, chamber differences, congressional elections, and the relationship with the executive branch. Examines the legislative process. Evaluates the nature of representation in contemporary society.

**POLS 155. United States Congress.**
3 Units
Term Typically Offered: Fall only

This course will provide an overview of the political discussions and decisions related to immigration and citizenship in the US. More specifically, this course examines: (1) key political and policy actors in the development of immigrant admissions and immigrant integration policies, (2) the nature and consequences of immigration at the national, state, and local levels, (3) evolving racial and ethnic relations in the US, (4) public opinion and immigration-immigrants participation in American political life, and (5) contemporary issues.

**POLS 159D. Politics, Immigration, and Citizenship.**
3 Units
Prerequisite(s): GOVT 1
Term Typically Offered: Fall, Spring

Examines the phenomenon of political underrepresentation in the U.S.A. It will identify significant affected groupings, examine the conditions which have resulted in such underrepresentation, evaluate the effects of underrepresentation on the lives of affected groups, and consider relevant political strategies. Emphasis on particular groups may vary with instructor.
POL 166. Gender and Politics. 3 Units
Term Typically Offered: Spring only

This course examines the influence of socially constructed meanings of femininity and masculinity on the political participation of women, candidate selection, election campaigns, and electoral outcomes in executive and legislative offices in the U.S. and worldwide. Students will develop a rich understanding of the relationship between gender and women's political representation and analyze and discuss institutional, structural, cultural, and historical conditions associated with women's voting behavior, political advancement, leadership styles, and impacts of political representation on women.

POL 167. American Political Development. 3 Units
Term Typically Offered: Fall only

Focuses on key transformative sequences in American political history and their consequences. Topics include the nature of American political culture and its role in shaping U.S. political institutions and public policy; the process of government growth or "state building"; the role of political institutions in channeling societal demands and influencing public policy; the nature of American party systems or "regimes" and the electoral "realignments" that link them; and connections between long-term economic and political cycles.

POL 168. LGBTQ Politics. 3 Units
Term Typically Offered: Fall, Spring

This course provides an in-depth examination of the politics and history of the lesbian, gay, bisexual, transgender, and queer (LGBTQ) communities in the United States. Particular emphasis will be placed on current American political issues impacting the LGBTQ community.

POL 169A. Science, Technology, and Politics. 3 Units
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall only

Social and political dimensions of science and technology. Examines how science and technology both shape politics and are shaped by politics. Considers the role of scientific advisors in government and society; dilemmas of expert authority and bias; relations between experts and non-experts; science and technology in popular culture; science and technology policy; implications of emerging technologies such as genetic engineering and the Internet for civil rights, moral values, and democracy.

POL 169D. Latino/a Politics. 3 Units
Prerequisite(s): GOVT 1
Term Typically Offered: Fall, Spring

Systematically and analytically examines the predominant political trends, concepts, and policies presently impacting Latino/a communities. Includes such topics as an examination of Latino/a identity, immigration and citizenship, political organization and participation, and relationships with other minority groups in the United States.

POL 170. Public Policy Development. 3 Units
Prerequisite(s): GOVT 1 or GOVT 150 and GWAR Certification before Fall 09, or WPJ score of 70+, or at least a C- in ENGL 109M or ENGL 109W.
Term Typically Offered: Fall, Spring

Examines the policy development process in the U.S. by exploring the ideological predispositions of the American public, the analytical approaches applied to policy development and assessment, and the institutional and political environment in which policy is made. Typically, the understanding derived from this examination is applied to several policy issues of current interest.

POL 171. Environmental Politics and Policy. 3 Units
Term Typically Offered: Spring only

Politics of human interaction with land, air and water. Political analysis of agenda setting, policy formation and administration (national, state, and local) of environmental programs. Focus on contemporary issues such as energy alternatives, management of toxics, land development, and pollution control. Cross Listed: ENVS 171; only one may be counted for credit.

POL 180. California State and Local Government. 3 Units
General Education Area/Graduation Requirement: California State & Local Government, GE AREA D
Term Typically Offered: Fall, Spring, Summer

California state, city and county politics and government. Comparisons with governments in other states. Meets State requirements in California State and Local Governments. Permits students who have fulfilled U.S. Constitution requirement in another state to meet graduation requirements for California State and Local Governments.

POL 181. Comparative State Government. 3 Units
Prerequisite(s): GOVT 1 or GOVT 150.
Term Typically Offered: Spring only

Examines the political diversity of the fifty states, with special attention paid to variations in state governing institutions. Topics covered include legislatures, governors, judiciaries, political parties, interest groups, elections, direct democracy, and state budget procedures.

POL 182A. Sem Calif Govt+Politics. 3 Units
Term Typically Offered: Spring only

Open to selected students from each of the 20 CSU campuses, the Sacramento Semester program provides students with an opportunity to spend the semester studying and working directly in California State government. Participating students work as interns at the State Capitol for 25 or more hours each week. Interns are placed in legislators' offices, with legislative committees, party caucuses, lobbyists and interest groups, or in various executive, administrative, and judicial agencies. In addition to the internships, students participate in an academic seminar, California Government and Politics. The seminars frequently include as resource persons individuals who work in key policy-making positions in the state government.

POL 182B. Sem Calif Govt+Politics. 3 Units
Term Typically Offered: Spring only

Open to selected students from each of the 20 CSU campuses, the Sacramento Semester program provides students with an opportunity to spend the semester studying and working directly in California State government. Participating students work as interns at the State Capitol for 25 or more hours each week. Interns are placed in legislators' offices, with legislative committees, party caucuses, lobbyists and interest groups, or in various executive, administrative, and judicial agencies. In addition to the internships, students participate in an academic seminar, California Government and Politics. The seminars frequently include as resource persons individuals who work in key policy-making positions in the state government.
POLS 184. Introduction to Urban Politics. 3 Units
Prerequisite(s): GOVT 1 or GOVT 150
Term Typically Offered: Fall only

Problems of urban areas and proposed solutions; politics and government. May be offered as lecture-discussion class or as a seminar. Field study may be required.

POLS 195A. Internship. 1 - 6 Units
Prerequisite(s): GWAR certification before Fall 09, WPJ score of 70+, or at least a C- in ENGL 109 M/W. Minimum GPA of 2.5 (both in the major and overall).
Term Typically Offered: Fall, Spring, Summer
Credit/No Credit

POLS 195B. Internship Sacramento Semester. 1 - 6 Units
Prerequisite(s): Minimum GPA of 2.5 (both in the major and overall).
Term Typically Offered: Spring only
Credit/No Credit

POLS 195D. Internship - Washington DC. 6 Units
Prerequisite(s): GWAR certification before Fall 09, WPJ score of 70+, or at least a C- in ENGL 109 M/W.
Term Typically Offered: Fall, Spring
Credit/No Credit

POLS 198A. Odyssey Peer Advisers. 1 - 3 Units
Prerequisite(s): Instructor permission
Term Typically Offered: Fall, Spring

Provides individualized learning opportunities (1-3 units per semester) for engaging in peer advising along with elective activities such as tutoring, assisting faculty with research, event planning and other activities of a comparable nature. Students should be upper division students or graduate students. The units may not be applied towards unit requirement of the Government major, Government IR and Government/Journalism.
Note: This course may be repeated up to a total of six units.
Credit/No Credit

POLS 198B. Peer Advising by Odyssey. 1 Unit
Prerequisite(s): Instructor permission
Term Typically Offered: Fall, Spring

Provides opportunity for lower division students, students on probation, and newly declared majors to be mentored by more advanced upper division students or graduate students. This peer advising will help students meet academic deadlines, achieve academic success, become engaged in campus activities and integrated into the Government Department. Units may not be applied towards unit requirement of the Government major, Government IR and Government/Journalism.
Note: This course may be repeated one time only for unit credit.
Credit/No Credit

POLS 199. Independent Studies. 1 - 3 Units
Prerequisite(s): GOVT 1 or equivalent, and nine units upper division government courses.
Term Typically Offered: Fall, Spring

Permits a student to pursue study and research in an area not otherwise available through the regular curriculum. Open only to upper division Government majors with at least a 3.0 GPA in the major.
Credit/No Credit

POLS 200. Method and Scope in Political Science. 3 Units
Prerequisite(s): STAT 1 or its equivalent.
Term Typically Offered: Fall, Spring

Introduction to the philosophy of science, and the scope and methods of empirical research in political, social, and policy science. In the area of philosophy of science, focuses on the logic of scientific inquiry, theory testing and confirmation and causal explanation. In the area of scope and methods, critically examines the scientific merits of several competing approaches to the study of politics and policy, as well as some of the major methodological controversies and debates in the literature.

POLS 201. Writing in Political Science. 3 Units
Term Typically Offered: Fall, Spring

A graduate-level seminar which introduces students to the research and literature in major fields in political science. Explores the norms of writing across the political science discipline, including for example: formal academic writing, policy writing, persuasive advocacy writing, methodological writing, and peer review. Broadly examines the literature from International Relations, Comparative Politics, American Politics, Political Theory, and Methods.

POLS 210. Political Theory. 3 Units
Prerequisite(s): An upper division course in the field and/or instructor permission.
Term Typically Offered: Fall, Spring

Historical and social roots, democratic or authoritarian ideologies; the conflict of ideologies; philosophic approaches.
Note: May be repeated for credit with permission of Graduate Coordinator.

POLS 213. Special Topics in American Political Thought. 3 Units
Term Typically Offered: Fall, Spring

A class examining the historical and philosophical discourse in America on central topics of debate, such as the meaning of citizenship, civil society, democracy, federalism, religion, and civil rights open to both advanced undergraduates and graduate students.
Note: Undergraduates are strongly encouraged to have completed GOVT 113 or an equivalent course.

POLS 218. Special Topics in International Political Thought. 3 Units
Term Typically Offered: Fall, Spring

A class examining the philosophical underpinnings and the theatrical problems of central concepts and problems in international relations, including human rights, intercultural dialogue, problems of just war and international justice through a study of historical and contemporary texts open to both advanced undergraduates and graduate students.
Note: Undergraduates are strongly encouraged to have completed GOVT 118 or an equivalent course.

POLS 219. Specialized Studies in Political Theory. 3 Units
Prerequisite(s): Instructor permission.
Term Typically Offered: Fall, Spring

Makes it possible for political theory students to deal with questions which theorists have asked, and to attempt to answer such questions for themselves.
Note: May be repeated for credit with permission of Graduate Coordinator.
POLS 230. Theories of International Relations. 3 Units
Prerequisite(s): Upper division course in the field and/or instructor permission.
Term Typically Offered: Fall, Spring
Examination of the theory and practice of international relations including such subfields as international law, international organization, foreign policy and national security policy.
Note: May be repeated for credit with permission of Graduate Coordinator. Cross Listed: IA 210; only one may be counted for credit.

POLS 236. Seminar in International Political Economy. 3 Units
Prerequisite(s): An upper division course in the field and/or instructor permission.
Term Typically Offered: Fall, Spring
This seminar is a graduate-level introduction to the theory and substance of international political economy (IPE). It examines the various theoretical approaches to IPE; considers the role of trade, money, and finance in the international political economy; analyzes the pattern and structure of global production, with an emphasis on multinational corporations; surveys international development issues, including Third World economic development strategies, the debt crises, structural adjustment, and economies in transition; and investigates the politics of globalization.
Cross Listed: IA 221; only one may be counted for credit.

POLS 239. Globalization and International Relations. 3 Units
Prerequisite(s): An upper division course in international relations or instructor permission.
Term Typically Offered: Fall, Spring
Introduction to the theories and substance of globalization. It examines alternative theories of globalization; considers globalization's political impact on the territorial state, regionalism, the welfare state, the military, immigration, and the environment; investigates the politics of the anti-globalization backlash; and concludes with an assessment of the future political trends of globalization.
Cross Listed: IA 230; only one may be counted for credit.

POLS 240. Comparative Government and Politics. 3 Units
Prerequisite(s): Advanced course in the field.
Term Typically Offered: Fall, Spring
Advanced study of some of the world's governmental and political systems. May focus on single countries, groups of countries or general categories of systems. Considers theoretical concept and methodology.
Note: May be repeated for credit with permission of Graduate Coordinator. Cross Listed: IA 222; only one may be counted for credit.

POLS 249A. Middle East Politics and the United States. 3 Units
Prerequisite(s): Instructor permission.
Term Typically Offered: Fall, Spring
Graduate introduction to politics and governments of the Middle East and the impact of the United States foreign policy in the region. Relies on a comparative frame to tease out the causes of intrastate and interstate conflicts in the region, as well as the effects of the American foreign policy on the contemporary political trends in the Middle East, including those relating to the Arab-Israeli conflict, Islamic political resurgence, and terrorism.

POLS 250. Basic Issues of American Government. 3 Units
Prerequisite(s): An upper division course in the field and/or instructor permission.
Term Typically Offered: Fall, Spring
Exploration in-depth of topics such as federalism, executive-legislative relationships, problems of representation, government reorganization, congressional reform, the electoral process.
Note: May be repeated for credit with permission of Graduate Coordinator.

POLS 270. Political Behavior and Political Processes: California and Beyond. 3 Units
Term Typically Offered: Fall, Spring
Course will explore public opinion, voting behavior, representation and political psychology with special focus on California.
Note: Undergraduates may take the course with instructor permission.

POLS 280. California Politics. 3 Units
Term Typically Offered: Fall, Spring
Advanced study of California's state and local governments, with emphasis on political history, political institutions, and the role of direct democracy on the state's government, budget and politics. Demographic and geographic elements will be scrutinized through a political focus. California's policy and political process will also be examined, as well as discussion of various political reforms.
Note: Undergraduates may take the course with instructor permission. Prerequisite

POLS 281. Comparative State Government. 3 Units
Term Typically Offered: Fall, Spring
Examines state political institutions and processes. Special attention will be paid to how the political variation among the states shapes processes and outcomes. Topics covered will include governors, legislatures, interest groups, public opinion, political parties, and elections.

POLS 284. Urban Politics. 3 Units
Term Typically Offered: Fall, Spring
In-depth exploration of the socio-economic problems of urban and metropolitan areas and an evaluation of proposed political and governmental solutions.
Note: May be repeated for credit with permission of Graduate Coordinator. Cross Listed: PPA 284; only one may be counted for credit.

POLS 293A. Senate Fellows Introductory Seminar. 3 Units
Term Typically Offered: Fall, Spring
Critical analysis and examination of the operation of the State Capitol and the larger political environment of political parties, interest groups, and public opinion.
Note: Open only to students admitted to the California Senate Fellows Program.

POLS 293B. Senate Fellows Policy Seminar. 3 Units
Term Typically Offered: Fall, Spring
Seminar will analyze procedural issues and public policy questions within the State Senate, legislature, and contemporary California politics.
Note: Open only to students admitted to the California Senate Fellows Program.
Program Description

The International Relations major complements a student's liberal arts education with an emphasis on understanding the theoretical and practical aspects of government and politics with a focus on global politics. The International Relations major is structured to provide students with a background in the basic fields of political science with an emphasis on the fields of Comparative Politics and International Politics, as well as to permit them to take supporting courses in a range of other disciplines with foci on politics and cultures in regions outside the United States and in the international system.

Minimum GPA Requirement

Students are required to maintain a minimum 2.0 GPA.

---

1. To help you complete your degree in a timely manner and not take more units than absolutely necessary, there are ways to use single courses to meet more than one requirement (overlap). For further information, please visit the General Education page (p. 1103).

2. Required in Major; also satisfies GE.

3. Department offers students a “select from the following” option:
   - If student chooses to take HIST 105, HIST 142, or WGS 121 they will meet upper division Area C.

4. Department offers students a “select from the following” option:
   - If student chooses to take ETHN 137, HIST 138A, HIST 141, HIST 143B, HIST 143B, POLS 134, POLS 141, POLS 142, POLS 143, POLS 144, POLS 147, POLS 148, SOC 162, SOC 163, SOC 164, or WGS 139 they will meet upper division Area D.

---

1. POLS 150 or an AP Test of 3 or above in AP American Government may be used in place of POLS 1 to satisfy the requirement.

2. Course also satisfies General Education (GE)/Graduation Requirement.

3. 21 of the 24 elective units must be upper division.

Note:
- POLS 35 may be taken to satisfy 3 elective units all others must be selected from Government courses numbered from 130 through 149. Students may also include POLS 118, POLS 119A, POLS 127, POLS 162, and POLS 166 as electives. Up to nine (9) units of work in classes in other disciplines that have an international relations/comparative politics content can be used to satisfy the requirements of the major. Approved classes are listed above.
- The Department strongly recommends that students select elective courses that include both thematic areas, such as globalization, internal organizations, and security studies, as well as regional concentrations such as Africa, Asia, Europe, Latin America, and the Middle east.
- If a student has not taken POLS 1 or its equivalent, then POLS 150 or a score on the AP American Government Exam of 3 or above may count as the prerequisite for the major.
Race and Ethnicity in American Society (RE) 4

Foreign Language Proficiency Requirement 5

1 To help you complete your degree in a timely manner and not take more units than absolutely necessary, there are ways to use single courses to meet more than one requirement (overlap). For further information, please visit the General Education page (p. 1103). Note: There is no way to list all possible overlaps so please consult with a professional advisor. The Academic Advising Center can be visited online (http://www.csus.edu/acad/), by phone (916) 278-1000, or email (advising@csus.edu).

2 Required in Major; also satisfies Graduation Requirement.

3 Department offers students a "select from the following" option:
   • If student chooses to take HIST 105, HIST 138A, or HIST 138B they will meet the Writing Intensive (WI) Graduation Requirement.

4 Department offers students a "select from the following" option:
   • If student chooses to take POLS 141 they will meet the Race and Ethnicity (RE) Graduation Requirement.

5 If not satisfied before entering Sacramento State, it may be satisfied in General Education Area C2 (Humanities). "C" or better required." The alternative methods for satisfying the Foreign Language Proficiency Requirement are described here: https://www.csus.edu/college/arts-letters/world-languages-literatures/foreign-language-requirement.html (https://www.csus.edu/college/arts-letters/world-languages-literatures/foreign-language-requirement.html

BA in Political Science

Units required for Major: 42
Total units required for BA: 120

Program Description

The Political Science major complements a student's liberal arts education with an emphasis on understanding the theoretical and practical aspects of government and politics. The department offers a BA in Political Science, a MA in Political Science-Journalism, and the minor in Political Science. The Political Science major is structured to provide students with a comprehensive background in the basic fields of political science, as well as to permit them a range of choice in completing the program. The Political Science Department offers several courses integral to interdisciplinary programs such as California Studies, Environmental Studies, Ethnic Studies, Peace and Conflict Resolution Studies, and Women's Studies.

The department emphasizes its expectation that students seek faculty advice when planning their program. Students may ask any faculty member's assistance initially. As specific interests are developed, students may wish to seek the advice of faculty sharing their interests.

Note: Although it is not a requirement of the major, the department strongly recommends that students take an introductory statistics course as part of their undergraduate work. A course in statistics may be used to satisfy the GE requirement in mathematics.

Minimum GPA Requirement

Students are required to maintain a minimum 2.0 GPA in the Major.

Electives (21 Units)

Select 21 units 5

Total Units 42

1 POLS 150 or a score of 3 or higher on the AP American Government Exam may be used in place of POLS 1 to satisfy the requirement.

2 Course also satisfies General Education (GE)/Graduation Requirement.

3 The Department recommends students take no more than two of these required courses a semester.

4 POLS 170 should be taken in the final year of a student's undergraduate work.

5 18 of the 21 elective units must be upper division even though all 21 required elective units may be satisfied with upper division courses. POLS 10 and POLS 35 may be taken to fulfill 3 lower division units of the elective requirement.

Select courses from the following Fields below. A seminar and/or internship is strongly recommended.

• Political Theory
• Public Law and Judicial Studies
• International and Comparative Politics
• American Governments, Politics and Policy

These courses must be selected in consultation with an advisor from the Political Science Department.

Notes:

• POLS 150 may not be counted as an elective toward the major, but may be used in place of POLS 1 or as its equivalent as a prerequisite;
• Students may take a maximum of 6 units of a POLS 195 (Internship) within the major, but may use no more than 3 of those units to complete the 36 units of required upper division work.
• Students should be aware that the Department offers a concentration in International Relations that is distinct from a field emphasis within the major. See complete International Relations Concentration description.

3 If not satisfied before entering Sacramento State, it may be satisfied in General Education Area C2 (Humanities). "C- or better required." The alternative methods for satisfying the Foreign Language Proficiency Requirement are described here: [https://www.csus.edu/college/arts-letters/world-languages-literatures/foreign-language-requirement.html](https://www.csus.edu/college/arts-letters/world-languages-literatures/foreign-language-requirement.html)

### BA in Political Science and Journalism

**Units required for Major: 51**

**Total units required for BA: 120**

#### Program Description

A unique interdisciplinary program that spans the combined areas of Political Science and Journalism.

The University's association with the Washington Center makes it possible for California State University, Sacramento students to undertake an internship in Washington, D.C. There are many opportunities for Government-Journalism majors to do an internship to meet their unique interests through this program.

**Note:** Political Science and Journalism majors should have both an advisor in the Political Science Department and a Journalism Advisor in the Communication Studies Department.

#### Minimum Grade Requirement

Majors must complete each required lower and upper division Journalism course with a grade of "C-" or better.

1. To help you complete your degree in a timely manner and not take more units than absolutely necessary, there are ways to use single courses to meet more than one requirement (overlap). For further information, please visit the General Education page (p. 1103).
2. Required in Major; also satisfies Graduation Requirement.
3. If not satisfied before entering Sacramento State, it may be satisfied with a professional advisor. The Academic Advising Center can be visited online (http://www.csus.edu/acad/), by phone (916) 278-1000, or email (advising@csus.edu).

Note: There is no way to list all possible overlaps so please consult with a professional advisor. The Academic Advising Center can be visited online (http://www.csus.edu/acad/), by phone (916) 278-1000, or email (advising@csus.edu).

### Capital Fellows Certificate in Applied Policy and Government

- **Units required for Certificate:** 6

### Program Description

Political Science, or Government, is devoted to study of the theory and practice of government and politics. The Political Science Department at Sacramento State offers courses in several fields of study, including: Political Theory; American Politics; Public Law; International Relations; Comparative Politics; and Public Policy. Over 70 courses cover all the major aspects of political science. Lower division courses satisfy General Education requirements and help to prepare students for advanced work.
Admission Requirements
Accepted to one of the four Capital Fellows Programs: Assembly, Judicial Administration, Executive, or Senate.

MA in Political Science (California and its Political Environment)

Total units required for MA: 30

Program Description
The Master of Arts program in Political Science is designed to orient the student toward critical investigation of problems in government and politics, and to improve the student's ability for independent study. This program is of special value to teachers of government in the public schools, to persons who contemplate public service or politics as a career, and to persons planning additional graduate study leading to the doctorate. The Political Science Department Graduate Coordinator acts as advisor to graduate students and should be consulted early in each student's program of graduate study.

Note: Because most graduate students work during the day, graduate courses are offered in the evening hours.

Admission Requirements
Admission as a classified graduate student in Political Science requires:

- a baccalaureate degree;
- a minimum 3.0 GPA in the last 60 units attempted and 3.0 GPA in the major;
- a satisfactory score on the aptitude portion of the Graduate Record Examination (the Department expects the student to achieve at least the 50th percentile in the combined verbal/analytic score);
- three letters of recommendation from individuals who can evaluate the applicant's potential for successful graduate study;
- a written statement explaining the applicant's purposes and goals in pursuing a master's degree in Political Science; and

- an example of written work which the applicant considers evidence of his/her best scholarship regardless of the grade received.

Applicants who have deficiencies in Admission Requirements that can be removed by specified additional preparation may be admitted to the degree program with conditionally classified graduate status. Students with an undergraduate major in any subject may be accepted; no minimum number of units in Government/Political Science is required. However, if a student's preparation in the field of government or political science is not adequate preparation for graduate study, he/she may be asked to complete some additional coursework before becoming classified. Any deficiencies will be noted on a written response to the student's admission application. No upper division prerequisite courses required as a condition of classification can be counted towards the degree requirement.

Admission Procedures
Applications are accepted as long as room for new students exists. All prospective graduate students, including Sacramento State graduates, must file the following with the Office of Graduate Studies, River Front Center 215, (916) 278-6740:

- an online application for admission;
- one set of official transcripts from all colleges and universities attended, other than Sacramento State; and
- Graduate Record Examination scores, aptitude portion only.

For more admissions information and application deadlines please visit the Office of Graduate Studies website.

At the same time, each applicant should submit the following supplemental application:

- the three letters of recommendation;
- the applicant's written statement of purposes and goals; and
- the example of the applicant's best written work.

Approximately six weeks after receipt of all items listed above, a decision regarding admission will be mailed to the applicant.

Minimum Units and Grade Requirement for the Degree
Units required for the MA: 30

Minimum Cumulative GPA: 3.0 with no grade below a "C" (not a "C-.").

Advancement to Candidacy
Each student must file an application for Advancement to Candidacy indicating a proposed program of graduate study. This procedure should begin as soon as the classified graduate student has:

- removed any deficiencies in admission requirements;
- completed STAT 1 or its approved equivalent, a prerequisite to the program (does not count towards the degree) which must be taken before POLS 200;
- completed at least 12 units in the graduate program with a minimum 3.0 GPA;
- taken the Writing Placement for Graduate Students (WPG) or taken a Graduate Writing Intensive (GWI) course in their discipline within
the first two semesters of coursework at California State University, Sacramento or secured approval for a WPG waiver; and
  • submitted a thesis prospectus (if the student elects to do a thesis).

Advancement to Candidacy forms are available on the Office of Graduate Studies website. The student fills out the form after planning a degree program in consultation with a Political Science Department advisor. The completed form is then returned to the Office of Graduate Studies for approval.

Total Units 30

1 Three additional courses which may be completed from graduate seminars in the Department, from 200-level courses in related fields (6 units allowed with graduate coordinator’s prior approval), from POLS 295 (3 units allowed), and/or from POLS 299 (6 units allowed). However, a maximum of 6 units of POLS 295 and/or POLS 299 may be applied to the MA. Of these twelve units, up to 6 units may be in 100-level courses within the Political Science Department, chosen from a pre-approved list compiled by the graduate coordinator. Up to six units of coursework from the graduate fellows programs (Assembly Fellow, Executive Fellow or Senate Associates Program) can be counted towards the degree.

2 By the time of Advancement to Candidacy, students must enroll in POLS 500 and choose either of the following options:
  • Plan A: Masters Thesis
  • Plan B: Comprehensive Exam (Students will take one exam in their area of emphasis and demonstrate a general comprehensive in that area)

Note: Students are not permitted to enroll in the culminating experience until they have Advanced to Candidacy, obtained a sponsor for their thesis, and received the approval of the Graduate Coordinator.

Select 15 units of political science courses 1

Total Units 15
No more than six units may be lower division. Students may count as many as (6) units of a POLS 195, or (3) units of a POLS 195 and (3) units of POLS 199 toward completion of the minor.

POLS 1 (or its equivalent) or POLS 150 may count as the prerequisite for the minor; however, if POLS 150 is used as the prerequisite, it will not count toward the 15 units of upper division government courses required. POLS 150 cannot count as an elective for the minor.

Note: Students are permitted to repeat upper division courses a maximum of two times.

Psychology
College of Social Sciences and Interdisciplinary Studies

Program Description
Psychology is the scientific study of human and animal behavior, cognition, and emotion. It is a broad discipline that includes both basic research and the application of research findings to everyday life. The Sacramento State Psychology Department offers an undergraduate major and minor in Psychology and an undergraduate certificate in Applied Behavior Analysis. In addition, there are graduate programs in Applied Behavior Analysis, Industrial-Organizational Psychology, and General Psychology, which includes a broad representation of psychology research areas and interests. At both the undergraduate and graduate levels, students may choose coursework, fieldwork, and research experiences that allow them to emphasize such areas as Applied Behavior Analysis, Clinical Psychology, Cognitive Psychology, Community Psychology, Cultural Psychology, Developmental Psychology, Industrial-Organizational Psychology, Neuroscience, Personality, and Social Psychology.

The Psychology program at Sacramento State is highly sought after and the undergraduate major is now officially impacted. Students wishing to become Psychology majors must meet eligibility requirements before applying for admission to the program. It is highly recommended that interested students speak with a Psychology advisor as soon as possible.

Degree Programs
Certificate in Behavior Analysis (p. 1071)

Minor in Psychology (p. 1076)

BA in Psychology (p. 1069)

MA in Psychology (General Psychology) (p. 1073)

MA in Psychology (Industrial-Organizational Psychology) (p. 1074)

MS in Applied Behavior Analysis (p. 1076)

Special Features
- The Psychology Department is housed in Amador Hall and contains extensive human and animal research facilities.
- The Psychological Services Center provides excellent learning opportunities for students in Applied Behavior Analysis. The six-room suite is equipped for audio and video recording of research sessions and a kitchenette for studies with children diagnosed with feeding difficulties.
- Available facilities support operant and neuroscience research with animals, including a rodent colony as well as equipment for behavioral procedures, histological techniques, and neurophysiological recordings.
- Computer labs are available for data collection, analysis, and teaching.
- The Psychology Department maintains close ties with the Sacramento community. Each year students conduct research projects or fieldwork in various community organizations and state agencies.
- Students are able to take independent study courses in Applied Behavior Analysis, Clinical Psychology, Cognitive Psychology, Cultural Psychology, Developmental Psychology, Industrial-Organizational Psychology, Neuroscience, Perception, and Social Psychology.
- The Prospects Peer Mentoring and Advising Program allows students to give and receive information and support regarding academic and career planning.
- Our Annual Psychology Department Research Conference showcases student and faculty research projects for the campus community, providing professional development opportunities for students.
- Several student organizations are involved in extracurricular activities: Psi Chi, Psychology Society, and the Student Association for Applied Behavior Analysis.

Career Possibilities
Individuals with a Bachelor of Arts
Administrative Service Manager · Admissions Counselor · Behavior Specialist · Community Service Manager · Employee Assistance Program Associate · Health Educator · Human Factors Specialist · Management Analyst · Market Research Analyst · Mental Health Worker · Public Relations Specialist · Sales Manager · Sales Representative · Victim Advocate.

Individuals with a Master of Arts
Autism Specialist · Behavior Analyst · Behavioral Consultant · Case Manager · Career Counselor · Community College Instructor · Human Resource Specialist · Mental Health Counselor · Personnel Analyst · Private Sector Consultant · Program Director · Psychometric Specialist · Personnel Selection Consultant · Research Analyst · Research Program Manager · Research Technician · School Consultant · Test Validation Specialist · Training and Development Specialist

PSYC 2. Introductory Psychology. 3 Units
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall, Spring
Provides a general overview of theory and research concerning psychological processes at the basic, individual and social levels. Topics will include physiological psychology, comparative psychology, learning, motivation, sensation and perception, developmental psychology, personality, social psychology, maladaptive behavior, individual differences, and selected other topics. Requires three hours of participation as a research subject.

PSYC 4. Navigating Psychology: The Major and Careers. 1 Unit
Prerequisite(s): PSYC 2 and Psychology majors only.
Term Typically Offered: Fall, Spring
Covers requirements for the major and career options in psychology and related fields. Students learn to design plans of study to meet requirements for the major and enhance career objectives. Introduces career options in various areas such as academic psychology, applied behavior analysis, counseling and mental health, education, industrial-organizational psychology and related fields. Class activities clarify students’ career goals and develop skills for job seeking and graduate education. Requires participation as a research subject.
Credit/No Credit

PSYC 8. Methods of Psychology. 3 Units
Corequisite(s): PSYC 2.
Term Typically Offered: Fall, Spring
Introduction to methods of the science of psychology. The topics include psychology as a way of knowing, the role of science in psychology, the nature of psychological research, research ethics, psychological literature and report writing, psychological measurement, and the design and analysis of case studies, survey research, field studies, correlational methods, and experimental methods. Requires three hours of participation as an experimental subject.

PSYC 9. Introductory Statistics for Psychology. 3 Units
Prerequisite(s): PSYC 2, may be taken concurrently.
Term Typically Offered: Fall, Spring
Introduction to descriptive and inferential statistics as tools for evaluating data from Psychological research. Topics include: measures of central tendency, measures of variability, correlation and regression, sampling distributions, hypothesis testing procedures including t-tests and analysis of variance. Application of hand computation will be emphasized to include the interpretation and significance of the statistical findings.

PSYC 100. Cross-Cultural Psychology. 3 Units
Prerequisite(s): PSYC 2, PSYC majors only.
Corequisite(s): PSYC 8.
Term Typically Offered: Fall, Spring
Examination of similarities and differences in human behavior, cognition, and emotion across cultures. Empirical evidence from cross-cultural research in the various areas of psychology, including biological, clinical, cognitive, developmental, social, personality, and industrial/organizational psychology, is evaluated with the purpose of developing a global perspective on the psychological processes underlying human behavior, cognition, and emotion.

PSYC 101. Statistics for Psychology. 3 Units
Prerequisite(s): Passing score on ELM; PSYC 2, PSYC 4, PSYC 8. PSYC majors only. PSYC 4 may be taken concurrently.
Term Typically Offered: Fall, Spring
Introduction to descriptive and inferential statistics as tools for evaluating data from Psychological research. Topics include: measures of central tendency, measures of variability, correlation and regression, sampling distributions, hypothesis testing procedures including t-tests and analysis of variance, and selected other topics. Application of hand computation will be emphasized to include the interpretation and significance of the statistical findings.
Plan and conduct projects using experimental, quasi-experimental and correlational methods. Evaluate published research and write proposals with attention to such issues as the reliability and validity of methods, the degree to which statistical assumptions are met, the adequacy of statistical power, and the internal and external validity of the project. Contemporary research design, measurement, and analysis techniques are examined, including the use of statistical software, for varieties of univariate and multivariate research designs. Lecture-discussion three hours; laboratory three hours.

**PSYC 103. Perception.** 3 Units

**Prerequisite(s):** PSYC 2, PSYC or CRJ majors only. PSYC 8 and PSYC 9 are recommended.

**Term Typically Offered:** Fall, Spring

Examination of how information about the outside world is sensed and how that information is organized and interpreted to form perceptions. Vision and audition will be primarily examined, along with some coverage of the other senses. Topics may include psychophysical methods, basic physiology and function of sensory systems, perception of color and form, motion, distance, auditory patterns, body and limb position, temperature, pain, perceptual constancies, attention, perceptual learning, adaptation, and perceptual development.

**PSYC 104. Learning Theories.** 3 Units

**Prerequisite(s):** PSYC 2, PSYC 8, PSYC 9, and PSYC majors only or instructor permission.

**Term Typically Offered:** Fall, Spring

Examination of classical and contemporary theories of learning, and a sampling of experimental findings which bear directly on the theories. Some attention is given to theory construction in psychology.

**PSYC 105. Motivation.** 3 Units

**Prerequisite(s):** PSYC 2; PSYC majors only or instructor permission.

**Term Typically Offered:** Fall, Spring

Study of theories and experimental findings related to basic processes in animal and human motivation.

**PSYC 106. Controversial Issues in Psychology.** 3 Units

**Prerequisite(s):** PSYC 121; Psychology majors only

**Term Typically Offered:** Fall, Spring

Consideration of unresolved issues of interest to psychology and the general public, such as the use of animals in research and mind and health. Emphasis is on critical analysis (but not solution) of the issues as they are presented in public discourse. Discussion format, written reports and evaluations.

**PSYC 107. Organizational Psychology.** 3 Units

**Term Typically Offered:** Fall, Spring

This course will provide an overview of the dynamics of human behavior in organizations, using the lens of psychological theory. Students will explore individual-, group-, and systems-level phenomena in organizations, with the overriding goal of understanding how to maximize performance, well-being, and satisfaction at work. Topics may include job attitudes, teams, organizational culture, individual differences, leadership, employee development, organizational change, occupational stress, fairness and diversity, and more.

Examination of the basic concepts of cognitive psychology, including sensory storage, pattern recognition, attention, short-term memory, long-term memory, visual imagery, semantic memory structure, text processing, problem solving and decision-making. The relations among artificial intelligence, mental modeling, and the simulation of cognitive processes will also be explored.

**PSYC 115. Introduction to Neuroscience.** 4 Units

**Prerequisite(s):** PSYC 2 and PSYC 8 or PSYC or BIO majors only. PSYC 9 recommended.

**Term Typically Offered:** Spring only

Introduction to the structure and function of the nervous system including neuroanatomy, neurophysiology, and systems neuroscience. Lectures and readings emphasize the empirical questions, techniques and methods used in neuroscience research. Laboratory activities focus on nervous system structure and some of the specialized techniques used within the fields of cellular, systems, and behavioral neuroscience. Lecture-discussion three hours; laboratory three hours.

Cross Listed: BIO 115; only one may be counted for credit.

**PSYC 116. Animal Behavior.** 3 Units

**Prerequisite(s):** PSYC 2; PSYC majors only or instructor permission.

**Term Typically Offered:** Fall, Spring

Basic principles of animal behavior including the genetic, evolutionary and ecological mechanisms underlying courtship, reproduction, aggression, territoriality, communication and parental behavior; applied aspects of animal behavior; innate or naturally occurring behavior patterns necessary for survival in the natural environment; physiological, social and acquired aspects of animal and, secondarily, human behavior.

**PSYC 117. Drugs and Behavior.** 3 Units

**Prerequisite(s):** PSYC majors only or instructor permission.

**Term Typically Offered:** Fall, Spring

Examination of the classification of psychoactive drugs and their mode of action. Covers effects of psychoactive drugs on central nervous system structure and function and on behavior; use, abuse, effects, and dangers of therapeautic and recreational drugs; motivational aspects of drug use, and methods for treating addiction.

**PSYC 118. Cognitive Neuroscience.** 3 Units

**Prerequisite(s):** PSYC 111 or PSYC 115 or PSYC 117 or BIO 132

**Term Typically Offered:** Fall, Spring

Examines how the nervous system accomplishes cognitive functioning. Brain mechanisms of higher functions such as memory, attention, sensorimotor integration, decision making, and language will be covered.
PSYC 119. Human Factors Psychology. 3 Units
**Prerequisite(s):** PSYC 2
**Term Typically Offered:** Fall, Spring

Study of the scientific application of psychology and human performance to the design of products and complex systems. Applications of perception, cognition, and human physical limitations are covered, with an emphasis on understanding how they relate to design. Topics include perception, attention, decision making, memory, action, and how they related to areas such as product design, human-machine interaction, health and medicine, aviation and aerospace, ergonomics of the workplace, and designing for special populations.

PSYC 120. Psychological Testing and Measurement. 3 Units
**Prerequisite(s):** PSYC 8; PSYC 9; PSYC majors only.
**Term Typically Offered:** Fall, Spring

Overview of the history and applications of psychological tests and assessments, including measures of mental abilities, personality, interests, and attitudes. Principles of measurement including construction of tests and assessments, alternative formats, methods for administration and scoring, analyzing items and the reliability of scores, and evaluating evidence regarding the validity of score interpretations.

PSYC 121. Methods and Statistics in Psychological Research. 3 Units
**Prerequisite(s):** PSYC 4 (may be taken concurrently), PSYC 8, and PSYC 9; PSYC majors only.
**Term Typically Offered:** Fall, Spring

Project-based experience of Psychology. Study of scientific processes in research such as literature reviews; developing testable hypotheses; design; IRB review; data collection, analysis, and interpretation; critical analysis of studies; APA paper preparation; and issues in dissemination. Study of some advanced statistical processes such as factorial ANOVAs, planned and post hoc comparisons, and multiple regression. Study of statistical software programs used in the analysis of data.

PSYC 122. Qualitative Research in Psychology. 3 Units
**Prerequisite(s):** PSYC 121 and PSYC majors only.
**Term Typically Offered:** Fall, Spring

Examines the philosophy underpinning the use of qualitative research and the methods and analyses strategies used in qualitative research. Methods may include interviews, focus groups, participant observation, and behavioral observation. Analyses strategies may include grounded theorizing, negative case analyses, developing case studies, and content coding. Issues pertaining to data accuracy and consistency will be examined, and the researcher’s role in interpreting results. Students will complete research projects involving the collection and/or analyses of qualitative data.

PSYC 123. Program Evaluation. 3 Units
**Prerequisite(s):** PSYC 8, PSYC 9, PSYC 100; psych majors only
**Term Typically Offered:** Fall, Spring, Summer

This course develops knowledge and skills in empirical research methods as applied to program evaluation. Students gain and practice skills needed to assist community service providers, state agencies, and other organizations to evaluate and improve programs and interventions. Students design program evaluation proposals that utilize psychological research techniques to support organizational effectiveness. Students learn to tailor program evaluations to the mission of an organization or purpose of an intervention, such as the promotion of social justice, well-being, and/or other goals.
PSYC 142. Community Psychology. 3 Units
Prerequisite(s): PSYC 121 and PSYC majors only.
Term Typically Offered: Fall, Spring

This course is designed to introduce you to the field of community psychology, which is concerned with the scientific study of social problems through collaborative research. This course will provide you with ecological frameworks that aim to reduce social problems (e.g., poverty, mental illness and others) as well as core values of community well-being, empowerment, and collaboration. You will be exposed to prevention and intervention programs employed to solve social concerns as well as potential implications for practice and policy.

PSYC 143. Practicum in Community Psychology. 3 Units
Prerequisite(s): Junior or Senior standing, Psychology majors and/or Peace Corps Prep certificate only, and instructor permission obtained through approval of an application the semester prior.
Term Typically Offered: Fall, Spring

Classroom and on-site experience in community psychology. Students will complete 60 hours of service learning experience related to their community organization with supervision by authorized persons at the organization. Students will also attend class meetings to discuss the application of concepts in community psychology to their service learning experience. Topics include: ethics, structure and capacity of community organizations, working with diverse populations, and professional relationships.

Note: Enrolling in or completing PSYC 142 is preferred, but not required, and Seniors will be prioritized for enrollment before Juniors.

PSYC 145. Social Psychology. 3 Units
Prerequisite(s): PSYC 2.
Term Typically Offered: Fall, Spring

Empirical examination of the emotion, behavior, and cognition of individuals in social situations. Topics can include: social psychology methods, social perception, social cognition, attitudes, persuasion, social identity, gender identity, prejudice and discrimination, interpersonal attraction, close relationships, conformity, compliance, obedience to authority, helping behavior, aggression, group processes, and social psychology applications. Multiple perspectives discussed.

PSYC 148. Child Psychology. 3 Units
Prerequisite(s): PSYC 2.
Term Typically Offered: Fall, Spring

Examination of behavioral and physiological development during the prenatal period, and behavioral, cognitive and social development during infancy and childhood. Theories, methods and empirical research will be studied.

PSYC 149. Psychology of Adolescence. 3 Units
Prerequisite(s): PSYC 2.
Term Typically Offered: Fall, Spring

Growth and development during the adolescent period and the interrelationships between adolescents and their culture are studied. Physical, psychological, social and educational problems and their implications are considered.

PSYC 150. Psychological Aspects of Aging. 3 Units
Prerequisite(s): PSYC 2.
Term Typically Offered: Fall, Spring

Developmental study of human aging emphasizing psychosocial, psychopathological, biological, intellectual and personality processes from a theoretical and research-oriented perspective. Influences including culture, gender, gender identity, race, ethnicity, sexual orientation, and socio-economic status on aging are examined.

PSYC 151. Psychological Aspects of Death and Dying. 3 Units
Prerequisite(s): Student’s academic level must be Junior or higher to enroll in this class.
Term Typically Offered: Fall, Spring

Examination of the beliefs, attitudes, and behaviors associated with death and dying. Topics covered include children’s and adults’ concepts of dying and death; causes and types of death; self-destructive behavior; grief and mourning in the dying person and their survivors; physician aid in dying and other legal and ethical issues; and cross-cultural and historical perspectives on death.

Cross listed: GERO 124

PSYC 152. Psychological Aspects of Health, Wellness, and Illness. 3 Units
Prerequisite(s): PSYC 2 and PSYC 8.
Term Typically Offered: Fall, Spring

Examines social, psychological, and behavioral factors important for physical health and emotional well-being. Psychological perspectives are applied to such topics as behavioral medicine, health promotion and compromise, the stress-illness relationship, social relations, personality, emotions, chronic illness, death and dying, and health care provider and patient interactions. Explores the development of health problems and the causes of premature death, as well as research on how psychology can help people live longer, healthier lives.

PSYC 153. Political Psychology. 3 Units
Term Typically Offered: Fall, Spring

Examines the ways in which political behavior is shaped by individual beliefs, personalities, cognitive patterns, biases, and other psychological mechanisms. Students will engage with a wide range of research on topics such as cognitive styles, personality, obedience, psychological roots of terrorism, the psychology of ideology, and the role of emotion in politics.

Cross Listed: GOVT 152

PSYC 157. Psychology of Women. 3 Units
Prerequisite(s): PSYC 2 or instructor permission.
Term Typically Offered: Fall, Spring

Contemporary psychological theories and issues related to the psychology of women in America and globally. Psychological theories may include but are not limited to feminism, cognitive-behavioral, self-object relations, humanistic, social learning and existential. Issues may include development, sexuality, mental health, psychotherapy, physical health, education, work, violence against women, gender inequality, multicultural perspectives, aging, parenting, criminal behavior, politics, sexual slavery, reproductive rights, religion, spirituality, and the arts.

Note: A service course for WOMS.
PSYC 160. Psychology of Sexual Orientation and Gender Identity. 3 Units
Prerequisite(s): PSYC 2. Psychology major, Psychology minor, LGBTQ Studies minor, or Peace Corps Prep Certificate
Term Typically Offered: Fall, Spring
This course explores the landscape of contemporary psychological research on gender and sexual diversity with a focus on the identities and experiences of lesbian, gay, bisexual, transgender, queer, intersex, and asexual people and all sexual and gender minorities. Course topics include cissexism and heterosexism, identity development and disclosure, parenting, aging, intersectionality, and minority stress, among others.

PSYC 165. Evolutionary Psychology. 3 Units
General Education Area/Graduation Requirement: Further Studies in Area B (B5)
Term Typically Offered: Fall only
Examination of empirical literature on emotion, behavior, and cognition of individuals from an evolutionary perspective. Topics can include: scientific methods in evolutionary psychology, survival strategies, mating strategies, parenting, kinship, cooperation, altruism, aggression, sexual conflict, and social dominance.

PSYC 166. Psychology in Personnel Training and Development. 3 Units
Prerequisite(s): PSYC 2.
Term Typically Offered: Fall, Spring
Application of psychological principles to problems of personnel training and development; techniques for determining training requirements, motivating trainees, providing feedback on trainee performance, and ensuring positive transfer of training to the job situation; personnel development programs.

PSYC 167. Abnormal Psychology. 3 Units
Prerequisite(s): PSYC 2.
Term Typically Offered: Fall, Spring
Detailed consideration of behavior disorders and maladaptive behavior: theories of causation, descriptions of the disorders, and strategies of various therapies.

PSYC 168. Industrial Psychology. 3 Units
Prerequisite(s): PSYC 2, PSYC 8.
Term Typically Offered: Fall, Spring
Comprehensive overview of various human resources practices and policies, with an emphasis on people's psychological reactions to them. Topics include: recruitment, employee selection, training, employee compensation, legal aspects of employment decisions, and ethics in human resource management.

PSYC 169. Applied Behavior Analysis. 3 Units
Prerequisite(s): PSYC 2 and PSYC majors or posted Behavior Analysis Certificate only, or instructor permission.
Term Typically Offered: Fall, Spring, Summer
Introduction to theory, historical background, and philosophical assumptions relevant to behavior analysis with individuals. Lectures and laboratory activities in basic principles of behavior and methodology.

PSYC 170. Behavioral Analysis. 3 Units
Prerequisite(s): PSYC 2, PSYC 8, or posted Behavior Analysis Certificate only, or instructor permission.
Term Typically Offered: Fall, Spring
Introduction to the theoretical and practical foundations of behavior analysis, focusing on the assessment, management, and evaluation of behavior. Topics include: clinical populations, behavior management, and ethical considerations.

PSYC 171. Clinical Issues in Applied Behavior Analysis. 3 Units
Prerequisite(s): PSYC 2 and PSYC majors or posted Behavior Analysis Certificate only, or instructor permission.
Term Typically Offered: Fall, Spring, Summer
Examination of complex clinical issues in applied behavior analysis, including assessment, intervention, and ethical considerations in diverse populations and settings.

PSYC 172. Special Topics Capstone: Advanced Study in Psychology. 3 Units
Prerequisite(s): PSYC 2, 4, 8, 9, must have Senior status to enroll in course.
Term Typically Offered: Fall, Spring, Summer
Examines a special topic of interest in psychology. Offered by rotating instructors, the capstone explores selected topics in psychology, and contemporary developments in theories, methodologies, and/or methods in the selected sub-discipline or topical area. Topics can include subject matter from all areas of psychology, including, but not limited to: applied behavior analysis, clinical, cognitive, community, cultural, developmental, experimental, feminist, health, industrial-organizational, neuroscience, perception, quantitative, social, etc., as well as related methodologies. Recommend prior coursework in area of focus.

Note: May be repeated for credit providing the topic and instructor are not the same.

PSYC 173. Experimental Analysis of Behavior. 4 Units
Prerequisite(s): PSYC 9, PSYC 171, and PSYC majors only.
Term Typically Offered: Fall only
Extensive analysis of single subject experimental research on intermittent reinforcement of behavior, including complex schedules, stimulus control, generalization, and verbal behavior. Lecture-discussion three hours; laboratory three hours; laboratory may include a component of self paced instruction.

PSYC 174. Teaching of Psychology. 3 Units
Prerequisite(s): Instructor permission
Term Typically Offered: Fall, Spring
Study of best practices in the Teaching of Psychology. Selected topics may include, course preparation, skills for fostering student learning, strategies for improving student writing, theories of assessment, using technology in the classroom, sensitivity to diversity, teaching special populations, and the ethical and legal issues faced in the classroom. Students attend scheduled seminars on course topics and course are mentored by a professor in the Department of Psychology (called Faculty Mentor/Sponsor). Credit/No Credit

PSYC 175. Clinical Issues in Applied Behavior Analysis. 4 Units
Prerequisite(s): PSYC 2 and PSYC 171, and PSYC majors or ABA Certificate students only
Term Typically Offered: Spring only
Extensive study of applied behavior analytic methods in the assessment, development, and implementation of treatment programs for a variety of clinical issues including pediatric behavior problems, developmental disabilities, hyperactivity, parent-child difficulties, school-related problems, behavioral safety, brain injury, and dementia. Lecture three hours; laboratory three hours.

PSYC 176. Psychology of Exceptional Children. 3 Units
Prerequisite(s): PSYC 2.
Term Typically Offered: Fall, Spring
Examines characteristics, special needs, and problems of children who differ from the group norm because of their level of abilities, physical handicaps, or other deviations.
PSYC 190. History and Systems of Psychology.  3 Units
Prerequisite(s): PSYC 9 and PSYC majors only.
Term Typically Offered: Fall, Spring

Covers the development of the various schools and systems of psychology, and their philosophical roots, interrelationships and differences. Normally taught with a seminar or proseminar format.

PSYC 191. Ethics in Behavior Analysis.  3 Units
Prerequisite(s): PSYC 171
Term Typically Offered: Fall, Spring

Classroom experience in applied behavior analysis. Students will meet in class for three hours a week to present and review relevant literature. Emphasis will be placed on ethics and professional conduct in applied behavior analysis following the BACB Professional and Ethical Compliance Code for Behavior Analysts.

PSYC 194. Cooperative Research.  1 - 6 Units
Prerequisite(s): PSYC 2, PSYC 8, and PSYC 9. PSYC 121 recommended.
Term Typically Offered: Fall, Spring

Opportunity for dedicated students interested in graduate school or a career involving research to work cooperatively on a psychological research project under faculty supervision.
Note: May be repeated once for up to 6 units of credit.

PSYC 195A. Fieldwork in the Teaching of Psychology.  1 - 6 Units
Term Typically Offered: Fall, Spring

Supervised experience in various educational and instructionally related tasks, such as leading discussion groups, setting up and presenting demonstrations, constructing and scoring tests, and tutoring, at selected educational institutions in the Sacramento area.
Note: Requires permission of instructor and the Department Chair. May be repeated once for credit.

Credit/No Credit

PSYC 195B. Fieldwork in Child Observation.  3 Units
Prerequisite(s): PSYC 148 or equivalent.
Term Typically Offered: Fall, Spring

Supervised observation of preschool children in a formal school setting.
Note: Requires permission of instructor and the Department Chair. May be repeated once for credit.

Credit/No Credit

PSYC 195C. Fieldwork in Industrial and Organizational Psychology.  1 - 6 Units
Term Typically Offered: Fall, Spring

Supervised work experience at an appropriate level in business and governmental organizations.
Note: Requires permission of instructor and the Department Chair. May be repeated once for credit.

Credit/No Credit

PSYC 195F. Fieldwork in Community Psychology.  1 - 4 Units
Term Typically Offered: Fall, Spring

Supervised experience in various community and governmental agencies, such as the Suicide Prevention Service, Planned Parenthood, and the California Youth Authority. The experience must be of an applied psychological nature, determined collectively by the agency, the supervising faculty member, and the student.
Note: Requires permission of instructor and the Department Chair. May be repeated once for credit and a third time if another agency is involved.

Credit/No Credit

PSYC 196. Psychology of Religion.  3 Units
Prerequisite(s): PSYC 2
Term Typically Offered: Fall, Spring

Introduction to psychological aspects of religion, including its foundations, measurement, and research methods. Selected topic areas include: religious & spiritual development; religion and spirituality in neuroscience, cognitive psychology, emotion, personality, social psychology, and cross-cultural psychology; religion and spirituality in health, mental health, coping, and psychotherapy.

PSYC 196T. Black Psychology.  3 Units
Prerequisite(s): PSYC 2
Term Typically Offered: Fall, Spring

Examines the concepts, issues and theories related to the psychology of the African American experience. Through the exploration of topics related to the African American experience in the United States, including, but not limited to, African philosophy, the US Census, media representations, language, and political enfranchisement, the course utilizes an interdisciplinary approach to interrogate the cultural, historical, political, and social factors influencing Black identity in the US and the creation of Black Psychology.

PSYC 196U. Psychology of Happiness.  3 Units
Prerequisite(s): PSYC 2
Term Typically Offered: Fall, Spring

Examines the scientific study of human happiness from a psychological perspective that includes its foundations, measurement, research methods, theories, and recent advances in the literature. Explores the correlates, predictors, and consequences of happiness at the individual and cultural levels. Topics include benefits of being happy; the roles of age, gender, culture, genes, personality, life circumstances, income, health, and social relationships in happiness; cultural comparisons in happiness; and happiness interventions (i.e., how to increase and sustain happiness).
PSYC 197A. Advanced Research I. 1 - 4 Units
Prerequisite(s): PSYC 194 and permission of instructor and Department Chair. Graded; 1 - 4 units.
Term Typically Offered: Fall only
Advanced research opportunity for students who have completed previous research experiences in PSYC 194. Students in the course are expected to develop advanced skills in research methods, data management, data analysis, and the communication of research findings by conducting research on collaborative projects under the guidance of a psychology faculty supervisor.

PSYC 197B. Advanced Research II. 1 - 4 Units
Prerequisite(s): PSYC 197A and permission of instructor and Department Chair. Graded; 1 - 4 units.
Term Typically Offered: Fall, Spring
Advanced research opportunity for students who have completed previous research experiences in PSYC 197A. Students in the course are expected to demonstrate competence in advanced research skills in research methods, data management, data analysis, and the communication of research findings by conducting research on collaborative projects under the guidance of a psychology faculty supervisor.

PSYC 198A. Prospects for Success: Peer Mentee. 1 Unit
Term Typically Offered: Fall, Spring
Provide psychology majors with information and experiences necessary for developing academic goals, skills, and better understanding of the Psychology major. Weekly meetings with peer mentors to discuss topics that include academic planning, website navigation, preparation for meeting with professors, academic skills, student professionalism and resume/CV development.
Note: May be repeated for credit

PSYC 198B. Prospects for Success: Peer Mentor. 2 - 3 Units
Prerequisite(s): PSYC 4 and permission from instructor
Term Typically Offered: Fall, Spring
Provide peer mentoring and advising to Psychology majors. Develop peer mentoring knowledge and skills through training and assigned readings. Peer mentors provide psychology majors with information and experiences necessary for developing academic goals, skills, and a better understanding of the Psychology major. Conduct weekly mentee meetings to discuss topics that include academic planning, website navigation, preparations for meetings with professors, academic skills, student professionalism and resume/CV development.

PSYC 199. Special Problems. 1 - 6 Units
Term Typically Offered: Fall, Spring
Individual projects or directed reading.
Note: Requires permission of instructor and the Department Chair.
Credit/No Credit

PSYC 200. Methods in Empirical Psychology. 3 Units
Prerequisite(s): PSYC 8, PSYC 101, PSYC 102.
General Education Area/Graduation Requirement: Writing Intensive
Graduation Requirement (WI)
Term Typically Offered: Fall, Spring
Philosophy of science, critical thinking in the design of research studies, and professional issues. Topics include: nature of science; observational, experimental, and case study designs; formulating research questions; measurement strategies; scaling and coding; internal and external validity; naturalism in research; quasi-experiments; archival research; physical traces; data collection; interpreting results; program evaluation; professional writing; and ethics.

PSYC 202. Survey of Contemporary Statistical Methods in Psychological Research. 3 Units
Prerequisite(s): Graduate standing; PSYC 102 or equivalent
Term Typically Offered: Fall, Spring
Broad coverage of common univariate and multivariate designs and analyses used in contemporary psychological research. Primary focus is on providing the basic tools for carrying out the analyses in statistical software and interpreting the results, as well as understanding results presented in published research reports. Topics include various ANOVA and multiple regression models and applications including related categorical and multivariate alternatives, such as logistic regression analysis, discriminant function analysis, MANOVA, path analysis, factor analysis, canonical correlation analysis.

PSYC 204. Advanced Topics in Statistical Methods for Psychological Research. 3 Units
Prerequisite(s): PSYC 202
Term Typically Offered: Fall, Spring
Advanced treatment of selected research design and analysis methods of psychological research. Applications of the general and generalized linear models (e.g., multiple regression models, structural equation models, multilevel models, and limited dependent variable models) for a variety of research designs and data structures. Intermediate to advanced training in statistical software and data management. Focus is on understanding foundations and assumptions of the methods, understanding interrelationships between the methods, performing specialized and non-routine analyses when needed, and interpreting results in detail.

PSYC 205. Measurement Methods for Psychological Research and Practice. 3 Units
Prerequisite(s): PSYC 202
Term Typically Offered: Fall, Spring
Detailed coverage of classical and modern theories and models of psychological measurement, and their applications in research and professional testing settings. Primary focus is on principles of constructing and analyzing measures, including both paper-and-pencil tests/surveys and performance-based tests that require rater judgment in scoring. Measurement models include classical testing theory, generalizability theory, confirmatory factor analysis, Rasch measurement, and item response theory.
PSYC 206. Tests and Measurement. 3 Units
Prerequisite(s): Graduate standing and PSYC 102 or its equivalent.
Term Typically Offered: Fall, Spring

Examines the administration, interpretation, and application of psychological tests used by behavioral scientists in clinical, educational, organizational, and other settings. Test development, reliability and validity, and legal considerations will be discussed.

PSYC 209. Seminar in Systems of Psychology. 3 Units
Term Typically Offered: Fall, Spring

Historical review of the systems of thought which led to modern psychology. An examination of current psychological systems and their development. Factors that differentiate psychological systems will be studied.

PSYC 210. Theories of Personality. 3 Units
Prerequisite(s): PSYC 102 or equivalent; PSYC 102 may be taken concurrently.
Term Typically Offered: Fall, Spring

Study of the role of personality theory in the field of psychology, and an examination of the current theories.

PSYC 216. Current Literature in Personnel and Organizational Psychology. 3 Units
Prerequisite(s): Course work in Personnel and Organizational Psychology; PSYC 102 or its equivalent.
Term Typically Offered: Fall, Spring

Analyzes selected current articles on theory and research in such journals as the Journal of Applied Psychology, Personnel Psychology, and Organizational Dynamics, with written and oral critiques.
Note: May be repeated twice for credit.

PSYC 216A. Current Literature and Applications in Industrial-Organizational Psychology. 3 Units
Term Typically Offered: Fall only

Seminar to review current literature in selected organizational psychology topics, and develop proposals for applied research in industrial-organizational psychology. Literature focus will be centered on personal and interpersonal factors influencing the quality of work life and experiences of employees. Application focus will be centered on identifying organizational problems amenable to research, reviewing literature and common practices to identify potential solutions, designing a research methodology to address the problem and evaluate the solution, and writing research proposals including Human Subjects Review.

PSYC 216B. Current Literature and Applications in Industrial-Organizational Psychology. 3 Units
Prerequisite(s): PSYC 216A
Term Typically Offered: Spring only

Seminar to discuss implementation of applied research proposals from the previous semester and review current literature in performance management and workforce planning systems. Application focus will be centered on understanding organizational contexts and constraints for implementing research, obtaining managerial and participant cooperation, maintaining methodological rigor in the field, systematically and objectively recording data, and preparing data for analysis. Literature focus will be centered on methods for measuring employee performance relative to objectives, understanding performance barriers, and identifying human resource needs.

PSYC 217. Seminar in Social Psychology. 3 Units
Prerequisite(s): Graduate standing
Term Typically Offered: Fall, Spring

Review of classic and contemporary theories and research in social psychology. Topics may include group dynamics, social influence, aggression, helping behavior, attitudes, dissonance and self-justification, prejudice, stereotyping, and discrimination; automaticity and social cognition, motivation, and gender. Emphasis upon the application of social psychological theories and research to social problems.

PSYC 240. Seminar in Behavioral Neuroscience. 3 Units
Prerequisite(s): Graduate standing
Term Typically Offered: Fall, Spring

Surveys the fundamental principles of Behavioral Neuroscience, the connection between the brain and behavior. Topics may include: neuroanatomy, electrochemical transmission, sites and mechanism of drug action, sensation and perception, motor systems, developmental processes, neuroendocrine systems, learning and memory, attention, emotion, executive function, neurodegenerative disease and the neurobiology of mental illness. Seminal experiments and recent discoveries within the field will be reviewed and discussed with a focus on how these findings impacted and continue to influence past and current theory.

PSYC 241. Seminar in Cognitive Psychology. 3 Units
Prerequisite(s): Graduate standing
Term Typically Offered: Fall, Spring

Provides a survey of topics in human information processing. Selected topics may include perception, attention, memory, knowledge, categorization, problem solving, reasoning, decision making, and language comprehension and production. Classical theories and experiments in these areas will be reviewed in addition to applications of this work to practical problems.

PSYC 242. Seminar in Learning and Behavior. 3 Units
Prerequisite(s): Graduate standing
Term Typically Offered: Fall, Spring

Surveys the area of Psychology concerned with how people and animals learn and how their behaviors are changed as a result of this learning. Selected topics include: Inmate behaviors, respondent and operant learning, behavioral economics, comparative cognition, theories of imitation, choice and self-control. Classical theories and current experiments in these areas will be reviewed in addition to implications of this work to practical problems.

PSYC 251. Developmental Processes. 3 Units
Prerequisite(s): PSYC 148 or PSYC 149.
Term Typically Offered: Fall, Spring

Study of the psychological processes underlying development throughout the life span. Covers such topics as cognitive, language, emotional, and relationship development in terms of the individual. Attention will be given to functioning of the individual within social units such as the family.
PSYC 262. Theoretical Foundations of Organizational Psychology. 3 Units
Prerequisite(s): PSYC 108 or equivalent.
Term Typically Offered: Fall, Spring

Major theories that made significant theoretical contributions to organizational psychology are covered, along with areas of significant research which have provided the foundations of modern organizational psychology.

PSYC 267. Training & Employee Development. 3 Units
Term Typically Offered: Fall only

This course will provide an overview of the application of psychological principles to employee training and development, and an in-depth review of common training and development practices. Additional topics include techniques for determining training requirements, motivating trainees, providing feedback on trainee performance, ensuring positive transfer of training to the job environment, and employee development programs.

PSYC 268. Advanced Psychopathology. 3 Units
Term Typically Offered: Fall, Spring

Covers an advanced and detailed discussion of the description, etiology, development, dynamics and treatment of individuals with mental disorders. Since the DSM-IV is the major classification system used by mental health professionals, it will also be discussed. This manual describes essential features of a variety of disorders and outlines the basis on which an experienced clinician can differentiate one disorder from another.

Note: May substitute EDC 231.

PSYC 269. Analysis of Work and Employee Selection. 3 Units
Term Typically Offered: Spring only

Survey of work analysis, with emphasis on designing employee selection systems. Topics to include multiple methods for analysis of different types and aspects of work, and applications of the results such as: Explicating the performance construct for a given job; identifying human attributes required for successful performance; evaluating jobs in terms of compensation; selecting appropriate measurement methods for predictor and criterion constructs; evaluating predictor utility; and the legal environment for employee selection practice.

PSYC 271. Advanced Applied Behavior Analysis. 4 Units
Prerequisite(s): Graduate status and instructor permission.
Term Typically Offered: Fall, Spring

Designed both for graduate students who are interested in gaining knowledge about the fundamental principles of behavioral psychology and those who are pursuing certification as a Board Certified Behavior Analyst. Students will not only learn behavioral theory and the means by which behavior is increased, decreased, shaped and maintained, but they will learn to apply behavioral principles to more complex topics such as concept formation and novel behaviors.

PSYC 272. Research Methods in Behavior Analysis. 3 Units
Prerequisite(s): PSYC 171 or PSYC 181.
Term Typically Offered: Fall, Spring

Covers methods related to single-case research (i.e., data collection, logic, designs). Course content is based primarily on contemporary books and articles from peer-review journals. Topics include: measurement of behavior, methods of assessing inter-rater agreement; experimental design including, reversal designs, changing-criterion designs, alternating treatment designs, and multiple-baseline designs; and displaying and interpreting behavioral data. Current methodological issues will be discussed.

PSYC 274. Theoretical Foundations of Behavior Analysis. 3 Units
Prerequisite(s): PSYC171 or PSYC181 or equivalent.
Term Typically Offered: Fall, Spring

Covers major theories that have made significant contributions to behavior analysis, along with areas of significant research providing the foundations of radical behaviorism and contemporary behavior analysis. Topics include history of behaviorism, selection by consequences as a casual mode, pragmatism, determinism, logical positivism, dualism x monism, verbal behavior and private events.

PSYC 275. Applied Behavior Analysis in the Workplace. 3 Units
Prerequisite(s): Graduate Student Status
Term Typically Offered: Fall only

Overview of contemporary research and practice on the use of applied behavior analysis techniques in the workplace. Students will learn to use several performance assessment and improvement tools based on the operant learning literature, as well as learn strategies for effective supervision, training, and management of staff in human service organizations.

PSYC 277. Special Topics Graduate Seminar in Psychology. 3 Units
Prerequisite(s): Graduate Student Status
Term Typically Offered: Fall, Spring

Examines a special topic of interest in psychology at the graduate level. Offered by rotating instructors, the course explores selected topics in psychology, and contemporary developments in theories, methodologies, and/or methods in the selected sub-discipline or topical area. Topics can include subject matter from all areas of psychology, including, but not limited to: applied behavior analysis, clinical, cognitive, community, cultural, developmental, experimental, feminist, health, industrial-organizational, neuroscience, perception, quantitative, social, etc., or related methodologies. Recommend prior coursework in area of focus.

PSYC 281. Advanced Experimental Analysis of Behavior. 4 Units
Prerequisite(s): PSYC 271.
Term Typically Offered: Fall, Spring

Advanced consideration of small-N research designs. Analysis of complex contingencies of reinforcement and stimulus control as they apply to such topics as perceiving, thinking, abstractions, and concept formation. In-depth examination of behavior analytic principles in relation to choice behavior and verbal behavior.

PSYC 283. Teaching Of Psychology. 3 Units
Term Typically Offered: Fall, Spring

Covers the historical background of higher education, the social and administrative structure of colleges and universities, and the selection, preparation and planning of undergraduate psychology courses, particularly introductory courses.
PSYC 284. Assessment and Treatment of Behavior Problems. 4 Units
Prerequisite(s): Graduate status and instructor permission.
Term Typically Offered: Fall, Spring

Advanced study and practical experience in application and teaching of behavior analytic methods of assessment, data collection, program construction and evaluation for a variety of behavior problems. Students will become proficient in conducting functional analyses, positive programming, and constructing and implementing behavior intervention programs for behavior excesses (consistent with State of California laws) including, antecedent manipulations, differential reinforcement schedules, functional communication training, and response cost. They will be required to develop didactic skills with respect to these various programs. Lecture three hours; Lab three hours.

PSYC 291. Professional Issues in Behavior Analysis. 3 Units
Prerequisite(s): PSYC 271.
Term Typically Offered: Fall, Spring

Classroom and on-site experience in applied behavior analysis. Students will work at an approved agency for a minimum of 10 hours per week under the supervision of a Board Certified Behavior Analyst. Students will also meet in class to present and review their cases. Emphasis will be placed on treatment integrity and ethics.

Note: Requires permission of instructor. May be repeated for credit.

PSYC 294. Cooperative Research. 1 - 6 Units
Term Typically Offered: Fall, Spring

Students work cooperatively on a psychological research project under faculty supervision.

Note: Requires permission of instructor and the Department Chair. May be repeated once for credit.

PSYC 295A. Fieldwork in the Teaching of Psychology. 1 - 6 Units
Term Typically Offered: Fall, Spring

Supervised experience in various educational and instructionally related tasks, such as leading discussion groups, setting up and presenting demonstrations, constructing and scoring tests, and tutoring, at selected educational institutions in the Sacramento area.

Note: Requires permission of instructor and the Department Chair. May be repeated once for credit.

PSYC 295C. Fieldwork in Personnel and Organizational Psychology. 1 - 6 Units
Term Typically Offered: Fall, Spring

Supervised work experience at a professional level in business and governmental organizations.

Note: Requires permission of instructor and the Department Chair. May be repeated once for credit.

PSYC 297A. Advanced Graduate Research I. 1 - 4 Units
Prerequisite(s): PSYC 294
Term Typically Offered: Fall, Spring

Advanced research opportunity for graduate students who have completed previous research experiences in PSYC 294. Students in the course are expected to develop advanced skills in research methods, data management, data analysis, and the communication of research findings by conducting research on collaborative projects under the guidance of a psychology faculty supervisor.

PSYC 297B. Advanced Graduate Research II. 1 - 4 Units
Prerequisite(s): PSYC 297A
Term Typically Offered: Fall, Spring

Advanced research opportunity for graduate students who have completed previous research experiences in PSYC 297A. Students in the course are expected to demonstrate competence in research methods, data management, data analysis, and the communication of research findings by conducting research on collaborative projects under the guidance of a psychology faculty supervisor.

PSYC 299. Special Problems. 1 - 6 Units
Term Typically Offered: Fall, Spring

Individual projects or directed reading. Requires approval of instructor and Department Chair.

Credit/No Credit

PSYC 500A. Culminating Experience. 4 Units
Prerequisite(s): Advanced to candidacy and permission of the graduate coordinator.
Term Typically Offered: Fall, Spring

Completion of a thesis or project approved for the Master’s degree.

PSYC 500B. Culminating Experience. 2 Units
Prerequisite(s): PSYC 500A.
Term Typically Offered: Fall, Spring

Continuation of work on thesis or project.

BA in Psychology

Units required for Major: 46-50
Total units required for BA: 120

Program Description

With a Bachelor of Arts in Psychology, graduates can qualify for positions requiring an understanding of human behavior in public service, education, or business. The undergraduate Behavior Analysis Certificate qualifies students for positions requiring the application of behavior analysis in educational settings and health and human service agencies.

The Psychology program at Sacramento State is highly sought after and the undergraduate major is officially impacted. Students wishing to become Psychology majors must meet eligibility requirements before applying for admission to the program. It is highly recommended that interested students speak with a Psychology advisor as soon as possible.

Students interested in a Psychology major or minor should contact the Psychology Department in Amador Hall room 350.
Minimum Grade Requirement

Once admitted to the program, PSYC 2, PSYC 8, AND PSYC 121 must each be completed with a minimum grade of "C-" or better.

Coursework Sequencing

The Psychology Department strongly recommends that Psychology Majors sequence their courses in the following manner to provide them with an optimal learning experience:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>Freshmen and Sophomores</td>
<td></td>
<td></td>
</tr>
<tr>
<td>PSYC 2</td>
<td>Introductory Psychology</td>
<td>1,2</td>
</tr>
<tr>
<td>CHAD 30</td>
<td>Human Development</td>
<td>3</td>
</tr>
<tr>
<td>PSYC 4</td>
<td>Navigating Psychology: The Major and Careers</td>
<td>1</td>
</tr>
<tr>
<td>PSYC 8</td>
<td>Methods of Psychology</td>
<td>2</td>
</tr>
<tr>
<td>PSYC 9</td>
<td>Introductory Statistics for Psychology</td>
<td>3</td>
</tr>
<tr>
<td>Juniors</td>
<td></td>
<td></td>
</tr>
<tr>
<td>PSYC 121</td>
<td>Methods and Statistics in Psychological Research</td>
<td>3</td>
</tr>
<tr>
<td>Seniors</td>
<td></td>

</tr>
<tr>
<td>PSYC 100</td>
<td>Cross-Cultural Psychology</td>
<td>3</td>
</tr>
<tr>
<td>PSYC 121</td>
<td>Methods and Statistics in Psychological Research</td>
<td>3</td>
</tr>
</tbody>
</table>

It is important to choose courses in the sequence outlined above. Otherwise, there could be a delay in completion of the major and graduation.

Note: Transfer students must take at least 15 units of Psychology courses in residence at Sacramento State; 12 of those units must be upper division.

Program Requirements

<table>

| C1   | Arts | 3 |
| C2   | Humanities | 3 |
| C1/C2 | Area C Course | 3 |
| C1/C2 | Area C Course - Take upper-division course to complete Area & upper division requirements. | 3 |

| **Area D: The Individual and Society (6 Units)** | | |
| Area D Course | 3 |
| Area D Course | 0 |
| Area D Course - Take upper-division course to complete Area & upper division requirements. | 3 |

| **Area E: Understanding Personal Development (3 Units)** | | |
| Area E Course | 3 |

| **Area F: Ethnic Studies** | | |
| Area F Course | |

**Total Units**: 40

1 To help you complete your degree in a timely manner and not take more units than absolutely necessary, there are ways to use single courses to meet more than one requirement (overlap). For further information, please visit the General Education page (p. 1103).

**Note**: There is no way to list all possible overlaps so please consult with a professional advisor. The Academic Advising Center can be visited online (http://www.csus.edu/acad/), by phone (916) 278-1000, or email (advising@csus.edu).

2 Department recommends ANTH 4, ENVS 11, or SOC 8 to meet Area A3.

3 Required in Major; also satisfies GE.

Certificate in Behavior Analysis

**Units required for Certificate**: 20

**Program Description**

The undergraduate Behavior Analysis Certificate qualifies students for positions requiring the application of behavior analysis in educational settings and health and human service agencies. Specialized coursework is taken concurrently with established degree requirements. Courses for the Certificate program are applicable toward course requirements for the major.

To receive the Sacramento State certification in Behavior Analysis, students must:

- complete a baccalaureate degree program with a major in Psychology or a related field;
- achieve a passing grade of "C" or better in each of the BA Certificate Program courses.

Additional certification information may be obtained from the Psychology Department Office.

**Total Units**: 20

MA in Industrial-Organizational Psychology

**Total units required for MA**: 31-33

**Program Description**

The Master of Arts in Industrial-Organizational Psychology is designed for students who wish to develop marketable career skills that allow them to apply psychological principles and research methods to work-
related issues. The I-O program at CSUS was strongly influenced by the 2016 Guidelines for Education and Training in Industrial-Organizational Psychology, published by the Society for Industrial and Organizational Psychology. While we cover all 24 major competency areas in the SIOP Guidelines to some degree, we give more emphasis to some than to others—a strategy that is common and fully expected in master’s programs according to the narrative of the SIOP Guidelines. In consideration of the typical jobs held by master’s level I-O practitioners in general and especially in the local employment market for our students and alumni, our program gives primary emphasis to topics in human resource planning and development (e.g., job/work analysis; employee recruitment, testing, and selection; employee training; performance management) and general analytical skills (e.g., research methods; measurement; data analysis). These topics are slanted more toward the “industrial” side of the I-O field. Current literature in organizational psychology topics such as work attitudes and motivation, groups and teams, and occupational health and safety have important implications for the aforementioned human resource planning and development topics, and are covered more briefly in the coursework.

Many of our students work locally in I-O-related positions while taking classes, and often have full-time employment upon graduating. Our graduates are sought for employment in various branches of the State of California, other public sector agencies, and private sector consulting firms.

At Sacramento State students in the I-O option have many opportunities to pursue their interests in the field. These opportunities include:

- Completing a supervised applied project, representing their area of research expertise and interest
- Working with I-O faculty in their research labs and presenting research at conferences or submitting work for publication
- Teaching Assistant experience
- Applied fieldwork projects

All students who complete the program requirements are expected to finish the program in 2.5 years. Students who successfully complete the I-O program will have “Industrial-Organizational Psychology” printed on their transcripts and diplomas.

**Admission Requirements**

Admission to graduate study in Psychology is selective. The Department equally weights the candidate’s overall grade point average (GPA) and scores on the Graduate Record Examination (GRE). An overall GPA of 3.0 is recommended. When making admissions decisions, the Department takes into consideration the candidate’s combined GPA and GRE score, letters of recommendation, previous (research and/or practical) experience, the candidate’s interest in a particular faculty member’s research agenda, and additional materials as required by each program option (ABA, General MA, and I/O).

Applicants are required to have completed upper division undergraduate psychology courses in statistics and research methods, with at least "C" grades in those courses, as well as a balanced and academically strong group of upper division courses covering at least five different core academic areas of psychology (e.g., biological, clinical, cognitive, developmental, social). The upper division psychological research methods/statistics requirement is met by PSYC 121 and PSYC 102 taken at Sacramento State, or their equivalents at other universities. Upper division research methods/statistics courses from other four-year universities must be reviewed and approved for equivalency by the Department’s Graduate Coordinator.

Please visit [www.csus.edu/psyc/grad-students/graduate-program-dev.html](http://www.csus.edu/psyc/grad-students/graduate-program-dev.html) for information on each option’s additional requirements.

**Admission Procedures**

All applicants, including Sacramento State graduates, must apply to both the University and the Psychology Department. Please submit the following to the Sacramento State Office of Graduate Studies:

- an application for admission—via CalState Apply ([https://www2.calstate.edu/apply/](https://www2.calstate.edu/apply/))
- two sets of official transcripts from all colleges and universities attended, other than Sacramento State, should be sent to:
  - California State University, Sacramento
  - Office of Graduate Studies
  - River Front Center 215
  - 6000 J Street
  - Sacramento, CA 95819-6112
- Official Graduate Records Exam (GRE) scores (be aware that it takes approximately six weeks from the test date for scores to be forwarded); for more admissions information and application deadlines please visit [http://www.csus.edu/gradstudies](http://www.csus.edu/gradstudies)

At the same time, each applicant must file on-line with the Psychology Department:

- a completed application form;
- one set of unofficial transcripts from all colleges and universities attended, including Sacramento State transcripts;
- unofficial copies of the General GRE scores*;
- three letters of recommendation, from individuals who can evaluate the applicant’s potential for successful graduate study. At least two letters from faculty are preferred. See application brochure for link—available from [www.csus.edu/psyc/grad-students/graduate-program-dev.html](http://www.csus.edu/psyc/grad-students/graduate-program-dev.html);
- additional materials, as required by each specific option (General MA, ABA and I/O).

*The General GRE must have been taken by the application deadline.

**Minimum Units and Grade Requirement for the Degree**

Units required for the MA: 34-36
Minimum Cumulative GPA: 3.0. All units must be completed with a grade of “B” or better.

The field of Industrial-Organizational Psychology (I-O Psychology) covers all aspects of psychology in the workplace, including such sub-topics as: organizational development, leadership, performance evaluation, personnel selection, test validation and development, work teams, training, and personality influences.

The Industrial-Organizational Psychology Option at Sacramento State is designed to give broad-based training in the relevant content areas as well as provide a strong methodological background. Students obtaining the Master’s degree should be prepared for a career as a personnel manager, a testing specialist, a member of an I-O consulting group; they should also be prepared for further graduate work at the doctoral level.

By meeting all of the requirements for the degree, students will have met...
the master's level educational competencies identified by the Society for Industrial and Organizational Psychology.

Students are strongly advised to keep in contact with professors in the Psychology Department for academic advising.

**Advancement to Candidacy**

Each student must file an application for Advancement to Candidacy, indicating a proposed program of graduate study. This procedure should begin as soon as the classified graduate student has:

- removed any deficiencies in admission requirements;
- completed at least 12 units of 200-level courses in the graduate program with a minimum 3.0 GPA;
- selected a Thesis or Project committee;
- obtained the committee's approval of a proposal for the thesis or project (as indicated by committee members' signatures on the Department's thesis/project approval form); and
- taken the Writing Placement for Graduate Students (WPG) or taken a Graduate Writing Intensive (GWI) course in their discipline within the first two semesters of coursework at California State University, Sacramento or secured approval for a WPG waiver.

The student will complete the Advancement to Candidacy form after planning a degree program in consultation with a Psychology advisor and members of the student’s thesis/project committee. The completed form is then returned to the Office of Graduate Studies for approval.

### MA in Psychology (General Psychology)

**Total units required for the MA**: 30

#### Program Description

The Master of Arts program in Psychology is designed to provide specialized education in the field of psychology. With a MA in Psychology, one can qualify for positions similar to those associated with a BA, though at a higher level of responsibility. Advisors play an active role in the planning process, and students are strongly encouraged to consult with faculty on a continual and intensive basis as soon as they begin their studies in the program. MA students can prepare for doctoral study in any area of Psychology or specialize in areas such as Applied Behavior Analysis or Industrial-Organizational Psychology. The Graduate Brochure contains the department application procedures, including GRE requirements and the departmental application form.

Although the program is based on a core set of requirements, the structure of the program allows for flexibility. While much material is covered in regular course offerings, the Department recognizes that specialized study and the development of certain types of skills must take place on a one-to-one student-instructor basis. This includes research activities in the laboratory, field, or library; teaching activities; and volunteer work in community mental health agencies, government agencies, schools, and/or businesses. Academic credit under individualized study or fieldwork designations is available for these purposes.

In the General Psychology option, students can create individual programs in conjunction with the faculty to prepare for employment or further study in doctoral programs in a variety of specialized fields, such as Clinical, Cognitive, Developmental, Educational, Experimental, Industrial/Organizational, Neuroscience, Quantitative, and Social Psychology.

#### Admission Requirements

Admission to graduate study in Psychology is selective. The Department equally weighs the candidate’s overall grade point average (GPA) and scores on the Graduate Record Examination (GRE). An overall GPA of 3.0 is recommended. When making admissions decisions, the Department takes into consideration the candidate's combined GPA and GRE score, letters of recommendation, previous (research and/or practical) experience, the candidate's interest in a particular faculty member’s research agenda, and additional materials as required by each program option (ABA, General MA, and I/O).

Applicants are required to have completed upper division undergraduate psychology courses in statistics and research methods, with at least “C” grades in those courses, as well as a balanced and academically strong group of upper division courses covering at least five different core academic areas of psychology (e.g., biological, clinical, cognitive, developmental, social). The upper division psychological research methods/statistics requirement is met by PSYC 121 and PSYC 102 taken at Sacramento State, or their equivalents at other universities. Upper division research methods/statistics courses from other four-year universities must be reviewed and approved for equivalency by the Department's Graduate Coordinator.
Please visit www.csus.edu/psyc/grad-students/graduate-program-dev.html for information on each option's additional requirements.

### Admission Procedures

All applicants, including Sacramento State graduates, must apply to both the University and the Psychology Department. Please submit the following to the Sacramento State Office of Graduate Studies:

- an application for admission—via CalState Apply (https://www2.calstate.edu/apply/)
- two sets of official transcripts from all colleges and universities attended, other than Sacramento State, should be sent to:

  California State University, Sacramento
  Office of Graduate Studies
  River Front Center 215
  6000 J Street
  Sacramento, CA 95819-6112

- Official Graduate Records Exam (GRE) scores (be aware that it takes approximately six weeks from the test date for scores to be forwarded); for more admissions information and application deadlines please visit http://www.csus.edu/gradstudies

At the same time, each applicant must file on-line with the Psychology Department:

- a completed application form;
- one set of unofficial transcripts from all colleges and universities attended, including Sacramento State transcripts;
- unofficial copies of the General GRE scores*;
- three letters of recommendation, from individuals who can evaluate the applicant's potential for successful graduate study. At least two letters from faculty are preferred. See application brochure for link—available from www.csus.edu/psyc/grad-students/graduate-program-dev.html;
- additional materials, as required by each specific option (General MA, ABA and I/O).

*The General GRE must have been taken by the application deadline.

### Minimum Units and Grade Requirement for the Degree

Units required for the MA: 30
Minimum Cumulative GPA: 3.0. All units must be completed with a grade of "B" or better.

### Advancement to Candidacy

Each student must file an application for Advancement to Candidacy, indicating a proposed program of graduate study. This procedure should begin as soon as the classified graduate student has:

- removed any deficiencies in admission requirements;
- completed at least 12 units of 200-level courses in the graduate program with a minimum 3.0 GPA;
- selected a Thesis or Project committee;
- obtained the committee's approval of a proposal for the thesis or project (as indicated by committee members' signatures on the Department's thesis/project approval form); and
- taken the Writing Placement for Graduate Students (WPG) or taken a Graduate Writing Intensive (GWI) course in their discipline within the first two semesters of coursework at California State University, Sacramento or secured approval for a WPG waiver.

The student will complete the Advancement to Candidacy form after planning a degree program in consultation with a Psychology advisor and members of the student's thesis/project committee. The completed form is then returned to the Office of Graduate Studies for approval.

- PSYC 241 Seminar in Cognitive Psychology
- PSYC 242 Seminar in Learning and Behavior

#### Methods (3 Units)

Select one of the following:

- PSYC 204 Advanced Topics in Statistical Methods for Psychological Research
- PSYC 205 Measurement Methods for Psychological Research and Practice
- PSYC 206 Tests and Measurement
- PSYC 272 Research Methods in Behavior Analysis

#### Additional Courses (11 Units)

- PSYC 283 Teaching Of Psychology
- Select two other PSYC courses (in any combination) from Group 1 Seminars, Group 2 Seminars, or Methods
- PSYC 294 Cooperative Research or PSYC 299 Special Problems

#### Culminating Experience (4-6 Units)

- PSYC 500A Culminating Experience
- PSYC 500B Culminating Experience

| Total Units | 30-32 |

---

1 Students must enroll in PSYC 500B if thesis/project is not satisfactorily completed while enrolled in PSYC 500A.

### MA in Psychology (Industrial-Organizational Psychology)

Total units required for MA: 30
Program Description

The Master of Arts program in Psychology is designed to provide specialized education in the field of psychology. With a MA in Psychology, one can qualify for positions similar to those associated with a BA, though at a higher level of responsibility. Advisors play an active role in the planning process, and students are strongly encouraged to consult with faculty on a continual and intensive basis as soon as they begin their studies in the program. MA students can prepare for doctoral study in any area of Psychology or specialize in areas such as Applied Behavior Analysis or Industrial-Organizational Psychology. The Graduate Brochure contains the department application procedures, including GRE requirements and the departmental application form.

Although the program is based on a core set of requirements, the structure of the program allows for flexibility. While much material is covered in regular course offerings, the Department recognizes that specialized study and the development of certain types of skills must take place on a one-to-one student-instructor basis. This includes research activities in the laboratory, field, or library; teaching activities; and volunteer work in community mental health agencies, government agencies, schools, and/or businesses. Academic credit under individualized study or fieldwork designations is available for these purposes.

The Industrial-Organizational Psychology Option is designed for students who wish to develop marketable career skills that allow them to apply psychological principles and research methods to work-related issues. The I-O program at Sacramento State was designed with heavy influence from the 2016 Guidelines for Education and Training in Industrial-Organizational Psychology, published by the Society for Industrial and Organizational Psychology. While we cover all 24 major competency areas in the SIOP Guidelines to some degree, we give more emphasis to some than we do others—a strategy that is common and fully expected in master programs according to the narrative of the SIOP Guidelines. In consideration of the typical jobs held by master’s level I-O practitioners in general and especially in the local employment market for our students and alumni, our program gives primary emphasis to topics in human resource planning and development (e.g., job/work analysis; employee recruitment, testing, and selection; employee training; performance management) and general analytical skills (e.g., research methods; measurement; data analysis). These topics are slanted more toward the “industrial” side of the I-O field. Current literature in organizational psychology topics such as work attitudes and motivation, groups and teams, and occupational health and safety have important implications for the aforementioned human resource planning and development topics, and are covered more briefly in the coursework. In addition to completing the core courses and the culminating requirement for the MA degree, students must also select the Industrial-Organizational Psychology option.

Admission Requirements

Admission to graduate study in Psychology is selective. The Department equally weighs the candidate’s overall grade point average (GPA) and scores on the Graduate Record Examination (GRE). An overall GPA of 3.0 is recommended. When making admissions decisions, the Department takes into consideration the candidate’s combined GPA and GRE score, letters of recommendation, previous (research and/or practical) experience, the candidate’s interest in a particular faculty member’s research agenda, and additional materials as required by each program option (ABA, General MA, and I/O).

Applicants are required to have completed upper division undergraduate psychology courses in statistics and research methods, with at least "C" grades in those courses, as well as a balanced and academically strong group of upper division courses covering at least five different core academic areas of psychology (e.g., biological, clinical, cognitive, developmental, social). The upper division psychological research methods/statistics requirement is met by PSYC 121 and PSYC 102 taken at Sacramento State, or their equivalents at other universities. Upper division research methods/statistics courses from other four-year universities must be reviewed and approved for equivalency by the Department’s Graduate Coordinator.

Please visit www.csus.edu/psyc/grad-students/graduate-program-dev.html for information on each option’s additional requirements.

Admission Procedures

All applicants, including Sacramento State graduates, must apply to both the University and the Psychology Department. Please submit the following to the Sacramento State Office of Graduate Studies:

• an application for admission—via CalState Apply (https://www2.calstate.edu/apply/)
• two sets of official transcripts from all colleges and universities attended, other than Sacramento State, should be sent to:
  
  California State University, Sacramento
  Office of Graduate Studies
  River Front Center 215
  6000 J Street
  Sacramento, CA 95819-6112

• Official Graduate Records Exam (GRE) scores (be aware that it takes approximately six weeks from the test date for scores to be forwarded); for more admissions information and application deadlines please visit http://www.csus.edu/gradstudies

At the same time, each applicant must file on-line with the Psychology Department:

• a completed application form;
• one set of unofficial transcripts from all colleges and universities attended, including Sacramento State transcripts;
• unofficial copies of the General GRE scores*;
• three letters of recommendation, from individuals who can evaluate the applicant’s potential for successful graduate study. At least two letters from faculty are preferred. See application brochure for links—available from www.csus.edu/psyc/grad-students/graduate-program-dev.html ;
• additional materials, as required by each specific option (General MA, ABA and I/O).

*The General GRE must have been taken by the application deadline.

Minimum Units and Grade Requirement for the Degree

Units required for the MA: 34-36
Minimum Cumulative GPA: 3.0. All units must be completed with a grade of "B" or better.

The field of Industrial-Organizational Psychology (I-O Psychology) covers all aspects of psychology in the workplace, including such sub-topics as: organizational development, leadership, performance evaluation,
personnel selection, test validation and development, work teams, training, and personality influences.

The Industrial-Organizational Psychology Option at Sacramento State is designed to give broad-based training in the relevant content areas as well as provide a strong methodological background. Students obtaining the Master's degree should be prepared for a career as a personnel manager, a testing specialist, a member of an I-O consulting group; they should also be prepared for further graduate work at the doctoral level. By meeting all of the requirements for the degree, students will have met the master's level educational competencies identified by the Society for Industrial and Organizational Psychology.

Students are strongly advised to keep in contact with professors in the Psychology Department for academic advising.

Advancement to Candidacy

Each student must file an application for Advancement to Candidacy, indicating a proposed program of graduate study. This procedure should begin as soon as the classified graduate student has:

- removed any deficiencies in admission requirements;
- completed at least 12 units of 200-level courses in the graduate program with a minimum 3.0 GPA;
- selected a Thesis or Project committee;
- obtained the committee's approval of a proposal for the thesis or project (as indicated by committee members’ signatures on the Department's thesis/project approval form); and
- taken the Writing Placement for Graduate Students (WPG) or taken a Graduate Writing Intensive (GWI) course in their discipline within the first two semesters of coursework at California State University, Sacramento or secured approval for a WPG waiver.

The student will complete the Advancement to Candidacy form after planning a degree program in consultation with a Psychology advisor and members of the student’s thesis/project committee. The completed form is then returned to the Office of Graduate Studies for approval.

Elective

Select one additional upper division Psychology course numbered 100-199

Total Units: 21-22

1 Must be completed with a grade of "C-" or better.
2 May be applied to both the Minor and General Education requirements

MS in Applied Behavior Analysis

Total units required for MS: 40-42

Program Description

Applied behavior analysis (ABA) is the field of Psychology concerned with understanding the environmental variables that reliably influence
human behavior, as well as developing procedures to modify socially significant behavior. The Master of Science program in ABA prepares students to work as behavior analysts in a variety of settings including schools, hospitals, neurorehabilitation settings, and agencies providing services to individuals with developmental disabilities. The ABA option coursework should fulfill the most recent requirements to sit for the national certification exam in behavior analysis (BCBA). For more information visit www.bacb.com. Students should note that this program is also appropriate for those planning to enter doctoral programs in Applied Behavior Analysis, Experimental Analysis of Behavior, or Special Education. Advisors play an active role in the planning process, and students are strongly encouraged to consult with faculty on a continual and intensive basis as soon as they begin their studies in the program. The Graduate Brochure contains the department application procedures, including GRE requirements and the departmental application form.

Although the program is based on a core set of requirements, the structure of the program allows for flexibility. While much material is covered in regular course offerings, the Psychology Department recognizes that specialized study and the development of certain types of skills must take place on a one-to-one student instructor basis. This includes research activities in the laboratory, field, or library; teaching activities; and practicum experience in community settings. Academic credit under individualized study or fieldwork designations is available for these purposes. Our research facilities include human and animal (rats) operant laboratories and research rooms for data collection with children and adults. We have also established research partnerships with different schools and agencies in the region. Finally, clinical training is also an integral part of our program. There are numerous funded internships and job opportunities for behavior analysis students in Sacramento.

**Admission Requirements**

Admission to the MS in Applied Behavior Analysis (ABA) is selective. The Department equally weighs the candidate's overall grade point average (GPA) and scores on the Graduate Record Examination (GRE). An overall GPA of 3.0 is recommended. When making admissions decisions, the Department takes into consideration the candidate's combined GPA and GRE score, letters of recommendation, previous (research and/ or practical) experience, the candidate's interest in a particular faculty member's research agenda, and additional materials.

Applicants are required to have a Bachelor's degree, a lower division undergraduate psychology course in research methods, and an upper division undergraduate course in applied behavior analysis, with at least "C" grades in those courses. The lower division research methods requirement is met by PSYC 8 and the upper division applied behavior analysis requirement is met by PSYC 171 taken at Sacramento State, or their equivalents at other colleges and universities. Course equivalents must be reviewed and approved by the Department's Graduate Coordinator.

Please visit the Department of Psychology (https://www.csus.edu/college/social-sciences-interdisciplinary-studies/psychology/) for information on additional requirements.

**Admission Procedures**

All applicants, including Sacramento State graduates, must apply to both the University and the Psychology Department. Please submit the following to the Sacramento State Office of Graduate Studies:

- one set of official transcripts from all colleges and universities attended, other than Sacramento State

For more admissions information and application deadlines please visit the Office of Graduate Studies website (http://www.csus.edu/gradstudies/).

At the same time, each applicant must submit the following supplemental application:

- unofficial copies of the General GRE scores*;
- three letters of recommendation, from individuals who can evaluate the applicant's potential for successful graduate study. At least two letters from faculty are preferred. See application brochure—available from www.csus.edu/psyc/grad-students/graduate-program-dev.html — for any additional required materials.

*The General GRE must have been taken by the application deadline.

**Minimum Units and Grade Requirements**

Units required for the MS: 40-42, each with a grade of "B" or better.

Minimum required GPA: 3.0.

**Advancement to Candidacy**

Each student must file an application for Advancement to Candidacy, indicating a proposed program of graduate study. This procedure should begin as soon as the classified graduate student has:

- removed any deficiencies in admission requirements;
- completed at least 12 units of 200-level courses in the graduate program with a minimum 3.0 GPA;
- selected a Thesis or Project committee;
- obtained the committee's approval of a proposal for the thesis or project (as indicated by committee members' signatures on the Department's thesis/project approval form); and
- taken the Writing Placement for Graduate Students (WPG) or taken a Graduate Writing Intensive (GWI) course in their discipline within the first two semesters of coursework at California State University, Sacramento, or secured approval for a WPG waiver.

The student will complete the Advancement to Candidacy form after planning a degree program in consultation with a Psychology advisor and members of the student's thesis/project committee. The completed form is then returned to the Office of Graduate Studies for approval.

**Culminating Experience Requirements**

Students must enroll once for four units of PSYC 500A, which may be satisfied by completing an empirical thesis. Each student will compile an APA-style manuscript, including introduction, method, results, and discussion sections, at the conclusion of the thesis. Students must also successfully pass an oral defense of the thesis.

If the thesis or project is not completed by the end of the first semester in which a student is registered for culminating requirement units, they must enroll for two units of PSYC 500B during the following semester. If the thesis is still not completed by the end of that semester, students must enroll in the university designated thesis/project continuation course.

Public Policy and Administration

**College of Social Sciences and Interdisciplinary Studies**

**Program Description**

The graduate programs in the Department of Public Policy and Administration prepare students for a career in public service through a deeper understanding of how to address complex issues relating to public policy and administration. We serve the State of California and Sacramento Region by developing leaders possessing strong analytical tools, and a deep commitment to public service.

**Note:** The Department of Public Policy and Administration, in collaboration with the College of Business Administration, also offers an interdisciplinary Master’s of Science in Urban Land Development. In addition, it offers an interdisciplinary doctorate in Education in collaboration with the College of Education. Both of these programs are listed separately in this catalog.

**Special Features**

- The proximity of Sacramento State to the State Capitol offers significant advantages to students by providing them with a ready "laboratory" for observing the policy and administrative issues they will confront professionally, and for gaining experience alongside existing practitioners in public policy and administration.
- The graduate program’s curricular design and scheduling of courses allow students to complete the program in four semesters if enrolled full-time. In addition, part-time students may complete the program after five or a six semesters of attendance. Classes are scheduled in the evening, and sometimes on Saturday, to accommodate the scheduling needs of students who are employed in the daytime, or who have other obligations that require non-traditional schedules.
- As a reflection of the growing interest in collaborative processes to solve public concerns, and the need for mid-level administrators in the judicial system, the PPA Department also offers certificates in Collaborative Governance and Judicial Administration (through the College of Continuing Education).

**Career Possibilities**

Policy analyst and/or public administrator for state, federal, or local government; private firm or association; or not-for profit organization

**Contact Information**

Edward L. (Ted) Lascher, Jr., Department Chair
Suzi Byrd, Administrative Support Coordinator
Tahoe Hall 3038

KUMAR, AMAL
WASSMER, ROBERT W.

**PPA 100. Introduction to Public Policy and Administration.** 3 Units
Prerequisite(s): GOVT 1 or GOVT 150 or equivalent.
Term Typically Offered: Fall, Spring

Explores context and process for policy making by national and California state governments, including ethical dimensions. Applications are developed from students’ and instructor’s areas of interest including K-12 and higher education, land-use policy, and aging issues such as elder advocacy, Social Security, and Medicaid. Provides background and skills for entry level positions in public or non-profit organizations. Cross Listed: GERO 102; only one may be counted for credit.

**PPA 200. Introduction to Public Policy and Administration.** 3 Units
Term Typically Offered: Fall, Spring

Examines public policy and administration by exploring major policy processes, particularly in California state and local government. Topics include the emergence and specification of issues, developing and selecting policy options, implementing and administering policies and evaluating and terminating public policies. The course approach is comprehensive, transdisciplinary and human centered – concerned with the interplay of values in shaping policy outcomes. The intent is to provide conceptual frameworks and operational principles required in identifying and resolving issues emerging in public settings.

**Note:** Satisfies the Graduate Writing Intensive Requirement (GWI).
PPA 250.  California Land Use Policy.  3 Units
Term Typically Offered:  Fall, Spring
Examines public policies that influence land use. Reviews tools of land use planning and development and applies them to issues that dominate California policy choices including urban design, fiscalization of land use, sustained growth, and the challenges of social equity.

PPA 251.  Urban Problems, Economics and Public Policy.  3 Units
Prerequisite(s):  PPA 220A or ECON 100B.
Corequisite(s):  ECON 251; only one of these courses may be counted for credit.
Term Typically Offered:  Fall, Spring
Historical development, economics and possible policy solutions of the most pressing problems facing central cities and urban areas in the U.S. are presented. Problems discussed include poverty, crime, urban abandonment/suburban sprawl, edge cities, deteriorating infrastructures, and fiscal stress.
Cross Listed:  ECON 251; only one may be counted for credit.

PPA 270.  Introduction to Collaborative Policy Making.  3 Units
Prerequisite(s):  PPA 200 and PPA 210, or approval of instructor.
Term Typically Offered:  Fall, Spring
Examines the theory and practice of collaborative policy-making using case studies of major collaborative processes. Topics include interpretative policy analysis, deliberative democracy theory, public participation, collaborative policy networks, the use of dialogue in public policy, resolution of policy controversies, and consensus building.
PPA 272. Collaborative Governance Advanced Practice. 3 Units
Prerequisite(s): PPA 270 with a grade of B- or better, or instructor permission.
Term Typically Offered: Fall, Spring
Practice driven, highly participatory course for professionals who require more advanced skills into collaborative methods. Topics include conflict analysis and assessment, analysis of advocacy speech, public participation, working with the media, and interagency networks. Focuses on active learning with practice in a wide variety of collaborative skills.

PPA 284. Urban Policy. 3 Units
Term Typically Offered: Fall, Spring
Exploration in-depth of the socio-economic problems of urban and metropolitan areas and evaluation of proposed political and governmental solutions.
Cross Listed: GOVT 284; only one may be counted for credit.

PPA 291. Court Governance and Operations. 3 Units
Term Typically Offered: Fall, Spring
Studies the state judiciary as both independent and interdependent with the legislative and executive branches of government at both the state and local level. The goal is to develop foundational knowledge of the historical and evolving governing and operational principles of the California court system.

PPA 292. Court Management. 3 Units
Prerequisite(s): PPA 291 or instructor permission.
Term Typically Offered: Fall, Spring
Provides training in key court administrative areas identified by such organizations as the National Association of Court Management (e.g., case flow management). Drawing from interdisciplinary literature on management theory, court case studies illustrate and provide context.

PPA 293. Court Leadership. 3 Units
Term Typically Offered: Fall, Spring
Examines leadership in the court environment as distinct from management. Investigates how leadership principles are exercised in pivotal areas of the courts such as: community relations, creativity and innovation, organizational change, workforce development, succession planning, strategic planning and re-engineering.

PPA 294. Emerging Issues in Judicial Administration. 3 Units
Term Typically Offered: Fall, Spring
Addresses pressing issues in judicial administration (e.g., courts in an electronic world, rising administrative workloads, greater number of self-represented litigants). Specific topics may change from year to year depending on the urgency of topics and nature of policy implications.

PPA 296E. Intergovernmental Relations. 3 Units
Term Typically Offered: Fall, Spring
A review of the origins of federalism in the U.S. and various theoretical approaches to understanding the relationships between various levels of government, including ways in which the different levels of government relate to one another both vertically and horizontally.

PPA 296M. Policy Prototyping. 3 Units
Prerequisite(s): At least one graduate course in political science, economics, and administration or management; no more than one of which may be taken as a co-requisite.
Term Typically Offered: Spring only
Applies policy and administrative prototyping to policy topics such as transportation and mobility, environment and resources, and education, workforce, and justice. The course uses the drafting and iteration of statutes, ordinances, and regulations, budget and personnel plans, organizational designs, and vote counts, along with sketching design thinking applications, to explore innovative strategies for addressing these policy topics, with an emphasis on implementation.

PPA 297A. Executive Fellows Introductory Seminar. 3 Units
Term Typically Offered: Fall, Spring
Seminar will enhance Executive Fellows’ understanding of the state policy making and administrative process, policy implementation, ethical responsibilities of policy and administrative actors.
Note: Open only to students admitted to the Executive Fellowship Program.

PPA 297B. Executive Fellows Policy Seminar. 3 Units
Prerequisite(s): PPA 297A
Term Typically Offered: Fall, Spring
Seminar will extend the examination and analysis of the Executive branch of government to include alternative administrative practices, policy implementation strategies, and related administrative issues.
Note: Open only to students admitted to the Executive Fellowship Program.

PPA 298A. Judicial Administration Fellows Introductory Seminar. 3 Units
Term Typically Offered: Fall, Spring
Critical examination and analysis of the administrative operation of the California judicial system and its structures, policies and practices.
Note: Open only to students admitted to the Judicial Administration Fellows Program.

PPA 298B. Judicial Administration Fellows Policy Seminar. 3 Units
Term Typically Offered: Fall, Spring
Analyzes procedural issues and policy questions within the California judicial system with emphasis on the interdependence of the judicial, legislative and executive branches.
Note: Open only to students admitted to the Judicial Administration Fellows Program.

PPA 299. Special Problems. 1 - 3 Units
Prerequisite(s): Permission of faculty supervisor and the Department Chair.
Term Typically Offered: Fall, Spring
Supervised independent study in public policy and administration. Credit/No Credit
PPA 500. Culminating Experience. 3 Units
Prerequisite(s): Advanced to candidacy and permission of the graduate coordinator.
Term Typically Offered: Fall, Spring
Completion of a comprehensive exam or project approved for the Master’s degree.

Certificate in Applied Policy and Government
Units required for Certificate: 6

Program Description
The Capital Campus’s graduate programs in Public Policy and Administration prepare future leaders to address the complex issues that face California. We serve the State and the region by developing leaders with strong analytical tools and a deep commitment to public service.

Admission Requirements
Acceptance to one of the four Capital Fellows Programs: Assembly, Judicial Administration, Executive, or Senate.

Master of Public Policy and Administration
Total units required for MPPA: 36

Program Description
The Capital Campus’s graduate programs in Public Policy and Administration prepare future leaders to address the complex issues that face California. We serve the State and the region by developing leaders with strong analytical tools and a deep commitment to public service.

Graduates of our graduate programs are expected to have the ability to: 1) synthesize, analyze, and offer solutions to public policy and administration problems; 2) apply knowledge and skills in a professional setting; and 3) recognize the role of the profession in society (e.g., by
considering the ethical dimension of choices about public policy and administration).

Admission Requirements

Admission to classified standing in the program requires:

• the baccalaureate degree;
• a GPA of 2.75 for all undergraduate coursework or in the last 60 units;
• results of the Graduate Record Examination (GRE) General Test; the department chair may waive this requirement for an applicant with at least five years of professional experience in the area of public policy and administration;
• completion of the following (or their equivalents at other colleges or universities as determined by the Department Chair):

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>ECON 1B</td>
<td>Introduction to Microeconomic Analysis</td>
<td>3</td>
</tr>
<tr>
<td>POLS 1</td>
<td>Essentials Of Government</td>
<td>3</td>
</tr>
</tbody>
</table>

• a written statement of purpose from one to two pages in length (typewritten), addressing the applicant’s purpose in pursuing the Master of Public Policy and Administration;
• three letters of recommendation from individuals with knowledge of the applicant’s academic and professional potential.

All applicants to graduate programs who have not completed a baccalaureate degree from a postsecondary educational institution where English is the primary language of instruction must achieve a minimum score on TOEFL or IELTS. The minimum score is 83 iBT (560 Paper Based TOEFL) or 6.5 IELTS.

A student with certain deficiencies in the above requirements may be admitted to the program on a conditionally classified status. Admission conditions will be determined on an individual basis.

Admission Procedures

All prospective students must file the following with the Office of Graduate Studies:

• an online application for admission;
• one set of official transcripts from all colleges and universities attended, other than Sacramento State; and
• GRE scores.

For more admissions information and application deadlines please visit https://www.csus.edu/graduate-studies/.

The items below should be submitted to the Department office:

• written statement of purpose;
• letters of recommendation; and
• TOEFL score or IELTS score, if applicable.

Minimum Units and Grade Requirement for the Degree

Units required for the MPPA: 36

Minimum Cumulative GPA: 3.0 with no grade lower than a "B-" in all required courses (and "credit" for PPA 500).

Advancement to Candidacy

Students must file an application for Advancement to Candidacy listing their program of graduate study. The filing procedure should begin as soon as the student has:

• removed any deficiencies in admission requirements;
• completed at least five of the program’s required courses with a minimum grade of "B-" in each and a cumulative grade point average of at least 3.0; and
• Satisfy the Graduate Writing Assessment Requirement (GWAR) by completing one of our Departmental Graduate Writing Intensive (GWI) courses with a grade of "B" or better (either PPA 200 or PPA 220A) or meeting one of the other standards set by the Office of Graduate Studies.

Department specific advancement to candidacy forms are available in the Department office.

<td>3</td>
</tr>
</tbody>
</table>

Total Units 36

Footnotes

1 PPA graduate students are required to take 6 units of elective courses. Ordinarily at least 3 of these units should be chosen from among the graduate level elective courses offered by the Department of Public Policy and Administration. As appropriate, the requirement to take at least 3 units within PPA may be waived with the approval of the student’s academic advisor and the Department Chair. Additionally, the Department has offered experimental PPA 296 electives in the past, and will continue to do so.

2 Enrollment in PPA 500 is required of students in their last semester of enrollment in the program. Each student will undertake a project or comprehensive examination dealing with a policy or administrative issue
and complete a significant written work detailing the problem or issue examined, sources of information used in analyzing the issue, and project findings and conclusions.

Social Science
College of Social Sciences and Interdisciplinary Studies

Program Description
The Social Science major is offered by the departments of Anthropology, Economics, Ethnic Studies, Geography, Political Science, History, and Sociology. It serves both as an interdisciplinary major for the Bachelor of Arts degree and to provide subject matter preparation for the Single Subject Teaching Credential in Social Science.

To qualify for a teaching credential, candidates must also complete an approved Professional Education Program and other requirements as specified by the California Commission on Teacher Credentialing. California faces a shortage of qualified teachers. Over the next decade we will need to find 300,000 people to take on the challenging but rewarding job of teaching in California schools.

Since the Social Science program involves work in several departments, and since special rules on overlap with General Education apply to this program, advising is essential to the efficient completion of the program.

Note: On June 1, 2006, the California Commission on Teacher Credentialing approved the program of subject matter preparation for the Single Subject Teaching credential in Social Science submitted by California State University, Sacramento.

Special Features
- The program also provides an opportunity for students to build on the foundation of general education and become familiar with several areas in the Social Sciences. A Social Science major is excellent background for advanced graduate studies and in professional careers. Non-credential students need not complete the pre-credential professional education coursework, and elective courses are available to complete the 120-unit Bachelor of Arts degree.
- As an interdisciplinary major, the Social Science program works closely with the Career Center and the California Interns Network to support internship opportunities that will enhance future professional development and employment.
- Through the Social Science major, graduates will also earn a 24 unit minor in History. Formal submission of a Minor Degree Application is required.
- Social Science majors can also earn a minor in other disciplines including Economics, Ethnic Studies, Geography, Political Science and more. Additional specialized advising is required in these cases.
- Graduates of the Social Science program have distinguished leadership careers in government service, public policy, politics, business, K-12, education, higher education administration, law, law enforcement, counseling, community service, and military service. Several Social Science majors (including two former mayors of Sacramento) are inductees into the College of Social Science and Interdisciplinary Studies Academy of Distinction and Honor.
- The Social Science program works closely with the Career Center on campus to provide proactive and comprehensive career services to students through: career development, experiential learning, on-campus recruitment, and employer relations.

Career Possibilities
Middle School or High School Teacher of Civics, Economics, Geography, and History · Politics · Government and Civil Service · Lobbyist · Attorney · Law Enforcement · Business · Public Relations · Human Relations/Personnel Specialist · Journalist · Military Service · Community Service · Graduate School

Contact Information
Kristin Van Gaasbeck, Program Director
Lassen Hall 2008
(916) 278-6342
www.csus.edu/socsci/ (http://www.csus.edu/socsci/)

SSCI 193. Integrating History and Social Science. 3 Units
Prerequisite(s): Instructor permission.
Term Typically Offered: Spring only
Capstone seminar that serves as a bridge between academic preparation and entry into a professional teacher credential program. Students will examine social science-history in the State curriculum framework, reflect on subject matter preparation, focus on middle and high school social science teaching and learning, investigate and evaluate resources pertinent to instruction, and explore current issues in education.

SSCI 199. Special Problems. 1 - 3 Units
Prerequisite(s): Approval of instructor or Department chair.
Term Typically Offered: Fall, Spring
Individual projects or directed reading. Requires permission of instructor and department chair.
Credit/No Credit

BA in Social Science
Units required for Major: 63
Units required for Subject Matter Program: 69-74
Total units required for BA: 120

Program Description
The Social Science major is offered by the departments of Anthropology, Economics, Ethnic Studies, Geography, Government, History, Sociology, and Women’s and Gender Studies. It serves both as an interdisciplinary major for the Bachelor of Arts degree and to provide subject matter preparation for the Single Subject Teaching Credential in Social Science.

Minimum Grade Requirement
Minimum grade of “C-” is required in all courses completed toward the Social Science major and pre-credential requirements.

2 Required in Major; also satisfies Graduation Requirement.

3 Students may select an elective within the major that is a Writing Intensive course.

4 If not satisfied before entering Sacramento State, it may be satisfied in General Education Area C2 (Humanities). “C- or better required.” The alternative methods for satisfying the Foreign Language Proficiency Requirement are described here: https://www.csus.edu/college/arts-letters/world-languages-literatures/foreign-language-proficiency.html

Sociology

College of Social Sciences and Interdisciplinary Studies

Program Description

Sociology is the analysis of the social lives of people, groups, and societies. A sociological perspective helps students understand the relationship between individuals and society, analyze the impact of larger social structures, and become aware of ways to achieve desired collective ends.

Sociology faculty have expertise in the following areas: family and marriage, gender study, social psychology, migration and immigration,
ethnic and race relations, inequalities, human sexuality, environment, sports, popular culture, political sociology, medical sociology, sociology of education, and crime and deviance.

Sociology graduates are hired by community-based organizations, government agencies, hospital and healthcare organizations, social services departments, the criminal justice system, school systems, private businesses, and research firms.

Degree Programs

BA in Sociology (p. 1094)

MA in Sociology (p. 1095)

Special Features

• Sociology students are encouraged to become involved in the internship program. Though it is not mandatory, internships provide an excellent way to explore the real world of sociology outside of the classroom.

• The Sociology Club’s mission is to promote the professional, intellectual, and personal growth of our student members. Alpha Kappa Delta (AKD) is an international honor society for Sociology majors.

• Majors learn statistical analysis of social data, computer processing of data and the SPSS computer program. Students are encouraged to learn several computer languages and the use of census data for social and regional planning. Student research projects may be selected for presentation in programs throughout the state.

• Thematic areas of studies include ethnic and race relation, immigration, crime and deviance, social inequality, socialization and interaction, globalization, and social change.

Career Possibilities

Public Health Statistician · Demographer · Recreational Specialist · Social Worker · Urban Planner · Correctional Counselor · Youth Counselor · Criminologist · Social Ecologist · Public Relations Consultant · Interviewer/Researcher · Statistician · Population Analyst · Public Opinion Analyst · Migration Specialist · Parole/Probation Officer · Employment Counselor · Teacher · Writer/Journalist · Management Analyst · Budget Analyst · Government Research Analyst

3 Units

General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall, Spring

Introduction to the field of sociology; its basic concepts and principles; the analysis and explanation of culture, personality, social institutions, social change, population, social processes and collective behavior.
SOC 2.  You, Sociology and the University.  
Term Typically Offered: Fall, Spring

This course is an introduction for students to the campus, campus resources, and the department of Sociology at Sac State. The goal is to connect students to information and resources to help them be successful as students in the Sociology program at CSUS, as well as clarify the process for success within, throughout, and beyond the Sociology program. This course is for all sociology majors. The class will be taught as a hybrid class.

Note: Required to be taken during first semester students changes or adds the major.

Credit/No Credit

General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall, Spring

Introduction to major social problems in the U.S., with an emphasis on systemic problems, such as economic, racism and sexism. Problems in major social institutions such as the family, social services, criminal justice and the environment are also addressed.

Term Typically Offered: Fall, Spring

An exploration of social issues that contemporary families face every day with an integration of the life course perspective and sociopsychological viewpoint. Issues covered may include varying family constellations, mate selection, intimacy, communication, adjustment, cohesion, attachment, aging, foster care and adoption, gender, race/ethnic/cultural influences, social stratification, family/partner violence, health, and social policy.

General Education Area/Graduation Requirement: Critical Thinking (A3)
Term Typically Offered: Fall, Spring

Introduces basic steps in the research process and/or basic steps in critically evaluating discussions on social issues. Students are taught to recognize common errors through the analysis of non-technical applied research and/or through newspapers and sociological articles about social issues and problems. Emphasizes the logical steps involved in thinking critically about social research and/or social problems such as quality of operational definitions, weaknesses in research design, sampling errors, value assumptions, logical consistency between premises and conclusions, and the structure of arguments.

General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall, Spring

Introduces the concepts utilized by sociologists in the analysis of controversial issues in crime and social control, e.g., norms, roles, subcultures, labeling, social conflict, social stratification, racism, sexism, etc. Particular attention is paid to sources of data and trends over time. Issues covered include, but are not limited to: capital punishment, drugs and drug policy, domestic violence, abortion, driving under the influence, police use of deadly force, private prisons and juvenile justice reform.

SOC 101.  Introduction to Statistics for Sociologists.  
Prerequisite(s): Sociology majors only
Term Typically Offered: Fall, Spring, Summer

Provides students with an overall view of the role and techniques of statistics in the presentation and interpretation of social science data. Lectures emphasize descriptive statistics: measures of central tendency and variability, and association and correlation. Introduction is given to statistical inference: sampling distributions, hypothesis-testing, and estimation. Lab sessions provide demonstrations and training in the practical application of concepts and techniques dealt with in lectures. Students learn to use the computer as an aid in data processing and analysis.

SOC 101X.  Collaborative Practice for SOC 101.  
Prerequisite(s): SOC 101.
Term Typically Offered: Fall, Spring

SOC 101X Collaborative Practice for SOC 101. Discussion, 1 hour. Students concurrently enrolled in SOC 101 work collaboratively on, and discuss, problem sets designed by the SOC 101 instructor. Pedagogical strategies that encourage active, engaged learning are employed to facilitate student understanding and success in SOC 101.

Credit/No Credit

Prerequisite(s): SOC 101; Sociology majors only
Term Typically Offered: Fall, Spring, Summer

Students will be introduced to the basic steps in research; problem definition, research design, sampling, data collection methods, and analysis. Laboratory exercises reinforce methodological processes, including finding and evaluating existing research studies, operationalizing concepts, developing questionnaires, and analyzing primary data. Students will learn how to process and analyze both qualitative and quantitative data, including analytic induction, manipulation of computerized data files, bivariate and multivariate analysis, table construction, and preparation of written research reports. Lab exercises reinforce computer and statistical skills.

SOC 103.  Advanced Sociological Analysis.  
Prerequisite(s): SOC 101 and SOC 102
Term Typically Offered: Fall, Spring

An advanced course in research design and analysis. Introduces students to advanced data analysis techniques and how to use them to investigate social problems and issues. Students will build on the knowledge they have accumulated in previous courses in sociological research methods and theory to design and complete a research project. Specific methodological strategies taught will vary, and could include regression analysis, ethnography, comparative-historical methods, qualitative interviewing, evaluation research and longitudinal survey analysis.

Note: May be repeated for credit

SOC 106.  Births, Deaths and Borders.  
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall, Spring

Studies population including growth and decline, fertility and mortality trends, migration, human ecology, and the interrelationship of population and socioeconomic change.
SOC 110. Urban Life and Problems.  3 Units
Term Typically Offered: Fall, Spring

Takes a political economic approach to urban development, with special emphasis on the roles played by various social groups and institutions. Particular attention is given to the effects of urban growth, oppositional movements to growth and the global developments that affect urban conditions.

SOC 118. Chicano Community.  3 Units
General Education Area/Graduation Requirement: GE AREA D, Race & Ethnicity Graduation Requirement (RE)
Term Typically Offered: Fall, Spring

Analyses the institutions, norms, values, and traditions of the Chicano community. Included is an examination of the Chicano community's progress in mainstream American life with attention to the effect of ethnocentrism, racism and class.

SOC 120. Ethnic and Race Relations.  3 Units
General Education Area/Graduation Requirement: GE AREA D, Race & Ethnicity Graduation Requirement (RE)
Term Typically Offered: Fall, Spring

Analyzes relations among various racial, religious, nationality, and gender groups as they interact with racism, ethnocentrism and class in the U.S. and the world.

SOC 122. Immigration Studies.  3 Units
Term Typically Offered: Fall, Spring

Examines the social phenomena of labor migration, immigration, and transnationalism, and places their origins and development in the context of political-economic national inequalities. Advances an understanding of why societies experience migration, immigration, and transnationalism, and evaluates competing and complementary theoretical frameworks explaining these migratory processes, particularly as they relate to the U.S. Special attention will be given to race, gender, and class relations as impacted by labor migration processes.

SOC 123. Black Studies in Sociology.  3 Units
Term Typically Offered: Fall, Spring

Introduces students to the sociological analysis of Black American life in the U.S. - the complex phenomena of Black issues, emerging theories of race, and the cumulative scholarship on black identity, experience, socio-economic status, and social organization. Focus is on the original contributions of social scientists to Black Studies in Sociology.

SOC 124. Social Justice in Interdisciplinary Perspective.  3 Units
Prerequisite(s): Sophomore standing or instructor permission.
Term Typically Offered: Fall, Spring

Examines the nature and forms of social justice and injustice. Key philosophical and theoretical models and debates over the meaning of social justice, using historical and contemporary examples to highlight important concepts and controversies are addressed. Faculty from different departments within SSIS, and occasionally from other colleges, will address how their discipline understands and analyzes issues of social justice. Students will be encouraged to critically assess the assumptions of various perspectives on social justice, and to address the relationship of academe and social activism in achieving social justice. Cross listed as ANTH 130, ID 124, ENVS 124, ETHN 124 and FACS 124. Only one may be counted for credit.

SOC 125. Social Inequalities.  3 Units
Prerequisite(s): SOC 1 or equivalent.
Term Typically Offered: Fall, Spring

Examination of the ways race, class and gender, as well as the intersection of all three, affect the distribution of valued resources in a society. Other social inequalities such as age, sexual orientation, or nationality, etc. may also be examined. Attention is given to struggles to change or preserve economic and political inequalities.

SOC 126. Sociology of Gender.  3 Units
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall, Spring

Examines how gender designation of "male" and "female" impacts an individual's life; explores the social construction of masculinity and femininity in the family, school, workplace, everyday interactions, and within racialized and colonized societies; studies the consequences of gender difference and inequality that result in violence and abuse, sexual harassment, hate crimes, wage differentials and unequal opportunities.

SOC 127. Men, Masculinity and Society.  3 Units
Term Typically Offered: Fall, Spring

Introduces students to the field of men and masculinity. Examines the construction of masculinity in sports, family, work and other social relationships, showing how it affects and is affected by people, institutions and society. Explores the diverse experiences based on race, class, occupation, physical ability and sexuality, and the implications for people from such diverse groups.

SOC 128. Sociology Of Sexuality.  3 Units
Prerequisite(s): SOC 1 or instructor permission.
Term Typically Offered: Fall, Spring

Studies sexuality including historical and cultural differences in sexual attitudes, beliefs and behaviors. Also examines the mutual influence of sexuality and social institutions, such as the family, the economy, politics and religion.

SOC 129. Social Change and Migration in Latin America.  3 Units
Term Typically Offered: Fall, Spring, Summer

This course examines the social, political, and economic changes many societies underwent in Latin America throughout the 20th and 21st century, the role the U.S. played in shaping these changes, how this past has shaped today's U.S.-Latin American relations, and how this interconnectedness has shaped migration to the U.S. Focus will be on specific case studies and using a sociological perspective to study and understand these social changes globally and locally.

SOC 130. Political Sociology.  3 Units
Prerequisite(s): SOC 1 or equivalent.
Term Typically Offered: Fall, Spring

Analyzes political order and change from the viewpoint of cultural values and the institutional structure of societies. Examines group behavior patterns related to ideology, elites, masses, classes, movements, parties, and other power groups. Surveys differing theories and methodologies for the study of political processes across cultures and societies.
SOC 133.  Sport in a Global Perspective.  3 Units
Prerequisite(s): GWAR certification before Fall 09; or WPJ score of 80+; or 3-unit placement in ENGL 109M or ENGL 109W; or 4-unit placement in ENGL 109M or ENGL 109W and co-enrollment in ENGL 109X; or WPJ score 70 or 71 and co-enrollment in ENGL 109X.
General Education Area/Graduation Requirement: Writing Intensive
Graduation Requirement (WI)
Term Typically Offered: Fall, Spring

Examines sport in a global context, focusing on the dynamic nature of sports in response to changes in society. Addresses the effect sport has on both the society and the individual, from socialization to nationalism. Focuses on both participants (youth, amateurs, professionals) and spectators (parents, fans, etc.) at all levels of involvement, from community to international competition. Highlights cross-cultural differences in the relationships between sport and other social institutions such as government, corporations, and the media.

SOC 134.  Sociology of Film.  3 Units
Term Typically Offered: Fall, Spring

Introduces the "Sociological Imagination" by linking the personal histories found in films to larger social structures. The evolution of important contemporary global and domestic social issues is discussed by analyzing the sociological content of major motion pictures. The socio-historical development of the American film industry is also examined to explore its ideological role in challenging and perpetuating various forms of class, race, and gender discrimination.

SOC 135.  Sociology of Popular Culture.  3 Units
General Education Area/Graduation Requirement: Humanities (Area C2)
Term Typically Offered: Fall, Spring

Analyzes social processes that produce popular culture by contrasting interrelationships between institutional power structures and collective behavior. Examines theories of popular culture, mass movements, and individualism; social change, cultural hegemony, sub-cultures, and organizational studies.

SOC 136.  Social Movements.  3 Units
Prerequisite(s): SOC 1 or instructor permission.
Term Typically Offered: Fall, Spring

Analyzes old and new social movements — pre-political and political, cultural and identity types — class, labor, feminist, ethnic, environmental, left and right. Challenges by movements to institutional order. Surveys differing theories and methodologies for the study of movements and degree of change (reform, revolutionary) across cultures and societies.

SOC 137.  Sociology of Science.  3 Units
Term Typically Offered: Fall, Spring

Examines paradigm changes of science in society and how views of science and technology are socially constructed. Analyzes the representations of scientists, scientific inquiry, and technological innovation. Explores the ways in which science has driven social change, and vice-versa.

SOC 138.  Environmental Sociology.  3 Units
Term Typically Offered: Fall, Spring

Studies human society, the natural environment, and their mutual interactions. Examines environmental sociology at several levels, from the micro level of individual communities to the meso level of government policies to macro theoretical considerations. Analysis of environmental issues in a global context also included.

SOC 139.  Animals in Society.  3 Units
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall, Spring

Examines social relationships between humans and animals as pets, companions, workers, entertainers, and food. Analyzes the representations of animals. Studies our relationships with animals both on the level of social groups and as individuals. Applies sociological approaches to the study of human-animal relationships, including the social movements around animal rights.

SOC 140.  Sociology of Education.  3 Units
Prerequisite(s): SOC 1 or equivalent.
Term Typically Offered: Fall, Spring

Examines the organization and functions of educational institutions; the rise of mass education and changes in educational systems to the present; the role of teachers, parents, and schools in education; the impact of gender, race, and class on educational outcomes and processes.

SOC 144.  Sociology of Health and Illness.  3 Units
Prerequisite(s): SOC 1 or instructor permission.
Term Typically Offered: Fall, Spring

Examines the social contexts of health, illness, and medical care. Emphasizes the debates and contrasting perspectives that characterize the sociological study of health and illness. Topics include the social, global, environmental, and occupational factors influencing health and illness; the politics surrounding physical and mental illness; the patient’s perspective on illness; ethical issues in medicine as they relate to medical technology; and health care reform. The influence of health status on identity and interaction will also be addressed.

SOC 146.  Sociology of Aging.  3 Units
Term Typically Offered: Fall, Spring

Analyzes the process of aging in the context of social structure and processes. Specifically, it deals with such issues as the age structure of society, social values and norms that define the aged, social stratification and aging, social institutions and the aged, theoretical and methodological issues in social gerontology.

SOC 150.  Social Psychology.  3 Units
Term Typically Offered: Fall, Spring

Examines major principles governing face to face interaction and their application in understanding the student’s own experience: creating and preserving meaning, “realities” and selves through dramaturgy, negotiation and power; the relationship between status and intimacy; the impact of status resources (such as race and gender) on the status assignment process; the self concept; the role of emotions in social life.

SOC 155.  Criminology.  3 Units
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall, Spring

Examines social dimensions — causes and characteristics — of adult crime and deviant behavior in American society. Makes some international comparisons. Police, courts and prisons are examined. Special attention is given to current issues in crime and deviance.
SOC 156. Delinquency.
**General Education Area/Graduation Requirement:** GE AREA D
**Term Typically Offered:** Fall, Spring

Examines social determinants of juvenile delinquency, including family, urban conditions, social-psychological and sociological factors. Analyzes the juvenile justice system, including law enforcement, the courts and community treatment programs.

**Term Typically Offered:** Fall, Spring

Sociologically analyzes American courts and prisons from prosecutorial intake through sentencing and incarceration. Emphasis is on the role of social factors (in particular race, class and gender) in decision-making practices at each stage of processing. Topics will include, but are not limited to: preventive detention, prosecutorial intake, plea-bargaining, jury selection, pre-sentence investigation reports, sentencing, and legal reconstruction of the American prison in the modern era.

SOC 158. Sociology of Deviance.
**Term Typically Offered:** Fall, Spring

Introduces students to the history of attempts to define and explain deviant behavior; explains social conditions and processes associated with careers of deviants; examines relationship of deviance to problems of social control.

SOC 160. Asian Societies.
**General Education Area/Graduation Requirement:** Humanities (Area C2)
**Term Typically Offered:** Fall, Spring

Cross-cultural study focuses on Japanese and Chinese societies and cultures and their influences on other Asian developments. Emphasizes their distinctive institutions, norms, values, and traditions in relation to contemporary social, economic, and political processes.

SOC 162. Middle Eastern Societies and Culture.
**General Education Area/Graduation Requirement:** Humanities (Area C2)
**Term Typically Offered:** Fall, Spring

Discusses the fundamental aspects of Middle East Societies covering such topics as population, family, women, patterns of living, social stratification, education, economic development, politics and armies in the Middle East.

SOC 163. Conflict, Oil and Development in the Middle East.
**General Education Area/Graduation Requirement:** GE AREA D
**Term Typically Offered:** Fall, Spring

Examines in detail the major sources of conflict in the Middle East with special reference to the Arab-Israeli conflict, the arms buildup in the Arabian-Persian Gulf, energy crisis and the multi-national aspect of Middle East oil. Attempts to discuss the impact of these conflicts on the processes of social and economic development.

**General Education Area/Graduation Requirement:** GE AREA D
**Term Typically Offered:** Fall, Spring

Examines globalization and its effect on local societies, including the impact of globalization on local labor and work practices, the social organization of local firms and business enterprises, local social structures such as gender, class, race/ethnicity, and local social patterns such as consumption and leisure activities.

SOC 166. The Family.
**Term Typically Offered:** Fall, Spring

Introduces students to the sociology of the family including an examination of the family in various cultures with the emphasis on the American family in all its many forms.

SOC 168. Self and Society.
**Prerequisite(s):** GWAR certification before Fall 09; or WPJ score of 80+; or 3-unit placement in ENGL 109M or ENGL 109W; or 4-unit placement in ENGL 109M or ENGL 109W and co-enrollment in ENGL 109X; or WPJ score 70 or 71 and co-enrollment in ENGL 109X.
**General Education Area/Graduation Requirement:** Writing Intensive Graduation Requirement (WI)
**Term Typically Offered:** Fall, Spring

Examines the relationship between the individual and society: social interaction, human development, behavior in groups and collectivities, personality and social structure. Theories and empirical studies.

SOC 169. Changing American Family.
**Term Typically Offered:** Spring only

Analyzes the American family, past, present, and future, focusing on explanation and consequences of changes in child-bearing, courtship, marriage, and the interrelationships between the individual and the family and society. Focuses on connecting course material to real world organizations and programs in the community that are associated with or linked to families. Per week: lecture two hours; fieldwork in the community two to three hours.

SOC 170. Sociology of Children and Adolescents.
**Term Typically Offered:** Fall, Spring

Introduces students to the sociology of childhood and adolescence, focusing on theoretical foundations, methodological challenges, and empirical examination of youth from preschool through high school. Focuses on peer relations within wider contexts shaped by gender, race, and social class.

SOC 171. Sociology of Religion.
**Term Typically Offered:** Fall, Spring

Acquaints students with the sociological foundations of religion in society. Emphasis is on the history, development and overall structure of the institution of religion, its relation to social, ethnic and class-based groups and its effect on society in general, and how its social development in America differs from other cultures.

SOC 175. Work and Occupations.
**Term Typically Offered:** Fall, Spring

Examines the social organization of work and economic organization; the rise of industrial society and changes in workplace relations to the present; the role of technology and ideology in the workplace; industrial reforms and alternative forms of economic organization.
SOC 176. Labor and the American Social Structure. 3 Units
Prerequisite(s): GWAR certification before Fall 09; or WPJ score of 80+; or 3-unit placement in ENGL 109M or ENGL 109W; or 4-unit placement in ENGL 109M or ENGL 109W and co-enrollment in ENGL 109X; or WPJ score 70 or 71 and co-enrollment in ENGL 109X.
General Education Area/Graduation Requirement: Writing Intensive
Term Typically Offered: Fall, Spring
Introduction to the study of labor in the U.S., including the nature of work, characteristics of the work force, and an overview of contemporary labor and industrial relations systems within the framework of current U.S. economic and political developments.
Cross Listed: LBR 100; only one may be counted for credit.

SOC 185. Bullying as a Social Experience. 3 Units
Term Typically Offered: Fall, Spring
This course educates students on bullying as a social experience, introducing how social forces, environment and context impact the culture of bullying. Students will develop an understanding about how programs and policies impact bullying rates based on social theoretical perspective. Students will gain a better understanding of how research is related to intervention and prevention practices. Then, from a whole school approach, using the resources available to the school, students will implement different components of an anti-bullying program at a school site.

SOC 190. Sociology of Small Groups. 3 Units
Prerequisite(s): SOC 1 or equivalent.
Term Typically Offered: Fall, Spring
Examines social structure and social determinants of behavior in small groups; socialization, social control, social change, leadership, social ranking, social conflict and morale.

SOC 191. Culminating Course in Sociology. 1 Unit
Prerequisite(s): 85 units need to be completed prior to start of the course.
Term Typically Offered: Fall, Spring
The course offers Sociology students a culminating experience that has students reflect on their experience as a student in the sociology major, their success in the learning goals and outcomes of the Sociology program, and ultimately engage with their future career goals and their preparation to reach them. This class will be taught fully online.
Note: Students are expected to take this class during their second to last semester (the penultimate semester).
Credit/No Credit

SOC 192. Sociological Theory. 3 Units
Prerequisite(s): SOC 1.
Term Typically Offered: Fall, Spring
Surveys the history of sociological theory from Comte to the present.

SOC 193A. Mentoring in Sociology. 1 Unit
Prerequisite(s): Instructor permission.
Term Typically Offered: Fall, Spring
Provides opportunity for freshman, sophomores, and juniors majoring in sociology to be mentored for improved student success and retention. Students receive peer mentoring to facilitate closer integration into campus community through participation in events, organizations, and conferences sponsored by the sociology department. Students learn how to build productive relationships with professors and receive timely advising for better retention and success rates. Course does not count toward sociology major but toward degree requirements.
Note: May be repeated twice for credit; Three times with exception as determined by the instructor.
Credit/No Credit

SOC 193B. Peer Mentoring in Sociology. 2 Units
Prerequisite(s): One year of residency at Sac State; 2.8 GPA required; Open only to Sociology majors.
Term Typically Offered: Fall, Spring
Provides opportunities for junior and senior sociology majors to mentor and gain practical out-of-class experience. Students learn the principles of mentoring and contribute to student retention and success and close the retention gap. Course provides practical orientation and guidance for the best practices in mentoring that contribute to a positive campus culture.
Note: May be repeated twice for credit; Three times with exception to be determined by the instructor.
Credit/No Credit

SOC 194. Special Topics in Sociology. 3 Units
Prerequisite(s): SOC 1 or instructor permission.
Term Typically Offered: Fall, Spring
Examines contemporary issues and social developments within the research specialization of department faculty. Provides a forum to discuss and evaluate controversies and advancements in the discipline of sociology, including theory and methodology.

SOC 195. Internship and Fieldwork. 1 - 3 Units
Prerequisite(s): Instructor permission.
Term Typically Offered: Fall, Spring
Supervised internship and fieldwork experience in a variety of settings: (1) public or private agencies in the Sacramento community, and (2) ethnic and/or minority communities. Supervision is provided by authorized persons in the field and collaborative supervision is provided by sociology faculty at Sacramento State.
Credit/No Credit
SOC 198.  Linking Statistics Education and Practice.  1 - 2 Units
Prerequisite(s): SOC 101 and instructor permission
Term Typically Offered: Fall, Spring
Advanced exploration of the scholarship of learning as applied to sociological methods and/or data analysis. Students will work independently on an applied semester project, but will also attend agreed upon number of computer lab hours each week and engage in course activities with a focus on how to best structure learning opportunities and apply content.
Note: Admission requires approval of professor and Department Chair. No more than 3 units from SOC 195, SOC 198, or SOC 199 combined may be applied to the Sociology upper division major requirement.

SOC 199.  Individual Study Projects.  1 - 3 Units
Term Typically Offered: Fall, Spring
Individual projects or directed reading; open only to students who appear competent to carry on individual work. Admission requires approval of the sponsor of the project and the Department Chair.
Credit/No Credit

SOC 200.  Orientation and Writing for Sociological Graduate Studies.  3 Units
Prerequisite(s): Admission to MA in Sociology program.
Term Typically Offered: Fall only
This course introduces students to our graduate program and provides students with insights into how the profession works. Students will learn about campus and departmental resources that will aid them in their studies. This class fulfills the requirements for the required Graduate Writing Intensive Course and will train students in the skills needed for successfully writing sociological papers at a graduate level. Students will also be introduced to department faculty who will share their research interests and writing strategies.

SOC 200A.  Orientation to Graduate Studies in Sociology.  1 Unit
Prerequisite(s): Classified graduate status.
Term Typically Offered: Fall, Spring
Describes our graduate program, clearly explains our requirements and standards for successful completion of the M.A., shows students how the profession works and how to work in the profession (public submissions, conference presentations, job searches), and explains how to get through the program in a timely manner with a strong thesis. We will discuss Ph.D. programs and the application process, job opportunities and the role of professional sociologists outside academe.

SOC 200B.  Thesis Prospectus/Project Preparation Seminar.  2 Units
Prerequisite(s): Completion of a minimum of 6 hours of graduate study. Completion of (or concurrent enrollment in) SOC 214 is recommended.
Term Typically Offered: Fall, Spring
Provides students with faculty and peer support for the process of developing a draft of a thesis prospectus or project proposal. This includes the clarification of expectations, familiarization with research resources, and support provided through feedback in a structured environment.
Credit/No Credit

SOC 210.  Urban Sociology.  3 Units
Prerequisite(s): Classified graduate status.
Term Typically Offered: Fall, Spring
Critically examines major theories, research, and debates in the field of urban sociology, including social ecology, Marxist, subcultural, and postmodernist perspectives. Course materials will be framed within two main themes; the dynamics of cooperation and conflict under urban conditions, and the tension between private interests and public life in urban settings. Methodological emphasis will be on case studies, ethnographic, and social historical analysis.

SOC 214.  Research Methods.  3 Units
Term Typically Offered: Fall, Spring
Deals specifically with such issues as the role of research within the discipline, the ethics of conducting research, the rationale behind field and survey methods, the validity and reliability of data collected through these methods and alternative approaches to data collection.
Note: Open to classified graduate students in sociology, all others by instructor permission only; Graduate Writing Intensive

SOC 215.  Data Analysis.  3 Units
Prerequisite(s): SOC 101 or equivalent, or instructor permission.
Term Typically Offered: Fall, Spring
Introduces techniques used to analyze sociological data. Emphasis will be placed on the basic concepts of quantitative models used to explore causality, along with an introduction to software to carry out multivariate analysis. Qualitative analytical techniques and software will also be introduced.

SOC 220.  Seminar: Social Change.  3 Units
Prerequisite(s): Classified graduate status in sociology; all others by instructor permission only.
Term Typically Offered: Fall, Spring
Course deals with main theoretical orientations in sociology representing radical, liberal and conservative viewpoints on social change. Examines the historical context of events that affected Western countries such as the Industrial Revolution, French Revolution, and the emergence of nationalism and human rights. Course approach is theoretical, historical and global.

SOC 222.  Immigration and Coloniality.  3 Units
Term Typically Offered: Fall, Spring
This course focuses on human migration and its modern origins and development in a global context of political-economic inequalities. The course offers historical, comparative, and theoretical perspectives on immigration and incorporation of immigrants to the United States. It examines competing and complementary theories on migration, and assesses their explanatory power on the basis of historical, empirical, and standpoint evidence. This graduate elective course aligns with various program learning objectives including critical thinking, intercultural knowledge and competency; and inquiry and analysis.

SOC 225.  Social Stratification.  3 Units
Prerequisite(s): Classified graduate status in sociology; all others by instructor permission only.
Term Typically Offered: Fall, Spring
Analyzes contemporary issues in stratification literature including class, status, power, sex/gender, identity, ethnicity, mobility, equality/inequality. Discusses differing theories, methodologies, and controversies according to student interests.
**SOC 226. Sociology of Gender.** 3 Units
Term Typically Offered: Fall, Spring

Intended to introduce graduate students to diverse theories that explain gender relations in contemporary society. Provides a critical perspective on how we construct men’s and women’s identities and how the consequences of such a construction affect institutions, culture and society. Broken up in four sections: origins of gender inequality and issues surrounding research, theoretical perspectives, marginalized groups, and gendered issues in society.

**SOC 230. Seminar: Social Organization.** 3 Units
Prerequisite(s): Classified graduate status or instructor permission.
Term Typically Offered: Fall, Spring

Analyzes and critiques institutional structure. Studies shared understanding in groups, corporations, communities, institutions or societies and their hierarchical order.

**SOC 235. Social Psychology.** 3 Units
Prerequisite(s): Open to classified graduate students in sociology, all others by instructor permission only.
Term Typically Offered: Fall, Spring

Examines advanced social psychology. Focuses on symbolic interactionism, ethnomethodology and other recent developments in sociological social psychology, phenomenology, humanistic social psychology and critical reflexive sociology.

**SOC 238. Environmental Sociology.** 3 Units
Term Typically Offered: Fall, Spring

Examines the complex relationship between human society and its surrounding environment. Theoretical perspectives are complemented by empirical research on environmental issues. Special attention is given to issues relating to the local and regional California environment. Analyzes environmental issues in a global context.

**SOC 240. Seminar: Sociological Theory.** 3 Units
Prerequisite(s): Classified graduate status in sociology; all others by instructor permission only.
Term Typically Offered: Fall, Spring

Analyzes and critiques terms and issues in social and sociological theory including levels of social reality and differing perspectives - positivism, idealism, realism, post-modernism, feminism, etc.

**SOC 255. Social Research in Crime and Deviance.** 3 Units
Term Typically Offered: Fall, Spring

Comprehensively reviews and evaluates major sociological theories of crime and deviance, methods of studying crime and deviance, current empirical research in crime and deviance, empirical testing of sociological explanations of crime and deviance, and empirical evaluation of crime and deviance control policy.

**SOC 260. Contemporary Issues of the Middle East and North Africa.** 3 Units
Term Typically Offered: Fall, Spring

Discusses in-depth several contemporary issues such as the political dimension of Islam, population growth and food security, oil and development, regional conflict, national integration and forces of modernization, etc. The selection of the topics will depend on current events.

**SOC 265. Race and Ethnic Relations.** 3 Units
Term Typically Offered: Fall, Spring

Examines the social constructs of race and ethnicity as "central organizing principles" in the making and development of our modern world, particularly in the U.S., and how they have interacted with class and gender to create and maintain cultural and material social inequalities. Evaluates competing and complementary theoretical frameworks explaining how race and ethnicity affect individual and group social-structural location (e.g., class position, educational attainment, and political power).

**SOC 266. Sociology of The Family.** 3 Units
Prerequisite(s): Classified graduate status or instructor permission.
Term Typically Offered: Fall, Spring

Sociologically examines the family, with an emphasis on the contemporary American family. The numerous stages and variations of the family life cycle will be considered, with an emphasis on changes and the causes and consequences of the changes.

**SOC 274. Special Topics in Sociology.** 3 Units
Prerequisite(s): Open to classified graduate students in sociology; all other sociology graduate students by instructor permission
Term Typically Offered: Fall, Spring

Examines contemporary issues and social developments within the research specialization of department faculty. Provides a forum to discuss and evaluate controversies and advancements in the discipline of sociology including theory and methodologies.

**Note:** May be repeated twice for credit

**SOC 294. Special Topics in Sociology.** 1 - 3 Units
Prerequisite(s): Instructor permission.
Term Typically Offered: Fall, Spring

Examines advanced topics in specialized areas. Individual topics vary by term. Credit/No Credit

**SOC 295. Internship and Fieldwork.** 1 - 3 Units
Prerequisite(s): Classified graduate status or instructor permission.
Term Typically Offered: Fall, Spring

Supervised internship and fieldwork experience in a variety of settings: (1) public or private agencies in the Sacramento community, (2) ethnic and/or minority communities, and (3) educational institutions including area community colleges and universities. Supervision is provided by authorized persons in the field and collaborative supervision is provided by sociology faculty at Sacramento State. Credit/No Credit

**SOC 299. Special Problems.** 1 - 3 Units
Term Typically Offered: Fall, Spring

Individual projects or directed reading.

**Note:** Open only to students who appear competent to carry on individual work. Admission requires approval of the sponsor of the project and the Department Chair. Credit/No Credit

**SOC 500. Culminating Experience.** 3 - 6 Units
Prerequisite(s): Advancement to candidacy, successful thesis prospectus hearing, and a minimum 3.0 GPA.
Term Typically Offered: Fall, Spring

Completion of a thesis or a project. Thesis: the 6 unit master’s thesis requirement must be completed under the direction of the student’s thesis committee. Project: the 6 unit project requirement must be completed under the direction of the student’s project committee.
BA in Sociology

Units required for Major: 43
Total units required for BA: 120

Program Description
The sociology major and minor have few specific requirements, allowing
the student flexibility in selecting courses in the various subject areas
covered in the program. The areas covered are:

1. social theory and methods of inquiry;
2. advanced studies, such as family, immigration, education, politics, religion, sport and environment;
3. thematic areas of crime and deviance, diversity and inequality, socialization and interaction, globalization, and social change.

Race and Ethnicity in American Society (RE) 3
Foreign Language Proficiency Requirement 6

Admissions for this program have been suspended for the 2023/2024 Academic Year. Please contact the Department of Sociology (https://www.csus.edu/college/social-sciences-interdisciplinary-studies/sociology/) for further information.

Total units required for MA: 30

Program Description

The Master of Arts Program in Sociology is designed to provide a broad academic foundation for a variety of professional opportunities and community needs such as survey research, evaluation research, social problems analysis, career interest in community organizations, and teaching.

The program offers small seminars and allows for close student-faculty contact. The program encourages students to seek internships and fieldwork, and participate in observation experience among the many government, voluntary, and private agencies in the Sacramento area. Students concentrate on theory and research methods as well as areas of specialization. Following coursework, students write a thesis based on original research.

Some graduates of the program enter Ph.D. programs at a variety of universities throughout the United States and others are employed in many state, local, and city government agencies and private businesses doing evaluation research, systems analysis, social problems analysis, and social impact assessment.

Admission Requirements

Admission as a classified graduate student in Sociology requires:

- a baccalaureate degree;
- a minimum 3.0 GPA in the last 60 units attempted;
- satisfactory completion of a minimum of 18 units of undergraduate work in Sociology, including one course each in theory, statistics, and methodology, with a minimum 3.0 GPA;
• two letters of recommendation from faculty members in Sociology who know the applicant well enough to assess his/her potential for graduate study.

Students who have deficiencies in admission requirements that can be removed by specified additional preparation may be admitted with conditionally classified graduate status. Any such deficiencies will be noted on a written response to the admission application.

Admission Procedures
Applications are accepted as long as room for new students exists. All prospective graduate students, including Sacramento State graduates, must file the following with the Office of Graduate Studies, River Front Center 215, (916) 278-6470:

• an online application for admission;
• two sets of official transcripts from all colleges and universities attended, other than Sacramento State; and
• two letters of recommendation from Sociology faculty members to the Graduate Coordinator in the Sociology Department.

For more admissions information and application deadlines please visit http://www.csus.edu/gradstudies/.

Minimum Units and Grade Requirement for the Degree
Units required for the MA: 30

Minimum Cumulative GPA: 3.0

Advancement to Candidacy
Each student must file an application for Advancement to Candidacy, indicating a proposed program of graduate study. This procedure should begin as soon as the classified graduate student has:

• removed any deficiencies in admission requirements;
• completed at least 15 units in the graduate program with a minimum 3.0 GPA;
• completed a draft of the thesis prospectus; and
• take a Graduate Writing Intensive (GWI) course in their discipline within the first two semesters of coursework at California State University, Sacramento.

Advancement to candidacy forms are available in the Department Office. The student fills out the form after planning a degree program in consultation with a Sociology Graduate Advisor. The completed form should be returned to the Office of Graduate Studies for approval.

Note: A foreign language is not required for the degree. However, students who plan further graduate study are encouraged to study French, German, or Spanish since proficiency in one of these is sometimes required in doctoral programs.

Women's and Gender Studies

College of Social Sciences and Interdisciplinary Studies

Program Description
Women's and Gender Studies is a dynamic interdisciplinary field preparing students to be future leaders, scholars, and social justice activists. We are dedicated to studying the social production of gender and women's experiences in relation to formations of sexuality, race, class, nationality, ability, ageism, and other categories of difference. Scholarship and research in Women's and Gender Studies emphasize the importance of connecting what students learn in the classroom to political projects and personal experiences.

Our curriculum empowers students to be agents of change in their communities and society. It provides them tools to examine relations of gender in local, national, and global contexts. Our courses situate gender within specific historical and cultural contexts, allowing students to examine how our lives are shaped by social and economic institutions, political movements, and individual experiences. “Putting Theory into Practice” since 1971, we place a strong emphasis on community involvement and activism, and we offer many opportunities for internships and service work credit.

The B.S. in Women's and Gender Studies prepares students for careers in education as professors, teachers, or curriculum specialists; in counseling as school counselors, psychological or family therapists; in law; health; human services; student services; and public service.

Minimum total units required for the BS: 120; 40 units should be upper division.

Faculty

WGS 50. Introduction to Gender & Sexuality. 3 Units
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall, Spring

Introduction to basic concepts and issues informing studies in gender, gay, lesbian, bisexual and transgender (GLBT) identities. Classic and contemporary texts from different cultures will cover biological, historical and social constructions of gender and sexuality. Transformations in family and society, global and intersectional perspectives on GLBT identity, political activism, cultural and social perceptions of gender and sexuality will be discussed.

WGS 75. Introduction to Disability Studies. 3 Units
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall, Spring

This course is an introduction to disability studies. An intersectional approach to knowledge construction about disability will be examined. This interdisciplinary study draws on humanities and social sciences, feminism, medical and scientific literature, and popular sources. How gender, race, class, sexuality, ethnicity, and nationality intersect with disability to shape experience will be analyzed. Historical and contemporary social movements and activism by people with disabilities will also be discussed.

WGS 85. Introduction to Women's & Gender Studies. 3 Units
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall, Spring

Introduction to major topics and issues within feminism. Using interdisciplinary and intersectional perspectives, the course will examine issues in women's and gender studies across the globe. Feminist methods and approaches will be examined using classic and contemporary texts. Topics include intersectionality, LGBTQ studies, domestic violence, reproductive justice, beauty standards, disability, and globalization.

WGS 110. Introduction to Feminist Movements in the United States. 3 Units
General Education Area/Graduation Requirement: GE AREA D, United States History
Term Typically Offered: Fall, Spring

An examination of the institutional structures, practices and ideals contributing to feminist struggles, and achievements of feminist movements in the United States. Including contemporary struggles for social justice by women and LGBTQ people, this course explores how factors of race, class, gender, and sexuality have contributed to the emergence of feminist consciousness and struggles for rights in the United States from the nineteenth century to the present time.

WGS 118. Asian American Women. 3 Units
General Education Area/Graduation Requirement: Humanities (Area C2)
Term Typically Offered: Fall, Spring

Using an interdisciplinary approach, course offers a broad introduction to broad principle values and traditions shaping Asian American women's lives in the U.S. Examines cultural diversity, gender inequality and conflicts between traditions and social practices through critical analysis of literature, film and cultural theories as expressions of identity. Topics covered include: cultural heritage and philosophies, intergenerational conflict, transnationalism, gender roles and socio-economic practices. Comprehensive understanding principle factors governing Asian American women's lives at the nexus of Asian and American cultures. Cross-listed: ETHN 118.

WGS 120. Mother Woman Person. 3 Units
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall only

This course applies principles of feminism to the study of motherhood as social institution and private experience. Students explore family, cultural and social values that influenced their mothers and grandmothers, analyzing the impact of social institutions on their own childhood and adulthood. Students develop awareness of the historic evolution of women's social and private roles and the changing emphasis on woman as mother, wife/sexual companion and wage earning person largely through African American women's social movements.

WGS 121. Women Of The Middle East. 3 Units
General Education Area/Graduation Requirement: Humanities (Area C2)
Term Typically Offered: Fall, Spring

Provides an introduction to historical and contemporary conditions affecting women's lives and contributions to Middle Eastern societies. Readings will be framed with a focus on women within state systems and political life, economic activity, family systems, religious thought and law, health, arts and literature.

WGS 125. Sex & Gender in South Asia. 3 Units
General Education Area/Graduation Requirement: Humanities (Area C2)
Term Typically Offered: Spring, Summer

This course focuses on love, sex & gender in the cultures of South Asia starting with ancient times to the present. The influence of social customs, traditions, religion, and social class on human relationships will be examined using various texts and films. Gender and sexual identity, sexual desire, eroticism, sex role stereotyping, violence against women, gay and transgender people, subversive desires and the threat they post to patriarchal structures will be explored.
WGS 133. Gender & Health. 3 Units
General Education Area/Graduation Requirement: Further Studies in Area B (B5)
Term Typically Offered: Fall, Spring

This course explores feminist analyses of medicine. An intersectional approach to how medical science constructs knowledge about health will be examined. This interdisciplinary study draws on humanities and social sciences; feminism; medical, scientific, and clinical literature; popular sources; and web discourses. How gender, race, class, sexuality, ethnicity, nationality, and disability intersect and shape behavior and experience will be analyzed. Contemporary social movements and activism by women and LGBTQIA+ people will also be discussed.

WGS 136. Gender, Race, and Class. 3 Units
Prerequisite(s): GWAR certification before Fall 09; or WPJ score of 80+; or 3-unit placement in ENGL 109M or ENGL 109W; or 4-unit placement in ENGL 109M or ENGL 109W and co-enrollment in ENGL 109X; or WPJ score 70 or 71 and co-enrollment in ENGL 109X.
General Education Area/Graduation Requirement: Writing Intensive Graduation Requirement (WI), Race & Ethnicity Graduation Requirement (RE), GE AREA D
Term Typically Offered: Fall, Spring

Designed to examine the effects of the dynamic interaction of gender, race, and class on women. The social construction of gender, race, and class will also be examined. Other topics to be discussed and researched are the effects of sexism, racism, and classicism on institutions such as academia, business, government, religion, and social movements. Also provides an analysis of effective techniques to end sexism, racism, and classicism.

WGS 137. Women of Color. 3 Units
General Education Area/Graduation Requirement: Race & Ethnicity Graduation Requirement (RE), GE AREA D
Term Typically Offered: Fall, Spring, Winter

This course examines significant issues that have contributed to the historical experiences of cisgender and transgender women of color in the United States. Contemporary resistance to violence and struggles for social justice will also be examined. Topics such as racial and cultural stereotypes, economic exploitation, gender stratification, struggles over identity, immigration status, and community activism and organizing efforts by Black, Native American, Latinx, Middle Eastern and Asian American women will be examined using classic and contemporary feminist readings and films.

WGS 138. Women and Work. 3 Units
Prerequisite(s): GWAR certification before Fall 09; or WPJ score of 80+; or 3-unit placement in ENGL 109M or ENGL 109W; or 4-unit placement in ENGL 109M or ENGL 109W and co-enrollment in ENGL 109X; or WPJ score 70 or 71 and co-enrollment in ENGL 109X.
General Education Area/Graduation Requirement: Writing Intensive Graduation Requirement (WI), GE AREA D
Term Typically Offered: Fall, Spring

Explores topics basic to discussion of women's paid and unpaid work from historical and crosscultural perspectives. Consideration is given to popular conceptions and stereotypes of work and "women's issues" in the industrialized world; the private and public lives of women and men with emphasis on work and social realities; and the maintenance of patriarchy under capitalism, socialism and communism, with some possible feminist "solutions.

WGS 139. Violence Against Women. 3 Units
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall, Spring

Examines the gendered and systemic nature of violence. Focuses on understanding and preventing violence against women. This course investigates oppression and privilege using an intersectional and transnational feminist lens and looks at how gender-based violence is perpetuated through some of the following: sexual harassment and assault, domestic violence, child abuse, medical and psychiatric violence, economic violence, military violence, and state violence. This course also examines the ways that women are individually and collectively combating these various forms of violence.

WGS 140. Latinx Feminist Studies. 3 Units
General Education Area/Graduation Requirement: GE AREA D, Race & Ethnicity Graduation Requirement (RE)
Term Typically Offered: Fall, Spring

This course offers students feminist frameworks for understanding Latinx feminisms as a field of study and political inquiry. Latinx feminisms and their development are mapped alongside queer, trans, Black, Indigenous, women of color, and antiracist feminisms and movements. Centers the creative and critical ways in which Latinx feminists conceptualize oppression, resistance, social transformation, and the abolition of systems of domination. Students will analyze the complexity, heterogeneity, and interconnectedness of U.S. based Latinx feminists.

WGS 144. Women and Theatre: Staging Diversity. 3 Units
General Education Area/Graduation Requirement: Arts (Area C1), Race & Ethnicity Graduation Requirement (RE)
Term Typically Offered: Fall, Spring

Includes study of recent feminist performance theory and criticism and its application to acting, directing, and writing for the theatre. Students will participate in both lecture/discussion and activities, including the creation of a final performance. Lecture two hours; lab two hours. Cross Listed: THEA 144; only one may be counted for credit.

WGS 145. Feminism and the Spirit. 3 Units
General Education Area/Graduation Requirement: Humanities (Area C2)
Term Typically Offered: Fall only

This course examines Goddess cultures and the power of feminist spirituality and healing across different cultures and time-periods using Art & Literature. Sexism in institutionalized religions, advances women are making, and the backlash they are suffering will be discussed. The ‘witch craze’ which began in Europe, how women across the world continue to suffer from accusations of witchcraft today will be covered. We will examine aspects of the modern feminist spiritual movement and its strong ties to the environmental movements.

WGS 146. Women In Art. 3 Units
General Education Area/Graduation Requirement: Arts (Area C1)
Term Typically Offered: Spring only

Study of the unique and important contributions of women to the visual arts (Renaissance to present) and their personal struggle toward success and recognition. The Women’s Art Movement and its impact on education, museums and women’s status in the arts are important topics of this class.
WGS 147. Women & Globalization. 3 Units
Prerequisite(s): Minimum 45 units completed
Term Typically Offered: Fall only

This advanced interdisciplinary course will explore the gendered effects of globalization across the world at local, national, and global scales. Using feminist approaches, the course will examine issues of gender equity and uneven distribution of power created by the interconnection between capitalism, colonialism, and patriarchy. Topics such as economic globalization, war and militarism, tourism, sex trafficking, food security and environmental justice, gender-based violence, healthcare, migration and global activism will be covered in the course.

WGS 150. Introduction to Queer and Trans Studies. 3 Units
Prerequisite(s): WGS 50 or instructor permission.
Term Typically Offered: Fall only

Introduces students to the fields of queer theory and trans theory from a transnational feminist perspective. Includes theoretical approaches to the history of sexuality and the politics of sexual and gender normativity. Places queer and trans studies in conversation with Native studies, disability studies, postcolonial theory, critical race and ethnic studies, and feminist theory.

WGS 166. Gender and Politics. 3 Units
Term Typically Offered: Spring only

This course examines the influence of socially constructed meanings of femininity and masculinity on the political participation of women, candidate selection, election campaigns, and electoral outcomes in executive and legislative offices in the U.S. and worldwide. Students will develop a rich understanding of the relationship between gender and women’s political representation and analyze and discuss institutional, structural, cultural, and historical conditions associated with women’s voting behavior, political advancement, leadership styles, and impacts of political representation on women.

Cross Listed: POLS 166; only one may be counted for credit.

WGS 172A. LGBTQ Histories. 3 Units
Term Typically Offered: Spring only

This course provides an introduction to the study of lesbian, gay, bisexual, transgender, and queer (LGBTQ) histories. Uses an interdisciplinary and comparative approach to explore the historical emergence and development of LGBTQ identities, communities, and political movements. Includes theoretical analysis of the history of gender and sexuality and the practice of historical analysis.

Cross Listed: HIST 172A; only one may be taken for credit.

WGS 175. Gender & Disability. 3 Units
Prerequisite(s): GWAR certification before Fall 09; or WPJ score of 80+; or 3-unit placement in ENGL 109M or ENGL 109W; or 4-unit placement in ENGL 109M or ENGL 109W and co-enrollment in ENGL 109X; or WPJ score 70 or 71 and co-enrollment in ENGL 109X.

General Education Area/Graduation Requirement: GE AREA D, Writing Intensive Graduation Requirement (WI)
Term Typically Offered: Fall, Spring

This interdisciplinary course utilizes texts from various humanities and social sciences disciplines to survey the field of feminist disability studies, with emphasis on intersectional feminist disability theory, narrative, and practice. Attention will be given to historical and contemporary social movements and activism by disabled people, focusing particularly on disability justice. Students will analyze how individual experiences of gender, race, class, sexuality, ethnicity, and nationality intersect with disability to reflect institutional bias against multiply marginalized disabled people.

WGS 180. Seminar in Feminist Theory. 3 Units
Prerequisite(s): WGS 110 or instructor permission.
Term Typically Offered: Spring only

Advanced course providing detailed inquiry into specific feminist theories, including their conceptual framework and development, relationship to other political theories and application to the current practices of feminism.

WGS 195A. Fieldwork in Women's Studies. 1 - 3 Units
Prerequisite(s): Instructor permission.
Term Typically Offered: Fall, Spring

Supervised experience in selected women's organizations and projects in the Sacramento area; for example, the Rape Crisis Center, Women Escaping a Violent Environment (WEAVE), Sacramento Women's Center. Credit/No Credit

WGS 198. Special Topics in Women's and Gender Studies. 3 Units
Prerequisite(s): WGS 85 or WGS 110
Term Typically Offered: Fall, Spring

Examines various topics within the field of women's and gender studies. Different issues will be covered based on the interests and expertise of the faculty teaching the course. Approaches topics from broadly intersectional perspectives using feminist concepts and methods. Potential topics include: Feminism & War; Queer & Trans Migrations; Gender, Sexuality & Mass Incarceration; Gender & Human Rights; Reproductive Justice; Feminist Disability Studies; LGBTQ Health; Black Motherhood; Black Feminist Activism; Gender & Education; Comparative Feminisms.

WGS 199. Special Problems. 1 - 3 Units
Prerequisite(s): WGS 115 and instructor permission.
Term Typically Offered: Fall, Spring

Supervised individual research projects or directed reading specifically related to Women's Studies topics. Should be taken by students who can work on an individual basis. Credit/No Credit
BS in Women’s and Gender Studies

Units required for Major: 36
Total units required for BS: 120

Program Description

Women’s and Gender Studies is a dynamic interdisciplinary field preparing students to be future leaders, scholars, and social justice activists. We are dedicated to studying the social production of gender and women’s experiences in relation to formations of sexuality, race, class, nationality, ability, ageism, and other categories of difference. Scholarship and research in Women’s and Gender Studies emphasize the importance of connecting what students learn in the classroom to political projects and personal experiences.

Our curriculum empowers students to be agents of change in their communities and society. It provides them tools to examine relations of gender in local, national, and global contexts. Our courses situate gender within specific historical and cultural contexts, allowing students to examine how our lives are shaped by social and economic institutions, political movements, and individual experiences. “Putting Theory into Practice” since 1971, we place a strong emphasis on community involvement and activism, and we offer many opportunities for internships and service work credit.

The B.S. in Women’s and Gender Studies prepares students for careers in education, as professors, teachers, or curriculum specialists; counseling, as school counselors, psychological or family therapists; law, health; human services; student services; and public service.

Minimum total units required for the BS: 120; 40 units should be upper division.

Minimum Grade Requirement

A minimum grade of C- is required of courses applied to the major.

**Total Units** 34

1 To help you complete your degree in a timely manner and not take more units than absolutely necessary, there are ways to use single courses to meet more than one requirement (overlap). For further information, please visit the General Education page (p. 1103).

**Note:** There is no way to list all possible overlaps so please consult with a professional advisor. The Academic Advising Center can be visited online (http://www.csus.edu/acad/), by phone (916) 278-1000, or email (advising@csus.edu).

2 Required in Major; also satisfies GE.

**Minor in LGBTQ Studies**

Units required for Minor: 18

### Program Description

The LGBTQ Studies minor provides students with competency in interdisciplinary scholarship related to the study of lesbian, gay, bisexual, transgender, and queer lives and communities as well as to the study of gender and sexual structures. The minor familiarizes students with the theoretical and methodological tools used to study gender and sexuality from a variety of disciplinary perspectives. Students will gain an understanding of how non-normative sexualities and genders have been organized in previous historical moments and in different cultural and national contexts in the present. The minor equips students with awareness of sexual and gender diversity and how sexuality intersects with and informs other categories of identity and practice, such as race, class, ethnicity, age, and disability.

A minor in LGBTQ Studies prepares students for their pursuit of graduate and professional degrees. Given the increasing demand for nuance around issues of diversity in both the public and private sectors of the job market, this minor also positions Sacramento State graduates well for careers in education, social work, counseling, health care, social services, media, law and policy, and nonprofit advocacy.

**Note:** WGS courses that meet the WI Graduation Requirement are displayed with a pencil icon.

2 If not satisfied before entering Sacramento State, it may be satisfied in General Education Area C2 (Humanities). "C- or better required." The alternative methods for satisfying the Foreign Language Proficiency Requirement are described here: https://www.csus.edu/college/arts-letters/world-languages-literatures/foreign-language-proficiency-requirement.html (https://www.csus.edu/college/arts-letters/world-languages-literatures/foreign-language-proficiency-requirement.html)
Minor in Women's and Gender Studies

Units required for the Minor: 21

Program Description

Women's and Gender Studies is a dynamic interdisciplinary field preparing students to be future leaders, scholars, and social justice activists. We are dedicated to studying the social production of gender and women's experiences in relation to formations of sexuality, race, class, nationality, ability, ageism, and other categories of difference. Scholarship and research in Women's and Gender studies emphasize the importance of connecting what students learn in the classroom to political projects and personal experiences.

Our curriculum empowers students to be agents of change in their communities and society. It provides them tools to examine relations of gender in local, national, and global contexts. Our courses situate gender within specific historical and cultural contexts, allowing students to examine how our lives are shaped by social and economic institutions, political movements, and individual experiences. "Putting Theory into Practice" since 1971, we place a strong emphasis on community involvement and activism, and we offer many opportunities for internships and service work credit.

The Minor in Women's and Gender Studies will help students prepare for careers in education, as professors, teachers, or curriculum specialists; counseling, as school counselors, psychological or family therapists; law; health; human services; student services; and public service.

Minimum Grade Requirement

A minimum grade of C- is required of courses applied to the minor.

Total Units 21-22
Office of Academic Affairs

Academic Affairs is the largest administrative unit in the University, encompassing the seven Academic Colleges, the University Library, and the College of Continuing Education.

Our Program Centers include: the Office of Graduate Studies, Research Administration, the Community Engagement Center, the Center for Teaching and Learning, Academic Technology & Creative Services, International Programs & Global Engagement, and the Center for College Readiness. Most important, we ensure quality academic programs for all students and support well qualified faculty to provide excellent teaching and learning.

Programs:

General Education (p. 1103)
General Education Honors (p. 1149)
Peace Corps Prep Certificate (p. 1022)
ROTC (p. 1151)
Special Major/Minor (p. 1155)

General Education

Click here for General Education Requirements prior to Fall 2018. (p. 1132)

Click here for General Education Requirements from Fall 2018 to Spring 2021.

One of the principles on which a modern university rests is the assumption that there is an important difference between learning to make a living and building the foundation for a life. While the first goal is important, the second is fundamental.

In focusing on the students’ development as whole or “educated” people, a university distinguishes itself from a trade school. The goal of a university education is not simply the acquisition and application of knowledge, but the creation of people who firmly grasp the worth of clear thinking and know how to do it; who understand and appreciate the differences between peoples and cultures as well as their similarities; who have a sense of history and social forces; who can express thought clearly and have quantitative ability; who know something about the arts as well as how to enjoy them; who can talk and think intelligently about the physical and life sciences, the humanities, and literature; and, above all, who have the desire and capability for learning. This goal is why a university degree is so highly valued by individuals, employers, and the community at large.

The Sacramento State General Education Program is designed to educate in this holistic sense. Thus, it is not simply a series of courses to complete or hoops for students to jump through as they complete the courses in their major. Rather, general education lies at the heart of what a university education is all about.

Therefore students should carefully select courses and actively seek subject areas that are new and may challenge their world views or cherished assumptions and offer new experiences, such as inquiry-based or community-based learning. In short, students should not take the easy way out. This is their opportunity to lay the foundation for the rest of their lives, and to define themselves as educated members of the human community. Their time at the university is precious and the General Education Program has been designed to help them begin the process of becoming truly educated people. In deciding to pursue a university degree, they have chosen well and should make the best use of the opportunities open to them.

Objectives

Upon completion of the General Education Program requirements, students will be expected to:

- read, write, and understand relatively complex and sophisticated English prose;
- construct a non-fallacious verbal argument, recognize fallacious arguments, and follow the verbal arguments of others;
- find and use common information resources, engage in specialized library research, use computers, and seek out appropriate expert opinion and advice;
- use mathematical ideas to accomplish a variety of tasks;
- gain a general understanding of current theory, concepts, knowledge, and scientific methods pertaining to the nature of the physical universe, ecosystems, and life on this planet;
- develop an acquaintance and understanding of cultures and major dynamic social institutions which affect one’s life,
- possess a significant and useful understanding of peoples from a diversity of cultures and backgrounds, including women and ethnic and other minority groups who have been the objects of prejudice and adverse discrimination within our society.

In addition to these basic skills, courses in the sciences, arts, humanities, and social sciences have been selected to help students attain the university’s baccalaureate learning goals and to satisfy particular GE Area Learning Outcomes. The Baccalaureate Learning Goals include:

- Competence in the Disciplines: The ability to demonstrate the competencies and values listed below in at least one major field of study and to demonstrate informed understandings of other fields, drawing on the knowledge and skills of disciplines outside the major.
- Knowledge of Human Cultures and the Physical and Natural World through study in the sciences and mathematics, social sciences, humanities, histories, languages, and the arts. Focused by engagement with big questions, contemporary and enduring.
- Intellectual and Practical Skills, Including: inquiry and analysis, critical, philosophical, and creative thinking, written and oral communication, quantitative literacy, information literacy, teamwork and problem solving, practiced extensively across the curriculum, in the context of progressively more challenging problems, projects, and standards for performance.
- Personal and Social Responsibility, Including: civic knowledge and engagement—local and global, intercultural knowledge and competence, ethical reasoning and action, foundations and skills for lifelong learning anchored through active involvement with diverse communities and real-world challenges.
General Education

- **Integrative Learning**, including: synthesis and advanced accomplishment across general and specialized studies.

1. Understanding of and respect for those who are different from oneself and the ability to work collaboratively with those who come from diverse cultural backgrounds.

2. Interdisciplinary learning, learning communities, capstone or senior studies in the General Education program and/or in the major connecting learning goals with the content and practices of the educational programs including GE, departmental majors, the co-curriculum and assessments.

Sacramento State General Education courses are designed, selected, and approved by the faculty to meet these program objectives. Students will benefit from consultation with the Academic Advising Center or advisors in their major departments in planning their General Education course choices. Students may search the online Schedule of Classes by Area or other specification(s) for currently available GE courses.

### Course Requirements

The following courses have been approved to meet the 48-unit General Education pattern required of Sacramento State students. At least 9 units must be in upper division GE courses (100-199) from Areas B, C, and D taken after you complete 45 units of coursework. Enrollment in upper division General Education courses is limited to students who have completed Areas A1, A2, A3. Upper division General Education courses must be completed in residence with the CSU.

**General Education/Graduation Requirements Checklist**

A checklist is available to download here [https://www.csus.edu/academic-affairs/curriculum-workflow/_internal/_documents/ge_worksheet_sac-state.pdf](https://www.csus.edu/academic-affairs/curriculum-workflow/_internal/_documents/ge_worksheet_sac-state.pdf).

Students must choose their General Education classes from the Areas and classes listed below.

### Area A: Basic Subjects (p. 1104) (9 units)

These requirements must be completed before enrollment in upper division GE courses. A grade of "C-" or better is required in all courses taken in Area A.

Area D: The Individual and Society (p. 1109) (9 Units)

A minimum of two disciplines (e.g. ANTH, ECON, ETHN, HIST, POLS, RPTA, etc.) must be taken in Area D. Up to three units of the The American Institutions graduation requirement may be satisfied in Area D in either US History or US Constitution and California government (see American Institutions Graduation Requirement).

Total Units 3

Additional Graduation Requirements (p. 1111)

In addition to the 48-unit General Education Area Requirements, undergraduate students must also complete the following Graduation Requirements. Some courses that satisfy the GE Area Requirements may also satisfy Graduation Requirements.

S (p. 1111) Second Semester Composition Requirement

Second semester composition (ENGL 20, ENGL 20M or an approved equivalent) must be completed with a grade of C- or better.

Foreign Language Graduation Requirement (p. 1111)

Foreign language graduation requirement may be met by successfully completing appropriate coursework or passing proficiency exams. For details on challenge exams, please visit the Department of World Languages and Literatures website.
With a grade of "C-" or better, the following second semester or equivalent college-level language courses may satisfy both GE Area C2 units and the Foreign Language Requirement:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>

</tr>
</tbody>
</table>

**American Institutions (p. 1112)**

This requirement may be fulfilled by completing one course in US History and one course in the US Constitution and California Government from the following list. Up to three units of the American Institutions Requirement may also satisfy GE Area units requirements. In addition, students have the option of taking challenge exams in US History, and/or US Constitution and California State and Local Government. For details on challenge exams, please see the Departments of History or Political Science.

**Writing Intensive (p. 1113) and Graduate Writing Intensive (3-unit Supervenient Requirement)**

One Writing Intensive course, i.e., a course with comprehensive writing assignments (minimum 5,000 words) is required. Some Writing Intensive courses also satisfy a GE Area Requirement, a major requirement, or both. Prerequisite: Completion of GE Areas A2, A3, second semester composition (ENGL 20), junior standing, and either ENGL 109M/ ENGL 109W or completion of the WPJ. Successful completion of the writing intensive course with a grade of C- or better certifies the Graduation Writing Assessment Requirement (GWAR).

**General Writing Intensive Courses**

**General Education Policies**

- All upper division GE courses require at least second semester sophomore standing (45 units) and completion of all GE Area A courses as prerequisites.
- At least 3 upper division GE units must be completed each in Area B, Area C, and Area D, for a total of at least 9 upper division GE units.
- Each course taken to satisfy Area A Basic Subjects, Area B4 Quantitative Reasoning, Second Semester Composition, Foreign Language, and Writing Intensive Requirements must be completed with a grade of “C-” or higher.
- A 2.0 cumulative GPA is required in General Education.

**Overlap Between General Education and Majors/Minors (Fall 1992 - Spring 2013)**

General Education requirements include five areas (A-E) in which you must take courses (area requirements), a nine-unit upper division requirement, a Race and Ethnicity requirement, and a Writing Intensive requirement. The overlap possibilities among these four aspects of General Education are outlined below. Students needing help applying these overlap policies are encouraged to seek advising through their College Advising Centers or through an advisor in the Academic Advising Center, Lassen Hall 1012.

1. A maximum of nine units of coursework from your major department may also be applied to the General Education requirements.
2. The Race and Ethnicity requirement can be met with an upper or lower division course from a student’s major or major department. Example: A Social Work major can use SWRK 102 to meet the Race and Ethnicity requirement.
3. The Writing Intensive requirement can be met with a course from the major or major department in specified majors, but not in all majors.
4. There is no restriction on the overlap of courses between GE and minor requirements*

**Note:** For Business majors, substitute “College of Business” for “major department.” For Social Science majors, substitute “History” for “major department.”

**Overlap Between General Education and Majors/Minors (Fall 2013 and Spring 2021)**

General Education requirements include five areas (A-E) in which you must take courses (area requirements), a nine-unit upper division requirement, a Race and Ethnicity requirement, and a Writing Intensive requirement. The overlap possibilities among these four aspects of General Education are outlined below. Students needing help applying these overlap policies are encouraged to seek advising through their College Advising Centers or through an advisor in the Academic Advising Center, Lassen Hall 1012.

1. There is no university restriction on the overlap of courses between GE and coursework approved for GE from your major department.
2. The Race and Ethnicity requirement can be met with an upper or lower division course from a student’s major or major department. Example: A Social Work major can use SWRK 102 to meet the Race and Ethnicity requirement.
3. The Writing Intensive requirement can be met with a course from the major or major department in specified majors, but not in all majors.
4. There is no restriction on the overlap of courses between GE and minor requirements

**Transfer Students**
Transfer students who have completed lower division General Education requirements at a California Community College, including those certified under the Intersegmental General Education Transfer Core Curriculum (IGETC), and/or those in receipt of an Associate Degree for Transfer (ADT), are required to complete 9 units of upper division GE at Sacramento State (or another CSU campus), meet the foreign language proficiency graduation requirement, meet the state “code” requirements in U.S. History, American and California Government, and the writing intensive requirement. These 9 units may or may not include the writing intensive requirement, depending on the policy of the student’s major department. Students who have not completed an approved course for the "Race and Ethnicity in American Society" category at a community college must take a course in this category at Sacramento State. In addition, all transfer students, except those fully certified as having completed the IGETC core curriculum, must complete the required second semester writing course or an approved course at a community college.

Note: Foreign Language Proficiency Requirement - If not satisfied before entering Sacramento State, it may be satisfied in General Education Area C2 (Humanities). “C- or higher required.” The alternative methods for satisfying the Foreign Language Proficiency Requirement are described here (http://www.csus.edu/wll/for-students/graduation-requirement.html/).

For more information about IGETC requirements and/or Associate Degrees for Transfer, contact your community college counselor.

**Certificate in Global and Multicultural Perspectives**

Units required for Certificate: 12

**Program Description**
Total Units: 12 units minimum—9 of which must be upper division.
All courses in Section A and B are also approved for General Education.

All courses and petitions for substitution will be approved by the Office of Undergraduate Studies and will reflect the criteria and learning outcomes of the Certificate Program.

**Program Requirements**

**General Education (Fall 2018 to Spring 2021)**

Click here for General Education Requirements prior to Fall 2018. (p. 1132)

One of the principles on which a modern university rests is the assumption that there is an important difference between learning to make a living and building the foundation for a life. While the first goal is important, the second is fundamental.

In focusing on the students’ development as whole or “educated” people, a university distinguishes itself from a trade school. The goal of a university education is not simply the acquisition and application of knowledge, but the creation of people who firmly grasp the worth of clear thinking and know how to do it; who understand and appreciate the differences between peoples and cultures as well as their similarities; who have a sense of history and social forces; who can express thought clearly and have quantitative ability; who know something about the arts as well as how to enjoy them; who can talk and think intelligently about the physical and life sciences, the humanities, and literature; and, above all, who have the desire and capability for learning. This goal is why a university degree is so highly valued by individuals, employers, and the community at large.

The Sacramento State General Education Program is designed to educate in this holistic sense. Thus, it is not simply a series of courses to complete or hoops for students to jump through as they complete the courses in their major. Rather, general education lies at the heart of what a university education is all about.

Therefore students should carefully select courses and actively seek subject areas that are new and may challenge their world views or...
cherished assumptions and offer new experiences, such as inquiry-based or community-based learning. In short, students should not take the easy way out. This is their opportunity to lay the foundation for the rest of their lives, and to define themselves as educated members of the human community. Their time at the university is precious and the General Education Program has been designed to help them begin the process of becoming truly educated people. In deciding to pursue a university degree, they have chosen well and should make the best use of the opportunities open to them.

**Objectives**

Upon completion of the General Education Program requirements, students will be expected to:

- read, write, and understand relatively complex and sophisticated English prose;
- construct a non-fallacious verbal argument, recognize fallacious arguments, and follow the verbal arguments of others;
- find and use common information resources, engage in specialized library research, use computers, and seek out appropriate expert opinion and advice;
- use mathematical ideas to accomplish a variety of tasks;
- gain a general understanding of current theory, concepts, knowledge, and scientific methods pertaining to the nature of the physical universe, ecosystems, and life on this planet;
- develop an acquaintance and understanding of cultures and major dynamic social institutions which affect one's life,
- possess a significant and useful understanding of peoples from a diversity of cultures and backgrounds, including women and ethnic and other minority groups who have been the objects of prejudice and adverse discrimination within our society.

In addition to these basic skills, courses in the sciences, arts, humanities, and social sciences have been selected to help students attain the university’s baccalaureate learning goals and to satisfy particular GE Area Learning Outcomes. The Baccalaureate Learning Goals include:

- **Competence in the Disciplines:** The ability to demonstrate the competencies and values listed below in at least one major field of study and to demonstrate informed understandings of other fields, drawing on the knowledge and skills of disciplines outside the major.
- **Knowledge of Human Cultures and the Physical and Natural World** through study in the sciences and mathematics, social sciences, humanities, histories, languages, and the arts. Focused by engagement with big questions, contemporary and enduring.
- **Intellectual and Practical Skills, Including:** inquiry and analysis, critical, philosophical, and creative thinking, written and oral communication, quantitative literacy, information literacy, teamwork and problem solving, practiced extensively across the curriculum, in the context of progressively more challenging problems, projects, and standards for performance.
- **Personal and Social Responsibility, Including:** civic knowledge and engagement—local and global, intercultural knowledge and competence¹, ethical reasoning and action, foundations and skills for lifelong learning anchored through active involvement with diverse communities and real-world challenges.
- **Integrative Learning**, Including: synthesis and advanced accomplishment across general and specialized studies.

1 Understanding of and respect for those who are different from oneself and the ability to work collaboratively with those who come from diverse cultural backgrounds.

2 Interdisciplinary learning, learning communities, capstone or senior studies in the General Education program and/or in the major connecting learning goals with the content and practices of the educational programs including GE, departmental majors, the co-curriculum and assessments.

Sacramento State General Education courses are designed, selected, and approved by the faculty to meet these program objectives. Students will benefit from consultation with the Academic Advising Center or advisors in their major departments in planning their General Education course choices. Students may search the online Schedule of Classes by Area or other specification(s) for currently available GE courses.

**Course Requirements**

The following courses have been approved to meet the 48-unit General Education pattern required of Sacramento State students. At least 9 units **must be in upper division GE courses (100-199) from Areas B, C, and D** taken after you complete 45 units of coursework. Enrollment in upper division GE courses is limited to students who have completed Areas A1, A2, A3. At least nine units of GE must be taken in residence (i.e., at Sacramento State). In addition, a second semester composition course and demonstration of proficiency in a foreign language are required for graduation.

## Area D: The Individual and Society

(p. 1122) (12 Units)

Minimum of three disciplines (e.g. ANTH, ECON, ETHN, FACS, GOVT, HIST, RPTA, etc.) must be taken in Area D. The American Institutions graduation requirement may be satisfied in Area D with 3 units of US history courses and 3 units of US Constitution and CA government courses (see Graduation Requirements: American Institutions).

Additional Graduation Requirements (p. 1129)
The 48-unit General Education requirement does not include the following two graduation requirements:

- Second semester composition (ENGL 20, ENGL 20M or an approved equivalent) must be completed with a grade of C- or better.
- Foreign language graduation requirement may be met by successfully completing appropriate coursework or passing proficiency exams. With a grade of "C-" or better, the following second semester or equivalent college-level language courses may satisfy both GE Area C2 units and the Foreign Language Requirement:

<table>
<thead>
<tr>
<th>Code</th>

</tr>
</tbody>
</table>

American Institutions (p. 1129)
This requirement may be fulfilled by completing one Government and one US History course from the following list. The courses below also satisfy Area D units. In addition, students have the option of taking challenges in US History, US Constitution and California State and Local Government. For details on challenges exam, please visit the Department of World Languages and Literatures website (https://www.csus.edu/college/artslanguages/world-languages-literatures/foreign-language-requirement.html).

Writing Intensive (p. 1130) (3-unit Supervenient Requirement)

One Writing Intensive course, i.e., a course with comprehensive writing assignments (minimum 5,000 words) is required. This requirement may be met either with a specifically marked GE courses or, in certain majors, with a course required for the major. (Writing Intensive courses taken to meet major requirements do not apply to the nine-unit upper division requirement in GE.) Prerequisite: Completion of GE Areas A2, A3, second semester composition (ENGL 20), junior standing, and ENGL 109M/ ENGL 109W. Students who take the WPJ instead of initially taking ENGL 109M/ ENGL 109W must score 70, 71, or 80. Students with a lower WPJ score will have to complete other prerequisites determined by their score. Successful completion of the writing intensive course with a grade of C- or better certifies the Graduation Writing Assessment Requirement (GWAR).

General Education Policies

- All upper division GE courses require at least second semester sophomore standing (45 units) and completion of all GE Area A courses as prerequisites.

- At least 9 units must be chosen from upper division GE courses (100-199) and at least 9 units must be taken in residence at Sacramento State (these units may overlap).

- Each course taken to satisfy the Area A Basic Subjects and Area B4 Quantitative Reasoning must be completed with a grade of "C-" or higher.

- A 2.0 cumulative GPA is required in General Education.

Overlap Between General Education and Majors/Minors

(Fall 1992 - Spring 2013)

General Education requirements include five areas (A-E) in which you must take courses (area requirements), a nine-unit upper division requirement, a Race and Ethnicity requirement, and a Writing Intensive requirement. The overlap possibilities among these four aspects of General Education are outlined below. Students needing help applying these overlap policies are encouraged to seek advising through their College Advising Centers or through an advisor in the Academic Advising Center, Lassen Hall 1012.

1. A maximum of nine units of coursework from your major department may also be applied to the General Education requirements.

2. The Race and Ethnicity requirement can be met with an upper or lower division course from a student’s major or major department. Example: A Social Work major can use SWRK 102 to meet the Race and Ethnicity requirement.

3. The Writing Intensive requirement can be met with a course from the major or major department in specified majors, but not in all majors.

4. There is no restriction on the overlap of courses between GE and minor requirements*

Note: For Business Administration majors, substitute “College of Business” for “major department.” For Social Science majors, substitute “History” for “major department.”

Overlap Between General Education and Majors/Minors (Fall 2013 and Later)

General Education requirements include five areas (A-E) in which you must take courses (area requirements), a nine-unit upper division requirement, a Race and Ethnicity requirement, and a Writing Intensive requirement. The overlap possibilities among these four aspects of General Education are outlined below. Students needing help applying these overlap policies are encouraged to seek advising through their College Advising Centers or through an advisor in the Academic Advising Center, Lassen Hall 1012.

1. There is no university restriction on the overlap of courses between GE and coursework approved for GE from your major department.

2. The Race and Ethnicity requirement can be met with an upper or lower division course from a student’s major or major department. Example: A Social Work major can use SWRK 102 to meet the Race and Ethnicity requirement.

3. The Writing Intensive requirement can be met with a course from the major or major department in specified majors, but not in all majors.

4. There is no restriction on the overlap of courses between GE and minor requirements.

Transfer Students

Transfer students who have completed lower division General Education requirements at a California Community College, including those certified under the Intersegmental General Education Transfer Core
Curriculum (IGETC), and/or those in receipt of an Associate Degree for Transfer (ADT), are required to complete 9 units of upper division GE at Sacramento State, meet the foreign language proficiency graduation requirement, meet the state “code” requirements in U.S. History, American and California Government, and the writing intensive requirement. These 9 units may or may not include the writing intensive requirement, depending on the policy of the student’s major department. Students who have not completed an approved course for the “Race and Ethnicity in American Society” category at a community college must take a course in this category at Sacramento State. In addition, all transfer students, except those fully certified as having completed the IGETC core curriculum, must complete the required second semester writing course or an approved course at a community college.

Note: Foreign Language Proficiency Requirement - If not satisfied before entering Sacramento State, it may be satisfied in General Education Area C2 (Humanities). "C- or higher required." The alternative methods for satisfying the Foreign Language Proficiency Requirement are described here (http://www.csus.edu/wll/for-students/graduation-requirement.html/).

For more information about IGETC requirements and/or Associate Degrees for Transfer, contact your community college counselor.

General Education (Prior to Fall 2018)

One of the principles on which a modern university rests is the assumption that there is an important difference between learning to make a living and building the foundation for a life. While the first goal is important, the second is fundamental.

In focusing on the students’ development as whole or “educated” people, a university distinguishes itself from a trade school. The goal of a university education is not simply the acquisition and application of knowledge, but the creation of people who firmly grasp the worth of clear thinking and know how to do it; who understand and appreciate the differences between peoples and cultures as well as their similarities; who have a sense of history and social forces; who can express thought clearly and have quantitative ability; who know something about the arts as well as how to enjoy them; who can talk and think intelligently about the physical and life sciences, the humanities, and literature; and, above all, who have the desire and capability for learning. This goal is why a university degree is so highly valued by individuals, employers, and the community at large.

The Sacramento State General Education Program is designed to educate in this holistic sense. Thus, it is not simply a series of courses to complete or hoops for students to jump through as they complete the courses in their major. Rather, general education lies at the heart of what a university education is all about.

Therefore students should carefully select courses and actively seek subject areas that are new and may challenge their world views or cherished assumptions and offer new experiences, such as inquiry-based or community-based learning. In short, students should not take the easy way out. This is their opportunity to lay the foundation for the rest of their lives, and to define themselves as educated members of the human community. Their time at the university is precious and the General Education Program has been designed to help them begin the process of becoming truly educated people. In deciding to pursue a university degree, they have chosen well and should make the best use of the opportunities open to them.

Objectives

Upon completion of the General Education Program requirements, students will be expected to:

- read, write, and understand relatively complex and sophisticated English prose;
- construct a non-fallacious verbal argument, recognize fallacious arguments, and follow the verbal arguments of others;
- find and use common information resources, engage in specialized library research, use computers, and seek out appropriate expert opinion and advice;
- use mathematical ideas to accomplish a variety of tasks;
- gain a general understanding of current theory, concepts, knowledge, and scientific methods pertaining to the nature of the physical universe, ecosystems, and life on this planet;
- develop an acquaintance and understanding of cultures and major dynamic social institutions which affect one’s life;
- possess a significant and useful understanding of peoples from a diversity of cultures and backgrounds, including women and ethnic and other minority groups who have been the objects of prejudice and adverse discrimination within our society.

In addition to these basic skills, courses in the sciences, arts, humanities, and social sciences have been selected to help students attain the university’s baccalaureate learning goals and to satisfy particular GE Area Learning Outcomes. The Baccalaureate Learning Goals include:

- Competence in the Disciplines: The ability to demonstrate the competencies and values listed below in at least one major field of study and to demonstrate informed understandings of other fields, drawing on the knowledge and skills of disciplines outside the major.
- Knowledge of Human Cultures and the Physical and Natural World through study in the sciences and mathematics, social sciences, humanities, histories, languages, and the arts. Focused by engagement with big questions, contemporary and enduring.
- Intellectual and Practical Skills, Including: inquiry and analysis, critical, philosophical, and creative thinking, written and oral communication, quantitative literacy, information literacy, teamwork and problem solving, practiced extensively across the curriculum, in the context of progressively more challenging problems, projects, and standards for performance.
- Personal and Social Responsibility, Including: civic knowledge and engagement—local and global, intercultural knowledge and competence, ethical reasoning and action, foundations and skills for lifelong learning anchored through active involvement with diverse communities and real-world challenges.
- Integrative Learning, Including: synthesis and advanced accomplishment across general and specialized studies.

1 Understanding of and respect for those who are different from oneself and the ability to work collaboratively with those who come from diverse cultural backgrounds.
Interdisciplinary learning, learning communities, capstone or senior studies in the General Education program and/or in the major connecting learning goals with the content and practices of the educational programs including GE, departmental majors, the co-curriculum and assessments.

Sacramento State General Education courses are designed, selected, and approved by the faculty to meet these program objectives. Students will benefit from consultation with the Academic Advising Center or advisors in their major departments in planning their General Education course choices. Students may search the online Schedule of Classes by Area or other specification(s) for currently available GE courses.

**Course Requirements**

The following courses have been approved to meet the 48-unit General Education pattern required of Sacramento State students. At least 9 units must be in upper division GE courses (100-199) taken after you complete 60 units of coursework. Enrollment in upper division GE courses is limited to students who have completed Areas A1, A2, A3, and have taken at least 45 units (not limited to GE classes). At least nine units of GE must be taken in residence (i.e., at Sacramento State). In addition, a second semester composition course and demonstration of proficiency in a foreign language are required for graduation.

To help you complete your degree in a timely manner and not take more units than absolutely necessary, there are ways to use single courses to meet more than one requirement (overlap). There is no way to list all possible overlaps so please complete this checklist with a professional advisor. We can help you identify the best course of action. Academic Advising Center can be visited csus.edu/acad or please call: (916) 278-1000 or email at advising@csus.edu.

Students must choose their General Education classes from the Areas and classes listed below:
<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>

**Total Units**

12

1. Completion of the ELM (unless exempt) is a prerequisite for courses in this Area. In addition, passage of course-based diagnostic exams is required. A grade of "C-" or better is required in all courses taken in Area B4.

2. Choose a course from this area or another from B1, B2, or B4 to total 12 units in Area B.

**Area C: The Arts and Humanities (p. 12 Units)**

At least 3 units must be taken from Areas C1 (ARTS) and C2 (HUMANITIES).

Area D: The Individual and Society

(p. ) (12 Units)

Minimum of three disciplines (e.g. ANTH, ECON, ETHN, FACS, GOVT, HIST, RPTA, etc.) must be taken in Area D. The American Institutions graduation requirement may be satisfied in Area D with 3 units of US history courses and 3 units of US Constitution and CA government courses (see Graduation Requirements: American Institutions).

The 48-unit General Education requirement does not include the following two graduation requirements:

- Second semester composition (ENGL 20, ENGL 20M or an approved equivalent) must be completed with a grade of C- or better.
- Foreign language graduation requirement may be met by successfully completing appropriate coursework or passing proficiency exams. With a grade of "C-" or better, the following second semester or equivalent college-level language courses may satisfy both GE Area C2 units and the Foreign Language Requirement:

<table>
<thead>
<tr>
<th>Code</th>

</tr>
<tr>
<td>PUNJ 1B</td>
<td>Elementary Punjabi</td>
</tr>
<tr>
<td>RUSS 1B</td>
<td>Elementary Russian</td>
</tr>
<tr>
<td>SPAN 1B</td>
<td>Elementary Spanish</td>
</tr>
</tbody>
</table>

American Institutions (p. 44)
This requirement may be fulfilled by completing one Government and one US History course from the following list. The courses below also satisfy Area D units. In addition, students have the option of taking challenges in US History, US Constitution and California State and Local Government. For details on challenges exam, see http://www.csus.edu/CCR/Challenge %20Exams/.

**Writing Intensive (p. 3) (3-unit Supervenient Requirement)**

One Writing Intensive course, i.e., a course with comprehensive writing assignments (minimum 5,000 words) is required. This requirement may be met either with a specifically marked GE courses or, in certain majors, with a course required for the major. (Writing Intensive courses taken to meet major requirements do not apply to the nine-unit upper division requirement in GE.) Prerequisite: Completion of GE Areas A2, A3, second semester composition (ENGL 20), junior standing, and ENGL 109M/ENGL 109W. Students who take the WPJ instead of initially taking ENGL 109M/ENGL 109W must score 70, 71, or 80. Students with a lower WPJ score will have to complete other prerequisites determined by their score. Successful completion of the writing intensive course with a grade of C- or better certifies the Graduation Writing Assessment Requirement (GWAR).

### General Education Policies

- All upper division GE courses require at least second semester sophomore standing (45 units) and completion of all GE Area A courses as prerequisites.
  
- At least 9 units must be chosen from upper division GE courses (100-199) and at least 9 units must be taken in residence at Sacramento State (these units may overlap).

- Each course taken to satisfy the Area A Basic Subjects and Area B4 Quantitative Reasoning must be completed with a grade of "C-" or higher.

- A 2.0 cumulative GPA is required in General Education.

#### Overlap Between General Education and Majors/Minors (Fall 1992 - Spring 2013)

General Education requirements include five areas (A-E) in which you must take courses (area requirements), a nine-unit upper division requirement, a Race and Ethnicity requirement, and a Writing Intensive requirement. The overlap possibilities among these four aspects of General Education are outlined below. Students needing help applying these overlap policies are encouraged to see an advisor in the Academic Advising Center, Lassen Hall 1012.

1. A maximum of nine units of coursework from your major department may also be applied to the General Education requirements.

2. The Race and Ethnicity requirement can be met with an upper or lower division course from a student’s major or major department. Example: A Social Work major can use SWRK 102 to meet the Race and Ethnicity requirement.

3. The Writing Intensive requirement can be met with a course from the major or major department in specified majors, but not in all majors.

4. There is no restriction on the overlap of courses between GE and minor requirements*

**Note:** For Business Administration majors, substitute “College of Business” for “major department.” For Social Science majors, substitute “History” for “major department.”

#### Overlap Between General Education and Majors/Minors (Fall 2013 and Later)

General Education requirements include five areas (A-E) in which you must take courses (area requirements), a nine-unit upper division requirement, a Race and Ethnicity requirement, and a Writing Intensive requirement. The overlap possibilities among these four aspects of General Education are outlined below. Students needing help applying these overlap policies are encouraged to see an advisor in the Academic Advising Center, Lassen Hall 1012.

1. There is no university restriction on the overlap of courses between GE and coursework approved for GE from your major department.

2. The Race and Ethnicity requirement can be met with an upper or lower division course from a student’s major or major department. Example: A Social Work major can use SWRK 102 to meet the Race and Ethnicity requirement.

3. The Writing Intensive requirement can be met with a course from the major or major department in specified majors, but not in all majors.

4. There is no restriction on the overlap of courses between GE and minor requirements.

Transfer Students

Transfer students who have completed lower division General Education requirements at a California Community College, including those certified under the Intersegmental General Education Transfer Core Curriculum (IGETC), and/or those in receipt of an Associate Degree for Transfer (ADT), are required to complete 9 units of upper division GE at
Sacramento State, meet the foreign language proficiency graduation requirement, meet the state “code” requirements in U.S. History, American and California Government, and the writing intensive requirement. These 9 units may or may not include the writing intensive requirement, depending on the policy of the student’s major department. Students who have not completed an approved course for the “Race and Ethnicity in American Society” category at a community college must take a course in this category at Sacramento State. In addition, all transfer students, except those fully certified as having completed the IGETC core curriculum, must complete the required second semester writing course or an approved course at a community college.

Note: Foreign Language Proficiency Requirement - If not satisfied before entering Sacramento State, it may be satisfied in General Education Area C2 (Humanities). “C- or higher required.” The alternative methods for satisfying the Foreign Language Proficiency Requirement are described here: http://www.csus.edu/will/for-students/graduation-requirement.html

For more information about IGETC requirements and/or Associate Degrees for Transfer, contact your community college counselor.

General Education Honors Program
Program Description
“Education is not preparation for life; education is life itself.” – John Dewey

The General Education Honors Program is a course of study to provide academic challenges and enhanced learning for highly motivated students at Sacramento State. Honors students take most of these courses in their freshman and sophomore years. There is an additional nine-unit upper division Honors sequence that students take to earn an Honors certificate upon graduation. The Honors courses fulfill almost all Sacramento State General Education requirements.

The guiding principles of the Honors Programs are active learning, global subject matter, study of primary texts, and an interdisciplinary orientation. Specially selected faculty provide challenging and stimulating learning experiences in small class settings. The cornerstone experience of the freshmen and sophomore years is a three semester Honors seminar, in which students will read some of the great books of the civilizations of the world and discuss some of the issues raised by these authors.

Honors students have access to a lounge and central administrative office, where they can relax, study, meet with advisors, and talk with one another. The program is open to qualified entering freshmen; all others interested should contact the Honors Director.

For further information and application instructions, visit the Honors Web site at www.csus.edu/honorsprogram (http://www.csus.edu/honorsprogram/).

Minor in Honors Global Engagement and Leadership

HONR 102. The Public Good Through the Visual and Performing Arts. 3 Units
Prerequisite(s): Upper division status in Honors Program; GWAR certification before Fall 09; or WPJ score of 80+; or 3-unit placement in ENGL 109M or ENGL 109W; or 4-unit placement in ENGL 109M or ENGL 109W and co-enrollment in ENGL 109X; or WPJ score 70 or 71 and co-enrollment in ENGL 109X.
General Education Area/Graduation Requirement: Writing Intensive Graduation Requirement (WI)
Term Typically Offered: Fall, Spring
This course explores the role of the visual and performing arts as a catalyzing and infinitely variable means of pursuing the public good. Students will engage with the artistic process as well as learn how works of art have successfully challenged ideological conventions and helped change social and political systems. Strategies of making art will be examined in the form of specific visual and performativity methodologies, the context of the artist, and the public perception of various art forms.

HONR 103. Civic Engagement, Service Learning: Pursuing the Public Good. 3 Units
Prerequisite(s): Must be admitted to Honors Program
Term Typically Offered: Fall, Spring
Students to be an active participant in his/her own learning process through a service learning experience and participation in a corresponding seminar. Students are offered a reciprocal opportunity to acquire knowledge and develop skills while providing service and assistance to the community. Students will have the opportunity to assess the circumstances of an organization and provide feedback on their situation. The student will evaluate and assess his/her service learning from three perspectives: the physical universe and its life forms, social issues and social science research, and the arts.
Note: An international experience can be substituted for a local service learning experience. See Honors Program Director for more information.

HONR 102. Honors One World Seminar. 3 Units
Prerequisite(s): Open to students in the Honors program and permission of the program director.
Seminar dedicated to exploring the One World theme for the university. Topic changes annually.

HONR 150. Leadership Seminar. 3 Units
Prerequisite(s): Open only to Honors students.
Term Typically Offered: Fall, Spring
Seminar dedicated to exploring the principles of effective leadership.

HONR 196. Honors Senior Thesis. 3 Units
Prerequisite(s): Open only to students enrolled in the GE Honors program with permission of the program director.
Term Typically Offered: Fall, Spring
Honors research seminar in which students will complete a research paper in the discipline of their choice based on original research. Recommended for the student’s final semester of study.

HONR 199. Special Problems. 1 - 3 Units
Term Typically Offered: Fall, Spring
Open to students enrolled in the General Education Honors Program. Individual projects and directed reading for students who are competent to assume independent work. Requires approval of the Honors Program Director and Honors faculty member under whom the independent work is to be conducted.

Minor in Honors Global Engagement and Leadership

Program Description
The Honors minor in Global Engagement and Leadership builds upon the existing core upper division courses of the General Education Honors Program (Hons 101, 102, 103) and is dedicated to interdisciplinary inquiry. The minor provides the ideal avenue for students to hone their intellectual skills and apply their education in the real world. Building upon the campus initiative to encourage global education the coursework invites students to explore ideas beyond the boundaries of their majors and to engage in a scholarly conversation with the broad university community and community at large. Students who complete the minor should truly be life-long learners who view themselves and engage as global citizens.

Admission Requirements
Students must be admitted to the General Education Honors Program to participate in the minor.

Minimum GPA Requirement
To be admitted to the GE Honors Program incoming freshmen must have a minimum H.S. GPA of 3.5 or higher, 27 on the ACT or 1180 on the SAT. Current students and transfer students may apply to the Honors Program with a cumulative college GPA of 3.5 or higher. Once accepted into the minor students must maintain a cumulative GPA of 3.0 or higher.

Additional requirements:

Students must complete a study abroad experience to complete the minor. A credit-bearing study abroad experience may be used to waive up to 3 courses depending on length and scope of trip, and required coursework.

Presentation of an honors thesis, creative project, or portfolio completed during the student's senior year. The thesis can be completed within the student's major.

GE Honors Certificate

Units required for Certificate: 42

Program Description

The General Education Honors Program is a course of study to provide academic challenges and enhanced learning for highly motivated students at Sacramento State. Honors students take most of these courses in their first two years. An additional nine-unit upper division Honors sequence is completed to earn an Honors certificate upon graduation. The Honors courses fulfill almost all Sacramento State General Education requirements.

Requirements

Honors students take forty-two (42) units of Honors courses (33 lower division and 9 upper division). Limited exceptions are permitted with permission of the Director.

In their first two years, Honors students take approximately three Honors courses (9 units) per semester, filling out their schedules with other General Education courses or courses required in their pre-major. Honors students must take at least 12 units overall per semester.

The core of the curriculum will be a three-semester Honors seminar in which students read some of the great books of world civilizations, consider some of the big issues raised by world thinkers and writers, and improve their skills in critical thinking and writing:

</tr>
<tr>
<td>HONR 3</td>
<td>Great Books and World Civilization II</td>
<td>3</td>
</tr>
</tbody>
</table>

The Honors courses fulfill almost all Sacramento State General Education requirements for graduation. GE courses that students take in addition to their Honors courses are: ENGL 5, Math, and a physical science course with lab. Students must also fulfill a university graduation requirement in foreign languages.

Honors students are assigned a faculty advisor upon arrival at Sacramento State. They must consult with their advisor at least once a semester before registering for their courses.

The freshman and sophomore courses for the first Honors cohort are approximately as follows:

1 May be completed in any semester in the program.

2 Students choose ANTH 2H, GEOG 2H or ETHN 11H to complete their Area D requirements.

ROTC

Office of Academic Affairs

Program Description

Aerospace Studies/Air Force

The Department of Aerospace Studies offers three and four year academic and training programs towards a commission in the United States Air Force. The Air Force Reserve Officer Training Corps (AFROTC) program is designed to develop officers in the USAF through leadership and academic training. Cadets participate in dialogues, problem solving, and other planning activities. Program goals are achieved through formal
academic classes, physical fitness training, and Leadership Laboratory (a 2-hour weekly military training session). Qualified undergraduate or specially qualified graduate students may apply for AFROTC. The program accepts students from most of the local two- and four-year community colleges and universities. Contact the Department (www.csus.edu/afrotc/ (http://www.csus.edu/afrotc/)) for information on open enrollment procedures for non-Sacramento State students.

Eligibility
As one of the prerequisites for commissioning, each cadet must attend a two-week field training encampment. This training is conducted at an Air Force base during the summer, normally between a cadet’s sophomore and junior years. Field training emphasizes military orientation, academics, physical fitness training, leadership exercises, teamwork, job specialty briefings, military drill and ceremonies.

Upon completion of the AFROTC program and all requirements for a bachelor’s degree, cadets are commissioned as second lieutenants and serve a minimum of four years in the Air Force. Graduate students are eligible for an Air Force commission upon successful completion of the AFROTC program. AFROTC students may compete to be selected and enter pilot, combat systems operator ("CSO"—navigators, weapon system operators, etc.), remotely piloted aircraft pilot, or air battle manager training after commissioning. These career fields, particularly pilot, are highly selective career fields and the competition is intense. Other commissionees go on active duty in specialties consistent with their academic majors, their desires, and the needs of the Air Force. Commissionees may request a delay from entry on active duty to continue their education, or they may apply for Air Force sponsored study to begin immediately upon entering on active duty service.

Scholarships
AFROTC may offer scholarships to qualified students. Less than 20% of AFROTC cadets are on scholarships and they are highly competitive. Scholarships usually provide for tuition, books, lab and incidental fees, and a tax-free monthly stipend ranging from $300-$500.

Except for scholarship recipients, students are under no obligation to the Air Force until they enter their junior cadet year. Upon entering their junior cadet year all cadets (scholarships/non-scholarships) begin receiving a monthly stipend ranging from $300-$500. More detailed program information is available upon request from AFROTC, Sacramento State, Chair, Department of Aerospace Studies, Yosemite Hall Room 122, (916) 278-7315 or at www.csus.edu/afrotc/ (http://www.csus.edu/afrotc/)

Program Description
Military Science/Army
The Military Science Department operates as an extension office of the Military Science Department at the University of California at Davis and offers hands-on training in management and leadership. The program stresses the following leadership dimensions: oral and written communications, oral presentations (formal briefings), initiative, sensitivity, influence, planning and organizing, delegation, administrative control, problem analysis, judgment, decisiveness, physical stamina, mission accomplishment, and fellowship. Also stressed are current events, national and international politics, military affairs, ethics training, and human relations with emphasis on eliminating racial and gender discrimination. Management and leadership are taught using the U.S. Army as a model. Military skills (such as drill and ceremonies, map reading, and squad tactics) are taught to create an environment where students can enter leadership positions and apply theories taught in the classroom. Students learn by doing. The program assists students in all academic fields to prepare for positions of leadership in military or civilian careers.

The Department offers two program tracks:
1. a purely academic track, and
2. a precommissioning track for those desiring a commission in the U.S. Army

The academic track entails no obligation to the military and is open to all students. Students pursuing the academic track do not wear a uniform or otherwise participate in extracurricular activities designed as part of the precommissioning process. Activities for all students include the Ranger club (a club designed for adventure activities such as rappelling, white-water rafting, orienteering, and trailing) and intramural sports teams.

Students who desire a commission in the U.S. Army participate in both the academic portion of the program and in the leadership laboratories and extracurricular activities designed to enhance their leadership and technical skills. They wear uniforms to leadership laboratories and selected classes and become ROTC cadets. Students may be cadets in the lower division courses without incurring a military obligation. Students participating in the upper division precommissioning program incur a military obligation. See below for details. Extracurricular activities for cadets include an intercollegiate sports team (Ranger Challenge), the university color guard, military honor society, a rifle/pistol team, and opportunities to participate in field training exercises.

Military Science Program Options
Students are enrolled in military science under one of two programs.

Four-Year Program
